- ZOOL 3200 - Cell Biology **Credits: (4)**
- ZOOL 3300 - Genetics **Credits: (4)**
- ZOOL 4210 - Advanced Human Physiology
Credits: (4)
- ZOOL 4220 - Endocrinology **Credits: (4)**
- ZOOL 4300 - Research Applications in Genetics
Credits: (4)

Note:

CHEM 2600 - Laboratory Safety recommended.

Students planning to attend graduate school should take
PHYS 2210/2220 and CHEM 4420.

Additional courses should be chosen to support career plans.

Required Cognate Courses (18 credit hours)

Students must complete a minimum of two semesters of calculus and two semesters of physics with laboratory.

MATH 1210 - Calculus I **Credits: (4)** and
MATH 1220 - Calculus II **Credits: (4)**

PHYS 2210 PS - Physics for Scientists and
Engineers I **Credits: (5)** and
PHYS 2220 - Physics for Scientists and
Engineers II **Credits: (5)** or
PHYS 2010 PS - College Physics I **Credits: (5)**
and
PHYS 2020 - College Physics II **Credits: (5)**

Chemistry - ACS Certified (BS)

Program Prerequisite: Students are eligible for admission to the Chemistry (BS) Program upon completion of the requirements for the Chemical Technician (AAS) degree, the requirements of which are a subset of the in Chemistry (BS) requirements.

Minor: Not required

Grade Requirements: Average GPA of 2.00 or better in courses within the major.

Credit Hour Requirements: A total of 120 credit hours are required for graduation. A minimum of 51 credit hours of chemistry and chemistry related course work are required with a further 18 credits in required cognate courses outside of chemistry. A total of 40 upper division credit hours (in courses numbered 3000 and above) are required for all Chemistry majors to fulfill University graduation requirements; 29-34 upper division credit hours are earned while completing the Chemistry program requirements.

Program Code: 6005BS

CIPC: 400501

General Education Requirements

Refer to Degree and General Education Requirements for Bachelor of Science requirements. The following courses required for the Chemistry major also satisfy general education requirements for the physical sciences: CHEM 1210 and PHYS 2210.

Advisement

All Chemistry majors should meet with their assigned faculty advisor at least annually for course and program advisement. Initial advisement is with the Chemistry Department Chair. Call 801-626-6952 for information and to arrange an appointment.

Admission Requirements

Declare your program of study (see Enrollment Services and Information). Students are eligible for admission to the Chemistry (BS) Program upon completion of the requirements for the Chemical Technician (AAS) degree, the requirements of which are a subset of the in Chemistry (BS) requirements.

Chemistry-ACS Certified (BS)

Students applying for the Chemistry Major will first complete the requirements for the Chemical Technician AAS. Courses for the AAS are included here for completeness.

Required Introductory and Foundation Courses (32 credit hours)

The following are introductory and foundation level courses that are required for the Chemistry major.

- CHEM 1210 PS - Principles of Chemistry I
Credits: (5)
- CHEM 1220 - Principles of Chemistry II **Credits: (5)**
- CHEM 2310 - Organic Chemistry I **Credits: (4)**
- CHEM 2315 - Organic Chemistry I Lab **Credits: (1)**
- CHEM 2990 - Chemical Technician Seminar
Credits: (1)
- CHEM 3000 - Quantitative Analysis **Credits: (4)**
- CHEM 3070 - Biochemistry I **Credits: (3)**
- CHEM 3075 - Biochemistry I Lab **Credits: (1)**
- CHEM 3410 - Foundations in Physical Chemistry
Credits: (4)
- CHEM 3610 - Foundations in Inorganic Chemistry **Credits: (4)**

Required In-Depth Courses (3 credit hours)

The following are required courses beyond the foundation.

- CHEM 4800 - Research and Independent Study in Chemistry **Credits: (1-3)**
Minimum of 2 credit hours of CHEM 4800 are required
- CHEM 4990 - Senior Seminar **Credits: (1)**

Elective In-Depth Courses (minimum 16 credit hours)

Students must take a minimum of 16 credit hours of the following courses with a minimum of 12 hours in CHEM including a minimum of 4 hours of CHEM laboratory. One hour of laboratory credit is imbedded in most in-depth CHEM courses. Please consult the course description for more detail.

- CHEM 2320 - Organic Chemistry II **Credits: (4)**
- CHEM 2325 - Organic Chemistry II Lab **Credits: (1)**
- CHEM 3020 - Computer Applications in Chemistry **Credits: (1)**
- CHEM 3050 - Instrumental Analysis **Credits: (4)**
- CHEM 3080 - Biochemistry II **Credits: (3)**
- CHEM 3090 - Biochemical Techniques **Credits: (1)**
- CHEM 4150 - Nuclear Magnetic Resonance Spectroscopy **Credits: (2)**
- CHEM 4250 - Medicinal Chemistry **Credits: (3)**
- CHEM 4420 - Quantum Chemistry **Credits: (4)**
- CHEM 4540 - Spectrometric and Separation Methods **Credits: (4)**
- CHEM 4550 - Geochemistry **Credits: (3)**
- CHEM 4620 - Advanced Inorganic Chemistry **Credits: (4)**
- CHEM 4630 - Materials Chemistry **Credits: (4)**
- CHEM 4700 - Special Topics in Chemistry **Credits: (1-3)**
- MATH 3410 - Probability and Statistics I **Credits: (3)**
- MATH 3710 - Boundary Value Problems **Credits: (3)**
- MATH 4110 - Modern Algebra I **Credits: (3)**
- MICR 4054 - Microbial Physiology **Credits: (4)**
- PHYS 3180 - Thermal Physics **Credits: (3)**
- PHYS 3190 - Applied Optics **Credits: (3)**
- PHYS 3410 - Electronics for Scientists **Credits: (4)**
- PHYS 4200 - The Physics of Materials **Credits: (3)**
- PHYS 4410 - Materials Characterization Laboratory **Credits: (2)**
- PHYS 4610 - Quantum Mechanics **Credits: (3)**
- ZOOL 3200 - Cell Biology **Credits: (4)**

Note:

CHEM 2600 - Laboratory Safety is recommended.

CHEM 2320/2325, CHEM 4420, and CHEM 4620 are strongly recommended for students planning to attend graduate school.

Additional upper division math courses (MATH 2210, MATH 2270, MATH 2280, MATH 3410, MATH 3710, MATH 4110) are recommended for students planning to attend graduate school and study physical chemistry or chemical engineering.

Additional courses should be chosen to support career plans.

Required Cognate Courses (18 credit hours)

Students must complete a minimum of two semesters of calculus and two semesters of physics with laboratory.

MATH 1210 - Calculus I **Credits: (4)** and
MATH 1220 - Calculus II **Credits: (4)**

PHYS 2210 PS - Physics for Scientists and
Engineers I **Credits: (5)** and
PHYS 2220 - Physics for Scientists and
Engineers II **Credits: (5)**

Chemistry Teaching (BS)

Program Prerequisite: Chemistry Teaching majors must meet the Teacher Education admission and licensure requirements (see Department of Teacher Education).

Grade Requirements: Average GPA of 2.00 or better in Chemistry courses. Also refer to the general grade requirements for graduation on Degree Requirements.

Credit Hour Requirements: A total of 120 credit hours are required for graduation; 43 are required within the teaching major, plus the credits required by the Teacher Education department. A total of 40 upper division credit hours (in courses numbered 3000 and above) are required for all Chemistry majors to fulfill University graduation requirements.

Program Code: 6007BS

CIPC: 131323

Advisement

All Chemistry Teaching majors should meet with the Chemistry Teaching major advisor at least annually for course and program advisement. Call 801-626-6952 for information and to arrange an appointment.

Admission Requirements

Declare your program of study (see Enrollment Services and Information). There are no special admission or application requirements for the Chemistry Teaching major, however, teaching majors must meet the Teacher Education admission and licensure requirements (see Department of Teacher Education).

General Education Requirements

Refer to Degree Requirements for Bachelor of Science requirements. The following courses required for the Chemistry major also satisfies general education requirements: CHEM 1210.

Required Introductory and Foundation Courses (15 credit hours)

CHEM 1210 PS - Principles of Chemistry I

Credits: (5) and

CHEM 1220 - Principles of Chemistry II **Credits: (5)**

CHEM 2310 - Organic Chemistry I **Credits: (4)** and

CHEM 2315 - Organic Chemistry I Lab **Credits: (1)**

Additional Required Chemistry Courses (8 credit hours)

CHEM 2600 - Laboratory Safety **Credits: (1)**

CHEM 3570 - Foundations of Science Education **Credits: (3)**

CHEM 4570 - Secondary School Science Teaching Methods **Credits: (3)**

CHEM 4800 - Research and Independent Study in Chemistry **Credits: (1-3)** (1 credit hour required) or

CHEM 4890 INT - Cooperative Work Experience **Credits: (1-6)**

Electives (select at least 8 credit hours)

CHEM 3000 - Quantitative Analysis **Credits: (4)** and

CHEM 3020 - Computer Applications in Chemistry **Credits: (1)**

CHEM 3070 - Biochemistry I **Credits: (3)** and

CHEM 3075 - Biochemistry I Lab **Credits: (1)**

CHEM 3410 - Foundations in Physical Chemistry **Credits: (4)** (note pre-requisites)

CHEM 3610 - Foundations in Inorganic Chemistry **Credits: (4)**

Required Support Courses (7-8 credit hours)

HIST 3350 - History and Philosophy of Science
Credits: (3)

MATH 1050 QL - College Algebra **Credits: (4)** or
MATH 1080 QL - Pre-calculus **Credits: (5)**

Note:

Consult with an advisor early in the program to choose elective courses which will fulfill teaching endorsement requirements.

Student must also complete requirements for a secondary education license as determined by the Jerry and Vicki Moyes College of Education

Chemistry (BIS)

Grade Requirements: A minimum grade of "C" must be achieved in all coursework used to satisfy BIS emphasis requirements, consistent with the requirements for the BIS degree.

Credit Hours Requirements: A minimum of 18 credit hours is required for the BIS emphasis.

Program Code: 6006

CIPC: 400501

Course Requirements for BIS Emphasis

Chemistry Courses Required (10 credit hours)

CHEM 1210 PS - Principles of Chemistry I

Credits: (5)

CHEM 1220 - Principles of Chemistry II **Credits:**

(5)

BIS Electives (8 credit hours)

Select additional chemistry coursework including at least 8 credit hours of upper division courses (numbered 3000 and above).

Chemistry Minor

Grade Requirements: A minimum passing grade of "D-" will be accepted in any course used toward the minor.

Credit Hours Requirements: A minimum of 18 credit hours is required.

Program Code: 6006

CIPC: 400501

Required Introductory Courses (10 credit hours)

CHEM 1210 PS - Principles of Chemistry I

Credits: (5)

CHEM 1220 - Principles of Chemistry II **Credits:**

(5)

Elective Foundation Courses (8-10 credit hours)

Select two foundation courses and their associated labs or co/prerequisite (if not included with the course) from the list below:

CHEM 2310 - Organic Chemistry I **Credits: (4)**

and

CHEM 2315 - Organic Chemistry I Lab **Credits:**

(1)

CHEM 3000 - Quantitative Analysis **Credits: (4)**

and

CHEM 3020 - Computer Applications in

Chemistry **Credits: (1)**

CHEM 3070 - Biochemistry I **Credits: (3)** and

CHEM 3075 - Biochemistry I Lab **Credits: (1)**

CHEM 3410 - Foundations in Physical Chemistry

Credits: (4) (note prereqs)

CHEM 3610 - Foundations in Inorganic

Chemistry **Credits: (4)**

Chemistry Teaching Minor

CHEM 4570 - Secondary School Science
Teaching Methods **Credits: (3)**

Grade Requirements: A minimum passing grade of "D-" will be accepted in any course used toward the minor.

Credit Hour Requirements: A minimum of 26 credit hours is required.

Program Code: 6007

CIPC: 131323

Students who select the Chemistry Teaching Minor must satisfy the Teacher Education admission and licensure requirements (see Department of Teacher Education).

Course Requirements for Teaching Minor

Courses Required (23 credit hours)

CHEM 1210 PS - Principles of Chemistry I

Credits: (5) and

CHEM 1220 - Principles of Chemistry II **Credits:
(5)**

CHEM 2310 - Organic Chemistry I **Credits: (4)**

and

CHEM 2315 - Organic Chemistry I Lab **Credits:
(1)**

CHEM 2320 - Organic Chemistry II **Credits: (4)**

and

CHEM 2325 - Organic Chemistry II Lab **Credits:
(1)**

Approved chemistry elective, 3000 or above

Support Course Required (3 credit hours)

HIST 3350 - History and Philosophy of Science
Credits: (3)

If a student is not obtaining a Teaching Major in Sciences, the following courses are also required:

CHEM 2600 - Laboratory Safety **Credits: (1)**

CHEM 3570 - Foundations of Science Education
Credits: (3)

Chemistry Departmental Honors

Please see weber.edu/honors/contracts.html for a list of current Departmental Honors contracts and Departmental Honors Advisors. For additional information about the Honors Program, please refer to the Honors Program section of the WSU Catalog.

Department of Earth and Environmental Sciences

Department Chair: Dr. Marek Matyjasik

Location: Tracy Hall Science Center, Room 338

Telephone Contact: Anna Cich 801-626-7139

Professors: Richard Ford, Michael Hernandez, David Matty, Marek Matyjasik, Adolph Yonkee; **Assistant**

Professors: Elizabeth Balgord, Carie Frantz, Ryan Frazier, Caitlin Tems; **Lab Manager:** Sara Summers

Earth scientists (also called geoscientists) investigate Earth, our planetary home, including its origin, composition, dynamic processes, and evolution over geologic time. Earth science knowledge is vital to society, as we explore for natural resources, mitigate the impacts of natural disasters, and work to protect the quality of the environment for future generations. Environmental scientists are problem solvers; they use multi-science approaches to investigate and address a wide variety of environmental issues. Both Earth and environmental scientists rely heavily of geospatial technologies (GIS, remote sensing, drones) to study and model Earth processes and features. This is an important and exciting time to be involved in Earth, environmental, and geospatial science careers.

The Department of Earth and Environmental Sciences offers bachelor's degrees in Geology, Applied Environmental Geoscience, and Earth Science Teaching, and supports the Physical Science Composite Teaching degree. The department offers minors in Geology, Geospatial Studies, and Earth Science Teaching. A certificate of proficiency in Geospatial Analysis is also available.

Every citizen should have a basic knowledge of how our planet, including its climate system, works. Thus, the department offers a wide variety of physical science (PS) general education courses.

Interdisciplinary Programs

The Department of Earth and Environmental Sciences contributes courses and faculty expertise to the interdisciplinary Environmental Science major (BS) sponsored by the College of Science. In addition, the department participates in the interdisciplinary Environmental Studies Minor Program and the Urban and Regional Planning Emphasis Program. Students who wish

to enroll in one of these programs should contact the program coordinator, who will help them select a combination of courses to fit their particular educational goals. (See the Engaged Learning, Honors, and Interdisciplinary Programs section of the catalog.)

The Department of Earth and Environmental Sciences uses the course prefix GEO because "geo", from the Greek, means Earth.

Emphasis Options for Bachelor of Integrated Studies

The Geology Minor and/or Geospatial Studies Minor may be used as a BIS emphasis.

Geospatial Analysis Certificate of Proficiency

Advisor: Dr. Michael Hernandez
801-626-8186 mhernandez@weber.edu

Grade Requirements: A grade of "C" or better in all courses used toward the certificate (a grade of "C-" is not acceptable).

Credit Hour Requirements: Minimum of 16 credit hours from the Department of Earth and Environmental Sciences, and 6 credit hours from the Department of Geography. The remaining 1-3 credit hours earned from completing either the Geospatial Internship (GEO 4840 /GEOG 4840) or Geospatial Capstone (GEO 4850 /GEOG 4850) courses will be taken in the department offering it that year

Gainful Employment Disclosure

Program Code: 6013CP

CIPC: 450702

Additional information pertaining to the Northern Utah Geospatial Technology Education Program (NUGeoTec) may be found at

<https://www.weber.edu/nugeotec> or

<http://departments.weber.edu/geosciences> .

Course Requirements for Certificate of Proficiency

Geospatial Courses Required (22 credit hours)

Required courses are offered in two departments: Earth and Environmental Sciences (GEO) and Geography (GEOG).

GEO 3710 - Introduction to Geographic Information Systems **Credits: (4)**

GEO 3720 - Geospatial Analysis **Credits: (4)**

GEO 3840 - Remote Sensing: Principles and Methods **Credits: (4)**

GEO 4200 - Geospatial Data Acquisition **Credits: (4)**

GEOG 4400 - Cartography and Map Design **Credits: (3)**

GEOG 4600 - Geospatial Programming/Online Methods **Credits: (3)**

Elective Geospatial Courses (1-3 credit hours)

Select one elective course in the Earth and Environmental Sciences Department (GEO-even years) or the Geography Department (GEOG-odd years), depending on the year, from the following:

GEO 4840 INT - Geospatial Internship **Credits: (1-3)** taught even years

GEO 4850 - Geospatial Capstone **Credits: (3)** taught even years

Additional Information:

Other applicable geospatial and support courses (e. g., computer programming, applications development, relational database, and field-based courses) and co-curricular experiences (e. g., CCEL) may be considered at the discretion of the program advisor.

A sample of degree programs that this certificate complements include Applied Environmental Geosciences, Geology, Geography, Botany, Computer Science, Information Systems & Technologies, Archaeology, Anthropology, Epidemiology, Business, Criminal Justice, other social sciences, or a combination of three emphasis areas for a Bachelor of Integrated Studies (BIS) Degree. The Geospatial Analysis Certificate of Proficiency provides students with the essential skills necessary to analyze/model/solve today's applied geospatial problems.

Geospatial Technology Certificate of Proficiency

Advisor: Dr. Eric C. Ewert, 801-626-6197,
eewert@weber.edu

*Additional information pertaining to the Northern Utah
Geospatial Technology Education Program
(NUGeoTec) may be found at:
<https://www.weber.edu/nugeotec> or <http://weber.edu/geography>.*

Grade Requirements: A grade of "C" or better in all courses used toward the certificate (a grade of "C-" is not acceptable).

Credit Hour Requirements: Minimum of 6 credit hours from the Department of Geography, and 12 credit hours from the Department of Earth and Environmental Sciences. The remaining 1-3 credit hours earned from completing either the Geospatial Internship (GEO/GEOG 2840) or the Geospatial Capstone (GEO/GEOG 2850) courses which will be taken in the department offering the course that particular year (alternates yearly).

Program Code: 6039CP

CIPC: 450702

Course Requirements for Certificate of Proficiency

Geography Courses Required (6 credit hours)

GEOG 1790 - Exploring Our World Through
Geospatial Technology **Credits: (3)**
GEOG 2400 - Cartography and Map Design
Credits: (3)

Earth and Environmental Science Courses Required (12 credit hours)

GEO 1710 - Introduction to Geographic
Information Systems (GIS) **Credits: (4)**
GEO 1720 - Geospatial Analysis **Credits: (4)**
GEO 2200 - Geospatial Data Acquisition **Credits:
(4)**

Select at least 1 hour from the following:

GEO 2840/ GEOG 2840 INT - Geospatial Internship **(1-3)**

GEO 2850/ GEOG 2850 - Geospatial Capstone **(3)**

Geology (BA)

Advisor: Dr. Richard Ford, 801-626-6942 rford@weber.edu

Program Prerequisite: None

Minor: Not required

Grade Requirements: A grade of "C-" or better in courses required for this major in addition to an overall GPA for all courses of 2.00 or higher.

Credit Hour Requirements: A total of 120 credit hours is required for graduation; 51-58 of these are required within the major. A total of 40 upper division credit hours are required (courses numbered 3000 and above).

Program Code: 6010BA

CIPC: 400601

** Students may benefit from having a minor in such fields as chemistry, physics, mathematics, computer science, geospatial analysis, a life science, or professional and technical writing and should consult with an advisor prior to choosing an option.*

Advisement

All Geology students are required to meet with a faculty advisor (see above) at least annually for course and program advisement. Call 801-626-7139 for more information or to schedule an appointment. (Also refer to the Department Advisor Referral List.)

Admission Requirements

Declare your program of study (see Enrollment Services and Information). No special admission or application requirements are needed for this program. However, students should meet with an advisor to plan and declare their program of study.

General Education

Refer to Degree Requirements for either Bachelor of Science or Bachelor of Arts requirements. MATH 1050 or MATH 1080 or MATH 1210 is recommended for the Quantitative Literacy requirement. The following courses required for the Geology major will also satisfy general education requirements: BTNY 1203, CHEM 1210, GEO 1110, PHYS 2010, and PHYS 2210.

Language Courses Required to fulfill the BA (12 credit hours)

Select 6 semester-hours of a foreign language

and

Select 6 hours from

ENGL 3610 - American Literature I **Credits: (3)**
ENGL 3100 - Professional and Technical Writing **Credits: (3)**
ENGL 3140 - Professional and Technical Editing **Credits: (3)**
ENGL 3190 CEL - Document Design **Credits: (3)**
ENGL 3520 HU - Literature of the Natural World **Credits: (3)**
Or additional foreign language

Major Course Requirements for BA Degree

Geology Courses Required (23 credit hours)

GEO 1110 PS - Dynamic Earth: Physical Geology **Credits: (3)**
GEO 1115 - Physical Geology Lab **Credits: (1)**
GEO 1220 - Historical Geology **Credits: (4)**
GEO 2050 - Earth Materials **Credits: (4)**
GEO 3000 - Geoscience Methods and Careers **Credits: (3)**

GEO 3080 - Applied Hydrology **Credits: (3)** or
GEO 3550 - Sedimentology and Stratigraphy **Credits: (4)**

GEO 3150 - Geomorphology **Credits: (4)**

Electives Courses (15 credit hours)

Select an additional 15 hours from GEO courses numbered 3000 and above and/or up to 6 hours from other Earth/environmentally related classes approved by the Earth and Environmental Sciences Department.

Support Courses Required (13-21 credit hours)

BTNY 1203 LS - Plant Biology **Credits: (3)** or
BTNY 1403 LS SUS - Principles of
Environmental Science **Credits: (3-4)**

CHEM 1010 PS - Introductory Chemistry **Credits:**
(3) or
CHEM 1110 PS - Elementary Chemistry **Credits:**
(5) or
CHEM 1210 PS - Principles of Chemistry I
Credits: (5) **

PHYS 1010 PS - Elementary Physics **Credits: (3)**
or
PHYS 2010 PS - College Physics I **Credits: (5)** or
PHYS 2210 PS - Physics for Scientists and
Engineers I **Credits: (5) ****
either

MATH 1050 QL - College Algebra **Credits: (4)** and
MATH 1060 - Trigonometry **Credits: (3)**
or
MATH 1080 QL - Pre-calculus **Credits: (5)**
or
MATH 1210 - Calculus I **Credits: (4) ****

Notes:

** Students should consider a minor or complementary set of elective classes that supports their career plans (please consult an advisor).*

***Students planning to attend graduate school in science or engineering areas should take additional Chemistry, Physics, and Math classes (please consult an advisor).*

Applied Environmental Geosciences (BS)

Advisors: Dr. Marek Matyjasik, 801-626-7726
mmatyjasik@weber.edu

Program Prerequisite: None.

Minor: Not required.

Grade Requirements: A grade of "C-" or better in each courses required by this major in addition to a minimum cumulative GPA for all courses of 2.0.

Credit Hour Requirements: A total of 120 credit hours are required for graduation; 77 to 82 of these are required within the major. A total of 40 upper division credit hours is required (courses numbered 3000 and above); 38 to 40 of these are required within the major.

Program Code: 6012BS

CIPC: 400601

Advisement

All Geoscience students are required to meet with a faculty advisor (see above) at least annually for course and program advisement. Call 801-626-7139 for more information or to schedule an appointment.

Admission Requirements

Declare your program of study (see Enrollment Services and Information). No special admission or application requirements are needed for this program. However, students should meet with an advisor to plan and declare their program of study.

General Education

Refer to Degree Requirements for Bachelor of Science requirements. MATH 1050 or MATH 1080 is recommended for the Quantitative Literacy requirement. The following courses required for the Applied Environmental Geoscience major will also satisfy general education requirements: CHEM 1210, GEO 1060, GEO 1110, PHYS 2010, and PHYS 2210.

Course Prefix GEO

The Department of Earth and Environmental Sciences uses the course prefix GEO because geo means "earth." The prefix GEO also aids in course articulation with other colleges and universities.

Major Course Requirements for BS Degree

Earth Science Courses Required (39-40 credit hours)

GEO 1060 PS - Environmental Geosciences
Credits: (3)

GEO 1110 PS - Dynamic Earth: Physical Geology
Credits: (3)

GEO 1115 - Physical Geology Lab
Credits: (1)

GEO 1220 - Historical Geology
Credits: (4)

GEO 2050 - Earth Materials
Credits: (4)

GEO 3000 - Geoscience Methods and Careers
Credits: (3)

GEO 3080 - Applied Hydrology
Credits: (3)

GEO 3150 - Geomorphology
Credits: (4)

GEO 3710 - Introduction to Geographic Information Systems
Credits: (4)

GEO 3753 - Geomicrobiology
Credits: (3) or
GEO 4560 - Environmental Geochemistry
Credits: (4)

GEO 4060 - Geoscience Field Methods
Credits: (4)

GEO 4990 - Geoscience and Society Seminar
Credits: (2)

Applied Geoscience Electives Required (11-12 credit hours)

Complete three (3) of the following courses:

GEO 3214 - Soils
Credits: (4)

GEO 3720 - Geospatial Analysis
Credits: (4)

GEO 3840 - Remote Sensing: Principles and Methods
Credits: (4)

GEO 4080 - Groundwater and Environmental Assessment
Credits: (4)

GEO 4100 - Engineering Geology
Credits: (3)

GEO 4200 - Geospatial Data Acquisition **Credits: (4)**

GEO 4560 - Environmental Geochemistry
Credits: (4) or

GEO 3753 - Geomicrobiology **Credits: (3)**

Additional Electives Required (3 credit hours minimum)

Complete a minimum of 3 credit hours in additional upper-division Earth Science (GEO) courses (numbered 3000 and above), which could include an additional applied geoscience course listed above or another approved environmental/sustainability science course.

Support Courses Required (24-27 credit hours)

CHEM 1210 PS - Principles of Chemistry I
Credits: (5) and

CHEM 1220 - Principles of Chemistry II **Credits: (5)**

PHYS 2010 PS - College Physics I **Credits: (5)**
and

PHYS 2020 - College Physics II **Credits: (5)**
or

PHYS 2210 PS - Physics for Scientists and Engineers I **Credits: (5)** and

PHYS 2220 - Physics for Scientists and Engineers II **Credits: (5) ***

either

MATH 1050 QL - College Algebra **Credits: (4)**

MATH 1060 - Trigonometry **Credits: (3)**

or

MATH 1080 QL - Pre-calculus **Credits: (5)**

or

MATH 1210 - Calculus I **Credits: (4) ****

***Students planning to attend graduate school in Geology or a related geotechnical area should also take MATH 1210/MATH 1220, Calculus I and II (8).*

Students planning a career or advanced degree in geospatial science and technologies are encouraged to complete the Geospatial Analysis certificate program. Students planning a career or advanced degree in geotechnical applications are encouraged to take GEO 3060, GEO 4080, GEO 4100 and as electives. Course work in microbiology, especially Environmental Microbiology (MICR 3484), is recommended for students pursuing environmental or remediation-related careers.

Note:

**Students planning to attend graduate school in Geology or a related geotechnical area should take PHYS 2210-PHYS 2220, Physics for Scientists & Engineers, instead of the General Physics series (PHYS 2010-PHYS 2020).*

Earth Science Teaching (BS)

Advisor: Dr. Richard Ford, 801-626-6942 rford@weber.edu

Program Prerequisite: Must satisfy Teacher Education admission and licensure requirements (see Teacher Education Department).

Minor: Not required.

Grade Requirements: A grade of "C-" or better in courses required for this major.

Credit Hour Requirements: A total of 125-126 credit hours is required for graduation; 70 to 72 of these are required within the major. Teacher Education Licensure requires 9 credit hours of support courses and 24 credit hours of professional education courses (see Teacher Education Department). This major requires a total of 44 upper division credit hours (courses numbered 3000 and above); 17 of these are required Geosciences courses and 24 are Teacher Education courses.

Program Code: 6011BS

CIPC: 131316

Advisement

All Earth Science Teaching students are required to meet with a faculty advisor (see previous column) at least annually for course and program advisement. Call 801-626-7139 for more information or to schedule an appointment. In addition, teaching majors are encouraged to consult with an advisor in the Jerry and Vickie Moyes College of Education (call 801-626-6269). (Also refer to the Department Advisor Referral List.)

Admission Requirements

Declare your program of study (see Enrollment Services and Information). Earth Science Teaching majors must satisfy Teacher Education admission and licensure requirements. (See Teacher Education Department.)

General Education

Refer to Degree Requirements for Bachelor of Science requirements. MATH 1050 or MATH 1080 is recommended for the Quantitative Literacy requirement. The following courses required for the Earth Science

Teaching major will also satisfy general education requirements: BTNY 1203, CHEM 1210, GEO 1060, GEO 1110, GEO 1130, PHYS 1040, PHYS 2010, and PHYS 2210. The following required education support courses will also satisfy general education requirements: CHF 1500 and COMM 1020 or COMM 2110.

Major Course Requirements for BS Degree

Earth Science Courses Required (42 credit hours)

GEO 1060 PS - Environmental Geosciences
Credits: (3) or

GEOG 1500 PS SUS - The Science of Global Warming: Myths, Realities and Solutions
Credits: (3)

GEO 1110 PS - Dynamic Earth: Physical Geology **Credits: (3)**

GEO 1115 - Physical Geology Lab **Credits: (1)**

GEO 1130 PS - Introduction to Meteorology
Credits: (3)

GEO 1220 - Historical Geology **Credits: (4)**

GEO 2050 - Earth Materials **Credits: (4)**

GEO 2600 - Laboratory Safety **Credits: (1)**

GEO 3010 - Oceanography and Earth Systems
Credits: (3) or

GEOG 3050 - Weather and Climate **Credits: (3)**

GEO 3150 - Geomorphology **Credits: (4)**

GEO 3570 - Foundations of Science Education
Credits: (3)

GEO 4570 - Secondary School Science Teaching Methods **Credits: (3)**

GEO 4800 - Independent Research **Credits: (1-3)**
(only 1 credit hour required)

PHYS 1040 PS - Elementary Astronomy **Credits: (3)** or

ASTR 1040 PS - Elementary Astronomy **Credits: (3)**

BTNY 1203 LS - Plant Biology **Credits: (3)**

Select one or more of the following for a minimum of 3 credit hours:

GEO 3060 - Structural Geology **Credits: (4)**
GEO 3080 - Applied Hydrology **Credits: (3)**
GEO 3180 - Paleontology **Credits: (4)**
GEO 3214 - Soils **Credits: (4)**
GEO 3250 - Geology of Utah **Credits: (3)**
GEO 3550 - Sedimentology and Stratigraphy
Credits: (4)
GEO 3710 - Introduction to Geographic
Information Systems **Credits: (4)**
GEO 3753 - Geomicrobiology **Credits: (3)**
GEO 4750 - Special Topics in Geosciences
Credits: (1-4)
GEO 4950 - Advanced Geoscience Fieldtrips
Credits: (1-3)

MATH 1040 QL - Introduction to Statistics
Credits: (3)
ZOOL 1010 LS - Animal Biology **Credits: (3) ***

Note:

*The Utah State Office of Education also requires Earth Science Teaching graduates to pass the Earth and Space Sciences Praxis exam to receive the Earth Science endorsement (9th grade). Earth Science Teaching graduates who pass the General Science Praxis exam may also receive the Middle Level Science endorsement (7th and 8th grades). Completion of ZOOL 1010 will help prepare students for the General Science Praxis exam.

Required Support Courses (27-30 credit hours)

Note: CHEM 1210 requires CHEM 1200 as a pre-requisite.

CHEM 1210 PS - Principles of Chemistry I
Credits: (5) and
CHEM 1220 - Principles of Chemistry II **Credits:**
(5)

PHYS 2010 PS - College Physics I **Credits: (5)**
and
PHYS 2020 - College Physics II **Credits: (5)**
or
PHYS 2210 PS - Physics for Scientists and
Engineers I **Credits: (5)** and
PHYS 2220 - Physics for Scientists and
Engineers II **Credits: (5)**

HIST 3350 - History and Philosophy of Science
Credits: (3)

either
MATH 1050 QL - College Algebra **Credits: (4)** and
MATH 1060 - Trigonometry **Credits: (3)**
or
MATH 1080 QL - Pre-calculus **Credits: (5)**
or
MATH 1210 - Calculus I **Credits: (4)**

Recommended Support Courses

any additional upper division (numbered 3000 and above)
GEO course

GEOG 3060 - World Environmental Issues
Credits: (3)

Geology (BS)

Advisor: Dr. Rick Ford, 801-626-6942 rford@weber.edu

Program Prerequisite: None

Minor: Not required.

Grade Requirements: A grade of "C-" or better in courses required for this major in addition to an overall GPA for all courses of 2.00 or higher.

Credit Hour Requirements: A total of 120 credit hours is required for graduation; 79-82 of these are required within the major. A total of 40 upper division credit hours is required; 40 of these are required within the major (courses numbered 3000 and above).

Program Code: 6010BS

CIPC: 400601

** Students may benefit from having a minor in such fields as chemistry, physics, mathematics, computer science, geospatial analysis, or a life science, and should consult with an advisor prior to choosing an option.*

Advisement

All Geology students are required to meet with a faculty advisor (see above) at least annually for course and program advisement. Call 801-626-7139 for more information or to schedule an appointment. (Also refer to the Department Advisor Referral List.)

Admission Requirements

Declare your program of study (see Enrollment Services and Information). No special admission or application requirements are needed for this program. However, students should meet with an advisor to plan and declare their program of study.

General Education

Refer to Degree Requirements for either Bachelor of Science or Bachelor of Arts requirements. MATH 1050 or MATH 1080 or MATH 1210 is recommended for the Quantitative Literacy requirement. The following courses required for the Geology major will also satisfy general education requirements: CHEM 1210, GEO 1110, PHYS 2010, and PHYS 2210.

Course Prefix GEO

The Department of Earth and Environmental Sciences uses the course prefix GEO because geo means "earth." The prefix GEO also aids in course articulation with other colleges and universities.

Major Course Requirements for BS Degree

Earth Science Courses Required (49 credit hours)

- GEO 1110 PS - Dynamic Earth: Physical Geology **Credits: (3)**
- GEO 1115 - Physical Geology Lab **Credits: (1)**
- GEO 1220 - Historical Geology **Credits: (4)**
- GEO 2050 - Earth Materials **Credits: (4)**
- GEO 3000 - Geoscience Methods and Careers **Credits: (3)**
- GEO 3060 - Structural Geology **Credits: (4)**
- GEO 3080 - Applied Hydrology **Credits: (3)**
- GEO 3150 - Geomorphology **Credits: (4)**
- GEO 3550 - Sedimentology and Stratigraphy **Credits: (4)**
- GEO 3710 - Introduction to Geographic Information Systems **Credits: (4)**
- GEO 4060 - Geoscience Field Methods **Credits: (4)**
- GEO 4510 - Geology Field Camp **Credits: (4)**
- GEO 4560 - Environmental Geochemistry **Credits: (4)**
- GEO 4990 - Geoscience and Society Seminar **Credits: (2)**

Electives Courses (6 credit hours minimum)

Complete GEO 1060 PS - Environmental Geosciences (3) and/or additional upper-division geoscience Earth science (GEO) courses (numbered 3000 and complete above) for a minimum of 6 credit hours.

Support Courses Required (24-27 credit hours)

CHEM 1210 PS - Principles of Chemistry I
Credits: (5) and
CHEM 1220 - Principles of Chemistry II **Credits:**
(5)

PHYS 2010 PS - College Physics I **Credits: (5)**
and
PHYS 2020 - College Physics II **Credits: (5)**
or
PHYS 2210 PS - Physics for Scientists and
Engineers I **Credits: (5) *** and
PHYS 2220 - Physics for Scientists and
Engineers II **Credits: (5) ***

either
MATH 1050 QL - College Algebra **Credits: (4)** and
MATH 1060 - Trigonometry **Credits: (3)**
or
MATH 1080 QL - Pre-calculus **Credits: (5)**
or
MATH 1210 - Calculus I **Credits: (4) ****

Note:

** Students planning to attend graduate school should take PHYS 2210-PHYS 2220, Physics for Scientists & Engineers, instead of the General Physics series (PHYS 2010-PHYS 2020).*

***Students planning to attend graduate school should also take MATH 1210/MATH 1220, Calculus I and II (8).*

The physical chemistry sequence, CHEM 3410-CHEM 4420 (8), is recommended for students planning advanced study in geochemistry, mineralogy, or mineral deposits. Advanced course work in zoology, microbiology or botany is recommended for students planning advanced work in paleontology, stratigraphy, or related fields. Environmental Microbiology (MICR 3484) is recommended for students pursuing environmental or remediation-related careers.

Geology Minor

Advisor: Dr. Richard Ford 801-626-6942 rford@weber.edu

Grade Requirements: A grade of "C-" or better in courses used toward the minor.

Credit Hour Requirements: Minimum of 19 credit hours in Earth science (GEO) courses.

Program Code: 6010

CIPC: 400601

Course Requirements for Minor

Earth Science Courses Required (12 credit hours)

GEO 1110 PS - Dynamic Earth: Physical
Geology **Credits: (3)**

GEO 1115 - Physical Geology Lab **Credits: (1)**

GEO 1220 - Historical Geology **Credits: (4)**

GEO 3150 - Geomorphology **Credits: (4)**

Earth Science Electives (minimum 7 credit hours)

Complete GEO 2050 - Earth Materials (4) and/or additional upper-division Earth science (GEO) courses (numbered 3000 and above) for a minimum of 7 credit hours.

Geospatial Studies Minor

GEO 4850 - Geospatial Capstone Credits: (3)
taught even years

Advisor: Dr. Michael Hernandez 801-626-8186
mhernandez@weber.edu

Grade Requirements: A grade of "C" or better in all courses used toward the minor (a grade of "C-" is not acceptable).

Credit Hour Requirements: Minimum of 18 credit hours.

Program Code: 6013

CIPC: 450702

Course Requirements for Minor

Geospatial Courses Required (15 credit hours)

Required courses are offered in two departments: Earth and Environmental Sciences (GEO) and Geography (GEOG).

GEO 3710 - Introduction to Geographic Information Systems Credits: (4)

GEO 3720 - Geospatial Analysis Credits: (4)

GEO 3840 - Remote Sensing: Principles and Methods Credits: (4)

GEOG 4400 - Cartography and Map Design Credits: (3)

Note:

If any required courses for the Geospatial Studies Minor are also required in a student's major, then an elective of equivalent hours may need to be substituted.

Elective Geospatial Courses (3 credit hours)

Select one or more elective courses in the Earth and Environmental Sciences (GEO) and Geography (GEOG) Departments from the following list:

GEO 4200 - Geospatial Data Acquisition Credits: (4)

GEOG 4410 SUS - Sustainable Land Use Planning Credits: (3)

GEOG 4600 - Geospatial Programming/Online Methods Credits: (3)

GEO 4840 INT - Geospatial Internship Credits: (1-3) taught even years

Earth Science Teaching Minor

Advisor: Dr. Richard Ford 626-6942 rford@weber.edu

Grade Requirements: A grade of "C-" or better in courses used toward the minor.

Credit Hour Requirements: Minimum of 20 credit hours in Geosciences courses.

Program Code: 6011

CIPC: 131316

Students who select the Earth Science Teaching Minor must satisfy the Teacher Education admission and licensure requirements (see Department of Teacher Education).

Course Requirements for Minor

Earth Science Courses Required (20 credit hours)

GEO 1060 PS - Environmental Geosciences
Credits: (3)

GEO 1110 PS - Dynamic Earth: Physical
Geology **Credits: (3)**

GEO 1115 - Physical Geology Lab **Credits: (1)**

GEO 1130 PS - Introduction to Meteorology
Credits: (3)

GEO 1220 - Historical Geology **Credits: (4)**

GEO 3010 - Oceanography and Earth Systems
Credits: (3) or

GEOG 3050 - Weather and Climate **Credits: (3)**

PHYS 1040 PS - Elementary Astronomy **Credits:**
(3) or

ASTR 1040 PS - Elementary Astronomy **Credits:**
(3)

If not taken as part of a student's major requirements, then the following courses are also required (up to 20 credit hours):

Note: CHEM 1210 requires CHEM 1200 as a pre-requisite.

GEO 3570 - Foundations of Science Education
Credits: (3)

GEO 4570 - Secondary School Science Teaching
Methods **Credits: (3)**

PHYS 2010 PS - College Physics I **Credits: (5)** or

PHYS 2210 PS - Physics for Scientists and
Engineers I **Credits: (5)**

CHEM 1210 PS - Principles of Chemistry I
Credits: (5)

ZOOL 3450 - Ecology **Credits: (4)**

Note:

Any deviation from the above requirements must be approved by the department in advance.

This minor is best for students majoring in another area of science or science teaching, as one semester of chemistry, one semester of physics, and one semester of ecology are required to obtain Earth Science teaching certification in the state of Utah.

Earth and Environmental Sciences Departmental Honors

Please see weber.edu/honors/contracts.html for a list of current Departmental Honors contracts and Departmental Honors Advisors. For additional information about the Honors Program, please refer to the Honors Program section of the WSU Catalog.

Department of Mathematics

Department Chair: Sandra Fital-Akelbek

Location: Tracy Hall Science Center, Room 381

Contact: Debi Larson, 801-626-6095 or math@weber.edu

Department Website: weber.edu/mathematics

Professors: Mahmud Akelbek, Chloe Cai, Sandra Fital-Akelbek, Afshin Ghoreishi, Kent Kidman, George Kvernadze, Matthew Ondrus, Timothy Steele, Paul Talaga;

Associate Professors: Rachel Bachman, Julian Chan, Mihail Cocos, Cora Neal, James Peters; **Assistant**

Professors: Shawn Broderick, Alees Lee, C. David Walters; **Instructor:** Shannon Dixon

From data mining to forensics, mathematics is the language of choice for an ever-increasing number of disciplines. The scientist, the engineer, the actuary, the financial planner - all use algebra, geometry, calculus and statistics. But also, the voter needs to understand these concepts, albeit at a less advanced level, to reach informed decisions about a multitude of issues from utility rates and retirement saving to information security and global warming.

The Department of Mathematics offers a variety of courses (from general interest to advanced levels of applicability), two minors, departmental honors, and five majors. The Mathematics major may be the best choice for someone planning to go directly to graduate school; the Applied Mathematics major prepares one for a job that uses mathematics; the Mathematics Teaching major prepares students to be teachers of mathematics in elementary through high school, and the Computational Statistics and Data Science major is for students who can convert big data into actionable insight, improve decision making, and provide a competitive advantage for their employers. We also offer an Associate's of Science degree in Mathematics that complements all STEM degrees.

Prerequisites

Since each course in mathematics requires a working knowledge of principles from prerequisite courses, students are required to earn a "C" grade in each prerequisite course before registering for the next course. Math prerequisites for math courses up to MATH 2210 expire after 24 months.

Placement

Weber State University students will be placed into mathematics courses by the following procedure.

A. To enroll in mathematics courses MATH 1030 QL, MATH 1040 QL, MATH 1120 QL, or MATH 2010 a student must have, **within the past 24 months**, either:

Completed the prerequisite course with a grade of "C" or higher; *OR*

Received a Math ACT score of 21 or above; *OR*

Scored sufficiently high on a placement exam at a WSU testing center

B. To enroll in mathematics courses MATH 1050 QL, MATH 1060, MATH 1080 QL, or MATH 1090 QL a student must have, **within the past 24 months**, either:

Completed the prerequisite course with a grade of "C" or higher; *OR*

Received a Math ACT score of 23 or above; *OR*

Scored sufficiently high on a placement exam at a WSU testing center

C. To enroll in MATH 1035 QL - Contemporary Mathematics with Prerequisite Topics QL a student must have, **within the past 24 months**, either:

Completed MATH 0950 with a grade of "C" or higher; *OR*

Received a Math ACT score of 14 or above; *OR*

Scored sufficiently high on a placement exam at a WSU testing center

D. To enroll in MATH 2020 QL a student must have completed MATH 2010 and 2015 with a grade of "C" or better. Students may not use a placement exam to test into MATH 2020 QL.

E. To enroll in mathematics courses numbered 1210 through 2210, a student must have, **within the past 24 months**, either:

Completed the prerequisite course(s) with a grade of "C" or higher

Scored sufficiently high on a placement exam at a WSU testing center. (Placement scores only available up to MATH 1210 - Calculus I)

Obtained the appropriate AP Calculus score described below:

Three on the AB test places the student in MATH 1210

Four or five on the AB test places the student in MATH 1220

Three or four on the BC test places the student in MATH 1220

Five on the BC test places the student
in MATH 2210 or higher
*Students who score below 21 on the Math ACT may be
placed into developmental courses. See the Math
Placement Standards listed in the WSU Core General
Education Requirements.*

*Failure to comply with this policy will normally result in
the cancellation of the student's math course registration.*

*It is recommended that students have their programs
(majors and minors) approved before registering for upper
division courses.*

Mathematics (AS)

Program prerequisite: None

Grade Requirements: A grade of "C" or better in courses required for this major (a grade of "C-" is not acceptable), in addition to an overall 2.0 GPA and a 2.0 GPA in mathematics classes numbered 1210 or above.

Credit Hour Requirements: A total of 60 credit hours are required; a minimum of 18 credit hours are required in mathematics courses.

Program Code: 6035AS

CIPC: 270101

MATH 2270 - Elementary Linear Algebra **Credits:**
(3)

One course chosen from:

MATH 2280 - Ordinary Differential Equations

Credits: (3)

Any upper division MATH course (MATH 3xxx or MATH 4XXX)

Advisement

All Mathematics AS students should see the Mathematics Department to be assigned an advisor. They should meet with their advisors at least once a year to help plan their programs and check on their progress. Call 801-626-6095 for more information or to schedule an appointment. (Also refer to the Department Advisor Referral List.)

Admission Requirements

Declare your program of study (see Program of Study (Major/Minor) Declaration) with your advisor. There are no special admission or application requirements for the AS degree.

General Education

Refer to Degree Requirements for Associate of Science degree. PHYS 2210 will fulfill requirements for both the AS degree and general education.

Course Requirements for Mathematics AS Degree

Mathematics courses required (18
credit hours):

MATH 1210 - Calculus I **Credits: (4)**

MATH 1220 - Calculus II **Credits: (4)**

MATH 2210 - Calculus III **Credits: (4)**

Mathematics (BA)

All Mathematics Majors

Program Prerequisite: Not required for Mathematics and Applied Mathematics majors. Mathematics Teaching majors must meet the Teacher Education admission and licensure requirements (see Teacher Education Department).

Minor: Required only for the regular mathematics major.

Grade Requirements: A grade of "C" or better in courses required for this major (a grade of "C-" is not acceptable), in addition to an overall 2.0 GPA and a 2.0 GPA in mathematics classes numbered 1210 or above.

Credit Hour Requirements: A total of 120 credit hours are required for graduation; 31-46 of these are required within the major. A total of 40 upper division credit hours is required (courses numbered 3000 and above); at least nine credit hours of upper division Mathematics must be completed at Weber State University.

Program Code: Mathematics (6029BA or 6029BS), Mathematics Teaching (6030BA or 6030BS), Applied Mathematics (6031BA or 6031BS) with Regular Track (6022), Computing Track (6023), Physical Mathematics Track (6024), Engineering Mathematics Track (6025), Actuarial/Financial Mathematics Track (6026), Natural/Life Sciences Track (6028)

CIPC: Mathematics (270101), Applied Mathematics (270301), Mathematics Teaching (131311)

Advisement

All Mathematics majors should see the Mathematics Department to be assigned an advisor. They should meet with their advisors at least once a year to help plan their programs and check on their progress. Call 801-626-6095 for more information or to schedule an appointment. (Also refer to the Department Advisor Referral List.)

Admission Requirements

Declare your program of study (see Program of Study (Major/Minor) Declaration) with your advisor. There are no special admission or application requirements for the Regular or Applied mathematics emphases. Mathematics

Teaching majors must meet the Teacher Education admission and licensure requirements (see Teacher Education Department).

General Education

Refer to Degree Requirements for either Bachelor of Science or Bachelor of Arts requirements. PHYS 2210 will fulfill requirements for both the major and general education. PSY 1010 (3) in the Social Sciences area is recommended for the Mathematics Teaching emphasis.

Language Courses Required to fulfill the BA (14 credit hours)

6 credit hour of foreign language
and the following language arts courses

MATH 1210 - Calculus I **Credits: (4)**

MATH 1220 - Calculus II **Credits: (4)**

Major Course Requirements for Mathematics BS or BA Degree

Mathematics Courses Required (33 credit hours)

MATH 1210 - Calculus I **Credits: (4)**

MATH 1220 - Calculus II **Credits: (4)**

MATH 2210 - Calculus III **Credits: (4)**

MATH 2270 - Elementary Linear Algebra **Credits: (3)**

MATH 2280 - Ordinary Differential Equations **Credits: (3)**

MATH 3110 - Foundations of Algebra **Credits: (3)**

MATH 4110 - Modern Algebra I **Credits: (3)**

MATH 4120 - Modern Algebra II **Credits: (3)** or

MATH 4320 - Topology **Credits: (3)**

MATH 4210 - Introductory Real Analysis I **Credits: (3)** and

MATH 4220 - Introductory Real Analysis II **Credits: (3)**

Mathematics Electives (at least 9 credit hours)

Complete any upper division Mathematics courses (not including any required courses) so that required mathematics courses and mathematics electives total at least 42 credit hours.

Minor

A minor is required or

CS 1400 - Programming I **Credits: (4)**
CS 1410 - Object-Oriented Programming **Credits: (4)**

and one course chosen from:

CS 2130 - Computational Structures **Credits: (4)**
CS 2420 - Introduction to Data Structures and Algorithms **Credits: (4)**
CS 2450 - Software Engineering I **Credits: (4)**
CS 2810 - Computer Architecture/Organization **Credits: (4)**
MATH 4610 - Numerical Analysis I **Credits: (3)**

Support Courses Required (10 credit hours)

PHYS 2210 PS - Physics for Scientists and Engineers I **Credits: (5)**
PHYS 2220 - Physics for Scientists and Engineers II **Credits: (5)**

Graduate School Preparation

It is highly recommended that students planning on graduate work in Mathematics take Linear Algebra (MATH 3270) and Topology (MATH 4320) in addition to the above. See the Mathematics Department for counseling.

Mathematics Teaching (BA)

All Mathematics Majors

Program Prerequisite: Not required for Mathematics and Applied Mathematics majors. Mathematics Teaching majors must meet the Teacher Education admission and licensure requirements (see Teacher Education Department).

Minor: Required only for the regular mathematics major.

Grade Requirements: A grade of "C" or better in courses required for this major (a grade of "C-" is not acceptable), in addition to an overall 2.0 GPA and a 2.0 GPA in mathematics classes numbered 1210 or above.

Credit Hour Requirements: A total of 120 credit hours are required for graduation; 31-46 of these are required within the major. A total of 40 upper division credit hours is required (courses numbered 3000 and above); at least nine credit hours of upper division Mathematics must be completed at Weber State University.

Program Code: Mathematics (6029BA or 6029BS), Mathematics Teaching (6030BA or 6030BS), Applied Mathematics (6031BA or 6031BS) with Regular Track (6022), Computing Track (6023), Physical Mathematics Track (6024), Engineering Mathematics Track (6025), Actuarial/Financial Mathematics Track (6026), Natural/Life Sciences Track (6028)

CIPC: Mathematics (270101), Applied Mathematics (270301), Mathematics Teaching (131311)

Advisement

All Mathematics majors should see the Mathematics Department to be assigned an advisor. They should meet with their advisors at least once a year to help plan their programs and check on their progress. Call 801-626-6095 for more information or to schedule an appointment. (Also refer to the Department Advisor Referral List.)

Admission Requirements

Declare your program of study (see Program of Study (Major/Minor) Declaration) with your advisor. There are no special admission or application requirements for the Regular or Applied mathematics emphases. Mathematics

Teaching majors must meet the Teacher Education admission and licensure requirements (see Teacher Education Department).

General Education

Refer to Degree Requirements for either Bachelor of Science or Bachelor of Arts requirements. PHYS 2210 will fulfill requirements for both the major and general education. PSY 1010 (3) in the Social Sciences area is recommended for the Mathematics Teaching emphasis.

Language Courses Required to fulfill the BA (14 credit hours)

6 credit hour of foreign language
and the following language arts courses

MATH 1210 - Calculus I **Credits: (4)**

MATH 1220 - Calculus II **Credits: (4)**

Major Course Requirements for Mathematics Teaching BS or BA Degree

Mathematics Courses Required (48 credit hours)

MATH 1210 - Calculus I **Credits: (4)**

MATH 1220 - Calculus II **Credits: (4)**

MATH 2210 - Calculus III **Credits: (4)**

MATH 2270 - Elementary Linear Algebra **Credits: (3)**

MATH 2280 - Ordinary Differential Equations **Credits: (3)** or

MATH 3550 - Introduction to Mathematical Modeling **Credits: (3)**

MATH 3110 - Foundations of Algebra **Credits: (3)**
or

MATH 4110 - Modern Algebra I **Credits: (3)**

MTHE 2120 - Geometry from a Teaching Perspective **Credits: (3)**

MATH 3120 - Foundations of Euclidean and Non-Euclidean Geometry **Credits: (3)**

MATH 3160 - Number Theory **Credits: (3)**

MTHE 3060 - Probability and Statistics from a Teaching Perspective **Credits: (3)**
MATH 3410 - Probability and Statistics I **Credits: (3)**
MTHE 4110 - Algebra from a Teaching Perspective **Credits: (3)**
MTHE 3010 - Methods and Technology for Teaching Secondary Mathematics **Credits: (3)**
MATH 4210 - Introductory Real Analysis I **Credits: (3)**
One upper division MATH course not otherwise required **(3)**

Support Courses Required (5-10 credit hours)

Complete either

PHYS 2210 PS - Physics for Scientists and Engineers I **Credits: (5)**
or
CHEM 1210 PS - Principles of Chemistry I **Credits: (5)** and
CHEM 1220 - Principles of Chemistry II **Credits: (5)**

Note:

A student must also complete requirements for a secondary education licensure as determined by the Jerry and Vickie Moyes College of Education.

Mathematics, Applied (BA)

All Mathematics Majors

Program Prerequisite: Not required for Mathematics and Applied Mathematics majors. Mathematics Teaching majors must meet the Teacher Education admission and licensure requirements (see Teacher Education Department).

Minor: Required only for the regular mathematics major.

Grade Requirements: A grade of "C" or better in courses required for this major (a grade of "C-" is not acceptable), in addition to an overall 2.0 GPA and a 2.0 GPA in mathematics classes numbered 1210 or above.

Credit Hour Requirements: A total of 120 credit hours are required for graduation; 31-46 of these are required within the major. A total of 40 upper division credit hours is required (courses numbered 3000 and above); at least nine credit hours of upper division Mathematics must be completed at Weber State University.

Program Code: Mathematics (6029BA or 6029BS), Mathematics Teaching (6030BA or 6030BS), Applied Mathematics (6031BA or 6031BS) with Regular Track (6022), Computing Track (6023), Physical Mathematics Track (6024), Engineering Mathematics Track (6025), Actuarial/Financial Mathematics Track (6026), Natural/Life Sciences Track (6028)

CIPC: Mathematics (270101), Applied Mathematics (270301), Mathematics Teaching (131311)

Advisement

All Mathematics majors should see the Mathematics Department to be assigned an advisor. They should meet with their advisors at least once a year to help plan their programs and check on their progress. Call 801-626-6095 for more information or to schedule an appointment. (Also refer to the Department Advisor Referral List.)

Admission Requirements

Declare your program of study (see Program of Study (Major/Minor) Declaration) with your advisor. There are no special admission or application requirements for the Regular or Applied mathematics emphases. Mathematics

Teaching majors must meet the Teacher Education admission and licensure requirements (see Teacher Education Department).

General Education

Refer to Degree Requirements for either Bachelor of Science or Bachelor of Arts requirements. PHYS 2210 will fulfill requirements for both the major and general education. PSY 1010 (3) in the Social Sciences area is recommended for the Mathematics Teaching emphasis.

Language Courses Required to fulfill the BA (14 credit hours)

6 credit hours of foreign language
and the following language arts courses

MATH 1210 - Calculus I **Credits: (4)**

MATH 1220 - Calculus II **Credits: (4)**

Major Course Requirements for Applied Mathematics BS or BA Degree

The Applied Mathematics Program provides an opportunity for WSU students to apply mathematics to different fields. The program requires 19 credit hours of core lower division mathematics courses, a minimum of 12 credit hours of upper division applied mathematics courses and additional upper division courses in specified fields, including mathematics, so the total upper division credit hours reaches at least 40. To design a specific program different from the following tracks, students must get approval from a Mathematics Department advisor.

Lower Division Mathematics Courses Required for All Tracks (19 credit hours)

MATH 1200 - Mathematics Computer Laboratory
Credits: (1)

MATH 1210 - Calculus I **Credits: (4)**

MATH 1220 - Calculus II **Credits: (4)**

MATH 2210 - Calculus III **Credits: (4)**

MATH 2270 - Elementary Linear Algebra **Credits: (3)**

MATH 2280 - Ordinary Differential Equations
Credits: (3)

1. Regular Track

A traditional diversified program in applied mathematics.

Required Upper Division Mathematics Courses (12 credit hours)

MATH 3410 - Probability and Statistics I Credits: (3)

MATH 3550 - Introduction to Mathematical Modeling Credits: (3)

MATH 3710 - Boundary Value Problems Credits: (3) or

MATH 3280 - Dynamical Systems Credits: (3)

MATH 4610 - Numerical Analysis I Credits: (3)

Mathematics Electives (at least 12 credit hours)

Complete at least an additional 12 credit hours of upper division Mathematics courses.

Support Courses Required (6-10 credit hours)

Complete 2 calculus based courses outside the Mathematics Department, for example PHYS 2210 PS - Physics for Scientists and Engineers I (5), ECON 3030 - Managerial Economics (3), CHEM 3400 - Molecular Symmetry and Applied Math for Physical Chemistry (3), etc.

Graduate School Preparation

It is recommended that students planning on graduate work in Applied Mathematics take MATH 4210/MATH 4220 - Introductory Real Analysis II and all Mathematics courses in the future area of graduate study. See the Mathematics Department for counseling.

2. Computing Track

Additional Required Lower Division Courses (12 credit hours)

CS 1400 - Programming I Credits: (4)

CS 1410 - Object-Oriented Programming Credits: (4)

CS 2420 - Introduction to Data Structures and Algorithms Credits: (4) or

MATH 1630 - Discrete Mathematics Applied to Computing Credits: (4)

Required Upper Division Mathematics Courses (15 credit hours)

MATH 3410 - Probability and Statistics I Credits: (3)

MATH 3550 - Introduction to Mathematical Modeling Credits: (3)

MATH 3610 - Graph Theory Credits: (3)

MATH 4610 - Numerical Analysis I Credits: (3)

MATH 4620 - Numerical Analysis II Credits: (3) or

MATH 3620 - Enumeration Credits: (3) or

MATH 4160 - Introduction to Mathematical Cryptography Credits: (3) or

MATH 3450 - Advanced Statistical Methods Credits: (4)

Electives (at least 25 credit hours)

Complete at least an additional 25 credit hours of upper division courses in Computer Science or Mathematics. At least 6 of these credit hours must be in Computer Science.

3. Physical Mathematics Track

Required Upper Division Mathematics Courses (18 credit hours)

Complete 6 of the following courses

MATH 3280 - Dynamical Systems Credits: (3)

MATH 3410 - Probability and Statistics I Credits: (3)

MATH 3550 - Introduction to Mathematical Modeling Credits: (3)

MATH 3710 - Boundary Value Problems Credits: (3)

MATH 3810 - Complex Variables Credits: (3)

MATH 4610 - Numerical Analysis I **Credits: (3)**
MATH 4710 - Partial Differential Equations
Credits: (3)

Electives (at least 22 credit hours)

Complete at least an additional 22 credit hours of upper division courses in Chemistry, Geosciences, Mathematics, or Physics. At least 6 of these credit hours must be outside Mathematics.

4. Engineering Mathematics Track

Required Upper Division Mathematics Courses (18 credit hours)

Complete 6 of the following courses

MATH 3280 - Dynamical Systems **Credits: (3)**
MATH 3410 - Probability and Statistics I **Credits: (3)**
MATH 3550 - Introduction to Mathematical Modeling **Credits: (3)**
MATH 3710 - Boundary Value Problems **Credits: (3)**
MATH 3810 - Complex Variables **Credits: (3)**
MATH 4610 - Numerical Analysis I **Credits: (3)**
MATH 4620 - Numerical Analysis II **Credits: (3)**
MATH 4710 - Partial Differential Equations
Credits: (3)

Electives (at least 22 credit hours)

Complete at least an additional 22 credit hours of upper division Mathematics or upper division courses from the Engineering Technology programs. At least 6 of these credit hours must be outside of Mathematics.

5. Actuarial/Financial Mathematics Track

Required Upper Division Mathematics Courses (15 credit hours)

MATH 3410 - Probability and Statistics I **Credits: (3)**
MATH 3420 - Probability and Statistics II **Credits: (3)**

And three of the following courses

MATH 3550 - Introduction to Mathematical Modeling **Credits: (3)**
MATH 3710 - Boundary Value Problems **Credits: (3)**
MATH 4610 - Numerical Analysis I **Credits: (3)**
MATH 4710 - Partial Differential Equations
Credits: (3)
MATH 3450 - Advanced Statistical Methods
Credits: (4)

Electives (at least 25 credit hours)

Complete at least an additional 25 credit hours of upper division Mathematics courses or courses from the list below offered by the John B. Goddard School of Business and Economics:

ACTG 3110 - Intermediate Financial Accounting I
Credits: (3)
ACTG 3120 - Intermediate Financial Accounting II
Credits: (3)
ECON 3030 - Managerial Economics **Credits: (3)**
ECON 4010 - Intermediate Microeconomic Theory
Credits: (3)
ECON 4020 - Intermediate Macroeconomic Theory
Credits: (3)
ECON 4550 - Introduction to Econometrics
Credits: (3)
ECON 4560 - Mathematical Economics **Credits: (3)**
FIN 3200 - Financial Management **Credits: (3)**
FIN 3300 - Investments **Credits: (3)**
FIN 4400 - Financial Problems - Corporate Finance
Credits: (3)
MGMT 3010 - Organizational Behavior and Management
Credits: (3)
MKTG 3010 - Marketing Concepts and Practices
Credits: (3)
QUAN 3610 - Business Statistics II **Credits: (3)**

6. Natural/Life Sciences Track

Required Upper Division Mathematics Courses (12 credit hours)

MATH 3410 - Probability and Statistics I **Credits: (3)**
MATH 3550 - Introduction to Mathematical Modeling **Credits: (3)**

MATH 3710 - Boundary Value Problems **Credits:**

(3) or

MATH 3280 - Dynamical Systems **Credits: (3)**

MATH 4610 - Numerical Analysis I **Credits: (3)**

Electives (at least 28 credit hours)

Complete at least an additional 28 credit hours of upper division courses in Botany, Mathematics, Microbiology or Zoology. At least 6 of these credit hours must be outside of Mathematics.

Computational Statistics and Data Science (BS)

Program Prerequisite: Not required for Computational Statistics and Data Science.

Minor: No minor required

Grade Requirements: A grade of "C" or better in courses required for this major (a grade of "C-" is not acceptable), in addition to an overall 2.0 GPA and a 2.0 GPA in mathematics courses numbered 1210 or above.

Credit Hour Requirements: A minimum total of 120 credit hours are required for graduation; 48 of these are required within the major. A total of 40 upper division credit hours are required (courses numbered 3000 and above); at least nine (9) credit hours of upper division Mathematics must be completed at Weber State University.

Program Code: 6037BS

CIPC: 27.9999

Advisement

All Mathematics majors should see the Mathematics Department to be assigned an advisor. They should meet with their advisors at least once a year to help plan their programs and check on their progress. Call 801-626-6095 for more information or go to mathadvising.youcanbook.me to schedule an appointment. (Also refer to the Department Advisor Referral List.)

Use Grad MAPs to plan your degree.

Admission Requirements

Declare your program of study (see Program of Study (Major/Minor) Declaration) with your major department. There are no special admission or application requirements for the Regular Mathematics, Applied Mathematics, or Computational Statistics and Data Science majors. Mathematics Teaching majors must meet the Teacher Education admission and licensure requirements (See Teacher Education Department).

General Education

Refer to Degree Requirements for either Bachelor of Science or Bachelor of Arts requirements. COMM 1020 (HU), COMM 2110 (HU), ECON 2010 (SS), ECON

2020 (SS), and PHYS 2210 (PS) will fulfill requirements for both the major and general education.

Major Course Requirements for Computational Statistics and Data Science BS Degree

Required Lower Division Mathematics Courses Required (15 credit hours)

MATH 1210 - Calculus I **Credits: (4)**
MATH 1220 - Calculus II **Credits: (4)**
MATH 2210 - Calculus III **Credits: (4)**
MATH 2270 - Elementary Linear Algebra **Credits: (3)**

Required Computer Courses (20 credit hours)

CS 1400 - Programming I **Credits: (4)**
CS 1410 - Object-Oriented Programming **Credits: (4)**
CS 2420 - Introduction to Data Structures and Algorithms **Credits: (4)**
CS 2550 - Introduction to Database Design and SQL **Credits: (4)**
CS 3580 - Data Science Algorithms **Credits: (4)**

Required Upper Division Mathematics Courses (13 credit hours)

MATH 3410 - Probability and Statistics I **Credits: (3)**
MATH 3420 - Probability and Statistics II **Credits: (3)**
MATH 3450 - Advanced Statistical Methods **Credits: (4)**
MATH 4400 - Statistical Analysis of Big and Small Data **Credits: (3)**

Statistical Concepts Electives (3 credit hours)

Take 3 credit hours from the following:

- MATH 1040 QL - Introduction to Statistics
Credits: (3)
- QUAN 2600 - Business Statistics I **Credits: (3)**
- PSY 3600 - Statistics in Psychology **Credits: (3)**
- SOC 3600 - Social Statistics **Credits: (3)**

Business Communication Electives (3 credit hours)

Take 3 credit hours from the following:

- PS 3250 - Business Communication **Credits: (3)**
- MKTG 3010 - Marketing Concepts and Practices
Credits: (3)
- * COMM 1020 HU - Principles of Public
Speaking **Credits: (3)**
- * COMM 2110 HU CEL - Interpersonal and
Small Group Communication **Credits: (3)**

Math and Computing Electives (6 credit hours)

Take at least 6 credits from the following:

- MATH 2280 - Ordinary Differential Equations
Credits: (3)
- MATH 3550 - Introduction to Mathematical
Modeling **Credits: (3)**
- MATH 3610 - Graph Theory **Credits: (3)**
- MATH 3620 - Enumeration **Credits: (3)**
- MATH 4210 - Introductory Real Analysis I
Credits: (3)
- MATH 4220 - Introductory Real Analysis II
Credits: (3)
- MATH 4610 - Numerical Analysis I **Credits: (3)**
- MATH 4620 - Numerical Analysis II **Credits: (3)**
- MATH 4160 - Introduction to Mathematical
Cryptography **Credits: (3)**
- CS 2130 - Computational Structures **Credits: (4)**
- CS 3550 - Advanced Database Programming
Credits: (4)
- CS 4500 - Introduction to Artificial Intelligence
Credits: (4)
- CS 5600 - Machine Learning **Credits: (3)**

Electives (9 credit hours)

Take at least 9 credit hours from the following:

Business Principles

- BSAD 1010 - Introduction to Business **Credits: (3)**
- ACTG 2010 - Survey of Accounting I **Credits: (3)**
- ACTG 2020 - Survey of Accounting II **Credits: (3)**
- ACTG 3110 - Intermediate Financial Accounting I
Credits: (3)
- MKTG 3100 - Consumer Behavior **Credits: (3)**
- MKTG 3200 - Selling and Sales Management
Credits: (3)
- ART 2430 - Introduction to Graphic Design
Credits: (3)
- MGMT 3010 - Organizational Behavior and
Management **Credits: (3)**
- SCM 3050 - Operations and Supply Chain
Management **Credits: (3)**
- QUAN 3610 - Business Statistics II **Credits: (3)**
- * ECON 2010 SS - Principles of
Microeconomics **Credits: (3)**
- * ECON 2020 SS - Principles of
Macroeconomics **Credits: (3)**
- ECON 4550 - Introduction to Econometrics
Credits: (3)

Health Statistics

- HIM 3200 - Epidemiology and Biostatistics
Credits: (3)
- HIM 3210 - Advanced Epidemiology & Population
Health **Credits: (3)**
- HIM 3300 - Introduction to Quality Improvement
in Healthcare **Credits: (3)**
- HIM 3500 - Biomedical Research Support
Credits: (2)
- HIM 3550 - Healthcare Data Analytics **Credits: (3)**

Computing

- MIS 2010 - Business Computer Skills **Credits: (1)**
- MIS 2110 - Software Development I **Credits: (3)**
- MIS 2020 - Introduction to Information Systems
Credits: (3)
- MIS 3210 - Database Design and Implementation
Credits: (3)
- ^ CS 1030 - Foundations of Computing **Credits: (4)**
- CS 2450 - Software Engineering I **Credits: (4)**
- CS 2705 - Network Fundamentals and Design
Credits: (4)
- CS 2810 - Computer Architecture/Organization
Credits: (4)

[^] (CS 1030 Foundations of Computing is recommended to apply for an Institutional Certificate of Proficiency in Programming Essentials provided student has completed CS 1030, CS 1400, CS 1410, and CS 2420).

Science and Mapping

- * PHYS 2210 PS - Physics for Scientists and Engineers I **Credits: (5)**
- PHYS 2300 - Scientific Computing for Physical Systems **Credits: (3)**
- GEOG 4400 - Cartography and Map Design **Credits: (3)**
- GEO 3710 - Introduction to Geographic Information Systems **Credits: (4)**
- GEO 3720 - Geospatial Analysis **Credits: (4)**

Alternatively, 9 elective credits may be approved by the Department of Mathematics.

These courses are typically, but not limited to 3000 or 4000 level course, in the College of Science or in the College of Engineering, Applied Science and Technology, or in the Goddard School of Business and Economics.

Mathematics (BS)

All Mathematics Majors

Program Prerequisite: Not required for Mathematics and Applied Mathematics majors. Mathematics Teaching majors must meet the Teacher Education admission and licensure requirements (see Teacher Education Department).

Minor: Required only for the regular mathematics major.

Grade Requirements: A grade of "C" or better in courses required for this major (a grade of "C-" is not acceptable), in addition to an overall 2.0 GPA and a 2.0 GPA in mathematics classes numbered 1210 or above.

Credit Hour Requirements: A total of 120 credit hours are required for graduation; 31-46 of these are required within the major. A total of 40 upper division credit hours is required (courses numbered 3000 and above); at least nine credit hours of upper division Mathematics must be completed at Weber State University.

Program Code: Mathematics (6029BA or 6029BS), Mathematics Teaching (6030BA or 6030BS), Applied Mathematics (6031BA or 6031BS) with Regular Track (6022), Computing Track (6023), Physical Mathematics Track (6024), Engineering Mathematics Track (6025), Actuarial/Financial Mathematics Track (6026), Natural/Life Sciences Track (6028)

CIPC: Mathematics (270101), Applied Mathematics (270301), Mathematics Teaching (131311)

Advisement

All Mathematics majors should see the Mathematics Department to be assigned an advisor. They should meet with their advisors at least once a year to help plan their programs and check on their progress. Call 801-626-6095 for more information or to schedule an appointment. (Also refer to the Department Advisor Referral List.)

Admission Requirements

Declare your program of study (see Program of Study (Major/Minor) Declaration) with your advisor. There are no special admission or application requirements for the Regular or Applied mathematics emphases. Mathematics Teaching majors must meet the Teacher Education admission and licensure requirements (see Teacher Education Department).

General Education

Refer to Degree Requirements for either Bachelor of Science or Bachelor of Arts requirements. PHYS 2210 will fulfill requirements for both the major and general education. PSY 1010 (3) in the Social Sciences area is recommended for the Mathematics Teaching emphasis.

Major Course Requirements for Mathematics BS or BA Degree

Mathematics Courses Required (33 credit hours)

MATH 1210 - Calculus I **Credits: (4)**
MATH 1220 - Calculus II **Credits: (4)**
MATH 2210 - Calculus III **Credits: (4)**

MATH 2270 - Elementary Linear Algebra **Credits: (3)**

MATH 2280 - Ordinary Differential Equations
Credits: (3)

MATH 3110 - Foundations of Algebra **Credits: (3)**

MATH 4110 - Modern Algebra I **Credits: (3)**

MATH 4120 - Modern Algebra II **Credits: (3)** or
MATH 4320 - Topology **Credits: (3)**

MATH 4210 - Introductory Real Analysis I
Credits: (3) and

MATH 4220 - Introductory Real Analysis II
Credits: (3)

It is highly recommended that students planning on graduate work in Mathematics take Linear Algebra (MATH 3270) and Topology (MATH 4320) in addition to the above. See the Mathematics Department for counseling.

Mathematics Electives (at least 9 credit hours)

Complete any upper division Mathematics courses (not including any required courses) so that required mathematics courses and mathematics electives total at least 42 credit hours.

Minor

A minor is required or

CS 1400 - Programming I **Credits: (4)**

CS 1410 - Object-Oriented Programming **Credits: (4)**

and one course chosen from:

CS 2130 - Computational Structures **Credits: (4)**

CS 2420 - Introduction to Data Structures and Algorithms **Credits: (4)**

CS 2450 - Software Engineering I **Credits: (4)**

CS 2810 - Computer Architecture/Organization
Credits: (4)

MATH 4610 - Numerical Analysis I **Credits: (3)**

Support Courses Required (10 credit hours)

PHYS 2210 PS - Physics for Scientists and Engineers I **Credits: (5)**

PHYS 2220 - Physics for Scientists and Engineers II **Credits: (5)**

Graduate School Preparation

Mathematics Teaching (BS)

All Mathematics Majors

Program Prerequisite: Not required for Mathematics and Applied Mathematics majors. Mathematics Teaching majors must meet the Teacher Education admission and licensure requirements (see Teacher Education Department).

Minor: Required only for the regular mathematics major.

Grade Requirements: A grade of "C" or better in courses required for this major (a grade of "C-" is not acceptable), in addition to an overall 2.0 GPA and a 2.0 GPA in mathematics classes numbered 1210 or above.

Credit Hour Requirements: A total of 120 credit hours are required for graduation; 31-46 of these are required within the major. A total of 40 upper division credit hours is required (courses numbered 3000 and above); at least nine credit hours of upper division Mathematics must be completed at Weber State University.

Program Code: Mathematics (6029BA or 6029BS), Mathematics Teaching (6030BA or 6030BS), Applied Mathematics (6031BA or 6031BS) with Regular Track (6022), Computing Track (6023), Physical Mathematics Track (6024), Engineering Mathematics Track (6025), Actuarial/Financial Mathematics Track (6026), Natural/Life Sciences Track (6028)

CIPC: Mathematics (270101), Applied Mathematics (270301), Mathematics Teaching (131311)

Advisement

All Mathematics majors should see the Mathematics Department to be assigned an advisor. They should meet with their advisors at least once a year to help plan their programs and check on their progress. Call 801-626-6095 for more information or to schedule an appointment. (Also refer to the Department Advisor Referral List.)

Admission Requirements

Declare your program of study (see Program of Study (Major/Minor) Declaration) with your advisor. There are no special admission or application requirements for the Regular or Applied mathematics emphases. Mathematics

Teaching majors must meet the Teacher Education admission and licensure requirements (see Teacher Education Department).

General Education

Refer to Degree Requirements for either Bachelor of Science or Bachelor of Arts requirements. PHYS 2210 will fulfill requirements for both the major and general education. PSY 1010 (3) in the Social Sciences area is recommended for the Mathematics Teaching emphasis.

Major Course Requirements for Mathematics Teaching BS or BA Degree

Mathematics Courses Required (48 credit hours)

MATH 1210 - Calculus I **Credits: (4)**
MATH 1220 - Calculus II **Credits: (4)**
MATH 2210 - Calculus III **Credits: (4)**
MATH 2270 - Elementary Linear Algebra **Credits: (3)**

MATH 2280 - Ordinary Differential Equations **Credits: (3)** or
MATH 3550 - Introduction to Mathematical Modeling **Credits: (3)**

MATH 3110 - Foundations of Algebra **Credits: (3)**
or
MATH 4110 - Modern Algebra I **Credits: (3)**

MTHE 2120 - Geometry from a Teaching Perspective **Credits: (3)**
MATH 3120 - Foundations of Euclidean and Non-Euclidean Geometry **Credits: (3)**
MATH 3160 - Number Theory **Credits: (3)**
MTHE 3060 - Probability and Statistics from a Teaching Perspective **Credits: (3)**
MATH 3410 - Probability and Statistics I **Credits: (3)**
MTHE 4110 - Algebra from a Teaching Perspective **Credits: (3)**
MTHE 3010 - Methods and Technology for Teaching Secondary Mathematics **Credits: (3)**

MATH 4210 - Introductory Real Analysis I
Credits: (3)
One upper division MATH course not otherwise
required (3)

Support Courses Required (5-10 credit hours)

Complete either

PHYS 2210 PS - Physics for Scientists and
Engineers I **Credits: (5)**

or

CHEM 1210 PS - Principles of Chemistry I

Credits: (5) and

CHEM 1220 - Principles of Chemistry II **Credits:**
(5)

Note:

*A student must also complete requirements for a secondary
education licensure as determined by the Jerry and Vickie
Moyes College of Education.*

Mathematics, Applied (BS)

All Mathematics Majors

Program Prerequisite: Not required for Mathematics and Applied Mathematics majors. Mathematics Teaching majors must meet the Teacher Education admission and licensure requirements (see Teacher Education Department).

Minor: Required only for the regular mathematics major.

Grade Requirements: A grade of "C" or better in courses required for this major (a grade of "C-" is not acceptable), in addition to an overall 2.0 GPA and a 2.0 GPA in mathematics classes numbered 1210 or above.

Credit Hour Requirements: A total of 120 credit hours are required for graduation; 31-46 of these are required within the major. A total of 40 upper division credit hours is required (courses numbered 3000 and above); at least nine credit hours of upper division Mathematics must be completed at Weber State University.

Program Code: Mathematics (6029BA or 6029BS), Mathematics Teaching (6030BA or 6030BS), Applied Mathematics (6031BA or 6031BS) with Regular Track (6022), Computing Track (6023), Physical Mathematics Track (6024), Engineering Mathematics Track (6025), Actuarial/Financial Mathematics Track (6026), Natural/Life Sciences Track (6028)

CIPC: Mathematics (270101), Applied Mathematics (270301), Mathematics Teaching (131311)

Advisement

All Mathematics majors should see the Mathematics Department to be assigned an advisor. They should meet with their advisors at least once a year to help plan their programs and check on their progress. Call 801-626-6095 for more information or to schedule an appointment. (Also refer to the Department Advisor Referral List.)

Admission Requirements

Declare your program of study (see Program of Study (Major/Minor) Declaration) with your advisor. There are no special admission or application requirements for the Regular or Applied mathematics emphases. Mathematics

Teaching majors must meet the Teacher Education admission and licensure requirements (see Teacher Education Department).

General Education

Refer to Degree Requirements for either Bachelor of Science or Bachelor of Arts requirements. PHYS 2210 will fulfill requirements for both the major and general education. PSY 1010 (3) in the Social Sciences area is recommended for the Mathematics Teaching emphasis.

Major Course Requirements for Applied Mathematics BS or BA Degree

The Applied Mathematics Program provides an opportunity for WSU students to apply mathematics to different fields. The program requires 19 credit hours of core lower division mathematics courses, a minimum of 12 credit hours of upper division applied mathematics courses and additional upper division courses in specified fields, including mathematics, so the total upper division credit hours reaches at least 40. To design a specific program different from the following tracks, students must get approval from a Mathematics Department advisor.

Lower Division Mathematics Courses Required for All Tracks (19 credit hours)

MATH 1200 - Mathematics Computer Laboratory
Credits: (1)

MATH 1210 - Calculus I **Credits: (4)**

MATH 1220 - Calculus II **Credits: (4)**

MATH 2210 - Calculus III **Credits: (4)**

MATH 2270 - Elementary Linear Algebra **Credits: (3)**

MATH 2280 - Ordinary Differential Equations
Credits: (3)

1. Regular Track

A traditional diversified program in applied mathematics.

Required Upper Division Mathematics Courses (12 credit hours)

MATH 3410 - Probability and Statistics I **Credits: (3)**

MATH 3550 - Introduction to Mathematical Modeling **Credits: (3)**

MATH 3710 - Boundary Value Problems **Credits: (3)** or

MATH 3280 - Dynamical Systems **Credits: (3)**

MATH 4610 - Numerical Analysis I **Credits: (3)**

Mathematics Electives (at least 12 credit hours)

Complete at least an additional 12 credit hours of upper division Mathematics courses.

Support Courses Required (6-10 credit hours)

Complete 2 calculus based courses outside the Mathematics Department, for example PHYS 2210 PS - Physics for Scientists and Engineers I (5), ECON 3030 - Managerial Economics (3), CHEM 3400 - Molecular Symmetry and Applied Math for Physical Chemistry (3), etc.

Graduate School Preparation

It is recommended that students planning on graduate work in Applied Mathematics take MATH 4210/MATH 4220 - Introductory Real Analysis II and all Mathematics courses in the future area of graduate study. See the Mathematics Department for counseling.

2. Computing Track

Additional Required Lower Division Courses (12 credit hours)

CS 1400 - Programming I **Credits: (4)**

CS 1410 - Object-Oriented Programming **Credits: (4)**

CS 2420 - Introduction to Data Structures and Algorithms **Credits: (4)** or

MATH 1630 - Discrete Mathematics Applied to Computing **Credits: (4)**

Required Upper Division Mathematics Courses (15 credit hours)

MATH 3410 - Probability and Statistics I **Credits: (3)**

MATH 3550 - Introduction to Mathematical Modeling **Credits: (3)**

MATH 3610 - Graph Theory **Credits: (3)**

MATH 4610 - Numerical Analysis I **Credits: (3)**

MATH 4620 - Numerical Analysis II **Credits: (3)** or

MATH 3620 - Enumeration **Credits: (3)** or

MATH 4160 - Introduction to Mathematical Cryptography **Credits: (3)** or

MATH 3450 - Advanced Statistical Methods **Credits: (4)**

Electives (at least 25 credit hours)

Complete at least an additional 25 credit hours of upper division courses in Computer Science or Mathematics. At least 6 of these credit hours must be in Computer Science.

3. Physical Mathematics Track

Required Upper Division Mathematics Courses (18 credit hours)

Complete 6 of the following courses

MATH 3280 - Dynamical Systems **Credits: (3)**

MATH 3410 - Probability and Statistics I **Credits: (3)**

MATH 3550 - Introduction to Mathematical Modeling **Credits: (3)**

MATH 3710 - Boundary Value Problems **Credits: (3)**

MATH 3810 - Complex Variables **Credits: (3)**

MATH 4610 - Numerical Analysis I **Credits: (3)**

MATH 4710 - Partial Differential Equations **Credits: (3)**

Electives (at least 22 credit hours)

Complete at least an additional 22 credit hours of upper division courses in Chemistry, Geosciences, Mathematics, or Physics. At least 6 of these credit hours must be outside Mathematics.

4. Engineering Mathematics Track

Required Upper Division Mathematics Courses (18 credit hours)

Complete 6 of the following courses

- MATH 3280 - Dynamical Systems **Credits: (3)**
- MATH 3410 - Probability and Statistics I **Credits: (3)**
- MATH 3550 - Introduction to Mathematical Modeling **Credits: (3)**
- MATH 3710 - Boundary Value Problems **Credits: (3)**
- MATH 3810 - Complex Variables **Credits: (3)**
- MATH 4610 - Numerical Analysis I **Credits: (3)**
- MATH 4620 - Numerical Analysis II **Credits: (3)**
- MATH 4710 - Partial Differential Equations **Credits: (3)**

Electives (at least 22 credit hours)

Complete at least an additional 22 credit hours of upper division Mathematics or upper division courses from the Engineering Technology programs. At least 6 of these credit hours must be outside of Mathematics.

5. Actuarial/Financial Mathematics Track

Required Upper Division Mathematics Courses (15 credit hours)

- MATH 3410 - Probability and Statistics I **Credits: (3)**
- MATH 3420 - Probability and Statistics II **Credits: (3)**

And three of the following courses

- MATH 3550 - Introduction to Mathematical Modeling **Credits: (3)**
- MATH 3710 - Boundary Value Problems **Credits: (3)**
- MATH 4610 - Numerical Analysis I **Credits: (3)**
- MATH 4710 - Partial Differential Equations **Credits: (3)**
- MATH 3450 - Advanced Statistical Methods **Credits: (4)**

Electives (at least 25 credit hours)

Complete at least an additional 25 credit hours of upper division Mathematics courses or courses from the list below offered by the John B. Goddard School of Business and Economics:

- ACTG 3110 - Intermediate Financial Accounting I **Credits: (3)**
- ACTG 3120 - Intermediate Financial Accounting II **Credits: (3)**
- ECON 3030 - Managerial Economics **Credits: (3)**
- ECON 4010 - Intermediate Microeconomic Theory **Credits: (3)**
- ECON 4020 - Intermediate Macroeconomic Theory **Credits: (3)**
- ECON 4550 - Introduction to Econometrics **Credits: (3)**
- ECON 4560 - Mathematical Economics **Credits: (3)**
- FIN 3200 - Financial Management **Credits: (3)**
- FIN 3300 - Investments **Credits: (3)**
- FIN 4400 - Financial Problems - Corporate Finance **Credits: (3)**
- MGMT 3010 - Organizational Behavior and Management **Credits: (3)**
- MKTG 3010 - Marketing Concepts and Practices **Credits: (3)**
- QUAN 3610 - Business Statistics II **Credits: (3)**

6. Natural/Life Sciences Track

Required Upper Division Mathematics Courses (12 credit hours)

- MATH 3410 - Probability and Statistics I **Credits: (3)**
- MATH 3550 - Introduction to Mathematical Modeling **Credits: (3)**
- MATH 3710 - Boundary Value Problems **Credits: (3)** or
- MATH 3280 - Dynamical Systems **Credits: (3)**
- MATH 4610 - Numerical Analysis I **Credits: (3)**

Electives (at least 28 credit hours)

Complete at least an additional 28 credit hours of upper division courses in Botany, Mathematics, Microbiology or Zoology. At least 6 of these credit hours must be outside of Mathematics.

Mathematics Minor

Mathematics

Grade Requirements: A grade of "C" or better in all courses used toward the minor (a grade of "C-" is not acceptable).

Credit Hour Requirements: Minimum of 20 credit hours for regular emphasis and 26 credit hours for Mathematics Teaching minor. At least one upper-division mathematics course for three credit hours must be completed at Weber State University.

Program Code: Mathematics (6029), Mathematics Teaching (6030)

CIPC: Mathematics (270101), Mathematics Teaching (131311)

Students who select the Mathematics Teaching Minor must satisfy the Teacher Education admission and licensure requirements (see Teacher Education Department).

Course Requirements for Mathematics Minor (Regular Emphasis)

Mathematics Courses Required (11 credit hours)

MATH 1210 - Calculus I **Credits: (4)**

MATH 1220 - Calculus II **Credits: (4)**

MATH 2270 - Elementary Linear Algebra **Credits:
(3)**

Electives (9-10 credit hours)

Take three courses chosen from the following:

MATH 2210 - Calculus III **Credits: (4)**

MATH 2280 - Ordinary Differential Equations
Credits: (3)

any upper division mathematics courses (courses
numbered 3000 and higher)

Mathematics Teaching Minor

Mathematics

Grade Requirements: A grade of "C" or better in all courses used toward the minor (a grade of "C-" is not acceptable).

Credit Hour Requirements: Minimum of 26 credit hours for Mathematics Teaching minor. At least one upper-division mathematics course for three credit hours must be completed at Weber State University.

Program

Code: Mathematics (6029), Mathematics Teaching (6030)

CIPC: Mathematics (270101), Mathematics Teaching (131311)

Students who select the Mathematics Teaching Minor must satisfy the Teacher Education admission and licensure requirements (see Teacher Education Department).

A student who is ready to take calculus is considered prepared for the Mathematics Teaching Minor.

Course Requirements for Mathematics Teaching Minor

Mathematics Courses Required (26 credit hours)

MATH 1210 - Calculus I **Credits: (4)**
MATH 1220 - Calculus II **Credits: (4)**
MTHE 2120 - Geometry from a Teaching
Perspective **Credits: (3)**
MATH 2270 - Elementary Linear Algebra **Credits:
(3)**

MATH 3110 - Foundations of Algebra **Credits: (3)**
or
MATH 4110 - Modern Algebra I **Credits: (3)**

MTHE 3010 - Methods and Technology for
Teaching Secondary Mathematics **Credits:
(3)**

MTHE 3060 - Probability and Statistics from a
Teaching Perspective **Credits: (3)**
MTHE 4110 - Algebra from a Teaching
Perspective **Credits: (3)**

Mathematics Departmental Honors

Please see weber.edu/honors/contracts.html for a list of current Departmental Honors contracts and Departmental Honors Advisors. For additional information about the Honors Program, please refer to the Honors Program section of the WSU Catalog.

Developmental Mathematics Program

Director: Dr. Kathryn Van Wagoner

Advisor & Telephone Contact: Katrina Marriott, 801-626-7451

Admin Asst. & Telephone Contact: Shawnette Horton, 801-626-7585

Email Contact: devmath@weber.edu

Location: Tracy hall Science Center 207

Instructors: Brenda Acor, Loyal Baker, Christopher Dunn, Amber Hansen, David Imig, Christine Jennings-Lewis, Charity Jones, Debi McKee, Janette Penrod, Darrell Poore, Carrie Quesnell, Michelle Rich, and Kassidy Symonds

The Developmental Mathematics Program prepares students to take the Quantitative Literacy courses offered by the Mathematics Department. See the Core Requirements listed under the General Education Requirements of this catalog.

For more information about our courses or assistance selecting the best course for your needs:
www.weber.edu/mathoptions

Placement in Mathematics Courses

To prevent delay of graduation, all students requiring developmental courses should begin those courses immediately and stay registered in mathematics until completing a Quantitative Literacy course. Developmental Math courses provide foundational skills necessary for most college level courses. See Math Placement for details on our placement options and Choose Your Math Path for course options.

Course Delivery Options

Individual students have individual learning needs. The Developmental Math Program offers three types of courses to meet student learning needs.

Inquiry & Exploration Learning (IEL) - Students explore and solve real-world problems collaboratively in class with instructor guidance. Homework is completed online. In-class workbook and tests are on paper. Classes taught in this format: MATH 0950, MATH 0970, and MATH 1010.

Mastery-Based Learning (MBL) - Students take notes from videos or the textbook before class and collaboratively work on homework in class with instructor guidance. The videos, textbook, homework, quizzes, and tests are all online. Classes taught in this format: MATH 0950, MATH 0990, and MATH 1010.

Online Learning (ONL) - Online classes are mastery-based learning and completed entirely online with no face-to-face class meetings. All materials are online. Computerized quizzes and tests must be proctored in an approved location. Classes taught in this format: MATH 0950, 0990, and 1010.

Get more information at www.weber.edu/mathoptions or email devmath@weber.edu

Department of Microbiology

Department Chair: Matthew Domek

Location: Tracy Hall Science Center, Room 450

Telephone: Katie Nelson, 801-626-6949

Professors: Michele Culumber, Matthew Domek, William Lorowitz, Karen Nakaoka, Craig Oberg; **Assistant**

Professors: Daniel Clark, Matthew Crook, Katrina Twing, and Lisa Wiltbank

Microbiology is the study of microorganisms (bacteria, viruses, algae, fungi, and protozoa) including their structure, metabolism, distribution, and ecological relationships. Knowledge gained by microbiologists leads to a better understanding of molecular-level life processes and to beneficial applications in agriculture, industry, and medicine. The field is expanding, with special emphasis being given to genetic engineering, biotechnology, cell culture, disease and the immune response, production and storage of food, research and development and quality assurance of industrial products, disposal and detoxification of wastes, and the monitoring of environmental quality.

Interdisciplinary Programs

The Department of Microbiology contributes courses and faculty expertise to the interdisciplinary Environmental Science major (BS) sponsored by the College of Science. In addition, the department participates in A.S. Biology.

Microbiology (BS), Medical Microbiology Emphasis

CIPC: 260502

Microbiology majors pursuing this emphasis should consult the appropriate advisor. The courses listed below are for the Bachelors of Science (BS) Degree in Microbiology with an emphasis in Medical Microbiology. The total number of credits required for the emphasis are the same as those required for the Microbiology degree, but are more specifically defined. An emphasis is not a major. Your major will be Microbiology with an emphasis in Medical Microbiology.

Students considering application to medical, dental, veterinary, physical therapy, optometry, and pharmacy schools should consult the beginning of the College of Science section of this catalog. Furthermore, they should meet with the advisors of these programs, each of whom is listed in that section. The Department of Microbiology offers lower and upper level courses that provide superb training for examinations such as the Medical College Admissions Test (MCAT), as well as medical school courses. Students should meet with the appropriate advisor for specific course suggestions. For information see <https://www.weber.edu/premedicalprofessionalprograms>

Medical schools do not accept AP or CELP credits in English, Math, or Science courses.

Students interested in Graduate School should discuss their plans with the major advisor.

Microbiology Major

Program Prerequisite: Not required.

Minor: Not required. However, Microbiology majors will meet the requirements for a minor in Chemistry. If desired for another program, a Microbiology Minor is offered. Please see "Microbiology Minor" for requirements.

Grade Requirements: An overall GPA of 2.00 or higher in Microbiology courses is required for this major in addition to an overall GPA of 2.00 or higher. Also refer to the General Grade Requirements for graduation.

Credit Hour Requirements: A total of 120 credit hours is required for graduation; a minimum of 71 credits is required within the major. A total of 40 upper division credit hours is required (courses numbered 3000 and above).

Program Code: 6015BS and emphasis 6042 (Medical Microbiology)

Advisement

All Microbiology students are encouraged to meet with a faculty advisor at least annually for course and program advisement. Call 801-626-6949 for more information or to schedule an appointment. (Also refer to the Department Advisor Referral List.) Please note, careful planning is essential as most courses have prerequisites and some upper division courses are only offered in one semester.

Use Grad MAPs to plan your degree. They can be found at <https://apps.weber.edu/gradmaps>

Admission Requirements

Declare your program of study with the Microbiology Department. No special admission or application requirements are needed for this program. However, students should meet with an advisor to plan and declare their program of study.

General Education

Refer to Degree Requirements for Bachelor of Science requirements. The following courses are required for the Microbiology major and will also satisfy general education requirements: MICR 2054 LS - Principles of Microbiology, CHEM 1210 PS - Principles of Chemistry I, PHYS 1010 PS - Elementary Physics or PHYS 2010 PS - College Physics I.

Required Core Microbiology Major Courses (19 credit hours)

MICR 2054 LS - Principles of Microbiology

Credits: (4)

MICR 3053 - Microbiological Procedures

Credits: (3)

MICR 3154 - Microbial Ecology

Credits: (4)

MICR 4054 - Microbial Physiology

Credits: (4)

MICR 4154 - Microbial Genetics

Credits: (4)

Foundational Medical Microbiology Courses (9 credit hours)

MICR 3254 - Immunology

Credits: (4)

MICR 3305 - Medical Microbiology

Credits: (5)

Medical Microbiology Elective Courses (11 credit hours)

Select 11 credit hours from the following categories A-C: (may not be counted twice except where noted in the course description)

Category A: Upper-division Microbiology Courses

- MICR 3012 - Microbiology and Global Public Health **Credits: (2)**
- MICR 3403 - Tropical Diseases **Credits: (3)**
- MICR 3484 - Environmental Microbiology **Credits: (4)**
- MICR 3502 SUS - Environmental Health **Credits: (2)**
- MICR 3853 - Food Microbiology **Credits: (3)**
- MICR 4252 - Cell Culture **Credits: (2)**
- MICR 4554 - Virology **Credits: (4)**

Category B: Experience in Microbiology Courses

- MICR 2600 - Laboratory Safety **Credits: (1)** or CHEM 2600 - Laboratory Safety **Credits: (1)**
- MICR 2920 - Short Courses, Workshop, Institutes and Special Programs **Credits: (1-3)**
- MICR 4800 - Directed Research **Credits: (1-2) ***
- MICR 4830 - Directed Readings **Credits: (1-2) ***
- MICR 4920 - Short Courses, Workshops, Institutes and Special Programs **Credits: (1-3)**
- MICR 4991 - Microbiology Seminar **Credits: (1)**

**No more than 3 credit hours of MICR 4800 and no more than 2 credit hours of MICR 4830 may count toward the major.*

Category C: Other elective courses in the College of Science (maximum 4 credit hours)

- BTNY 3504 - Mycology **Credits: (4)**
- ZOOL 3200 - Cell Biology **Credits: (4)**
- ZOOL 3300 - Genetics **Credits: (4)**

Required Support Courses (26-29 credit hours)

A grade of D- or better is required in each support course.

Chemistry (19 credit hours)

- CHEM 1210 PS - Principles of Chemistry I **Credits: (5)**
- CHEM 1220 - Principles of Chemistry II **Credits: (5)**
- CHEM 2310 - Organic Chemistry I **Credits: (4)**
- CHEM 2315 - Organic Chemistry I Lab **Credits: (1)**
- CHEM 3070 - Biochemistry I **Credits: (3)**
- CHEM 3075 - Biochemistry I Lab **Credits: (1)**

Math (minimum of 1 course from the following)

- MATH 1050 QL - College Algebra **Credits: (4)** or
- MATH 1080 QL - Pre-calculus **Credits: (5)** or
- MATH 1210 - Calculus I **Credits: (4)**

Physics (minimum of 1 course from the following)

- PHYS 1010 PS - Elementary Physics **Credits: (3)**
or
- PHYS 2010 PS - College Physics I **Credits: (5)**
- PHYS 2019 - College Physics I Lab **Credits: (0)**
or
- PHYS 2020 - College Physics II **Credits: (5)**
- PHYS 2029 - College Physics II Lab **Credits: (0)**
or
- PHYS 2210 PS - Physics for Scientists and Engineers I **Credits: (5)**
- PHYS 2219 - Physics for Scientists and Engineers I Lab **Credits: (0)** or
- PHYS 2220 - Physics for Scientists and Engineers II **Credits: (5)**
- PHYS 2229 - Physics for Scientists and Engineers II Lab **Credits: (0)**

Life Science Course Electives (6 credit hours)

Minimum of 6 credit hours from 2 Life Science courses in the following:

Botany

- BTNY 1203 LS - Plant Biology **Credits: (3)**
- BTNY 2104 - Plant Form and Function **Credits: (4)**
- BTNY 2114 - Evolutionary Survey of Plants **Credits: (4)**
- BTNY 3105 - Anatomy of Vascular Plants **Credits: (4)**
- BTNY 3204 - Plant Physiology **Credits: (4)**
- BTNY 3214 - Soils **Credits: (4)**
- BTNY 3454 - Plant Ecology **Credits: (4)**
- BTNY 3473 - Plant Geography **Credits: (3)**
- BTNY 3624 - Taxonomy of Vascular Plants **Credits: (4)**

Zoology

- ZOOL 1010 LS - Animal Biology **Credits: (3)**
- ZOOL 1110 LS - Principles of Zoology **Credits: (4)**
- ZOOL 2100 - Human Anatomy **Credits: (4)**
- ZOOL 2200 LS - Human Physiology **Credits: (4)**
- ZOOL 3450 - Ecology **Credits: (4)**
- ZOOL 3470 - Zoogeography **Credits: (3)**
- ZOOL 3500 - Conservation Biology **Credits: (3)**
- ZOOL 3720 - Evolution **Credits: (3)**
- ZOOL 4050 - Comparative Vertebrate Anatomy **Credits: (4)**
- ZOOL 4100 - Vertebrate Embryology **Credits: (4)**
- ZOOL 4120 - Histology **Credits: (4)**
- ZOOL 4210 - Advanced Human Physiology **Credits: (4)**
- ZOOL 4220 - Endocrinology **Credits: (4)**
- ZOOL 4300 - Research Applications in Genetics **Credits: (4)**
- ZOOL 4470 - Wildlife Ecology and Management **Credits: (4)**
- ZOOL 4480 - Aquatic Ecology **Credits: (4)**
- ZOOL 4490 - Marine Ecology **Credits: (4)**
- ZOOL 4640 - Entomology **Credits: (4)**
- ZOOL 4650 - Ichthyology **Credits: (4)**
- ZOOL 4660 - Herpetology **Credits: (4)**
- ZOOL 4670 - Ornithology **Credits: (4)**
- ZOOL 4680 - Mammalogy **Credits: (4)**

Microbiology (BS)

Areas of Emphasis

Select at least one of the following areas of emphasis:

- Microbiology (BS), Microbiology Major Emphasis
- Microbiology (BS), Industrial Microbiology and Biotechnology Emphasis
- Microbiology (BS), Medical Microbiology Emphasis
- Microbiology (BS), Public and Environmental Health Emphasis

Microbiology (BS), Industrial Microbiology and Biotechnology Emphasis

Microbiology majors pursuing this emphasis should consult the appropriate advisor. The courses listed below are for the Bachelors of Science (BS) Degree in Microbiology with an emphasis in Industrial Microbiology and Biotechnology. The total number of credits required for the emphasis are the same as those required for the Microbiology degree, but are more specifically defined. An emphasis is not a major. Your major will be Microbiology with an emphasis in Industrial Microbiology and Biotechnology.

Students interested in Graduate School should discuss their plans with the major advisor.

Microbiology Major

- Program Prerequisite:** Not required.
- Minor:** Not required. However, Microbiology majors will meet the requirements for a minor in Chemistry. If desired for another program, a Microbiology Minor is offered. Please see "Microbiology Minor" for requirements.
- Grade Requirements:** An overall GPA of 2.00 or higher in Microbiology courses is required for this major in addition to an overall GPA of 2.00 or higher. Also refer to the General Grade Requirements for graduation.
- Credit Hour Requirements:** A total of 120 credit hours is required for graduation; a minimum of 71 credits is required within the major. A total of 40 upper division credit hours is required (courses numbered 3000 and above).

Program Code: 6015BS and emphasis code 6041
(Industrial Microbiology and Biotechnology)
CIPC: 260502

Advisement

All Microbiology students are encouraged to meet with a faculty advisor at least annually for course and program advisement. Call 801-626-6949 for more information or to schedule an appointment. (Also refer to the [Department Advisor Referral List](#).) Please note, careful planning is essential as most courses have prerequisites and some upper division courses are only offered in one semester.

Use Grad MAPs to plan your degree. They can be found at <https://apps.weber.edu/gradmaps>

Admission Requirements

Declare your program of study with the Microbiology Department. No special admission or application requirements are needed for this program. However, students should meet with an advisor to plan and declare their program of study.

General Education

Refer to [Degree Requirements](#) for Bachelor of Science requirements. The following courses are required for the Microbiology major and will also satisfy general education requirements: MICR 2054 LS - Principles of Microbiology, CHEM 1210 PS - Principles of Chemistry I, PHYS 1010 PS - Elementary Physics or PHYS 2010 PS - College Physics I.

Required Core Microbiology Major Courses (19 credit hours)

- MICR 2054 LS - Principles of Microbiology
Credits: (4)
- MICR 3053 - Microbiological Procedures **Credits: (3)**
- MICR 3154 - Microbial Ecology **Credits: (4)**
- MICR 4054 - Microbial Physiology **Credits: (4)**
- MICR 4154 - Microbial Genetics **Credits: (4)**

Foundational Industrial Microbiology and Biotechnology Courses (9 credit hours)

- MICR 3853 - Food Microbiology **Credits: (3)**
- MICR 4252 - Cell Culture **Credits: (2)**

MICR 4354 - Industrial Microbiology and Biotechnology **Credits: (4)**

BTNY 3504 - Mycology **Credits: (4)**
ZOOL 3200 - Cell Biology **Credits: (4)**
ZOOL 3300 - Genetics **Credits: (4)**

Industrial Microbiology and Biotechnology Elective Courses (11 credit hours)

Required Support Courses (26-29 credit hours)

Select 11 credit hours from the following categories A-C (may not be counted twice except where noted in the course description):

A grade of D- or better is required in each support course.

Category A: Upper-division Microbiology Courses

Chemistry (19 credit hours)

MICR 3012 - Microbiology and Global Public Health **Credits: (2)**
MICR 3254 - Immunology **Credits: (4)**
MICR 3305 - Medical Microbiology **Credits: (5)**
MICR 3403 - Tropical Diseases **Credits: (3)**
MICR 3484 - Environmental Microbiology **Credits: (4)**
MICR 3502 SUS - Environmental Health **Credits: (2)**
MICR 3753 - Geomicrobiology **Credits: (3)**
MICR 4554 - Virology **Credits: (4)**

CHEM 1210 PS - Principles of Chemistry I **Credits: (5)**
CHEM 1220 - Principles of Chemistry II **Credits: (5)**
CHEM 2310 - Organic Chemistry I **Credits: (4)**
CHEM 2315 - Organic Chemistry I Lab **Credits: (1)**
CHEM 3070 - Biochemistry I **Credits: (3)**
CHEM 3075 - Biochemistry I Lab **Credits: (1)**

Category B: Experience in Microbiology Courses

Math (minimum of 1 course from the following)

MICR 2600 - Laboratory Safety **Credits: (1)** or
CHEM 2600 - Laboratory Safety **Credits: (1)**

MICR 2920 - Short Courses, Workshop, Institutes and Special Programs **Credits: (1-3)**
MICR 4800 - Directed Research **Credits: (1-2) ***
MICR 4830 - Directed Readings **Credits: (1-2) ***
MICR 4920 - Short Courses, Workshops, Institutes and Special Programs **Credits: (1-3)**
MICR 4991 - Microbiology Seminar **Credits: (1)**

MATH 1050 QL - College Algebra **Credits: (4)** or
MATH 1080 QL - Pre-calculus **Credits: (5)** or
MATH 1210 - Calculus I **Credits: (4)**

**No more than 3 credit hours of MICR 4800 and no more than 2 credit hours of MICR 4830 may count toward the major.*

Category C: Other elective courses in the College of Science (maximum 4 credit hours)

Physics (minimum of 1 course from the following)

PHYS 1010 PS - Elementary Physics **Credits: (3)**
or
PHYS 2010 PS - College Physics I **Credits: (5)**
PHYS 2019 - College Physics I Lab **Credits: (0)**
or
PHYS 2020 - College Physics II **Credits: (5)**
PHYS 2029 - College Physics II Lab **Credits: (0)**
or
PHYS 2210 PS - Physics for Scientists and Engineers I **Credits: (5)**
PHYS 2219 - Physics for Scientists and Engineers I Lab **Credits: (0)** or
PHYS 2220 - Physics for Scientists and Engineers II **Credits: (5)**

PHYS 2229 - Physics for Scientists and
Engineers II Lab **Credits: (0)**

Life Science Course Electives (6 credit hours)

*Minimum of 6 credit hours from 2 Life Science courses in
the following:*

ZOOL 4490 - Marine Ecology **Credits: (4)**
ZOOL 4640 - Entomology **Credits: (4)**
ZOOL 4650 - Ichthyology **Credits: (4)**
ZOOL 4660 - Herpetology **Credits: (4)**
ZOOL 4670 - Ornithology **Credits: (4)**
ZOOL 4680 - Mammalogy **Credits: (4)**

Botany

BTNY 1203 LS - Plant Biology **Credits: (3)**
BTNY 2104 - Plant Form and Function **Credits:
(4)**
BTNY 2114 - Evolutionary Survey of Plants
Credits: (4)
BTNY 3105 - Anatomy of Vascular Plants

ZOOL 4480 - Aquatic Ecology **Credits: (4)**

Microbiology (BS), Microbiology Major Emphasis

Microbiology majors should consult the appropriate advisor. The courses listed below are for the Bachelors of Science (BS) Degree in Microbiology with an emphasis in Microbiology. The total number of credits required for the emphasis are the same as those required for the Microbiology degree.

Students interested in Graduate School should discuss their plans with the major advisor.

Microbiology Major

Program Prerequisite: Not required.

Minor: Not required. However, Microbiology majors will meet the requirements for a minor in Chemistry. If desired for another program, a Microbiology Minor is offered. Please see "Microbiology Minor" for requirements.

Grade Requirements: An overall GPA of 2.00 or higher in Microbiology courses is required for this major in addition to an overall GPA of 2.00 or higher. Also refer to the General Grade Requirements for graduation.

Credit Hour Requirements: A total of 120 credit hours is required for graduation; a minimum of 71 credits is required within the major. A total of 40 upper division credit hours is required (courses numbered 3000 and above).

Program Code: 6015BS and emphasis 6044 (Microbiology)

CIPC: 260502

Advisement

All Microbiology students are encouraged to meet with a faculty advisor at least annually for course and program advisement. Call 801-626-6949 for more information or to schedule an appointment. (Also refer to the Department Advisor Referral List.) Please note, careful planning is essential as most courses have prerequisites and some upper division courses are only offered in one semester.

Use Grad MAPs to plan your degree. They can be found at <https://apps.weber.edu/gradmaps>

Admission Requirements

Declare your program of study with the Microbiology Department. No special admission or application requirements are needed for this program. However,

students should meet with an advisor to plan and declare their program of study.

General Education

Refer to Degree Requirements for Bachelor of Science requirements. The following courses are required for the Microbiology major and will also satisfy general education requirements: MICR 2054 LS - Principles of Microbiology, CHEM 1210 PS - Principles of Chemistry I, PHYS 1010 PS - Elementary Physics or PHYS 2010 PS - College Physics I.

Major Course Requirements for Microbiology BS Degree

Required Core Microbiology Major Courses (19 credit hours)

MICR 2054 LS - Principles of Microbiology

Credits: (4)

MICR 3053 - Microbiological Procedures

Credits: (3)

MICR 3154 - Microbial Ecology

Credits: (4)

MICR 4054 - Microbial Physiology

Credits: (4)

MICR 4154 - Microbial Genetics

Credits: (4)

Microbiology Major Elective Courses (20 credit hours)

Select 20 credit hours from the following categories A-C:

Category A: Upper-division Microbiology Courses (minimum 8 credit hours)

MICR 3012 - Microbiology and Global Public Health

Credits: (2)

MICR 3254 - Immunology

Credits: (4)

MICR 3305 - Medical Microbiology

Credits: (5)

MICR 3403 - Tropical Diseases

Credits: (3)

MICR 3484 - Environmental Microbiology

Credits: (4)

MICR 3502 SUS - Environmental Health

Credits: (2)

MICR 3753 - Geomicrobiology

Credits: (3)

MICR 3853 - Food Microbiology

Credits: (3)

MICR 4252 - Cell Culture

Credits: (2)

MICR 4354 - Industrial Microbiology and

Biotechnology

Credits: (4)

MICR 4554 - Virology

Credits: (4)

Category B: Experience in Microbiology Courses

MICR 2600 - Laboratory Safety **Credits: (1)** or
CHEM 2600 - Laboratory Safety **Credits: (1)**

MICR 2920 - Short Courses, Workshop, Institutes
and Special Programs **Credits: (1-3)**

MICR 4800 - Directed Research **Credits: (1-2) ***

MICR 4830 - Directed Readings **Credits: (1-2) ***

MICR 4920 - Short Courses, Workshops,
Institutes and Special Programs **Credits: (1-3)**

MICR 4991 - Microbiology Seminar **Credits: (1)**

**No more than 3 credit hours of MICR 4800 and
no more than 2 credit hours of MICR 4830 may
count toward the major.*

Category C: Other elective courses in the College of Science (maximum 8 credit hours)

BTNY 3303 - Plant Genetics **Credits: (4)**

BTNY 3504 - Mycology **Credits: (4)**

ZOOL 3200 - Cell Biology **Credits: (4)**

ZOOL 3300 - Genetics **Credits: (4)**

Required Support Courses (26-29 credit hours)

A grade of D- or better is required in each support course.

Chemistry (19 credit hours)

CHEM 1210 PS - Principles of Chemistry I
Credits: (5)

CHEM 1220 - Principles of Chemistry II **Credits:
(5)**

CHEM 2310 - Organic Chemistry I **Credits: (4)**

CHEM 2315 - Organic Chemistry I Lab **Credits:
(1)**

CHEM 3070 - Biochemistry I **Credits: (3)**

CHEM 3075 - Biochemistry I Lab **Credits: (1)**

Math (minimum of 1 course from the following)

MATH 1050 QL - College Algebra **Credits: (4)** or

MATH 1080 QL - Pre-calculus **Credits: (5)** or
MATH 1210 - Calculus I **Credits: (4)**

Physics (minimum of 1 course from the following)

PHYS 1010 PS - Elementary Physics **Credits: (3)**
or

PHYS 2010 PS - College Physics I **Credits: (5)**

PHYS 2019 - College Physics I Lab **Credits: (0)**
or

PHYS 2020 - College Physics II **Credits: (5)**

PHYS 2029 - College Physics II Lab **Credits: (0)**
or

PHYS 2210 PS - Physics for Scientists and
Engineers I **Credits: (5)**

PHYS 2219 - Physics for Scientists and
Engineers I Lab **Credits: (0)** or

PHYS 2220 - Physics for Scientists and
Engineers II **Credits: (5)**

PHYS 2229 - Physics for Scientists and
Engineers II Lab **Credits: (0)**

Life Science Course Electives (6 credit hours)

*Minimum of 6 credit hours from 2 Life Science courses in
the following:*

Botany

BTNY 1203 LS - Plant Biology **Credits: (3)**

BTNY 2104 - Plant Form and Function **Credits:
(4)**

BTNY 2114 - Evolutionary Survey of Plants
Credits: (4)

BTNY 3105 - Anatomy of Vascular Plants
Credits: (4)

BTNY 3204 - Plant Physiology **Credits: (4)**

BTNY 3214 - Soils **Credits: (4)**

BTNY 3454 - Plant Ecology **Credits: (4)**

BTNY 3473 - Plant Geography **Credits: (3)**

BTNY 3624 - Taxonomy of Vascular Plants
Credits: (4)

Zoology

ZOOL 1010 LS - Animal Biology Credits: (3)
 ZOOL 1110 LS - Principles of Zoology Credits:
 (4)
 ZOOL 2100 - Human Anatomy Credits: (4)
 ZOOL 2200 LS - Human Physiology Credits: (4)
 ZOOL 3450 - Ecology Credits: (4)
 ZOOL 3470 - Zoogeography Credits: (3)
 ZOOL 3500 - Conservation Biology Credits: (3)
 ZOOL 3720 - Evolution Credits: (3)
 ZOOL 4050 - Comparative Vertebrate Anatomy
 Credits: (4)
 ZOOL 4100 - Vertebrate Embryology Credits: (4)
 ZOOL 4120 - Histology Credits: (4)
 ZOOL 4210 - Advanced Human Physiology
 Credits: (4)
 ZOOL 4220 - Endocrinology Credits: (4)
 ZOOL 4300 - Research Applications in Genetics
 Credits: (4)
 ZOOL 4470 - Wildlife Ecology and Management
 Credits: (4)
 ZOOL 4480 - Aquatic Ecology Credits: (4)
 ZOOL 4490 - Marine Ecology Credits: (4)
 ZOOL 4640 - Entomology Credits: (4)
 ZOOL 4650 - Ichthyology Credits: (4)
 ZOOL 4660 - Herpetology Credits: (4)
 ZOOL 4670 - Ornithology Credits: (4)
 ZOOL 4680 - Mammalogy Credits: (4)

Students must choose at least one of the four emphases that are offered in order to declare a Microbiology (BS) degree.

Microbiology Emphases

Microbiology majors pursuing emphases should consult the appropriate advisor and include the specified Foundational and Elective emphasis courses into their Microbiology Major. Regardless of the chosen emphasis, students must successfully complete the REQUIRED CORE MICROBIOLOGY MAJOR COURSES (19 credit hours), [20 credit hours through the specific emphasis] REQUIRED SUPPORT COURSES (26-29 credit hours), and LIFE SCIENCE COURSE ELECTIVES (6 credit hours). Please note that emphases are not a major. Your major will be Microbiology with a specific emphasis.

The emphasis areas are as follows:

Microbiology (BS)
 Microbiology (BS), Industrial Microbiology and
 Biotechnology Emphasis
 Microbiology (BS), Medical Microbiology Emphasis
 Microbiology (BS), Public and Environmental Health
 Emphasis

Microbiology (BS), Public and Environmental Health Emphasis

Microbiology majors pursuing this emphasis should consult the appropriate advisor. The courses listed below are for the Bachelors of Science (BS) Degree in Microbiology with an emphasis in Public and Environmental Health. The total number of credits required for the emphasis are the same as those required for the Microbiology degree, but are more specifically defined. An emphasis is not a major. Your major will be Microbiology with an emphasis in Public and Environmental Health.

Students interested in Graduate School should discuss their plans with the major advisor.

Microbiology Major

Program Prerequisite: Not required.

Minor: Not required. However, Microbiology majors will meet the requirements for a minor in Chemistry. If desired for another program, a Microbiology Minor is offered. Please see "Microbiology Minor" for requirements.

Grade Requirements: An overall GPA of 2.00 or higher in Microbiology courses is required for this major in addition to an overall GPA of 2.00 or higher. Also refer to the General Grade Requirements for graduation.

Credit Hour Requirements: A total of 120 credit hours is required for graduation; a minimum of 71 credits is required within the major. A total of 40 upper division credit hours is required (courses numbered 3000 and above).

Program Code: 6015BS and emphasis 6043 (Public and Environmental Health)

CIPC: 260502

Advisement

All Microbiology students are encouraged to meet with a faculty advisor at least annually for course and program advisement. Call 801-626-6949 for more information or to schedule an appointment. (Also refer to the [Department Advisor Referral List](#)). Please note, careful planning is essential as most courses have prerequisites and some upper division courses are only offered in one semester.

Grad Maps

Use Grad MAPs to plan your degree. They can be found at <https://apps.weber.edu/gradmaps>

Admission Requirements

Declare your program of study with the Microbiology Department. No special admission or application requirements are needed for this program. However, students should meet with an advisor to plan and declare their program of study.

General Education

Refer to Degree Requirements for Bachelor of Science requirements. The following courses are required for the Microbiology major and will also satisfy general education requirements: MICR 2054 LS - Principles of Microbiology, CHEM 1210 PS - Principles of Chemistry I, PHYS 1010 PS - Elementary Physics or PHYS 2010 PS - College Physics I.

Required Core Microbiology Major Courses (19 credit hours)

MICR 2054 LS - Principles of Microbiology

Credits: (4)

MICR 3053 - Microbiological Procedures **Credits: (3)**

MICR 3154 - Microbial Ecology **Credits: (4)**

MICR 4054 - Microbial Physiology **Credits: (4)**

MICR 4154 - Microbial Genetics **Credits: (4)**

Foundational Public and Environmental Health Courses (4 credit hours)

MICR 3012 - Microbiology and Global Public Health **Credits: (2)**

MICR 3502 SUS - Environmental Health **Credits: (2)**

Public and Environmental Health Elective Courses (16 credit hours)

Select 16 credit hours from the following categories A-C: (may not be counted twice except where noted in the course description):

Category A: Upper-division Microbiology Courses (minimum 8 credit hours)

MICR 3254 - Immunology **Credits: (4)**
MICR 3305 - Medical Microbiology **Credits: (5)**
MICR 3403 - Tropical Diseases **Credits: (3)**
MICR 3484 - Environmental Microbiology
Credits: (4)
MICR 3853 - Food Microbiology **Credits: (3)**
MICR 4554 - Virology **Credits: (4)**

Category B: Experience in Microbiology Courses

MICR 2600 - Laboratory Safety **Credits: (1)** or
CHEM 2600 - Laboratory Safety **Credits: (1)**

MICR 2920 - Short Courses, Workshop, Institutes
and Special Programs **Credits: (1-3)**
MICR 4800 - Directed Research **Credits: (1-2) ***
MICR 4830 - Directed Readings **Credits: (1-2) ***
MICR 4920 - Short Courses, Workshops,
Institutes and Special Programs **Credits: (1-
3)**
MICR 4991 - Microbiology Seminar **Credits: (1)**

** No more than 3 credit hours of MICR 4800 and no more
than 2 credit hours of MICR 4830 may count toward the
major.*

Category C: Other elective courses in the College of Science (maximum 8 credit hours)

BTNY 3504 - Mycology **Credits: (4)**
ZOOL 3200 - Cell Biology **Credits: (4)**
ZOOL 3300 - Genetics **Credits: (4)**

Required Support Courses (26-29 credit hours)

A grade of D- or better is required in each support course

Chemistry (19 credit hours)

CHEM 1210 PS - Principles of Chemistry I
Credits: (5)
CHEM 1220 - Principles of Chemistry II **Credits:
(5)**
CHEM 2310 - Organic Chemistry I **Credits: (4)**
CHEM 2315 - Organic Chemistry I Lab **Credits:
(1)**
CHEM 3070 - Biochemistry I **Credits: (3)**
CHEM 3075 - Biochemistry I Lab **Credits: (1)**

Math (minimum of 1 course from the following)

MATH 1050 QL - College Algebra **Credits: (4)** or
MATH 1080 QL - Pre-calculus **Credits: (5)** or
MATH 1210 - Calculus I **Credits: (4)**

Physics (minimum of 1 course from the following)

PHYS 1010 PS - Elementary Physics **Credits: (3)**
or
PHYS 2010 PS - College Physics I **Credits: (5)**
PHYS 2019 - College Physics I Lab **Credits: (0)**
or
PHYS 2020 - College Physics II **Credits: (5)**
PHYS 2029 - College Physics II Lab **Credits: (0)**
or
PHYS 2210 PS - Physics for Scientists and
Engineers I **Credits: (5)**
PHYS 2219 - Physics for Scientists and
Engineers I Lab **Credits: (0)** or
PHYS 2220 - Physics for Scientists and
Engineers II **Credits: (5)**
PHYS 2229 - Physics for Scientists and
Engineers II Lab **Credits: (0)**

Life Science Course Electives (6 credit hours)

*Minimum of 6 credit hours from 2 Life Science courses in
the following:*

Botany

BTNY 1203 LS - Plant Biology **Credits: (3)**
BTNY 2104 - Plant Form and Function **Credits:**
(4)
BTNY 2114 - Evolutionary Survey of Plants
Credits: (4)
BTNY 3105 - Anatomy of Vascular Plants
Credits: (4)
BTNY 3204 - Plant Physiology **Credits: (4)**
BTNY 3214 - Soils **Credits: (4)**
BTNY 3454 - Plant Ecology **Credits: (4)**
BTNY 3473 - Plant Geography **Credits: (3)**
BTNY 3624 - Taxonomy of Vascular Plants
Credits: (4)

Zoology

ZOOL 1010 LS - Animal Biology **Credits: (3)**
ZOOL 1110 LS - Principles of Zoology **Credits:**
(4)
ZOOL 2100 - Human Anatomy **Credits: (4)**
ZOOL 2200 LS - Human Physiology **Credits: (4)**
ZOOL 3450 - Ecology **Credits: (4)**
ZOOL 3470 - Zoogeography **Credits: (3)**
ZOOL 3500 - Conservation Biology **Credits: (3)**
ZOOL 3720 - Evolution **Credits: (3)**
ZOOL 4050 - Comparative Vertebrate Anatomy
Credits: (4)
ZOOL 4100 - Vertebrate Embryology **Credits: (4)**
ZOOL 4120 - Histology **Credits: (4)**
ZOOL 4210 - Advanced Human Physiology
Credits: (4)
ZOOL 4220 - Endocrinology **Credits: (4)**
ZOOL 4300 - Research Applications in Genetics
Credits: (4)
ZOOL 4470 - Wildlife Ecology and Management
Credits: (4)
ZOOL 4480 - Aquatic Ecology **Credits: (4)**
ZOOL 4490 - Marine Ecology **Credits: (4)**
ZOOL 4640 - Entomology **Credits: (4)**
ZOOL 4650 - Ichthyology **Credits: (4)**
ZOOL 4660 - Herpetology **Credits: (4)**
ZOOL 4670 - Ornithology **Credits: (4)**
ZOOL 4680 - Mammalogy **Credits: (4)**

Microbiology (BIS)

BIS students that wish to include Microbiology as one of their emphasis areas should recognize that they should have a clear goal for their BIS program and capstone project. Students need to gain approval of courses for the emphasis from a Microbiology advisor. Because Microbiology research often involves laboratory experiments, students should begin discussing their capstone project with a faculty member a year in advance. They will then work with that faculty mentor, in coordination with the other emphasis mentors, to develop the experiments, methods, and schedule for the project. The student is responsible for securing funding for the supplies needed for their project.

Program Prerequisite: Students seeking a BIS with an emphasis in Microbiology must complete CHEM 1210 PS - Principles of Chemistry I and CHEM 1220 - Principles of Chemistry II as prerequisites for upper division Microbiology courses *in addition to* the credits required for Microbiology.

Grade Requirements: A minimum grade of "C" must be achieved in all coursework to satisfy BIS degree requirements.

Credit Hours Requirements: A minimum of 18 credit hours is required in Microbiology, at least one course should be at the 4000 level.

Program Code: 6015

CIPC: 260502

Course Requirements for BIS Emphasis

Required Chemistry Courses (10 credit hours)

CHEM 1210 PS - Principles of Chemistry I
Credits: (5) and

CHEM 1220 - Principles of Chemistry II **Credits: (5)**

Required Microbiology Courses (7-8 credit hours)

MICR 2054 LS - Principles of Microbiology
Credits: (4)

MICR 3053 - Microbiological Procedures **Credits: (3) or**

MICR 3154 - Microbial Ecology **Credits: (4)**

Microbiology BIS Emphasis Elective Courses

Choose 3 courses to total the remaining 10-11 credits in Microbiology courses. 1 of the 3 courses must be a 4000 level course.

Please be aware that some courses have additional prerequisites.

MICR 3012 - Microbiology and Global Public Health **Credits: (2)**

MICR 3053 - Microbiological Procedures **Credits: (3)**

MICR 3154 - Microbial Ecology **Credits: (4)**

MICR 3203 - The Immune System in Health & Disease **Credits: (3) or**

MICR 3254 - Immunology **Credits: (4)**

MICR 3305 - Medical Microbiology **Credits: (5) or**
MICR 3603 - Advanced Microbiology for the Health Professions **Credits: (3)**

MICR 3403 - Tropical Diseases **Credits: (3)**

MICR 3484 - Environmental Microbiology **Credits: (4)**

MICR 3502 SUS - Environmental Health **Credits: (2)**

MICR 3753 - Geomicrobiology **Credits: (3)**

MICR 3853 - Food Microbiology **Credits: (3)**

MICR 4054 - Microbial Physiology **Credits: (4)**

MICR 4154 - Microbial Genetics **Credits: (4)**

MICR 4252 - Cell Culture **Credits: (2)**

MICR 4354 - Industrial Microbiology and Biotechnology **Credits: (4)**

MICR 4554 - Virology **Credits: (4)**

The following courses will not be counted toward a BIS degree without the approval of a Microbiology advisor:

MICR 2600 - Laboratory Safety **Credits: (1)**

MICR 4800 - Directed Research **Credits: (1-2) ***

MICR 4830 - Directed Readings **Credits: (1-2) ***

MICR 4890 INT - Cooperative Work Experience **Credits: (1-5)**

MICR 4991 - Microbiology Seminar **Credits: (1)**

**No more than 3 credit hours of MICR 4800 and only 1 credit hour of MICR 4830 may count toward the Microbiology BIS Emphasis.*

Microbiology Minor

MICR 4991 - Microbiology Seminar **Credits: (1)**

Grade Requirements: A grade of "C-" or better in courses used toward the minor.

Credit Hour Requirements: Minimum of 18 credit hours in Microbiology courses.

Program Code: 6015

CIPC: 260502

Course Requirements for Minor

Required Microbiology Course (4 credit hours)

MICR 2054 LS - Principles of Microbiology
Credits: (4)

Microbiology Minor Elective Courses (14 credit hours)

Select 14 credit hours of Microbiology courses from the following:

- MICR 2600 - Laboratory Safety **Credits: (1)**
- MICR 3012 - Microbiology and Global Public Health **Credits: (2)**
- MICR 3053 - Microbiological Procedures **Credits: (3)**
- MICR 3154 - Microbial Ecology **Credits: (4)**

- MICR 3203 - The Immune System in Health & Disease **Credits: (3)** or
- MICR 3254 - Immunology **Credits: (4)**

- MICR 3305 - Medical Microbiology **Credits: (5)**
- MICR 3403 - Tropical Diseases **Credits: (3)**
- MICR 3484 - Environmental Microbiology **Credits: (4)**
- MICR 3502 SUS - Environmental Health **Credits: (2)**
- MICR 3753 - Geomicrobiology **Credits: (3)**
- MICR 3853 - Food Microbiology **Credits: (3)**
- MICR 4054 - Microbial Physiology **Credits: (4)**
- MICR 4154 - Microbial Genetics **Credits: (4)**
- MICR 4252 - Cell Culture **Credits: (2)**
- MICR 4354 - Industrial Microbiology and Biotechnology **Credits: (4)**
- MICR 4554 - Virology **Credits: (4)**
- MICR 4800 - Directed Research **Credits: (1-2)**
- MICR 4830 - Directed Readings **Credits: (1-2)**

Microbiology Departmental Honors

Please see weber.edu/honors/contracts.html for a list of current Departmental Honors contracts and Departmental Honors Advisors. For additional information about the Honors Program, please refer to the Honors Program section of the WSU Catalog.

Department of Physics and Astronomy

Department Chair: Colin Inglefield

Location: Tracy Hall Science Center, Room 302

Telephone: Nereyda Hesterberg, 801-626-6163

Website: weber.edu/physics

Professors: John Armstrong, Colin Inglefield, Adam Johnston, Stacy Palen, Daniel Schroeder, John Sohl, Walther Spjeldvik; **Associate Professors:** Michelle Arnold; **Assistant Professors:** Jonathan Cornell, Kristin Rabosky

Physics is the study and application of the fundamental laws of nature, including the laws of motion, gravity, electromagnetism, heat, and microscopic interactions. These laws govern the behavior of objects at all scales, from the smallest subatomic particles to the entire observable universe. In between, physicists study nuclear reactions, the interaction of atoms with light, properties of materials, the chaotic dynamics of fluids, and the evolution of stars and galaxies, among many other applications.

Our courses in physics introduce all of the most important fundamental laws and many of their applications. Equally valuable, however, are the skills that students develop in these courses, from analytical thinking and problem solving to experimental design and interpretation. Majoring in physics can thus prepare a student for a variety of careers in research, education, business, industry, and government.

The Department offers three major programs: Physics, Applied Physics, and Physics Teaching. The Physics major places emphasis on understanding nature at the deepest possible level, and offers options that emphasize fundamental theoretical physics, astrophysics, computational physics, and physics of materials. Each of these options provides a strong foundation for graduate work. The Applied Physics major places more emphasis on physical phenomena and hands-on experience. Thus, it is more suitable for those planning to go either directly into industrial employment or into graduate programs in certain applied fields. The Physics Teaching major is designed specifically for those planning to teach physics at the secondary school level.

Students who are majoring in other disciplines are encouraged to consider a minor in physics, which includes a year of introductory physics plus eight credit hours of additional physics courses. These electives may be chosen to emphasize basic theory, experimental techniques, or applied subfields such as optics and astrophysics.

Physical Science (AAS)

Grade Requirements: Minimum overall GPA of 2.00 or "C".

Credit Hour Requirements: A total of 63 credit hours are required for graduation; 34-36 of these are required within the program.

Program Code:

CIPC:

Advisement

It is recommended that a student consult with a departmental advisor annually. Call 801-626-6163 for information or to schedule an appointment.

Use Grad MAPs to plan your degree

General Education

Refer to Degree Requirements for Associate of Applied Science requirements. The following courses required for the Physical Science program will also satisfy the general education requirement for physical sciences: CHEM 1210 PS; GEO 1110 PS; and PHYS 2210 PS (or PHYS 2010 PS).

Major Course Requirements for AAS Degree (34-39 credits)

Core Courses (26 credits):

CHEM 1200 - Preparation for College Chemistry
Credits: (3)

CHEM 1210 PS - Principles of Chemistry I
Credits: (5)

CHEM 1220 - Principles of Chemistry II **Credits: (5)**

GEO 1110 PS - Dynamic Earth: Physical Geology **Credits: (3)**

GEO 1115 - Physical Geology Lab **Credits: (1)**

PHYS 2210 PS - Physics for Scientists and Engineers I **Credits: (5) OR**

PHYS 2010 PS - College Physics I **Credits: (5)**

PHYS 2600 - Laboratory Safety **Credits: (1)**

PHYS 2820 - Elements of Research in the Sciences **Credits: (3)**

Foundational Courses for the Discipline (8-13 credits):

Complete one of the following groups of courses.

For Students most interested in chemistry (10 credits):

CHEM 2310 - Organic Chemistry I **Credits: (4)**
and
CHEM 2315 - Organic Chemistry I Lab **Credits: (1)**

CHEM 2320 - Organic Chemistry II **Credits: (4)**
and
CHEM 2325 - Organic Chemistry II Lab **Credits: (1)**

Please note the combined CHEM 2310 and CHEM 2315, and CHEM 2320 and CHEM 2325, each count as one foundation course. CHEM 2310 and CHEM 2315 must be taken concurrently, same for CHEM 2315 and CHEM 2325

For students most interested in Earth/geological science (8 credits):

GEO 1220 - Historical Geology **Credits: (4)**

GEO 2050 - Earth Materials **Credits: (4)**

For students most interested in physics (13 credits):

MATH 1200 - Mathematics Computer Laboratory **Credits: (1)**

MATH 1220 - Calculus II **Credits: (4)**

PHYS 2220 - Physics for Scientists and Engineers II **Credits: (5)**

PHYS 2300 - Scientific Computing for Physical Systems **Credits: (3)**

** Students should consult with a departmental advisor to determine the appropriate mathematics and physics sequences for their educational and/or career goals.*

Physics (BS)

Physics Major

Program Prerequisite: Not required.

Minor: No minor is required. However, a math minor is automatically satisfied by the requirements.

Grade Requirements: An overall GPA of 2.00 is required. Also refer to the general grade requirements for graduation on Degree Requirements.

Credit Hour Requirements: A total of 120 semester credit hours is required for graduation; 75 to 82 of these (depending on the option chosen) are required within the Physics major. Forty upper-division credit hours are required (courses numbered 3000 and above); 30 to 34 of these (depending on the option chosen) are required within the Physics major.

Program Code: 6018BS

CIPC: 400801

Advisement

All Physics majors are strongly encouraged to meet with the chair at least annually for course and program advisement. Call 801-626-6163 for more information or to schedule an appointment. Note that because most courses have prerequisites and some advanced courses are offered only in alternate years, careful planning is essential.

Admissions Requirements

Declare your program of study (see Enrollment Services and Information). There are no special admission or application requirements for the Physics major.

General Education

Refer to Degree Requirements for Bachelor of Science requirements. The following courses required for the Physics major will satisfy general education requirements: PHYS 2210 and MATH 1210.

Physics Major Course Requirements for BS Degree

Physics Courses Required (23 credit hours)

PHYS 2210 PS - Physics for Scientists and Engineers I **Credits: (5)** and

PHYS 2220 - Physics for Scientists and Engineers II **Credits: (5)**

PHYS 2300 - Scientific Computing for Physical Systems **Credits: (3)**

PHYS 2710 - Introductory Modern Physics **Credits: (3)**

PHYS 3500 - Analytical Mechanics **Credits: (3)**

PHYS 3510 - Electromagnetic Theory **Credits: (3)**

PHYS 4990 - Seminar in Physics **Credits: (1)**

Physics Electives (3 credit hours)

Select a minimum of three additional credit hours from Physics courses numbered 3000 and above. Courses in closely related disciplines may also satisfy this requirement when appropriate to the option chosen (see below). In all cases, elective courses must be approved by the department chair.

Support Courses Required (22 credit hours)

MATH 1200 - Mathematics Computer Laboratory **Credits: (1)**

MATH 1210 - Calculus I **Credits: (4)**

MATH 1220 - Calculus II **Credits: (4)**

MATH 2210 - Calculus III **Credits: (4)**

MATH 2270 - Elementary Linear Algebra **Credits: (3)**

MATH 2280 - Ordinary Differential Equations **Credits: (3)**

MATH 3710 - Boundary Value Problems **Credits: (3)**

OPTIONS

Physics Majors must also satisfy the requirements of at least one of the following four options.

1. Traditional option.

By including all of the core courses in theoretical physics, this option provides a strong foundation for graduate study in physics.

Additional Physics Courses Required (17 or 18 credit hours)

PHYS 3180 - Thermal Physics **Credits: (3)**

PHYS 3190 - Applied Optics **Credits: (3)** or
PHYS 3410 - Electronics for Scientists **Credits:**
(4)

PHYS 3540 - Mechanical and Electromagnetic
Waves **Credits: (3)**

PHYS 3710 - Nuclear and Particle Physics
Credits: (3)

PHYS 4400 - Advanced Physics Laboratory
Credits: (2)

PHYS 4610 - Quantum Mechanics **Credits: (3)**

Additional Support Courses Required (10 credit hours)

CHEM 1210 PS - Principles of Chemistry I
Credits: (5) and

CHEM 1220 - Principles of Chemistry II **Credits:**
(5)

2. Physics of Materials option.

This option is intended for students who have an interest in the properties of materials and their study using advanced instrumentation.

Additional Physics Courses Required (18 credit hours)

PHYS 3180 - Thermal Physics **Credits: (3)**

PHYS 3410 - Electronics for Scientists **Credits:**
(4)

PHYS 3540 - Mechanical and Electromagnetic
Waves **Credits: (3)**

PHYS 4200 - The Physics of Materials **Credits:**
(3)

PHYS 4410 - Materials Characterization
Laboratory **Credits: (2)**

PHYS 4610 - Quantum Mechanics **Credits: (3)**

Additional Support Courses Required (10 credit hours)

CHEM 1210 PS - Principles of Chemistry I
Credits: (5) and

CHEM 1220 - Principles of Chemistry II **Credits:**
(5)

3. Astrophysics option.

Supplementing a traditional physics program with several astronomy and astrophysics courses, this option is intended for students with a special interest in astronomy, including those intending to pursue graduate study in astrophysics.

Additional Physics Courses Required (23 or 24 credit hours)

ASTR 2040 PS - Principles of Observational
Astronomy **Credits: (3)**

ASTR 3160 - Stellar and Planetary Astrophysics
Credits: (3)

ASTR 3170 - Galaxies and Cosmology **Credits:**
(3)

PHYS 3180 - Thermal Physics **Credits: (3)**

PHYS 3190 - Applied Optics **Credits: (3)** or
PHYS 3410 - Electronics for Scientists **Credits:**
(4)

PHYS 3540 - Mechanical and Electromagnetic
Waves **Credits: (3)**

PHYS 4400 - Advanced Physics Laboratory
Credits: (2)

PHYS 4610 - Quantum Mechanics **Credits: (3)**

Additional Support Courses Required (9 or 10 credit hours)

CHEM 1210 PS - Principles of Chemistry I
Credits: (5)

select one of the following:

CHEM 1220 - Principles of Chemistry II **Credits:**
(5)

MICR 2054 LS - Principles of Microbiology
Credits: (4)

GEO 1110 PS - Dynamic Earth: Physical
Geology **Credits: (3)** and
GEO 1115 - Physical Geology Lab **Credits: (1)**

4. Computational Physics option.

*This option is intended for students with a special interest
in computational techniques applied to the physical world.*

Additional Physics Courses Required (15 credit hours)

PHYS 3300 - Advanced Computational Physics
Credits: (3)
PHYS 3410 - Electronics for Scientists **Credits:**
(4)
PHYS 4400 - Advanced Physics Laboratory
Credits: (2)

select two of the following:

PHYS 3180 - Thermal Physics **Credits: (3)**
PHYS 3540 - Mechanical and Electromagnetic
Waves **Credits: (3)**
PHYS 4610 - Quantum Mechanics **Credits: (3)**

Additional Physics Courses Required (14 credit hours)

MATH 4610 - Numerical Analysis I **Credits: (3)**
and
MATH 4620 - Numerical Analysis II **Credits: (3)**

select two of the following:

CS 1410 - Object-Oriented Programming **Credits:**
(4)
CS 2420 - Introduction to Data Structures and
Algorithms **Credits: (4)**
CS 2450 - Software Engineering I **Credits: (4)**
CS 2810 - Computer Architecture/Organization
Credits: (4)

Physics Teaching (BS)

Program Prerequisite: Physics Teaching majors must meet the Teacher Education admission and licensure requirements (see Teacher Education Department).

Minor: Not Required.

Grade Requirements: An overall GPA of 2.00 is required in courses required for this major. Also refer to the general grade requirements for graduation under General Requirements.

Credit Hour Requirements: A total of 120 semester credit hours is required for graduation; 45 hours are required within the major, plus the credits required by the Teacher Education department. Forty upper-division credit hours are required (courses numbered 3000 and above).

Program Code: 6020BS

CIPC: 131329

Advisement

Physics Teaching majors are strongly encouraged to meet with the chair at least annually for course and program advisement. Call 801-626-6163 for more information or to schedule an appointment. Physics Teaching majors are also encouraged to meet with a Jerry and Vickie Moyes College of Education advisor (call 801-626-6269). (Also refer to the Department Advisor Referral List.)

Admissions Requirements

Declare your program of study. Teaching majors must meet the Teacher Education admission and licensure requirements (see Department of Teacher Education

General Education

Refer to Degree Requirements for Bachelor of Science requirements. The following courses required for the Physics and Applied Physics majors will satisfy general education requirements: PHYS 1040 PS, PHYS 2210 PS, and MATH 1210.

Physics Teaching Major Course Requirements for BS Degree

Physics Courses Required (25 credit hours)

PHYS 1040 PS - Elementary Astronomy **Credits: (3)**

PHYS 2210 PS - Physics for Scientists and Engineers I **Credits: (5)** and
PHYS 2220 - Physics for Scientists and Engineers II **Credits: (5)**

PHYS 2600 - Laboratory Safety **Credits: (1)**
PHYS 2710 - Introductory Modern Physics **Credits: (3)**

PHYS 3570 - Foundations of Science Education **Credits: (3)**

PHYS 4570 - Secondary School Science Teaching Methods **Credits: (3)**

PHYS 4800 - Individual Research Problems **Credits: (1-3)** (1 credit hour required)

PHYS 4990 - Seminar in Physics **Credits: (1)**

Physics Electives (9 credit hours)

Select nine credit hours in approved Physics classes (courses numbered 2300 and above, excluding other explicit course requirements).

Support Courses Required (11 credit hours)

HIST 3350 - History and Philosophy of Science **Credits: (3)**

MATH 1210 - Calculus I **Credits: (4)** and
MATH 1220 - Calculus II **Credits: (4)**

Note:

Students must also complete the Teacher Education Licensure Program.

Physics, Applied (BS)

Program Prerequisite: Not required.

Minor: No minor is required. However, a math minor is automatically satisfied by taking one additional Math course (MATH 2270) beyond the Applied Physics major requirements.

Grade Requirements: An overall GPA of 2.00 is required. Also refer to the general grade requirements for graduation under Degree Requirements.

Credit Hour Requirements: A total of 120 semester credit hours is required for graduation; 75 to 76 of these (depending on choice of courses) are required within the Applied Physics major. Forty upper-division credit hours are required (courses numbered 3000 and above); 32 to 33 of these are required within the Applied Physics major.

Program Code: 6019BS

CIPC: 400801

Advisement

All Applied Physics majors are strongly encouraged to meet with the chair at least annually for course and program advisement. Call 801-626-6163 for more information or to schedule an appointment. Note that because most courses have prerequisites and some advanced courses are offered only in alternate years, careful planning is essential.

Admissions Requirements

Declare your program of study. There are no special admission or application requirements for the Applied Physics major.

General Education

Refer to Degree Requirements for Bachelor of Science requirements. The following courses required for the Applied Physics major will satisfy general education requirements: PHYS 2210PS, CHEM 1210 PS, and MATH 1210.

Applied Physics Major Course Requirements for BS Degree

Physics Courses Required (34 or 35 credit hours)

PHYS 2210 PS - Physics for Scientists and Engineers I **Credits: (5)** and
PHYS 2220 - Physics for Scientists and Engineers II **Credits: (5)**

PHYS 2300 - Scientific Computing for Physical Systems **Credits: (3)**

PHYS 2600 - Laboratory Safety **Credits: (1)**

PHYS 2710 - Introductory Modern Physics **Credits: (3)**

PHYS 3190 - Applied Optics **Credits: (3)**

PHYS 3500 - Analytical Mechanics **Credits: (3)**

PHYS 3510 - Electromagnetic Theory **Credits: (3)**

PHYS 3540 - Mechanical and Electromagnetic Waves **Credits: (3)**

PHYS 4400 - Advanced Physics Laboratory **Credits: (2)** or

PHYS 4410 - Materials Characterization Laboratory **Credits: (2)**

PHYS 4800 - Individual Research Problems **Credits: (1-3)**

PHYS 4990 - Seminar in Physics **Credits: (1)**

Electives (9 credit hours)

Select a minimum of nine additional credit hours from Physics courses numbered 3000 and above. Upper-division courses in closely related disciplines may also satisfy this requirement. In all cases, elective courses must be approved by the department chair.

Support Courses Required (32 credit hours)

CHEM 1210 PS - Principles of Chemistry I **Credits: (5)** and

CHEM 1220 - Principles of Chemistry II **Credits: (5)**

MATH 1200 - Mathematics Computer Laboratory **Credits: (1)**

MATH 1210 - Calculus I **Credits: (4)**

MATH 1220 - Calculus II **Credits: (4)**
MATH 2210 - Calculus III **Credits: (4)**
MATH 2280 - Ordinary Differential Equations
Credits: (3)

MATH 3410 - Probability and Statistics I **Credits:**
(3) and
MATH 3420 - Probability and Statistics II **Credits:**
(3)

Physics Minor

Grade Requirements: A grade of "C" or better in all courses used toward the minor (a grade of "C-" is not acceptable).

Credit Hour Requirements: Minimum of 26 credit hours in Physics and support courses. Prior department approval is required.

Program Code: 6018

CIPC: 400801

PHYS 4410 - Materials Characterization

Laboratory **Credits: (2)**

PHYS 4610 - Quantum Mechanics **Credits: (3)**

Support Courses Required (8 credit hours)

MATH 1210 - Calculus I **Credits: (4)** and

MATH 1220 - Calculus II **Credits: (4)**

Course Requirements for Minor

Physics Courses Required (10 credit hours)

PHYS 2210 PS - Physics for Scientists and Engineers I **Credits: (5)** and

PHYS 2220 - Physics for Scientists and Engineers II **Credits: (5)**

Elective Physics Courses (8 credit hours)

Select at least three Physics courses from the following

PHYS 2300 - Scientific Computing for Physical Systems **Credits: (3)**

PHYS 2710 - Introductory Modern Physics **Credits: (3)**

PHYS 3160 - Stellar and Planetary Astrophysics **Credits: (3)**

PHYS 3170 - Galaxies and Cosmology **Credits: (3)**

PHYS 3180 - Thermal Physics **Credits: (3)**

PHYS 3190 - Applied Optics **Credits: (3)**

PHYS 3300 - Advanced Computational Physics **Credits: (3)**

PHYS 3410 - Electronics for Scientists **Credits: (4)**

PHYS 3420 - Data Analysis, Statistics, and Instrumentation **Credits: (3)**

PHYS 3500 - Analytical Mechanics **Credits: (3)**

PHYS 3510 - Electromagnetic Theory **Credits: (3)**

PHYS 3540 - Mechanical and Electromagnetic Waves **Credits: (3)**

PHYS 4200 - The Physics of Materials **Credits: (3)**

PHYS 4400 - Advanced Physics Laboratory **Credits: (2)**

Physics Teaching Minor

PHYS 4570 - Secondary School Science
Teaching Methods **Credits: (3)**

Grade Requirements: A grade of C or better in all courses used toward the minor (a grade of "C-" is not acceptable).

Credit Hour Requirements: Minimum of 25 credit hours in Physics and support courses. Prior department approval is required.

Program Code: 6020

CIPC: 131329

Students who select the Physics Teaching minor must satisfy the Teacher Education admission and licensure requirements (see Department of Teacher Education).

Course Requirements for Minor

Physics Courses Required (11 credit hours)

PHYS 2210 PS - Physics for Scientists and Engineers I **Credits: (5)** and

PHYS 2220 - Physics for Scientists and Engineers II **Credits: (5)**

PHYS 2600 - Laboratory Safety **Credits: (1)**

Elective Physics Courses (6 credit hours)

Select 6 credit hours in approved Physics courses (numbered 2300 and above)

Support Courses Required (11 credit hours)

MATH 1210 - Calculus I **Credits: (4)** and
MATH 1220 - Calculus II **Credits: (4)**

HIST 3350 - History and Philosophy of Science
Credits: (3)

If a student is not obtaining a Teaching Major in Physical or Life Science, the following courses are also required:

PHYS 3570 - Foundations of Science Education
Credits: (3)

Physics Departmental Honors

Please see weber.edu/honors/contracts.html for a list of current Departmental Honors contracts and Departmental Honors Advisors. For additional information about the Honors Program, please refer to the Honors Program section of the WSU Catalog.

Department of Zoology

Department Chair: Ron Meyers

Location: Tracy Hall Science Center, Room 402

Website: www.weber.edu/zoology

Telephone Contact: 801-626-6165

Professors: Nicole Berthélémy, John Cavitt, Brian Chung, Jonathan Clark, Christopher Hoagstrom, Jon Marshall, Ron Meyers, John Mull, Michele Skopec, Barbara Trask;

Assistant Professors: Rebecka Brasso, Elizabeth Sandquist, Ezgi Yesilyurt; **Instructor:** Brian Pilcher

Zoology is the study of animals. It includes a tremendous diversity of subdivisions and approaches. These range from using electron microscopy to study cells, to field examinations of natural populations. Some zoologists focus their studies on a specific group of animals; others specialize on problems or processes, such as those in physiology or genetics, which are common to many groups. Zoologists have made many important contributions to our understanding of the natural world. Furthermore, they benefit humankind through their work in areas such as medicine and environmental conservation.

Although our majors pursue several tracks, many are involved in pre-medical professional training. We have an excellent record of placing students in the finest medical, dental, veterinary, and physical therapy programs. The faculty strongly encourage majors to pursue guided research, particularly through the department's thesis program.

All students are urged to consult with the department early in their education. Arrangements can then be made for the student to be matched with an appropriate advisor who can offer course and career suggestions.

DNA Laboratory

The Department of Zoology maintains a DNA Laboratory on the first floor of the Science Laboratory building in the College of Science. It is a modern facility with state-of-the-art equipment for DNA isolation and analysis. The laboratory is used for student course work, faculty-supervised student research, and faculty research.

Interdisciplinary Programs

The Zoology Department participates in the interdisciplinary Neuroscience Minor and the Urban and Regional Planning Emphasis programs. Students who wish

to enroll in one of these programs should indicate their desire to do so with the program coordinator who will help them work out a proper combination of courses to fit their particular needs. (See the Engaged Learning, Honors, and Interdisciplinary Programs section of this catalog.)

Zoology (BS)

Program Prerequisite: Not required.

Minor: Not required.

Grade Requirements: Zoology majors must have an average GPA of 2.00 or higher. Students are required to earn a grade of "C-" in each prerequisite course before taking the next course. Zoology majors must have a grade of "C-" or better in all courses that satisfy specific requirements for the major.

Credit Hour Requirements: A total of 120 credit hours is required for graduation; a minimum of 74 of these is required within the major. A total of 40 upper division hours is required (courses number 3000 and above); a minimum of 34 is required within the major.

Program Code: 6021BS

CIPC: 260701

Advisement

All Zoology students should meet with a faculty advisor at least annually for course and program advisement. The department secretary can also assist students. Call 801-626-6165 for more information or to schedule an appointment. (Also, refer to the Department Advisor Referral List.)

Admissions Requirements

Declare your program of study (Enrollment Services and Information). No special admission or application requirements are needed for the Zoology BS.

General Education

Refer to Degree Requirements for Bachelor of Science requirements. The following courses required for the Zoology BS will satisfy general education requirements: CHEM 1210, MATH 1040, MATH 1050, MATH 1080, PHYS 1010, PHYS 2010, PHYS 2210, ZOOL 1110. The following courses that are electives for the Zoology BS will also satisfy general education requirement: BTNY 1203, BTNY 2303, MICR 2054, ZOOL 2200. Students are encouraged to take general

education courses concurrently with required and elective courses in the major.

Major Course Requirements for Zoology BS Degree

Required Zoology Courses

- ZOOL 1110 LS - Principles of Zoology **Credits: (4)**
- ZOOL 2220 - Diversity of Animals **Credits: (4)**
- ZOOL 3200 - Cell Biology **Credits: (4)**
- ZOOL 3300 - Genetics **Credits: (4)**
- ZOOL 3450 - Ecology **Credits: (4)**
- ZOOL 3600 - Comparative Physiology **Credits: (4)**
- ZOOL 3720 - Evolution **Credits: (3)**
- ZOOL 4990 - Seminar **Credits: (1)**

Upper-division Zoology Electives (minimum 4 courses from the following)

- ZOOL 3470 - Zoogeography **Credits: (3)**
- ZOOL 3500 - Conservation Biology **Credits: (3)**
- ZOOL 3730 - Population Biology **Credits: (3)**
- ZOOL 3820 - Biology of Cancer **Credits: (3)**
- ZOOL 4050 - Comparative Vertebrate Anatomy **Credits: (4)**
- ZOOL 4100 - Vertebrate Embryology **Credits: (4)**
- ZOOL 4120 - Histology **Credits: (4)**
- ZOOL 4210 - Advanced Human Physiology **Credits: (4)**
- ZOOL 4220 - Endocrinology **Credits: (4)**
- ZOOL 4250 - Radiation Biology **Credits: (4)**
- ZOOL 4300 - Research Applications in Genetics **Credits: (4)**
- ZOOL 4350 - Animal Behavior **Credits: (4)**
- ZOOL 4470 - Wildlife Ecology and Management **Credits: (4)**
- ZOOL 4480 - Aquatic Ecology **Credits: (4)**
- ZOOL 4490 - Marine Ecology **Credits: (4)**
- ZOOL 4500 - Parasitology **Credits: (4)**
- ZOOL 4600 - Protozoology **Credits: (4)**
- ZOOL 4640 - Entomology **Credits: (4)**
- ZOOL 4650 - Ichthyology **Credits: (4)**
- ZOOL 4660 - Herpetology **Credits: (4)**
- ZOOL 4670 - Ornithology **Credits: (4)**
- ZOOL 4680 - Mammalogy **Credits: (4)**

ZOOL 4900 - Topics in Zoology **Credits: (1-4)** 3 or 4 credits required

Experience in Zoology (minimum 2 credit hours* from the following or select an additional (5th) course from upper-division Zoology electives (above)).

ZOOL 3099 - Teaching the Human Anatomy Laboratory **Credits: (3)**
ZOOL 3100 - Advanced Human Anatomy **Credits: (3)**
ZOOL 4800 - Problems in Zoology **Credits: (1-4)**
ZOOL 4820 - Human Physiology Laboratory Teaching Assistant **Credits: (1)**
ZOOL 4830 - Readings in Zoology **Credits: (1-4)**
ZOOL 4890 INT - Cooperative Work Experience **Credits: (1-4)**
ZOOL 4920 - Short Courses, Workshops, Institutes and Special Programs **Credits: (1-4)**
ZOOL 4950 - Field Zoology **Credits: (1-3)**
ZOOL 4970 - Thesis **Credits: (2)**
ZOOL 4980 - Research Design **Credits: (2)**

Note:

*The two credit hours can be taken in the same or separate semesters.

Required Chemistry Courses

CHEM 1210 PS - Principles of Chemistry I **Credits: (5)**
CHEM 1220 - Principles of Chemistry II **Credits: (5)**

Required Math Courses (minimum 1 course from the following)

MATH 1050 QL - College Algebra **Credits: (4)**
MATH 1080 QL - Pre-calculus **Credits: (5)**
MATH 1210 - Calculus I **Credits: (4)**
MATH 1060 - Trigonometry **Credits: (3)**

Required Statistics Courses (minimum 1 course from the

following; courses taken with separate labs count as 1 course)

MATH 1040 QL - Introduction to Statistics **Credits: (3)**
MATH 3410 - Probability and Statistics I **Credits: (3)**
SOC 3600 - Social Statistics **Credits: (3)**
PSY 3600 - Statistics in Psychology **Credits: (3)**

Required Physics Courses (minimum 1 course from the following)

PHYS 1010 PS - Elementary Physics **Credits: (3)**
PHYS 2010 PS - College Physics I **Credits: (5)**
PHYS 2210 PS - Physics for Scientists and Engineers I **Credits: (5)**

Elective support courses (minimum 4 courses from the following including at least 1 course in BTNY or MICR; courses taken with separate labs count as 1 course)

Botany
BTNY 1203 LS - Plant Biology **Credits: (3)**
BTNY 2104 - Plant Form and Function **Credits: (4)**
BTNY 2114 - Evolutionary Survey of Plants **Credits: (4)**
BTNY 2303 - Ethnobotany **Credits: (3)**
BTNY 3105 - Anatomy of Vascular Plants **Credits: (4)**
BTNY 3204 - Plant Physiology **Credits: (4)**
BTNY 3214 - Soils **Credits: (4)**
BTNY 3454 - Plant Ecology **Credits: (4)**
BTNY 3504 - Mycology **Credits: (4)**
BTNY 3514 - Algology **Credits: (4)**
BTNY 3523 - Marine Biology **Credits: (3)**
BTNY 3624 - Taxonomy of Vascular Plants **Credits: (4)**
BTNY 4113 - Plant Evolution **Credits: (3)**
Chemistry
CHEM 2310 - Organic Chemistry I **Credits: (4)**
with CHEM 2315 - Organic Chemistry I Lab **Credits: (1)**
CHEM 2320 - Organic Chemistry II **Credits: (4)**
with CHEM 2325 - Organic Chemistry II Lab **Credits: (1)**

CHEM 3070 - Biochemistry I **Credits: (3)**
 Microbiology
 MICR 2054 LS - Principles of Microbiology
Credits: (4)
 MICR 3053 - Microbiological Procedures **Credits:**
(3)
 MICR 3203 - The Immune System in Health &
 Disease **Credits: (3)**
 MICR 3254 - Immunology **Credits: (4)**
 MICR 3305 - Medical Microbiology **Credits: (5)**
 MICR 3484 - Environmental Microbiology
Credits: (4)
 MICR 3853 - Food Microbiology **Credits: (3)**
 MICR 4054 - Microbial Physiology **Credits: (4)**
 MICR 4554 - Virology **Credits: (4)**
 Physics
 PHYS 2020 - College Physics II **Credits: (5)**
 PHYS 2220 - Physics for Scientists and
 Engineers II **Credits: (5)**
 Zoology
 ZOOL 2100 - Human Anatomy **Credits: (4)**
 ZOOL 2200 LS - Human Physiology **Credits: (4)**

ZOOL 4470 - Wildlife Ecology and Management
Credits: (4)
 ZOOL 4480 - Aquatic Ecology **Credits: (4)**
 ZOOL 4640 - Entomology **Credits: (4)**
 ZOOL 4650 - Ichthyology **Credits: (4)**
 ZOOL 4660 - Herpetology **Credits: (4)**
 ZOOL 4670 - Ornithology **Credits: (4)**
 ZOOL 4680 - Mammalogy **Credits: (4)**

Support Course Electives in Botany

BTNY 3624 - Taxonomy of Vascular Plants
Credits: (4)
 BTNY 3473 - Plant Geography **Credits: (3)**

Note:

Students desiring employment as a conservation officer should minor in Criminal Justice with a Law Enforcement concentration (see Department of Criminal Justice section of the catalog). Students desiring a career as a wildlife biologist or wildlife manager, or intending to pursue advanced studies in ecology or conservation biology following graduation (MS or PhD degrees), should minor in Botany. (Consult with the department secretary at 801-626-6165 for information about the advisor of this program.

Special Emphases

Pre-Medical Professional Training

Students considering application to medical, dental, veterinary, physical therapy, optometry, and pharmacy schools should consult the beginning of the College of Science section of this catalog. Furthermore, they should meet with the advisors of these programs, each of whom is listed in that section. The Department of Zoology offers lower and upper level courses that provide superb training for examinations such as the Medical College Admissions Test, as well as medical school courses. Students should meet with the appropriate advisor for specific course suggestions.

Ecological/Environmental Training

Students interested in ecologically or environmentally oriented careers should follow the Zoology major and select courses to fill their elective requirements from the following:

Zoology Course Electives

ZOOL 3500 - Conservation Biology **Credits: (3)**
 ZOOL 4300 - Research Applications in Genetics
Credits: (4)

Zoology (BIS)

Grade Requirements: A grade of "C -" or better in courses used toward the Zoology Emphasis in BIS.

Credit Hour Requirements: A minimum of 18 credit hours in Zoology courses.

Program Code: 6021

CIPC: 260701

Advisement

Students must have their Zoology BIS Emphasis contract approved by the departmental advisor and the BIS program coordinator. Call 801-626-6165 for the departmental advisor's contact information. (Also refer to the Departmental Advisor Referral List.)

Course Requirements for BIS Emphasis

Zoology Courses Required (11 credit hours)

ZOOL 1110 LS - Principles of Zoology Credits: (4)

ZOOL 2220 - Diversity of Animals Credits: (4)

ZOOL 3720 - Evolution Credits: (3)

Zoology BIS Emphasis Electives (7 credit hours)

Select 7 credit hours of approved upper division Zoology courses (numbered 3000 and above).

Note:

ZOOL 2100 – Human Anatomy Credits: (4) and ZOOL 2200 – Human Physiology Credits: (4) may be used at half credit (2 credit hours per each) to fulfill elective credit hours in the Zoology BIS Emphasis.

Zoology Minor

Grade Requirements: A grade of "C-" or better in courses used toward the minor.

Credit Hour Requirements: Minimum of 19 credit hours in Zoology courses.

Program Code: 6021

CIPC: 260701

Course Requirements for Minor

Zoology Courses Required (11 Credit Hours)

ZOOL 1110 LS - Principles of Zoology **Credits: (4)**

ZOOL 2220 - Diversity of Animals **Credits: (4)**

ZOOL 3720 - Evolution **Credits: (3)**

Zoology Minor Elective Courses (8 credit hours)

Select 8 credit hours of Zoology courses at or above the 2000 level.

ZOOL 2100 - Human Anatomy **Credits: (4)**

ZOOL 2200 LS - Human Physiology **Credits: (4)**

ZOOL 3099 - Teaching the Human Anatomy Laboratory **Credits: (3)**

ZOOL 3200 - Cell Biology **Credits: (4)**

ZOOL 3300 - Genetics **Credits: (4)**

ZOOL 3340 - Information Resources in the Life Sciences **Credits: (2)**

ZOOL 3450 - Ecology **Credits: (4)**

ZOOL 3470 - Zoogeography **Credits: (3)**

ZOOL 3500 - Conservation Biology **Credits: (3)**

ZOOL 3600 - Comparative Physiology **Credits: (4)**

ZOOL 3730 - Population Biology **Credits: (3)**

ZOOL 4050 - Comparative Vertebrate Anatomy **Credits: (4)**

ZOOL 4100 - Vertebrate Embryology **Credits: (4)**

ZOOL 4120 - Histology **Credits: (4)**

ZOOL 4210 - Advanced Human Physiology **Credits: (4)**

ZOOL 4220 - Endocrinology **Credits: (4)**

ZOOL 4300 - Research Applications in Genetics **Credits: (4)**

ZOOL 4350 - Animal Behavior **Credits: (4)**

ZOOL 4470 - Wildlife Ecology and Management **Credits: (4)**

ZOOL 4480 - Aquatic Ecology **Credits: (4)**

ZOOL 4490 - Marine Ecology **Credits: (4)**

ZOOL 4640 - Entomology **Credits: (4)**

ZOOL 4650 - Ichthyology **Credits: (4)**

ZOOL 4660 - Herpetology **Credits: (4)**

ZOOL 4670 - Ornithology **Credits: (4)**

ZOOL 4680 - Mammalogy **Credits: (4)**

ZOOL 4900 - Topics in Zoology **Credits: (1-4)**

ZOOL 4920 - Short Courses, Workshops, Institutes and Special Programs **Credits: (1-4)**

ZOOL 4950 - Field Zoology **Credits: (1-3)**

ZOOL 4990 - Seminar **Credits: (1)**

Maximum 2 credit hours from the following courses:

ZOOL 4800 - Problems in Zoology **Credits: (1-4)**

ZOOL 4820 - Human Physiology Laboratory Teaching Assistant **Credits: (1)**

ZOOL 4830 - Readings in Zoology **Credits: (1-4)**

ZOOL 4890 INT - Cooperative Work Experience **Credits: (1-4)**

Zoology Departmental Honors

Please see weber.edu/honors/contracts.html for a list of current Departmental Honors contracts and Departmental Honors Advisors. For additional information about the Honors Program, please refer to the Honors Program section of the WSU Catalog.

Interdisciplinary Programs

Biology (AS)

Location: College of Science (Department of Botany, Department of Microbiology, and Department of Zoology)
Telephone: Botany (801) 626-6174; Microbiology (801) 626-6949; Zoology (801) 626-6165

Grade Requirements: Cumulative GPA of 2.00 or higher for all WSU work. No more than 20 credit hours of "D" grade may be applied toward graduation.

Credit Hour Requirements: Total of 61 credit hours are required.

Program Code: 6038AS

CIPC: 26.0101

Advisement

Students should meet with the advisor listed below for advisement on Biology A.S. courses:

Advisor: Monica Lindford

Office: TY 201A (College of Science Advising Center)

Phone: 801-626-6578

To schedule an appointment:

cosadvising.youcanbook.me or "My Success Network" in Starfish (see College of Science Academic Advisement)

General Education

Students who plan to complete a B.S. in Botany, Microbiology, or Zoology or who are fulfilling pre-professional requirements should meet with the relevant program advisor or the College of Science advisor for guidance selecting CHEM, MATH, and electives. Refer to Degree Requirements for Associate of Science requirements. The following courses required for the Biology AS program will satisfy the quantitative core and life sciences portion of the general education requirements:

Students should complete the AS program in two years.

Requirements for AS Degree (61-63 credit hours)

Required Courses (26-28 credit hours)

BTNY 2104 - Plant Form and Function **Credits: (4)**

BTNY 2600 - Laboratory Safety **Credits: (1)** or
CHEM 2600 - Laboratory Safety **Credits: (1)** or
GEO 2600 - Laboratory Safety **Credits: (1)** or
MICR 2600 - Laboratory Safety **Credits: (1)** or
PHYS 2600 - Laboratory Safety **Credits: (1)**

CHEM 1210 PS - Principles of Chemistry I
Credits: (5)

CHEM 1215 - Principles of Chemistry I Lab
Credits: (1) **
**Only required for transfer students that have
CHEM 1210 lecture for 4 credit hours

CHEM 1220 - Principles of Chemistry II **Credits: (5)**

CHEM 1225 - Principles of Chemistry II Lab
Credits: (1) **
**Only required for transfer students that have
CHEM 1220 lecture for 4 credit hours

MATH 1050 QL - College Algebra **Credits: (4)** or
MATH 1040 QL - Introduction to Statistics
Credits: (3) or
MATH 1080 QL - Pre-calculus **Credits: (5)**

MICR 2054 LS - Principles of Microbiology
Credits: (4)

ZOOL 1110 LS - Principles of Zoology **Credits: (4)**

Alternative required courses suitable only for students pursuing a Botany major

CHEM 1110 PS - Elementary Chemistry **Credits: (5)**

CHEM 1115 - Elementary Chemistry Lab **Credits: (1) ****
**Only required for transfer students that have
CHEM 1110 lecture for 4 credit hours

CHEM 1120 - Elementary Organic Bio-Chemistry
Credits: (5)

CHEM 1125 - Elementary Organic Bio-Chemistry
Lab **Credits: (1) ****

**Only required for transfer students that have
CHEM 1120 lecture for 4 credit hours

WGS 2500 SS/DV - Human Rights in the World
Credits: (3)

Additional General Education Requirements (22 credit hours)

Composition

Earn a "C" grade or better:

ENGL 2010 EN2 - Intermediate College Writing
Credits: (3)

American Institutions

*Select 1 of the following options and earn a "C" grade or
better:*

POLS 1100 AI - American National Government
Credits: (3)
HIST 1700 AI - American History **Credits: (3)**
ECON 1740 AI - Economic History of the United
States **Credits: (3)**

Social Sciences

Select 6 credits and earn a passing grade:

ANTH 1000 SS/DV - Introduction to Anthropology
Credits: (3)
ANTH 2010 SS/DV - Peoples and Cultures of the
World **Credits: (3)**
ANTH 2030 SS - Principles of Archaeology
Credits: (3)
CJ 1010 SS - Introduction to Criminal Justice
Credits: (3)
ECON 1100 SS - Environmental Issues and
Economic Policy **Credits: (3)**
GEOG 1520 SS/DV - Geography of the United
States and Canada **Credits: (3)**
GERT 1010 SS - Introduction to Gerontology
Credits: (3)
HLTH 1030 SS - Healthy Lifestyles **Credits: (3)**
MIS 1100 SS - The Digital Society **Credits: (3)**
POLS 2500 SS/DV - Human Rights in the World
Credits: (3)
PSY 1010 SS - Introductory Psychology **Credits:**
(3)
SOC 1010 SS/DV - Introduction to Sociology
Credits: (3)
SOC 1020 SS/DV - Social Problems **Credits: (3)**

Humanities & Creative Arts

*Select 9 credits (with at least 3 credits from Humanities
and at least 3 credits from Creative Arts) and earn a
passing grade:*

Humanities

ANTH 1040 HU/DV - Language and Culture
Credits: (3)
COMM 1020 HU - Principles of Public Speaking
Credits: (3)
COMM 2010 HU - Mass Media and Society
Credits: (3)
COMM 2110 HU CEL - Interpersonal and Small
Group Communication **Credits: (3)**
ENGL 2200 HU/DV - Introduction to Literature
Credits: (3)
ENGL 2710 HU/DV - Perspectives on Women's
Literature **Credits: (3)**
ENGL 3510 HU/DV - World Literature **Credits: (3)**
ENGL 3520 HU - Literature of the Natural World
Credits: (3)
PHIL 1000 HU - Introduction to Philosophy
Credits: (3)
PHIL 1120 HU - Contemporary Moral Problems
Credits: (3)
PHIL 1250 HU - Critical Thinking **Credits: (3)**

Creative Arts

ART 1030 CA - Studio Art for the Non-Art Major
Credits: (3)
CS 1010 CA - Introduction to Interactive
Entertainment **Credits: (3)**
ENGL 2250 CA - CW: Introduction to Creative
Writing **Credits: (3)**
ENGL 2270 CA - CW: Introduction to Writing
Poetry **Credits: (3)**
MUSC 1040 CA/DV - Music of World Cultures
Credits: (3)
THEA 1053 - Introduction to Technical
Production **Credits: (3)**

Information Literacy

*Complete an exam or course option (see table below) and
earn a "C" grade or better for a course or a passing exam
score:*

LIBS 1504 - Information Literacy Competency Exam **Credits: (1)**
LIBS 1704 - Information Navigator **Credits: (1)**
LIBS 2604 - Information Resources in Education **Credits: (1)**
LIBS 2904 - Information Resources in the Health Professions **Credits: (1)**

Elective courses requiring advisor approval (career goals determine selection):
PHYS 1010 PS - Elementary Physics **Credits: (3)**
PHYS 2010 PS - College Physics I **Credits: (5)**
PHYS 2210 PS - Physics for Scientists and Engineers I **Credits: (5)**

Electives

Choose 13 or more credit hours from the following:

BTNY 1403 LS SUS - Principles of Environmental Science **Credits: (3-4)**
BTNY 2114 - Evolutionary Survey of Plants **Credits: (4)**
BTNY 2121 - Career Planning for Botanists **Credits: (1)**
BTNY 2303 - Ethnobotany **Credits: (3)**
BTNY 2413 - Introduction to Natural Resource Management **Credits: (3)**
CHEM 1200 - Preparation for College Chemistry **Credits: (3)**

CHEM 2310 - Organic Chemistry I **Credits: (4)**
and
CHEM 2315 - Organic Chemistry I Lab **Credits: (1)**

CHEM 2320 - Organic Chemistry II **Credits: (4)**
and
CHEM 2325 - Organic Chemistry II Lab **Credits: (1)**

ENGL 1010 EN1 - Introductory College Writing **Credits: (3)**

GEO 1110 PS - Dynamic Earth: Physical Geology **Credits: (3)** or
GEOG 1000 PS SUS - Natural Environments of the Earth **Credits: (3)**

MATH 1010 - Intermediate Algebra **Credits: (4-5)**
MATH 1040 QL - Introduction to Statistics **Credits: (3)** (if not taken as required MATH course)
MATH 1050 QL - College Algebra **Credits: (4)** (if not taken as required MATH course)
MATH 1060 - Trigonometry **Credits: (3)**
MATH 1210 - Calculus I **Credits: (4)**
ZOO 2100 - Human Anatomy **Credits: (4)**
ZOO 2200 LS - Human Physiology **Credits: (4)**
ZOO 2220 - Diversity of Animals **Credits: (4)**

WSU courses are new interdisciplinary, variable credit (3-5), team taught, and limited enrollment courses that satisfy requirements in two General Education areas (Core or Breadth). Must earn a passing grade.*

Students may take as many WSU Courses as they wish, but only the non-overlapping General Education attributes from subsequent WSU Courses will count toward General Education requirements.

Counts toward these two General Education areas:

WSU 1450 CA/HU - Perspectives in Creative Arts and Humanities **Credits: (3-5)**
WSU 1560 SS/HU - Perspectives in Social Science and Humanities **Credits: (3-5)**

Biology Composite Teaching (BS)

Program Prerequisite: Must meet the Teacher Education admission and licensure requirements (see Teacher Education Department).

Minor: Not required.

Grade Requirements: A grade of "C" or better in courses required for this major (a grade of "C-" is not acceptable).

Credit Hour Requirements: This major requires 120-124 credit hours. The student must also complete requirements for a secondary education license as determined by the Jerry and Vicki Moyes College of Education.

Program Code: 6008BS

CIPC: 131322

Advisement

Teaching majors are encouraged to consult with advisors in both the College of Science (call 801-626-6160) and the College of Education (call 801-626-6269).

Admission Requirements

Declare your program of study (see Enrollment Services and Information). Biology Composite Teaching majors must satisfy Teacher Education admission and licensure requirements (see Teacher Education Department in this catalog).

General Education

Refer to Degree Requirements for Bachelor of Science requirements. The following courses required for the Biology Composite Teaching major also will satisfy general education requirements: MICR 2054, GEO 1110, CHEM 1110 or CHEM 1210, PHYS 1010, CHF 1500, COMM 1020, and MATH 1050.

Major Course Requirements for BS Degree

Biological Science Courses Required (46 credit hours)

BTNY 2104 - Plant Form and Function **Credits: (4)**

BTNY 2114 - Evolutionary Survey of Plants **Credits: (4)**

MICR 2054 LS - Principles of Microbiology **Credits: (4)**

ZOOL 1110 LS - Principles of Zoology **Credits: (4)** and

ZOOL 2220 - Diversity of Animals **Credits: (4)**

ZOOL 2200 LS - Human Physiology **Credits: (4)**

or

ZOOL 3600 - Comparative Physiology **Credits: (4)**

ZOOL 3300 - Genetics **Credits: (4)**

ZOOL 3720 - Evolution **Credits: (3)** or

BTNY 4113 - Plant Evolution **Credits: (3)**

BTNY 3454 - Plant Ecology **Credits: (4)** or

ZOOL 3450 - Ecology **Credits: (4)** or

MICR 3154 - Microbial Ecology **Credits: (4)**

BTNY 2600 - Laboratory Safety **Credits: (1)** or

MICR 2600 - Laboratory Safety **Credits: (1)** or

BTNY 3000+ - Electives **(3)** or

ZOOL 3000+ - Electives **(3)** or

MICR 3000+ - Electives **(3)**

BTNY 3570 - Foundations of Science Education **Credits: (3)** or

MICR 3570 - Foundations of Science Education **Credits: (3)** or

ZOOL 3570 - Foundations of Science Education **Credits: (3)**

ZOOL 4570 - Secondary School Science Teaching Methods **Credits: (3)** or

BTNY 4570 - Secondary School Science Teaching Methods **Credits: (3)** or

MICR 4570 - Secondary School Science Teaching Methods **Credits: (3)**

BTNY 4800 - Individual Research **Credits: (2)** or
MICR 4800 - Directed Research **Credits: (1-2)** or
ZOOL 4800 - Problems in Zoology **Credits: (1-4)**

Support Courses Required (23-25 credit hours)

CHEM 1110 PS - Elementary Chemistry **Credits:**
(5) and

CHEM 1120 - Elementary Organic Bio-Chemistry
Credits: (5)

or

CHEM 1210 PS - Principles of Chemistry I
Credits: (5) and

CHEM 1220 - Principles of Chemistry II **Credits:**
(5)

GEO 1110 PS - Dynamic Earth: Physical
Geology **Credits: (3)**

PHYS 1010 PS - Elementary Physics **Credits: (3)**

or

PHYS 2010 PS - College Physics I **Credits: (5)**

MATH 1050 QL - College Algebra **Credits: (4)**

HIST 3350 - History and Philosophy of Science
Credits: (3)

Note:

*It is recommended that more advanced courses in
Mathematics, Physics and Chemistry be taken, especially if
graduate studies are planned. These should be discussed in
advance with the advisor.*

Environmental Science (BS)

Program Prerequisite: Not required.

Minor: Though not required, students may benefit from completing a minor, especially one focused on developing workforce skills such as communication, data analytics, geospatial studies, or professional and technical writing. Students should consult with an advisor prior to adding a minor to their program of study.

Grade Requirements: A grade of "C-" or better in courses required for the major (a grade of "D+" is not acceptable). A 2.00 overall GPA is required by the university for graduation.

Credit Hour Requirements: A total of 120 credit hours is required for graduation. Of this total, 58 credit hours in Environmental Science courses are required. Including the required support courses, 78-79 credit hours are required within the major. A total of 40 upper-division credit hours (courses numbered 3000 and above from any department) is required by the university for graduation.

Program Code: 6066BS

CIP: 030104

Advisement

All Environmental Science majors should meet with a faculty advisor at least annually for course and program advisement. New majors are strongly encouraged to meet with an advisor. Call 801-626-7139 for more information or to schedule an appointment.

Use Grad MAPs to plan your degree

Admission Requirements

Declare your program of study (see Enrollment Services and Information) with the program advisor. There are no special admission or application requirements.

General Education

Refer to Degree Requirements for Bachelor of Science requirements. The Quantitative Literacy (QL) requirement will be fulfilled by degree requirements (MATH 1050 QL or MATH 1080 QL or MATH 1210). The natural science breadth requirement (LS/PS) will be fulfilled by

degree requirements. The required support course ECON 1100 SS will count towards the social science (SS) breadth requirement.

Environmental Science Core Courses (35 credit hours)

BTNY 1403 LS SUS - Principles of Environmental Science **Credits: (3-4)**

BTNY 2600 - Laboratory Safety **Credits: (1)** or
CHEM 2600 - Laboratory Safety **Credits: (1)** or
GEO 2600 - Laboratory Safety **Credits: (1)** or
MICR 2600 - Laboratory Safety **Credits: (1)** or
PHYS 2600 - Laboratory Safety **Credits: (1)**

GEO 1060 PS - Environmental Geosciences **Credits: (3)** or

GEO 1110 PS - Dynamic Earth: Physical Geology **Credits: (3)**

GEO 1115 - Physical Geology Lab **Credits: (1)**
GEO 3010 - Oceanography and Earth Systems **Credits: (3)**

GEO 3710 - Introduction to Geographic Information Systems **Credits: (4)**

GEO 4990 - Geoscience and Society Seminar **Credits: (2)**

MICR 2054 LS - Principles of Microbiology **Credits: (4)**

MICR 3502 SUS - Environmental Health **Credits: (2)**

PHYS 2090 PS SUS - Energy and the Environment **Credits: (3)**

Either

BTNY 2104 - Plant Form and Function **Credits: (4)** and

BTNY 3454 - Plant Ecology **Credits: (4)**

OR

ZOOL 1110 LS - Principles of Zoology **Credits: (4)** and

ZOOL 3450 - Ecology **Credits: (4)**

Environmental Science Electives (24 credit hours minimum)

Select 24 additional Environmental Science elective credits, in consultation with your advisor, with at least 2 credits from each category. Some upper-division electives may have prerequisites not listed as an environmental science core or elective course. Those courses are marked with an asterisk (*) and students should consult with an academic advisor before adding them to their program of study.

Elective Category 1 - Ecology, Sustainability, & Natural Resources

BTNY 2413 - Introduction to Natural Resource Management **Credits: (3)** or

GEOG 1500 PS SUS - The Science of Global Warming: Myths, Realities and Solutions **Credits: (3)** or

GEOG 3060 - World Environmental Issues **Credits: (3)**

BTNY 3473 - Plant Geography **Credits: (3) ***

BTNY 3624 - Taxonomy of Vascular Plants **Credits: (4) ***

BTNY 3643 - Intermountain Flora **Credits: (3)**

BTNY 4950 - Advanced Field Botany **Credits: (3-5)**

MICR 3154 - Microbial Ecology **Credits: (4)**

ZOOL 3470 - Zoogeography **Credits: (3) ***

ZOOL 3500 - Conservation Biology **Credits: (3) ***

ZOOL 4480 - Aquatic Ecology **Credits: (4) ***

ZOOL 4490 - Marine Ecology **Credits: (4) ***

ZOOL 4640 - Entomology **Credits: (4) ***

Elective Category 2 - Environmental Health & Planning

MICR 3012 - Microbiology and Global Public Health **Credits: (2)**

MICR 3403 - Tropical Diseases **Credits: (3)**

MICR 3484 - Environmental Microbiology **Credits: (4)**

MICR 4054 - Microbial Physiology **Credits: (4) ***

ZOOL 4900 - Topics in Zoology **Credits: (1-4) ***
(must be taken as Animal Toxicology)

GEOG 3210 - Urban Geography **Credits: (3)** or

GEOG 4410 SUS - Sustainable Land Use Planning **Credits: (3)** or

SOC 3300 - Environment and Society **Credits: (3)**

GEOG 4420 - Advanced Urban and Regional Planning **Credits: (3)**

Elective Category 3 - Earth Systems & Water Science

BTNY 3214 - Soils **Credits: (4)** or

GEO 3214 - Soils **Credits: (4)**

GEO 3080 - Applied Hydrology **Credits: (3)**

GEO 3150 - Geomorphology **Credits: (4)**

GEO 3210 - Quaternary Environmental Change **Credits: (3)**

GEO 3753 - Geomicrobiology **Credits: (3)** or

MICR 3753 - Geomicrobiology **Credits: (3)**

GEO 4080 - Groundwater and Environmental Assessment **Credits: (4)**

GEO 4560 - Environmental Geochemistry **Credits: (4)** or

CHEM 4560 - Environmental Geochemistry **Credits: (4)**

GEOG 3050 - Weather and Climate **Credits: (3)**

or

GEOG 3080 - Arid Lands **Credits: (3)** or

GEOG 3090 - Arctic and Alpine Environments **Credits: (3)**

Elective Category 4 - Laboratory, Data Analysis, & Workforce Skills

CHEM 2310 - Organic Chemistry I **Credits: (4)**

CHEM 2315 - Organic Chemistry I Lab **Credits: (1)**

CHEM 3000 - Quantitative Analysis **Credits: (4)**

CHEM 3050 - Instrumental Analysis **Credits: (4)**

CHEM 3075 - Biochemistry I Lab **Credits: (1)**

CHEM 3610 - Foundations in Inorganic Chemistry **Credits: (4)**

GEO 3720 - Geospatial Analysis **Credits: (4)**

GEO 3840 - Remote Sensing: Principles and Methods **Credits: (4)**

GEO 4200 - Geospatial Data Acquisition **Credits: (4)**

GEO 4840 INT - Geospatial Internship **Credits: (1-3)**

GEOG 4400 - Cartography and Map Design

Credits: (3)

MATH 3450 - Advanced Statistical Methods

Credits: (4)

MATH 4400 - Statistical Analysis of Big and Small Data **Credits: (3)**

MATH 4910 - Senior Research Project **Credits: (3)**

BTNY 4800 - Individual Research **Credits: (2)** or
CHEM 4800 - Research and Independent Study in Chemistry **Credits: (1-3)** or

GEO 4800 - Independent Research **Credits: (1-3)**
or

MICR 4800 - Directed Research **Credits: (1-2)** or
PHYS 4800 - Individual Research Problems

Credits: (1-3) or

ZOOL 4800 - Problems in Zoology **Credits: (1-4)**

BTNY 4890 INT - Cooperative Work Experience
Credits: (1-6) or

CHEM 4890 INT - Cooperative Work Experience
Credits: (1-6) or

GEO 4890 INT - Cooperative Work Experience
Credits: (1-6) or

MICR 4890 INT - Cooperative Work Experience
Credits: (1-5) or

PHYS 4890 INT - Cooperative Work Experience
Credits: (1-6) or

ZOOL 4890 INT - Cooperative Work Experience
Credits: (1-4)

Required Support Courses (20-21 credit hours)

MATH 1050 QL - College Algebra **Credits: (4)** or
MATH 1080 QL - Pre-calculus **Credits: (5)** or
MATH 1210 - Calculus I **Credits: (4)**

MATH 1040 QL - Introduction to Statistics
Credits: (3) or

MATH 3410 - Probability and Statistics I **Credits: (3)** or

SOC 3600 - Social Statistics **Credits: (3)** or

PSY 3600 - Statistics in Psychology **Credits: (3)**

CHEM 1210 PS - Principles of Chemistry I
Credits: (5)

CHEM 1220 - Principles of Chemistry II **Credits: (5)**

ECON 1100 SS - Environmental Issues and Economic Policy **Credits: (3)**

Physical Science Composite Teaching (BS)

Program Prerequisite: Composite Teaching majors must meet the Teacher Education admission and licensure requirements (see Teacher Education Department).

Minor: Not required.

Grade Requirements: A grade of "C" or better in courses required for this major (a grade of "C-" is not acceptable). Also refer to the general grade requirements for graduation on Degree Requirements.

Credit Hour Requirements: A total of 120 credit hours are required for graduation; a minimum of 69 of these is required within the major. A total of 40 upper division credit hours is required (courses numbered 3000 and above); a minimum of 13 of these is required within the major.

Program Code: 6009BS

CIPC: 131399

Advisement

Teaching majors are encouraged to consult with advisors in both the College of Science (call 801-626-6160) and the College of Education (call 801-626-6269). (Also refer to the Department Advisor Referral List.) Students in this program should work closely with their advisor to ensure their teaching endorsements in multiple subject areas within physical science.

Admission Requirements

Declare your program of study. Physical Science Composite Teaching majors must satisfy Teacher Education admission and licensure requirements (see Teacher Education Department).

General Education

Refer to Degree Requirements for Bachelor of Science requirements. The following courses required for this major will satisfy physical science general education requirements: CHEM 1210, GEO 1110 and PHYS 2210.

Major Course Requirements for BS Degree

Required Courses (minimum of 69 credit hours)

Physics Courses (19 credit hours)

PHYS 1040 PS - Elementary Astronomy **Credits: (3)**

PHYS 2210 PS - Physics for Scientists and Engineers I **Credits: (5)** and

PHYS 2220 - Physics for Scientists and Engineers II **Credits: (5)**

Physics electives PHYS 2300 and above **(6)**

Geology Courses (17 credit hours)

GEO 1060 PS - Environmental Geosciences **Credits: (3)**

GEO 1110 PS - Dynamic Earth: Physical Geology **Credits: (3)**

GEO 1115 - Physical Geology Lab **Credits: (1)**

GEO 1130 PS - Introduction to Meteorology **Credits: (3)**

GEO 1220 - Historical Geology **Credits: (4)**

GEO 3010 - Oceanography and Earth Systems **Credits: (3)** or

GEO 3210 - Quaternary Environmental Change **Credits: (3)**

Chemistry Courses (14-15 credit hours)

CHEM 1210 PS - Principles of Chemistry I **Credits: (5)** and

CHEM 1220 - Principles of Chemistry II **Credits: (5)**

CHEM 2310 - Organic Chemistry I **Credits: (4)** and

CHEM 2315 - Organic Chemistry I Lab **Credits: (1)**

or

CHEM 3000 - Quantitative Analysis **Credits: (4)**

General Science Courses (8 credit hours)

PHYS 2600 - Laboratory Safety **Credits: (1)** or
CHEM 2600 - Laboratory Safety **Credits: (1)** or
GEO 2600 - Laboratory Safety **Credits: (1)**

PHYS 3570 - Foundations of Science Education
Credits: (3) or
CHEM 3570 - Foundations of Science Education
Credits: (3) or
GEO 3570 - Foundations of Science Education
Credits: (3)

PHYS 4570 - Secondary School Science
Teaching Methods **Credits: (3)** or
CHEM 4570 - Secondary School Science
Teaching Methods **Credits: (3)** or
GEO 4570 - Secondary School Science Teaching
Methods **Credits: (3)**

PHYS 4800 - Individual Research Problems
Credits: (1-3) (1 credit hour required) or
CHEM 4800 - Research and Independent Study
in Chemistry **Credits: (1-3)** (1 credit hour
required) or
GEO 4800 - Independent Research **Credits: (1-3)**
(1 credit hour required)

Science Support Courses (11 credit hours)

HIST 3350 - History and Philosophy of Science
Credits: (3)

MATH 1210 - Calculus I **Credits: (4)** and
MATH 1220 - Calculus II **Credits: (4)**

Note:

*Students must also complete the Teacher Education
Licensure Program.*

Biology Teaching Minor

This minor replaces and is a consolidation of the Botany and Zoology Teaching Minors.

Grade Requirements: A grade of "C-" or better in courses used towards the minor.

Credit Hour Requirements: A minimum of 47 credit hours. Students who select the Biology Teaching Minor must satisfy the Teacher Education admission and licensure requirements (see Teacher Education Department).

Program Code: 6002

CIPC: 131322

Course Requirements for Biology Teaching Minor

Science Courses Required (39 credit hours)

ZOOL 1110 LS - Principles of Zoology **Credits: (4)**

ZOOL 2220 - Diversity of Animals **Credits: (4)**

BTNY 2104 - Plant Form and Function **Credits: (4)**

BTNY 2114 - Evolutionary Survey of Plants **Credits: (4)**

MICR 2054 LS - Principles of Microbiology **Credits: (4)**

ZOOL 3300 - Genetics **Credits: (4)**

ZOOL 3600 - Comparative Physiology **Credits: (4)** or

ZOOL 2200 LS - Human Physiology **Credits: (4)**

MICR 3154 - Microbial Ecology **Credits: (4)** or

BTNY 3454 - Plant Ecology **Credits: (4)** or

ZOOL 3450 - Ecology **Credits: (4)**

BTNY 3570 - Foundations of Science Education **Credits: (3)** or

MICR 3570 - Foundations of Science Education **Credits: (3)** or

ZOOL 3570 - Foundations of Science Education **Credits: (3)**

BTNY 4570 - Secondary School Science Teaching Methods **Credits: (3)** or

MICR 4570 - Secondary School Science Teaching Methods **Credits: (3)** or

ZOOL 4570 - Secondary School Science Teaching Methods **Credits: (3)**

BTNY 2600 - Laboratory Safety **Credits: (1)** or

MICR 2600 - Laboratory Safety **Credits: (1)**

Required Support Courses (8 credit hours)

HIST 3350 - History and Philosophy of Science **Credits: (3)**

CHEM 1110 PS - Elementary Chemistry **Credits: (5)** or

CHEM 1210 PS - Principles of Chemistry I **Credits: (5)**

College of Engineering, Applied Science & Technology

Dr. David L. Ferro, Dean

College Mission Statement: The primary goal of the College of Engineering, Applied Science & Technology (EAST) is to implement the mission of Weber State University and to prepare students for employment upon graduation by ensuring that they are productive, accountable, and responsible individuals able to function effectively in today's workplace. This goal is achieved by developing in students a cohesive, solid theoretical foundation bolstered by practical, hands-on experiences. The learning environment is further enhanced by extensive contact between faculty and students both in and out of the classroom. In addition, the liberal education component present in all programs equips students for lifelong learning in a changing world.

College Vision Statement: The vision of the College of Engineering, Applied Science & Technology is to be the leader in the state in technology and technology related programs through service to our students and the businesses and industries in our region. The mission of the college is to serve the State of Utah by

- Preparing students for employment upon graduation and ensuring that they are productive, accountable, and responsible individuals able to function effectively in today's workplace.
- Engaging in scholarly activities that expand the technological education our students receive and providing a service to business and industry.
- Utilizing the college's resources and faculty expertise to benefit students, business, industry, education, government, and society in general.

The Alan E. Hall Center for Sales Excellence

Director: Brock Adams
Telephone: 801-626-6912 or 801-626-6970

The Alan E. Hall Center for Sales Excellence was established in 2013 through a grant funded by the Alan and Jeanne Hall Foundation to promote and explore sales excellence by collaboratively engaging academic and industry sales experts. The Center for Sales Excellence is the nexus of a community of learners and benefactors in sales expertise. It develops sales curricula and instruction for private and public institutions, creates online resources for sales, partners with industry to augment industry-specific sales skill-sets, promotes the development of improved sales technology and theory-based techniques, and links sales students with experienced sales professionals and organizations.

The National Center for Automotive Science and Technology

Director: Joe Thomas
Location: TE 201 **Telephone:** 801-626-7836

The Center for Automotive Science and Technology was established in 1997 to assist in developing a better understanding of vehicle emissions among academic, regulatory, and private sector entities, both locally and nationally. To do this, the Center provides training to automotive technicians, instructors, regulatory officials, field engineers, and consumer groups as well as doing applied research on vehicular emissions. Additionally, the Center gathers and disseminates information about the impact of emissions, design for emission abatement, and efficiency of vehicles. The Center is a cooperative endeavor of the University, the Utah Department of Environmental Quality, and multiple private companies.

Wadman Center for Excellence in Construction and Building Sciences

Location: WSU Davis, DSC-310 **Telephone:** 801-395-3427 **Email:** parsoncmt@weber.edu

Established in 2018, the Wadman Center for Excellence in Construction and Building Sciences supports department degree programs in Construction Management, Interior Design, Facilities Management, and Building Design & Construction. The Center, working with regional educational institutions, industry advisory boards, staff, faculty and alumni develops and implements student recruiting and marketing strategies for the Center's programs. The Center promotes and manages recruiting and marketing activities in coordination with WSU's existing EAST support services. These activities include fostering employer and alumni relations, supporting student recruiting, and hosting related student/program events. In addition, the Center promotes, sponsors, and hosts student-related activities each school year in support of department programs and student events. The Center will collaborate and coordinate critical continuing education programs with the WSU's Office of Continuing Education, providing industry training for licensing, industry continuing educational credit, and workshops and seminars relevant to construction and building science industries.

Computer Literacy Center

Director: Abdulmalek Al-Gahmi
Administrative Specialist: Angie Christensen
Location: EH 311 **Telephone:** 801-626-7384
Web: weber.edu/clc

The Computer Literacy Center is a university-wide student learning center established to ensure all students achieve the computational literacy necessary to succeed in university coursework, academic research, and the workplace of the future. Entering and continuing WSU students possess widely varying levels of experience and knowledge about computer applications and operation. The CLC is designed to support students from all backgrounds to attain levels of computer competency appropriate to their specific academic needs. The CLC also offers instructional support on advanced topics to prepare students for upper

division courses and research investigations, and represents a key resource to ensure student competency in computer applications specifically defined by faculty to support university courses instructed by those faculty.

The Concept Center

Director: Taylor Foss

Location: TE 219 **Telephone:** 801-626-6670 **Web:** weber.edu/east/concept

The Concept Center is an innovative engineering research and design think tank that brings skilled students, experienced faculty, and local companies together on engineering research, product development, and design. The Concept Center at Weber State University is here to provide the engineering expertise needed to help established businesses improve production processes, assist small tech-based startups with a potentially valuable patent, and assist individuals to move great ideas forward. The Concept Center participants get low cost, creative, and effective solutions; and WSU students and faculty gain valuable experience.

Center for Technology Outreach

Director: Alicia Christensen & Luke Fernandez

Location: M3 **Telephone:** 801-626-7552

Web: weber.edu/eastoutreach

The College of Engineering, Applied Science & Technology values our role in providing a variety of engaging, fun, and instructive outreach programs. Through the Center for Technology Outreach we strive to reach out to students and community members of all ages through our Speaker Series and K-12 Programs.

The Speaker Series features interesting and informative voices from the expansive field of technology experts in Utah and around the US. Participants are intellectually enriched by the insight, understanding, and knowledge of people such as internet expert Radia Perlman, author Matt Richtel, and computer programmer and activist Richard Stallman. The Speaker Series is open to the public and all are welcome.

Encouraging, supporting and providing Science, Technology, Engineering and Math (STEM) opportunities to K-12 students is an important and valued component of our service to the community. The scope of our K-12 Outreach is multi-layered.

Introduction and Awareness: Short-term events to build interest and awareness in technology such as Parent/Daughter Engineering Day, Family Engineering Day, and STEM Fests & Expo's.

Engage and Experience: Programs designed to engage students in more committed STEM activities and increase their confidence and interest in pursuing STEM related majors and careers. These include, FIRST Tech Challenge Robotics, FIRST LEGO League, SeaPerch Underwater Robotics, Engineering and Technology Summer Camps, and more.

Educate and Support: In-depth academic enrichment, designed with the goal of impacting the long-term education and career pathways of students. WSU PREP and Project Lead the Way both highlight the college's long-term investment in K-12 education and Utah's youth.

Noorda Interdisciplinary Center

Director: David Ferro

Location: ET 110 **Telephone:** 801-626-6303

The Noorda Interdisciplinary Center (NIC) for Engineering, Science & Society, created with the generous donations from the Noorda Foundation, and an element of the original agreement with that foundation, endeavors to find collaborations between various disciplines in science, engineering, technology, humanities, and social sciences; to allow for creating interdisciplinary programs; to engage in projects with the community examining social impacts and creating positive changes through engineering and science; to expose students to the social contexts within which they work and create; and to reignite passion and exploration with the larger community for an enlightened understanding of techno-scientific issues. The NIC is oriented towards outreach and teaching about and solving engineering grand challenges, that could correspond to Noorda Foundation goals like energy efficiency, generation, and storage, among others, that putting engineering into important social, historical, and economic contexts, including, for examples, the need to welcome sustainability, under-represented populations into engineering, promoting democracy, and cybersecurity.

Construction and Building Sciences Department

Department Chair: Pieter van der Have
Location: WSU Davis DSC, Room 310
Telephone Contact: Liz Hill 801-395-3427
Email: Parsoncmt@weber.edu

Professor: Steven Peterson; **Associate Professors:** Kristen Arnold, Jeremy Farnier; **Instructors:** Ashley Badali, Russell Butler, Pieter van der Have, Jacie Johnson, Cameron Lewis, Shauna Morris, Tim Willard

Construction and Building Science is a field of knowledge that draws upon physics, chemistry, engineering, architecture, construction and the life sciences. Construction and Building Science attempts to work with models of buildings and structures *as a system*, applying empirical techniques to the effective solution of design and construction problems. More specifically, contemporary construction and building science is a broad discipline that is concerned with the full life cycle of buildings and engineering projects, including: policy (codes and standards), planning, design, construction, commissioning, facilities management, restoration and retrofit, preservation and conservation, and demolition (deconstruction) and recycling.

The Construction and Building Sciences Department offer degrees in Building Design and Construction, Interior Design, Construction Management and Facilities Management.

Parson Construction Management

The Parson Construction Management program teaches the processes, procedures and management techniques necessary to function as a "Professional Constructor". It is designed to prepare students for immediate professional level employment or further study by developing a cohesive, solid technical foundation bolstered by practical, hands-on experiences, at the same time providing the education necessary for lifelong learning in a changing world. The process of learning is emphasized, as well as accumulation of knowledge. The multi-disciplinary curriculum is composed of courses in the areas of construction science, construction practice, business, and

management as well as general education. The program is accredited by the Weber State University Accreditation.

The Parson Construction Management curriculum is a "2+2" design facilitating articulation with programs in architecture, commercial building construction, design graphics, facilities, interior design, and other building design and construction-related degrees.

Facilities Management-Emphasis

The Construction Management Program-Facilities Management Emphasis prepares graduates to manage and maintain the physical facilities for companies. Facilities managers may be responsible for leading activities in all or parts of the following: managing operations and maintenance of buildings, physical plant and utility distribution systems, grounds upkeep, road and parking lot maintenance, snow removal; recycling and waste management, energy conservation, sustainability; long range facility planning, remodeling of existing facilities and planning, design and construction of new facilities and systems; code compliance.

Building Design & Construction

The Building Design & Construction (BDC) degree prepares graduates to enter careers in the design, construction, operation or maintenance of the built environment. Graduates are prepared for careers in the building design, construction, testing, operation, and maintenance of building systems; they have the abilities to produce and utilize basic construction documents and to perform basic analysis and design of system components. Baccalaureate degree graduates will have the technical and managerial skills necessary for careers in which they will analyze and design systems, specify project methods and materials, perform cost estimates and analyses, and manage technical activities in support of building projects.

Interior Design

The four-year Interior Design degree provides student's academic preparation for employment in the design-build industry. Students develop skills in professional practice and sales, Auto CAD, Revit Architecture, drafting,

sketching, rendering, space planning, specification of materials, building codes, history and theory. Drafting and technical skills are essential to the program of study. Students graduating with the Interior Design Professional Sales degree meet guidelines for the practice of residential and commercial interior design, are academically prepared to sit for the CKD (Certified Kitchen Design) exam, gain membership in professional organizations, become licensed, and after two years of experience in the field sit for the NCIDQ (National Council for Interior Design Qualification) exam. The Interior Design bachelor of science degree is accredited by the Council for Interior Design Accreditation (CIDA) and endorsed by the National Kitchen and Bath Association (NKBA).

Apprenticeship (AAS)

LIBS 1704 - Information Navigator Credits: (1)

The Associate of Applied Science in Apprenticeship degree is a generic degree that is specifically designed for students who have completed or are completing an apprenticeship program under the auspices of the Office of Apprenticeship. This degree consists of the apprenticeship courses and on-the-job training from the Ogden Weber Technical College (OWTC) or the Davis Technical College coupled with general education and two additional required courses from Weber State University.

While the degree was developed for OWTC apprenticeship students, **it is open to anyone who meets the qualifications** of an apprentice with a certificate of proficiency from a post-secondary institution offering the Office of Apprenticeship (OA) certified program. Please see <http://www.utech.edu/> for a list of other Utah System of Technical Colleges locations.

Program Code: 8047AAS

CIPC: 460000

For additional information and advisement, schedule an appointment online with an Advisor at <https://www.weber.edu/east/advising/default.html> or call 801-395-3496

In order for a student to receive this degree they must complete the course requirements listed below and provide one of the following:

- State of Utah Journey person's License
- Certificate of Completion from the Office of Apprenticeship (OA)
- Certificate of Completion from the post-secondary institution offering an OA certified program

Course Requirements for the AAS Degree

- ENGL 1010 EN1 - Introductory College Writing
Credits: (3)
- COMM 1020 HU - Principles of Public Speaking
Credits: (3)
- COMM 2110 HU CEL - Interpersonal and Small Group Communication **Credits: (3)**
- BTNY 1403 LS SUS - Principles of Environmental Science **Credits: (3-4)**
- MATH 1050 QL - College Algebra **Credits: (4)**
- ECON 2010 SS - Principles of Microeconomics
Credits: (3)
- MIS 2010 - Business Computer Skills **Credits: (1)**

Construction Management (AAS)

Grade Requirements: A grade of "C" or better in all major courses, business courses, and support courses is required (a grade of "C-" is not acceptable) in addition to an overall GPA for all courses of 2.00 or higher. Also refer to the general grade requirements for graduation under Degree Requirements .

Credit Hour Requirements: 65 total credit hours are required. A minimum of 20 hours in residence at WSU is required. A student must also complete a minimum of 18 hours of CMT major courses at WSU to obtain an AAS degree.

Program Code: 8085AAS

CIPC: 522001

Advisement

All Construction Management Technology students are encouraged to meet with a faculty advisor at the beginning of their freshman and sophomore years for course and program advisement. Call the CMT program secretary at 801-395-3427 to schedule an appointment.

Admission Requirements

Declare your program of study (see Enrollment Services and Information). There are no special admission or application requirements for this program. (Also refer to the Department Advisor Referral List.)

General Education

Refer to the Degree Requirements for Associate of Applied Science requirements. The following courses required for the Construction Management Technology AAS degree will also fulfill general education requirements: COMM 1020/COMM 2110 (Humanities), MATH 1080 (Quantitative Literacy), ECON 2010 (Social Science), and LIBS 1704 (Information Navigator).

Major Course Requirements for AAS Degree

Construction Management Technology Courses Required (36 credit hours)

CMT 1100 - Construction Management
Orientation **Credits: (1)**
CMT 1150 - Construction Graphics **Credits: (3)**
CMT 1220 - Construction Contracts **Credits: (3)**
CMT 1310 - Materials & Methods **Credits: (4)**
CMT 1330 - Civil Materials **Credits: (4)**
CMT 1550 - Construction Safety **Credits: (2)**
CMT 2210 - Construction Jobsite Management
Credits: (3)
CMT 2260 - MEP **Credits: (4)**
CMT 2340 - Civil Design and Layout **Credits: (4)**
CMT 2360 - Commercial Design and Codes
Credits: (4)
CMT 2410 - LEED-GA Preparation **Credits: (1)**
CMT 2640 - Quantity Survey **Credits: (2)**
CMT 2899 - AAS Graduation Assessment and
Signoff **Credits: (0)**
CMT 2990 - Construction Management Seminar
Credits: (0.5) (2 credit hours required)

Business Courses Required (9 credit hours)

ACTG 2010 - Survey of Accounting I **Credits: (3)**
BSAD 1010 - Introduction to Business **Credits:
(3)**
ECON 2010 SS - Principles of Microeconomics
Credits: (3)

Support Courses Required (17 credit hours)

MATH 1080 QL - Pre-calculus **Credits: (5)**
LIBS 1704 - Information Navigator **Credits: (1)**
ENGL 2010 EN2 - Intermediate College Writing
Credits: (3)
COMM 2010 HU - Mass Media and Society
Credits: (3) or
COMM 2110 HU CEL - Interpersonal and Small
Group Communication **Credits: (3)**
BTNY 1403 LS SUS - Principles of
Environmental Science **Credits: (3-4)**
MIS 2010 - Business Computer Skills **Credits: (1)**

Interior Design (AAS)

Grade Requirements: A grade of "B" or better in courses required for this major (a grade of "B-" is not acceptable) in addition to an overall GPA of 3.0 or higher.

Credit Hour Requirements: A total of 66 credit hours is required.

Assessment Requirements: Students may be required to complete certain assessment instruments as part of the requirements for receiving the associate's degree.

Program Code: 8087AAS

CIPC: 500408

Advisement

All Interior Design students are required to meet with a faculty advisor each semester for course and program advisement. Call 801-626-6913 for more information or to schedule an appointment. (Also refer to the Department Advisor Referral List.)

Admission Requirements

Declare your program of study (see Enrollment Services and Information). There are no admission or application requirements for this program.

General Education

Refer to Degree Requirements for Associate of Applied Science requirements. The following required support courses will also be applied toward general education requirements: COMM 2110 (3), and ART 1010 (3) or ART 1030 (3). Students also need to complete ENGL 1010 (3), Quantitative Literacy (3), Life Science or Physical Science (3), Social Science (3), and Computer and Information Literacy (minimum 2). A minimum of 20 hours in residence is required.

Transfer Credits

No courses older than 10 years will be accepted for credit toward a degree in this program.

Major Course Requirements for AAS Degree

Interior Design Courses Required (33 credit hours)

- IDT 1010 CA - Introduction to Interior Design
Credits: (3)
- IDT 1020 - Presentation Techniques **Credits: (3)**
- IDT 2010 - Sustainability I: Textiles and Soft Materials **Credits: (3)**
- IDT 2020 - Computer-aided Design and Drafting
Credits: (3)
- IDT 2035 - Design Process/Space Planning
Credits: (3)
- IDT 2040 - Architectural Detailing **Credits: (3)**
- IDT 2050 - Codes **Credits: (2)**
- IDT 2860 - Practicum **Credits: (1-2)**
- IDT 2990 - Interior Design Seminar **Credits: (1)**
- IDT 2820 - Historical Interiors **Credits: (3)**
- IDT 3020 - American and Modern Interiors
Credits: (3)
- IDT 2060 - Sustainability II: Materials, Hard Surfaces, and Specifications **Credits: (3)**

Support Courses Required (12 credit hours)

- ART 1010 CA - Introduction to the Visual Arts
Credits: (3) or
- ART 1030 CA - Studio Art for the Non-Art Major
Credits: (3)

- COMM 2110 HU CEL - Interpersonal and Small Group Communication **Credits: (3)**
- PS 1143 - Principles of Selling and Persuasion
Credits: (3)
- PS 3103 - Sales Personalities and Profiles
Credits: (3)

Note:

Information Literacy as defined in this catalog is also required.

Pre-Architecture (AAS)

The BDC Pre-Architecture program will allow students to prepare for job opportunities working for residential design firms and builders, commercial architectural design firms and contractors; trade contractors and engineering firms such as mechanical, electrical, and plumbing; civil engineering firms; and various other firms related to the construction of the built environment. It provides an alternative pathway for those interested in continuing their graduate education in various disciplines relating to the built environment.

Program Prerequisite: None

Minor: Not required

Grade Requirements: A grade of "C" or better in courses used toward the major (a grade of "C-" is not acceptable).

Credit Hour Requirements: 64 total credits

Program Code: 8089AAS

CIPC: 040901

Advisement

All program students should meet with a faculty advisor at least annually for course and program advisement. The department secretary can also assist students. Call 801-395-3427 for more information or to schedule an appointment. (Also, refer to the Department Advisor Referral List.)

Use Grad MAPs to plan your degree

Admission Requirements

Declare your program of study (Enrollment Services and Information).

General Education

Refer to Degree Requirements for AAS general education requirements.

Required Courses

BDC 1040 CA - Introduction to Architecture
(Studio 1) **Credits: (3)**

CMT 1100 - Construction Management
Orientation **Credits: (1)**

IDT 1010 CA - Introduction to Interior Design
Credits: (3)

CMT 1150 - Construction Graphics **Credits: (3)**

CMT 1310 - Materials & Methods **Credits: (4)**

IDT 1050 - Architectural Drafting **Credits: (3)**

BDC 1350 - Residential Design (Studio 2)
Credits: (3)

IDT 1020 - Presentation Techniques **Credits: (3)**

IDT 2820 - Historical Interiors **Credits: (3)**

IDT 2990 - Interior Design Seminar **Credits: (1)**
Taken 4 times for a total of 4 credits

IDT 2035 - Design Process/Space Planning
Credits: (3)

BDC 2000 - Commercial Design (Studio 3)
Credits: (3)

CMT 1220 - Construction Contracts **Credits: (3)**

IDT 2050 - Codes **Credits: (2)**

CMT 2410 - LEED-GA Preparation **Credits: (1)**

CMT 2640 - Quantity Survey **Credits: (2)**

Required Support Courses

MATH 1080 QL - Pre-calculus **Credits: (5)**

PHYS 2010 PS - College Physics I **Credits: (5)**

COMM 2110 HU CEL - Interpersonal and Small
Group Communication **Credits: (3)**

Building Design & Construction Essentials Certificate of Proficiency

The Building Design & Construction Essentials Certificate will allow students to prepare for job opportunities working for residential design firms and builders, commercial architectural design firms and contractors; trade contractors and firms such as civil, mechanical, electrical, and plumbing; various other firms related to the design and construction of the built environment. It provides a pathway for those interested in continuing their undergraduate education in Architecture, Construction Management, Interior Design, Sustainability, and various disciplines relating to the built environment.

Admission Requirements: None

Grade Requirements: Students must receive a grade of C or better in all courses.

Credit Hour Requirements: A total of 17 credit hours is required.

Program Code: 8081CP

CIPC: 150101

Advisement

Building Design & Construction students should meet with the program advisor for course and program advisement. Call 801-395-3427 for more information or to schedule an appointment. (Also refer to the Department Advisor Referral List.)

Course Requirements for Building Design & Construction Essentials Certificate of Proficiency

Courses Required (17 credit hours)

CMT 1100 - Construction Management

Orientation **Credits: (1)**

BDC 1040 CA - Introduction to Architecture

(Studio 1) **Credits: (3)**

CMT 1310 - Materials & Methods **Credits: (4)**

BDC 1350 - Residential Design (Studio 2)

Credits: (3)

IDT 1010 CA - Introduction to Interior Design

Credits: (3)

Facilities Management Certificate of Proficiency

The Certificate of Proficiency will allow individuals to enhance their level of expertise in the profession of Facilities Management. The knowledge gained upon earning the Certificate will help individuals who are already working in this field develop an understanding of their environment, and potentially provide an opportunity to advance up the career ladder. This program covers the essential elements of the Facilities Management profession.

Admission Requirements: None.

Grade Requirements: Students must receive a grade of C or better in all courses.

Credit Hour Requirements: A total of 19 credit hours is required.

Program Code: 8056CP

CIPC: 522001

Advisement

Facilities Management students should plan to meet with the program advisor for course and program advisement. Call 801-395-3427 for more information or to schedule an appointment. (Also refer to the Department Advisor Referral List.)

Required Courses

CMT 3510 - Energy Management in Bldg. M&E Systems **Credits: (4)**

CMT 3630 - Environmental Issues in FM **Credits: (3)**

CMT 3680 - Facility Management Administration and Operations **Credits: (4)**

CMT 4270 - Computer Aided FM **Credits: (4)**

CMT 4310 - Long-term Planning in Facility Management **Credits: (4)**

Building Design & Construction (BS)

The Building Design & Construction (BDC) program prepares graduates to enter careers in the architectural design, construction, operation or maintenance of the built environment. Graduates are prepared for careers in the architectural design, construction, testing, operation, and maintenance of building systems; they have the abilities to produce and utilize basic construction documents and to perform basic analysis and design of system components. Baccalaureate degree graduates will have the technical and managerial skills necessary for careers in which they will analyze and design systems, specify project methods and materials, perform cost estimates and analyses, and manage technical activities in support of architectural design projects.

The BDC program will allow students to prepare for job opportunities working for residential design firms and builders, commercial architectural design firms and contractors; trade contractors and engineering firms such as mechanical, electrical, and plumbing; civil engineering firms; and various other firms related to the construction of the built environment. It provides an alternative pathway for those interested in continuing their graduate education in various disciplines relating to the built environment.

Program Prerequisites: None

Minor: Not required.

Grade Requirements: A grade of "C" or better in courses used toward the major (a grade of "C-" is not acceptable).

Credit Hour Requirements: 120 total credits.

Program Code: 8088BS

CIPC: 150101

Advisement

All program students should meet with a faculty advisor at least annually for course and program advisement. The department secretary can also assist students. Call 801-395-3427 for more information or to schedule an appointment. (Also, refer to the Department Advisor Referral List.)

Admission Requirements

Declare your program of study (Enrollment Services and Information).

General Education

Refer to Degree

Requirements for the University Bachelor of Science requirements.

Building Design & Construction Pre-Architecture AAS Required Courses

- BDC 1040 CA - Introduction to Architecture (Studio 1) **Credits: (3)**

CMT 4150 - Construction Equipment and Methods **Credits: (3)**
CMT 4270 - Computer Aided FM **Credits: (4)**
CMT 4310 - Long-term Planning in Facility Management **Credits: (4)**
CMT 4330 - Applied Structures **Credits: (4)**
CMT 4350 - Temporary Structures **Credits: (2)**
CMT 4510 - Design Charrette **Credits: (1)**
CMT 4520 - ASC Student Competition **Credits: (1)**
CMT 4570 - Approaches to Construction Contracting **Credits: (2)**

CMT 4620 - Senior Project **Credits: (2)**
CMT 4650 - FM Senior Project **Credits: (2)**
CMT 4800 - Individual Projects and Research **Credits: (1-3)**
CMT 4830 - Directed Studies **Credits: (1-3)**
CMT 4890 - Practicum **Credits: (2)**
CMT 4920 - Short Courses, Workshops, Institutes, and Special Programs **Credits: (.5-4)**
ENTR 3002 - Scale & Exit **Credits: (3)**
MGMT 3010 - Organizational Behavior and Management **Credits: (3)**
MKTG 3010 - Marketing Concepts and Practices **Credits: (3)**
SCM 3050 - Operations and Supply Chain Management **Credits: (3)**
GEOG 4410 SUS - Sustainable Land Use Planning **Credits: (3)**
GEOG 4420 - Advanced Urban and Regional Planning **Credits: (3)**
GEOG 4920 - Short Courses, Workshops, Institutes and Special Programs **Credits: (1-6)**
BDC 4830 - Directed Studies **Credits: (1-3)**
BDC 4920 - Short Courses, Workshops, Institutes, and Special Programs **Credits: (1-3)**

Construction Management (BS)

Program Prerequisite: Declare a Program of Study in Construction Management

Minor: Not required, Business minor is recommended.

Grade Requirements: A grade of "C" or better in all major courses, business courses, and support courses is required (a grade of "C-" is not acceptable) in addition to an overall GPA for all courses of 2.00 or higher. Also refer to the general grade requirements for graduation under Degree Requirements.

Credit Hour Requirements: A total of 123 credit hours is required for graduation. A total of 40 upper division credit hours is required (courses numbered 3000 and above).

Assessment Requirements: The students will be required to take Associate Constructor (AC) exam administered by American Institute of Constructors (AIC). A minimum score of 192 out of 300 (64 percent) is required for graduation. The exam may be retaken if needed.

Program Code: 8085BS

CIPC: 522001

Advisement

All Construction Management students are encouraged to meet with a faculty advisor at the beginning of their freshman, junior, and senior years for course and program advisement. Call the CMT program secretary at 801-395-3427 to schedule an appointment. (Also refer to the Department Advisor Referral List).

Admission Requirements

Declare your program of study (see Enrollment Services and Information). There are no special admission or application requirements for this program.

General Education

Refer to Degree Requirements for Bachelor of Science requirements. Consult with an academic advisor for specific general education guidelines. The following courses required for the Construction Management BS

degree will also fulfill general education requirements: COMM 1020/ COMM 2110 (Humanities), MATH 1080 (Quantitative Literacy), ECON 2010 (Social Science), PHYS 2010 (Physical Science), and BTNY 1403 (Life Science).

Major Course Requirements for BS Degree

Course requirements are subject to change. Check with program advisor for current requirements.

Construction Management Courses Required (65 credit hours)

CMT 1100 - Construction Management
Orientation **Credits: (1)**

CMT 1150 - Construction Graphics **Credits: (3)**

CMT 1220 - Construction Contracts **Credits: (3)**

CMT 1310 - Materials & Methods **Credits: (4)**

CMT 1330 - Civil Materials **Credits: (4)**

CMT 1550 - Construction Safety **Credits: (2)**

CMT 2210 - Construction Jobsite Management
Credits: (3)

CMT 2260 - MEP **Credits: (4)**

CMT 2340 - Civil Design and Layout **Credits: (4)**

CMT 2360 - Commercial Design and Codes

Credits: (4)

CMT 2410 - LEED-GA Preparation **Credits: (1)**

CMT 2640 - Quantity Survey **Credits: (2)**

CMT 2990 - Construction Management Seminar
Credits: (0.5) (2 credit hours required)

CMT 3115 - Construction Cost Estimating
Credits: (3)

CMT 3130 - Construction Planning & Scheduling
Credits: (3)

CMT 3310 - Leadership in the Construction
Industry **Credits: (2)**

CMT 3370 - Preconstruction Services **Credits: (3)**

CMT 4120 - Construction Accounting and
Finance **Credits: (3)**

CMT 4150 - Construction Equipment and
Methods **Credits: (3)**

CMT 4330 - Applied Structures **Credits: (4)**

CMT 4350 - Temporary Structures **Credits: (2)**

CMT 4510 - Design Charrette **Credits: (1)** or

CMT 4520 - ASC Student Competition **Credits:**

(1) Students can choose between CMT 4510 or
4520

CMT 4570 - Approaches to Construction Contracting **Credits: (2)**
CMT 4620 - Senior Project **Credits: (2)**
CMT 4899 - BS Graduation Assessment and Signoff **Credits: (0)**

Business Courses Required (18 credit hours)

The following Business Courses are Required:

BSAD 1010 - Introduction to Business **Credits: (3)**
BSAD 3200 - Legal Environment of Business **Credits: (3)**
ECON 2010 SS - Principles of Microeconomics **Credits: (3)**
MGMT 3010 - Organizational Behavior and Management **Credits: (3)**
MKTG 3010 - Marketing Concepts and Practices **Credits: (3)**

Support Courses Required (28 credit hours)

The following Support Courses are Required:

ACTG 2010 - Survey of Accounting I **Credits: (3)**
BTNY 1403 LS SUS - Principles of Environmental Science **Credits: (3-4)** (4 credit hours required)

COMM 1020 HU - Principles of Public Speaking **Credits: (3)** or
COMM 2110 HU CEL - Interpersonal and Small Group Communication **Credits: (3)**

ENGL 2010 EN2 - Intermediate College Writing **Credits: (3)**
MIS 2010 - Business Computer Skills **Credits: (1)**

MIS 2020 - Introduction to Information Systems **Credits: (3)** or
SCM 3050 - Operations and Supply Chain Management **Credits: (3)**

LIBS 1704 - Information Navigator **Credits: (1)**
MATH 1080 QL - Pre-calculus **Credits: (5)**
PS 3250 - Business Communication **Credits: (3)**
PHYS 2010 PS - College Physics I **Credits: (5)**

Construction Management (BS), Facilities Management Emphasis

Program Prerequisite: Declare a Program of Study in Construction Management and declare your emphasis as Facilities Management.

Minor: Not required.

Grade Requirements: A grade of "C" or better in all major courses, business courses, and support courses is required (a grade of "C-" is not acceptable) in addition to an overall GPA for all courses of 2.00 or higher. Also refer to the general grade requirements for graduation under Degree Requirements.

Credit Hour Requirements: A total of 121 credit hours is required for graduation. A total of 40 upper division credit hours is required (courses numbered 3000 and above).

Program Code: 8085BS Construction Management with Emphasis code (8056)

CIPC: 522001

Advisement

All Construction Management Technology students are encouraged to meet with a faculty advisor at the beginning of their freshman, junior, and senior years for course and program advisement. Call the CMT program secretary at 801-395-3427 to schedule an appointment. (Also refer to the Department Advisor Referral List).

Admission Requirements

Declare your program of study (see Enrollment Services and Information). No special admission or application requirements are needed for this program.

General Education

Refer to the Degree Requirements for Bachelor of Science requirements. Consult with an academic advisor for specific general education guidelines. The following courses required for the Construction Management - Facilities Management Emphasis BS degree will also fulfill general education requirements: COMM 1020/COMM 2110 (Humanities), MATH 1080 (Quantitative Literacy),

ECON 2010 (Social Science), and BTNY 1403 (Life Science).

Major Course Requirements for BS Degree

Course requirements are subject to change. Check with program advisor for current requirements.

CMT 2640 - Quantity Survey **Credits: (2)**

CMT 2899 - AAS Graduation Assessment and Signoff **Credits: (0) See program advisor for signoff**

CMT 2990 - Construction Management Seminar
Credits: (0.5) (2 credit hours required)

CMT 3130 - Construction Planning & Scheduling
Credits: (3)

CMT 3310 - Leadership in the Construction Industry **Credits: (2)**

CMT 3510 - Energy Management in Bldg. M&E Systems **Credits: (4)**

CMT 3630 - Environmental Issues in FM **Credits: (3)**

CMT 3680 - Facility Management Administration and Operations **Credits: (4)**

CMT 4270 - Computer Aided FM **Credits: (4)**

CMT 4310 - Long-term Planning in Facility Management **Credits: (4)**

CMT 4650 - FM Senior Project **Credits: (2)**

CMT 4899 - BS Graduation Assessment and Signoff **Credits: (0) See program advisor for signoff**

Business Courses Required (12 credit hours)

ACTG 2010 - Survey of Accounting I **Credits: (3)**

ECON 2010 SS - Principles of Microeconomics
Credits: (3)

MGMT 3010 - Organizational Behavior and
Management **Credits: (3)**

MGMT 3300 - Human Resource Management
Credits: (3)

Support Courses Required (24 credit hours)

BTNY 1403 LS SUS - Principles of
Environmental Science **Credits: (3-4)** (3 credit
hours required)

COMM 1020 HU - Principles of Public Speaking
Credits: (3) or

COMM 2110 HU CEL - Interpersonal and Small
Group Communication **Credits: (3)**

MATH 1080 QL - Pre-calculus **Credits: (5)**

Three (3) Approved Electives - **9 Credit Hours**

Interior Design (BS)

The four-year Interior Design degree provides student's academic preparation for employment in the design-build industry.

Students develop skills in professional practice and sales, Auto CAD, Revit Architecture, drafting, sketching, rendering, space planning, specification of materials, building codes, history and theory. Drafting and technical skills are essential to the program of study.

In addition to classroom projects, students participate in various community service projects, interdisciplinary design charrettes, attend field trips, and participate locally in professional organizations such as ASID, IIDA and NKBA.

Students graduating with the Interior Design degree meet guidelines for the practice of residential and commercial interior design, are academically prepared to sit for the CKD (Certified Kitchen Design) exam, gain membership in professional organizations, become licensed, and after two years of experience in the field sit for the NCIDQ (National Council for Interior Design Qualification) exam. The Interior Design is **accredited by the Council for Interior Design Accreditation (CIDA)** and is endorsed by the National Kitchen and Bath Association (NKBA).

Because the practice of interior design is complex, technical, and demanding, this program provides students with the technical skills, design and sales skills necessary to compete in the profession.

Program Prerequisite: None.

Minor: Not required.

Grade Requirements: A grade of "B" or better in courses required for this major (a grade of "B-" is not acceptable) in addition to an overall GPA of 3.0 or higher.

Credit Hour Requirements: A total of 124 hours is required for this program for graduation.

Program Code: 8087BS

CIPC: 500408

Transfer students and students coming into the program with an AAS, AA, or AS will take at least six semesters to complete the program.

Advisement

All Interior Design students are required to meet with a faculty advisor each semester for course and program

advisement. Call 801- 626-6913 for more information or to schedule an appointment. (Also refer to the Department Advisor Referral List.)

Admission Requirements

Declare your program of study (see Enrollment Services and Information). There are no admission or application requirements for this program.

General Education

Refer to Degree Requirements for Bachelor of Science requirements. MATH 1030 (3) is recommended to fulfill the Quantitative Literacy requirement. The following required support courses will also be applied toward general education requirements: ART 1010 (3) or ART 1030 (3) and COMM 2110 (3).

Transfer Credits:

No courses older than 10 years will be accepted for credit toward a degree in this program.

Major Course Requirements for BS Degree

Interior Design Courses Required (65-66 credit hours)

- IDT 1010 CA - Introduction to Interior Design
Credits: (3)
- IDT 1020 - Presentation Techniques **Credits: (3)**
- IDT 1050 - Architectural Drafting **Credits: (3)**
- IDT 2010 - Sustainability I: Textiles and Soft Materials **Credits: (3)**
- IDT 2020 - Computer-aided Design and Drafting
Credits: (3)
- IDT 2035 - Design Process/Space Planning
Credits: (3)
- IDT 2040 - Architectural Detailing **Credits: (3)**
- IDT 2050 - Codes **Credits: (2)**
- IDT 2860 - Practicum **Credits: (1-2)**
- IDT 2990 - Interior Design Seminar **Credits: (1)**
- IDT 3000 - Lighting Design **Credits: (3)**
- IDT 2820 - Historical Interiors **Credits: (3)**

- IDT 3020 - American and Modern Interiors
Credits: (3)
- IDT 3025 - Professional Practice **Credits: (3)**
- IDT 2060 - Sustainability II: Materials, Hard Surfaces, and Specifications **Credits: (3)**
- IDT 3040 - Perspective/Rendering **Credits: (2)**
- IDT 3045 - Residential Design **Credits: (3)**
- IDT 3060 - Kitchen & Bath **Credits: (3)**
- IDT 2080 - Advanced Interior Architectural Drafting and Design **Credits: (3)**
- IDT 4020 - Commercial Design **Credits: (3)**
- IDT 4025 - Senior Program Development **Credits: (2)**
- IDT 4030 - Senior Project **Credits: (3)**
- IDT 4040 - Portfolio Design **Credits: (2)**
- IDT 4830 - Directed Readings **Credits: (1-3)** 1 credit hour required
- IDT 4860 INT - Internship for Interior Design **Credits: (3)**

Support Courses Required (26 credit hours)

- ART 1010 CA - Introduction to the Visual Arts
Credits: (3) or
- ART 1030 CA - Studio Art for the Non-Art Major
Credits: (3)
- IDT 4010 - Commercial Studio **Credits: (3)**
- COMM 2110 HU CEL - Interpersonal and Small Group Communication **Credits: (3)**
- PS 1143 - Principles of Selling and Persuasion
Credits: (3)
- PS 3103 - Sales Personalities and Profiles
Credits: (3)
- PS 3203 - Customer Service Techniques **Credits: (3)**
- PS 3363 - Contract and Sales Negotiation Techniques **Credits: (3)**
- PS 3702 - Developing Team Leadership Skills
Credits: (2)
- PS 3903 - Sales Presentation Strategies and Techniques **Credits: (3)**

Note:

Students are required to attend and participate in activities outside of the classroom and at least one workshop per year, for which a fee may be attached.

Building Design & Construction Emphasis (BIS)

The BDC BIS Emphasis will allow students to prepare for job opportunities working for residential design firms and builders, commercial architectural design firms and contractors; trade contractors and engineering firms such as mechanical, electrical, and plumbing; civil engineering firms; and various other firms related to the construction of the built environment. It provides an alternative pathway for those interested in continuing their graduate education in various disciplines relating to the built environment.

Program Prerequisite: Enroll in the BIS Program with an interview with the BIS Program Coordinator. Call 801-626-7713 to talk with the BIS secretary and schedule an appointment.

Grade Requirements: A grade of "C" or better in courses used toward the minor (a grade of "C-" is not acceptable.)

Credit Hour Requirements: 18 total BDC credits selected with BDC Advisor.

Program Code: 8081

CIPC: 150101

Advisement

All program students should meet with a faculty advisor at least annually for course and program advisement. The department secretary can also assist students. Call 801-395-3427 for more information or to schedule an appointment. (Also, refer to the Department Advisor Referral List.)

Admission Requirements

Declare your program of study (Enrollment Services and Information).

General Education

Refer to Degree Requirements for the University Bachelor of Science requirements.

Course Requirements

Required Courses

- BDC 1040 CA - Introduction to Architecture
(Studio 1) **Credits: (3)**
- BDC 1350 - Residential Design (Studio 2)
Credits: (3)
- BDC 3000 - Sustainable Building Design &
Codes **Credits: (3)**
- PDD 3400 - Rendering Basics (Photoshop/3ds
Max) **Credits: (3)**
- BDC 3660 - Structural Design & Detailing
Credits: (3)
- BDC 4350 - BIM Management & Coordination
Credits: (3)

Interior Design Emphasis (BIS)

The Interior Design Program participates in the BIS degree program. For an Interior Design emphasis, students will take a minimum of 24 credit hours as approved by the Interior Design BIS advisor.

Program Prerequisite: Enroll in the BIS Program with an interview with the BIS Program Coordinator. Call 801-626-7713 to talk with the BIS secretary and schedule an appointment.

Grade Requirements: Receive a minimum grade of "B" in each IDT course and also receive a minimum grade of "C" in each additional course taken for the three emphases in addition to a minimum cumulative GPA of 2.5. Classes listed on the BIS contract must be taken for a letter grade; special exams, CLEP or credit/no credit are not allowed for contract classes.

Program Code: 8087

CIPC: 521804

IDT 2860 - Practicum **Credits: (1-2)**
IDT 2990 - Interior Design Seminar **Credits: (1)**
IDT 3000 - Lighting Design **Credits: (3)**
IDT 2820 - Historical Interiors **Credits: (3)**
IDT 3060 - Kitchen & Bath **Credits: (3)**

Courses Required for the Interior Design BIS Emphasis

Required Courses (21 credit hours)

Note: The following are required courses for the BIS degree. No substitutions are allowed.

IDT 1010 CA - Introduction to Interior Design
Credits: (3)
IDT 2020 - Computer-aided Design and Drafting
Credits: (3)
IDT 2035 - Design Process/Space Planning
Credits: (3)
IDT 2050 - Codes **Credits: (2)**
IDT 3025 - Professional Practice **Credits: (3)**
IDT 2060 - Sustainability II: Materials, Hard Surfaces, and Specifications **Credits: (3)**
IDT 4040 - Portfolio Design **Credits: (2)**

Elective Courses

Students should choose 3 hours from the following courses to compliment the required courses listed above.

IDT 1020 - Presentation Techniques **Credits: (3)**
IDT 2010 - Sustainability I: Textiles and Soft Materials **Credits: (3)**
IDT 2040 - Architectural Detailing **Credits: (3)**

Building Design & Construction Architectural Design Minor

The BDC Architectural Design minor will allow students to prepare for job opportunities working for residential design firms and builders, commercial architectural design firms and contractors; trade contractors and engineering firms such as mechanical, electrical, and plumbing; civil engineering firms; and various other firms related to the construction of the built environment. It provides an alternative pathway for those interested in continuing their graduate education in various disciplines relating to the built environment.

Grade Requirements: A grade of "C" or better in courses used toward the minor (a grade of "C-" is not acceptable).

Credit Hour Requirements: A minimum of 18 credit hours of BDC courses.

Program Code: 8081

CIPC: 150101

This program offers students who major in another discipline the option to obtain a minor in Construction Management Technology (Building Design & Construction).

Required Courses (12-13 Credits)

BDC 1040 CA - Introduction to Architecture
(Studio 1) **Credits: (3)** or
IDT 1050 - Architectural Drafting **Credits: (3)**

CMT 1150 - Construction Graphics **Credits: (3)** or
IDT 2020 - Computer-aided Design and Drafting
Credits: (3)

BDC 1350 - Residential Design (Studio 2)
Credits: (3) or
IDT 3045 - Residential Design **Credits: (3)**

CMT 2360 - Commercial Design and Codes
Credits: (4) or
IDT 4020 - Commercial Design **Credits: (3)**

Elective Courses (6 Credits)

Select 6 credits from below:

BDC 3500 - Architectural Rendering & Animation
Studio **Credits: (3)**

BDC 4830 - Directed Studies **Credits: (1-3)**

BDC 4920 - Short Courses, Workshops,
Institutes, and Special Programs **Credits: (1-3)**

BDC 3000 - Sustainable Building Design &
Codes **Credits: (3)**

BDC 3660 - Structural Design & Detailing
Credits: (3)

BDC 4350 - BIM Management & Coordination
Credits: (3)

Construction Management Minor

Grade Requirements: A grade of "C" or better in all courses used toward the minor (a grade of "C-" is not acceptable) in addition to an overall GPA of 2.50 or better in all CMT courses.

Credit Hour Requirements: 23 total credit hours are required as listed below.

Program Code: 8085

CIPC: 522001

Advisement

The CMT Minor must be cleared with the CMT Program Coordinator. Call the CMT program secretary at 801-395-3427 to schedule an appointment. (Also refer to the Department Advisor Referral List.)

Course Requirements for Minor

Construction Management Technology Courses Required (17 credit hours)

- CMT 1100 - Construction Management Orientation **Credits: (1)**
- CMT 1150 - Construction Graphics **Credits: (3)**
- CMT 1220 - Construction Contracts **Credits: (3)**
- CMT 1310 - Materials & Methods **Credits: (4)**
- CMT 1550 - Construction Safety **Credits: (2)**
- CMT 2360 - Commercial Design and Codes **Credits: (4)**

Recommended Electives (6 credit hours)

Select 6 hours from the following courses as approved by the CMT program coordinator.

- CMT 1330 - Civil Materials **Credits: (4)**
- CMT 2210 - Construction Jobsite Management **Credits: (3)**
- CMT 2260 - MEP **Credits: (4)**
- CMT 2340 - Civil Design and Layout **Credits: (4)**
- CMT 2410 - LEED-GA Preparation **Credits: (1)**
- CMT 2640 - Quantity Survey **Credits: (2)**

- CMT 2990 - Construction Management Seminar **Credits: (0.5)**
- CMT 3115 - Construction Cost Estimating **Credits: (3)**
- CMT 3130 - Construction Planning & Scheduling **Credits: (3)**
- CMT 3310 - Leadership in the Construction Industry **Credits: (2)**
- CMT 3370 - Preconstruction Services **Credits: (3)**
- CMT 4120 - Construction Accounting and Finance **Credits: (3)**
- CMT 4150 - Construction Equipment and Methods **Credits: (3)**
- CMT 4330 - Applied Structures **Credits: (4)**
- CMT 4350 - Temporary Structures **Credits: (2)**

- CMT 4510 - Design Charrette **Credits: (1)** or
CMT 4520 - ASC Student Competition **Credits: (1)**

- CMT 4570 - Approaches to Construction Contracting **Credits: (2)**

Facilities Management Minor

The FM minor degree will allow students to prepare for job opportunities working for enterprises that operate out of substantial and/or high-end facilities who are interested in assuring that their capital investments in current and future facilities will support their respective missions for the desired life cycle in a cost effective manner. It provides an opportunity to students majoring in business administration, health sciences administration, theatre arts, and other areas, to make themselves more valuable to prospective employers in these fields, respectively.

Grade Requirements: Students must receive a grade of C or better in all courses.

Credit Hour Requirements: A total of 19 credit hours is required.

Program Code: 8056

CIPC: 522001

Advisement

Facilities Management students should plan to meet with the program advisor for course and program advisement. Call 801-395-3432 for more information or to schedule an appointment. (Also refer to the Department Advisor Referral List.)

Course Requirements for Facilities Management Minor

CMT 3510 - Energy Management in Bldg. M&E Systems **Credits: (4)**

CMT 3630 - Environmental Issues in FM **Credits: (3)**

CMT 3680 - Facility Management Administration and Operations **Credits: (4)**

CMT 4270 - Computer Aided FM **Credits: (4)**

CMT 4310 - Long-term Planning in Facility Management **Credits: (4)**

Interior Design Minor

Grade Requirements: A grade of "B" or better in all courses used toward the minor.

Credit Hour Requirements: A total of 21 credit hours required.

Program Code: 8087

CIPC: 500408

This program offers students who major in another field the option to obtain a minor in Interior Design.

No courses older than 10 year will be accepted for credit towards the minor.

Course Requirements for Interior Design Minor

Courses Required (minimum of 21 credit hours)

IDT 1010 CA - Introduction to Interior Design

Credits: (3)

IDT 2020 - Computer-aided Design and Drafting

Credits: (3)

IDT 2035 - Design Process/Space Planning

Credits: (3)

IDT 2040 - Architectural Detailing **Credits: (3)**

IDT 3025 - Professional Practice **Credits: (3)**

IDT 2060 - Sustainability II: Materials, Hard Surfaces, and Specifications **Credits: (3)**

IDT 4020 - Commercial Design **Credits: (3)**

Construction Management Departmental Honors

Please see weber.edu/honors/contracts.html for a list of current Departmental Honors contracts and Departmental Honors Advisors. For additional information about the Honors Program, please refer to the Honors Program section of the WSU Catalog.

Interior Design Technology Departmental Honors

Please see weber.edu/honors/contracts.html for a list of current Departmental Honors contracts and Departmental Honors Advisors. For additional information about the Honors Program, please refer to the Honors Program section of the WSU Catalog.

Department of Automotive Technology

Department Chair: Scott Hadzik

Location: WSU Davis, Computer & Automotive
Engineering Building

Telephone Contract: Jennifer Vesper, 801-626-6579

Advisor: Jessica Slater, jessicaslater.youcanbook.me/

Website: weber.edu/automotive

Professor: John Kelly; **Associate Professor:** Scott Hadzik;
Instructors: Scott Holland, Blair Newbold, Jessica Slater

The Automotive Technology Department curriculum is a "2 + 2" design leading to an Associate of Applied Science degree in Automotive Service Technology and a Bachelor of Science degree in Automotive Technology.

Automotive Service Technology

Automotive Service Technology is a program offered under the Automotive Technology Department. Automotive Service Technology is the field of study dealing with diagnosis, service, and repair of automobiles and light trucks. Lab and classroom courses are oriented toward high levels of technical understanding, current developments such as electronic control systems and environmental issues, the development of the students' diagnostic capabilities, and proficiency with recommended service procedures. In addition to specific technical training, supporting courses provide for growth of interpersonal and other skills needed to advance within the automotive service industry.

There are three tracks available under the Automotive Service Technology Associate of Applied Science degree.

General Motors Automotive Service Educational Program (ASEP) is a program with technical coverage specializing exclusively in current General Motors products.

Automotive Technology Educational Program (ATEP) is a comprehensive training program covering all major manufacturers' products.

Heavy Duty Truck Technology is an articulated program with Davis Applied Technology Center, specializing in current Mack and Volvo White products.

Additionally, an Institutional Certificate is offered that prepares students for entry level automotive technician positions in dealerships or at independent shops.

The Automotive Service Technology degree tracks are certified by the National Automotive Technicians Education Foundation (NATEF). Partnerships with four of the world's largest automotive corporations-Chrysler, Ford, General Motors and Toyota-assure direct access to state-of-the-art automotive technology. To assure optimum functioning, individual program tracks may have limited enrollment. See department for details.

In addition to the above degree tracks, the Automotive program also has the manufacturer's training centers, listed above, located on campus allowing faculty and students access to the latest equipment, data, and vehicles.

Automotive Technology

Automotive Technology is a program offered under the Automotive Technology Department. The baccalaureate degree in Automotive Technology is designed to prepare graduates for employment in a wide variety of automotive related industries including field service operations, fleet management, and technical support activities. It will also prepare them to advance in organizations such as:

- Original Equipment Manufacturers
- Aftermarket Management
- Service/Parts Management and Marketing
- Advanced Vehicle Systems Technical Research and Support.

To cover the broad range of knowledge and skills that these different organizations require, the degree has two different tracks. They are as follows:

- Field Service Operations
- Advanced Vehicle Systems

Automotive Technology graduates will be technically competent and possess strong interpersonal skills. They will have the ability to communicate effectively, be able to solve problems, work in teams, and will have developed an understanding of the need for continued professional development.

The Automotive Technology bachelor's degree is designed as a "2+2" program building upon associate degree graduates who have received a degree in automotive service technology, heavy duty truck technology, collision repair, diesel technology, or similar programs. Students who have completed their associate degrees in one of these programs will be admitted as juniors and can complete their baccalaureate degree within two years.

Automotive Service Technology (AAS)

Grade Requirements: Minimum grade of "C " in courses required for this major in addition to an overall GPA of 2.00 or higher.

Credit Hour Requirements: A total of 65 credit hours is required.

Assessment Requirements: Students will be required to complete certain assessment instruments as part of the overall requirements for receiving their associate's degree. Please see the program advisor for specific information regarding the assessment.

Program Code: Independent Shop ATEP (8043AAS), Heavy Duty Truck (8008AAS)

CIPC: Independent Shop ATEP (470604), Heavy Duty Truck (470605)

Advisement

Automotive Service students should meet each semester with the program advisor for their specific track. Call 801-626-6577 for more information or to schedule an appointment. (Also refer to the Department Advisor Referral List.)

Admission Requirements

Submit the online application to the program along with a copy of the applicants driving record. Submitting an application does not guarantee admission to the program. An applicant will be contacted by an advisor if they qualify for admittance into the program.

General Education

A minimum of 63 credit hours.
A minimum of 20 hours in residency (WSU courses).
At least a 2.0 (C) WSU grade point average (GPA).
General education requirements
ENGL 1010 or **ENGL 2010** and one other course in oral or written communication (6 credit hours);
Math (3 credit hours);

Creative Arts & Humanities (CA or HU) (3 credit hours);
Social Sciences (SS) (3 credit hours)

Major Course Requirements for AAS Degree

Support Courses Required for All Tracks (12 credit hours)

CHEM 1010 PS - Introductory Chemistry **Credits: (3)** or
CHEM 1110 PS - Elementary Chemistry **Credits: (5)**

COMM 2110 HU CEL - Interpersonal and Small Group Communication **Credits: (3)**
PS 2703 - Internet Sales and Service **Credits: (3)**
WEB 1700 - Introduction to Computer Applications **Credits: (3)**

Track Requirements

Select one of the following tracks (see the faculty advisor for a suggested course sequence):

Independent Shop ATEP Track

Automotive Service Courses Required (41 credit hours)

AUSV 1000 - Introduction to Automotive Service **Credits: (2)**
AUSV 1010 - Automotive Technology Orientation **Credits: (1)**
AUSV 1021 - Automotive Braking Systems 1 **Credits: (2)**
AUSV 1023 - Automotive Braking Systems 2 **Credits: (2)**
AUSV 1022 - Steering and Suspension Systems 1 **Credits: (2)**
AUSV 1025 - Steering and Suspension Systems 2 **Credits: (2)**
AUSV 2320 - Automotive Climate Control Systems **Credits: (3)**
AUSV 1220 - Automotive Manual Drivetrain Systems **Credits: (3)**
AUSV 1320 - Automotive Electronics 1 **Credits: (2)**

AUSV 1323 - Automotive Electronics 2 **Credits:**
(2)
AUSV 1325 - Electrical Fundamentals 3 **Credits:**
(3)
AUSV 2520 - Automatic Transmissions **Credits:**
(4)
AUSV 1120 - Automotive Engines 1 **Credits: (2)**
AUSV 1124 - Automotive Engines 2 **Credits: (2)**
AUSV 2020 - Engine Control Systems **Credits:**
(3)
AUSV 2120 - Automotive Electrical and Body
Control Systems **Credits: (3)**
AUSV 2860 INT - Automotive Shop Practice
Credits: (3-8)

Heavy Duty Truck Track

Automotive Service Courses Required (40 credit hours)

AUSV 1000 - Introduction to Automotive Service
Credits: (2)
AUSV 1010 - Automotive Technology Orientation
Credits: (1)
AUSV 1323 - Automotive Electronics 2 **Credits:**
(2)
AUSV 1325 - Electrical Fundamentals 3 **Credits:**
(3)
AUSV 2120 - Automotive Electrical and Body
Control Systems **Credits: (3)**
AUSV 1071 - H D Truck Brakes **Credits: (2)**
AUSV 1072 - H D Truck Steering & Suspension
Credits: (3)
AUSV 1170 - H D Truck Engines **Credits: (5)**
AUSV 1270 - H D Truck Drive Mechanisms
Credits: (8)
AUSV 2170 - H D Truck Electrical Systems
Credits: (3)
AUSV 2270 - H D Truck Engine Diagnosis
Credits: (3)
AUSV 2370 - H D Truck Air Conditioning **Credits:**
(2)
AUSV 2860 INT - Automotive Shop Practice
Credits: (3-8)

Automotive Service Technology Certificate of Proficiency

The Certificate of Proficiency in Automotive Service Technology prepares students for entry level automotive technician positions in repair shops.

For information call 801-626-6579

Admission Requirements: Submit the online application to the program along with a copy of the applicants driving record. Submitting an application does not guarantee admission to the program. An applicant will be contacted by an advisor if they qualify for admittance into the program.

Grade Requirements: Students must receive a grade of C- or better in every course.

Credit Hour Requirements: A total of 15 credit hours is required.

Program Code: 8064CP

CIPC: 150803

AUSV 1320 - Automotive Electronics 1 **Credits:**
(2)

Take two of the following courses

COMM 2110 HU CEL - Interpersonal and Small
Group Communication **Credits: (3)**

ENGL 1010 EN1 - Introductory College Writing
Credits: (3)

WEB 1700 - Introduction to Computer
Applications **Credits: (3)**

Advisement

Automotive Technology students should meet annually with the program advisor for course and program advisement. Call Jessica Slater 801-626-6577 for more information or to schedule an appointment. (Also refer to the Department Advisor Referral List.)

Course Requirements for Automotive Service Technology Certificate of Proficiency

Automotive Service Courses Required (16 credit hours)

AUSV 1000 - Introduction to Automotive Service
Credits: (2)

AUSV 1021 - Automotive Braking Systems 1
Credits: (2)

AUSV 1022 - Steering and Suspension Systems
1 **Credits: (2)**

AUSV 1120 - Automotive Engines 1 **Credits: (2)**

Automotive Technology (BS)

Department Chairman: Scott Hadzik, 801-626-7138

Department Website: www.weber.edu/automotive

Program Prerequisite: An interview with the program coordinator is necessary prior to acceptance into the program. Students must provide evidence of completion of an Associate of Applied Science AAS or Associate of Science AS degree in automotive service technology or other related degree prior to entering upper division curriculum.

Minor: Not required.

Grade Requirements: Minimum grade of "C" in courses required for this major in addition to an overall GPA of 2.00 or higher.

Credit Hour Requirements: A minimum of 125 to 126 credit hours is required depending upon the emphasis selected and what courses were taken as part of the associate degree. A minimum of 40 upper-division credit hours is required (courses numbered 3000 and above).

Program Code: Field Service (8050BS), Advanced Vehicle Systems (8052BS)

CIPC: Field Service (150803), Advanced Vehicle Systems (150803)

Advisement

Automotive Technology students should meet annually with the program advisor for course and program advisement. Call Jessica Slater 801-626-6577 for more information or to schedule an appointment. (Also refer to the Department Advisor Referral List.)

Admission Requirements

Declare your program of study (see Enrollment Services and Information) and meet with the program advisor.

General Education

Refer to Degree Requirements for Bachelor of Science requirements. The following general education courses not taken as part of the associate degree will need to be taken as part of the bachelor's degree: MATH 1030 or higher, PHYS 1010, WEB 1700, CHEM 1010, SOC 1020, and COMM 2110.

Major Course Requirements for BS Degree

Field Service Operations Emphasis

(Also available online)

Automotive Technology Courses Required (33 credit hours)

- ATTC 3000 - Introduction to Automotive Technology **Credits: (1)**
- ATTC 3020 - Introduction to Safety Management and Hazardous Materials **Credits: (3)**
- ATTC 3520 - Fleet Management **Credits: (3)**
- ATTC 3620 - Automotive Business Practices **Credits: (3)**
- ATTC 3760 - Advanced Automotive Technologies **Credits: (3)**
- ATTC 3880 INT - Cooperative Practicum **Credits: (3)**
- ATTC 4530 - Hybrid and Electric Vehicle Systems **Credits: (3)**
- ATTC 4540 - Automated Safety and Convenience Systems **Credits: (3)**
- ATTC 4550 - Advanced Automotive Emissions **Credits: (3)**
- ATTC 4710 - Capstone Research Methods **Credits: (2)**
- ATTC 4720 - Capstone Research and Development **Credits: (3)**
- ATTC 4860 - Automotive Standards, Laws, and Regulations **Credits: (3)**

Support Courses Required (11 credit hours)

- PS 3503 - Sales Planning and Forecasting **Credits: (3)**
- PS 3702 - Developing Team Leadership Skills **Credits: (2)**
- PS 3903 - Sales Presentation Strategies and Techniques **Credits: (3)**

Pick One of the Following Courses

- PS 3203 - Customer Service Techniques **Credits: (3)**
- PS 3250 - Business Communication **Credits: (3)**
- PS 3563 - Principles of Sales Supervision **Credits: (3)**

PS 4203 - Ethical Sales and Service **Credits: (3)**

PS 4203 - Ethical Sales and Service **Credits: (3)**

PS 3250 - Business Communication **Credits: (3)**

Advanced Vehicle Systems Emphasis

Automotive Technology Courses Required (33 credit hours)

ATTC 3000 - Introduction to Automotive
Technology **Credits: (1)**

ATTC 3020 - Introduction to Safety Management
and Hazardous Materials **Credits: (3)**

ATTC 3260 - Advanced Electrical Systems
Credits: (3)

ATTC 3760 - Advanced Automotive Technologies
Credits: (3)

ATTC 3880 INT - Cooperative Practicum **Credits:**
(3)

ATTC 4530 - Hybrid and Electric Vehicle
Systems **Credits: (3)**

ATTC 4540 - Automated Safety and
Convenience Systems **Credits: (3)**

ATTC 4560 - Advanced Propulsion Systems
Credits: (3)

ATTC 4710 - Capstone Research Methods
Credits: (2)

ATTC 4720 - Capstone Research and
Development **Credits: (3)**

ATTC 4760 - Alternate Fuel Systems **Credits: (3)**

ATTC 4860 - Automotive Standards, Laws, and
Regulations **Credits: (3)**

Support Courses Required (12 credit hours)

PS 3903 - Sales Presentation Strategies and
Techniques **Credits: (3)**

ENGL 3100 - Professional and Technical Writing
Credits: (3)

Pick One of the Following Courses

PS 3503 - Sales Planning and Forecasting
Credits: (3)

MFET 2410 - Quality Concepts and Statistical
Applications **Credits: (3)**

Pick One of the Following Courses

PS 3203 - Customer Service Techniques **Credits:**
(3)

PS 3563 - Principles of Sales Supervision
Credits: (3)

Automotive Technology Departmental Honors

Please see weber.edu/honors/contracts.html for a list of current Departmental Honors contracts and Departmental Honors Advisors. For additional information about the Honors Program, please refer to the Honors Program section of the WSU Catalog.

Department of Electrical & Computer Engineering

Department Chair: Justin Jackson

Location: Engineering Technology Building, Room 236

Telephone Contact: Susan Foss, 801-626-6898

Email: susanfoss@weber.edu

Website: weber.edu/ece

Professors: Justin Jackson, Fon Brown; **Associate**

Professor: Christian Hearn; **Assistant Professors:** Shellee Dyer, Tye Gardner, Eric Gibbons; **Instructor:** Jonathan West

The Department of Electrical & Computer Engineering houses three academic programs- Computer Engineering, Electrical Engineering and Electronics Engineering Technology.

Computer Engineering is the branch of engineering that integrates the fields of electrical engineering and computer science. Computer engineers use computer hardware and software to solve engineering problems. They are trained in computer architecture, embedded systems, software design, data structures, hardware interfacing, and hardware/software integration. The Computer Engineering program offers courses in basic circuitry, microelectronics, embedded systems, algorithms, data structures, and signal processing. An internship, which gives students engineering work experience, is also part of the program. In the senior year, students complete a two-semester capstone project that integrates their course work. The program prepares graduates to enter engineering industry or pursue advanced studies in the discipline.

Electrical Engineering is the branch of engineering that deals with the design and development of electronic devices and systems such as computers, telecommunications and controls. The Electrical Engineering Program offers courses in basic analog and digital circuits, microelectronic systems, electromagnetics, embedded systems, and signal processing. An internship, which gives students engineering work experience, is also part of the program. In the senior year, students complete a two-semester capstone project that integrates their course work. The program prepares graduates to enter engineering industry or pursue advanced studies in the discipline.

Electronics Engineering Technology provides an applications-oriented education and prepares graduates to make significant contributions in technology-based career fields. The program prepares students to incorporate

computer and electronic systems in solving engineering, technology, science, and manufacturing problems.

The Electrical & Computer Engineering Department offers both Bachelor of Science (BS) and Master of Science (MS) degrees in Electrical Engineering and Computer Engineering. The department also offers an Associate of Applied Science (AAS) and Bachelor of Science degrees in Electronics Engineering Technology along with a minor.

Electronics Engineering Technology (AAS)

Grade Requirements: A grade of "C" or better in all EET and support courses (a grade of "C-" is not acceptable). Students must have an overall GPA of 2.5 or higher to graduate.

Credit Hour Requirements: A minimum of 66 credit hours is required with a minimum of 37 credit hours in the major. Transfer students are required to take a minimum of 20 credit hours at Weber State University.

Program Code: 8032AAS

CIPC: 190706

Advisement

All Electronics Engineering Technology students are required to meet with their faculty advisor at least annually for course and program advisement. Please call the department secretary at 801-626-6898 to schedule an appointment.

Admission Requirements

See the department secretary to declare your program of study (major - see Enrollment Services and Information). No special admission or application requirements are needed for this program.

General Education

Refer to Degree Requirements for Associate of Applied Science requirements. Consult with your advisor for specific general education guidelines.

Course Requirements for EET AAS Degree

Required EET Courses (37 credit hours)

EET 1110 - Basic Electronics **Credits: (2)**

EET 1130 - Digital Systems **Credits: (4)**

EET 1140 - DC Circuits **Credits: (3) ***

EET 2010 - AC Circuits **Credits: (3)**

EET 2110 - Semiconductor Circuits **Credits: (4)**

EET 2120 - Power and Motors **Credits: (4)** or

EET 2180 - Solar PV Systems **Credits: (4) *** or

EET 2190 - Solar PV Technical Assessments
Credits: (4) *

EET 2130 - PC Board Design **Credits: (3)**

EET 2140 - Communications Systems **Credits:
(4)**

EET 2150 - Embedded Controllers **Credits: (4)**

EET 2160 - Troubleshooting **Credits: (3)**

EET 2170 - Industrial Controls **Credits: (3)**

* Course qualified for Solar Photovoltaic
Systems Institutional Certificate

Required Support Course (4 credit hours)

CS 2250 - Structured Computing in a Selected
Language **Credits: (4)**

Required General Education Courses (11-13 credit hours)

COMM 2110 HU CEL - Interpersonal and Small
Group Communication **Credits: (3)**

ENGL 2010 EN2 - Intermediate College Writing
Credits: (3)

MATH 1080 QL - Pre-calculus **Credits: (5)** or both

MATH 1050 QL - College Algebra **Credits: (4)** and

MATH 1060 - Trigonometry **Credits: (3)**

Computer Engineering (BS)

Program Prerequisite: Not required.

Minor: Not required.

Grade Requirements: A grade of "C" or better in all ECE and support courses is required for this major (a grade of "C-" is not acceptable). Students must have an overall GPA of 2.5 or higher to graduate.

Credit Hour Requirements: A total of 126 credit hours is required for graduation.

Program Code: 8074BS

CIPC: 140901

Program Educational Objectives

The Objectives of the ECE undergraduate programs in Electrical and Computer Engineering are to educate graduates to become productive, accountable, and responsible professionals in engineering who will:

- Apply their engineering skills, through theory and application, in industry, government, society, or in graduate school;
- Practice high technical and ethical standards and communicate their work to colleagues, industry, and professional organizations;
- Work effectively and contribute in interdisciplinary fields while encouraging expression and valuing diversity;
- Understand the importance of lifelong learning and continuous professional growth in a changing world as shown through self-directed learning, specialized trainings, certifications, licensing, and graduate programs.

Accreditation

The Weber State University Computer Engineering program is accredited by the Engineering Accreditation Commission (EAC) of ABET.

Advisement

All Computer Engineering students are required to meet with their faculty advisor at least annually for course and program advisement. Please call the department secretary at 801-626-6898 for the name of your advisor and to

schedule an appointment. Individual student records are accessible through the WSU Home Page.

Admission Requirements

See an academic advisor for the College of Engineering, Applied Science and Technology to declare your program of study (major). The program is split into two parts, a pre-professional program and a professional program. By declaring your major you will be added to the pre-professional program.

Departmental Honors

For information on Departmental Honors, please see the Electrical & Computer Engineering website at weber.edu/ece or the Honors Program.

General Education

Refer to Degree Requirements for Bachelor of Science degrees. Consult with your advisor and refer to the major requirements below for specific general education courses required.

Major Course Requirements for Computer Engineering BS Degree

The Computer Engineering program is comprised of three components: (1) Pre-professional Program, (2) Professional Program, and (3) Required Support Courses.

1. Pre-professional Program

Pre-Professional Program Admission Requirements

Students must have enrolled or have all the necessary prerequisites to enroll in MATH 1210 - Calculus I and ENGL 2010 EN2 - Intermediate College Writing.

Pre-Professional Required Courses

MATH 1210 - Calculus I **Credits: (4)**
MATH 1220 - Calculus II **Credits: (4)**

MATH 2250 - Linear Algebra and Differential Equations **Credits: (4)**
or both

MATH 2270 - Elementary Linear Algebra **Credits: (3)**

MATH 2280 - Ordinary Differential Equations **Credits: (3)**

PHYS 2210 PS - Physics for Scientists and Engineers I **Credits: (5)**

PHYS 2220 - Physics for Scientists and Engineers II **Credits: (5)**

ECE 1000 - Introduction to Electrical Engineering **Credits: (2)** or

ENGR 1000 - Introduction to Engineering **Credits: (2)**

ECE 1270 - Introduction to Electrical Circuits **Credits: (4)**

ECE 1400 - Fundamentals of Engineering Computing **Credits: (4)**

ECE 2260 - Fundamentals of Electrical Circuits **Credits: (4)**

ECE 2700 - Digital Circuits **Credits: (4)**

CS 1400 - Programming I **Credits: (4)** or

CS 2250 - Structured Computing in a Selected Language **Credits: (4)**

CS 1410 - Object-Oriented Programming **Credits: (4)**

2. Professional Program

Professional Program Admission Requirements

After completion of the pre-professional program, students are required to apply for admittance to the professional program. A minimum GPA of 2.8 in the Pre-Professional Required Courses listed above is required for application to the Professional Program.

ECE 3000 - Engineering Seminar **Credits: (1)**
ECE 3090 - Project Management **Credits: (1)**
ECE 3110 - Microelectronics I **Credits: (4)**
ECE 3210 - Signals and Systems **Credits: (4)**
ECE 3610 - Digital Systems **Credits: (4)**
ECE 3710 - Embedded Systems **Credits: (4)**
ECE 3890 INT - Internship **Credits: (1)**

ECE 4010 CEL - Senior Project I **Credits: (2)**

ECE 4020 CEL - Senior Project II **Credits: (2)**

ECE and CS Elective Courses (Select Four Courses)

Select four courses totaling 12 or more credit hours from the following list. At least 1 course with a CS prefix and 1 course with an ECE prefix is required.

ECE 4100 - Control Systems **Credits: (4)**

ECE 5110 - Digital VLSI Design **Credits: (3)**

ECE 5130 - Advanced Semiconductor Devices **Credits: (3)**

ECE 5140 - Sensors and Instrumentation **Credits: (3)**

ECE 5210 - Digital Signal Processing **Credits: (3)**

ECE 5220 - Image Processing **Credits: (3)**

ECE 5230 - Engineering Applications in Deep Learning **Credits: (3)**

ECE 5410 - Communication Circuits and Systems **Credits: (3)**

ECE 5420 - Digital Communication **Credits: (3)**

ECE 5440 - Optical Communication Systems **Credits: (3)**

ECE 5620 - Digital System Testing **Credits: (3)**

ECE 5640 - Model-based Engineering **Credits: (3)**

ECE 5710 - Real-Time Systems **Credits: (4)**

ECE 5730 - Robotics **Credits: (3)**

ECE 5800 - Individual Studies **Credits: (1-4)**

ECE 5900 - Special Topics **Credits: (1-4)**

CS 3100 - Operating Systems **Credits: (4)**

CS 4110 - Concepts of Formal Languages and Algorithms for Computing **Credits: (4)**

CS 4280 - Computer Graphics **Credits: (4)**

CS 4450 - Advanced Software Engineering Methods **Credits: (4)**

CS 5100 - Distributed Operating Systems **Credits: (3)**

CS 5420 - Advanced Algorithms **Credits: (3)**

CS 5500 - Advanced Artificial Intelligence **Credits: (3)**

CS 5600 - Machine Learning **Credits: (3)**

CS 5610 - Computer Architecture **Credits: (3)**

CS 5740 - Computer Systems Security **Credits: (3)**

CS 5820 - Compiler Design **Credits: (3)**

CS 5840 - Formal System Design **Credits: (3)**

CS 5850 - Parallel Programming and Architecture **Credits: (3)**

MATH 4160 - Introduction to Mathematical Cryptography **Credits: (3)**

3. Support Courses Required

ENGL 3100 - Professional and Technical Writing

Credits: (3) or

PS 3250 - Business Communication **Credits: (3)**

MATH 3410 - Probability and Statistics I **Credits:**
(3)

COMM 2110 HU CEL - Interpersonal and Small
Group Communication **Credits: (3)**

ECON 2010 SS - Principles of Microeconomics
Credits: (3)

CS 2130 - Computational Structures **Credits: (4)**

CS 2420 - Introduction to Data Structures and
Algorithms **Credits: (4)**

CS 2810 - Computer Architecture/Organization
Credits: (4)

Electrical Engineering (BS)

Program Prerequisite: Not required.

Minor: Not required.

Grade Requirements: A grade of "C" or better in all ECE and support courses is required for this major (a grade of "C-" is not acceptable). Students must have an overall GPA of 2.5 or higher to graduate.

Credit Hour Requirements: A total of 126 credit hours is required for graduation.

Program Code: 8071BS

CIPC: 141001

Program Educational Objectives

The Objectives of the ECE undergraduate programs in Electrical and Computer Engineering are to educate graduates to become productive, accountable, and responsible professionals in engineering who will:

- Apply their engineering skills, through theory and application, in industry, government, society, or in graduate school;
- Practice high technical and ethical standards and communicate their work to colleagues, industry, and professional organizations;
- Work effectively and contribute in interdisciplinary fields while encouraging expression and valuing diversity;
- Understand the importance of lifelong learning and continuous professional growth in a changing world as shown through self-directed learning, specialized trainings, certifications, licensing, and graduate programs.

Accreditation

The Weber State University Electrical Engineering program is accredited by the Engineering Accreditation Commission (EAC) of ABET.

Advisement

All Electrical Engineering students are required to meet with their faculty advisor at least annually for course and program advisement. Please call the department secretary

at 801-626-6898 for the name of your advisor and to schedule an appointment. Individual student records are accessible through the WSU Home Page.

Admission Requirements

See an academic advisor for the College of Engineering, Applied Science and Technology to declare your program of study (major). The program is split into two parts, a pre-professional program and a professional program.

Departmental Honors

For information on Departmental Honors, please see the Department of Electrical & Computer Engineering website at weber.edu/ece or the Honors Program.

General Education

Refer to Degree Requirements for Bachelor of Science degrees. Consult with your advisor and refer to the major requirements below for specific general education courses required.

Major Course Requirements for EE BS Degree

The Electrical Engineering program is comprised of three components: (1) Pre-professional Program, (2) Professional Program, and (3) Required Support Courses.

1. Pre-professional Program

Pre-professional Program Admission Requirements

Students must have enrolled or have all the necessary prerequisites to enroll in MATH 1210 - Calculus I, ENGL 2010 EN2 - Intermediate College Writing, and CHEM 1210 PS - Principles of Chemistry I.

Pre-Professional Required Courses

MATH 1210 - Calculus I **Credits: (4)**
MATH 1220 - Calculus II **Credits: (4)**
MATH 2210 - Calculus III **Credits: (4)**

MATH 2250 - Linear Algebra and Differential Equations **Credits: (4)**

or both

MATH 2270 - Elementary Linear Algebra **Credits: (3)** and
MATH 2280 - Ordinary Differential Equations
Credits: (3)

CHEM 1210 PS - Principles of Chemistry I
Credits: (5)

PHYS 2210 PS - Physics for Scientists and
Engineers I **Credits: (5)**

PHYS 2220 - Physics for Scientists and
Engineers II **Credits: (5)**

ECE 1000 - Introduction to Electrical Engineering
Credits: (2) or

ENGR 1000 - Introduction to Engineering
Credits: (2)

ECE 1270 - Introduction to Electrical Circuits
Credits: (4)

ECE 1400 - Fundamentals of Engineering
Computing **Credits: (4)**

ECE 2260 - Fundamentals of Electrical Circuits
Credits: (4)

ECE 2700 - Digital Circuits **Credits: (4)**

2. Professional Program

Professional Program Admission Requirements

After completion of the pre-professional program, students are required to apply for admittance to the professional program. A minimum GPA of 2.8 in the Pre-Professional Required Courses listed above is required for application to the Professional Program.

Professional Program Required Courses

ECE 3000 - Engineering Seminar **Credits: (1)**

ECE 3110 - Microelectronics I **Credits: (4)**

ECE 3120 - Microelectronics II **Credits: (4)**

ECE 3210 - Signals and Systems **Credits: (4)**

ECE 3310 - Electromagnetics I **Credits: (4)**

ECE 3510 - Power Systems **Credits: (4)** or

ECE 3610 - Digital Systems **Credits: (4)**

ECE 3710 - Embedded Systems **Credits: (4)**

ECE 3890 INT - Internship **Credits: (1)**

ECE 3090 - Project Management **Credits: (1)**

ECE 4010 CEL - Senior Project I **Credits: (2)**

ECE 4020 CEL - Senior Project II **Credits: (2)**

ECE 4100 - Control Systems **Credits: (4)**

Electrical Engineering Elective Courses (minimum of 12 credit hours)

Select 12 credit hours from the following 4000 & 5000 level courses

ECE 5110 - Digital VLSI Design **Credits: (3)**

ECE 5130 - Advanced Semiconductor Devices
Credits: (3)

ECE 5140 - Sensors and Instrumentation
Credits: (3)

ECE 5210 - Digital Signal Processing **Credits: (3)**

ECE 5220 - Image Processing **Credits: (3)**

ECE 5230 - Engineering Applications in Deep
Learning **Credits: (3)**

ECE 5310 - Electromagnetics II **Credits: (3)**

ECE 5320 - Antennas and Wave Propagation
Credits: (3)

ECE 5410 - Communication Circuits and
Systems **Credits: (3)**

ECE 5420 - Digital Communication **Credits: (3)**

ECE 5440 - Optical Communication Systems
Credits: (3)

ECE 5510 - Advanced Power Systems **Credits:**
(3)

ECE 5620 - Digital System Testing **Credits: (3)**

ECE 5640 - Model-based Engineering **Credits:**
(3)

ECE 5710 - Real-Time Systems **Credits: (4)**

ECE 5730 - Robotics **Credits: (3)**

ECE 5800 - Individual Studies **Credits: (1-4)**

ECE 5900 - Special Topics **Credits: (1-4)**

CS 5610 - Computer Architecture **Credits: (3)**

MATH 4160 - Introduction to Mathematical
Cryptography **Credits: (3)**

3. Support Courses Required

ENGL 3100 - Professional and Technical Writing
Credits: (3) or

PS 3250 - Business Communication **Credits: (3)**

MATH 3410 - Probability and Statistics I **Credits:**
(3)

COMM 2110 HU CEL - Interpersonal and Small
Group Communication **Credits: (3)**

ECON 2010 SS - Principles of Microeconomics
Credits: (3)

Electronics Engineering Technology (BS)

Program Prerequisite: Not required.

Minor: Not required.

Grade Requirements: A grade of "C" or better in all EET and support courses is required for this major (a grade of "C-" is not acceptable). Students must have an overall GPA of 2.5 or higher to graduate.

Credit Hour Requirements: A total of 126 credit hours is required for graduation. A total of 40 upper division credit hours is also required (courses numbered 3000 and above). Transfer students are required to take a minimum of 30 credit hours at Weber State University.

Program Code: 8032BS

CIPC: 150303

Program Educational Objectives

1. Graduates will receive an applications-oriented education and upon completion will be prepared to make significant contributions in technology-based career fields.
2. BS graduates will demonstrate relevant technical capabilities in the design, application, installation, and implementation of electrical and electronic systems. AAS graduates will demonstrate requisite technical skills for building, testing, operating, and maintaining electrical and electronic systems.
3. Graduates will demonstrate their knowledge using oral, written, and graphical communications and have a desire for lifelong learning, keeping current within the discipline and be responsible citizens able to contribute as active members of society.
4. Graduates will have the abilities and skills to work in a variety of different industries and businesses including manufacturing, mechanical, electrical, architectural, and government.
5. Graduates will demonstrate a commitment to quality, ethics, service and continuous improvement in personal and professional situations.

Accreditation

The Weber State University Electronics Engineering Technology program is accredited by the Engineering Technology Accreditation Commission (ETAC) of ABET.

Advisement

All Electronics Engineering Technology students are required to meet with their faculty advisor at least annually for course and program advisement. Please call the department secretary at 801-626-6898 for the name of your advisor and to schedule an appointment. Individual student records are accessible through the WSU Home Page.

Admission Requirements

See the department secretary to declare your program of study (major - see Enrollment Services and Information). No special admission or application requirements are needed for this program.

Departmental Honors

For information on Departmental Honors, please see the Department of Electrical & Computer Engineering website at weber.edu/ece or the Honors Program.

General Education

Refer to Degree Requirements for Bachelor of Science degrees. Consult with your advisor for specific general education guidelines.

Course Requirements for EET BS Degree

Required Lower-Division EET Courses (37 credit hours)

EET 1110 - Basic Electronics Credits: (2)

EET 1130 - Digital Systems Credits: (4)

EET 1140 - DC Circuits Credits: (3) *

EET 2010 - AC Circuits Credits: (3)

EET 2110 - Semiconductor Circuits **Credits: (4)**

EET 2120 - Power and Motors **Credits: (4)** or
EET 2180 - Solar PV Systems **Credits: (4)** * or
EET 2190 - Solar PV Technical Assessments
Credits: (4) *

EET 2130 - PC Board Design **Credits: (3)**
EET 2140 - Communications Systems **Credits:**
(4)
EET 2150 - Embedded Controllers **Credits: (4)**
EET 2160 - Troubleshooting **Credits: (3)**
EET 2170 - Industrial Controls **Credits: (3)**

* Course qualified for Solar Photovoltaic
Systems Institutional Certificate

Required Upper-Division EET Courses (32 credit hours)

EET 3010 - Circuit Analysis **Credits: (4)**
EET 3030 - FPGA and ASIC Design **Credits: (4)**
EET 3040 - Instrumentation and Measurements
Credits: (4)
EET 3050 - Microprocessor Systems **Credits: (4)**
EET 3090 - Project Management **Credits: (2)**
EET 4010 - Senior Project I **Credits: (2)**
EET 4020 - Senior Project II **Credits: (2)**
EET 4030 - Controls & Systems **Credits: (4)**
EET 4040 - Signals and Systems **Credits: (4)**
EET 4890 INT - Cooperative Work Experience
Credits: (2)

Elective Upper-Division EET Courses (7 credit hours required)

EET 3100 - Renewable Energy **Credits: (3)** *
EET 3180 - Advanced Solar PV Systems **Credits:**
(4) *
EET 4060 - Advanced Communications **Credits:**
(4)
EET 4090 - Systems Design and Integration
Credits: (3)
MFET 4580 - Process Automation II & Robotics
Credits: (1)
MFET 4585 - Process Automation II Lab **Credits:**
(2)
MFET 4850 - Integration of Automated Systems
Credits: (3)
EET 4900 - Special Topics **Credits: (1-4)**

* Course qualified for Solar Photovoltaic
Systems Institutional Certificate

Required Support and General Education Courses (27-33 credit hours)

MATH 1080 QL - Pre-calculus **Credits: (5)**
or *both*
MATH 1050 QL - College Algebra **Credits: (4)** and
MATH 1060 - Trigonometry **Credits: (3)**

MATH 1210 - Calculus I **Credits: (4)**

CS 2250 - Structured Computing in a Selected
Language **Credits: (4)**

or *both*

CS 1400 - Programming I **Credits: (4)** and
CS 1410 - Object-Oriented Programming **Credits:**
(4)

COMM 2110 HU CEL - Interpersonal and Small
Group Communication **Credits: (3)**

PHYS 2210 PS - Physics for Scientists and
Engineers I **Credits: (5)**

ENGL 2010 EN2 - Intermediate College Writing
Credits: (3)

ENGL 3100 - Professional and Technical Writing
Credits: (3) or

PS 3250 - Business Communication **Credits: (3)**

Electronics Engineering Technology Minor

Grade Requirements: A grade of "C" or better in courses used toward the minor (a grade of "C-" is not acceptable).

Credit Hour Requirements: A minimum of 24 credit hours of EET courses.

Program Code: 8032

CIPC: 150303

This program offers students who major in another discipline the option to obtain a minor in Electronics Engineering Technology.

Course Requirements for Minor

EET Courses Required (24 credit hours)

EET 1110 - Basic Electronics **Credits: (2)**

EET 1130 - Digital Systems **Credits: (4)**

EET 1140 - DC Circuits **Credits: (3)**

EET 2010 - AC Circuits **Credits: (3)**

EET 2110 - Semiconductor Circuits **Credits: (4)** or

EET 2180 - Solar PV Systems **Credits: (4)** or

EET 2190 - Solar PV Technical Assessments
Credits: (4)

EET 2150 - Embedded Controllers **Credits: (4)**

and one of the following courses:

EET 3010 - Circuit Analysis **Credits: (4)**

EET 3030 - FPGA and ASIC Design **Credits: (4)**

EET 3040 - Instrumentation and Measurements
Credits: (4)

EET 3100 - Renewable Energy **Credits: (3)** and

EET 4900 - Special Topics **Credits: (1-4)**

EET 3180 - Advanced Solar PV Systems **Credits:**
(4)

EET 4060 - Advanced Communications **Credits:**
(4)

Master of Science in Computer Engineering (MSCE)

Grade Requirements: An MSCE student must complete all program courses, including electives, with a grade of "B-" or higher. In addition, the overall program GPA must be 3.0 or higher.

Credit Hour Requirements: The program requires a minimum of 30 semester hours beyond a bachelor's degree in computer engineering.

Program Code: 8073MSCE

CIPC: 140901

Once enrolled, a student must register for at least one MSCE course each semester, excepting summers, until graduation. Students who fail to do so must petition for readmission into the program.

Admissions Requirements

Applicants for admission into the Master of Science in Computer Engineering program must possess a bachelor's degree or be in the final stage of completing the degree. An overall GPA of 3.0 is required from the undergraduate program in which the bachelor's degree is earned.

Applicants will submit:

- Completed application

- Current resume

- Official transcripts (domestic applicants) or credential evaluation reports (international applicants) for all institutions of higher education (except Weber) that pertain to the bachelor's degree

- Scores from the GRE (Students with a GPA of 3.5 or higher in the BS/MS combined program are exempt.)

- Contact information for three references, at least one from a professional context and one from an academic context

Additional Admission Requirements for International Students

All international students and any applicant educated outside the U.S. must demonstrate proficiency in English. Those whose native language is not English, or whose language of instruction for their undergraduate degree was

not English, will be required to submit an official score from the Test of English as a Foreign Language (TOEFL) or International Language Testing System (IELTS) which is not more than two years old. Applicants are required to have an internet-based TOEFL score of 79 (with a minimum of 17 in each category) or a minimum IELTS score of 6.5.

Application

The application for admission to the Master of Science in Computer Engineering program must be submitted online. Official transcripts from each institution of higher education attended and all test scores must be sent directly to the WSU Department of Engineering.

Deadlines for application are the first Friday in November for students enrolling in spring semester and the first Friday in May for students enrolling in fall semester. Completed applications are considered by the Admissions Committee after each application deadline

Advisement

For questions concerning academic advisement, the primary source of contact is the program director. Students should meet with the director at least once a year while enrolled. For issues regarding registration and scheduling, students should contact either the Administrative Specialist for the Department of Electrical & Computer Engineering.

Leveling Courses

After being accepted, students who have not graduated from an ABET accredited Computer Engineering program may be required to demonstrate competency in one or more of the following courses:

- CS 2420 - Introduction to Data Structures and Algorithms **Credits: (4)**

- CS 2810 - Computer Architecture/Organization **Credits: (4)**

- CS 3100 - Operating Systems **Credits: (4)**

- ECE 3110 - Microelectronics I **Credits: (4)**

- ECE 3210 - Signals and Systems **Credits: (4)**

- ECE 3610 - Digital Systems **Credits: (4)**

- MATH 3410 - Probability and Statistics I **Credits: (3)**

- MATH 2250 - Linear Algebra and Differential Equations **Credits: (4) OR BOTH**

MATH 2270 - Elementary Linear Algebra **Credits: (3)** AND
MATH 2280 - Ordinary Differential Equations
Credits: (3)

Coursework (24-26 credit hours)

Eight of the following courses (minimum 24 credit hours) are required. At least two courses must have a CS prefix and at least two courses must have an ECE prefix.

ECE 6110 - Digital VLSI Design **Credits: (3)**
ECE 6130 - Advanced Semiconductor Devices
Credits: (3)
ECE 6140 - Sensors and Instrumentation
Credits: (3)
ECE 6210 - Digital Signal Processing **Credits: (3)**
ECE 6220 - Image Processing **Credits: (3)**
ECE 6230 - Engineering Applications in Deep
Learning **Credits: (3)**
ECE 6410 - Communication Circuits and
Systems **Credits: (3)**
ECE 6420 - Digital Communication **Credits: (3)**
ECE 6440 - Optical Communication Systems
Credits: (3)
ECE 6620 - Digital System Testing **Credits: (3)**
ECE 6640 - Model-Based Engineering **Credits:**
(3)
ECE 6710 - Real-Time Systems **Credits: (4)**
ECE 6730 - Robotics **Credits: (3)**
ECE 6800 - Individual Studies **Credits: (1-3)**
ECE 6900 - Special Topics **Credits: (1-4)**
CS 6100 - Distributed Operating Systems
Credits: (3)
CS 6420 - Advanced Algorithms **Credits: (3)**
CS 6500 - Advanced Artificial Intelligence
Credits: (3)
CS 6600 - Machine Learning **Credits: (3)**
CS 6610 - Computer Architecture **Credits: (3)**
CS 6740 - Computer Systems Security **Credits:**
(3)
CS 6820 - Compiler Design **Credits: (3)**
CS 6840 - Formal System Design **Credits: (3)**
CS 6850 - Parallel Programming and Architecture
Credits: (3)

Thesis or Design Project (6 credit hours)

MSCE Students are required to either (a) perform original research that results in a thesis, (b) complete a substantial

engineering design project, or (c) take an additional 6 credits of approved coursework.

For students taking the thesis option, a total of 6 or more credits of ECE 6020 is required for a thesis. Students must be enrolled in ECE 6020 at the time of their defense.

For students taking the project option, a total of 6 or more credits of ECE 6010 is required for a project. Students must be enrolled ECE 6010 at the time of their final design review.

The thesis or project report must meet formatting requirements and be submitted to the Department of Electrical and Computer Engineering for approval prior to graduation.

For students taking the coursework option, a total of 6 or more credits of 6000-level coursework are required. At least one course must have an ECE prefix and the other must have a CS prefix.

ECE 6010 - Design Project **Credits: (2-6)**
ECE 6020 - Thesis **Credits: (2-6)**

Master of Science in Electrical Engineering (MSEE)

Grade Requirements: An MSEE student must complete all program courses, including electives, with a grade of "B-" or higher. In addition, the overall program GPA must be 3.0 or higher.

Credit Hour Requirements: The program requires a minimum of 30 semester hours beyond a bachelor's degree in electrical engineering. Credits applied to graduation from another program are not accepted.

Program Code: 8084MS

CIPC: 141001

Once enrolled, a student must register for at least one MSEE course each semester, excepting summers, until graduation. Students who fail to do so must petition for readmission into the program.

Admissions Requirements

Applicants for admission into the Master of Science in Electrical Engineering program must possess a bachelor's degree or be in the final stage of completing the degree. An overall GPA of 3.0 is required from the undergraduate program in which the bachelor's degree is earned.

Applicants will submit:

- Completed application
- Current resume
- Official transcripts from every institution of higher education attended
- Official GRE Scores
- Contact information for three references, at least one from a professional context and one from an academic context

Additional Admission Requirements for International Students

All international students and any applicant educated outside the U.S. must demonstrate proficiency in English. Those whose native language is not English, or whose language of instruction for their undergraduate degree was not English, will be required to submit a score from the

Test of English as a Foreign Language (TOEFL) or International Language Testing System (IELTS) which is not more than two years old. Applicants are required to have an internet-based TOEFL score of 79 (with a minimum of 17 in each category) or a minimum IELTS score of 6.5.

Application

The application for admission to the Master of Science in Electrical Engineering program must be submitted online. Official transcripts from each institution of higher education attended and all test scores must be sent directly to the WSU Department of Engineering.

Deadlines for application are the first Friday in November for students enrolling in spring semester and the first Friday in May for students enrolling in fall semester. Completed applications are considered by the Admissions Committee after each application deadline.

Advisement

For questions concerning academic advisement, the primary source of contact is the program director. Students should meet with the director at least once a year while enrolled. For issues regarding registration and scheduling, students should contact the Administrative Specialist for the Department of Electrical & Computer Engineering

Leveling Courses

After being accepted, students who have not graduated from an ABET accredited Electrical Engineering program must demonstrate the ability to pass the following courses:

ECE 3110 - Microelectronics I **Credits: (4)**
ECE 3210 - Signals and Systems **Credits: (4)**
ECE 3310 - Electromagnetics I **Credits: (4)**
ECE 3610 - Digital Systems **Credits: (4)**
MATH 3410 - Probability and Statistics I **Credits: (3)**

MATH 2250 - Linear Algebra and Differential Equations **Credits: (4) OR BOTH**
MATH 2270 - Elementary Linear Algebra **Credits: (3) AND**
MATH 2280 - Ordinary Differential Equations **Credits: (3)**

Course Requirements for MSEE

Elective Courses (8 courses required, minimum 24 credit hours):

- ECE 6110 - Digital VLSI Design **Credits: (3)**
- ECE 6120 - Analog VLSI Design **Credits: (3)**
- ECE 6130 - Advanced Semiconductor Devices **Credits: (3)**
- ECE 6140 - Sensors and Instrumentation **Credits: (3)**
- ECE 6210 - Digital Signal Processing **Credits: (3)**
- ECE 6220 - Image Processing **Credits: (3)**
- ECE 6230 - Engineering Applications in Deep Learning **Credits: (3)**
- ECE 6310 - Electromagnetics II **Credits: (3)**
- ECE 6320 - Antennas and Wave Propagation **Credits: (3)**
- ECE 6410 - Communication Circuits and Systems **Credits: (3)**
- ECE 6420 - Digital Communication **Credits: (3)**
- ECE 6440 - Optical Communication Systems **Credits: (3)**
- ECE 6510 - Advanced Power Systems **Credits: (3)**
- ECE 6620 - Digital System Testing **Credits: (3)**
- ECE 6640 - Model-Based Engineering **Credits: (3)**
- ECE 6710 - Real-Time Systems **Credits: (4)**
- ECE 6730 - Robotics **Credits: (3)**
- ECE 6800 - Individual Studies **Credits: (1-3)**
- ECE 6900 - Special Topics **Credits: (1-4)**
- CS 6610 - Computer Architecture **Credits: (3)**

The thesis or project report must meet formatting requirements and be submitted to the Department of Electrical and Computer Engineering for approval prior to graduation.

For students taking the coursework option, a total of 6 or more credits of 6000-level coursework with an ECE prefix are required.

- ECE 6010 - Design Project **Credits: (2-6)**
- ECE 6020 - Thesis **Credits: (2-6)**

Thesis, Design Project, or Additional Coursework (6 credit hours)

MSEE students are required to either (a) perform original research that results in a thesis, (b) complete a substantial engineering design project, or (c) take an additional 6 credits of approved coursework.

For students taking the thesis option, a total of 6 or more credits of ECE 6020 is required for a thesis. Students must be enrolled in ECE 6020 at the time of their defense.

For students taking the project option, a total of 6 or more credits of ECE 6010 is required for a project. Students must be enrolled ECE 6010 at the time of their final design review.

Department of Manufacturing and Systems Engineering

Department Chair: George Comber

Location: Engineering Technology Building, Room 214

Telephone Contact: Sheri Eddington, 801-626-6305

Professors: Mark Baugh, George Comber, Kelly Harward, Rick Orr, Kerry Tobin, Glen West; **Associate Professor:** Megumi Usui; **Assistant Professors:** David Wetzel; **Instructors:** Nicole Batty, Taylor Foss, Samuel Hunter, Justin Knighton, Jeffrey Strahan

Department of Manufacturing and System Engineering (M&SE) education focuses primarily on the aspects of science and engineering aimed at preparing graduates for practice in that portion of the technological spectrum closest to product improvement, industrial processes, and operational functions. The M&SE programs at Weber State prepare individuals for a wide variety of positions in industrial, manufacturing, production, product design and quality based business and industries. The study of engineering and engineering technology requires a knowledge of mathematical, scientific, and engineering principles in combination with a strong applications-orientation in support of engineering activities. The M&SE department offers a variety of AAS and BS degrees in the following engineering and engineering technology programs:

Manufacturing Systems Engineering (BS)
Manufacturing Engineering Technology (AAS,
BS)

Emphasis:

Production Operations and
Control

Welding

Plastics and Composites

Product Design and Development: An Engineering
Technology (AAS, BS)

General Technology (AAS)

Controls Technology (AAS)

The BS degrees in these programs are accredited by the Engineering Technology Accreditation Commission of ABET, <http://www.abet.org>.

Manufacturing Systems Engineering

Program Coordinator: Rick Orr; **MSE Emphasis**

Coordinator: David Wetzel

Location: Engineering Technology Building, Room 214

Telephone Contact: Sheri Eddington, 801-626-6305

Manufacturing Systems (process) Engineering is the branch of Industrial and Systems engineering that addresses the analysis and design of systems involving the human interaction with machines or nature. Such systems are highly complex and require modeling of the variability introduced by the human element. Operations are optimized and made more robust by incorporating these models into the overall system design. The focus of the Bachelor of Science in Manufacturing Systems Engineering (MSE) is on the training of students in facility design and modeling / simulations, including material handling.

The Manufacturing Systems (process) Engineers is an eclectic professional that turn ideas into reality. They play key roles in the creation of almost every single product that you see or use, from biomedical to computers, from sport equipment to aerospace. The challenges of creating new processes and using new materials to meet future needs, relieving human drudgery by automating dangerous and onerous production processes, and forming and leading teams of engineering experts are all examples of a few of the numerous opportunities for which the Manufacturing Systems Engineering Program prepares its students.

Manufacturing Engineering Technology

Program Coordinator: Rick Orr

Location: Engineering Technology Building, Room 214

Telephone Contact: Sheri Eddington, 801-626-6305

The Weber State Manufacturing Engineering Technology program has long been recognized as one of the outstanding manufacturing technology programs in the country. Students may choose among three emphasis areas; Production Operations and Control, Welding, or Plastics and Composites. The Production Operations and Control emphasis area is designed to prepare the student for professional employment in industry by giving them fundamental knowledge and skills in a broad range of manufacturing disciplines, manufacturing processes and automation. These include process selection and planning, tool and machine design, material selection and treatment,

programmable logic controllers, mechatronics, robotics, Six Sigma methods and tools in manufacturing, and lean manufacturing. State-of-the-art laboratories give the students hands-on experiences with CNC machine tools, robotics, programmable logic controllers, systems integration and the latest in a variety of CAD/ CAM systems. Yearlong required senior projects have included industrial equipment, drones, crash simulators for the Utah Highway Patrol, electric vehicles, innovative products, computer integrated manufacturing cells and many fun projects that help students gain confidence in their abilities while gaining additional insight and skills in both teamwork and human relations.

The Manufacturing Engineering Technology Welding Emphasis is designed to produce welding engineering technology graduates that are involved in the concept, design, engineering, and metallurgy of weldments and implementation of welding processes in any manufacturing or technical industry. The program has six main areas of study: welding and manufacturing, design and structural, metallurgical, quality assurance, electrical, and management. Courses are designed to give students the background to solve welding related issues in a variety of industry settings. Students will learn how to set up welding quality systems with procedures and qualifications. Most classes have labs where students receive hands on training to complement the classroom instruction. Students complete a senior project with a team that brings together their experience and education.

The Manufacturing Engineering Technology Plastics and Composite Emphasis prepares students for professional employment in the plastic/composite industry. Students will learn firsthand about the complex interdependence between plastic/composite process, materials, tooling, and part design. The design portion of the emphasis will provide the knowledge and skills required to fulfill a number of career roles that focus on the product development process, which includes plastic part design. Another phase of this education delves into the differences between the many types of plastics as well as the properties which differentiate plastics from other materials. This emphasis will also expose the students to a wide variety of tooling from the many plastic disciplines. This includes injection, thermoforming, blow molding, extrusion dies and high/low tech composite molds. This exposure provides the students with a keen understanding of the function, construction, and multi-component interactions involved in well-constructed plastics tooling.

Product Design and Development: An Engineering Technology

Program Coordinator: Megumi Usui

Location: Engineering Technology Building, Room 214

Telephone Contact: Sheri Eddington, 801-626-6305

The Product Design and Development program prepares students to develop product design and development drawings. 3D models, reports, presentations, technical illustrations, interactive multimedia, and animations for industry. Students will develop their graphical skills, techniques, concepts, and management skills through exercises and projects. They will work in mechanical, electrical, and structural disciplines. Students will use calculators, computers, handbooks, and engineering reference materials while applying various mathematical concepts from geometry, algebra, and trigonometry.

Controls Technology (AAS)

Grade Requirements: A grade of "C" or better in all required and support courses (a grade of "C-" is acceptable). Students must have an overall GPA of 2.5 or higher to graduate.

Credit Hour Requirements: A minimum of 69 credit hours is required with a minimum of 23 credit hours in the major with a block of 25 credit hours for the Applied Technology College (ATC) Industrial Automation Maintenance Technician (IAMT) certification. Transfer students are required to take a minimum of 20 credit hours at Weber State University.

Program Code: 8079AAS
CIPC: 150406

Advisement

All Engineering Technology students are required to meet with their faculty advisor at least annually for course and program advisement. Please call the department secretary at 801-626-6305 to schedule an appointment.

Admission Requirements

See the department secretary to declare your program of study (major - see Enrollment Services and Information). No special admission or application requirements are needed for this program.

General Education

Refer to Degree Requirements for Associate of Applied Science requirements. Consult with your advisor for specific general education guidelines.

Course Requirements for Controls Technology AAS Degree

Required Engineering Technology Courses (23 credit hours)

EET 1130 - Digital Systems **Credits: (4)**
EET 1140 - DC Circuits **Credits: (3)**
EET 2010 - AC Circuits **Credits: (3)**
EET 2120 - Power and Motors **Credits: (4)**
EET 2170 - Industrial Controls **Credits: (3)**

MFET 2410 - Quality Concepts and Statistical Applications **Credits: (3)**
MFET 4580 - Process Automation II & Robotics **Credits: (1)**
MFET 4585 - Process Automation II Lab **Credits: (2)**

Required Support Course (25 credit hours)

Students must complete the Industrial Automation Maintenance certification consisting of at least 900 hours at the collaborating ATCs: DATC, OWATC, BATC. The certificate will transfer as a block of 25 credit hours toward the Controls Technology degree.

Required General Education Courses (21 credit hours)

COMM 2110 HU CEL - Interpersonal and Small Group Communication **Credits: (3)**
ECON 1010 SS - Economics as a Social Science **Credits: (3)**
ENGL 1010 EN1 - Introductory College Writing **Credits: (3)**
MATH 1010 - Intermediate Algebra **Credits: (4-5)**
MATH 1060 - Trigonometry **Credits: (3)**
PHYS 1010 PS - Elementary Physics **Credits: (3)**
WEB 1701 - Document Creation **Credits: (1)**
WEB 1703 - Data Manipulation, Visualization, and Presentation **Credits: (1)**

General Technology (AAS)

Program Prerequisite: A 900 hour minimum certificate from a WSU approved DTC or OWTC program awarded within 5 years of beginning the AAS in General Technology Program.

Grade Requirements: A grade of "C" or better in all core and elective courses (a grade of "C-" is not acceptable) in addition to an overall GPA for all courses of 2.00 or higher.

Credit Hour Requirements: A minimum of 63.5 credit hours (includes exactly 30 transfer credit hours for completing an approved 900-hour or more certificate program at DTC or OWTC awarded within 5 years of beginning the AAS program. Residency (WSU courses): Must complete a minimum of 20 credit hours.

Program Code: 8061AAS

CIPC: 470000

Advisement

All General Technology students are required to meet with the WSU College of Engineering, Applied Science & Technology (EAST) academic advisor before entering the program to establish a program contract plan. Students will also be required to meet with the EAST academic advisor at least annually for ongoing course and program advisement.

Admission Requirements

Regular university admission requirements and a completed 900 hour minimum approved technical specialty certificate from OWTC or DTC awarded within 5 years of beginning the AAS program. Students with an approved 900-hour minimum ATC technical certificate awarded within 5 years of beginning the AAS program will receive 30 hours of transfer elective credit toward an AAS in General Technology degree upon completion of all WSU graduation requirements for the AAS in General Technology. Approval by the College of Engineering, Applied Science and Technology at Weber State University is required.

Major Course Requirements for the AAS in General Technology Degree

NOTE: Individual articulated courses between WSU and DTC/OWTC will not count for this requirement if those courses were included in the 900-hour certificate, excluding transfer equivalents to NTM 1700. Students must complete a minimum of 20 credit hours of WSU residency (WSU courses).

Core Courses Required (10.5 credit hours minimum; grade of "C" or better required)

ENGL 1010 EN1 - Introductory College Writing
Credits: (3) and

ENGL 2010 EN2 - Intermediate College Writing
Credits: (3)

or

ENGL 1010 EN1 - Introductory College Writing
Credits (3) or

ENGL 2010 EN2 - Intermediate College Writing
Credits (3)

AND one other course in oral and written communication **Credits: (3)**

AND

MATH 1030 QL - Contemporary Mathematics
Credits: (3) or

MATH 1040 QL - Introduction to Statistics
Credits: (3) or

MATH 1050 QL - College Algebra **Credits: (4)** or

MATH 1080 QL - Pre-calculus **Credits: (5)**

AND

WEB 1700 - Introduction to Computer Applications
Credits: (3) or

WEB 1501 - Document Creation Competency Exam
Credits: (.5) and

WEB 1502 - Content, Internet Identity, and Device Management Competency Exam
Credits: (.5) and

WEB 1503 - Data Manipulation, Visualization, and Presentation Competency Exam
Credits: (.5)

Breadth Courses Required (9 credit hours minimum)

Creative Arts & Humanities:

COMM 2110 HU CEL Interpersonal and Small Group
Communication **(3)**

Social Science:

Any Approved (3)

Physical or Life Science:

Any Approved (3-5)

Elective Courses (Select 14-17 credit hours)

Grades for the following elective courses must meet departmental requirements. Students should work closely with the College of Engineering, Applied Science & Technology academic advisor to select a course sequence that will support the student's chosen career pathway.

ACTG 2010 - Survey of Accounting I **Credits: (3)**

BSAD 1010 - Introduction to Business **Credits: (3)**

PDD 1010 - Introduction to Engineering & Technical Design (Solidworks) **Credits: (3)**

PDD 1160 - Geometric Dimensioning & Tolerancing Using 3D CAD **Credits: (3)**

PDD 2460 - Product Design Fundamentals Using 3D CAD **Credits: (3)**

PDD 2650 - Product Design & Development **Credits: (3)**

EET 1110 - Basic Electronics **Credits: (2)**

EET 1130 - Digital Systems **Credits: (4)**

EET 1140 - DC Circuits **Credits: (3)**

EET 1850 - Industrial Electronics **Credits: (4)**

EET 2150 - Embedded Controllers **Credits: (4)**

EET 2170 - Industrial Controls **Credits: (3)**

HTHS 1101 - Medical Terminology **Credits: (2)**

HTHS 1103 - Introduction to Health Careers and Care in a Diverse Society **Credits: (3)**

HTHS 1108 - Biocalculations for Health Professions **Credits: (5)**

HTHS 1110 LS - Integrated Human Anatomy and Physiology I **Credits: (4)**

HTHS 1111 - Integrated Human Anatomy and Physiology II **Credits: (4)**

MIS 1100 SS - The Digital Society **Credits: (3)**

MFET 1210 - Machining Principles Lecture/Lab I **Credits: (3)**

MFET 2150 - Metal Forming, Casting and Welding **Credits: (2)**

MFET 2360 - Manufacturing Processes and Materials **Credits: (3)**

MFET 2410 - Quality Concepts and Statistical Applications **Credits: (3)**

MFET 2850 - CNC/CAM for Plastics and Composites Lecture/Lab **Credits: (3)**

PS 1143 - Principles of Selling and Persuasion **Credits: (3)**

PS 1303 - Sales Channels **Credits: (3)**

PS 2182 - Credit and Collection Methods **Credits: (2)**

PS 2383 - Retail Merchandising and Buying Methods **Credits: (3)**

PS 2443 - Advertising Methods **Credits: (3)**

PS 2603 - Advanced Selling Techniques **Credits: (3)**

PS 2703 - Internet Sales and Service **Credits: (3)**

NET 2300 - Introduction to LAN Management **Credits: (3)**

WEB 2410 - Web Animation I **Credits: (3)**

WEB 2200 - Image Editing **Credits: (3)**

WEB 2300 - Video Editing **Credits: (3)**

Technical Specialty Credit (30 credit hours)

Technical specialty credit for completing a third-party approved 900-hour or more certificate program from DTC or OWTC completed within 5 years prior to beginning the AAS program. is awarded to students after WSU graduation clearance for the AAS in General Technology.

Manufacturing Engineering Technology (AAS)

Areas of Emphasis

Select one of the following areas of emphasis

- Manufacturing Engineering Technology (AAS),
Plastics and Composites Emphasis
- Manufacturing Engineering Technology (AAS),
Production Operations and Control Emphasis
- Manufacturing Engineering Technology (AAS),
Welding Emphasis

Manufacturing Engineering Technology (AAS), Plastics and Composites Emphasis

Manufacturing Engineering Technology

Grade Requirements: A grade of "C" or better in all major courses, support courses, and technical electives is required (a grade of "C-" is not acceptable) in addition to an overall GPA for all courses of 2.00 or higher. Also refer to the general grade requirements for graduation in the Degree Requirements.

Credit Hour Requirements: Credit hours vary as shown for different emphasis areas: the AAS in Manufacturing Engineering Technology with a Production Operations and Control Emphasis requires 66-68 credit hours, the AAS in Manufacturing Engineering Technology with a Welding Emphasis requires 63-65 credit hours, and the AAS in Manufacturing Engineering Technology with a Plastics and Composites Emphasis requires 63-65 credit hours. Transfer students are required to take a minimum of 20 credit hours at Weber State University.

Assessment Requirements: Students will be required to complete certain assessment instruments as part of the overall requirements for receiving their associate's degree. Please see your advisor or your department for specific information regarding assessment.

Program Code: 8037AAS with Emphasis codes Plastics & Composites (8058), Production Ops & Control (8059) or Welding (8060).

CIPC: 150613 with Emphasis codes Plastics & Composites (150607), Production Ops & Control (150613) or Welding (150614).

Advisement

All Manufacturing Engineering Technology students are required to meet with their faculty advisor at least annually for course and program advisement. Please call the department secretary at 801-626-6305 for the name of your advisor and to schedule an appointment.

Admission Requirements

Declare your program of study (see Enrollment Services and Information). No special admission or application requirements are needed for this program.

General Education

Refer to Degree Requirements for Associate of Applied Science requirements. Information Literacy as defined in this catalog is also required for the AAS degree. Consult with your advisor for specific general education guidelines.

Course Requirements for the AAS Degree

Core Courses (44-48 credit hours)

AAS Degree requirements for an AAS Degree in Manufacturing Engineering Technology, Production Operations and Control Emphasis, an AAS Degree in Manufacturing Engineering Technology with a Welding Emphasis, or an AAS Degree in Manufacturing Engineering Technology with a Plastics and Composites Emphasis will be met by completing the first two years of the respective BS Degree. All AAS Degrees will have the following core courses in common. Please see your academic advisor for additional general education requirements.

Manufacturing Engineering Technology Courses Required (15 credit hours)

MFET 1000 - Manufacturing Engineering
Technology Fundamentals **Credits: (3)**
MFET 1210 - Machining Principles Lecture/Lab I
Credits: (3)
MFET 2310 - Statics for Engineering Technology
Credits: (3)
MFET 2410 - Quality Concepts and Statistical
Applications **Credits: (3)**
MFET 2500 - Process Automation I **Credits: (1)**
MFET 2510 - Process Automation I Lab **Credits:**
(2)

Technical Courses Required (10 credit hours)

PDD 1010 - Introduction to Engineering &
Technical Design (Solidworks) **Credits: (3)**
PDD 1160 - Geometric Dimensioning &
Tolerancing Using 3D CAD **Credits: (3)**

EET 1850 - Industrial Electronics **Credits: (4)** or
MFET 1820 - Manufacturing Electricity and
Electronics **Credits: (4)**

*MFET 1820 is recommended for Welding
Emphasis students.*

Support Courses Required (19-22 credit hours)

COMM 1020 HU - Principles of Public Speaking
Credits: (3) or
COMM 2110 HU CEL - Interpersonal and Small
Group Communication **Credits: (3)**
* Note: COMM 1020 or 2110 count towards Gen
Ed as Humanities (HU) credits.

CHEM 1110 PS - Elementary Chemistry **Credits:**
(5)

PHYS 2010 PS - College Physics I **Credits: (5)** or
PHYS 2210 PS - Physics for Scientists and
Engineers I **Credits: (5)**

MATH 1060 - Trigonometry **Credits: (3)** or
MATH 1080 QL - Pre-calculus **Credits: (5)**

MATH 1110 QL - Calculus Concepts and
Applications **Credits: (3)** or
MATH 1210 - Calculus I **Credits: (4)**

Other Courses Required (4 credit hours)

ENGL 2010 EN2 - Intermediate College Writing
Credits: (3)
*prerequisite is ENGL 1010 EN1 - Introductory
College Writing (3) or equivalent*

Computer Information Literacy **Credits: (1)**
* LIBS 1504 - Information Literacy Competency
Exam (1) OR LIBS 1704 - Information Navigator
(1). Visit weber.edu/cil for more information.

Additional Courses Required by Emphasis Area

Plastics and Composites Emphasis (9 credit hours)

MFET 2320 - Mechanics of Materials **Credits: (3)**
MFET 2850 - CNC/CAM for Plastics and
Composites Lecture/Lab **Credits: (3)**
MFET 2860 - Plastics/Composites Materials &
Properties **Credits: (3)**

Note:

** These courses will also fulfill general education
requirements.*

Manufacturing Engineering Technology (AAS), Production Operations and Control Emphasis

Manufacturing Engineering Technology

Grade Requirements: A grade of "C" or better in all
major courses, support courses, and technical
electives is required (a grade of "C-" is not
acceptable) in addition to an overall GPA for all

courses of 2.00 or higher. Also refer to the general grade requirements for graduation in the Degree Requirements.

Credit Hour Requirements: Credit hours vary as shown for different emphasis areas: the AAS in Manufacturing Engineering Technology with a Production Operations and Control Emphasis requires 66-68 credit hours, the AAS in Manufacturing Engineering Technology with a Welding Emphasis requires 63-65 credit hours, and the AAS in Manufacturing Engineering Technology with a Plastics and Composites Emphasis requires 63-65 credit hours. Transfer students are required to take a minimum of 20 credit hours at Weber State University.

Assessment Requirements: Students will be required to complete certain assessment instruments as part of the overall requirements for receiving their associate's degree. Please see your advisor or your department for specific information regarding assessment.

*prerequisite is ENGL 1010 EN1 - Introductory
College Writing (3) or equivalent*

Computer Information Literacy **Credits: (1)**

** LIBS 1504 - Information Literacy Competency
Exam (1) OR LIBS 1704 - Information Navigator
(1). Visit weber.edu/cil for more information.*

Additional Courses Required by Emphasis Area

Production Operations and Control Emphasis (12 credit hrs)

MFET 2150 - Metal Forming, Casting and
Welding **Credits: (2)** and

MFET 2150L - Metal Forming, Casting & Welding
Lab **Credits: (1)**

MFET 2320 - Mechanics of Materials **Credits: (3)**

MFET 2440 - Computer Numeric Control (CNC)
in Manufacturing **Credits: (2)** and

MFET 2440L - CNC in Manufacturing Lab
Credits: (1)

Manufacturing Engineering Technology (AAS), Welding Emphasis

Manufacturing Engineering Technology

Grade Requirements: A grade of "C" or better in all major courses, support courses, and technical electives is required (a grade of "C-" is not acceptable) in addition to an overall GPA for all courses of 2.00 or higher. Also refer to the general grade requirements for graduation in the Degree Requirements.

Credit Hour Requirements: Credit hours vary as shown for different emphasis areas: the AAS in Manufacturing Engineering Technology with a Production Operations and Control Emphasis requires 66-68 credit hours, the AAS in Manufacturing Engineering Technology with a Welding Emphasis requires 63-65 credit hours, and the AAS in Manufacturing Engineering Technology with a Plastics and Composites Emphasis requires 63-65 credit hours. Transfer students are required to take a minimum of 20 credit hours at Weber State University.

Assessment Requirements: Students will be required to complete certain assessment instruments as part of the overall requirements for receiving their associate's degree. Please see your advisor or your department for specific information regarding assessment.

Program Code: 8037AAS with Emphasis codes Plastics & Composites (8058), Production Ops & Control (8059) or Welding (8060).

CIPC: 150613 with Emphasis codes Plastics & Composites (150607), Production Ops & Control (150613) or Welding (150614).

Advisement

All Manufacturing Engineering Technology students are required to meet with their faculty advisor at least annually for course and program advisement. Please call the department secretary at 801-626-6305 for the name of your advisor and to schedule an appointment.

Admission Requirements

Declare your program of study (see Enrollment Services and Information). No special admission or application requirements are needed for this program.

General Education

Refer to Degree Requirements for Associate of Applied Science requirements. Information Literacy as defined in this catalog is also required for the AAS degree. Consult with your advisor for specific general education guidelines.

Course Requirements for the AAS Degree

Core Courses (44-48 credit hours)

AAS Degree requirements for an AAS Degree in Manufacturing Engineering Technology, Production Operations and Control Emphasis, an AAS Degree in Manufacturing Engineering Technology with a Welding Emphasis, or an AAS Degree in Manufacturing Engineering Technology with a Plastics and Composites Emphasis will be met by completing the first two years of the respective BS Degree. All AAS Degrees will have the following core courses in common. Please see your academic advisor for additional general education requirements.

Manufacturing Engineering Technology Courses Required (15 credit hours)

- MFET 1000 - Manufacturing Engineering Technology Fundamentals **Credits: (3)**
- MFET 1210 - Machining Principles Lecture/Lab I **Credits: (3)**
- MFET 2310 - Statics for Engineering Technology **Credits: (3)**
- MFET 2410 - Quality Concepts and Statistical Applications **Credits: (3)**
- MFET 2500 - Process Automation I **Credits: (1)**
- MFET 2510 - Process Automation I Lab **Credits: (2)**

Technical Courses Required (10 credit hours)

PDD 1010 - Introduction to Engineering & Technical Design (Solidworks) **Credits: (3)**

PDD 1160 - Geometric Dimensioning & Tolerancing Using 3D CAD **Credits: (3)**

EET 1850 - Industrial Electronics **Credits: (4)** or
MFET 1820 - Manufacturing Electricity and Electronics **Credits: (4)**

MFET 1820 is recommended for Welding Emphasis students.

Support Courses Required (19-22 credit hours)

COMM 1020 HU - Principles of Public Speaking **Credits: (3)** or

COMM 2110 HU CEL - Interpersonal and Small Group Communication **Credits: (3)**

* Note: COMM 1020 or 2110 count towards Gen Ed as Humanities (HU) credits.

CHEM 1110 PS - Elementary Chemistry **Credits: (5)**

PHYS 2010 PS - College Physics I **Credits: (5)** or
PHYS 2210 PS - Physics for Scientists and Engineers I **Credits: (5)**

MATH 1060 - Trigonometry **Credits: (3)** or
MATH 1080 QL - Pre-calculus **Credits: (5)**

MATH 1110 QL - Calculus Concepts and Applications **Credits: (3)** or

MATH 1210 - Calculus I **Credits: (4)**

Other Courses Required (4 credit hours)

ENGL 2010 EN2 - Intermediate College Writing **Credits: (3)**

prerequisite is ENGL 1010 EN1 - Introductory College Writing (3) or equivalent

Computer Information Literacy **Credits: (1)**

** LIBS 1504 - Information Literacy Competency Exam (1) OR LIBS 1704 - Information Navigator (1). Visit weber.edu/cil for more information.*

Additional Courses Required by Emphasis Area

Welding Emphasis (9 credit hours)

MFET 2150 - Metal Forming, Casting and Welding **Credits: (2)** and

MFET 2150L - Metal Forming, Casting & Welding Lab **Credits: (1)**

PDD 2460 - Product Design Fundamentals Using 3D CAD **Credits: (3)**

MFET 2670 - GMA, FCA and GTA Welding **Credits: (1)** and

MFET 2670L - GMA, FCA and GTA Welding Lab **Credits: (2)**

Note:

** These courses will also fulfill general education requirements.*

Product Design and Development (formerly DET): An Engineering Technology (AAS)

Grade Requirements: A grade of "C" or better in all required technical courses, and support courses (a grade of "C-" is not acceptable) in addition to an overall GPA for all courses of 2.00 or higher.

Credit Hour Requirements: 64-66 total hours (depending on which math option is chosen) are required (24) of which are required within the Product Design and Development (formerly DET): An Engineering Technology AAS program. A minimum of 20 hours in residency (WSU courses).

Product Code: 8080AAS
CIPC: 151399

Advisement

All Product Design and Development (formerly DET): An Engineering Technology students are required to meet with a faculty advisor at least annually for course and program advisement. Call 801-626-6305 for more information or to schedule an appointment. Advisement may also be obtained in Engineering Technology, room 214.

Admission Requirements

Declare your program of study (see Enrollment Services and Information). No special admission or application requirements are needed for this program.

General Education

Refer to the Degree Requirements for Associate of Applied Science requirements.

Major Course Requirements for AAS Degree

Product Design and Development (formerly DET): An Engineering

Technology Courses Required (21 credit hours)

- PDD 1010 - Introduction to Engineering & Technical Design (Solidworks) **Credits: (3)**
- PDD 1020 - Introduction to 2D CAD Software **Credits: (3)**
- PDD 1160 - Geometric Dimensioning & Tolerancing Using 3D CAD **Credits: (3)**
- MFET 2150 - Metal Forming, Casting and Welding **Credits: (2)**
- MFET 2150L - Metal Forming, Casting & Welding Lab **Credits: (1)**
- PDD 2460 - Product Design Fundamentals Using 3D CAD **Credits: (3)**
- PDD 2650 - Product Design & Development **Credits: (3)**
- MFET 2440 - Computer Numeric Control (CNC) in Manufacturing **Credits: (2)**
- MFET 2440L - CNC in Manufacturing Lab **Credits: (1)**

Technical Support Courses Required (6 credit hours)

- MFET 1210 - Machining Principles Lecture/Lab I **Credits: (3)**
- MFET 2410 - Quality Concepts and Statistical Applications **Credits: (3)**

Technical Electives (2 credit hours minimum)

A minimum of 2 credit hours of technical electives chosen from the following list or approved by the program coordinator are required.

- EET 1110 - Basic Electronics **Credits: (2)**
- EET 1140 - DC Circuits **Credits: (3) ***
- EET 1850 - Industrial Electronics **Credits: (4)**
- PDD 2830 - Directed Readings **Credits: (1-3)**

- MFET 2670 - GMA, FCA and GTA Welding **Credits: (1)** and
- MFET 2670L - GMA, FCA and GTA Welding Lab **Credits: (2)**

- MET 1000 - Introduction to Mechanical Engineering Technology and Design **Credits: (3)**

MFET 2860 - Plastics/Composites Materials &
Properties **Credits: (3)**
MFET 2870 - Design of Plastics/Composites
Products **Credits: (3)**

Support Courses Required (32-34 credit hours)

ENGL 1010 EN1 - Introductory College Writing
Credits: (3)

ENGL 2010 EN2 - Intermediate College Writing
Credits: (3)

COMM 1020 HU - Principles of Public Speaking
Credits: (3) or

COMM 2110 HU CEL - Interpersonal and Small
Group Communication **Credits: (3)**

MATH 1080 QL - Pre-calculus **Credits: (5)** or
MATH 1050 QL - College Algebra **Credits: (4)**
and

MATH 1060 - Trigonometry **Credits: (3)**

CHEM 1010 PS - Introductory Chemistry **Credits:**
(3)

PHYS 2010 PS - College Physics I **Credits: (5)**

LIBS 1704 - Information Navigator **Credits: (1)**

Creative Arts Elective (3)*

Social Science Elective (3)*

American Institutions (3)*

**These courses will also fulfill general education
requirements.*

Solar Photovoltaic Systems Certificate of Proficiency

Grade Requirements: A grade of "C" or better in all the following five EET courses is required for this institutional certificate (a grade of "C-" is not acceptable).

Credit Hour Requirements: A minimum of 18 credit hours of EET courses list below (EET 1140 or EET 1850, EET 2180, EET 2190, EET 3100, and EET 3180). No minimum GPA is required for this certificate.

Program Code: 8076CP

CIPC: 150505

Required Courses (minimum 18 credit hours)

EET 1140 - DC Circuits **Credits: (3)** or
EET 1850 - Industrial Electronics **Credits: (4)**

EET 2180 - Solar PV Systems **Credits: (4)**
EET 2190 - Solar PV Technical Assessments
Credits: (4)

EET 3100 - Renewable Energy **Credits: (3)**
EET 3180 - Advanced Solar PV Systems **Credits:
(4)**

Design Engineering Technology (BS)

This major has been renamed Product Design and Development (formerly DET): An Engineering Technology (BS).

Manufacturing and Systems Engineering (BS)

Program Prerequisite: Not required, but a strong math background is suggested.

Minor: Not required.

Grade Requirements: A grade of "C" or better in all major courses, support courses, and technical electives is required (a grade of "C-" is not acceptable) in addition to an overall GPA for all courses of 2.50 or higher. Also refer to the general grade requirements for graduation in the Degree Requirements section of this catalog.

Credit Hour Requirements: Credit hours vary as shown for different emphasis areas: the BS in Manufacturing and Systems Engineering requires 125.5 - 126 credit hours. A total of 40 upper division credit hours is also required (courses numbered 3000 and above). Transfer students are required to take a minimum of 30 credit hours at Weber State University.

Program Code: 8083BS

CIPC: 142701

Accreditation

The Weber State University Manufacturing and Systems Engineering program will seek accreditation by the Engineering Accreditation Commission (EAC) of ABET upon first graduate.

Advisement

All Manufacturing and Systems Engineering students are required to meet with their faculty advisor at least annually for course and program advisement. Please call the department secretary at 801-626-6305 for the name of your advisor and to schedule an appointment.

Admission Requirements

Declare your program of study (see Enrollment Services and Information). Refer to the Program Prerequisite on the previous page. There are no additional special admission or application requirements for this program.

General Education

Refer to Degree Requirements for Bachelor of Science requirements. Consult with your advisor for specific general education guidelines.

Major Course Requirements for MSE BS Degree

Manufacturing and Systems Engineering Required Courses (44 credit hours)

- MSE 1210 - Metal Processing and Joining for Engineers **Credits: (3)**
- MSE 3040 - Cost Estimating and Engineering Economic Analysis **Credits: (3)**
- MSE 3360 - Manufacturing Process and Materials Lab **Credits: (3)**
- MSE 3460 - Product Design and Development **Credits: (3)**
- MSE 3700 - Manufacturing Systems I **Credits: (3)**
- MSE 3710 - Computer Aided Manufacturing and Additive Manufacturing/Lab **Credits: (3)**
- MSE 3850 - Statistical Process Control and Reliability **Credits: (3)**
- MSE 3910 - Six Sigma Methods and Tools in Manufacturing **Credits: (3)**
- MSE 4010 - Facility Design and Material Handling **Credits: (3)**
- MSE 4590 - Lean Manufacturing Systems **Credits: (3)**
- MSE 4600 - Production Systems Modeling and Analysis/Lab **Credits: (3)**
- MSE 4610 - Project Management for Engineers **Credits: (3)**
- MSE 4615 - Lab: Senior Project Design I **Credits: (2)**
- MSE 4620 - Lab: Senior Project Design II **Credits: (3)**
- MSE 4700 - Manufacturing Systems Engineering II **Credits: (3)**

Technical Elective Course (Minimum 3 credit hours)

- MATH 2210 - Calculus III **Credits: (4)**
- MATH 2250 - Linear Algebra and Differential Equations **Credits: (4)**

MATH 2270 - Elementary Linear Algebra **Credits:**
(3)

Pre-Engineering Required Courses (19 credits)

ENGR 1000 - Introduction to Engineering
Credits: (2)
ENGR 2010 - Statics **Credits:** (3)
ENGR 2080 - Dynamics **Credits:** (4)
ENGR 2140 - Mechanics of Materials **Credits:** (3)
ENGR 2160 - Materials Science and Engineering
Credits: (4)
ENGR 2210 - Electrical Engineering for Non-
majors **Credits:** (4)

Required Technical Courses (9 credit hours)

PDD 1010 - Introduction to Engineering &
Technical Design (Solidworks) **Credits:** (3)
PDD 1160 - Geometric Dimensioning &
Tolerancing Using 3D CAD **Credits:** (3)
MFET 3550 - Manufacturing Supervision **Credits:**
(3)

Additional Manufacturing and Systems Engineering Courses (required department approval)

MSE 4800 - Individual Research Problems
Credits: (1-3)
MSE 4830 - Directed Readings for Manufacturing
Systems Engineering **Credits:** (1-3)
MSE 4890 INT - Cooperative Work Experience
Credits: (1-3)
MSE 4900 - Special Topics **Credits:** (1-3)
MSE 4920 - Short Courses, Workshops,
Institutes and Special Programs **Credits:** (1-
3)

Required Support Courses (minimum of 12 credit hours)

MATH 1220 - Calculus II **Credits:** (4)
MATH 3410 - Probability and Statistics I **Credits:**
(3)
PHYS 2220 - Physics for Scientists and
Engineers II **Credits:** (5) (and Lab)

Associated course suggested for continuing for a
Master's degree in Industrial/Systems engineering
(4 Credits): MATH 2210 Calculus III **Credits:**
(4) or MATH 2250 Linear Algebra and
Differential Equations **Credits:** (4)

Required General Education Courses (38.5-39 credit hours)

ENGL 2010 EN2 - Intermediate College Writing
Credits: (3)
*prerequisite is ENGL 1010 Introductory College
Writing (3) or equivalent*
American Institutions (AI) **Credits:** (3)
MATH 1210 - Calculus I **Credits:** (4)
Information Literacy **Credits:** (.5-1)
COMM 2110 HU CEL - Interpersonal and Small
Group Communication **Credits:** (3)
Humanities and Creative Arts (HU/CA) **Credits:** (6)
ECON 2010 SS - Principles of Microeconomics
Credits: (3)
Social Science and Diversity (SS/DV) **Credits:** (3)
CHEM 1210 PS - Principles of Chemistry I
Credits: (5)
PHYS 2210 PS - Physics for Scientists and
Engineers I **Credits:** (5)
Life Science (LS) **Credits:** (3)

Manufacturing Engineering Technology (BS)

Areas of Emphasis

Select one of the following areas of emphasis

- Manufacturing Engineering Technology (BS), Plastics and Composites Emphasis
- Manufacturing Engineering Technology (BS), Production Operations and Control Emphasis
- Manufacturing Engineering Technology (BS), Welding Emphasis

Manufacturing Engineering Technology (BS), Plastics and Composites Emphasis

Manufacturing Engineering Technology

Program Prerequisite: Not required.

Minor: Not required.

Grade Requirements: A grade of "C" or better in all major courses, support courses, and technical electives is required (a grade of "C-" is not acceptable) in addition to an overall GPA for all courses of 2.00 or higher. Also refer to the general grade requirements for graduation in the Degree Requirements section of this catalog. Seniors may petition to have one C- allowed in major and support courses. Approval from the Program Coordinator and Department Chair is required.

Credit Hour Requirements: Credit hours vary as shown for different emphasis areas: the BS in Manufacturing Engineering Technology with a Production Operations and Control Emphasis requires 126.5 credit hours, the BS in Manufacturing Engineering Technology with a Welding Emphasis requires 123.5 credit hours, and the BS in Manufacturing Engineering Technology with a Plastics and Composites Emphasis requires 125.5 credit hours. A total of 40 upper division credit hours is also required (courses numbered 3000 and above). Transfer

students are required to take a minimum of 30 credit hours at Weber State University.

Program Code: Manufacturing (8037BS), with Emphasis in Plastics & Composites (8058), Production Ops & Control (8059), or Welding (8060).

CIPC: Manufacturing (150613), with Emphasis in Plastics & Composites (150607), Production Ops & Control (150613), or Welding (150614).

Advisement

All Manufacturing Engineering Technology students are required to meet with their faculty advisor at least annually for course and program advisement. Please call the department secretary at 801-626-6305 for the name of your advisor and to schedule an appointment.

Admission Requirements

Declare your program of study (see Enrollment Services and Information). Refer to the Program Prerequisite listed above. There are no additional special admission or application requirements for this program.

General Education

Refer to Degree Requirements for Bachelor of Science requirements. Consult with your advisor for specific general education guidelines.

Major Course Requirements for BS Degree

Plastics and Composites Emphasis

To be taken in addition to the courses required for the AAS Degree in Manufacturing Engineering Technology with a Plastics and Composites Emphasis.

Manufacturing Engineering Technology Courses Required (48.5 credit hours)

MFET 2870 - Design of Plastics/Composites Products **Credits: (3)**

MFET 3340 - Applied Fluid Power **Credits: (2)** and

MFET 3340L - Applied Fluid Power Lab **Credits: (1)**

MFET 3350 - Plastic and Composite Manufacturing **Credits: (2)** and

MFET 3350L - Plastic and Composite Manufacturing Lab **Credits: (2)**

MFET 3550 - Manufacturing Supervision **Credits: (3)**

MFET 3620 - Senior Capstone Project Planning **Credits: (.5)**

MFET 3830 - Reinforced Plastics/Advanced Composite Lecture/Lab **Credits: (3)**

MFET 3870 - Mold Design and Process Strategies Lecture/Lab **Credits: (3)**

MFET 4580 - Process Automation II & Robotics **Credits: (1)** and

MFET 4585 - Process Automation II Lab **Credits: (2)**

MSE 4590 - Lean Manufacturing Systems **Credits: (3)**

MFET 4610 - Senior Project Management & Cost Estimating **Credits: (3)**

MFET 4610L - Senior Project Lab **Credits: (2)**

MFET 4620L - Senior Project Lab **Credits: (2)**

MFET 4995 - Certified Manufacturing Technologist (CMfgT) Exam Review **Credits: (1)**

MET 3150 - Engineering Technology Materials **Credits: (3)**

MET 4650 - Thermal Science **Credits: (3)**

MSE 3700 - Manufacturing Systems I **Credits: (3)**

MSE 3850 - Statistical Process Control and Reliability **Credits: (3)**

MSE 3910 - Six Sigma Methods and Tools in Manufacturing **Credits: (3)**

MFET 3710 - Computer Aided Manufacturing and Rapid Prototyping **Credits: (2)** and

MFET 3710L - Computer Aided Manufacturing and Rapid Prototyping Lab **Credits: (1)**

MFET 3890 INT - Cooperative Work Experience **Credits: (1-3)** or

MFET 4890 INT - Cooperative Work Experience **Credits: (1-3)**

PS 3702 - Developing Team Leadership Skills **Credits: (2)**

Other classes approved by your MFET advisor

Technical Electives (2 credit hours minimum)

A minimum of 2 credit hours of technical electives chosen from the following list are required.

PDD 3470 - Introduction to CATIA V5 **Credits: (3)**

MFET 3460 - Engineering Design using Solid Modeling **Credits: (2)** and

MFET 3460L - Engineering Design using Solid Modeling Lab **Credits: (1)**

Manufacturing Engineering Technology (BS), Production Operations and Control Emphasis

Manufacturing Engineering Technology

Program Prerequisite: Not required.

Minor: Not required.

Grade Requirements: A grade of "C" or better in all major courses, support courses, and technical electives is required (a grade of "C-" is not acceptable) in addition to an overall GPA for all courses of 2.00 or higher. Also refer to the general grade requirements for graduation in the Degree Requirements section of this catalog. Seniors may petition to have one C- allowed in major and support courses. Approval from the Program Coordinator and Department Chair is required.

Credit Hour Requirements: Credit hours vary as shown for different emphasis areas: the BS in Manufacturing Engineering Technology with a Production Operations and Control Emphasis requires 126.5 credit hours, the BS in Manufacturing Engineering Technology with a Welding Emphasis requires 123.5 credit hours, and the BS in Manufacturing Engineering Technology with a Plastics and Composites Emphasis requires 125.5 credit hours. A total of 40 upper division credit hours is also required (courses numbered 3000 and above). Transfer students are required to take a minimum of 30 credit hours at Weber State University.

Program Code: Manufacturing (8037BS), with Emphasis in Plastics & Composites (8058), Production Ops & Control (8059), or Welding (8060).

CIPC: Manufacturing (150613), with Emphasis in Plastics & Composites (150607), Production Ops & Control (150613), or Welding (150614).

Advisement

All Manufacturing Engineering Technology students are required to meet with their faculty advisor at least annually for course and program advisement. Please call the department secretary at 801-626-6305 for the name of your advisor and to schedule an appointment.

Admission Requirements

Declare your program of study (see Enrollment Services and Information). Refer to the Program Prerequisite listed above. There are no additional special admission or application requirements for this program.

General Education

Refer to Degree Requirements for Bachelor of Science requirements. Consult with your advisor for specific general education guidelines.

Major Course Requirements for BS Degree

Production Operations and Control Emphasis

To be taken in addition to the courses required for the AAS Degree in Manufacturing Engineering Technology with a Production Operations and Control Emphasis.

Required Courses for Major (45.5 credit hours)

MFET 3340 - Applied Fluid Power **Credits: (2)** and
MFET 3340L - Applied Fluid Power Lab **Credits:
(1)**

MFET 3350 - Plastic and Composite
Manufacturing **Credits: (2)** and
MFET 3350L - Plastic and Composite
Manufacturing Lab **Credits: (2)**

MFET 3550 - Manufacturing Supervision **Credits:
(3)**
MFET 3620 - Senior Capstone Project Planning
Credits: (.5)

MFET 3710 - Computer Aided Manufacturing and
Rapid Prototyping **Credits: (2)** and
MFET 3710L - Computer Aided Manufacturing
and Rapid Prototyping Lab **Credits: (1)**

MFET 4580 - Process Automation II & Robotics
Credits: (1) and

MFET 4585 - Process Automation II Lab **Credits:**
(2)

MFET 4610 - Senior Project Management & Cost
Estimating **Credits:** **(3)**

MFET 4610L - Senior Project Lab **Credits:** **(2)**

MFET 4620L - Senior Project Lab **Credits:** **(2)**

MFET 4995 - Certified Manufacturing
Technologist (CMfgT) Exam Review **Credits:**
(1)

MET 3150 - Engineering Technology Materials
Credits: **(3)**

MET 3400 - Machine Design **Credits:** **(3)**

MSE 3700 - Manufacturing Systems I **Credits:** **(3)**

MSE 3850 - Statistical Process Control and
Reliability **Credits:** **(3)**

MSE 3910 - Six Sigma Methods and Tools in
Manufacturing **Credits:** **(3)**

MSE 4590 - Lean Manufacturing Systems
Credits: **(3)**

PDD 3100 - Tool Design **Credits:** **(3)**

PS 3103 - Sales Personalities and Profiles
Credits: **(3)**

PS 4203 - Ethical Sales and Service **Credits:** **(3)**

Other classes approved by your MFET advisor

Note:

*Please note that there are additional General Education
requirements to complete the degree.*

Technical Electives (3 credit hours)

*A minimum of 3 credit hours of technical electives chosen
from the following list are required.*

PDD 3460 - Parametric Design Graphics **Credits:**
(3)

PDD 3470 - Introduction to CATIA V5 **Credits:** **(3)**

MFET 2850 - CNC/CAM for Plastics and
Composites Lecture/Lab **Credits:** **(3)**

MFET 2860 - Plastics/Composites Materials &
Properties **Credits:** **(3)**

MFET 2870 - Design of Plastics/Composites
Products **Credits:** **(3)**

MFET 3460 - Engineering Design using Solid
Modeling **Credits:** **(2)** and

MFET 3460L - Engineering Design using Solid
Modeling Lab **Credits:** **(1)**

MFET 3830 - Reinforced Plastics/Advanced
Composite Lecture/Lab **Credits:** **(3)**

MFET 3890 INT - Cooperative Work Experience
Credits: **(1-3)** or

MFET 4890 INT - Cooperative Work Experience
Credits: **(1-3)**

MFET 4850 - Integration of Automated Systems
Credits: **(3)**

Manufacturing Engineering Technology (BS), Welding Emphasis

Manufacturing Engineering Technology

Program Prerequisite: Not required.

Minor: Not required.

Grade Requirements: A grade of "C" or better in all major courses, support courses, and technical electives is required (a grade of "C-" is not acceptable) in addition to an overall GPA for all courses of 2.00 or higher. Also refer to the general grade requirements for graduation in the Degree Requirements section of this catalog. Seniors may petition to have one C- allowed in major and support courses. Approval from the Program Coordinator and Department Chair is required.

Credit Hour Requirements: Credit hours vary as shown for different emphasis areas: the BS in Manufacturing Engineering Technology with a Production Operations and Control Emphasis requires 126.5 credit hours, the BS in Manufacturing Engineering Technology with a Welding Emphasis requires 123.5 credit hours, and the BS in Manufacturing Engineering Technology with a Plastics and Composites Emphasis requires 125.5 credit hours. A total of 40 upper division credit hours is also required (courses numbered 3000 and above). Transfer students are required to take a minimum of 30 credit hours at Weber State University.

Program Code: Manufacturing (8037BS), with Emphasis in Plastics & Composites (8058), Production Ops & Control (8059), or Welding (8060).

CIPC: Manufacturing (150613), with Emphasis in Plastics & Composites (150607), Production Ops & Control (150613), or Welding (150614).

Advisement

All Manufacturing Engineering Technology students are required to meet with their faculty advisor at least annually for course and program advisement. Please call the department secretary at 801-626-6305 for the name of your advisor and to schedule an appointment.

Admission Requirements

Declare your program of study (see Enrollment Services and Information). Refer to the Program Prerequisite listed above. There are no additional special admission or application requirements for this program.

General Education

Refer to Degree Requirements for Bachelor of Science requirements. Consult with your advisor for specific general education guidelines.

Major Course Requirements for BS Degree

Welding Emphasis

To be taken in addition to the courses required for the AAS Degree in Manufacturing Engineering Technology with a Welding Emphasis .

Manufacturing Engineering Technology Courses Required (42.5 credit hours)

MFET 2320 - Mechanics of Materials **Credits: (3)**

MFET 3060 - Codes, Weld Inspection, and
Quality Assurance **Credits: (3)**

MFET 3550 - Manufacturing Supervision **Credits:
(3)**

MFET 3620 - Senior Capstone Project Planning
Credits: (.5)

MFET 3630 - Fusion Joining and Brazing
Processes **Credits: (2)** and

MFET 3630L - Fusion Joining and Brazing
Processes **Credits: (1)**

MFET 3750 - Welding Metallurgy I **Credits: (2)**
and

MFET 3750L - Welding Metallurgy I Lab **Credits:
(1)**

MFET 3760 - Welding Metallurgy II **Credits: (2)**
and

MFET 3760L - Welding Metallurgy II Lab **Credits:
(1)**

MFET 3820 - Nondestructive Testing **Credits: (3)**
MFET 4090 - Welding Power Sources **Credits:**
(2)
MFET 4315 - Welding Robotics **Credits: (2)**
MFET 4610 - Senior Project Management & Cost
Estimating **Credits: (3)**
MFET 4610L - Senior Project Lab **Credits: (2)**
MFET 4620L - Senior Project Lab **Credits: (2)**
MFET 4995 - Certified Manufacturing
Technologist (CMfgT) Exam Review **Credits:**
(1)
MSE 3850 - Statistical Process Control and
Reliability **Credits: (3)**
MSE 3910 - Six Sigma Methods and Tools in
Manufacturing **Credits: (3)**
MSE 4590 - Lean Manufacturing Systems
Credits: (3)

Technical Electives (6 credit hours minimum)

*A minimum of 6 credit hours of technical electives chosen
from the following list are required.*

PDD 3470 - Introduction to CATIA V5 **Credits: (3)**

MFET 3350 - Plastic and Composite
Manufacturing **Credits: (2)** and
MFET 3350L - Plastic and Composite
Manufacturing Lab **Credits: (2)**

MFET 3460 - Engineering Design using Solid
Modeling **Credits: (2)** and
MFET 3460L - Engineering Design using Solid
Modeling Lab **Credits: (1)**

MFET 3890 INT - Cooperative Work Experience
Credits: (1-3) or
MFET 4890 INT - Cooperative Work Experience
Credits: (1-3)

PS 3702 - Developing Team Leadership Skills
Credits: (2)

Other classes approved by your MFET advisor

Product Design and Development (formerly DET): An Engineering Technology (BS)

Program Prerequisite: Complete AAS degree in Product Design and Development (formerly DET): An Engineering Technology from Weber State University or equivalent degree or coursework from an accredited AAS program.

Minor: Not required.

Grade Requirements: A grade of "C" or better in all required technical courses, and support courses is required (a grade of "C-" is not acceptable) in addition to an overall GPA for all courses of 2.00 or higher. Also refer to the general grade requirements for graduation in the Degree Requirements section of this catalog.

Credit Hour Requirements: A total of 124-126 credit hours (depending on which math option is chosen) is required for graduation. A total of 40 upper division credit hours is required (courses numbered 3000 and above.) A minimum of 30 hours in residency (WSU courses).

Program Code: 8080BS

CIPC: 151399

Advisement

All four-year design engineering technology students are required to meet at least annually with a faculty advisor for course and program advisement. Call 801-626-6305 for more information or to schedule an appointment. Advisement may also be obtained in Engineering Technology, room 214.

Admission Requirements

Declare your program of study (see Enrollment Services and Information). Refer to the Program Prerequisite in the previous column. There are no additional special admissions or application requirements for this program.

General Education

Refer to the Degree Requirements for Bachelor of Science requirements.

Major Course Requirements for BS Degree

To be taken in addition to the requirements for the Product Design and Development (formerly DET): An Engineering Technology (AAS).

Product Design and Development (formerly DET): An Engineering Technology Courses Required (27 credit hours)

MET 3150 - Engineering Technology Materials

Credits: (3)

PDD 3100 - Tool Design **Credits: (3)**

PDD 3300 - Applied Kinematic Analysis **Credits: (3)**

PDD 3460 - Parametric Design Graphics **Credits: (3)**

PDD 3470 - Introduction to CATIA V5 **Credits: (3)**

MFET 3710 - Computer Aided Manufacturing and Rapid Prototyping **Credits: (2)**

MFET 3710L - Computer Aided Manufacturing and Rapid Prototyping Lab **Credits: (1)**

PDD 4200 - Advanced Mechanical Design **Credits: (3)**

PDD 4470 - Advanced CATIA V5 **Credits: (3)**

PDD 4500 - Hydraulic and Pneumatic Applications **Credits: (3)**

Technical Support Courses Required (20.5 credit hours)

MFET 2310 - Statics for Engineering Technology **Credits: (3)**

MFET 2320 - Mechanics of Materials **Credits: (3)**

MET 3400 - Machine Design **Credits: (3)**

MFET 3550 - Manufacturing Supervision **Credits: (3)**

MFET 3620 - Senior Capstone Project Planning **Credits: (.5)**

MFET 4610 - Senior Project Management & Cost Estimating **Credits: (3)**

MFET 4610L - Senior Project Lab **Credits: (2)**

MFET 4620L - Senior Project Lab **Credits: (2)**

MFET 4995 - Certified Manufacturing
Technologist (CMfgT) Exam Review **Credits:**
(1)

Technical Electives (6 credit hours minimum)

*A minimum of 6 credit hours of upper division technical
electives chosen from the following list or approved by the
program coordinator are required.*

PDD 3400 - Rendering Basics (Photoshop/3ds
Max) **Credits: (3)**
PDD 4400 - Animation Basics (3ds Max) **Credits:**
(3)
PDD 4830 - Directed Readings **Credits: (1-3)**
PDD 4890 INT - Cooperative Work Experience
Credits: (1-3)
MET 3500 - Mechanical Measurements and
Instrumentation **Credits: (3)**
MFET 3340 - Applied Fluid Power **Credits: (2)**
MFET 3340L - Applied Fluid Power Lab **Credits:**
(1)
MFET 3350 - Plastic and Composite
Manufacturing **Credits: (2)**
MFET 3350L - Plastic and Composite
Manufacturing Lab **Credits: (2)**
MFET 3460 - Engineering Design using Solid
Modeling **Credits: (2)**
MFET 3460L - Engineering Design using Solid
Modeling Lab **Credits: (1)**
MSE 3850 - Statistical Process Control and
Reliability **Credits: (3)**
PS 3250 - Business Communication **Credits: (3)**
EET 3040 - Instrumentation and Measurements
Credits: (4)

Support Courses Required (6 credit hours)

Humanities Electives (3)*
Life Science Elective (3)*

**These courses will also fulfill general education
requirements.*

Production and Inventory Control (APICS) Emphasis (BIS)

Program Prerequisite: Refer to the Bachelor of Integrated Studies Program for the general and specific requirements for the BIS degree.

Credit Hour Requirements: A total of 18 credit hours of courses is required for the APICS emphasis portion of this degree.

Program Code: 8041

CIPC: 520203

MFET 3550 - Manufacturing Supervision **Credits: (3)**

MFET 4050 - Detailed Scheduling and Planning I **Credits: (2) ***

MFET 4150 - Execution and Control of Operations **Credits: (2) ***

MFET 4250 - Detailed Scheduling and Planning **Credits: (2) ***

MFET 4750 - Master Planning of Resources **Credits: (2) ***

MFET 4770 - Strategic Management of Resources **Credits: (2) ***

Electives to be determined by an MFET Advisor **(3)**

Note: * *Online course*

BIS Option in Production and Inventory Control

The Manufacturing Engineering Technology department offers those courses required by APICS The Association for Operations Management for a continuing education certificate in Production and Inventory Control Technology. The following courses indicated with an asterisk (*) prepare one to take the APICS Certification Exam as well as receive the above certificate. In addition, if these courses are taken in conjunction with the other courses listed below or other courses approved by the department chair, all of these may then be used to fill one of the three areas required for a Bachelor of Integrated Studies degree. The courses must be taken for credit and the area of emphasis will be in Production and Inventory Control (not Manufacturing Engineering Technology).

The course of study described below must be approved by the MFET department chair.

Course Requirements for BIS Emphasis

Manufacturing Engineering Technology Courses Required (18 credit hours)

MFET 3510 - Basics of Supply Chain Management **Credits: (2) ***

Design Engineering Technology Departmental Honors

Please see weber.edu/honors/contracts.html for a list of current Departmental Honors contracts and Departmental Honors Advisors. For additional information about the Honors Program, please refer to the Honors Program section of the WSU Catalog.

Quality and Lean Manufacturing Graduate Certificate

The Graduate Institutional Certificate in Quality and Lean Manufacturing prepares students to take the ASQ green belt certification exam or to go on in the MSETM program at Oklahoma State University. Contact the Department for more information.

Program Prerequisite: Applicants must possess a bachelor's degree from a regionally accredited institution in an appropriate field and be working in industry.

Grade Requirements: Students must receive a grade of B or better in every course.

Credit Hour Requirements: 12 credit hours as specified below.

Program Code: 8046GC

CIPC: 150702

Course Requirements for Graduate Certificate

Required Courses (12 credit hours)

ETM 5913G - Six Sigma Tools I **Credits: (3)**

ETM 5923G - Six Sigma Tools II **Credits: (3)**

ETM 5933G - Lean Tools **Credits: (3)**

ETM 5943G - Lean-Sigma Implementation
Credits: (3)

Systems Engineering and Sustainable Engineering Post Baccalaureate Certificate

The Industry-based Post-Bachelor's Certificate in Systems Engineering and Sustainable Engineering is a launching point for gainful employment in the aerospace/manufacturing workplace, professional certification within the International Council of Systems Engineering (INCOSE), and continuing education toward a Master of Science in Systems Engineering.

Grade Requirements: To receive a Systems Engineering & Sustainable Engineering Certificate the student must complete all courses in the certificate program with a grade of "C" or higher (a grade of "C-" is not acceptable).

Credit Hour Requirements: 12 credit hours as specified below.

Program Code: 8092CP

CIPC: 142701

Courses Required (12 credit hours)

MSE 3040 - Cost Estimating and Engineering

Economic Analysis **Credits: (3)**

MSE 3700 - Manufacturing Systems I **Credits: (3)**

MSE 4610 - Project Management for Engineers

Credits: (3)

MSE 4900 - Special Topics **Credits: (1-3)**

Department of Mechanical Engineering

Department Chair: Dr. Daniel J. Magda

Location: Engineering Technology Building, Room 214

Telephone Contact: Sheri Eddington 801-626-6305

Website: weber.edu/mechanical/engineering

Professors: Daniel J. Magda, Kirk Hagen; **Associate Professors:** Dustin Birch; **Assistant Professors:** Tariq Arif, Mary Foss, Randy Hurd; **Instructor:** Randall Kent
Advisor: Angela Payan, 801-626-6369

Mechanical Engineering Technology (AAS)

Grade Requirements: A grade of "C" or better in all major courses and support courses is required (a grade of "C-" is not acceptable) in addition to an overall GPA for all courses of 2.00 or higher.

Also refer to the general grade requirements for graduation in the Degree Requirements.

Credit Hour Requirements: A total of 63 credits is required, 20 of which are within the Manufacturing and Mechanical Engineering Technology Department. Transfer students are required to take a minimum of 30 credit hours at Weber State University.

Program Code: 8002AAS

CIPC: 150805

Advisement

All Mechanical Engineering Technology students are required to meet with their faculty advisor at least annually for course and program advisement. Please call the department secretary at 801-626-6305 for the name of your advisor and to schedule an appointment.

Admission Requirements

Declare your program of study. No special admission or application requirements are needed for this program.

General Education

Refer to Degree Requirements for Associate of Applied Science requirements. Computer & Information Literacy as defined in this catalog is also required for the AAS degree. Consult with your advisor for specific general education guidelines.

Course Requirements for the AAS Degree

MET Core and Support Courses Required (48 credit hours)

MET 1000 - Introduction to Mechanical Engineering Technology and Design **Credits: (3)**

MET 1500 - Mechanical Design Engineering **Credits: (3)**

MET 2500 - Modern Engineering Technologies **Credits: (3)**

MFET 2300 - Statics and Strength of Materials **Credits: (5)**

MFET 2360 - Manufacturing Processes and Materials **Credits: (3)**

EET 1850 - Industrial Electronics **Credits: (4)**

CHEM 1110 PS - Elementary Chemistry **Credits: (5)**

PDD 1010 - Introduction to Engineering & Technical Design (Solidworks) **Credits: (3)**
Computer and Information Literacy **(2)**

MATH 1040 QL - Introduction to Statistics **Credits: (3)**

MATH 1080 QL - Pre-calculus **Credits: (5)**

MATH 1210 - Calculus I **Credits: (4)**

PHYS 2210 PS - Physics for Scientists and Engineers I **Credits: (5)**

Other General Education Support Courses Required (12-15 credit hours)

COMM 2110 HU CEL - Interpersonal and Small Group Communication **Credits: (3)**

ENGL 2010 EN2 - Intermediate College Writing **Credits: (3)**
prerequisite is ENGL 1010 Introductory College Writing (3) or equivalent

ECON 1010 SS - Economics as a Social Science **Credits: (3)**

Gen Ed Creative Arts Elective **(3)**

Pre-Engineering (APE)

Grade Requirements: A minimum overall GPA of 2.00 is required.

Credit Hour Requirements: A minimum of 57 credit hours is required. A minimum of 20 hours in residence (for transfer students).

Program Code: 8042APE

CIPC: 140101

The Associate of Pre-Engineering (APE) degree at Weber State University offers the first two years of a professional engineering curriculum. The degree is designed to prepare students for transfer into an engineering program at other universities in Utah, or throughout the United States, that offer four-year engineering degrees. Because many pre-engineering graduates will transfer to the University of Utah or Utah State University, the WSU Pre-Engineering program has official transfer agreements with these two schools.

In planning a program of study, students should be aware that most pre-engineering courses have mathematics and science prerequisites and that improper scheduling of courses can lengthen the time required to complete the degree. Students should also be aware that requirements may vary according to the university to which the student wishes to transfer. Students are therefore strongly encouraged to meet with the Pre-Engineering coordinator prior to beginning their program.

The Associate of Pre-Engineering degree has fewer general education credit hours than the Associate of Science (AS) degree. Therefore, in order for a student to obtain a Bachelor of Science (BS) degree in engineering, he or she will have to take additional general education courses at WSU and/or the receiving university. Alternatively, a student may earn the AS degree, but this degree may take longer than the APE degree because it contains not only pre-engineering courses but also a full complement of general education courses. The AS degree has the potential benefit, however, of satisfying all the general education requirements at either the University of Utah or Utah State University.

Advisement

All Pre-Engineering students are strongly encouraged to meet with the Pre-Engineering coordinator at the beginning of the program and at least once annually for course and program advisement. Pre-Engineering students are also encouraged to obtain advisement from the applicable engineering department at the receiving university.

Admission Requirements

Declare your program of study (see Enrollment Services and Information). No special admission or application requirements are needed for this program. However, students entering the Pre-Engineering program are expected to have taken college preparatory mathematics and physical science courses in high school. The standard entry level mathematics course for pre-engineering majors is MATH 1210 - Calculus I. The prerequisite for MATH 1210 is MATH 1080 QL - Pre-calculus, or MATH 1050 QL - College Algebra plus MATH 1060 - Trigonometry, or placement through examination. Students who are not ready to take MATH 1210 upon entering the Pre-Engineering program should consult with the Pre-Engineering coordinator, who will recommend remedial courses that will prepare the student for calculus, physics and engineering courses.

Major Course Requirements for APE Degree

General Education Core Requirements (15 credit hours)

1. Composition (3 credit hours)

ENGL 2010 EN2 - Intermediate College Writing
Credits: (3)

2. American Institutions (3 credit hours)

POLS 1100 AI - American National Government
Credits: (3) or
HIST 1700 AI - American History **Credits: (3)** or
ECON 1740 AI - Economic History of the United States **Credits: (3)**

3. Information Literacy (.5 to 1 credit hours)

Refer to the Information Literacy requirements listed under the General Requirements section of this catalog. The credit hours for this requirement do not count toward the 57 credit hour total for this degree.

4. General Education Breadth Requirements (9 credit hours)

Select 9 credit hours – 3 credit hours from Humanities (HU), 3 credit hours from Creative Arts (CA) and 3 credit hours from Social Sciences (SS) (a list of courses for each area appears under the General Education section of this catalog).

Pre-Engineering Core Requirements (20 credit hours)

ENGR 1000 - Introduction to Engineering
Credits: (2)
MATH 1210 - Calculus I **Credits: (4)**
MATH 1220 - Calculus II **Credits: (4)**
PHYS 2210 PS - Physics for Scientists and Engineers I **Credits: (5)** (w lab)
PHYS 2220 - Physics for Scientists and Engineers II **Credits: (5)** (w lab)

Engineering Specialty Courses (22 credit hours minimum)

Engineering specialty courses are those that are required for specific engineering disciplines at the receiving universities. With the assistance of the Pre-Engineering coordinator, students should take courses that apply to their particular engineering major at the university to which they plan to transfer. The specialty courses listed below apply generally, but do not constitute a list of specific course requirements for any particular receiving university. Engineering specialty course requirements for the University of Utah and Utah State University may be obtained from the Pre-Engineering coordinator or the applicable engineering department at these institutions.

CHEM 1210 PS - Principles of Chemistry I
Credits: (5)
CHEM 1220 - Principles of Chemistry II **Credits: (5)**
CHEM 2310 - Organic Chemistry I **Credits: (4)**
CHEM 2320 - Organic Chemistry II **Credits: (4)**
CHEM 3070 - Biochemistry I **Credits: (3)**

CS 1023 - Selected Programming Language
Credits: (4)
CS 1030 - Foundations of Computing **Credits: (4)**
CS 1400 - Programming I **Credits: (4)**
CS 1410 - Object-Oriented Programming **Credits: (4)**

CS 2130 - Computational Structures **Credits: (4)**
CS 2250 - Structured Computing in a Selected Language **Credits: (4)**

CS 2420 - Introduction to Data Structures and Algorithms **Credits: (4)**
CS 2810 - Computer Architecture/Organization **Credits: (4)**
PDD 1010 - Introduction to Engineering & Technical Design (Solidworks) **Credits: (3)**

ENGR 2010 - Statics **Credits: (3)**
ENGR 2080 - Dynamics **Credits: (4)**
ENGR 2140 - Mechanics of Materials **Credits: (3)**
ENGR 2160 - Materials Science and Engineering **Credits: (4)**
ENGR 2210 - Electrical Engineering for Non-majors **Credits: (4)**
ENGR 2300 - Thermodynamics **Credits: (3)**

ECE 1270 - Introduction to Electrical Circuits
Credits: (4)
ECE 2260 - Fundamentals of Electrical Circuits
Credits: (4)
ECE 2700 - Digital Circuits **Credits: (4)**

GEO 1110 PS - Dynamic Earth: Physical Geology **Credits: (3)** and
GEO 1115 - Physical Geology Lab **Credits: (1)**

MATH 2210 - Calculus III **Credits: (4)**
MATH 2250 - Linear Algebra and Differential Equations **Credits: (4)**
MATH 2270 - Elementary Linear Algebra **Credits: (3)**
MATH 2280 - Ordinary Differential Equations **Credits: (3)**
MATH 3410 - Probability and Statistics I **Credits: (3)**

MICR 2054 LS - Principles of Microbiology
Credits: (4)

Energy Engineering (BS)

Program Prerequisites: ENGL 1010 or placement into ENGL 2010; MATH 1050 plus 1060 or 1080, or placement into MATH 1210; CHEM 1200 or permission from the Chemistry Department to take CHEM 1210.

Minor: Not required.

Grade Requirements: A grade of "C" or better in all EEN and support courses is required for this major (a grade of "C-" is not acceptable). Students must have a minimum cumulative GPA of 2.5 to graduate.

Credit Hour Requirements: A total of 127 credit hours is required for graduation.

Program Code: 8095BS

CIPC:149999

Energy Engineering is the branch of engineering that deals with energy efficiency, power generation, energy services, facility management, environmental compliance, sustainable energy and renewable energy. One of the more recent engineering fields to emerge, energy engineering combines the fields of mechanical engineering, electrical engineering, environmental science and economics. The main responsibility of energy engineers is to find the most efficient, sustainable and cost-effective ways to operate buildings, power plants and manufacturing processes. The Energy Engineering Program consists primarily of courses in the Mechanical Engineering Program, bolstered by courses in Electrical Engineering. Some new courses in energy related topics are also an integral part of the program. In the senior year, students complete a two-semester capstone project that integrates their course work. The program prepares graduates to enter the energy engineering industry or to pursue graduate studies in the discipline.

Program Educational Objectives

Educational objectives are the accomplishments that the program prepares graduates to achieve. The educational objectives of the Energy Engineering Program are to produce graduates who are able to:

Be employed in an engineering or other physical science/technology field in a position that utilizes the curriculum knowledge and skills developed in the Energy Engineering Program.

Use their Energy Engineering education as a stimulus for personal and professional growth to pursue advanced degrees in engineering or other fields.
Communicate with and work effectively and ethically with people of diverse backgrounds.
Be independent and critical thinkers who identify problems and develop effective solutions through creativity and the application of knowledge.

Accreditation

The Weber State University Energy Engineering Program will seek accreditation by the Engineering Accreditation Commission (EAC) of ABET upon producing its first graduate.

Advisement

All Energy Engineering students are required to meet with their faculty advisor at least annually for course and program advisement. Please call the department administrative assistant at 801-626-6305 for the name of your advisor and to schedule an appointment.

Use Grad MAPs to plan your degree

Admission Requirements

Refer to "Program Prerequisites" above. See the department administrative assistant to declare the major.

General Education

Refer to Degree Requirements in the WSU catalog for BS degrees. Consult with your advisor and refer to the major requirements below for specific general education courses required.

Required Mechanical Engineering and Electrical Engineering Courses (43 credit hours)

ENGR 1000 - Introduction to Engineering

Credits: (2)

ENGR 2010 - Statics **Credits: (3)**

ENGR 2080 - Dynamics **Credits: (4)**

ENGR 2140 - Mechanics of Materials **Credits: (3)**

ENGR 2160 - Materials Science and Engineering
Credits: (4)
ENGR 2210 - Electrical Engineering for Non-
majors **Credits: (4)**
ENGR 2300 - Thermodynamics **Credits: (3)**
ME 3040 - Dynamic System Modeling **Credits: (3)**
ME 3050 - Machine Design **Credits: (3)**
ME 3060 - Sensors, Instrumentation and Control
Systems **Credits: (3)**
ME 3300 - Fluid Mechanics **Credits: (3)**
ME 4000 - Heat Transfer **Credits: (3)**
ME 4990 - Seminar in Mechanical Engineering
Credits: (1)
ECE 3510 - Power Systems **Credits: (4)**

Required Energy Engineering Courses (19 credit hours)

EEN 1200 - Introduction to Energy Engineering
Credits: (2)
EEN 2600 - Engineering Economics **Credits: (3)**
EEN 3000 - Design, Ethics & Entrepreneurship
Credits: (3)
EEN 3200 - Sustainable Energy **Credits: (3)**
EEN 4300 - Energy Auditing **Credits: (2)**
EEN 4100 - Senior Project I **Credits: (3)**
EEN 4200 - Senior Project II **Credits: (3)**

Elective Energy Engineering Courses (6 credit hours)

Select 6 credit hours from the following 4000 level courses:

EEN 4420 - Renewable Energy Systems Design I
Credits: (3)
EEN 4430 - Renewable Energy Systems Design
II **Credits: (3)**
EEN 4440 - Introduction to Energy Systems
Credits: (3)
EEN 4450 - Electric Vehicles Engineering
Credits: (3)
EEN 4460 - Energy Management **Credits: (3)**
EEN 4470 - Energy and Environmental Issues
Credits: (3)
EEN 4480 - Energy and Legal Issues **Credits: (3)**
ME 4500 - Heating, Ventilating and Air-
Conditioning **Credits: (3)**

Required Support Courses (24 credit hours)

MATH 1210 - Calculus I **Credits: (4)**
MATH 1220 - Calculus II **Credits: (4)**
MATH 2210 - Calculus III **Credits: (4)**
MATH 2250 - Linear Algebra and Differential
Equations **Credits: (4)**
PHYS 2220 - Physics for Scientists and
Engineers II **Credits: (5)**

MFET 2500 - Process Automation I **Credits: (1)**
and
MFET 2510 - Process Automation I Lab **Credits:**
(2)

Required General Education Courses (35 credit hours)

LIBS 1704 - Information Navigator **Credits: (1)**
ENGL 2010 EN2 - Intermediate College Writing
Credits: (3)
PHYS 2210 PS - Physics for Scientists and
Engineers I **Credits: (5)**
CHEM 1210 PS - Principles of Chemistry I
Credits: (5)

Additionally, select three credits of (AI)
American Insitutions, six credits of (SS/DV)
Social Science/Diversity, and three credits of
(LS/DV) Life Science/Diversity.

Mechanical Engineering (BS)

Program Prerequisite: Not required.

Minor: Not required.

Grade Requirements: A grade of "C" or better in all ME and support courses is required for this major (a grade of "C-" is not acceptable). Students must have a minimum cumulative WSU GPA of 2.5 to graduate.

Credit Hour Requirements: A total of 126 credit hours is required for graduation.

Program Code: 8082BS

CIPC: 141901

Mechanical Engineering is the branch of engineering that deals with the design and development of mechanical devices and systems across a wide spectrum of industries such as transportation, aerospace, biotechnology, electronics, robotics, power generation, renewable energy, environmental control and manufacturing. The Mechanical Engineering Program offers courses in engineering mechanics, materials, thermal-fluid sciences, instrumentation and measurements and manufacturing. In the senior year, students complete a two-semester capstone project that integrates their course work. The program prepares graduates to enter engineering industry or to pursue graduate studies in the discipline.

Mission Statement:

Educate and prepare Mechanical Engineering students for successful careers. This is accomplished by the program educational objectives.

Program Educational Objectives

Be employed in an engineering or other physical science/technology field in a position that utilizes the curriculum knowledge and skills developed in the Mechanical Engineering program.

Use their mechanical engineering education as a stimulus for personal and professional growth to pursue advanced degrees in engineering or other fields.

Engage students in activities to produce graduates who communicate and work effectively and ethically with people of diverse backgrounds.

Be independent and critical thinkers who identify problems and develop effective solutions through creativity, and the application of knowledge.

ABET ME Student Outcomes are:

An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.

An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.

An ability to communicate effectively with a range of audiences.

An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.

An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.

An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.

An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Enrollment and Graduation

With this new four-year mechanical engineering program, the current annual student enrollment for the 19-20 year is 243 with the program graduating three students so far. It is expected within a couple of years the graduation rate will substantially increase based on enrollment data.

Accreditation

Weber State University, Mechanical Engineering program has applied for accreditation by the Engineering Accreditation Commission (EAC) of ABET. Evaluation of the program will take place fall semester 2020.

Advisement

All Mechanical Engineering students are required to meet with their faculty advisor at least annually for course and program advisement. Please call the department secretary at 801-626-6898 for the name of your advisor and to schedule an appointment. Individual student records are accessible through the WSU Home Page.

Admission Requirements

See an academic advisor for the College of Engineering, Applied Science and Technology to declare your program of study (major). The program consists of two parts, a pre-professional program and a professional program.

Pre-professional Program Admission Requirements

Students must have enrolled or have all the necessary prerequisites to enroll in MATH 1210 - Calculus I, ENGL 1010 EN1 - Introductory College Writing, and CHEM 1210 PS - Principles of Chemistry I.

Professional Program Admission Requirements

After completion of the pre-professional program, students are required to apply for admittance to the professional program. A minimum cumulative GPA of 2.8 in the following courses is required for application to the professional program: ENGR 1000, ENGR 2010, ENGR 2080, ENGR 2140, ENGR 2160, ENGR 2210, ENGR 2300, MATH 1210, MATH 1220, MATH 2210, MATH 2250, PHYS 2210, PHYS 2220, CHEM 1210.

General Education

Refer to Degree Requirements or Bachelor of Science degrees. Consult with your advisor and refer to the major requirements below for specific general education courses required.

Major Course Requirements for ME BS Degree

Mechanical Engineering Required Courses (50 credit hours)

- ENGR 1000 - Introduction to Engineering
Credits: (2)
- ENGR 2010 - Statics **Credits: (3)**
- ENGR 2080 - Dynamics **Credits: (4)**
- ENGR 2140 - Mechanics of Materials **Credits: (3)**
- ENGR 2160 - Materials Science and Engineering
Credits: (4)
- ENGR 2210 - Electrical Engineering for Non-majors **Credits: (4)**
- ENGR 2300 - Thermodynamics **Credits: (3)**
- ME 3040 - Dynamic System Modeling **Credits: (3)**
- ME 3050 - Machine Design **Credits: (3)**
- ME 3060 - Sensors, Instrumentation and Control Systems **Credits: (3)**
- ME 3300 - Fluid Mechanics **Credits: (3)**
- ME 3350 - Engineering Computing **Credits: (2)**
- ME 3500 - Numerical Methods for Engineering
Credits: (3)
- ME 4000 - Heat Transfer **Credits: (3)**
- ME 4100 - Senior Project I **Credits: (3)**
- ME 4200 - Senior Project II **Credits: (3)**
- ME 4990 - Seminar in Mechanical Engineering
Credits: (1)

Mechanical Engineering Elective Courses (9 credit hours)

Select credit hours from the following 3000 and 4000 level courses:

- ME 4150 - Vibrations **Credits: (3)**
- ME 4250 - Finite Element Analysis **Credits: (3)**
- ME 4300 - Material Failure Analysis **Credits: (3)**
- ME 4350 - Advanced Mechanics of Materials
Credits: (3)
- ME 4400 - Aerodynamics **Credits: (3)**
- ME 4440 - Compressible Fluid Flow **Credits: (3)**
- ME 4450 - Aerospace Propulsion **Credits: (3)**
- ME 4500 - Heating, Ventilating and Air-Conditioning **Credits: (3)**
- ME 4550 - Robotics **Credits: (3)**
- ME 4600 - Advanced Thermal-Fluids **Credits: (3)**
- MATH 3710 - Boundary Value Problems **Credits: (3)**

Required Support Course (minimum of 33 credit hours)

PDD 1010 - Introduction to Engineering & Technical Design (Solidworks) **Credits: (3)**
MSE 1210 - Metal Processing and Joining for Engineers **Credits: (3)**
ENGL 3100 - Professional and Technical Writing **Credits: (3)**
MATH 1210 - Calculus I **Credits: (4)**
MATH 1220 - Calculus II **Credits: (4)**
MATH 2210 - Calculus III **Credits: (4)**

MATH 2250 - Linear Algebra and Differential Equations **Credits: (4)**
or both
MATH 2270 - Elementary Linear Algebra **Credits: (3)** *and*
MATH 2280 - Ordinary Differential Equations **Credits: (3)**

MATH 3410 - Probability and Statistics I **Credits: (3)**
PHYS 2220 - Physics for Scientists and Engineers II **Credits: (5)**

ME 4800 - Individual Research Problems **Credits: (1-3)**
ME 4830 - Readings in Mechanical Engineering **Credits: (1-3)**
ME 4890 - Cooperative Work Experience **Credits: (1-3)**
ME 4900 - Special Topics **Credits: (1-3)**
ME 4920 - Short Courses, Workshops, Institutes and Special Programs **Credits: (1-3)**

Required General Education Courses (34 credit hours)

ECON 2010 SS - Principles of Microeconomics **Credits: (3)**
ENGL 2010 EN2 - Intermediate College Writing **Credits: (3)**
prerequisite is ENGL 1010 Introductory College Writing **(3)** or placement.
American Institutions (AI) **Credits: (3)**
Information Literacy **Credits: (.5-1)***
Humanities and Creative Arts (HU/CA) **Credits: (9)**
Social Science/Diversity (SS/DV) **Credits: (3)**
CHEM 1210 PS - Principles of Chemistry I **Credits: (5)**
PHYS 2210 PS - Physics for Scientists and Engineers I **Credits: (5)**
Life Science (LS) **Credits: (3)**
*Information Literacy not included in 34 credit hour total

Additional Mechanical Engineering courses (not required however these need departmental approval)

Mechanical Engineering Technology (BS)

Program Prerequisite: Complete the requirements for the AAS Degree in Mechanical Engineering Technology.

Minor: Not Required.

Grade Requirements: A grade of "C" or better in all major courses, support courses, and technical electives is required (a grade of "C-" is not acceptable) in addition to an overall GPA for all courses of 2.00 or higher. Also refer to the general grade requirements for graduation in the Degree Requirements section of this catalog.

Credit Hour Requirements: A total of 124 credit hours is required for graduation. A total of 40 upper division credits is also required (courses numbered 3000 and above). Transfer students are required to take a minimum of 30 credit hours at Weber State University.

Program Code: 8002BS

CIPC: 150805

Advisement

All Mechanical Engineering Technology students are required to meet with their faculty advisor at least annually for course and program advisement. Please call the department secretary at 801-626- 6305 for the name of your advisor and to schedule an appointment.

Admission Requirements

Declare your program of study. Refer to the Program Prerequisite listed above. There are no additional special admission or application requirements for this program.

General Education

Refer to Degree Requirements for Bachelor of Science requirements. Consult with your advisor for specific general education guidelines.

Major Course Requirements for BS Degree

To be taken in addition to the courses required for the AAS Degree in Mechanical Engineering Technology

Mechanical Engineering Technology Courses Required (31 credit hours)

MET 3050 - Dynamics **Credits: (3)**

MET 3150 - Engineering Technology Materials
Credits: (3)

MET 3300 - Computer Programming Applications
of Mechanical Engineering Technology
Credits: (3)

MET 3400 - Machine Design **Credits: (3)**

MET 3500 - Mechanical Measurements and
Instrumentation **Credits: (3)**

MET 3700 - Testing and Failure Analysis **Credits:
(3)**

MET 4200 - Mechanical Design with FEA
Credits: (3)

MET 4500 - Senior Project **Credits: (3)** or

MET 4510 - Senior Project **Credits: (3)**

MET 4650 - Thermal Science **Credits: (3)**

MET 4990 - Seminar in Mechanical Engineering
Technology **Credits: (1)**

Support Courses Required (9 credit hours)

MFET 1210 - Machining Principles Lecture/Lab I
Credits: (3)

MFET 3340 - Applied Fluid Power **Credits: (2)** and
MFET 3340L - Applied Fluid Power Lab **Credits:
(1)**

PS 3250 - Business Communication **Credits: (3)**
or

ENGL 3100 - Professional and Technical Writing
Credits: (3)

Technical Electives (9 credit hours)

A minimum of 9 credit hours of technical electives chosen from the following list are required. At least 3 credit hours must be upper division.

PDD 2650 - Product Design & Development
Credits: (3)

PDD 3470 - Introduction to CATIA V5 **Credits: (3)**

PDD 4470 - Advanced CATIA V5 **Credits: (3)**
MATH 2210 - Calculus III **Credits: (4)**
MATH 2270 - Elementary Linear Algebra **Credits:
(3)**
MATH 2280 - Ordinary Differential Equations
Credits: (3)
MET 4800 - Individual Research in Mechanical
Engineering Technology **Credits: (1-3)**
MET 4890 INT - Cooperative Work Experience
Credits: (1-3)
MET 4300 - Heating, Ventilating & Air
Conditioning **Credits: (3)**
MFET 2410 - Quality Concepts and Statistical
Applications **Credits: (3)**
MFET 3010 - Tool Design **Credits: (3)**

MFET 3350 - Plastic and Composite
Manufacturing **Credits: (2)** and
MFET 3350L - Plastic and Composite
Manufacturing Lab **Credits: (2)**

MFET 3460 - Engineering Design using Solid
Modeling **Credits: (2)** and
MFET 3460L - Engineering Design using Solid
Modeling Lab **Credits: (1)**

MFET 3750 - Welding Metallurgy I **Credits: (2)**
MFET 3820 - Nondestructive Testing **Credits: (3)**
MFET 4310 - Corrosion and Corrosion Control
Credits: (2)
PHYS 2220 - Physics for Scientists and
Engineers II **Credits: (5)**

Other Required Courses (12 credit hours)

Gen Ed Humanities Elective **(3)**
Gen Ed Social Science Diversity Elective **(3)**
Gen Ed Life Science Elective **(3)**
Gen Ed American Institutions Elective **(3)**

Engineering Departmental Honors

Please see weber.edu/honors/contracts.html for a list of current Departmental Honors contracts and Departmental Honors Advisors. For additional information about the Honors Program, please refer to the Honors Program section of the WSU Catalog. Or visit the department website at <http://www.weber.edu/engineering/ee.html>.

Department of Professional Sales

Department Chair: Blake Nielson

Location: Technical Education Building, Room 101

Telephone Contact: Wendi Birch 801-626-6913

Professor: Vel Casler; **Associate Professors:** Tim Border, Jo Ellen Jonsson, Blake Nielson; **Assistant Professors:** Brock Adams, Alex Lawrence; **Instructor:** Mikelle Barberi-Weil, Nicole Flink, Paige Young

The Department of Professional Sales offers associate of applied science degrees in the areas of Sales & Merchandising Technology and bachelor's degrees in Professional Sales.

Sales and Merchandising

The sales and merchandising program is designed to prepare people for employment in selling at all levels of distribution and merchandising and middle management areas of retailing. Occupational opportunities include positions as salespeople (auto, insurance, real estate, etc.), middle management areas of sales managers and wholesale managers, retail salespeople, departmental managers, fashion coordinators, buyers, sales promotion managers, personnel directors, and display people. Students supplement their course work with practical on-the-job training in local business establishments, receiving college credit for their work experience.

Professional Sales

This program prepares individuals to serve as agents or sales representatives in selling products/services to other businesses, plants, professionals, and public and private institutions. This program offers a professional sales emphasis tailored toward specific fields such as:

Manufacturing Rep
Communication System Rep
Pharmaceutical Rep
Medical Equipment Rep
Financial Planning
Real Estate
Technology Sales
Financial Services
Marketing
Wholesale Rep
Broker
Electronic Rep
Small Business Owner

Sales and Merchandising (AAS)

Program Prerequisite: An interview with the program advisor is necessary prior to acceptance into the program.

Grade Requirements: An overall GPA of 2.00 or "C."

Credit Hour Requirements: A total of 63 credit hours is required.

Assessment Requirements: Students will be required to complete certain assessment instruments as part of the overall requirements for receiving their associate's degree. Please see your advisor or your department for specific information regarding assessment.

Program Code: 8025AAS
CIPC: 521803

PS 1143 - Principles of Selling and Persuasion
Credits: (3)

PS 1303 - Sales Channels **Credits: (3)**

PS 2603 - Advanced Selling Techniques **Credits: (3)**

PS 3203 - Customer Service Techniques **Credits: (3)**

PS 3563 - Principles of Sales Supervision
Credits: (3)

Support Courses (30 credit hours)

Select 30 credit hours from any of the PS Department courses.

Note:

Computer and Information Literacy as defined in this catalog is also required.

Advisement

All Sales and Merchandising students are required to meet with a faculty advisor at least annually for course and program advisement. Call 801-626-6913 for more information or to schedule an appointment.

Admission Requirements

Declare your program of study (see Enrollment Services and Information). No special admission or application requirements are needed for this program.

General Education

Refer to Degree Requirements for Associate of Applied Science requirements. COMM 2110 is a required support course and will also be applied toward general education requirements. Computer and Information Literacy as defined in this catalog is also required for the AAS degree.

Major Course Requirements for AAS Degree

Courses Required (15 credit hours)

Professional Sales (BS)

Program Prerequisite: An interview with a faculty member is necessary prior to acceptance into the program.

Minor: Not required.

Grade Requirements: A grade of "C" or better in courses required for this major (a grade of "C-" is not acceptable) in addition to an overall GPA of 2.00 or higher.

Credit Hour Requirements: A total of 120 hours is required for graduation; a minimum of 51 of these is required within the major. A total of 40 upper division credit hours is required (courses number 3000 and above); a minimum of 32 of these is required within the major.

Program Code: 8065BS
CIPC: 521804

Advisement

All Professional Sales students are required to meet with a faculty advisor at least annually for course and program advisement. Call 801-626-6913 for more information or to schedule an appointment. (Also refer to the Department Advisor Referral List.)

Admission Requirements

Declare your program of study (see Enrollment Services and Information). No special admission or application requirements are needed for this program.

General Education

Refer to Degree Requirements for Bachelor of Science requirements.

Major Course Requirements for BS Degree

Courses Required (51 credit hours)

- PS 1143 - Principles of Selling and Persuasion **Credits: (3)**
- PS 1303 - Sales Channels **Credits: (3)**
- PS 1401 - Introduction to Sales and Service Technology **Credits: (1)**
- PS 2603 - Advanced Selling Techniques **Credits: (3)**
- PS 3103 - Sales Personalities and Profiles **Credits: (3)**
- PS 3203 - Customer Service Techniques **Credits: (3)**
- PS 3250 - Business Communication **Credits: (3)**
- PS 3303 - Technology in Sales **Credits: (3)**
- PS 3363 - Contract and Sales Negotiation Techniques **Credits: (3)**
- PS 3503 - Sales Planning and Forecasting **Credits: (3)**
- PS 3563 - Principles of Sales Supervision **Credits: (3)**
- PS 3702 - Developing Team Leadership Skills **Credits: (2)**
- PS 3803 - Sales Proposals **Credits: (3)**
- PS 3903 - Sales Presentation Strategies and Techniques **Credits: (3)**
- PS 4203 - Ethical Sales and Service **Credits: (3)**
- PS 4610 INT - Senior Project I **Credits: (3)**
- PS 4620 INT - Senior Project II **Credits: (3)**
- PS 4993 - Sales Career Seminar **Credits: (3)**

Support Course Electives (minimum 24 credit hours)

Select from the following or other classes approved by the department adviser.

- ACTG 2010 - Survey of Accounting I **Credits: (3)**
- ACTG 2020 - Survey of Accounting II **Credits: (3)**
- ATTC 3520 - Fleet Management **Credits: (3)**
- ATTC 3620 - Automotive Business Practices **Credits: (3)**
- BSAD 1010 - Introduction to Business **Credits: (3)**
- BSAD 3000 - Small Business Management **Credits: (3)**
- CHF 1500 SS/DV - Human Development **Credits: (3)**
- CHF 2100 - Family Resource Management **Credits: (3)**
- CHF 2400 SS/DV - Family Relations **Credits: (3)**
- CHF 3150 - Consumer Rights and Responsibilities **Credits: (3)**
- CHF 4400 - The Family in Stress **Credits: (3)**
- COMM 3050 - Conflict Management and Negotiation **Credits: (3)**
- COMM 3120 - Advanced Public Speaking **Credits: (3)**
- COMM 3820 - Persuasive Communication **Credits: (3)**
- COMM 3850 - Advertising **Credits: (3)**
- ENGL 3100 - Professional and Technical Writing **Credits: (3)**
- GERT 3120 - Aging: Adaptation and Behavior **Credits: (3)**
- GERT 4650 - Retirement: Adjustment/Planning **Credits: (3)**
- IDT 1010 CA - Introduction to Interior Design **Credits: (3)**
- PSY 2000 SS - The Psychology of Human Relationships **Credits: (3)**
- PSY 3000 - Child Psychology **Credits: (3)**
- PSY 3100 - Psychology of Diversity **Credits: (3)**
- PSY 3460 - Social Psychology **Credits: (3)**
- PSY 4510 - Industrial and Organizational Behavior **Credits: (3)**
- SOC 2600 - Sociology of Family **Credits: (3)**
- PS 1503 - Introduction to Fashion Merchandising **Credits: (3)**
- PS 2182 - Credit and Collection Methods **Credits: (2)**
- PS 2443 - Advertising Methods **Credits: (3)**
- PS 2703 - Internet Sales and Service **Credits: (3)**
- PS 2903 - Professional Selling Methodologies **Credits: (3)**
- PS 4830 - Directed Readings **Credits: (1-3)**
- PS 4920 - Workshop Lecture **Credits: (1-2)**
- WEB 2080 - Database Applications **Credits: (1)**

WEB 3070 - Advanced Spreadsheet Applications

Credits: (1)

WEB 3090 - Digital Presentations **Credits: (2)**

WEB 2220 - Digital Publishing **Credits: (3)**

WEB 3400 - LAMP Stack Web Development

Credits: (3)

BSAD 3200 - Legal Environment of Business

Credits: (3)

ECON 2010 SS - Principles of Microeconomics

Credits: (3)

MIS 2010 - Business Computer Skills **Credits: (1)**

MGMT 3010 - Organizational Behavior and

Management **Credits: (3)**

MKTG 3010 - Marketing Concepts and Practices

Credits: (3)

QUAN 2600 - Business Statistics I **Credits: (3)**

SCM 3050 - Operations and Supply Chain

Management **Credits: (3)**

Professional Sales (BIS)

Grade Requirements: A grade of "C" or better in all courses.

Credit Hour Requirements: A minimum of 18 credit hours.

Program Code: 8065

CIPC: 521804

Course Requirements for BIS

Professional Sales Courses Required (6 credit hours)

PS 1143 - Principles of Selling and Persuasion
Credits: (3)

PS 2603 - Advanced Selling Techniques **Credits:**
(3)

Additional Professional Sales Electives (12 credit hours)

Choose any 4 of the following courses

PS 3103 - Sales Personalities and Profiles
Credits: (3)

PS 3203 - Customer Service Techniques **Credits:**
(3)

PS 3303 - Technology in Sales **Credits: (3)**

PS 3363 - Contract and Sales Negotiation
Techniques **Credits: (3)**

PS 3563 - Principles of Sales Supervision
Credits: (3)

PS 3803 - Sales Proposals **Credits: (3)**

PS 3903 - Sales Presentation Strategies and
Techniques **Credits: (3)**

Fashion Merchandising Minor

Professional Sales (Minor)

Grade Requirements: A grade of "C" or better in all courses used toward the minor.

Credit Hour Requirements: A total of 15 credit hours required.

Program Code: Fashion Merchandising (8029), Professional Sales (8065)

CIPC: Fashion Merchandising (521904), Professional Sales (521804)

This program offers students who major in another field the option to obtain a minor in one of the areas in Professional Sales. Course options are available for substitution or addition to the recommended courses should the student feel a need for a more specific or concentrated minor emphasis. Check with the PS Department for approval of substitute courses.

Course Requirements for Fashion Merchandising Minor

Courses Required (21 credit hours)

IDT 2010 - Sustainability I: Textiles and Soft Materials **Credits: (3)**

PS 1143 - Principles of Selling and Persuasion **Credits: (3)**

PS 1503 - Introduction to Fashion Merchandising **Credits: (3)**

PS 2383 - Retail Merchandising and Buying Methods **Credits: (3)**

PS 2443 - Advertising Methods **Credits: (3)**

PS 2703 - Internet Sales and Service **Credits: (3)**

THEA 3243 - Costume History **Credits: (3)**

Sales Minor

Professional Sales (Minor)

Grade Requirements: A grade of "C" or better in all courses used toward the minor.

Credit Hour Requirements: A total of 15 credit hours required.

Program Code: Fashion Merchandising (8029), Professional Sales (8065)

CIPC: Fashion Merchandising (521904), Professional Sales (521804)

This program offers students who major in another field the option to obtain a minor in one of the areas in Professional Sales. Course options are available for substitution or addition to the recommended courses should the student feel a need for a more specific or concentrated minor emphasis. Check with the PS Department for approval of substitute courses.

Course Requirements for Professional Sales Minor (minimum of 15 credit hours)

PS 1143 - Principles of Selling and Persuasion

Credits: (3)

PS 1303 - Sales Channels **Credits: (3)**

PS 2603 - Advanced Selling Techniques **Credits:**
(3)

PS 3203 - Customer Service Techniques **Credits:**
(3)

PS 3563 - Principles of Sales Supervision
Credits: (3)

Professional Sales Departmental Honors

Please see weber.edu/honors/contracts.html for a list of current Departmental Honors contracts and Departmental Honors Advisors. For additional information about the Honors Program, please refer to the Honors Program section of the WSU Catalog.

School of Computing

Department Chair: Dr. Kyle Feuz

Location: WSU Davis, Computer and Automotive Engineering (CAE), 161

Telephone Contact: Christel Grange-Hicks, 801-626-7929

The School of Computing provides exceptional educational opportunities to students in the growing area of computing and computational systems. Students can explore diverse areas such as software engineering, mobile applications, programming languages, virtual reality, simulation science, game development, network technologies, network security, database development, multimedia applications, user interface/user experience, and web design and development. The College of Engineering, Applied Science & Technology offers AAS and BS degrees in the following computing programs:

Computer Science

Network Management Technology

Web and User Experience

The BS degree in Computer Science is accredited by the Computing Accreditation Commission of ABET, <http://www.abet.org>

Students must provide evidence of completion of an Associate of Applied Science AAS or Associate of Science AS degree in computing or other related degree prior to entering advanced upper division curriculum.

Computer Science

Program Coordinator: Linda DuHadway

Location: Technical Education Building, Room 110K

Telephone Contact: 801-626-6906

CS Program Advisor: Pat DeJong, 801-626-6318

Salt Lake Program Coordinator & Advisor: Ted Cowan, 801-957-4769

Davis Program Coordinator & Advisor: Brad Peterson, 801-395-3465

Professors: Delroy Brinkerhoff, Richard Fry, Brian Rague, Drew Weidman; **Associate Professors:** Robert Ball, Linda DuHadway, Kyle Feuz, Hugo Valle, Yong Zhang;

Assistant Professors: Abdulmalek Al-Gahmi, Noel Alton, Nicole Anderson, Arpit Christi, Luke Fernandez, Mark Huson, Brad Peterson, Meher Shaikh; **Instructors:** Mackenzie Bristow, Ted Cowan, Joshua Jensen, Jose Limas, Marrie Mack, Kim Murphy, Cody Squadroni, Alison Sunderland, Garth Tuck

The Computer Science program offers an Associate of Applied Science Degree and a Bachelor of Science Degree

in Computer Science. The nature of the curricula offers flexibility as a student may tailor their program of study to their interests and professional aspirations. The curricula is based on ABET suggested program outcomes and also provides a Customized Option for students seeking a second bachelor's degree or a minor in a different academic area. The program also offers a minor, a teaching minor, and a BIS concentration. A Game Development Certificate is also offered that consists of 15-16 credits that focus on game development and math and also requires a bachelor's degree in Computer Science to be completed as a pre or co-requisite.

The Computer Science program is a technical, scientific approach requiring a solid foundation in mathematics and physics. The program blends scientific and engineering principles implemented through actual, practical, and applications-oriented experience as well as the intellectual study of computing. It is designed to provide a sound fundamental understanding of logic and of digital computer organization as well as the interaction between hardware, software and the interconnection of system components. Also emphasized is software engineering which includes understanding operating systems and other software systems design including implementation of the theory of computing, analysis of algorithms, simulation, and knowledge-based systems. The objectives of the Computer Science program are to provide students with an education that will meet their academic and career goals as well as meeting the needs of local industries.

Network Management Technology

Program Coordinator: Kyle Feuz

Location: Elizabeth Hall, Room 301

Telephone Contact: 801-626-6059

NMT Program Advisors: Kyle Feuz, Andy Drake

Professor: Allyson Saunders; **Instructors:** Andy Drake, AJ Helper, Jose Limas, Matthew Paulson

The Network Management Technology program offers an Associate of Applied Science (AAS) Degree and a Bachelor of Science (BS) Degree in Network Management Technology, as well as a minor in Network Management Technology. Also offered are a Network Security Technology Certificate and a Network Technologies Certificate.

The program offers courses in network management technology, telecommunications, local area networks, wireless technologies, operating systems, network certification, and other related areas.

Network Management Technology students study both the data side and the voice side of the discipline. On the data side, students learn about computer networks, network operating systems, security, and computer application programs. On the voice side, students learn about designing, installing, and managing phone systems, and making decisions regarding the purchase and operation of hardware and software.

Web & User Experience

Program Coordinator: Cody Squadroni

Location: Elizabeth Hall, Room 368

Telephone Contact: 801-626-6571

WEB Program Advisor: Pat DeJong, 801-626-6318

Associate Professor: Laura MacLeod; **Assistant**

Professor: Noel Alton

The Web and User Experience program offers an Associate of Applied Science (AAS) Degree and a Bachelor of Science (BS) Degree in Web and User Experience. Minors are offered in Web Technology, and User Experience Design.

The program offers courses in web design, user experience design, database management, graphic production, and other related areas.

Graduates of this program will be prepared for employment in web design, development, and user experience. Students will gain an understanding of best practices in each of these fields.

Credit Policy

Obsolete Credit: School of Computing credits earned more than seven (7) years earlier than the proposed date of graduation will not be accepted toward University or major requirements unless validated through a challenge examination or approved by the appropriate academic department chair or department advisor.

Waiver Requests: Any exceptions to the printed School of Computing program graduation requirements must be approved by the appropriate academic department chair or department advisor prior to waiving, substituting, or taking the course(s) in question.

Computer Science (AAS)

Grade Requirements: A grade of "C" or better must be earned in all required CS courses (a grade of "C-" is not acceptable). A grade of "C-" or better must be earned in all required support courses. In addition, an overall GPA of 2.70 or higher must be attained for all required courses.

Credit Hour Requirements: This degree requires a minimum 63 credit hours.

Assessment Requirements: Students will be required to complete certain assessment instruments as part of the overall requirements for receiving their associate's degree. Please see your advisor or your department for specific information regarding assessment.

Program Code: 8023AAS

CIPC: 110701

Advisement

It is strongly suggested that Computer Science students see the departmental advisor on a regular basis. Call the department administrative specialist at 801-626-7929 for an appointment with the advisor. (Also refer to the Department Advisor Referral List.)

Admission Requirements

Declare your program of study (refer to Enrollment Services and Information) as Associate of Applied Science in Computer Science. No special admission or application requirements are needed for this program.

General Education

Refer to Degree Requirements for the AAS general education requirements (core and breadth). The following required support courses will also be applied toward general education requirements: COMM 2110, ENGL 2010, PHYS 2210, and MATH 1040 (or MATH 1210 or MATH 3410), CS 1030, LIBS 1504, and ETC 2001.

Major Course Requirements for AAS Degree

Computer Science Courses Required (40 credit hours)

- CS 1030 - Foundations of Computing **Credits: (4)**
- CS 1400 - Programming I **Credits: (4)**
- CS 1410 - Object-Oriented Programming **Credits: (4)**
- CS 2130 - Computational Structures **Credits: (4)**
- CS 2350 - Client Side Web Development **Credits: (4)**
- CS 2420 - Introduction to Data Structures and Algorithms **Credits: (4)**
- CS 2450 - Software Engineering I **Credits: (4)**
- CS 2705 - Network Fundamentals and Design **Credits: (4)**
- CS 2550 - Introduction to Database Design and SQL **Credits: (4)**
- CS 2810 - Computer Architecture/Organization **Credits: (4)**
- CS 2899 - Associate Degree Assessment **Credits: (0)**

Support Courses Required (24 credit hours)

- ENGL 2010 EN2 - Intermediate College Writing **Credits: (3)**
- PHYS 2210 PS - Physics for Scientists and Engineers I **Credits: (5)**
- COMM 2110 HU CEL - Interpersonal and Small Group Communication **Credits: (3)**
- MATH 1210 - Calculus I **Credits: (4)**

- MATH 1040 QL - Introduction to Statistics **Credits: (3)** or
- MATH 3410 - Probability and Statistics I **Credits: (3)**

- ENGL 3100 - Professional and Technical Writing **Credits: (3)** or
- PS 3250 - Business Communication **Credits: (3)** or
- ENGL 2250 CA - CW: Introduction to Creative Writing **Credits: (3)** or
- PHIL 1250 HU - Critical Thinking **Credits: (3)**

ETC 2001 SS/DV - Engineering Culture **Credits:**
(3)

In addition

*Information Literacy as defined in this catalog is also
required for the AAS degree*

LIBS 1504 - Information Literacy Competency
Exam **Credits: (1)** *or equivalent*

Network Management Technology (AAS)

Grade Requirements: A grade of "C" or better in courses required for this program in addition to an overall GPA of 2.50 or higher for all required specific major courses and a minimum cumulative GPA for all courses of 2.00.

Credit Hour Requirements: A total of 63 credit hours is required within the program. Recommendation: If additional elective hours are needed to meet the 63 credit hours required for the AAS degree, students are encouraged to take courses to be counted toward the Network Management Technology bachelor's degree.

Program Code: 8062AAS

CIPC: 110901

Advisement

All Network Management Technology students should meet with a faculty advisor for course and program advisement. Email Andy Drake (andrewdrake@weber.edu), Kyle Feuz (kylefeuz@weber.edu) or call 801-626-6059 for more information or to schedule an appointment.

Advisement may also be obtained in Elizabeth Hall 301.

Admission Requirements

Declare a program of study (see Enrollment Services and Information) with the department secretary (Elizabeth Hall 301). No special admission or application requirements are needed for this program.

General Education

Refer to Degree Requirements for Associate of Applied Science requirements. COMM 2110 and ECON 1010 will be applied to fill both program and general education requirements.

Major Course Requirements for AAS Degree

Core Courses Required (13 credit hours)

ENGL 1010 EN1 - Introductory College Writing
Credits: (3)

ENGL 2010 EN2 - Intermediate College Writing
Credits: (3)

MATH 1040 QL - Introduction to Statistics
Credits: (3) or

MATH 1050 QL - College Algebra **Credits: (4)**

WEB 1700 - Introduction to Computer
Applications **Credits: (3)** and

LIBS 1704 - Information Navigator **Credits: (1)** (or
equivalent)

Specific Major Courses Required (43 credit hours)

CS 1030 - Foundations of Computing **Credits: (4)**

NET 2200 - Microcomputer Operating Systems
Credits: (3)

NET 2210 - Linux Systems Administration
Credits: (3)

NET 2300 - Introduction to LAN Management
Credits: (3)

NET 2415 - Cisco TCP/IP Routing Protocols and
Router Configuration **Credits: (3)**

NET 2435 - Cisco Advanced LAN and WAN
Switching and Routing Theory and Design
Credits: (3)

CS 1400 - Programming I **Credits: (4)**

CS 2130 - Computational Structures **Credits: (4)**

CS 2550 - Introduction to Database Design and
SQL **Credits: (4)**

CS 2810 - Computer Architecture/Organization
Credits: (4)

WEB 1400 - Web Design and Usability **Credits:
(3)**

PS 3250 - Business Communication **Credits: (3)**

EET 1110 - Basic Electronics **Credits: (2)**

Support Courses Required (6 credit hours)

ECON 1010 SS - Economics as a Social Science
Credits: (3)

COMM 2110 HU CEL - Interpersonal and Small
Group Communication **Credits: (3)**

Web and User Experience (AAS)

Grade Requirements: A grade of "C" or better must be earned in all required WEB and CS courses (a grade of "C-" is not acceptable). A grade of "C-" or better must be earned in all required support courses. In addition, an overall GPA of 2.70 or higher must be attained for all required courses.

Credit Hour Requirements: A total of 63 credit hours is required.

Program Code: 8075AAS

CIPC: 110801

Advisement

Web and User Experience major students should meet with a School of Computing advisor for course and program advisement. Refer to the Department Advisor Referral List for more information or to schedule an appointment.

Admission Requirements

Declare your program of study (see Enrollment Services and Information) with the department secretary (Elizabeth Hall 301). No special admission or application requirements are needed for this program.

General Education

Refer to Degree Requirements for Associate of Applied Science requirements. COMM 2110 will be applied to fill both program and general education requirements.

Major Course Requirements for AAS Degree

Core Courses Required (10 credit hours)

ENGL 1010 EN1 - Introductory College Writing
Credits: (3)

ENGL 2010 EN2 - Intermediate College Writing
Credits: (3)

MATH 1050 QL - College Algebra **Credits: (4)**

General Education Courses Required (6 credit hours)

Refer to Degree Requirements for Associate of Applied Science requirements.

Specific Major Courses Required (19 credit hours)

WEB 1400 - Web Design and Usability **Credits: (3)**

WEB 1430 - Client Side Programming **Credits: (3)**

WEB 2500 - User Experience Design **Credits: (3)**

WEB 2620 - Advanced CSS **Credits: (3)**

WEB 2630 - Client Side Frameworks **Credits: (4)**

WEB 2890 - Client-Side Portfolio **Credits: (3)**

Support Courses Required (19 credit hours)

COMM 2110 HU CEL - Interpersonal and Small Group Communication **Credits: (3)**

ART 1120 - Design Concepts **Credits: (3)**

CS 1030 - Foundations of Computing **Credits: (4)**

CS 1400 - Programming I **Credits: (4)**

CS 2550 - Introduction to Database Design and SQL **Credits: (4)**

Specific Major Electives (9 credit hours)

These 9 credits can be fulfilled with any CS or WEB 1xxx or 2xxx course which has not already been applied above.

CS 1xxx Any CS 1xxx Course Not Slotted Elsewhere

CS 2xxx Any CS 2xxx Course Not Slotted Elsewhere

WEB 2xxx Any WEB 2xxx Course Not Slotted Elsewhere

Cybersecurity Essentials Certificate of Proficiency

Program Admission and Prerequisites: Application for admission to Weber State University and/or current degree-seeking status..

Grade Requirements: Completion of the following required courses with a grade of "C" or better. These courses may also be slotted appropriately for degree requirements.

Program Code: 8090CP

CIPC: 111003

Required Courses (17 credit hours)

CS 1030 - Foundations of Computing **Credits: (4)**

CS 1400 - Programming I **Credits: (4)**

NET 2200 - Microcomputer Operating Systems
Credits: (3)

NET 2300 - Introduction to LAN Management
Credits: (3)

WEB 1400 - Web Design and Usability **Credits:**
(3)

Game Development Certificate of Proficiency

A student may apply for a certificate of proficiency in Game Development provided he or she has fulfilled the following requirements:

Concurrent or previous completion of a Bachelor's Degree in Computer Science from the WSU College of Engineering, Applied Science, and Technology or any other accredited institution.

Completion of the following required courses with a grade of C or better. (These courses may also be slotted as electives for degree requirements)

Program Code: 8049CP

CIPC: 110299

(15 credit hours):

CS 1010 CA - Introduction to Interactive Entertainment **Credits: (3)**

CS 3280 - Object Oriented Windows Application Development **Credits: (4)**

CS 4640 - Foundations of Game Development **Credits: (4)**

CS 4650 - Advanced Game Development **Credits: (4)**

Network Security Technology Certificate of Proficiency

Grade Requirements: A minimum overall GPA of 2.00 or "C".

Credit Hour Requirements: A total of 23 credit hours is required in addition to Computer Competency (at least 10 of which must be residence hours taken from WSU).

Program Code: 8066CP

CIPC: 151204

Course Requirements for Certificate of Proficiency

Courses Required (23 credit hours)

CS 1400 - Programming I **Credits: (4)**

NET 2300 - Introduction to LAN Management
Credits: (3)

NET 2415 - Cisco TCP/IP Routing Protocols and
Router Configuration **Credits: (3)**

NET 2435 - Cisco Advanced LAN and WAN
Switching and Routing Theory and Design
Credits: (3)

NET 3300 - Advanced LAN Security
Management **Credits: (3)**

CS 3030 - Scripting Languages **Credits: (4)** or
CS 3705 - Protocol Analysis **Credits: (4)**

NET 3730 - Cyber Policy and Ethics **Credits: (3)**

Network Technologies

Certificate of Proficiency

Grade Requirements: A minimum overall GPA of 2.00 or "C".

Credit Hour Requirements: A total of 17-19 credit hours is required (at least 10 of which must be residence hours taken from WSU).

Program Code: 8067CP

CIPC: 110901

Course Requirements for Certificate of Proficiency

Courses Required (17-19 credit hours)

NET 2300 - Introduction to LAN Management

Credits: (3) or

CS 2705 - Network Fundamentals and Design

Credits: (4)

NET 3710 - Switching and Transmission Network
Systems Management **Credits: (3)**

NET 3715 - Transmission Network Applications

Credits: (2)

NET 2415 - Cisco TCP/IP Routing Protocols and
Router Configuration **Credits: (3)**

NET 2435 - Cisco Advanced LAN and WAN
Switching and Routing Theory and Design

Credits: (3)

NET 3310 - Network Server Administration

Credits: (3) or

CS 3705 - Protocol Analysis **Credits: (4)**

Programming Essentials Certificate of Proficiency

A student may apply for an Institutional Certificate of Proficiency in Programming Essentials provided he or she has fulfilled the following requirements:

Application for admission to Weber State University and/or current degree-seeking status.

Completion of the following required courses with a grade of "C" or better. These courses may also be slotted appropriately for degree requirements.

(16 credit hours):

CS 1030 - Foundations of Computing **Credits: (4)**

CS 1400 - Programming I **Credits: (4)**

CS 1410 - Object-Oriented Programming **Credits: (4)**

CS 2420 - Introduction to Data Structures and Algorithms **Credits: (4)**

User Experience Design

Certificate of Proficiency

User experience (UX) design is a growing interdisciplinary field focusing on the interaction between humans and technology and the design of meaningful and transformative user experiences. It focuses on having a deep understanding of users and their needs and using that understanding to guide the design of new sites, apps, products, and services.

This certificate provides students with the high-quality training in the main areas of UX including design, prototyping, accessibility, and user research methods. Students receiving this certificate will possess a level of competency that will prepare them to work as UX designers and/or researchers.

A student may apply for an Institutional Certificate of Proficiency in User Experience provided the following requirements have been fulfilled:

Application for admission to Weber State University and/or current degree-seeking status

Completion of the following required courses with a grade of "C" or better (a grade of "C-" is not acceptable). These courses may also be slotted appropriately for degree requirements.

Program Code: 8094CP
CIPC: 303101

Required Courses (16 credit hours)

- WEB 1400 - Web Design and Usability **Credits: (3)**
- WEB 2500 - User Experience Design **Credits: (3)**
- WEB 2620 - Advanced CSS **Credits: (3)**
- WEB 3500 - User Interface Prototyping & Design **Credits: (3)**
- WEB 3600 - User Research Methods **Credits: (4)**

Web Essentials Certificate of Proficiency

The Institutional Certificate of Proficiency in Web Essentials provides a measured, proven, and effective introduction to user interface design concepts and best practices in web development. This Institutional Certificate emphasizes hands-on programming techniques, development of solid design principles, and exposure to the most widely used multimedia creation and editing tools. A student receiving this certificate will possess a level of competency that will prepare them to successfully design and develop client side web pages.

A student may apply for an Institutional Certificate of Proficiency in Web Essentials provided he or she has fulfilled the following requirements:

Application for admission to Weber State University and/or current degree-seeking status

Completion of the following required courses with a grade of "C" or better. These courses may also be slotted appropriately for degree requirements.

Program: 8086CP

CIPC: 110801

(17 credit hours):

CS 1030 - Foundations of Computing **Credits: (4)**

CS 1400 - Programming I **Credits: (4)**

WEB 1400 - Web Design and Usability **Credits:**
(3)

WEB 2210 - Computer Illustrations **Credits: (3)**

WEB 2200 - Image Editing **Credits: (3)**

Computer Science (BS)

Program Prerequisite: Completion or equivalent of a Weber State AAS degree in Computer Science and acceptance into the baccalaureate degree program.

Minor: Required for the Customized Option.

Grade Requirements: A grade of "C" or better must be earned in all required CS courses (a grade of "C-" is not acceptable). A grade of "C-" or better must be earned in all required support courses. In addition, an overall GPA of 2.70 or higher must be attained for all required courses.

Credit Hour Requirements: A minimum of 126 credit hours is required for graduation. The actual number of credit hours required for graduation with the customized option varies.

Program Code: 8023BS, 8022BS (Customized Post-Bac)

CIPC: 110701, Customized (110101)

Advisement

It is strongly suggested that Computer Science students see an advisor on a regular basis. Call the department administrative specialist at 801-626-7929 for an appointment with the advisor. (Also refer to the Department Advisor Referral List.)

Admission Requirements into the Bachelor Program

Complete an AAS degree in Computer Science or equivalent.

Formally declare and be accepted to baccalaureate status through the Department of Computer Science. Specific requirements and details may be obtained from a department advisor.

General Education

Refer to Degree Requirements. The MATH 1040, or MATH 1210, or MATH 3410 course required for the Computer Science AAS degree, which is a pre-requisite to the BS major, also satisfies the WSU core general education Quantitative Literacy requirement. Computer Science majors must complete COMM 2110 as part of the Humanities general education requirement. It is

recommended that Computer Science majors take CS 1010 for one of the CA general education requirements.

Students who pass the Computer Science Advanced Placement A exam with a score of 3 receive 4 hours of credit for CS 1022 (4). Students who pass the Computer Science Advanced Placement A exam with a score of 4 or 5 receive a total of 8 hours of credit consisting of CS Elective credit (4) plus specific credit for either CS 1400 (4) or CS 1023 (4). Students who pass the Advanced Placement Computer Science Principles exam with a score of 3, 4, or 5 receive 4 hours of credit for CS 1030 (4).

Major Course Requirements for BS Degree

To be taken in addition to the requirements for the AAS degree in Computer Science.

Course Descriptions-CS, ETC, NET, WEB

Required Courses (24 credit hours)

CS 3100 - Operating Systems **Credits: (4)**

CS 3230 - Object Oriented User Interface Development with Java **Credits: (4)** or

CS 3280 - Object Oriented Windows Application Development **Credits: (4)**

CS 3550 - Advanced Database Programming **Credits: (4)**

CS 3750 - Software Engineering II **Credits: (4)**

CS 4110 - Concepts of Formal Languages and Algorithms for Computing **Credits: (4)**

CS 4790 - .NET Web Application Development **Credits: (4)** or

CS 4230 - Java Application Development **Credits: (4)** or

CS 4450 - Advanced Software Engineering Methods **Credits: (4)**

CS 4899 - Bachelor's Degree Assessment **Credits: (0)**

Support Courses Required (3-4 credit hours)

MATH 1220 - Calculus II **Credits: (4)** or

MATH 3110 - Foundations of Algebra **Credits: (3)**

or

MATH 3160 - Number Theory **Credits: (3)**

CS Upper Division Electives (6-8 credit hours)

Choose 2 upper division computer science courses (see list of suggested electives). You may not use CS 4800 or CS 4850 or CS 4890 for these electives.

Other Upper Division Electives (6 credit hours)

Choose 6 credits of any approved upper division courses from CS, NET, WEB, ECE, EET, MIS, PHYS, AND MATH. This may include up to 4 credits maximum in any one of the following courses: CS 4800, CS 4850, or CS 4890 (max 6 credits total).

Suggested Upper Division CS Electives

The following suggested electives are provided in order to assist students wishing to specialize in different areas:

Recommended electives for students desiring to pursue a Master's Degree in Computer Science

CS 4280 - Computer Graphics **Credits: (4)**
CS 4500 - Introduction to Artificial Intelligence **Credits: (4)**
CS 4820 - Compiler Design **Credits: (4)**

Recommended electives for students desiring to specialize in Web Development

CS 4230 - Java Application Development **Credits: (4)**
CS 4350 - Advanced Internet Programming **Credits: (4)**
CS 4790 - .NET Web Application Development **Credits: (4)**
CS 3620 - Server-Side Web Architecture **Credits: (4)**
CS 3630 - Rich Internet Application Development **Credits: (4)**

Recommended electives for students desiring to specialize in Mobile Development

CS 3230 - Object Oriented User Interface Development with Java **Credits: (4)**
CS 3260 - Mobile Development for the iPhone **Credits: (4)**
CS 3270 - Mobile Development for Android **Credits: (4)**

Recommended electives for students desiring to specialize in Network Security

CS 3030 - Scripting Languages **Credits: (4)**
CS 3705 - Protocol Analysis **Credits: (4)**
CS 3805 - Computer and Network Security **Credits: (4)**
CS 3840 - Computer Forensics for Security Assurance **Credits: (4)**
NET 4740 - Security Vulnerabilities and Intrusion Mitigation **Credits: (4)**

Alternative Customized Option (33-35 credit hours) plus a minor or first bachelor's degree

Required Courses (30-32 credit hours)

CS 3100 - Operating Systems **Credits: (4)**
CS 3230 - Object Oriented User Interface Development with Java **Credits: (4)** or
CS 3280 - Object Oriented Windows Application Development **Credits: (4)**

CS 3550 - Advanced Database Programming **Credits: (4)**

CS 3750 - Software Engineering II **Credits: (4)**
CS 4110 - Concepts of Formal Languages and Algorithms for Computing **Credits: (4)**

CS 4230 - Java Application Development **Credits: (4)** or
CS 4450 - Advanced Software Engineering Methods **Credits: (4)** or

CS 4790 - .NET Web Application Development
Credits: (4)

Any two computer science upper division electives (**6-8 credit hours**). *You may not use CS 4800 or CS 4850 or CS 4890 for these electives.*

Complete a minor in any academic area or a concurrent second bachelor's degree, or have completed a first bachelor's degree.

Note:

Additional hours of upper division computer science courses may be taken to satisfy the University upper division requirement of 40 hours (CS 4890 is recommended).

Computer Science Teaching (BS)

Program Prerequisite: Not required for Computer Science and Computer Science Customized majors. Computer Science Teaching majors must meet the Teacher Education admission and licensure requirements (see Department of Teacher Education).

Minor: Not required.

Grade Requirements: An overall GPA of 2.90 is required in courses required for this major. Also refer to the general grade requirements for graduation under Degree Requirements.

Credit Hour Requirements: A total of 125 semester credit hours is required for graduation; 60 hours are required within the major, plus the credits required by the Department of Teacher Education. Forty-four upper-division credit hours are required (courses numbered 3000 and above).

Program Code: 8091BS

CIPC: 131321

Advisement

Computer Science Teaching majors are strongly encouraged to meet with the advisor at least annually for course and program advisement. Call 801-626-7929 for more information or to schedule an appointment. Computer Science Teaching majors are also encouraged to meet with a Jerry and Vickie Moyes College of Education advisor (call 801-626-6269). (Also refer to the Department Advisor Referral List.)

Admission Requirements

Declare your program of study. Teaching majors must meet the Teacher Education admission and licensure requirements (see Department of Teacher Education).

General Education

Refer to pages Degree Requirements for Bachelor of Science requirements.

Computer Science Teaching Major Course Requirements for BS Degree

Computer Science Courses Required (60 credit hours)

CS 1030 - Foundations of Computing **Credits: (4)**

CS 1400 - Programming I **Credits: (4)**

CS 1410 - Object-Oriented Programming **Credits: (4)**

CS 2130 - Computational Structures **Credits: (4)**

CS 2350 - Client Side Web Development **Credits: (4)**

CS 2420 - Introduction to Data Structures and Algorithms **Credits: (4)**

CS 2450 - Software Engineering I **Credits: (4)**

CS 2550 - Introduction to Database Design and SQL **Credits: (4)**

CS 2705 - Network Fundamentals and Design **Credits: (4)**

CS 2810 - Computer Architecture/Organization **Credits: (4)**

CS 3230 - Object Oriented User Interface Development with Java **Credits: (4)**

CS 3280 - Object Oriented Windows Application Development **Credits: (4)**

CS 3550 - Advanced Database Programming **Credits: (4)**

Select two of the following:

CS 3030 - Scripting Languages **Credits: (4)**

CS 3100 - Operating Systems **Credits: (4)**

CS 3260 - Mobile Development for the iPhone **Credits: (4)**

CS 3270 - Mobile Development for Android **Credits: (4)**

CS 3705 - Protocol Analysis **Credits: (4)**

Support Courses Required (16 credit hours)

CHF 1500 SS/DV - Human Development **Credits: (3)**

COMM 2110 HU CEL - Interpersonal and Small Group Communication **Credits: (3)**

ENGL 2010 EN2 - Intermediate College Writing **Credits: (3)**

ENGL 2250 CA - CW: Introduction to Creative Writing **Credits: (3)**

MATH 1050 QL - College Algebra **Credits: (4)**

Note:

Students must also complete the Teacher Education Licensure Program.

Network Management Technology (BS)

Program Prerequisite: Completion or equivalent of a Weber State AAS Degree in Network Management Technology.

Minor: Not required.

Grade Requirements: A grade of "C" or better in courses required for this major in addition to an overall GPA of 2.50 or higher for all required specific major courses and a minimum cumulative GPA for all courses of 2.00.

Credit Hour Requirements: A total of 120-126 credit hours is required for graduation. A total of 40 upper-division credit hours is required (courses numbered 3000 and above); 38 of these credit hours are required within the major.

Program Code: 8062BS

CIPC: 110901

Advisement

All Network Management Technology students should meet with a faculty advisor for course and program advisement. Email Andy Drake (andrewdrake@weber.edu), Kyle Feuz (kylefeuz@weber.edu) or call 801-626-6059 for more information or to schedule an appointment.

Advisement may also be obtained in Elizabeth Hall 301.

Admission Requirements

Complete an AAS Degree in Network Management Technology or equivalent. Declare a program of study (see Enrollment Services and Information) with Angela Christensen (angelachristensen@weber.edu) (Elizabeth Hall 301). No special admission or application requirements are needed for this program.

General Education

Refer to Degree Requirements for the Bachelor of Science requirements. COMM 2110 and ECON 1010 will be applied to fill 6 credits of both program and general education requirements. (These courses are taken as part of the AAS).

Major Course Requirements for BS Degree

To be taken in addition to the requirements for the Network Management Technology (AAS).

Specific Major Courses Required (44 credit hours)

- NET 3300 - Advanced LAN Security Management **Credits: (3)**
- NET 3310 - Network Server Administration **Credits: (3)**
- WEB 3400 - LAMP Stack Web Development **Credits: (3)**
- NET 3550 - Supervising Information Technology **Credits: (3)**
- NET 3710 - Switching and Transmission Network Systems Management **Credits: (3)**
- NET 3715 - Transmission Network Applications **Credits: (2)**
- NET 3720 - Advanced Transport Media **Credits: (3)**
- NET 3730 - Cyber Policy and Ethics **Credits: (3)**
- NET 4700 - Data and Voice Network Design **Credits: (4)**
- NET 4760 INT - Network/Telecommunications Internship **Credits: (3)**
- NET 4790 INT - Network/Telecommunications Senior Project **Credits: (2)**
- CS 3030 - Scripting Languages **Credits: (4)**
- CS 3705 - Protocol Analysis **Credits: (4)**
- NET 4740 - Security Vulnerabilities and Intrusion Mitigation **Credits: (4)**

Web and User Experience (BS)

Program Prerequisite: Completion or equivalent of a Weber State AAS Degree in Web and User Experience.

Emphasis Selection: Full Stack Web Development Emphasis or User Experience Design Emphasis

Minor: Not required.

Grade Requirements: A grade of "C" or better must be earned in all required WEB and CS courses (a grade of "C-" is not acceptable). A grade of "C-" or better must be earned in all required support courses. In addition, an overall GPA of 2.70 or higher must be attained for all required courses.

Credit Hour Requirements: A minimum of 123 credit hours is required for graduation. A total of 40 upper-division credit hours is required (courses numbered 3000 and above).

Program Code: 8075BS with one of the following emphasis codes: 8093 (Full-Stack) or 8094 (User Experience Design)

CIPC: Web and User Experience(110801) with the following: Full Stack(110801) or User Experience Design (303101)

Major Course Requirements for BS Degree

In addition to the requirements for the Web and User Experience (AAS), select one of the following emphases:

Web and User Experience (BS), Full Stack Web Development Emphasis

Web and User Experience (BS), User Experience Design Emphasis

Advisement

Web and User Experience major students should meet with a School of Computing advisor for course and program advisement. Refer to the Department Advisor Referral List for more information or to schedule an appointment.

Admission Requirements

Complete the AAS Degree in Web and User Experience or equivalent. Declare a program of study (see Enrollment Services and Information) with the department secretary (Elizabeth Hall 301). An application is needed to select an emphasis.

General Education

Refer to Degree Requirements for the Bachelor of Science requirements. The COMM HU CEL 2110 course required for the Web and User Experience major (taken as part of the AAS) will also be applied to fill general education requirements.

Web and User Experience (BS), Full Stack Web Development Emphasis

Students of this emphasis will learn to build functional web applications end to end using languages like JavaScript, PHP, Python, Java, and ASP.Net, and tools like MySQL, Oracle, MS SQL Server, and NoSQL databases to find, save, or change data and serve it back to the user.

Program Prerequisite: Completion or equivalent of a Weber State AAS Degree in Web and User Experience.

Minor: Not required.

Grade Requirements: A grade of "C" or better must be earned in all required WEB and CS courses (a grade of "C-" is not acceptable). A grade of "C-" or better must be earned in all required support courses. In addition, an overall GPA of 2.70 or higher must be attained for all required courses.

Credit Hour Requirements: A minimum of 123 credit hours is required for graduation. A total of 40 upper-division credit hours is required (courses numbered 3000 and above).

Program Code: 8075BS with 8093 emphasis code

CIPC: Web and User Experience(110801) with Full Stack(110801)

Advisement

Web and User Experience major students should meet with a School of Computing advisor for course and program advisement. Refer to the Department Advisor Referral List for more information or to schedule an appointment.

Admission Requirements

Complete the Web and User Experience (AAS) or equivalent. Declare a program of study (see Enrollment Services and Information) with the department admin (Elizabeth Hall 301). An application is needed to select this emphasis

General Education

Refer to Degree Requirements for Bachelor of Science requirements. The COMM 2110 HU CEL course required for the Web and User Experience major (taken as part of the AAS) will also be applied to fill general education requirements.

Major Course Requirements for BS Degree with an emphasis on User Experience Design

To be taken in addition to the requirements for the Web and User Experience (AAS).

Specific Major Courses Required (16 credit hours)

WEB 3200 - Dynamic Languages for Web
Development **Credits: (3)**

WEB 3400 - LAMP Stack Web Development
Credits: (3)

WEB 3430 - Full Stack JavaScript Development
Credits: (3)

WEB 3500 - User Interface Prototyping & Design
Credits: (3)

WEB 4350 - Web Development Capstone
Credits: (4)

Support Courses Required (14 credit hours)

BSAD 3000 - Small Business Management
Credits: (3) or

MKTG 3010 - Marketing Concepts and Practices
Credits: (3)

PS 3250 - Business Communication **Credits: (3)**
or

ENGL 3100 - Professional and Technical Writing
Credits: (3)

CS 3550 - Advanced Database Programming
Credits: (4)

CS 3620 - Server-Side Web Architecture **Credits:
(4)**

Electives (12 credit hours)

These 12 credits can be fulfilled with any CS 3xxx, CS 4xxx, NET 3550, WEB 3xxx, WEB 4xxx courses.

- Any CS 3xxx Course Not Slotted Elsewhere
- Any CS 4xxx Course Not Slotted Elsewhere
- Any WEB 3xxx Course Not Slotted Elsewhere
- Any WEB 4xxx Course Not Slotted Elsewhere

Web and User Experience (BS), User Experience Design Emphasis

User Experience (UX) design is a growing interdisciplinary field focusing on the interaction between humans and technology and the design of meaningful and transformative user experiences. It focuses on having a deep understanding of users and their needs and using that understanding to guide the design of new sites, apps, products, and services.

This emphasis takes place during the last two years of the WEB/UX (BS) program. It covers the main areas of UX design including user research methods, accessibility, and information architecture. As an interdisciplinary emphasis, it lists required support courses from departments such as Psychology, Professional Sales, Communications, English, and Sociology and Anthropology. A student graduating with this emphasis will have the UX Design training and background needed to work as UX designers and/or researchers.

Program Prerequisite: Completion or equivalent of a Weber State AAS Degree in Web and User Experience.

Minor: Not required.

Grade Requirements: A grade of "C" or better must be earned in all required WEB and CS courses (a grade of "C-" is not acceptable). A grade of "C-" or better must be earned in all required support courses. In addition, an overall GPA of 2.70 or higher must be attained for all required courses.

Credit Hour Requirements: A minimum of 123 credit hours is required for graduation. A total of 40 upper-division credit hours is required (courses numbered 3000 and above).

Program Code: 8075BS with 8094 emphasis code

CIPC: Web and User Experience(110801) with User Experience Design (303101)

Advisement

Web and User Experience major students should meet with a School of Computing advisor for course and program advisement. Refer to the Department Advisor Referral List for more information or to schedule an appointment.

Admission Requirements

Complete the Web and User Experience (AAS) or equivalent. Declare a program of study (see Enrollment Services and Information) with the department admin (Elizabeth Hall 301). An application is needed to select this emphasis

General Education

Refer to Degree Requirements for Bachelor of Science requirements. The COMM 2110 HU CEL course required for the Web and User Experience major (taken as part of the AAS) will also be applied to fill general education requirements.

Major Course Requirements for BS Degree with an emphasis on User Experience Design

To be taken in addition to the requirements for the Web and User Experience (AAS).

Specific Major Courses Required (17 credit hours)

- WEB 3130 - Web Accessibility **Credits: (3)**
- WEB 3500 - User Interface Prototyping & Design **Credits: (3)**
- WEB 3530 - Information Architecture **Credits: (3)**
- WEB 3600 - User Research Methods **Credits: (4)**
- WEB 4350 - Web Development Capstone **Credits: (4)**

Support Courses Required (13 credit hours)

- PS 3250 - Business Communication **Credits: (3)**
- PSY 3500 - Cognition **Credits: (3)**
- CS 3650 - Human-Computer Interaction **Credits: (4)**
- SOC 4220 - Life in a Consumer Society **Credits: (3)**

Electives (12 credit hours)

WEB 3XXX or 4XXX not already slotted anywhere
else

CS 3XXX or 4XXX not already slotted anywhere else

Other upper-level courses from other departments

Computer Science (BIS)

Select one additional course (4 credit hours total)

Computer Science (Minor or BIS Concentration)

An approved upper division Computer Science course (CS courses numbered 3000 or higher) other than CS 4800, CS 4850, or CS 4890. An upper division programming language course (CS 3230, CS 3280, CS 3620, CS 3550, or CS 3030) is recommended.

Grade Requirements: A grade of "C" or better must be earned in all required CS courses (a grade of "C-" is not acceptable). A grade of "C-" or better must be earned in all required support courses. In addition, an overall GPA of 2.70 or higher must be attained for all required courses.

Credit Hour Requirements: 28 hours for the Minor and BIS Concentration.

Program Code: 8023

CIPC: 110701

Course Requirements for Minor or BIS Concentration (28 credit hours)

Required Courses (16 credit hours)

CS 1030 - Foundations of Computing **Credits: (4)**

CS 1400 - Programming I **Credits: (4)**

CS 1410 - Object-Oriented Programming **Credits: (4)**

CS 2420 - Introduction to Data Structures and Algorithms **Credits: (4)**

Electives (12 credit hours)

Select two of the following courses (8 credit hours)

CS 2350 - Client Side Web Development **Credits: (4)**

CS 2450 - Software Engineering I **Credits: (4)**

CS 2550 - Introduction to Database Design and SQL **Credits: (4)**

CS 2810 - Computer Architecture/Organization **Credits: (4)**

CS 2705 - Network Fundamentals and Design **Credits: (4)**

Network Management Technology (BIS)

NET 3715 - Transmission Network Applications
Credits: (2)

Network Management Technology (Minor or BIS Emphasis)

For the BIS emphasis, refer to Bachelor of Integrated Studies (BIS) Program in the Interdisciplinary Programs section of this catalog.

Grade Requirements: The following required curriculum used for this minor must be completed with a grade of "C" or better and with a GPA of 2.50 or higher for all required specific major courses and a minimum cumulative GPA for all courses of 2.00.

Credit Hour Requirements: Minimum of 24 credit hours in NMT courses as listed below.

Program Code: 8062

CIPC: 110901

Advisement

Students should meet with a faculty advisor for course and program advisement. Call or email Andy Drake at 801-395-3477 (andrewdrake@weber.edu), Kyle Feuz (kylefeuz@weber.edu), or call 801-626-6059 for more information or to schedule an appointment. Advisement may also be obtained in Elizabeth Hall 301. (Also refer to the Department Advisor Referral List.)

Courses Required for Minor

Courses Required (24 credit hours)

CS 1030 - Foundations of Computing **Credits: (4)**

NET 2200 - Microcomputer Operating Systems
Credits: (3)

NET 2300 - Introduction to LAN Management
Credits: (3)

NET 2210 - Linux Systems Administration
Credits: (3)

NET 3300 - Advanced LAN Security
Management **Credits: (3)**

NET 3310 - Network Server Administration
Credits: (3)

NET 3710 - Switching and Transmission Network
Systems Management **Credits: (3)**

Web Technology (BIS)

Web Technology (Minor or BIS Emphasis)

Program Code: 8077

CIPC: 110801

Web Technology (Minor or BIS Emphasis)

WEB 1400 - Web Design and Usability **Credits:**

(3) and

WEB 1430 - Client Side Programming **Credits:**

(3) or

CS 2350 - Client Side Web Development **Credits:**

(4)

WEB 2620 - Advanced CSS **Credits:** **(3)**

WEB 2630 - Client Side Frameworks **Credits:** **(4)**

WEB 3200 - Dynamic Languages for Web
Development **Credits:** **(3)**

WEB 3400 - LAMP Stack Web Development

Credits: **(3)** or

WEB 3430 - Full Stack JavaScript Development

Credits: **(3)**

CS 3620 - Server-Side Web Architecture **Credits:**

(4)

Computer Science Minor

4850, or CS 4890. An upper division programming language course (CS 3230, CS 3280, CS 3620, CS 3550, or CS 3030) is recommended.

Computer Science (Minor or BIS Concentration)

Grade Requirements: A grade of "C" or better must be earned in all required CS courses (a grade of "C-" is not acceptable). A grade of "C-" or better must be earned in all required support courses. In addition, an overall GPA of 2.70 or higher must be attained for all required courses.

Credit Hour Requirements: 28 hours for the Minor and BIS Concentration.

Program Code: 8023

CIPC: 110701

Course Requirements for Minor or BIS Concentration (28 credit hours)

Required Courses (16 credit hours)

CS 1030 - Foundations of Computing **Credits: (4)**

CS 1400 - Programming I **Credits: (4)**

CS 1410 - Object-Oriented Programming **Credits: (4)**

CS 2420 - Introduction to Data Structures and Algorithms **Credits: (4)**

Electives (12 credit hours)

Select two of the following courses (8 credit hours)

CS 2350 - Client Side Web Development **Credits: (4)**

CS 2450 - Software Engineering I **Credits: (4)**

CS 2550 - Introduction to Database Design and SQL **Credits: (4)**

CS 2810 - Computer Architecture/Organization **Credits: (4)**

CS 2705 - Network Fundamentals and Design **Credits: (4)**

Select one additional course (4 credit hours total)

An approved upper division Computer Science course (CS courses numbered 3000 or higher) other than CS 4800, CS

Network Management Technology Minor

NET 3715 - Transmission Network Applications
Credits: (2)

Network Management Technology (Minor or BIS Emphasis)

For the BIS emphasis, refer to Bachelor of Integrated Studies (BIS) Program in the Interdisciplinary Programs section of this catalog.

Grade Requirements: The following required curriculum used for this minor must be completed with a grade of "C" or better and with a GPA of 2.50 or higher for all required specific major courses and a minimum cumulative GPA for all courses of 2.00.

Credit Hour Requirements: Minimum of 24 credit hours in NMT courses as listed below.

Program Code: 8062

CIPC: 110901

Advisement

Students should meet with a faculty advisor for course and program advisement. Call or email Andy Drake at 801-395-3477 (andrewdrake@weber.edu), Kyle Feuz (kylefeuz@weber.edu), or call 801-626-6059 for more information or to schedule an appointment. Advisement may also be obtained in Elizabeth Hall 301. (Also refer to the Department Advisor Referral List.)

Systems Management **Credits: (3)**

User Experience Design Minor

User experience is a critical component of software and web design. User-centric design has allowed software engineers and front-end web developers to create user experiences that are more sophisticated. This minor will address user experience best practices in several courses using current tools and technologies. The courses in this minor will complement major course offerings.

Grade Requirements: The following required curriculum used for this minor must be completed with a grade of "C" or better and with a minimum cumulative GPA for all courses of 2.70.

Credit Hour Requirements: Minimum of 24 credit hours.

Program Code: 8069

CIPC: 110801

Advisement

Web and User Experience major students should meet with a School of Computing advisor for course and program advisement. Refer to the Department Advisor Referral List for more information or to schedule an appointment.

Required Courses

WEB 1400 - Web Design and Usability **Credits: (3)**

WEB 2200 - Image Editing **Credits: (3)**

WEB 2210 - Computer Illustrations **Credits: (3)**

WEB 2300 - Video Editing **Credits: (3)**

WEB 2410 - Web Animation I **Credits: (3)** or

WEB 3300 - Motion Graphics **Credits: (3)**

WEB 2500 - User Experience Design **Credits: (3)**

WEB 2620 - Advanced CSS **Credits: (3)**

WEB 3500 - User Interface Prototyping & Design
Credits: (3)

Web Technology Minor

Web Technology (Minor or BIS Emphasis)

(4)

Computer Science Teaching Minor

An approved upper division Computer Science course (CS courses numbered 3000 or higher) other than CS 4800, CS 4850, or CS 4890. An upper division programming language course (CS 3230, CS 3280, CS 3620, CS 3550, or CS 3030) is recommended.

Grade Requirements: A grade of "C" or better must be earned in all required CS courses (a grade of "C-" is not acceptable). A grade of "C-" or better must be earned in all required support courses. In addition, an overall GPA of 2.70 or higher must be attained for all required courses.

Credit Hour Requirements: 26 hours for the Teaching Minor.

Program Code: 8020

CIPC: 131321

Students who select the Computer Science Teaching minor must satisfy the Teacher Education admission and licensure requirements (see Department of Teacher Education) and have a teaching major.

Course Requirements for Teaching Minor (26 credit hours)

Required Courses (18 credit hours)

CS 1030 - Foundations of Computing **Credits: (4)**

CS 1400 - Programming I **Credits: (4)**

CS 1410 - Object-Oriented Programming **Credits: (4)**

CS 2810 - Computer Architecture/Organization **Credits: (4)**

EDUC 3370 - Advanced Instructional Technology **Credits: (2)**

Electives (8 credit hours)

Select one of the following

CS 2250 - Structured Computing in a Selected Language **Credits: (4)**

CS 2350 - Client Side Web Development **Credits: (4)**

CS 2420 - Introduction to Data Structures and Algorithms **Credits: (4)**

CS 2450 - Software Engineering I **Credits: (4)**

CS 2550 - Introduction to Database Design and SQL **Credits: (4)**

Select one additional course (4 credit hours)

Computer Science Departmental Honors

Please see weber.edu/honors/contracts.html for a list of current Departmental Honors contracts and Departmental Honors Advisors. For additional information about the Honors Program, please refer to the Honors Program section of the WSU Catalog.

Network Management Technology Departmental Honors

Please see weber.edu/honors/contracts.html for a list of current Departmental Honors contracts and Departmental Honors Advisors. For additional information about the Honors Program, please refer to the Honors Program section of the WSU Catalog.

Mobile Application Development Certificate

A student may apply for a certificate in Mobile Application Development provided he or she has fulfilled the following requirements:

Concurrent or previous completion of a Bachelor's Degree in Computer Science from the WSU College of Applied Science and Technology or any other accredited institution.

Completion of the following required courses with a grade of C or better. These courses may also be slotted as electives for degree requirements.

(12 credit hours):

CS 3260 - Mobile Development for the iPhone

Credits: (4)

CS 3270 - Mobile Development for Android

Credits: (4)

CS 3630 - Rich Internet Application Development

Credits: (4)

Master of Science in Computer Science (MSCS)

Grade Requirements: An MSCS student must complete all program courses, including electives, with a grade of "B-" or higher. In addition, the overall program GPA must be 3.0 or higher.

Credit Hour Requirements: The program requires a minimum of 30 semester hours beyond a bachelor's degree in computer science.

Program Code: 8023MS

CIPC: 110701

Once enrolled, a student must register for at least one MSCS course each semester, except summers, until graduation. Students who fail to do so must petition for readmission into the program.

Admissions Requirements

Applicants for admission into the Master of Science in Computer Science program must possess a bachelor's degree or be in the final stage of completing the degree. An overall GPA of 3.25 is required from the undergraduate program in which the bachelor's degree is earned.

Applicants will submit:

- Completed application.

- Current resume.

- Official transcripts from every institution of higher education attended.

- Scores from the GRE. NOTE: Individuals who have already completed a graduate-level program and are well into established careers in a related field may be admitted without the GRE requirement, based on admission committee approval.

- Contact information for three references, at least one from a professional context and one from an academic context.

Additional Admission Requirements for International Students

All international students and any applicant educated outside the U.S. must demonstrate proficiency in English. Those whose native language is not English, or whose

language of instruction for their undergraduate degree was not English, will be required to submit a score from the Test of English as a Foreign Language (TOEFL) or International Language Testing System (IELTS) which is not more than two years old. Applicants are required to have an internet-based TOEFL score of 79-80 or a minimum IELTS score of 6.0.

Application

The application for admission to the Master of Science in Computer Science program must be submitted online. Official transcripts from each institution of higher education attended and all test scores must be sent directly to the WSU School of Computing.

Deadlines for application are October 15, for students enrolling in spring semester and March 15, for students enrolling in fall semester. Completed applications are considered by the Admissions Committee after each application deadline

Advisement

For issues regarding admissions, registration, and scheduling, students should contact the Graduate Enrollment Director. For questions concerning academic advisement, the primary source of contact is the MSCS Program Director. Students should meet with the director at least once a year while enrolled.

Leveling Courses

As determined on a case-by-case basis, students with non-computer science degrees may be required to take leveling courses in technology-related areas that will adequately prepare them for the MS core courses. The minimum leveling courses for non-computer science degrees are the following:

- CS 2420 - Introduction to Data Structures and Algorithms **Credits: (4)**

- CS 2810 - Computer Architecture/Organization **Credits: (4)**

- CS 3100 - Operating Systems **Credits: (4)**

- MATH 3410 - Probability and Statistics I **Credits: (3)**

- MATH 1210 - Calculus I **Credits: (4)**

Course Requirements for MSCS

Required Core MSCS courses (10 credits):

- CS 6420 - Advanced Algorithms **Credits: (3)**
- CS 6610 - Computer Architecture **Credits: (3)**
- CS 6820 - Compiler Design **Credits: (3)**
- CS 6000 - Fundamentals of Graduate Studies **Credits: (1)**

Required Thesis Research, Design Project, or Course-Work Only Option (6 credits):

MSCS Students are required to complete original research resulting in a thesis (CS 6011), a substantial project (CS 6010), or a course-work option (CS 6450 and another CS graduate elective). The student must declare to the department their intent to do a thesis, project or course-work only option. It is presumed that students will do a research thesis unless the program director is otherwise notified.

Generally, CS 6011 is taken by students who are interested in being introduced to research and development and are considering the possibility of pursuing their doctorate (Ph.D.).

Alternatively, CS 6010 is taken by students with an industry-minded perspective.

The course-work only option is for students seeking to increase their technical depth in Computer Science.

A total of 6 or more credits is required for each of the three tracks.

Select a Track (6 credits):

Thesis Option (6 credits)

- CS 6011 - Thesis Research **Credits: (2-6)**

Project Option (6 credits)

- CS 6010 - Design Project **Credits: (2-6)**

Course-Work Option (6 credits)

- CS 6450 - Software Evolution and Maintenance **Credits: (3)**
- Another CS 6000-Level Course

Electives (15 credits):

- CS 6100 - Distributed Operating Systems **Credits: (3)**
- CS 6450 - Software Evolution and Maintenance **Credits: (3)**
- CS 6500 - Advanced Artificial Intelligence **Credits: (3)**
- CS 6580 - Advanced Data Science Algorithms and Visualization **Credits: (3)**
- CS 6600 - Machine Learning **Credits: (3)**
- CS 6740 - Computer Systems Security **Credits: (3)**
- CS 6830 - Special Topics in Computer Science **Credits: (3)**
- CS 6840 - Formal System Design **Credits: (3)**
- CS 6850 - Parallel Programming and Architecture **Credits: (3)**

Computer Science Graduate Electives (9 credits)

In addition to the previously listed courses, MSCS students are required to complete 9 hours of Computer Science (CS) graduate electives. For these 9 credits, students may select any other graduate CS courses that do not meet the previous requirements. For a list of scheduled and recently scheduled CS graduate courses, see the following: <https://weber.edu/mscs/course-schedule.html>.

Additional Graduate Electives (6 credits):

In addition, MSCS students are required to complete 6 additional graduate electives. These additional graduate electives can be any CS graduate course not previously applied to another requirement, any graduate course that is approved by the MSCS graduate director, or one of the approved courses from the following list:

- ECE 6110 - Digital VLSI Design **Credits: (3)**
- ECE 6210 - Digital Signal Processing **Credits: (3)**
- ECE 6220 - Image Processing **Credits: (3)**
- ECE 6420 - Digital Communication **Credits: (3)**
- ECE 6710 - Real-Time Systems **Credits: (4)**
- MBA 6160 - Applications of Decision Models **Credits: (3)**

MBA 6310 - Information Technology in the
Enterprise **Credits: (3)**
MBA 6530 - E-Business **Credits: (3)**
MBA 6630 - Networking **Credits: (3)**
MBA 6640 - Cyber Security **Credits: (3)**

Engaged Learning, Honors, and Interdisciplinary Programs

Weber State University has a long history of engaging students in learning both inside and outside the classroom. Engaged learning fosters intellectual and personal growth, critical thinking, problem solving, civic engagement, and professional and career development opportunities. Students engage with faculty members in small groups or one-on-one, for an intellectually challenging experience that is enhanced by professional and real world application of knowledge.

The Office of Undergraduate Research, the Center for Community Engaged Learning, the Sustainability Practices and Research Center, and Honors Program continue to facilitate the engaged learning of WSU students by collaborating with disciplines across colleges. These programs offer engaged learning opportunities in undergraduate research, community engaged learning, and classes that provide a stimulating, creative and supportive learning environment.

Interdisciplinary programs provide students the opportunity to expand their learning across different subject areas, and contribute to a well-rounded educational experience. Students who want to individualize or create a unique academic program resulting in an interdisciplinary degree can do so through the Bachelor of Integrated Studies program.

Office of Community Development (OCD)

Executive Director: Bill Cook
Telephone Contact: Bill Cook (801) 721-9382
Location: Community Education Center, 115
Internet Address: weber.edu/OgdenCAN

The Office of Community Development at Weber State University acts as a catalyst for fostering collaboration and partnerships between anchor institutions and partner organizations that address social determinants of health in education, health, housing and financial stability. The mission includes engaging residents, community leaders, political leaders, students, faculty and staff to develop and implement evidence-based interventions and systemic adaptive changes. Through the evidence-based interventions opportunities are offered to faculty and students to advance their teaching, learning and research agendas in the community (weber.edu/OgdenCAN).

The Office is responsible for developing, facilitating and maintaining critical partnerships for the university with local, regional and national partners and their networks including: The Democracy Collaborative, Coalition of Urban and Metropolitan Universities, Anchor Learning Network, Promise Partnership Regional Council and the United Partnership Council. The Office also leads the university's anchor-mission committees and coordinates with multiple areas of campus including the development of core metrics and business practice improvements related to community wealth building in the areas of hiring, purchasing and investing.

The Ogden Civic Action Network (OgdenCAN) is a program within the Office of Community Development. OgdenCAN is a consortium of anchor institutions, partners, allies and residents that is determined to create comprehensive neighborhood revitalization in the East Central Neighborhood of Ogden, Utah. This initiative is designed to remove barriers, create opportunities, align available resources and provide funding for evidence-based interventions. A Board of Directors is responsible for setting priorities and allocating funds. Weber State University serves as the fiscal agent for OgdenCAN.

Asian Studies Minor Program

Asian Studies Minor

Coordinator: Dr. Greg Lewis

Location: Lindquist Hall, Room 252

Telephone: 801-626-6707

Asian Studies at Weber State offers a Minor in Asian Studies, supports the Foreign Language Department's Japanese Minor, oversees courses in the Middle East Track, and cooperates with the BIS Program to offer a Bachelor's degree "BIS Asian Studies Concentration." Asian Studies courses are offered through a number of cooperating departments including History, Political Science and Philosophy, Geography, Foreign Language, English, Honors, Sociology and Anthropology, Visual Arts, Health and Physical Education, and others.

Grade Requirements: A grade of "C" or above in each course used toward the Asian Studies Minor (a grade of C- is not acceptable).

Credit Hour Requirements: Fifteen credit hours of courses must be taken from at least four of the areas listed under Course Requirements for Minor.

Program Code: 7023

CIPC: 050103

Courses taken which are part of the student's major will not count as fulfillment of the minor requirement.

Course Requirements for Minor

Required Courses (15 credit hours)

Select 15 credit hours from at least four of the following areas

ARTH 2040 - Art and Architecture of Asia
Credits: (4)

ARTH 3060 - The Art and Architecture of India
Credits: (4)

ARTH 3070 - The Art and Architecture of China
Credits: (4)

ARTH 3080 - The Art and Architecture of Japan
Credits: (4)

ARTH 3100 - The Art and Architecture of the Islamic World
Credits: (4)

ENGL 3730 - Literatures of Cultures and Places
Credits: (3) *

ENGL 2710 HU/DV - Perspectives on Women's Literature
Credits: (3) *

GEOG 3640 - Geography of Asia
Credits: (3)

GEOG 3780 - Geographic Area Studies
Credits: (1-3) *

GEOG 4800 - Individual Research
Credits: (1-3) *

HIST 4530 - Far Eastern History
Credits: (3)

HIST 4550 - Southeast Asian History
Credits: (3)

HIST 4590 - Middle Eastern History
Credits: (3)

HIST 4730 - Special Issues and Topics in Global and Comparative History
Credits: (3) *

POLS 4830 - Directed Readings
Credits: (3) *

POLS 4920 - Short Courses, Workshops, Institutes and Special Programs
Credits: (1-3) *

PHIL 3550 - Philosophy of Eastern Religion
Credits: (3)

PE 1410 - TaiChi, Level I
Credits: (1)

PE 1411 - TaiChi, Level II
Credits: (1)

PE 1412 - TaiChi, Level III
Credits: (1)

PE 1435 - Kempo, Level I
Credits: (1)

PE 1436 - Kempo, Level II
Credits: (1)

PE 1437 - Kempo, Level III
Credits: (1)

PE 1445 - Tae Kwon-do, Level I
Credits: (1)

PE 1446 - Tae Kwon-do, Level II
Credits: (1)

PE 1447 - Tae Kwon-do, Level III
Credits: (1)

SOC 4990 - Seminar in Sociology
Credits: (3) *

HNRS 2130 HU/SS/DV - Intellectual Traditions: Great Ideas of the East
Credits: (3)

WGS 2900 - Topics in Women's Studies
Credits: (1-3)

WGS 4900 - Topics in Women's Studies
Credits: (1-3) *

(2 credit hours required)

CHNS 1000 - Proficiency Development
Credits: (1-2) or

JPNS 1000 - Proficiency Development
Credits: (1-2)

CHNS 1010 - First Semester Chinese
Credits: (3)
or

JPNS 1010 - First Semester Japanese
Credits: (3)

CHNS 1020 - Second Semester Chinese **Credits:**
(3) or
JPNS 1020 - Second Semester Japanese
Credits: (3)

CHNS 2010 - Third Semester Chinese **Credits:**
(3) or
JPNS 2010 - Third Semester Japanese **Credits:**
(3)

CHNS 2020 HU - Fourth Semester Chinese
Credits: (3) or
JPNS 2020 HU - Fourth Semester Japanese
Credits: (3)

CHNS 3060 - Grammar & Composition **Credits:**
(3) or
JPNS 3060 - Grammar & Composition **Credits:**
(3)

JPNS 3160 - Introduction to Literature **Credits:**
(3)

3) or
JPNS 3320 - Applied Language Studies **Credits:**
(1-3)

CHNS 3550 - Cultural Heritage I **Credits: (3)** or
JPNS 3550 - Cultural Heritage I **Credits: (3)**

JPNS 3630 - Literature Poetry **Credits: (3)**
JPNS 3650 - Literature Periods **Credits: (3)**
JPNS 3670 - Literature Authors **Credits: (3)**

CHNS 3710 - Business Language I **Credits: (3)** or
JPNS 3710 - Business Language I **Credits: (3)**

JPNS 3715 - Business Language II **Credits: (3)**

CHNS 3850 - Study Abroad **Credits: (1-6)** or
JPNS 3850 - Study Abroad **Credits: (1-6)**

JPNS 4850 - Study Abroad **Credits: (3)**

FL 4400 - Methods for Teaching Languages
Credits: (5)

Note:

**Acceptable when the emphasis and/or content are basically Asian Studies/Language or Middle East Studies/Language.*

Should other courses relating specifically to Asia or the Middle East, either of an experimental or of a permanent nature, be added to the curriculum, these courses will be accepted as part of the Asian Studies Minor. To be a part of the Asian Studies curriculum, a course must have two-thirds Asian content.

Bachelor of Integrated Studies (BIS) Program

Integrated Studies (BIS)

Coordinator: Dr. Michael Cena

Location: Stewart Library, Room 147

Telephone Contact: Beth Thompson 801-626-7713

Website: weber.edu/bis

The Bachelor of Integrated Studies (BIS) Program is an interdisciplinary degree program that serves the needs of students who want to create a specific academic program, obtain a broad liberal education, prepare for particular career goals, or go to graduate school. The program best suits students who have developed a sense of their educational and life goals, and who are looking for ways to express those values through an individualized university program.

To accomplish these general outcomes, BIS students complete course work in three different disciplines. As a culminating experience, students then synthesize the three areas in a capstone project. The BIS degree option is available to students in good standing at Weber State University with a GPA of 2.5 or above. Students must formally apply for admittance into the BIS program, and must take 15 credit hours in the program after they are accepted.

Program Requirements

BIS applicants must earn and maintain a 2.5 GPA to graduate with a Bachelors of Integrated Studies degree.

The institution requires that every bachelor's degree candidate earn a total of 120 credit hours, 40 of which must be upper division hours.

A BIS student can expect to take a minimum of 18 credit hours in each of three areas of emphasis, plus 5 hours for the capstone preparation and project, for a minimum of 59 credits in the BIS program.

All contract and BIS courses must receive a minimum grade of "C" in order to count towards the BIS degree.

Only graded classes can be included in the course contract (special exams, CLEP, or credit/no credit may not be included in the BIS contract).

Courses which are used to satisfy General Education may not be used again in the BIS contract.

Program Code: 1000BIS with three concentration codes

CIPC: 240101

Advisement

All prospective students must meet with the BIS Coordinator to plan a course of study, and be admitted into the program. Call 801-626-7713 to schedule an appointment. For more information, see the BIS Web page (weber.edu/bis).

General Education

Refer to Degree Requirements for bachelor's degree requirements. Honors students may elect to fulfill this requirement through the Honors general education option.

Course Requirements for BIS Degree

Contract of three areas of emphasis: (54 credit hours minimum)

Every BIS student will take a minimum of 18 credit hours in three different academic departments or institutionally recognized disciplines (two of which must offer upper division credit) as approved by the department and the BIS Coordinator. Any change in the course contract must be approved by the chair of the appropriate department and the BIS coordinator.

BIS Capstone and Graduation Preparation Class (3 credit hours)

This class will prepare students to successfully complete the BIS capstone thesis project, and to prepare themselves professionally for careers and graduate school. (Required prerequisite for capstone)

BIS 3800 - BIS Capstone and Graduation Preparation Credits: (3)

BIS Capstone Project: (3 credit hours)

The BIS capstone project gives students the opportunity to integrate their three areas of emphasis into a single thesis. (Required for graduation)

BIS 4800 - Bachelor of Integrated Studies Senior Capstone **Credits: (3)**

Internship Option

Elective - BIS Internship (1-3 credit hours)

The opportunity to earn 1 to 3 credits for an internship is available to students in the BIS program. Please contact the BIS coordinator for more information.

BIS 3850 - BIS Internship **Credits: (1-3)**

BIS Departmental Honors

Please see weber.edu/honors/contracts.html for a list of current Departmental Honors contracts and Departmental Honors Advisors. For additional information about the Honors Program, please refer to the Honors Program section of the WSU Catalog.

Center for Community Engaged Learning (CCEL)

Executive Director: Dr. Becky Jo Gesteland
Telephone Contact: Ella Mitchell (801) 626-7737
Location: Center for Community Engaged Learning, Shepherd Union, 324
Website: weber.edu/CCEL

The Center for Community Engaged Learning at Weber State University facilitates both curricular and co-curricular community engaged learning experiences. The main mission of the center is to engage students, faculty and staff members in direct service, civic engagement, and community research to promote civic participation, build community capacity, and enhance the educational process. Community engagement describes the collaboration between Weber State University and our larger communities (local, regional/state, national, global) for the mutually beneficial exchange of knowledge and resources in a context of partnership and reciprocity (Carnegie Foundation). Courses designated with the Community Engaged Learning (CEL) attribute are designed to provide students with a structured approach to learning and teaching that connects meaningful community experience with intellectual development, personal growth, and active citizenship. CEL enriches coursework by encouraging students to apply the knowledge and analytic tools gained in the classroom to the pressing issues affecting local communities. Therefore CEL is defined as an activity that involves a collaborative, reciprocal relationship with the community that prepares our students, faculty, staff, and alumni to be engaged citizens by strengthening their democratic values and civic responsibility as they address community issues.

Community engaged learning can be facilitated through one of our three pathways: direct service, civic engagement and community research.

Direct Service experiences often involve working directly with community residents to meet an immediate need. Examples of direct service include, but are not limited to: volunteering to serve meals at a homeless shelter, using academic knowledge to develop an electronic food-monitoring database for a food pantry, serving as a mentor or tutor in a local school or youth development program, cleaning up the banks of the Ogden River, or coaching a city youth sport.

Civic engagement experiences often involve raising awareness about issues of public concern and working more systematically through both political and non-political processes to create change. Examples of civic engagement include, but are not limited to: attending organized discussions about pollution; community organizing; writing a letter to an elected official; engaging others in the process of deliberative democracy; or producing information about community issues.

Community research experiences often involve gathering information *with* and *for* community organizations to solve a pressing community problem or create change. Examples of community research include, but are not limited to: community needs assessment survey; water quality or scientific assessment; or program evaluation for non-profit organizations.

Regardless of the type of community engaged learning experience, students are expected to acquire four CEL outcomes through their experiences: civic knowledge, civic skills, civic values, and civic action. Student learning outcomes, definitions, and measurement rubrics can be found at www.weber.edu/CCEL.

Courses

Community engaged learning is not specific to any one discipline; in fact, CEL courses exist in many disciplines across campus. For example, an Athletic Training class incorporates a service component wherein students are utilizing their knowledge and skills gleaned from class to serve patrons at a local free medical clinic.

Community Engaged Learning courses are designated with the CEL attribute and are listed in the course schedule published online each semester.

Ethnic Studies Program

Ethnic Studies Emphasis (BIS)

Coordinator: Dr. Eric Ewert

Location: Linquist Hall, Room 316

Telephone: 801-626-6197

The Ethnic Studies Emphasis at WSU examines the construction and context of ethnicity in the United States with a primary focus on Americans of African, Asian, Latino, and Native American descent. Other ethnic foci may be developed by the student to meet his or her particular interests. As an element of American identity that cuts across disciplinary categories, ethnicity requires a mode of study that draws on the humanities, the social sciences, and other related fields. Ethnicity also must be addressed historically and comparatively, paying attention to the five centuries of North American minority experience and the perspectives of other New World societies and cultures. Above all, the program seeks to convey knowledge and understanding of ethnicity in the United States and to help students learn about the opportunities and responsibilities they have as citizens in an increasingly multicultural nation.

Grade Requirements: A grade of "C-" or better is required for all courses in Ethnic Studies.

Credit Hour Requirements: A minimum of 18 credit hours.

Program Code: Composite(7024), Hispanic (7028), Native American (7029), African (7027)

CIPC: Composite(050299), Hispanic (050203), Native American (050202), African (050201)

Ethnic Studies Program

Course Requirements for Emphasis

Basic Core (6 credit hours required of all students)

ANTH 1000 SS/DV - Introduction to Anthropology
Credits: (3)

SOC 3850 - Race & Ethnicity **Credits: (3)**

Select one of the following options or design a comparable one:

Option I: Hispanic Studies (12 credit hours)

HIST 3050 - History of U.S. Latinos **Credits: (3)**

HIST 4110 - History of the American West to 1900 **Credits: (3)**

HIST 4670 - History of Mexico **Credits: (3)**

HIST 4630 - History of Ancient and Colonial Latin America **Credits: (3)** or

HIST 4650 - Modern Latin America **Credits: (3)**

Option II: Native American Studies (12 credit hours)

ANTH 3600 - Culture Area Studies **Credits: (1-3)**
(3 credit hours required)

ARTH 3030 - Native American Art of the Southwest: From the Anasazi to the Present **Credits: (4)**

HIST 3010 - Native American History: 1300 to Present **Credits: (3)**

HIST 4110 - History of the American West to 1900 **Credits: (3)**

Option III: African-American Studies (12 credit hours)

HIST 3030 - African-American History **Credits: (3)**

HIST 4040 - Era of the Civil War and Reconstruction: 1840-1877 **Credits: (3)**

HIST 4610 - History of Africa **Credits: (3)**

GEOG 3740 - Geography of Africa **Credits: (3)**

Option IV: Composite (12 credit hours)

Select a minimum of 12 credit hours from the following:

HIST 3010 - Native American History: 1300 to Present **Credits: (3)**

HIST 3030 - African-American History **Credits: (3)**

HIST 3050 - History of U.S. Latinos **Credits: (3)**

GEOG 3540 - Geography of Latin America **Credits: (3)**

GEOG 3640 - Geography of Asia **Credits: (3)**

Note: *Should other courses relating specifically to ethnic minorities, either of an experimental or of a permanent*

nature be added to the curriculum, these courses will be accepted as part of the Ethnic Studies emphasis; should such courses be part of an academic area not listed, the new academic area will be added to those presently constituting the Ethnic Studies emphasis.

European Studies Minor Program

European Studies Minor

Coordinator: Thomas Mathews

Location: Elizabeth Hall, Room 420

Telephone: 801-626-6345

The European Studies Minor is an interdisciplinary program offered through several WSU departments. Students wishing to minor in European Studies must have their course selection approved by the program coordinator.

Grade Requirements: A grade of "C" or better in each course used toward the minor (a grade of "C-" is not acceptable).

Credit Hour Requirements: A minimum of 18 credit hours in addition to two years of college study (or the equivalent) of a European language. Courses taken which are part of the student's major will not count as fulfillment of the minor requirement. Of the total 18 credit hours, only six may be taken in the same department.

Program Code: 3036

CIPC: 050106

Advisement

All students electing the minor are required to meet with the coordinator for approval of all courses to be counted toward fulfillment of the requirements. The coordinator will ascertain that the individual courses selected are eligible to be counted, and that together they form a coherent curriculum of sufficient breadth.

Course Requirements for Minor

The following are required in addition to two years of college study in a European language other than the student's native language, or equivalent proficiency to be demonstrated by the student.

Core requirements (6 credit hours)

Two courses (six credit hours) from the following; courses may not be from the same department:

FL 3320 - Applied Language Studies **Credits: (1-3)**

Approved titles offered under FL 3320 are:
European Language & Society and European Culture & Community

HIST 4220 - History of the Middle Ages 300-1300 **Credits: (3)**

HIST 4230 - Renaissance and Reformation - Europe: 1300-1660 **Credits: (3)**

HIST 4240 - Absolutism, Enlightenment and Revolution - Europe: 1660-1815 **Credits: (3)**

HIST 4250 - Nineteenth-Century Europe **Credits: (3)**

HIST 4260 - Europe in the Age of Total War **Credits: (3)**

HIST 4280 - History of Christianity in Europe **Credits: (3)**

GEOG 3590 - Geography of Europe **Credits: (3)**

POLS 3210 - Politics in the European Union **Credits: (3)**

Elective requirements (12 credit hours)

Select twelve additional credit hours from the following programs and departments as approved by the program coordinator: Anthropology, Communication, English, Foreign Language, Performing Arts, Business & Economics, Geography, History, Political Science, Philosophy, Sociology, Honors. Courses selected and approved from these departments must have explicit European emphasis and content.

**Environmental Studies
Minor Program (see
Geography)**

University Honors Core Requirements

University Honors Core Requirements

Students will complete three of the eight classes listed below:

- HNRS 1110 HU - Introduction to Honors: The Construction of Knowledge **Credits: (3)**
- HNRS 2010 HU - Exploring Key Concepts in the Disciplines: Humanities **Credits: (3)**
- HNRS 2020 CA - Exploring Key Concepts in the Disciplines: Creative Arts **Credits: (3-6)**
- HNRS 2030 PS - Exploring Key Concepts in the Disciplines: Physical Sciences **Credits: (3)**
- HNRS 2040 LS - Exploring Key Concepts in the Disciplines: Life Sciences **Credits: (3)**
- HNRS 2050 SS - Exploring Key Concepts in the Disciplines: Social Science **Credits: (3)**
- HNRS 2110 HU/SS - Intellectual Traditions: Great Ideas of the West in the Classical and Medieval Eras **Credits: (3)**
- HNRS 2120 HU/SS - Intellectual Traditions: Great Ideas of the West in the Modern Era **Credits: (3)**
- HNRS 2130 HU/SS/DV - Intellectual Traditions: Great Ideas of the East **Credits: (3)**

In addition, the following courses are required:

- HNRS 3900 - Honors Colloquium **Credits: (3)** – 2 classes are required
- HNRS 4990 - Honors Senior Project **Credits: (3)** - This option may also be completed through the student's major department.

Students will complete the remaining six credits required to earn University Honors with any other Honors courses.

**Interdisciplinary Center
for Applied Research**

Latin American Studies Minor Program

Latin American Studies Minor

Coordinator: Dr. Isabel Asensio

Location: Elizabeth Hall, 230

Telephone: 801-626-6777

The Latin American Studies Minor is an interdisciplinary program offered through a number of cooperating departments and programs including Foreign Languages, History, Geography, Political Science and Philosophy, Psychology, Sociology, Anthropology, Child and Family Studies, English, and Women Studies.

Grade Requirements: A grade of "C" or better in each course used toward the minor (a grade of "C-" is not acceptable).

Credit Hour Requirements: A minimum of 18 credit hours in addition to two years of college Portuguese or Spanish or their equivalent.

Program Code: 3000

CIPC: 050107

Courses taken which are part of the student's major will not count as fulfillment of the minor requirement.

Course Requirements for Minor in Latin American Studies

The following are required in addition to two years of college study in Portuguese or Spanish or equivalent proficiency to be demonstrated by the student. Select 18 credit hours chosen from at least three of the following departments.

Child & Family Studies

CHF 4300 - Latino Child and Family
Development **Credits: (3)**

Foreign Languages

SPAN 3060 - Grammar & Composition **Credits:**
(3) or
PTGS 3060 - Grammar & Composition **Credits:**
(3)

SPAN 3160 - Introduction to Literature **Credits:**
(3) or

SPAN 3650 - Literature Periods **Credits: (3)**
SPAN 3670 - Literature Authors **Credits: (3)**
SPAN 3690 - Literature Special Topics in
Literature **Credits: (1-3)**

SPAN 4620 - Survey of Literature I **Credits: (3)**
SPAN 4630 - Survey of Literature II **Credits: (3)**
SPAN 4830 - Directed Readings **Credits: (1-3)**
PTGS 3570 - Special Topics in Culture **Credits:**
(3)
PTGS 3850 - Study Abroad **Credits: (1-6)**

English

ENGL 3730 - Literatures of Cultures and Places
Credits: (3) **

History

HIST 3050 - History of U.S. Latinos **Credits: (3)**
HIST 4410 - History of Spain and Portugal
Credits: (3)
HIST 4630 - History of Ancient and Colonial Latin
America **Credits: (3)**
HIST 4650 - Modern Latin America **Credits: (3)**
HIST 4670 - History of Mexico **Credits: (3)**
HIST 4830 - Directed Readings **Credits: (1-3) ****

Geography

GEOG 3540 - Geography of Latin America
Credits: (3)
GEOG 4800 - Individual Research **Credits: (1-3)**

GEOG 4950 - Advanced Regional Field Studies
Credits: (1-3) **

Political Science

POLS 3290 - Democratization and Political
Transitions **Credits: (3) ****
POLS 4830 - Directed Readings **Credits: (3) ****
POLS 4990 - Senior Seminar/Senior Thesis
Credits: (3) **

Anthropology

ANTH 3600 - Culture Area Studies **Credits: (1-3)**

ANTH 4830 INT - Readings and/or Projects
Credits: (1-3) **

Note:

*** Acceptable when the emphasis and content are basically Latin American.*

Should other courses relating specifically to Latin America, either of an experimental or of a permanent nature, be added to the curriculum, these courses will be accepted as part of the Latin American Studies Minor Program. Should such courses be part of an academic area not listed above, the new academic area will be added to those presently constituting the Latin American Studies Minor.

Learning English for Academic Purposes (LEAP)

Chair: Dr. Debi Sheridan

Location: Elizabeth Hall, Room 207

Telephone Contact: Kaori Gale (801) 626-7457

Instructors: Giana Curtis, Amy Reimann Hudson, Debi Sheridan

The Weber State University LEAP (Learning English for Academic Purposes) Department provides intensive English language courses for students in the process of acquiring English as a second language for academic use. It is the mission of the Department to prepare these students to function effectively in mainstream academic classes where English is the language of instruction. In doing so, we also seek to familiarize students with American culture and the academic atmosphere of studying in an American university.

The program curriculum includes courses that utilize an integrated skills, content-based approach. The goal of the department is to prepare non-native English speaking students to read, write and communicate effectively in academic courses taught in English.

The program consists of six levels of instruction (Novice Low through Advanced according to ACTFL guidelines available at <https://www.actfl.org/publications/guidelines-and-manuals/actfl-performance-descriptors-language-learners>), two levels per semester and the LEAP Bridge Classes. Each level (with the exception of LEAP Bridge Classes) is 7 weeks in length. The Bridge LEAP Classes are 15 weeks in length. Courses are competency based. Students must pass a proficiency final exam at the end of the semester and receive a grade of C+ (77%) or better in order to progress to the next level.

Total Credit Hours per Level

Levels	1	2	3	4	5	6	LEAP Bridge Classes
Credits	9	9	9	9	9	9	6

Levels 1-3 are non-credit and do not count toward graduation. Courses in Levels 4-6 and the LEAP Bridge classes earn academic credit which can be applied to fulfill

the foreign language requirement for a Bachelor of Arts degree and Associate of Arts degree or applied as elective credit toward the Bachelor of Science and Associate of Science degrees. This may be done by completing the LEAP Placement Examination and placing into ENGL 1010 or by completing LEAP 2510 and LEAP 2520 with a grade of C+ or better.

Students who pass the LEAP Placement Examination and place in ENGL 1010 or who complete LEAP 2510 and LEAP 2520 with a grade of C+ or better will be able to claim 16 hours of credit for ESL 2310, ESL 2410, ESL 2420, ESL 2430, and ESL 2441 for a nominal fee. (Inquire in the LEAP Office EH 207.)

CR/NC Sections:

CR/NC sections of each course are available. CR/NC sections do not factor into a student's GPA. Students participate in the same classes with the same teachers and are held to the same proficiency standards as graded courses. Contact the LEAP office for more information.

International Students:

International students who meet the University's TOEFL or IELTS minimum requirements for placement in academic courses are cleared to register for ENGL 1010.

International students who **do not** meet the University's TOEFL or IELTS minimum requirements for placement in academic courses must take the LEAP Placement Test. Students are required to complete the appropriate ESL courses according to the test results before being cleared to take academic courses on campus.

Students sponsored by the Saudi Arabian Cultural Mission (SACM) are required by SACM to complete 20 credit hours per semester.

Comments:

The Placement Test should be taken as soon as the students arrive at the university to determine placement level for necessary ESL courses. All International students are also required to take the Math Accuplacer Test (see the Department of Mathematics section of this catalog). Students must complete Advanced (Level 6) before they can register for other university classes.

Resident Students:

Resident students for whom English is a second, new or additional language and who have ACT scores of 16 or below or Accuplacer scores of 89 or below are required to take the LEAP Placement Test and complete appropriate ESL courses according to the test results before registering for ENGL 1010.

Learning English for Academic Purposes (LEAP) Course Descriptions

Legal Studies Minor Program

Legal Studies Minor

Contact: Dr. Richard Price
Office: Lindquist Hall 146
Website: richardprice@weber.edu
Phone: 801-626-6694

The Legal Studies Minor Program introduces students to the study of law in society from a broad, interdisciplinary perspective.

Grade Requirements: A grade of "C" or better in all courses used toward the minor (a grade of "C-" will not be accepted).

Credit Hour Requirements: A minimum of 18 credit hours.

Program Code: 7025
CIPC: 229999

Course Requirement for Minor

Core Course Required (3 credit hours)

POLS 2400 SS - Introduction to Law and Courts
Credits: (3)

Additional Courses Required (15 credit hours)

Students must take 15 additional hours with at least two courses from each area. No more than 6 hours (excluding the core requirement) may be lower division. No more than 6 hours (excluding the core requirement) may be taken in any one discipline.

Area I: Contextualizing the Law

COMM 1020 HU - Principles of Public Speaking
Credits: (3) or
COMM 2270 - Argumentation and Debate
Credits: (3)

CJ 3270 - Theories of Crime and Delinquency
Credits: (3) or

SOC 3270 - Criminology **Credits: (3)**

CJ 4000 - Critical Legal Studies **Credits: (3)**

CJ 4065 - Law and Society **Credits: (3)** or
POLS 4060 - Law and Society **Credits: (3)** or
SOC 4270 - Sociology of Law **Credits: (3)**

ECON 1010 SS - Economics as a Social Science
Credits: (3)

ENGL 3210 - Advanced College Writing **Credits: (3)** or
ENGL 3100 - Professional and Technical Writing
Credits: (3)

HIST 3210 - U.S. Constitutional History **Credits: (3)**

PHIL 1250 HU - Critical Thinking **Credits: (3)** or
PHIL 2200 - Deductive Logic **Credits: (3)**

PHIL 3200 - Philosophy of Democracy **Credits: (3)**

PHIL 4600 - Ethical Theory **Credits: (3)**
POLS 1100 AI - American National Government
Credits: (3)

POLS 3330 - American Political Thought **Credits: (3)**

POLS 4360 - Classical Political Thought **Credits: (3)**

POLS 4380 - Modern Political Thought **Credits: (3)**

POLS 4600 - American Congress **Credits: (3)**
POLS 4620 - The U.S. Supreme Court **Credits: (3)**

POLS 4640 - American Presidency **Credits: (3)**
POLS 4750 - Public Policy Analysis **Credits: (3)**

PSY 3850 - Forensic Psychology **Credits: (3)**
WGS 3050 - Introduction to Feminist Theories
1700 -- Present **Credits: (3)**

HIST 3220 - History of the Bill of Rights **Credits: (3)**

Area 2: Law Courses

BSAD 3200 - Legal Environment of Business
Credits: (3)

CHF 3150 - Consumer Rights and
Responsibilities **Credits: (3)**

COMM 3650 - Communication Law **Credits: (3)**
CJ 1330 - Criminal Law and Courts **Credits: (3)**
CJ 2350 - Laws of Evidence **Credits: (3)**

CJ 4165 - Constitutional Rights **Credits: (3)**
CJ 4700 - International Criminal Justice **Credits:**
(3)
PHIL 3250 - Philosophy of Law **Credits: (3)**
POLS 3400 - LGBTQ Politics **Credits: (3)**

Library Teaching & Information Services Department

Dean of the Library: Wendy Holliday

Location: Stewart Library, Room 108A

Telephone: Cathy Christensen 801-626-6405

Head of Teaching and Information Services: Nicole
Beatty

Telephone: 801-626-7034

Professors: Shaun Adamson, Wade Kotter; **Associate**

Professors: Nicole Beatty, Jason Francis, Edward Hahn;

Assistant Professors: Ernesto Hernandez, Miranda
Kispert, Sarah Langsdon, Diana Meiser, Jamie Weeks

To be successful in a global information society, students must understand how to identify, locate, and critically evaluate information. The Library Teaching & Information Service Department provides instruction and assistance that enable students to effectively access and utilize digital and print information resources to meet their academic, professional and life-long learning needs.

Linguistics Minor Program

Linguistics Minor

Coordinator: John C. Trimble

Location: Elizabeth Hall, Room 422

Telephone: 801-626-6780

The Linguistics Minor is an interdisciplinary program that introduces students the scientific study of language as a complement to a broad range of majors.

Grade Requirements: A grade of "C" or better is required for all courses used toward the minor (a grade of "C-" is not acceptable.)

Credit Hour Requirements: A total of 18.5 credit hours is required for this minor.

Program Code: 3057

CIPC: 239999

Course Requirements for Minor

1. Foundation Course (3 credit hours)

ENGL 3010 - Introduction to Linguistics **Credits: (3)**

2. Language Structures Course (3-4 credit hours)

Select one of the following

CS 4110 - Concepts of Formal Languages and Algorithms for Computing **Credits: (4)**

ENGL 3030 - Structure of English **Credits: (3)**

ENGL 3050 - Grammar, Style, and Usage for Advanced Writing **Credits: (3)**

PHIL 2200 - Deductive Logic **Credits: (3)**

FRCH 3220 - Phonetics and Phonology **Credits: (3)** or

GRMN 3220 - Phonetics and Phonology **Credits: (3)** or

JPNS 3220 - Phonetics and Phonology **Credits: (3)** or

PTGS 3220 - Phonetics and Phonology **Credits: (3)** or

SPAN 3220 - Phonetics and Phonology **Credits: (3)**

FRCH 3360 - Advanced Grammar **Credits: (3)** or
GRMN 3360 - Advanced Grammar **Credits: (3)** or

JPNS 3360 - Advanced Grammar **Credits: (3)** or
PTGS 3360 - Advanced Grammar **Credits: (3)** or

SPAN 3360 - Advanced Grammar **Credits: (3)**

3. Sub-Disciplines and Applications of Linguistics Courses (11-12 credit hours)

Select two of the following

ANTH 1040 HU/DV - Language and Culture **Credits: (3)**

CS 4500 - Introduction to Artificial Intelligence **Credits: (4)**

COMM 3000 - Communication Theory **Credits: (3)**

COMM 3080 - Intercultural Communication **Credits: (3)**

COMM 3090 - Gender and Communication **Credits: (3)**

EDUC 4250 - Second Language Acquisition: Theories and Implementation **Credits: (3)**

EDUC 4270 - Literacy Strategies for Teaching English Language Learners **Credits: (3)**

ENGL 3040 - History of the English Language **Credits: (3)**

ENGL 4410 - Strategies and Methodology of Teaching ESL/Bilingual **Credits: (3)**

ENGL 4420 - English Phonology and Syntax for ESL/Bilingual Teachers **Credits: (3)**

ENGL 4450 - ESL/Bilingual Assessment: Theory, Methods, and Practices **Credits: (3)**

FL 3320 - Applied Language Studies **Credits: (1-3) ***

PSY 3450 - Psychology of Language **Credits: (3)**

LING 4830 - Directed Readings in Linguistics **Credits: (1-3)**

LING 4900 - Variable Topics in Linguistics **Credits: (1-3)**

Note:

** "Applied Language Studies" shall be understood to include any version of FL 3320 whose linguistic content is at least 50%. The coordinator of the minor will make that*

determination in consultation with the chair of Foreign Languages and the Linguistics Minor Committee.

4. Senior Reflection (.5 credit hours)

LING 4990 - Centering Experience **Credits: (.5)**

Note:

Students may take no more than eight hours with the same prefix (beyond the Foundations course).

Neuroscience Minor Program

Neuroscience Minor

Coordinator: Dr. Aminda O'Hare, 801-626-6729

Location: Lindquist Hall 391

Telephone Contact: Roe Schoof, 801-626-6293

Neuroscience is the interdisciplinary scientific study of the central and peripheral nervous systems in an effort to understand the biological basis of behavior, thinking, emotion, memory, and perception.

Credit Hour Requirements: A minimum of 18 credit hours as described below. *For advisement contact the Neuroscience Program Coordinator who will help you select courses which will compliment your major.*

Grade Requirements: A grade of "C" or better in courses used toward the Minor (a grade of "C-" is not acceptable).

Program Code: 7044

CIPC: 261599

Neuroscience Students Sarah Honeycutt and Andrew Maloy study models of human brains in preparation for Brain Awareness Week.

Course Requirements for Minor

For advisement contact the Neuroscience Program Coordinator who will help you select courses which will compliment your major.

To complete the Neuroscience Minor, the student must complete a minimum of 18 credit hours as follows: a) Introduction to Neuroscience (NEUR 2050), b) one course each from the three content areas (Cognitive/Behavioral, Cellular/Molecular, and Clinical/Medical), and c) 6 credits of electives. Students that have not already completed ZOOL 1110 LS - Principles of Zoology as part of their major will also need to complete this course before taking the Cellular and Molecular area requirement. Thus, completion of the Neuroscience Minor may require 23 credit hours for some students. With approval of the Neuroscience Program Director and the applicable Department Chair, students may apply credits from one of the required courses of either Area 3 or Area 5 towards both their minor and major to offset the number of prerequisites necessary for courses in these areas. Only one

course total may be applied to the minor and major, and only after the appropriate approvals have been received.

1. Foundation Course

NEUR 2050 - Introduction to Neuroscience

Credits: (3)

2. Cognitive and Behavioral Area: 1 of the below

NEUR 3750 - Cognitive and Behavioral

Neuroscience **Credits: (3)** (Prereq: PSY 2710 or NEUR 2050)

PSY 2710 - Biopsychology **Credits: (3)** (Prereq: PSY 1010 or NEUR 2050)

PSY 3730 - Perception **Credits: (3)** (Prereq: PSY 1010 or NEUR 2050)

3. Cellular and Molecular Area: 1 of the below

NEUR 3950 - Cellular and Molecular

Neuroscience **Credits: (3)** (Prereq: NEUR 2050)

ZOOL 3200 - Cell Biology **Credits: (4)** (Prereq: ZOOL 1110 and either CHEM 1110 and 1120 series or CHEM 1210 and 1220 series, or approval of instructor)

ZOOL 3300 - Genetics **Credits: (4)** (Prereq: ZOOL 1110 and MATH 1050 or equivalent, or approval of instructor)

ZOOL 4100 - Vertebrate Embryology **Credits: (4)** (Prereq: ZOOL 1110 and ZOOL 2220, or approval of instructor)

CHEM 3070 - Biochemistry I **Credits: (3)** Prereq: CHEM 2310 and CHEM 2315. Must be taken with CHEM 3075, Biochemistry Lab.

CHEM 3075 - Biochemistry I Lab **Credits: (1)** Prereq: CHEM 2310 and CHEM 2315. Must be taken with CHEM 3070, Biochemistry.

4. Clinical and Medical Area: 1 of the below

HTHS 2240 - Introduction to Pharmacology

Credits: (3) Prerequisite: (Recommended) HTHS 1101, HTHS 1110 and HTHS 1111. Students taking HTHS 2240 cannot take HTHS 3240 for credit.

or
HTHS 3240 - Pharmacology Principles and
Clinical Applications **Credits: (3)**
*Prerequisite: (Recommended) HTHS 1101,
HTHS 1110 and HTHS 1111. Students taking
HTHS 2240 cannot take HTHS 3240 for credit.*

NEUR 3850 - Clinical Neuroscience **Credits: (3)**
*Prerequisite: NEUR 2050 or PSY 2730 or
consent of instructor.*

PSY 3740 - Neuropsychopharmacology **Credits:**
(3) *Prerequisite: NEUR 2050 or PSY 2730 or
instructor approval.*

ZOOL 1020 LS - Human Biology **Credits: (3)**

ZOOL 2200 LS - Human Physiology **Credits: (4)**

5. Electives: 6 credits minimum from the electives listed below

ANTH 1020 LS/DV - Biological Anthropology
Credits: (3)

ANTH 1040 HU/DV - Language and Culture
Credits: (3)

BTNY 2303 - Ethnobotany **Credits: (3)**

BTNY 2600 - Laboratory Safety **Credits: (1)**

EET 1110 - Basic Electronics **Credits: (2)**

EET 4040 - Signals and Systems **Credits: (4)**

CHEM 1130 PS - Introduction to General,
Organic & Biochemistry **Credits: (5)**

CHEM 1120 - Elementary Organic Bio-Chemistry
Credits: (5)

CHEM 2310 - Organic Chemistry I **Credits: (4)**

CHEM 2315 - Organic Chemistry I Lab **Credits:**
(1)

CHEM 2320 - Organic Chemistry II **Credits: (4)**

CHEM 2325 - Organic Chemistry II Lab **Credits:**
(1)

CHEM 2600 - Laboratory Safety **Credits: (1)**
(cross-listed with all science departments)

CHEM 3070 - Biochemistry I **Credits: (3)**

CHEM 3080 - Biochemistry II **Credits: (3)**

CHEM 3090 - Biochemical Techniques **Credits:**
(1)

CS 4500 - Introduction to Artificial Intelligence
Credits: (4)

HLTH 3100 - Applications of Technology in
Health Promotion **Credits: (3)**

HLTH 4013 - Health Promotion Research and
Assessment **Credits: (3)**

HLTH 3160 - Principles of Health Behavior
Credits: (3)

HTHS 1101 - Medical Terminology **Credits: (2)**

HTHS 1110 LS - Integrated Human Anatomy and
Physiology I **Credits: (4)** and

HTHS 1111 - Integrated Human Anatomy and
Physiology II **Credits: (4)**

HTHS 2230 - Introductory Pathophysiology
Credits: (3)

HTHS 2240 - Introduction to Pharmacology
Credits: (3) or

HTHS 3240 - Pharmacology Principles and
Clinical Applications **Credits: (3)**

MICR 3254 - Immunology **Credits: (4)**

MICR 3305 - Medical Microbiology **Credits: (5)**

MICR 4154 - Microbial Genetics **Credits: (4)**

MICR 4252 - Cell Culture **Credits: (2)** *(cross-listed
with Botany)*

MICR 4554 - Virology **Credits: (4)**

NEUR 4800 - Projects and Research **Credits: (1-
3)**

NEUR 4830 - Directed Readings **Credits: (1-3)**

NEUR 4900 - Topics in Neuroscience **Credits: (2-
3)**

PHIL 3350 - Medical Ethics **Credits: (3)**

PHYS 3190 - Applied Optics **Credits: (3)**

PHYS 3410 - Electronics for Scientists **Credits:**
(4)

PHYS 3420 - Data Analysis, Statistics, and
Instrumentation **Credits: (3)**

PSY 2710 - Biopsychology **Credits: (3)**

PSY 2830 - Directed Readings **Credits: (1-3)** (3
credit hours required)

PSY 3730 - Perception **Credits: (3)**

PSY 3740 - Neuropsychopharmacology **Credits:**
(3)

PSY 4800 INT - Projects and Research **Credits:**
(1-3) * ‡

PSY 4830 INT - Directed Readings **Credits: (1-3)**
*** ‡**

PSY 4900 - Selected Topics in Psychology
Credits: (2-3) * ‡

PSY 4910 - Senior Thesis **Credits: (3) * ‡**

ZOOL 1020 LS - Human Biology **Credits: (3)**

ZOOL 2100 - Human Anatomy **Credits: (4)**

ZOOL 2200 LS - Human Physiology **Credits: (4)**

ZOOL 3200 - Cell Biology **Credits: (4)**

ZOOL 3300 - Genetics **Credits: (4)**

ZOOL 3600 - Comparative Physiology **Credits:**
(4)

ZOOL 4050 - Comparative Vertebrate Anatomy
Credits: (4)

ZOOL 4100 - Vertebrate Embryology **Credits: (4)**

ZOOL 4120 - Histology **Credits: (4)**

ZOOL 4220 - Endocrinology **Credits: (4)**
 ZOOL 4300 - Research Applications in Genetics
Credits: (4)
 ZOOL 4350 - Animal Behavior **Credits: (4)**
 ZOOL 4800 - Problems in Zoology **Credits: (1-4)**
 ** ‡
 ZOOL 4830 - Readings in Zoology **Credits: (1-4)**
 ** ‡
 ZOOL 4900 - Topics in Zoology **Credits: (1-4) ****
 ‡
 ZOOL 4920 - Short Courses, Workshops,
 Institutes and Special Programs **Credits: (1-4)** ‡
 CHEM 4250 - Medicinal Chemistry **Credits: (3)**
 MLS 1113 - Introduction to Medical Laboratory
 Practices **Credits: (4)**
 MLS 4803 - Research Projects in Medical
 Laboratory Sciences I **Credits: (2)**
 MLS 4804 - Research Projects in Medical
 Laboratory Sciences II **Credits: (2)**
 PSY 3240 - The Psychology of Drug Use and
 Abuse **Credits: (3)**

be included as part of a course (for example, CHEM 2310), or as a separate class (for example, CHEM 3075 or NEURO Lab).

Area 7: Graduation Sign Off

Students must meet with the program director.

*Prerequisites:

SS PSY 1010, PSY 3600 (Statistics), and PSY 3610 (Research Methods) or equivalent, and faculty mentor permission.

**Prerequisites:

LS ZOOL 1110 and ZOOL 2220, and approval of instructor.

‡Note:

‡These courses must have a significant neuroscience focus in order to qualify as an elective towards the neuroscience minor; approval by the Neuroscience Program Direct is required in advance.

Note:

Consult the WSU course catalog for prerequisites to the elective courses listed above.

Area 6: Lab Requirement

Students must complete at least one science lab course (in any subject) to complete the neuroscience minor. This can

Office of Undergraduate Research (OUR)

Director: Dr. John Cavitt

Telephone Contact: Erin Kendall (801) 626-8541

Location: Stewart Library, 147

Internet Address: weber.edu/OUR

Weber State University offers undergraduates the opportunity to work directly with faculty on projects that involve research, scholarly and creative activities. These projects are designed and implemented by students with the support and guidance of WSU faculty. Undergraduate research, and scholarly and creative activities must include:

- inquiry, study or investigation of a question or problem;
- methodology, including safety and ethical practices, appropriate to the discipline;
- relevant, meaningful, and engaging intellectual or creative contribution and/or application to the discipline which is of high-quality and which results in a tangible product (abstract, paper, performance, object) which can be shared or disseminated; and
- on-going supervision and mentoring by individuals with appropriate expertise.

Undergraduate research has long been an important part of the college experience at Weber State University. The Office of Undergraduate Research (OUR) supports students by offering grants for research and travel for dissemination of results. In addition, OUR publishes Ergo, WSU's undergraduate research journal, and sponsors an undergraduate research symposium each spring semester.

Sustainability Practices for Research Center (SPARC)

Director: Dr. Alice Mulder

Telephone Contact: Bonnie Christiansen(801) 626-6326

Location: Stewart Library 147

Website: <https://weber.edu/sustainability/sustainability-practices-research-center.html>

Mission Statement

The mission of the Weber State University Sustainability Practices and Research Center is to inform and educate WSU students, faculty, staff and the local and statewide community in order to ensure the sustainability of our region and our world for future generations. The Center serves as a hub to connect campus activities, programs, departments and community partners in order to advance a commitment to sustainability on campus and in the region. It facilitates curricular and co-curricular learning experiences related to sustainability toward the goals of both understanding and working to address the sustainability challenges of our time.

Sustainability at WSU

Weber State is committed to sustainability education and to sustainability in its own operations and practices on its campuses. We are all global and local citizens, intricately interconnected to both natural and human systems.

"Sustainability" is considered at Weber State in an inclusive, holistic sense, recognizing that that environmental, social, and economic health are interdependent and interconnected in both simple and complex ways. Below is WSU's general curriculum-focused definition of sustainability (approved by the Environmental Initiatives Committee (EIC) in 2010):

At Weber State University the goal of sustainability education is for students to gain knowledge and understanding of the intricate linkages between human and natural systems. This includes a recognition that healthy human societies (physically, socially, culturally, politically, and economically) are fundamentally dependent on healthy ecosystems and the sustainable use of natural resources, such that they are available indefinitely for future generations to meet their needs. Included in this

goal is for students to learn how to achieve sustainability across these areas.

Learning about the concepts, challenges and potential solutions for sustainability can occur in classes and departments across the university. Many disciplines consider and address issues pertinent to sustainability such as anthropology, automotive technology, botany, construction management, earth science, economics, electrical engineering technology, English, geography, graphic arts, history, interior design, nursing, nutrition, philosophy, political science, physics, sociology, zoology, and many others.

Sustainability Course Designation

The SUS designation on courses stands for "sustainability" and indicates that a course involves some sustainability components, which aim to both further students' understanding of and ability to address real world sustainability challenges. As noted above, sustainability is defined in a pluralistic and inclusive way, encompassing human and ecological health, social justice, secure livelihoods, and a better world for all generations. Learning about sustainability in an array of courses across the curriculum will increase students' awareness and comprehension that healthy human societies are fostered and supported through a complex web of interconnections between their physical, social and economic dimensions.

To see a list of courses that either focus on or include some component related to sustainability (e.g., a case study, module, readings) please visit <https://www.weber.edu/sustainability/courses>.

Urban and Regional Planning Emphasis

Urban and Regional Planning Emphasis (BIS)

Coordinator: Dr. Bryan Dorsey

Location: Lindquist Hall 363

Telephone: 801-626-6944

This program provides a special emphasis in Urban and Regional Planning for majors in Botany, Sociology, Geography, Geosciences, Microbiology, Politics, Economics, Zoology, and related fields. The planning emphasis offers students a background in planning by adding a set of core courses to the major of their choice. This allows each student to pursue his discipline and still gain a general understanding of the field of planning.

Grade Requirements: A grade of "C" or better is required for all courses in Urban and Regional Planning (a grade of "C-" is not acceptable).

Credit Hour Requirements: A minimum of 18 credit hours.

Program Code: 7037

CIPC: 451201

Urban and Regional Planning Emphasis

Courses Required (6 credit hours)

GEOG 4410 SUS - Sustainable Land Use Planning **Credits: (3)**

GEOG 4420 - Advanced Urban and Regional Planning **Credits: (3)**

Electives (12 credit hours)

For students completing both a major and a minor, the requirements of the major field will be reduced by fifteen hours. They will be replaced by 12 hours of interdisciplinary courses selected outside the major field from the following.

BTNY 1403 LS SUS - Principles of Environmental Science **Credits: (3-4)** (3 credit hours required)

GEOG 4400 - Cartography and Map Design **Credits: (3)**

GEOG 3210 - Urban Geography **Credits: (3)**

GEOG 3360 - Economic Geography **Credits: (3)**

GEO 3710 - Introduction to Geographic Information Systems **Credits: (4)**

MICR 1153 LS - Public Health: Sex, Travel, Food, & Drugs **Credits: (3)**

POLS 3700 - Bureaucratic Politics **Credits: (3)**

POLS 3750 - Urban Government and Politics **Credits: (3)**

SOC 3840 - Cities and Urban Life **Credits: (3)**

SOC 3850 - Race & Ethnicity **Credits: (3)**

SOC 3300 - Environment and Society **Credits: (3)**

Note:

And a basic statistics course taken in a department of the student's choice.

For students who wish to complete the Planning Emphasis Program in lieu of a minor, GEOG 4410 and GEOG 4420 will be required as well as 12 hours of interdisciplinary courses from the above list outside the major field.

Other courses related to land use planning not listed here are acceptable with approval of advisor. This includes courses transferred in from other colleges or universities and any directed reading or individual research courses in any department where the topic deals primarily with land use planning.

Urban and Regional Planning

Coordinator: Dr. Bryan Dorsey

Location: Social Science Building, Room 314

Telephone: 801-626-6944

Women & Gender Studies Minor Program

Queer Studies Minor/BIS

Program Prerequisites: A student's program of study for the Queer Studies Minor must be approved by the Queer Studies Coordinator.

Grade Requirements: A grade of "C" or better is required for all courses used toward the minor (a grade of "C-" is not acceptable.)

Credit Hour Requirements: A total of 18 credit hours is required for this minor, 9 credits from core courses and 9 from electives.

Program Code: 7054

CIPC: 050299

Queer Studies (QS) is a minor program, and Bachelor of Integrated Studies area of emphasis, which offers interdisciplinary, scholarly perspectives on the formation of sexuality and gender identity. Instead of conceptualizing these topics as unchangeable and only biologically driven,

QS approaches these topics as they relate to the social construction of and their critical intersections with other relations of power such as race, ethnicity, class, nationality, religion, and age.

Faculty and students address questions within the context of a transnational world and from different disciplines, such as, but not limited to, history, literature, sociology, communication, psychology, social work, political science, and cultural studies.

Advisement

Use Grad MAPs to plan your degree

Core Courses (9 credit hours)

WGS 1500 SS/DV - Introduction to Women and Gender Studies **Credits: (3)**

QS 3050 - Queer Theories **Credits: (3)**

QS 4150 - Research Methods in Queer Studies **Credits: (3)** or

QS 4860 - Internship in Queer Studies **Credits: (3)**

Elective Courses (9 credit hours)

HLTH 3500 - Human Sexuality **Credits: (3)**

POLS 2500 SS/DV - Human Rights in the World **Credits: (3)**

POLS 3400 - LGBTQ Politics **Credits: (3)**

QS 2900 - Topics in Queer Studies **Credits: (3)**

QS 3100 - LGBTQ America Since 1945 **Credits: (3)**

QS 4830 - Directed Readings **Credits: (1-3)**

QS 4900 - Topics in Queer Studies **Credits: (3)**

SOC 2370 - Sociology of Gender **Credits: (3)**

If other courses relating specifically to Queer Studies, either of an experimental or permanent nature, are added to the curriculum, these courses will be accepted as electives for the QS Minor Program.

Women & Gender Studies Minor

Coordinator: Dr. Melina Alexander

Location: Lindquist Hall Room 336

Telephone Contact: Roe Schoof 801-626-7627

Women & Gender Studies is a minor program, and Bachelor of Integrated Studies area of emphasis, which offers interdisciplinary, scholarly perspectives on the formation of gender and its critical intersections with other relations of power such as sexuality, race, ethnicity, class, nationality, religion, and age.

Faculty and students address questions within the context of a transnational world and from different disciplines, such as, but not limited to, history, literature, sociology, communication, psychology, criminal justice, social work, political sciences, and cultural studies.

Program Prerequisite: A student's program of study for the Women & Gender Studies Minor must be approved by the Women & Gender Studies Coordinator.

Grade Requirements: A grade of "C" or better is required for all courses used toward the minor (a grade of "C-" is not acceptable.)

Credit Hour Requirements: A total of 21 credit hours is required for this minor, 15 credits from core courses and 6 from electives.

Program Code: 7048

CIPC: 050207

Course Requirements for Minor

Women and Gender Studies Courses Required (15 credit hours)

WGS 1500 SS/DV - Introduction to Women and Gender Studies **Credits: (3)**

WGS 2500 SS/DV - Human Rights in the World **Credits: (3)**

WGS 3050 - Introduction to Feminist Theories 1700 -- Present **Credits: (3)**

WGS 4150 - Research Methodologies **Credits: (3)**

WGS 4250 INT - Community-Based Research/Internship **Credits: (3)**

Electives (6 credit hours)

A total of 6 credit hours of electives chosen in consultation with the Women and Gender Studies Coordinator. Electives may include up to 3 credit hours of Directed Readings.

COMM 3090 - Gender and Communication **Credits: (3)**

ENGL 2710 HU/DV - Perspectives on Women's Literature **Credits: (3)**

SPAN 3670 - Literature Authors **Credits: (3)**

GERT 3320 - Ethnicity and Older Women in the American Society **Credits: (3)**

HIST 3070 - Women in American History: 1600 to Present **Credits: (3)**

PSY 2370 - Psychology of Women and Gender **Credits: (3)**

PSY 3100 - Psychology of Diversity **Credits: (3)**

SOC 2370 - Sociology of Gender **Credits: (3)**

WGS 2900 - Topics in Women's Studies **Credits: (1-3)** or

WGS 4900 - Topics in Women's Studies **Credits: (1-3)**

WGS 4830 - Directed Readings **Credits: (1-3)**

Note:

Should other courses relating specifically to Women or Gender Studies, either of an experimental or of a permanent nature, be added to the curriculum, these courses will be accepted as electives for the Women and Gender Studies Minor Program.

Course Descriptions

ACTG 1010 - Practical Accounting & Taxes

Credits: (3)

A pragmatic look at financial accounting and federal taxes as they relate to the individual's personal life. Designed for non-accounting majors.

Note: This course is not currently being offered.

ACTG 2010 - Survey of Accounting I

Credits: (3)

Typically Taught Summer Semester: Full Sem, Full Sem Online, 1st Blk

Typically Taught Spring Semester: Full Sem, Full Sem Online

Introduction to accounting information, the basic accounting cycle, and consideration of selected financial statement topics. The course emphasizes the uses and limitations of accounting information in economic decision-making, as well as problem-solving, oral and written communication skills, and computer skills.

ACTG 2020 - Survey of Accounting II

Credits: (3)

Typically Taught Summer Semester: Full Sem, 2nd Blk, Full Sem Online

Typically Taught Fall Semester: Full Sem, Full Sem Online

Typically Taught Spring Semester: Full Sem, Full Sem Online

Further consideration of selected financial statement topics. Analysis of cost behavior and the uses and limitations of accounting information in planning, controlling, and decision-making processes. Emphasizes skills in problem-solving, oral and written communication, and computer skills.

Pre-requisite(s): ACTG 2010.

ACTG 2891 - Coop Work Experience

Credits: (1-3)

Open to students meeting criteria established from time to time by the department and on file either in the department or the cooperative education office. Provides academic credit for selected on-the job experience. Grade and amount

of credit will be determined by the department.

Pre-requisite(s): Instructor Approval.

ACTG 2892 - Coop Work Experience

Credits: (1-3)

Open to students meeting criteria established from time to time by the department and on file either in the department or the cooperative education office. Provides academic credit for selected on-the job experience. Grade and amount of credit will be determined by the department.

Pre-requisite(s): Instructor Approval.

ACTG 2893 - Coop Work Experience

Credits: (1-3)

Open to students meeting criteria established from time to time by the department and on file either in the department or the cooperative education office. Provides academic credit for selected on-the job experience. Grade and amount of credit will be determined by the department.

Pre-requisite(s): Instructor Approval.

ACTG 2921 - Short Courses, Workshops, Institutes, & Special Programs

Credits: (1-3)

Variable Title

Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript.

ACTG 2922 - Short Courses, Workshops, Institutes, & Special Programs

Credits: (1-3)

Variable Title

Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript.

ACTG 2923 - Short Courses, Workshops, Institutes, & Special Programs

Credits: (1-3)

Variable Title

Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript.

ACTG 3110 - Intermediate Financial Accounting I

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Introduction to the accounting profession, standard-setting process, and financial accounting concepts. Thorough study of the balance sheet, income statement, and statement of retained earnings. Theory and application of the time value of money. Financial accounting and reporting considerations for selected balance sheet topics.

Pre-requisite(s): ACTG 2020.

ACTG 3120 - Intermediate Financial Accounting II

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Thorough study of the statement of cash flows. Financial accounting and reporting considerations for selected balance sheet topics not considered in Intermediate Financial Accounting I.

Pre-requisite(s): BSAD 2899, ACTG 3110.

ACTG 3130 - Accounting Data Analytics

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

The purpose of this course is to increase student's technical and analytical skills and at the same time provide a review of accounting topics so that as professional accountants, students will have the skills to manage data effectively in a variety of accounting positions. Software products like Microsoft Excel, Microsoft SQL, and Tableau will be utilized in this class. Specifically, this course will enhance understanding of AIS data elements and data structures, critical thinking skills, and technical skills through the use of software packages and a variety of accounting topics.

Pre-requisite(s): ACTG 3110.

ACTG 3300 - Cost Accounting

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Cost determination for budgeting, product costing, process costing, cost assignment and allocation, standard costing, and decision making in manufacturing and service

organizations.

Pre-requisite(s): BSAD 2899, ACTG 2020.

ACTG 3400 - Taxation of Individuals

Credits: (3)

Typically Taught Summer Semester: *1st Blk*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$30.00

Basic concepts of gross income, deductions, credits, special computations, and property transactions for individual taxpayers.

Pre-requisite(s): ACTG 2020.

ACTG 3500 - International Accounting

Credits: (3)

This course reviews major issues in international accounting, including historical, cultural, and environmental influences that impact various national accounting systems. Harmonization of standards is also examined.

Pre-requisite(s): ACTG 2020.

Note: Course not currently being offered.

ACTG 3750 - Accounting & Information Systems

Credits: (3)

Typically Taught Summer Semester: *Full Sem Online*

Typically Taught Fall Semester: *Full Sem Online*

Typically Taught Spring Semester: *Full Sem Online*

Analysis, design, and implementation of accounting information systems with special emphasis on an understanding of accounting cycles, internal control concepts, and data flows associated with basic economic entities of the organization.

Pre-requisite(s): BSAD 2899, ACTG 3110.

ACTG 4130 - Advanced Accounting

Credits: (3)

A study of business combination accounting. The course will also include an introduction to government and fund accounting.

Pre-requisite(s): BSAD 2899, ACTG 3120.

Note: Course not currently being offered.

ACTG 4140 - Accounting for Global and Complex Entities

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Issues in international accounting not covered in Intermediate Accounting are covered in this course. The course also covers concepts related to accounting for complex entities, consolidated entities and partnerships.

Pre-requisite(s): ACTG 3120 and BSAD 2899.

ACTG 4440 - Taxation of Business Entities

Credits: (3)

Typically Taught Summer Semester: *2nd Blk*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A study of the income taxation of corporations (including S corporations), limited liability companies, and partnerships.

Pre-requisite(s): BSAD 2899, ACTG 3400.

ACTG 4510 - Auditing

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Generally-accepted auditing standards, professional responsibilities, evidence, internal control, sampling, audit tests, and audit reports.

Pre-requisite(s): BSAD 2899, ACTG 3120 or concurrent enrollment in ACTG 3120.

ACTG 4801 - Individual Study

Credits: (1-3)

Individual work or work in small groups by arrangement on special topics.

Pre-requisite(s): Instructor Approval.

ACTG 4802 - Individual Study

Credits: (1-3)

Individual work or work in small groups by arrangement on special topics.

Pre-requisite(s): Instructor Approval.

ACTG 4803 - Individual Study

Credits: (1-3)

Individual work or work in small groups by arrangement on special topics.

Pre-requisite(s): Instructor Approval.

ACTG 4810 - Experimental Courses

Credits: (1-3)

Experimental or one-time courses designed to fill a need in the community or investigate interesting and unusual topics. Refer to Experimental Courses.

ACTG 4850 - Accounting Study Abroad

Credits: (1-3)

This course is designed for students who wish to explore accounting theory and practice in countries other than the U.S. Students will study international accounting as offered through a partner university (or other university with department chair approval).

Pre-requisite(s): BSAD 2899.

Can be repeated once up to 6 credits.

ACTG 4891 - Accounting Internship

Credits: (1-3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Open to students meeting criteria established from time to time by the department and on file either in the department or the cooperative education office. Provides academic credit for selected on-the job experience. Grade and amount of credit will be determined by the department.

Pre-requisite(s): Instructor Approval.

ACTG 4892 - Accounting Internship

Credits: (1-3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Open to students meeting criteria established from time to time by the department and on file either in the department or the cooperative education office. Provides academic credit for selected on-the job experience. Grade and amount of credit will be determined by the department.

Pre-requisite(s): Instructor Approval.

ACTG 4893 INT - Accounting Internship

Credits: (1-3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Open to students meeting criteria established from time to

time by the department and on file either in the department or the cooperative education office. Provides academic credit for selected on-the-job experience. Grade and amount of credit will be determined by the department.
Pre-requisite(s): Instructor Approval.

ACTG 4921 - Short Courses, Workshops, Institutes, & Special Programs

Credits: (1-3)
Variable Title

Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript.

ACTG 4922 - Short Courses, Workshops, Institutes, & Special Programs

Credits: (1-3)
Variable Title

Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript.

ACTG 4923 - Short Courses, Workshops, Institutes, & Special Programs

Credits: (1-3)
Variable Title

Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript.

AERO 1010 - Foundations of USAF I

Credits: (1)
Typically Taught Fall Semester: Full Sem
Development, organization, and doctrine of the United States Air Force, emphasizing Strategic Force Requirements.

AERO 1010L - General Military Leadership Lab I

Credits: (0)
Typically Taught Fall Semester: Full Sem
Studies and experience in Air Force standards, customs and courtesies. Introduction to drill and ceremonies. Studies typical organizations and missions of Air Force Bases through field trips.

AERO 1011 - Foundations of USAF II

Credits: (1)
Typically Taught Spring Semester: Full Sem
Development and organization of United States Air Force Defensive Forces, General Purpose Forces and Tactical Air Forces.

AERO 1011L - General Military Leadership Lab II

Credits: (0)
Typically Taught Spring Semester: Full Sem
Studies and experience in Air Force standards, customs and courtesies. Introduction to drill and ceremonies. Studies typical organizations and missions of Air Force Bases through field trips.

AERO 1110 - General Military Leadership Lab I

Credits: (1)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Studies and experience in Air Force standards, customs and courtesies. Introduction to drill and ceremonies. Studies typical organizations and missions of Air Force Bases through field trips.

AERO 1111 - General Military Leadership Lab II

Credits: (1)
Typically Taught Spring Semester: Full Sem
Studies and experience in Air Force standards, customs and courtesies. Introduction to drill and ceremonies. Studies typical organizations and missions of Air Force Bases through field trips.

AERO 2010 - Airpower History I

Credits: (1)
Typically Taught Fall Semester: Full Sem
Development of various concepts of air power employment, emphasizing factors that have prompted research and technological change.

AERO 2010L - General Military Leadership Lab III

Credits: (0)

Typically Taught Spring Semester: *Full Sem*

Application of Air Force standards, customs and courtesies. Drill and ceremonies leadership, introduction to reviews and honors. First-hand exposure to various career opportunities within the Air Force and their application on a typical Air Force base.

AERO 2011 - Airpower History II

Credits: (1)

Typically Taught Spring Semester: *Full Sem*

Development of various concepts of air power employment, emphasizing factors that have prompted research and technological change.

AERO 2011L - General Military Leadership Lab IV

Credits: (0)

Typically Taught Spring Semester: *Full Sem*

Application of Air Force standards, customs and courtesies. Drill and ceremonies leadership, introduction to reviews and honors. First-hand exposure to various career opportunities within the Air Force and their application on a typical Air Force base. Professional Officer Courses

AERO 2110 - General Military Leadership Lab III

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Application of Air Force standards, customs and courtesies. Drill and ceremonies leadership, introduction to reviews and honors. First-hand exposure to various career opportunities within the Air Force and their application on a typical Air Force base.

AERO 2111 - General Military Leadership Lab IV

Credits: (1)

Typically Taught Spring Semester: *Full Sem*

Application of Air Force standards, customs and courtesies. Drill and ceremonies leadership, introduction to reviews and honors. First-hand exposure to various career opportunities within the Air Force and their application on a typical Air Force base.

AERO 2830 - Directed Studies

Credits: (1-3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Individual study with a professor from Aerospace Studies (Air Force ROTC). Allows increased responsibility for GMC in an academic setting providing leadership/management skill development opportunities. May be repeated twice with a maximum of 3 credit hours.

AERO 3000 - Field Training

Credits: (1-4)

Typically Taught Fall Semester: *Full Sem*

Four to five weeks of field training conducted at United States Air Force bases as arranged by the Professor of Aerospace Studies. Course prepares AFROTC students for entry into upper division AFROTC classes, the Professional Officer Corps, and for later commissioning into the US Air Force. The course offers a minimum of 269 hours of education and training in the areas of Officership, Air Force Orientation, Leadership, and Physical/Survival Training. May be repeated 3 times with a maximum of 4 credit hours.

AERO 3010 - Leadership Studies I

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Writing, speaking, and listening as communication skills; management concepts; responsibilities and ethics for an Air Force junior officer.

AERO 3010L - POC Leadership Lab I

Credits: (0)

Typically Taught Fall Semester: *Full Sem*

Application of leadership and management skills in leadership positions in a student-run organization. Study of general structure and progression patterns common to selected Air Force officer career fields. Application of personnel performance evaluation techniques.

AERO 3011 - Leadership Studies II

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

Principles of leadership, problem solving, decision, discipline, and human relations. Emphasis on career planning as an Air Force junior officer.

AERO 3011L - POC Leadership Lab II

Credits: (0)

Typically Taught Spring Semester: *Full Sem*

Application of leadership and management skills in leadership positions in a student-run organization. Study of general structure and progression patterns common to selected Air Force officer career fields. Application of personnel performance evaluation techniques.

AERO 3110 - POC Leadership Lab I

Credits: (1)

Typically Taught Spring Semester: *Full Sem*

Application of leadership and management skills in leadership positions in a student-run organization. Study of general structure and progression patterns common to selected Air Force officer career fields. Application of personnel performance evaluation techniques.

AERO 3111 - POC Leadership Lab II

Credits: (1)

Typically Taught Spring Semester: *Full Sem*

Application of leadership and management skills in leadership positions in a student-run organization. Study of general structure and progression patterns common to selected Air Force officer career fields. Application of personnel performance evaluation techniques.

AERO 4010 - National Security Affairs I

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Examines the need for national security, analyzes the evolution and formulation of American defensive policy, strategy and joint doctrine. Investigates methods of managing conflict and touches on arms control and terrorism.

AERO 4010L - POC Leadership Lab III

Credits: (0)

Typically Taught Spring Semester: *Full Sem*

Application of leadership and management techniques with individuals and groups. Introduction to operations and communications security. Introduction to advanced educational opportunities available to Air Force officers.

AERO 4011 - National Security Affairs II

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

Examines conflict management, arms control, military law and Air Force issues and policies.

AERO 4011L - POC Leadership Lab III

Credits: (0)

Typically Taught Spring Semester: *Full Sem*

Application of leadership and management techniques with individuals and groups. Introduction to operations and communications security. Introduction to advanced educational opportunities available to Air Force officers.

AERO 4110 - POC Leadership Lab III

Credits: (1)

Typically Taught Spring Semester: *Full Sem*

Application of leadership and management techniques with individuals and groups. Introduction to operations and communications security. Introduction to advanced educational opportunities available to Air Force officers.

AERO 4111 - POC Leadership Lab IV

Credits: (1)

Typically Taught Spring Semester: *Full Sem*

Application of leadership and management techniques with individuals and groups. Introduction to operations and communications security. Introduction to advanced educational opportunities available to Air Force officers.

AERO 4830 - Directed Studies

Credits: (1-5)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Individual study with a professor from Aerospace Studies. Provides added leadership/management skill development opportunities to develop more competitive officer candidates.

May be repeated 4 times with a maximum of 5 credit hours.

ANTH 1000 SS/DV - Introduction to Anthropology

Credits: (3)

Typically Taught Summer Semester: *1st Blk, 2nd Blk, Full Sem Online*

Typically Taught Fall Semester: *Full Sem, Full Sem Online*

Typically Taught Spring Semester: *Full Sem, Full Sem Online*

Anthropology is the study of humankind, past and present: our origins and the development of cultural behavior and biological attributes. This course examines what it means to be human, describing and explaining human differences and similarities throughout time and across the world.

ANTH 1020 LS/DV - Biological Anthropology

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Explores human origins, evolution, and contemporary biological diversity by examining genetics, the human fossil record, primatology, and human ecology from a biocultural perspective.

ANTH 1040 HU/DV - Language and Culture

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Explores the nature of human language and its role in sociocultural settings. Surveys a world sample of languages from the perspective of anthropological linguistics including language structure, social functions, geographical and historical variation, and cultural values.

ANTH 2010 SS/DV - Peoples and Cultures of the World

Credits: (3)

Typically Taught Summer Semester: *1st Blk, 2nd Blk*

Typically Taught Fall Semester: *Full Sem, Full Sem Online*

Typically Taught Spring Semester: *Full Sem, Full Sem Online*

A survey of cultures around the world, exploring their similarities and differences as observed by anthropologists.

ANTH 2030 SS - Principles of Archaeology

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Archaeology attempts to reconstruct prehistoric and early historic human life ways as well as long term cultural and biological evolutionary processes through the scientific study of material remains. This course focuses upon the

history of archaeology, the ways in which archaeologists recover and analyze data, and the major theoretical perspectives used to interpret the past.

ANTH 2810 - Experimental Courses

Credits: (1-6)

Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript. Refer to Experimental Courses.

May be repeated 5 times with a maximum of 6 credit hours.

ANTH 2920 - Short Courses, Workshops, Institutes, and Special Programs

Credits: (1-6)

Variable Title

Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript.

May be repeated for a maximum of 6 credit hours.

ANTH 2950 - Elementary Anthropological Field Trip

Credits: (1-3)

Typically Taught Summer Semester: *1st Blk*

Students will visit areas and events of anthropological interest. The course will include relevant lectures, readings, and exercises designed to maximize and evaluate the learning experience. Pre- and post-trip meetings for student preparation, feedback, and course evaluation will occur.

When the course number is used, it will be accompanied by a specific title and authorized credit which will appear on the student's transcript.

Pre-requisite(s): Consent of instructor. A maximum of three credit hours of Anthropology 2950 can be applied toward graduation.

May be repeated twice with a maximum of 3 credit hours.

ANTH 2990 - Hunter-Gatherers

Credits: (1-3)

Workshop

Typically Taught Fall Semester: *Full Sem, Full Sem - Online*

Typically Taught Spring Semester: *Full Sem, Full Sem - Online*

Investigation of modern and recent hunter-gatherer

societies using ethnographic and archaeological record from around the world.

Course Objectives:

Students will develop or improve:

An understanding of the variation in the lifeways of hunting and gathering societies as well an appreciation for their achievements and rich histories.

Familiarization with an anthropological perspective on foraging groups and its development.

The ability to distinguish between common misconceptions/stereotypes of hunter-gatherer groups versus the reality.

Comprehend the diversity of perspectives on what is "human nature" and the role foragers have and continue to play.

The ability to critically read anthropological literature and discuss concepts presented in lecture and texts in an informed manner.

ANTH 2990 - Special Topics in Anthropology

Credits: (1-3)

Variable Title

Typically Taught Fall Semester: Full Sem

Typically Taught Spring Semester: Full Sem

A course allowing examination of selected topics and current issues in Anthropology. When the course number is used, it will be accompanied by a specific title and authorized credit which will appear on the student's transcript. Offerings of same title may not be repeated for credit toward graduation.

May be repeated 6 times with a maximum of 18 credit hours.

ANTH 3100 - Prehistory of North America

Credits: (3)

Typically Taught Spring Semester: Full Sem

A general survey course concerning the archaeology of North America and an interpretation of its prehistory. The course material spans the time of initial human occupation of the continent through the early historic period, and emphasizes the three major cultural stages (Paleo Indian, Archaic, and Formative) which characterize the archaeological record of North America.

ANTH 3150 - Archaeology of the Great Basin

Credits: (3)

Typically Taught Fall Semester: Full Sem

This course introduces students to the archaeological and ethnographic peoples of the Great Basin while exploring how the environment and specific theoretical approaches have shaped how they are understood. A portion of the course also focuses on on-going archaeological debates and current research in the region.

ANTH 3200 - Archaeology of Early Civilizations

Credits: (3)

Typically Taught Fall Semester: Full Sem

This course is designed to survey the broad range of early civilizations worldwide as they are known archaeologically, including the variety of ways and places in which they have arisen and the great diversity of peoples who created them. It examines highly complex societies in sub-Saharan and North Africa, native North and South America, East and South Asia, the Middle East, the Aegean and Celtic Europe, discussing in detail the diverse ways of life in these civilizations and how they shaped cultural forms, practices and ideas in the modern life of these regions today.

ANTH 3300 - Archaeological Field Techniques

Credits: (3-6)

Typically Taught Summer Semester: 2nd Blk

Intensive field school involving archaeological excavation and/or survey, emphasizing modern field techniques, data recordation and recovery, map interpretation and production, and the proper conduct of problem-oriented archaeology.

Pre-requisite(s): ANTH 2030, one upper division archaeology course such as ANTH 3100, 3200, or 3400, and consent of instructor.

May be repeated up to 12 credit hours.

Note: Archaeology Track, Archaeological Technician Associate's Degree, and Archaeological Technician Certificate students must complete 6 credit hours.

ANTH 3400 - Archaeological Laboratory Techniques

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Emphasizes student analysis and write-up of an artifact assemblage from an archaeological site. Weekly lectures familiarize students with analyses of prehistoric and historic archaeological materials, as well as the production of text, figures, tables, maps, and bibliographies for technical reports.

Pre-requisite(s): ANTH 2030, or consent of instructor.

ANTH 3500 - Advanced Cultural Anthropology

Credits: (3)

The nature of culture, its structure and function in the variety of human activities.

Pre-requisite(s): ANTH 1000 or ANTH 2010, or consent of instructor.

ANTH 3600 - Culture Area Studies

Credits: (1-3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Surveys selected societies in ethnographically different cultural areas of the world, such as Africa, Asia, North American Indians, Latin America, the Middle East, the Pacific, or the modern United States. When the number is used, it will be accompanied by a descriptive title and the credit authorized, which will appear on the student transcript. Offerings of same title may not be repeated for credit toward graduation.

Pre-requisite(s): ANTH 1000 or ANTH 2010, or consent of instructor.

May be repeated 6 times with a maximum of 18 credit hours.

ANTH 3700 - Sex Roles: Past, Present and Future

Credits: (3)

An overview of the differences and similarities in human sex roles, cross-culturally and over time, with special emphasis on the influences of biology, socialization, and ecology in their origin, perpetuation, and change.

Note: This course is not currently offered.

ANTH 3900 - Magic, Shamanism and Religion

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

A comparative study of the origins, development, and social functions of magic, shamanism, and religion within cultural systems around the world.

ANTH 4100 - Archaeological Method, Theory, and Cultural Resource Management

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

Explores means by which archaeological inferences are made to decipher the material record of past human behavior. Includes the history of recent archaeological thought from the beginnings of scientific archaeology (ca. 1960's) through the profession of cultural resource management.

Pre-requisite(s): ANTH 2030.

ANTH 4150 - Technical Skills in Anthropology

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

This course introduces students to visual and spatial data collection, management, and production skills through direct hands-on training and lecture. Topics include field and laboratory based photography, manipulation and management of digital images, spatial data collection through Global Positioning Systems (GPS) and total stations, and digital map/image creation. While exercises used throughout the course focus on archaeological examples, the technical skills learned can easily be applied to all four subfields of anthropology.

ANTH 4200 - Anthropological Theory

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

Historical and theoretical development of the major anthropological schools of thought including 19th century evolutionism, historical particularism, social anthropology, symbolic analysis, neoevolutionism, and cultural ecology.

Pre-requisite(s): ANTH 1000 or consent of instructor.

ANTH 4300 - Anthropological Research Methods

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Students will learn and apply the scientific methods of inquiry used in anthropological research. Required for majors and recommended for minors.

Pre-requisite(s): ANTH 1000 or a 2000-level course; and SOC 3600, or consent of instructor.

ANTH 4810 - Experimental Courses

Credits: (1-3)

Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript. Refer to Experimental Courses.

May be repeated twice with a maximum of 6 credit hours.

ANTH 4830 INT - Readings and/or Projects

Credits: (1-3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Individual readings and/or projects for anthropology students.

Pre-requisite(s): ANTH 1000, permission of instructor and approval of program coordinator.

Maximum of 6 hours may be applied toward graduation.

ANTH 4890 INT - Internship in Anthropology

Credits: (1-3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Anthropology majors may apply for internship opportunities that provide the student with both practical and research experiences.

Pre-requisite(s): 6 hours of upper-division anthropology courses, Anthropology major status, approval of Program Coordinator.

A student may complete a total up to 6 hours of internships for credit, with a maximum of 3 hours to be applied towards the Anthropology major.

ANTH 4900 - Senior Capstone Seminar

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

This class is a one-semester three credit hour seminar whose main goal is integration of materials within the

major (especially what you have learned in Methods and Theory). The Senior Thesis is a culminating experience focused on a theoretical issue, practical research or applied work, a historical period or theme within anthropology. Students will write an academic thesis paper which centers on a topic chosen by the student in consultation with the course instructor and, depending on the anthropological subfield, another faculty member in this department. The project requires approval of the course instructor and may include an applied or fieldwork component. Students will develop a research question, prepare a literature review, collect and analyze data, complete and present a substantial research writing project (the senior thesis) using the skills they have acquired throughout their academic career, drawing particularly upon the required theory and methods classes in crafting their research proposals. Students will be encouraged to engage deeply with a topic they care about as they produce a Senior Thesis based on original scholarship that displays a refined understanding of current literature and enduring analytical perspectives in Anthropology. In addition to the research project, this course also examines anthropology as a career through presentations, readings, and discussions that help students prepare for the process of applying to graduate programs and/or explore career opportunities in which an anthropology degree can be applied.

Pre-requisite(s): ANTH 4300.

ANTH 4920 - Short Courses, Workshops, Institutes, and Special Programs

Credits: (1-3)

Variable Title

Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript.

May be repeated 5 time with a maximum of 6 credit hours.

ANTH 4950 - Advanced Anthropological Field Trip

Credits: (1-3)

Typically Taught Summer Semester: *1st Blk*

Students will visit areas and events of anthropological interest. The course will include relevant lectures, readings, and exercises designed to maximize and evaluate the learning experience. Pre- and post-trip meetings for student preparation, feedback, and course evaluation will occur.

When the course number is used, it will be accompanied by a specific title and authorized credit which will appear on the student's transcript.

Pre-requisite(s): ANTH 1000 or ANTH 2030 and consent

of instructor.

A maximum of three credit hours of Anthropology 4950 can be applied toward graduation.

ANTH 4990 - Hunter-Gatherers

Credits: (1-3)

Workshop

Typically Taught Fall Semester: *Full Sem, Full Sem - Online*

Typically Taught Spring Semester: *Full Sem, Full Sem - Online*

Investigation of modern and recent hunter-gatherer societies using ethnographic and archaeological record from around the world.

Course Objectives:

Students will develop or improve:

An understanding of the variation in the lifeways of hunting and gathering societies as well an appreciation for their achievements and rich histories.

Familiarization with an anthropological perspective on foraging groups and its development.

The ability to distinguish between common misconceptions/stereotypes of hunter-gatherer groups versus the reality.

Comprehend the diversity of perspectives on what is "human nature" and the role foragers have and continue to play.

The ability to critically read anthropological literature and discuss concepts presented in lecture and texts in an informed manner.

ANTH 4990 - Seminar in Anthropology

Credits: (1-3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

An advanced course allowing in-depth study of selected topics and current issues in Anthropology. When the course number is used, it will be accompanied by a specific title with the credit authorized, which will appear on the student's transcript. Offerings of same title may not be repeated for credit toward graduation.

Pre-requisite(s): ANTH 1000 or consent of instructor. May be repeated 6 times with a maximum of 18 credit hours.

ART 1010 CA - Introduction to the Visual Arts

Credits: (3)

Typically Taught Summer Semester: *Online*

Typically Taught Fall Semester: *Full Sem, 1st Blk, 2nd Blk, Online*

Typically Taught Spring Semester: *Full Sem, 1st Blk, 2nd Blk, Online*

Course Fee: \$10.00

Introduction to all forms of visual art covering processes (such as demonstration of the lost-wax process of metal casting), language, responses (oral and written assignments that utilize art-related terminology), issues (such as patronage, feminism or orientalism), and ways of seeing and understanding works of art. A general education course for the non-art major.

ART 1030 CA - Studio Art for the Non-Art Major

Credits: (3)

Typically Taught Summer Semester: *Online*

Typically Taught Fall Semester: *Full Sem, Online*

Typically Taught Spring Semester: *Full Sem, Online*

Course Fee: \$15.00

A general education course for non-art majors that primarily includes a series of hands-on art experiences (such as drawing and sculpture). Class discussion draws from the disciplines of art history, art criticism, and aesthetics as guides through visual presentations. For students desiring to broaden their academic background in the area of visual literacy and problem solving.

ART 1040 - Orientation to Visual Studies

Credits: (3)

Typically Taught Summer Semester: *1st Blk*

Typically Taught Fall Semester: *Full Sem, Online*

Typically Taught Spring Semester: *Full Sem, Online*

Course Fee: \$45.00

Orientation to the visual world including how we perceive and interpret visual messages, the impact of the visual on human relations, political exploitation of the visual and aesthetic issues in the visual arts. Topics are explored through written and creative projects designed to establish a context for expanded study in the visual arts. Includes curriculum planning for art and design majors, introduction to programs and faculty, and professional opportunities.

ART 1110 CA - Drawing I

Credits: (3)

Typically Taught Summer Semester: *1st Blk*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$45.00

This is the foundation drawing class for art majors and minors (not a general education class). Perceptual and conceptual development stressed. Variety of materials and procedures investigated.

ART 1120 - Design Concepts

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$45.00

An introduction to visual language, design principles, and compositional approaches in two and three dimensions. Basic approaches to sketching and modeling, improving compositional structures, and using form and color to communicate will be addressed.

ART 1130 - Approaches to Surface, Shape and Form

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$45.00

An in-depth exploration of diverse approaches to communicating through form and color in two and three dimensions. In the course of the semester, students will complete three workshop-style segments across a range of media to include 3D fabrication, analog 2D composition, and digital color & composition.

ART 1135 - Approaches to Materials, Space and Time

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$45.00

An in-depth exploration of a range of approaches to communicating through material, spatial and time-based methods. In the course of the semester, students will complete three workshop-style segments across a range of media to include analog experimental media, art & design in space and time & interaction.

ART 2015 - Drawing on the Land

Credits: (3)

Variable Title

Typically Taught Summer Semester: *Full Sem*

Introduction to visual arts media as a productive way to investigate and interpret the natural environment.

Appropriate for the art major as well as the non-art major.

Participants will build a practice of observation, inquiry, and discovery via drawing and/or other media as designated by faculty. A significant portion of each course will be conducted in the field. Media focus and field location will be announced in advance.

Some travel is required. Camping may be required.

This course may be repeated twice with a maximum of 9 credit hours with different titles.

ART 2050 - Photographing Artwork

Credits: (1)

Photographing artwork for portfolios: photographing of two- and three-dimensional artwork. Emphasis on reproduction of quality slides, including masking and labeling of slides for juried activities, career and graduate school application. Credit/No Credit.

Pre-requisite(s): ART 2250 or consent of instructor.

Note: Check with Department for course availability.

ART 2200 - Introduction to Printmaking

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$152.00

An introduction to all printmaking classes covering the processes of intaglio, screenprinting, relief, lithography, and monotype. Students are provided with the fundamentals of each process and experience with each one.

Note: This class is a prerequisite for all printmaking classes.

ART 2250 - Foundations of Photography: Black & White/Analog

Credits: (3)

Typically Taught Summer Semester: *1st Blk*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$120.00

A highly disciplined craft and concept course to help develop technical and aesthetic skills in black and white photography. Students learn the use of the camera, zone

system of exposure, film, and print processing, and gain an aesthetic sense of the medium.

ART 2310 - Ceramics I

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$182.00

The first course of a two-part introduction to ceramic art. Projects in hand-building and wheel-thrown objects are emphasized. Multiple surfacing and firing techniques will be explored.

ART 2350 - Small Metals/Jewelry I

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$125.00

Introduction to tools, materials, and basic techniques of fabrication and casting, with an emphasis on design.

ART 2420A - Bitmap Imaging

Credits: (1)

Emphasis on the principle of bitmap imaging using industry-standard software. This course builds on studies in basic two-dimensional design and provides the conceptual and technical foundation for more advanced work in color photography, graphic design, illustration, web-based and other digital media. Primary software: Adobe Photoshop.

Pre-requisite(s): ART 1120 or consent of instructor.

ART 2420B - Vector Drawing

Credits: (1)

Typically Taught Fall Semester: *1st Blk, 2nd Blk*

Typically Taught Spring Semester: *1st Blk, 2nd Blk*

Emphasis on vector drawing as applied to problems in art and design. This course builds on studies in basic two-dimensional design and provides the conceptual and technical foundation for more advanced work in graphic design, animation, 3D modeling, and web design. Primary software: Adobe Illustrator.

Pre-requisite(s): ART 1120 or consent of instructor.

ART 2420C - Digital Page Composition

Credits: (1)

Typically Taught Fall Semester: *1st Blk, 2nd Blk*

Typically Taught Spring Semester: *1st Blk, 2nd Blk*

Emphasis on the principles of layout using industry-standard software tools. This course builds on studies in basic two-dimensional design and provides the conceptual and technical foundation for more advanced work in typography and graphic design. Primary software: Quark Express.

Pre-requisite(s): ART 1120 or consent of instructor.

ART 2420D - Design for the Internet

Credits: (1)

Typically Taught Fall Semester: *1st Blk, 2nd Blk*

Typically Taught Spring Semester: *1st Blk, 2nd Blk*

Emphasis on the principles of web design using industry-standard software. This course builds in studies in basic two-dimensional design and provides the conceptual and technical foundation for more advanced work in digital media and web design. Primary software: Macromedia Dreamweaver.

Pre-requisite(s): ART 1120 or consent of instructor.

ART 2430 - Introduction to Graphic Design

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$95.00

Introduction to the technical foundations of graphic design along with the elements and principles of visual language. Emphasis on the development of software skills, image and symbol development, graphic systems and design process.

Co-Requisite(s): ART 1120.

ART 2435 - Graphic Design Practice

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Exploration of core elements and processes in the practice of graphic design. Includes project work in basic typography, image generation, visual metaphor, word/picture communication, and information design. Prerequisite: ART 2430.

ART 2450 CA - Foundations of Photography: Color/Digital

Credits: (3)

Typically Taught Summer Semester: *2nd Blk*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$150.00

A highly disciplined craft and concept course to help develop technical and aesthetic skills in color photography. Students will learn and explore the theory, practice, and aesthetics of shooting and printing color photographic materials. Using digital media and new technology as a means for creative expression and investigation in color photography will also be a main concern in this course.

ART 2600 - Painting I

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$80.00

Introduction to painting including the construction and design of paintings, investigations into the character and actions of various paints and techniques (traditional and contemporary) on a variety of surfaces.

ART 2700 - Sculpture I

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$125.00

An introduction to the essential methods and materials of sculpture including modeling, carving, casting, and construction with emphasis on contemporary activity in sculpture and with projects designed to practice concept development.

ART 2750 - Foundations of Video Art

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Course Fee: \$117.00

This course will provide students with an introductory-level investigation of the skills and concepts used in experimental digital video making. Students will learn video recording and editing in an art context and to incorporate video into their own creative practice. Students will also be introduced to historical and contemporary aesthetic and conceptual issues surrounding video as a form of creative expression.

Pre-requisite(s): Either ART 2250 or ART 2450 or consent of instructor.

ART 2810 - Book Binding and Box Structures

Credits: (3)

Experimental Course, Contact Department for More Information

Course Fee: \$120.00

This Class involves investigation of material and techniques for constructing traditional and non-traditional book structures. Class covers both adhesive and non-adhesive bindings, box making and basic paper decoration. Students take away multiple models of book structures.

ART 2810 - Drawing and Painting to Print

Credits: (3)

Experimental Course, Contact Department for More Information

Course Fee: \$120.00

The language of print and its articulation has been ever changing since the earliest cave drawings to the digital revolution in the creation of images.

ART 2810 - Furniture Design

Credits: (3)

Experimental Course, Contact Department for More Information

Course Fee: \$120.00

This course will explore the intersection of Sculpture and Design through furniture and object making. With a focus on developing craftsmanship skills will explore current and emerging practices in furniture design including issues of form versus function. Students will develop intermediate to advanced skills in woodworking and metalworking while studying design and sculpture concepts and material exploration. Preliminary design work will be explored with drawing and digital 3D modeling. Students will be introduced to CNC fabrication technology and CAD software for designing and creating functional furniture and/or furniture as sculpture.

ART 2830 - Directed Readings

Credits: (1-3)

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$18.00

Individually chosen readings on specialized topics supervised by a faculty member.

Pre-requisite(s): Consent of faculty supervisor prior to registration.
May be repeated twice with a maximum of 3 credit hours.

ART 2850 - Furniture Design

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$125.00

Furniture Design explores the intersection of Sculpture and Design through furniture and object making. The course addresses emerging and historic approaches to furniture including both functional and sculptural approaches by contemporary artists and designers. Students will develop intermediate to advanced skills in woodworking and metalworking while studying design and sculpture concepts and gaining a broad understanding of materials. Students will be introduced to CNC fabrication technology and CAD software for designing and creating functional furniture and furniture as sculpture.

May be repeated three times with a maximum of nine credit hours.

ART 2890 INT - Cooperative Work Experience

Credits: (1-2)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

An opportunity for students to receive academic credit for faculty approved on-the-job learning experiences within certain visual arts areas of emphasis. C/NC only.

Pre-requisite(s): Instructor approval (before enrollment) and previous or concurrent enrollment in art classes as specified by each area of emphasis.

May be repeated with a maximum of 6 credit hours.

ART 2920 - Short Courses, Workshops, Institutes and Special Programs

Credits: (1-4)

Variable Title

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$18.00

Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will be determined by the department.

May be repeated 5 times with a maximum of 6 credit hours with different topics.

ART 3085 - Critical Issues in Art

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$25.00

This course introduces students to the history of ideas in art from the ancient Greeks to the most contemporary currents, with a focus on Modernism and Post-Modernism up to the present. The goal of this course is the creation of a critical and theoretical foundation that will allow student to locate themselves and their work within the context of critical dialogues in the contemporary art world. Class time will involve discussions of assigned readings, with images presented to supplement and inform the ideas under consideration.

Pre-requisite(s): ART 1040 or consent of instructor.

ART 3120 - Figure Drawing

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Course Fee: \$135.00

Study of the anatomical structure of the human body. The student, by means of drawing from the model, explores literal and experimental interpretation of form.

Pre-requisite(s): ART 1110 and ART 1120; or consent of instructor.

ART 3150 - Photography Seminar

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$150.00

This course is designed to introduce students early to the type of intense investigation and experimentation necessary to define and execute a semester long project in photography. Emphasis will be on development of ideas, fine-tuning technique, and improving ability in critical evaluation and writing. Other topics covered will be an introduction to professional medium-format cameras, and portfolio preparation.

Pre-requisite(s): ART 2250 and ART 2450.

May be repeated twice with a maximum of 6 credit hours.

ART 3200 - Intermediate Printmaking

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$152.00

An intermediate level class with emphasis on

screenprinting, relief, and intaglio with further exploration into print processes that include photographic stencils and multicolor printing.

Pre-requisite(s): ART 1120 and ART 2200; or consent of instructor.

ART 3210 - Relief Printmaking

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Course Fee: \$152.00

Students will learn the basic printmaking processes and traditional techniques of carving and printing both wood and linoleum relief blocks. Contemporary approaches to relief processes through digital media experimentation will be introduced. Emphasis is on development of the student's own ideas through experimentation, using traditional and non-traditional forms and processes. Safety issues will be addressed. Students will work from an introductory through an intermediate level, with a variety of progressive projects, each resulting in a small edition. The course will be administered through lecture, process demos, in class work time, and peer/individual critiques. Materials fee will cover most studio costs, excluding plates and paper. May be repeated once up to 6 credit hours.

ART 3215 - Etching Printmaking

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$152.00

Students learn basic platemaking and printing techniques used in etching while learning to incorporate their own drawing skills and points of view. Line work, aquatint, and ancillary techniques will be explored. Safety issues will be addressed. Historical and contemporary prints and printmakers are reviewed. Emphasis is on development of the student's own ideas through experimentation, using traditional and non-traditional forms and processes. The course will be administered through lecture, demos, in class work time, and formal and informal peer critiques. Materials fee to cover most supplies except for printing plates and paper. May be repeated once up to 6 credit hours.

ART 3310 - Ceramics II

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$182.00

The second class in a two-part introductory ceramics series.

This course expands upon hand-building and covers wheel-thrown techniques in greater depth. Additional approaches to clay surfacing are explored. Students learn clay mixing, glaze testing and principles of kiln firing.

Pre-requisite(s): ART 2310.

ART 3320 - Ceramic Processes

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course focuses on specific ceramic processes, trends or concepts that are not normally taught in the regular ceramics classes. Consult department or instructor for course topic prior to enrollment.

Pre-requisite(s): ART 2310 or consent of instructor.

May be repeated 3 times with a maximum of 9 credit hours.

ART 3350 - Small Metals/Jewelry II

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$125.00

Development of design concepts and procedures with emphasis on basic techniques and concept development in fabrication, casting, enameling, cold connectors, surface enrichment.

Pre-requisite(s): ART 2350 or consent of instructor.

ART 3410 - Design Seminar for Juniors

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$95.00

Orientation to professional Graphic Design practice for the Junior Graphic Design student. Includes art direction and work situations, client relations, portfolio and resume preparation, self promotion, and career advancement. Course contents will be explored through reading, writing, lecture, discussion, critique, simulation, guest presentations, studio visits, and project work tailored to individual portfolio development.

Pre-requisite(s): ART 3445 and ARTH 3451 or consent of instructor.

ART 3430 - Typography and Publication Design

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$95.00

Orientation to typographic communications including methods and processes, aesthetics, readability, typographic systems, grids, layout, and digital page composition. Class meets 2 times/week for 3-hour sessions.

Pre-requisite(s): ART 2430 or consent of instructor.

ART 3435 - Experimental Typography

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$95.00

Investigation into experimental and expressive aspects of typographic communication. Emphasis is placed upon the historical development of letter design, letter and text as visual form, and typographical illustration.

Pre-requisite(s): ART 2430 and ART 3430 or consent of instructor.

ART 3445 - Web Graphic Design

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Introduction to designing for the Internet. Emphasis on the application of visual communication principles to the creation of functioning, well designed websites. Course will include basic HTML and CSS programming, methods for organizing and understanding website content, ways and processes for working with clients and/or creating content, and ways to translate design and typographic fundamentals to the landscape of the Internet.

Pre-requisite(s): ART 3430 - Typography and Publication Design or consent of instructor.

May be repeated once for credit.

ART 3460 - Illustration

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Course Fee: \$95.00

Introduction to theory, methods, tools and materials, and the professional practice of illustration. Emphasis is placed on concept development, media exploration and technique as applied to a variety of problems in pictorial communication.

Pre-requisite(s): ART 1110 and ART 1120 or consent of instructor.

ART 3465 - Motion Design

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$95.00

This course is an introduction to Motion Design (in relation to Graphic Design) and will cover the history and aesthetics of motion design, ways to think in time and space, techniques and methods for planning motion sequences, ways to think about and design with typography in motion, and the use of motion-specific industry-standard software and tools (Apple Motion, Adobe Flash, Adobe After Effects). This course aims to: provide historic and current perspectives regarding motion graphics and design; introduce students to categories, styles, terminology and vocabulary used in motion graphics and design; introduce students to basic techniques, methods and concepts used in motion design; work with typography and image in terms of motion; reinforce graphic design tenets and practices, and show how they extend to motion design.

Pre-requisite(s): ART 3430 - Typography and Publication Design and ART 2435 - Graphic Design Practice or consent of instructor.

May be repeated three times for a maximum of nine credit hours.

ART 3500 - Advanced Time-Based Media/Video Art

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$117.00

A project-oriented studio course providing a more in-depth exploration of time-based media as used by contemporary artists with an emphasis on video. We will explore installation, projection and the web as environments for video art, as well as other media which allows the employment of time as a central element.

Pre-requisite(s): ART 2750.

ART 3515 - Art Methods and Resources for Secondary Teachers I [Art Methods I]

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Course Fee: \$120.00

This class prepares the art education candidate for teaching in the classroom, grades 7-12 and adaptable to K- 6. Experiences will include art activities, processes, materials, tools and resources, with the development and preparation of the accompanying curricula materials, lesson plans and assessments by the candidate. Curriculum aligns with State of Utah's core curriculum and national standards in the

visual arts. Content will focus on the foundations of art education programming, including the art elements and design principles. In addition, this class will examine classroom management strategies and practices for the beginning teacher in the contemporary classroom. Art Education majors should have completed 40 credit hours; minors must have completed 12 credit hours.

Pre-requisite(s): (Recommended) Professional Core Level, College of Education, or permission of instructor. This course is required for secondary certification and is designed to be taken prior to student teaching.

ART 3520 - Art Methods and Resources for Secondary Teachers II [Art Methods II]

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$120.00

Examination of advanced approaches, methodologies, and curriculum appropriate to teaching visual arts in grades 7-12, and adaptable to K-6. Candidate will develop and prepare materials for advanced visual arts programming. Further investigation of classroom management practices appropriate to adolescents and young adults. Collaboration, mentorship and leadership will be emphasized. Curriculum aligns with State of Utah's core curriculum and national standards in the visual arts. Art education Majors should have completed 40 credit hours; minors must have completed 12 credit hours.

Pre-requisite(s): ART 3515, or by consent of instructor. Note: This course is required for secondary certification and is designed to be taken prior to student teaching.

ART 3525 - Practicum: WSU ArtsBridge Service-Learning

Credits: (1-6)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This service-learning course provides the fine arts teacher candidate with academic credit for designing and teaching an integrated arts course in a grade K-12 classroom or equivalent community education program. The candidate will work closely with a University faculty mentor, host school teacher and ArtsBridge director in implementing and assessing integrated arts curricula and producing a final project by K-12 classroom students. Course components include: curricula pre-planning and implementation, in-class teaching, student assessment, candidate self-assessment and ArtsBridge seminar components. By permission only. Fine arts education content area

supervisor and successful interview with faculty mentor and/or ArtsBridge director. Content methodology course(s) complete or in progress.

May be repeated once with a maximum of 12 credit hours.

ART 3530 - Art Methods and Resources for Elementary Art Teachers K-6

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$120.00

Examination of advanced approaches, methodologies, and curriculum appropriate to teaching visual arts in grades K-6. Candidate will develop and prepare materials for elementary visual arts programming, in alignment with state and national standards.

Pre-requisite(s): ART 3515.

ART 3550 - Photography: View Camera Techniques

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Course Fee: \$163.00

The theory, aesthetics, and techniques of photographic image making with the view camera. Students will learn the operation of large format cameras, the Zone System method of negative exposure and development and methods for fine-tuning black and white photographic printing. The history of and contemporary trends in working with large format negatives will also be explored.

Pre-requisite(s): ART 3150 or consent of instructor.

May be repeated once with a maximum of 6 credit hours.

ART 3600 - Painting II

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$80.00

Consolidates and further develops material covered in Painting I. Investigations include the figure, mixed media, and abstraction. Historical precedents are discussed through slide lecture as an aid to development.

Pre-requisite(s): ART 1120 and ART 2600; or consent of instructor.

ART 3700 - Sculpture II

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$125.00

An introduction to the form language of sculpture with projects designed to develop conceptual thinking skills, to learn technical skills, and to explore new areas of interest in the three-dimensional visual arts.

Pre-requisite(s): ART 1130 and ART 2700; or consent of instructor.

ART 3720 - Public Art

Credits: (3)

Typically Taught Summer Semester: *1st Blk, 2nd Blk, Full Sem - Online*

Typically Taught Fall Semester: *Full Sem, Full Sem - Online*

Typically Taught Spring Semester: *Full Sem, Full Sem - Online*

Course Fee: \$125.00

Public Art covers a broad range of historic and current approaches to working in the public realm, including: murals, monuments, community-based projects, ecologically-focused projects, site-specificity and environmental art. Students will learn to create 2D, 3D and/or digital renderings and models to develop public art concepts, while gaining knowledge of real-world opportunities for visual artists and designers. Students will learn professional practices, skill building for the discipline, and how to assemble a public art proposal. Students can repeat the course for additional credit a maximum for 2 times (6 credit hours total).

ART 3800 - Travel-Study Studio

Credits: (1-3)

Variable Title

Typically Taught Summer Semester: *Full Sem*

Studio projects will be based in response to the opportunities afforded by travel-study. These works may be a direct response to the country or region and its culture or they may be related to an event that takes place in that area while students are visiting. Instruction will be given in English.

Pre-requisite(s): ART 1040 or Instructor's Approval. May be repeated up to 4 times and up to 12 credit hours.

ART 3810 - Professional Practices

Credits: (3)

Experimental Course, Contact Department for More Information

This course provides students with a wide variety of information and hands-activities to prepare emerging artists for professional pursuits after completion of their undergraduate degree. Emphasis is placed on the following: writing artist statements, exhibition/project proposals, residency applications, cover letters, and curriculum vitae; oral and visual presentation skills; professional portfolio creation for use in an online/digital context; promotion and marketing; networking with alumni and other key figures in their fields of interest; relevant career paths; practical skills related to packing, shipping, framing, displaying, and pricing artwork; traditional and alternative exhibition spaces including galleries, art-fairs, e-commerce, co-ops, etc.; articulating an understanding of how skills developed during their undergraduate program transfer to a variety of obvious and unexpected career paths.

ART 3995 - BFA Seminar

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$25.00

This is a seminar/discussion and studio course that guides BFA students in the research, development, and articulation of a thematic body of work, within the context of contemporary art. Studio projects will be directed toward bringing individual vision toward full expression.

Pre-requisite(s): BFA students who have completed second-level course in their studio area only.

ART 4010 - Museum Methods

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

This course explains and demonstrates the three main areas of emphasis within the museum studies field: collections management, curation and interpretation, and arts administration. The course meets two times a week for a three hour session.

Pre-requisite(s): Consent of instructor.

ART 4110 - Advanced Drawing

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$45.00

Continued drawing exploration in various media with emphasis on focused personal direction, independent serial work, presentation of assigned research into related contemporary work, active participation in the critique process.

Pre-requisite(s): ART 3120 or consent of instructor.
May be repeated 3 times with a maximum of 9 credit hours-please consult a faculty advisor.

ART 4120 - Advanced Figure Drawing

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Course Fee: \$135.00

Advanced study of the structure of the human body with a greater stress on draftsmanship, historical uses of the figure in art, and individual explorations.

Pre-requisite(s): ART 3120 or consent of instructor.
May be repeated 3 times with a maximum of 9 credit hours-please consult a faculty advisor.

ART 4150 - Photography: Alternative Processes

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$150.00

Studio assignments are based on photographic alternatives to the silverprint. Historical references and perspectives provide the context for supervised studio/computer/assignments.

Pre-requisite(s): ART 3150 and ART 1140 [Inactive] or consent of instructor.

May be repeated 3 times with a maximum of 9 credit hours-please consult a faculty advisor.

ART 4200 - Advanced Printmaking

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$152.00

An advanced level class in printmaking with emphasis on screenprinting, relief, intaglio, and/or lithography. Emphasis on individual portfolio production.

Pre-requisite(s): ART 3200 or consent of instructor.
May be repeated twice with a maximum of 9 credit hours-please consult a faculty advisor.

ART 4310 - Ceramics III: Intermediate

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$182.00

This course addresses intermediate issues in craftsmanship, form and content through assignments and projects.

Students will conduct directed research, draft proposals, fire kilns, make clay and mix glazes.

Pre-requisite(s): ART 3310 or consent of instructor.

ART 4320 - Ceramics IV: Advanced

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$182.00

This course addresses advanced issues in craftsmanship and concepts through lecture and proposal based projects. Research assignments that explore ceramic processes and current trends in ceramic art are emphasized.

Pre-requisite(s): ART 4310 or consent of instructor.
May be repeated 4 times with a maximum of 12 credit hours.

ART 4350 - Small Metals/Jewelry III

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$125.00

Development of advanced design concepts and procedures with emphasis on basic techniques and concept development in fabrication, casting, enameling, cold connectors, and surface enrichment.

Pre-requisite(s): ART 3350 or consent of instructor.
May be repeated 3 times with a maximum of 9 credit hours-please consult a faculty advisor.

ART 4400 - Advanced Graphic Design

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$95.00

Application of design theory and process to complex problems in visual communication. Emphasis is placed on research, analysis, problem definition, and the development of individual design solutions. Studio projects vary each term and will generally involve visual identity, information design, environmental graphics, publication design, and design for interactive media.

Pre-requisite(s): ART 3435 - Experimental Typography, ART 3445 - Web Graphic Design, ARTH 3451 - Design History and Theory, and BFA program admission or consent of instructor.

May be repeated 3 times with a maximum of 9 credit hours-please consult a faculty advisor.

ART 4410 - Design Seminar

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$95.00

Orientation to professional practice in visual communication including art direction and work situations, client relations, portfolio and resume preparation, self promotion, and career advancement. Course contents will be explored through reading, writing, lecture, discussion, critique, simulation, guest presentations, studio visits, and project work tailored to individual portfolio development.

Pre-requisite(s): ART 3410 - Design Seminar for Juniors and BFA program admission, or consent of instructor.

May be repeated twice with a maximum of 9 credit hours-please consult a faculty advisor.

ART 4415 - Design Production

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$95.00

Technical processes and procedures for Art Major, Visual Communication emphasis. Emphasis is placed on file preparation and technical procedures for electronic media and for offset printing including proofing methods, paper, binding and other finishing processes.

Pre-requisite(s): ART 3430 and ART 3435 or consent of instructor.

ART 4420 - Advanced Digital Media

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$70.00

Students will further develop personal expression in the visual arts using computer media through aesthetic problem solving and further development of digital media skills.

There will be an emphasis on strengthening the students' ability to work independently while supplying the necessary feedback from the interaction of a class.

Pre-requisite(s): ART 2420A, ART 2420B, ART 2420C, ART 2420D, or consent of instructor.

May be repeated twice with a maximum of 9 credit hours-please consult a faculty advisor.

ART 4440 - Interaction Design

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$70.00

This course is an introduction to the principles of interaction design as it relates to physical and digital space, with a focus on designing user-centered artifacts like interactive publications and apps for hand-held devices. Theoretical concepts like ethnography, user-testing, and the use of mapping in design will be explored. We will also explore the landscape of technology as it relates to interaction, and the use of appropriate tools and software to create prototypes and functioning digital designs.

Pre-requisite(s): ART 3445 - Web Graphic Design or consent of instructor.

May be repeated once for credit.

ART 4460 - Advanced Illustration

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$95.00

Development of individual approaches to advanced problems in illustration. Emphasis is placed on the formulation of visual metaphor, articulation of form, and on professional practices. Studio projects vary each term and will generally involve editorial, reportorial, scientific, advertising, and instructional problems in pictorial communication.

Pre-requisite(s): ART 3460 or consent of instructor.

May be repeated twice with a maximum of 9 credit hours-please consult a faculty advisor.

ART 4550 - Photography: Studio Lighting

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$150.00

This is a practical course that enables students to better control and use light and lighting in their work. Students will be introduced to a range of artificial light sources and lighting techniques to be used as a means of creative control. Work will center in the studio where controlled conditions and a directorial approach can yield the artist's intent.

Pre-requisite(s): ART 2450.

May be repeated once with a maximum of 6 credit hours.

ART 4600 - Painting III

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$80.00

Emphasis on developing independence in the painting student and to provide an opportunity for them to pursue

their own area of interest in painting while providing the necessary feedback from the interaction of a class.

Pre-requisite(s): ART 3600 or consent of instructor.
May be repeated 3 times with a maximum of 9 credit hours-please consult a faculty advisor.

ART 4660 - Special Topics in Photography

Credits: (3)

Variable Title

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$125.00

A study of specific topics in photography, the subject and faculty change each time this course is offered. Example topics include "Documentary Photography," "Visual Books," "Video Art," and "Directed Visions."

Pre-requisite(s): ART 3150 or consent of instructor.
May be repeated 2 times for credit - consult with faculty advisor.

ART 4700 - Sculpture III

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$125.00

Advanced individual problems in selected areas of concentration; research and development of conceptual, technical, and methodological concerns.

Pre-requisite(s): ART 3700 or consent of instructor.
May be repeated 3 times with a maximum of 9 credit hours-please consult a faculty advisor.

ART 4750 - Experimental Photography

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Course Fee: \$150.00

This course explores experimental photographic alternatives to the traditional methods of photographic image making. Emphasis will be placed on using the camera, darkroom techniques and digital and emerging technology in ways that will give the students the mind-set and ability to push the limits of the medium.

Pre-requisite(s): ART 2450 or ART 2250.
May be repeated 3 times with a maximum of 9 credit hours-please consult a faculty advisor.

ART 4801 - College of Arts & Humanities Leadership Lecture Series

Credits: (1)

Typically Taught Spring Semester: *Full Sem*

This one-credit elective course will give arts and humanities' majors the opportunity to interact with successful guest lecturers whose undergraduate backgrounds are in the arts and humanities. Lecturers will clarify how the talents and skills associated with their degrees have contributed to their pursuit of successful careers and lives.

ART 4810 - Experimental

Credits: (1-6)

Experimental Course, Contact Department for More Information

Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript. Refer to Experimental Courses.

ART 4830 - Directed Readings

Credits: (1-3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$25.00

Individually chosen readings on specialized topic supervised by a faculty member.

Pre-requisite(s): Consent of faculty supervisor prior to registration.

May be repeated twice with a maximum of 3 credit hours-please consult a faculty advisor.

ART 4890 INT - Cooperative Work Experience

Credits: (1-2)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

An opportunity for students to receive academic credit for faculty approved on-the-job learning experiences within certain visual arts areas of emphasis. C/NC only.

Pre-requisite(s): By instructor approval only and previous or concurrent enrollment in art classes as specified by each area of emphasis.

May be repeated for a maximum of 6 credit hours-please consult a faculty advisor.

ART 4900 - Individual Studies

Credits: (1-3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$18.00

Individual studies in selected areas of emphasis. Open to juniors and seniors by instructor approval only.

May be repeated for a maximum of 6 credit hours-please consult a faculty advisor.

ART 4910 INT - Photography: Internship

Credits: (1-3)

Typically Taught Spring Semester: *Full Sem*

Students have the opportunity to engage in a close learning relationship with professional photographers. These opportunities include workshops, seminars, professional assistantships, and residencies. Students will be responsible for researching and proposing mentorships. Area faculty will approve proposals, help place students with mentors and review the progress of mentorships.

Pre-requisite(s): ART 3150 or consent of instructor.

May be repeated for credit - consult with faculty advisor.

ART 4920 - Short Courses, Workshops, Institutes and Special Programs

Credits: (1-3)

Variable Title

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$26.00

In order to provide flexibility and to meet many different needs, a number of specific offerings are possible using this catalog number. When the number is used it will be accompanied by a brief and specific descriptive title. The specific title with the credit authorized for the particular offering will appear on the student transcript.

May be repeated 5 times with a maximum of 6 credit hours with different topics.

ART 4930 INT - Teaching Assistantship Experience

Credits: (2)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Designed for students who wish to gain teaching experience for graduate school. By observation and participation with the instructor, students will learn how a basic art course is designed and taught.

Pre-requisite(s): Student must be in the BFA program and have instructor consent.

ART 4990 - BFA Thesis

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$25.00

Emphasis on portfolio preparation and professional writing skills pertinent to the completion of the BFA Thesis Exhibit and future career applications. Students work on the development and synthesis of ideas, and fine-tune relevant artistic and critical evaluation skills. During this course students will be required to produce new work for the BFA Thesis Exhibit.

Pre-requisite(s): Senior level BFA student. Completion of ART 3995 BFA Seminar. Registration by departmental approval only. Course cannot be taken during the semester immediately following BFA Seminar.

May be repeated for credit - consult with faculty advisor.

ARTH 1090 CA - Art and Architecture of the World: Paleolithic-AD 1000

Credits: (4)

Typically Taught Summer Semester: *1st Blk*

Typically Taught Fall Semester: *Full Sem*

Course Fee: \$37.00

A global survey of the history of art and architecture from BC 15,000 to AD 1000. Visual art from the first artistic expressions on rocks to the art of emerging civilizations (such as Mesopotamia, Egypt, China, India, and Africa), and the monuments and small-scale artifacts of the Medieval Ages will be analyzed in its historical, social, political, and broader cultural contexts.

ARTH 1100 CA - Art and Architecture of the World: AD 1000-Present

Credits: (4)

Typically Taught Summer Semester: *2nd Blk*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$37.00

A global survey of the history of art and architecture from AD 1000 to the present. Visual art from Gothic cathedrals and Islamic book art to Renaissance Europe and the Chinese Empire, from the Age of Enlightenment to contemporary art will be analyzed in its historical, social, political, and broader cultural contexts.

ARTH 2040 - Art and Architecture of Asia

Credits: (4)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$37.00

A historical account of the architecture, sculpture, and painting of Asia (India, Nepal, Tibet, Myanmar, Sri Lanka, Thailand, Cambodia, Indonesia, China, Korea, and Japan), including the political, religious, and intellectual history informing the arts of each country.

ARTH 3030 - Native American Art of the Southwest: From the Anasazi to the Present

Credits: (4)

Typically Taught Fall Semester: *Full Sem odd years*

Course Fee: \$37.00

Focuses on the arts of the Native Americans in the Southwest from their archaeological past to the present with occasional relevant explorations of Native American art in general. Study of traditional and contemporary modes of artistic expressions.

ARTH 3040 - Global Modernisms: 1850 to the Early 20th Century

Credits: (4)

Typically Taught Fall Semester: *Full Sem*

Course Fee: \$37.00

The history of visual art and culture from circa 1850 into the early 20th century. This course explores the European roots of Modernism, its dissemination to North America and its global manifestations. Areas of study will include Impressionism to Art Nouveau, Women Artists of the Fin-de-Siècle, Modernism in Canada and Latin America as well as Native American and Asian Modernisms. The political, social, and intellectual histories that inform the arts as well as pertinent cross-cultural considerations will provide the context for exploring these global modernisms.

ARTH 3045 - Global Modernisms: Early 20th Century to 1960

Credits: (4)

Typically Taught Spring Semester: *Full Sem*

The history of visual art and culture from circa 1900 to the 1960s. This course explores the continuous evolution of Modernism. Areas of study will include Cubism to Vorticism, Colonialism and Modernism in Africa, Central European Avant-Gardes, International Dada and Surrealism, African-American Modernism and the crisis of Modernism in the post-colonial, post-war global community. The political, social, and intellectual histories that inform the arts as well as pertinent cross-cultural

considerations will provide the context for exploring these global modernisms.

ARTH 3050 - Contemporary Art

Credits: (4)

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$37.00

Critical analysis of developments in the arts (including multimedia art, photography, performance art, installations, and feminist art) from 1960s to the present. Emphasis on post modern currents and issues and their study in the context of broader cultural contexts.

Pre-requisite(s): ARTH 1100 or consent of instructor.

ARTH 3055 - Special Topics in Art History

Credits: (4)

Variable Title

Typically Taught Spring Semester: *Full Sem odd years*

Course Fee: \$37.00

This course will explore different topics and content related to art history and the contemporary practice of art; the content of the course will change as the main topic changes. Students will gain the benefit of a deep dive into a specific time period, discourse, or exploration of media. May be repeated four times for a maximum of 12 credit hours.

ARTH 3060 - The Art and Architecture of India

Credits: (4)

Typically Taught Fall Semester: *Full Sem*

Course Fee: \$37.00

An historical account of the architecture, sculpture, and painting of India, including the political, religious, and intellectual history informing the arts of various regions.

ARTH 3070 - The Art and Architecture of China

Credits: (4)

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$37.00

An historical account of the architecture, sculpture and painting of China including the political, religious, and intellectual history informing the arts of different regions. May be repeated for a maximum of 4 credit hours-please consult a faculty advisor.

ARTH 3080 - The Art and Architecture of Japan

Credits: (4)

Typically Taught Fall Semester: *Full Sem*

Course Fee: \$37.00

An historical account of the architecture, sculpture and painting of Japan, including the political, religious, and intellectual history informing the arts of different regions. May be repeated for a maximum of 4 credit hours-please consult a faculty advisor.

ARTH 3100 - The Art and Architecture of the Islamic World

Credits: (4)

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$37.00

An historical survey of the architecture, sculpture, and painting of the Islamic world, including the political, religious, and intellectual history informing the arts of different countries: Iran, Iraq, Egypt, Turkey, North Africa, India, Spain, and Indonesia.

ARTH 3451 - Design History and Theory

Credits: (4)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$37.00

An investigation of selected movements, figures and theories from the history of graphic design. Contents include intersections with art and related disciplines along with the social, political, and technical forces that have influenced visual culture over time. Topics are selected thematically according to their significance to the design profession in our current day and include the role of design research in contemporary practice.

Pre-requisite(s): ART 3430 - Typography and Publication Design and ART 2435 - Graphic Design Practice, or consent of instructor.

ARTH 3850 - Travel-Study Art History

Credits: (1-4)

Variable Title

Typically Taught Summer Semester: *Full Sem*

The study of the history of art and architecture will be in direct response to a country or region and its culture or it may be related to an event that takes place in that area while students are there. Instruction will be given in English.

Pre-requisite(s): ARTH 1090 or ARTH 1100 or ARTH 2040.

ARTH 3950 - Photography: History, Theory and Criticism

Credits: (4)

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$37.00

This is a reading, writing and discussion course, which addresses historical and contemporary issues of photographic art practices. Written projects and class discussions will focus on developing a critical understanding of the readings as they relate to the historical development and contemporary practice of photography as a fine art, to the influence photography has had on the history of art and to the broader cultural impact of photography and digital media.

Pre-requisite(s): ARTH 1100 or consent of instructor.

ASL 1010 - First Semester ASL

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$8.00

(N=Novice) Introductory course assuming no significant previous experience with the language. Beginners and students with less than two years of high school language should register for this class. Emphasis on everyday conversation and exposure to cultural perspectives.

ASL 1020 - Second Semester ASL

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$8.00

(N=Novice) Continuation of ASL 1010. Basic language skills including listening, speaking, reading, writing and culture.

ASL 2010 - Third Semester ASL

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$8.00

(NH=Novice High) Continuation of ASL 1020. Assumes completion of first-year or equivalent experience. Students

learn to understand and express ideas about their community and the world. Includes listening, speaking, reading, writing and culture.

ASL 2020 HU - Fourth Semester ASL

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$8.00

(NH=Novice High) Continuation of ASL 2010. The learning and application of strategies for acquiring a foreign language. Students also learn how cultural products and practices reflect a culture's attitudes, values, ideas and meaning. The process of language acquisition and the seeking of cross-cultural understanding provide insights into the commonalities of how the human family learns, thinks and communicates.

ASL 2021 - Second Year II

Credits: (3)

(NH=Novice High) Continuation of ASL 2010 without General Education Humanities credit. Offered through examination only.

Note: Only available through testing.

ASL 2030 - Second Year Language Review

Credits: (3)

Course Fee: \$8.00

(NH=Novice High) This course will prepare students who wish to continue language study. Emphasis on conversational skills and a review of language structure and usage.

Note: Check with department for course availability.

ASL 2920 - Short Courses, Workshops, Institutes and Special Programs

Credits: (1-6)

Consult the class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript.

ASL 3000 - Proficiency Development

Credits: (3)

Course Fee: \$8.00

(IL=Intermediate Low) This is a transition course to upper

division. The course focuses on oral proficiency development. Students will learn a variety of techniques and strategies to increase their oral proficiency in a variety of social, educational and cultural settings. Native-speaking students or those who have acquired proficiency through residence in the target language community are not eligible to take this class.

Note: Check with department for course availability.

ASL 3116 - DLI Bridge Course I

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Taught in DLI High Schools for students who have passed the AP Exam with a 4 or higher. Although this is a three credit-hour class, it will meet over the course of a full academic year. Credit will count toward a major or minor in the language.

Pre-requisite(s): ASL 2020 or AP exam with a score of 4 or better

ASL 3117 - DLI Bridge Course II

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Taught in DLI High Schools for students who have passed the AP Exam with a 4 or higher. Although this is a three credit-hour class, it will meet over the course of a full academic year. Credit will count toward a major or minor in the language.

Pre-requisite(s): FL 2020 or AP exam with a score of 4 or better

ASL 3118 - DLI Bridge Course III

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Taught in DLI High Schools for students who have passed the AP Exam with a 4 or higher. Although this is a three credit-hour class, it will meet over the course of a full academic year. Credit will count toward a major or minor in the language.

Pre-requisite(s): ASL 2020 or AP exam with a score of 4 or better

ASL 3270 - Special Topics in Linguistics

Credits: (3)

Variable Title

Course Fee: \$8.00

(IM=Intermediate Mid) An introduction to linguistic structures and semantic elements. The course provides

useful information and practice in the language, its structures and usage. The sub-disciplines of linguistics, other than phonetics and phonology (covered in FL 3220), will be studied. These may include lexical analysis, semantics, morphology, syntax, linguistic change and dialectal variation.

Note: Check with department for course availability.

ASL 3550 - Cultural Heritage I

Credits: (3)

Variable Title

Course Fee: \$8.00

(Intermediate Mid) In-depth studies in culture, history, geography, social customs, fine arts and civilization. May be repeated up to 7 times for credit and for other non-English speaking cultures.

ASL 4830 - Directed Readings

Credits: (1-3)

(IH=Intermediate High) Independent readings under the direction of a faculty member.

May be repeated up to 10 times.

Note: Check with Department for course availability.

ASL 4920 - Short Courses, Workshops, Institutes and Special Programs

Credits: (1-4)

(minimal proficiency level varies with content) Consult the class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript.

May be repeated 5 times with a maximum of 6 credit hours.

Note: Course not currently being offered.

ASTR 1040 PS - Elementary Astronomy

Credits: (3)

Typically Taught Fall Semester: *Full Sem, Full Sem Online*

Typically Taught Spring Semester: *Full Sem, Full Sem Online*

A brief survey of the physical universe using the fundamental laws of physics. Topics include the history of astronomy, the solar system, the sun, the evolution of stars, pulsars, black holes, the Milky Way galaxy, galaxies, quasars, and the Big Bang.

Three hours of lecture per week.

Cross-listed with PHYS 1040.

ASTR 2040 PS - Principles of Observational Astronomy

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

An introductory course in observational astronomy. Topics will include planetary, stellar, and galactic astronomy, with a focus on modern observational techniques, including digital imagery, spectroscopy, and observing with science-grade astronomical instrumentation. *Cross-listed with PHYS 2040.*

Pre-requisite(s): MATH 1060 (minimum grade of C).

ASTR 2800 - Introductory Individual Research Problems

Credits: (1-3)

Time and credit to be arranged. Intended for students working on a directed research project which includes physics/astronomy at the lower division level for one or more semesters.

Pre-requisite(s): Consent of instructor.

Cross-listed with PHYS 2800.

May be repeated up to 10 times.

ASTR 2830 - Introductory Readings in Physics/Astronomy

Credits: (1-3)

Time and credit to be arranged. Intended for students working on a directed reading project which includes physics/astronomy at the lower division level for one or more semesters.

Pre-requisite(s): Consent of instructor.

Cross-listed with PHYS 2830.

May be repeated up to 10 times.

ASTR 3040 - Principles of Observational Astronomy, Advanced

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

An advanced course in observational astronomy. Topics will include planetary, stellar, and galactic astronomy, with a focus on modern observational techniques, including digital imagery, spectroscopy, and observing with science-grade astronomical instrumentation. *Cross-listed with PHYS 3040.*

Pre-requisite(s): PHYS 2710 and PHYS 3180.

ASTR 3160 - Stellar and Planetary Astrophysics

Credits: (3)

Typically Taught Spring Semester: *Full Sem odd years*

Selected topics in astrophysics with a focus on stellar and planetary systems. Topics may include celestial mechanics, interaction of light and matter, stellar and planetary spectroscopy, stellar atmospheres and interiors, binary star systems, planets and planet formation, and extrasolar planets.

Pre-requisite(s): PHYS 2220.

Cross-listed with PHYS 3160.

ASTR 3170 - Galaxies and Cosmology

Credits: (3)

Typically Taught Spring Semester: *Full Sem even years*

Selected topics in astrophysics, with a focus on galactic astronomy and cosmology. Topics may include gravitational dynamics, interaction of light and matter, galaxy classification, galaxy formation and evolution, the structure of the universe, cosmology, and the origin and fate of the universe.

Pre-requisite(s): PHYS 2220.

Cross-listed with PHYS 3170.

ASTR 4800 - Individual Research Problems

Credits: (1-3)

Time and credit to be arranged. Open to qualified students for one or more semesters.

Pre-requisite(s): Consent of instructor.

Cross-listed with PHYS 4800.

May be repeated up to 10 times.

ASTR 4830 - Readings in Physics/Astronomy

Credits: (1-3)

Topics which can be studied include (but are not limited to): mechanics, thermodynamics, kinetic theory, statistical mechanics, electronics, electromagnetism, optics, solid-state physics, modern physics, nuclear physics, relativity, cosmology, and astrophysics. These courses may be taken at any time on a personalized basis. Time and credit to be arranged.

Pre-requisite(s): Consent of instructor.

Cross-listed with PHYS 4830.

May be repeated up to 10 times.

ATHL 1080 - Strength Training Level I

Credits: (1)

-For Club Hockey Players Only

May be repeated five times for credit.

ATHL 1081 - Strength Training Level II

Credits: (1)

-For Club Hockey Players Only

May be repeated five times for credit.

ATHL 1180 - Varsity Softball

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This athletic activity course is intended to engage students in the sport of softball at the collegiate level. Students will learn techniques, drills, and games to assist with the development of skills and competitive game play.

May be repeated 7 times with up to 8 credit hours.

ATHL 1510 - Varsity Volleyball

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This athletic activity course is intended to engage students in the sport of volleyball at the collegiate level. Students will learn techniques, drills, and games to assist with the development of skills and competitive game play.

May be repeated 7 times with up to 8 credit hours.

ATHL 1520 - Varsity Soccer

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This athletic activity course is intended to engage students in the sport of soccer at the collegiate level. Students will learn techniques, drills, and games to assist with the development of skills and competitive game play.

May be repeated 7 times with up to 8 credit hours.

ATHL 1570 - Varsity Basketball

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This athletic activity course is intended to engage students

in the sport of basketball at the collegiate level. Students will learn techniques, drills, and games to assist with the development of skills and competitive game play. May be repeated 7 times with up to 8 credit hours.

ATHL 1580 - Varsity Cross Country

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

This athletic activity course is intended to engage students in the sport of cross country at the collegiate level. Students will learn techniques and participate in drills to assist with the development of competitive skills and prepare for varsity cross country meets. May be repeated 7 times with up to 8 credit hours.

ATHL 1590 - Varsity Football

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This athletic activity course is intended to engage students in the sport of football at the collegiate level. Students will learn techniques, drills, and games to assist with the development of skills and competitive game play. May be repeated 7 times with up to 8 credit hours.

ATHL 1600 - Varsity Golf

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This athletic activity course is intended to engage students in the sport of golf at the collegiate level. Students will learn techniques, drills, and games to assist with the development of skills and competitive game play. May be repeated 7 times with up to 8 credit hours.

ATHL 1630 - Varsity Tennis

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This athletic activity course is intended to engage students in the sport of tennis at the collegiate level. Students will learn techniques, drills, and games to assist with the development of skills and competitive game play. May be repeated 7 times with up to 8 credit hours.

ATHL 1640 - Varsity Track and Field

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This athletic activity course is intended to engage students in the sport of track and field at the collegiate level. Students will learn techniques and drills to assist with the development of skills for competition. May be repeated 7 times with up to 8 credit hours.

ATHL 1680 - Varsity Indoor Track

Credits: (1)

Typically Taught Spring Semester: *Full Sem*

This athletic activity course is intended to engage students in the sport of indoor track at the collegiate level. Students will learn techniques and drills to assist with the development of skills for competition. May be repeated 7 times with up to 8 credit hours.

ATHL 1760 - Spirit Squad

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This athletic activity course is intended to engage students in dance/cheer for the spirit squad at the collegiate level. Students will learn techniques to assist with the development of skills and performance. May be repeated 7 times with up to 8 credit hours.

ATTC 3000 - Introduction to Automotive Technology

Credits: (1)

Typically Taught Summer Semester: *Full Sem Online*

Typically Taught Fall Semester: *Full Sem, Full Sem Online*

An introduction to the Automotive Technology program. Degree requirements and options, internship preparation, employment opportunities, required professional publications, communication, and other topics. (This course is a prerequisite for most automotive technology courses.)

Pre-requisite(s): Proof of completion of an Associate of Applied Science AAS or Associate of Science AS degree in automotive service technology or a related degree.

ATTC 3020 - Introduction to Safety Management and Hazardous Materials

Credits: (3)

Typically Taught Spring Semester: *Full Sem, Full Sem Online*

An overview of the environmental issues related to the use and service of vehicles, with emphasis on air quality topics. Environmental regulations, safe practices, disposal of hazardous substances, such as paints and solvents.

ATTC 3260 - Advanced Electrical Systems

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

A study of the advanced electrical systems in today's vehicles. Vehicle communication networks, body control systems, chassis control systems, powertrain control, hybrid control, and battery control systems.

ATTC 3280 - Advanced Painting and Refinishing

Credits: (3)

Preparation for insurance industry employment. Includes advanced topics in surface preparation and application of contemporary and specialty paints. Matching, blending and complete vehicle refinishing. Inter-Industry Conference on Auto Collision Repair (I-CAR) training modules are included.

Lab included.

Pre-requisite/Co-requisite: ATTC 3000.

Note: Course not currently being offered.

ATTC 3480 - Advanced Structural Analysis and Damage Repair

Credits: (3)

Preparation for insurance industry employment. Includes advanced topics in frame and unibody repair. Replacement of major panels, measuring and corrective pulling, and occupant safety systems. Inter-Industry Conference on Auto Collision Repair (I-CAR) training modules are included.

Lab included.

Pre-requisite(s): ATTC 3280.

Note: Course not currently being offered.

ATTC 3520 - Fleet Management

Credits: (3)

Typically Taught Fall Semester: *Full Sem Online*

Study of fleet standards, fixed operations, inventory and

personnel management, financial policies and procedures. Includes financial statement analysis.

ATTC 3620 - Automotive Business Practices

Credits: (3)

Typically Taught Spring Semester: *Full Sem Online*

Study of independent shop and corporate dealership standards, fixed operations, inventory and personnel management, and industry report systems, financial policies and procedures. Includes financial statement analysis.

ATTC 3680 - Automotive Damage Analysis and Estimating

Credits: (3)

Preparation for insurance industry employment. Includes an overview of vehicle damage analysis, restraint systems, mechanical and electrical systems. Topics also include industry standard terminology, procedures, and estimation software usage.

Lab included.

Pre-requisite(s): ATTC 3480.

Note: Course not currently being offered.

ATTC 3760 - Advanced Automotive Technologies

Credits: (3)

Typically Taught Fall Semester: *Full Sem, Full Sem Online*

A study of current events/trends in the automotive industry, industry standard professional publications, and the latest technologies used by the automotive industry to meet current emissions, fuel economy, and safety regulations.

ATTC 3880 INT - Cooperative Practicum

Credits: (3)

Typically Taught Summer Semester: *Full Sem Online*

Supervised work experience with a sponsoring employer, designed to synthesize theory and practice. Full-time, upper division related employment and approval of faculty supervisor required.

ATTC 4380 - Advanced Non-Structural Analysis and Damage Repair

Credits: (3)

Preparation for insurance industry employment. Includes advanced topics in safety, welding processes, panel repair and replacement, trim application, water and wind leakage. Inter-Industry Conference on Auto Collision Repair (I-CAR) training modules are included. Lab included.

Pre-requisite(s): ATTC 3480.

Note: Course not currently being offered.

ATTC 4530 - Hybrid and Electric Vehicle Systems

Credits: (3)

Typically Taught Spring Semester: *Full Sem Online*

An in-depth look at the operation, diagnosis, and service of hybrid (HEV), plug-in hybrid (PHEV), and electric vehicles (EV). Topics include: Safety and personal protective equipment (PPE), low voltage systems, high voltage systems, high voltage batteries, inverter/converters, transaxles, electric motors, Atkinson Cycle internal combustion engines (ICE), heating, ventilation, and air-conditioning (HVAC) systems, braking/regenerative braking, and steering systems. Preparation for the ASE L3 Light duty hybrid/electric vehicles exam is included.

ATTC 4540 - Automated Safety and Convenience Systems

Credits: (3)

Typically Taught Fall Semester: *Full Sem Online*

An in-depth look at the operation, diagnosis and service of the automated safety and convenience systems found on modern vehicles. Topics will include: AUTOMATED: vehicle system classifications (driver assisted, partial automated, conditional automated, high automated, and fully automated). SAFETY: advanced cruise systems, advanced steering systems, advanced suspension systems, advanced parking systems. CONVENIENCE: In car WiFi, vehicle to vehicle communication, biometrics, active health monitoring, comprehensive vehicle tracking, advanced heads up displays.

ATTC 4550 - Advanced Automotive Emissions

Credits: (3)

Typically Taught Fall Semester: *Full Sem Online*

The study and evaluation of vehicle and fuel technologies to meet current and future emissions standards. We will explore what automotive emissions are currently regulated, purpose and procedures associated with emissions testing,

current and future emissions reduction technologies, and how sustainable manufacturing is being implemented in industry. The topics in this class will help you to prepare for the L1 Advanced Engine Performance test.

ATTC 4560 - Advanced Propulsion Systems

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

A study of advanced propulsion systems including those used on hybrid-electric vehicles, plug-in hybrids, electric vehicles, and other propulsion technologies. Advanced transmissions/transaxles, wheel motors, drive motors, etc. are included.

ATTC 4710 - Capstone Research Methods

Credits: (2)

Typically Taught Fall Semester: *Full Sem, Full Sem Online*

This is the first course in the Capstone Project for seniors. This course will prepare students to complete the capstone project. Students will create the initial proposal and receive approval for the project. Students will start the research for the project using the standards established by the Society of Automotive Engineers (SAE).

ATTC 4720 - Capstone Research and Development

Credits: (3)

Typically Taught Spring Semester: *Full Sem, Full Sem Online*

The use of sophisticated diagnostic tools and equipment. Emphasis is on diagnosis and the development of analytical thinking as it applies to technical problems. Includes lab.

Pre-requisite(s): ATTC 4710.

ATTC 4760 - Alternate Fuel Systems

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

A study of alternate fuel systems including bio fuels (ethanol and bio-diesel systems), advanced diesel systems, hybrid-electric vehicles, Compressed Natural Gas (CNG) systems, hydrogen fuel cell, and other existing or emerging technologies.

Pre-requisite(s): ATTC 3760.

ATTC 4780 - Insurance Industry Business Practices

Credits: (3)

An overview of the business practices used by the automotive insurance industry. Included is the use of industry standard software to determine insurance policy coverage, vehicle reparability (current value verses repair costs) and parts availability.

Pre-requisite/Co-requisite: ATTC 3680 and PS 3203.

Note: Course not currently being offered.

ATTC 4830 - Directed Readings

Credits: (1-3)

Typically Taught Fall Semester: *Full Sem Online*

Typically Taught Spring Semester: *Full Sem Online*

Individual readings supervised by a faculty member.

Pre-requisite(s): Approval of instructor.

May be repeated twice up to 3 credit hours.

ATTC 4860 - Automotive Standards, Laws, and Regulations

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

A study of automotive industry related Society of Automotive Engineers (SAE) standards, State Regulations, U.S. Environmental Protection Agency (EPA) emissions regulations, National Highway Traffic Safety Administration (NHTSA), Federal Motor Vehicle Safety Standards (FMVSS), Corporate Average Fuel Economy (CAFE) regulations, and others.

Pre-requisite(s): ATTC 3000.

ATTC 5920 - Short Courses and Workshops

Credits: (1-4)

Variable Title

Consult the semester class schedule for the current offerings under this number.

AUSV 1000 - Introduction to Automotive Service

Credits: (2)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

An introduction to automotive shop safety, pollution

prevention, hazardous waste handling, Internet-based electronic service information, diagnostic scan tools, ASE certifications, safety inspection certifications, emissions inspection certifications, developing job interview skills, and resume writing.

Note: (This course is a prerequisite for all automotive service courses.)

AUSV 1001 - Collision Repair Fundamentals and Estimating

Credits: (2)

This course is an introduction to the collision repair industry and the construction of the modern automobile as it applies to the collision repair industry. Emphasis will be placed on locating vehicle information, basic construction of vehicles, environmental concerns and issues, and writing collision repair estimates on damaged vehicles.

Note: Course not currently being offered.

AUSV 1010 - Automotive Technology Orientation

Credits: (1)

Typically Taught Fall Semester: *1st Blk*

Typically Taught Spring Semester: *1st Blk*

An introduction to maintenance and light repair tasks including: lube oil and filter change, basic under vehicle inspection and maintenance, basic under hood inspection and maintenance, wheel and tire service, Internet-based electronic service information, and diagnostic scan tools, (This course is a prerequisite for all automotive service courses.)

AUSV 1020 - Braking, Steering, Suspension, and Climate Control Systems

Credits: (8)

Theory, operation, diagnosis and repair of braking, steering, and suspension systems. The use of electronic service information, the proper diagnostic process, and proper diagnostic service tools is emphasized.

Pre-requisite(s): AUSV 1000, AUSV 1325.

Note: (AUSV 1020 is equivalent to AUSV 1021, AUSV 1022, and AUSV 2320.)

AUSV 1021 - Automotive Braking Systems 1

Credits: (2)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Theory, operation, diagnosis, and repair of braking systems. This is the first part of a two-part class.

Note: (AUSV 1021, AUSV 1022, and AUSV 2320 are equivalent to AUSV 1000, AUSV 1020.)

AUSV 1022 - Steering and Suspension Systems 1

Credits: (2)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Theory, operation, diagnosis, and repair of steering and suspension systems. This is the first part of a two-part class.

Note: (AUSV 1021, AUSV 1022, and AUSV 2320 are equivalent to AUSV 1000, AUSV 1020.)

AUSV 1023 - Automotive Braking Systems 2

Credits: (2)

Typically Taught Fall Semester: *Full Sem, 2nd Blk*

Typically Taught Spring Semester: *Full Sem, 2nd Blk*

Theory, operation, diagnosis, and repair of automotive braking systems. This is the second part of a two-part class.

AUSV 1025 - Steering and Suspension Systems 2

Credits: (2)

Typically Taught Fall Semester: *Full Sem, 2nd Blk*

Typically Taught Spring Semester: *Full Sem, 2nd Blk*

Theory, operation, diagnosis, and repair of steering and suspension systems. This is the first part of a two-part class.

AUSV 1030 - Honda Braking, Steering, Suspension, and Climate Control Systems

Credits: (8)

Theory, operation, diagnosis, and repair of Honda braking, steering, suspension, and climate control systems. The use of electronic service information, the proper diagnostic process, and proper diagnostic service tools is emphasized.

Pre-requisite(s): AUSV 1000, AUSV 1335.

Note: (AUSV 1030 is comprised of AUSV 1031, AUSV 1032 and AUSV 2330.) Course not currently being offered.

AUSV 1031 - Honda Braking Systems

Credits: (3)

Theory, operation, diagnosis, and repair of Honda braking systems.

Pre-requisite(s): AUSV 1000.

Note: (AUSV 1030 is equivalent to AUSV 1031, AUSV 1032, and AUSV 2330). Course not currently being offered.

AUSV 1032 - Honda Steering and Suspension Systems

Credits: (2)

Theory, operation, diagnosis, and repair of Honda steering and suspension systems.

Note: (AUSV 1031, AUSV 1032, and AUSV 2330 are equivalent to AUSV 1000, AUSV 1030.) Course not currently being offered.

AUSV 1040 - General Motors Braking, Steering, Suspension and Climate Control Systems

Credits: (8)

Theory, operation, diagnosis, and repair of General Motors braking, steering, suspension, and climate control systems. The use of electronic service information, the proper diagnostic process, and proper diagnostic service tools is emphasized.

Pre-requisite(s): AUSV 1000, AUSV 1345.

Note: (AUSV 1040 is comprised of AUSV 1041, AUSV 1042 and AUSV 2340.)

AUSV 1041 - General Motors Braking Systems

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

Theory, operation, diagnosis, and repair of General Motors braking systems. (AUSV 1040 is equivalent to AUSV 1041, AUSV 1042, and AUSV 2340).

Pre-requisite(s): AUSV 1000, AUSV 1345.

AUSV 1042 - General Motors Steering and Suspension Systems

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

Theory, operation, diagnosis, and repair of General Motors steering and suspension systems.

Pre-requisite(s): AUSV 1000.

Note: (AUSV 1041, AUSV 1042, and AUSV 2340 are equivalent to AUSV 1000, AUSV 1040.)

AUSV 1050 - Chrysler Braking, Steering, Suspension and Climate Control Systems

Credits: (8)

Theory, operation, diagnosis, and repair of Chrysler braking, steering, suspension, and climate control systems. The use of electronic service information, the proper diagnostic process, and proper diagnostic service tools is emphasized.

Pre-requisite(s): AUSV 1000, AUSV 1355.

Note: (AUSV 1050 is comprised of AUSV 1051, AUSV 1052 and AUSV 2350.) Course not currently being offered.

AUSV 1051 - Chrysler Braking Systems

Credits: (3)

Theory, operation, diagnosis, and repair of Chrysler braking systems.

Pre-requisite(s): AUSV 1000, AUSV 1355.

Note: (AUSV 1050 is equivalent to AUSV 1051, AUSV 1052, and AUSV 2350). Course not currently being offered.

AUSV 1052 - Chrysler Steering and Suspension Systems

Credits: (3)

Theory, operation, diagnosis, and repair of Chrysler steering and suspension systems.

Pre-requisite(s): AUSV 1000.

Note: (AUSV 1051, AUSV 1052, and AUSV 2350 are equivalent to AUSV 1000, AUSV 1050.) Course not currently being offered.

AUSV 1060 - Toyota Braking, Steering, Suspension, and Climate Control Systems

Credits: (8)

Theory, operation, diagnosis, and repair of Toyota braking, steering, suspension, and climate control systems. The use of electronic service information, the proper diagnostic

process, and proper diagnostic service tools is emphasized.

Pre-requisite(s): AUSV 1000, AUSV 1365.

Note: (AUSV 1060 is comprised of AUSV 1061, AUSV 1062 and AUSV 2360.) Course not currently being offered.

AUSV 1061 - Toyota Braking Systems

Credits: (3)

Theory, operation, diagnosis, and repair of Toyota braking systems.

Pre-requisite(s): AUSV 1000, AUSV 1365.

Note: (AUSV 1060 is equivalent to 1061, AUSV 1062 and AUSV 2360.) Course not currently being offered.

AUSV 1062 - Toyota Steering and Suspension Systems

Credits: (3)

Theory, operation, diagnosis, and repair of Toyota steering and suspension systems.

Pre-requisite/Co-requisite: AUSV 1000.

Note: (AUSV 1061, AUSV 1062, and AUSV 2360 are equivalent to AUSV 1000, AUSV 1060.) Course not currently being offered.

AUSV 1071 - H D Truck Brakes

Credits: (2)

Operation, diagnosis, inspection, and repair of air brake systems. Equivalent to DATC proficiency #48530, 48601.

AUSV 1072 - H D Truck Steering & Suspension

Credits: (3)

Operation, diagnosis, and repair of heavy duty steering and suspension systems. Equivalent to DATC proficiency #48540, 48550.

AUSV 1080 - Non-Structural Analysis and Damage Repair 1

Credits: (4)

Safety, welding processes, panel repair and replacement, trim application, water leak and wind noise issues . Proper use of modern body fillers and repair techniques. I-CAR training modules are included.

Pre-requisite(s): AUSV 1001 or instructor approval.

Note: Course not currently being offered.

AUSV 1085 - Painting and Refinishing 1

Credits: (4)

Introductory course on modern automotive paint application processes. Emphasis will be placed on Panel and part preparation as well as spray and application techniques.

Pre-requisite(s): AUSV 1001 or instructor approval.

Note: Course not currently being offered.

AUSV 1100 - Principles of Technology I

Credits: (2)

Scientific concepts of force, work, rate, resistance and energy are applied to mechanical and fluid systems found in modern industry.

Laboratory activities featuring measurement and instrumentation are emphasized.

Note: Course not currently being offered.

AUSV 1120 - Automotive Engines 1

Credits: (2)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Theory, operation, diagnosis, repair, and overhaul of automotive engines.

AUSV 1124 - Automotive Engines 2

Credits: (2)

Typically Taught Fall Semester: *Full Sem, 2nd Blk*

Typically Taught Spring Semester: *Full Sem, 2nd Blk*

Theory, operation, diagnosis, repair, and overhaul of automotive engines. This is the second part of a two-part class.

AUSV 1130 - Honda Engines

Credits: (3)

Theory, operation, diagnosis, repair, and overhaul of Honda engines.

Pre-requisite(s): AUSV 1000.

Note: Course not currently being offered.

AUSV 1140 - General Motors Engines

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

Theory, operation, diagnosis, repair, and overhaul of

General Motors engines.

Pre-requisite(s): AUSV 1000.

AUSV 1150 - Chrysler Engines

Credits: (3)

Theory, operation, diagnosis, repair, and overhaul of Chrysler engines.

Pre-requisite(s): AUSV 1000.

Note: Course not currently being offered.

AUSV 1160 - Toyota Engines

Credits: (4)

Theory, operation, diagnosis, repair, and overhaul of Toyota engines.

Pre-requisite(s): AUSV 1000.

Note: Course not currently being offered.

AUSV 1170 - H D Truck Engines

Credits: (5)

Operational principles, diagnosis and complete overhaul of diesel engines. Equivalent to DATC proficiency #48140, 48141, 48142, 48143, 48160, 48162, 48163.

AUSV 1180 - Structural Analysis and Damage Repair 1

Credits: (4)

Frame and unibody repair will be explored. Replacement of major structural panels and introduction to measuring and corrective pulling will be covered. Occupant safety and restraint systems will be examined. I-Car training modules are included.

Pre-requisite(s): AUSV 1001 or instructor approval.

Note: Course not currently being offered.

AUSV 1200 - Principles of Technology II

Credits: (2)

Scientific concepts pertaining to electricity, heat, sound and light are applied to systems found in modern industry.

Laboratory activities featuring measurement and instrumentation are emphasized.

Pre-requisite(s): AUSV 1000.

Note: Course not currently being offered.

AUSV 1220 - Automotive Manual Drivetrain Systems

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Theory, operation, diagnosis, maintenance, and overhaul of manual transmissions and transaxles, front and rear drive axles and differentials, drivelines, and transfer cases.

AUSV 1230 - Honda Manual Drivetrain Systems

Credits: (3)

Theory, operation, diagnosis, maintenance, and overhaul of Honda manual transmissions and transaxles, drive axles and differentials, drivelines, and transfer units.

Pre-requisite(s): AUSV 1000.

Note: Course not currently being offered.

AUSV 1240 - General Motors Manual Drivetrain Systems

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Theory, operation, diagnosis, maintenance, and overhaul of General Motors manual transmissions and transaxles, front and rear drive axles and differentials, drivelines, and transfer cases.

Pre-requisite(s): AUSV 1000.

AUSV 1250 - Chrysler Manual Drivetrain Systems

Credits: (3)

Theory, operation, diagnosis, maintenance, and overhaul of Chrysler manual transmissions and transaxles, front and rear drive axles and differentials, drivelines, and transfer cases.

Pre-requisite(s): AUSV 1000.

Note: Course not currently being offered.

AUSV 1260 - Toyota Manual Drivetrain Systems

Credits: (3)

Theory, operation, diagnosis, maintenance, and overhaul of Toyota manual transmissions and transaxles, front and rear drive axles and differentials, drivelines, and transfer cases.

Pre-requisite(s): AUSV 1000.

Note: Course not currently being offered.

AUSV 1270 - H D Truck Drive Mechanisms

Credits: (8)

Theory, operation, diagnosis, and overhaul of the clutch, transmission, drive lines, differentials, and wheel bearings. Equivalent to DATC proficiency #48401, 48403, 48603.

AUSV 1300 - Technical Mathematics

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Measurements, common and decimal fractions, square roots, surfaces, columns, capacities. Principles of algebra and geometry.

AUSV 1320 - Automotive Electronics 1

Credits: (2)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Electrical fundamentals, use of meters and wiring diagrams, wiring repair. Theory, diagnosis, and repair of computer inputs, outputs, and communication systems. The use of electronic service information, the proper diagnostic process, and proper diagnostic service tools are emphasized. This is a three-part class.

AUSV 1323 - Automotive Electronics 2

Credits: (2)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Electrical fundamentals, use of meters and wiring diagrams, wiring repair. Theory, diagnosis, and repair of computer inputs, outputs, and communication systems. The use of electronic service information, the proper diagnostic process, and proper diagnostic service tools are emphasized. This is a three-part class.

AUSV 1325 - Electrical Fundamentals 3

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Electrical fundamentals, use of meters and wiring diagrams, wiring repair. Theory, diagnosis, and repair of lighting, infotainment, electronic control modules. The use of electronic service information, the proper diagnostic process, and proper diagnostic service tools are emphasized. This is the third part of a three-part class.

AUSV 1330 - Honda Automotive Electronics

Credits: (4)

Electrical fundamentals, use of meters and Honda wiring diagrams, wiring repair. Theory, diagnosis, and repair of Honda computer inputs, outputs, and communication systems. The use of Honda electronic service information, the proper diagnostic process, and proper diagnostic service tools are emphasized.

Pre-requisite(s): (Recommended) AUSV 1000.

AUSV 1335 - Honda Electronics, Electrical and Body Control Systems

Credits: (7)

Electrical fundamentals, use of meters and Honda wiring diagrams, wiring repair. Theory, diagnosis, and repair of Honda computer inputs, outputs, and communication systems, starting, charging, lighting, air-bags, power accessories, and various body computer control systems. The use of Honda electronic service information, the proper diagnostic process, and proper diagnostic service tools is emphasized. (AUSV 1330, AUSV 2130 are equivalent to AUSV 1335.)

Note: Course not currently being offered.

AUSV 1340 - General Motors Automotive Electronics

Credits: (4)

Typically Taught Fall Semester: *Full Sem*

Electrical fundamentals, use of meters and General Motors wiring diagrams, wiring repair. Theory, diagnosis, and repair of General Motors computer inputs, outputs, and communication systems. The use of General Motors electronic service information, the proper diagnostic process, and proper diagnostic service tools are emphasized.

Pre-requisite(s): (Recommended) AUSV 1000.

AUSV 1345 - General Motors Electronics, Electrical and Body Control Systems

Credits: (7)

Electrical fundamentals, use of meters and General Motors wiring diagrams, wiring repair. Theory, diagnosis, and repair of General Motors computer inputs, outputs, and communication systems, starting, charging, lighting, air-bags, power accessories, and various body computer control systems. The use of General Motors electronic

service information, the proper diagnostic process, and proper diagnostic service tools is emphasized. (AUSV 1340, AUSV 2140 are equivalent to AUSV 1345.)

AUSV 1350 - Chrysler Automotive Electronics

Credits: (4)

Electrical fundamentals, use of meters and Chrysler wiring diagrams, wiring repair. Theory, diagnosis, and repair of Chrysler computer inputs, outputs, and communication systems. The use of Chrysler electronic service information, the proper diagnostic process, and proper diagnostic service tools are emphasized.

Pre-requisite(s): (Recommended) AUSV 1000.

Note: Course not currently being offered.

AUSV 1355 - Chrysler Electronics, Electrical and Body Control Systems

Credits: (7)

Electrical fundamentals, use of meters and Chrysler wiring diagrams, wiring repair. Theory, diagnosis, and repair of Chrysler computer inputs, outputs, and communication systems, starting, charging, lighting, air-bags, power accessories, and various body computer control systems. The use of Chrysler electronic service information, the proper diagnostic process, and proper diagnostic service tools is emphasized. (AUSV 1350, AUSV 2150 are equivalent to AUSV 1355.)

Note: Course not currently being offered.

AUSV 1360 - Toyota Automotive Electronics

Credits: (4)

Electrical fundamentals, use of meters and Toyota wiring diagrams, wiring repair. Theory, diagnosis, and repair of Toyota computer inputs, outputs, and communication systems. The use of Toyota electronic service information, the proper diagnostic process, and proper diagnostic service tools are emphasized.

Pre-requisite(s): (Recommended) AUSV 1000.

Note: Course not currently being offered.

AUSV 1365 - Toyota Electronics, Electrical and Body Control Systems

Credits: (7)

Electrical fundamentals, use of meters and Toyota wiring diagrams, wiring repair. Theory, diagnosis, and repair of

Toyota computer inputs, outputs, and communication systems, starting, charging, lighting, air-bags, power accessories, and various body computer control systems. The use of Toyota electronic service information, the proper diagnostic process, and proper diagnostic service tools is emphasized. (AUSV 1360, AUSV 2160 are equivalent to AUSV 1365.)

Note: Course not currently being offered.

AUSV 1400 - Automotive Fundamentals

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Operation, diagnosis and repair of selected automotive systems, as well as general auto shop orientation for beginners and non-automotive majors.

AUSV 1890 - Cooperative Work Experience

Credits: (1-6)

Open to all first year students in Automotive Service. Provides academic credit for on-the-job experience. Grade and amount of credit will be determined by the department.

AUSV 2020 - Engine Control Systems

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Theory, operation, diagnosis, and repair of automotive fuel systems, OBD-II and Tier-2 emission control systems, and ignition systems.

AUSV 2030 - Honda Engine Control Systems

Credits: (3)

Theory, operation, diagnosis, and repair of Honda automotive fuel systems, OBD-II and Tier-2 emission control systems, and ignition systems. (AUSV 1130, AUSV 2030 are equivalent to AUSV 2635.)

Pre-requisite(s): AUSV 1000, AUSV 1335.

Note: Course not currently being offered.

AUSV 2040 - General Motors Engine Control Systems

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

Theory, operation, diagnosis, and repair of General Motors automotive fuel systems, OBD-II and Tier-2 emission control systems, and ignition systems. (AUSV 1140, AUSV 2040 are equivalent to AUSV 2645.)

Pre-requisite(s): AUSV 1000, AUSV 1345.

AUSV 2050 - Chrysler Engine Control Systems

Credits: (3)

Theory, operation, diagnosis, and repair of Chrysler automotive fuel systems, OBD-II and Tier-2 emission control systems, and ignition systems. (AUSV 1150, AUSV 2050 are equivalent to AUSV 2655.)

Pre-requisite(s): AUSV 1000, AUSV 1355.

Note: Course not currently being offered.

AUSV 2060 - Toyota Engine Control Systems

Credits: (6)

Theory, operation, diagnosis, and repair of Toyota automotive fuel systems, OBD-II and Tier-2 emission control systems, and ignition systems. (AUSV 1160, AUSV 2060 are equivalent to AUSV 2665.)

Pre-requisite(s): AUSV 1000, AUSV 1365.

Note: Course not currently being offered.

AUSV 2080 - Painting and Refinishing 2

Credits: (4)

Advanced surface preparation and application of modern paint system. Color matching, blending and complete vehicle refinishing. I-CAR training modules are included.

Pre-requisite(s): AUSV 1085 or instructor approval.

Note: Course not currently being offered.

AUSV 2085 - Non-Structural Analysis and Damage Repair 2

Credits: (4)

This is an advanced non-structural and welding course that expands on what has previously been learned. A great deal of time will be spent working on advanced non-structural techniques and processes. Full frame, unibody, space frames and other modern frame designs will be examined along with proper repair and replacement techniques.

Pre-requisite(s): AUSV 1080 or instructor approval.

Note: Course not currently being offered.

AUSV 2120 - Automotive Electrical and Body Control Systems

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Theory, diagnosis, and repair of starting, charging, lighting, air-bags, power accessories, and various body computer control systems. The use of electronic service information, the proper diagnostic process, and proper diagnostic services tools are emphasized.

AUSV 2130 - Honda Electrical and Body Control Systems

Credits: (3)

Theory, diagnosis, and repair of Honda starting, charging, lighting, air-bags, power accessories, and various body computer control systems. The use of electronic service information, the proper diagnostic process, and proper diagnostic services tools are emphasized. (AUSV 1330, AUSV 2130 are equivalent to AUSV 1335.)

Pre-requisite(s): (Recommended) AUSV 1000.

Prerequisite: AUSV 1330.

Note: Course not currently being offered.

AUSV 2140 - General Motors Electrical and Body Control Systems

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Theory, diagnosis, and repair of General Motors starting, charging, lighting, air-bags, power accessories, and various body computer control systems. The use of electronic service information, the proper diagnostic process, and proper diagnostic services tools are emphasized. (AUSV 1340, AUSV 2140 are equivalent to AUSV 1345.)

Pre-requisite(s): (Recommended) AUSV 1000.

Prerequisite: AUSV 1340.

AUSV 2150 - Chrysler Electrical and Body Control Systems

Credits: (3)

Theory, diagnosis, and repair of Chrysler starting, charging, lighting, air-bags, power accessories, and various body computer control systems. The use of electronic service information, the proper diagnostic process, and proper diagnostic services tools are emphasized. (AUSV 1350, AUSV 2150 are equivalent to AUSV 1355.)

Pre-requisite(s): (Recommended) AUSV 1000.

Prerequisite: AUSV 1350.

Note: Course not currently being offered.

AUSV 2160 - Toyota Electrical and Body Control Systems

Credits: (3)

Theory, diagnosis, and repair of Toyota starting, charging, lighting, air-bags, power accessories, and various body computer control systems. The use of electronic service information, the proper diagnostic process, and proper diagnostic services tools are emphasized. (AUSV 1360, AUSV 2160 are equivalent to AUSV 1365.)

Pre-requisite(s): (Recommended) AUSV 1000.

Prerequisite: AUSV 1360.

Note: Course not currently being offered.

AUSV 2170 - H D Truck Electrical Systems

Credits: (3)

Theory, operation, diagnosis and repair of batteries, starting, charging and electrical accessories. Equivalent to DATC proficiency #48304, 48305.

AUSV 2180 - Structural Analysis and Damage Repair 2

Credits: (3)

Expands on techniques and skills learned in AUSV 1180. Emphasis will be placed on advanced frame and unibody repair techniques and methods.

Pre-requisite(s): AUSV 1180 or instructor approval.

Note: Course not currently being offered.

AUSV 2270 - H D Truck Engine Diagnosis

Credits: (3)

Engine starting, diagnosis, fuel pump timing, compression and cylinder leakage testing, and tune-up. Equivalent to DATC proficiency #48144, 48164, 48302.

AUSV 2320 - Automotive Climate Control Systems

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Theory, operation, diagnosis and repair of vehicle climate control systems.

AUSV 2330 - Honda Climate Control Systems

Credits: (3)

Theory, operation, diagnosis and repair of Honda climate control systems. (AUSV 1030 is equivalent to AUSV 1031, AUSV 1032 and AUSV 2330.)

Pre-requisite(s): AUSV 1000, AUSV 1330.

Note: Course not currently being offered.

AUSV 2340 - General Motors Climate Control Systems

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

Theory, operation, diagnosis and repair of General Motors climate control systems. (AUSV 1040 is equivalent to AUSV 1041, AUSV 1042 and AUSV 2340.)

Pre-requisite(s): AUSV 1000, AUSV 1340.

AUSV 2350 - Chrysler Climate Control Systems

Credits: (3)

Theory, operation, diagnosis and repair of Chrysler climate control systems. (AUSV 1050 is equivalent to AUSV 1051, AUSV 1052 and AUSV 2350.)

Pre-requisite(s): AUSV 1000, AUSV 1350.

Note: Course not currently being offered.

AUSV 2360 - Toyota Climate Control Systems

Credits: (3)

Theory, operation, diagnosis and repair of Toyota climate control systems. (AUSV 1060 is equivalent to AUSV 1061, AUSV 1062 and AUSV 2360.)

Pre-requisite(s): AUSV 1000, AUSV 1360.

Note: Course not currently being offered.

AUSV 2370 - H D Truck Air Conditioning

Credits: (2)

Operation, environmental concerns, diagnosis and repair of air conditioning and heating systems and components. Equivalent to DATC proficiency #48800, 48801.

AUSV 2480 - Auto Body Business Practices

Credits: (2)

Estimating, scheduling work, purchasing, inventory, insurance practices and applied customer relations.

Note: Course not currently being offered.

AUSV 2520 - Automatic Transmissions

Credits: (4)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Theory, operation, diagnosis and overhaul procedures of automatic transmissions.

AUSV 2530 - Honda Automatic Transmissions

Credits: (4)

Theory, operation, diagnosis and overhaul procedures of Honda automatic transmissions.

Pre-requisite(s): AUSV 1000, AUSV 1335.

Note: Course not currently being offered.

AUSV 2540 - General Motors Automatic Transmissions

Credits: (4)

Typically Taught Fall Semester: *Full Sem*

Theory, operation, diagnosis and overhaul procedures of General Motors automatic transmissions.

Pre-requisite(s): AUSV 1000, AUSV 1345.

AUSV 2550 - Chrysler Automatic Transmissions

Credits: (4)

Theory, operation, diagnosis and overhaul procedures of Chrysler automatic transmissions.

Pre-requisite(s): AUSV 1000, AUSV 1355.

Note: Course not currently being offered.

AUSV 2560 - Toyota Automatic Transmissions

Credits: (4)

Theory, operation, diagnosis and overhaul procedures of Toyota automatic transmissions.

Pre-requisite(s): AUSV 1000, AUSV 1365.

Note: Course not currently being offered.

AUSV 2625 - Engine Mechanical and Engine Control Systems

Credits: (6)

Theory, operation, diagnosis, and repair of automotive engines, fuel systems, OBD-II and Tier-2 emission control systems, ignition systems. The use of electronic service information, the proper diagnostic process, and proper diagnostic service tools is emphasized. (AUSV 1120, AUSV 2020 are equivalent to AUSV 2625.)

Pre-requisite(s): AUSV 1000, AUSV 1325.

AUSV 2635 - Honda Engine Mechanical and Engine Control Systems

Credits: (6)

Theory, operation, diagnosis, and repair of Honda automotive engines, fuel systems, OBD-II and Tier-2 emission control systems, ignition systems. The use of electronic service information, the proper diagnostic process, and proper diagnostic service tools is emphasized. (AUSV 1130, AUSV 2030 are equivalent to AUSV 2635.)

Pre-requisite(s): AUSV 1000, AUSV 1335.

Note: Course not currently being offered.

AUSV 2645 - General Motors Engine Mechanical and Engine Control Systems

Credits: (6)

Theory, operation, diagnosis, and repair of General Motors automotive engines, fuel systems, OBD-II and Tier-2 emission control systems, ignition systems. The use of electronic service information, the proper diagnostic process, and proper diagnostic service tools is emphasized. (AUSV 1140, AUSV 2040 are equivalent to AUSV 2645.)

Pre-requisite(s): AUSV 1000, AUSV 1345.

AUSV 2655 - Chrysler Engine Mechanical and Engine Control Systems

Credits: (6)

Theory, operation, diagnosis, and repair of Chrysler automotive engines, fuel systems, OBD-II and Tier-2 emission control systems, ignition systems. The use of electronic service information, the proper diagnostic process, and proper diagnostic service tools is emphasized. (AUSV 1150, AUSV 2050 are equivalent to AUSV 2655.)

Pre-requisite(s): AUSV 1000, AUSV 1355.

Note: Course not currently being offered.

AUSV 2665 - Toyota Engine Mechanical and Engine Control Systems

Credits: (6)

Theory, operation, diagnosis, and repair of Toyota automotive engines, fuel systems, OBD-II and Tier-2 emission control systems, ignition systems. The use of electronic service information, the proper diagnostic process, and proper diagnostic service tools is emphasized. (AUSV 1160, AUSV 2060 are equivalent to AUSV 2665.)

Pre-requisite(s): AUSV 1000, AUSV 1365.

Note: Course not currently being offered.

AUSV 2860 INT - Automotive Shop Practice

Credits: (3-8)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Provides an opportunity to practice skills needed by Automotive Service technicians derived from classroom and shop experience. Simulates line mechanic work.

Pre-requisite(s): Instructor approval required.

May be taken 10 times up to 30 credit hours.

AUSV 2880 - Cooperative Practicum

Credits: (3-8)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Supervised work experience, at the sponsoring dealership, which applies directly to previous academic courses. Full-time employment and approval of faculty supervisor required.

May be taken 10 times up to 30 credit hours.

AUSV 2890 - Cooperative Work Experience

Credits: (1-6)

Open to second year Automotive Service students. A continuation of AUSV 1890.

Note: NOTE: AUSV 2890 may be taken in lieu of AUSV 2860, when appropriate work experience is available and the student obtains departmental approval.

AUSV 2920 - Short Courses, Workshops, Institutes and Special Programs

Credits: (1-4)

Variable Title

Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript.

BDC 1040 CA - Introduction to Architecture (Studio 1)

Credits: (3)

Typically Taught Summer Semester: *Full Sem - Online*

Typically Taught Fall Semester: *Full Sem, Full Sem - Online*

Typically Taught Spring Semester: *Full Sem, Full Sem - Online*

Course Fee: \$35.00

This class will be an introductory course to allow students to learn about the field of architectural design, and other associated and possible careers in conjunction with Building Design & Construction. Students will research and explore the world of architecture around them, and see how they might find a place therein.

Within this course, students will come to know the difference between creating architecture vs just building space. They will also be able to research an educational direction and career path associated with and around the field of architecture and design.

Course content will include research-based assignments and reports, along with studio design and work critiques. Students will begin to learn to create and present ideas and thoughts through the use of analog and digital presentations. Students will discover great architecture all around them, and understand how they can be a part of it. The class will also include introductory methods of reading, interpreting and creating beginnings of architectural and construction documents.

At the end of the semester, students will create architecture with a signature assignment where they will begin to understand concept design and how to create architecture with reason and value.

BDC 1350 - Residential Design (Studio 2)

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$35.00

This will be a course to allow students to explore the field of Residential Design and Architecture. Students will research and present precedents of great residential

design. Residential Design concepts will be taught and explored within the projects.

Course content will include research-based assignments and presentations, along with studio design and work critiques. Students will create and present ideas and thoughts through the use of analog, digital and oral presentations. Students will begin to understand the difference between simply building houses, and creating a great piece of residential architecture. The class will include architectural readings, interpretation thereof, and the design and production of architectural design and construction documents.

Pre-requisite(s): BDC 1040.

Pre-requisite/Co-requisite: CMT 1310.

BDC 2000 - Commercial Design (Studio 3)

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$35.00

This will be a course to allow students to explore the field of Commercial Design and Architecture. Students will research and present precedents of examples architecture and methods of construction. Design concepts will be explored and employed within the explorations and projects.

Course content will include research-based assignments and presentations, along with studio design and work critiques. Students will create and present ideas and thoughts through the use of analog, digital and oral presentations. Students will begin to understand the difference between just building commercial square footage, and creating a great piece of architecture. The class will include architectural readings, interpretation thereof, and the design and production of architectural and construction documents.

Pre-requisite(s): BDC 1350.

BDC 2830 - Directed Studies

Credits: (3)

Typically Taught Summer Semester: *Full Sem Online*

Typically Taught Fall Semester: *Full Sem Online*

Typically Taught Spring Semester: *Full Sem Online*

Directed readings in Building Design, & Construction.

Must have department approval. nbsp;nbsp;

Can be taken for 3 credit hours three times for a maximum of 9 credits.

BDC 3000 - Sustainable Building Design & Codes

Credits: (3)

Typically Taught Fall Semester: *Full Sem, Full Sem Online*

Typically Taught Spring Semester: *Full Sem, Full Sem Online*

Course Fee: \$35.00

An analysis of sustainability in the green built environment including certifications such as LEED, Energy Star, RESNET, and the National Green Building Standard. Course discussions will include: What is Green Building and why does it make sense, Building Science fundamentals, planning for Green from the start, Green Building Economics, and Building performance analysis.

BDC 3500 - Architectural Rendering & Animation Studio

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$35.00

This course introduces students to the basic tools and concepts used to create photo realistic renderings and animations for the Architecture industry.

Pre-requisite/Co-requisite: BDC 1350 or CMT 2360 or IDT 2080.

BDC 3660 - Structural Design & Detailing

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Course Fee: \$35.00

Structural design and detailing for Building Designers and Construction Professionals using emerging software to visualize and analyze the structural behavior of buildings and structures. A study of common construction material properties and their connections under varying load conditions including: wood, steel, and concrete. Both 2D and 3D CAD are used to create residential and commercial engineered construction documents.

Pre-requisite(s): Math QL.

BDC 4350 - BIM Management & Coordination

Credits: (3)

Typically Taught Fall Semester: *Full Sem; Full Sem Online*

Typically Taught Spring Semester: *Full Sem; Full Sem Online*

Course Fee: \$35.00

An advanced BIM course dealing with BIM project management, MEP modeling, clash detection, 4D scheduling, as well as emerging technology in the Building Design & Construction industry.

Pre-requisite(s): BDC 2000 or CMT 2360.

BDC 4600 - Senior Project

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course is a culminating experience for students from the program. Requires integration of concepts from a variety of coursework to prepare and present a solution to a building design & construction problem. Emphasis placed on integrated project management including preparation of drawings, creation of presentations, project organization, control, and documentation.

This course may be taken twice for credit.

BDC 4830 - Directed Studies

Credits: (1-3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Directed readings in Building Design and Construction.

Must have department approval. Can be taken for 3 credit hours three times for a maximum of 9 credits

BDC 4920 - Short Courses, Workshops, Institutes, and Special Programs

Credits: (1-3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Consult the semester class schedule for the current offering under this number. The specific title and credit authorized for the particular offering will appear on the student transcript. May be repeated three times for up to 9 credit hours.

Pre-requisite(s): Consent of instructor.

BIS 2800 - Foundations of Integrated Studies

Credits: (3)

Foundations of Interdisciplinary Studies provide students with theories and methods used in cross-disciplinary inquiry. Course components include: connections between academic studies and student interests, methods associated with integrated studies, and planning future employment and life-long learning goals.

Note: This course is not currently offered.

BIS 3800 - BIS Capstone and Graduation Preparation

Credits: (3)

Typically Taught Summer Semester: *Online*

Typically Taught Fall Semester: *Online*

Typically Taught Spring Semester: *Online*

This course provides BIS students with a foundation for the capstone project, as well as helping them to professionalize themselves in preparation for life after graduation. BIS 3800 is a required prerequisite for BIS 4800.

Pre-requisite(s): *BIS 2800.*

BIS 3850 - BIS Internship

Credits: (1-3)

Typically Taught Summer Semester: *Online*

Typically Taught Fall Semester: *Online*

Typically Taught Spring Semester: *Online*

The Bachelor of Integrated Studies Program (BIS) offers BIS students the opportunity to earn 1 to 3 elective credits for a work internship.

Pre-requisite(s): For requirements and guidelines, contact the BIS office.

May be repeated three times for a maximum of three credit hours.

BIS 4800 - Bachelor of Integrated Studies Senior Capstone

Credits: (3)

Typically Taught Summer Semester: *Online*

Typically Taught Fall Semester: *Online*

Typically Taught Spring Semester: *Online*

The Senior Capstone serves as the culmination of the Bachelor of Integrated Studies (BIS) interdisciplinary degree. After completing course work in three different areas of emphasis, BIS student synthesize their three

disciplines in this capstone project.

Pre-requisite(s): BIS 3800.

BSAD 1010 - Introduction to Business

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Relation of business managers and firms to contemporary society and the global economy. Topics include human values and ethics in the workplace, multiculturalism, social responsibilities of business, business functions, and general principles of effective business operation.

BSAD 2704 - Information Resources in the Business Disciplines

Credits: (1)

Typically Taught Fall Semester: *1st Blk, Full Sem Online*

Typically Taught Spring Semester: *1st Blk, Full Sem Online*

Information Resources in the Business Disciplines is a one credit hour course that will assist students in developing information literacy and basic research skills to support life-long learning. Students will develop skills in identifying, locating, retrieving, documenting, and critically evaluating both electronic and print resources that are appropriate for undergraduate research, with emphasis in the business disciplines.

Cross listed with LIBS 2704.

BSAD 2899 - Business Foundations and Admissions Process

Credits: (0)

Typically Taught Summer Semester: *Full Sem - Online*

Typically Taught Fall Semester: *Full Sem - Online*

Typically Taught Spring Semester: *Full Sem - Online*

Completion of BSAD 2899 is required of all students pursuing any major, minor, emphasis or certificate awarded by the John B. Goddard School of Business & Economics. The course objectives are: 1) assessment of Business Foundation knowledge, and 2) admittance to the Goddard School. Students must have an overall GPA of 2.5 or higher and a Business Foundation GPA of 2.5 or higher and a minimum grade of "C-" in each of the six Business Foundation courses. *Credit/No credit.*

Pre-requisite/Co-requisite: ACTG 2010, ACTG 2020, ECON 2010, ECON 2020, MIS 2010, QUAN 2600. Department registration approval is required.

Suggested Requisite(s): Students should register for this course concurrent with (same semester as) their last

Business Foundation course (ACTG 2010, ACTG 2020, ECON 2010, ECON 2020, MIS 2010 and QUAN 2600) or after the required Business Foundation courses have been completed.

BSAD 2920 - Short Courses, Workshops, Institutes, and Special Programs

Credits: (1-6)

Variable Title

Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript.

May be repeated 5 times with a maximum of 6 credit hours with different topics.

BSAD 3000 - Small Business Management

Credits: (3)

Typically Taught Fall Semester: *Full Sem Online*

Typically Taught Spring Semester: *Full Sem Online*

This course is designed for students majoring outside the John B. Goddard School of Business & Economics. It will not be counted for credit toward graduation for students majoring in the John B. Goddard School of Business & Economics. It covers the business management concepts involved in starting and/or managing a small business.

BSAD 3200 - Legal Environment of Business

Credits: (3)

Typically Taught Summer Semester: *Full Sem, Full Sem Online*

Typically Taught Fall Semester: *Full Sem, Full Sem Online*

Typically Taught Spring Semester: *Full Sem, Full Sem Online*

Introduction to the legal and judicial system, emphasizing the application of regulatory law (e.g., antitrust, employment discrimination, etc.) and selected common law topics (e.g., contracts, agency, etc.).

BSAD 3330 - Business Ethics & Environmental Responsibility

Credits: (3)

Typically Taught Summer Semester: *Full Sem, 1st Blk*

Typically Taught Fall Semester: *Full Sem, 1st Blk, 2nd Blk*

Typically Taught Spring Semester: *Full Sem, 2nd Blk*

An introduction to the rudiments of moral reasoning, concepts and principles, and their application to common ethical issues faced in business. Special attention will be given to moral issues associated with the use of the natural environment by businesses.

Pre-requisite(s): BSAD 2899.

BSAD 3500 - Introduction to Business Research

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Introduces students to gathering and analyzing primary and secondary data for a wide range of business applications, such as assessing customer or employee satisfaction. Students are introduced to CD ROM databases, other library resources, questionnaire development and administration, basic data analysis, and research report writing.

Pre-requisite(s): BSAD 2899, QUAN 3610.

BSAD 3600 - [World Region] Business and Society

Credits: (3)

The world region or country covered in this course varies and will be indicated in the specific course title and on the student's transcript (e.g., European Business and Society, Japanese Business and Society, etc.). For a specified world region or country, this course considers its historical and cultural roots, together with modern societal issues, as they relate to business; the role of business in society; economic development, industrial policy, and trade relations; and management and business practices, including sociocultural considerations, in the specified world region or country.

Pre-requisite(s): BSAD 2899.

Suggested Requisite(s): Prior course work in business or economics or the appropriate foreign language(s) or culture, or in-country experience.

BSAD 4210 - Survey of Business Law

Credits: (3)

Typically Taught Summer Semester: *Full Sem Online*

Typically Taught Fall Semester: *Full Sem, Full Sem Online*

Typically Taught Spring Semester: *Full Sem*

An overview of sales, negotiable instruments, property, and debtor/ creditor relations and other selected legal topics.

Pre-requisite(s): BSAD 2899, BSAD 3200.

BSAD 4401 - E-Commerce

Credits: (3)

Technologies, strategies, and methods for an electronic approach to financial, purchasing, marketing, and order fulfillment processes. Emphasis is on creating successful business strategies to exploit Internet and Electronic Data Interchange (EDI) capabilities.

Pre-requisite(s): MKTG 3010 or concurrent enrollment in MKTG 3010.

Note: Course not currently being offered.

BSAD 4500 - Entrepreneurship

Credits: (3)

Integration of various functional areas of business as they relate to evaluating, creating, planning, and managing new business ventures.

Pre-requisite(s): Business Foundations; BSAD 2899; MKTG 3010; MGMT 3010, MGMT 3200.

Note: Course not currently being offered.

BSAD 4620 - Executive Lectures

Credits: (1)

Typically Taught Fall Semester: *Full Sem, Full Sem Online*

Typically Taught Spring Semester: *Full Sem, Full Sem Online*

This course is designed to acquaint the students with successful executives, their personal styles and philosophies as leaders, and the keys to their effectiveness.

Credit/No credit.

The format is a series of weekly one-hour lectures delivered by guest executives.

The course may be repeated for credit to a maximum of two credit hours.

BSAD 4680 - Small Business Diagnostics

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Diagnostic analysis of small business issues through the use of case studies and consultation opportunities with small businesses in the community. Students will work both individually and in teams to analyze the health of sample small businesses, identify issues and develop recommendations for remediation. Case issues will cover a broad spectrum of typical small business issues and require the student to evaluate based on all areas of business

operations. Research, written reports and presentations are required. Cross-listed with ENTR 4680.

BSAD 4780 - Strategic Management

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A capstone course for seniors designed to facilitate integration of the knowledge gained in earlier courses. Focus of the course is on the total enterprise. Emphasis is on crafting well-conceived strategies and on successful strategy implementation.

Pre-requisite(s): BSAD 2899, BSAD 3200, SCM 3050, FIN 3200, MGMT 3010, MGMT 3200 or PS 3250, MKTG 3010, Senior standing.

BSAD 4800 - Independent Research

Credits: (1-3)

Directed research and study on an individual basis.

Pre-requisite(s): BSAD 2899; Senior Standing; Written Instructor Approval.

May be repeated until a total of 4 hours credit is accumulated.

BSAD 4850 - Business Administration Study Abroad

Credits: (1-3)

This course is designed for students who wish to explore business administration theory and practice in countries other than the U.S. Students will study international business as offered through a partner university (or other university with department chair approval).

Pre-requisite(s): BSAD 2899.

May be repeated once up to 6 credits.

BSAD 4920 - Short Courses, Workshops, Institutes, and Special Programs

Credits: (1-3)

Variable Title

Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript.

May be repeated 5 times with a maximum of 6 credit hours with different topics.

BTNY 1203 LS - Plant Biology

Credits: (3)

Typically Taught Summer Semester: *1st Blk Online*

Typically Taught Fall Semester: *Full Sem, Full Sem Online*

Typically Taught Spring Semester: *Full Sem, Full Sem Online*

An introductory course for non-majors that emphasizes unique features of plant biology. Included are discussions on: the origins of life; important plants of the world and their habitats; plant diversity, structure, function, and reproduction; plants and environmental science; plants that changed history; practical botany; and botany as a science. Three lecture/demonstration hours per week.

BTNY 1303 LS - Plants and People

Credits: (3)

Typically Taught Summer Semester: *Full Sem - Online, 1st Blk Online*

Typically Taught Fall Semester: *Full Sem - Online*

Typically Taught Spring Semester: *Full Sem - Online*

This class provides a general introduction to the importance and function of plants in human affairs. It includes an overview of science as a way of knowing, plant forms and functions, plant reproduction, and use of economically and sociologically important plants. Flowering and non-flowering plants and products such as fruits, forages, grains, medicines, herbs and spices, textile fibers, lumber, algae, and foliage plants are studied. Ecological concepts as they relate to the growth and production of world food crops will also be included. The course has a strong emphasis on the historical development of exploitation of certain plants and the role plants played in exploration and international development. This class cannot be used to fulfill requirements for a Botany major or minor. Three hours of lecture per week.

BTNY 1370 LS - Principles of Life Science

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

A survey course for elementary education majors. Course content includes cells, cell chemistry, genetics, plant and animal anatomy, plant and animal classification, physiology, immune systems, evolution, and ecology. Unifying concepts of all living things will be emphasized. Recommended for students intending to major in elementary education. This class cannot be used to fulfill requirements for a Botany major or minor. Two hours of lecture and one 3-hour laboratory per week.

BTNY 1403 LS SUS - Principles of Environmental Science

Credits: (3-4)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$20.00

Development of awareness of the consequences of the impact of modern science through technology upon our environments and how we respond to issues related to threats to our biological life-support system. A definition of a quality environment is developed, with student input, and an analysis of the existing quality of our environment is made in light of this definition which challenges our collective wisdom to identify those things which we do well and to prescribe remedies for shortcomings. This course can be taken for 3 or 4 credits with the fourth credit based on completion of the laboratory course. Three hours of lecture per week (3 credits) or three hours of lecture and one two-hour lab per week (4 credits).

BTNY 2104 - Plant Form and Function

Credits: (4)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

An introduction to the anatomy, cell biology, physiology, and genetics of the seed plants. This course is designed for science majors and is a prerequisite for upper division Botany courses. Two hours of lecture and two 2-hour labs per week. Botany majors are advised to take BTNY 2121 prior to or concurrently with this course.

Two hours of lecture and two 2-hour labs per week.

Suggested Requisite(s): Botany majors are advised to take BTNY 2121 prior to or concurrently with this course.

BTNY 2114 - Evolutionary Survey of Plants

Credits: (4)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A study of the diversity, ecology, and reproduction of plants in the context of the evolution of life on earth. The role of plants in making life on earth possible is an important theme. This course is designed for science majors and is a prerequisite for selected upper division Botany courses.

Two hours of lecture and two 2-hour labs per week.

Pre-requisite(s): BTNY 2104.

Suggested Requisite(s): Botany majors are advised to take BTNY 2121 prior to or concurrently with this course.

BTNY 2121 - Career Planning for Botanists

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A course designed for majors to introduce them to expected student learning outcomes, assessment of these expected outcomes, advisement and/or mentoring, keys to success in getting a job or into graduate school, career resources available, and how to start and develop the Botany Student Portfolio.

One lecture per week.

Pre-requisite/Co-requisite: BTNY 2104 or BTNY 2114.

BTNY 2203 - Home and Garden Plants

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

Basic principles of plant science with special reference to care of home and garden plants. Includes a general study of lighting, watering, soils, fertilizer, pruning and shaping, propagation, controlling pests, and planting designs.

Two hours of lecture and one 3-hour laboratory per week.

BTNY 2303 - Ethnobotany

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

A thorough study of the scientific methodology in ethnobotanical research with opportunities for practical applications. This class includes an introduction to how plants are used by people for food, fiber, shelter, and medicine. Students will learn fundamental botanical principles, how to conduct field work and how to collect plants and prepare them for use. Ethical questions concerning conservation, biodiversity and the continued loss of indigenous plants and cultures will also be discussed.

Three lecture/demonstrations per week.

BTNY 2413 - Introduction to Natural Resource Management

Credits: (3)

Typically Taught Fall Semester: *Full Sem odd years*

Introduces students, especially those interested in forestry and range management, to concepts and ideologies in the utilization and preservation of forests, range, soils, wildlife, water and fisheries, and the human impact on these resources.

Three hours of lecture per week.

BTNY 2600 - Laboratory Safety

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

An interdisciplinary, team-taught course that will be an overview of the major chemical, biological and physical safety issues related to science laboratories and field work. Class will meet once per week and will be taught in a lecture/demonstration format.

BTNY 2750 - Topics in Science and Society

Credits: (3)

Variable Title

Typically Taught Spring Semester: *Full Sem*

An exploration of selected topics related to science and society. The specific title will appear on the student transcript.

BTNY 2810 - Experimental Course

Credits: (1-6)

Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript. Refer to Experimental Courses.

5 for a total of 6 hours.

BTNY 2810 - Molecular Toolbox for Plant Scientists

Credits: (4)

Experimental Course, Contact Department for More Information

This course is a hands-on introduction to molecular tools relevant in plant science. You will work independently on an overarching semester-long project (The Mystery Gene Project). Throughout the semester you will be given the skills to build the mystery gene construct through guided mini-projects. These will introduce you to basic laboratory protocols, equipment use, DNA isolation, PCR, proof-reading PCR, agarose gel electrophoresis, restriction enzymes, ligation, and subcloning. In the last section of the course, you will 'put it all together' and take what you have learned in the mini-projects to transform your own gene construct into the bacterium *E. coli*.

BTNY 2830 - Readings in Botany

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Cannot be repeated.

BTNY 2890 INT - Cooperative Work Experience

Credits: (1-3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Open to all students in Botany programs of study who meet the minimum Cooperative Work Experience requirements of the department. Provides academic credit for on-the-job experience. Grade and amount of credit will be determined by the department.

Pre-requisite(s): BTNY 2104 and BTNY 2121, and instructor's permission.

Course may be repeated for a maximum of 3 credit hours.

BTNY 2920 - Short Courses, Workshops, Institutes, and Special Programs

Credits: (1-4)

Variable Title

Consult the class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript.

May be repeated 5 times for a maximum of 6 credit hours with different content.

Note: This course is offered as needed.

BTNY 2950 - Elementary Field Botany

Credits: (1-2)

Fundamentals of Botany as observed during field trips.

Trips will be preceded by lectures and exercises designed to prepare the student for maximizing the learning experience in the field. The course involves extensive pre- and post-trip exercises and evaluation.

May be repeated once for a maximum of 2 credit hours.

Note: This course is not currently offered.

BTNY 3105 - Anatomy of Vascular Plants

Credits: (4)

Typically Taught Fall Semester: *Full Sem*

Anatomy of Vascular Plants explores the internal structures of higher plants. This course examines the structural organization of higher plants at all levels of organization -- from the subcellular, to cellular, to tissue, to organism level--and pays close attention to how structure begets function from the subcellular to the ecological level. Additionally, students will learn different technical methods and equipment used to study plants' internal structures.

Three hours of lecture and one 3-hour lab per week.

Pre-requisite(s): BTNY 2104, BTNY 2114, BTNY 2121, & (BTNY 2600 OR GEO 2600 OR MICR 2600, OR PHYS 2600, OR CHEM 2600.)

BTNY 3153 - Biology of the Plant Cell

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

A study of plant cell structure and function, including biogenesis and activities of organelles, signal transduction, cell-cell interactions, and the molecular processes involved in cellular development and specialization as well as cellular responses. Three hours of lecture per week.

Pre-requisite(s): BTNY 2104 and BTNY 2114, CHEM 1120 or CHEM 2310.

BTNY 3204 - Plant Physiology

Credits: (4)

Typically Taught Fall Semester: *Full Sem*

A study of the physiological processes of plants, including carbon metabolism, mineral assimilation, water relations, and stress responses. Two hours of lecture and two 3-hour labs per week.

Pre-requisite(s): BTNY 2600 and BTNY 2104, CHEM 1120 or CHEM 2310, and MATH 1040 or MATH 1050 or MATH 1080.

BTNY 3214 - Soils

Credits: (4)

Typically Taught Spring Semester: *Full Sem*

An introduction to the fundamental principles of soil science. Chemical, physical, geological, and biological properties of soils; Course will examine the role of soils as a fundamental ecological constraint through space and time on patterns and processes, such as plant distribution, nutrient cycling, and cycling of water between terrestrial ecosystems and the atmosphere. Course will also examine the human dimensions of soils as a natural resource, and the historical and current environmental impact of soil use

and management. Three hours of lecture and one 3-hour lab per week.

Pre-requisite(s): (BTNY 2104 and BTNY 2114 and BTNY 2121) or (GEO 1110) and (CHEM 1110 or CHEM 1210) and (BTNY 2600 or CHEM 2600 or GEO 2600 or MICR 2600 or PHYS 2600).

Course is cross listed with GEO 3214.

BTNY 3303 - Plant Genetics

Credits: (4)

Typically Taught Spring Semester: *Full Sem*

The principles of heredity, population genetics, and molecular genetics as applied to plants. Three lecture hours and one 3-hour lab per week.

Pre-requisite(s): (BTNY 2104 and BTNY 2114) or MICR 2054; CHEM 1120 or (CHEM 2310 and CHEM 2315); MATH 1040 or MATH 1050 or MATH 1080; BTNY 2600 or CHEM 2600 or GEO 2600 or MICR 2600 or PHYS 2600.

BTNY 3454 - Plant Ecology

Credits: (4)

Typically Taught Fall Semester: *Full Sem*

Nature and development of plant communities and their relations to the environmental factors controlling them.

Three hours of lecture and one 3-hour lab per week.

Pre-requisite(s): BTNY 2104 and (MATH 1040 or MATH 1050 or MATH 1080).

BTNY 3473 - Plant Geography

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

A study of global and regional distributions of major plant groups and communities as affected by past and present climates, biological, ecological and geomorphic factors.

Three lectures per week.

Pre-requisite(s): BTNY 2104 and BTNY 2114.

BTNY 3504 - Mycology

Credits: (4)

Typically Taught Fall Semester: *Full Sem odd years*

Structure, taxonomy, biology, and physiology of the fungi.

Two hours of lecture and two 2-hour labs per week.

Pre-requisite(s): (BTNY 2104 and BTNY 2114 and BTNY 2121) or MICR 2054, and BTNY/CHEM/GEO/MICR/PHYS 2600.

BTNY 3514 - Algology

Credits: (4)

A study of the biology of algae, their morphology, cytology, development, taxonomy, ecology, economic and experimental uses.

Two hours of lecture and two 2-hour labs per week.

Pre-requisite(s): BTNY 2104 and BTNY 2114, or MICR 2054, or ZOOL 4480.

Note: This course is not currently offered.

BTNY 3523 - Marine Biology

Credits: (3)

A study of marine biology and ecology, relating to the plant and animal populations of the sea to their various habitats, including the pelagic environment, the sea bottom, sea shores, and estuaries.

Two hours of lecture and one 2-hour lab per week.

Pre-requisite(s): BTNY 2114, or ZOOL 1110, or MICR 2054, or GEO 3010.

Note: This course is not currently offered.

BTNY 3570 - Foundations of Science Education

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

A thorough investigation of research in science learning and curricular standards at the state and national levels.

Foundations of the philosophy of science and scientific inquiry as applicable to science teaching at the secondary level. This course serves as a foundation to a preservice science teacher's education coursework.

BTNY 3583 - Medicinal Plants-Chemistry and Use

Credits: (4)

Typically Taught Fall Semester: *Full Sem*

A study of plants and herbal preparations idely used in maintaining health and treating disease in traditional and modern societies. Active ingredients, modern use and side effects will be studied. In lab, students will learn to analyze plants, over-the-counter-drugs and herbal supplements for active ingredients. Students will also learn how to make extractions and preparations from plant materials. This course is especially useful for students interested in careers in Pharmacy, Ethnobotany, Natural Medicine, Nursing and Medicine. Two hours of lecture and two 3 hour labs per week.

Pre-requisite(s): CHEM 1120 or (CHEM 2310 and CHEM 2315), and MATH 1040 or MATH 1050 or MATH 1080.

BTNY 3624 - Taxonomy of Vascular Plants

Credits: (4)

Typically Taught Summer Semester: *1st Blk*

A study of the basic principles and concepts of vascular plant systematics with emphasis on the identification and classification of flowering plants.

Two hours of lecture and two 2-hour labs per week.

Pre-requisite(s): BTNY 2104, BTNY 2114, and BTNY/CHEM/GEO/MICR/PHYS 2600.

BTNY 3643 - Intermountain Flora

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

A taxonomic study of plants that are of major importance to the management of wildland resources. Students will learn to identify 300 of the most important grasses, woody plants, and marsh-aquatic plants. Considers federal laws for the regulation of rare and endangered species and habitat designation.

One hour of lecture and two 2-hour labs per week.

Pre-requisite(s): BTNY 3624.

BTNY 4113 - Plant Evolution

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

The Plant Evolution course focuses on two broad areas: 1) the patterns of evolution of plants from prokaryotes to seed plants and 2) current patterns and processes of evolution among plants. The first area will involve an examination of the evolutionary patterns of plants, with a focus on land plants, and will include tracing patterns of evolution from prokaryotes to eukaryotes to land plants to vascular plants to seed plants. This section of the course will explore patterns, evolutionary innovations, and notable taxa throughout the history of plants. The second area will involve an investigation of the current patterns and processes influencing plant evolution. This includes variation within and among populations, strategies for reproduction and breeding systems in plants, patterns of selection, speciation, macroevolution, etc. We will not only discuss these aspects of plant evolution but also delve into modern (and previous) methods for examining patterns and processes of evolution in plants.

Pre-requisite(s): BTNY 2104 and BTNY 2114.

Pre-requisite/Co-requisite: BTNY 2121.

Note: This course is not currently offered.

BTNY 4252 - Cell Culture

Credits: (2)

Typically Taught Fall Semester: *Full Sem*

Basic methods and applications for culturing plant and animal cells in vitro.

Two 2-hour combined lecture and laboratory sessions per week.

Pre-requisite(s): BTNY 2104, or MICR 2054. cross-listed with Microbiology

BTNY 4570 - Secondary School Science Teaching Methods

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Acquaintance and practice with various teaching and assessment methods. Development of science curricula including lesson and unit plans. It is recommended that this course be completed immediately before student teaching.

Pre-requisite(s): Admission to the Teacher Education Program.

BTNY 4750 - Topics in Botany

Credits: (1-5)

Variable Title

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

An exploration of selected topics in the discipline. The specific title and credit authorized will appear on the student transcript.

Pre-requisite(s): BTNY 2104 and BTNY 2114, and any specified courses selected by the instructor.

Course may be repeated up to 10 times for credit.

BTNY 4800 - Individual Research

Credits: (2)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Pre-requisite(s): BTNY 2104 and BTNY 2114 and BTNY 2121, two upper division Botany courses, and approval of instructor.

Course may be repeated up to 10 times for credit.

BTNY 4830 - Readings in Botany

Credits: (1-3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Independent readings in botany under the direction of a faculty member.

Pre-requisite(s): BTNY 2104 and BTNY 2114 and BTNY 2121, two upper division Botany courses, and approval of instructor.

May be repeated up to four times for a maximum of 6 credit hours.

BTNY 4840 - Thesis Readings

Credits: (2)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Literature search and evaluation, culminating in the writing of a thesis proposal.

Pre-requisite(s): BTNY 2104 and BTNY 2114 and BTNY 2121, two upper division Botany courses, and approval of thesis advisor.

Course may be repeated once for a maximum of 4 credit hours.

BTNY 4850 - Thesis Research

Credits: (1-4)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Independent research related to a student's approved thesis proposal. May be repeated for a maximum of 8 credit hours.

Pre-requisite(s): BTNY 2600, BTNY 4840, (MATH 1040 or MATH 1050 or MATH 1080), and approval of thesis advisor.

BTNY 4890 INT - Cooperative Work Experience

Credits: (1-6)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Open to all students in Botany Department programs of study who meet the minimum Cooperative Work Experience requirements of the department. Provides academic credit for on-the-job experience. Grade and amount of credit will be determined by the department.

Pre-requisite(s): BTNY 2104, BTNY 2114, BTNY 2121,

two upper-division Botany courses, and instructor approval. Course may be repeated 5 times for a maximum of 6 credit hours.

BTNY 4920 - Short Courses, Workshops, Institutes, and Special Programs

Credits: (1-4)

Variable Title

Consult the class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript.

Pre-requisite(s): BTNY 2104 and BTNY 2114 and BTNY 2121, and any specified courses selected by the instructor.

May be repeated six times for a maximum of six credit hours.

Note: This course is offered as needed.

BTNY 4950 - Advanced Field Botany

Credits: (3-5)

Typically Taught Fall Semester: *Full Sem*

A concentrated study of the flora and/or field methods for conducting surveys or ecological studies in a specific geographical region. This course generally involves an extended field trip conducting botanical fieldwork in addition to local fieldwork and/or study to prepare for and summarize trip results.

Pre-requisite(s): BTNY 2104, BTNY 2114, BTNY 2121, BTNY 2600, and any specified courses selected by the instructor, and consent of the instructor.

BTNY 4970 - Botany Thesis

Credits: (2)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Written report of thesis research in the form of a scientific paper.

Pre-requisite(s): BTNY 4850 and approval of instructor (thesis advisor).

BTNY 4990 - Botany Capstone Seminar

Credits: (2)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Oral presentation of an individual research, thesis research, library research, or internship project in which the student demonstrates understanding of science as a process. This course includes the final evaluation of the student's

portfolio and should be taken the last semester of the senior year.

Pre-requisite(s): BTNY 2121 and Senior status.

BTNY 5030G - Botany for Teachers

Credits: (2-5)

Science content course for teachers in MEd Science Emphasis Program. To register, select another departmental course and develop a contract detailing additional work required for graduate credit. Contract must be approved by instructor, department chair, and Director of the Master of Education Program.

Course may be repeated up to 10 times.

Note: This course is offered as needed.

CHEM 1010 PS - Introductory Chemistry

Credits: (3)

Typically Taught Summer Semester: *Full Sem Online*

Typically Taught Fall Semester: *Full Sem, Full Sem Online*

Typically Taught Spring Semester: *Full Sem, Full Sem Online*

This is a lecture-demonstration class designed to introduce the subject of chemistry and requires no prior chemistry experience. This class is designed for students who will not be majoring in a discipline that requires any further chemistry coursework. This course is not intended to prepare students for any future chemistry coursework.

CHEM 1110 PS - Elementary Chemistry

Credits: (5)

Typically Taught Summer Semester: *Full Sem Online*

Typically Taught Fall Semester: *Full Sem, Full Sem Online*

Typically Taught Spring Semester: *Full Sem, Full Sem Online*

Fundamentals of inorganic chemistry and introduction to organic chemistry. The first course in a two-semester sequence designed primarily for students of nursing, engineering technology and some other fields of science and health professions who require no more than one year of chemistry.

Four hours of lecture and one 3-hour lab a week.

CHEM 1115 - Elementary Chemistry Lab

Credits: (1)

CHEM 1115 is a stand-alone lab course designed to accommodate transfer students from other Universities.

CHEM 1115 registration will be allowed only by special permission from the Chair of Chemistry. Transfer students who have taken the CHEM lecture without the lab should petition the Chair of the Chemistry Department for permission to take this course.

Pre-requisite(s): Must have completed or currently be enrolled in CHEM 1110 lecture.

Note: This course is offered as needed.

CHEM 1120 - Elementary Organic Bio-Chemistry

Credits: (5)

Typically Taught Summer Semester: *Full Sem Online*

Typically Taught Fall Semester: *Full Sem, Full Sem Online*

Typically Taught Spring Semester: *Full Sem, Full Sem Online*

Elementary study of the compounds of carbon and chemical compounds and reactions of biological systems. Four hours of lecture and one 3-hour lab a week.

Pre-requisite(s): CHEM 1110 or equivalent.

CHEM 1125 - Elementary Organic Bio-Chemistry Lab

Credits: (1)

CHEM 1125 is a stand-alone lab course designed to accommodate transfer students from other Universities. CHEM 1125 registration will be allowed only by special permission from the Chair of Chemistry. Transfer students who have taken the CHEM 1120 lecture without the lab should petition the Chair of the Chemistry Department for permission to take this course.

Pre-requisite(s): Must have completed or currently be enrolled in CHEM 1120 lecture.

Note: This course is offered as needed.

CHEM 1130 PS - Introduction to General, Organic & Biochemistry

Credits: (5)

Typically Taught Summer Semester: *Full Sem Online*

Typically Taught Fall Semester: *Full Sem, Full Sem Online*

Typically Taught Spring Semester: *Full Sem, Full Sem Online*

Course Fee: \$35.00

An introduction to general, organic and biochemistry designed primarily for students of nursing and other majors that require no more than one semester of chemistry.

Four hours of lecture and one 3-hour lab a week.
May be repeated twice for a maximum of five credit hours.

CHEM 1135 - Introduction to General, Organic & Biochemistry Lab

Credits: (1)

Course Fee: \$35.00

CHEM 1135 is a stand-alone lab course designed to accommodate transfer students from other universities. CHEM 1135 registration will be allowed only by special permission from the Chemistry Department Chair. Transfer students who have taken the CHEM 1130 lecture or equivalent without the lab should petition the Chemistry Department Chair for permission to take this course.

Pre-requisite(s): Must have completed or be currently enrolled in CHEM 1130 lecture or equivalent.

Note: This course is offered as needed.

CHEM 1200 - Preparation for College Chemistry

Credits: (3)

Typically Taught Summer Semester: *Full Sem Online*

Typically Taught Fall Semester: *Full Sem, Full Sem Online*

Typically Taught Spring Semester: *Full Sem, Full Sem Online*

CHEM 1200 prepares students to take the CHEM 1210 - 1220 chemistry series. No prior chemistry experience is necessary, however, mathematical and problem-solving competency at the level of intermediate algebra (MATH 1010) or above is expected. *Students who do not plan to take Chemistry 1210-1220 series should not take this class.* This course does not fulfill any general education requirements and does not apply towards hours in any major. Three hours of lecture per week.

Pre-requisite/Co-requisite: MATH 1010, MATH 1050, MATH 1080, MATH 1210, MATH 1220, or MATH 2210.

CHEM 1210 PS - Principles of Chemistry I

Credits: (5)

Typically Taught Summer Semester: *1st Blk*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This is the first course in a series designed primarily for science majors and others who will take more than one year of chemistry such as pre-medical students, clinical/medical laboratory scientists, and some engineering students.

Course topics include components of matter, stoichiometry, major classes of reactions, gases and kinetic molecular theory, thermochemistry, quantum theory and atomic structure, models of chemical bonding, shapes of molecules, intermolecular forces, and properties of mixtures. The laboratory emphasizes qualitative and quantitative methods of analysis. Four hours of lecture and one 3-hour lab a week.

Pre-requisite(s): MATH 1010 or equivalent and CHEM 1200 or departmental approval.

Pre-requisite/Co-requisite: MATH 1050, MATH 1080, MATH 1210, MATH 1220, MATH 2210, or equivalent.

CHEM 1215 - Principles of Chemistry I Lab

Credits: (1)

CHEM 1215 is a stand-alone lab course designed to accommodate transfer students from other Universities. CHEM 1215 registration will be allowed only by special permission from the Chair of Chemistry. Transfer students who have taken the CHEM 1210 lecture without the lab or High School AP students should petition the Chair of the Chemistry Department for permission to take this course.

Pre-requisite(s): Must have completed or currently be enrolled in CHEM 1210.

Note: This course is offered as needed.

CHEM 1220 - Principles of Chemistry II

Credits: (5)

Typically Taught Summer Semester: *2nd Blk*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This is the second course in a series designed primarily for science majors and others who will take more than one year of chemistry such as pre-medical students, clinical/medical laboratory scientists, and some engineering students. Course topics include kinetics, equilibrium including aqueous solution equilibrium, thermodynamics, electrochemistry, and an introduction to inorganic, nuclear, and organic chemistry. The laboratory emphasizes qualitative and quantitative methods of analysis.

Four hours of lecture and one 3-hour lab a week.

Pre-requisite(s): MATH 1050 or MATH 1080 or MATH 1210 or MATH 1220 or MATH 2210 or equivalent and CHEM 1210.

CHEM 1225 - Principles of Chemistry II Lab

Credits: (1)

CHEM 1225 is a stand-alone lab course designed to accommodate transfer students from other Universities. CHEM 1225 registration will be allowed only by special permission from the Chair of Chemistry. Transfer students who have taken the CHEM 1220 lecture without the lab, or High School AP students should petition the Chair of the Chemistry Department for permission to take this course.

Pre-requisite(s): Must have completed or currently be enrolled in CHEM 1220 lecture.

Note: This course is offered as needed.

CHEM 1360 PS - Principles of Physical Science

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

A lecture/laboratory course designed to provide an introduction to the scientific method and its application to the study of selected topics in physics and chemistry.

Two hours of lecture and one 3-hour lab per week.

Recommended for Elementary Education majors.

CHEM 2310 - Organic Chemistry I

Credits: (4)

Typically Taught Summer Semester: *1st Blk*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Principles of organic chemistry, including structure and reactivity of carbon based molecules. Detailed study of mechanisms, synthesis, and reactions. Alkane, alkyl halide, alkyne, alcohol, and ether families are covered.

Four hours of lecture a week.

Pre-requisite(s): CHEM 1220.

Co-Requisite(s): CHEM 2315 lab.

CHEM 2315 - Organic Chemistry I Lab

Credits: (1)

Typically Taught Summer Semester: *1st Blk*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Lab course designed to be taken with CHEM 2310.

Includes organic laboratory techniques, synthesis, product isolation, spectroscopy and analysis.

Pre-requisite(s): CHEM 1220.

Co-Requisite(s): CHEM 2310 lecture.

CHEM 2320 - Organic Chemistry II

Credits: (4)

Typically Taught Summer Semester: *2nd Blk*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Principles of organic chemistry, second semester. A continuation of structure and reactivity analysis, along with structure elucidation techniques, spectroscopy and synthetic reactions. Coverage includes aromatics, carbonyls, carboxylic acid derivatives, and sugars.

Four hours of lecture a week.

Pre-requisite(s): CHEM 2310 and CHEM 2315.

Co-Requisite(s): CHEM 2325 lab.

CHEM 2325 - Organic Chemistry II Lab

Credits: (1)

Typically Taught Summer Semester: *2nd Blk*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Lab course designed to be taken with CHEM 2320.

Includes organic laboratory techniques, synthesis, product isolation, spectroscopy and analysis.

Pre-requisite(s): CHEM 2310 and CHEM 2315.

Co-Requisite(s): CHEM 2320 lecture.

CHEM 2600 - Laboratory Safety

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

An interdisciplinary, team-taught course that will be an overview of the major chemical, biological and physical safety issues related to science laboratories and field work. Class will meet once per week and will be taught in a lecture/demonstration format.

CHEM 2820 - Elements of Research in the Sciences

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

This interdisciplinary course provides concrete skills for productive entry-level scientific research. Students engage in a hands-on introduction to scientific research and methods, including an introduction to sample handling, data analysis, and dissemination of results through papers and presentations. Upon completion of the course, a student will be prepared for potential internships, summer research programs, and research assistantships both on and off campus.

Pre-requisite(s): MATH 1060 or MATH 1080 or MATH 1210; and CHEM 1210 or PHYS 2210 or PHYS 2010 or

(GEO 1110 and GEO 1115).
Cross-listed with GEO 2820 and PHYS 2820.

CHEM 2890 INT - Cooperative Work Experience

Credits: (1-6)

Open to all students in the Chemistry Department who meet the minimum Cooperative Work Experience requirements of the department. Provides academic credit for on-the-job experience. Grade and amount of credit will be determined by the department.
May be repeated 5 times with a maximum of 6 credit hours.
Note: This course is offered as needed.

CHEM 2920 - Short Courses, Workshops, Institutes and Special Programs

Credits: (1-4)

Variable Title

Consult the class schedule for the current offering under this number. The specific title with the credit authorized will appear on the student transcript.
Note: This course is offered as needed.

CHEM 2990 - Chemical Technician Seminar

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A course designed to provide the skills necessary to enter the job market as a Chemical Technician.

One hour of lecture/discussion a week.

Pre-requisite(s): CHEM 1220.

CHEM 3000 - Quantitative Analysis

Credits: (4)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Theory and methods of gravimetric and volumetric analysis and simple instrumentation. Includes statistical evaluation of results.

Three hours of lecture and one 3-hour lab per week.

Pre-requisite(s): CHEM 1220.

Pre-requisite/Co-requisite: CHEM 3020.

CHEM 3005 - Quantitative Analysis Lab

Credits: (1)

CHEM 3005 is a stand-alone lab course designed to accommodate transfer students from other Universities. CHEM 3005 registration will be allowed only by special permission from the Chair of Chemistry. Transfer students who have taken the CHEM 3000 lecture without the lab should petition the Chair of the Chemistry Department for permission to take this course.

Pre-requisite(s): Must have completed or currently be enrolled in CHEM 3000 lecture.

Note: This course is offered as needed.

CHEM 3020 - Computer Applications in Chemistry

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A course designed to provide students computer skills for applications including computation and electronic data bases searches. It is required that this course be taken before or with CHEM 3000.

One hour of lecture/discussion a week.

Pre-requisite(s): CHEM 1210.

CHEM 3050 - Instrumental Analysis

Credits: (4)

Typically Taught Spring Semester: *Full Sem*

Theory and methods of modern instrumental analysis.

Includes practical applications in electrochemical, spectrometric, and chromatographic techniques.

Three hours of lecture and one three hour laboratory per week.

Pre-requisite(s): CHEM 3000.

Note: This course is offered as needed.

CHEM 3060 - Applied Analysis

Credits: (1)

Applied Analysis using modern methods of analysis with an emphasis on speed and accuracy.

One 3-hour lab per week.

Pre-requisite(s): CHEM 3000.

Pre-requisite/Co-requisite: CHEM 3050.

Note: This course is offered as needed.

CHEM 3070 - Biochemistry I

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Structure and function of biomolecules including proteins, nucleic acids, fats and carbohydrates. A focus on proteins as energy transforming and catalytic devices; their role in metabolism, defense and other biochemical processes.

Three lectures a week.

Pre-requisite(s): CHEM 2310 and CHEM 2315.

CHEM 3075 - Biochemistry I Lab

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Biochemistry lab course designed to accompany Biochemistry I Lecture, CHEM 3070. Includes biochemical concept illustration using chemical and biological techniques and experimentation.

Pre-requisite/Co-requisite: CHEM 3070.

CHEM 3080 - Biochemistry II

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

A detailed study of the molecular basis of life: nucleic acids, biosynthetic pathways, molecular aspects of disease and pharmacology.

Three lectures a week.

Pre-requisite(s): CHEM 2320, CHEM 2325, and CHEM 3070.

CHEM 3090 - Biochemical Techniques

Credits: (1)

Typically Taught Spring Semester: *Full Sem*

Advanced techniques including instrumentation for biochemistry.

One 3-hour lab per week.

Pre-requisite(s): CHEM 2320, CHEM 2325, and CHEM 3070.

Pre-requisite/Co-requisite: CHEM 3080.

CHEM 3400 - Molecular Symmetry and Applied Math for Physical Chemistry

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

An introduction to molecular symmetry, experimental error analysis, and physical chemistry applications of algebra, linear algebra, and differential equations.

Pre-requisite(s): MATH 1220.

Co-Requisite(s): CHEM 3410.

CHEM 3410 - Foundations in Physical Chemistry

Credits: (4)

Typically Taught Summer Semester: *NA*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

The one-semester foundation course in Physical Chemistry covering chemical thermodynamics, kinetics with an introduction to quantum mechanics. Three hours of lecture and one 3-hour lab a week.

Pre-requisite(s): MATH 1220, PHYS 2220, CHEM 3000, ENGL 2010.

CHEM 3570 - Foundations of Science Education

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

A thorough investigation of research in science learning and curricular standards at the state and national levels.

Foundations of the philosophy of science and scientific inquiry as applicable to science teaching at the secondary level. This course serves as a foundation to a preservice science teacher's education coursework.

CHEM 3610 - Foundations in Inorganic Chemistry

Credits: (4)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A foundation course for chemistry majors and minors. Topics include atomic properties, bonding, molecular symmetry, solid state structures, and transition metal complexes. This class will meet for 3 hours each week with one 3 hour laboratory per week.

Pre-requisite(s): CHEM 1220, and MATH 1060 or MATH 1080.

CHEM 4150 - Nuclear Magnetic Resonance Spectroscopy

Credits: (2)

Typically Taught Fall Semester: *Full Sem*

NMR theory is investigated from a semi-classical standpoint and practiced on an NMR spectrometer. Pulse and Fourier transform NMR basics are developed and common one- and two-dimensional NMR experiments are described.

Pre-requisite(s): CHEM 2320, CHEM 2325, MATH 1220, and PHYS 2220 with lab.

CHEM 4250 - Medicinal Chemistry

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Medicinal chemistry is a fast-paced and important field that has direct impacts on overall world health and quality of life. This 3-credit-hour course is designed for students with an interest in chemistry, biochemistry, pharmacology, and medicine. It will provide an in-depth look at how pharmacologically active molecules are designed, how they chemically interact with their targets, and how they work molecularly to treat human diseases. Selected case studies will be used to illustrate the concepts being covered. In line with our university mission, an over-arching theme will be looking at how medicinal chemistry affects our worldwide community with emphasis on patents, drug development costs, risks, and ethics.

Pre-requisite(s): CHEM 3070.

CHEM 4420 - Quantum Chemistry

Credits: (4)

Typically Taught Spring Semester: *Full Sem*

The second semester course of Physical Chemistry covering quantum mechanics, statistical mechanics, and chemical reaction dynamics.

Three hours of lecture and one 3-hour lab a week.

Pre-requisite(s): CHEM 3000 and CHEM 3410 and CHEM 3610.

CHEM 4540 - Spectrometric and Separation Methods

Credits: (4)

Typically Taught Fall Semester: *Full Sem*

Theory and practice of spectrometric and separation methods in the study of chemical systems.

Three hours of lecture and one 3-hour lab per week.

Pre-requisite(s): CHEM 3050.

CHEM 4550 - Geochemistry

Credits: (3)

The chemistry of the earth and geochemical processes operating in the lithosphere, hydrosphere, and atmosphere with a synthesis of these ideas to account for the chemical evolution of the earth. Applications to mineral stability and chemical reactions, geochemical cycles, and isotope geochemistry.

Three hours of lecture a week.

Pre-requisite(s): CHEM 1220 and GEO 2050 or consent of instructor.

Note: This course is offered during even years.

CHEM 4560 - Environmental Geochemistry

Credits: (4)

Typically Taught Spring Semester: *Full Sem*

Applications of chemistry to understanding Earth system cycles and assessing environmental health and safety. Course emphasizes modern surface geochemical cycles operating in the lithosphere, hydrosphere, atmosphere, and biosphere. Applications of aqueous chemistry, geomicrobiology, and isotope geochemistry. Laboratory introduces practical skills and real-world applications. Three hours of lecture and three hours of lab per week.

Pre-requisite(s): CHEM 1220 and GEO 3000; or consent of instructor.

CHEM 4570 - Secondary School Science Teaching Methods

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Acquaintance and practice with various teaching and assessment methods. Development of science curricula including lesson and unit plans. It is recommended that this course be completed immediately before student teaching.

Pre-requisite(s): Admission to the Teacher Education Program.

CHEM 4620 - Advanced Inorganic Chemistry

Credits: (4)

Typically Taught Spring Semester: *Full Sem*

Students will learn how to use symmetry and current bonding theories to explain and predict the structure, properties and reactivity of inorganic molecules. They will explore the breadth of inorganic chemistry including organometallic chemistry, bioinorganic chemistry, and catalysis. The research based laboratory experience focuses on the synthesis, characterization, and testing of inorganic compounds using state of the art techniques and instrumentation.

Three hours of lecture and one 3-hour lab a week.

Pre-requisite(s): CHEM 3610 or permission of instructor.

CHEM 4630 - Materials Chemistry

Credits: (4)

Typically Taught Fall Semester: *Full Sem*

Course Fee: \$20.00

Materials chemistry is the study of the synthesis, structure, properties, and applications of solid materials. Our technology-driven world is fueled by advances in materials chemistry with examples of application in areas such as nanomaterials, polymers, and energy technology. This survey course will focus on the synthesis of materials through gas, liquid, and solid phase reactions. Crystalline and molecular structure of materials will be related to electronic, optical, thermal, and mechanical properties. Some material characterization techniques including x-ray diffraction and microscopy will be covered. The accompanying lab focuses on synthesis of advanced crystalline and amorphous materials through traditional and new techniques. Analysis with scanning electron microscopy, x-ray diffraction, uv/vis spectroscopy, and IR spectroscopy is included.

Three hours of lecture and one 3-hour lab a week.

Pre-requisite(s): CHEM 3610.

CHEM 4700 - Special Topics in Chemistry

Credits: (1-3)

variable title

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Pre-requisite(s): CHEM 4420 or permission of instructor.

This course may be repeated twice for a maximum of 3 credit hours.

CHEM 4710 - Chemical Preparations

Credits: (1-3)

Synthesis and determination of the properties of selected chemical compounds.

Three to nine hours of lab a week.

Pre-requisite(s): Permission of the instructor.

Note: This course is not currently being offered.

CHEM 4800 - Research and Independent Study in Chemistry

Credits: (1-3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Open to qualified students for one or more semesters.

May be repeated for credit up to 12 times with instructor approval.

CHEM 4890 INT - Cooperative Work Experience

Credits: (1-6)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A continuation of CHEM 2890. Open to all students.

May be repeated for credit up to 12 times with instructor approval.

CHEM 4920 - Short Courses, Workshops, Institutes and Special Programs

Credits: (1-4)

Variable Title

Consult the class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript.

May be repeated 3 times with a maximum of 4 credit hours.

Note: This course is offered as needed.

CHEM 4990 - Senior Seminar

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A seminar course where students will share their research results with fellow students and faculty in written and oral formats.

Pre-requisite(s): CHEM 4800 or permission of instructor.

CHEM 5030G - Chemistry for Teachers

Credits: (3-5)

Science content course for teachers in the M. Ed Science Emphasis Program. To register, select another departmental course and develop a contract detailing additional work required for graduate credit. Contract must be approved by instructor, department chair, and Director of the Master of Education Program.

May be repeated twice with a maximum of 5 credit hours.

CHF 1400 - Marriage and Romantic Relationships

Credits: (3)

Typically Taught Summer Semester: *1st Blk Online*

Typically Taught Fall Semester: *Full Sem, Full Sem Online*

Typically Taught Spring Semester: *Full Sem, Full Sem Online*

An introductory survey course which addresses individual, interpersonal, and developmental dynamics essential for sustaining interpersonal and marital relationships.

CHF 1500 SS/DV - Human Development

Credits: (3)

Typically Taught Summer Semester: *Full Sem, Full Sem Online*

Typically Taught Fall Semester: *Full Sem, Full Sem Online*

Typically Taught Spring Semester: *Full Sem, Full Sem Online*

A survey course which addresses the developmental aspects of individuals across the lifespan. Course content encompasses the study of biological, cognitive, social, and emotional developmental changes of the healthy individual in the context of the family and society. It emphasizes and demonstrates the vital connections between theory, research, and application.

CHF 2100 - Family Resource Management

Credits: (3)

Typically Taught Summer Semester: *Full Sem, Full Sem Online*

Typically Taught Fall Semester: *Full Sem, Full Sem Online*

Typically Taught Spring Semester: *Full Sem, Full Sem Online*

Understanding the significance of values, goals, attitudes and planning strategies in the management of human, economic and environmental resources as they relate to increasing satisfaction and the enhancement of family relationships.

CHF 2400 SS/DV - Family Relations

Credits: (3)

Typically Taught Summer Semester: *1st Blk, 1st Blk Online*

Typically Taught Fall Semester: *Full Sem, Full Sem Online*

Typically Taught Spring Semester: *Full Sem, Full Sem Online*

Examines dynamics of the healthy family using family theory, individual life span development, research, and active learning experiences.

CHF 2500 - Development of the Child

Credits: (3)

Typically Taught Summer Semester: *1st Blk Online*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Examines the major physical, socioemotional, and cognitive/language developmental milestones for children, both typical and atypical, through middle childhood. There is an emphasis on interactions between maturational processes and environmental factors. While studying developmental theory and investigative research methodologies, students observe children, evaluate individual differences and analyze characteristics of development at various stages.

Pre-requisite/Co-requisite: CHF 1500.

CHF 2600 - Introduction to Early Childhood Education

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$50.00

An overview of the historical roots of early childhood education; theoretical approaches, developmentally appropriate practice, types and efficacy of early childhood programs; and political issues and ethical conduct within the early childhood profession.

3 hours lecture per week and 12 hours field observation.

Pre-requisite(s): CHF 1500, concurrent or prior enrollment in CHF 2500, or instructor consent.

CHF 2610 - Guidance Based on Developmental Theory

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$25.00

The development of a philosophy and a plan of action for guiding the child based on theories of development. Lectures combine with laboratory experiences to provide opportunity for building relationships with young children. Students complete a minimum of 24 hours practicum arranged by the instructor.

Pre-requisite(s): CHF 1500.

CHF 2620 - Planning Creative Experiences for Young Children

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$50.00

Development of attitudes, materials, and skills needed to plan and teach age, individually, and culturally appropriate curriculum for young children. Students complete a minimum of 24 hours practicum arranged by the instructor.

Pre-requisite(s): CHF 1500, CHF 2500, CHF 2600, and CHF 2610.

CHF 2670 - STEM and Approaches to Learning in Early Childhood

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$50.00

The purpose of this course is to build on a foundation of knowledge of developmentally appropriate practice for teaching integrated content in the disciplines of science, technology, engineering, and math (STEM) in early childhood settings. Fundamental approaches to learning will be employed to integrate learning across these disciplines. Students will develop meaningful curriculum content through hands-on learning experiences designed for children (birth through age 8) based on accepted learning standards in each content area.

Pre-requisite(s): CHF 2600, CHF 2610, CHF 2620.

CHF 2810 - Educator Resilience

Credits: (3)

Experimental Course, Contact Department for More Information

This online course develops educator well-being and resilience through life design, identifying and addressing cognitive distortions, fostering optimistic thinking, relaxation strategies, choosing one's attention, practicing mindfulness and gratitude. Use of a variety of positive strategies and routines such as value oriented goals and behaviors, prioritizing, time and organization skills, good sleep and nutrition, scheduling in fun, and doing what matters most are also explored.

CHF 2810 - Experimental Courses

Credits: (1-5)

Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript. Refer to Experimental Courses.

CHF 2810 - Family, School, and Community Partnerships

Credits: (1-3)

Experimental

Equips students with foundational philosophies, evidence-based models, interpersonal process skills and strategies for inclusive practice with families of all young children (birth - 8 years) that may be applied to a variety of early education, family education, therapeutic and social service settings. Components of family structure, economics, abilities, gender, culture and language learning, community resources are integrated into the student experience.

CHF 2830 - Directed Readings

Credits: (1-3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Individually chosen readings on specialized topics supervised by a faculty member.

Pre-requisite(s): Consent of faculty supervisor prior to registration.

May be repeated up to 3 credit hours.

CHF 2850 - Child Development Associate Training

Credits: (2)

Understanding child development concepts and applying them to teaching situations with young children. The Professional Resource File in preparation for National Child Development Associate Credential (CDA) is compiled during the course.

Note: This course is not currently offered.

CHF 2860 INT - Practicum

Credits: (2-6)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$50.00

Work experience which applies prior academic learning in

a supervised setting.

Pre-requisite(s): For Early Childhood majors: CHF 1500, CHF 2500, CHF 2600, CHF 2610, CHF 2620, or consent of faculty advisor prior to registration.
May be repeated up to 6 credit hours.

CHF 2890 INT - Cooperative Work Experience

Credits: (3-6)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$50.00

Open to all students in the Child and Family Studies Department who meet the minimum Cooperative Work Experience requirements of the department. Provides academic credit for on-the-job learning experience with coordination of faculty instructor and professional mentor. Ethical conduct related to working with children and families will be discussed. Professional activities will include goal setting, strategies, and documentation for progress evaluation meetings culminating in a student-created professional development portfolio. Students will arrange their own opportunities in a professional setting. Prior consent of the faculty instructor and the professional mentor are required. Fingerprinting/background check may be needed to work in certain settings.

Pre-requisite(s): For Early Childhood AAS majors: CHF 2860, or consent of faculty advisor.

CHF 2920 - Short Courses, Workshops, Institutes and Special Programs

Credits: (1-4)

Variable Title

Consult the class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript.

May be repeated up to 6 credit hours.

Note: This course is taught as needed.

CHF 2990A - Seminar in Child Development

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Discussion and analysis of readings and selected topics in growth, development, and education of the young child.

Pre-requisite(s): CHF 1500, CHF 2500, CHF 2600, CHF 2610, CHF 2620, and concurrent or prior enrollment in CHF 2860, or instructor's consent.

CHF 2990B - Seminar in Family Studies

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Discussion and analysis of special topics for Family Studies majors including professional skills, professional credentials, and the development of professional ethics.

CHF 3150 - Consumer Rights and Responsibilities

Credits: (3)

Typically Taught Summer Semester: *Online*

Typically Taught Fall Semester: *Online*

Typically Taught Spring Semester: *Online*

The role and responsibilities of the family and its members as consumers. An exploration of marketplace fact and fraud and identification of consumer resources.

CHF 3350 - Diverse Families

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A comparative analysis of various types of ethnic families in the United States reflecting their social and political dynamics with extensive coverage of the family lifestyles, traditions and values. Several American ethnic groups will be examined including historical background, key ethnic cultural components, traditional and current ethnic family characteristics, and changes and adaptations to the ethnic family and culture.

CHF 3400 - Development in Middle Adulthood

Credits: (3)

Typically Taught Summer Semester: *Full Sem Online*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

The content of this course is designed to create a foundation of knowledge and understanding for the required core competency of the nationally recognized Family Life Education Content areas. Specifically addressing competency area number 3, Human Growth and Development across the Lifespan. The course will focus on normative and non-normative individual developmental processes, as well as systemic dynamics of social context surrounding and impacting middle-aged development.

CHF 3450 - Adult Development

Credits: (3)

Typically Taught Summer Semester: *1st Blk*

Typically Taught Spring Semester: *Full Sem*

Growth and development through young, middle, and late adulthood within a developmental and family system context.

CHF 3500 - Young Children at Risk

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Focuses on the elements of the child's history, status, biological traits, and social circumstances that have the potential of placing the child in a position of risk in early childhood settings during the early childhood period.

CHF 3550 - Parenting Education

Credits: (3)

Typically Taught Summer Semester: *Online*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A course designed to assist in the acquisition of skills and knowledge regarding the understanding and facilitation of contemporary parents in their parenting role. Course content will include conceptualizations and strategies from both contemporary theoretical and applied perspectives.

CHF 3570 - Infants and Toddlers: Development and Practice

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course provides an in-depth study of physical, cognitive, language, social, and emotional development from prenatal period through toddlerhood. Practical application and assessment play an integral part of the course. Students will be introduced to observation, early intervention, and relationship-based care in diverse settings. Students complete a minimum of 24 hours practicum arranged by the instructor.

Pre-requisite(s): CHF 1500

CHF 3620 - Curriculum Planning for Kindergarten

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

An introduction to planning curriculum in kindergarten with an emphasis on design of learning environments and curriculum that are developmentally appropriate and evidence based. Students complete a minimum of 24 hours practicum. Student are required to complete a background check by the beginning of the semester.

Pre-requisite(s): CHF 1500; CHF 2500; CHF 2610.

CHF 3640 - Working with Parents

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Prepares students to be advocates and practitioners of parent involvement by exploring philosophies, processes, and methods for working with parents and involving them in their child's learning process. Components of family structure, economics, cultural diversity, second-language learners, communication skills, community resources, and a model for parent involvement are integrated into the student experience.

Pre-requisite(s): CHF 1500.

CHF 3650 - Family Processes

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

An examination of family internal dynamics and family systems for the purpose of enrichment, problem prevention and education.

Pre-requisite(s): CHF 2400.

CHF 3680 - Teaching Experience in the Preschool

Credits: (3)

Provides students an opportunity to be an assistant teacher, to observe and interact with children on an individual and group basis; plan, develop, and implement activities for children.

Pre-requisite(s): CHF 1500, CHF 2610 and CHF 2620, or consent of instructor.

Note: This course is not currently offered.

CHF 3700 - Family Life Education and Sexuality

Credits: (3)

Typically Taught Summer Semester: *1st Blk*

Typically Taught Spring Semester: *Full Sem*

This course is a survey of issues and attitudes associated with Family Life Education (FLE) and sexuality. It is primarily intended for professionals who currently work with individuals or plan to in the future. Using a biopsychosocial perspective, emphasis will be placed on the social, cultural, familial and individual differences in sexual and reproductive attitudes, values, and behavior. Students will be introduced to common sex-related issues and to the particular concerns of various sexually oppressed groups. Information will also be provided about childhood sexual abuse and its relationship to the intimacy issues that clients typically present in direct practice.

CHF 3820 - Organization and Leadership of Non-profit Family Services

Credits: (3)

Typically Taught Summer Semester: *1st Blk*

Typically Taught Spring Semester: *Full Sem*

This course will introduce the student to theories and structures of family service organizations, best practices for planning, managing people, customer service models, working budgets and evaluating family service programs. Class discussions, case studies, and guest speakers will be used to help students understand the application of the basic concepts. Leadership styles will be examined as an overall context within which the management of family service programs occurs.

CHF 3850 - Current Research Methods in Child and Family Studies

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

An introduction to the methods and types of research used in the study of family issues and processes. Focus of the course includes the development of student knowledge and skills used in applying the scientific method in family studies contexts. Understanding, reviewing, evaluating, and interpreting the methods and conclusions reported in the professional empirically based journals will also be emphasized.

Pre-requisite(s): CHF 1500, CHF 2400.

CHF 4130 - Language Development and Emergent Literacy in Early Childhood

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course explores current theory, research, and evidence based practices for promoting early language and emergent literacy development (birth 8 years) in home, child care, prekindergarten, and primary education environments through collaborative practices between early childhood professionals and parents.

Pre-requisite(s): CHF 1500.

CHF 4201 - Coaching EC/ECE Professionals: Foundation & Organization of Coaching Application: Organization & Self Reflection

Credits: (3)

Typically Taught Spring Semester: *Full Sem odd years*

Educator coaching is an evidence-based strategy to increase program quality and teacher effectiveness in early childhood/early childhood education classrooms, programs, and home delivery systems. This course will train EC/ECE coaches using material from research-based sources and program experiences. Participants will learn recommended practices in coaching related to early childhood and develop a systematic, individualized approach to effective coaching. Participants will learn practical strategies for coaching early childhood staff of diverse backgrounds and varying adult learning styles. Materials and discussions will include interpersonal communication skills and a systematic approach to more intentional coaching. Students will apply these strategies to Case Studies and field work experiences throughout the course and will participate in hands-on activities in class to apply new skills. Coaching skills will apply to any EC/ECE curriculum or model. This is course 1 in a three course series for the Utah Coaching Credential.

CHF 4202 - Coaching EC/ECE Professionals: Connecting Awareness with Application & Deepening of Practice

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Becoming an effective coach is a result of introspection, thoughtful planning, application of coaching skills and knowledge, and continuous self-improvement. This course will identify effective ongoing support strategies for

individuals providing coaching. Participants will integrate skills with effective application in real life coaching experiences. Discussions will include self-reflective practices, self-directed action, planning and goal setting, and managing progress and accountability. Students will apply these strategies to case studies and real life experiences throughout the course. Students will be encouraged to engage in self-reflection and share ideas, successes, and challenges with other students in this course. This is course 2 in a three course series for the Utah Coaching Credential.

Pre-requisite(s): CHF 4201/MED 6201 or instructor permission.

CHF 4203 - Coaching EC/ECE Professionals: Attuning for Personal and Organizational Change

Credits: (3)

Typically Taught Fall Semester: Full Sem

The success of the educator coaching relationship has been based on the trusting relationship between two peers, coach, and adult learner, through a collaborative process of co-learning. The opportunity for the adult learner to self-monitor, self-analyze, and self-modify enhances the adult learner's own resourcefulness and alters his/her own personal understanding. In addition, when the act of coaching is a collaborative process, the coach is also allowed the same opportunity to reflect on self as part of their learning. This course is designed to support the coach in creating a social learning climate where a synergy of shared learning and reflective dialogue about practice are examined, analyzed and refined. Participants will integrate skills from Course 1 and 2 with opportunities to engage in conducting and constructing ongoing support strategies the coach can apply, refine and alter based on the adult learners' needs, readiness, and values about practice. Using strategies and protocols, coaching for organizational change in diverse settings (home-based programming, early care settings, classrooms, and school districts, etc.), and identifying effective ongoing personal supports will also be addressed. Students will apply these strategies to case studies and real life experiences throughout the course. This is course 3 of a three course series for the Utah Coaching Credential.

Pre-requisite(s): CHF 4201/MED 6201 and CHF 4202/MED 6202 or instructor permission.

CHF 4275 - Family Life Education Coaching

Credits: (3)

Typically Taught Spring Semester: Full Sem

This course is to prepare students to become family life coaches. The course covers topics from the foundational theories/models of coaching (positive psychology, cognitive-behavioral coaching, and others), how to conduct coaching sessions, the delineation between counseling and coaching, and how to run a coaching business. Students will practice coaching with other students as well as with actual practice clients.

CHF 4300 - Latino Child and Family Development

Credits: (3)

Typically Taught Summer Semester: 1st Blk

Typically Taught Spring Semester: Online

The Latino Child and Family Development course is designed as an upper division course for those who will work with, advocate for, or interact with children and families from a Latino background. The course uses a cultural constructivist approach to understand Latino children and their families. The central focus includes the study of Latino culture, parenting practices, couple and marital practices, and other family dynamics. Additionally, a major goal is to understand and deconstruct stereotypes associated with individuals within the Latino culture. The course will simultaneously focus on Latinos living within the United States as well as cultural groups throughout North America, South America, and the Caribbean.

CHF 4310 - Understanding the Modern United States Military Family

Credits: (3)

Typically Taught Fall Semester: Full Sem

Typically Taught Spring Semester: Full Sem

This course is designed to assist you in understanding the structure and formation of each service branch as well as the experiences of families serving in the U.S. Military focusing on both Active duty and Reserve components using Family Systems Theory, Risk and Resiliency Theory and Ambiguous Loss Theory. In recent years, many changes have taken place in the military family landscape. The knowledge gained in this course should provide you with insight into the complex experiences of today's U.S. Military Families. The information provided in this course is designed to assist students to be effective in professional settings working with military personnel and their families, and is a starting foundation for those interested in pursuing professional civilian careers working with military families in a variety of settings (e.g., nonprofit organizations, the

U.S. Military, and others). This course will focus on different components of family life that specifically impact military families. The course format will include (1) readings, (2) online lectures, (3) quizzes, (4) exams, and (5) online and in class discussion.

Pre-requisite(s): CHF 1400, CHF 1500, CHF 2400.

CHF 4350 - Religiosity and Family Life Education

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

The Religiosity and Family Life Education course as an upper-division course that examines how various religious traditions and practices influence family dynamics and interaction. Specifically, how religious traditions and practices influence couple formation, marital dynamics, parenting practices, gender roles, intergenerational relationships, and sexuality. Furthermore, to develop an understanding and appreciation for a diversity of faith traditions (including nonbelief). Finally, how family life educators can effectively work with diverse populations in a variety of settings.

CHF 4400 - The Family in Stress

Credits: (3)

Typically Taught Summer Semester: *Online*

Typically Taught Fall Semester: *Full Sem, Online*

Typically Taught Spring Semester: *Full Sem, Online*

Examining causes of stress in the family and developing strategies for coping with stress.

CHF 4450 - Children and Families in the Medical Setting

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

The purpose of this course is to understand and serve children and families in the medical setting and to provide basic background and knowledge of Child Life practices. This course prepares individuals who plan to complete a 480 hour cooperative work experience in the field of Child Life, and is required prior entering into an internship and taking the National Child Life Certification Examination.

The content of this course is designed to create a foundation of knowledge, both academically and practically, in the required core competencies of the nationally recognized Child Life Certification. The core competencies include the ability to assess and provide services to infants, children, youth, and families in a

medical setting including stress management, supportive environments, team skills, professional development, and evaluation skills.

CHF 4500 - Comparative Study of Childhood and Adolescent Development

Credits: (3)

Typically Taught Summer Semester: *Online*

Typically Taught Spring Semester: *Full Sem*

An advanced level course that addresses the understanding of the principles and theories of growth and development within and between the stages of children in childhood and adolescence. Covers the physiological, intellectual, social, emotional domains of development.

CHF 4510 - Contemporary Issues in Planning for Children

Credits: (1-3)

Variable Title

An in-depth study of a contemporary issue in childhood. In some cases, this course may substitute for one of the minor requirements when it has received prior approval from a department advisor.

May be repeated up to 3 credit hours.

Note: This course is not currently offered.

CHF 4520 - Basic Mediation Training

Credits: (3)

A basic mediation training course addressing the theory and skills to effectively deal with conflict situations. The course leads to certification in basic theory and skills of mediation. (Supervised mediation practice is required to complete certification.)

Note: This course is taught as needed.

CHF 4600 INT - Family Studies Field Experiences

Credits: (1-8)

Six to eight weeks internship, which may require off-campus residence. Credit and hours as arranged with instructor.

Pre-requisite(s): consent of instructor.

May be repeated up to 8 credit hours.

Note: This course is taught as needed.

CHF 4650 - Family Life Education Methods

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Preparing students to be Family Life Educators by exploring philosophies, methods, and skills for teaching and working with parents and family members.

Pre-requisite(s): CHF 3350, CHF 3550, and CHF 3850, or consent of instructor.

CHF 4660 - Advanced Skills for Family Life Educators

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This upper division course is centered on students' development of interpersonal and pedagogical skills as Family Life Educators under the direct supervision of course instructors. This theory-based course will provide students with hands-on skills and experiences that are vital for today's family life educators. This includes building audience engagement and trust through the use of observational feedback, responding to nonverbal cues, and addressing common teaching challenges. This course will teach students to present specific family life education program curricula. The course training will include students reviewing and presenting the family life education materials in two contexts: 1-within the classroom among peers and faculty and 2-within the community. This course also provides students with a number of teaching tools and philosophies considered key to becoming effective in the field of Family Life Education, and it also provides students with the experience of having presented a community education program in multiple contexts.

CHF 4670 - STEM and Approaches to Learning in Early Childhood

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Course Fee: \$50.00

The purpose of this course is to build on a foundation of knowledge of developmentally appropriate practice for teaching integrated content in the disciplines of science, technology, engineering, and math (STEM) in early childhood settings. Fundamental approaches to learning will be employed to integrate learning across these disciplines. Students will develop meaningful curriculum content through hands-on learning experiences designed for

children (birth through age 8) based on accepted learning standards in each content area.

Pre-requisite(s): CHF 2600, CHF 2610, CHF 2620.

CHF 4710 - Advanced Guidance and Planning for Early Childhood Education

Credits: (1-3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A synthesis of guidance and planning with an emphasis on assessment, appropriate objectives and strategies for individual and specific groups of children. Requires both lecture and lab time.

Pre-requisite(s): CHF 1500, CHF 2500, CHF 2600, CHF 2610, and CHF 2620.

Co-Requisite(s): Students majoring in EC, ECE, or taking an early childhood specialization with their K-6 license will register for the section that is offered the first 5 weeks of the semester, and take it concurrently with CHF 4720.

Pre-requisite/Co-requisite: CHF 3640.

CHF 4720 INT - Student Teaching in the Children's School

Credits: (6)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Experience in application of generalizations regarding growth, guidance, and development of children in the Melba S. Lehner Children's School. For juniors and seniors.

Pre-requisite(s): CHF 1500, CHF 2500, CHF 2600, CHF 2610, and CHF 2620.

Co-Requisite(s): To be taken concurrently with CHF 4710.

Pre-requisite/Co-requisite: CHF 3640.

May be repeated 2 times up to 9 credit hours.

CHF 4730 - Early Childhood/Early Childhood Education Program Development

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course prepares students with skills specific to leadership roles in early childhood education programs including: professional ethics, ensuring the health and safety of children, ongoing quality improvement, program leadership, planning, and management. Content and skills focus on practices endorsed by the National Association for

the Education of Young Children (NAEYC) and are aligned with the NAEYC Standards for Early Childhood Professional Preparation Programs.

Pre-requisite(s): CHF 2600, CHF 2610, CHF 2620, or consent of the instructor, and concurrent or prior enrollment in CHF 4710 and CHF 4720.

CHF 4800 - Individual Research

Credits: (1-6)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Supervised projects and primary research in various areas of Child and Family Studies. Limited to advanced students upon consent of faculty supervisor.

May be repeated up to 6 credit hours.

CHF 4810 - Educator Resilience

Credits: (3)

Experimental Course, Contact Department for More Information

This online course develops educator well-being and resilience through life design, identifying and addressing cognitive distortions, fostering optimistic thinking, relaxation strategies, choosing one's attention, practicing mindfulness and gratitude. Use of a variety of positive strategies and routines such as value oriented goals and behaviors, prioritizing, time and organization skills, good sleep and nutrition, scheduling in fun, and doing what matters most are also explored.

CHF 4810 - Family, School, and Community Partnerships

Credits: (1-3)

Experimental

Equips students with foundational philosophies, evidence-based models, interpersonal process skills and strategies for inclusive practice with families of all young children (birth - 8 years) that may be applied to a variety of early education, family education, therapeutic and social service settings. Components of family structure, economics, abilities, gender, culture and language learning, community resources are integrated into the student experience.

CHF 4830 - Directed Readings

Credits: (1-3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Individually chosen readings on specialized topics supervised by a faculty member. Credit for this course towards a Child and Family Studies major or minor will only be accepted when the course is completed with a grade of B- or better.

Pre-requisite(s): Consent of faculty supervisor prior to registration.

May be repeated up to 3 credit hours.

CHF 4860 INT - Practicum

Credits: (1-6)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Work or volunteer experience which applies prior academic learning in a supervised setting. Consent of faculty supervisor is required prior to registration.

Pre-requisite(s): for Family Studies Majors include CHF 2990B, CHF 3350, CHF 3550, CHF 3850, and completed background clearance.

May be repeated up to 6 credit hours.

CHF 4890 - Cooperative Work Experience

Credits: (3-6)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$50.00

Open to all students in the Child and Family Studies Department who meet the minimum Cooperative Work Experience requirements of the department. Provides academic credit for on-the-job learning experience with coordination of faculty instructor and professional mentor. Ethical conduct related to working with children and families will be discussed. Professional activities will include goal setting, strategies, and documentation for progress evaluation meetings culminating in a student-created professional development portfolio. Students will arrange their own opportunities in a professional setting. Prior consent of the faculty instructor and the professional mentor are required. Fingerprinting/background check may be needed to work in certain settings.

Pre-requisite(s): for Early Childhood BS majors: CHF 4710 and CHF 4720, or consent of faculty supervisor.

CHF 4900 - Career Strategy Seminar

Credits: (1)

Open to first semester Juniors through first semester Seniors in all academic schools. Course objectives are to

help students develop a career strategy to meet expected career goals, i.e., acquire a career position or successfully prepare for graduate school acceptance.

Note: This course is not currently offered.

CHF 4920 - Short Courses, Workshops, Institutes and Special Programs

Credits: (1-4)

Variable Title

Consult the class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript.

May be repeated up to 6 credit hours.

Note: This course is taught as needed.

CHF 4980 - Early Childhood Senior Synthesis Seminar

Credits: (1)

Synthesis of Early Childhood/Elementary Education program of study with specific emphasis on beginning a professional career in teaching. Senior project not required.

Suggested Requisite(s): To be taken concurrently with student teaching.

Note: This course is not currently offered.

CHF 4990A - Seminar in Child Development

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Discussion and analysis of special topics for advanced Early Childhood and Early Childhood Education majors.

Pre-requisite(s): CHF 2500, CHF 2600, CHF 3640, and CHF 3500 (or EDUC 2010) or instructor's consent, and concurrent or prior enrollment in CHF 4710 and CHF 4720.

CHF 4990B - Senior Seminar in Family Studies

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Discussion and analysis of special topics for seniors in Family Studies major.

Pre-requisite(s): CHF 2990B, CHF 3350, CHF 3550, CHF 3850, or consent of instructor.

CHNS 1000 - Proficiency Development

Credits: (1-2)

(N=Novice) (Cr/NCr) Non-graded courses for entry-level students to augment foreign language instruction in stress-free activities such as reading children's literature, learning and performing skits, folk dancing, singing, cooking, etc. May be repeated for credit under different titles.

Note: Course not currently being offered.

CHNS 1010 - First Semester Chinese

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Course Fee: \$8.00

(N=Novice) Introductory course assuming no significant previous experience with the language. Beginners and students with less than two years of high school language should register for this class. Emphasis on everyday conversation and exposure to cultural perspectives.

CHNS 1020 - Second Semester Chinese

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$8.00

(N=Novice) Continuation of CHNS 1010. Basic language skills including listening, speaking, reading, writing and culture.

CHNS 1852 - Study Abroad

Credits: (1-3)

(N=Novice) Language and culture studies for students with no previous experience in the target language and culture. Most assignments are performed in English. Prior travel experience does not apply.

May be repeated twice with a maximum of 3 credit hours.

Note: Check with Department for course availability.

CHNS 2000 - Proficiency Development

Credits: (1-2)

(NH=Novice High) (CR/NC) Non-graded courses for second-year students to augment foreign language instruction in stress-free activities appropriate to the linguistic level of second-year students. May be repeated under different titles. Note: Course not currently being offered.

CHNS 2010 - Third Semester Chinese

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Course Fee: \$8.00

(NH=Novice High) Continuation of CHNS 1020. Assumes completion of first-year or equivalent experience. Students learn to understand and express ideas about their community and the world. Includes listening, speaking, reading, writing and culture.

CHNS 2020 HU - Fourth Semester Chinese

Credits: (3)

Course Fee: \$8.00

(NH=Novice High) Continuation of CHNS 2010. The learning and application of strategies for acquiring a foreign language. Students also learn how cultural products and practices reflect a culture's attitudes, values, ideas and meaning. The process of language acquisition and the seeking of cross-cultural understanding provide insights into the commonalities of how the human family learns, thinks and communicates.

CHNS 2021 - Second Year II

Credits: (3)

(NH=Novice High) Continuation of CHNS 2010 without General Education Humanities credit. Offered through examination only.

Pre-requisite(s): Only available through testing.

CHNS 2030 - Second Year Language Review

Credits: (3)

Course Fee: \$8.00

(IL=Intermediate Low) This is a transition course to upper division. The course focuses on oral proficiency development. Students will learn a variety of techniques and strategies to increase their oral proficiency in a variety of social, educational and cultural settings. Native-speaking students or those who have acquired proficiency through residence in the target language community are not eligible to take this class.

Note: Check with department for course availability.

CHNS 2851 - Study Abroad

Credits: (3)

(NH=Novice High) Language and culture studies for students whose minimal proficiency is Novice High.

Language assignments at the Novice or Intermediate-Low levels are performed in the target language. All other assignments are performed in English. Prior travel experience does not apply.

Note: Check with Department for course availability.

CHNS 2852 - Study Abroad

Credits: (1-3)

(NH=Novice High) Language and culture studies for students whose minimal proficiency is at Novice High. Language assignments at the Novice or Intermediate-Low levels are performed in the target language. All other assignments are performed in English. Prior travel experience does not apply.

Twice with a maximum of 3 credit hours.

Note: Check with Department for course availability.

CHNS 3000 - Proficiency Development

Credits: (3)

Course Fee: \$8.00

(IL=Intermediate Low) This is a transition course to upper division. The course focuses on oral proficiency development. Students will learn a variety of techniques and strategies to increase their oral proficiency in a variety of social, educational and cultural settings. Native-speaking students or those who have acquired proficiency through residence in the target language community are not eligible to take this class.

Note: Check with department for course availability.

CHNS 3060 - Grammar & Composition

Credits: (3)

Course Fee: \$8.00

(IL=Intermediate Low) This is a transition course to upper division. The course focuses on oral proficiency development. Students will learn a variety of techniques and strategies to increase their oral proficiency in a variety of social, educational and cultural settings. Native-speaking students or those who have acquired proficiency through residence in the target language community are not eligible to take this class. Note: Check with department for course availability.

CHNS 3116 - DLI Bridge Course I

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Taught in DLI High Schools for students who have passed the AP Exam with a 3 or higher. Although this is a three

credit-hour class, it will meet over the course of a full academic year. Credit will count toward a major or minor in the language.

Pre-requisite(s): CHNS 2020 or AP exam with a score of 3 or better

CHNS 3117 - DLI Bridge Course II

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Taught in DLI High Schools for students who have passed the AP Exam with a 3 or higher. Although this is a three credit-hour class, it will meet over the course of a full academic year. Credit will count toward a major or minor in the language.

Pre-requisite(s): CHNS 2020 or AP exam with a score of 3 or better

CHNS 3118 - DLI Bridge Course III

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Taught in DLI High Schools for students who have passed the AP Exam with a 3 or higher. Although this is a three credit-hour class, it will meet over the course of a full academic year. Credit will count toward a major or minor in the language.

Pre-requisite(s): CHNS 2020 or AP exam with a score of 3 or better

CHNS 3320 - Applied Language Studies

Credits: (1-3)

Variable Title

Course Fee: \$8.00

(Minimal proficiency level varies with content).

May be repeated up to 10 times under different titles.

CHNS 3550 - Cultural Heritage I

Credits: (3)

Variable Title

Course Fee: \$8.00

(Intermediate Mid) In-depth studies in culture, history, geography, social customs, fine arts and civilization. May be repeated up to 7 times for credit and for other non-English speaking cultures.

CHNS 3631 - Literature: Prose

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Course Fee: \$8.00

(IM=Intermediate Mid). A survey of works in prose by one or various authors of a particular period or place, or spanning several literary movements and geographical regions. May be taken 3 times up to 9 credits under different titles.

CHNS 3632 - Literature: Drama

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Course Fee: \$8.00

(IM=Intermediate Mid). A survey of theater plays by one or various authors of a particular period or place, or spanning several literary movements and geographical regions. May be taken 3 times up to 9 credits under different titles.

CHNS 3680 - Literature: Film

Credits: (3)

Course Fee: \$8.00

(IM=Intermediate Mid). A survey of film by one or various filmmakers of a particular period or place, or spanning several literary movements and geographical regions.

May be taken 3 times up to 9 credits under different titles.

Note: Check with department for course availability.

CHNS 3710 - Business Language I

Credits: (3)

Course Fee: \$8.00

(IM=Intermediate Mid) Business Language and Practices. Required of all commercial majors.

Note: Check with department for course availability.

CHNS 3850 - Study Abroad

Credits: (1-6)

(IM=Intermediate Mid) Language and culture studies for students whose language proficiency is Intermediate Low to Intermediate High. All Intermediate and Advanced tasks will be performed in the target language. All Superior tasks may be performed in English. Prior travel experience does not apply. May be repeated up to 10 times for credit.

CHNS 4830 - Directed Readings

Credits: (1-3)

(IH=Intermediate High) Independent readings under the direction of a faculty member.

May be repeated up to 10 times.

Note: Check with Department for course availability.

CHNS 4920 - Short Courses, Workshops, Institutes and Special Programs

Credits: (1-4)

(minimal proficiency level varies with content) Consult the class schedule for the current offering under this number.

The specific title and credit authorized will appear on the student transcript.

May be repeated 5 times with a maximum of 6 credit hours.

Note: Course not currently being offered.

CJ 1010 SS - Introduction to Criminal Justice

Credits: (3)

Typically Taught Summer Semester: *Full Sem, Online*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem, Online*

An introduction to the history, processes and functions of the American criminal justice system and its primary components, law enforcement, courts, and corrections.

CJ 1070 - Law Enforcement/Corrections Academy, Part I

Credits: (9)

Experiential credit for students completing a State of Utah authorized SFO/BCO or SFO/LEO POST Academy. Credit is earned concurrently with CJ 1080. Register through the Department of Criminal Justice. *Does not count for credit toward CJ major, CJ minor or BIS emphasis in CJ.*

CJ 1080 - Law Enforcement/Corrections Academy, Part II

Credits: (9)

Experiential credit for students completing a State of Utah authorized SFO/BCO or SFO/LEO POST Academy. Credit is earned concurrently with CJ 1070. Register through the Department of Criminal Justice. *Does not count for credit toward CJ major, CJ minor or BIS emphasis in CJ.*

CJ 1300 - Corrections: History, Theory and Practice

Credits: (3)

Typically Taught Summer Semester: *Full Sem, Online*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem, Online*

An introductory overview of the correctional system including: the historical development and societal context of corrections, contemporary correctional theory and law, jails and prisons, community corrections, treatment, juvenile corrections, and contemporary correctional issues.

CJ 1330 - Criminal Law and Courts

Credits: (3)

Typically Taught Summer Semester: *Online*

Typically Taught Fall Semester: *Full Sem, Online*

Typically Taught Spring Semester: *Full Sem*

Surveys American criminal law and the criminal court system. Elements of crime, defenses, historical foundation, limits, purposes and functions of criminal law. History, theory and practice of criminal courts.

CJ 1340 - Criminal Investigation

Credits: (3)

Typically Taught Summer Semester: *Online*

Typically Taught Fall Semester: *Full Sem, Online*

Typically Taught Spring Semester: *Full Sem, Online*

This is an introduction to Criminal Investigation including the necessary functions of interviewing witnesses and suspects, techniques in the collection and preservation of evidence, crime scene processing including some post-crime scene processing of evidence, follow-up investigation and recent techniques of enhancing the criminal investigation function.

CJ 1350 - Introduction to Forensic Science

Credits: (3)

Typically Taught Fall Semester: *Full Sem, Online*

Typically Taught Spring Semester: *Full Sem, Online*

An introduction to the various types of physical evidence commonly encountered at crime scenes (e.g., fingerprints, hairs, fibers, drugs, glass, etc.), including discussion of comparison and identification techniques (i.e., optical examination/comparison, instrumental analysis, and many chemical processes) used in the analysis of such physical evidence.

CJ 2300 - Policing: History, Theory and Practice

Credits: (3)

Typically Taught Summer Semester: *Online*

Typically Taught Fall Semester: *Full Sem, Online*

Typically Taught Spring Semester: *Full Sem, Online*

This course will provide an overview of the history of policing and the role of police in modern society. Particular emphasis will be placed on problems and issues confronting police and solutions within an organizational framework.

CJ 2330 - Juvenile Justice

Credits: (3)

Typically Taught Summer Semester: *Online*

Origin, philosophy, and development of the juvenile justice system, particularly the juvenile court. Emphasis placed upon laws, detention, adjudication, probation, after-care, foster homes, and other alternative correctional practices.

CJ 2340 - Crime Scene Investigation

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course is designed to give students an understanding of the integration of the criminal investigative process with complex scientific application of modern technology in searching for and processing physical evidence in crime scenes. It will provide background into the theory behind Crime Scene Science and the ethical and legal challenges faced by Forensic Scientists and Crime Scene Investigators. Using modern instructional materials, students will learn of the complexity of processing and documentation of Crime Scenes with the ultimate goal of having a successful outcome in the court system.

Pre-requisite(s): CJ 1350.

CJ 2350 - Laws of Evidence

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Deals with the principles and rules of law emphasizing evidentiary problems related to criminal cases.

CJ 2360 - Juvenile Law and Procedure

Credits: (3)

Typically Taught Summer Semester: *Full Sem, Full Sem Online*

Typically Taught Spring Semester: *Full Sem, Full Sem*

Online

An investigation of the juvenile justice system emphasizing Utah law and procedure. Studies differences between juvenile and adult systems, delinquent acts, juvenile treatment as adults and role and function of probation, youth corrections, family services and the community.

CJ 2400 - Criminal Court Process

Credits: (3)

Typically Taught Summer Semester: *Full Sem Online*

Typically Taught Fall Semester: *Full Sem, Full Sem Online*

Typically Taught Spring Semester: *Full Sem, Full Sem Online*

Introduction to American criminal case processing including instruction on how a case is processed, step-by-step, from beginning to end. The motivations, cultural norms and behaviors of attorneys, judges and jurors will also be studied.

CJ 2810 - Experimental Course

Credits: (1-3)

This number is used for newly developed experimental courses. Refer to Experimental Courses.

May be repeated up to two additional times if new topic(s), for a combined total not exceeding 9 credit hours.

CJ 2860 INT - Criminal Justice Field Experience

Credits: (3)

Field experience in an internship with city, county, and state criminal justice agencies.

May be repeated once for 6 credit hours.

Note: This course is not currently offered (see CJ 4860).

CJ 2861 INT - Victim Advocacy Capstone

Credits: (1-3)

Typically Taught Summer Semester: *Full Sem, 1st Blk, 2nd Blk*

Typically Taught Fall Semester: *Full Sem, 1st Blk, 2nd Blk*

Typically Taught Spring Semester: *Full Sem, 1st Blk, 2nd Blk*

Capstone experience for students in the Victim Advocacy Certificate of Proficiency comprised of a volunteer experience with a victim advocacy agency/department; or victim advocacy training experience. Must be enrolled in the VA Certificate to register. Variable

credit course (1-3 credit hours). Credit hours determined by type and length of experience in consultation with instructor prior to beginning course. May only be taken once for credit.

Pre-requisite(s): Completion of certificate required and elective courses; and instructor permission.

Co-Requisite(s): Concurrent enrollment in no more than 9 hours of the remaining required and elective courses in the certificate; and instructor permission.

CJ 2862 INT - Juvenile Justice Capstone

Credits: (1-3)

Typically Taught Summer Semester: *Full Sem, 1st Blk, 2nd Blk*

Typically Taught Fall Semester: *Full Sem, 1st Blk, 2nd Blk*

Typically Taught Spring Semester: *Full Sem, 1st Blk, 2nd Blk*

Capstone experience for students in the Juvenile Justice Certificate of Proficiency comprised of a volunteer experience with a city, county or state juvenile justice agency/department. Must be enrolled in the JJ Certificate to register. Variable credit course (1-3 credit hours). Credit hours determined by length of experience in consultation with instructor prior to beginning course. May only be taken once for credit.

Pre-requisite(s): Completion of certificate required and elective courses.

Co-Requisite(s): Concurrent enrollment in no more than 9 hours of the remaining required and elective courses in the certificate; and instructor permission.

CJ 2920 - Short Courses, Workshops, Institutes and Special Programs

Credits: (1-4)

Variable Title

Consult the semester class schedule for the current offering under this number. The specific title with the credit authorized will appear in the semester schedule and on the student transcript.

May be repeated up to one additional time for a combined total not exceeding 4 credit hours.

CJ 3020 - Criminal Justice Management

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Current command level problems and trends in criminal justice organizations and management including work environment, motivation, leadership, morale, discipline, evaluation, planning, and functioning of line and staff.

CJ 3040 - Community Policing

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Problem solving and the development of community trust are integral to community policing. The philosophy, concepts and methods in support of identifying the issues in a community that relate to crime are outlined and studied. The goal of creating healthy neighborhoods and sustaining the quality of neighborhood life are explained in detail. Crime is pervasive in American society, but victims and criminals have identified characteristics. These characteristics impact certain neighborhoods more than others. These characteristics and issues surrounding them are explored and researched.

CJ 3060 - Corrections in the Community

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

An overview of community based correctional programs focusing upon the historical origin, development, and current practices in probation, parole, the halfway house, work and educational release, as well as furlough programs.

CJ 3120 - Professional Practice for the Forensic Expert

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

An in-depth analysis of critical issues for forensic experts in all fields. Topics such as evidence preservation, report writing, expert testimony and ethics are investigated. The course will focus on theory and practice through lecture, writing and practical exercises. 2 hour lecture, 3 hour lab.

Pre-requisite(s): CJ 1350; or instructor approval.

CJ 3130 - Investigation of Computer Crime

Credits: (3)

Deals with the threats, vulnerabilities, and risks of unauthorized system access. Understanding the modus

operandi of criminal acts associated with computer crime and how to investigate them. Cryptography and network security will be closely examined.

Note: This course is not currently offered.

CJ 3270 - Theories of Crime and Delinquency

Credits: (3)

Typically Taught Summer Semester: *Full Sem, Full Sem Online*

Typically Taught Fall Semester: *Full Sem, Full Sem Online*

Typically Taught Spring Semester: *Full Sem, Full Sem Online*

Study of the nature, extent, causes, and treatment of crime.

Pre-requisite(s): CJ 1010.

CJ 3300 - Victimology

Credits: (3)

Typically Taught Summer Semester: *Full Sem, Full Sem Online*

Typically Taught Fall Semester: *Full Sem, Full Sem Online*

Typically Taught Spring Semester: *Full Sem, Full Sem Online*

This course is designed to review key research areas in the field of victimology. Particular emphasis will be placed on theory, measurement, and empirical results related to different types, consequences, and prevention of victimization.

Pre-requisite(s): CJ 1010.

CJ 3340 - Crime Scene Photography

Credits: (3)

Typically Taught Spring Semester: *Full Sem Online*

Course Fee: \$4.00

Theory and practice behind photographic documentation of crime scenes. Practice of proper documentation methodology, injury photography, evidence photography, special lighting considerations, etc. This hybrid course is a combination of lecture, laboratory, community workshops, and individual exercises.

Pre-requisite(s): CJ 2340 and ART 2450 and instructor approval.

CJ 3344 - Advanced Forensic Photography

Credits: (3)

Typically Taught Fall Semester: *Full Sem Online*

Course Fee: \$40.00

This course addresses photography and imaging issues relevant to the forensic science laboratory including examination quality physical evidence imaging, alternative lighting and exposure techniques, digital camera calibration and maintenance, and courtroom presentation of image evidence.

Pre-requisite(s): CJ 3340.

CJ 3350 - The American Jail

Credits: (3)

Typically Taught Summer Semester: *Online*

Typically Taught Spring Semester: *Full Sem*

Course critically examines the American jail with particular emphasis on history, management, operations and contemporary issues.

CJ 3360 - Prisons - Contemporary Issues and Dilemmas

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

A course which focuses upon the contemporary adult prison with a particular emphasis upon current problems, issues and dilemmas. Diversity issues such as integration of the prison work force by women and minorities as well as the problems of elderly, women, and minority inmates will be examined.

CJ 3400 - Drugs and Crime

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

The historic, economic, social and political roles of legal and illegal drugs; their contribution to crime of many kinds, accidents, and impacts on the criminal justice system; production and distribution systems; efforts to combat; decriminalization, prevention and treatment.

CJ 3600 - Criminal Justice Statistics

Credits: (3)

Typically Taught Summer Semester: *Full Sem, Full Sem Online*

Typically Taught Fall Semester: *Full Sem, Full Sem Online*

Typically Taught Spring Semester: *Full Sem, Full Sem Online*

An introduction to descriptive and inferential statistics and data analysis for use in criminal justice and the social sciences.

Pre-requisite(s): CJ 1010 and (MATH 1030 or MATH 1040 or MATH 1050 or MATH 1080 or QL completion)

CJ 3610 - Research Methods in Criminal Justice

Credits: (3)

Typically Taught Summer Semester: *Full Sem, Online*

Typically Taught Fall Semester: *Full Sem, Online*

Typically Taught Spring Semester: *Full Sem*

Addresses the social scientific methodology utilized in criminal justice and criminological research. The essentials of the scientific method will be studied such as research design, probability sampling, qualitative methods and the classic experimental design. The course will familiarize the student with the methods and problems of social science research as applied to the information needs of criminologists, criminal justice agencies, and criminal justice policy-makers. Students will acquire a better sense of criminology or criminal justice research and of exactly what it is that academic researchers do.

Pre-requisite(s): CJ 1010, or instructor approval.

CJ 3700 - Women & Criminal Justice

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course explores women within the American criminal justice system, focusing on females as the victim and perpetrator of crime as well as the various positions that they hold within the criminal justice profession (i.e. law enforcement, courts, corrections). Additional attention will be paid to the social construction of gender and how it can shape the creation and application of social control within society.

CJ 3800 - White Collar Crime

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This is an advanced undergraduate course designed to provide an overview of white collar crime. The course emphasizes defining white collar crime, describing the nature of white collar crime, and applying criminological theories to explaining the perpetration of white collar crime.

CJ 3900 - Intelligence and National Security

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Exploration of the role and structure of intelligence collection and analysis in criminal justice and national security. Course focuses on skill building in the areas of critical thinking, organization and presentation of data, and problem analysis in the scope of intelligence and security driven problems.

CJ 4000 - Critical Legal Studies

Credits: (3)

Critical Legal Studies comprehends the development and application of the criminal law and criminal justice institutions in the United States from a critical perspective. The course begins with a short review of slavery and race, civil rights and civil liberties, and the transformation of legal thought in America. Readings provide a perspective for how the criminal law and justice system are used to bolster the lives of the affluent classes while remaining oblivious or acting as a detriment to the lives of disadvantaged, under-represented and marginalized members of society. The course concludes with readings that provide an understanding for the meaning of justice, the role of the law in fostering a more just society, and the legal tools available to the advocate of social change to propose changes through legal reform.
Note: This course is not currently offered.

CJ 4065 - Law and Society

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

This course explores how law operates in society and how society influences the nature of the law. Topics may include the role of race in law, legal consciousness, efficacy of legal action, and the nature of the legal profession. Students may take either POLS 4065 or CJ 4065, but may not take both courses.

CJ 4110 - Physical Methods in Forensic Science

Credits: (4)

Typically Taught Fall Semester: *Full Sem*

Course Fee: \$55.00

Physical methods for evidence analysis including microscopy, pattern based physical evidence (firearms, footwear, etc.) pattern recovery and analysis and statistical foundations for pattern comparison.

Pre-requisite(s): CJ 2340, CJ 3120 and either CHEM 1120 or CHEM 1220; or instructor approval.

CJ 4115 - Friction Ridge Analysis

Credits: (4)

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$120.00

Legal and scientific methodology behind identification, analysis and comparison of finger and palm prints including computer database methodology. 3 hours lecture, 1 hour lab.

Pre-requisite(s): CJ 2340, CJ 3120 and either CHEM 1120 or CHEM 1220; or instructor approval.

CJ 4116 - Friction Ridge Development

Credits: (4)

Typically Taught Fall Semester: *Full Sem*

Course Fee: \$55.00

Basic and applied scientific theory and practice behind the detection, development, recovery and preservation of latent finger and palm prints. 3 hours lecture, 3 hour lab.

Pre-requisite(s): CJ 4115.

CJ 4125 - Research Methods in Forensic Science

Credits: (4)

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$50.00

Selected topics in forensic instrumentation, trace evidence, pattern evidence, biological and chemical analysis, research methods and data analysis. 3 hours lecture, 3 hour lab.

Pre-requisite(s): CJ 4110, or instructor approval.

CJ 4165 - Constitutional Rights

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course critically examines Amendments to the United States Constitution related to criminal justice issues including the 4th, 5th, 6th, 8th, and 14th amendments. It examines citizen's rights and criminal justice agent's responsibility and liability in connection with those rights.

Pre-requisite(s): CJ 1010 and CJ 1330.

CJ 4167 - State Criminal Justice Rights

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

This course examines state supreme court decisions interpreting state constitutional provisions similar to the provisions in the U.S. Bill of Rights protecting criminal defendants. Emphasis is placed on discussing state constitutional decisions with broader constitutional interpretations than recognized by the U.S. Supreme Court. This course will focus upon state constitutional provisions analogous to the rights in the Fourth, Fifth, Sixth and Eighth Amendments, and the state supreme court decisions interpreting those state constitutional provisions.

Pre-requisite/Co-requisite: CJ 4165.

CJ 4200 - Ethical Issues in Criminal Justice

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem, Online*

Typically Taught Spring Semester: *Full Sem*

Critically examines selected criminal justice ethical issues such as capital punishment, official corruption, use of deadly force, discretion and deception by the police.

Pre-requisite(s): CJ 1010.

CJ 4300 - History of Law Enforcement

Credits: (3)

An introduction to the history of America's law enforcement organizations, stressing the development, community issues, and organizational designs. The early leaders in policing and the early crime problems in America will be discussed and studied. From slave patrols prior to the Civil War to the U.S. Marshals of the old west, police development issues will be presented.

Note: This course is not currently offered.

CJ 4400 - Sex Crimes

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

This course examines sex crimes in the United States through the lens of the criminal justice system. Topics may include stereotypes and realities related to perpetrators and victims of sexual violence, how various actors in the criminal justice system respond to allegations of sexual abuse, and potential solutions to the problem of sexual violence in the United States.

CJ 4700 - International Criminal Justice

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Compares United States criminal justice system with other international systems from throughout the world, and reviews the nature and extent of international crime.

Pre-requisite(s): CJ 1010.

CJ 4810 - CJ Policy Assessment

Credits: (3)

Experimental Course, Contact Department for More Information

Criminal justice policies are created and implemented at local, state, and federal levels. This course will introduce students to policy creation and its implementation process as well as to the five prongs of policy assessment: needs, theory, implementation, outcome and impact, and cost-efficiency evaluations.

CJ 4810 - Experimental Course

Credits: (1-3)

This number is used for newly developed experimental courses. Refer to Experimental Courses.

May be repeated up to two additional times if new topic(s), for a combined total not exceeding 9 credit hours.

CJ 4830 - Directed Readings and Special Projects

Credits: (1-3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Assigned reading or project with evaluation by faculty member. Requires approval of the Department Chair.

May be repeated for up to 6 credit hours cumulative course work.

Note: May not be used as an elective to complete CJ minor or A.S.

CJ 4860 INT - Criminal Justice Internship

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Volunteer experience with city, county, and state criminal justice agencies.

Pre-requisite(s): CJ 1010 and two of CJ 1300, CJ 1330, or CJ 2300; or instructor approval.

Students may take this course for a combined total of six (6) credit hours.

CJ 4861 INT - CSI Internship

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Volunteer experience with city, county, or state crime scene investigation units or related forensic science organizations. Students must complete a minimum level of course work, be selected by an agency, pass a background check, and have permission from the department to register for this course.

Pre-requisite(s): CJ 4110 or CJ 4115; and permission from the instructor.

CJ 4900 - Current Issues in Criminal Justice

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

In-depth study of current theoretical issues in criminal justice. Specific offering will be identified by name and will be listed on student's transcript with authorized credit. May be repeated two additional times, for a total of three such classes with different titles.

CJ 4920 - Short Courses, Workshops, Institutes and Special Programs

Credits: (1-4)

Variable Title

Typically Taught Fall Semester: *Full Sem*

Consult the semester class schedule for the current offering under this number. The specific title with the credit authorized will appear in the semester schedule and on the student transcript.

May be repeated up to one additional time for a combined total not exceeding 4 credit hours.

CJ 4950 - Field Trips/Travel Study

Credits: (1-6)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Designed to provide students with access to both national and international law enforcement agencies, prisons, detention centers, courts and institutions dealing with criminals and delinquents - male and female. Field trips include 2-3 weeks of intense instruction and then 3-5 days of on-site visits, interviews, and lectures by practitioners in the field.

Course may be repeated for a total of six (6) hours of criminal justice credit. Additional hours will be counted toward 120 elective hours of study.

Note: May not be used as an elective to complete CJ minor or A.S.

CJ 4995 - Criminal Justice Senior Assessment

Credits: (1)

Typically Taught Summer Semester: *Online*

Typically Taught Fall Semester: *Online*

Typically Taught Spring Semester: *Online*

Program assessment for graduating seniors combined with an exploration of selected issues and dilemmas surrounding the criminal justice field. Credit/No credit.

Pre-requisite(s): Criminal Justice major core course requirements completed (CJ 1010, 1300, 1330, 2300, 3270, 3300, 3600, 3610, 4165, and 4200) and senior standing; or department chair approval.

CMT 1100 - Construction Management Orientation

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

This course introduces students to careers in the construction industry and is designed to help students develop a clear focus on their educational and occupational goals.

CMT 1150 - Construction Graphics

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

This course covers graphical communications as they relate to the architectural, engineering, and construction industry. Includes print reading, interpretation of graphical symbols and line types, and understanding of construction terminology.

CMT 1210 - Residential Construction Materials and Methods

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

This course provides students with knowledge of residential building techniques and materials. The course will examine common construction materials, components, and systems as related to wood frame structures, including sustainable materials. The residential construction process will be analyzed from site planning to finish construction.

CMT 1220 - Construction Contracts

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course covers the interpretation of contract documents used in the various construction delivery methods. Includes contracts, bidding documents, bonding and insurance, conditions of the contract, general requirements, and technical specifications.

CMT 1310 - Materials & Methods

Credits: (4)

Typically Taught Fall Semester: *Full Sem*

This course covers the materials and construction methods used in buildings. Emphasis is placed on sustainable construction practices.

CMT 1330 - Civil Materials

Credits: (4)

Typically Taught Spring Semester: *Full Sem*

This course covers the properties of concrete, asphalt, and soils. Emphasis is placed on quality control and testing of materials.

CMT 1500 - Computer Applications in Construction

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

Computer applications used in the construction field will be examined. Various software packages will be introduced and studied specifically to their application in the construction industry.

Pre-requisite(s): WEB 1700.

CMT 1550 - Construction Safety

Credits: (2)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course covers the Occupational Safety and Health Act (OSHA) and jobsite safety procedures and practices.

Emphasis will be placed on ethics as it relates to safety.

CMT 2210 - Construction Jobsite Management

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

This course covers the skills necessary to manage construction projects successfully. Emphasis is placed on construction communications and documentation.

Pre-requisite(s): CMT 1100 and CMT 1220.

CMT 2260 - MEP

Credits: (4)

Typically Taught Fall Semester: *Full Sem*

This course is designed to provide a basic knowledge of mechanical, electrical, and plumbing (MEP) systems used in commercial buildings. Emphasis is placed on sustainable MEP systems and analyzing life-cycle costs.

Pre-requisite(s): MATH 1010 or QL.

CMT 2340 - Civil Design and Layout

Credits: (4)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course is designed to provide a basic knowledge of road, utility, and site design. Emphasis is placed on determining grades and surveying operations necessary for layout of civil designs, including establishing locations and elevations.

Pre-requisite(s): MATH 1010 or QL.

CMT 2360 - Commercial Design and Codes

Credits: (4)

Typically Taught Fall Semester: *Full Sem*

This course is designed to provide a basic knowledge of processes used to design commercial buildings. Includes the use of building information modeling (BIM) in the design process for preparing drawings and coordinating the design of the different building trades. Emphasis is placed on how zoning regulation, building codes, and sustainability are integrated into the design.

Pre-requisite(s): MATH 1010 or QL, CMT 1150, and CMT 1310.

CMT 2410 - LEED-GA Preparation

Credits: (1)

Typically Taught Spring Semester: *Full Sem*

This course will help prepare students to take the LEED-GA exam.

CMT 2640 - Quantity Survey

Credits: (2)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course covers the processes and methods used to develop a quantity takeoff (list of required materials) for commercial construction projects. Emphasis is placed on using spreadsheets to prepare the quantity takeoff.

Pre-requisite(s): MATH 1010 or QL, CMT 1150, and CMT 1310.

CMT 2880 - Internship

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Supervised work experience in the construction industry with placement and course objectives approved by the faculty supervisor. Ethics as it relates to construction management will be discussed.

CMT 2899 - AAS Graduation Assessment and Signoff

Credits: (0)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course includes final assessment (e.g., exit interviews) and signoff needed for graduation with an AAS degree from the program. Contact your advisor during your last semester before graduation to complete this requirement. Credit/no credit.

CMT 2990 - Construction Management Seminar

Credits: (0.5)

Typically Taught Fall Semester: *1st Blk*

Typically Taught Spring Semester: *2nd Blk*

This course is designed to give students the opportunity to interact with professionals from the architecture, engineering, and construction industries and to learn of emerging trends within these industries. Students may repeat this course three times and up to 2 credits.

CMT 3115 - Construction Cost Estimating

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

This course covers the processes and methods for preparing estimates and bids for construction projects. Emphasis is placed on the use of computers in preparing estimates. Ethics as it relates to bidding will be discussed.

Pre-requisite(s): CMT 2640.

CMT 3130 - Construction Planning & Scheduling

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

This course covers the processes and methods of planning and scheduling of construction projects. Emphasis is placed on the use of computers in the planning and scheduling process.

Pre-requisite(s): CMT 2640.

CMT 3310 - Leadership in the Construction Industry

Credits: (2)

Typically Taught Spring Semester: *Full Sem*

This course explores leadership as applied to the construction industry. Emphasis is placed on the importance of professional relationships.

Pre-requisite(s): CMT 2210.

CMT 3370 - Preconstruction Services

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

This course covers services provided by contractors during the design of projects constructed using alternative delivery methods (e.g., design-build, CM/CG). Emphasis is placed on reducing construction risks during the design process.

Pre-requisite(s): CMT 2260, CMT 2340, CMT 2360, and CMT 3115.

CMT 3510 - Energy Management in Bldg. M&E Systems

Credits: (4)

Typically Taught Fall Semester: *Full Sem*

This course covers mechanical and electrical system design, operation and maintenance principles. Includes review of types of systems and equipment, and applications for each. Covers estimating, monitoring and managing the use of energy.

CMT 3540 - Facilities Management Administration

Credits: (3)

Typically Taught Fall Semester: *Full Sem odd years*

Practical applications of the administrative principles and skills required of a successful facility manager focusing on administration, management, and leadership of the facility function, finance and accounting, repair, alterations and maintenance, planning, programming, budgeting and execution.

CMT 3630 - Environmental Issues in FM

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Practical application of environmental practices and procedures pertinent to preservation, protection, compliance and conservation issues related to facilities management with emphasis on the regulatory and permitting process, environmental planning, auditing and assessment, recycling, indoor air quality (IAQ) and ozone level depleting substances (OLDS), Environmental Protection Agency (EPA) programs and permitting procedures, Occupational Health and Safety Act (OSHA) programs, and sustainable practices.

CMT 3660 - Energy Management

Credits: (3)

Typically Taught Spring Semester: *Full Sem even years*

The course addresses the methodologies of estimating annual energy consumption, undertaking energy audits, and monitoring and targeting energy consumption of fossil fuels. The material covered is for building services engineering, building engineering, and environmental engineering in facilities management.

Pre-requisite(s): CMT 3510.

CMT 3680 - Facility Management Administration and Operations

Credits: (4)

Typically Taught Fall Semester: *Full Sem*

This course covers operational principles and leadership skills required of a successful senior-level facility management professional.

CMT 4120 - Construction Accounting and Finance

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

This course covers the fundamental principles of construction finance, accounting, and cost control.

Pre-requisite(s): ACTG 2010.

CMT 4150 - Construction Equipment and Methods

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

This course covers the use of equipment used on heavy/civil construction projects. Emphasis is placed on equipment selection, production rates, and unit cost.

Pre-requisite(s): CMT 3115.

CMT 4210 - Facility Planning and Layout

Credits: (3)

Typically Taught Fall Semester: *Full Sem even years*

Practical aspects of facilities planning as a function of location and design with specific application to the following facilities: manufacturing and production, warehousing, and other commercial uses.

CMT 4270 - Computer Aided FM

Credits: (4)

Typically Taught Spring Semester: *Full Sem*

This course covers current computer-based technologies available to the facility manager.

CMT 4310 - Long-term Planning in Facility Management

Credits: (4)

Typically Taught Spring Semester: *Full Sem*

This course covers financial and physical planning

activities required to meet future needs of the successful Facility Management Organization.

CMT 4330 - Applied Structures

Credits: (4)

Typically Taught Fall Semester: *Full Sem*

This course covers the processes and methods used to analyze the behavior of engineered structures. Includes the application of the properties of materials and mechanics as they relate to the structural behavior of load resisting components.

Pre-requisite(s): PHYS 2010.

CMT 4350 - Temporary Structures

Credits: (2)

Typically Taught Spring Semester: *Full Sem*

This course covers basic design of temporary structures. Emphasis is placed on formwork, scaffolding, dewatering, and excavation shoring.

Pre-requisite(s): CMT 1330 and CMT 4330.

CMT 4510 - Design Charrette

Credits: (1)

Typically Taught Fall Semester: *1st Blk*

Students will work in multi-disciplinary teams to solve real-world construction problems.

Pre-requisite(s): CMT 3115 and CMT 3130.

CMT 4520 - ASC Student Competition

Credits: (1)

Typically Taught Fall Semester: *2nd Blk*

Students will work in multi-disciplinary teams to solve real-world construction problems. This course requires students to participate in the ASC Region 6 Student competition.

Pre-requisite(s): CMT 3115 and CMT 3130.

CMT 4570 - Approaches to Construction Contracting

Credits: (2)

Typically Taught Spring Semester: *Full Sem*

This course covers the development of a business plan for a small construction company.

Pre-requisite(s): PS 3250, CMT 2210, and CMT 4120.

CMT 4620 - Senior Project

Credits: (2)

Typically Taught Spring Semester: *Full Sem*

This course is a culminating experience for students from the program. Requires integration of concepts from a variety of coursework to prepare and present a solution to a construction problem.

Pre-requisite(s): PS 3250, CMT 2210, CMT 3115, CMT 3130, CMT 3370, CMT 4120, and CMT 4330.

CMT 4650 - FM Senior Project

Credits: (2)

Typically Taught Spring Semester: *Full Sem*

The application of skills, knowledge, techniques and concepts to an actual facility's management project. Emphasis on integrating the concepts taught in the facilities management classes. Students must apply for Senior Project the semester before they plan to take CMT 4650.

Pre-requisite(s): CMT 3510, CMT 3630, CMT 3680. Senior class standing required.

Pre-requisite/Co-requisite: CMT 4270, CMT 4310.

CMT 4800 - Individual Projects and Research

Credits: (1-3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Individual research or projects in Construction Management Technology. Credit and time determined by the student and faculty advisor.

Pre-requisite(s): Junior or Senior standing and consent of instructor.

May be repeated up to 9 credit hours.

CMT 4830 - Directed Studies

Credits: (1-3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

The student will receive credit for approved studies in an area not covered in the CMT program. Credit and time determined by the student and faculty advisor.

Pre-requisite(s): Junior or Senior standing and consent of instructor.

May be repeated up to 9 credit hours.

CMT 4890 - Practicum

Credits: (2)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Supervised work experience in the construction industry with placement and course objectives approved by the faculty supervisor. This course can be used to help the student satisfy the CMT program requirement of 800 hours of approved supervised work experience. Ethics as it related to construction management will be discussed.

Pre-requisite(s): CMT 2880.

May be repeated up to 9 credit hours.

CMT 4899 - BS Graduation Assessment and Signoff

Credits: (0)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course includes final assessment (e.g., exit interviews) and signoff needed for graduation with a BS degree from the program. Contact your advisor during your last semester before graduation to complete this requirement. Credit/no credit.

CMT 4920 - Short Courses, Workshops, Institutes, and Special Programs

Credits: (.5-4)

Variable Title

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Consult the semester class schedule for the current offering under this number. The specific title and credit authorized for the particular offering will appear on the student transcript.

Pre-requisite(s): Junior or Senior standing and consent of instructor.

May be repeated up to 4 credit hours.

COMM 1020 HU - Principles of Public Speaking

Credits: (3)

Typically Taught Fall Semester: *Full Sem, Online*

Typically Taught Spring Semester: *Full Sem, Online*

Introduces theories and principles of effective speaking with emphasis on: audience analysis and adaptation, listening, organization, content development, use of language, and extemporaneous delivery. Designed to

improve the student's ability to research, organize, develop and make presentations.

COMM 1040 - Convocations

Credits: (1)

Features distinguished speakers and artists in broad fields of humanities, sciences, technology, education, national and world affairs, and specialized artists in the fine arts from specialties such as music, theatre, interpretation, ballet and art.

May be repeated 5 times up to 6 credits.

Note: Course not currently being offered.

COMM 1130 - Media Writing

Credits: (3)

Typically Taught Summer Semester: *Full Sem, 1st Blk, 2nd Blk*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Beginning instruction in information-gathering techniques and media writing styles that inform, entertain and/or persuade. Approach recognizes that new technology is blurring the distinctions among various media and that writers must have a broad base of knowledge and skills.

Pre-requisite(s): Proficiency in word processing.

COMM 1140 - Writing for Workplace Communication

Credits: (3)

Typically Taught Fall Semester: *Full Sem Online*

Typically Taught Spring Semester: *Full Sem Online*

This course is designed to teach communication appropriate to the workplace with an emphasis on written forms. It covers content, organization, tone, grammar and formatting across multiple contexts: presentations, professional biographies, email, executive summary, letters of commendation and complaint, press releases and business and training proposals. It uses verbal communication such as interviewing in addition to primary and secondary research to provide substance in professional communication.

COMM 1270 - Analysis of Argument

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

Students will learn to analyze, evaluate, develop and refute arguments using formal argumentation methods and research based evidence. The course is designed to increase

student competence and confidence in constructing, defending and critiquing a broad range of arguments found in public discourse.

COMM 1500 - Introduction to Mass Communication

Credits: (3)

Typically Taught Summer Semester: *Full Sem, 1st Blk, 2nd Blk, Online*

Typically Taught Fall Semester: *Full Sem, Online*

Typically Taught Spring Semester: *Full Sem, Online*

Examines mass media development and impact upon society. Considers newspapers, magazines, film, radio, TV and multimedia. The role of media in providing information, opinion, entertainment and advertising support are considered along with the social political-economic controls which affect the media.

COMM 1560 - Audio Production and Performance

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

An introductory course in audio production and performance. Training in audio console operation, use of recorders and microphones, and audio editing. Class includes basic announcing and formatting for radio stations. Course emphasizes hands-on projects.

COMM 2010 HU - Mass Media and Society

Credits: (3)

Typically Taught Summer Semester: *Full Sem, 1st Blk, 2nd Blk, Online*

Typically Taught Fall Semester: *Full Sem, Online*

Typically Taught Spring Semester: *Full Sem, Online*

Media literacy course which examines the non-legal, but ethical and social problems of mass media. Discusses current media issues and explores constructive steps to improve media relationships.

COMM 2110 HU CEL - Interpersonal and Small Group Communication

Credits: (3)

Typically Taught Summer Semester: *Full Sem, 1st Blk, 2nd Blk, Online*

Typically Taught Fall Semester: *Full Sem, Online*

Typically Taught Spring Semester: *Full Sem, Online*
Explores the dynamics of verbal and nonverbal communication in personal relationships and small groups. The emphasis is on practical application of course content to enhance interpersonal relationships and to achieve competence as group members.

COMM 2200 - Multi-Camera Production and Performance

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

An introductory course in all aspects of in-studio video production. Skills include performing for video as well as the use of cameras, switching, lighting, electronic graphics and audio equipment. In-class projects emphasize directing, writing and performing for video.

COMM 2210 INT - Intercollegiate Debate

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Preparation and competition on the national debate resolutions and participation in individual events.

Pre-requisite(s): Permission of instructor.

May be repeated 7 times up to 8 credits. However, only 6 credits may be used toward the Communication major.

COMM 2220 INT - Intercollegiate Speech

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Preparation for and participation in intercollegiate speech competition and community speaking activities.

Course teaches students to research, write, and deliver valuable messages and share their experience through reasoned discourse, presentation, and narrative speaking. Up to 10 times for credit.

COMM 2250 - Essentials of Digital Media

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course introduces the basic digital communication skills necessary to be successful in today's multimedia environment. Students will learn how to produce and edit audio, stills, and video. Students will also learn to upload content for presentation on the Web and will learn to use

social media to disseminate information relative to your content. Concepts will first be discussed in two lecture periods, and then put into practice in a lab.

COMM 2270 - Argumentation and Debate

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

An examination of the theory and practice of argumentation with emphasis on parliamentary and policy debate formats. Emphasis also placed on making claims and inferences, research and the use of evidence, cross-examination, case construction, rebuttals and style of presentation.

COMM 2400 - Social Media for Communicators

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course is designed for students who are interested in using social media professionally and strategically. Students will apply multiple communication perspectives to make sense of social media adoption and use. Upon completing this course, students will understand the implications of social media for a variety of social issues in personal, organizational, and societal contexts.

COMM 2550 - Communication in Professional Settings

Credits: (3)

Typically Taught Fall Semester: *Full Sem, Online*

Typically Taught Spring Semester: *Full Sem, Online*

This class is designed to acquaint students with many of the major theories, concepts, and research findings related to the study of organizational communication and public relations. While this class will include a theoretical component, it is designed to be a more "hands on" or "practical skills" course. The information should be of practical value since individuals spend much of their lives in organizations and other professional settings.

COMM 2730 - Digital Radio Production and Broadcast

Credits: (1-3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Students meet once a week for one and two-credit options,

or twice a week for the three-credit option. Students work as contributors to the Weber State student streaming radio station, KWCR. Work includes detailing the tasks of station management, announcing, content generation, production, news, sales or engineering. Two hours in the studio a week are required for single-credit registrants, Four hours for two-credit registrants, and four hours in-studio work as well as a final portfolio of work for three-credit registrants. May be taken up to four times for a total of four credits.

COMM 2820 - Podcast Production

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course will acquaint students with all aspects of podcasting and help them become better storytellers. Students will learn the components of podcast production including interviewing, story development, scriptwriting, interview techniques, remote and digital audio recording, editing of sound, mixing, and final production for streaming.

Pre-requisite(s): COMM 1560 or permission of instructor.

COMM 2890 - Cooperative Work Experience for The Signpost

Credits: (1-3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Newspaper lab experience at The Signpost for those who want the experience of gathering and producing news. Students will learn facets of producing a print and/or on-line publication and promoting the content on social media. Skills include news reporting and writing, advertising, design and photography. 3 credits requires instructor approval. The 3-credit option will be used for those seeking an Associate in Workplace Communication. May be taken 3 times and up to 6 credits total.

COMM 2920 - Short Courses, Workshops, Institutes and Special Programs

Credits: (1-6)

Variable Title

Consult the class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript.

May be repeated 5 times up to 6 credit hours.

Note: Course is offered as needed.

COMM 2999 - Capstone in Workplace Communication and Writing

Credits: (3)

Typically Taught Fall Semester: *Full Sem, 1st Blk, 2nd Blk*

Typically Taught Spring Semester: *Full Sem, 1st Blk, 2nd Blk*

This class provides an opportunity for students to synthesize and demonstrate their learning in the Associate of Workplace Communication program. The primary purpose of this course is to help students transition from earning an associate's degree to pursuing a job and/or continued education toward a bachelor's degree. The course will include employment-related content such as interviewing skills, job shadows, career research, portfolios, resumes, and cover letters. The course will also include a section on workplace ethics to develop responsible and productive professionals. Cross-listed with ENGL 2999.

Pre-requisite(s): Permission of Instructor.

COMM 3000 - Communication Theory

Credits: (3)

Typically Taught Summer Semester: *Full Sem, 1st Blk, 2nd Blk, Online*

Typically Taught Fall Semester: *Full Sem, Online*

Typically Taught Spring Semester: *Full Sem, Online*

This course is intended to provide students with an overview of communication theory. It will give students a working knowledge of theories used to explain a wide range of communication phenomena, enabling them to build upon selected theories in other upper-division courses in their chosen communication major concentration.

Pre-requisite(s): COMM 2110 or permission of instructor.

COMM 3050 - Conflict Management and Negotiation

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

The purpose of this course is to provide students an opportunity to explore conflict management concepts in depth. Upon successful completion of this course, students will have a greater understanding of conflict across a variety of contexts, including interpersonal, organizational, group, and cultural. Students will be provided the analytical and communication tools to understand, evaluate, and respond effectively to conflicts.

Pre-requisite(s): COMM 3000 or permission of instructor.

COMM 3060 - Listening and Interviewing

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

This course covers the purpose, structure, focus, and techniques employed in effective listening and interviewing. Emphasis is placed on observing, attending, listening, responding, recording, and summarizing in a variety of interviewing settings. This course is designed to offer students insight into improved listening and interviewing practices. The theory and research concerning the process of listening and the practice of interviewing will form the basis for students' understanding about listening and interviewing behavior. This course then applies that knowledge to the development of listening and interviewing skills.

Pre-requisite(s): COMM 3000 or permission of instructor.

COMM 3070 - Performance Studies

Credits: (3)

Study of aesthetic texts through performance featuring the view of text or literature as communicative event and textual meaning as response in readers and audience. A primary emphasis will be placed on the relationship between performative choices and textual understanding.

Pre-requisite(s): COMM 1020 or permission of instructor.

Note: Check with Department for course availability.

COMM 3080 - Intercultural Communication

Credits: (3)

Typically Taught Fall Semester: *Full Sem, Online*

Explores theoretical perspectives in intercultural communication. Through analysis of various intercultural theories, students will become aware of cultural influences on communication in both international and domestic cultures.

Pre-requisite(s): COMM 2110 or permission of instructor.

COMM 3085 - Family Communication

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

No activity is more fundamental to emotional need fulfillment, overall personal satisfaction, and the maintenance of community-social systems than family communication. It is in the recursive cycle of family communication that we learn how to relate to others. This course examines current studies in family communication research and its implications. Students will add to the

scholarship of family communication by completing a research project in conjunction with this course.

Pre-requisite(s): COMM 2110 or permission of instructor.

COMM 3090 - Gender and Communication

Credits: (3)

Typically Taught Spring Semester: *Full Sem, Online*

This course is designed to help students understand the influence that communication has upon the shaping of gender and the influence that gender has in shaping communication interactions. Students become aware of, sensitive to, and more experienced in the issues, implications and skills necessary to successfully and meaningfully communicate with males and females, and about males and females, in a wide range of communication contexts.

Pre-requisite(s): COMM 2110 or permission of instructor.

Cross listed in WGS 3090.

COMM 3100 - Small Group Facilitation and Leadership

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

Theories and practical communication processes are examined and applied to develop fundamental attitudes and skills for facilitating and leading effective groups.

Pre-requisite(s): COMM 2110 or permission of instructor.

COMM 3120 - Advanced Public Speaking

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Enhanced speaking skills across a range of situations such as the professional workplace and via social media. Increase understanding of audience, publics, and the overall definition of "speaking" as a result of our ever-changing society.

Pre-requisite(s): COMM 1020 or permission of instructor.

COMM 3130 - News Reporting and Writing

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Develops journalism skills relevant to newspapers and online news services. Emphasizes news gathering,

interviewing and news writing.

Pre-requisite(s): COMM 1130 or permission of instructor.

COMM 3150 - Communication Research Methods

Credits: (3)

Typically Taught Summer Semester: *Full Sem, 1st Blk, 2nd Blk*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Explores methods of gathering, analyzing and interpreting data. Topics include: asking questions, observing and measuring communication variables; designing valid and reliable research; research ethics, experimental design and survey research. Emphasis is also placed on how to present research and how to read scholarly journal articles.

Pre-requisite(s): COMM 3000 or permission of instructor.

COMM 3200 - Live Event Production

Credits: (1-3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Students will learn to operate field video cameras, switchers, instant-replay and other equipment while experiencing the pressures of live-sports production.

Students will be part of a crew supplying the visuals for Weber State's football and basketball scoreboards. The crew will also provide visuals necessary to fulfill production commitments.

May be repeated up to 12 times for a maximum of 12 credit hours.

Note: (A maximum of 6 credit hours total may be counted for the major, however, 6 additional credit hours may be used as elective credit.)

COMM 3220 - Editing

Credits: (3)

Typically Taught Fall Semester: *Online*

Develops editing knowledge and skills for print and online publications. Covers copy editing, content editing and page editing.

Pre-requisite(s): COMM 1130 or permission of instructor.

COMM 3230 - Health Communication

Credits: (3)

A broad examination of communication theory, application, and research in health care delivery and management.

Examines many different levels and channels of

communication including the development and application of interpersonal communication, small group communication and teamwork, organizational communication, communication ethics, leadership, and motivation skills in dealing with health care providers, staff, and consumers in a variety of health care environments.

Cross-listed with HAS 3230.

Note: Check with Department for course availability.

COMM 3350 - Visual Communication

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Visual messages have great power to inform, educate and persuade. In all fields of communication, visual presentation of the message helps determine the success of the message. This course is designed to help students become effective and ethical visual communicators on the page or the screen. In addition to creating design projects, students will learn how to critically analyze visual designs and to understand major visual communication theories.

Pre-requisite(s): COMM 1130.

COMM 3400 - Introduction to Public Relations

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Philosophy and practice of public relations in business, government, education and non profit organizations. Case studies will be selected from a wide range of actual public relations concerns to foster decision-making skills and a mature understanding of public relations management.

Pre-requisite(s): COMM 1130 or COMM 1140.

COMM 3440 - Public Relations Writing

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Explores principles and practices of a variety of public relations writing formats ranging from news releases to websites.

Pre-requisite(s): COMM 3400 or permission of instructor.

COMM 3460 - Public Relations and Social Media

Credits: (3)

Typically Taught Fall Semester: *Full Sem, Online*

Typically Taught Spring Semester: *Full Sem, Online*

This course will combine theory and practice in teaching the principles of the new "Social Media" or "PR 2.0." Students will learn how new web technologies have expanded the practice of Public Relations beyond the traditional arena and into the fast-moving and dynamic world of public communication on the web. They will learn how to communicate with the news media and directly with the public. The course will prepare them to use the newest technology and practices effectively as they represent their companies and their clients.

COMM 3550 - Organizational Communication

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Study of communication in organizations from various theoretical perspectives with an emphasis on the organizational culture perspective. Includes topics such as communicating with external audiences, decision-making, conflict resolution, and power relationships.

Pre-requisite(s): COMM 3000 or permission of instructor.

COMM 3650 - Communication Law

Credits: (3)

Typically Taught Summer Semester: *Full Sem, 1st Blk, 2nd Blk, Online*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

First Amendment origins, interpretations and philosophy underlying regulation of the mass media.

Pre-requisite(s): COMM 3000 or permission of instructor.

COMM 3730 - Media Programming and Audiences

Credits: (3)

This course focuses on principles, strategies and approaches for creating and scheduling content for radio, television and the World Wide Web. The course also provides an analytical framework for understanding industry trends in media programming, and how those trends are influenced by audience research. Students create and schedule programs, apply programming strategies and philosophies, and learn relevant terminology and audience measurement techniques.

Pre-requisite(s): Permission of instructor.

Note: Check with Department for course availability.

COMM 3740 - Writing for Screen and Television

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Specialized concepts and techniques required to write effectively for film, television, and other new media technologies.

Pre-requisite(s): COMM 1130.

COMM 3751 - Narrative Digital Filmmaking

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

On-location video production and performance. Skills include screenwriting, directing, producing, use of field cameras and post-production.

Pre-requisite(s): COMM 2250.

COMM 3780 - Broadcast News Writing and Production

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Classroom instruction and practical experience in writing, reporting, performing, producing, and editing for television news. Students will produce newscasts for a local cable channel.

Pre-requisite(s): COMM 1130 and COMM 2250, or permission of instructor.

COMM 3820 - Persuasive Communication

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Study of theories and principles of persuasion from classical to modern times. Examines persuasion as a means of influence in interpersonal communication, public speaking, public relations, advertising, politics, and other contexts.

Pre-requisite(s): COMM 3000 or permission of instructor.

COMM 3840 - Data Visualization and Storytelling

Credits: (3)

Students taking this course will study the fundamentals of compelling data-driven storytelling. Students will learn how to detect and articulate the stories behind datasets and communicate data findings in visual, oral, and written contexts for various audiences and the public. Students will become familiar with associated tools.

COMM 3850 - Advertising

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A practical and theoretical study of advertising. Course is designed for students planning careers in advertising, as well as for those who are simply lifelong consumers of advertising and want to understand its role in the economic system.

Pre-requisite(s): COMM 1130 or permission of instructor.

COMM 3890 INT - Advanced Cooperative Work Experience with Signpost

Credits: (1-3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Open to students who are Signpost editors and managers.

Pre-requisite(s): COMM 1130 or COMM 2890.

May be repeated six times for a maximum of 12 credit hours.

Note: (A maximum of 6 credit hours total from COMM 3890, COMM 3891, COMM 3892 and COMM 3893 may be counted for the major, however, 6 additional credit hours may be used as elective credit.)

COMM 3891 INT - Advanced Cooperative Work Experience with KWCR

Credits: (1-3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Open to students who are KWCR senior staff.

Pre-requisite(s): COMM 2730 or permission of instructor.

May be repeated six times for a maximum of 12 credit hours.

Note: (A maximum of 6 credit hours total from COMM 3890, COMM 3891, COMM 3892 and COMM 3893 may be counted for the major, however, 6 additional credit hours may be used as elective credit.)

COMM 3892 INT - Advanced Cooperative Work Experience with Public Relations

Credits: (1-3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

COMM3892 Advanced Cooperative Work Experience with Public Relations is a nontraditional, CEL-designated course that functions as Ogden Peak Communications, Weber State's student-run public relations firm. Modeling the leadership and management roles of a real-world firm, students provide public relations services to community and campus partners.

Pre-requisite(s): COMM 3400 and permission of instructor.

May be repeated six times for a maximum of 12 credit hours.

Note: (A maximum of 6 credit hours total from COMM 3890, COMM 3891, COMM 3892 and COMM 3893 may be counted for the major, however, 6 additional credit hours may be used as elective credit.)

COMM 3893 INT - Advanced Cooperative Work Experience with Studio 76

Credits: (1-3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Open to students who are members of Weber State News' crew or staff and/or crew members of other student produced television programs.

Pre-requisite(s): COMM 2250 or permission of instructor.

May be repeated six times for a maximum of 12 credit hours.

Note: (A maximum of 6 credit hours total from COMM 3890, COMM 3891, COMM 3892 and COMM 3893 may be counted for the major, however, 6 additional credit hours may be used as elective credit.)

COMM 4130 - In-depth and Investigative Journalism

Credits: (3)

Typically Taught Spring Semester: *Full Sem odd years*

Emphasizes finding and writing news stories that move from explanations of what happened to how and why something happened. Examines research techniques and discusses ways to use the law to access information.

Pre-requisite(s): COMM 1130 or permission of instructor.

COMM 4150 - Rhetorical Theory and Criticism

Credits: (3)

Studies the origins of rhetorical theory in Greece and Rome in the works of Corax, Isocrates, Plato, Protagoras, Aristotle, Cicero and Quintilian. Tensions between rhetoric and philosophy. Study and application of neo-classical standards of rhetorical criticism.

Pre-requisite(s): COMM 3820.

Note: Check with Department for course availability.

COMM 4160 - Contemporary Rhetorical and Communication Theories

Credits: (3)

Study of contemporary rhetorical and communication theories.

Pre-requisite(s): COMM 3000 and COMM 4150 or permission of instructor.

Note: Check with Department for course availability.

COMM 4210 INT - Intercollegiate Debate

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Preparation and competition on the national debate resolutions and participation in individual events.

Pre-requisite(s): COMM 2270 or permission of instructor.

May be repeated 7 times up to 8 credit hours. However, only 6 credits may be used toward the Communication major.

COMM 4220 INT - Advanced Intercollegiate Speech

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Preparation for and participation in intercollegiate speech competition and community speaking activities.

Course teaches students to research, write, and deliver valuable messages and share their experience through reasoned discourse, presentation, and narrative speaking.

This is designed as an advanced course for students in their third or fourth years participating in intercollegiate speech. Up to 10 times for credit.

COMM 4400 INT - Public Relations Media and Campaigns

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Apply communication principles to internal and external publics; research, plan and evaluate social interrelationships; study of the controlled and uncontrolled media and their role in public relations; prepare a major public relations campaign for a selected client.

Pre-requisite(s): COMM 3150 and COMM 3440, or permission of instructor.

COMM 4440 - Developing and Evaluating Health Communication Campaigns

Credits: (3)

This course prepares students to understand the planning, implementation, and refinement of communication campaigns that affect individual and group level behavior changes in relation to health care issues. It will thus address public health problems. Throughout the semester, students study, practice, and apply the various stages of a health communication campaign based on real world conditions. The course content will draw from health behavior theory; formative (including pretesting), process, impact, and outcome research; and expert opinion.

Pre-requisite(s): COMM 3400 or permission of instructor.

Note: Check with Department for course availability.

COMM 4500 - Topics in Communication

Credits: (3)

Variable Title

The study and application of Communication in contemporary society is dynamic and ever changing. This course will provide students with opportunities to explore specialized topics in contemporary journalism, electronic mediated communication, human communication studies, and public relations in a seminar format.

Pre-requisite(s): COMM 3000 or permission of instructor.

May be taken 2 times up to 6 credit hours with different designations.

Note: Course is offered as needed.

COMM 4740 - Advanced Writing for Screen and Television

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

This class is a workshop for students who have a screenplay in progress (Act 1 Complete) and ready to workshop pages and complete Act 2 and Act 3 (90 to 110 pages). Students will develop the ability to analyze the

various elements of a feature film, including concept, character arc, dialogue, and plot devices such as suspense, surprise, dramatic irony, planting and payoff.

Pre-requisite(s): COMM 3740.

COMM 4750 - Advanced Cinematography and Editing

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

Capstone course for audio and video production. Emphasis is placed on combining production types to produce longer and more complex programs.

Pre-requisite(s): COMM 2250.

COMM 4751 - Advanced Narrative Digital Filmmaking

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

This class is designed to teach advanced concepts, theories and skills in digital narrative film production. Students develop these skills through group production, individual performance, and repetition of production tasks and procedures from pre-production, production, to post-production.

Pre-requisite(s): COMM 3751.

COMM 4760 - Media Management and Distribution

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

Analysis of complex systems necessary to manage media companies. Students will develop a website and a distribution plan for a new media company.

Pre-requisite(s): COMM 1500 or permission of instructor.

COMM 4770 - Digital Documentary Filmmaking

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

This course will provide an introduction to the fundamental theory and craft of non-fictional visual storytelling and

familiarize students with concepts such as drama, structure, story development and visual style. Throughout the semester, students will screen and analyze various filmmaking techniques used by documentary filmmakers. Students will develop and create a short documentary from conceptualization through post production.

Pre-requisite(s): COMM 2250.

COMM 4800 - Special Study and Individual Projects

Credits: (1-3)

Variable Title

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Work with an assigned faculty member on a project of special interest.

Pre-requisite(s): COMM 3000 and permission of instructor.

May be taken 3 times up to 6 credit hours. A maximum of 3 credit hours may be counted for the major.

COMM 4801 - College of Arts & Humanities Leadership Lecture Series

Credits: (1)

Typically Taught Spring Semester: *Full Sem*

This one-credit elective course will give arts and humanities' majors the opportunity to interact with successful guest lecturers whose undergraduate backgrounds are in the arts and humanities. Lecturers will clarify how the talents and skills associated with their degrees have contributed to their pursuit of successful careers and lives.

COMM 4840 - Teaching Journalism and Advising Student Media in the Secondary School

Credits: (3)

Prepares students to be teachers of journalism and advisors of student media in secondary schools. Designed to confront problems involved in organizing a staff, gathering material and publishing a newspaper, yearbook and literary magazine.

Pre-requisite(s): COMM 3000 or permission of instructor.

Note: This course is offered through Independent Study only.

COMM 4850 INT - Teaching Speech and Directing Speech Activities in the Secondary School

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Methods and techniques for teaching speech communication in secondary schools. Techniques and practices for coaching and supervising high school speech activities such as individual events, legislative forum, and debate.

Pre-requisite(s): COMM 3000 or permission of instructor.

COMM 4860 - Communication Co-curricular Leadership

Credits: (1-3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course is designed to teach leadership and management skills to students who have taken on leadership roles within the Communication Department co-curriculars: WSU Debate, The Signpost, KWCR, Studio 76 and Ogden Peak Communications. With instructor permission, student leaders take this class in lieu of the co-curricular course during the semester of enrollment and are expected to fulfill their co-curricular responsibilities as well as participate in monthly leadership seminars and one-on-one mentoring sessions with their advisers.

Pre-requisite(s): Permission of instructor AND COMM 3890, COMM 3891, COMM 3892, COMM 3893 OR COMM 2210.

May be repeated up to 6 credit hours.

COMM 4890 INT - Communication Internship

Credits: (1-3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

An opportunity for students to receive academic credit for faculty approved on-the-job learning experiences within certain communication areas of emphasis.

Pre-requisite(s): COMM 1130 or COMM 1140 and COMM 3000.

May be repeated for 5 times up to 6 credit hours. A maximum of 3 credit hours may be counted for the major.

Note: *Credit/No credit only.*

COMM 4920 - Short Courses, Workshops, Institutes and Special Programs

Credits: (1-3)

Variable Title

Consult the class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript.

May be repeated 5 times up to 6 credit hours.

Note: Course is offered as needed.

COMM 4990 - Senior Seminar

Credits: (3)

Typically Taught Summer Semester: *Full Sem, 1st Blk, 2nd Blk, Online*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A capstone course that prepares students to do a senior project and a portfolio to be used in job interviews or application to graduate school.

Pre-requisite(s): Communication major, COMM 3000 and COMM 3150.

CS 1010 CA - Introduction to Interactive Entertainment

Credits: (3)

Typically Taught Summer Semester: *Online*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course examines and analyzes the history, philosophy, and impact of digital entertainment (video and computer games along with simulations) on an individual and society. Students take a critical look at the artistic, but also the cultural, economic and social aspects of this expressive medium. Students imagine and articulate their own ideas and work through a series of projects helping them understand the creative challenges behind interactive entertainment design. Implications of certain values embedded in games will be discussed. Elements of the ethical code of conduct for a game creator will be formulated. The issue of balancing individual creativity vs. socio-cultural impact will also be discussed. Students will be required to play video games outside of the regularly scheduled class times. A lab fee is required for this class.

CS 1022 - Software Development

Credits: (4)

Application of the most recent implementation of a selected programming language to the solution of technical and scientific problems.

Pre-requisite(s): CS 1030 and basic skills in Algebra.

CS 1023 - Selected Programming Language

Credits: (4)

Introduction and application of the most recent implementation of a selected programming language to the solution of technical and scientific problems. The language for a particular instance of this course will be based upon demand.

Pre-requisite(s): CS 1030 and basic skills in Algebra.

CS 1030 - Foundations of Computing

Credits: (4)

Typically Taught Summer Semester: *Full Sem, Full Sem Online*

Typically Taught Fall Semester: *Full Sem, Full Sem Online*

Typically Taught Spring Semester: *Full Sem, Full Sem Online*

Computers are an essential part of every occupation. Having a basic understanding of computers will help students become more confident users. This course is taught at an introductory level and presents a broad overview of topics in computing such as personal digital security, ethical behaviors in education and business, how computers work and communicate with one another, how data is stored and used in a computer, and how to create a website and write a computer program.

CS 1400 - Programming I

Credits: (4)**Variable Title**

Typically Taught Summer Semester: *Full Sem, Full Sem Online*

Typically Taught Fall Semester: *Full Sem, Full Sem Online*

Typically Taught Spring Semester: *Full Sem, Full Sem Online*

Most technology, such as airplanes, laptops, smartphones, and appliances, depends on computer programming to function. This course introduces students to computer programming using a modern programming language. Designed for students with little or no programming experience, it covers topics including logical

problem solving, basic input/output, conditionals, loops, functions, arrays, classes, utilizing language libraries, development environments, and program debugging. Students will gain a basic understanding of how to create software for all computing environments.

Pre-requisite/Co-requisite: CS 1030 or NET 1300.

CS 1410 - Object-Oriented Programming

Credits: (4)

Typically Taught Summer Semester: *Full Sem, Full Sem Online*

Typically Taught Fall Semester: *Full Sem, Full Sem Online*

Typically Taught Spring Semester: *Full Sem, Full Sem Online*

An introduction to the C++ language. Topics will include data types, control structures, functions, pointers, arrays, I/O streams, classes, objects, encapsulation, overloading, inheritance and use of these concepts in problem solving.

Pre-requisite(s): CS 1400 or CS 2250 and ENGL 1010 or ENGL 2010.

CS 2130 - Computational Structures

Credits: (4)

Typically Taught Summer Semester: *Full Sem, Online*

Typically Taught Fall Semester: *Full Sem, Online*

Typically Taught Spring Semester: *Full Sem*

An overview of the fundamentals of algorithmic, discrete mathematics applied to computation using a contemporary programming language. Topics include sets, functions, logic, matrices, relations, graphs, trees, regular expressions, grammars, finite state machines, and data encoding.

Pre-requisite(s): CS 1400.

CS 2140 - Computer Systems Administration

Credits: (4)

An introduction to managing computer operating systems. Covers installation of the operating system, network, and application software. The course will cover the UNIX operating system. Topics include working with disk drives, allocation of resources, security, administering user accounts, monitoring system performance, tuning concepts, remote mounting of file systems, and setting up systems on networks.

Pre-requisite(s): CS 1400.

Note: Course not currently being offered.

CS 2250 - Structured Computing in a Selected Language

Credits: (4)

Typically Taught Spring Semester: *Full Sem*

Introduction to structured problem solving using objects, data enumeration and encapsulation in a selected language. The language for a particular instance of this course will be based upon demand.

Pre-requisite(s): Basic skills in fundamental Algebra.

CS 2335 - Introduction to User Experience Design for Web & Mobile

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

This course is designed to introduce students to the elements of user experience design for the web and mobile. The following topics will be covered: history of user experience, user centric design, agile development, user interface best practices for web and mobile applications, and analytics. Using current technologies and tools, students will create a basic web or mobile application.

CS 2350 - Client Side Web Development

Credits: (4)

Typically Taught Summer Semester: *Online*

Typically Taught Fall Semester: *Full Sem, Online*

Typically Taught Spring Semester: *Full Sem, Online*

This course provides an introduction to client-side programming and Web page development. Subjects covered include responsive Web page design and dynamic Web page development. The course will explore various technologies such as HTML5, CSS3, JavaScript client-side programming, and an introduction to a JavaScript framework.

Pre-requisite(s): CS 1400.

CS 2400 - Project Management

Credits: (3)

Strategies and techniques for managing a project from inception to completion to meet all schedule, cost, and technical objectives. Knowledge and skills learned in this course prepare students to perform successfully the role of a project manager in any construction, engineering, health, information technology, business, or research and development project, although emphasis will be on project management applied to Software Engineering. Topics include organizational structures, project planning and evaluation, cost estimating, quantitative methods in

schedule and cost management, project information systems, communication skills, and conflict resolution.

CS 2420 - Introduction to Data Structures and Algorithms

Credits: (4)

Typically Taught Summer Semester: *Full Sem, Full Sem-Online*

Typically Taught Fall Semester: *Full Sem, Full Sem-Online*

Typically Taught Spring Semester: *Full Sem, Full Sem-Online*

General principles of common data structures and design of efficient algorithms. Topics include: arrays, linked-lists, stacks, queues, trees, graphs, tables, storage and retrieval structures, searching, sorting, hashing, and algorithmic analysis. Emphasis will be on abstraction, efficiency, re-usable code, and object-oriented implementation.

Pre-requisite(s): CS 1410.

Pre-requisite/Co-requisite: MATH 1080 or MATH 1050 and MATH 1060.

CS 2450 - Software Engineering I

Credits: (4)

Typically Taught Summer Semester: *Online*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem, Online*

An Object Oriented Analysis and Design course which provides practical guidance on the construction of object-oriented systems. Its specific goals are to provide a sound understanding of the fundamental concepts of the Software Development Life-Cycle, to teach quality design and development style through applications of object-oriented project development within a variety of problem domains, and provide coverage of current Software Engineering models and diagramming techniques.

Pre-requisite(s): CS 1410.

CS 2550 - Introduction to Database Design and SQL

Credits: (4)

Typically Taught Summer Semester: *Full Sem, Full Sem - Online*

Typically Taught Fall Semester: *Full Sem, Full Sem - Online*

Typically Taught Spring Semester: *Full Sem, Full Sem - Online*

This course is an introduction to databases, specifically focusing on the relational database model, database design

and modeling and the structured query language (SQL). Students will become proficient at formulating data query requests using SQL and will also gain experience in database normalization and entity-relationship modeling.

CS 2630 - Client Side Frameworks

Credits: (4)

Typically Taught Spring Semester: *Full Sem*

An introduction to current technologies of modern responsive web design techniques, combining CSS3 and Bootstrap with the popular Angular.js, jQuery and jQuery Mobile utility frameworks, to create rich web sites that adapt to a wide range of client devices. Cross listed with WEB 2630.

Pre-requisite(s): CS 2350.

CS 2705 - Network Fundamentals and Design

Credits: (4)

Typically Taught Summer Semester: *Online*

Typically Taught Fall Semester: *Full Sem, Online*

Typically Taught Spring Semester: *Full Sem, Online*

Provide an understanding of the basic networking terminology. This will cover the theory of networking, types of network protocols, and wide and local area networks. The student should have a good understanding of network terminology at the completion of the course.

Pre-requisite(s): CS 1030 and CS 1400.

CS 2780 - Windows Application Programming

Credits: (4)

This course provides participants with a working knowledge of the Windows Operating System. The students will develop applications to run under Windows, using the C/C++ languages. Concepts of Memory Management, DLLs, Resources, and Child Window development will be emphasized. The course also introduces the student to the use of OLE controls and MFC architecture.

Pre-requisite(s): CS 1410 and basic algebra skills.

Note: Course not currently being offered.

CS 2800 - Individual Projects & Research

Credits: (1-4)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

The purpose of this course is to permit Computer Science majors to develop an individual project, program, system, or research paper, with coordination and approval of a faculty mentor. The final grade and amount of credit awarded will be determined by the department, depending on the complexity of the upper division work performed.

Pre-requisite(s): CS 1410.

May be repeated 3 times up to 6 credits.

Note: Note: Only 4 credit hours of either CS 2800 or CS 2890 can apply to a CS degree as an elective course, and only a maximum of 6 hours of both CS 2800 and CS 2890 may be taken to satisfy missing credits or to achieve full time academic status.

CS 2810 - Computer Architecture/Organization

Credits: (4)

Typically Taught Summer Semester: *Full Sem-Online*

Typically Taught Fall Semester: *Full Sem, Full Sem-Online*

Typically Taught Spring Semester: *Full Sem, Full Sem-Online*

Computers are essential to modern life, yet most people use them with no understanding of how they accomplish everything they do. This course will explore how computers function from a technical perspective, allowing students to see why they work and are designed the way they are. The course will focus on Von Neumann computers, covering a variety of topics including logic gates, basic digital circuit concepts, number and data representation, the processor implementation, BIOS, buses, interrupts, addressing, memory management, and storage. The practical implementation of this knowledge will be examined by introducing assembly language code.

Pre-requisite(s): CS 1410 or (CS 1400 and (NET 2210 or NET 3200)).

CS 2890 INT - Cooperative Work Experience

Credits: (1-4)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

The purpose of this course is to permit Computer Science majors who are currently working in a computer related job or internship to receive academic credit for their work, with coordination and approval of a faculty mentor and their supervisor. The amount of upper division credit awarded will be determined by the department, depending on the

nature and quantity of work performed.

Pre-requisite(s): CS 1410.

May be repeated 3 times up to 6 credits.

Note: Note: Only 4 credit hours of either CS 2800 or CS 2890 can apply to a CS degree as an elective course, and only a maximum of 6 hours of both CS 2800 and CS 2890 may be taken to satisfy missing credits or to achieve full time academic status.

CS 2899 - Associate Degree Assessment

Credits: (0)

This course is to serve as an assessment tool whereby all AAS degree seeking students in the Department of Computer Science demonstrate core knowledge acquired from course studies in the discipline as specified in the AAS degree program.

May be repeated 11 times.

CS 2920 - Short Courses, Workshops, Institutes and Special Programs

Credits: (1-4)

Variable Title

Typically Taught Summer Semester: *Full Sem*

Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript.

May be repeated 5 times up to 6 credits.

CS 3030 - Scripting Languages

Credits: (4)

Typically Taught Fall Semester: *Full Sem*

This course addresses the design of scripting languages and their applications. Scripting languages can be used to manipulate text and data using subtle and complex coding to automate many tasks. Students will learn to write simple scripts to automate system administration tasks using appropriate languages. This course explores the nature of scripting, the role of scripting languages, introduces some of the popular scripting languages and their applications, and provides skills in scripting language design.

Pre-requisite(s): CS 1400 and CS 2705 or CS 1400 and NET 2210.

CS 3040 - Windows/Unix/Linux Infrastructure and Administration

Credits: (4)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

This is the second course for understanding Windows operating systems and the first in the Unix/Linux operating system. It includes administration in a client/server directory services environment. Taught in a networking setting, it builds upon complex issues learned in previous courses. Provides the knowledge and skills necessary to install, configure, network and administer both operating systems.

Pre-requisite(s): CS 2705.

CS 3050 - Enterprise Computing

Credits: (4)

Typically Taught Spring Semester: *Full Sem*

This course provides an integrated view of using enterprise computing systems. An overview on enterprise hardware concepts, enterprise operating systems concepts, and interactive facilities is covered. Batch applications will be developed, edited, compiled, linked, executed and debugged in enterprise operating systems environments. An introduction to emerging technologies in enterprise computing will be presented. Access to the latest enterprise systems, hands-on exercises, and online support materials are important components of this course.

Pre-requisite(s): CS 2420 and CS 2810.

CS 3100 - Operating Systems

Credits: (4)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

An overview of computer operating system from the programmer's point of view. Input-output hardware, interrupt handling, properties of external storage devices, associative memories and virtual address translation techniques, optimizing programs for performance, concurrent programming with threads, and network programming.

Pre-requisite(s): CS 2420 and CS 2810.

CS 3210 - UNIX System Programming and Internals

Credits: (4)

Typically Taught Fall Semester: *Full Sem*

This course provides hands-on experience with writing programs using UNIX system calls and inter-process communication mechanisms, from simple file I/O and I/O management subsystems to network client and server programs. The internal design and operation of the UNIX

operating systems are studied. A detailed examination of the UNIX SVR4 source code will be included in the course.
Pre-requisite(s): CS 2420.

CS 3230 - Object Oriented User Interface Development with Java

Credits: (4)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

An intermediate programming course that covers the "core" features of the Java programming language with the goal of preparing students to focus on specialized uses of Java. Topics include object-oriented programming and polymorphism, graphics, event handling, building graphical user interfaces with Swing, multithreading and synchronization, and error handling.

Pre-requisite(s): CS 2420.

CS 3250 - Advanced Object Oriented Programming

Credits: (4)

Develop and expand abilities in solving lengthy, advanced problems, multiple parallel tasks, generic packages, and other object-oriented techniques using selected languages.

Pre-requisite(s): CS 2420.

CS 3260 - Mobile Development for the iPhone

Credits: (4)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course addresses the development of applications for mobile iOS devices, specifically the iPhone using Xcode and associated tools. Students will learn the basics of the Swift programming language and use it to create applications for the iPhone family of products.

Pre-requisite(s): CS 1410, CS 2350 and CS 2550.

CS 3270 - Mobile Development for Android

Credits: (4)

Typically Taught Summer Semester: *Online*

Typically Taught Fall Semester: *Full Sem*

Mobile devices have become an essential part of many people's lives. This course will explore the development of applications using the Android SDK and modern Android development tools while applying industry best practices.

Students will develop multiple apps from start to finish, and will be prepared to develop applications on their own.

Pre-requisite(s): CS 2350, CS 2550 and CS 3230.

CS 3280 - Object Oriented Windows Application Development

Credits: (4)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course is designed to teach students how to write Windows programs in C# using the .NET environment. The student will learn how to develop programs based on Windows Applications and the .NET Framework. They will also be introduced to APIs and MFC/AFX styles of Windows programming and to become familiar with various data sharing methods and .NET services.

Pre-requisite(s): CS 2420.

CS 3540 - Database Administration

Credits: (4)

Typically Taught Spring Semester: *Full Sem*

This course describes the role of the Database Administrator in managing an organization's most valuable asset - its data. Topics covered include DBMS architecture, database layout, database development, data fragmentation, rollback segments, database tuning, database security, backup and recovery, database networking, and distributed databases. Special emphasis is given to working with current database management systems such as Oracle, SQL Server and DB2.

Pre-requisite(s): CS 2550.

CS 3550 - Advanced Database Programming

Credits: (4)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Students will build upon the basic database knowledge and skills gained in the introductory database course. Advanced database knowledge will be gained through the design and implementation of an enterprise-level database. Students will perform database programming techniques such as stored procedures, user-defined functions, cursors, triggers, and distributed queries. Various database paradigms will be used in the course including RDBMS and NoSQL.

Pre-requisite(s): CS 2550 AND (CS 1410 OR CS 3030 OR WEB 3200).

CS 3580 - Data Science Algorithms

Credits: (4)

Typically Taught Spring Semester: *Full Sem*

This course introduces students to the data management, storage and manipulation tools common in data science and has students apply those tools to real scenarios. Topics include, but are not limited to, the following: data reduction, scalable algorithms, modern distributed solutions, data visualization, applied statistical models, prediction algorithms, and forecasting.

Pre-requisite(s): ((CS 1400 and CS 2550) or CS 2420) and (MATH 1040 or MATH 3410 or QUAN 2600) and (at least 60 hours of completed credits).

CS 3610 - Introduction to Game Industry

Credits: (4)

Typically Taught Summer Semester: *Full Sem*

This course is an introduction to the game industry and the skills and best practices needed in order to become a game developer. The course will evaluate different gaming hardware, genre, skills, tools, and roles. Students will also understand the elements in creating a game including the game design document, story line, vision, virtual worlds, playfields, and the mathematics and physics that are involved with game development.

Pre-requisite(s): CS 1400.

CS 3620 - Server-Side Web Architecture

Credits: (4)

An introduction to server-side web architectures using current server-side technologies. General web development principles such as usability, reliability, maintainability, security, and scalability will be taught. Students will also learn how to architect and apply server-side technology to create both dynamic websites, and APIs at scale using industry best practices.

Pre-requisite(s): CS 2350 and CS 2550.

CS 3630 - Rich Internet Application Development

Credits: (4)

An introduction to developing and deploying rich Internet applications (RIAs) using current technologies. Students will develop engaging websites by incorporating RIAs in the web application development process.

Pre-requisite(s): CS 2350 and CS 2550.

CS 3645 - Advanced User Interface Design

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

Students will learn the elements of user interface design as it applies to front-end web development and software engineering. Students will identify best practices in user interface design. The following topics will be covered: wire-framing, color palettes, typography, information architecture, contrast, uniformity, and responsive design techniques. Using current technologies and tools, students will wireframe, design, and program effective interfaces.

Pre-requisite(s): WEB 2500 or CS 2335, WEB 1400 or CS 1400, or permission of instructor.

CS 3650 - Human-Computer Interaction

Credits: (4)

Typically Taught Fall Semester: *Full Sem, Full Sem Online*

This course introduces the skills and concepts of Human-Computer Interaction (HCI) that enable students to design systems that effectively meet human needs. A concrete illustration of the practice of HCI, this course covers usability, user experience, and modern diverse interfaces. This course includes both theoretical and practical best practices.

Pre-requisite(s): CS 2420, CS 2450 or WEB 3500.

Cross-listed with WEB 3650.

CS 3705 - Protocol Analysis

Credits: (4)

Typically Taught Fall Semester: *Full Sem*

This course provides an in depth look at the fundamentals of what protocols do and how they work, how addresses and routing are used to move data through the network, and how information is exchanged over the Internet. In depth analysis of network traffic packets will include normal traffic as well as protocol attack patterns. Topics include: DNS, Apache, email, Samba, PPP, DHCP, TCP, IP, and UDP troubleshooting, and security.

Pre-requisite(s): CS 2705 or NET 2435.

CS 3720 - Network Architectures and Protocols

Credits: (4)

A practical applications course designed to teach the basic concepts associated with local and wide area networks and protocols. The course will concentrate on the TCP/IP and

other protocols in the UNIX and Windows NT environments. Covers TCP/IP extensively, NFS, Sockets, RPC and TLI interfaces. The course also covers the use of Domain Name Servers, remote system calls, ports, services, configuration, IP addressing, and UNIX and Windows NT monitoring commands.

Pre-requisite(s): CS 3705.

Note: Course not currently being offered.

CS 3730 - Client/Server Network Programming

Credits: (4)

Covers client/server architecture and application development using TCP/IP and other protocols. The course covers client/server operations on a single machine and across an Ethernet network to multiple machines. The course will also cover distributed processing concepts and applications. Applications include the use of STREAMS, Sockets, TLI, network listener facility, drivers, RPC, and ONC. The course will concentrate mainly on UNIX but will cover some concepts and applications using Windows NT.

Pre-requisite(s): CS 2705 and CS 3210.

Note: Course not currently being offered.

CS 3750 - Software Engineering II

Credits: (4)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

(Community Engaged Learning Designation) This course emphasizes teamwork in small groups on a substantial software engineering project that will be performed for a real customer in the community. It is the intent of the course to provide a capstone experience that integrates the material contained in the CS curriculum through work on a software project that applies this material. Projects are chosen so as to provide an interdisciplinary service learning component with project proposals being solicited from the community at large. Projects that integrate students and faculty from other disciplines are also encouraged. Lectures will be directed towards the software development lifecycle, requirements gathering and design documentation, as well as software project management. Each team member will contribute to all phases of the project as well as the development of a project prototype.
Pre-requisite(s): CS 2350, CS 2450, CS 2899, CS 3550, CS 3230 or CS 3280, and ENGL 3100 or ENGL 2250 or PHIL 1250 or PS 3250.

CS 3805 - Computer and Network Security

Credits: (4)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course is designed to provide students with a solid foundation in network security including a treatment of security issues related to computers and computer networking. The primary emphasis is on developing security policies, security auditing, security models and laws related to security.

Pre-requisite(s): CS 2705 and CS 2420.

CS 3810 - Digital Design Theatre

Credits: (3)

Experimental Course, Contact Department for More Information

This course emphasizes close collaboration among students in Theatre Arts and students in the School of Computing. Software and hardware commonly used in current digital theatre design will be explored. Students will be given an introduction to the "tools" of the trade in a studio setting as they advance through a series of exercises, as well as independent and team projects focusing on both artistic design and software engineering. The course will culminate in a selection of short realized multimedia performance projects with guest student actors. Members of each discipline will be immersed in the problem solving approaches and thinking patterns of peers from a different field, which more accurately represents the experiences of working individuals within their chosen careers.

Prerequisite: Instructor Permission

CS 3810 - Experimental Courses

Credits: (1-6)

Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript. May be repeated 5 times with a maximum of 6 credit hours. Refer to Experimental Courses.

CS 3810 - Programming Voice Activated Devices

Credits: (4)

Experimental Course, Contact Department for More Information

Introduction to developing applications for voice-activated devices. Students will learn how to program a voice-activated device such as the Amazon Alexa or Amazon Dot. Students will use the Amazon Alexa Skills Kit which is a collection of Application Programming Interface (API), tools to develop Alexa Skills to perform functions. Students will gain experience learning how to program voice activated applications.

CS 3830 - Writing Secure Code

Credits: (4)

This course focuses on how to develop software systems that are robust and can withstand repeated attacks from malicious intruders. The course coverage includes the need for secure systems, basic security principles and strategies, designing secure applications, secure coding techniques, dangerous APIs, data input issues, network security problems, testing secure applications, security code reviews, secure software installation, and writing security documentation.

Pre-requisite(s): CS 2420.

CS 3840 - Computer Forensics for Security Assurance

Credits: (4)

Typically Taught Fall Semester: *Full Sem*

This course is a foundational course in file system analysis, digital forensics and computer media analysis. A combination of lectures and labs will give students a strong understanding of low-level file system knowledge to prepare them for involvement in digital forensic analysis, data recovery and other related tasks. Students will examine widely used file systems such as Windows NTFS and FAT32, UFS, EXT2 and UFS2. Students will also become familiar with software tools used in computer forensic work.

Pre-requisite(s): CS 2420.

CS 4110 - Concepts of Formal Languages and Algorithms for Computing

Credits: (4)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Concepts of formal language definition, automata theory, Turing theory, and solvability, with an introduction of algorithms and computational methods used in advanced computer science courses.

Pre-requisite(s): CS 2420 and either MATH 1630 or CS 2130.

CS 4230 - Java Application Development

Credits: (4)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course is a continuation of CS 3230 and examines the development of Java applications intended for an enterprise environment. The course is programming intensive and concentrates on designing and implementing multi-tier and Web applications based on the Java Enterprise Edition (Java EE) specification. Topics include JavaBeans, Java Database Connectivity, client/server interactions, servlets, session tracking, JavaServer Pages, JavaServer Faces, Struts, the Model-View-Controller approach, remote method invocation, Enterprise JavaBeans, and application servers. Lab exercises will emphasize how Java Enterprise programming supports the operation of robust, distributed object architectures.

Pre-requisite(s): CS 3230, CS 3750.

CS 4250 - Design Patterns

Credits: (4)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Introduction to fundamental principles of software development using design patterns, including structural design patterns, behavioral design patterns, SOLID principles, and agile approach; Understand and program the basic concepts and techniques for building software in an adaptive way, including dependencies and layering, interfaces, unit testing, and refactoring.

Pre-requisite(s): CS 3230 or CS 3280.

CS 4280 - Computer Graphics

Credits: (4)

This course introduces and investigates the mathematical and programming basis for generating pictures and images using a computer. Fields impacted by visual rendering technologies include filmmaking, publishing, banking, engineering, and education. Students are introduced to the theory and practice of computer graphics, with an emphasis on designing and developing working applications using currently available graphics libraries. The course focuses on strategies for rendering geometric data (points, lines, and polygons), and the analysis of the processing stages and components of the graphics pipeline, including transformations, viewing volumes, and projections.

Programming and mathematical techniques related to modeling, viewing, coordinate frames, and perspective will be primary topics for discussion and code development. The course covers the key processing steps and structures needed to appropriately map 3D geometric primitives to 2D screen positions while maintaining a realistic look, which involves hidden surface removal, proper lighting, and simulated material properties.
Pre-requisite(s): CS 2420.

CS 4350 - Advanced Internet Programming

Credits: (4)

Typically Taught Spring Semester: *Full Sem*

Capstone client/server web programming group project implemented using an advanced web framework (such as PHP (Laravel, Zend, Cake PHP) or Django, or Ruby on Rails). Includes implementation and concepts of an MVC web architecture, Web UI design and creation, data modeling and retrieval, input validation, security, and unit testing.

Pre-requisite(s): WEB 3620 or CS 3620.

CS 4450 - Advanced Software Engineering Methods

Credits: (4)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course provides a capstone project experience for students interested in software engineering. While previous courses in the Computer Science curriculum provide students with the knowledge and skills necessary to begin a career as a software engineer, the end-to-end design and implementation experience offered in this course, done as part of a team, and addressing an open ended problem (as well as an open ended solution), comes much closer to the experience that software engineering professionals encounter in the workplace. The emphasis on documentation and presentation of designs and results is also valuable career preparation, and forces students to take ownership of their designs and systems as they present them to others.

Pre-requisite(s): CS 3750.

CS 4500 - Introduction to Artificial Intelligence

Credits: (4)

Typically Taught Fall Semester: *Full Sem*

This course covers basic artificial intelligence principles

from the perspective of implementing intelligent agents through software. Students will write intelligent software agents to solve a variety of problems from different application domains. Topics include search, search heuristics, adversarial search, constraint satisfaction problems, knowledge and reasoning, planning, and knowledge representation.

Pre-requisite(s): CS 2420 and either MATH 1630 or CS 2130.

CS 4640 - Foundations of Game Development

Credits: (4)

Typically Taught Fall Semester: *Full Sem*

This course introduces students to 2D game development using a programming language, scripting, and a gaming engine. The work includes team work project, graphical programming, GUI, and all other aspects of creating a game program associated with a game design document.

Pre-requisite(s): CS 1010 and CS 3280.

CS 4650 - Advanced Game Development

Credits: (4)

This course is a continuation of CS 4640 and covers intermediate to advanced level 3D game development using a commercial gaming engine authoring tool like Unity or Unreal. Students work in small teams and reference a game design document (which they've previously created themselves or which is selected from previously approved CS 1010 course documents) to program and fully develop a "medium-scoped" 3D video game. The game will be delivered over several iterations throughout the semester, each requiring peer review and play-test feedback. This course emphasizes several aspects of 3D game development, including but not limited to level, character, environment and world construction, scripting, 3D modeling and asset creation, user interface, scene transitions and cinematics, rudimentary AI, physics, graphical post-processing, as well as solid gameplay principles, core mechanics, scalability, and replayability. The course focuses heavily on game development and programming, assuming the game design has been previously scoped out.

Pre-requisite(s): CS 2350, CS 2550 and CS 3230.

CS 4730 - Applied Cryptography

Credits: (4)

This course provides an introduction to the principles of number theory and how they are applied to cryptographic

algorithms. Different topics that will be examined are: several classic ciphers, modern cryptographic methods, symmetric encryption, public key cryptography, hash functions, key management, digital signatures, certificates, electronic mail security, steganography, and recent developments affecting security and privacy on the Internet. The focus will be on how cryptography and their application can maintain privacy and security in computer networks.

Pre-requisite(s): CS 2420 and either MATH 1630 or CS 2130.

CS 4790 - .NET Web Application Development

Credits: (4)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

In this course, students will work together as a team to develop advanced ASP.NET MVC applications using the latest .NET CORE Framework tools and technologies. The focus will be on coding activities that enhance the performance and scalability of a web application in a small to medium-sized development environment. Students will create websites that separate the user interface, data access, and application logic.

Pre-requisite(s): CS 3750.

CS 4800 - Individual Projects and Research

Credits: (1-4)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

The purpose of this course is to permit Computer Science majors to develop an individual project, program, system, or research paper, with coordination and approval of a faculty mentor. The final grade and amount of credit awarded will be determined by the department, depending on the complexity of the upper division work performed.

Pre-requisite(s): CS 2420.

May be repeated 3 times up to 4 credit hours.

Note: Note: Only 4 credit hours of CS 4800 or CS 4850 or CS 4890 can apply to a CS degree as an elective course, and only a maximum of 6 hours of CS 4800, CS 4850, and CS 4890 may be taken to satisfy missing credits or to achieve full time academic status.

CS 4820 - Compiler Design

Credits: (4)

A study of compilers, grammars, finite-state and push down automata, scanning, parsing, error handling, semantic analysis and code generation.

Pre-requisite(s): CS 2420, CS 4110.

CS 4830 - Advanced Topics in Computer Science

Credits: (1-4)

Variable Title

Typically Taught Spring Semester: *Full Sem*

Advanced topics which are demanded by industry, are currently popular in this rapidly changing field, or which meet special needs of students in Computer Science will be offered. Individualized material will be taught on a one time basis as needed. Time and credit to be arranged.

Pre-requisite(s): Consent of instructor.

May be repeated 2 times up to 8 credit hours.

CS 4850 - Faculty Directed Research

Credits: (1-4)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

The purpose of this course is to permit Computer Science majors to work closely and consistently with a faculty mentor on specific research related to current, experimental topics in Computer Science. The final grade and amount of credit awarded will be determined by the faculty mentor, depending on the complexity of the advanced, upper division work performed.

Pre-requisite(s): CS 2420.

May be repeated 3 times up to 4 credit hours.

Note: Note: Only 4 credit hours of CS 4800 or CS 4850 or CS 4890 can apply to a CS degree as an elective course, and only a maximum of 6 hours of CS 4800, CS 4850 and CS 4890 may be taken to satisfy missing credits or to achieve full time academic status.

CS 4890 INT - Cooperative Work Experience

Credits: (1-4)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

The purpose of this course is to permit Computer Science majors who are currently working in a computer related job or internship to receive academic credit for their work, with coordination and approval of a faculty mentor and their

supervisor. The amount of upper division credit awarded will be determined by the department, depending on the nature and quantity of work performed.

Pre-requisite(s): CS 2420.

May be repeated 3 times up to 4 credit hours.

Note: Note: Only 4 credit hours of CS 4800 or CS 4850 or CS 4890 can apply to a CS degree as an elective course, and only a maximum of 6 hours of CS 4800, CS 4850, and CS 4890 may be taken to satisfy missing credits or to achieve full time academic status

CS 4899 - Bachelor's Degree Assessment

Credits: (0)

This course is to serve as an assessment tool whereby all BS/BA degree seeking students in the Computer Science Department demonstrate their learned knowledge in at least three areas of computer science. At present, this knowledge will be demonstrated through the use of Chi Tester exams administered through the Campus Testing Center. The course is taken during the last term prior to receiving the BS/BA degree.

Pre-requisite/Co-requisite: Successful completion of requirements for the Bachelor's Degree.

CS 4920 - Short Courses, Workshops, Institutes and Special Projects

Credits: (1-4)

Variable Title

Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript.

May be repeated 3 times up to 4 credit hours.

CS 5100 - Distributed Operating Systems

Credits: (3)

Typically Taught Fall Semester: Full Sem

Distributed systems or distributed computing deals with the issues encountered while running programs across a computer network. This course will cover key topics including: models of distributed systems, timing, synchronization, coordination and agreement, fault tolerance, naming, security, and middleware. Students will learn both the theoretical background of distributed systems as well as work on hands-on projects developing distributed systems applications.

Pre-requisite(s): CS 3100.

CS 5200 - The Internet of Things

Credits: (3)

Typically Taught Fall Semester: Full Sem

Typically Taught Spring Semester: Full Sem

Course Fee: \$25.00

The growth of the Internet of Things (IoT) is changing the way we interact with the world by saving time and resources and opening new opportunities for growth and innovation. This course explores the fundamentals of the world of IoT, including design considerations and constraints. It provides an overview of the networks and security issues related to IoT devices. Course participants will get hands-on experience using Arduino and/or Raspberry Pi hardware and software platforms, learn different communication protocols, how to harness the data from IoT devices, and review capabilities of cloud-based IoT platforms.

Pre-requisite(s): CS 2810 or ECE 3710.

CS 5420 - Advanced Algorithms

Credits: (3)

Typically Taught Spring Semester: Full Sem

Introduction to fundamental principles of advanced algorithm design, including asymptotic analysis; divide-and-conquer algorithms and recurrences; greedy algorithms; practical data structures (heaps, hash tables, search trees, graphs); dynamic programming; graph algorithms; and randomized algorithms.

Pre-requisite(s): CS 2420.

CS 5450 - Software Evolution and Maintenance

Credits: (3)

Typically Taught Fall Semester: Full Sem

This course aims to improve student awareness of standard software engineering tools and techniques and make them more capable team members/leaders in software development projects. In this course, students build on their software engineering knowledge by evaluating the Software Development Lifecycle (SDLC) of an existing undergraduate capstone project (or and re-engineering it with specific techniques for maintenance, scalability, dependability, reliability, safety, security, and resilience. Topics such as reverse engineering, design recovery, program analysis, program transformation, refactoring, traceability, and program understanding will be investigated. Accompanying lectures aim to provide timely concepts from the software engineering body of knowledge as they relate to the course work. There will also be class discussions and demonstrations around practical aspects of improving software-related skills that draw upon the

students' collective experience and upon the research.

Pre-requisite(s): CS 3100.

CS 5500 - Advanced Artificial Intelligence

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

This course covers advanced topics in artificial intelligence from the perspective of implementing intelligent agents through software. Students are expected to have a basic understanding of search and knowledge reasoning. Topics include quantifying uncertainty, probabilistic reasoning and planning, supervised learning, reinforcement learning, natural language processing, and perception. CS 4500 - Introduction to Artificial Intelligence or a similar course is not required but may be helpful prior to taking this course.

Pre-requisite(s): CS 2420 and either MATH 1630 or CS 2130.

CS 5580 - Advanced Data Science Algorithms and Visualization

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Data Science affects modern life in many ways from search engines and recommendation engines to e-commerce and the stock exchange. This course builds on the undergraduate Data Science Algorithms course concepts and introduces the student to advanced methodologies in applied machine learning, data mining, visualization concepts, feature engineering, and modern topics, such as Big Data. The goal of this course is to prepare professionals for practical hands-on experiences for the modern Data Science workplace with visualization as a significant part of the course.

Pre-requisite(s): CS 3580.

CS 5600 - Machine Learning

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

Introduction to fundamental principles and practical techniques of machine learning and its applications, including parametric and non-parametric algorithms, support vector machines, kernels, neural networks, clustering algorithms, dimensionality reduction, recommender systems, and deep learning. This course focuses on understanding and implementing the machine learning algorithms.

Pre-requisite(s): CS 2420.

CS 5610 - Computer Architecture

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Investigation of high-performance computer processing architectures, including concurrent, multicore platforms; memory hierarchy; static and dynamic scheduling; instruction-level parallelism, including branch prediction; graphics processing units; cache performance and analysis.

Pre-requisite(s): CS 2810 or ECE 3710.

CS 5650 - Interaction Design

Credits: (3)

Typically Taught Fall Semester: *Full Sem, Full Sem - Online*

Typically Taught Spring Semester: *Full Sem, Full Sem - Online*

Course Fee: \$25.00

The most exciting technologies of today are immersive, interactive, solve big problems, and are even entertaining. In this course, we will study how, as software developers, we can understand our users and create innovative designs that best meet their needs and desires. Known tools and techniques from the field of human-computer interaction are reviewed. User center research and evaluation techniques will be presented and students will have the opportunity to undertake a study on user design where they apply these techniques.

Pre-requisite(s): CS 3100.

CS 5740 - Computer Systems Security

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

Computer Systems Security studies the design and implementation of secure computer systems. Topics include threat models, operating system security, TCP/IP security issues, information flow control, language security, hardware security, security in web applications, and detecting/monitoring unauthorized activity. Assignments include readings from current articles, labs that involve implementing and compromising a secure computer system, and a team final project.

Pre-requisite(s): CS 2420 and CS 3100.

CS 5820 - Compiler Design

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

A study of compilers, grammars, finite-state and push down automata, scanning, parsing, error handling, semantic analysis and code generation.

Pre-requisite(s): CS 2420 and CS 2130.

CS 5840 - Formal System Design

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Methods for developing high-quality hardware/software systems that are delivered on time, within budget, and according to requirements. Techniques for specifying programs and reasoning about them, including formal logical proofs, correct code synthesis, model checking, type theory specifications, and properly evaluating concurrent programs.

Pre-requisite(s): CS 2420.

CS 5850 - Parallel Programming and Architecture

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

In parallel programming you will learn how to utilize multiple CPU's/Cores/Nodes in parallel to increase the performance of your applications. Different architectures will be discussed along with the advantages and disadvantages of each. This course will cover key topics parallel programming including: memory models, parallel programming architectures, Flynn's Taxonomy, synchronization, and performance analysis and tuning. In addition to learning the theoretical background of parallel programming, you will work on hands-on projects using multiple parallel programming languages and libraries including (CUDA, openMP, MPI, open CL, and python).

Pre-requisite(s): CS 3100.

CS 6000 - Fundamentals of Graduate Studies

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

The purpose of this course is to introduce students in the graduate programs in the College of Engineering, Applied Science, and Technology to the expectations of graduate study and the scholarly requirement options for their program. Students will learn the difference between a research thesis and a design project as well as how to select, narrow, and refocus a research topic. Students will explore academic electronic databases and Internet search engines, thus developing skills that allow them to critically evaluate published scholarly work. They will also be introduced to research methods and design and will develop skills in organization, effective editing, reviewing, and proofreading. This course should be taken within the first

year of study to establish a program of study and support future work on a thesis or project.

CS 6010 - Design Project

Credits: (2-6)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Students are required to complete a substantial computer science project. Students must demonstrate proficiency in research, design, analysis, project planning, implementation, testing, presentation and documentation. Students receive T (temporary) grades until their final design review, after which these grades are changed retroactively. Students must be enrolled in CS 6010 at the time of their final design review. May be taken up to 10 times for credit.

CS 6011 - Thesis Research

Credits: (2-6)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Students are required to complete original computer science research resulting in a thesis. Students must demonstrate proficiency in research, design, analysis, project planning, implementation, testing, presentation and documentation. Students receive T (temporary) grades until their final design review, after which these grades are changed retroactively. Students must be enrolled in CS 6011 at the time of their final thesis defense. May be taken up to 10 times for credit.

CS 6100 - Distributed Operating Systems

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Distributed systems or distributed computing deals with the issues encountered while running programs across a computer network. This course will cover key topics including: models of distributed systems, timing, synchronization, coordination and agreement, fault tolerance, naming, security, and middleware. Students will learn both the theoretical background of distributed systems as well as work on hands-on projects developing distributed systems applications.

Pre-requisite(s): CS 3100.

CS 6200 - The Internet of Things

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$25.00

The growth of the Internet of Things (IoT) is changing the way we interact with the world by saving time and resources and opening new opportunities for growth and innovation. This course explores the fundamentals of the world of IoT, including design considerations and constraints. It provides an overview of the networks and security issues related to IoT devices. Course participants will get hands-on experience using Arduino and/or Raspberry Pi hardware and software platforms, learn different communication protocols, how to harness the data from IoT devices, and review capabilities of cloud-based IoT platforms.

Pre-requisite(s): CS 2810 or ECE 3710.

CS 6420 - Advanced Algorithms

Credits: (3)

Introduction to fundamental principles of advanced algorithm design, including asymptotic analysis; divide-and-conquer algorithms and recurrences; greedy algorithms; practical data structures (heaps, hash tables, search trees, graphs); dynamic programming; graph algorithms; and randomized algorithms.

Pre-requisite(s): CS 2420.

CS 6450 - Software Evolution and Maintenance

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

This course aims to improve student awareness of standard software engineering tools and techniques and make them more capable team members/leaders in software development projects. In this course, students build on their software engineering knowledge by evaluating the Software Development Lifecycle (SDLC) of an existing undergraduate capstone project (or and re-engineering it with specific techniques for maintenance, scalability, dependability, reliability, safety, security, and resilience. Topics such as reverse engineering, design recovery, program analysis, program transformation, refactoring, traceability, and program understanding will be investigated. Accompanying lectures aim to provide timely concepts from the software engineering body of knowledge as they relate to the course work. There will also be class discussions and demonstrations around practical aspects of improving software-related skills that draw upon the students' collective experience and upon the research.

Pre-requisite(s): CS 3100.

CS 6500 - Advanced Artificial Intelligence

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

This course covers advanced topics in artificial intelligence from the perspective of implementing intelligent agents through software. Students are expected to have a basic understanding of search and knowledge reasoning. Topics include quantifying uncertainty, probabilistic reasoning and planning, supervised learning, reinforcement learning, natural language processing, and perception. CS 4500 - Introduction to Artificial Intelligence or a similar course is not required but may be helpful prior to taking this course.

Pre-requisite(s): CS 3100.

CS 6580 - Advanced Data Science Algorithms and Visualization

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Data Science affects modern life in many ways from search engines and recommendation engines to e-commerce and the stock exchange. This course builds on the undergraduate Data Science Algorithms course concepts and introduces the student to advanced methodologies in applied machine learning, data mining, visualization concepts, feature engineering, and modern topics, such as Big Data. The goal of this course is to prepare professionals for practical hands-on experiences for the modern Data Science workplace with visualization as a significant part of the course. CS 3580 (Data Science Algorithms) or a similar course is not required but will be immensely helpful prior to taking this course.

Pre-requisite(s): CS 3100 or CS 3580.

CS 6600 - Machine Learning

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Introduction to fundamental principles and practical techniques of machine learning and its applications, including parametric and non-parametric algorithms, support vector machines, kernels, neural networks, clustering algorithms, dimensionality reduction, recommender systems, and deep learning. This course focuses on understanding and implementing the machine learning algorithms.

Pre-requisite(s): CS 3100.

CS 6610 - Computer Architecture

Credits: (3)

Investigation of high-performance computer processing architectures, including concurrent, multicore platforms; memory hierarchy; static and dynamic scheduling; instruction-level parallelism, including branch prediction; graphics processing units; cache performance and analysis.

Pre-requisite(s): CS 2810 or ECE 3710.

CS 6650 - Interaction Design**Credits: (3)**

Typically Taught Fall Semester: *Full Sem*

Course Fee: \$25.00

The most exciting technologies of today are immersive, interactive, solve big problems, and are even entertaining. In this course, we will study how, as software developers, we can understand our users and create innovative designs that best meet their needs and desires. Known tools and techniques from the field of human-computer interaction are reviewed. User center research and evaluation techniques will be presented and students will have the opportunity to undertake a study on user design where they apply these techniques.

Pre-requisite(s): CS 3100.

CS 6740 - Computer Systems Security**Credits: (3)**

Typically Taught Spring Semester: *Full Sem*

Computer Systems Security studies the design and implementation of secure computer systems. Topics include threat models, operating system security, TCP/IP security issues, information flow control, language security, hardware security, security in web applications, and detecting/monitoring unauthorized activity. Assignments include readings from current articles, labs that involve implementing and compromising a secure computer system, and a team final project.

Pre-requisite(s): CS 2420 and CS 3100.

CS 6820 - Compiler Design**Credits: (3)**

Typically Taught Fall Semester: *Full Sem*

A study of compilers, grammars, finite-state and push down automata, scanning, parsing, error handling, semantic analysis and code generation.

Pre-requisite(s): CS 2420.

Suggested Requisite(s): CS 4110.

CS 6830 - Special Topics in Computer Science**Credits: (3)****Variable Title**

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course explores new or otherwise relevant computer science topics that are not covered in a regularly offered course. Each offering will have a specific title and authorized credit that will appear on the student's transcript. May be repeated for credit under different titles. Lecture or Lecture/Lab combination.

Pre-requisite(s): Instructor permission.

May be taken twice up to 6 credits.

CS 6840 - Formal System Design**Credits: (3)**

Methods for developing high-quality hardware/software systems that are delivered on time, within budget, and according to requirements. Techniques for specifying programs and reasoning about them, including formal logical proofs, correct code synthesis, model checking, type theory specifications, and properly evaluating concurrent programs.

Pre-requisite(s): CS 2420.

CS 6850 - Parallel Programming and Architecture**Credits: (3)**

Typically Taught Spring Semester: *Full Sem*

In parallel programming you will learn how to utilize multiple CPU's/Cores/Nodes in parallel to increase the performance of your applications. Different architectures will be discussed along with the advantages and disadvantages of each. This course will cover key topics parallel programming including: memory models, parallel programming architectures, Flynn's Taxonomy, synchronization, and performance analysis and tuning. In addition to learning the theoretical background of parallel programming, you will work on hands-on projects using multiple parallel programming languages and libraries including (CUDA, openMP, MPI, open CL, and python).

Pre-requisite(s): CS 3100.

DANC 1010 CA/DV - Introduction to Dance**Credits: (3)**

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$11.00

An introduction to dance providing a knowledge base from which to experience dance from a variety of viewpoints: historically, culturally, aesthetically, critically, and creatively. This course takes a close-up look at the rules, messages, and meanings embodied in dance around the world. This is a writing intensive course. Students are expected to attend dance concerts and cultural dance experiences outside regularly scheduled class time. Open to all students.

DANC 1100 - Ballet I

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$2.00

Introduction to the techniques of the classical ballet including alignment, positions, port de bras, and allegro combinations. Open to all students.

May be repeated for credit, but use toward Major/Minor must be approved by program advisor. May be repeated for a maximum of 4 credit hours.

DANC 1200 - Modern I

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$2.00

Introduction to the movement techniques of modern dance. Open to all students.

May be repeated for credit, but use toward Major/Minor must be approved by program advisor. May be repeated for a maximum of 4 credit hours.

DANC 1310 - Music for Dance

Credits: (2)

Typically Taught Spring Semester: *Full Sem odd years*

Course Fee: \$4.00

Study of the relationship between sound and movement, accompaniment and dance. Focus extends to creative and working relationship(s) between accompaniment/composer and teacher/choreographer with emphasis on practical applications of methods and understandings.

DANC 1450 - Special Topic Dance Form

Credits: (1)

Variable Title

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$10.00

This course is designed to provide enrichment opportunities for those who undertake dance as a field of study or as recreational activity. It allows for the study of changing series of dance forms, including, but not limited to African, Flamenco, Middle Eastern, Clogging, Ballroom, Renaissance, etc.

May be repeated for 2 credit hours, but use toward Major/Minor must be approved by program advisor.

DANC 1500 - Jazz I

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Course Fee: \$2.00

Introduction to the style, technique, and rhythmic structures of jazz dance with emphasis on increasing movement capabilities and personal expression. Open to all students.

May be repeated for credit, but use toward Major/Minor must be approved by program advisor. May be repeated for a maximum of 4 credit hours.

DANC 1520 - Folk & Ethnic Dance

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Course Fee: \$2.00

Folk and ethnic dances of Europe, Near and Far East, Africa, and the Americas as they relate to concert dance. Open to all students.

May be repeated for up to 4 credit hours, but use toward Major/Minor must be approved by program advisor.

DANC 1580 - Rhythm Tap

Credits: (1)

Typically Taught Fall Semester: *Full Sem even years*

Course Fee: \$2.00

Special training in tap dance skills and techniques.

May be repeated 2 times up to 3 credit hours, but use toward Major/Minor must be approved by program advisor.

DANC 2250 - Alignment and Conditioning for Dance/Pilates

Credits: (1)

Typically Taught Spring Semester: *Full Sem even years*

Course Fee: \$2.00

Strength and alignment for dancers, using Pilates mat exercises. The class addresses areas of strength essential for dancers, focuses on breathing techniques integral to the exercises, and uses the exercises as a means to better

understand and improve alignment. The course also addresses how strength and alignment facilitates more ease and efficiency in movement. To repeat the class a student must have the permission of the instructor. May be repeated twice for up to 3 credit hours, but use toward Major/Minor must be approved by program advisor.

DANC 2300 - Dance Kinesiology

Credits: (3)

Typically Taught Fall Semester: *Full Sem even years*

Course Fee: \$4.00

This course provides a study of anatomy and dance kinesiology with a specific focus on anatomical analysis, conditioning principles and injury prevention, with special attention given to application of information to technique class, rehearsal, choreography and individual anomalies. The course prepares the student to understand basic kinesiological analysis and fundamental concepts of somatic inquiry.

Pre-requisite/Co-requisite: Pre/Co-requisite: NUTR 1020.

DANC 2410 - Improvisation

Credits: (2)

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$4.00

Guided exploration in the elements of dance for the creative development of personal movement repertoire, spontaneous group interaction, and choreographic skills. May be repeated for credit, but use toward Major/Minor must be approved by program advisor.

DANC 2470 - Ballet II

Credits: (1.5)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$8.00

Technique course designed to increase skill in classical ballet.

Pre-requisite(s): DANC 1100 (2 credit hours minimum), or DANC 2470 (1 credit hour minimum), or by audition. May be repeated for credit, but use toward Major/Minor must be approved by program advisor. May be repeated 4 times for a maximum of 6 credit hours.

DANC 2490 - Modern II

Credits: (1.5)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$8.00

Refinement of beginning skills, emphasis on development of technical abilities and performance qualities.

Pre-requisite(s): DANC 1200 (2 credit hours minimum), or DANC 2490 (1.5 credit hour minimum), or by audition. May be repeated for a maximum of 6 credit hours.

DANC 2500 - Jazz II

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Refinement of beginning skills, emphasis on development of technical abilities and performance qualities.

Pre-requisite(s): DANC 1500 (2 credit hours minimum), or DANC 2480 (1 credit hour minimum), or by audition. May be repeated for credit, but use toward Major/Minor must be approved by program advisor. May be repeated for a maximum of 4 credit hours.

DANC 2610 - Dance and Digital Technology

Credits: (2)

Typically Taught Spring Semester: *Full Sem even years*

This course will provide students with an opportunity to explore the integration of dance and technology, specifically the use of the digital video medium and the use of the internet for creative and professional distribution. DANC 2610 will introduce students to dance-videography, video editing, dissemination of work through media such as the DVD format, YouTube, Vimeo and the creation/maintenance of on-line portfolios. May be repeated for credit, but use toward Major/Minor must be approved by program advisor.

DANC 2810 - Dance Form Investigations: Brazilian Samba

Credits: (2)

Experimental Course, Contact Department for More Information

Students learn the technique of Brazilian Samba and study the dance form's rich cultural and historical background. Includes student research and writing.

DANC 2920 INT - Short Courses, Workshops, Institutes and Special Programs

Credits: (1-4)

Variable Title

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$2.00

Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript. In individual cases, this course might be considered as an elective in the Dance Major.

May be repeated four times for a maximum of four credit hours, but use toward Major/Minor must be approved by program advisor.

DANC 2950 INT - Dance Festival Participation

Credits: (1)

Typically Taught Spring Semester: *Full Sem*

Students attend the American College Dance Festival Association's regional gathering to study a variety of dance forms with professionals from across the country. Students see the choreographies of peers and professionals. Students may be responsible for their own registration fees and transportation, lodging and meal costs.

Pre-requisite(s): Audition and permission.

May be repeated for up to 4 credit hours, but use toward Major/Minor must be approved by program advisor.

DANC 3015 - Dance History

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Study of the history and philosophy of dance from lineage-based societies through the early decades of modern dance, ballet, vernacular forms and dance as public art. Areas covered will include pre-Christian civilizations, the Middle Ages, the Renaissance and the Golden Age of Ballet, the Age of Innovation in Ballet through the Contemporary Period of history.

Pre-requisite(s): DANC 1010.

DANC 3320 INT - Techniques and Materials for Teaching Modern Dance

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Course Fee: \$4.00

Methods, teaching techniques, accompaniment, and practical experience in teaching modern dance. This is the

secondary teaching methods class.

Pre-requisite(s): DANC 2490.

DANC 3440 - Dance for Musical Theatre

Credits: (1)

Typically Taught Spring Semester: *Full Sem even years*

Course Fee: \$2.00

Dance skills and techniques taken from the repertoire of the modern musical theatre. Special emphasis on characterization and style as demonstrated by the works of the leading choreographers of this genre.

Pre-requisite(s): DANC 1200 and DANC 1500.

May be repeated four times for a maximum of four credit hours, but use toward Major/Minor must be approved by program advisor.

DANC 3450 - Special Topic Dance Form

Credits: (1)

Variable Title

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$10.00

This course is designed to provide enrichment opportunities for those who undertake dance as a field of study or as recreational activity. It allows for the study of changing series of dance forms, including, but not limited to African, Flamenco, Middle Eastern, Clogging, Ballroom, Renaissance, etc.

May be repeated up to 2 credit hours, but use toward Major/Minor must be approved by program advisor.

DANC 3470 - Ballet III

Credits: (1.5)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$8.00

Coordinating course designed to increase skill in classical ballet technique.

Pre-requisite(s): DANC 2470 (3 credit hours minimum), or DANC 3470 (1.5 credit hour minimum), or by audition. May be repeated for a maximum of 6 credit hours.

DANC 3490 - Modern III

Credits: (1.5)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$8.00

Exercises and activities to develop strength, flexibility,

endurance, and technical dance skill.

Pre-requisite(s): DANC 2490 (3 credit hours minimum), or DANC 3490 (1.5 credit hour minimum), or by audition. May be repeated for a maximum of 6 credit hours.

DANC 3500 - Choreography I: Space & Time/Design in Dance

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Course Fee: \$4.00

Study of the elements of time and space as they are artistically significant in themselves and in organized forms of meaning in dance. Considering time and space design in related fields of music and art included as relevant to choreographic design and communication in dance.

Pre-requisite(s): DANC 2410.

May be repeated twice for up to six credit hours, but use toward Major/Minor must be approved by program advisor.

DANC 3510 - Choreography II: Process

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Course Fee: \$4.00

Study of and experience in various approaches to the choreographic process as related to artistic concepts and to the philosophy of art as espoused by various traditional and contemporary dance artists and as developed by the individual student.

Pre-requisite(s): DANC 3500.

May be repeated twice for up to 6 credit hours, but use toward Major/Minor must be approved by program advisor.

DANC 3520 INT - Choreography Practicum

Credits: (2)

Typically Taught Fall Semester: *Full Sem*

Supervised experience choreographing a dance for public performance. Arranged through cooperative effort of student and supervisor.

Pre-requisite(s): DANC 3510 and approval of instructor. May be repeated three times for a maximum of six credit hours.

DANC 3525 - ArtsBridge

Credits: (1-6)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

ArtsBridge is a course that provides undergraduate students with an internship and academic credit for designing and implementing a comprehensive, needs-based, integrated arts project with community organizations or area schools. The course will offer students a clear structure and process for navigating the complexities of community engagement. ArtsBridge students will work closely with a WSU faculty mentor, community/school stakeholder, peers, and the ArtsBridge program coordinator throughout the process culminating in the development of a arts integrated project.

Pre-requisite(s): Recommendation by education supervisor in fine arts content area faculty mentor. Content methodology course(s) completed or in progress.

Note: Following faculty recommendation, please contact the ArtsBridge coordinator for an interview.

DANC 3580 - Rhythm Tap

Credits: (1)

Typically Taught Fall Semester: *Full Sem even years*

Course Fee: \$2.00

Intermediate/Advanced training in tap dance skills and techniques.

Pre-requisite(s): Lower Division Tap Dance (DANC 1580) and/or instructor approval.

May be repeated 2 times up to 3 credit hours, but use toward Major/Minor must be approved by program advisor.

DANC 3640 INT - Teaching Creative Dance in the Elementary School

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Course Fee: \$4.00

Techniques for teaching creative dance and basic dance forms. Suggested for Elementary Education majors.

DANC 3860 INT - Field Experience

Credits: (1-3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A course designed to provide opportunities for students to gain practical experience in the field by assisting in the activities of community agencies, schools, and Weber State.

Pre-requisite(s): DANC 3320 for those who plan to teach in a middle or secondary school or DANC 3640 for those who plan to teach in an elementary school.

May be repeated twice, up to 3 credit hours, but use toward Major/Minor must be approved by program advisor.

DANC 3910 INT/CEL - Moving Company: Rehearsal & Development

Credits: (2)

Typically Taught Fall Semester: *Full Sem*

The Moving Company is designed to give students the opportunity to learn about the various aspects of creating, rehearsing, and implementing performances off-campus and to reach the community with our dance program. The commitment is for both fall (rehearsal - 3910) and spring (performance - DANC 3911) semesters. This segment deals with preparation and rehearsal.

May be repeated 3 times up to 8 credit hours, but use toward Major/Minor must be approved by program advisor.

DANC 3911 INT/CEL - Moving Company: Performance

Credits: (2)

Typically Taught Fall Semester: *Full Sem*

The Moving Company is designed to give students the opportunity to learn about the various aspects of creating, rehearsing, and implementing performances off-campus and to reach the community with our dance program. The commitment is for both fall (rehearsal - DANC 3910) and spring (performance - 3911) semesters. This segment deals with implementation and performance.

Pre-requisite(s): DANC 3910.

May be repeated 3 times up to 8 credit hours, but use toward Major/Minor must be approved by program advisor.

DANC 4250 - Alignment and Conditioning for Dance/Pilates

Credits: (2)

Typically Taught Spring Semester: *Full Sem even years*

Course Fee: \$4.00

Strength and alignment for dancers, using Pilates mat exercises and Reformer. The class addresses areas of strength essential for dancers, focuses on breathing techniques integral to the exercises, and uses the exercises as a means to better understand and improve alignment. The course also addresses how strength and alignment facilitate ease and efficiency of movement.

Co-Requisite(s): DANC 2250.

May be repeated once up to 4 credit hours, but use toward Major/Minor must be approved by program advisor.

DANC 4610 - Dance and Digital Technology

Credits: (2)

Typically Taught Spring Semester: *Full Sem even years*

This course will provide students with an opportunity to explore the integration of dance and technology, specifically the use of the digital video medium and the use of the internet for creative and professional distribution. DANC 4610 will introduce students to dance-videography, video editing, and dissemination of work through media such as the DVD format, You Tube, Vimeo and the creation/maintenance of on-line portfolios.

May be repeated for credit, but use toward Major/Minor must be approved by program advisor.

DANC 4620 - Dance and Digital Technology Seminar

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

This seminar will provide students with individual and collaborative study and research in the field of dance and the digital video medium. The course will cover artistic and technical forms, including, but not limited to capturing dance on the digital/video medium, choreographic processes through non-linear digital editing, audio/visual editing for dance, lighting, dance theory and criticism in the context of dance in the digital age.

Pre-requisite(s): DANC 2610.

May be repeated once up to 2 credit hours, but use toward Major/Minor must be approved by program advisor.

DANC 4700 INT - Creative Synthesis in Dance

Credits: (2)

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$2.00

Project oriented experience intended to coordinate student work. It will serve as guide in the synthesis of philosophy, experience, and understanding of dance as an art form and/or dance as education. This capstone course will include a portfolio and have an artistic or scholarly outcome.

Pre-requisite(s): Students Pursuing BA in Dance: DANC 2610, DANC 3520 and senior dance major standing. Students Pursuing BA/BS in Dance Education: DANC 2610, DANC 3860 and senior dance major standing.

DANC 4800 - Individual Study

Credits: (1-4)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Individual work or work in small groups by arrangements in special topics not included in the announced course offerings.

Pre-requisite(s): Approval of instructor. In individual cases, this course might be considered as an elective in the Dance Major.

May be repeated 3 times up to 8 credit hours, but use toward Major/Minor must be approved by program advisor.

DANC 4801 - A&H Leadership Lecture Series

Credits: (1)

Typically Taught Spring Semester: *Full Sem*

This one-credit elective course will give arts and humanities' majors the opportunity to interact with successful guest lecturers whose undergraduate backgrounds are in the arts and humanities. Lecturers will clarify how the talents and skills associated with their degrees have contributed to their pursuit of successful careers and lives.

DANC 4890 INT - Cooperative Work Experience

Credits: (1-6)

Individual work or work in small groups by arrangement; in special topics not included in the announced course offerings.

Pre-requisite(s): Approval of instructor. In individual cases, this course might be considered as an elective in the Dance Major.

May be repeated 3 times up to 18 credit hours, but use toward Major/Minor must be approved by program advisor.

DANC 4910 INT - Rehearsal and Performance

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$2.00

Preparation and rehearsal of dance composition to be presented in concert.

Pre-requisite(s): consent of instructor. May be repeated for an unlimited number of credit hours.

May be repeated 11 times for credit, but use toward Major/Minor must be approved by program advisor.

DANC 4920 INT - Short Courses, Workshops, Institutes and Special Programs

Credits: (1-4)

Variable Title

Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript. In individual cases, this course might be considered as an elective in the Dance Major. May be repeated 3 times up to 16 credit hours, but use toward Major/Minor must be approved by program advisor.

Note: This course is offered as needed.

DANC 4950 INT - Dance Festival Participation

Credits: (1)

Typically Taught Spring Semester: *Full Sem*

Students attend the American College Dance Festival Association's regional gathering to study a variety of dance forms with professionals from across the country. Students see the choreographies of peers and professionals. Students may be responsible for their own registration fees and transportation, lodging and meal costs.

Pre-requisite(s): Audition and permission.

May be repeated 3 times up to 4 credit hours, but use toward Major/Minor must be approved by program advisor.

DENT 2201 - Concepts of Community Dental Health

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

This course will present the basic concepts of planning and implementing community dental health programs. These principles include epidemiology, sociological concepts of health and illness, health behavior, public attitudes and principles of dental health education.

DENT 2205 - Head/Neck and Dental Anatomy

Credits: (2)

Typically Taught Fall Semester: *Full Sem*

Identification of major anatomical landmarks of the head and neck, their innervation, blood supply and function. Also includes instruction in the histology and embryology of head and neck development and tooth morphology.

DENT 2206 - Clinical Dental Hygiene/Radiology

Credits: (4)

Typically Taught Fall Semester: *Full Sem*

Course Fee: \$320.00

Clinical application of principles of DENT 2207 and DENT 2208. Must accompany DENT 2207 and DENT 2208.

Students participate in three four-hour labs each week.

DENT 2207 - Dental Hygiene I

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Theory essential to performing clinical treatment, including, but not limited to armamentarium, client-operator positioning, aseptic technique, soft tissue exam, health history, principles of instrumentation and disease control therapies. Must accompany DENT 2206.

DENT 2208 - Radiology

Credits: (2)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Preparatory skills for clinical dental radiology, including information on radiation safety and exposure techniques. Must accompany DENT 2206.

DENT 2211 - Oral Pathology

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

The study of manifestations and identification of disease processes in the oral cavity.

DENT 2215 - Periodontology

Credits: (2)

Typically Taught Spring Semester: *Full Sem*

The study of basic periodontal structures and disease processes.

DENT 2216 INT - Clinical Dental Hygiene II

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$95.00

Clinical application of DENT 2217. Must accompany

DENT 2217.

Two four-hour clinic lab sessions each week.

Pre-requisite(s): DENT 2206 and DENT 2207.

DENT 2217 - Dental Hygiene II

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

Continuation of DENT 2206. Didactic instruction for intermediate skills in dental hygiene treatment. Must accompany DENT 2216.

Pre-requisite(s): DENT 2207.

DENT 2219 - Dental Materials

Credits: (1)

Typically Taught Spring Semester: *Full Sem*

Identification of and laboratory experiences with materials used in dentistry and dental hygiene.

DENT 2230 - Oral Health Research & Statistics

Credits: (2)

Typically Taught Fall Semester: *Online*

Typically Taught Spring Semester: *Online*

This course is designed to provide the student with research design and statistics principles as they apply to oral health settings and issues.

Pre-requisite(s): WSU Quantitative Literacy requirement.

DENT 2235 - Dental Medicine I

Credits: (2)

Typically Taught Spring Semester: *Full Sem*

The study of common medical conditions and their treatment. Emphasis is placed on oral manifestations of systemic disease and related pharmacology.

DENT 2250 - Professional Ethics

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Professional Ethics is designed to provide dental hygiene students with a foundation in the professional standards governing the dental hygiene profession and the development of ethical decision-making skills, in the context of diversity and respect for others. Throughout the course the student will be guided to explore issues of diversity, prejudices, and their responsibility to provide culturally sensitive care.

DENT 2800 - Individual Research

Credits: (1-3)

Typically Taught Summer Semester: *Online*

Typically Taught Fall Semester: *Full Sem, Online*

Typically Taught Spring Semester: *Full Sem, Online*

Special project in a student's area of interest.

May be repeated twice for a maximum of 4 credit hours.

DENT 2830 - Directed Readings, Projects and Research

Credits: (1-3)

Typically Taught Summer Semester: *Online*

Typically Taught Fall Semester: *Full Sem, Online*

Typically Taught Spring Semester: *Full Sem, Online*

Limited to dental hygiene majors.

A maximum of nine hours may be accumulated with this course.

DENT 2920 - Short Courses, Workshops, Institutes and Special Programs

Credits: (1-3)

Variable Title

Typically Taught Spring Semester: *Full Sem*

The specific title and credit authorized will appear on the student transcript.

May be repeated 5 times for a maximum of 6 credit hours.

DENT 3130 - Independent Study

Credits: (1-3)

Typically Taught Summer Semester: *Online*

Typically Taught Fall Semester: *Online*

Typically Taught Spring Semester: *Full Sem, Online*

Independent project in an area of interest; second year dental hygiene students only. Project approval by dental hygiene faculty.

A maximum of nine hours may be accumulated with this course.

DENT 3301 INT - Community Dental Health Service Learning Lab

Credits: (1)

Typically Taught Spring Semester: *Full Sem*

This course leads the student through on-campus and off-campus field projects with selected community agencies.

DENT 3305 - Pain Control

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

The study of local anesthesia with regard to pharmacology, administration techniques, methods of pain and apprehension control and nitrous oxide sedation. Includes laboratory experiences in the administration of local anesthesia and nitrous oxide sedation.

Pre-requisite(s): DENT 2235.

DENT 3336 INT - Clinical Dental Hygiene III

Credits: (4)

Typically Taught Fall Semester: *Full Sem*

Course Fee: \$120.00

Clinical application of DENT 3337. This course must accompany DENT 3337.

Three four hour clinics each week.

Pre-requisite(s): DENT 2206 and DENT 2216.

DENT 3337 - Dental Hygiene III

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Continuation of DENT 2207, DENT 2217. Emphasis on advanced instrumentation in the care of patients with periodontal disease. Must accompany DENT 3336.

Pre-requisite(s): DENT 2207 and DENT 2217.

DENT 3346 INT - Clinical Dental Hygiene IV

Credits: (4)

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$120.00

Clinical lab which must accompany DENT 3347.

Twelve hours of clinic each week.

Pre-requisite(s): DENT 2206, DENT 2216, DENT 3336.

DENT 3347 - Dental Hygiene IV

Credits: (2)

Typically Taught Spring Semester: *Full Sem*

Continuation of DENT 2207, DENT 2217, DENT 3337.

Emphasis on expanded client care services and with client populations with special treatment needs. Must accompany DENT 3346.

Pre-requisite(s): DENT 2207, DENT 2217, DENT 3337.

DENT 4010 - Interdisciplinary Health Care Teams

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course provides an interdisciplinary experience with the team concept as a priority. The students learn the role of the health care team members, each with their different skills and objectives. The course teaches students to practice an interdisciplinary approach as they research, interact and learn in the interdisciplinary environment of a health care setting.

Cross-listed with HTHS 4010 and NRSNG 4010.

DENT 4405 INT - Dental Hygiene Clinical Teaching Practice

Credits: (4)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Supervised teaching in the Weber State Dental Hygiene program as an assistant to the supervising faculty.

Pre-requisite(s): Consent of the faculty member and acceptance into the BS/DH major program.

DENT 4410 - Dental Hygiene Needs of the Geriatric Client

Credits: (2)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

An overview of dental health needs of elderly clients.

Pre-requisite(s): Consent of instructor and acceptance into the BS/DH major program.

DENT 4530 INT - Principles and Application of Evidence - based Dental Hygiene Practice

Credits: (2)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Emphasis is on the critical appraisal of scientific literature, the development of clinical problem statements and hypotheses and the formulation of a research proposal. Ethical issues inherent in the research process and the identification of appropriate hypothesis testing procedures will also be discussed.

Pre-requisite(s): Acceptance into the BS/DH program and completion of WSU Quantitative Literacy requirement.

DENT 4780 - Baccalaureate Thesis

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course is designed to give dental hygiene students an opportunity to complete a thesis project in partial fulfillment of the requirements for the BS/DH major.

Pre-requisite(s): Acceptance into the BS/DH program, completion of the WSU Quantitative Literacy requirement.

DENT 4800 - Individual Research

Credits: (1-3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Special project in a student's area of interest.

May be repeated twice for a maximum of 3 credit hours.

DENT 4810 - Summer Elective Clinic

Credits: (4)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Summer intensive clinical course which allows the student to set personal achievement goals for clinical techniques and assists them through the process of skill development. May be repeated six times for a maximum of six credit hours.

DENT 4830 - Directed Readings, Projects and Research

Credits: (1-3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Limited to dental hygiene majors.

A maximum of nine hours may be accumulated with this course.

DENT 4850 - Study Abroad

Credits: (1-6)

Variable Title

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

The purpose of this course is to provide opportunities for students in health professions to experience a study abroad

program that is designed to explore healthcare, culture, and clinical experience.
May be repeated 5 times with a maximum of 6 credit hours.

DENT 4890 INT - Advanced Community or Clinical Work Experience

Credits: (2)

Typically Taught Summer Semester: *Full Sem, Online*

Typically Taught Fall Semester: *Full Sem, Online*

Typically Taught Spring Semester: *Full Sem, Online*

This course is designed to specifically meet the interests and career goals of the Dental Hygiene Degree-completion student or the student completing the Baccalaureate degree, Dental Hygiene major prior to initial licensure as a dental hygienist. The student who is completing this course as part of their BS degree, initial entry into the profession, will participate in an advanced community or clinical work experiences under the direct supervision of program faculty. The baccalaureate degree completion student must be licensed to practice dental hygiene at the site in which the work experience will take place, have successfully completed an accredited dental hygiene program, or have a work experience site that does not have direct patient care as its community role.

Pre-requisite(s): Acceptance into the BS/DH Program and consent of the instructor.

DENT 4920 - Short Courses, Workshops, Institutes and Special Programs

Credits: (1-4)

Variable Title

Typically Taught Summer Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript.

May be repeated 5 times with a maximum of 6 credit hours.

DENT 4990 - Seminar

Credits: (1-2)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Current concepts in dental hygiene for baccalaureate level dental hygiene students.

May be repeated once for a maximum of 2 credit hours.

DMS 4110 - Sonography Principles & Instrumentation

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

Elementary principles, propagation through tissues, transducers, pulse echo principles and instruments, images, storage and display, Doppler, image features and artifacts, bioeffects, and safety.

DMS 4120 - Quality Assurance

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Developing, analyzing and evaluating a quality assurance program.

DMS 4210 - Cardiac Sonography I

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Concepts in cardiac sonographic scanning technique and protocol to produce and evaluate diagnostic images.

DMS 4220 - Cardiac Sonography II

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

Continuation of 4203.

DMS 4230 - Cardiac Sonography III

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Continuation of DMS 4220.

DMS 4310 - Abdominal Sonography

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Concepts in abdominal intraperitoneal and retroperitoneal sonographic scanning technique and protocol to produce and evaluate diagnostic images in the clinical setting.

DMS 4320 - Superficial Structure Sonography

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Concepts in superficial structure sonographic scanning

technique and protocol to produce and evaluate diagnostic images in the clinical setting.

DMS 4330 - Gynecologic Sonography

Credits: (1)

Typically Taught Spring Semester: *Full Sem*

Concepts in gynecologic sonographic scanning technique and protocol to produce and evaluate diagnostic images.

DMS 4340 - Obstetric Sonography

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

Concepts in obstetric sonographic scanning technique and protocol to produce and evaluate diagnostic images.

DMS 4410 - Vascular Sonography I

Credits: (2)

Typically Taught Fall Semester: *Full Sem*

Concepts in vascular sonographic scanning technique and protocol to produce and evaluate diagnostic images.

DMS 4420 - Vascular Sonography II

Credits: (2)

Typically Taught Spring Semester: *Full Sem*

Continuation of DMS 4410.

DMS 4510 - Breast Sonography

Credits: (1)

Typically Taught Spring Semester: *Full Sem*

Concepts in breast sonographic scanning technique and protocol to produce and evaluate diagnostic images.

DMS 4610 - Cardiac Sonography - Clinical Simulation I

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Clinical Simulation in Cardiac Sonography Labs.

DMS 4611 - Cardiac Sonography - Clinical Simulation II

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Clinical Simulation in Cardiac Sonography Labs.

DMS 4612 - Cardiac Sonography - Clinical Simulation III

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Clinical Simulation in Cardiac Sonography Labs.

DMS 4620 - Medical Sonography - Clinical Simulation I

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Clinical Simulation in Medical Sonography Labs.

DMS 4621 - Medical Sonography - Clinical Simulation II

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Clinical Simulation in Medical Sonography Labs.

DMS 4622 - Medical Sonography - Clinical Simulation III

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Clinical Simulation in Medical Sonography Labs.

DMS 4630 - Vascular Sonography - Clinical Simulation I

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Clinical Simulation in Vascular Sonography Labs.

DMS 4631 - Vascular Sonography - Clinical Simulation II

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Clinical Simulation in Vascular Sonography Labs.

DMS 4632 - Vascular Sonography - Clinical Simulation III

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Clinical Simulation in Vascular Sonography Labs

DMS 4801 - Individualized Research

Credits: (1-3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Contract with faculty advisor required.

May be repeated twice with a maximum of 3 credit hours.

DMS 4811 INT - Cardiac Clinical I

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

A minimum of 24 hours per week in an active diagnostic cardiac sonography department.

DMS 4812 INT - Cardiac Clinical II

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Continuation of DMS 4811.

DMS 4813 INT - Cardiac Clinical III

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Continuation of DMS 4812.

DMS 4821 INT - Medical Clinical I

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

A minimum of 24 hours per week in an active diagnostic medical sonography department.

DMS 4822 INT - Medical Clinical II

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Continuation of DMS 4821.

DMS 4823 INT - Medical Clinical III

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Continuation of DMS 4822.

DMS 4831 INT - Vascular Clinical I

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

A minimum of 24 hours per week in an active diagnostic vascular sonography department.

DMS 4832 INT - Vascular Clinical II

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

Continuation of DMS 4831.

DMS 4833 INT - Vascular Clinical III

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Continuation of DMS 4832.

DMS 4841 INT - Breast Clinical

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

A minimum of 24 hours per week performing breast sonography examinations.

Pre-requisite(s): DMS 4510 Breast Sonography.

DMS 4911 - Cardiac Comprehensive Review

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Review and requirements for advanced responsibilities of the cardiac sonographer.

DMS 4912 - Medical Comprehensive Review

Credits: (2)

Typically Taught Fall Semester: *Full Sem*

Review and requirements for advanced responsibilities of the medical sonographer.

DMS 4913 - Vascular Comprehensive Review

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Review and requirements for advanced responsibilities of the vascular sonographer.

DMS 4921 - Workshops, Conferences and Telecourses

Credits: (1-3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

May be repeated twice with a maximum of 3 credit hours.

ECE 1000 - Introduction to Electrical Engineering

Credits: (2)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

An introductory course to Electrical & Computer Engineering topics including electronic terms, numbering systems, software tools, and documentation practices. College algebra and trigonometry are strongly recommended.

Pre-requisite/Co-requisite: MATH 1060 or MATH 1080 or equivalent.

ECE 1270 - Introduction to Electrical Circuits

Credits: (4)

Typically Taught Fall Semester: *Full Sem*

The basics of analog circuits as an introduction to Electrical Engineering. Concepts of voltage, current, power, resistance capacitance and inductance. Circuit analysis techniques such as Kirchhoff's Laws, node voltages, and

mesh currents. Thevenin's and Norton's equivalent circuits, sinusoidal steady state and phasors.

Lecture and lab combination.

Pre-requisite(s): MATH 1210 and MATH 1220 (1220 may be taken concurrently).

ECE 1400 - Fundamentals of Engineering Computing

Credits: (4)

Typically Taught Spring Semester: *Full Sem*

Computer programming and computational tools applied to electrical and computer engineering problems. Topics include coding fundamentals, numeric libraries and debugging techniques. Lecture and lab combination.

Pre-requisite(s): MATH 1210.

ECE 2260 - Fundamentals of Electrical Circuits

Credits: (4)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Fundamental electric-circuit techniques including: time domain transient responses for 1st and 2nd order circuits, Laplace transforms, Fourier series, and filters. Lecture and lab combination.

Pre-requisite(s): ECE 1270 and MATH 1220.

Pre-requisite/Co-requisite: ECE 1400 and either MATH 2250 or MATH 2280.

ECE 2700 - Digital Circuits

Credits: (4)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

An introduction to digital electronics, integrated circuits, numbering systems, Boolean algebra, gates, flip-flops, multiplexers, sequential circuits, combinational circuits, and computer architecture. Introduction to hardware description language and programmable logic devices. Lecture and lab combination. Laboratory activities to include the design, construction, analysis, and measurement of basic digital systems.

Pre-requisite(s): ECE 1000 or ENGR 1000. May be taken concurrently.

Co-Requisite(s):

ECE 3000 - Engineering Seminar

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

An engineering seminar course designed to prepare the student for professional engineering employment. Topics to include resumes, hiring criteria, interviewing techniques, engineering ethics, professional and societal responsibilities, lifelong learning, diversity, creative problem solving, goals, quality, timeliness, and continuous improvement. The students will research related topics and write a paper.

Pre-requisite(s): ECE 1270.

Note: Admittance into the Professional Program required.

ECE 3090 - Project Management

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Project Management course is designed to prepare students for the senior capstone project. The course will include development of a contract, goal setting, time management, budgeting, project funding, project leadership and team building principles. Engineering economics, team work, quality statistics and continuous improvement will also be discussed. Other topics include project life cycles, organization and risk management. Students should take this course the semester before taking ECE 4010.

Pre-requisite(s): Permission from the department.

Note: Admittance into the Professional Program required.

ECE 3110 - Microelectronics I

Credits: (4)

Typically Taught Fall Semester: *Full Sem*

Fundamental semiconductor device characteristics including diodes, MOSFETs and bipolar transistors; small and large signal characteristics and design of linear circuits. Lecture and lab combination. Laboratory activities to include the design, construction, computer simulation, and analysis of semiconductor circuits, amplifiers and power supplies.

Pre-requisite(s): ECE 1270 and MATH 1220.

Note: Admittance into the Professional Program required.

ECE 3120 - Microelectronics II

Credits: (4)

Typically Taught Spring Semester: *Full Sem*

Intermediate topics related to microelectronics including differential and multistage amplifiers, frequency response, feedback systems, power amplifiers, filters, and signal generation.

Lecture and lab combination. Laboratory activities to include the design, construction, computer simulation, and analysis of filters and advanced circuits.

Pre-requisite(s): ECE 2260 and ECE 3110.

Note: Admittance into the Professional Program required.

ECE 3210 - Signals and Systems

Credits: (4)

Typically Taught Fall Semester: *Full Sem*

Topics related to the analysis of linear time invariant continuous and discrete systems and signal transformations, convolution, frequency spectra, Laplace transforms, Z transforms, and fast Fourier transforms.

Lecture and lab combination. Laboratory activities to include the computer simulation, analysis, and numerical modeling of signals and systems.

Pre-requisite(s): ECE 2260 and MATH 2250 or MATH 2270 and MATH 2280.

Note: Admittance into the Professional Program required.

ECE 3310 - Electromagnetics I

Credits: (4)

Typically Taught Spring Semester: *Full Sem*

An introduction to electrostatics, magnetostatics and Maxwell's equations with specific applications to wave propagation and transmission line theory.

Lecture and lab combination. Laboratory activities to include the design, construction, and analysis of RF radar subsystems.

Pre-requisite(s): MATH 2210, PHYS 2220, and ECE 2260.

Note: Admittance into the Professional Program required.

ECE 3510 - Power Systems

Credits: (4)

Typically Taught Fall Semester: *Full Sem*

A study of AC and DC power systems and machines, including single and 3-phase power, power factor and

correction, transformers, synchronous and induction machines, DC motors, power transmission lines, and analysis of power flow and faults. Lecture and Lab combination.

Pre-requisite(s): ECE 2260 or ENGR 2210.

Note: Admittance into the Professional Program required.

ECE 3610 - Digital Systems

Credits: (4)

Typically Taught Fall Semester: *Full Sem*

Introduction to microprocessor architecture, arithmetic logic units, memory systems, input/output interfaces, peripheral devices, and communication.

Lecture and lab combination. Laboratory activities to include the programming and operation of microprocessor circuits.

Pre-requisite(s): ECE 2700 and (CS 2250 or CS 1410 or ECE 1400).

ECE 3710 - Embedded Systems

Credits: (4)

Typically Taught Spring Semester: *Full Sem*

Design and implementation of a microcontroller or microprocessor embedded system including assembly language programming, interfacing to peripherals, interrupt handling and debugging techniques.

Lecture and Lab. Laboratory exercises build toward a final embedded systems project.

Pre-requisite(s): (ECE 2700 or CS 2810) and (ECE 1400 or CS 2250 or CS 1410).

Pre-requisite/Co-requisite: ENGL 3100 or PS 3250.

ECE 3890 INT - Internship

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This is a core course that is required for the BS Engineering degree. The student will need department approval before being allowed to register.

Pre-requisite(s): Permission from the department.

ECE 3890 can be taken a maximum of three times for a total of three credits, but only one credit counts toward the

major.

Note: Admittance into the Professional Program required.

ECE 4010 CEL - Senior Project I

Credits: (2)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Students will be required to complete a 300-hour engineering project (over two semesters) in a team environment. Project management and problem solving techniques will be emphasized. Topics to include goal setting, developing milestone charts, writing contracts, conducting research, project design and construction, testing and analysis, project documentation, and design review presentations. Before seeking departmental approval, students should be **currently** enrolled in ECE 3090 and should have taken at least four 3000-level core ECE courses, MATH 3410, and either ENGL 3100 or PS 3250. Exceptions to this rule are made only if a student's graduation would otherwise be delayed.

Pre-requisite(s): Permission from the department.

Note: Admittance into the Professional Program required.

ECE 4020 CEL - Senior Project II

Credits: (2)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A continuation of Senior Project I. Students will be required to complete a significant engineering project in a team environment. Project management and problem solving techniques will be emphasized. Topics to include goal setting, developing milestone charts, writing contracts, conducting research, project design and construction, testing and analysis, project documentation, and design review presentations.

Pre-requisite(s): ECE 4010.

Note: Admittance into the Professional Program required.

ECE 4100 - Control Systems

Credits: (4)

Typically Taught Fall Semester: *Full Sem*

Topics related to control theory, analysis, and testing of systems in the time domain, frequency domain and state space.

Lecture and lab combination.

Pre-requisite(s): ECE 3110 and ECE 3210.

Note: Admittance into the Professional Program required.

ECE 5110 - Digital VLSI Design

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Introduction to Digital VLSI design. Includes the development of standard cell library of common CMOS circuits. Use of hardware description language and CAD tools for the design and simulation of custom large-scale digital systems. Students will understand the impacts and tradeoffs from speed, power consumption, and thermal properties of large-scale custom ICs.

Pre-requisite(s): ECE 3110 and ECE 3610.

Note: Admittance into the Professional Program required.

ECE 5130 - Advanced Semiconductor Devices

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

Introduction to advanced semiconductor physics and devices. Topics include carrier transport theory, energy band diagrams, PN junctions, metal-semiconductor junctions, BJTs and MOSFETs. Study of current semiconductor process technologies and discussion of off-roadmap technologies.

Pre-requisite(s): PHYS 2220 and ECE 3110.

Note: Admittance into the Professional Program required.

ECE 5140 - Sensors and Instrumentation

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

This course introduces a host of sensor technologies from both theoretical and practical perspectives. A study of the electronics for sensor signal conditioning will be complemented by lectures on the principles and operation of various sensor modalities including pressure, thermal, strain, displacement, inertial, magnetic field, optical, acoustic, and/or bio-medical. Students will be introduced to precision analog circuit architectures, noise analysis, and signal processing algorithms commonly used in data acquisition systems.

Pre-requisite(s): ECE 3110 and PHYS 2220.

ECE 5210 - Digital Signal Processing

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Theory, application, and implementation of digital signal processing (DSP) concepts, from the design and implementation perspective. Topics include: Fast Fourier transforms, adaptive filters, state-space algorithms, random signals, and spectral estimation.

Pre-requisite(s): ECE 3210.

Note: Admittance into the Professional Program required.

ECE 5220 - Image Processing

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

Advanced image processing theory and methods. Topics include digital image formation, transformation, filtering, enhancements, segmentation and morphological processing. Lectures, computer assignments and project (including term paper).

Pre-requisite(s): ECE 3210.

Note: Admittance into the Professional Program required.

ECE 5230 - Engineering Applications in Deep Learning

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

This course covers deep learning architectures with a focus on learning end-to-end models for these tasks, particularly image and signal processing. Students will learn to implement, train and debug their own deep neural networks and gain a detailed understanding of cutting-edge research in this field. Strong emphasis will be placed on real-world applications for both solving engineering problems using these methods as well as practical techniques for training and fine-tuning the networks. Case studies will be drawn from medical imaging, semiconductors, and audio signal processing.

Pre-requisite(s): ECE 1400, ECE 3210, MATH 3410, and either MATH 2250 or MATH 2270.

ECE 5310 - Electromagnetics II

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A study of intermediate electromagnetic issues common to circuits, systems, and communication networks.

Pre-requisite(s): ECE 3310.

Note: Admittance into the Professional Program required.

ECE 5320 - Antennas and Wave Propagation

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Behavior of radiated electromagnetic waves in atmosphere, space, urban and indoor environments; path, frequency and antenna selection for practical communication systems; propagation prediction.

Pre-requisite(s): ECE 3310.

Note: Admittance into the Professional Program required.

ECE 5410 - Communication Circuits and Systems

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

A study of communication circuits, modulation and decoding theory, spectrum usage, networks, and protocols.

Pre-requisite(s): ECE 3210 and MATH 3410.

Note: Admittance into the Professional Program required.

ECE 5420 - Digital Communication

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

This course provides an in-depth coverage of the theory, analysis, and design of digital communications systems with an emphasis on advanced topics related to wired, wireless data communication and the physical networking layer. Topics include QPSK, QAM, PAM, CSMA/CD, SONET, ADSL, and/or MACAW. Spread spectrum concepts such as FHSS, DSSS, OFDM, MIMO and/or cooperative communication techniques may be included. Students will develop Matlab based models to emulate the concepts. The course will include group projects as well as individual assignments. The course would be beneficial particularly to students who are interested in doing work/research in fields related to communications, networks, and signal processing.

Pre-requisite(s): ECE 3210 and MATH 3410.

Note: Admittance into the Professional Program required.

ECE 5440 - Optical Communication Systems

Credits: (3)

This course covers the fundamentals of optical communication. Topics include wave propagation in fiber

optics, optical transmitters and receivers, system design and performance, multichannel lightwave systems, optical losses and loss management, fiber dispersion and dispersion management.

Pre-requisite(s): ECE 3310.

ECE 5510 - Advanced Power Systems

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

This course will explore advanced power systems concepts.

Pre-requisite(s): ECE 3510.

Note: Admittance into the Professional Program required.

ECE 5620 - Digital System Testing

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

Fundamentals of testing digital circuits and memory devices, including fault modeling, test pattern generation, and test coverage. Introduction to design for test and built-in self-test. Laboratory activities include performing bench and automated testing of digital and memory chips, and generating test patterns for fault detection.

Pre-requisite(s): ECE 3610 - Digital Systems (4)

Note: Admittance into the Professional Program required.

ECE 5640 - Model-based Engineering

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

This course is an introduction to the use of formal models to describe complex electrical systems. Topics include modeling tools, design, verification and testing of model-based systems, model validation and verification, and the use of state-machines in models.

Pre-requisite(s): ECE 3610.

ECE 5710 - Real-Time Systems

Credits: (4)

Typically Taught Fall Semester: *Full Sem*

An advanced course on real-time system design. Topics include task concurrency, scheduling paradigms, synchronization, resource access control, and inter-process communication. Lecture and Lab combination.

Pre-requisite(s): ECE 3710.

Note: Admittance into the Professional Program required.

ECE 5730 - Robotics

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Robotic design and control principles. Topics include servo control, localization, navigation and vision. Introduction to robotic operating system software to interface and fuse data from various sensors such as LIDAR, Inertial measurement units, compass and physical and visual odometry for navigation and control. Validation of designs before implementation.

Pre-requisite(s): ECE 4100.

ECE 5800 - Individual Studies

Credits: (1-4)

The students will receive credit for approved studies in the Electrical & Computer Engineering programs. A maximum of four credits can count as an elective course in the Electrical & Computer Engineering programs.

May be repeated four times for a maximum of four credit hours.

Note: Admittance into the Professional Program required.

ECE 5900 - Special Topics

Credits: (1-4)

Variable Title

A one-time special study course designed to introduce a new relevant topic that is not covered in the Electrical & Computer Engineering programs.

Lecture and lab combination. Laboratory activities support the selected course topic.

May be repeated four times for a maximum of four credit hours.

Note: A maximum of four credits can be counted for the Electrical & Computer Engineering programs. Admittance into the Professional Program required.

ECE 6010 - Design Project

Credits: (2-6)

Students are required to complete a substantial engineering design project. Students must demonstrate proficiency in research, design, analysis, project planning, implementation, testing, presentation and documentation. Students receive T (temporary) grades until their final design review, after which these grades are changed retroactively. Students must be enrolled in ECE 6010 at the time of their final design review. This course may be repeated.

Pre-requisite(s): Permission from the department.

May be repeated 11 times for a maximum of 20 credit hours.

ECE 6020 - Thesis

Credits: (2-6)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Students are required to perform original research that results in a thesis under the direction of a faculty advisor. Students receive T (temporary) grades until their thesis defense, after which these grades are changed retroactively. Students must be enrolled in ECE 6020 at the time of their thesis defense.

Pre-requisite(s): Permission from the department.

This course may be taken 3 times and up to 9 credits.

ECE 6110 - Digital VLSI Design

Credits: (3)

Introduction to Digital VLSI design. Includes the development of standard cell library of common CMOS circuits. Use of hardware description language and CAD tools for the design and simulation of custom large-scale digital systems. Students will understand the impacts and tradeoffs from speed, power consumption, and thermal properties of large-scale custom ICs.

Pre-requisite(s): ECE 3110 and ECE 3610.

ECE 6120 - Analog VLSI Design

Credits: (3)

Design of analog VLSI systems. Course includes design, modeling, and verification of analog circuits in large-scale systems. Students will develop custom analog system designs utilizing CAD programs.

Pre-requisite(s): ECE 3120.

ECE 6130 - Advanced Semiconductor Devices

Credits: (3)

Introduction to advanced semiconductor physics and devices. Topics include carrier transport theory, energy band diagrams, PN junctions, metal-semiconductor junctions, BJTs and MOSFETs. Study of current semiconductor process technologies and discussion of off-roadmap technologies.

Pre-requisite(s): PHYS 2220 and ECE 3110.

ECE 6140 - Sensors and Instrumentation

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

This course introduces a host of sensor technologies from both theoretical and practical perspectives. A study of the electronics for sensor signal conditioning will be complemented by lectures on the principles and operation of various sensor modalities including pressure, thermal, strain, displacement, inertial, magnetic field, optical, acoustic, and/or bio-medical. Students will be introduced to precision analog circuit architectures, noise analysis, and signal processing algorithms commonly used in data acquisition systems.

Pre-requisite(s): ECE 3110.

ECE 6210 - Digital Signal Processing

Credits: (3)

Theory, application, and implementation of digital signal processing (DSP) concepts, from the design and implementation perspective. Topics include: Fast Fourier transforms, adaptive filters, state-space algorithms, random signals, and spectral estimation.

Pre-requisite(s): ECE 3210.

ECE 6220 - Image Processing

Credits: (3)

Advanced image processing theory and methods. Topics include digital image formation, transformation, filtering, enhancements, segmentation and morphological processing. Lectures, computer assignments and project (including term paper).

Pre-requisite(s): ECE 3210.

ECE 6230 - Engineering Applications in Deep Learning

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

This course covers deep learning architectures with a focus on learning end-to-end models for these tasks, particularly image and signal processing. Students will learn to implement, train and debug their own deep neural networks and gain a detailed understanding of cutting-edge research in this field. Strong emphasis will be placed on real-world applications for both solving engineering problems using these methods as well as practical techniques for training and fine-tuning the networks. Case studies will be drawn from medical imaging, semiconductors, and audio signal processing.

Pre-requisite(s): ECE 1400, ECE 3210, MATH 3410, and either MATH 2250 or MATH 2270.

ECE 6310 - Electromagnetics II

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

A study of intermediate electromagnetic issues common to circuits, systems, and communication networks.

Pre-requisite(s): ECE 3310.

ECE 6320 - Antennas and Wave Propagation

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Behavior of radiated electromagnetic waves in atmosphere, space, urban and indoor environments; path, frequency and antenna selection for practical communication systems; propagation prediction.

Pre-requisite(s): ECE 3310.

ECE 6410 - Communication Circuits and Systems

Credits: (3)

A study of communication circuits, modulation and decoding theory, spectrum usage, networks, and protocols.

Pre-requisite(s): ECE 3210 and MATH 3410.

ECE 6420 - Digital Communication

Credits: (3)

This course provides an in-depth coverage of the theory, analysis, and design of digital communications systems with an emphasis on advanced topics related to wired, wireless data communication and the physical networking layer. Topics include QPSK, QAM, PAM, CSMA/CD, SONET, ADSL, and/or MACAW. Spread spectrum concepts such as FHSS, DSSS, OFDM, MIMO and/or cooperative communication techniques may be included. Students will develop Matlab based models to emulate the concepts. The course will include group projects as well as individual assignments. The course would be beneficial particularly to students who are interested in doing work/research in fields related to communications, networks, and signal processing.

Pre-requisite(s): ECE 3210 and MATH 3410.

ECE 6440 - Optical Communication Systems

Credits: (3)

This course covers the fundamentals of optical

communication. Topics include wave propagation in fiber optics, optical transmitters and receivers, system design and performance, multichannel lightwave systems, optical losses and loss management, fiber dispersion and dispersion management.

Pre-requisite(s): ECE 3310.

ECE 6510 - Advanced Power Systems

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

This course will explore advanced power systems concepts.

Pre-requisite(s): ECE 3510.

ECE 6620 - Digital System Testing

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

Fundamentals of testing digital circuits and memory devices, including fault modeling, test pattern generation, and test coverage. Introduction to design for test and built-in self-test. Laboratory activities include performing bench and automated testing of digital and memory chips, and generating test patterns for fault detection.

Pre-requisite(s): ECE 3610.

ECE 6640 - Model-Based Engineering

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

This course is an introduction to the use of formal models to describe complex electrical systems. Topics include modeling tools, design, verification and testing of model-based systems, model validation and verification, and the use of state-machines in models.

Pre-requisite(s): ECE 3610.

ECE 6710 - Real-Time Systems

Credits: (4)

Typically Taught Fall Semester: *Full Sem*

An advanced course on real-time system design. Topics include task concurrency, scheduling paradigms, synchronization, resource access control, and inter-process communication. Lecture and Lab combination.

Pre-requisite(s): ECE 3710 or CS 3100.

ECE 6730 - Robotics

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Robotic design and control principles. Topics include servo control, localization, navigation and vision. Introduction to robotic operating system software to interface and fuse data from various sensors such as LIDAR, Inertial measurement units, compass and physical and visual odometry for navigation and control. Validation of designs before implementation.

Pre-requisite(s): ECE 4100.

ECE 6800 - Individual Studies

Credits: (1-3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Students taking this course will receive credit for approved, mentored studies in the Master of Science in Electrical Engineering (MSEE) and Master of Science in Computer Engineering (MSCE) programs. A maximum of three credits may be counted toward graduation.

Pre-requisite(s): Permission from the department.

ECE 6900 - Special Topics

Credits: (1-4)

Variable Title

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A one-time special study course designed to introduce a new relevant topic that is not covered in the Electrical & Computer Engineering programs. Lecture or lecture and lab combination. Laboratory activities support the selected course topic.

May be repeated 10 times and up to 12 credit hours.

ECON 1010 SS - Economics as a Social Science

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

An introduction to basic economic institutions and principles of economics for non-business and non-economics majors. The primary objective of the course is to provide a framework of economic approaches useful in the analysis of social problems. Topics include poverty, economic systems, crime, pollution, health, discrimination, unemployment, inflation, and the role of government in the economy.

ECON 1100 SS - Environmental Issues and Economic Policy

Credits: (3)

An analysis of policies which affect environmental resources. Emphasis on economic analysis of renewable and nonrenewable resources, pollution, and public policy. This course demonstrates economic solutions to environmental problems, and the role economics plays in designing environmental policy.

Note: Check with department for course availability.

ECON 1740 AI - Economic History of the United States**Credits: (3)**

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A critical study of the history of the American Economy, significant events, fundamental principles of a market economy, interactions between government and the market economy, and the evolution of fundamental economic institutions.

ECON 2010 SS - Principles of Microeconomics**Credits: (3)**

Typically Taught Summer Semester: *Full Sem - Online*

Typically Taught Fall Semester: *Full Sem, Full Sem - Online*

Typically Taught Spring Semester: *Full Sem, Full Sem - Online*

The application of economic concepts to the analysis of scarcity of individual, firm, and organizational behavior. Topic coverage includes the theories of how consumers and firms make choices, and how various rules guide their respective decisions. The course also explores the theory of market structures, such as perfect and imperfect competition, as well as monopoly.

Pre-requisite(s): Earn a "C" or better in MATH 1010, MATH 1050, MATH 1080, MATH 1090, or MATH 1210 or; earn a "C" or better in any math course for which either MATH 1010, MATH 1050, MATH 1080, or MATH 1090 is a prerequisite or; score 3 or higher on AP Calculus exam or; score 70 or higher on ACCUPLACER College Level Math (CLM) or; score of 23 or higher on Math ACT or; score of 55 or higher on ALEKS.

ECON 2020 SS - Principles of Macroeconomics**Credits: (3)**

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Analyzes human behavior and choices as they relate to the entire economy, with specific focus on national income measurement, unemployment, inflation, business cycles, global trade, and economic growth. Implications of different government policies, e.g., changes in taxation, government spending, money supply or interest rates for a stable economy and steady growth are explored.

Pre-requisite(s): Earn a "C" or better in MATH 1010, MATH 1050, MATH 1080, MATH 1090, or MATH 1210 or; earn a "C" or better in any math course for which either MATH 1010, MATH 1050, MATH 1080, or MATH 1090 is a prerequisite or; score 3 or higher on AP Calculus exam or; score 70 or higher on ACCUPLACER College Level Math (CLM) or; score of 23 or higher on Math ACT or; score of 55 or higher on ALEKS.

ECON 2899 - Economics Foundations and Admissions Process**Credits: (0)**

Typically Taught Summer Semester: *Full Sem Online*

Typically Taught Fall Semester: *Full Sem Online*

Typically Taught Spring Semester: *Full Sem Online*

Completion of ECON 2899 is required of all non-business Economics students pursuing any major, minor, emphasis or certificate awarded by the John B. Goddard School of Business & Economics. The course objectives are: 1) assessment of Foundation knowledge, and 2) admittance to the Goddard School. Students should register for this course concurrent with (same semester as) their last required Foundation course (ECON 2010, ECON 2020 and QUAN 2600) or after the required Foundation courses have been completed. Students must have an overall GPA of 2.5 or higher and a Foundation GPA of 2.5 or higher and a minimum grade of "C-" in each of the three Foundation courses. *Credit/No credit.*

Pre-requisite/Co-requisite: ECON 2010, ECON 2020, QUAN 2600.

ECON 2920 - Short Courses, Workshops, Institutes, and Special Programs**Credits: (1-3)****Variable Title**

Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript.

May be repeated 5 times with a maximum of 6 credit hours

with different topics.

Note: This course is offered as needed.

ECON 3030 - Managerial Economics

Credits: (3)

This course uses the tools of differential calculus and regression theory to analyze the managerial decisions of individual firms.

Pre-requisite(s): MATH 1050, QUAN 2600, QUAN 3610.

Note: Course not currently being offered.

ECON 3090 - History of Economic Thought

Credits: (3)

This course covers the major concepts and contributions of the scholars of the past in economic doctrine and interpretations.

Pre-requisite(s): ECON 2010, ECON 2020, and MATH 1050 or MATH 1080 or MATH 1210.

Note: Course not currently being offered.

ECON 3110 - International Trade

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

An introduction to the pure theory of trade, international trade agreements and negotiations (e.g., GATT, EU and NAFTA) and the institutions designed to encourage trade. Emphasis on the benefits of free trade as well as the reasons for the existence of trade barriers such as tariffs and quotas. Special topics include trade in agricultural products and international labor migration.

Pre-requisite(s): ECON 2010 and ECON 2020, and earn a "C" or better in MATH 1010, MATH 1050, MATH 1080, MATH 1090, or MATH 1210 or; earn a "C" or better in any math course for which either MATH 1010, MATH 1050, MATH 1080, or MATH 1090 is a prerequisite or; score 3 or higher on AP Calculus exam or; score 70 or higher on ACCUPLACER College Level Math (CLM) or; score of 23 or higher on Math ACT or; score of 55 or higher on ALEKS.

ECON 3120 - International Finance and Monetary Systems

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Applications of the principle of economics to the international monetary system. Special emphasis on the way in which international monetary institutions can facilitate trade. Macroeconomic models of an open economy are used to examine the effect that international trade and financial ties have on the domestic economy. Special topics include institutions such as the World Bank and the IMF, along with regional monetary unification in Europe.

Pre-requisite(s): ECON 2010 and ECON 2020, and earn a "C" or better in MATH 1010, MATH 1050, MATH 1080, MATH 1090, or MATH 1210 or; earn a "C" or better in any math course for which either MATH 1010, MATH 1050, MATH 1080, or MATH 1090 is a prerequisite or; score 3 or higher on AP Calculus exam or; score 70 or higher on ACCUPLACER College Level Math (CLM) or; score of 23 or higher on Math ACT or; score of 55 or higher on ALEKS.

ECON 3150 - Business Studies Abroad-International Finance

Credits: (3)

This course studies the globalization of financial markets and the environment in which international finance takes place, e.g., the international monetary system. With this background, a global financial strategy design for corporations will be discussed. This course is taught at Fachhochschule Hof, Germany during each fall semester. Students enrolled in this course have to participate in the Study Abroad Program (Contact: Doris Geide-Stevenson, ext. 7634, dgsteven@weber.edu).

Note: Check with department for course availability.

ECON 3200 - Money and Banking

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

This course presents a detailed description and economic analysis of the U.S. financial system which includes the banking industry, bond and stock markets, and the Federal Reserve system. This course serves as an extension to the material covered in an introductory macroeconomics course. The enhanced understanding of the workings of the financial system, including the determination of interest rates, will be used to trace out the channels of monetary policy as conducted by the Federal Reserve and the effect of monetary policy on financial markets, such as the stock market.

Pre-requisite(s): ECON 2010 and ECON 2020, and earn a "C" or better in MATH 1010, MATH 1050, MATH 1080, MATH 1090, or MATH 1210 or; earn a "C" or better in any math course for which either MATH 1010, MATH

1050, MATH 1080, or MATH 1090 is a prerequisite or; score 3 or higher on AP Calculus exam or; score 70 or higher on ACCUPLACER College Level Math (CLM) or; score of 23 or higher on Math ACT or; score of 55 or higher on ALEKS.

ECON 3300 - Environmental Economics

Credits: (3)

Typically Taught Spring Semester: *-Every Other - Full Sem*

Environmental Economics applies economic concepts to environmental and resource topics. We will use both standard economic and ecological analyses. Specific topics include externalities, public goods, environmental accounting, nonrenewable and renewable resource use, pollution, and climate change.

Pre-requisite(s): ECON 2010 and earn a "C" or better in MATH 1010, MATH 1050, MATH 1080, MATH 1090, or MATH 1210 or; earn a "C" or better in any math course for which either MATH 1010, MATH 1050, MATH 1080, or MATH 1090 is a prerequisite or; score 3 or higher on AP Calculus exam or; score 70 or higher on ACCUPLACER College Level Math (CLM) or; score of 23 or higher on Math ACT or; score of 55 or higher on ALEKS.

ECON 3400 - Labor Economics

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

The study of labor economics explores choices made by the two sides of the labor market, employers and workers and how these choices interact in determining wage and employment levels. Hence, an important part of the course consists of a detailed analysis of labor demand and supply. This analysis is followed by a discussion of why the labor market often does not clear, i.e., why we observe unemployment. The analysis focuses on special features of the labor market such as minimum wage, labor unions and efficiency wages. Other topics include the effect of education and training on earnings, the optimal incentive structure of an employment contract and determinants of income inequality.

Pre-requisite(s): ECON 2010, and earn a "C" or better in MATH 1010, MATH 1050, MATH 1080, MATH 1090, or MATH 1210 or; earn a "C" or better in any math course for which either MATH 1010, MATH 1050, MATH 1080, or MATH 1090 is a prerequisite or; score 3 or higher on AP Calculus exam or; score 70 or higher on ACCUPLACER College Level Math (CLM) or; score of 23 or higher on Math ACT or; score of 55 or higher on ALEKS.

ECON 3410 - Women in the World Economy

Credits: (3)

Applications of the principles of economics to the analysis of the economic status of women in the U.S. and elsewhere. The focus is on labor markets, income differentials, the tax system and household work. Special consideration is given to women in developing economies.

Pre-requisite(s): ECON 2010 and MATH 1050 or MATH 1080 or MATH 1210.

Note: Course not currently being offered.

ECON 4010 - Intermediate Microeconomic Theory

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

The application of economic concepts to individual and firm behavior, consumer behavior, demand analysis, economics of the firm, and price theory.

Pre-requisite(s): ECON 2010 and ECON 2020 and earn a "C" or better in MATH 1010, MATH 1050, MATH 1080, MATH 1090, or MATH 1210 or; earn a "C" or better in any math course for which either MATH 1010, MATH 1050, MATH 1080, or MATH 1090 is a prerequisite or; score 3 or higher on AP Calculus exam or; score 70 or higher on ACCUPLACER College Level Math (CLM) or; score of 23 or higher on Math ACT or; score of 55 or higher on ALEKS.

ECON 4020 - Intermediate Macroeconomic Theory

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

The building of standard models to test theories of long-run economic performance and short-term fluctuations in closed and open economies. Emphasis is placed on how fiscal and monetary policies encourage long-run growth while mitigating the negative effects of short-term fluctuations.

Pre-requisite(s): ECON 2010, ECON 2020, QUAN 2400, and BSAD 2899 or ECON 2899.

ECON 4170 - Economic Development

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

The application of economic principles to the challenging problems of third world and developing nations including Africa, Asia, Latin America and the newly independent states of the Former Soviet Union and Eastern Europe.

Pre-requisite(s): ECON 2010 and ECON 2020 and earn a "C" or better in MATH 1050, MATH 1080 or MATH 1210 or; earn a "C" or better in any math course for which either MATH 1050 or MATH 1080 is a prerequisite or; score 3 or higher on AP Calculus exam or; score 70 or higher on ACCUPLACER College Level Math (CLM) or; score of 26 or higher on Math ACT or; score of 65 or higher on ALEKS*.

ECON 4320 - Industrial Organization

Credits: (3)

The theory and performance of firms and industries in the context of substantial market power and market regulation. Emphasis on oligopoly, game theory, and theory of markets within the context of global market competition.

Pre-requisite(s): QUAN 2400 or ECON 3030, ECON 2010.

Note: Course not currently being offered.

ECON 4330 - Game Theory

Credits: (3)

Typically Taught Fall Semester: *Every Other - Full Sem*

This course is an introduction to game theory, the study of strategic behavior among parties having opposed, mixed, or similar interests. This course will sharpen your understanding of strategic behavior in encounters with other individuals. You will learn how to recognize and model strategic situations, to predict when and how your actions will influence the decisions of others and to exploit strategic situations for your own benefit.

Pre-requisite(s): ECON 2010 and earn a "C" or better in MATH 1050, MATH 1080 or MATH 1210 or; earn a "C" or better in any math course for which either MATH 1050 or MATH 1080 or MATH 1090 is a prerequisite or; score 3 or higher on AP Calculus exam or; score 70 or higher on ACCUPLACER College Level Math (CLM) or; score of 26 or higher on Math ACT or; score of 65 or higher on ALEKS*.

ECON 4520 - Public Finance

Credits: (3)

This course covers the aspects of economic policy that arise in the operations of a public budget. Topics addressed include economic theories of bureaucracy, public expenditures, and taxation.

Pre-requisite(s): ECON 2010, ECON 2020 and MATH 1050 or MATH 1080 or MATH 1210.

Note: Course not currently being offered.

ECON 4550 - Introduction to Econometrics

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Advanced Regression Analysis. Topics include ordinary least squares, generalized least squares, nonlinear regression, dummy variables, autocorrelation, heteroskedasticity, and serial correlation. Computers used extensively.

Pre-requisite(s): ECON 2010, ECON 2020, QUAN 2400, and QUAN 3610.

ECON 4560 - Mathematical Economics

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

Advanced application of mathematical modeling techniques to selected economic issues.

Pre-requisite(s): ECON 4010, ECON 4020, QUAN 2400 or MATH 1210, and QUAN 3610.

ECON 4800 - Independent Research

Credits: (1-3)

Individual work or work in small groups, by arrangement, in special topics not included in the announced course offerings.

Pre-requisite(s): QUAN 3610 and approval of instructor. May be repeated twice with a maximum of 3 credit hours.

Note: This course is offered as needed.

ECON 4810 - Experimental Courses

Credits: (1-3)

Experimental or one-time courses designed to fill a need in the community or investigate interesting and unusual topics. Refer to Experimental Courses.

Pre-requisite(s): ECON 2010, ECON 2020.

May be repeated 5 times with a maximum of 6 credit hours

with different topics.

Note: This course is offered as needed.

ECON 4850 - Economics Study Abroad

Credits: (1-3)

This course is designed for students who will study economics at one of the international partner universities of the Goddard School of Business and Economics as part of an extended study abroad visit. Students will explore the international economic institutions, business culture, and applications of economic theory to countries outside of the US. Students will study international economics as offered through a partner university (or other university with department chair approval).

Pre-requisite(s): ECON 2899 and BSAD 2899.

May be repeated once up to 6 credits.

Note: This course is offered as needed.

ECON 4860 INT - Economics Internship

Credits: (1-3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A structured professional-level field experience. The student will be counseled and supervised as he/she applies and integrates the knowledge and skills obtained through the Business Economics or International Business Economics program courses.

Pre-requisite(s): BSAD 2899; Instructor approval.

ECON 4920 - Short Courses, Workshops, Institutes, and Special Programs

Credits: (1-3)

Variable Title

Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript.

May be repeated 5 times with a maximum of 6 credit hours with different topics.

Note: This course is offered as needed.

ECON 4970 - Introduction to Research Methods

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course prepares students for ECON 4980 Research

Methods. Students will study the research process and the scientific method as it applies to economics. Students will have an opportunity to explore various fields and literature in order to design a thesis project for ECON 4980.

Pre-requisite(s): ECON 2899 or BSAD 2899.

ECON 4980 - Research Methods

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A course designed for senior economics majors which requires the completion of an extensive thesis project. This course will focus on the formulation of hypotheses, review of relevant literature, and either theoretical or empirical analysis.

Pre-requisite(s): ECON 4970, BSAD 2899 or ECON 2899, QUAN 3610, ECON 4010 or ECON 4020.

EDUC 1010 CEL - Exploring Teaching

Credits: (3)

Students will explore the exciting world of teaching, examine what it means to be a teacher, and participate in field observations. This course is designed to introduce students to personal and professional experiences within the educational community.

Pre-requisite(s): This course or an equivalent approved course is a prerequisite to all licensure programs in the Department of Teacher Education.

EDUC 2000 - Social Studies Concepts for Elementary Teachers

Credits: (3)

Fundamental concepts from the social sciences commonly found in elementary social studies curriculum.

Note: This course is not currently offered.

EDUC 2010 CEL - Human Exceptionality

Credits: (3)

Typically Taught Summer Semester: *2nd Blk*

Typically Taught Spring Semester: *Full Sem*

This course will introduce students to the characteristics of exceptional children with emphasis on the educational and psychological implications of disabilities to the development of the child. A minimum grade of C is required in this course.

EDUC 2300 - Global Perspectives on Education and Learning

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course begins by introducing perspectives on globalization and how the globalization process impacts educational policies and practices. We will then discuss three major topics from an international and comparative perspective. These three topics are: 1) educational policies and practices; 2) pedagogies and classroom practices; 3) individual experiences of learning. Case studies will be used to demonstrate different ways to examine how schools teach, as well as how students learn, in various social contexts. Towards the end of the course, students will learn to develop age appropriate pedagogical tools by incorporating global learning perspectives that can be used in K-12 classrooms.

EDUC 2604 - Information Resources in Education

Credits: (1)

Intended for students interested in education, this one-credit hour course will assist in developing information literacy and academic research skills, and an understanding of academic integrity issues unique to the field of education. Students will develop skills in identifying, locating, retrieving, documenting, and critically evaluating both electronic and print resources that are appropriate for undergraduate research, with emphasis in education and related disciplines.

Cross-Listed with LIBS 2604.

EDUC 2890 INT - Cooperative Work Experience

Credits: (1-6)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

For students not yet accepted to the Teacher Education Program who meet the minimum cooperative work experience requirements of the department. Provides academic credit for on-the-job experience. Amount of credit will be determined by the department.

Fingerprinting/ background check must be completed prior to working in the schools.

May be repeated up to 6 credit hours.

EDUC 2920 - Short Courses, Workshops, Institutes and Special Programs

Credits: (1-6)

Variable Title

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

The specific title and credit authorized will appear on the student transcript. May be taken on a Credit/No Credit basis.

May be repeated up to 6 credit hours.

EDUC 3100 - Instructional Planning & Assessment

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course introduces the basic concepts of lesson and unit design, planning and assessment based on student needs. May include field experiences that involve travel to local schools or other relevant destinations.

Pre-requisite(s): Completion of Elementary Education Level 1 courses with a grade of B- or better.

Co-Requisite(s): EDUC 3117, EDUC 3210, EDUC 3230, EDUC 3240, EDUC 4345

EDUC 3110 - Instructional Technology

Credits: (2)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course allows students to apply existing technology literacy into educational environments to promote enhanced learning. The curriculum is based on teacher skills required to teach Utah State Educational Technology Standards for students in K-8 settings. The course focuses on providing teacher licensure candidates with basic technology proficiencies for teaching with technology.

Pre-requisite(s): Completion of the computer and information literacy requirements.

EDUC 3115 - Media Integration in Elementary Education Settings

Credits: (2)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course focuses on how to create media to support and apply research-based principles for learning into educational environments. The course content is based on

Utah core curriculum skills for students in the K-8 setting. The course provides students with technology proficiencies for integrating technology into teaching.

Pre-requisite(s): Admission to Teacher Education. Verification of technology literacy training (through coursework or job experience) within the past five years. Completion of the computer and information literacy requirements and completion of Elementary Education Level 2 courses with a grade of B- or better.

Suggested Requisite(s): This is part of Elementary Education Level 3 and should be taken with EDUC 3280, EDUC 4210, EDUC 4300, EDUC 4320, and EDUC 4330.

EDUC 3117 - Media Integration in Elementary Education Settings 2

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course focuses on integrating media and technology to support and apply research-based principles for learning in educational environments for traditional, blended, and online instruction. Students will continue to develop their skills and knowledge about how to incorporate technology into the curriculum to support meaningful instruction. A variety of technologies will be utilized for designing digital curriculum and developing 21st century standards. The course content is based on Utah core curriculum skills for students in the K-8 setting. May include field experiences that involve travel to local schools or other relevant destinations.

Pre-requisite(s): Successful completion (B- or better) of Elementary/Early Childhood Level 1. This is part of Elementary/Early Childhood Education Level 2 and should be taken with EDUC 3100, EDUC 3210, EDUC 3230, EDUC 3240 and EDUC 4345.

EDUC 3120 - Reading Instruction in the Primary Grades

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course is designed to familiarize the teacher candidate with current knowledge and practices as they relate to teaching literacy (reading, writing, listening, and speaking) in the primary grades (K-2). The focus of this course will be how to apply current literacy research in a primary grade classroom.

Pre-requisite(s): Admission to Teacher Education.

Suggested Requisite(s): This course is part of Elementary

Education Level 1 and should be taken with EDUC 3140, EDUC 3205, EDUC 3270, EDUC 4550.

EDUC 3140 - Educational Psychology, Interpersonal Skills and Classroom Management

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

The focus of this course is the fundamental theories and philosophies, concepts, processes, and applications related to human behavior, teaching and learning, interpersonal relationships, and classroom management.

Pre-requisite(s): Admission to Teacher Education.

Suggested Requisite(s): This course is part of Elementary Education Level 1 and should be taken with EDUC 3120, EDUC 3205, EDUC 3270, EDUC 4550.

EDUC 3205 - Culturally and Linguistically Responsive Teaching

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Rationales, concepts, practices provide a scope of understanding and awareness regarding the role of cultural and language pluralism in school and society. Foundations and theories on the role of family and community influence on student values are also explored. Experiences are provided intended to develop basic skills in personal interaction and adaptation to teaching diverse populations.

Pre-requisite(s): Admission to Teacher Education.

Suggested Requisite(s): This course is part of Elementary Education Level 1 and should be taken with EDUC 3120, EDUC 3140, EDUC 3270, EDUC 4550.

EDUC 3210 INT - Elementary Level II Practicum

Credits: (2)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

The purpose of this practicum is to provide students with opportunities to design and implement integrated instruction in the elementary grades. Instruction will focus on integrating the arts, healthy lifestyles, and literacy. Students are required to spend at least 40 hours in an assigned classroom.

Pre-requisite(s): Admission to Teacher Education. Completion of Elementary Education Level 1

courses with a grade of B- or better.

Suggested Requisite(s): This course is part of Elementary Education Level 2 and should be taken with EDUC 3100, EDUC 3240, EDUC 4345, PEP 3620.

EDUC 3220 - Foundations of Diversity

Credits: (2)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Rationales, concepts, practice provide a scope of understanding and awareness regarding the role of cultural and language pluralism in school and society. Foundations and theories on the role of family and community influence on student values. Experiences intended to develop basic skills in personal interaction and adaptation to teaching diverse populations.

Pre-requisite(s): Admission to Teacher Education.

Suggested Requisite(s): This course is part of the professional core courses and should be taken with EDUC 3265, EDUC 3315, EDUC 3900, EDUC 3910, and EDUC 3935.

EDUC 3230 - Data Analysis for Elementary Teachers and Math Pedagogy

Credits: (2)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course will focus on the study of statistics and probability in the Utah mathematics core (K-8) and appropriate mathematics teaching methods. Emphasis will also be on the developing an understanding of the Standards of Mathematical Practice. Teaching mathematics for deep conceptual understanding and connections to other subject areas and real life situations will be addressed. This course builds upon and will use content learned in MATH 2010, 2015, and 2020. May include field experiences that involve travel to local schools or other relevant destinations.

Pre-requisite(s): Successful completion (B- or better) of Elementary/Early Childhood Level 1. Should be taken with Elementary/Early Childhood Level 2 courses.

EDUC 3240 - Reading Instruction in the Intermediate Grades

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course will provide theories, methods, and

assessments for reading in the elementary school, Grades 3-6. Students will understand reading instruction in relation to the wider processes of literacy and language development to guide elementary students to effectively communicate through oral and written languages for different contexts, which includes text-based and digital environments. The course will also include the contemporary issues on elementary reading instruction. May include field experiences that involve travel to local schools or other relevant destinations.

Pre-requisite(s): Admission to Teacher Education. Completion of Elementary Education Level 1 courses with a grade of B- or better.

Suggested Requisite(s): This course is part of Elementary Education Level 2 and should be taken concurrently with EDUC 3100, EDUC 3210, EDUC 4345, PEP 3620.

EDUC 3265 - The Exceptional Student

Credits: (2)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Students will learn about the learning and social characteristics of young people with exceptionalities-that is, disabilities (physical, mental, learning) or giftedness-and about public policy and services available to them. As future teachers, they will learn about how such individuals are identified and served by the school system, what strategies are effective for instructing them, and roles and responsibilities of school personnel in providing appropriate educational experiences for all students in an inclusive classroom.

Pre-requisite(s): Admission to Teacher Education.

Suggested Requisite(s): This course is part of the professional core courses and should be taken with EDUC 3220, EDUC 3900, EDUC 3315, EDUC 3935, EDUC 3910.

EDUC 3270 - Differentiation and Collaboration for Inclusive Teaching

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

The Individuals with Disabilities Education Improvement Act of 2004 (IDEA-04) mandates that students with disabilities be educated "to the maximum extent appropriate with children who are not disabled." The expectation is that students with disabilities will have access to, and make adequate progress in, the general curriculum. Therefore, it is essential for general educators and special educators to work collaboratively. This course is designed to provide preservice teachers with the

knowledge and skills of effective inclusive teaching practices.

Pre-requisite(s): Admission to Teacher Education and EDUC 2010.

Suggested Requisite(s): This course is part of Elementary Education Level 1 and should be taken concurrently with EDUC 3120, EDUC 3140, EDUC 3205, EDUC 4550.

EDUC 3280 - Elementary Social Studies Methods

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course focuses on the place of social studies in the elementary school curriculum, the scope and rationale of the social studies curriculum, connections with other subject areas, teaching and assessment strategies, and building classroom community.

Pre-requisite(s): Admission to Teacher Education. Completion of Elementary Education Level 2 courses with a grade of B- or better.

Suggested Requisite(s): This course is part of Elementary Education Level 3 and should be taken with EDUC 3115, EDUC 4210, EDUC 4300, EDUC 4320, EDUC 4330.

EDUC 3300 - Introduction to International Education: Case Studies

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course uses case studies of education systems and practices from Japan, China, South Korea, Finland, Cuba, Germany, Poland, and the U.S. to demonstrate the interactions of social-cultural contexts, school policies and practices, as well as the individuals' learning processes. Theories of and perspectives on examining educational policies and practices will be introduced throughout the class along with case studies covering a diverse range of contexts. The class will be a mix of lectures, discussions, and in-class demonstrations, so students will have many opportunities to actively engage with the material in multiple ways. Students will also have opportunities to discuss educational issues with college students from China, Japan, India and Singapore via a virtual platform.

EDUC 3315 - Media Integration in the Secondary School Setting

Credits: (2)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course focuses on how to create media to support and apply research-based principles for learning into the educational environments. The curriculum is based on Core Curriculum skills for students in grades 9-12. The course content provides teacher licensure candidates with technology proficiencies for integrating technology into teaching.

Pre-requisite(s): Admission to Teacher Education. Verification of technology literacy training (through coursework or job experience) within the past five years. Completion of the computer and information literacy requirements.

Suggested Requisite(s): This course is part of the professional core courses and should be taken with EDUC 3220, EDUC 3265, EDUC 3900, EDUC 3910, EDUC 3935.

EDUC 3370 - Advanced Instructional Technology

Credits: (2)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course allows students to apply existing technology literacy into educational environments to promote advanced use of educational technology in learning environments. The curriculum is based on teacher skills required to teach Utah State Educational Technology Standards for students in K-6 settings. The course focuses on providing teacher licensure candidates with advanced technology proficiencies for teaching with technology.

Pre-requisite(s): Verification of technology literacy training (through coursework or job experience) within the past five years. Completion of the computer and information literacy requirements.

EDUC 3371 - Assistive Technology

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course provides students with an understanding of the use of assistive technology for students with disabilities. Students will learn to assess student assistive technology needs, identify assistive technology used to provide students access to educational opportunities, and application of assistive technology in instructional programs, career tasks, and life skills for individuals with disabilities.

EDUC 3375 - Foundations of Dual Immersion or Immersion Education

Credits: (3)

The course examines the background, underlying theory, and research foundations that support dual language and immersion education practices. Issues for teachers and administrators will be addressed. Practices and principles that inform language attentive curriculum will be a focus of the course.

EDUC 3390 - Literacy in the Primary Grades

Credits: (2)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Analysis of developmental reading skills with emphasis on readiness for reading, phonic and structural analysis, word recognition, use of the basal reader, and reading for various purposes.

EDUC 3430 - Creative Processes in the Elementary School

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$15.00

This course focuses on the development of attitudes, methods, and skills in creative teaching, including an exploration of using music, art, dance, and drama in the elementary classroom. Graduate students will also explore philosophy, research, and theories that support arts integration, and development of teaching strategies and materials for use in the elementary classroom.

EDUC 3535 - IEP and Instructional Planning

Credits: (2)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course provides prospective special education teachers with a curriculum analysis process for determining appropriate educational opportunities for students with IEPs. In addition, prospective teachers will examine strategies for content area instruction and consider a wide range of accommodations and adaptations used to support

students with disabilities in the general education classroom.

EDUC 3545 - Universal Positive Behavior Support Strategies for Teachers

Credits: (2)

Typically Taught Spring Semester: *Full Sem*

This course is designed to teach teacher candidates validated classroom management strategies and level one behavioral intervention strategies. This course focuses on techniques and methods for preventative classroom student management. The course will assist candidates in writing effective classroom management plans. Candidates will be introduced to the process of Functional Behavior Assessments and Behavior Intervention Plans.

Pre-requisite(s): Completion of Education Level 1 courses with a grade of B- or better.

Co-Requisite(s): EDUC 3565 , EDUC 3575 , EDUC 4515, EDUC 4521, EDUC 4530.

EDUC 3565 - Elementary English Language Arts: Evaluation, Remediation and Supports

Credits: (2)

Typically Taught Spring Semester: *Full Sem*

This course is designed to teach teacher candidates validated evaluation and remediation strategies for K-5 students struggling in English Language Arts, focusing on techniques in elementary reading, writing, speaking, listening, and language. Candidates will be introduced to the process of identifying reading and writing difficulties, selecting evidence-based interventions, implementing instruction, and using the data-based instructional decision model to monitor students' ELA progress and intervention effectiveness.

Pre-requisite(s): Completion of Education Level 1 courses with a grade of B- or better.

Co-Requisite(s): This course is part of Special Education Block 2 courses and should be taken with EDUC 3545, EDUC 3575 , EDUC 4515, EDUC 4521, EDUC 4530.

EDUC 3575 - Elementary Mathematics: Evaluation, Remediation and Supports

Credits: (2)

Typically Taught Spring Semester: *Full Sem*

This course is designed to teach teacher candidates validated evaluation and remediation strategies for K-5 students struggling in mathematics. This course focuses on

techniques in elementary mathematics. Candidates will be introduced to the process of identifying math difficulties, selecting evidence based interventions, implementing instruction, and using the data-based instructional decision model to monitor students' math progress and intervention effectiveness.

Pre-requisite(s): MATH 2010. Completion of Education Level 1 courses with a grade of B- or better.

Co-Requisite(s): This course is part of Special Education Block 2 courses and should be taken with EDUC 3545, EDUC 3565, EDUC 4515, EDUC 4521, EDUC 4530.

EDUC 3585 - Working with Students with ELA or Math Disabilities in Inclusion Settings

Credits: (3)

This course is designed to teach pre-service teachers validated accommodations and supports for K-12 students with disabilities struggling in English Language Arts (ELA) and/or Math in inclusive settings, specifically focusing on reading, writing, speaking, listening, language, and math.

Pre-requisite(s): MATH 2010, successful completion of Education Level 1 (EDUC 3120, EDUC 3140, EDUC 3205, EDUC 3270, EDUC 3115).

Co-Requisite(s): EDUC 3371, EDUC 3545, EDUC 4521, EDUC 4535, EDUC 4580.

EDUC 3590 - Working with Students with ELA or Math Disabilities in Resource Settings

Credits: (3)

Typically Taught Fall Semester: Full Sem

This course is designed to teach pre-service teachers validated evaluation and remediation strategies for K-12 students with disabilities in English Language Arts and/or math, focusing on identifying deficits and designing and disseminating evidence-based remediation plans.

Pre-requisite(s): MATH 2020, successful completion of level two (EDUC 3371, EDUC 3545, EDUC 3585, EDUC 4521, EDUC 4535, EDUC 4580).

Co-Requisite(s): EDUC 4515, EDUC 4530, EDUC 4545, EDUC 4582.

EDUC 3900 - Preparing, Teaching, and Assessing Instruction

Credits: (2)

Typically Taught Fall Semester: Full Sem

Typically Taught Spring Semester: Full Sem

This integrated course will focus on lesson planning, teaching, and assessment through the application of the Teacher Work Sample (TWS) using lesson plan formats taught in the content areas. A variety of instructional strategies effective for use at the secondary level will be taught and modeled.

Pre-requisite(s): Admission to Teacher Education.

Suggested Requisite(s): This course is part of the professional core courses and should be taken with EDUC 3220, EDUC 3315, EDUC 3265, EDUC 3910, and EDUC 3935.

EDUC 3910 INT - Secondary Education Practicum

Credits: (2)

The purpose of this practicum is to provide students with opportunities to design and implement content-specific instruction at the secondary level. Students are required to spend at least 40 hours in an assigned classroom.

Pre-requisite(s): Admission to Teacher Education.

Suggested Requisite(s): This course is part of the professional core courses and should be taken with EDUC 3220, EDUC 3265, EDUC 3315, EDUC 3900, EDUC 3935.

EDUC 3935 - Reading and Writing Across the Secondary Curriculum

Credits: (2)

Typically Taught Fall Semester: Full Sem

Typically Taught Spring Semester: Full Sem

This course will focus on assessment of reading comprehension of students, and decisions teachers make concerning methods, materials and procedures based on those assessments. Teacher candidates will integrate literacy skills (vocabulary, study skills, comprehension development and writing) within their respective content areas and teach sample lessons to secondary students.

Pre-requisite(s): Admission to Teacher Education.

Suggested Requisite(s): This course is part of the professional core courses and should be taken with EDUC 3220, EDUC 3265, EDUC 3315, EDUC 3900, EDUC 3910.

EDUC 4210 INT - Elementary Level III Practicum

Credits: (3)

Typically Taught Fall Semester: Full Sem

Typically Taught Spring Semester: Full Sem

The purpose of this practicum is to provide students with opportunities to design and implement integrated instruction in the elementary grades. Instruction will focus on instruction of core subjects including language arts, mathematics, science, and social studies. Students are required to spend at least 60 hours in an assigned classroom.

Pre-requisite(s): Admission to Teacher Education. Completion of Elementary Education Level 2 courses with a grade of B- or better.

Suggested Requisite(s): This course is part of Elementary Education Level 3 and should be taken with EDUC 3115, EDUC 3280, EDUC 4300, EDUC 4320, EDUC 4330.

EDUC 4250 - Second Language Acquisition: Theories and Implementation

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

This course explores second language acquisition processes, current theories, and effective strategies as a knowledge base in planning appropriate curriculum and instruction for English language learners.

EDUC 4270 - Literacy Strategies for Teaching English Language Learners

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

This course will examine literacy strategies for English Language Learners. Teacher candidates will learn how to apply literacy strategies to teach reading, writing, listening and speaking skills, while including culture, to scaffold language development in both the second language and mainstream classrooms.

EDUC 4300 - Elementary Mathematics Methods

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course includes the study of mathematics methods appropriate for elementary school curriculum with specific emphasis on developmental strategies including the concrete-representational-abstract instructional model. Connections to other subject areas, problem solving, critical thinking skills and real-life situations are stressed.

Pre-requisite(s): Completion of Elementary Education Level 2 courses with a grade of B- or better.

Suggested Requisite(s): This course is part of Elementary Education Level 3 and should be taken with EDUC 3115, EDUC 3280, EDUC 4210, EDUC 4320, EDUC 4330.

EDUC 4310 - Foundations of Cooperative Learning

Credits: (2)

This course examines the rational, principles, skills and interaction strategies necessary before implementing Cooperative Learning in the classroom. Emphasis will be upon the basic components of Cooperative Learning, team building, and simple teamwork. Methods and strategies will be demonstrated and will involve active student group participation.

EDUC 4320 - Elementary Language Arts Methods

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course focuses on methods for language arts instruction in the elementary setting with specific emphasis on writing strategies. Particular emphasis is given to models of research-based instruction of core curriculum in language art.

Pre-requisite(s): Completion of Elementary Education Level 2 courses with a grade of B- or better.

Suggested Requisite(s): This course is part of Elementary Education Level 3 and should be taken with EDUC 3115, EDUC 3280, EDUC 4210, EDUC 4300, EDUC 4330.

EDUC 4330 - Elementary Science Methods

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course focuses on methods and materials for teaching hands-on guided discovery science with an emphasis on concepts included in the Utah core curriculum.

Pre-requisite(s): Completion of Elementary Education Level 2 courses with a grade of B- or better.

Suggested Requisite(s): This course is part of Elementary Education Level 3 and should be taken with EDUC 3115, EDUC 3280, EDUC 4210, EDUC 4300, EDUC 4320.

EDUC 4345 - Elementary Integrated Arts Methods

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course is designed to prepare students to successfully teach art and music in the elementary classroom. Students are expected to design, prepare and teach lessons to engage elementary students in art and music activities. May include field experiences that involve travel to local schools or other relevant destinations.

Pre-requisite(s): Admission to Teacher Education. Completion of Elementary Education Level 1 courses with a grade of B- or better.

Suggested Requisite(s): This course is part of Elementary Education Level 2 and should be taken with EDUC 3100, EDUC 3210, EDUC 3240, PEP 3620.

EDUC 4350 - Elementary Mathematics Pedagogy

Credits: (2)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course will focus on the study of appropriate mathematics teaching methods for the Utah core curriculum. Emphasis will be on teaching mathematics for deep conceptual understanding and connections to other subject areas and real life situations. Students will practice teaching mathematics using content from the K-8 Utah Mathematics Core.

Pre-requisite(s): EDUC 3230.

EDUC 4380 - Student Teaching in Elementary Education

Credits: (4)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Student teaching experience in elementary public school setting plus weekly seminar on campus. Offered CR/NC only. Can be repeated one time.

Pre-requisite(s): EDUC Level 3 (EDUC 3116 , EDUC 3117, EDUC 3280, EDUC 4210, EDUC 4300, EDUC 4320, EDUC 4330) and permission of Field Experience Director.

Suggested Requisite(s): Should be taken concurrently with EDUC 4950 the first time.

EDUC 4400 - International Education Experiences: Study Abroad

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This is a study abroad course led by two faculty members from Moyes College of Education. The class will visit various kinds of schools, interview teachers, students and parents, as well as study the socio-cultural contexts of a certain country or region. We expect the learning to occur during the lectures conducted by WSU faculty, the observations of the classes in the schools, visits to the schools and other educational/cultural sites, communications between students and school teachers and administrators in a certain country, as well as reflection sessions led by WSU faculty. The country covered by this course may change from year to year. Examples of countries include Nordic countries (Finland, Sweden, and Estonia) or selected South Asian countries (Singapore and Vietnam).

EDUC 4415 - Content-Based Second Language Curriculum, Instruction and Assessment

Credits: (3)

Participants in this course learn to plan curriculum and instruction for dual language and immersion classrooms that combine language and content goals using standards-based and backwards design approaches. They also learn a range of classroom-based strategies for assessing language and content.

EDUC 4420 - Foundations of Education of the Gifted

Credits: (2)

An overview of education for the gifted and talented; historical and philosophical background; characteristics, needs, and developmental patterns of the gifted; issues in identification, differentiating curriculum, and educational program options; special populations of gifted students. Note: This course is not currently offered.

EDUC 4450 - Creativity and Applied Imagination in the K-12 Classroom

Credits: (2)

Exploration and development of readily available personal and community resources to encourage creative thinking, classroom involvement, and transfer of learning. Note: This course is not currently offered.

EDUC 4470 - Teaching for Thinking

Credits: (2)

Theory and practice for teaching thinking skills in elementary, middle, and high school classrooms.

Pre-requisite(s): Admission to Teacher Education and EDUC 3140 or equivalent.

Note: This course is not currently offered.

EDUC 4480 - Differentiated Curriculum for the Gifted and Talented

Credits: (3)

Curriculum theories and educational strategies for educating gifted and talented students. A practical course, with special attention to the development of instructional materials appropriate for use by gifted students in special programs as well as in the regular classroom.

Note: This course is not currently offered.

EDUC 4490 - Assessment and Evaluation in Education of the Gifted

Credits: (3)

Principles of assessment applied to: identification of gifted and talented students including identification of gifted in minority populations, diagnosis of student learning needs, learning styles, evaluation of student progress, and evaluation of program effectiveness.

Note: This course is not currently offered.

EDUC 4510 - Foundations in Special Education Practice and Law

Credits: (3)

Typically Taught Fall Semester: Full Sem

This course will introduce students to the philosophical, historical, legal and ethical foundations of special education. Students will examine in depth the characteristics of exceptional learners.

Pre-requisite(s): Admission to Teacher Education, EDUC 2010.

EDUC 4515 - IEP Planning and Special Education Law

Credits: (4)

Typically Taught Fall Semester: Full Sem

This course provides students with a broad knowledge and understanding of a wide range of legal issues concerning the provision of special education services to students with disabilities. A review of pertinent legislation concerning human and constitutional rights related to persons with

disabilities will be addressed. Teachers' specific responsibilities and liabilities are described and related to current requirements for development of appropriate educational programs.

Pre-requisite(s): Completion of Special Education Level 2 courses with a grade of B- or better.

Co-Requisite(s): This course is part of Special Education Level 3 courses and should be taken with EDUC 3590, EDUC 4545, EDUC 4530, EDUC 4582.

EDUC 4520 - Collaboration, Consultation, and IEP Development

Credits: (3)

Typically Taught Fall Semester: Full Sem

Roles of the special educator and families. IEP development, Least Restrictive environment, managing multidisciplinary team activities and techniques of collaboration and consultation.

Pre-requisite(s): Admission to Teacher Education.

EDUC 4521 - Practicum in Special Education A

Credits: (3)

Typically Taught Spring Semester: Full Sem

The purpose of this practicum is to provide teacher candidates with opportunities to implement content-specific instruction and demonstrate quality inclusion strategies while working with students in special education. Teacher candidates are required to spend at least 60 hours in an assigned classroom.

Pre-requisite(s): Completion of Special Education Block 1 Foundation courses with a grade of B- or better.

Co-Requisite(s): This course is part of Special Education Block 2 courses and should be taken with EDUC 3545, EDUC 3585, EDUC 4535, EDUC 3371, EDUC 4580.

EDUC 4530 - Principles and Applications of Special Education Assessment

Credits: (3)

Typically Taught Fall Semester: Full Sem

Typically Taught Spring Semester: Full Sem

Administer, score, and interpret norm-referenced assessments instruments, analyze in combination with data from other assessment processes, and use to determine eligibility and develop educational programs. Requires passing Block 1 with a B- or better.

Suggested Requisite(s): This course is part of Special

Education Block 3 courses and should be taken with EDUC 4545, EDUC 4565, EDUC 4575, EDUC 4580.

EDUC 4535 - Strategic Plan for Disability

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

This course is designed to instruct students in methods to successfully facilitate the inclusion of students with disabilities in the general education classroom. Strategies will be given for how to initiate, grow, and sustain, effective collaborative educational environments, utilize specifically designed instruction, and develop targeted accommodations and modifications that can be efficiently delivered in general education environments to create meaningful access for students with disabilities.

Pre-requisite(s): Completion of Education Level 1 courses with a grade of B- or better.

Co-Requisite(s): This course is part of Special Education Level 2 courses and should be taken with EDUC 3371, EDUC 3545, EDUC 3585, EDUC 4521, and EDUC 4580.

EDUC 4540 - Managing Student Behavior

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Current issues, practices, and application of a variety of approaches for behavior change, discipline and management of the classroom environment, and the teaching of appropriate social skills.

Suggested Requisite(s): This course is part of Special Education Block 1 courses and should be taken with EDUC 4521, EDUC 4530, EDUC 4550, EDUC 4560.

EDUC 4545 - Individualized Behavioral Strategies Using Applied Behavior Analysis

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

This course is designed to teach teacher candidates validated individual behavioral intervention strategies, particularly those designed to meet the needs of students with severe behavioral and social skill deficits. This course will address the needs of those candidates using Applied Behavior Analysis. Candidates will conduct functional assessments and write and implement a function-based behavior intervention plan.

Pre-requisite(s): Completion of Education Level 2 courses with a grade of B- or better.

Co-Requisite(s): This course is part of Special Education

Block 3 Advanced Methods and should be taken with EDUC 3590, EDUC 4515, EDUC 4530, EDUC 4582.

EDUC 4550 - Instructional Planning and Learning Environments for Special Education Students

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Instructional programming and modification of curriculum for students with disabilities served by teachers with Mild/Moderate Endorsements.

Pre-requisite(s): Admission to Teacher Education.

Suggested Requisite(s): This course is part of Elementary Education Level 1 and should be taken with EDUC 3120, EDUC 3140, EDUC 3205, EDUC 3270.

EDUC 4555 - Validated Instructional Methods: Reading

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course is designed to introduce principles and validated strategies for teaching reading to students with mild/moderate disabilities. The course will cover student characteristics and school setting demands that contribute to lack of success in reading.

Pre-requisite(s): Completion of Special Education Block 2 Integrated Methods courses with a grade of B- or better.

Suggested Requisite(s): This course is part of Special Education Block 3 Advanced Methods courses and should be taken with EDUC 4570, EDUC 4580, EDUC 4581.

EDUC 4560 - Validated Instructional Methods: Mathematics

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course is designed to introduce principles and techniques for diagnosis and remediation of mathematics problems. The course will cover student characteristics and school setting demands that contribute to lack of success in mathematics classrooms.

Pre-requisite(s): Completion of Special Education Block 1 Foundation courses with a grade of B- or better.

Suggested Requisite(s): This course is part of Special Education Block 2 Integrated Methods courses and should

be taken with EDUC 4521, EDUC 4530, EDUC 4540, EDUC 4550.

EDUC 4570 - Validated Instructional Methods: Written Expression

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course is designed to introduce principles and validated strategies for teaching written expression to students with mild/moderate disabilities. The course will cover student characteristics and school setting demands that contribute to lack of success in written expression.

Pre-requisite(s): EDUC 4530.

Co-Requisite(s): EDUC 4581.

Suggested Requisite(s): This course is part of Special Education Block 3 Advanced Methods courses and should be taken with EDUC 4555, EDUC 4580, EDUC 4581.

EDUC 4580 - Instructional and Transition Planning for Special Education Students

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

Instructional programming and modification of curriculum for students with disabilities served by teachers with Mild/Moderate Endorsements.

Pre-requisite(s): Completion of Education Level 1 courses with a grade of B- or better.

Co-Requisite(s): This course is part of Special Education Level 2 courses and should be taken with EDUC 3371, EDUC 3545, EDUC 3585, EDUC 4521, and EDUC 4535.

EDUC 4581 - Pre-Student Teaching in Special Education: Assessment, Behavior Management, Instruction

Credits: (4)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

The purpose of Pre-Student Teaching is to continue field experience in a supportive and professional manner. The student will have the opportunity to experience teaching and the responsibilities that it entails under the direct guidance of the Cooperating Teacher and the Course Instructor. This course is designed to provide students with practical experiences in the areas of: a) literacy curriculum and instruction for students K-12, and (b) planning and developing post secondary transition plans. Practical experience in assessment and behavior management are

continued.

Pre-requisite(s): Completion of Special Education Block 2 Integrated Methods courses with a grade of B- or better.

Suggested Requisite(s): This course is part of Special Education Block 3 Advanced Methods courses and should be taken with EDUC 4555, EDUC 4570, EDUC 4580.

EDUC 4582 INT - Practicum in Special Education B

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

The purpose of this practicum is to provide teacher candidates with opportunities to implement content-specific instruction and demonstrate quality instruction while working in special education and/or general education classrooms.

Pre-requisite(s): Completion of Education Level 2 courses with a grade of B- or better.

Co-Requisite(s): This course is part of Special Education Block 3 Advanced Methods and should be taken with EDUC 4545, EDUC 4515, EDUC 4530, and EDUC 3590.

EDUC 4640 - Validated Instructional Methods: Mathematics

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course is designed to introduce principles and techniques for diagnosis and remediation of mathematics problems. The course will cover student characteristics and school setting demands that contribute to lack of success in mathematics classrooms.

EDUC 4650 - Validated Instructional Methods: Reading

Credits: (4)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course is designed to introduce principles and validated strategies for teaching reading to students with mild/moderate disabilities. The course will cover student characteristics and school setting demands that contribute to lack of success in reading.

EDUC 4660 - Validated Instructional Methods: Written Expression

Credits: (4)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course is designed to introduce principles and validated strategies for teaching written expression to students with mild/moderate disabilities. The course will cover student characteristics and school setting demands that contribute to lack of success in written expression.

EDUC 4670 - Special Education Student Teaching

Credits: (4)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Supervised teaching in selected special education programs in an elementary or secondary school. Available on a CR/NC basis only.

Pre-requisite(s): successful completion of mild/moderate licensure course work and permission of the Field Experience Director. Can be repeated one time. Should be taken concurrently with EDUC 4686 the first time. May be repeated 99 times.

EDUC 4680 INT - Special Education Student Teaching

Credits: (8)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Supervised clinical practice in an elementary or secondary school at which candidates teach pupils with mild/moderate disabilities. Available on a CR/NC basis only.

Pre-requisite(s): Successful completion of Special Education major requirements, EDUC 4581, EDUC 4570 with B- or above.

Co-Requisite(s): Must be taken concurrently with EDUC 4686.

EDUC 4685 - Special Education Student Teaching Seminar and Synthesis

Credits: (1)

The Seminar and Synthesis will support student teaching through regular meetings.

Pre-requisite(s): Successful completion of Special Education Licensure requirements.

Co-Requisite(s): Must be taken concurrently with EDUC 4670.

Note: This course is available to non-majors.

EDUC 4686 - Special Education Student Teaching Seminar & Synthesis for Special Education Majors

Credits: (4)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

The Seminar and Synthesis will support student teaching through regular meetings on campus.

Pre-requisite(s): SPED Levels 1-3 (EDUC 3116 , EDUC 3120, EDUC 3140, EDUC 3205, EDUC 3270, EDUC 3371, EDUC 3535 , EDUC 3545, EDUC 3565 , EDUC 3575 , EDUC 4515, EDUC 4521, EDUC 4530, EDUC 4535, EDUC 4545, EDUC 4565 , EDUC 4575 , EDUC 4580, EDUC 4582) and approval by student teaching director.

Co-Requisite(s): EDUC 4680.

EDUC 4700 - Learning in the Schools

Credits: (2)

Principles of learning and management and their application to the school situation.

Pre-requisite(s): Student teaching.

EDUC 4740 - Building School Partnerships with ESL/Bilingual Families

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course prepares students to be advocates and practitioners of family involvement in education. Goals and benefits of family involvement will be explored along with specific strategies for developing a partnership within the education system. Components of family structure, economics, cultural diversity, second-language learners, communication skills and resources are integrated into the student experience.

EDUC 4820E - Managing Diverse Classrooms

Credits: (3)

Current issues, methodology and application of a variety of approaches for behavioral change, discipline and management of diverse learners in the context of classroom environments.

Pre-requisite(s): Teacher Education Level 3 Elementary (EDUC 4300, EDUC 4320 or EDUC 4350 if previously taken, EDUC 4330, EDUC 4345).

Suggested Requisite(s): Should be taken concurrently with the other courses in Teacher Education Level 4 Elementary (EDUC 4840A/B, EDUC 4860).

Note: This course is not currently offered.

EDUC 4820S - Managing Diverse Classrooms

Credits: (3)

Current issues, methodology and application of a variety of approaches for behavioral change, discipline and management of diverse learners in the context of classroom environments.

Pre-requisite(s): Secondary Teacher Education Core (EDUC 3220, EDUC 3900, and EDUC 3935).

Note: This course is not currently offered.

EDUC 4830 - Individually Prescribed Program

Credits: (1-6)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Designed primarily for individual needs.

May be repeated up to 6 credit hours.

EDUC 4840A/B INT - Student Teaching in Elementary Education

Credits: (8)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Student teaching experience in a public school to synthesize theory and practice. Support seminars held on campus. Available on a CR/NC basis only.

Pre-requisite(s): EDUC Levels 1-3 (EDUC 3100, EDUC 3116, EDUC 3117, EDUC 3120, EDUC 3140, EDUC 3205, EDUC 3210, EDUC 3230, EDUC 3240, EDUC 3270, EDUC 3280, EDUC 4210, EDUC 4320, EDUC 4330, EDUC 4345, EDUC 4350, PEP 3620) and permission of the Field Experience Director.

Suggested Requisite(s): Should be taken concurrently with EDUC 4850.

May be repeated 99 times.

EDUC 4850 - Integrated Elementary Education Student Teaching Seminar and Synthesis

Credits: (4)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course will help prepare teacher candidates for student teaching and ultimately licensure with two different types of activities. First, are weekly, 3-hour collaboration and topical seminars emphasizing on-going discussions and support on classroom management, preparing the TWS and INTASC portfolio, creating your career file, and other education issues. Second, is a two-day workshop to synthesize the semester and have your INTASC portfolio assessed.

Pre-requisite(s): EDUC 4300, EDUC 4320, EDUC 4330, and EDUC 4345.

Suggested Requisite(s): (Should be taken concurrently with EDUC 4840A/B.)

EDUC 4860 - Elementary Senior Synthesis Seminar

Credits: (1)

Synthesis of the TREC model for elementary programs with specific emphasis on beginning a professional career in teaching. Senior project is required. To be taken for CR/NC only.

Pre-requisite(s): Teacher Education Level 3 Elementary (EDUC 4300, EDUC 4320 or EDUC 4350 if previously taken, EDUC 4330, EDUC 4345).

Suggested Requisite(s): Should be taken concurrently with the other courses in Teacher Education Level 4 Elementary (EDUC 4820E, EDUC 4840A/B).

Note: This course is not currently offered.

EDUC 4870 - Directed Experiences with Students

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Directed experiences with elementary and secondary school students in cooperating schools.

Students may register for one unit of credit per semester for a maximum of three semester hours.

EDUC 4890 INT - Cooperative Work Experience

Credits: (1-6)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

For students accepted to the Teacher Education Program who meet the minimum cooperative work experience

requirements of the department. Provides academic credit for on-the-job experience. Amount of credit will be determined by the department. Fingerprinting/background check must be completed prior to working in the schools. May be repeated up to 6 credit hours.

EDUC 4920 - Short Courses, Workshops, Institutes and Special Programs

Credits: (1-6)

Variable Title

The specific title and credit authorized will appear on the student transcript. Available on CR/NC basis.

May be repeated up to 6 credit hours.

Note: Consult the semester class schedule for the current offering under this number.

EDUC 4930 - Student Teaching in Secondary Education

Credits: (4)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Student teaching experience in secondary public school setting plus weekly seminar on campus. Offered CR/NC only.

Pre-requisite(s): Secondary Teacher Education Core (EDUC 3220, EDUC 3265, EDUC 3315, EDUC 3900, EDUC 3910, EDUC 3935) and permission of the Field Experience Director. Can be repeated one time.

Suggested Requisite(s): Should be taken concurrently with EDUC 4950 the first time.

EDUC 4940 INT - Student Teaching in Secondary Education

Credits: (8)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Student teaching experience in a public school to synthesize theory and practice. Support seminars held on campus. Available on a CR/NC basis only.

Pre-requisite(s): Secondary Teacher Education Core (EDUC 3220, EDUC 3265, EDUC 3315, EDUC 3900, EDUC 3910, EDUC 3935).

Suggested Requisite(s): Should be taken concurrently with EDUC 4950 Integrated Secondary Student Teaching Seminar.

EDUC 4950 - Integrated Secondary Student Teaching Seminar

Credits: (4)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Preparation and support for secondary clinical practice. Collaborative and topical seminars will emphasize on-going discussions and support on classroom management, ethics, preparing the TWS and INTASC portfolio, creating a career file, and secondary school issues.

Pre-requisite(s): Completion of Secondary Teacher Education Core (EDUC 3220, EDUC 3265, EDUC 3315, EDUC 3900, EDUC 3910, EDUC 3935).

Suggested Requisite(s): Should be taken concurrently with Student Teaching in Secondary Education (EDUC 4930 or EDUC 4940).

EDUC 4960 - Secondary Senior Synthesis Seminar

Credits: (1)

Synthesis of the TREC Model for elementary and secondary programs with specific emphasis on beginning a professional career in teaching. Senior Project is required.

Suggested Requisite(s): Should be taken concurrently with EDUC 4820S and EDUC 4840A/B.

Note: This course is not currently offered.

EDUC 5050 - Action Research in the Classroom

Credits: (2)

Students will explore effective classroom-based research techniques, complete a classroom-based case study, and promote the ongoing application of research to the improvement of teaching practice. This course is designed for cooperating teachers in the site-based teacher education program, and is graded CR/NC.

Note: This course is offered as needed.

EDUC 5060 - Effective Mentoring in the Classroom

Credits: (2)

Course covers strategies for effectively mentoring student teachers and novice teachers by expert teachers. Expectations for the course include journal keeping, writing assignments, and mentoring project.

Note: This course is offered as needed.

EDUC 5110 - Advanced Multicultural/Bilingual Education

Credits: (3)

Provides a knowledge base concerning the curricular issues and need for multicultural education, and explores various curriculum models and approaches for successful implementation of multicultural education across the curriculum.

EDUC 5120 - Culture and Language**Credits: (3)**

Examines the effects and impact of historical, political, social, and economic issues which affect teaching and learning for students from diverse cultural and ethnic groups.

EDUC 5320 - Reading in the Content Areas**Credits: (3)**

Use of reading as an effective means to help students comprehend their course material. Explores how to incorporate these skills into the curriculum of the content areas.

EDUC 5330 - Using Children's Literature in the Classroom**Credits: (2)**

This course will provide a broad basis for using children's literature for instructional purposes in elementary classrooms to enhance literacy development.

EDUC 5340 - Assessment and Corrective Procedures in Reading**Credits: (3)**

Assessment of reading problems and corrective procedures for remediation in elementary classrooms.

EDUC 5360 - Literacy in the Elementary School**Credits: (3)**

An exploration of current reading, oral and written language theories, and their applications for the improvement of literacy practices in schools.

EDUC 5770 INT - Field Experience in ESL/Bilingual Education**Credits: (2)**

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Students will gain experience in teaching and working with ESL/bilingual students and apply what they have learned from relevant courses.

EDUC 5920 - Short Courses, Workshops, Institutes and Special Programs**Credits: (1-3)****Variable Title**

The specific title and credit authorized will appear on the student transcript. Available on CR/NC basis.

May be repeated up to 18 credit hours.

Note: Consult the semester class schedule for the current offering under this number.

EDUC 5920G - Short Courses, Workshops, Institutes and Special Programs**Credits: (1-3)****Variable Title**

The specific title and credit authorized will appear on the student transcript. Available on CR/NC basis. For graduate students.

May be repeated up to 18 credit hours.

Note: Consult the semester class schedule for the current offering under this number.

EEN 1200 - Introduction to Energy Engineering**Credits: (2)**

Introduction to the field of energy engineering. Energy sources, electrical power generation, renewable and non-renewable energy, environmental and economic issues, the energy future.

Pre-requisite(s): ENGR 1000 and PHYS 2210.

EEN 2600 - Engineering Economics**Credits: (3)**

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Emphasizes the systematic evaluation of the costs and benefits of engineering solutions. Topics include equivalence, simple and compound interest, cash flow diagrams, present worth, equivalent uniform annual worth, rate of return, payback period, depreciation, income taxes,

and inflation.

Pre-requisite(s): MATH 1050 or equivalent placement.

EEN 3000 - Design, Ethics & Entrepreneurship

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Fundamentals of the engineering design process. Design modeling, simulation, documentation and communication. Engineering ethics and entrepreneurship.

Pre-requisite(s): EEN 1200.

EEN 3200 - Sustainable Energy

Credits: (3)

Introduction to sustainable energy. Energy conservation and efficiency. Renewable energy systems and energy storage. Economic, societal and environmental aspects of sustainable energy.

Pre-requisite(s): EEN 1200.

EEN 4100 - Senior Project I

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

An energy engineering project will be selected for team participation. Team assignments will lead to the completion of a preliminary design phase which includes concept generation, engineering analysis and design, prototype testing, and preliminary economic analyses. Senior Project I culminates in a preliminary design review based on formal student presentations of documented engineering drawings of the proposed design.

Pre-requisite(s): Departmental permission.

EEN 4200 - Senior Project II

Credits: (3)

Continuation of EEN 4100. Team assignments will lead to the construction, testing and optimization of the design. This includes detailed engineering analysis and testing of prototypes, final parameter and tolerance design, and economic analysis of the project. Senior Project II culminates in a final design review based on formal student presentations of the documented final product and verification that the final product meets all requirements.

Pre-requisite(s): EEN 4100.

EEN 4300 - Energy Auditing

Credits: (2)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Introduction to energy auditing of buildings and industrial processes. Energy assessment, conservation, efficiency, and cost analysis of energy systems.

Pre-requisite(s): EEN 2600 and ME 4000.

EEN 4420 - Renewable Energy Systems Design I

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Introduction to renewable energy systems. In-depth coverage of the analysis and design of solar and wind energy systems.

Pre-requisite(s): EEN 3200 and ME 4000.

EEN 4430 - Renewable Energy Systems Design II

Credits: (3)

Follow-on course to EEN 4420. Analysis and design of hydroelectric, geothermal, marine, and biomass energy systems. Environmental and economic impacts of these renewable energy technologies.

Pre-requisite(s): EEN 4420.

EEN 4440 - Introduction to Energy Systems

Credits: (3)

Typically Taught Summer Semester: -

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Introduction to systems engineering as applied to the energy industry. Systems definition, attributes and properties. Command and control, mission modeling, verification and validation, documentation.

Pre-requisite(s): EEN 3000.

EEN 4450 - Electric Vehicles Engineering

Credits: (3)

Introduction to electric and hybrid-electric vehicles. Alternative fuels, powertrains, battery technologies, vehicle dynamics, propulsion, energy

management, braking and controls.

Pre-requisite(s): EEN 3200.

EEN 4460 - Energy Management

Credits: (3)

Energy management design, utility rates, economic analyses, mechanical and electrical systems, safety, green technologies and sustainability.

Pre-requisite(s): EEN 3000.

EEN 4470 - Energy and Environmental Issues

Credits: (3)

Environmental impacts of energy systems, fossil fuels, renewable and green technologies, nuclear energy, energy conservation and climate change.

Pre-requisite(s): EEN 3200.

EEN 4480 - Energy and Legal Issues

Credits: (3)

Legal issues of energy systems, regulations, case law pertaining to development and implementation of energy systems, climate change, political influences.

Pre-requisite(s): EEN 3000.

EET 1110 - Basic Electronics

Credits: (2)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Introduction to the concepts and fundamentals of electronic devices, circuits and systems. An electronics overview course for technology majors. Topics include direct current electricity, alternating current electricity, transistors and integrated circuits, amplifiers and oscillators, transmitters and receivers, digital logic circuits, electronic memory, and computers.

Pre-requisite(s): Credit for or concurrent enrollment in MATH 1010 or higher.

EET 1130 - Digital Systems

Credits: (4)

Typically Taught Fall Semester: *Full Sem*

Introduction to digital electronics, integrated circuits, numbering systems, Boolean algebra, gates, flip-flops, multiplexers, sequential circuits, combinational circuits, programmable logic devices, and computer architecture.

Lecture and lab combination. Laboratory activities to include the design, construction, analysis, and measurement of basic digital systems.

Pre-requisite/Co-requisite: Prerequisite: Credit for or concurrent enrollment in MATH 1010 or equivalent or any higher math.

EET 1140 - DC Circuits

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

Introduction to DC circuit fundamentals, analysis, theorems, laws, components, measuring devices, and equipment. The introduction and use of measuring instruments and power supplies. Lecture and lab combination. Laboratory activities to include circuit design, construction, and analysis of DC circuits.

Pre-requisite/Co-requisite: Prerequisite: EET 1110 and credit for or concurrent enrollment in MATH 1060 or MATH 1080 or any higher math.

EET 1850 - Industrial Electronics

Credits: (4)

Typically Taught Spring Semester: *Full Sem*

Industrial electronics course for Mechanical and Manufacturing Engineering Technology majors.

Introduction to DC and AC circuits, machines, and power systems.

Lecture and lab combination. Laboratory activities to include the design, construction, and analysis of DC/AC circuits and machinery.

Pre-requisite(s): MATH 1010 or equivalent or any higher math.

EET 2010 - AC Circuits

Credits: (3)

The course serves as an extension of circuit analysis methods taught in EET 1140 to AC networks. The introduction of complex numbers and phasor notation at the beginning of the course is followed by AC circuit analysis techniques and the determination of the frequency response for passive AC networks. The course is a combination of lecture and laboratory formats. Laboratory activities will include the design, computer simulation, validation and analysis of passive AC networks.

Pre-requisite(s): EET 1140 and credit for MATH 1060 or MATH 1080.

EET 2110 - Semiconductor Circuits

Credits: (4)

Typically Taught Fall Semester: *Full Sem*

Introduction to the design and analysis of semiconductor circuits using diodes, transistors, op-amps, field effect devices, thyristors, and regulators.

Lecture and lab combination. Laboratory activities to include the design, construction, computer simulation, and analysis of semiconductor circuits, amplifiers and power supplies.

Pre-requisite(s): EET 1130 , EET 1140, MATH 1060 or higher.

EET 2120 - Power and Motors

Credits: (4)

Typically Taught Fall Semester: *Ful Sem*

Introduction to AC and DC motors, relays, transformers, power measurements, National Electrical Code, ladder logic, wiring, and programmable logic controllers (PLCs). Lecture and lab combination. Laboratory activities to include the design, construction, and analysis of basic power circuits and machinery configurations.

Pre-requisite(s): EET 1140, MATH 1060 or higher.

EET 2130 - PC Board Design

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

An introduction to the design of printed circuit boards and packaging with emphasis on the design, simulation, analysis and packaging of circuits.

Lecture and lab combination. Laboratory activities include the design, construction, and testing of prototype circuit boards. CAD programs will be used for the design and layout of circuit boards.

Pre-requisite(s): EET 2110.

EET 2140 - Communications Systems

Credits: (4)

Typically Taught Spring Semester: *Full Sem*

Introduction to digital and wireless communication circuits. Topics to include radio frequency circuits, modulation, detection, transmitters, receivers, transmission lines, antennas, and measurement instruments. Digital communications topics to include parallel and serial data transmission.

Lecture and lab combination. Laboratory activities to include the design, construction, computer simulation, and analysis of communication circuits.

Pre-requisite(s): EET 2110.

EET 2150 - Embedded Controllers

Credits: (4)

Typically Taught Spring Semester: *Full Sem*

A study of microprocessors, embedded controllers, operational characteristics, computer architecture, machine code programming, memory devices, and interfacing.

Lecture and lab combination. Laboratory activities include the design, construction, and analysis of microprocessor based systems. Analysis techniques include the use of assemblers, cross-assemblers, and emulators.

Pre-requisite(s): Credit for or Current Enrollment in EET 2110.

EET 2160 - Troubleshooting

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

An introduction to troubleshooting techniques and skills. Topics include the use of diagnostic electronic test equipment such as multi-meters, power supplies, signal generators, digital storage oscilloscopes, and spectrum analyzers. Students will diagnose and repair electronic circuits and systems.

Lecture and laboratory combination.

Pre-requisite(s): EET 2110, EET 2120, EET 2170.

EET 2170 - Industrial Controls

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Introduction to industrial control systems for manufacturing and automated test applications. The course will focus on LabVIEW control systems and Programmable Logic Controllers (PLCs). Students will configure, program, and troubleshoot industrial control systems.

Lecture and lab combination.

Pre-requisite(s): EET 1130, EET 1140.

EET 2180 - Solar PV Systems

Credits: (4)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

The purpose of this course is for each student to learn the fundamental knowledge and technology of solar PV (Photovoltaic) systems. This course discusses the limitation and the impacts of using fossil fuel energy and its possible impact on global climate change. Solar energy can provide a long term solution and minimize climate change. This course will enable students to build an essential foundation towards how to design the solar PV systems for various

applications. The topics in this course include PV markets and applications, electricity basics, safety basics, the fundamentals of solar PV energy, PV system components, grid-tied and battery-based systems, load analysis and PV system sizing, PV system electrical and mechanical designs, National Electric Code (NEC) applied to PV systems, commissioning and decommissioning, performance analysis, maintenance and troubleshooting. Incentives, rebates and policies from federal, state and local power company will also be addressed in the class. The students will learn how to acquire professional certifications if they are interested in developing a career in solar PV industry.

Pre-requisite(s): EET 1140 or EET 1850.

EET 2190 - Solar PV Technical Assessments

Credits: (4)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

The purpose of this course is to educate each student how to be a solar electric professional with demonstrated expertise in the siting, design, analysis and performance of PV systems from site specific information, analyzes customer needs and energy usage for the purpose of advising and providing customers with the most appropriate solution for their situation. Each student will also learn the fundamental knowledge and technology of solar PV (Photovoltaic) systems. The topics in this course include PV markets and applications, electricity basics, safety basics, the fundamentals of solar PV energy, PV system components and configurations, grid-tied and battery-based systems, load analysis, qualifying the customer, site analysis, conceptual PV system design, financial costs, incentives and savings, financial benefit analysis and financing, non-financial benefit analysis, performance analysis, prepare proposals, and professional sales skills. The students will learn how to acquire professional certifications if they are interested in developing a career in solar PV industry.

Pre-requisite(s): EET 1140 or EET 1850.

EET 3010 - Circuit Analysis

Credits: (4)

Typically Taught Fall Semester: *Full Sem*

Advanced calculus-based topics related to electronic circuit analysis, Laplace transforms, differential equations, Fourier series, Fourier transforms, and applications. Lecture and lab combination. Laboratory activities include circuit design, construction, computer simulation, and analysis.

Pre-requisite(s): EET 2110, EET 2140, Credit for or Current Enrollment in in MATH 1210.

EET 3020 - Active Filters

Credits: (4)

Continuation of Circuit Analysis, EET 3010. Topics include active and passive filters, Pole-zero analysis, stability, Bode diagrams, frequency response, and applications.

Lecture and lab combination. Laboratory activities include circuit design, construction, computer simulation, and analysis.

Pre-requisite(s): EET 3010.

EET 3030 - FPGA and ASIC Design

Credits: (4)

Typically Taught Fall Semester: *Full Sem*

Introduction to field programmable gate arrays (FPGA) and application specific integrated circuit (ASIC) design. Lecture and lab combination. Laboratory activities to include the use of computer design tools to design, model, simulate, and program gate arrays and application specific integrated circuits.

Pre-requisite(s): EET 2150.

EET 3040 - Instrumentation and Measurements

Credits: (4)

Typically Taught Fall Semester: *Full Sem*

Introduction to electronic data acquisition, data analysis, error analysis, signal measurement, and automatic testing techniques.

Lecture and lab combination. Laboratory activities to include the design, construction, and analysis of measurement circuits, data acquisition circuits, instrumentation devices, and automatic testing.

Pre-requisite(s): EET 2110, EET 2170.

EET 3050 - Microprocessor Systems

Credits: (4)

Typically Taught Spring Semester: *Full Sem*

Microprocessor system development using modern software design principles and high level programming languages. Topics include peripheral interfacing, real-time operating systems and debugging techniques.

Lecture and lab combination. Laboratory activities to include design, simulation, computer programming, analysis, and troubleshooting.

Pre-requisite(s): EET 2150 and either CS 1410 or CS 2250.

EET 3060 - Real-Time Embedded Controllers

Credits: (4)

Typically Taught Fall Semester: *Full Sem*

An introduction to real-time kernels and operating systems. Priority-based pre-emptive scheduling, intertask communication, and intertask synchronization will be studied. Other topics include priority inversions, semaphores, mutexes, context switches, rate monotonic analysis (RMA), various kernel services, finite state machines, and nested state machines.

Pre-requisite(s): EET 2150.

EET 3070 - Engineering Technology Research

Credits: (3)

Engineering problem solving using the Internet, professional journals, and human networking. Three styles of writing emphasized; technical descriptions, historical perspectives of technology, and technical defensible arguments.

Pre-requisite(s): AAS degree in CET or EET.

EET 3080 - Embedded Networks

Credits: (4)

Typically Taught Spring Semester: *Full Sem*

This course provides an in-depth study of several serial communication standards and how to implement them in embedded systems. The standards addressed in this class include RS232, RS485, Controller Area Network (CAN), and Ethernet. Emphasis will be placed on utilizing the stacks and protocols for each standard. The channel bandwidth, noise, and data error rate will be addressed. Wireless methods of serial communication will be surveyed.

Pre-requisite(s): EET 2150.

EET 3090 - Project Management

Credits: (2)

Typically Taught Spring Semester: *Full Sem*

EET 3090 Project Management course is designed to prepare students for the senior capstone project. The course will include development of a contract, goal setting, time management, budgeting, project funding, project

leadership and team building principles. Engineering economics, team work, quality statistics and continuous improvement will also be discussed. Other topics include project life cycles, organization and risk management.

Pre-requisite(s): EET 1110, and EET 1140, and EET 2010.

EET 3100 - Renewable Energy

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

The purpose of the EET 3100 Renewable Energy course is for each student to learn the fundamental knowledge and technology of various types of renewable energy including solar energy, wind power, hydroelectric, geothermal energy, biomass and ocean energy. This course discusses the limitations and the impacts of using fossil fuel energy and its possible impact on global climate change. This course will enable students to build an essential foundation towards the specific applications of renewable energy such as solar PV (Photovoltaic) systems, wind turbine systems and micro-hydro systems. Incentives, rebates and policies from federal, state and local power companies will also be addressed in the class. The students will learn how to acquire professional certifications if they are interested in developing a career in the area of renewable energy.

Pre-requisite(s): EET 1110 or EET 1850.

EET 3180 - Advanced Solar PV Systems

Credits: (4)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

The purpose of this course is for each student to learn the advanced knowledge and technology of solar PV (Photovoltaic) systems. This course will enable students to verify system design, manage project, install electrical and mechanical components, complete system installation, and conduct maintenance and troubleshooting. The topics in this course includes PV markets and applications, safety requirements, the advanced technology of solar PV systems, PV system components, grid-tied and battery-based systems, load analysis and PV system sizing, PV system electrical and mechanical designs, National Electric Code (NEC) applied to PV systems, commissioning and decommissioning, performance analysis, maintenance and troubleshooting, and CAD software for PV system design. Incentives, rebates and policies from federal, state and local power company will also be addressed in the class. The students will learn how to acquire professional certifications if they are interested in developing a career in

solar PV industry.

Pre-requisite(s): EET 2180.

EET 3810 - Advanced Industrial Controls

Credits: (3)

Experimental Course, Contact Department for More Information

The focus of this course is on Advanced Industrial Control Systems hardware and associated software. Students will combine individual hardware control system components and develop programming skills to combine platforms into integrated automated systems. They will gain knowledge of advanced robotics, servo systems, PLCs, National Instruments cRIO, and HMI hardware. Students will learn the techniques behind laying out a control system backplane through the development of a simulated automation system.

EET 4010 - Senior Project I

Credits: (2)

Typically Taught Fall Semester: Full Sem

Students will work on teams to design, construct, test, and install a significant engineering project. The course includes selecting a team, selecting a project, writing a contract, maintaining a logbook, creating and following project milestones, setting and completing weekly goals, writing a manual, and making a final presentation to students, faculty, and industry advisers.

Pre-requisite(s): EET 3090.

EET 4020 - Senior Project II

Credits: (2)

Typically Taught Spring Semester: Full Sem

A continuation of EET 4010 Senior Project I. Students will work on teams to design, construct, test, and install a significant engineering project. The course includes selecting a team, selecting a project, writing a contract, maintaining a logbook, creating and following project milestones, setting and completing weekly goals, writing a manual, and making a final presentation to students, faculty, and industry advisers.

Pre-requisite(s): EET 4010.

EET 4030 - Controls & Systems

Credits: (4)

Typically Taught Fall Semester: Full Sem

Introduction to automatic control theory, analysis, and

testing, pole, zero, Bode plots, and frequency response. The design and application of programmable controllers using ladder logic, sequential functions charts, PID, and data highway.

Lecture and lab combination. Laboratory activities to include computer simulation, servo-system construction, and analysis.

Pre-requisite(s): EET 3010, MATH 1210, PHYS 2210.

EET 4040 - Signals and Systems

Credits: (4)

Typically Taught Spring Semester: Full Sem

An introduction to digital signal processing, digital filters, discrete and fast Fourier transforms, quantization, introduction to adaptive filters, industrial applications, and DSP hardware.

Lecture and lab combination. Laboratory activities include the design, construction, computer simulation, and analysis of digital signal processing circuits.

Pre-requisite(s): EET 3010, MATH 1210.

EET 4060 - Advanced Communications

Credits: (4)

Introduction to satellite communications, spread spectrum techniques, digital satellite communications, antennas, small signal amplifiers, Smith charts, and "S" parameter analysis.

Lecture and lab combination. Laboratory activities to include the design, construction, computer simulation and analysis of wireless communications circuits and systems.

Pre-requisite(s): EET 3010.

EET 4090 - Systems Design and Integration

Credits: (3)

An introduction to the fundamentals of large-scale systems. The first part deals with systems analysis, design and integration with emphasis on input/output models, transfer functions, and interface issues. The second part discusses a variety of systems design and management approaches, particularly those concerned with system requirements, interface control, evaluation, quality assurance through configuration management, audits and reviews, and the human role in systems.

Pre-requisite(s): EET 3090.

EET 4800 - Individual Studies

Credits: (1-4)

Typically Taught Spring Semester: *Full Sem*

The student will receive credit for approved studies in an area not covered in the EET program. A maximum of four credits can be counted as electives for EET majors.

EET 4890 INT - Cooperative Work Experience

Credits: (2)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

The student will receive credit for approved electronics industrial experience. Professional development activities will include resume writing, goal setting, progress reports, and a supervisor's evaluation.

Pre-requisite(s): Permission from the department.

The course can be taken a maximum of three times for a total of 6 credits.

EET 4900 - Special Topics

Credits: (1-4)

Variable Title

Typically Taught Fall Semester: *Full Sem*

A one-time special study course designed to introduce a new relevant topic that is not covered in the EET program. Lecture and lab combination. Laboratory activities to support the selected course topic.

May be repeated four times for a maximum of seven credit hours.

Note: A maximum of four credits can be counted for EET majors.

ENGL 0900 ND - Fundamentals of College Reading and Writing

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A course designed to help students develop fundamental reading, writing, and thinking skills. Students in this course work closely with Skills Enhancement Center tutors in both group and one-to-one settings. Students with ACT scores in either English or Reading of 12 and below are required to take ENGL ND0900. Students without ACT scores are also placed in this course unless they are otherwise placed by Accuplacer. Students must complete this course with a grade of C or better before enrolling in ENGL 0955.

Note: ND (non-degree) do not count toward hours required for graduation.

ENGL 0955 ND - Developmental College Reading and Writing

Credits: (6)

Typically Taught Summer Semester: *Full Sem, Full Sem Online*

Typically Taught Fall Semester: *Full Sem, Full Sem Online*

Typically Taught Spring Semester: *Full Sem, Full Sem Online*

A course to help students develop reading, writing, and critical thinking skills prerequisite for entry-level college courses. Students in this course are supported by the Skills Enhancement Center. Students who pass ENGL 0900 with a grade of C or better, whose ACT scores in English or Reading run from 13 to 16, or who are placed by Accuplacer are placed in ENGL ND0955. Students must complete ENGL ND0955 with a grade of C or better before enrolling in ENGL 1010.

Note: ND (non-degree) do not count toward hours required for graduation.

ENGL 1000 - College Reading

Credits: (1-3)

The English department recommends this course as an excellent entry-level college course. Students in this course can expect to improve their reading comprehension, their critical thinking skills, their breadth and depth of knowledge, and their aptitude for learning.

May be repeated 4 times up to 6 credit hours.

Note: Check with Department for course availability.

ENGL 1005 EN1 - College Reading and Introductory Writing

Credits: (6)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

English 1005 introduces students to the habits and practices necessary for reading and writing at the college level.

Students will focus on the writing process, writing for specific audiences, collaboration with peers, grammatical and mechanical correctness, improving reading comprehension, and the interrelationship between reading and writing. Students who have placed into ENGL 0955 (Level 2) may choose to take this accelerated course, which will satisfy the requirements for ENGL 0955 and ENGL 1010.

Pre-requisite(s): Level 2 placement or ENGL 0900 with a grade of C or better.

ENGL 1010 EN1 - Introductory College Writing

Credits: (3)

Typically Taught Summer Semester: *1st Blk, 2nd Blk, Full Sem Online*

Typically Taught Fall Semester: *Full Sem, Full Sem Online*

Typically Taught Spring Semester: *Full Sem, Full Sem Online*

Students will learn practices of successful academic writing. Students will focus on the writing process, writing for specific audiences, collaboration with peers, and on the interrelationship between reading and writing.

Pre-requisite(s): To enter 1010 the student must have 17 or higher on both ACT English and Reading, or equivalent. Students must complete ENGL 1010 satisfactorily (a grade of "C" or better) before enrolling in ENGL 2010.

ENGL 2010 EN2 - Intermediate College Writing

Credits: (3)

Typically Taught Summer Semester: *Full Sem, 2nd Blk, Full Sem - Online, 1st Blk*

Typically Taught Fall Semester: *Full Sem, 2nd Blk, Full Sem - Online, 1st Blk*

Typically Taught Spring Semester: *Full Sem, 2nd Blk, Full Sem - Online, 1st Blk*

This course will focus on writing arguments, conducting research, and documenting sources. Students will continue to learn practices of successful academic writing including the writing process, writing for specific audiences, and collaboration with peers.

Pre-requisite(s): ENGL 1005 or ENGL 1010 with "C" grade or better, AP Language and Composition or Literature and Composition examination with a score of 3 or better, ACT English and Reading score of 29 or better, CLEP with essay test with a score of 50 or better, or articulated transfer credit from another regionally accredited college or university.

ENGL 2015 EN2 - Intermediate College Writing & Research

Credits: (4)

Typically Taught Summer Semester: *Full Sem, Full Sem - Online*

Typically Taught Fall Semester: *Full Sem, Full Sem - Online*

Typically Taught Spring Semester: *Full Sem, Full Sem -*

Online

Intermediate College Writing & Research focuses on combining writing and research skills. It will focus on writing arguments, conducting research, and documenting sources. Students will continue to learn practices of successful academic writing including the writing process, writing for specific audiences, and collaboration with peers. Students completing this course will be able to use an academic library and the Internet to successfully identify, access, evaluate and use information resources to support academic success and lifelong learning. This course will fulfill both the English Composition and the Information Literacy General Education core requirements. **Pre-requisite(s):** Level 4 placement, passing ENGL 1010 with a grade of "C" or better, passing the AP Language and Composition or Literature and Composition examination with a score of 3 or better, achieving an ACT English and Reading score of 29 or better, a CLEP with essay test with a score of 50 or better, or an articulated transfer credit from another regionally accredited college or university.

ENGL 2100 - Technical Writing

Credits: (3)

Typically Taught Summer Semester: *Check with department for course availability.*

Typically Taught Fall Semester: *Full Sem, Online*

Typically Taught Spring Semester: *Full Sem, Online*

This course prepares students for on-the-job writing and emphasizes the importance of audience analysis, graphics, and document design. Students study and practice writing and designing a variety of technical documents as they learn to write clearly, concisely, and persuasively to a specific audience for a specific purpose.

Pre-requisite/Co-requisite: ENGL 1010 or ENGL 2010 or ENGL 2015.

ENGL 2120 - Introduction to Writing and Document Design

Credits: (3)

Typically Taught Fall Semester: *Check with department*

Typically Taught Spring Semester: *Full Sem*

Through literary texts, including fiction, non-fiction and poetry as well as film and other digital mediums, this course will introduce students to the ways writing fits into various types of organizations, which are increasingly focused around knowledge work, or work that analyzes and communicates rather than manufactures products. Within the framework of writing, students will learn how organizations are networked and situated, and how

collaboration, systems of power, organizational structures, and various audiences and stakeholders function.

ENGL 2130 - Media and Technology in Texts

Credits: (3)

Typically Taught Fall Semester: *Check with department*

Typically Taught Spring Semester: *Full Sem*

Through the study of literary texts such as fiction, poetry, nonfiction, and film, students will gain an understanding of key concepts in the study of media and technology, including historical and forward-looking perspectives. These might include such topics as the impact of technology on society and culture, how new technologies shape information and how new media forms affect reading, writing and analysis.

ENGL 2140 - Introduction to Professional and Technical Editing

Credits: (3)

Typically Taught Fall Semester: *Check with department*

Typically Taught Spring Semester: *Full Sem*

This course focuses on basic editing in the workplace. We examine genres, electronic editing, version control, collaboration, synchronous and asynchronous writing/editing, and literature related to editing.

ENGL 2150 - Gender and Culture in Workplace Writing

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Check with department for course availability.*

Gender and culture affect professional and technical writing and an understanding of the many roles we encounter and play through gender and culture is essential for writers. This course will overview for students the many ways gender and culture can be applied to and explored in professional and technical writing and provide practice identifying and analyzing such issues through literature.

ENGL 2160 - Introduction to Web-Based Technical Writing

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Check with department for course availability.*

This course will first cover how organizations create and share information on the web and social media, and how the differences in reader expectation and reading behavior between printed and online texts help shape the information. The course will then focus on characteristics of good online content, analysis of audience and purpose, and strategies for writing and designing content to meet the needs and expectations of the readers. Throughout the semester, students will practice, individually and collaboratively, good writing and designing skills in learning to become effective writers of a workplace.

ENGL 2200 HU/DV - Introduction to Literature

Credits: (3)

Typically Taught Fall Semester: *Full Sem, Full Sem Online*

Typically Taught Spring Semester: *Full Sem, Full Sem Online*

An introduction to three major literary genres, fiction, poetry, and drama, drawn from a diverse range of authors from various cultures and historical periods. Students will learn how to read literary texts closely and critically, and how literature--reading more generally--can have a meaningful part of their daily lives. Course includes relevant practice in the principles of successful writing, including drafting, revising, and editing.

ENGL 2220 HU/DV - Introduction to Fiction

Credits: (3)

Typically Taught Fall Semester: *Full Sem, Full Sem - Online*

Typically Taught Spring Semester: *Full Sem, Full Sem - Online*

An introduction to short stories, novellas, and novels, selected from a diverse range of authors from various cultures and historical periods. Students will learn how to read fiction carefully and critically, and how fiction can have a meaningful part in their daily lives. Course includes relevant practice in the principles of successful writing, including drafting, revising, and editing.

ENGL 2230 HU/DV - Introduction to Drama

Credits: (3)

Typically Taught Fall Semester: *Check with Department*

Typically Taught Spring Semester: *Check with Department*

An introduction to drama from around the globe, selected from a diverse range of authors from various cultures and historical periods. Students will develop the critical and interpretive skills necessary to analyze and appreciate plays and to recognize their contemporary relevance. Course includes relevant practice in the principles of successful writing, including drafting, revising, and editing.

ENGL 2240 HU/DV - Introduction to Poetry

Credits: (3)

Typically Taught Fall Semester: *Full Sem, Full Sem - Online*

Typically Taught Spring Semester: *Full Sem, Full Sem - Online*

An introduction to poetry written in English, selected from a diverse range of authors from various cultures and historical periods. Students will develop the critical and interpretive skills necessary to appreciate the craft of poetry as a valid and important way of talking about human experiences. Course includes relevant practice in the principles of successful writing, including drafting, revising, and editing.

ENGL 2250 CA - CW: Introduction to Creative Writing

Credits: (3)

Typically Taught Summer Semester: *Check with Department*

Typically Taught Fall Semester: *Full Sem, Full Sem - Online*

Typically Taught Spring Semester: *Full Sem, Full Sem - Online*

In this Gen Ed course students will learn in a workshop setting to write original pieces in three genres that may include the following: short stories, poetry, creative non-fiction, and plays. As models for their own writing, students will read exemplary pieces from each genre taught from different eras and cultures, in order to build a vocabulary base. Thus, students will become familiar with aspects of storytelling such as story arc, characterization, and dialogue; and aspects of poetry such as rhyme, rhythm, and figurative language, for use in their own writing. Through regular exercises, students will generate ideas for creating original writing such as stories, poems, plays, and creative essays, and will refine oral and communicative skills. Students will critique and be critiqued by the entire class in order to revise early drafts, will analyze selected texts, and will evaluate their own and others' work.

Pre-requisite(s): ENGL 1010, ENGL 2010, or ENGL 2015.

ENGL 2260 CA - CW: Introduction to Writing Short Fiction

Credits: (3)

Typically Taught Summer Semester: *1st Blk*

Typically Taught Fall Semester: *Full Sem, Full Sem - Online*

Typically Taught Spring Semester: *Full Sem, Full Sem - Online*

This course introduces students to writing original short fiction in a workshop setting. Students will read as models a judicious sampling of stories by authors such as Edgar Allen Poe, William Faulkner, Toni Morrison, Truman Capote, and others as selected by the professor in order to build a vocabulary for analyzing aspects of storytelling such as plot, story arc, characterization, dialogue, meaningful detail, and story pacing. Using guided writing exercises and journaling, students will develop ideas from these sources to create original fiction for a series of in-class workshops. Students will critique, and be critiqued by, the entire class, in order to revise their stories.

Pre-requisite(s): ENGL 1010, ENGL 2010, or ENGL 2015.

ENGL 2270 CA - CW: Introduction to Writing Poetry

Credits: (3)

Typically Taught Summer Semester: *1st Blk*

Typically Taught Fall Semester: *Full Sem, Full Sem - Online*

Typically Taught Spring Semester: *Full Sem, Full Sem - Online*

This course introduces students to writing original poetry. Students will read as models a judicious sampling of poems by contemporary poets as selected by the professor in order to build a vocabulary for analyzing aspects of poetic craft, such as form, line, prosody, image, sound, narrative, and lyric. Using guided writing exercises and journaling, students will develop their ideas into original poems for a series of in-class writing workshops. Students will critique and be critiqued by their peers in order to revise their poems.

Pre-requisite(s): ENGL 1010, ENGL 2010, or ENGL 2015.

ENGL 2420 - Young Adult Literature

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Young Adult Literature will introduce students to a variety of literary works within this popular and compelling genre. Through close reading, we will examine various features, themes, and representations of adolescence and adulthood. We will also consider different pedagogical approaches to these texts to uncover broader literary and sociocultural dimensions.

Pre-requisite(s): ENGL 2010 or ENGL 2015, or equivalent.

ENGL 2510 HU/DV - Masterpieces of Literature

Credits: (3)

Typically Taught Fall Semester: *Check with Department*

Typically Taught Spring Semester: *Check with Department*

An introduction to select masterworks, selected from a diverse range of authors from various cultures and historical periods. Students will develop the critical and interpretive skills necessary to analyze various genres (fiction, drama, and poetry) and to reflect on the nature of literary excellence. Course includes relevant practice in the principles of successful writing, including, drafting, revising, and editing.

Note: Check with Department for course availability.

ENGL 2710 HU/DV - Perspectives on Women's Literature

Credits: (3)

Typically Taught Fall Semester: *Full Sem - Online*

Typically Taught Spring Semester: *Check with Department*

The purpose of this class is to introduce students to the rich contributions of women to the field of literature. The course will cover a variety of women writers that may range from the medieval period to the present and will feature literary genres such as fiction, poetry, drama, non-fiction, and journals/diaries. In discussing and writing about these works, students will consider why women were excluded or marginalized in the canon for such a large part of literary history and how society, family, and politics impacted the way these women wrote.

ENGL 2750 HU - Topics and Ideas in the Humanities

Credits: (3)

Variable Title

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This variable topics course focuses on topics and ideas in the humanities. The course may consider social, political, artistic, environmental, or philosophical themes across disciplines. Students will learn the critical skills necessary to identify the intellectual currents in the texts under consideration, to engage in focused discussion and to probe the various intentions of any act of writing. May be taken twice for a total of 6 credits.

ENGL 2810 - Experimental

Credits: (1-3)

Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript. Refer to Experimental Courses.

ENGL 2830 - Directed Readings

Credits: (1-3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Individual readings supervised by a faculty member.

Pre-requisite(s): ENGL 2010, ENGL 2015, or equivalent. May be repeated twice up to 6 credit hours.

ENGL 2890 - Cooperative Work Experience

Credits: (1-6)

Open to all students in the English Department who meet the minimum Cooperative Work Experience requirements of the department. Provides academic credit for on-the-job experience. Grade and amount of credit will be determined by the department.

Pre-requisite(s): ENGL 2010, ENGL 2015, or equivalent. May be repeated 5 times up to 6 credit hours.

Note: Check with department for current course offerings.

ENGL 2920 - Short Courses, Workshops, Institutes and Special Programs

Credits: (1-4)

Variable Title

Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript.

Pre-requisite(s): ENGL 1010 with a "C" grade or better or equivalent.

May be repeated 3 times up to 4 credit hours with different topics.

Note: Check with department for current course offerings.

ENGL 2920S INT - Community Service

Credits: (3)

Students will receive an overview of community service and explore opportunities for service learning in the community. A weekly seminar with required readings and writings as necessary and 50 hours of community service.

Pre-requisite(s): ENGL 2010, ENGL 2015, or equivalent.

Note: Check with department for current course offerings.

ENGL 2999 INT - Capstone in Workplace Communication and Writing

Credits: (3)

This class provides an opportunity for students to synthesize and demonstrate their learning in the Associate of Workplace Communication program. The primary purpose of this course is to help students transition from earning an associate's degree to pursuing a job and/or continued education toward a bachelor's degree. The course will include employment-related content such as interviewing skills, job shadows, career research, portfolios, resumes, and cover letters. The course will also include a section on workplace ethics to develop responsible and productive professionals. Cross-listed with COMM 2999.

Pre-requisite(s): Permission of Instructor Required.

Note: Check with Department for course availability.

ENGL 3010 - Introduction to Linguistics

Credits: (3)

Typically Taught Summer Semester: *Check with department for course availability.*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course introduces students to the scientific study of language. It looks across languages to explore what they have in common, as well as what distinguishes them from one another. Students learn basic analytic techniques in articulatory phonetics, phonology, morphology, syntax, and

semantics and apply them to data drawn from various languages. These core concepts may be applied to other areas, such as language acquisition, language history, language and culture, language and society, language and thought, or language and literary expression.

Pre-requisite(s): ENGL 2010, ENGL 2015, or equivalent.

Note: Students in English, foreign languages, anthropology, philosophy, psychology, and history are encouraged to take this course.

ENGL 3020 - Teaching English/Language Arts

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

This course is designed for English teaching majors and minors. It introduces students to the nature of language and linguistics. It also reviews the elements of traditional grammar. This course surveys prescribed application for prospective secondary school English teachers, including language variation, contemporary alternatives to traditional grammar, and linguistics and composition. Students are required to complete a grades 7-12 school field experience.

Pre-requisite(s): ENGL 2010, ENGL 2015 or equivalent and admitted to Secondary Education program.

Pre-requisite/Co-requisite: ENGL 2420.

ENGL 3030 - Structure of English

Credits: (3)

Typically Taught Summer Semester: *Check with department for course availability.*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course presents the major parts of speech, grammatical functions, and constructions of Standard English. Its purpose is to show that English, like any human language, is an intricate and rule-governed system. To this end, it draws on the terminology of traditional grammar and the analytical techniques of structural and transformational grammar, including contextual definitions and tree diagramming. The course is directed toward departmental English majors, teaching majors, advanced ESL students, and students majoring in foreign language teaching.

Pre-requisite(s): ENGL 2010 or ENGL 2015, or equivalent.

ENGL 3040 - History of the English Language

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course begins by introducing the elementary vocabulary and concepts of linguistic theory as these pertain to historical linguistics. It then traces the prehistory of English from its beginnings in Indo-European, through its place in the Germanic branch, to its historical phases of Old, Middle, and Early Modern English. Attention may also be given to national varieties of English and the development of English as a world language.

Pre-requisite(s): ENGL 2010 or ENGL 2015 or equivalent.

ENGL 3050 - Grammar, Style, and Usage for Advanced Writing

Credits: (3)

Typically Taught Summer Semester: *Check with department for course availability.*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course presents the concepts and nomenclature of traditional grammar as a context for students wishing to increase their control of punctuation, style, and usage in order to become more proficient writers. Its purpose is to offer practical guidance in how grammatical concepts can be applied to revising and editing one's own or others' writing to more effectively express one's intended meaning. The course is offered to all English majors and minors as a means of fulfilling the language requirement for the major, especially those in technical writing, as well as students in communication, pre-law, and criminal justice.

Pre-requisite(s): ENGL 2010 or ENGL 2015 or equivalent.

ENGL 3080 - Critical Approaches to Literature

Credits: (3)

Typically Taught Summer Semester: *Check with Department*

Typically Taught Fall Semester: *Full Sem, Full Sem - Online*

Typically Taught Spring Semester: *Full Sem, Full Sem - Online*

This course introduces students to the basic theories and practices of technical communication. Using audience, purpose, and context as their guides, students create various professional and technical documents, such as formal and informal reports, instructions, proposals, job application materials, brochures, web media, and presentations. Working both individually, and in collaboration, students analyze their rhetorical situation as they create usable and

appropriate professional documents. This course provides the practical and theoretical basis for the minor and emphasis in Professional and Technical Writing.

Pre-requisite(s): ENGL 2010 or ENGL 2015 or equivalent.

Suggested Requisite(s): ENGL 2200, ENGL 2220, ENGL 2230, or ENGL 2240.

ENGL 3100 - Professional and Technical Writing

Credits: (3)

Typically Taught Summer Semester: *Full Sem Online, Check with department for course availability.*

Typically Taught Fall Semester: *Full Sem, Full Sem Online*

Typically Taught Spring Semester: *Full Sem, Full Sem Online*

This course introduces students to the basic theories and practices of technical communication. Using audience, purpose, and context as their guides, students create various professional and technical documents, such as formal and informal reports, instructions, proposals, job application materials, brochures, web media, and presentations. Working both individually, and in collaboration, students analyze their rhetorical situation as they create usable and appropriate professional documents. This course provides the practical and theoretical basis for the minor and emphasis in Professional and Technical Writing.

Pre-requisite(s): ENGL 2010 or ENGL 2015.

ENGL 3120 - Foundations in Professional & Technical Writing

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$20.00

This course provides the theoretical and rhetorical knowledge that underpins the practice of technical and professional writing. Students will learn about rhetorical theories, research methods, social justice initiatives, technological theories, and ethics. The course will prepare students for understanding why technical and professional writers make the choices they do and empower students to explain the exigence of their field of study.

Pre-requisite(s): ENGL 2010 or ENGL 2015.

ENGL 3130 - Digital Writing Technologies

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$20.00

This course will introduce students to the tools/software that technical writers and other professionals use in the workplace. Topics include, but are not limited to, Advanced Features in MS Word (styles, macros), the Adobe Suite, Advanced Features of online collaborative tools (the Google Suite among others), the suite of Apple products. This instruction prepares students, not just English majors, for the necessary skills to enter into the workforce prepared to succeed.

Pre-requisite(s): ENGL 2010 or ENGL 2015.

ENGL 3140 - Professional and Technical Editing

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem - Online*

Course Fee: \$20.00

Building on the knowledge of technical writing genres and the writing strengths developed in ENGL 3100, this course introduces students to copyediting, comprehensive editing, and the basics of collaborative editing and document management. Technical editing is designed to strengthen students' writing, editing, and visual design skills through attention to detail and application of style, grammar, and usage principles. Additionally, this course focuses on hard copy and soft copy editing principles.

Pre-requisite(s): ENGL 2010 or ENGL 2015.

Suggested Requisite(s): ENGL 3100.

ENGL 3160 - Grant Writing

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$20.00

This class introduces you to the grant writing process and provides you with experience writing actual grant applications in collaboration with a local non-profit organization. By the end of the class you will know the basic elements of grant writing and be able to identify organizational needs; research appropriate funding sources; plan, develop, and write grant proposals.

Pre-requisite(s): ENGL 2010 or ENGL 2015.

ENGL 3190 CEL - Document Design

Credits: (3)

Typically Taught Fall Semester: *Full Sem - Odd Years*

Typically Taught Spring Semester: *Full Sem - Online Even Years*

This course teaches a rhetorical approach to document design. Using the rhetorical principles of audience, purpose, and context, students will discuss sample documents, analyze the layout of documents (both professional documents and ones students create in class), and articulate what makes an effective layout and design (regarding arrangement, emphasis, clarity, conciseness, tone, and ethos). Throughout the course, students will create (both individually and collaboratively) documents that meet client specifications thereby providing practical experience and generating material for their professional portfolios.

Pre-requisite(s): ENGL 2010 or ENGL 2015.

Suggested Requisite(s): ENGL 3100.

ENGL 3210 - Advanced College Writing

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Basic expository techniques combined with other forms of discourse. Emphasis on originality, clarity and practical application for other courses as well as vocation.

Pre-requisite(s): ENGL 2010 or ENGL 2015.

ENGL 3240 - CW: Writing Creative Nonfiction

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course will introduce students to the craft of writing creative nonfiction, including forms such as personal essay, lyric essay, and memoir.

Pre-requisite(s): Any of the following: ENGL 2250, ENGL 2260, or ENGL 2270.

ENGL 3250 - CW: Advanced Fiction Writing

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem, Full Sem - Online*

Students will learn advanced fiction writing skills and strategies. Whether they plan to write novels or short fiction, this class will help them develop their use of plot, character, point of view, narrative structure, setting, image,

wordplay and syntax.

Pre-requisite(s): Any of the following: ENGL 2250, ENGL 2260, or ENGL 2270.

ENGL 3260 - CW: Advanced Poetry Writing

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem, Full Sem - Online*

Students in this course will write and revise their own original poetry. Using their drafts and/or published poems, they will improve their use of line and stanza breaks, imagery, sound and rhythm, poetic structure, and other techniques.

Pre-requisite(s): Any of the following: ENGL 2250, ENGL 2260, or ENGL 2270.

ENGL 3280 - Biographical Writing

Credits: (3)

Typically Taught Fall Semester: *Check with department for course availability.*

Typically Taught Spring Semester: *Full Sem*

Includes autobiographical writing and is oriented strongly toward personal and familial interests. Written assignments include the personal narrative, character sketch, as told to, and conclude with a chapter or two on a projected book-length project. Extensive written and oral input on each assignment from professor and class. Strong emphasis is placed on techniques of research including interviewing, effective characterization, narration and description. Prior experience in imaginative writing and other areas of literature is recommended.

Pre-requisite(s): ENGL 2010 or ENGL 2015 or equivalent.

ENGL 3300 - Children's Literature

Credits: (3)

Typically Taught Summer Semester: *Check with department for course availability.*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Students will study the principles of literature for children with special emphasis on evaluation and selection, classroom and library use, ethnic and cultural diversity, and the development of literacy. Designed to meet the needs of teachers, those preparing to teach and those who work with children in various settings.

Pre-requisite(s): ENGL 2010 or ENGL 2015 or equivalent.

ENGL 3350 - Studies in Literary Genres

Credits: (3)

Variable Title

Typically Taught Summer Semester: *NA*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This variable topics course introduces students to the historical and cultural origins of literary genres, their distinguishing features, and the dynamics of literary development. Genres may include the novel, drama, poetry, creative non-fiction, bildungsroman, the diary, biography, autobiography, satire, and others. It may be taken more than once with different designations.

Pre-requisite(s): ENGL 2010 or ENGL 2015 or equivalent.

May be repeated once for a total of six credit hours.

ENGL 3352 - Studies in World Literary Genres

Credits: (3)

Variable Title

Typically Taught Summer Semester: *Check with department for course availability.*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This variable topics course introduces students to familiar and unfamiliar genres around the world, exploring their distinctive features and their interactions with the cultures and histories they represent. Genres might include poetry and prose, fiction and non-fiction, satire and fable, tragedy and ballad, biography and autobiography, and many others. It may be taken a total of 3 times (for a maximum of 9 credits) with different designations.

Pre-requisite(s): ENGL 2010 or ENGL 2015 or equivalent.

It may be taken a total of 3 times (for a maximum of 9 credits) with different designations.

ENGL 3353 - Genres in Cultural and Media Studies

Credits: (3)

Variable Title

Typically Taught Summer Semester: *Check with department for course availability.*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This variable topics course introduces students to genres in cultural and media studies, their distinguishing features, and the dynamics of their development. Genres may include the novel, digital novel, film, television, social media, advertising, music, and the internet.

Pre-requisite(s): ENGL 2010 or ENGL 2015 or equivalent.

It may be taken a total of 3 times (for a maximum of 9 credits) with different designations.

ENGL 3354 - Genres in Writing and Interdisciplinary Studies

Credits: (3)

Variable Title

Typically Taught Summer Semester: *Check with department for course availability.*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This variable topics course introduces students to interdisciplinary genres, new directions in transcending disciplinary boundaries, or issues in writing and rhetoric. Genres may include various forms of narrative as they intersect with the sciences, social sciences, arts and humanities, health professions, business and economics, applied science and technology, and others.

Pre-requisite(s): ENGL 2010 or ENGL 2015 or equivalent.

It may be taken a total of 3 times (for a maximum of 9 credits) with different designations.

ENGL 3355 - CW: Creative Nonfiction Forms and Craft

Credits: (3)

Typically Taught Summer Semester: *1st Blk, 2nd Blk*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This class asks students to write a number of forms within the genre of creative nonfiction writing, experimenting with narrative shape and the effects of structural choices.

Pre-requisite(s): Any one of the following: ENGL 2250, ENGL 2260, or ENGL 2270.

ENGL 3360 - CW: Short Story Forms and Craft

Credits: (3)

Typically Taught Summer Semester: *2nd Blk, 2nd Blk*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This class asks students to experiment with form and story

structure within the genre of fiction writing, to understand how narrative shape affects the reader's experience.

Pre-requisite(s): And one of the following: ENGL 2250, ENGL 2260, or ENGL 2270.

ENGL 3365 - CW: Novel Forms and Craft

Credits: (3)

Typically Taught Summer Semester: *3rd Blk, 2nd Blk*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This class asks students to experiment with form and structure within the genre of novel writing to understand how narrative shape affects the reader's experience.

Pre-requisite(s): Any one of the following: ENGL 2250, ENGL 2260, or ENGL 2270.

ENGL 3370 - CW: Poetic Forms and Craft

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This class asks students to experiment with form and structure within the genre of poetry writing to understand how line, repetition, rhyme patterns, and shape affect the reader's experience.

Pre-requisite(s): Any one of the following: ENGL 2250, ENGL 2260, or ENGL 2270.

ENGL 3375 - CW: Forms and Craft of Notebooks and Journals

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

This class examines the writer's notebook, reading examples and studying possibilities. Students will keep a writer's notebook inspired by those examples.

ENGL 3380 - CW: Screenwriting Form and Craft

Credits: (3)

Typically Taught Summer Semester: *Check with department for course availability.*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This class examines screenwriting form. Students will write their own original screenplay(s) in this form.

Pre-requisite(s): Any one of the following: ENGL 2250, ENGL 2260, or ENGL 2270.

ENGL 3410 INT - The Teaching of Writing

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Students will develop their own philosophies for teaching writing to middle, junior high, and high school students by exploring current research findings, theoretical approaches and practical strategies. This class is required of English teaching majors and minors. Students are required to complete a grades 7-12 school field experience.

Pre-requisite(s): ENGL 2010 or ENGL 2015 or equivalent, and admitted to Secondary Education program.

Co-Requisite(s): ENGL 3020.

Pre-requisite/Co-requisite: ENGL 2420.

ENGL 3500 HU - Introduction to Shakespeare

Credits: (3)

Typically Taught Fall Semester: *Full Sem - Even Years, Full Sem - Online Odd Years*

This class is an introduction designed to foster a critical appreciation of the plays of Shakespeare. The class is intended for all who wish to gain a greater appreciation for Shakespeare and his work. Students can expect to study a varied selection of Shakespeare's plays and poems, as well as historical, cultural, critical, and performance contexts.

Pre-requisite(s): ENGL 2010 or ENGL 2015 or equivalent.

ENGL 3510 HU/DV - World Literature

Credits: (3)

Typically Taught Summer Semester: *Check with Department*

Typically Taught Fall Semester: *Full Sem, Full Sem - Online*

Typically Taught Spring Semester: *Full Sem, Full Sem - Online*

This is a selection of masterworks from a variety of authors, regions, and eras - expressly to introduce diverse literatures other than British and American. The required readings may vary considerably from semester to semester, according to the instructors' expertise.

Pre-requisite(s): ENGL 2010 or ENGL 2015 or equivalent.

ENGL 3520 HU - Literature of the Natural World

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Check with department for course availability.*

This course engages literary texts that focus on humans in relation to their natural environment. Conceived as a survey course, it attempts to delineate the various traditions of environmental concern, from the ancient past to the present, and to draw attention to the ongoing relevance of such texts. Students will learn how to read closely and carefully, and how to make such literature meaningful for their own daily lives.

Pre-requisite(s): ENGL 2010 or ENGL 2015 or equivalent.

ENGL 3530 - The Literature of Business and Economics

Credits: (3)

Typically Taught Fall Semester: *Check with Department*

Typically Taught Spring Semester: *Check with Department*

This course examines historical and contemporary issues in the world of business and economics through literature, film, and essays. The course will explore concepts such as private property, commodities and natural resources, wage labor, capital, public lands, and globalization. Students will investigate pertinent moral and ethical questions connected with these concepts from both historical and contemporary perspectives, such as the distribution of wealth and poverty, consumption and resource management, competition and conflict, and social (in)stability. The course is designed to improve writing skills, specifically the ability to express complex ideas from a variety of perspectives and to improve critical and creative thinking skills while stressing the importance of learning through writing.

ENGL 3540 - Adaptation Studies

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

This course focuses on the process by which literary works and other texts are adapted into other forms and media, and on the product of that adaptive process. Works may include traditional text-to-film adaptations, as well as more non-traditional forms such as graphic novels, music, television, the Internet, and more.

Pre-requisite(s): ENGL 2010 or ENGL 2015.

ENGL 3610 - American Literature I

Credits: (3)

Typically Taught Summer Semester: *Check with department for course availability.*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course will introduce students to the study of American Literature from its earliest known works to those produced prior to the American Civil War. We will examine its history, major works, and literary concepts.

Pre-requisite(s): ENGL 2010 or ENGL 2015.

ENGL 3620 - American Literature II

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course will introduce students to the study of American Literature from the American Civil War to the contemporary period. We will examine its history, major works, and literary concepts.

Pre-requisite(s): ENGL 2010 or ENGL 2015.

ENGL 3650 - British Literature I

Credits: (3)

Typically Taught Summer Semester: *Check with Department*

Typically Taught Fall Semester: *Full Sem, Full Sem - Online Even Years*

Typically Taught Spring Semester: *Full Sem*

This course will introduce students to the study of British Literature from its earliest known works to those produced in the eighteenth century. We will examine its history, major works, and literary concepts.

Pre-requisite(s): ENGL 2010 or ENGL 2015.

ENGL 3660 - British Literature II

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course will introduce students to the study of British Literature from the eighteenth century to the contemporary period. We will examine its history, major works, and literary concepts.

Pre-requisite(s): ENGL 2010 or ENGL 2015.

ENGL 3730 - Literatures of Cultures and Places

Credits: (3)

Variable Title

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Check with department for course availability.*

This variable topics course examines literature, cultures, and nations beyond England and America. Students will be introduced to the ways in which texts are closely tied to the geographical and cultural space as well as the historical movement from which they emerge. The course may focus on a single national culture or, alternately, offer representative works from various cultures.

Pre-requisite(s): ENGL 2010 or ENGL 2015 or equivalent.

It may be repeated 3 times with different designations.

ENGL 3750 HU - Topics and Ideas in Literature

Credits: (3)

Variable Title

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This variable topics course focuses on the various social, philosophical, and political themes emerging in literary texts. Students will learn the critical skills necessary to identify the intellectual currents in the texts under consideration, to engage in focused discussion, and to probe the various intentions of any act of writing.

Pre-requisite(s): ENGL 2010 or ENGL 2015 or equivalent.

It may be repeated 3 times with different designations.

ENGL 3752 - Topics and Ideas in World Literature and Language

Credits: (3)

Variable Title

This variable topics course focuses on the various social, philosophical, and political themes emerging in literary texts from around the world excluding British and American texts. Students will learn the critical skills necessary to identify the intellectual currents in the texts under consideration, to engage in focused discussion, and to probe the various intentions of any act of writing.

Pre-requisite(s): ENGL 2010 or ENGL 2015 or equivalent.

It may be taken a total of 3 times (for a maximum of 9 credits) with different designations.

Note: Check with Department for course availability.

ENGL 3753 - Topics and Ideas in Cultural and Media Studies

Typically Taught Spring Semester: *Full Sem*

This variable topics course focuses on themes manifest in the field of writing and in interdisciplinary studies. This course may focus on issues in writing, rhetoric, and other disciplines as they intersect with English. Students will learn the critical skills necessary to identify the intellectual currents in the texts under consideration, to engage in focused discussion, and to probe the various intentions of any text.

Pre-requisite(s): ENGL 2010 or ENGL 2015 or equivalent.

It may be taken a total of 3 times (for a maximum of 9 credits) with different designations.

ENGL 3755 - Topics in English Teaching

Credits: (3)

Variable Title

Typically Taught Fall Semester: *Full Sem*

This variable topics course focuses on critical ideas in the teaching of English. The course may consider social, political, artistic, environmental, or philosophical themes. Students in the class will learn to translate intellectual movements to pedagogical practices and approaches. May be taken twice for a total of 6 credits.

Pre-requisite(s): ENGL 2010 or ENGL 2015 or equivalent and admitted to Secondary Education program.

ENGL 3810 - Experimental Courses

Credits: (3)

Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript. Refer to Experimental Courses.

ENGL 3840 - Methods and Practice in Tutoring Writers

Credits: (1-3)

Typically Taught Fall Semester: *Full Sem*

Controlled experience in tutoring student writers in all disciplines. This course is only for people who are actually employed as a tutor.

Pre-requisite(s): ENGL 2010 or ENGL 2015 or equivalent.

ENGL 3850 INT - Methods and Practice in Tutoring and Mentoring ESL Students

Credits: (1-3)

This course trains students who are native speakers of English or who are second language learners of English at native or near native levels of proficiency to work or volunteer in the ESL Program as tutors, classroom aides, mentors, and as language informants leading conversation groups.

Pre-requisite(s): ENGL 2010 or ENGL 2015 or equivalent.

Note: Check with Department for course availability.

ENGL 3880 - Philosophy and Literature

Credits: (3)

Typically Taught Spring Semester: *Check with Department*

A study of the interrelationships between ideas that shape the course of history and the poetry, prose, and/or drama of the periods that produce these ideas.

Pre-requisite(s): ENGL 2010 or ENGL 2015 or equivalent.

ENGL 4010 - Topics in Language Study

Credits: (3)

Variable Title

Typically Taught Fall Semester: *Check with Department*

Typically Taught Spring Semester: *Check with Department*

This variable topics course explores areas of study such as advanced grammar, sociolinguistics, language and the law,

linguistics and composition, linguistics and language acquisition, or linguistics and literature, among others, as determined by the instructor. A previous language course or consultation with the instructor is recommended before enrolling.

Pre-requisite(s): ENGL 2010 or ENGL 2015 or equivalent.

It may be taken more than once with different designations.

Note: Check with Department for course availability.

ENGL 4100 - Issues in Professional and Technical Writing

Credits: (3)

Variable Title

Typically Taught Fall Semester: *Full Sem - Online*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$20.00

This variable topics course focuses on specific issues in the ever-evolving field of professional and technical writing. Recent issues include indexing, professionalization, theoretical approaches, and discipline-specific emphases such as writing in the sciences and writing for the Web.

Pre-requisite(s): ENGL 2010 or ENGL 2015.

Suggested Requisite(s): ENGL 3100.

It may be taken up to four times (for a total of 12 credit hours) with different designations to fulfill electives and must be pre-approved by an advisor.

ENGL 4110 - Content Management

Credits: (3)

Typically Taught Fall Semester: *Full Sem - Even Years; Full Sem - Online Odd Years*

Typically Taught Spring Semester: *Check with Department*

Course Fee: \$20.00

This class teaches the theory and application of content management. Students will learn how to evaluate content, divide content into reusable elements, label these elements, and then re-configure them into usable structures. Using the principles of single sourcing, modular writing, and structured authoring, students will map content for reuse, evaluate available authoring tools, implement state-of-the-art technologies, and develop project strategies.

Pre-requisite(s): ENGL 2010 or ENGL 2015.

Suggested Requisite(s): ENGL 3100.

ENGL 4120 CEL - Seminar and Practicum in Professional and Technical Writing

Credits: (3)

Typically Taught Summer Semester: *NA*

Typically Taught Fall Semester: *Full Sem - Odd Years*

Typically Taught Spring Semester: *Full Sem - Online, Even Years*

This course serves as a capstone for the minor and emphasis, preparing students for immediate job placement. In the seminar, students review issues and strategies of professional and technical writing and prepare portfolios for job interviews. The practicum is based on an internship or cooperative work experience in the community, with industry, or with an on-campus organization. The internship is the most time-intensive aspect of the course.

Pre-requisite(s): ENGL 2010 or ENGL 2015.

Suggested Requisite(s): ENGL 3100.

ENGL 4410 - Strategies and Methodology of Teaching ESL/Bilingual

Credits: (3)

Typically Taught Spring Semester: *Full Sem odd years*

Course Fee: \$40.00

This course emphasizes practical strategies and methods of teaching ESL/Bilingual in the public school systems of this country.

Pre-requisite(s): ENGL 2010 or ENGL 2015 or equivalent.

ENGL 4420 - English Phonology and Syntax for ESL/Bilingual Teachers

Credits: (3)

Typically Taught Summer Semester: *Odd-numbered years*

Typically Taught Spring Semester: *Full Sem*

This course provides the essential foundation for ESL/Bilingual teachers in the workings of the English language: pronunciation and spelling systems, word-forming strategies and sentence structure patterns.

Pre-requisite(s): ENGL 2010 or ENGL 2015 or equivalent.

ENGL 4450 - ESL/Bilingual Assessment: Theory, Methods, and Practices

Credits: (3)

Typically Taught Summer Semester: *Full Sem - even-numbered years*

Typically Taught Fall Semester: *Full Sem*

This course explores how to effectively evaluate and implement assessment processes for ESL/Bilingual pupils in public schools. Students will gain experience with both

standardized tests and authentic assessment.

Pre-requisite(s): ENGL 2010 or ENGL 2015 or equivalent.

ENGL 4520 - American Literature: Early and Romantic

Credits: (3)

This historical survey follows waves of European immigration and chronicles the effects of those on the American natives. The class then moves through the Revolutionary War and finishes with the relatively short but intense age of American Romanticism, which occurred in the decades just before the Civil War. The diverse writers in this period include such figures as Columbus, William Bradford, Anne Bradstreet, Benjamin Franklin, Washington Irving, Nathaniel Hawthorne, Edgar Allan Poe, Harriet Beecher Stowe, Henry David Thoreau, Frederick Douglass, Herman Melville, and Walt Whitman.

Pre-requisite(s): ENGL 3080.

Note: Check with Department for course availability.

ENGL 4530 - American Literature: Realism and Naturalism

Credits: (3)

This historical survey typically runs from the Civil War to WWI - emphasizing reconstruction, laissez-faire economics, growing imperialism, and universal suffrage. The diverse writers in this survey include such figures as Mark Twain, W. D. Howells, Sarah Orne Jewett, Henry James, Kate Chopin, Booker T. Washington, W. E. B. Du Bois, Stephen Crane, Jack London, Frank Norris, Theodore Dreiser, Mary Austin, and Henry Adams.

Pre-requisite(s): ENGL 3080.

Note: Check with Department for course availability.

ENGL 4540 - American Literature: Modern

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

This historical survey focuses on the first half of the 20th century, when the United States went through a series of profound political and social changes, such as its entry into World War I and II, Prohibition, The Red Scare, Suffrage, the advent of the mass media, and Progressivism. Drawing on a variety of genres and media (including painting and film), the course will study developments in the New Negro Renaissance, Greenwich Village bohemianism, the Provincetown Players, "high" modernism, and the Lost Generation. Representative writers of the period include:

Langston Hughes, Zora Neale Hurston, Nella Larsen, Edna St. Vincent Millay, Mina Loy, Eugene O'Neill, Susan Glaspell, Ezra Pound, John Dos Passos, Amy Lowell, William Carlos Williams, Gertrude Stein, Ernest Hemingway, and e.e. cummings.

Pre-requisite(s): ENGL 3080.

Note: Check with Department for course availability.

ENGL 4550 - American Literature: Contemporary

Credits: (3)

Typically Taught Fall Semester: *Check with department for course availability.*

Typically Taught Spring Semester: *Full Sem*

This course focuses on American literature from the 1950s to the present within the context of the dramatic political and cultural changes that have shaped contemporary American culture, such as the Cold War, Vietnam, the Civil Rights movement, feminism and multiculturalism. Like its modernist predecessor, it ranges across genres and media to survey various emergent traditions and tendencies in contemporary and postmodern US letters. Representative writers of this period include: Arthur Miller, Flannery O'Connor, Elizabeth Bishop, Tillie Lerner Olsen, Ralph Ellison, James Baldwin, Allen Ginsberg, Cynthia Ozick, Amiri Baraka, Maxine Hong Kingston, Rita Dove, Toni Morrison, Thomas Pynchon, E. L. Doctorow.

Pre-requisite(s): ENGL 3080.

ENGL 4560 - Contemporary Literature for Creative Writers

Credits: (3)

Typically Taught Fall Semester: *Full Sem, Full Sem - Online*

Typically Taught Spring Semester: *Full Sem, Full Sem - Online*

This course introduces students to the work of contemporary writers. Looking at variety of projects, including collections and individual pieces, we will examine their stylistic choices and the effects of those choices.

Pre-requisite(s): ENGL 3080.

ENGL 4610 - British Literature: Medieval

Credits: (3)

Typically Taught Fall Semester: *Check with Department*

Typically Taught Spring Semester: *Check with Department*

This historical survey runs from the eighth century to the

end of the fifteenth century - roughly from the reign of Alfred the Great to Henry VII. Some of the more recognizable works include Beowulf, The Wanderer, Geoffrey Chaucer's Canterbury Tales, early histories of King Arthur, Thomas Malory's Le Morte D'Arthur, Julian of Norwich's Showings, Everyman, and Gawain and the Green Knight. Works written in Anglo-Saxon English and northern medieval dialects will be read in modern translations.

Pre-requisite(s): ENGL 3080.

ENGL 4620 - British Literature: Renaissance

Credits: (3)

Typically Taught Fall Semester: *Check with Department*

Typically Taught Spring Semester: *Check with Department*

This historical survey runs from just before the middle of the sixteenth century to just after the middle of the seventeenth - roughly from the reign of Henry VIII, through the reign of Elizabeth Tudor, to the restoration of Charles II. Some of the more recognizable figures of this study are Christopher Marlowe, John Donne, Ben Jonson, John Milton, Anne Askew, Aemilia Lanyer, Mary Wroth, and Robert Herrick.

Pre-requisite(s): ENGL 3080.

Note: (Note: this survey does not typically try to do justice to its largest figure, Shakespeare - for whom the department has established ENGL 4730: Studies in Shakespeare.) Check with department for course availability.

ENGL 4630 - British Literature: Neoclassical and Romantic

Credits: (3)

Typically Taught Fall Semester: *Check with Department*

Typically Taught Spring Semester: *Check with Department*

This historical survey links two periods: the first has frequently been referred to as the Enlightenment of the Eighteenth Century and includes such figures as Alexander Pope, Anne Finch, Mary Montagu, Jonathan Swift, and Samuel Johnson. The second period covers the relatively short but intense age of English Romanticism - popular because of such writers as William Blake, William Wordsworth, Samuel Coleridge, Lord Byron, Mary Shelley, Percy Bysshe Shelley, Mary Wollstonecraft, Sir Walter Scott, Thomas De Quincey, and John Keats.

Pre-requisite(s): ENGL 3080.

ENGL 4640 - British Literature: Victorian

Credits: (3)

Typically Taught Fall Semester: *Check with Department*

Typically Taught Spring Semester: *Check with Department*

This historical survey follows the long span of Queen Victoria's life: from about 1837 when she came to the throne to 1901 when her funeral widely symbolized the passing of the age. Not merely a placid time of Victorian propriety, this era was marked by such philosophical upheavals as that which followed Darwin's Origin of Species. Some of the notable writers are Elizabeth Gaskell, George Eliot, Lord Alfred Tennyson, Robert Browning, Emily Bronte, Charles Dickens, Matthew Arnold, and Thomas Carlyle. This era is marked by the Industrial Revolution, Utilitarianism (Mill), the rise of science and evolution theory (Darwin), socialism (Marx and Engels); Psychology (Freud), resurgence of art (the Pre-Raphaelites), and imperialism (Kipling). Notable writers include: Carlyle, Tennyson, the Brownings, Arnold, Wilde, Dickens, the Brontes, Eliot, and Hardy.

Pre-requisite(s): ENGL 3080.

ENGL 4650 - British Literature: Modern

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Check with Department*

This historical survey focuses on the first half of the twentieth century, a time of great social change for Great Britain and Ireland that led to a rich outpouring of traditional and experimental writing. A variety of writers will be studied in this course in connection with such key developments as the critique of Empire (Joseph Conrad, E.M. Forster); the Abbey Theatre and the Irish Literary Renaissance (Lady Gregory, W.B. Yeats); World War I (Siegfried Sassoon, Vera Brittain); High Modernism (T.S. Eliot, James Joyce, D.H. Lawrence, Virginia Woolf, Katherine Mansfield); divergent poetic world-views (W.H. Auden, Dylan Thomas); and World War II, the collapse of Empire, and dystopian visions (Evelyn Waugh and George Orwell).

Pre-requisite(s): ENGL 3080.

ENGL 4660 - British Literature: Contemporary

Credits: (3)

Typically Taught Fall Semester: *Check with Department*

Typically Taught Spring Semester: *Full Sem*

This historical survey examines British and Anglo-Irish literature since 1950 as Britain metamorphoses from world power to an integral member of the European Community.

The course asks what it means to be a "British" writer in the second half of a century increasingly multicultural in outlook. Possible focuses include post-war disillusion (William Golding); Absurdism and Postmodernism (Samuel Beckett, Tom Stoppard); neo-Romanticism (Ted Hughes, Seamus Heaney, Nuala Ni Dhomhnaill); experimentalism and magic realism (Doris Lessing, Salman Rushdie, Angela Carter); innovative historical fiction (John Fowles, A.S. Byatt); and legacies of Empire in a postcolonial world (Jean Rhys, V.S. Naipaul, Kazuo Ishiguro, Anita Desai).

Pre-requisite(s): ENGL 3080.

Note: Check with Department for course availability.

ENGL 4710 - Eminent Authors

Credits: (3)

Variable Title

Typically Taught Fall Semester: *Check with Department*

Typically Taught Spring Semester: *Check with Department*

This variable topics course features a single author or several authors. Students may study authors such as Sir Arthur Conan Doyle, Ralph Waldo Emerson, Emily Dickinson, Walt Whitman, Virginia Woolf, or Toni Morrison, in order to gain a greater understanding of the social, cultural, and aesthetic significance of their work.

Pre-requisite(s): ENGL 3080.

May be taken up to 3 times with different designations.

Note: Check with Department for course availability.

ENGL 4712 - Eminent World Authors

Credits: (3)

Variable Title

Typically Taught Fall Semester: *Check with Department*

Typically Taught Spring Semester: *Check with Department*

This variable topics course features a single author or several authors. Students may study global anglophone writers and/or in translation authors such as Derek Walcott, Arundhati Roy, Chinua Achebe, Gabriel García Márquez, Nadine Gordimer, Margaret Atwood, Mo Yan, Fyodor Dostoevsky, Naguib Mahfouz, and Umberto Eco in order to gain a greater understanding of the social, cultural, and aesthetic significance of their work.

Pre-requisite(s): ENGL 3080.

It may be taken a total of 3 times (for a maximum of 9 credits) with different designations.

Note: Check with Department for course availability.

ENGL 4713 - Eminent Authors in Cultural and Media Studies

Credits: (3)

Variable Title

Typically Taught Fall Semester: *Check with Department*

Typically Taught Spring Semester: *Check with Department*

This variable topics course features a single author or several authors. Students may study foundational and emerging authors in this dynamic and influential field in order to gain a greater understanding of the social, cultural, and aesthetic significance of their work.

Pre-requisite(s): ENGL 3080.

It may be taken a total of 3 times (for a maximum of 9 credits) with different designations.

ENGL 4730 - Studies in Shakespeare

Credits: (3)

Typically Taught Fall Semester: *Check with Department*

Typically Taught Spring Semester: *Full Sem*

This class is intended for English majors and minors seeking a deeper understanding of Shakespeare's work. Students can expect to do close readings of at least five plays and to study such secondary materials as literary criticism and historical background.

Pre-requisite(s): ENGL 3080.

Note: Check with Department for course availability.

ENGL 4760 - Irish Literature

Credits: (3)

Typically Taught Fall Semester: *Check with Department*

Typically Taught Spring Semester: *Check with Department*

This course examines the distinctive temperament and outlook of both the Gaelic and Anglo-Irish traditions in such writers as Aogán Ó Rathaille, Eibhlín Dubh Ní Chonaill, Jonathan Swift, Lady Gregory, Oscar Wilde, John Millington Synge, William Butler Yeats, James Joyce, George Bernard Shaw, Samuel Beckett, Seamus Heaney, Eavan Boland, and Nuala Ni Dhomhnaill. The first portion of the course studies the body of literature from the sixth century through 1900; the remainder of the course focuses on modern and contemporary texts. Key themes to be examined, always in the larger context of Irish history as a whole, include the Irish use of words as weapons, the place of gender in Irish writing, and the intriguing nature of Irish - particularly as opposed to English - identity.

Pre-requisite(s): ENGL 3080.

ENGL 4801 - A&H Leadership Lecture Series

Credits: (1)

Typically Taught Spring Semester: *Full Sem*

This one-credit elective course will give arts and humanities' majors the opportunity to interact with successful guest lecturers whose undergraduate backgrounds are in the arts and humanities. Lecturers will clarify how the talents and skills associated with their degrees have contributed to their pursuit of successful careers and lives.

ENGL 4830 - Directed Readings

Credits: (1-3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Individual readings supervised by a faculty member.

Pre-requisite(s): ENGL 2010 or ENGL 2015 or equivalent.

May be repeated twice with a maximum of 6 credit hours.

Note: Check with Department for course availability.

ENGL 4890 - Cooperative Work Experience

Credits: (1-6)

A continuation of ENGL 2890 Cooperative Work Experience. Open to all students.

Pre-requisite(s): ENGL 2010 or ENGL 2015 or equivalent.

May be repeated 5 times with a maximum of 6 credit hours.

Note: Check with department for current course offerings.

ENGL 4900 - Internships in Literary and Textual Studies

Credits: (1-3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course allows students to receive academic credit for on-the-job learning in approved work environments and for approved projects. A maximum of 3 credit hours may be counted toward the major. Credit/No-Credit only.

Pre-requisite(s): English major with a Junior or Senior standing; ENGL 2010 or ENGL 2015, and ENGL 3080. May be repeated for up to 6 credit hours.

ENGL 4910 - Capstone in English Teaching

Credits: (1)

Typically Taught Spring Semester: *Full Sem*

This course is designed to synthesize a student's knowledge and training. The course will assist students in applying their content knowledge during the required teaching field experience. The course will also serve as a bridge to future employment by instructing students in portfolios, resumes, and recommendations. The class will underscore the acquisition of dispositional traits that produce responsible and effective teaching practices.

Pre-requisite(s): ENGL 2010 or ENGL 2015 or equivalent and admitted to Secondary Education program, ENGL 2420, ENGL 3410, ENGL 3020, and ENGL 3755.

ENGL 4920 - Short Courses, Workshops, Institutes and Special Programs

Credits: (1-4)

Variable Title

Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript.

Pre-requisite(s): ENGL 1010 with a "C" grade or better or equivalent.

May be repeated 3 times with a maximum of 4 credit hours.

Note: Check with Department for course availability.

ENGL 4930 - Visiting Writing Master Class

Credits: (1)

Typically Taught Fall Semester: *1st Blk, 2nd Blk*

Typically Taught Spring Semester: *1st Blk, 2nd Blk*

In this class, students will study the art and craft of creative writing, studying under the guidance of a nationally recognized visiting writer who will instruct them on writing theory and/or provide a short writing workshop of work from each student. Credit/No Credit grading.

May be repeated 3 times up to 4 credit hours.

ENGL 4940 - CW: Senior Project

Credits: (3)

Typically Taught Fall Semester: *Check with department for course availability.*

Typically Taught Spring Semester: *Full Sem*

This course offers an opportunity for students to choose a writing project and workshop it with their peers under the

direction of the instructor. Writing skills will be developed and honed through intensive writing projects which could include a variety of genres: nonfiction, creative nonfiction, fiction, (short story collection, novel), biography, autobiography, poetry, etc. The course is designed for students with a strong writing background.

Pre-requisite(s): ENGL 3250 or ENGL 3260 or ENGL 3280 or ENGL 3350.

ENGL 4960 INT - Metaphor: Editing the Student Literary Journal

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

Designed for students selected as staff for Weber State's Literary Journal, Metaphor. Therefore, it is a hands-on workshop centering on all aspects of journal production: creating an editorial policy, advertisement, selection, layout, copy editing, preparing for print, marketing, distribution, etc. The journal itself is the final product. The staff supports writing and visual arts across campus through participation in several ancillary projects.

Pre-requisite(s): ENGL 2010 or ENGL 2015 or equivalent.

May be repeated twice with a maximum of 6 credit hours.

ENGR 1000 - Introduction to Engineering

Credits: (2)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Introduction to engineering for students in the pre-engineering program. Engineering as a profession and career opportunities. Fundamentals of engineering design and analysis using the computer. Prerequisite/Co-requisite: MATH 1060 or MATH 1080 or equivalent.

Pre-requisite/Co-requisite: MATH 1060 or MATH 1080 or equivalent.

ENGR 2010 - Statics

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Vector mechanics, force and moment systems, equilibrium of particles and rigid bodies, friction and moments of inertia.

Pre-requisite(s): MATH 1210 and PHYS 2210.

ENGR 2080 - Dynamics

Credits: (4)

Typically Taught Spring Semester: *Full Sem*

Fundamentals of position, velocity and acceleration. Kinematics and kinetics of particles. Newton's laws, conservation of momentum and energy. Dynamics of rigid bodies.

Pre-requisite(s): ENGR 2010 with a grade of "C" or higher.

ENGR 2140 - Mechanics of Materials

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

Fundamentals of stress and strain, Hooke's law, torsion, bending of beams, combined stresses and design of members.

Pre-requisite(s): ENGR 2010 with a grade of "C" or higher.

ENGR 2160 - Materials Science and Engineering

Credits: (4)

Typically Taught Spring Semester: *Full Sem*

Combined lecture/laboratory course that introduces the fundamentals of atomic and microscopic structure of metals, polymers, ceramics and composite materials, and how these structures affect mechanical, thermal, electrical and optical properties.

Pre-requisite(s): CHEM 1210.

Co-Requisite(s): ENGR 2140.

ENGR 2210 - Electrical Engineering for Non-majors

Credits: (4)

Typically Taught Fall Semester: *Full Sem*

Combined lecture/laboratory course as an introduction to electrical engineering for non-electrical engineers. Fundamentals of DC and AC circuits, digital circuits, and power circuits.

Pre-requisite(s): MATH 1210.

ENGR 2300 - Thermodynamics

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Thermodynamic properties, equations of state, first and second laws of thermodynamics. Analysis of open and closed systems, availability and irreversibility, power and refrigeration cycles.

Pre-requisite(s): MATH 1210 and PHYS 2210.

ENGR 2920 - Short Courses, Workshops, Institutes and Special Programs

Credits: (1-4)

Variable Title

Consult the class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript.

May be repeated 5 times with a maximum of 6 credit hours.

ENTR 1001 - Principles of Entrepreneurship

Credits: (1)

This course explores the process and theory designed to help ideation become customer needs driven to buffer against startup failure. By the end of the course, students will have created, tested and updated a business model based entirely upon customer feedback and customer development methodologies as described in Business Model Generation and Start-up Owner's Manual textbooks.

Note: This course is not currently offered.

ENTR 1002 - Startup Innovation

Credits: (3)

Typically Taught Fall Semester: *Full Sem - Online*

Typically Taught Spring Semester: *Full Sem - Online*

This course will present a broad overview of entrepreneurship and teach students how to identify and create valuable entrepreneurial opportunities. This is accomplished via proven process and theory designed to help ideation become customer needs driven instead of based on the instincts of the entrepreneur. Students will create, test and update a business model based entirely upon customer feedback and customer development methodologies as described in Business Model Generation and Startup Owners Manual textbooks. This class will also have students spending time 'out of the classroom'-

learning about what customers want and will pay for through in-person prototype testing, iteration and feedback.

ENTR 1003 - Ideation and Customer Development: Testing Ideas with Customers

Credits: (1.5)

This course explores the process and theory designed to help ideation become customer needs driven to buffer against startup failure. By the end of the course, students will have created, tested and updated a business model based entirely upon customer feedback and customer development methodologies as described in Business Model Generation and Start-up Owner's Manual textbooks.

Pre-requisite(s): ENTR 1001, BSAD 2899 or ECON 2899.

Note: This course is not currently offered.

ENTR 1004 - Entrepreneurial Finance: Bootstrapping, Accounting & Survival Tactics

Credits: (3)

Typically Taught Fall Semester: *1st Blk*

Typically Taught Spring Semester: *1st Blk*

This course presents traditional and non-traditional financing techniques appropriate for the entrepreneurial business start-up. Students will explore the application of corporate finance tools to new venture and private equity transactions including forecast simulations and the application of real options. The course will view finance from the entrepreneur, lender and investor's perspectives. By the end of the course students will be able to evaluate and apply a range of financial techniques for business start-up purposes.

Pre-requisite(s): ENTR 1002.

ENTR 2001 - Sales and Marketing: Scaling a Successful Business Model

Credits: (3)

Typically Taught Fall Semester: *2nd Blk*

Typically Taught Spring Semester: *2nd Blk*

This course takes students who have successfully identified a start-up and teaches them the process of customer development, product development, business models and selling ideas to investors and customers. This includes examining a range of marketing techniques that are available for low to no cost. This course will look at alternatives to these traditional methods and students will, through hands on efforts, test these methods with real customers. By the end of the course students will be able to

analyze business ideas for commercial viability.

Pre-requisite(s): ENTR 1004.

ENTR 2002 - Marketing Strategy for Small Business

Credits: (1)

Typically Taught Summer Semester: *NA*

Typically Taught Fall Semester: *Full Sem - Online*

Typically Taught Spring Semester: *Full Sem - Online*

This course introduces students to marketing methods used by startups and early-stage companies with a particular emphasis on pre-launch marketing strategies. This course seeks to develop the student's understanding of delivering value, standing out from the competition, and having a compelling reason to exist. We will discuss differentiation, branding, targeting, and leveraging the power of collaborations (with existing brands, influencers and distribution partners) to gain instant traction in the marketplace. This course will use lectures, class discussions, assignments and a final project based on the student's business idea.

ENTR 2003 - Marketing Execution for Small Business

Credits: (1)

Typically Taught Summer Semester: *NA*

Typically Taught Fall Semester: *Full Sem - Online*

Typically Taught Spring Semester: *Full Sem - Online*

This course introduces students to marketing methods used by startups and early-stage companies. We will discuss differentiation, branding, targeting, and leveraging the power of collaborations (with existing brands, influencers and distribution partners) to gain instant traction in the marketplace. This course will use lectures, class discussions, and assignments to examine existing companies and how they executed various marketing tactics.

ENTR 2004 - Branding for Small Business

Credits: (1)

Typically Taught Summer Semester: *NA*

Typically Taught Fall Semester: *Full Sem - Online*

Typically Taught Spring Semester: *Full Sem - Online*

Branding for Small Business takes you through the process of identifying an innovation opportunity to create a new product and/or service that can generate profitable revenue for an established organization (aka: corporate innovation or non-profit innovation). In this course, students take on

the role of managers, both proposing an innovation project and evaluating other innovation projects on behalf of the organization. Managers use a disciplined approach to identify an important customer "job" that's not getting done well with existing solutions. Managers precisely and accurately define important and unsatisfied customer needs for this job and propose a new solution that can profitably satisfy those needs better than competing alternatives.

ENTR 2005 - Product to Market

Credits: (1)

Typically Taught Summer Semester: *NA*

Typically Taught Fall Semester: *Full Sem - Online*

Typically Taught Spring Semester: *Full Sem - Online*

Entering this course, you will move forward with validating in the market an opportunity you have identified that you believe is a high-potential demand creation opportunity. It is expected that you have already 1) verified the customers' job priorities, 2) verified that your value proposition is compelling to those customers, 3) designed a viable business model that you believe can profitably fulfill the value proposition, 4) ascertained an exhaustive set of value targets to inform solution design and 5) determined a demand creation strategy for commercializing the proposed solution (steps 1-5 in the AVID methodology). In this course, you'll continue through the AVID cycle, moving deeper into the discovery process.

ENTR 2006 - E-Commerce for Small Business

Credits: (1)

Typically Taught Fall Semester: *Full Sem - Online*

Typically Taught Spring Semester: *Full Sem - Online*

This course will help you establish an e-commerce foundation for your business that can be built upon as you grow. We'll learn the steps needed to help your business start selling online. From which platform to use, to a growth strategy once a foundation is built, this course will aid your journey in becoming digitally mature entrepreneurs. I'm not a traditional professor, so this class probably won't follow traditional guidelines. Innovation, experiences gained, and execution of principles taught will be more important than papers written or assignments turned in.

ENTR 2007 - Product Design & Prototyping for Small Business

Credits: (1)

Typically Taught Summer Semester: *NA*

Typically Taught Fall Semester: *Full Sem - Online*

Typically Taught Spring Semester: *Full Sem - Online*

This course presents the overall process of taking an idea through to a manufactured product ready for marketing and selling. Starting from the initial product idea, each lecture will cover a step in the process. Though specific skills and techniques will be covered, the goal is to understand primarily how to manage the process of design and development successfully. Students will learn to analytically vet ideas at the beginning and continually through the design and development cycle. They will also research successful products online and in-person, and understand what factors contributed to this effectiveness.

ENTR 2008 - Legal Foundations for Small Business

Credits: (1)

Typically Taught Summer Semester: *NA*

Typically Taught Fall Semester: *Full Sem - Online*

Typically Taught Spring Semester: *Full Sem - Online*

This course is concerned with understanding and navigating some of the top legal issues facing business today. It is designed specifically for individuals who are, or intend to become, small business owners. The course has a dual focus on developing you: (1) as a more analytical and effective business owner, and (2) leader.

ENTR 2009 - Money Management for Small Business

Credits: (1)

Typically Taught Summer Semester: *NA*

Typically Taught Fall Semester: *Full Sem - Online*

Typically Taught Spring Semester: *Full Sem - Online*

This course covers basic financial statements, creating pro-forma statements and analysis of financial statements. The course will view finance from the entrepreneur, lender and investor's perspectives. By the end of the course students will be able to evaluate and apply a range of financial techniques for business startup purposes.

ENTR 2010 - Funding For Small Business

Credits: (1)

Typically Taught Summer Semester: *NA*

Typically Taught Fall Semester: *Full Sem - Online*

Typically Taught Spring Semester: *Full Sem - Online*

This course presents traditional and non-traditional financing techniques appropriate for the entrepreneurial business startup. The course will view finance from the

entrepreneur, lender and investor's perspectives. By the end of the course students will be able to evaluate and apply a range of financial techniques for business startup or expansion purposes.

ENTR 2011 - Results-Focused Leadership

Credits: (1)

Typically Taught Summer Semester: *NA*

Typically Taught Fall Semester: *Full Sem - Online*

Typically Taught Spring Semester: *Full Sem - Online*

This course is concerned with identifying, evaluating, and supporting metrics which promote outcomes which are important for your venture. It is designed specifically for individuals who are, or intend to become, small business owners. The course has a dual focus on developing you: (1) results-focused analytical abilities, and (2) leadership approach in directing/promoting employee growth. It is designed to give you insight into your own attitudes, beliefs, and leadership philosophy, to provide you with assessment tools that will help you diagnose, understand, and develop more effective and influential leadership programs for your business. It is also designed to provide skill development in important areas such as leadership, performance enhancement, teamwork, communication, and feedback-giving.

ENTR 2012 - People Management for Small Business

Credits: (1)

Typically Taught Summer Semester: *NA*

Typically Taught Fall Semester: *Full Sem - Online*

Typically Taught Spring Semester: *Full Sem - Online*

This course is concerned with understanding and managing the human resources of a small business. It is designed specifically for individuals who are, or intend to become, small business owners. The course has a dual focus on developing you: (1) as a more analytical and effective manager, and (2) leader. It is designed to give you insight into your own attitudes, beliefs, and management philosophy, to provide you with analytical tools that will help you diagnose, understand, and develop solutions to management problems. It is also designed to provide skill development in important areas such as leadership, performance enhancement, teamwork, communication, and feedback-giving.

ENTR 2810 - Experimental

Credits: (1-6)

Experimental

Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript.

Students may repeat experimental courses with different titles up to 5 times for credit.

ENTR 2810 - Product Design & Prototyping for Small Business

Credits: (1)

Experimental

This course presents the overall process of taking an idea through to a manufactured product ready for marketing and selling. Starting from the initial product idea, each lecture will cover a step in the process and. Though specific skills and techniques will be covered, the goal is to understand primarily how to manage the process of design and development successfully.

Students will learn to analytically vet ideas at the beginning and continually through the design and development cycle. They will also research successful products online and in-person, and understand what factors contributed to this effectiveness.

ENTR 2810 - Product to Market

Credits: (1)

Experimental

Entering this course, you will move forward with validating in the market an opportunity you have identified that you believe is a high-potential demand creation opportunity. It is expected that you have already 1) verified the customers' job priorities, 2) verified that your value proposition is compelling to those customers, 3) designed a viable business model that you believe can profitably fulfill the value proposition, 4) ascertained an exhaustive set of value targets to inform solution design and 5) determined a demand creation strategy for commercializing the proposed solution (steps 1-5 in the AVID methodology). In this course, you'll continue through the AVID cycle, moving deeper into the discovery process.

ENTR 2810 - Results-Focused Leadership

Credits: (1)

Experimental

This course is concerned with identifying, evaluating, and supporting metrics which promote outcomes which are impo

rtant for your venture. It is designed specifically for individuals who are, or intend to become, small business owners.

The course has a dual focus on developing your: (1) results-focused analytical abilities, and (2) leadership approach in directing/promoting employee growth. It is designed to give you insight into your own attitudes, beliefs, and leadership philosophy, to provide you with assessment tools that will help you diagnose, understand, and develop more effective and influential leadership programs for your business. It is also designed to provide skill development in important areas such as leadership, performance enhancement, teamwork, communication, and feedback-giving.

ENTR 3002 - Scale & Exit

Credits: (3)

Typically Taught Fall Semester: *Full Sem - Online*

Typically Taught Spring Semester: *Full Sem - Online*

The aim of this course is for students to develop a business model that they will validate and iterate via paying and participating customers including managing budgets and spending plans designed to launch a business using actual dollars. Student teams will present their company at the beginning of the course as teams and will then use student start-up funds to launch their business. By the end of the course students will have launched a real start up business.

ENTR 3003 - Growing the Business

Credits: (3)

This course helps students take their start-ups business to the next level and accelerate the pace of customer validation and acquisition. This course will focus on launching the business from a student run start-up in a university setting, to a standalone company that can operate outside the confines of a college campus.

Pre-requisite(s): ENTR 3002.

Note: This course is not currently offered.

ENTR 4680 - Small Business Diagnostics

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Diagnostic analysis of small business issues through the use of case studies and consultation opportunities with small businesses in the community. Students will work both individually and in teams to analyze the health of sample small businesses, identify issues and develop recommendations for remediation. Case issues will cover a broad spectrum of typical small business issues and require the student to evaluate based on all areas of business

operations. Research, written reports and presentations are required. Cross-listed with BSAD 4680.

ESL 0010 - Writing Level I

Credits: (2)

Typically Taught Summer Semester: *1st Blk*

Typically Taught Fall Semester: *1st Blk*

Typically Taught Spring Semester: *1st Blk*

The focus of this novice-low course for English language learners is on writing words and sentences. Suggested co-requisites: ESL 0020, ESL 0030, ESL 0040, ESL 0050.

Pre-requisite(s): LEAP placement test.

ESL 0015 - Writing Level II

Credits: (2)

Typically Taught Summer Semester: *2nd Blk*

Typically Taught Fall Semester: *2nd Blk*

Typically Taught Spring Semester: *2nd Blk*

In this course, novice-mid English language learners practice writing sentences on familiar topics.

Pre-requisite(s):

ESL 0010 or LEAP placement test.

Co-Requisite(s): ESL 0025 , ESL 0035 , ESL 0045, ESL 0055.

ESL 0020 - Reading Level I

Credits: (2)

Typically Taught Summer Semester: *1st Blk*

Typically Taught Fall Semester: *1st Blk*

Typically Taught Spring Semester: *1st Blk*

In this course for English language learners, the focus is on reading and understanding simple stories at a novice-low level.

Pre-requisite(s): LEAP Placement Test.

Co-Requisite(s): ESL 0010 , ESL 0030 , ESL 0040 ,ESL 0050

ESL 0025 - Reading Level II

Credits: (2)

Typically Taught Summer Semester: *2nd Blk*

Typically Taught Fall Semester: *2nd Blk*

Typically Taught Spring Semester: *2nd Blk*

The focus of this course for English language learners is on reading and understanding short stories at a novice-mid level. Suggested co-requisites: ESL 0015 , ESL 0035 , ESL 0045 , ESL 0055.

Pre-requisite(s): ESL 0020 or LEAP Placement Test.

ESL 0030 - Speaking and Listening Level I

Credits: (2)

Typically Taught Summer Semester: *1st Blk*

Typically Taught Fall Semester: *1st Blk*

Typically Taught Spring Semester: *1st Blk*

This course focuses on helping novice-low English language learners to communicate using basic words and phrases. Suggested co-requisites: ESL 0010 , ESL 0020 , ESL 0040 , ESL 0050.

Pre-requisite(s): LEAP Placement Test.

ESL 0035 - Speaking and Listening Level II

Credits: (2)

Typically Taught Summer Semester: *2nd Blk*

Typically Taught Fall Semester: *2nd Blk*

Typically Taught Spring Semester: *2nd Blk*

This course focuses on helping novice-mid English language learners to communicate using basic words and phrases. Suggested co-requisites: ESL 0015 , ESL 0025 , ESL 0045 ,ESL 0055.

Pre-requisite(s): ESL 0030, or LEAP Placement Test.

ESL 0040 - Grammar Level I

Credits: (2)

Typically Taught Summer Semester: *1st Blk*

Typically Taught Fall Semester: *1st Blk*

Typically Taught Spring Semester: *1st Blk*

In this course, novice-low English language learners focus on the forms and meaning of the simple present tense and other basic grammar concepts. Suggested co-requisites: ESL 0010 , ESL 0020 , ESL 0030 , ESL 0050.

Pre-requisite(s): LEAP Placement Test.

ESL 0045 - Grammar Level II

Credits: (2)

Typically Taught Summer Semester: *2nd Blk*

Typically Taught Fall Semester: *2nd Blk*

Typically Taught Spring Semester: *2nd Blk*

The focus of this course for novice-mid English language learners is on forms and meaning of the present progressive tense and other basic grammar concepts. Suggested co-requisites: ESL 0015 , ESL 0025 , ESL 0035, ESL 0055.

Pre-requisite(s): ESL 0040 or LEAP Placement Test.

ESL 0050 - Pronunciation Level I

Credits: (1)

Typically Taught Summer Semester: *1st Blk*

Typically Taught Fall Semester: *1st Blk*

Typically Taught Spring Semester: *1st Blk*

This pronunciation course for novice-low English language learners focuses on the basic components of the English sound system. Suggested co-requisites: ESL 0010, ESL 0020 , ESL 0030 , ESL 0040.

Pre-requisite(s): LEAP Placement Test.

ESL 0055 - Pronunciation Level II

Credits: (1)

Typically Taught Summer Semester: *2nd Blk*

Typically Taught Fall Semester: *2nd Blk*

Typically Taught Spring Semester: *2nd Blk*

This pronunciation course for novice-mid English language learners focuses on the basic components of the English sound system. Suggested co-requisites: ESL 0015, ESL 0025, ESL 0035, ESL 0045.

Pre-requisite(s): ESL 0050 or LEAP Placement Test.

ESL 0060 - Reading Enrichment

Credits: (1)

This reading course offers additional reading practice for Novice-low English language learners. The course focuses on enlarging vocabulary and reinforcing basic sentence structures in English. Credit/no credit.

ESL 0065 - Reading Enrichment

Credits: (1)

This course offers additional reading practice for Novice-mid English language learners. Students expand their vocabulary and reading skills with high interest books adapted for this level. Credit/no credit.

ESL 0110 - Writing Level III

Credits: (2)

Typically Taught Summer Semester: *1st Blk*

Typically Taught Fall Semester: *1st Blk*

Typically Taught Spring Semester: *1st Blk*

This writing course for intermediate-low English language learners focuses on writing short paragraphs. Suggested co-requisites: ESL 0120, ESL 0130, ESL 0141, ESL 0150.

Pre-requisite(s): Complete ESL Levels 1 & 2 at C+ or better, or LEAP Placement Test.

ESL 0120 - Reading Level III

Credits: (2)

Typically Taught Summer Semester: *1st Blk*

Typically Taught Fall Semester: *1st Blk*

Typically Taught Spring Semester: *1st Blk*

This reading course focuses on developing reading skills and building vocabulary through reading and understanding non-academic fiction books that have been adapted for mid-intermediate English language learners. Suggested co-requisites: ESL 0110, ESL 0130, ESL 0141, ESL 0150.

Pre-requisite(s): Complete ESL Levels 1 & 2 at C+ or better or LEAP Placement Test.

ESL 0130 - Speaking and Listening Level III

Credits: (2)

Typically Taught Summer Semester: *1st Blk*

Typically Taught Fall Semester: *1st Blk*

Typically Taught Spring Semester: *1st Blk*

The focus of this course is for intermediate-low English language learners to communicate in simple social situations. Suggested co-requisites: ESL 0110, ESL 0120, ESL 0141, ESL 0150.

Pre-requisite(s): Complete ESL Levels 1 & 2 at C+ or better or LEAP Placement Test.

ESL 0141 - Grammar Level III

Credits: (2)

Typically Taught Summer Semester: *1st Blk*

Typically Taught Fall Semester: *1st Blk*

Typically Taught Spring Semester: *1st Blk*

This grammar course for intermediate-low English language learners focuses on forms and meaning of the future and past tenses, as well as basic noun and article usage. Suggested co-requisites: ESL 0110, ESL 0120, ESL 0130, ESL 0150.

Pre-requisite(s): Complete ESL Levels 1 & 2 at C+ or better or LEAP Placement Test.

ESL 0150 - Pronunciation Level III

Credits: (1)

Typically Taught Summer Semester: *1st Blk*

Typically Taught Fall Semester: *1st Blk*

Typically Taught Spring Semester: *1st Blk*

In this course, intermediate-mid English language learners focus on pronunciation features at the word and sentence level. Suggested co-requisites: ESL 0110, ESL 0120, ESL 0130, ESL 0141.

Pre-requisite(s): Complete ESL Levels 1 & 2 at C+ or better or LEAP Placement Test.

ESL 0160 - Reading Enrichment

Credits: (1)

This course offers additional reading practice for Novice-high/Intermediate-low English language learners. Students expand their vocabulary and reading skills with high interest books adapted for this level. Credit/no credit.

ESL 1210 - Writing Level IV

Credits: (2)

Typically Taught Summer Semester: *2nd Blk*

Typically Taught Fall Semester: *2nd Blk*

Typically Taught Spring Semester: *2nd Blk*

The focus of this intermediate-mid course for English language learners is longer paragraph development. Suggested co-requisites: ESL 1220, ESL 1230, ESL 1241, ESL 1250.

Pre-requisite(s): Complete ESL Levels 1 - 3 at C+ or better or LEAP Placement Test.

ESL 1220 - Reading Level IV

Credits: (2)

Typically Taught Summer Semester: *2nd Blk*

Typically Taught Fall Semester: *2nd Blk*

Typically Taught Spring Semester: *2nd Blk*

This reading course focuses on developing academic reading skills and building academic vocabulary through reading simplified academic text adapted for intermediate-mid English language learners. Suggested co-requisites: ESL 1210, ESL 1230, ESL 1241, ESL 1250.

Pre-requisite(s): Complete ESL Levels 1 - 3 at C+ or better or LEAP Placement Test.

ESL 1230 - Speaking and Listening Level IV

Credits: (2)

Typically Taught Summer Semester: *2nd Blk*

Typically Taught Fall Semester: *2nd Blk*

Typically Taught Spring Semester: *2nd Blk*

The focus of this course is for intermediate-mid English language learners to communicate in simple social situations. Suggested co-requisites: ESL 1210, ESL 1220, ESL 1241, ESL 1250.

Pre-requisite(s): Complete ESL Levels 1 - 3 at C+ or better or LEAP Placement Test.

ESL 1241 - Grammar Level IV

Credits: (2)

Typically Taught Summer Semester: *2nd Blk*

Typically Taught Fall Semester: *2nd Blk*

Typically Taught Spring Semester: *2nd Blk*

In this course, intermediate-mid English language learners focus on modal verbs, the present perfect tense, and adjective clauses. Suggested co-requisites: ESL 1210, ESL 1220, ESL 1230, ESL 1250.

Pre-requisite(s): Complete ESL Levels 1 - 3 at C+ or better or LEAP Placement Test level 1 - 3 or LEAP Placement Test.

ESL 1250 - Pronunciation Level IV

Credits: (1)

Typically Taught Summer Semester: *2nd Blk*

Typically Taught Fall Semester: *2nd Blk*

Typically Taught Spring Semester: *2nd Blk*

This course familiarizes students with rhythm, intonation, emphasis, and phrasing in spoken English. Suggested co-requisites: ESL 1210, ESL 1220, ESL 1230, ESL 1241.

Pre-requisite(s): Complete ESL Levels 1 - 3 at C+ or better or LEAP Placement Test.

ESL 1260 - Reading Enrichment

Credits: (1)

This course offers additional reading practice for Intermediate-mid English language learners. Students expand their vocabulary and reading skills with high interest books adapted for this level. Credit/no credit.

ESL 2310 - ESL Writing Part I

Credits: (2)

Typically Taught Summer Semester: *1st Blk*

Typically Taught Fall Semester: *1st Blk*

Typically Taught Spring Semester: *1st Blk*

In this course, intermediate-high level English language learners are introduced to essay writing.

Pre-requisite(s): Must pass the LEAP Department Placement Test or have a TOEFL score of 46.

Suggested Requisite(s): ESL 2320 and ESL 2341.

ESL 2320 - ESL Reading Part I

Credits: (2)

Typically Taught Summer Semester: *1st Blk*

Typically Taught Fall Semester: *1st Blk*

Typically Taught Spring Semester: *1st Blk*

The focus of this course for English language learners is on reading and understanding academic texts modified to an

intermediate-high level

Pre-requisite(s): Must be placed through the LEAP Department Placement test, or have a TOEFL score of 46 or above (or equivalence).

Suggested Requisite(s): ESL 2310 and ESL 2341.

ESL 2330 - Speaking and Listening Level V

Credits: (2)

Typically Taught Summer Semester: *1st Blk*

Typically Taught Fall Semester: *1st Blk*

Typically Taught Spring Semester: *1st Blk*

This intermediate-high speaking and listening class for English language learners focuses on building students' skills of listening, note-taking, vocabulary building, and speaking. Suggested co-requisites: ESL 2310, ESL 2320, ESL 2341, ESL 2351.

Pre-requisite(s): Complete ESL Levels 1 - 4 at C+ or better or LEAP Placement Test.

ESL 2341 - ESL Grammar Part I

Credits: (2)

Typically Taught Summer Semester: *1st Blk*

Typically Taught Fall Semester: *1st Blk*

Typically Taught Spring Semester: *1st Blk*

The focus of this grammar course for high-intermediate English language learners is the meaning and usage of the past and future perfect verb tenses, the passive voice, and noun clauses.

Pre-requisite(s): Must pass the Department Placement Test or score 46 or above on TOEFL (or equivalent).

Suggested Requisite(s): ESL 2310 and ESL 2320.

ESL 2351 CEL - Community Level V

Credits: (1)

Typically Taught Summer Semester: *1st Blk*

Typically Taught Fall Semester: *1st Blk*

Typically Taught Spring Semester: *1st Blk*

This is a community-based, project-driven course that is designed to give students the opportunity to develop English language skills with emphasis on written and oral communication, small group discussion, interaction with community members, as well as developing academic speaking and listening skills.

Pre-requisite(s): Complete ESL Levels 1 - 4 at C+ or better or LEAP Placement Test.

Suggested Requisite(s): Suggested co-requisites: ESL 2310, ESL 2320, ESL 2330, ESL 2341.

ESL 2360 - Reading Enrichment

Credits: (1)

This course offers additional reading practice for Intermediate-high English language learners. Students expand their vocabulary and reading skills with high interest books adapted for this level. Credit/no credit.

ESL 2410 - ESL Advanced Writing

Credits: (2)

Typically Taught Summer Semester: *2nd Blk*

Typically Taught Fall Semester: *2nd Blk*

Typically Taught Spring Semester: *2nd Blk*

In this course, advanced-low English language learners focus on writing essays on academic topics.

Suggested Requisite(s): Co-requisite: ESL 2420 and ESL 2441. Pre-requisite: ESL 2310.

ESL 2420 - ESL Advanced Reading

Credits: (2)

Typically Taught Summer Semester: *2nd Blk*

Typically Taught Fall Semester: *2nd Blk*

Typically Taught Spring Semester: *2nd Blk*

This low-advanced level reading course focuses on developing academic reading skills and building academic vocabulary through reading slightly modified academic texts

Co-Requisite(s): ESL 2410 and ESL 2441.

ESL 2430 - Speaking and Listening Level VI

Credits: (2)

Typically Taught Summer Semester: *2nd Blk*

Typically Taught Fall Semester: *2nd Blk*

Typically Taught Spring Semester: *2nd Blk*

This speaking and listening course focuses on helping low-advanced English language learners express, defend, and support opinions. Suggested co-requisites: ESL 2410, ESL 2420, ESL 2441, ESL 2451.

Pre-requisite(s): Complete ESL Levels 1 - 5 at C+ or better or LEAP Placement Test.

ESL 2441 - ESL Advanced Grammar

Credits: (2)

Typically Taught Summer Semester: *2nd Blk*

Typically Taught Fall Semester: *2nd Blk*

Typically Taught Spring Semester: *2nd Blk*

The focus of this grammar course for mid-advanced English language learners is understanding the meaning and usage of gerunds and infinitives, participles, conditionals, and modal verbs, and a review of past and future perfect verbs, passive voice, and noun clauses

Suggested Requisite(s): Pre-requisite: ESL 2341 Co-requisite: ESL 2410, ESL 2420

ESL 2451 CEL - Community Level VI

Credits: (1)

Typically Taught Summer Semester: *2nd Blk*

Typically Taught Fall Semester: *2nd Blk*

Typically Taught Spring Semester: *2nd Blk*

This is a community-based, project-driven course that is designed to give students the opportunity to develop English language skills with emphasis on written and oral communication, small group discussion, interaction with community members, as well as developing academic speaking and listening skills.

Pre-requisite(s): Complete ESL Levels 1 - 5 at C+ or better or LEAP Placement Test.

Suggested Requisite(s): Suggested co-requisites: ESL 2410, ESL 2420, ESL 2430 , ESL 2441.

ESL 2460 - Reading Enrichment

Credits: (1)

This course offers additional reading practice for Advanced English language learners. Students expand their vocabulary and reading skills with high interest books adapted for this level. Credit/no credit.

ESS 2200 - Exploring Exercise Science Professions

Credits: (3)

Typically Taught Summer Semester: *2nd Blk Online, 1st Blk Online*

Typically Taught Fall Semester: *Full Sem, Full Sem - Online*

Typically Taught Spring Semester: *Full Sem, Full Sem - Online*

Designed to orient and acquaint students with the goals, objectives, scope, professional preparation, career opportunities, and trends in exercise science professions.

ESS 2300 - Health/Fitness Evaluation and Exercise Prescription

Credits: (3)

Typically Taught Summer Semester: *1st Blk*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$35.00

Skills and competencies for prospective health fitness instructors, personal fitness trainers, and nutrition educators to deliver preventive exercise programs.

Pre-requisite(s): HLTH 1030 and NUTR 1020.

ESS 2890 INT - Cooperative Work Experience

Credits: (1-6)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Open to all students in Human Performance Management and Physical Education who meet the minimum Cooperative Work Experience requirements of the department. Provides academic credit for on-the-job experience. Grade and amount of credit will be determined by the department.

May be repeated 5 times up to 6 credit hours.

ESS 3450 - Structural Kinesiology

Credits: (3)

Typically Taught Summer Semester: *1st Blk*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$25.00

This course is a detailed study of muscles, nerves, bones, and joints as they are involved in the science of movement. It is designed for students to experience theoretical concepts and apply functional anatomy knowledge to the execution and improvement of human performance.

Pre-requisite(s): HTHS 1110 and Co-requisite: HTHS 1111, or Prerequisite: ZOOL 2100.

ESS 3500 - Biomechanics

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$25.00

A study of the musculomechanical bases of human movement and experience in applying that knowledge to the execution and evaluation of human performance.

Pre-requisite(s): ESS 3450 and MATH 1050 QL or higher.

ESS 3510 - Exercise Physiology

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$50.00

A study of various physiological and environmental factors which affect performance of exercise and sport during acute exercise and physiological adaptations to chronic exercise.

Pre-requisite(s): HTHS 1110 or ZOOL 1020 or ZOOL 2200.

ESS 3540 - Physiological Aspects of Human Performance

Credits: (2)

Examine, evaluate, and apply the latest physiological concepts and ideas in conditioning practices for improving human performance.

Pre-requisite(s): PEP 2000 or ESS 2200 and 3 hours of General Education Life Science (LS).

ESS 3600 - Measurement and Statistics in Exercise Science

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$10.00

The selection, administration, and interpretation of measurement techniques and statistical procedures for the purpose of evaluation and research as related to exercise science and health promotion.

Pre-requisite(s): Meet WSU Quantitative Literacy requirement.

ESS 4320 - Special Topics

Credits: (3)

Typically Taught Summer Semester: *Full Sem, Full Sem - Online, 1st Blk, 1st Blk Online*

Typically Taught Fall Semester: *Full Sem, Full Sem - Online*

Typically Taught Spring Semester: *Full Sem, Full Sem - Online*

This course will provide undergraduate students an opportunity to learn emerging and timely topics in the areas of exercise science by critically interpreting information from various sources. The course will also allow students to engage in discussions to appreciate different perspectives on certain exercise science topics.

Pre-requisite(s): ESS 2300, ESS 3450, ESS 3510 or Permission of the Instructor.

ESS 4370 - Clinical Exercise Physiology

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$20.00

This course provides a comprehensive look at the clinical aspects of exercise physiology by thoroughly examining the relationship between exercise and chronic disease. It provides students with fundamental knowledge of disease-specific pathology and treatment guidelines. Overview of each condition's unique physiology, effects of the condition on the exercise response, effects of exercise training on the condition, and recommendations for exercise testing and programming are presented in a selected topics format.

Pre-requisite(s): ESS 2300 and ESS 3510.

ESS 4620 - Leadership Concepts for Human Performance Management

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Students will study the current philosophical leadership concepts and the principles, practices, and issues of administration.

Pre-requisite(s): ESS 2200.

ESS 4800 - Directed Undergraduate Exercise Science Research

Credits: (1-4)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course will provide undergraduate students an opportunity to engage in research processes and participate in ongoing research projects in the areas of exercise and sport science under the guidance of the ESS faculty.

Pre-requisite(s): ESS 2300, ESS 3450, ESS 3510 and/or Permission of the Instructor.

May be repeated for a total of up to 10 credit hours.

ESS 4830 - Directed Readings in Exercise Science

Credits: (1-3)

Typically Taught Summer Semester: *Full Sem - Online, 1st Blk Online*

Typically Taught Fall Semester: *Full Sem - Online*

Typically Taught Spring Semester: *Full Sem - Online*

Each student is given the opportunity to do independent and directed readings, or secondary research on advanced special topics under the direction of a faculty mentor.

Pre-requisite(s): ESS 2200 and consent of faculty supervisor.

ESS 4890 INT - Cooperative Work Experience

Credits: (1-6)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A continuation of ESS 2890.

May be repeated 5 times up to 6 credit hours.

ESS 4990 - Senior Seminar

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

For Seniors only. Structured seminar focuses on synthesis of ideas and portfolio preparation.

ESS 6300 - Advanced Biomechanics

Credits: (3)

Designed to expose the graduate student to appropriate research in sports biomechanics and to be involved in the analysis of movement based on selected mechanical principles such as balance, buoyancy, leverage, force, angles of rebound, projection and motion.

Note: Check with Department for course availability.

ESS 6400 - Advanced Exercise Physiology

Credits: (3)

Understanding the physiological changes associated with exercise and training and the reasons for change are the paramount directives of this course.

Suggested Requisite(s): Concurrent with the lecture component is the practicum laboratory experience of equipment operation and individual assessment of

physiological parameters.

Note: Check with Department for course availability.

ESS 6540 - Physiological Aspects of Human Performance

Credits: (2)

Examine, evaluate, and apply the latest physiological concepts and ideas in conditioning practices for improving human performance.

Pre-requisite(s): PEP 2000 or ESS 2200 and 3 hours of General Education Life Science (LS).

Note: Check with Department for course availability.

ETC 2001 SS/DV - Engineering Culture

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Engineering Culture describes the culture of engineering and the social and scientific practices as well as beliefs that engineers ascribe to in pursuing their profession. It also describes how culture is shaped by engineering and by the technologies that engineers make and maintain. This course examines the professional cultures that engineers inhabit as well as the way that a wider culture is shaped by engineering.

ETM 5913G - Six Sigma Tools I

Credits: (3)

This distance learning course provides an introduction to the six sigma body of knowledge as defined by the American Society of Quality (ASQ). The course will examine the foundations of six sigma and the statistical tools used in the initial stages of the DMAIC problem solving methodology.

Pre-requisite(s): BS with three years relevant experience & an engineering statistics undergraduate course or equivalent such as MATH 3410 is required, or instructor's approval. Students also must be able to work on an approved six sigma project at a firm.

ETM 5923G - Six Sigma Tools II

Credits: (3)

This distance learning course is a follow-on to the initial six sigma course and provides additional detail on the analyze, improve and control portions of the DMAIC problem solving methodology. This course is required for the Institutional Certificate in Quality and Lean Manufacturing, and can be used as a technical elective for the Oklahoma

State University Engineering Technology Management Master's Degree.

Pre-requisite(s): ETM 5913G, Six Sigma Tools I.

ETM 5933G - Lean Tools

Credits: (3)

This course teaches students lean manufacturing tools for continuous improvement in a manufacturing environment. **Pre-requisite(s):** BS with three years relevant experience & an engineering statistics undergraduate course or equivalent such as Math 3410 is required, or instructor's approval. Students also must be able to work on an approved six sigma project at a firm. This distance learning course is required for the Institutional Certificate in Quality and Lean Manufacturing, and can be used as a technical elective for the Oklahoma State University Engineering Technology Management Master's Degree.

ETM 5943G - Lean-Sigma Implementation

Credits: (3)

This course introduces students to the implementation skills necessary to successfully combine and apply lean manufacturing and six sigma concepts in small to mid-sized manufacturing facilities. This course is required for the Institutional Certificate in Quality and Lean Manufacturing, and can be used as a technical elective for the Oklahoma State University Engineering Technology Management Master's Degree.

Pre-requisite(s): ETM 5923G, ETM 5933G.

FILM 2200 - Fundamentals of Film

Credits: (3)

Typically Taught Summer Semester: Full Sem, Full Sem - Online

Typically Taught Fall Semester: Full Sem, Full Sem - Online

Typically Taught Spring Semester: Full Sem, Full Sem - Online

Course Fee: \$30.00

Fundamentals of Film Studies offers film majors a more specialized analysis of formal cinematic elements, and narrative structure while introducing students to the basics of filmmaking and related technologies. It helps film students to articulate the theoretical and practical skills to recognize, analyze, and create the film as an art form. Students will also learn about the principle of "building blocks" and formal elements (narrative, mise-en-scene, cinematography, sound and editing) that constitute the fundamental principles of analysis, genre, style,

performance and storytelling. We will also outline, explain, and draw connections among artistic, technological, socioeconomic forces, which have shaped and reflected in the world of cinema. We will concentrate on essential films and directors from around the world to comprehend their contribution to the evolution of film form and content. In addition to the weekly lecture, screenings, and reading and writing assignments, students will also have the opportunity to put theory to practice by producing short film projects.

FILM 2280 - Introduction to Film Production

Credits: (3)

Typically Taught Summer Semester: Full Sem, Full Sem - Online

Typically Taught Fall Semester: Full Sem, Full Sem - Online

Typically Taught Spring Semester: Full Sem, Full Sem - Online

Course Fee: \$30.00

This practical and technical course explores all essential aspects of filmmaking in preparation of more advanced film production classes. Participants will acquire a fundamental grounding in all of the essential skills in film production from planning a project to producing and on toward completing the project with an overview of film festival participation and distribution. Students will also have an opportunity to gain insight into industry-standard film equipment and post-production technologies. One of the primary goals of this course is to familiarise film students with the fundamentals of cinematography, including the use of the professional camera, composition, lighting, and editing. Another goal is to examine the conceptual and unique challenges of visual-driven filmmaking: scriptwriting, pre-production, planning, continuity, and directing among them.

FILM 2820 - Special Topics in Film Studies

Credits: (3)

Typically Taught Summer Semester: Full Sem, Full Sem - Online

Typically Taught Fall Semester: Full Sem, Full Sem - Online

Typically Taught Spring Semester: Full Sem, Full Sem - Online

The special topic in film course may focus on an international cinema, a major filmmaker, genre, or a specific era.

It may be repeated three times for credit.

FILM 3200 - History of Film

Credits: (3)

Typically Taught Summer Semester: *Full Sem, Full Sem - Online*

Typically Taught Fall Semester: *Full Sem, Full Sem - Online*

Typically Taught Spring Semester: *Full Sem, Full Sem - Online*

Course Fee: \$30.00

This class is a survey of world cinema from 1893 to the present. We will examine movies as a business, a social phenomenon, a series of technological innovations, and an art form, and we will work toward a functional explanation of how each of these aspects of the movies has changed over time. Although many people associate movies with the American film industry, filmmakers in every historical period and all over the world have worked to both distinguish their work from that of Hollywood and to draw upon some approaches innovated by the Americans. The films screened in class may include silent epic blockbusters from Italy, riveting crime thrillers from Germany, explosive Hong Kong action movies, French New Wave dramas, anarchic British satires, and many other examples of exciting and innovative filmmaking from all over the world.

FILM 4700 - Film Studies Capstone

Credits: (3)

Typically Taught Summer Semester: *Full Sem, Full Sem - Online*

Typically Taught Fall Semester: *Full Sem, Full Sem - Online*

Typically Taught Spring Semester: *Full Sem, Full Sem - Online*

Course Fee: \$30.00

This Capstone course is designed to conclude students' experiences as film majors at the Weber State University as well as to develop students' research, writing, and/or production skills. In this course, students will analyze or produce films that pertain to the special topic of their choice. Peer review will occur throughout the writing or production process. At the end of the course, students will present their findings and/or films to the class and faculty members from the Film Studies program.

FIN 1010 - Personal Finance

Credits: (3)

Typically Taught Summer Semester: *Full Sem Online*

Typically Taught Fall Semester: *Full Sem, Full Sem Online*

Typically Taught Spring Semester: *Full Sem, Full Sem Online*

Personal and family budgeting, installment buying, borrowing money, buying a home, life and property insurance, personal investment, and retirement and estate planning.

FIN 2300 - Introduction to Investments

Credits: (3)

A study of investment opportunities, mechanics, analysis, risk, and risk management at the introductory level. This course is designed for non-finance majors and will not be accepted as a substitute for FIN 3300.

Note: Course not currently being offered.

FIN 3200 - Financial Management

Credits: (3)

Typically Taught Summer Semester: *1st Blk*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Financial analysis, planning and control, working capital management, capital budgeting, and short-term and long-term financing. Student use of computers is required for the preparation of case study material used to enhance the presentation of selected topics presented in the course.

Pre-requisite(s): ACTG 2010, ECON 2010, MIS 2010, and QUAN 2600.

FIN 3300 - Investments

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

An in-depth study of principles, concepts, and tools used in the investment field as they relate to investment opportunities, mechanics, financial statement analysis, risk, and portfolio management. Computer use is required to access the Dow-Jones market analyzer investment software and in the preparation and analysis of investment portfolios.

Pre-requisite(s): BSAD 2899, FIN 3200, and QUAN 3610.

FIN 3350 - Financial Institutions

Credits: (3)

Typically Taught Summer Semester: *1st Blk*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A study of the functions and significance of the major

financial institutions, such as commercial savings institutions, with an emphasis on management problems, regulations, credit appraisal, and loan types.
Pre-requisite(s): BSAD 2899, FIN 3200.

FIN 3400 - Real Estate Principles and Practices

Credits: (3)
Typically Taught Summer Semester: *Full Sem Online*
Fundamental economic aspects of real estate with emphasis on realty as a commodity of trade. The subject matter in this course is of general interest to both those desiring to enter the real estate profession and those who only intend to own real estate.
Pre-requisite(s): FIN 3200.

FIN 3500 - Capital Budgeting

Credits: (3)
Typically Taught Fall Semester: *Full Sem*
Typically Taught Spring Semester: *Full Sem*
Capital investment decision-making procedures relative to make/ buy, lease/buy, working capital, replacements, and new investment decisions. Involves use of the computer in the analysis of cash flows and capital acquisition alternatives.
Pre-requisite(s): BSAD 2899, FIN 3200.

FIN 4400 - Financial Problems - Corporate Finance

Credits: (3)
Typically Taught Fall Semester: *Full Sem*
Problems in financial management with an emphasis on corporate finance. Use of financial software and computers is an integral part of problem solutions.
Pre-requisite(s): BSAD 2899, FIN 3200, and QUAN 3610.

FIN 4410 - Financial Problems - Investments

Credits: (3)
Typically Taught Spring Semester: *Full Sem*
Problems in financial management with an emphasis on investments. Use of financial software and computers is an integral part of problem solutions.
Pre-requisite(s): BSAD 2899, FIN 3300.

FIN 4800 - Independent Research

Credits: (1-3)
Directed research and study on an individual basis.
Pre-requisite(s): BSAD 2899; Senior Standing; Written Instructor Approval.
May be repeated until a total of 4 hours credit is accumulated.

FIN 4850 - Finance Study Abroad

Credits: (1-3)
This course is designed for students who wish to explore financial theory and practice in countries other than the U.S. Students will study international finance as offered through a partner university (or other university with department chair approval).
Pre-requisite(s): BSAD 2899.
May be repeated once up to 6 credits.

FIN 4860 INT - Finance Internship

Credits: (3)
A structured professional-level field experience. The student will be counseled and supervised as he/she applies and integrates the knowledge and skills obtained through finance courses.
Pre-requisite(s): BSAD 2899; Senior Standing; Instructor approval.

FIN 4900 - Special Topics in Finance

Credits: (4)
Variable Title
Special treatment of current topics in Finance. This course will involve primary and/or secondary research by class participants.
Pre-requisite(s): BSAD 2899, FIN 3200; Instructor approval.

FL 2410 - Introduction to Localization

Credits: (3)
Typically Taught Fall Semester: *Full Sem*
Typically Taught Spring Semester: *Full Sem*
Course Fee: \$8.00

Introduction to the field of localization. Includes the globalization of digital applications such as software, websites, videos, and video games. Addresses how to overcome both technical and cultural issues in localization and internationalization.

FL 2600 HU - Introduction to Cultural and Literary Studies in Translation

Credits: (3)

Variable Title

Course Fee: \$8.00

May be offered under any of the languages taught in the department. All Foreign Language HU2600 courses are taught in English and all texts are read in English translation in order to make some of the literature we normally would teach in a foreign language accessible to all students. These courses may introduce students to specific literary periods, literary themes or some prominent authors in specific areas of the world where languages other than English are spoken.

May be repeated up to 10 times for credit under different titles.

Note: Check with Department for course availability.

FL 2810 - Experimental Courses

Credits: (1-6)

Individual courses offered on an experimental basis, identified by specific name and description. The specific title will appear on student's transcript along with the authorized credit. May be repeated up to 10 times. Refer to Experimental Courses.

FL 2851 - HU Study Abroad

Credits: (3)

Language and culture studies for students whose minimal proficiency is Novice High. Language assignments at the Novice or Intermediate-Low levels are performed in the target language. All other assignments are performed in English. Prior travel experience does not apply.

FL 3270 - Special Topics in Linguistics

Credits: (3)

Variable Title

Course Fee: \$8.00

(IM=Intermediate Mid) An introduction to linguistic structures and semantic elements. The course provides useful information and practice in the language, its structures and usage. The sub-disciplines of linguistics,

other than phonetics and phonology (covered in 3220), will be studied. These may include lexical analysis, semantics, morphology, syntax, linguistic change and dialectal variation.

Note: Check with Department for course availability.

FL 3320 - Applied Language Studies

Credits: (1-3)

Variable Title

Course Fee: \$8.00

(Minimal proficiency level varies with content).

May be repeated up to 10 times under different titles.

FL 3420 - Introduction to Translation

Credits: (3)

Typically Taught Fall Semester: Full Sem

Typically Taught Spring Semester: Full Sem

Course Fee: \$8.00

Introduction to the theory and practice of translation, with emphasis on the techniques and skills needed to translate commercial texts. Students will learn the concepts and conceptual framework for the analysis and understanding of translation as a process and a product.

Pre-requisite(s):

Intermediate Low proficiency in a second language (2020 or the equivalent).

FL 3430 - Translation Technology

Credits: (3)

Typically Taught Fall Semester: Full Sem

Typically Taught Spring Semester: Full Sem

Course Fee: \$8.00

This course introduces students to the theory and practical use of translation technologies important to management, engineering and linguistic roles in translation and localization, with a primary focus on tools for linguistic roles including translation and editing.

FL 3570 - Special Topics in Culture

Credits: (3)

Variable Title

Course Fee: \$8.00

(Intermediate Mid) In-depth studies in culture, history, geography, social customs, fine arts and civilization. May be repeated up to 7 times for credit and for other non-English speaking cultures.

Note: Check with Department for course availability.

FL 3750 - Introduction to Interpreting

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Course Fee: \$8.00

Introduction to basic techniques and skills needed for bilingual interpretation in a variety of professional settings. The course includes an overview and history of the interpreting industry and work of interpreters, certification and licensure, and the variety of consumers and modalities with which interpreters work. Ethical decision-making models and the Code of Ethics for interpreters are explored.

FL 3760 - Special Topics in Translation

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$8.00

This is a specialized course that offers in-depth studies in selected topics, current developments or recent trends in the fields of Translation Studies and Localization.

FL 3810 - Experimental

Credits: (1-6)

Experimental

Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript.

May be repeated up to 5 times for a total of 6 hours.

FL 4400 - Methods for Teaching Languages

Credits: (5)

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$15.00

(AL=Advanced Low) Practical Methods, techniques and strategies for teaching foreign languages. This course will also review second language acquisition research, various assessment techniques, the ACTFL Proficiency Guidelines and the National Standards for Foreign Language Learning. Emphasis is on planning, teaching and assessment. Offered spring semester only.

FL 4500 - Methods for Teaching Languages

Credits: (4)

Typically Taught Summer Semester: *Full Sem Online*

Typically Taught Fall Semester: *Full Sem Online*

Typically Taught Spring Semester: *Full Sem Online*

This course presents theoretical premises and research on foreign language acquisition. It uses the standards for foreign language learning as the organizing principle for instructional methods; students design classroom lessons, projects and assessments based upon standards. FL 4500 is designed for students who are working toward a foreign language teaching degree or for teachers not desiring post-graduate credit. FL 6500 is designed for teachers who are seeking to recertify or to become endorsed at the graduate level.

FL 4801 - A&H Leadership Lecture Series

Credits: (1)

Typically Taught Spring Semester: *Full Sem*

This one-credit elective course will give arts and humanities' majors the opportunity to interact with successful guest lecturers whose undergraduate backgrounds are in the arts and humanities. Lecturers will clarify how the talents and skills associated with their degrees have contributed to their pursuit of successful careers and lives.

FL 4810 - Experimental Courses

Credits: (1-6)

Individual courses offered on an experimental basis, identified by specific name and description. The specific title will appear on student's transcript along with the authorized credit. May be repeated up to 5 times. Refer to Experimental Courses.

FL 4860 INT - Foreign Language Internship

Credits: (1-3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

(IL=Intermediate Low) An opportunity for students to receive academic credit for faculty-approved, on-the-job learning experiences that involve foreign languages and/or cultures. Credit/No Credit grading only.

Pre-requisite(s): Instructor Approval.

May be repeated up to 6 credits.

FL 4990 - Senior Assessment

Credits: (.5)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Required of all majors during their senior year. Students will assemble a portfolio with a representation of their work in the foreign language. Speaking skills will also be evaluated. Must be completed before graduation clearance.

FL 6500 - Methods for Teaching Languages

Credits: (4)

Typically Taught Summer Semester: *Full Sem Online*

Typically Taught Fall Semester: *Full Sem Online*

Typically Taught Spring Semester: *Full Sem Online*

This course presents theoretical premises and research on foreign language acquisition. It uses the standards for foreign language learning as the organizing principle for instructional methods; students design classroom lessons, projects and assessments based upon standards. FL 4500 is designed for students who are working toward a foreign language teaching degree or for teachers not desiring post-graduate credit. FL 6500 is designed for teachers who are seeking to recertify or to become endorsed at the graduate level.

FRCH 1000 - Proficiency Development

Credits: (1-2)

(N=Novice) (Cr/NCr) Non-graded courses for entry-level students to augment foreign language instruction in stress-free activities such as reading children's literature, learning and performing skits, folk dancing, singing, cooking, etc. May be repeated for credit under different titles.

Note: Course not currently being offered.

FRCH 1010 - First Semester French

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Course Fee: \$8.00

(N=Novice) Introductory course assuming no significant previous experience with the language. Beginners and students with less than two years of high school language should register for this class. Emphasis on everyday conversation and exposure to cultural perspectives.

FRCH 1020 - Second Semester French

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$8.00

(N=Novice) Continuation of FRCH 1010. Basic language skills including listening, speaking, reading, writing and culture.

FRCH 1700 - Conversational Skills

Credits: (1-3)

Course Fee: \$8.00

(N=Novice) Specific vocabulary and speaking skills in one semester (e.g., nursing, law enforcement, medical, tourism, family language courses, etc.). May be repeated for credit under different titles.

Note: Course not currently being offered.

FRCH 1852 - Study Abroad

Credits: (1-3)

(N=Novice) Language and culture studies for students with no previous experience in the target language and culture. Most assignments are performed in English. Prior travel experience does not apply.

May be repeated twice with a maximum of 3 credit hours.

Note: Check with Department for course availability.

FRCH 2000 - Proficiency Development

Credits: (1-2)

(NH=Novice High) (CR/NC) Non-graded courses for second-year students to augment foreign language instruction in stress-free activities appropriate to the linguistic level of second-year students. May be repeated under different titles. Note: Course not currently being offered.

FRCH 2010 - Third Semester French

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Course Fee: \$8.00

(NH=Novice High) Continuation of FRCH 1020. Assumes completion of first-year or equivalent experience. Students learn to understand and express ideas about their community and the world. Includes listening, speaking, reading, writing and culture.

FRCH 2020 HU - Fourth Semester French

Credits: (3)

Course Fee: \$8.00

(NH=Novice High) Continuation of FRCH 2010. The learning and application of strategies for acquiring a foreign language. Students also learn how cultural products and practices reflect a culture's attitudes, values, ideas and meaning. The process of language acquisition and the seeking of cross-cultural understanding provide insights into the commonalities of how the human family learns, thinks and communicates.

FRCH 2021 - Second Year II

Credits: (3)

(NH=Novice High) Continuation of FRCH 2010 without General Education Humanities credit. Offered through examination only.

Pre-requisite(s): Only available through testing.

FRCH 2030 - Second Year Language Review

Credits: (3)

Course Fee: \$8.00

(NH=Novice High) This course will prepare students who wish to continue language study. Emphasis on conversational skills and a review of language structure and usage.

Note: Check with department for course availability.

FRCH 2600 HU - Introduction to Cultural and Literary Studies in Translation

Credits: (3)

Variable Title

Course Fee: \$8.00

May be offered under any of the languages taught in the department. All Foreign Language HU2600 courses are taught in English and all texts are read in English translation in order to make some of the literature we normally would teach in a foreign language accessible to all students. These courses may introduce students to specific literary periods, literary themes or some prominent authors in specific areas of the world where languages other than English are spoken.

May be repeated up to 10 times for credit under different titles.

Note: Check with Department for course availability.

FRCH 2851 - Study Abroad

Credits: (3)

(NH=Novice High) Language and culture studies for students whose minimal proficiency is Novice High. Language assignments at the Novice or Intermediate-Low levels are performed in the target language. All other assignments are performed in English. Prior travel experience does not apply.

Note: Check with Department for course availability.

FRCH 2852 - Study Abroad

Credits: (1-3)

(NH=Novice High) Language and culture studies for students whose minimal proficiency is at Novice High. Language assignments at the Novice or Intermediate-Low levels are performed in the target language. All other assignments are performed in English. Prior travel experience does not apply.

Twice with a maximum of 3 credit hours.

Note: Check with Department for course availability.

FRCH 2920 - Short Courses, Workshops, Institutes and Special Programs

Credits: (1-6)

Consult the class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript.

FRCH 3000 - Proficiency Development

Credits: (3)

Course Fee: \$8.00

(IL=Intermediate Low) This is a transition course to upper division. The course focuses on oral proficiency development. Students will learn a variety of techniques and strategies to increase their oral proficiency in a variety of social, educational and cultural settings. Native-speaking students or those who have acquired proficiency through residence in the target language community are not eligible to take this class.

Note: Check with department for course availability.

FRCH 3060 - Grammar & Composition

Credits: (3)

Course Fee: \$8.00

(IL=Intermediate Low) This is a transition course to upper division. The course focuses on oral proficiency

development. Students will learn a variety of techniques and strategies to increase their oral proficiency in a variety of social, educational and cultural settings. Native-speaking students or those who have acquired proficiency through residence in the target language community are not eligible to take this class.

Note: Check with department for course availability.

FRCH 3116 - DLI Bridge Course I

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Taught in DLI High Schools for students who have passed the AP Exam with a 4 or higher. Although this is a three credit-hour class, it will meet over the course of a full academic year. Credit will count toward a major or minor in the language.

Pre-requisite(s): FRCH 2020 or AP exam with a score of 4 or better

FRCH 3117 - DLI Bridge Course II

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Taught in DLI High Schools for students who have passed the AP Exam with a 4 or higher. Although this is a three credit-hour class, it will meet over the course of a full academic year. Credit will count toward a major or minor in the language.

Pre-requisite(s): FRCH 2020 or AP exam with a score of 4 or better

FRCH 3118 - DLI Bridge Course III

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Taught in DLI High Schools for students who have passed the AP Exam with a 4 or higher. Although this is a three credit-hour class, it will meet over the course of a full academic year. Credit will count toward a major or minor in the language.

Pre-requisite(s): FRCH 2020 or AP exam with a score of 4 or better

FRCH 3160 - Introduction to Literature

Credits: (3)

Course Fee: \$8.00

(IL=Intermediate Low) Required of all majors and minors. 3160 may be taken concurrently with other literature courses. One sheltered section may be offered to students

who have not had extensive in-country experience.

Note: Check with department for course availability.

FRCH 3220 - Phonetics and Phonology

Credits: (3)

Course Fee: \$8.00

(IL=Intermediate Low) Analysis of the sounds of language and word formation: practice of native like speech patterns. Required of all teaching majors and minors.

Note: Check with department for course availability.

FRCH 3270 - Special Topics in Linguistics

Credits: (3)

Variable Title

Course Fee: \$8.00

(IM=Intermediate Mid) An introduction to linguistic structures and semantic elements. The course provides useful information and practice in the language, its structures and usage. The sub-disciplines of linguistics, other than phonetics and phonology (covered in FL 3220), will be studied. These may include lexical analysis, semantics, morphology, syntax, linguistic change and dialectal variation.

Note: Check with department for course availability.

FRCH 3320 - Applied Language Studies

Credits: (1-3)

Variable Title

Course Fee: \$8.00

(Minimal proficiency level varies with content).

May be repeated up to 10 times under different titles.

FRCH 3360 - Advanced Grammar

Credits: (3)

Course Fee: \$8.00

(IL=Intermediate Low) Analysis and application of syntactic principles and discourse structure.

Note: Check with department for course availability.

FRCH 3550 - Cultural Heritage I

Credits: (3)

Variable Title

Course Fee: \$8.00

(Intermediate Mid) In-depth studies in culture, history, geography, social customs, fine arts and civilization. May

be repeated up to 7 times for credit and for other non-English speaking cultures.

FRCH 3560 - Cultural Heritage II

Credits: (3)

Variable Title

Course Fee: \$8.00

(IM=Intermediate Med) Studies in culture, history, geography, social customs, fine arts, and civilization. May be repeated 3 times for other non-English speaking cultures.

FRCH 3570 - Special Topics in Culture

Credits: (3)

Variable Title

Course Fee: \$8.00

(Intermediate Mid) In-depth studies in culture, history, geography, social customs, fine arts and civilization. May be repeated up to 7 times for credit and for other non-English speaking cultures.
Note: Check with Department for course availability.

FRCH 3610 - Literature Survey I

Credits: (3)

Variable Title

Course Fee: \$8.00

(IH=Intermediate High) A survey of the authors and works of a particular period or place. May be repeated under different titles.

FRCH 3620 - Literature Survey II

Credits: (3)

Variable Title

Course Fee: \$8.00

(IH=Intermediate High) A survey of the authors and works of a particular period or place. May be repeated under different titles.

FRCH 3630 - Literature Poetry

Credits: (3)

Variable Title

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$8.00

(IM= Intermediate Mid) One literature course is required

for regular and teaching majors. May be taken concurrently with FL 3160. May be repeated under different titles.

FRCH 3631 - Literature: Prose

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Course Fee: \$8.00

(IM=Intermediate Mid). A survey of works in prose by one or various authors of a particular period or place, or spanning several literary movements and geographical regions. May be taken 3 times up to 9 credits under different titles.

FRCH 3632 - Literature: Drama

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Course Fee: \$8.00

(IM=Intermediate Mid). A survey of theater plays by one or various authors of a particular period or place, or spanning several literary movements and geographical regions. May be taken 3 times up to 9 credits under different titles.

FRCH 3650 - Literature Periods

Credits: (3)

Variable Title

Course Fee: \$8.00

(IM=Intermediate Mid) May be repeated under different titles. One literature course is required for regular and teaching majors. May be taken concurrently with FRCH 3160.

FRCH 3670 - Literature Authors

Credits: (3)

Variable Title

Course Fee: \$8.00

(IN=Intermediate Mid) May be repeated under different titles. One literature course is required for regular and teaching majors. May be taken concurrently with FRCH 3160.

FRCH 3680 - Literature: Film

Credits: (3)

Course Fee: \$8.00

(IM=Intermediate Mid). A survey of film by one or various filmmakers of a particular period or place, or spanning

several literary movements and geographical regions.

May be taken 3 times up to 9 credits under different titles.

Note: Check with department for course availability.

FRCH 3690 - Literature Special Topics in Literature

Credits: (3)

Course Fee: \$8.00

(IM=Intermediate Mid) May be repeated under different titles. One literature course is required for regular and teaching majors. May be taken concurrently with FRCH 3160.

FRCH 3710 - Business Language I

Credits: (3)

Course Fee: \$8.00

(IM=Intermediate Mid) Business Language and Practices. Required of all commercial majors.

FRCH 3715 - Business Language II

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Course Fee: \$8.00

(IM=Intermediate High) Advanced Business Language and Practices. Required of all commercial majors.

FRCH 3715 - Business Language II

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$8.00

(IM=Intermediate High) Advanced Business Language and Practices. Required of all commercial majors.

FRCH 3720 - Language for Specific Purposes I

Credits: (3)

Course Fee: \$8.00

(IM=Intermediate Mid) This course is content, vocabulary and culture-based. The course focuses on practical vocabulary, idiomatic expressions, professional terminology and cultural interactions on a variety of topics such as language for the medical professions, social workers, law enforcement or tourism.

FRCH 3730 - Language for Specific Purposes II

Credits: (3)

Course Fee: \$8.00

(IM=Intermediate Mid) This course is content, vocabulary and culture-based. The course focuses on practical vocabulary, idiomatic expressions, professional terminology and cultural interactions on a variety of topics, such as language for medical professions, social work, law enforcement or tourism.

FRCH 3740 - Translation I

Credits: (3)

Course Fee: \$8.00

(IM=Intermediate Mid) Introduction to basic techniques and skills needed for bilingual translation of non-fiction texts. Emphasis will be on the translation into English, and on the stylistic, syntactic, cultural, lexical, and terminological problems. Students are given ample opportunity to apply these techniques through a series of written translation assignments, which form the basis for class discussion.

FRCH 3760 - Special Topics in Translation

Credits: (3)

Typically Taught Summer Semester: *NA*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$8.00

This is a specialized course that offers in-depth studies in selected topics, current developments or recent trends in the fields of Translation and Translation Studies.

FRCH 3810 - Experimental Courses

Credits: (1-6)

Individual courses offered on an experimental basis, identified by specific name and description. The specific title will appear on student's transcript along with the authorized credit. May be repeated up to 6 times. Refer to Experimental Courses.

FRCH 3850 - Study Abroad

Credits: (1-6)

(IM=Intermediate Mid) Language and culture studies for students whose language proficiency is Intermediate Low

to Intermediate High. All Intermediate and Advanced tasks will be performed in the target language. All Superior tasks may be performed in English. Prior travel experience does not apply. May be repeated up to 10 times for credit.

FRCH 4190 - Foreign Language Journal

Credits: (3)

(IM=Intermediate Mid) For foreign language students in the fourth year who work on publishing the foreign language literary journal. Includes selecting articles, editing and preparing journal layout.

FRCH 4620 - Survey of Literature I

Credits: (3)

Course Fee: \$8.00

(IH=Intermediate High) One literature course is required of regular and teaching majors. Prerequisite: FRCH 3160

FRCH 4630 - Survey of Literature II

Credits: (3)

Course Fee: \$8.00

(IH=Intermediate High) One literature course is required of regular and teaching majors. Prerequisite: FL 3160

FRCH 4740 - Translation II

Credits: (3)

Course Fee: \$8.00

(IH=Intermediate High) Development of techniques and skills needed for bilingual translation of non-fiction texts. Emphasis will be on the translation into the target language. Methods of contrastive linguistics to analyze pertinent aspects of language structure, involving syntax, vocabulary and style, as well as basic theoretical-historical concepts are employed. Students are given ample opportunity to apply these techniques and concepts through a series of written translation assignments, which form the basis for class discussion. Prerequisite/Co-requisite: FRCH 3740 is strongly advised, but not required.

FRCH 4830 - Directed Readings

Credits: (1-3)

(IH=Intermediate High) Independent readings under the direction of a faculty member.

May be repeated up to 10 times.

Note: Check with Department for course availability.

FRCH 4850 - Study Abroad

Credits: (3)

(A=Advanced) Language and culture studies for students whose language proficiency is Advanced or Superior. All tasks are performed in the target language. Prior travel experience does not apply.

FRCH 4920 - Short Courses, Workshops, Institutes and Special Programs

Credits: (1-4)

(minimal proficiency level varies with content) Consult the class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript.

May be repeated 5 times with a maximum of 6 credit hours.

Note: Course not currently being offered.

FRCH 4960 - Senior Project

Credits: (3)

(IH=Intermediate High) For students completing a major with Departmental Honors. Before registration in this course, students must work with a faculty advisor to define the project, create a contract and schedule, and determine the appropriate number of credit hours.

GEO 1030 PS - Earthquakes and Volcanoes

Credits: (3)

Typically Taught Summer Semester: *2nd Blk, Full Sem Online*

Typically Taught Fall Semester: *Full Sem, Full Sem Online*

Typically Taught Spring Semester: *Full Sem, Full Sem Online*

The causes, distribution, and effects of earthquakes and volcanoes within the framework of global plate tectonics. Development of problem solving and analytical thinking skills are emphasized through homework assignments related to geologic processes.

Three lectures per week.

GEO 1060 PS - Environmental Geosciences

Credits: (3)

Typically Taught Summer Semester: *Full Sem Online*

Typically Taught Fall Semester: *Full Sem, Full Sem*

Online

Typically Taught Spring Semester: *Full Sem, Full Sem Online*

The scientific study of the interaction of humans and earth systems including topics of natural hazards; soil, water, energy and mineral resources; and issues of global change. Three lectures per week.

GEO 1065 - Environmental Geosciences Lab

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Laboratory and field exercises involving analysis of geologic data related to environmental issues or problems. Application of the scientific method and development of basic computational and map interpretation skills will be stressed.

One three-hour lab per week.

Pre-requisite/Co-requisite: GEO 1060.

GEO 1110 PS - Dynamic Earth: Physical Geology

Credits: (3)

Typically Taught Summer Semester: *Full Sem Online*

Typically Taught Fall Semester: *Full Sem, Full Sem Online*

Typically Taught Spring Semester: *Full Sem, Full Sem Online*

Fundamental principles of geology emphasizing physical aspects of the Earth including earth materials, plate tectonics, and the effects of water, wind and ice on the Earth's surface. Useful for all students, and recommended as the first geology course for students with majors/minors in geosciences, science teaching, archaeology, and pre-engineering.

Three lectures per week. Optional field trip to observe local geologic features.

GEO 1115 - Physical Geology Lab

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

The study of minerals and rocks in hand specimens, as well as surficial processes of the Earth revealed by topographic maps and air photos.

One three-hour lab per week.

Pre-requisite/Co-requisite: GEO 1060 or GEO 1110 or GEOG 1000.

GEO 1130 PS - Introduction to Meteorology

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Survey of atmospheric processes that create weather. Topics include solar radiation, temperature, moisture, pressure, wind, storm systems, weather forecasting, and air pollution. Problem solving skills and use of satellite imagery included.

Three lectures per week.

GEO 1220 - Historical Geology

Credits: (4)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

The history of the Earth and the methods used to interpret this history. Short field trips required.

Three lectures and one three-hour lab per week.

Pre-requisite(s): GEO 1110 and GEO 1115.

GEO 1350 PS - Principles of Earth Science

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

Overview of Earth's systems, including weather, climate, seasons, rocks and minerals, processes that change Earth's surface, earthquakes, volcanoes, and plate tectonics. Data collection and analysis are included.

Two lectures and one three-hour lab per week. Designed for Elementary Education majors.

GEO 1710 - Introduction to Geographic Information Systems (GIS)

Credits: (4)

Typically Taught Fall Semester: *Full Sem*

This introductory geospatial course presents the fundamental principles and applications of Geographic Information Systems (GIS). You will learn how to evaluate and apply geospatial concepts using industry-leading GIS software to create, store, edit, evaluate, and query raster- and vector-based geospatial data. Successful completion of this course will ensure you have the critical knowledge and skills of a GIS (geospatial) technician.

Pre-requisite/Co-requisite: GEOG 1790.

GEO 1720 - Geospatial Analysis

Credits: (4)

Typically Taught Spring Semester: *Full Sem*

This advanced geospatial course presents geoprocessing techniques that support spatial analysis and modeling in both the vector and raster data models. The main goal of the course is to teach you the tools/methods that address spatial analysis / modeling applications used in a variety of professional fields that utilize geospatial information. After successful completion of this course, you will have the foundation necessary to become an advanced GIS user with marketable skills transforming data into information needed to address today's geospatial problems.

Pre-requisite(s): GEO 1710.

GEO 2050 - Earth Materials

Credits: (4)

Typically Taught Fall Semester: *Full Sem*

An introduction to the origin, classification, and identification of minerals and rocks including topics related to crystallography, mineral chemistry, petrology, and the importance of mineral and rock resources to our society. Three lectures and one three-hour laboratory per week.

Pre-requisite(s): GEO 1115 and CHEM 1200.

Co-Requisite(s): CHEM 1210.

GEO 2200 - Geospatial Data Acquisition

Credits: (4)

Typically Taught Spring Semester: *Full Sem*

This applied geospatial course introduces students to primary data collection methods in the field, with emphasis on GPS/GNSS, sUAS (drone), and smartphone/tablet operations. The main objective is to provide students with the knowledge and skills needed to successfully plan and execute field campaigns that result in the accurate collection and processing of geospatial data that can be used in a variety of applications. After successful completion of this course, you will know the fundamental techniques needed to effectively and accurately collect and process the most common types of geospatial field data.

Pre-requisite(s): GEO 1710.

GEO 2600 - Laboratory Safety

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

An interdisciplinary, team-taught course that will be an overview of the major chemical, biological and physical safety issues related to science laboratories and field work.

Class will meet once per week and will be taught in a lecture/demonstration format.

GEO 2820 - Elements of Research in the Sciences

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

This interdisciplinary course provides concrete skills for productive entry-level scientific research. Students engage in a hands-on introduction to scientific research and methods, including an introduction to sample handling, data analysis, and dissemination of results through papers and presentations. Upon completion of the course, a student will be prepared for potential internships, summer research programs, and research assistantships both on and off campus.

Pre-requisite(s): MATH 1060 or MATH 1080 or MATH 1210; and CHEM 1210 or PHYS 2210 or PHYS 2010 or (GEO 1110 and GEO 1115).

Cross-listed with CHEM 2820 and PHYS 2820.

GEO 2840 INT - Geospatial Internship

Credits: (1-3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This summative course provides a structured work experience in a supervised setting under the direction of a geospatial employer mentor and the course instructor. The internship will give students invaluable experience with technical, professional, and ethical issues commonly faced by geospatial professionals in today's workforce. Each student will work with their supervisor/mentor and instructor to develop a set measurable Internship Learning Outcomes (ILOs) that will be used to evaluate performance and competence in a real-world job situation.

Pre-requisite(s): Consent of instructor prior to registration.

Pre-requisite/Co-requisite: GEO 1720 and GEOG 2400

This is a dual-listed course with GEO 4840.

May be repeated for a maximum of three credit hours.

GEO 2850 - Geospatial Capstone

Credits: (3)

Typically Taught Spring Semester: *Even Years*

This capstone course provides a summative learning experience that is a culmination of a student's geospatial education. Students apply their knowledge and skills to develop, implement, and evaluate a geospatial project that simulates a workplace environment, including collaboration

as part of a team when appropriate. Students and the instructor develop a set of measurable Capstone Learning Outcomes (CLOs) that will be used to evaluate performance and competence to complete a geospatial project from start to finish.

Pre-requisite/Co-requisite: GEO 1720, GEO 2200, and GEOG 2400.

This is a dual-listed course with GEO 4850.

GEO 2890 INT - Cooperative Work Experience

Credits: (1-6)

Open to all students in Geosciences who meet the minimum Cooperative Work Experience requirements of the department. Provides academic credit for on-the-job experience. Grade and amount of credit will be determined by the department.

May be repeated 5 times with a maximum of 6 credit hours.

Note: This course is offered as needed.

GEO 2920 - Short Courses, Workshops, Institutes and Special Programs

Credits: (1-4)

Variable Title

Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript.

Note: This course is offered as needed.

GEO 2950 - Geoscience Fieldtrips

Credits: (1-3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Application of basic Geoscience field methods during fieldtrips. Readings, written and oral reports, and/or examinations may be required.

Pre-requisite(s): consent of instructor.

May be repeated for a maximum of 6 credit hours.

GEO 3000 - Geoscience Methods and Careers

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

An introduction to a variety of methods and skills used by geoscientists, including geoinformation literacy, written-oral-visual communication, and basic statistical/data analysis skills, that will be used and further developed in

upper-division courses. Basic field and laboratory methods used in geoscience research/investigations will be demonstrated and practiced. Geoscience career paths will be explored and students will begin planning for professional licensure. Two hours of lecture and three hours of field/laboratory per week.

Pre-requisite(s): GEO 1220 and MATH 1010.

GEO 3010 - Oceanography and Earth Systems

Credits: (3)

Typically Taught Spring Semester: *Full Sem even years*

Study of the world's oceans as a framework for examining the major issues in Earth system science. Topics include plate tectonics and the origin of ocean basins, atmosphere-ocean linkages and feedbacks, El Nino events, the ocean's role in biogeochemical cycles, structure and organization of marine ecosystems, and the scientific basis for understanding human impacts on marine systems. Three lectures per week.

Pre-requisite(s): GEO 1060 or GEO 1110 or GEO 1130 or GEOG 1000.

GEO 3060 - Structural Geology

Credits: (4)

Typically Taught Fall Semester: *Full Sem*

Origin and characteristics of structural features in deformed rock. Topics include basic principles of stress, strain, and rock deformation; analysis of faults and folds; and relations to major tectonic features of Earth. Field trips required. Three lectures and one three-hour lab per week.

Pre-requisite(s): GEO 2050 and either MATH 1050 or MATH 1080; or consent of instructor.

GEO 3080 - Applied Hydrology

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

A detailed examination of Earth's water cycle, including precipitation, surface water, groundwater, water management, and water conservation. Three hours of lecture and three hours of laboratory per week.

Pre-requisite(s): GEO 1115 and GEO 3000.

GEO 3150 - Geomorphology

Credits: (4)

Typically Taught Fall Semester: *Full Sem*

A study of landforms, surficial deposits, and geomorphic processes operating in fluvial, coastal, eolian, and glacial

environments. Laboratory exercises employ maps, aerial photographs, and field analysis to understand the interactive nature of geomorphic processes and landform development.

Three lectures and one three-hour lab per week.

Pre-requisite(s): GEO 1220 and MATH 1050 or MATH 1080.

GEO 3180 - Paleontology

Credits: (4)

Characteristics of important fossil groups and their geologic distribution and paleoecology. Emphasis on the invertebrate record with some treatment of vertebrates and plants.

Three lectures and one three-hour lab per week.

Pre-requisite(s): GEO 1220 or ZOOL 1110 or consent of instructor.

Note: This course is not currently offered.

GEO 3210 - Quaternary Environmental Change

Credits: (3)

Overview of the geologic and paleoclimatic history of the Earth during the last 2 million years (the "Ice Age"), focusing on the interactions between geological, climatological, and biological processes and systems.

Topics include the methods used to date Quaternary deposits, nature of Quaternary glaciations, use of proxy data to model past climates, causes of Quaternary climatic oscillations, history of Pleistocene Lake Bonneville, and the increasing role of humans as agents of environmental change.

Three lectures per week.

Pre-requisite(s): GEO 1220 or GEOG 1000 or ANTH 2030.

Note: This course is not currently offered.

GEO 3214 - Soils

Credits: (4)

Typically Taught Spring Semester: Full Sem

An introduction to the fundamental principles of soil science. Chemical, physical, geological, and biological properties of soils; Course will examine the role of soils as a fundamental ecological constraint through space and time on patterns and processes, such as plant distribution, nutrient cycling, and cycling of water between terrestrial ecosystems and the atmosphere. Course will also examine the human dimensions of soils as a natural resource, and the historical and current environmental impact of soil use

and management. Three hours of lecture and one 3-hour lab per week.

Pre-requisite(s): BTNY 2104 or GEO 1110 or GEO 1060 and CHEM 1130 or CHEM 1110 or CHEM 1210. Course is cross listed with BTNY 3214.

GEO 3250 - Geology of Utah

Credits: (3)

Typically Taught Fall Semester: Full Sem even years

The study of Utah's geologic history, rocks, minerals, fossils, and landforms and their relationship to regional and global events. Field trips required.

Three lectures per week.

Pre-requisite(s): GEO 1220.

GEO 3550 - Sedimentology and Stratigraphy

Credits: (4)

Typically Taught Spring Semester: Full Sem

The processes, origin, classification, identification, and basic petrology of sedimentary rocks and the principles, concepts, and applications of stratigraphy. Field trips required.

Three lectures and one three-hour lab per week.

Pre-requisite(s): GEO 1220 and GEO 2050; or consent of instructor.

GEO 3570 - Foundations of Science Education

Credits: (3)

Typically Taught Spring Semester: Full Sem

A thorough investigation of research in science learning and curricular standards at the state and national levels. Foundations of the philosophy of science and scientific inquiry as applicable to science teaching at the secondary level. This course serves as a foundation to a preservice science teacher's education coursework.

GEO 3710 - Introduction to Geographic Information Systems

Credits: (4)

Typically Taught Fall Semester: Full Sem

This introductory geospatial course presents the fundamental principles and applications of Geographic Information Systems (GIS). You will learn how to evaluate and apply geospatial concepts using industry-leading GIS

software to create, store, edit, evaluate, and query raster- and vector-based geospatial data. Successful completion of this course will ensure you have the critical knowledge and skills of a GIS (geospatial) technician.

GEO 3720 - Geospatial Analysis

Credits: (4)

Typically Taught Spring Semester: Full Sem

This advanced geospatial course presents geoprocessing techniques that support spatial analysis and modeling in both the vector and raster data models. The main goal of the course is to teach you the tools/methods that address spatial analysis / modeling applications used in a variety of professional fields that utilize geospatial information. After successful completion of this course, you will have the foundation necessary to become a Geospatial/GIS analyst or advanced GIS user with marketable skills required in the geospatial workforce today.

Pre-requisite(s): GEO 3710.

GEO 3753 - Geomicrobiology

Credits: (3)

Typically Taught Fall Semester: Full Sem even years

Geomicrobiology is the study of the interactions between microorganisms and minerals. This course will explore 1. geological change mediated by microorganisms, 2. microbial evolution driven by geologically diverse habitats, and 3. applications of geomicrobiology, including understanding the evolution of life on earth, the study of life in extreme environments, and industrial applications of geomicrobiology. This team-taught course includes classroom discussion, laboratories, and field trips.

Pre-requisite(s): CHEM 1210 or approval of the instructor.

Cross-listed with MICR 3753.

GEO 3810 - Oil, Gas, and the Environment

Credits: (2)

Experimental Course, Contact Department for More Information

An introduction to petroleum geology and the environmental impacts of oil and gas production, including groundwater contamination, induced earthquakes, and climate change. The issue of hydraulic fracturing (aka "fracking") will be examined in detail. Two hours of lecture per week.

GEO 3840 - Remote Sensing: Principles and Methods

Credits: (4)

Typically Taught Fall Semester: Full Sem

This is an advanced geospatial course that introduces and analyzes important concepts, issues, and methods related to a variety of multispectral and other types of remotely sensed imagery (e.g., satellite and airborne platforms). The major objectives are to provide students with both a foundation in understanding different types of imagery and how to process imagery used to address geospatial problems and issues. After successful completion of this course, you will have the knowledge needed to understand different types / applications of imagery and the skills needed to process the image data and assess the accuracy of the results.

Pre-requisite/Co-requisite: GEO 3710.

GEO 3880 - Groundwater

Credits: (4)

Typically Taught Spring Semester: Full Sem

Origin, occurrence, behavior, and use of groundwater, with special emphasis on practical applications in Utah. Three lectures and one three hour lab per week.

Pre-requisite(s): GEO 1115 and either MATH 1050 or MATH 1080; or consent of instructor.

GEO 4060 - Geoscience Field Methods

Credits: (4)

Typically Taught Fall Semester: Full Sem

A capstone course in the collection and analysis of field data for various Geoscience applications. Topics include introductory surveying, geologic mapping of bedrock and surficial deposits, measuring stratigraphic sections, GPS surveying, groundwater monitoring, and analysis of geologic hazards. Results are presented in maps, computer graphics, written reports, and oral presentations. Two hours of lecture and six hours of lab/field work per week.

Pre-requisite(s): GEO 2050, GEO 3000, and GEO 3550.

GEO 4080 - Groundwater and Environmental Assessment

Credits: (4)

Typically Taught Spring Semester: Full Sem

A survey of groundwater hydrology, including the origin, occurrence, behavior, and use of groundwater and the transport of groundwater and soil contaminants.

Environmental site assessment and groundwater remediation are also examined. Three hours of lecture and three hours of laboratory per week.

Pre-requisite(s): GEO 3080.

GEO 4100 - Engineering Geology

Credits: (3)

Typically Taught Spring Semester: *Full Sem odd years*

Introduction to basic concepts in engineering geology and geotechnical engineering; emphasizes problem solving as the primary method.

Three lectures per week.

Pre-requisite(s): GEO 1060 and GEO 1065, or GEO 2050, or consent of instructor.

GEO 4200 - Geospatial Data Acquisition

Credits: (4)

Typically Taught Spring Semester: *Full Sem*

This applied geospatial course introduces students to primary data collection methods in the field, with emphasis on GPS/GNSS, sUAS (drone), and smartphone/tablet operations. The main objective is to provide students with the knowledge and skills needed to successfully plan and execute field campaigns that result in the accurate collection and processing of geospatial data that can be used in a variety of applications. After successful completion of this course, you will know the fundamental techniques needed to effectively and accurately collect and process the most common types of geospatial field data. This is a dual-listed course with GEO 2200.

Pre-requisite(s): GEO 3710.

GEO 4300 - Igneous and Metamorphic Petrology

Credits: (4)

Typically Taught Spring Semester: *Full Sem even years*

The origin, classification, and identification of igneous and metamorphic rocks, and understanding of igneous and metamorphic processes. Laboratory includes analysis of rocks in thin section and an introduction to optical mineralogy.

Three lectures and one three-hour lab per week.

Pre-requisite(s): GEO 2050 and CHEM 1220; or consent of instructor.

GEO 4510 - Geology Field Camp

Credits: (4)

Typically Taught Summer Semester: *1st Blk even years*

Integrated approach to collecting field data and interpreting geologic processes and history. Includes geologic mapping and analysis of bedrock, surficial deposits, and geologic structures using aerial photographs, topographic maps, and surveying techniques. Results presented in written reports, maps, and graphical formats.

About forty hours of lab per week for about 4 weeks.

Pre-requisite(s): GEO 3060, GEO 3550, and GEO 4060; or consent of instructor.

GEO 4550 - Geochemistry

Credits: (3)

Typically Taught Spring Semester: *Full Sem odd years*

The chemical evolution of the Earth and geochemical processes operating in the lithosphere, hydrosphere, and atmosphere. Applications to chemical reactions, mineral stability, aqueous solutions, geochemical cycles, and isotope geochemistry.

Three lectures per week.

Pre-requisite(s): CHEM 1220 and GEO 2050; or consent of instructor.

GEO 4560 - Environmental Geochemistry

Credits: (4)

Typically Taught Spring Semester: *Full Sem*

Applications of chemistry to understanding Earth system cycles and assessing environmental health and safety. Course emphasizes modern surface geochemical cycles operating in the lithosphere, hydrosphere, atmosphere, and biosphere. Applications of aqueous chemistry, geomicrobiology, and isotope geochemistry. Laboratory introduces practical skills and real-world applications.

Three hours of lecture and three hours of lab per week.

Pre-requisite(s): CHEM 1200 and GEO 3000; or consent of instructor.

GEO 4570 - Secondary School Science Teaching Methods

Credits: (3)

Acquaintance and practice with various teaching and assessment methods. Development of science curricula including lesson and unit plans. It is recommended that this course be completed immediately before student teaching.

Pre-requisite(s): Admission to the Teacher Education Program.

Note: This course is offered as needed.

GEO 4600 - Geophysics

Credits: (3)

Principles and techniques of geophysical exploration, including gravity, magnetic, electric, and seismic methods. Course includes field collection and computer modeling of geophysical data.

Three lectures per week. Field trips required.

Pre-requisite(s): GEO 3060 and MATH 1220; or consent of instructor.

Note: This course is not currently offered.

GEO 4630 - Global Tectonics**Credits: (3)**

Typically Taught Spring Semester: *Full Sem odd years*

Large-scale structure and dynamics of the Earth.

Framework of plate tectonics including plate motion, processes at plate boundaries, and driving mechanisms.

Processes of crustal deformation and evolution of orogenic belts over time, with examples from North America.

Three lectures per week. Field trips required.

Pre-requisite(s): GEO 2050 and GEO 3060; or consent of instructor.

GEO 4750 - Special Topics in Geosciences**Credits: (1-4)****Variable Title**

Typically Taught Spring Semester: *Full Sem*

An opportunity to examine in depth topics in the Geosciences not regularly offered as part of the standard course offerings. The specific title and credit authorized will appear on the student transcript.

Pre-requisite(s): GEO 1110, GEO 1115, and any specific courses selected by the instructor.

May be repeated for a maximum of 8 credit hours.

GEO 4800 - Independent Research**Credits: (1-3)**

Typically Taught Summer Semester: *Offered as needed.*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Independent research under the advisement of a faculty member.

Pre-requisite(s): Consent of instructor prior to registration.

May be repeated for a maximum of five credit hours.

GEO 4810 - Experimental Courses**Credits: (1-6)**

Individual courses offered on an experimental basis,

identified by specific name and description. The specific title will appear on student's transcript along with the authorized credit. Refer to Experimental Courses.

May be repeated 5 times up to 6 credit hours.

GEO 4830 - Directed Readings**Credits: (1)**

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Directed individual readings in the general areas of geoscience and/or environmental science. Specific topics and readings selected in consultation with faculty member. Students will complete a scientific literature review and/or annotated bibliography.

Pre-requisite(s): GEO 3000 and approval of instructor.

May be repeated twice for a total of 2 credits.

GEO 4840 INT - Geospatial Internship**Credits: (1-3)**

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This summative course provides a structured work experience in a supervised setting under the direction of a geospatial employer mentor and the course instructor. The internship will give students invaluable experience with technical, professional, and ethical issues commonly faced by geospatial professionals in today's workforce. Each student will work with their supervisor/mentor and instructor to develop a set measurable Internship Learning Outcomes (ILOs) that will be used to evaluate performance and competence in a real-world job situation.

Pre-requisite(s): Consent of instructor prior to registration.

Pre-requisite/Co-requisite: GEO 3720 and GEOG 4400.

This is a dual-listed course with GEO 2840.

May be repeated for a maximum of three credit hours.

GEO 4850 - Geospatial Capstone**Credits: (3)**

Typically Taught Spring Semester: *Even Years*

This capstone course provides a summative learning experience that is a culmination of a student's geospatial education. Students apply their knowledge and skills to develop, implement, and evaluate a geospatial project that simulates a workplace environment, including collaboration as part of a team when appropriate. Students and the instructor develop a set of measurable Capstone Learning Outcomes (CLOs) that will be used to

evaluate performance and competence to complete a geospatial project from start to finish.

Pre-requisite/Co-requisite: GEO 3720, GEO 4200, and GEOG 4400.

This is a dual-listed course with GEO 2850.

GEO 4890 INT - Cooperative Work Experience

Credits: (1-6)

A continuation of GEO 2890. Open to all students.

May be repeated for a maximum of 6 credit hours.

Note: This course is offered as needed.

GEO 4920 - Short courses, Workshops, Institutes and Special Programs

Credits: (1-4)

Variable Title

Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript.

May be repeated for a maximum of 6 credit hours.

Note: This course is offered as needed.

GEO 4950 - Advanced Geoscience Fieldtrips

Credits: (1-3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Application of Geoscience field methods during fieldtrips.

Readings, written and oral reports, and/or examinations required.

Pre-requisite(s): consent of instructor.

May be repeated for a maximum of 6 credit hours.

GEO 4970 - Senior Thesis

Credits: (2)

A thesis to be written by a student at the culmination of a period of individual field/laboratory and library research, under the direction of a specific faculty person.

Pre-requisite(s): Senior standing and departmental approval of the thesis topic.

Note: This course is offered as needed.

GEO 4990 - Geoscience and Society Seminar

Credits: (2)

Typically Taught Spring Semester: *Full Sem*

Case studies, readings, presentations, and/or seminar-style discussions related to geologic hazards/disasters, natural resources, climate change, and applied geoscience careers.

Two hours of lecture and/or seminar discussion per week.

Pre-requisite(s): GEO 3000 and GEO 3150.

GEO 5030G - Geology for Teachers

Credits: (2-4)

Science content course for teachers in the M.Ed Science Emphasis Program. To register, select another departmental course and develop a contract detailing additional work required for graduate credit. Contract must be approved by instructor, department chair, and Director of the Master of Education Program.

May be repeated once with a maximum of 4 credit hours.

Note: This course is offered as needed.

GEO 5920G - Short courses, Workshops, Institutes and Special Programs

Credits: (1-4)

Variable Title

Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript.

Note: This course is offered as needed.

GEOG 1000 PS SUS - Natural Environments of the Earth

Credits: (3)

Typically Taught Summer Semester: *1st Blk, 2nd Blk*

Typically Taught Fall Semester: *Full Sem, Online*

Typically Taught Spring Semester: *Full Sem, Online*

A study of the interrelated systems that constitute the earth's surface environment, e.g., landforms, weather, climate, natural vegetation, hydrology, and soils, and their integrated patterns of world distribution.

GEOG 1002 - Map Reading and Land Navigation

Credits: (2)

Typically Taught Summer Semester: *1st Blk*

Orienteering and the use of maps, compasses, global positioning systems (GPS), and other navigational aids.

Lecture and field work prepares course participants to apply navigational knowledge and skills in a professional

setting.

Weekly two-hour lab sessions for ten weeks.

GEOG 1005 - Natural Environments Field Studies

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

This introductory level field studies course investigates natural environmental phenomena including weather, climate, natural vegetation, landforms, hydrology, soils and human impacts on the environment. While exploring local natural environments from a geographic perspective, understanding of principles of physical geography is enhanced through direct observation in the field and through the measurement of phenomena noted above.

Pre-requisite/Co-requisite: Prerequisite or current enrollment in GEOG 1000.

GEOG 1300 SS/DV - Places and Peoples of the World

Credits: (3)

Typically Taught Summer Semester: *1st Blk, 2nd Blk*

Typically Taught Fall Semester: *Full Sem, Online*

Typically Taught Spring Semester: *Full Sem, Online*

The study of different places, countries, and regions of the world. Addresses topics relating to natural environment, ethnic diversity, and regional differences in subjects related to culture, gender, age, class, social structure, spatial organization, and economic activities. Current social conditions within the world's major culture realms are analyzed and compared.

GEOG 1500 PS SUS - The Science of Global Warming: Myths, Realities and Solutions

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

This course examines the science behind global warming, providing an understanding of the basic physical, chemical, biological and geographical principles that explain the workings of Earth's climate system and the human influence upon it. The course also considers the feasibility and societal impacts of possible solutions to human-induced global warming. Finally, examination of the scientific process is a central part of the course, as students learn to separate truth from fiction in the arguments about whether or not global warming is a real problem, and if so, what should be done about it.

GEOG 1520 SS/DV - Geography of the United States and Canada

Credits: (3)

Typically Taught Fall Semester: *Full Sem Online*

Typically Taught Spring Semester: *Full Sem Online*

Addresses topics relating to the area's natural environment, ethnic diversity, and regional differences in such subjects as culture, gender, age, class, social structure, spatial organization, and economic activities. Present social and cultural conditions within the United States and Canada are analyzed and compared.

GEOG 1790 - Exploring Our World Through Geospatial Technology

Credits: (3)

Typically Taught Fall Semester: *Full Sem, Full Sem Online*

Typically Taught Spring Semester: *Full Sem Online*

This exploratory course introduces students to the fundamental concepts of Geospatial Science and how Geospatial Technology (GST) is used to measure, imagine, study, and discover our complex and ever-changing human and natural world. You will learn the basic techniques of cartography (mapping), GPS (global positioning systems), GIS (Geographic Information Systems), spatial analysis, and remote sensing (drones and satellites).

GEOG 2400 - Cartography and Map Design

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

This course introduces the foundations of Cartography and Map Design including topics and techniques important to the creation of cartographic visualizations using Geographic Information Systems (GIS) for digital and hardcopy maps. Students will explore and practice the guiding principles and cutting edge techniques that make modern cartographic products in such high demand across our multimedia social spaces and marketplaces as well as research and data environments.

GEOG 2790 - Exploring Geography, Environment & Sustainability

Credits: (1)

Typically Taught Fall Semester: *2nd Blk*

This course introduces new and prospective Geography, Environment & Sustainability majors and minors to the

fundamental perspectives that prepare them for success in their university career and beyond. Through engaging discussions, guest lectures, and activities, this course introduces the career opportunities, major tracks, and real-world applications of geographic perspectives and techniques that help students identify a pathway through the major and into their careers.

GEOG 2840 INT - Geospatial Internship

Credits: (1-3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This summative course provides a structured work experience in a supervised setting under the direction of a geospatial employer mentor and the course instructor. The internship will give students invaluable experience with technical, professional, and ethical issues commonly faced by geospatial professionals in today's workforce. Each student will work with their supervisor/mentor and instructor to develop a set measurable Internship Learning Outcomes (ILOs) that will be used to evaluate performance and competence in a real-world job situation.

Pre-requisite(s): Consent of instructor prior to registration.

Pre-requisite/Co-requisite: GEO 1720 and GEOG 2400. May be repeated for a maximum of three credit hours.

GEOG 2850 - Geospatial Capstone

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

This capstone course provides a summative learning experience that is a culmination of a student's geospatial education. Students apply their knowledge and skills to develop, implement, and evaluate a geospatial project that simulates a workplace experience, including collaboration as part of a team when appropriate. Students and the instructor develop a set of measurable Capstone Learning Outcomes (CLOs) that will be used to evaluate performance and competence to complete a geospatial project from start to finish.

Pre-requisite/Co-requisite: GEO 1720, GEO 2200, and GEOG 2400.

GEOG 2920 - Short Courses, Workshops, Institutes and Special Programs

Credits: (1-6)

Variable Title

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript.

This course can be repeated up to 5 times, for a total of 6 credit hours.

Note: This course is offered as needed.

GEOG 2950 - Elementary Regional Field Studies

Credits: (1-3)

The study of specific geographic regions, utilizing field observations, lectures, and individual student research. May be repeated twice with a maximum of 3 credit hours. Note: This course is offered as needed.

GEOG 3050 - Weather and Climate

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

The advanced study of the processes that produce global climate patterns; analysis of the prospects and possible repercussions of global climate change; and an examination of climatic anomalies such as El Niño, hurricanes, tornadoes and other unusual phenomena.

Pre-requisite(s): GEOG 1000, or GEO 1130, or the equivalent.

GEOG 3060 - World Environmental Issues

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A study of global and local environmental issues such as changing air and water quality, food production, waste management, and other topics. The course identifies strategies for creating healthier and more sustainable ways of living within our natural and built environments.

Pre-requisite(s): GEOG 1000, or BTNY 1403, or the equivalent, or consent of the instructor.

GEOG 3070 - Wetland Environments

Credits: (3)

Analysis of physical properties, values, economic, and legal issues associated with wetland environments. Since wetlands in different places have many different attributes, a detailed examination is made of wetland environments in

different parts of the United States.
Note: Course not currently being offered.

GEOG 3080 - Arid Lands

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Presents a general overview of the characteristics and variant topography, geography, and climatic conditions of the Earth's arid lands. Examines the spatial location of arid regions and their climatic controlling factors. Weather patterns, hydrology, and eolian processes will be discussed along with sediment transportation and deposition of arid environments. The course will also review dune types and formation along with soils of arid zones. The course concludes with a discussion on the desertification and the impact of human intervention in the misuse of arid lands, while discussing preservation versus reclamation of these regions.

Pre-requisite(s): GEOG 1000, or GEO 1060, or the equivalent, or consent of the instructor.

GEOG 3090 - Arctic and Alpine Environments

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

An examination of the physical environments of high altitude and high latitude places, the ways in which humans interact with these environments, and their broader roles within the large Earth systems. Topics will include causes and consequences of avalanches, climatic characteristics of the Arctic, glacier behavior, sea ice, and the responses of human physiology to high altitudes.

Pre-requisite(s): GEOG 1000, or GEO 1060, or the equivalent, or consent of the instructor.

GEOG 3210 - Urban Geography

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

The study of cities as elements of the landscape, their distribution, location, and structure, as related to their physical setting, economic function, and cultural inheritance.

GEOG 3300 - Historical Geography of the United States

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

A geographic analysis of America's past featuring an examination of cultural development in different parts of the United States and how this has produced many distinct regional landscapes throughout the country.

GEOG 3360 - Economic Geography

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

The spatial structure of the world's resources, production, commerce, and economic problems.

GEOG 3500 - Geography of Utah

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A study of the physical environment and activities of man in Utah.

GEOG 3540 - Geography of Latin America

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Addresses topics relating to Latin America's natural environment, ethnic diversity, and regional differences in culture, gender, age, class, social structure, spatial organization, and economic activities. Current issues relating to culture and society in Latin America are analyzed within the context of its colonial inheritance and its future prospects.

GEOG 3590 - Geography of Europe

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

Addresses topics relating to Europe's natural environment, ethnic diversity, and regional differences in culture, gender, age, class, social structure, wealth, spatial organization, and economic activities. Current issues and social conditions within Europe and its major subdivisions are discussed and analyzed.

GEOG 3640 - Geography of Asia

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

Addresses topics relating to Asia's natural environment, ethnic diversity, and regional differences in culture, gender,

age, class, social structure, spatial organization, and economic activities. Current societies in Asia are analyzed with special attention given to their colonial inheritance and future prospects.

GEOG 3740 - Geography of Africa

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

The study of Africa's natural environment, ethnic diversity, and regional differences in culture, gender, age, class, societal structure, wealth, spatial organization, and economic activities. Current socio-economic conditions in Africa are analyzed within the context of its colonial inheritance and its future outlook.

GEOG 3780 - Geographic Area Studies

Credits: (1-3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Surveys different geographic areas and regions of the world. When this number is used it will be accompanied by a descriptive title and the credit authorized, which will appear on the student's transcript. May be repeated for credit up to nine hours when a different title is used.

GEOG 3790 - Research Methods in Geography

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

This course introduces the methods used in geographic research, beginning with hypothesis formulation, review of literature, research design, gathering and analysis of data from a spatial perspective, and the analysis, interpretation and presentation of research results. Students are exposed to both quantitative and qualitative methods commonly used in geographic research, and are expected to have basic proficiency in spreadsheets, word processing and presentation software. IRBs and Grant Writing are also covered. The course is an essential prerequisite for GEOG 4990 - Senior Seminar in Geography, which should be taken in the following semester.

Pre-requisite(s): One statistics class taken from any of the following: CJ 3600, SW 3600, GERT 3600, PSY 3600, SOC 3600, or MATH 1040.

Pre-requisite/Co-requisite: GEOG 2790 with a grade of C or higher.

GEOG 4400 - Cartography and Map Design

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

This course introduces the foundations of Cartography and Map Design including topics and techniques important to the creation of cartographic visualizations using Geographic Information Systems (GIS) for digital and hardcopy maps. Students will explore and practice the guiding principles and cutting edge techniques that make modern cartographic products in such high demand across our multimedia social spaces and marketplaces as well as research and data environments.

GEOG 4410 SUS - Sustainable Land Use Planning

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

A study of the status and tools of planning, planning office organization, the federal and state role in planning, and problems in planning. The course emphasizes concepts of sustainable land use planning such as resource conservation, air and water quality improvement, agricultural land preservation, transit oriented development, and alternatives to suburban sprawl.

GEOG 4420 - Advanced Urban and Regional Planning

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

A study of the enabling legislation for planning, zoning laws and ordinances, rezoning and review processes, zoning problems, and the ramifications of urban growth. The preparation, financing, citizen participation and evaluation of land use pertaining to general plans. Class groups will prepare, critique, and present a draft urban general plan.

Pre-requisite(s): GEOG 4410.

GEOG 4600 - Geospatial Programming/Online Methods

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

This course focuses on two essential components of the geographic online experience: geospatial programming and online methods. Half of the course is devoted to customizing GIS software applications by way of modified service interface elements. Topics include the theory and implementation of the various scripting languages (Python for example) currently in use. With these skillsets, students will be able to solve geospatial problems, extend

functionality, and streamline/automate GIS workflows through the creation and modification of scripts. The other half of the course is aimed at the design, publishing, and optimization of geospatial servers, and to the maintenance of basic geospatial web services and applications. This will include an introduction to browser and mobile-enabled interactive applications such as those found on cellular phones. Mapping applications using geospatial APIs and Javascript will be covered as well.

Pre-requisite/Co-requisite: GEO 4200.

GEOG 4800 - Individual Research

Credits: (1-3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A personalized course designed to foster individual research and scientific writing.

Pre-requisite(s): Instructor approval required before registering for this course.

May be repeated up to a maximum of 12 credit hours.

GEOG 4840 INT - Geospatial Internship

Credits: (1-3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This summative course provides a structured work experience in a supervised setting under the direction of a geospatial employer mentor and the course instructor. The internship will give students invaluable experience with technical, professional, and ethical issues commonly faced by geospatial professionals in today's workforce. Each student will work with their supervisor/mentor and instructor to develop a set measurable Internship Learning Outcomes (ILOs) that will be used to evaluate performance and competence in a real-world job situation.

Pre-requisite(s): Consent of instructor prior to registration.

Pre-requisite/Co-requisite: GEO 3720 and GEOG 4400.

May be repeated for a maximum of three credit hours.

GEOG 4850 - Geospatial Capstone

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

This capstone course provides a summative learning experience that is a culmination of a student's geospatial education. Students apply their knowledge and skills to develop, implement, and evaluate a geospatial project that

simulates a workplace experience, including collaboration as part of a team when appropriate. Students and the instructor develop a set of measurable Capstone Learning Outcomes (CLOs) that will be used to evaluate performance and competence to complete a geospatial project from start to finish.

This is a dual-listed course with GEOG 2850.

GEOG 4890 INT - Cooperative Work Experience

Credits: (1-6)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Open to all students in Geography who meet the minimum Cooperative Work Experience requirements of the department. Provides academic credit for on-the-job experience. Grade and amount of credit will be determined by the department.

A maximum of six credit hours will be accepted toward a major in geography. **Instructor approval required before registering for this course.**

GEOG 4920 - Short Courses, Workshops, Institutes and Special Programs

Credits: (1-6)

Variable Title

Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student's transcript.

May be repeated 5 times up to 6 credit hours.

Note: This course is offered as needed.

GEOG 4950 - Advanced Regional Field Studies

Credits: (1-3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A directed study of specific geographic regions utilizing field observations, lectures, and individual student research.

Pre-requisite(s): A general course in Geography or consent of the instructor. May be repeated up to a maximum of 12 credit hours.

May be repeated 11 times up to 12 credit hours.

GEOG 4990 - Senior Seminar in Geography

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

This capstone course builds on GEOG 3790 - Research Methods in Geography. Students engage in a primary research experience that draws on the full range of skills and abilities acquired in prior semesters and classes, culminating in an original, professional-quality research report, thesis, or applied project. Students present their work in an end-of-semester forum, and will have the opportunity to present in other professional settings and/or submit their work for publication.

Pre-requisite(s): Senior standing.

Pre-requisite/Co-requisite: GEOG 3790.

GEOG 5030G - Geography for Teachers

Credits: (3)

Science content course for teachers in the MEd Science Emphasis Program. To register, select another departmental course and develop a contract detailing additional work required for graduate credit. Course may be repeated. Contract must be approved by instructor, department chair, and Director of the Master of Education Program. Graduate.

Note: This course is offered as needed.

GERT 1010 SS - Introduction to Gerontology

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A study of physical, psychological, social-psychological, and social dimensions of aging and the application of principles and strategies to facilitate adaptation to aging. Emphasis is placed on methods of gathering knowledge, the current knowledge base, and strategies for adaptation in the later stages of life cycle.

GERT 2220 - Introduction to Social Gerontology

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

A scientific study of social and psychological aging and the application of principles and strategies to facilitate adaptation to aging. The focus is on methods and systems for gathering data, demography of aging, social theoretical perspectives, psychological effects of aging, aging and the economy, and government and the politics of aging.

GERT 2900 - Current Topics on Aging

Credits: (2-4)

Variable Title

A study on age related topics of current interest. Specific title will appear on student's transcript along with authorized credit.

May be repeated once for a maximum of 4 credits.

Note: This course is offered as needed. Please check with the department for availability.

GERT 2920 - Short Courses, Workshops, Institutes and Special Programs

Credits: (1-4)

Variable Title

Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript.

May be repeated up to 3 times for a maximum of 4 credits.

Note: This course is offered as needed. Please check with the department for availability.

GERT 3000 - Death and Dying

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

An in-depth study of death, death-related issues and social institutions and practices dealing with death in American society, with special emphasis on the social processes surrounding death and constructive responses to death and dying.

Cross-listed with SW 3000.

GERT 3120 - Aging: Adaptation and Behavior

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

An examination of the physical and psychological processes of aging. The emphasis is upon behavioral and social adaptation to these processes.

Cross-listed with SW 3120.

GERT 3320 - Ethnicity and Older Women in the American Society

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

The importance of special populations (ethnic, racial and

women) as they relate to the aging process.
Cross-listed with SW 3320.

GERT 3400 - Methods of Research: Social and Behavioral Research

Credits: (4)

Focus on acquiring knowledge, developing skills, and conducting social and behavioral scientific research, utilizing single system design that includes visual and statistical assessment. The course will include both qualitative methodologies (evaluative research, historical methods, case studies, field research, ethnography studies, and grounded theory) and quantitative methodologies (experimental and survey with a special emphasis on survey).

Pre-requisite(s): It is recommended to take a Statistics course before Research.

Note: Course not currently being offered.

GERT 3500 - Social Welfare & Gerontological Policy Development and Service

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

The history, mission, philosophy and human service aspects used in the development of social work/gerontology as a profession will be covered. Examples of social, public and social welfare policy will be identified and studied. Knowledge of local, state, and federal legislation, professional organizations, and membership organizations will assist in review of lobby, funding and implementation practices used in meeting human service needs. Methods for the political and organizational analysis of processes and policy will be covered.

Pre-requisite(s): SW 1010 or GERT 1010. (SW 3500/GERT 3500 must be completed before entering Field Practice).

GERT 3600 - Social Statistics

Credits: (3)

Typically Taught Summer Semester: *Online*

Typically Taught Fall Semester: *Full Sem, 1st Blk, Online*

Typically Taught Spring Semester: *Full Sem, 2nd Blk, Online*

Introduction to analysis and presentation of data.

Pre-requisite(s): Meet WSU Quantitative Literacy

requirement.
Cross-listed with SW 3600.

GERT 4220 - Societal Responses to Aging

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

This course is designed to cover aspects of retirement relating to job change or discontinuance. The processes, events, social roles, and phases of life will be presented.
Cross-listed with SW 4220.

GERT 4650 - Retirement: Adjustment/Planning

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

This course is designed to cover aspects of retirement relating to job change or discontinuance. The processes, events, social roles, and phases of life will be presented.
Cross-listed with SW 4650.

GERT 4830 - Readings and/or Projects

Credits: (2-4)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Individual readings and/or projects for the senior Gerontology major (with the approval of the instructor). May be repeated once for a maximum of 4 credits.
Note: Check with department for course availability.

GERT 4860 - Introductory Field Practicum

Credits: (2)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$10.00

Introductory experience in the world of work in a gerontology setting whereby the student might develop, test, and use knowledge derived from classroom experiences (90 hours at approved agency).

Pre-requisite(s): GERT 1010, GERT 3320 and GERT 3500; must be a declared minor. Offered on demand.

GERT 4861 - Advanced Field Practicum

Credits: (2)

Course Fee: \$10.00

Advanced experience in the world of work in a gerontology setting whereby the student might develop, test, and use knowledge derived from classroom experiences (90 hours at approved agency).

Pre-requisite(s): GERT 3400, GERT 3500, GERT 4860, and must be a declared major or minor.

Note: Course not currently being offered.

GERT 4862 - Specialized Field Practicum

Credits: (2)

Course Fee: \$10.00

Specialized experience in the world of work in a gerontology setting whereby the student might develop, test, and use knowledge derived from classroom experiences (90 hours at approved agency).

Pre-requisite(s): GERT 3600, GERT 4861, and must be a declared major or minor.

Note: Course not currently being offered.

GERT 4900 - Current Topics on Aging

Credits: (2-4)

Variable Title

An in-depth study on age related topics of current interest. Specific title will appear on student's transcript along with authorized credit.

May be repeated once for a maximum of 4 credits.

Note: This course is offered as needed. Please check with the department for availability.

GERT 4920 - Short Courses, Workshops, Institutes and Special Programs

Credits: (1-4)

Variable Title

Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript.

May be repeated up to 3 times for a maximum of 4 credits.

Note: This course is offered as needed. Please check with the department for availability.

GERT 4990 - Senior Seminar

Credits: (2)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Preparation and discussion of gerontology concepts and

topics. Information and techniques for obtaining a job and selecting a graduate school.

Pre-requisite(s): GERT 1010, GERT 3320, GERT 3400, GERT 3500 and GERT 3600. Offered on demand.

GRMN 1000 - Proficiency Development

Credits: (1-2)

(N=Novice) (Cr/NCr) Non-graded courses for entry-level students to augment foreign language instruction in stress-free activities such as reading children's literature, learning and performing skits, folk dancing, singing, cooking, etc. May be repeated for credit under different titles.

Note: Course not currently being offered.

GRMN 1010 - First Semester German

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Course Fee: \$8.00

(N=Novice) Introductory course assuming no significant previous experience with the language. Beginners and students with less than two years of high school language should register for this class. Emphasis on everyday conversation and exposure to cultural perspectives.

GRMN 1020 - Second Semester German

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$8.00

(N=Novice) Continuation of GRMN 1010. Basic language skills including listening, speaking, reading, writing and culture.

GRMN 1700 - Conversational Skills

Credits: (1-3)

Specific vocabulary and speaking skills in one semester (e.g., nursing, law enforcement, medical, tourism, family language courses, etc.). May be repeated for credit under different titles.

GRMN 1852 - Study Abroad

Credits: (1-3)

(N=Novice) Language and culture studies for students with no previous experience in the target language and culture.

Most assignments are performed in English. Prior travel experience does not apply.

May be repeated twice with a maximum of 3 credit hours.
Note: Check with Department for course availability.

GRMN 2000 - Proficiency Development

Credits: (1-2)

(NH=Novice High) (CR/NC) Non-graded courses for second-year students to augment foreign language instruction in stress-free activities appropriate to the linguistic level of second-year students. May be repeated under different titles. Note: Course not currently being offered.

GRMN 2010 - Third Semester German

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Course Fee: \$8.00

(NH=Novice High) Continuation of GRMN 1020. Assumes completion of first-year or equivalent experience. Students learn to understand and express ideas about their community and the world. Includes listening, speaking, reading, writing and culture.

GRMN 2020 HU - Fourth Semester German

Credits: (3)

Course Fee: \$8.00

(NH=Novice High) Continuation of GRMN 2010. The learning and application of strategies for acquiring a foreign language. Students also learn how cultural products and practices reflect a culture's attitudes, values, ideas and meaning. The process of language acquisition and the seeking of cross-cultural understanding provide insights into the commonalities of how the human family learns, thinks and communicates.

GRMN 2021 - Second Year II

Credits: (3)

(NH=Novice High) Continuation of GRMN 2010 without General Education Humanities credit. Offered through examination only.

Pre-requisite(s): Only available through testing.

GRMN 2030 - Second Year Language Review

Credits: (3)

Course Fee: \$8.00

(NH=Novice High) This course will prepare students who wish to continue language study. Emphasis on conversational skills and a review of language structure and usage.

Note: Check with department for course availability.

GRMN 2600 HU - Introduction to Cultural and Literary Studies in Translation

Credits: (3)

Variable Title

Course Fee: \$8.00

May be offered under any of the languages taught in the department. All Foreign Language HU2600 courses are taught in English and all texts are read in English translation in order to make some of the literature we normally would teach in a foreign language accessible to all students. These courses may introduce students to specific literary periods, literary themes or some prominent authors in specific areas of the world where languages other than English are spoken.

May be repeated up to 10 times for credit under different titles.

Note: Check with Department for course availability.

GRMN 2851 - Study Abroad

Credits: (3)

(NH=Novice High) Language and culture studies for students whose minimal proficiency is Novice High. Language assignments at the Novice or Intermediate-Low levels are performed in the target language. All other assignments are performed in English. Prior travel experience does not apply.

Note: Check with Department for course availability.

GRMN 2852 - Study Abroad

Credits: (1-3)

(NH=Novice High) Language and culture studies for students whose minimal proficiency is at Novice High. Language assignments at the Novice or Intermediate-Low levels are performed in the target language. All other assignments are performed in English. Prior travel experience does not apply.

Twice with a maximum of 3 credit hours.

Note: Check with Department for course availability.

GRMN 2920 - Short Courses, Workshops, Institutes and Special Programs

Credits: (1-6)

Consult the class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript.

GRMN 3000 - Proficiency Development

Credits: (3)

Course Fee: \$8.00

(IL=Intermediate Low) This is a transition course to upper division. The course focuses on oral proficiency development. Students will learn a variety of techniques and strategies to increase their oral proficiency in a variety of social, educational and cultural settings. Native-speaking students or those who have acquired proficiency through residence in the target language community are not eligible to take this class.

Note: Check with department for course availability.

GRMN 3060 - Grammar & Composition

Credits: (3)

Course Fee: \$8.00

(IL=Intermediate Low) This is a transition course to upper division. The course focuses on oral proficiency development. Students will learn a variety of techniques and strategies to increase their oral proficiency in a variety of social, educational and cultural settings. Native-speaking students or those who have acquired proficiency through residence in the target language community are not eligible to take this class.

Note: Check with department for course availability.

GRMN 3116 - DLI Bridge Course I

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Taught in DLI High Schools for students who have passed the AP Exam with a 4 or higher. Although this is a three credit-hour class, it will meet over the course of a full academic year. Credit will count toward a major or minor in the language.

Pre-requisite(s): GRMN 2020 or AP exam with a score of 4 or better

GRMN 3117 - DLI Bridge Course II

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Taught in DLI High Schools for students who have passed the AP Exam with a 4 or higher. Although this is a three credit-hour class, it will meet over the course of a full academic year. Credit will count toward a major or minor in the language.

Pre-requisite(s): GRMN 2020 or AP exam with a score of 4 or better

GRMN 3118 - DLI Bridge Course III

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Taught in DLI High Schools for students who have passed the AP Exam with a 4 or higher. Although this is a three credit-hour class, it will meet over the course of a full academic year. Credit will count toward a major or minor in the language.

Pre-requisite(s): GRMN 2020 or AP exam with a score of 4 or better

GRMN 3160 - Introduction to Literature

Credits: (3)

Course Fee: \$8.00

(IL=Intermediate Low) Required of all majors and minors. 3160 may be taken concurrently with other literature courses. One sheltered section may be offered to students who have not had extensive in-country experience.

Note: Check with department for course availability.

GRMN 3220 - Phonetics and Phonology

Credits: (3)

Course Fee: \$8.00

(IL=Intermediate Low) Analysis of the sounds of language and word formation: practice of native like speech patterns. Required of all teaching majors and minors.

Note: Check with department for course availability.

GRMN 3270 - Special Topics in Linguistics

Credits: (3)

Variable Title

Course Fee: \$8.00

(IM=Intermediate Mid) An introduction to linguistic structures and semantic elements. The course provides useful information and practice in the language, its structures and usage. The sub-disciplines of linguistics, other than phonetics and phonology (covered in FL 3220),

will be studied. These may include lexical analysis, semantics, morphology, syntax, linguistic change and dialectal variation.

Note: Check with department for course availability.

GRMN 3320 - Applied Language Studies

Credits: (1-3)

Variable Title

Course Fee: \$8.00

(Minimal proficiency level varies with content).

May be repeated up to 10 times under different titles.

GRMN 3360 - Advanced Grammar

Credits: (3)

Course Fee: \$8.00

(IL=Intermediate Low) Analysis and application of syntactic principles and discourse structure.

Note: Check with department for course availability.

GRMN 3550 - Cultural Heritage I

Credits: (3)

Variable Title

Course Fee: \$8.00

(Intermediate Mid) In-depth studies in culture, history, geography, social customs, fine arts and civilization. May be repeated up to 7 times for credit and for other non-English speaking cultures.

GRMN 3560 - Cultural Heritage II

Credits: (3)

Variable Title

Course Fee: \$8.00

(IM=Intermediate Med) Studies in culture, history, geography, social customs, fine arts, and civilization. May be repeated 3 times for other non-English speaking cultures.

GRMN 3570 - Special Topics in Culture

Credits: (3)

Variable Title

Course Fee: \$8.00

(Intermediate Mid) In-depth studies in culture, history, geography, social customs, fine arts and civilization.

May be repeated up to 7 times for credit and for other non-English speaking cultures.

Note: Check with Department for course availability.

GRMN 3610 - Literature Survey I

Credits: (3)

Variable Title

Course Fee: \$8.00

(IH=Intermediate High) A survey of the authors and works of a particular period or place. May be repeated under different titles.

GRMN 3620 - Literature Survey II

Credits: (3)

Variable Title

Course Fee: \$8.00

(IH=Intermediate High) A survey of the authors and works of a particular period or place. May be repeated under different titles.

GRMN 3630 - Literature Poetry

Credits: (3)

Variable Title

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$8.00

(IM= Intermediate Mid) One literature course is required for regular and teaching majors. May be taken concurrently with GRMN 3160. May be repeated under different titles.

GRMN 3631 - Literature: Prose

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Course Fee: \$8.00

(IM=Intermediate Mid). A survey of works in prose by one or various authors of a particular period or place, or spanning several literary movements and geographical regions. May be taken 3 times up to 9 credits under different titles.

GRMN 3632 - Literature: Drama

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Course Fee: \$8.00

(IM=Intermediate Mid). A survey of theater plays by one or various authors of a particular period or place, or spanning several literary movements and geographical regions. May be taken 3 times up to 9 credits under different titles.

GRMN 3650 - Literature Periods

Credits: (3)

Variable Title

Course Fee: \$8.00

(IM=Intermediate Mid) May be repeated under different titles. One literature course is required for regular and teaching majors. May be taken concurrently with GRMN 3160.

GRMN 3670 - Literature Authors

Credits: (3)

Variable Title

Course Fee: \$8.00

(IN=Intermediate Mid) May be repeated under different titles. One literature course is required for regular and teaching majors. May be taken concurrently with GRMN 3160.

GRMN 3680 - Literature: Film

Credits: (3)

Course Fee: \$8.00

(IM=Intermediate Mid). A survey of film by one or various filmmakers of a particular period or place, or spanning several literary movements and geographical regions. May be taken 3 times up to 9 credits under different titles.

GRMN 3690 - Literature Special Topics in Literature

Credits: (1-3)

Variable Title

Course Fee: \$8.00

(IM=Intermediate Mid) May be repeated under different titles. One literature course is required for regular and teaching majors.

Suggested Requisite(s): May be taken concurrently with GRMN 3160.

Note: Check with department for course availability.

GRMN 3710 - Business Language I

Credits: (3)

Course Fee: \$8.00

(IM=Intermediate Mid) Business Language and Practices. Required of all commercial majors.

GRMN 3715 - Business Language II

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Course Fee: \$8.00

(IM=Intermediate High) Advanced Business Language and Practices. Required of all commercial majors.

GRMN 3720 - Language for Specific Purposes I

Credits: (3)

Course Fee: \$8.00

(IM=Intermediate Mid) This course is content, vocabulary and culture-based. The course focuses on practical vocabulary, idiomatic expressions, professional terminology and cultural interactions on a variety of topics such as language for the medical professions, social workers, law enforcement or tourism.

GRMN 3730 - Language for Specific Purposes II

Credits: (3)

Course Fee: \$8.00

(IM=Intermediate Mid) This course is content, vocabulary and culture-based. The course focuses on practical vocabulary, idiomatic expressions, professional terminology and cultural interactions on a variety of topics, such as language for medical professions, social work, law enforcement or tourism.

GRMN 3740 - Translation I

Credits: (3)

Course Fee: \$8.00

(IM=Intermediate Mid) Introduction to basic techniques and skills needed for bilingual translation of non-fiction texts. Emphasis will be on the translation into English, and on the stylistic, syntactic, cultural, lexical, and terminological problems. Students are given ample opportunity to apply these techniques through a series of written translation assignments, which form the basis for class discussion.

GRMN 3850 - Study Abroad

Credits: (1-6)

(IM=Intermediate Mid) Language and culture studies for students whose language proficiency is Intermediate Low to Intermediate High. All Intermediate and Advanced tasks will be performed in the target language. All Superior tasks

may be performed in English. Prior travel experience does not apply. May be repeated up to 10 times for credit.

GRMN 4190 - Foreign Language Journal

Credits: (3)

(IM=Intermediate Mid) For foreign language students in the fourth year who work on publishing the foreign language literary journal. Includes selecting articles, editing and preparing journal layout.

GRMN 4620 - Survey of Literature I

Credits: (3)

Course Fee: \$8.00

(IH=Intermediate High) One literature course is required of regular and teaching majors. Prerequisite: FL 3160

GRMN 4630 - Survey of Literature II

Credits: (3)

Course Fee: \$8.00

(IH=Intermediate High) One literature course is required of regular and teaching majors. Prerequisite: FL 3160

GRMN 4690 - Special Topics in Literature

Credits: (3)

Variable Title

Course Fee: \$8.00

(IH=Intermediate High) Detailed analysis of a particular body of literature. For students whose proficiency in the target language is at least Intermediate High.

Pre-requisite(s): GRMN 3160.

May be repeated up to 10 times under different titles.

GRMN 4740 - Translation II

Credits: (3)

Course Fee: \$8.00

(IH=Intermediate High) Development of techniques and skills needed for bilingual translation of non-fiction texts. Emphasis will be on the translation into the target language. Methods of contrastive linguistics to analyze pertinent aspects of language structure, involving syntax, vocabulary and style, as well as basic theoretical-historical concepts are employed. Students are given ample opportunity to apply these techniques and concepts through a series of written translation assignments, which form the basis for class discussion. Prerequisite/Co-requisite: FL 3740 is strongly advised, but not required.

GRMN 4830 - Directed Readings

Credits: (1-3)

(IH=Intermediate High) Independent readings under the direction of a faculty member.

May be repeated up to 10 times.

Note: Check with Department for course availability.

GRMN 4850 - Study Abroad

Credits: (3)

(A=Advanced) Language and culture studies for students whose language proficiency is Advanced or Superior. All tasks are performed in the target language. Prior travel experience does not apply.

GRMN 4920 - Short Courses, Workshops, Institutes and Special Programs

Credits: (1-4)

(minimal proficiency level varies with content) Consult the class schedule for the current offering under this number.

The specific title and credit authorized will appear on the student transcript.

May be repeated 5 times with a maximum of 6 credit hours.

Note: Course not currently being offered.

GRMN 4960 - Senior Project

Credits: (3)

(IH=Intermediate High) For students completing a major with Departmental Honors. Before registration in this course, students must work with a faculty advisor to define the project, create a contract and schedule, and determine the appropriate number of credit hours.

HAS 3000 - The Healthcare System

Credits: (3)

Typically Taught Summer Semester: *Online*

Typically Taught Fall Semester: *Full Sem, Online*

Typically Taught Spring Semester: *Full Sem, Online*

A study of the U.S. healthcare system to help students understand the critical issues facing healthcare in its ever-changing environment and to gain a sense of the complex multidimensional nature of healthcare delivery in the United States.

HAS 3010 - Professionalism in Healthcare

Credits: (3)

Typically Taught Summer Semester: *Full Sem, Online*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem, Online*

This course explores a variety of topics to develop a stronger sense of professionalism for healthcare managers. Topics include business and social etiquette, self-assessment, professional deportment, networking, effective communication skills, and dressing professionally.

HAS 3020 - Healthcare Marketing

Credits: (3)

Typically Taught Summer Semester: *Full Sem - Online*

Typically Taught Fall Semester: *Full Sem, Full Sem - Online*

Typically Taught Spring Semester: *Full Sem, Full Sem - Online*

This course outlines the application of marketing principles to healthcare organizations and the public health arena. Students will apply those principles in the development of a marketing plan.

HAS 3150 - Introduction to Public Health

Credits: (3)

Typically Taught Summer Semester: *Full Sem Online*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem, Full Sem Online*

An overview of public and community health including history, management, prevention and epidemiology of disease. Emphasis on the role of community and government health agencies regarding health promotion and disease prevention activities.

HAS 3190 - Cultural Diversity in Patient Education

Credits: (3)

Typically Taught Summer Semester: *Online*

Typically Taught Fall Semester: *Online*

Typically Taught Spring Semester: *Full Sem*

This course is an introduction to patient or client education skills and theory. It also focuses on health traditions of culturally diverse clients and how those traditions must be considered during effective patient education. In particular, the course will move from the general health traditions of world populations and religions, to the more specific behaviors and expectations of U.S. populations. Gender, age, and class will all be considered in the studies.

HAS 3230 - Health Communication

Credits: (3)

Typically Taught Summer Semester: *Full Sem Online*

Typically Taught Fall Semester: *Full Sem, Full Sem Online*

Typically Taught Spring Semester: *Full Sem, Full Sem Online*

A broad examination of communication theory, application, and research in health care delivery and management. Examines many different levels and channels of communication including the development and application of interpersonal communication, small group communication and teamwork, organizational communication, communication ethics, leadership, and motivation skills in dealing with health care providers, staff, and consumers in a variety of health care environments.

Cross-listed with COMM 3230.

HAS 3240 - Human Resource Development in Healthcare

Credits: (3)

Typically Taught Fall Semester: *Full Sem - Online*

Typically Taught Spring Semester: *Full Sem*

Study of human resource principles and practices in healthcare facilities. The general topics include: job analysis and work flows, compensation, recruitment and selection, performance appraisals, discipline, legal environment, unions, safety and health.

Pre-requisite(s): HAS 3000.

HAS 3260 - Healthcare Leadership and Management

Credits: (3)

Typically Taught Summer Semester: *Full Sem - Online*

Typically Taught Fall Semester: *Full Sem - Online*

Typically Taught Spring Semester: *Full Sem*

Basic theories and concepts of management. Emphasis is on individual and group behavior, interpersonal skills, decision making, leadership theory, planned change, motivation, teamwork, organizational design and culture within the context of the health care organization.

Pre-requisite(s): HAS 3000.

HAS 3700 - Public Health Finance

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Finance in the public sector is fundamentally different from business or corporate finance. This course will provide an overview of finance as directly related to public health. Basic concepts of government accounting and budgeting will be presented. The financial aspects of Medicare and Medicaid along with grant funding and funding agencies will be discussed. Students will leave the course with the ability to formulate a public health program budget as well as the background knowledge necessary to understand the financial operations of local and state departments of health.

HAS 3750 - Healthcare Financial Administration

Credits: (3)

Typically Taught Summer Semester: *Full Sem - Online*

Typically Taught Fall Semester: *Full Sem - Online*

Typically Taught Spring Semester: *Full Sem*

This course is designed to build upon the concepts introduced in basic accounting courses and develop proficiency in applying administrative financial techniques in healthcare decision making.

Pre-requisite(s): HAS 3000, ACTG 2010, Quantitative Literacy.

HAS 3810 - Healthcare Leadership Seminar

Credits: (3)

Experimental Course, Contact Department for More Information

This course will explore healthcare topics and issues of the day with clinical leaders and healthcare executives. Students will explore and analyze the implementation and application of management and leadership theory in various practices, healthcare settings and facilities.

HAS 3980 - Interprofessional Education

Credits: (1-3)

Variable Title

Typically Taught Fall Semester: *Full Sem*

Variable titled course to discuss topics related to interprofessional education.

May be repeated up to 3 times for credit.

HAS 4160 - Medical Practice Management

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem Online*

Covers the fundamentals of group practice and ambulatory care management. Includes leadership, planning, marketing, IT, business operations, physician/hospital relationships, and basic principles of management applied to the out-patient setting. This is an elective course for HAS students.

Pre-requisite(s): HAS 3000.

HAS 4320 - Healthcare Economics and Policy

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem - Online*

Discussion and analysis of the economic models controlling healthcare markets with subsequent investigation of the complex federal, state, and local policies and policymaking processes which result from those models in U.S. healthcare systems.

Pre-requisite(s): HAS 3000 and ECON 1010 or ECON 2010.

HAS 4400 - Legal and Ethical Aspects of Health Administration

Credits: (3)

Typically Taught Summer Semester: *Full Sem Online*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem Online*

Review of legal responsibilities of physicians, other healthcare workers, and healthcare institutions and means by which health-related laws and regulations are developed and implemented. Issues involved in healthcare professional ethics are discussed and evaluated.

Pre-requisite(s): HAS 3000.

HAS 4410 - Clinical Instructional Design and Evaluation

Credits: (3)

Typically Taught Fall Semester: *Online*

Designed to provide individuals with the skills necessary for the preparation, planning and evaluation of instruction. The Philosophy, theory, and effective methods and techniques of teaching the adult learner.

HAS 4420 - Clinical Instructional Skills

Credits: (3)

Typically Taught Spring Semester: *Online*

Designed to provide individuals with skills necessary for the implementation of instruction. Presentation practice is provided with peer evaluation and feedback.

HAS 4500 - Grant Writing

Credits: (2)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem Online*

This course is an introduction to the art of grant writing. The general elements of a grant will be outlined and explored. Students will learn about what makes a grant proposal successful. Grant writing and evaluation skills will be developed, demonstrated, and exercised.

HAS 4520 - Long-Term Care Administration

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

Application of health administration core curriculum to specific practice issues in the long-term care setting. Includes specific organization structures in skilled nursing care, relationships with healthcare providers, services offered, financial management issues in long-term care, and regulatory issues are investigated. Course includes a review of long-term care facility operations utilizing simulations. Teams of students make operational decisions utilizing financial statements, census reports, staffing schedules and other relevant factors. Prepares students for specific types of situations and questions encountered on the long-term care administrator licensing examination.

Pre-requisite(s): HAS 3000 and HAS 4400.

HAS 4525 - Post-Acute Care Operations

Credits: (3)

Typically Taught Spring Semester: *2nd Blk*

This course is designed to introduce the specific issues and body of knowledge pertaining to the healthcare management of: specialty hospitals, rehab facilities, homecare agencies, hospice and palliative care and post acute care. Emphasis is placed on guest lectures by professionals from each of these types of provider organizations.

Pre-requisite(s): HAS 3000 and HAS 4520.

HAS 4620 - International Health and Healthcare

Credits: (3)

Typically Taught Summer Semester: *Full Sem - Online*

Typically Taught Spring Semester: *Full Sem*

This course is designed to explore health and health care systems in countries other than the United States. Emphasis will be directed toward illnesses and treatments, health promotion, environmental and economic issues, governmental infrastructures that support health, and cultural considerations. The course will be targeted to the professional interested in international health information and experiences.

HAS 4700 - Public Health Capstone

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

The Public Health Capstone will provide students in the Public Health program a comprehensive review culminating in an applied project. Public Health concepts including epidemiology, population health, finance, behavior change, communications and marketing among others will be brought together demonstrating their application in real world public health situations. A final project will be used to demonstrate the students understanding of general public health concepts and their applications.

HAS 4740 - Senior Seminar

Credits: (1)

Typically Taught Fall Semester: *1st Blk*

Typically Taught Spring Semester: *1st Blk*

A capstone course for seniors designed to provide integration and application of theory through the use of case study analysis. Departmental approval required.

Pre-requisite(s): HAS 3000.

HAS 4741 - Senior Seminar Capstone

Credits: (3)

Typically Taught Summer Semester: *Full Sem Online*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A capstone course for seniors designed to provide integration and application of theory through the use of case study analysis, competency assessment, interaction with current practitioners, individual and team projects. Students will be provided with resources to assess and enhance their competencies in the various functional areas of health administration. Departmental approval

required.

Pre-requisite(s): HAS 3000.

HAS 4800 - Individual Study

Credits: (1-3)

Topics in allied health education studies tailored to the particular needs and interests of the student.

Class may be repeated once up to six credits with program approval.

Note: This course is offered as needed.

HAS 4850 - Study Abroad

Credits: (1-6)

Variable Title

The purpose of this course is to provide opportunities for students in health professions to experience a study abroad program that is designed to explore healthcare, culture, and clinical experience.

May be repeated five times up to six credit hours.

Note: This course is offered as needed.

HAS 4860 INT - Practicum/Internship

Credits: (2-6)

Typically Taught Summer Semester: *Full Sem, Full Sem Online*

Typically Taught Fall Semester: *Full Sem, Full Sem Online*

Typically Taught Spring Semester: *Full Sem, Full Sem Online*

Provides opportunities for observation, participation and practical application of administrative and management skills in the institutional setting. Departmental approval required.

Pre-requisite(s): HAS 3000 and HAS 3750.

HAS 4990 - Seminar

Credits: (1)

Topics, issues, and trends in Health Care.

May be repeated twice up to 3 credit hours with program approval.

Note: This course is offered as needed.

HIM 2000 - Introduction to Health Information Systems and Settings

Credits: (3)

Typically Taught Fall Semester: *Full Sem, Online*

Typically Taught Spring Semester: *Online*

Introduction to the health information profession. Job duties, functions, and the professional organization are discussed. Health care settings, master patient indexes, health information documentation requirements, analysis, and deficiency management are presented.

Pre-requisite(s): HTHS 1101 and HTHS 1110 or ZOOL 2100.

HIM 2250 - Health Care Privacy and Security

Credits: (3)

Typically Taught Fall Semester: *Online*

Typically Taught Spring Semester: *Full Sem*

The HIPAA privacy and security law, institutional review boards and human subjects research, development of policies and procedures for privacy and security, and release of information are discussed.

HIM 2300 - Diagnosis Coding

Credits: (3)

Typically Taught Summer Semester: *Online*

Typically Taught Fall Semester: *Full Sem, Online*

Typically Taught Spring Semester: *Online*

Coding conventions and procedure using the ICD-10-CM coding system are introduced and practiced.

Pre-requisite(s): HTHS 1110 and HTHS 1111 or ZOOL 2100 and ZOOL 2200 or equivalent.

HIM 2320 - Ambulatory and Physician Office Coding

Credits: (3)

Typically Taught Summer Semester: *Online*

Typically Taught Fall Semester: *Online*

Typically Taught Spring Semester: *Full Sem, Online*

CPT classification, conventions and coding procedures are introduced and practiced. Abstracting medical information from health documentation for coding facility outpatients, physician and professional billing is presented, discussed and practiced.

Pre-requisite(s): HIM 2300.

HIM 2330 - Healthcare Reimbursement

Credits: (2)

Typically Taught Summer Semester: *Online*

Typically Taught Fall Semester: *Online*

Typically Taught Spring Semester: *Full Sem, Online*

Discussion of issues parallel to or founded in the use of classification systems: Federal reimbursement systems, coding compliance, auditing, chargemaster maintenance, and revenue cycle management.

HIM 2410 - ICD-10-PCS Coding

Credits: (2)

Typically Taught Fall Semester: *Online*

Typically Taught Spring Semester: *Full Sem, Online*

ICD-10-PCS coding, conventions and guidelines are introduced and practiced. Students will gain exposure to procedure coding using the ICD-10-PCS system for hospital inpatient claims.

Pre-requisite(s): HIM 2300.

HIM 2500 - Healthcare Data Management

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Online*

An introduction to database monitoring, maintenance and use. Data definition, vocabularies, terminologies and dictionaries are discussed. Clinical abstracting and report writing are practiced. A working knowledge of data management is developed.

HIM 2861 INT - (2nd Year) Professional Practice Experiences

Credits: (2)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Student's final experience in the health care setting. Skills and learning from the classroom and laboratory are reinforced and practiced. The student observes in other health care settings. Projects assigned give the student expertise in technical functions, e.g., diagnostic and procedure coding systems.

Pre-requisite(s): HIM 2000.

HIM 2862 - Professional Practice Management

Credits: (2)

Typically Taught Fall Semester: *Full Sem Online*

Typically Taught Spring Semester: *Full Sem Online*

Student's final experience in the health care setting. Skills and learning from the classroom and laboratory are reinforced and practiced. Projects assigned give the student

expertise in technical functions.

Pre-requisite(s): HIM 2000.

HIM 2863 - Professional Practice Experience in Coding

Credits: (1)

Typically Taught Summer Semester: *Online*

Typically Taught Fall Semester: *Online*

Typically Taught Spring Semester: *Online*

Student's final experience in the coding setting. Skills and learning from the classroom and laboratory are reinforced and practiced in a simulated setting.

Pre-requisite(s): HIM 2300.

HIM 3000 - Health Informatics

Credits: (3)

Typically Taught Summer Semester: *Online*

Typically Taught Fall Semester: *Online*

Typically Taught Spring Semester: *Full Sem*

A survey of the clinical, research, and administrative applications of computers in the health care industry from which health care information is currently derived. The role of this technology and of the data collected in accomplishing the objectives and procedures of the principle functional areas in health care organizations is emphasized as are the interrelationships of the organizational units with respect to data acquisition, storage, analysis, retrieval, and use.

HIM 3200 - Epidemiology and Biostatistics

Credits: (3)

Typically Taught Summer Semester: *Online*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

The goals and objectives of epidemiology, its policy and procedure, and its foundation and support in health care information are the focus of this course. Investigation of an epidemic, measures of mortality, incidence and prevalence, measures of risk, biological variability, probability, screening, sampling, statistical significance, correlation, multiple regression, retrospective and prospective studies, and survival analysis are discussed. Advanced techniques for the statistical analysis of institutional case-mix and quality improvement data are presented.

Pre-requisite(s): Must meet WSU Quantitative Literacy requirement.

HIM 3210 - Advanced Epidemiology & Population Health

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course provides an advanced, in-depth, exploration of epidemiology, public health, and global population health. The history, philosophy, core values, concepts, and functions of public health will be discussed at the local, national, and international levels. The concepts and methods needed to track and analyze disease trends will be applied. Students will be able to identify and describe upstream determinants of health including the socioeconomic, behavioral, biological, environmental, and other factors that affect human health and contribute to health disparities. At the conclusion of the course, students will be able to identify public health issues, design a basic intervention, and formulate appropriate internal and external public health communications.

Pre-requisite(s): HIM 3200 - Epidemiology and Biostatistics.

HIM 3300 - Introduction to Quality Improvement in Healthcare

Credits: (3)

Typically Taught Summer Semester: *Full Sem - Online*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem - Online*

Quality assessment, disease processes, risk management, and utilization review systems are presented to the student with an emphasis upon integration. TQM/CQI processes are examined and practiced.

HIM 3400 - Health Care Networks and Databases

Credits: (3)

Typically Taught Fall Semester: *Online*

A comprehensive introduction to health care application development, including local and wide area networks, the internet and intranets, database structure, database tools, data management, and information management.

HIM 3450 - Healthcare Systems Analysis and Design

Credits: (3)

Typically Taught Spring Semester: *Full Sem - Online*

A comprehensive introduction to the planning, design, and

construction of healthcare information systems, using the systems development life cycle and other appropriate design tools.

HIM 3500 - Biomedical Research Support

Credits: (2)

Typically Taught Fall Semester: *Online*

Design concepts and information systems used in biomedical research and investigation by drug companies, genetic engineering firms, academic institutions, and individual researchers and the support of same by health information professionals are discussed. The major national research policy-making bodies (NIH, NCHS, CDC) and their research protocols are reviewed. The student also learns what techniques and resources facilitate biomedical literature searches and how to assist a researcher in the pursuit of published information. An overview of the development, structure, and management of a health care institutional medical library is presented.

HIM 3550 - Healthcare Data Analytics

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem - Online*

An in depth exploration of healthcare data analytics. Application of data analytic methodologies to improve decision making, performance, healthcare quality and strategic planning will be presented and practiced. Students will become familiar with internal and external data sources in healthcare and will be able: extract data from the data source; evaluate the quality of the data; perform basic data analytics; interpret analysis; present information in a final report.

Pre-requisite(s): HIM 3200.

Pre-requisite/Co-requisite: HIM 3200 - Epidemiology and Biostatistics.

HIM 3600 - Advanced Diagnosis and Procedure Coding

Credits: (3)

Typically Taught Summer Semester: *Online*

Typically Taught Fall Semester: *Online*

Typically Taught Spring Semester: *Online*

This is an advanced coding course designed for students with previous medical coding experience or previous medical coding courses. This course explores the more complex areas of ICD-10-CM, ICD-10-PCS, and CPT coding in hospital, outpatient, and physician based settings. Students will apply coding principles and guidelines related

to complex diagnoses and procedures. Coding from actual patient records is emphasized. The use of coding references and coding software is integrated into the course.

Pre-requisite(s): HIM 2300, HIM 2320, HIM 2410 or instructor approval.

HIM 3610 - Advanced Principles of Revenue Cycle Management

Credits: (3)

Typically Taught Summer Semester: *Online*

Typically Taught Fall Semester: *Online*

Typically Taught Spring Semester: *Online*

Elements of the revenue cycle are reviewed. Principles of revenue cycle management are examined including: scope and management of clinical coded data, process improvement and data quality, compliance, internal and external auditing, reporting, case-mix management, and changes in revenue cycle management.

Pre-requisite(s): HIM 2330 or instructor approval.

HIM 3620 - Principles of Clinical Documentation Improvement

Credits: (3)

Typically Taught Summer Semester: *Online*

Typically Taught Fall Semester: *Online*

Typically Taught Spring Semester: *Online*

Clinical documentation is the foundation of every patient health record. This course addresses the fundamentals of clinical documentation—assessing the current quality of health record documentation, development of a CDI program and process. How clinical documentation improvement impacts the revenue cycle of a healthcare organization will be reviewed.

Pre-requisite/Co-requisite: Prerequisites/Corequisites: HIM 2300, HIM 2320, and HIM 2410 or instructor approval.

HIM 4100 - Health Information Services Management

Credits: (3)

Typically Taught Spring Semester: *Online*

Management issues of health information services departments are discussed and worked through with reference to planning information services, organizing work force, procedures, and resources, staffing work units with qualified personnel, influencing information services teams performance, controlling/evaluating health information services performance and products, and resolving organizational conflict involving information

issues. Background is developed to facilitate evaluation of a vended system's ability to meet health care information applications, objectives and procedural requirements.

"Entrepreneurial" skill is developed to lead organizations in finding solutions to their information management problems.

HIM 4990 - Baccalaureate Thesis and Presentation

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Senior health information management students complete a research project and thesis in partial fulfillment of program requirements. By the completion of the course, the senior student will be able to specify a thesis topic, specify individual thesis learning objectives, specify individual thesis learning activities, develop a thesis project time-line, implement the thesis project, write the thesis, and present it to the Health Information Management faculty and students. Topics are chosen by the student but require approval by the Program Coordinator.

Pre-requisite(s): HIM 3500.

HIM 5000 - Clinical Foundations in HIM

Credits: (3)

A foundation in the language of medicine, pathophysiology and pharmacology will be discussed and developed.

Note: This course is offered as needed.

HIM 5010 - Health Data Management

Credits: (3)

This course prepares students to manage and create health data elements and data sets; and to develop and maintain organizational policies, procedures and guidelines for management of health information. Compliance with health care information laws, regulations, standards, and preparation for accreditation and licensing processes is discussed and practiced.

Note: This course is offered as needed.

HIM 5020 - Diagnosis and Procedure Coding

Credits: (3)

Coding and classification conventions and procedures are developed and practiced. The course will also include

auditing of coded data for accuracy.
Note: This course is offered as needed.

HIM 5030 - Clinical Data Management for Quality Care & Revenue Cycle Integrity

Credits: (3)

This course prepares the student to collect, analyze, present and organize data to improve quality of patient care and revenue cycle management. The management of clinical data required in reimbursement systems and prospective payment systems in health care delivery are discussed.
Note: This course is offered as needed.

HIM 5040 - Privacy, Security and Confidentiality in Health Care

Credits: (3)

This course prepares students to design and implement security measures to safeguard protected health information. The management, access, disclosure and use of PHI to ensure confidentiality is discussed. How to investigate and resolve health care privacy and security issues and problems are introduced.
Note: This course is offered as needed.

HIM 5050 - Health Information Systems & Technology

Credits: (3)

A foundation of electronic health record terminology and the information systems life cycle is explored. The important basis upon which successful EHR implementation must rely - project management, strategic planning, and migrations from the current state are discussed. Skills in selecting, negotiating for, implementing and operating the electronic health record and its corresponding databases are developed. The use of data dictionary, data models, database management and design for electronic health records are introduced.

HIM 5080 - Health Information Management Issues

Credits: (3)

Managing the HIM function including the monitoring of industry trends and organizational needs for change, strategic and operational planning, training or educational activity development, and preparation for accreditation and licensing processes are discussed.
Note: This course is offered as needed.

HIM 5090 INT - HIM Internship

Credits: (3)

Provides opportunities for observation, participation and practical application of health information management skills in the institutional setting.

Note: This course is offered as needed.

HIST 1000 - Introduction to the Craft of History

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

History 1000 is a one-credit course for newly declared history majors. It is designed to introduce students to different subfields within history; to familiarize them with the standard modes of researching, interpreting, analyzing, and citing historical sources; and to teach them how to build an historical argument.
Should be taken upon registration as a history major or history teaching major.

HIST 1500 SS - World History to 1500 C.E.

Credits: (3)

Typically Taught Summer Semester: *Full Sem, 1st Blk, 2nd Blk, Full Sem Online*

Typically Taught Fall Semester: *Full Sem, Full Sem Online*

Typically Taught Spring Semester: *Full Sem, Full Sem Online*

Examines the political, social, cultural, economic, religious, scientific, and intellectual influences on the development of world civilizations to 1500 C.E. Emphasis is global, comparative, and multi-cultural.

Note: Multiple Sections are offered each semester.

HIST 1510 SS/DV - World History from 1500 C.E. to the Present

Credits: (3)

Typically Taught Summer Semester: *Full Sem, 1st Blk, 2nd Blk, Full Sem Online*

Typically Taught Fall Semester: *Full Sem, Full Sem Online*

Typically Taught Spring Semester: *Full Sem, Full Sem Online*

A survey of the political, social, cultural, economic, religious, scientific, and intellectual influences on the

development of Asia, Africa, the Americas, and Europe from 1500 to the present.

Note: Multiple Sections are offered each semester.

HIST 1600 AI - The Black Experience

Credits: (3)

Typically Taught Summer Semester: *Full Sem - Online*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

HIST 1600 is the History of Black people in the United States. We will begin by tracing the origins of Blacks and Black Americans in the New World from their origins in Africa. We will then explore the history of Black people in the United States from the Atlantic Creoles to the present day. This course will also fulfill all the requirements for American Institutions (AI) credit.

HIST 1610 AI - The Latinx Experience

Credits: (3)

This course provides a general introduction to the history of Latinx in the United States from the era of Contact to the present day. Even before this country existed as a republic, people from "Hispanic" and Indo-America had been incorporated into the culture, history, and occupational fabric of what would become the United States. Yet larger society and, oftentimes, the government, have frequently perceived Latinx as racially and culturally "alien." This course will examine how people of Latin American heritage have adjusted to, been integrated by, assimilated, resisted, and adapted to these forces in the United States over past centuries, creating new identities in the process.

HIST 1620 AI - The LGBTQ Experience

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course will be a survey of LGBTQ history in American history, from the colonial era to the present day. It will not only consider LGBTQ experiences, but also focus on changing views toward slavery, economics, race, gender, and nationality that inform American society. As a General Education American Institutions course, we will discuss the major principles of the United States, the operations of its institutions, and the consequences of its market economy, with a focus on the particular LGBTQ experience within that narrative.

HIST 1700 AI - American History

Credits: (3)

Typically Taught Summer Semester: *Full Sem, 2nd Blk, Full Sem - Online, 1st Blk*

Typically Taught Fall Semester: *Full Sem, Full Sem - Online*

Typically Taught Spring Semester: *Full Sem, Full Sem - Online*

An analysis of American history that traces social, cultural, economic, and political developments in the United States. May be taken to complete the American Institutions requirement (grade of C or better required).

Note: Multiple Sections are offered each semester.

HIST 2700 - History of the United States to 1877

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A chronological survey of American history from Native American and European contacts through Reconstruction, 1877. Directed toward History majors, minors, and those planning to teach U.S. history.

Note: Note: Students may fulfill the American Institutions requirement by completing either HIST 1600, 1610, 1620, or 1700 or this course AND HIST 2710 with a grade of C or better.

HIST 2710 - History of the United States since 1877

Credits: (3)

Typically Taught Summer Semester: *Full Sem, Full Sem Online*

Typically Taught Fall Semester: *Full Sem, Full Sem Online*

Typically Taught Spring Semester: *Full Sem*

A chronological survey of American history from the Gilded Age, 1877, to the present. Directed toward History majors, minors, and those planning to teach U.S. history.

Note: Note: Students may fulfill the American Institutions requirement by completing either HIST 1600, 1610, 1620, or HIST 1700, or this course AND HIST 2710 with a grade of C or better.

HIST 2920 - Short Courses, Workshops, and Special Programs

Credits: (1-6)

Variable Title

Consult the semester class schedule for current offering

under this number. The specific title and credit authorized will appear on the student transcript.
No more than 6 hours will count towards a major or minor.
Note: This course is offered as needed.

HIST 3010 - Native American History: 1300 to Present

Credits: (3)

Typically Taught Fall Semester: *Full Sem, Full Sem - Online, even years*

An introduction to Native American history, stressing the integrity and viability of American Indian societies, dynamic, self-directed cultural changes, and the clashes that occurred with Native American and European contacts.

HIST 3030 - African-American History

Credits: (3)

Typically Taught Fall Semester: *Full Sem, even years*
African-American history from African origins to the late twentieth century. This course examines the historical experiences and enduring influence of African-Americans on U.S. history.

HIST 3050 - History of U.S. Latinos

Credits: (3)

Typically Taught Spring Semester: *Full Sem, even years*
Traces the historical development of the Latin Americans in the U.S. from their Indian, Spanish and African heritage to the present with special emphasis on the Mexican-American, Chicano contributions to American life.

HIST 3070 - Women in American History: 1600 to Present

Credits: (3)

Typically Taught Fall Semester: *Full Sem, odd years*
Examines gender as an organizing principle in United States history from the beginnings of European settlement to the present. Also explores the ways in which race, ethnicity, class, and region have shaped different female experiences.

HIST 3090 - American Social History

Credits: (3)

Typically Taught Fall Semester: *Full Sem, Full Sem Online every other year*

Explores American society through analyses of the public and private lives of ordinary individuals from colonial times to the present.

HIST 3110 - American Ideas and Culture

Credits: (3)

Typically Taught Fall Semester: *Full Sem, odd years*
This course will look at key transformations in American cultural and intellectual history. Subjects will include the history of religion, the changing nature of political ideology, and transformations in who creates and controls entertainment, leisure and literature in American society. The course will use novels, sermons, essays, movies, museums, paintings, and music as tools for understanding American cultural life.

HIST 3130 - U.S. Urban History

Credits: (3)

Typically Taught Fall Semester: *Full Sem even years*
Examines themes in social, economic and cultural development of American cities from the colonial era to the present. Key topics will include the process of urbanization and the ways in which various social groups and classes adapt to urban life and society. The course will also examine the transformation of urban neighborhoods and ghettos, social reform movements in the city, and the history of urban planning.

HIST 3210 - U.S. Constitutional History

Credits: (3)

Typically Taught Fall Semester: *Full Sem, even years*
The ideas and issues which resulted in the 1787 Constitution. It considers two centuries of American Constitutionalism, focusing on powers and rights, and the role of the Constitution in American culture.

HIST 3220 - History of the Bill of Rights

Credits: (3)

Typically Taught Fall Semester: *Full Sem, odd years*
This course will explore the historical origins of the first Ten Amendments to the Constitution, also known as the Bill of Rights. We will explore the original intent of the Framers of the Constitution and the Bill of Rights, as well as the context in which they were drafted and ratified. The historical significance of the Bill of Rights will be compared with their current understanding by Americans in the present.

HIST 3230 - American Foreign Relations

Credits: (3)

Typically Taught Spring Semester: *Full Sem, odd years*
Diplomatic relations and foreign policy of the United States, with particular emphasis in the "American Century" beginning with the imperialist thrust of 1898.

HIST 3250 - Religion in American History

Credits: (3)

Typically Taught Spring Semester: *Full Sem, odd years*
A history of religion in America from the colonial period (including Native American spirituality) through the early twentieth century. This course will examine religious figures, events, and movements in U.S. history. Particular emphasis will be placed upon the influence of religion in the United States on culture, politics, education, and reform.

HIST 3270 SUS - American Environmental History

Credits: (3)

Typically Taught Spring Semester: *Full Sem*
Explores the new scholarship in American environmental history, considering the intellectual and material interaction people have had with the environment of North America, from pre-contact to the present.

HIST 3280 - American Military History from 1500 to 1890

Credits: (3)

Typically Taught Fall Semester: *Full Sem*
Significance of military affairs in the context of American political, economic, and social history from the formation of the earliest colonial militias to the pre-World War I preparedness movement. Discusses major wars of this period but also emphasizes such themes as the professionalization of the officer corps, the relationship between war and technology, and civil-military relations.

HIST 3290 - American Military History from 1890 to the Present

Credits: (3)

Typically Taught Spring Semester: *Full Sem*
Significance of military affairs in the context of American political, economic, and social history from America's entry into World War I to the present. Discusses major wars of

this period but also emphasizes such themes as the professionalization to the officer corps, the relationship between war and technology, and civil-military relations.

HIST 3350 - History and Philosophy of Science

Credits: (3)

Typically Taught Fall Semester: *Full Sem*
The evolution and practice of Western science from origins to contemporary ideas.

HIST 3400 - Principles of Public History

Credits: (3)

Typically Taught Spring Semester: *Full Sem, Full Sem - Online*
This course will consider the theoretical background of public history and its disciplines: historic preservation, museum studies, archives and records administration, and documentary editing. Students will survey, research, and analyze the ways in which history is conveyed to a broad public through museums, monuments, sites, films, and other media outside the classroom or scholarly writings.
Note: (Replaces HIST 2500.)

HIST 3500 - Historic Preservation

Credits: (3)

Typically Taught Fall Semester: *Full Sem, odd years*
A study of the historic preservation movement in the United States including the history and evolution of the movement, theoretical origins, current conditions and laws, organizational framework and design philosophies.

HIST 3530 INT - History Editing

Credits: (3)

Typically Taught Summer Semester: *Full Sem*
Typically Taught Fall Semester: *Full Sem*
Typically Taught Spring Semester: *Full Sem*

Advanced principles in copyediting, scholarly publication, and preparation of material for multiple publishing venues, including journals and monographs, public displays, and online collections.

Suggested Requisite(s): HIST 1000 or HIST 3400.

HIST 3550 - Archives: Principles, Practices & Preservation

Credits: (3)

Typically Taught Fall Semester: *Full Sem, even years*

This course provides an introduction to archival management, in which the students learn how archival institutions obtain, process and manage a variety of archival formats, and how this information is made available to the public generally and to historians in particular.

HIST 4010 - Colonial America

Credits: (3)

Typically Taught Fall Semester: *Full Sem odd years*

The colonial origins of the United States to 1763.

HIST 4015 - History of the Atlantic World, 1400-1815

Credits: (3)

Typically Taught Fall Semester: *Full Sem, odd years*

Atlantic World history refers to relationships and interactions between the peoples of the Americas, Africa and Europe, from the fifteenth through the nineteenth century. Its study focuses on themes such as migration and colonialism; the African slave trade, New World slavery and its abolition; trans-oceanic commerce and the development of history's first worldwide cash economy; violence, mixing and transculturation among Europeans, Africans and indigenous Americans; negotiation of knowledge about medicine, geography and the natural world; and the evolution of imperial systems and the wars of Independence.

HIST 4020 - Era of the American Revolution: 1763-1800

Credits: (3)

Typically Taught Spring Semester: *Full Sem even years*

Causes of American Revolution, including the military, diplomatic and social aspects; the formation of the Union under the Articles of Confederation; the Constitution; and the Federalist era.

HIST 4030 - New Nation: 1800-1840

Credits: (3)

Typically Taught Fall Semester: *Full Sem, 1st Blk odd years*

Emphasizes Jefferson's Administration, War of 1812, the Era of Good Feelings, and the Age of Jackson, including

the growth of political parties, territorial expansion, sectionalism, and social reform.

HIST 4040 - Era of the Civil War and Reconstruction: 1840-1877

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

Slavery and the causes of the Civil War with attention to the political, economic, social, and military aspects of the conflict, including the period of Reconstruction to 1877.

HIST 4050 - U.S. in the Gilded Age and Progressive Era: 1877-1919

Credits: (3)

Typically Taught Fall Semester: *Full Sem odd years*

The transformation of the United States following the Civil War and Reconstruction into a modern urban-industrial superpower by the end of the First World War.

HIST 4060 - Twentieth-Century United States: 1919-1945

Credits: (3)

Typically Taught Spring Semester: *Full Sem odd years*

Developments, historical patterns and conflicts which shaped the modern United States in the Twenties, the Great Depression and the Second World War.

HIST 4070 - Twentieth-Century United States since 1945

Credits: (3)

Typically Taught Summer Semester: *Full Sem Online*

Typically Taught Fall Semester: *Full Sem Online*

The United States from 1945 to the present, including investigations of the Cold War, the Civil Rights Movement, the affluent society, modern politics, the Vietnam and Watergate crises and contemporary issues.

HIST 4110 - History of the American West to 1900

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Explores the history of the Trans-Mississippi West region of the United States from 1500 to the 1890s. The course considers the varied experiences of its peoples and the myth of the West in American culture.

HIST 4120 - The American West since 1900

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

Explores the history of the Trans-Mississippi West Region since 1900, to include analysis of such issues as water use and allocation, population growth, land use, exploitation of resources, conservation, the federal presence, tourism, and threats to the environment.

HIST 4130 - History of Utah

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A study of Utah history from its Native American beginnings to the present, emphasizing political, economic, and social developments.

Note: This course is taught online when not offered face-to-face.

HIST 4210 - Ancient History

Credits: (3)

Typically Taught Spring Semester: *Full Sem odd years*

The ancient Near East and Mediterranean world, including the civilizations of Greece and Rome, from approximately 3500 B.C.E. to 475 C.E. This course examines the origins of civilization and traces the development of culture, emphasizing the religious, political, and intellectual legacy of the ancient world.

HIST 4220 - History of the Middle Ages 300-1300

Credits: (3)

Typically Taught Fall Semester: *Full Sem odd years*

A survey of Europe during the Middle Ages emphasizing the religious, political, and cultural institutions shaping this period.

HIST 4230 - Renaissance and Reformation - Europe: 1300-1660

Credits: (3)

Typically Taught Spring Semester: *Full Sem even years*

Examines the cultural, religious, political and economic factors that affected Europe from the end of the Middle Ages to the mid-1600s. Special emphasis is given to the

Renaissance and Reformation as vital forces at work during the period.

HIST 4240 - Absolutism, Enlightenment and Revolution - Europe: 1660-1815

Credits: (3)

Typically Taught Fall Semester: *Full Sem even years*

Examines the political, economic, social, and cultural factors that affected Europe during the period. Special consideration is given to the Enlightenment as a cultural phenomenon and to European-wide revolution and counter-revolution in the late eighteenth century.

HIST 4250 - Nineteenth-Century Europe

Credits: (3)

Typically Taught Fall Semester: *Full Sem, odd years*

A survey of European history from the fall of Napoleon to the beginning of the First World War. The course will focus on the lingering impact of the political and economic revolutions of the late eighteenth century on the politics, culture, and social development of the nineteenth. Major consideration will be given to liberalism, romanticism, socialism, nationalism, imperialism, industrialization, science, and the rise of mass society.

HIST 4260 - Europe in the Age of Total War

Credits: (3)

Typically Taught Spring Semester: *Full Sem, even years*

This course on European history begins with a consideration of the causes of the First World War and concludes with an assessment of the impact of the Second World War on European politics, culture, and society. The course will examine the ways in which Europe was shaped in this period by warfare, revolution, the collapse of dynastic states, international agreements, colonial interests, labor movements, economic crises, economic modernization, the rise of totalitarian movements, genocide, and foreign occupation.

HIST 4280 - History of Christianity in Europe

Credits: (3)

Typically Taught Spring Semester: *Full Sem odd years*

A history of the development and impact of Christianity within Europe through the twentieth century. This course will examine how Christianity affected European society,

culture, politics, and science; and how these affected the institutions within Christianity. Particular emphasis will be placed on the early growth of Christianity, medieval changes, the Reformation, and spirituality in the industrial age.

HIST 4310 - Tsarist Russia

Credits: (3)

Typically Taught Fall Semester: *Full Sem, even years*
Russia's political, economic, social and cultural institutions from pre-history to 1917, emphasizing dynastic leaders, expansion, religion and other significant forces of change. Includes an analysis of both foreign and domestic policies that led to world war and revolution.

HIST 4320 - Stalin and the Soviet Experiment

Credits: (3)

Typically Taught Spring Semester: *Full Sem, odd years*
Analyzes the political, economic, military, diplomatic, social, and ideological problems, crises, and programs from the Russian Revolutions of 1917 to the present.

HIST 4330 - History of England to 1485

Credits: (3)

Typically Taught Fall Semester: *Full Sem even years*
A survey of English history to 1485 with special consideration given to England's cultural, political, economic and social development during the Middle Ages.

HIST 4335 - Tudor and Stuart England

Credits: (3)

Typically Taught Spring Semester: *Full Sem, odd years*
A survey of English history during the Tudor and Stuart periods (1485-1714). Emphasis will be placed on the social, cultural, political, religious and economic development of England during this period.

HIST 4340 - History of England since 1714

Credits: (3)

Typically Taught Fall Semester: *Full Sem, odd years*
A survey of English history from 1714 to the present. Special emphasis will be given to England's cultural, political, economic, and social development during the

Industrial Revolution, the Victorian era, and the twentieth century.

HIST 4350 - Germany and the Third Reich

Credits: (3)

Typically Taught Spring Semester: *Full Sem, even years*
German social-political, economic and cultural developments from the eighteenth century to the present. Topics include the Prussians, Classicism, Revolution, the Age of Bismarck, industrialism and warfare, and the 20th Century.

HIST 4370 - History of Modern France 1789-present

Credits: (3)

Typically Taught Fall Semester: *Full Sem, even years*
Examines the political, social, and cultural history of France from the outbreak of the French Revolution to the present. Attention will focus on political ideologies, religious and philosophical movements, artistic and literary expression, and changes in the social environment. The course will also attend to the impact of France and French culture on the world and to recent challenges presented to French national identity by globalization.

HIST 4410 - History of Spain and Portugal

Credits: (3)

Typically Taught Fall Semester: *Full Sem, odd years*
A survey of the political, economic, social and cultural development of Spain and Portugal from the beginning to the present.

HIST 4440 - East European Empires

Credits: (3)

Typically Taught Fall Semester: *Full Sem*
Examines the political, economic, and social factors that have shaped the history of this region from medieval era until 1815.

HIST 4450 - The Warsaw Pact

Credits: (3)

Typically Taught Spring Semester: *Full Sem*
Examines the political, economic, and social factors that have shaped the history of this region from 1815 to the present.

HIST 4500 - Teaching Social Studies in Grades 5-12

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Materials and methods of teaching for skill, concept and value development in middle, junior high and senior high school social studies.

Note: (Required of all majors in Social Science area).

HIST 4510 - Twentieth Century World

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

The political, economic, and social forces of the twentieth century since World War I. Emphasis is placed on global relationships, the rise of mass society, and conflict among cultures in an era of accelerating change.

HIST 4520 - History of Medicine

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course will examine the history of medicine from antiquity to the present in a comparative framework. It will discuss changing ideas about the body, the nature of disease, the role of physicians, and the practice of medicine in relationship to larger cultural transformations.

HIST 4530 - Far Eastern History

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

A survey of the political, economic, social and cultural development of China, Japan, and Korea from the pre-modern era to the present, with particular emphasis given to the 19th and 20th centuries.

HIST 4550 - Southeast Asian History

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

A survey of the political, economic, social and cultural development of Southeast Asia from the pre-modern era to

the present, with particular emphasis given to the 19th and 20th centuries.

HIST 4570 - Islamic Civilization

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course will examine the history of Islam from the 7th century to the present. It will discuss key theological developments, the spread of the religion and its diverse forms, and its effects on culture, art, and science.

HIST 4590 - Middle Eastern History

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

A survey of the political, economic, social and cultural development of the Middle East from the rise of Islam to the present with particular emphasis on the 19th and 20th centuries.

HIST 4610 - History of Africa

Credits: (3)

Typically Taught Spring Semester: *Full Sem, odd years*

Africa from earliest times to the twentieth century, with emphasis on the Sub-Sahara from its ancient kingdoms through the travails of the slave trade, European colonialism, and the independence movement.

HIST 4630 - History of Ancient and Colonial Latin America

Credits: (3)

Typically Taught Fall Semester: *Full Sem, even years*

History of ancient Native Latin America through the Spanish and Portuguese takeover and colonization.

HIST 4650 - Modern Latin America

Credits: (3)

Typically Taught Spring Semester: *Full Sem, even years*

A survey of the political, economic, social and cultural developments of the Latin American nations to the present.

HIST 4670 - History of Mexico

Credits: (3)

Typically Taught Fall Semester: *Full Sem, odd years*

A survey from ancient Native American times, the colonial experience, and the nation including the U.S. Southwest until 1848.

HIST 4710 - Special Issues and Topics in American History

Credits: (3)

Variable Title

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

When offered will focus on a specific and detailed subject in American History. Students may repeat this course for credit when the topic offered is substantially different than the previous class.

May be repeated 3 times with a maximum of 9 credit hours.

HIST 4720 - Special Issues and Topics in European History

Credits: (3)

Variable Title

Typically Taught Fall Semester: *Full Sem*

When offered will focus on a specific and detailed subject in European History. Students may repeat this course for credit when the topic offered is substantially different than the previous class.

May be repeated 3 times with a maximum of 9 credit hours.

HIST 4730 - Special Issues and Topics in Global and Comparative History

Credits: (3)

Variable Title

Typically Taught Fall Semester: *Full Sem odd years*

When offered will focus on a specific and detailed subject in global or comparative history. Students may repeat this course for credit when the topic offered is substantially different than the previous class.

May be repeated 3 times with a maximum of 9 credit hours.

HIST 4810 - Experimental Courses

Credits: (3)

Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript. Refer to Experimental Courses.

May be repeated four times for a maximum of nine credit

hours.

Note: This course is offered as needed.

HIST 4830 - Directed Readings

Credits: (1-3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Independent reading under the supervision of a department member on special topics in History. For each hour of credit approximately 1500 pages of material will be read. A written assignment on this material will also be completed. No more than three hours will count towards a major or minor.

Pre-requisite(s): Instructor approval.

HIST 4860 INT - Internships in Historical Studies

Credits: (1-6)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Open to all students. Faculty supervised off-campus internships in public history institutions. Each internship is individually established and provides students with practical experience and the opportunity to apply and learn new professional skills. Six hours of internship are required for the Public History Emphasis. No more than six hours will count towards a major or minor.

Pre-requisite(s): Junior-class standing and permission of instructor and field supervisor.

May be repeated 3 times with a maximum of 9 credit hours.

HIST 4920 - Short Courses, Workshops, and Special Programs

Credits: (1-6)

Variable Title

Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript. No more than six hours will count towards a major or minor.

May be repeated six times for a maximum of six credit hours.

Note: This course is offered as needed.

HIST 4985 - Historical Research and Methods

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course teaches research and writing skills and is designed to prepare History students for History 4990. Students will learn how to find a research topic, develop a thesis, identify primary sources, cite those sources, and prepare a research proposal. The course will expose students to models of good historical writing and argumentation which will serve as models for their own writing.

HIST 4990 - Senior Seminar

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A seminar for History majors requiring the completion of an extensive thesis project.

Pre-requisite(s): HIST 4985.

HIST 6010 - Colonial America

Credits: (3)

The colonial origins of the United States to 1763.

Note: This course is offered as needed.

HIST 6020 - The Era of the American Revolution 1763-1800

Credits: (3)

Causes of American Revolution, including the military, diplomatic and social aspects; the formation of the Union under the Articles of Confederation; the Constitution; and the Federalist era.

Note: This course is offered as needed.

HIST 6040 - The Era of the Civil War and Reconstruction 1840-1877

Credits: (3)

Slavery and the causes of the Civil War with attention to the political, economic, social, and military aspects of the conflict, including the period of Reconstruction to 1877.

Note: This course is offered as needed.

HIST 6130 - History of Utah

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A study of Utah history from its Native American beginnings to the present, emphasizing political, economic and social developments.

HIST 6590 - Middle Eastern History

Credits: (3)

The Middle East from the rise of Islam to the present with emphasis on the 19th and 20th centuries.

Note: This course is offered as needed.

HIST 6610 - History of Africa

Credits: (3)

Typically Taught Summer Semester: *Full Sem Online*

Typically Taught Spring Semester: *Full Sem Online*

Africa from earliest times to the twentieth century, with emphasis on the Sub-Sahara from its ancient kingdoms through the travails of the slave trade, European colonialism, and the independence movement.

HIST 6710 - Reading Seminar in American History

Credits: (3)

When offered will focus on a specific subject in American History. It is assumed that these topics would generally be non-repetitive or repeated only infrequently based on the demand for the course and the instructor assigned to it. Students would be assigned readings on various aspects of the topic and respond through discussion in a seminar setting and written work.

Note: This course is offered as needed.

HIST 6720 - Reading Seminar in European History

Credits: (3)

When offered will focus on a specific subject in European History. It is assumed that these topics would generally be non-repetitive or repeated only infrequently based on the demand for the course and the instructor assigned to it. Students would be assigned readings on various aspects of the topic and respond through discussion in a seminar setting and written work.

Note: This course is offered as needed.

HIST 6760 - Reading Seminar in World History

Credits: (3)

When offered will focus on a specific subject in World History. It is assumed that these topics would generally be non-repetitive or repeated only infrequently based on the demand for the course and the instructor assigned to it. Students would be assigned readings on various aspects of the topic and respond through discussion in a seminar setting and written work.

Note: This course is offered as needed.

HIST 6830 - Directed Readings

Credits: (1-3)

Independent readings under the supervision of a department member on special topics in History. For each hour of credit approximately 1500 pages of material will be read. A written assignment on this material will also be completed.

Pre-requisite(s): Instructor approval.

No more than three hours will count towards a major or minor.

Note: This course is offered as needed.

HLTH 1020 LS - Science and Application of Human Nutrition

Credits: (3)

(available online) Human nutrition is the platform to study the nature and integration of science across disciplines and in society through applied problem solving and data analysis. Nutritional balance and good health are explored in context of the levels of organization, metabolism and homeostasis, genetics and evolution, and ecological interactions.

This course is taught Web enhanced.

HLTH 1030 SS - Healthy Lifestyles

Credits: (3)

Typically Taught Summer Semester: *Online*

Typically Taught Fall Semester: *Full Sem, Online*

Typically Taught Spring Semester: *Full Sem, Online*

A systematic approach to promote health enhancing behaviors related to the prevention of disease and achievement of optimal health. Focuses on the total person with a consideration of the mental, emotional, intellectual, social, physical, and environmental dimensions which impact human health.

HLTH 1110 - Stress Management

Credits: (3)

Typically Taught Summer Semester: *Online*

Typically Taught Fall Semester: *Full Sem, Online*

Typically Taught Spring Semester: *Full Sem, Online*

An introductory course focusing on the causes of stress, recognizing personal stressors and life change management for stress control.

HLTH 1300 - First Aid: Responding to Emergencies

Credits: (2)

Typically Taught Summer Semester: *1st Blk*

Typically Taught Fall Semester: *1st Blk*

Typically Taught Spring Semester: *1st Blk*

Training the lay person to respond correctly in emergencies and act as the first link in the emergency medical service system. Course leads to American Red Cross certification in Adult, Infant and Child CPR and First Aid: Responding to Emergencies.

Cross listed with Athletic Training.

HLTH 2220 - Prenatal and Infant Nutrition

Credits: (2)

This course focuses on nutrition and diet as they apply to birth outcome, the maintenance of maternal health, and the growth of the infant. Breastfeeding and community programs will be discussed in support of maternal and infant health.

Pre-requisite(s): NUTR 1020 or HLTH 1020.

HLTH 2300 - Emergency Response

Credits: (3)

Typically Taught Summer Semester: *2nd Blk*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Meets the needs of the non-health care professional who has a duty to respond in an emergency. Provides more skills and in-depth training than the First Aid: Responding to Emergencies course. Course leads to American Red Cross certification in Emergency Response and CPR for the Professional Rescuer.

Cross listed with RHS 2300.

HLTH 2400 - Mind/Body Wellness

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Promotion of emotional wellness and understanding the body, mind, spirit connection. Required by the Utah State Board of Education for endorsement in health education.

HLTH 2420 - Childhood and Adolescent Nutrition

Credits: (2)

The effects of nutrition and diet on child growth, health and behavior are explored from toddler through adolescence.

The processes of growth and puberty provide the foundations for understanding nutritional support. Common nutritionally-related problems such as obesity, anemia, and eating disorders are also addressed.

Pre-requisite(s): NUTR 1020 or HLTH 1020.

HLTH 2700 - Consumer Health

Credits: (3)

Typically Taught Summer Semester: *Full Sem, 1st Blk, Online*

Typically Taught Fall Semester: *Full Sem, Online*

Typically Taught Spring Semester: *Full Sem*

Knowledge and skills relating to consumption of health products and services, including advertising and health, quackery, alternative health care, economics of health care, etc.

HLTH 2800 - Individual Projects

Credits: (1-3)

A comprehensive study or project in the field of Health Education. Hours to be arranged.

May be repeated 2 times up to 3 credit hours.

Note: This course is offered as needed.

HLTH 2890 INT - Cooperative Work Experience

Credits: (1-6)

Open to all students in Health who meet the minimum Cooperative Work Experience requirements of the department. Provides academic credit for on-the-job experience. Grade and amount of credit will be determined by the department.

May be repeated 5 times up to 6 credit hours.

Note: This course is offered as needed.

HLTH 2920 - Short Courses, Workshops, Institutes and Special Programs

Credits: (1-4)

Variable Title

Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript.

May be repeated 5 times up to 6 credit hours.

Note: This course is taught as needed.

HLTH 3000 - Foundations of Health Promotion

Credits: (3)

Typically Taught Summer Semester: *Online*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Emerging trends and roles of health education within occupational, medical, community, and school settings including history, philosophy, current practices.

Pre-requisite(s): HLTH 1030.

HLTH 3050 - School Health Program

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Designed to prepare the prospective teacher for their responsibilities in administering the functions of the School Health Program, including: health services, healthful school environment, and health education.

HLTH 3100 - Applications of Technology in Health Promotion

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

This course is an exploration of current and future uses of technology in the health promotion fields.

Pre-requisite(s): Completion of Computer & Information Literacy requirement or permission of instructor.

HLTH 3150 - Community Health Agencies and Services

Credits: (3)

Typically Taught Fall Semester: *Full Sem, Online*

Typically Taught Spring Semester: *Full Sem, Online*

An overview of public and community health including history, management, prevention and epidemiology of

disease. Emphasis on the role of community and government health agencies regarding health promotion and disease prevention activities.

Pre-requisite(s): HLTH 3000 or HLTH 3050.

HLTH 3160 - Principles of Health Behavior

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

The course provides a comprehensive overview of theories and models that explain and modify health behaviors. The models and theories are viewed from a multidisciplinary perspective and are applied to health behaviors among both normal and special populations.

Pre-requisite(s): HLTH 3000.

HLTH 3200 - Methods in Health Education

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Designed to appraise and utilize the different methods and aids used in teaching health and lifestyle management in the schools, community, worksite, and health care settings. Students develop skills in organizing, presenting, and evaluating learning experiences presented to target populations in the various settings.

Pre-requisite(s): HLTH 3000 or HLTH 3050 or ESS 2200.

HLTH 3320 - Health and Nutrition in the Older Adult

Credits: (3)

The developmental process of late adulthood with focus on the physiological age-related changes provides the foundation for understanding physical, mental, and social health and well-being in the older adult. Nutrition and exercise assessments and prescriptions, clinical services, community and social support services, complementary and alternative medicine, and other topics are explored in the context of promoting healthy aging.

Pre-requisite(s): NUTR 1020 or HLTH 1020.

HLTH 3400 - Substance Abuse Prevention

Credits: (3)

Typically Taught Summer Semester: *Full Sem, Online*

Typically Taught Fall Semester: *Full Sem, Online*

Typically Taught Spring Semester: *Full Sem, Online*

Study of legal and illegal drugs from a pharmacological, historical, psychosocial, and behavioral perspective. Emphasis on primary prevention concepts and responsible consumerism. Education students can receive "Substance Abuse Certification" from the Utah State Office of Education.

HLTH 3420 - Multicultural Health and Nutrition

Credits: (3)

The application and understanding of social, religious, economic and aesthetic qualities of foods provides the knowledge for the explorations of the food patterns of various cultures. The understanding or world food problems as they pertain to the health will also be discussed.

Pre-requisite(s): NUTR 1020 or HLTH 1020 and NUTR 2320.

This course is taught Web enhanced.

HLTH 3500 - Human Sexuality

Credits: (3)

Typically Taught Summer Semester: *Full Sem, Online*

Typically Taught Fall Semester: *Full Sem, Online*

Typically Taught Spring Semester: *Full Sem, Online*

A survey course of the biomedical and psychosocial forces which shape our sexuality. The focus will be upon the scholarly study of the biological, social, psychological, and spiritual dimensions of human sexuality.

HLTH 4013 - Health Promotion Research and Assessment

Credits: (3)

Typically Taught Summer Semester: *Full Sem Online*

Typically Taught Fall Semester: *Full Sem*

Application of research methods used both in assessing individual and community needs for health education, and in assessing the effectiveness of health education programs.

Pre-requisite(s): HLTH 3000 and HIM 3200.

HLTH 4150 - Needs Assessment & Planning Health Promotion Programs

Credits: (4)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Conducting needs assessment and planning health promotion programs in a community, occupational, school or clinical setting.

Pre-requisite(s): HLTH 3000.

HLTH 4220 - Women's Health Issues

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A feminist perspective and analysis of the psychological, cultural and political health related issues that impact women throughout the life span.

Pre-requisite(s): Upper division standing or consent of instructor.

(Cross listed with Women's Studies)

HLTH 4250 - Contemporary Health Issues of Adolescents

Credits: (2)

Typically Taught Summer Semester: *Full Sem, Online*

Typically Taught Fall Semester: *Full Sem, Online*

Typically Taught Spring Semester: *Full Sem, Online*

Provides professionals who work with adolescents an overview of both the school health program and health issues prevalent among teens.

HLTH 4300 - Health Education in the Elementary School

Credits: (2)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Provides elementary school teachers the resources and skills needed to teach the Utah Healthy Lifestyles curriculum.

HLTH 4700 - Wellness Coaching

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Wellness coaching provides a highly effective and focused approach towards improving people's individual health habits and involves coaching people towards achieving their personal, health, and wellness goals. Students with an interest in wellness coaching will gain a broad overview of the field including an introduction to the application of

wellness coaching tools, theory, concepts and techniques.

Pre-requisite(s): HLTH 2400, HLTH 3200.

HLTH 4800 - Individual Projects

Credits: (1-3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A comprehensive study or project in the field of Health Education. Hours to be arranged for seniors only. May be repeated 2 times up to 3 credit hours.

HLTH 4860 INT - Field Experience

Credits: (1-6)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Work experience which applies prior academic learning in a supervised setting.

Pre-requisite(s): HLTH 3000, HLTH 3100, HLTH 3200, HLTH 4150.

May be repeated 5 times up to 6 credit hours.

HLTH 4890 INT - Cooperative Work Experience

Credits: (1-6)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A continuation of HLTH 2890.

May be repeated 5 times up to 6 credit hours.

Note: This course is offered as needed.

HLTH 4920 - Short Courses, Workshops, Institutes and Special Programs

Credits: (1-4)

Variable Title

Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript.

May be repeated 5 times up to 6 credit hours.

Note: This course is taught as needed.

HLTH 4990 - Senior Seminar

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This is a capstone course of Health Promotion seniors only. Summarizes the experiences of the Health Promotion Major, addresses future alternatives and prepares students for employment now and/or graduate study.

HLTH 6250 - Contemporary Health Issues of Adolescents

Credits: (2)

Typically Taught Fall Semester: *Online*

Typically Taught Spring Semester: *Online*

Provides professionals who work with adolescents an overview of both the school health program and health issues prevalent among teens.

HLTH 6300 - Health Education in the Elementary School

Credits: (2)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Provides elementary school teachers the resources and skills needed to teach the Utah Healthy Lifestyles curriculum.

HNRS 1110 HU - Introduction to Honors: The Construction of Knowledge

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

An interdisciplinary class introducing students to the different ways university disciplines see the world and construct meaning.

A student may repeat a course number for up to 6 credits if the course name, course syllabus, and faculty/instructor teaching the course is different.

HNRS 1500 PS - Perspectives in the Physical Sciences

Credits: (3)

Variable Title

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

An interdisciplinary approach to the physical sciences. This introductory class deals with basic concepts, problems and issues of the physical sciences.

A student may repeat a course number for up to 6 credits if the course name, course syllabus, and faculty/instructor teaching the course is different.

HNRS 1510 LS - Perspectives in the Life Sciences

Credits: (3)

Variable Title

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

An interdisciplinary approach to the life sciences. This introductory class deals with basic concepts, problems and issues of the life sciences.

A student may repeat a course number for up to 6 credits if the course name, course syllabus, and faculty/instructor teaching the course is different.

HNRS 1520 SS - Perspectives in the Social Sciences

Credits: (3)

Variable Title

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

An interdisciplinary introduction to the social sciences. This introductory course deals with the basic concepts, methods, models and issues of the social sciences.

A student may repeat a course number for up to 6 credits if the course name, course syllabus, and faculty/instructor teaching the course is different.

HNRS 1530 CA - Perspectives in the Creative Arts

Credits: (3)

Variable Title

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

An interdisciplinary introduction to the creative arts. This introductory class deals with basic concepts, problems and issues of the creative arts.

A student may repeat a course number twice for a maximum of 6 credits if the course name, course syllabus, and faculty/instructor teaching the course is different.

HNRS 1540 HU - Perspectives in the Humanities

Credits: (3)

Variable Title

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

An interdisciplinary approach to the arts and humanities.

This introductory class deals with basic concepts, problems

and issues of the arts and humanities.

A student may repeat a course number for up to 6 credits if the course name, course syllabus, and faculty/instructor teaching the course is different.

HNRS 2010 HU - Exploring Key Concepts in the Disciplines: Humanities

Credits: (3)

Variable Title

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course will focus on the history and development of a central concept in the Humanities, using original sources as the primary class texts.

Pre-requisite(s): Prior to taking this course students are strongly advised to take HNRS 1110 HU and a 1000-level HNRS "Perspectives" General Education course.

A student may repeat a course number for up to 6 credits if the course name, course syllabus, and faculty/instructor teaching the course is different.

HNRS 2020 CA - Exploring Key Concepts in the Disciplines: Creative Arts

Credits: (3-6)

Variable Title

This course will focus on a central concept in the Creative Arts, using original sources as the primary class texts. Prior to taking this course students are strongly advised to take HNRS 1110 and a 1000-level HNRS "Perspectives" General Education course.

A student may repeat a course number for up to 6 credits if the course name, course syllabus, and faculty/instructor teaching the course is different.

HNRS 2030 PS - Exploring Key Concepts in the Disciplines: Physical Sciences

Credits: (3)

Variable Title

This course will focus on a central concept in the Physical Sciences, using original sources as the primary class texts. Prior to taking this course students are strongly advised to take HNRS 1110 and a 1000-level HNRS "Perspectives" General Education course.

A student may repeat a course number for up to 6 credits if the course name, course syllabus, and faculty/instructor teaching the course is different.

HNRS 2040 LS - Exploring Key Concepts in the Disciplines: Life Sciences

Credits: (3)

Variable Title

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course will focus on a central concept in the Life Sciences, using original sources as the primary class texts. Prior to taking this course students are strongly advised to take HNRS 1110 and a 1000-level HNRS "Perspectives" General Education course.

A student may repeat a course number for up to 6 credits if the course name, course syllabus, and faculty/instructor teaching the course is different.

HNRS 2050 SS - Exploring Key Concepts in the Disciplines: Social Science

Credits: (3)

Variable Title

This course will focus on the history and development of a central concept in the Social Sciences, using original sources as the primary class texts.

A student may repeat a course number for up to 6 credits if the course name, course syllabus, and faculty/instructor teaching the course is different.

HNRS 2110 HU/SS - Intellectual Traditions: Great Ideas of the West in the Classical and Medieval Eras

Credits: (3)

Variable Title

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A survey of influential ideas, literature and events that characterize antiquity and the middle ages in the Western world. This course is offered either for HU credit (2110A) or for SS credit (2110B). Prior to taking this course students are strongly advised to take HNRS 1110 and a 1000-level HNRS "Perspectives" General Education course.

A student may repeat a course number for up to 6 credits if the course name, course syllabus, and faculty/instructor teaching the course is different.

HNRS 2120 HU/SS - Intellectual Traditions: Great Ideas of the West in the Modern Era

Credits: (3)

Variable Title

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A survey of the great ideas, literature and events that characterize Western civilization from the Renaissance to relativity. This course is offered either for HU credit (2120A) or for SS credit (2120B). Prior to taking this course students are strongly advised to take HNRS 1110 and a 1000-level HNRS "Perspectives" General Education course.

A student may repeat a course number for up to 6 credits if the course name, course syllabus, and faculty/instructor teaching the course is different.

HNRS 2130 HU/SS/DV - Intellectual Traditions: Great Ideas of the East

Credits: (3)

Variable Title

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A survey of the great ideas, literature, religions and philosophical foundations of Asia. This course is offered either for HU credit (2130A) or for SS credit (2130B). This course also fills the Diversity requirement. Prior to taking this course students are strongly advised to take HNRS 1110 and a 1000-level HNRS "Perspectives" General Education course.

A student may repeat a course number for up to 6 credits if the course name, course syllabus, and faculty/instructor teaching the course is different.

HNRS 2830 - Directed Readings, Projects, and Research

Credits: (1-3)

Individualized tutorial with a professor who may be selected from many possible disciplines.

A student may repeat a course number for up to 6 credits if the course name, course syllabus, and faculty/instructor teaching the course is different.

HNRS 2900 - Honors Colloquium

Credits: (1-3)

Varied topics as described in the semester schedule; topics will be drawn from disciplines across the entire campus; may be taken twice up to 3 credits with different course content: restricted to lower division credit.

A student may repeat a course number for up to 6 credits if

the course name, course syllabus, and faculty/instructor teaching the course is different.

HNRS 2920 - Short Courses, Workshops, Institutes and Special Programs

Credits: (1-3)

Variable Title

In order to provide flexibility and to meet many different needs, a number of specific offerings are possible using this catalog number. When the number is used it will be accompanied by a specific and descriptive title. The specific title with the credit authorized for the particular offering will appear on the student transcript.

A student may repeat a course number for up to 6 credits if the course name, course syllabus, and faculty/instructor teaching the course is different.

HNRS 3110 - Great Books

Credits: (3)

A selection of books that embody some of the great ideas, literature, and events influential in history.

A student may repeat a course number for up to 6 credits if the course name, course syllabus, and faculty/instructor teaching the course is different.

HNRS 3900 - Honors Colloquium

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Varied topics as described in the semester schedule; topics will be drawn from disciplines across the entire campus.

A student may repeat a course number for up to 6 credits if the course name, course syllabus, and faculty/instructor teaching the course is different.

HNRS 4830 - Directed Readings: Senior Project Research

Credits: (1-3)

This class is taken in preparation for the HNRS 4990 Honors Senior Project. Class time is TBA, but students working towards their Honors Senior Project usually meet about seven times during the semester.

A student may repeat a course number for up to 6 credits if the course name, course syllabus, and faculty/instructor teaching the course is different.

HNRS 4900 - Honors Colloquium

Credits: (2-4)

Varied topics as described in the semester schedule; topics will be drawn from disciplines across the entire campus. A student may repeat a course number for up to 6 credits if the course name, course syllabus, and faculty/instructor teaching the course is different.

HNRS 4920 - Short Courses, Workshops, Institutes and Special Programs**Credits: (1-3)****Variable Title**

Consult the semester class schedule for current offering under this number. The specific title and credit authorized will appear on the student transcript.

A student may repeat a course number for up to 6 credits if the course name, course syllabus, and faculty/instructor teaching the course is different.

HNRS 4990 - Honors Senior Project**Credits: (3)**

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Must be taken by students whose major department offers no Senior Project course; or may be taken in conjunction with a departmental Senior Project course when the project merits additional credit. For the University Honors designation, a Senior Project/Thesis must be completed.

A student may repeat a course number for up to 6 credits if the course name, course syllabus, and faculty/instructor teaching the course is different.

HTHS 1005 - Current Certification in Health Care**Credits: (1-3)**

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Certificate programs provide a foundation for many of the Allied Health Professions. This course allows students to obtain University credit for the completion of a certificate program. Students should complete their certificate program prior to or during the semester in which they are enrolled in the course. Certificates that currently qualify for this course are Certified Nurse Assistant. Other certificates may be eligible on a case-by-case basis. Students may elect 1-3 credit hours for this course. Required assignments will match the elected credit hours.

HTHS 1101 - Medical Terminology**Credits: (2)**

Typically Taught Summer Semester: *Full Sem, Full Sem Online*

Typically Taught Fall Semester: *Full Sem, Full Sem Online*

Typically Taught Spring Semester: *Full Sem, Full Sem Online*

A comprehensive overview of medical language. This course takes a body-systems approach to presenting the medical terminology associated with anatomy, physiology, diseases and treatments. Designed for all students interested in health sciences or a career in medicine.

HTHS 1103 - Introduction to Health Careers and Care in a Diverse Society**Credits: (3)**

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course will compare and contrast diverse health careers. Students will discuss the history, providers, and delivery models involved in Health Care. The course will explore how such factors as economic class and status in groups such as gender, age, and physical ability affect health care professionals. Students will also explore numerous fields and opportunities in the Health Care Industry.

HTHS 1104 - Introductory Human Anatomy and Physiology**Credits: (3)**

Typically Taught Summer Semester: *Full Sem, Full Sem - Online*

Typically Taught Fall Semester: *Full Sem, Full Sem - Online*

Typically Taught Spring Semester: *Full Sem, Full Sem - Online*

Introductory Human Anatomy and Physiology is a single semester 3 credit-hour course that focuses on the basic structure and function of the human body. Course topics include a basic introduction to atomic, molecular, cellular, and tissue levels of organization; and the integumentary, musculoskeletal, neuroendocrine, cardiovascular, lymphatic, immune, respiratory, digestive, and genitourinary systems. Course activities will enhance your understanding of the material by providing practice in critical thinking, content application, and data analysis.

HTHS 1108 - Biocalculations for Health Professions

Credits: (5)

Fundamental mathematical concepts using health professions applications. Topics include: basic arithmetic, pre-algebra, beginning algebra, geometry, and statistics applied to solutions, dosage calculations, electrolytes, acid base balance, circulatory and urinary function, pulmonary function testing and energy and metabolism. This course does not meet the University's quantitative literacy requirement.

Note: This course is offered as needed.

HTHS 1110 LS - Integrated Human Anatomy and Physiology I

Credits: (4)

Typically Taught Summer Semester: *Full Sem, Full Sem - Online*

Typically Taught Fall Semester: *Full Sem, Full Sem - Online*

Typically Taught Spring Semester: *Full Sem, Full Sem - Online*

Integrated Human Anatomy and Physiology I is the first semester of a two-semester anatomy and physiology sequence that focuses on the structure and function of the human body. Course module topics include: the atomic and molecular levels of organization, cell biology and metabolism, microbiology, and the integumentary, skeletal and muscular body systems. Weekly integrated laboratory sessions serve to enhance the lectures through discussions, data analysis, hands-on activities, and activities utilizing cadaver specimens and interactive digital cadaver technology. This course meets the life science (LS) general education learning outcomes for the university.

Suggested Requisite(s): Completion of HTHS 1101 and/or HTHS 1104 is strongly recommended.

Note: Course may only be taken three times.

HTHS 1111 - Integrated Human Anatomy and Physiology II

Credits: (4)

Typically Taught Summer Semester: *Full Sem, Full Sem Online*

Typically Taught Fall Semester: *Full Sem, Full Sem Online*

Typically Taught Spring Semester: *Full Sem, Full Sem Online*

Integrated Human Anatomy and Physiology II is the second semester of a two-semester anatomy and physiology

sequence that focuses on the structure and function of the human body. Course module topics include: the nervous, endocrine, cardiovascular (blood), cardiovascular (heart and blood vessels), respiratory, digestive, urinary, and reproductive body systems. Laboratory sessions serve to enhance the lectures through discussions, data analysis, hands-on activities, and activities utilizing cadaver specimens and interactive digital cadaver technology.

Pre-requisite(s): HTHS 1110 with a grade of C or better.

HTHS 1120 - Case Studies in Health Sciences

Credits: (3)

Typically Taught Summer Semester: *Full Sem, Full Sem Online*

Typically Taught Fall Semester: *Full Sem, Full Sem Online*

Typically Taught Spring Semester: *Full Sem, Full Sem Online*

Case Studies in Health Sciences is a course designed for students wishing to explore the interdisciplinary nature of health care using case study models. Each case study focuses on a disease process. Progression through each case study involves a review of anatomy and physiology, pathophysiology, medical terminology and a study of a variety of health professionals including their educational and training requirements. Additionally, the student will explore key medical diagnostic tests (e.g. laboratory, imaging) used in patient disease diagnosis, management and prevention. The course emphasizes the importance of the team approach to patient care.

Pre-requisite(s): HTHS 1110 and HTHS 1111 or an equivalent course in anatomy and physiology. Recommended prerequisite: HTHS 1101.

HTHS 1130 - Common Medicines

Credits: (3)

This is an introductory course that will provide information regarding proper drug usage for those without significant backgrounds in the Biological Sciences. The course primarily discusses over-the-counter medicines as well as prescription drug groups that are commonly used by the public. The overall objective of this course will be to provide information in such a way that individuals are able to make wise and appropriate choices, are more aware of possible drug-related problems, and will become well-informed consumers.

May be repeated twice with a maximum of 6 credit hours.

Note: This course is offered as needed.

HTHS 2230 - Introductory Pathophysiology

Credits: (3)

Typically Taught Summer Semester: *Full Sem, Full Sem Online*

Typically Taught Fall Semester: *Full Sem, Full Sem Online*

Typically Taught Spring Semester: *Full Sem, Full Sem Online*

An introduction to the pathophysiologic disruptions of normal human body function, this course will emphasize disease mechanisms and the body's response to restore homeostasis. Units of study include foundational concepts of cellular injury, genetics, acid-base, electrolyte, fluid balance and functional alterations of the immune, hematologic, nervous, endocrine, cardiovascular, respiratory, urinary, musculoskeletal, and reproductive systems.

Pre-requisite(s): Completion of HTHS 1110 and HTHS 1111, or ZOOL 2200, or an equivalent human physiology course with a grade of C or better. Concurrent enrollment in HTHS 2231 is recommended.

HTHS 2231 - Introductory Pathophysiology Laboratory

Credits: (1)

Typically Taught Summer Semester: *Full Sem, Full Sem Online*

Typically Taught Fall Semester: *Full Sem, Full Sem Online*

Typically Taught Spring Semester: *Full Sem, Full Sem Online*

Laboratory and computer exercises involving analysis of both clinical and laboratory data. Students evaluate signs, symptoms, diagnosis, and treatment of various pathological conditions and diseases.

One two-hour laboratory session per week.

Co-Requisite(s): HTHS 2230.

HTHS 2240 - Introduction to Pharmacology

Credits: (3)

Typically Taught Summer Semester: *Full Sem Online*

Typically Taught Fall Semester: *Full Sem, Full Sem Online*

Typically Taught Spring Semester: *Full Sem, Full Sem Online*

Introductory pharmacology course which covers pharmacological principles including modes of action, uses,

modes of excretion, and patient side effects of various drug classes. The drugs are presented in a "system approach" with emphasis on medications utilized in diagnosing and treating diseases associated with the various body systems. Class format includes a 3 hour lecture class with students participating in oral presentations and case studies. Recommended prerequisite: HTHS 1101, HTHS 1110 and HTHS 1111.

HTHS 2830 - Health Sciences Directed Readings

Credits: (1-3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Directed Readings in Health Sciences areas. Must have departmental approval.

May be repeated twice with a maximum of 3 credit hours.

HTHS 2904 - Information Resources in the Health Professions

Credits: (1)

Typically Taught Summer Semester: *Full Sem Online*

Typically Taught Fall Semester: *Full Sem Online*

Typically Taught Spring Semester: *Full Sem Online*

Intended for students interested in the health professions, this one-credit hour course will assist in developing information literacy and research skills. Students completing this course will be able to use an academic library and the Internet to successfully identify, access, evaluate and use information resources to support academic and clinical success and lifelong learning. Emphasis is placed on resources in the health sciences.

Cross-listed as LIBS 2904.

HTHS 2990 - Health Sciences Seminar

Credits: (1)

Presentations, group discussions and analysis of selected topics, designed to prepare the Health Science major for career opportunities in the job market and applying for Health Professions professional programs.

May be repeated twice with a maximum of 3 credit hours.

Note: This course is offered as needed.

HTHS 3240 - Pharmacology Principles and Clinical Applications

Credits: (3)

Typically Taught Summer Semester: *Full Sem Online*

Typically Taught Fall Semester: *Full Sem, Full Sem Online*

Typically Taught Spring Semester: *Full Sem, Full Sem Online*

Pharmacology Principles and Clinical Applications is an upper division course designed for students who are pursuing a career in health, health education, or the health professions. This course will focus on pharmacokinetics, pharmacodynamics, mechanisms of drug action, evidenced-based medicine, organ-systems approach to differential therapeutics, and topics of current relevancy. In addition, students will present on a pharmacology case or topic of their choice.

Pre-requisite(s): HTHS 1111 or ZOOL 2200, or an equivalent human physiology course. HTHS 2230 - Introductory Pathophysiology is also recommended.

HTHS 3328 - Pathophysiology of Cells and Tissues

Credits: (2)

Typically Taught Summer Semester: *Full Sem Online*

Typically Taught Fall Semester: *Full Sem Online*

Typically Taught Spring Semester: *Full Sem Online*

Pathophysiology of Cells and Tissues is a course that will emphasize disease mechanisms and the body's response to restore homeostasis by presenting an orientation to disease as disordered physiology. This course describes the etiology, developmental considerations, pathogenesis and clinical manifestations of disease processes. Units of study focus on the interactions of cellular injury mechanisms, genetic disorders, neoplasia, and inflammatory and immune disorders. WSU Online class only.

Pre-requisite(s): HTHS 1111, ZOOL 2200, or equivalent human physiology course.

May be repeated once for credit.

HTHS 3329 - Pathophysiology of Organs and Systems

Credits: (2)

Typically Taught Summer Semester: *Full Sem Online*

Typically Taught Fall Semester: *Full Sem Online*

Typically Taught Spring Semester: *Full Sem Online*

Pathophysiology of Organs and Systems is a course that will emphasize the mechanisms of disordered physiology that underlie disease conditions by analyzing the mechanism(s) of different disease states. Particular attention will be given to etiology, pathogenesis, developmental and environmental influences, and clinical

manifestations. Units of study focus on the nervous, endocrine, cardiovascular, respiratory, urinary, musculoskeletal, and reproductive systems. WSU Online class only.

Pre-requisite(s): HTHS 1111 or ZOOL 2200, or equivalent human physiology course.

May be repeated once for credit.

HTHS 3410 - Foundations of Health Science Technology

Credits: (3)

The purpose of this course is to teach the student fundamental technological and pharmacological principles used in dental and medical equipment. It will be focused on criteria used by dental and medical personnel to make technology and pharmacology decisions.

Note: This course is offered as needed.

HTHS 3412 - Health Science Technology Applications

Credits: (3)

The purpose of this course is to teach students fundamental technological and pharmacological principles used in specific medical devices. The students will develop an understanding of different health science manufactured products and services and will receive exposure to industry representatives.

Pre-requisite(s): HTHS 3410.

Note: This course is offered as needed.

HTHS 3997 - Digital EEG Concepts

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

This course is part of the Bachelor of Integrated Studies in Electroneurodiagnostics (END), a partnership between Weber State University and the END program at the University of Utah. Students will complete lecture and lab hours primarily at the University of Utah. In addition, five meetings during the fall semester will be required and there is a required research paper.

HTHS 3998 - Normal Adult EEG

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

This course is part of the Bachelor of Integrated Studies in Electroneurodiagnostics (END), a partnership between

Weber State University and the END program at the University of Utah. Students will complete lecture and lab hours primarily at the University of Utah. In addition, five meetings during the spring semester will be required and there is a required research paper.

HTHS 3999 - Artifacts in EEG

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

This course is part of the Bachelor of Integrated Studies in Electroneurodiagnostics (END), a partnership between Weber State University and the END program at the University of Utah. Students will complete lecture and lab hours primarily at the University of Utah. In addition, five meetings during the spring semester will be required and there is a required research paper.

HTHS 4010 - Interdisciplinary Health Care Teams

Credits: (3)

This course provides an interdisciplinary experience with the team concept as a priority. The students learn the role of the health care team members, each with their different skills and objectives. The course teaches students to practice an interdisciplinary approach as they research, interact and learn in the interdisciplinary environment of a health care setting.

Cross-listed with DENT 4010 and NRS 4010.

May be repeated twice for credit.

Note: This course is offered as needed.

HTHS 4850 - Study Abroad

Credits: (1-6)

Variable Title

This course provides opportunities for students in health professions to experience a study abroad program that is designed to explore healthcare, culture, and clinical experience.

May be repeated 5 times for 6 credit hours.

IDT 1010 CA - Introduction to Interior Design

Credits: (3)

Typically Taught Summer Semester: *Online*

Typically Taught Fall Semester: *Full Sem, Online*

Typically Taught Spring Semester: *Full Sem, Online*

Explores the interior design profession, professional certification and licensure. Students learn the various phases of the design process and develop spaces that relate to sustainability, accessibility and human factors. Study of architectural and furniture styles are explored. Students develop aesthetic judgment as they create spaces that utilize the elements and principles of design and color theory.

IDT 1020 - Presentation Techniques

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Exploration of materials and application of methods required for visual communications with interior design presentation. Emphasis in conceptualizing and quick-sketching techniques. Introduction to oral and technical visual presentation methods such as Adobe Illustrator, InDesign and Google SketchUp are incorporated into curriculum.

IDT 1050 - Architectural Drafting

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Introduction to the fundamentals of drafting of architectural working drawings using hand and basic technical skills. Graphic symbols, lettering and procedures used in developing a set of residential plans, including architectural standards and building requirements are studied.

IDT 1860 - Practicum

Credits: (1-2)

A course of occupational experiences in the interior design industry. A plan is created by the instructor and student to provide meaningful training in the student's career field.

Pre-requisite(s): IDT 2020, IDT 2035.

May be repeated for a maximum of 2 credit hours.

Note: This course is offered as needed.

IDT 2010 - Sustainability I: Textiles and Soft Materials

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

A study of fibers, yarns, fabric structure, codes, finishes, and sustainable manufacturing practices and products-as they relate to residential and commercial interiors. Three-dimensional projects may be required as part of this course.

IDT 2020 - Computer-aided Design and Drafting

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

Application of basic computer-aided drafting and design as it relates to technology in interior design. Layout, modeling, rendering, and 3-D projects are featured as part of this course.

IDT 2035 - Design Process/Space Planning

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Experiences in programming, research development, and schematic design development. Emphasis on problem solving and space planning for residential and non-residential spaces. Design charrettes may be included as part of the course curriculum.

Pre-requisite(s): IDT 1050 or BDC 1350.

IDT 2040 - Architectural Detailing

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

This course develops interior detailing technical skills, emphasizing stairways, fireplaces, ceilings, floor systems, and millwork (built-in furniture) details for residential and commercial spaces. Accessibility standards are discussed and incorporated into construction drawings and custom millwork designs. Life safety issues in regards to door, frame and hardware specification. Preparation of construction drawings, specifications, door, window and finish schedules for use by the trade. Three-dimensional projects may be required as part of this course.

Pre-requisite(s): IDT 2020.

IDT 2050 - Codes

Credits: (2)

Typically Taught Spring Semester: *Full Sem*

The study and application of interior building codes that insures the health, safety, and welfare of individuals who occupy the structure.

IDT 2060 - Sustainability II: Materials, Hard Surfaces, and Specifications

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Exploration and research of interior finishes, materials, and sustainable practices. Practical application for specifying and installation of materials will be emphasized. Three-dimensional projects may be required as part of this course. An interdisciplinary design charrette is featured as part of this course.

IDT 2080 - Advanced Interior Architectural Drafting and Design

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

This course continues the study of technical digital interior architectural drafting and design using the latest technologies for interior construction documents and interior architectural renderings.

IDT 2820 - Historical Interiors

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

Historical research of interior furnishing and architecture from Egyptian through English Victorian. Oral presentations, research projects and/or three-dimensional projects may be required as part of this course. This course may be listed among credits for the IDT Study Abroad program.

IDT 2830 - Directed Readings

Credits: (1-3)

Individually chosen readings or specialized topics supervised by a faculty member. Instructor's approval required.

May be repeated up to 3 credit hours.

Note: This course is offered as needed.

IDT 2860 - Practicum

Credits: (1-2)

Typically Taught Spring Semester: *Full Sem*

A course of occupational experiences in the interior design industry. Students are given opportunity to apply the design process to a real-life project, often with a service-learning emphasis. Instructor's approval required. This course may be listed among credits for the IDT Study Abroad program.

Pre-requisite(s): IDT 2020 and IDT 2035.

May be repeated up to 2 credit hours.

IDT 2990 - Interior Design Seminar

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Professional issues presented by guest lecturers, tours, and current discussions in interior design. Due to the nature of the curriculum, not all lectures, tours and experiences may be held in a traditional setting or time. This course may be listed among credits for the IDT Study Abroad program. It is encouraged that design majors enroll in this course each semester. May be taken for credit/no credit.

May be repeated for credit up to 8 times for a maximum of 9 credit hours.

IDT 3000 - Lighting Design

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

A study of lighting principles, lighting systems, light sources, layered lighting concepts, calculation of lighting levels. Voice and data telecommunications systems, communication of lighting design and specifications including budgetary limitations are covered. Lighting plans, switching plans and electrical plans are explored. Focus is given to life safety concerns, codes, and accessibility. Also, exploration of daylighting principles and energy efficiency is incorporated. Emphasis is placed on communicating a design solution by practical application of learned principles in project format. An interdisciplinary design charrette is featured as part of this course.

Pre-requisite(s): (IDT 1050 OR BDC 1350) and IDT 2035.

IDT 3020 - American and Modern Interiors

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Historical survey and research of interiors, furnishings, and architecture from the 1880's to the present. Application of modern design in today's interior including oral presentations, research projects and/or three-dimensional projects may be required as part of this course. This course may be listed among credits for the IDT Study Abroad program.

IDT 3025 - Professional Practice

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

A study of the business aspect of Interior Design. Information will be presented regarding forms and professional practices for the Interior Designer, i.e., ethics,

contracts, fees, purchase orders, letters of agreement, business formations and terminology of business practice. Job seeking skills will also be covered, along with professional licensing and certification. An interdisciplinary design charrette is featured as part of this course.

IDT 3040 - Perspective/Rendering

Credits: (2)

Typically Taught Fall Semester: *Full Sem*

Perspective drawing, sketching, and manual and computer-generated rendering techniques are explored and utilized. It is required that IDT 4830 for one credit hour be taken in conjunction with this course. An interdisciplinary design charrette is featured as part of this course.

IDT 3045 - Residential Design

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

This course focuses on projects that apply the design process to residential interiors. Kitchen and Bath curriculum and NKBA standards are introduced. 20/20 Technologies software is introduced. Design charettes, local or national competition participation, and/or three-dimensional projects may be featured as part of this course.

Pre-requisite(s): IDT 3000 and IDT 3040.

IDT 3060 - Kitchen & Bath

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

A continuation of residential design is explored in which NKBA guidelines for kitchens and baths is applied to projects. In-depth study of the design of kitchens and baths is the focus. Kitchen and bath-specific 20/20 Software is utilized. Design charettes and national competition participation are featured as part of this course. Prepares the student for NKBA (National Kitchen and Bath Association) certification exams.

Pre-requisite(s): IDT 3045.

IDT 4010 - Commercial Studio

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

Application of codes as they pertain to egress, accessibility, and fire in commercial interiors. Emphasis on NCIDQ-based commercial projects are featured in this studio course.

Pre-requisite/Co-requisite: IDT 4020.

IDT 4020 - Commercial Design

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

Applying the design process to commercial design projects is the focus of this course. Contract, hospitality, healthcare, and global projects are emphasized in which students apply codes knowledge and commercial design strategies and specification of commercial-grade finishes and furnishings. Design charettes and national competition participation are featured as part of this course.

Pre-requisite(s): IDT 2035, IDT 2050, IDT 3000, IDT 3040.

IDT 4025 - Senior Program Development

Credits: (2)

Typically Taught Fall Semester: *Full Sem*

The first of a two-part series for the senior student that produces a comprehensive project that features residential, contract, hospitality and healthcare design emphasis along with a research component. The first four phases of the design process are embarked upon in this semester. The senior student must take IDT 4030 in the same academic year following completion of IDT 4025. Local and national competition participation are featured as part of this course. Instructor approval required for registration for this course.

Pre-requisite(s): IDT 4020.

IDT 4030 - Senior Project

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

The second of a two-part series for the senior student that produces a comprehensive project that features residential, contract, hospitality and healthcare design emphasis along with a research component. The design process continues in this semester including presentation of the capstone project. The senior student must take IDT 4025 in the same academic year preceding IDT 4030. Local and national competition participation are featured as part of this course. Instructor approval required for registration for this course.

Pre-requisite(s): IDT 4025.

May be taken twice.

IDT 4040 - Portfolio Design

Credits: (2)

Typically Taught Spring Semester: *Full Sem*

Developing and presenting both a hard-copy and digital portfolio for job searching in the field of interior design. In addition to the portfolio, student will create a customized

resume, business card, and letter of introduction to accompany both the hard-copy and digital portfolio for presentation to prospective employers and clients. Adobe Creative Suite software is used extensively in this course. Local and national competitions are featured as part of this course.

Pre-requisite(s): IDT 4025 or BDC 4350.

IDT 4830 - Directed Readings

Credits: (1-3)

Typically Taught Fall Semester: *Full Sem*

Individual readings supervised by a faculty member. Junior/Senior level course. Must be taken with the approval of the instructor and in conjunction with IDT 3040. This course may be listed among credits for the IDT Study Abroad program.

May be repeated twice for a maximum of 3 credit hours.

IDT 4860 INT - Internship for Interior Design

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A structured professional-level field experience where the interior design major applies skills through work experience with a qualified interior designer, architect, or design firm. The curriculum also involves research into the field of interior design, professional practice and professional certification. Tours, activities, and field trips may be featured as part of the course curriculum in addition to the on-site experience in the design field. Internship must be approved by the instructor within the first two weeks of the semester.

ITLN 1010 - First Semester

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Course Fee: \$8.00

(N=Novice) Introductory course assuming no significant previous experience with the language. Beginners and students with less than two years of high school language should register for this class. Emphasis on everyday conversation and exposure to cultural perspectives.

ITLN 1020 - Second Semester

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$8.00

(N=Novice) Continuation of ITLN 1010. Basic language skills including listening, speaking, reading, writing and culture.

ITLN 2010 - Third Semester

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Course Fee: \$8.00

(NH=Novice High) Continuation of ITLN 1020. Assumes completion of first-year or equivalent experience. Students learn to understand and express ideas about their community and the world. Includes listening, speaking, reading, writing and culture.

ITLN 2020 HU - Fourth Semester Italian

Credits: (3)

Course Fee: \$8.00

(NH=Novice High) Continuation of ITLN 2010. The learning and application of strategies for acquiring a foreign language. Students also learn how cultural products and practices reflect a culture's attitudes, values, ideas and meaning. The process of language acquisition and the seeking of cross-cultural understanding provide insights into the commonalities of how the human family learns, thinks and communicates.

ITLN 2021 - Second Year II

Credits: (3)

(NH=Novice High) Continuation of ITLN 2010 without General Education Humanities credit. Offered through examination only.

Pre-requisite(s): Only available through testing.

JPNS 1000 - Proficiency Development

Credits: (1-2)

(N=Novice) (Cr/NCr) Non-graded courses for entry-level students to augment foreign language instruction in stress-free activities such as reading children's literature, learning and performing skits, folk dancing, singing, cooking, etc. May be repeated for credit under different titles.

Note: Course not currently being offered.

JPNS 1010 - First Semester Japanese

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Course Fee: \$8.00

(N=Novice) Introductory course assuming no significant previous experience with the language. Beginners and students with less than two years of high school language should register for this class. Emphasis on everyday conversation and exposure to cultural perspectives.

JPNS 1020 - Second Semester Japanese

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$8.00

(N=Novice) Continuation of JPNS 1010. Basic language skills including listening, speaking, reading, writing and culture.

JPNS 1700 - Conversational Skills

Credits: (1-3)

Specific vocabulary and speaking skills in one semester (e.g., nursing, law enforcement, medical, tourism, family language courses, etc.). May be repeated for credit under different titles.

JPNS 1852 - Study Abroad

Credits: (1-3)

(N=Novice) Language and culture studies for students with no previous experience in the target language and culture. Most assignments are performed in English. Prior travel experience does not apply.

May be repeated twice with a maximum of 3 credit hours.

Note: Check with Department for course availability.

JPNS 2010 - Third Semester Japanese

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Course Fee: \$8.00

(NH=Novice High) Continuation of JPNS 1020. Assumes completion of first-year or equivalent experience. Students learn to understand and express ideas about their community and the world. Includes listening, speaking, reading, writing and culture.

JPNS 2020 HU - Fourth Semester Japanese

Credits: (3)

Course Fee: \$8.00

(NH=Novice High) Continuation of JPNS 2010. The learning and application of strategies for acquiring a foreign language. Students also learn how cultural products and practices reflect a culture's attitudes, values, ideas and meaning. The process of language acquisition and the seeking of cross-cultural understanding provide insights into the commonalities of how the human family learns, thinks and communicates.

JPNS 2021 - Second Year II

Credits: (3)

(NH=Novice High) Continuation of JPNS 2010 without General Education Humanities credit. Offered through examination only.

Pre-requisite(s): Only available through testing.

JPNS 2030 - Second Year Language Review

Credits: (3)

Course Fee: \$8.00

(NH=Novice High) This course will prepare students who wish to continue language study. Emphasis on conversational skills and a review of language structure and usage.

Note: Check with department for course availability.

JPNS 2851 - Study Abroad

Credits: (3)

(NH=Novice High) Language and culture studies for students whose minimal proficiency is Novice High. Language assignments at the Novice or Intermediate-Low levels are performed in the target language. All other assignments are performed in English. Prior travel experience does not apply.

Note: Check with Department for course availability.

JPNS 2852 - Study Abroad

Credits: (1-3)

(NH=Novice High) Language and culture studies for students whose minimal proficiency is at Novice High. Language assignments at the Novice or Intermediate-Low levels are performed in the target language. All other assignments are performed in English. Prior travel experience does not apply.

Twice with a maximum of 3 credit hours.

Note: Check with Department for course availability.

JPNS 2920 - Short Courses, Workshops, Institutes and Special Programs

Credits: (1-6)

Consult the class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript.

JPNS 3000 - Proficiency Development

Credits: (3)

Course Fee: \$8.00

(IL=Intermediate Low) This is a transition course to upper division. The course focuses on oral proficiency development. Students will learn a variety of techniques and strategies to increase their oral proficiency in a variety of social, educational and cultural settings. Native-speaking students or those who have acquired proficiency through residence in the target language community are not eligible to take this class.

Note: Check with department for course availability.

JPNS 3060 - Grammar & Composition

Credits: (3)

Course Fee: \$8.00

(IL=Intermediate Low) This is a transition course to upper division. The course focuses on oral proficiency development. Students will learn a variety of techniques and strategies to increase their oral proficiency in a variety of social, educational and cultural settings. Native-speaking students or those who have acquired proficiency through residence in the target language community are not eligible to take this class.

Note: Check with department for course availability.

JPNS 3116 - DLI Bridge Course I

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Taught in DLI High Schools for students who have passed the AP Exam with a 4 or higher. Although this is a three credit-hour class, it will meet over the course of a full academic year. Credit will count toward a major or minor in the language.

Pre-requisite(s): JPNS 2020 or AP exam with a score of 4 or better

JPNS 3117 - DLI Bridge Course II

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Taught in DLI High Schools for students who have passed the AP Exam with a 4 or higher. Although this is a three credit-hour class, it will meet over the course of a full academic year. Credit will count toward a major or minor in the language.

Pre-requisite(s): JPNS 2020 or AP exam with a score of 4 or better

JPNS 3118 - DLI Bridge Course III

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Taught in DLI High Schools for students who have passed the AP Exam with a 4 or higher. Although this is a three credit-hour class, it will meet over the course of a full academic year. Credit will count toward a major or minor in the language.

Pre-requisite(s): JPNS 2020 or AP exam with a score of 4 or better

JPNS 3160 - Introduction to Literature

Credits: (3)

Course Fee: \$8.00

(IL=Intermediate Low) Required of all majors and minors. 3160 may be taken concurrently with other literature courses. One sheltered section may be offered to students who have not had extensive in-country experience.

Note: Check with department for course availability.

JPNS 3175 - Business Language II

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

(IM=Intermediate High) Advanced Business Language and Practices. Required of all commercial majors.

JPNS 3220 - Phonetics and Phonology

Credits: (3)

Course Fee: \$8.00

(IL=Intermediate Low) Analysis of the sounds of language and word formation: practice of native like speech patterns. Required of all teaching majors and minors.

Note: Check with department for course availability.

JPNS 3270 - Special Topics in Linguistics

Credits: (3)

Variable Title

Course Fee: \$8.00

(IM=Intermediate Mid) An introduction to linguistic structures and semantic elements. The course provides useful information and practice in the language, its structures and usage. The sub-disciplines of linguistics, other than phonetics and phonology (covered in FL 3220), will be studied. These may include lexical analysis, semantics, morphology, syntax, linguistic change and dialectal variation.

Note: Check with department for course availability.

JPNS 3320 - Applied Language Studies

Credits: (1-3)

Variable Title

Course Fee: \$8.00

(Minimal proficiency level varies with content).

May be repeated up to 10 times under different titles.

JPNS 3360 - Advanced Grammar

Credits: (3)

Course Fee: \$8.00

(IL=Intermediate Low) Analysis and application of syntactic principles and discourse structure.

Note: Check with department for course availability.

JPNS 3550 - Cultural Heritage I

Credits: (3)

Variable Title

Course Fee: \$8.00

(Intermediate Mid) In-depth studies in culture, history, geography, social customs, fine arts and civilization. May be repeated up to 7 times for credit and for other non-English speaking cultures.

JPNS 3560 - Cultural Heritage II

Credits: (3)

Variable Title

Course Fee: \$8.00

(IM=Intermediate Med) Studies in culture, history, geography, social customs, fine arts, and civilization. May be repeated 3 times for other non-English speaking cultures.

JPNS 3570 - Special Topics in Culture

Credits: (3)

Variable Title

Course Fee: \$8.00

(Intermediate Mid) In-depth studies in culture, history, geography, social customs, fine arts and civilization.

May be repeated up to 7 times for credit and for other non-English speaking cultures.

Note: Check with Department for course availability.

JPNS 3610 - Literature Survey I

Credits: (3)

Variable Title

Course Fee: \$8.00

(IH=Intermediate High) A survey of the authors and works of a particular period or place. May be repeated under different titles.

JPNS 3620 - Literature Survey II

Credits: (3)

Variable Title

Course Fee: \$8.00

(IH=Intermediate High) A survey of the authors and works of a particular period or place. May be repeated under different titles.

JPNS 3630 - Literature Poetry

Credits: (3)

Variable Title

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$8.00

(IM= Intermediate Mid) One literature course is required for regular and teaching majors. May be taken concurrently with JPNS 3160. May be repeated under different titles.

JPNS 3631 - Literature: Prose

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Course Fee: \$8.00

(IM=Intermediate Mid). A survey of works in prose by one or various authors of a particular period or place, or spanning several literary movements and geographical regions. May be taken 3 times up to 9 credits under different titles.

JPNS 3632 - Literature: Drama

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Course Fee: \$8.00

(IM=Intermediate Mid). A survey of theater plays by one or various authors of a particular period or place, or spanning several literary movements and geographical regions. May be taken 3 times up to 9 credits under different titles.

JPNS 3650 - Literature Periods

Credits: (3)

Variable Title

Course Fee: \$8.00

(IM=Intermediate Mid) May be repeated under different titles. One literature course is required for regular and teaching majors. May be taken concurrently with JPNS 3160.

JPNS 3670 - Literature Authors

Credits: (3)

Variable Title

Course Fee: \$8.00

(IN=Intermediate Mid) May be repeated under different titles. One literature course is required for regular and teaching majors. May be taken concurrently with JPNS 3160.

JPNS 3680 - Literature: Film

Credits: (3)

Course Fee: \$8.00

(IM=Intermediate Mid). A survey of film by one or various filmmakers of a particular period or place, or spanning several literary movements and geographical regions. May be taken 3 times up to 9 credits under different titles.

JPNS 3710 - Business Language I

Credits: (3)

Course Fee: \$8.00

(IM=Intermediate Mid) Business Language and Practices. Required of all commercial majors.

JPNS 3715 - Business Language II

Credits: (3)

Course Fee: \$8.00

(IM=Intermediate High) Advanced Business Language and Practices. Required of all commercial majors.

JPNS 3720 - Language for Specific Purposes I

Credits: (3)

Course Fee: \$8.00

(IM=Intermediate Mid) This course is content, vocabulary and culture-based. The course focuses on practical vocabulary, idiomatic expressions, professional terminology and cultural interactions on a variety of topics such as language for the medical professions, social workers, law enforcement or tourism.

JPNS 3730 - Language for Specific Purposes II

Credits: (3)

Course Fee: \$8.00

(IM=Intermediate Mid) This course is content, vocabulary and culture-based. The course focuses on practical vocabulary, idiomatic expressions, professional terminology and cultural interactions on a variety of topics, such as language for medical professions, social work, law enforcement or tourism.

JPNS 3740 - Translation I

Credits: (3)

Course Fee: \$8.00

(IM=Intermediate Mid) Introduction to basic techniques and skills needed for bilingual translation of non-fiction texts. Emphasis will be on the translation into English, and on the stylistic, syntactic, cultural, lexical, and terminological problems. Students are given ample opportunity to apply these techniques through a series of written translation assignments, which form the basis for class discussion.

JPNS 3850 - Study Abroad

Credits: (1-6)

(IM=Intermediate Mid) Language and culture studies for students whose language proficiency is Intermediate Low to Intermediate High. All Intermediate and Advanced tasks will be performed in the target language. All Superior tasks may be performed in English. Prior travel experience does not apply. May be repeated up to 10 times for credit.

JPNS 4740 - Translation II

Credits: (3)

Course Fee: \$8.00

(IH=Intermediate High) Development of techniques and skills needed for bilingual translation of non-fiction texts. Emphasis will be on the translation into the target language. Methods of contrastive linguistics to analyze pertinent aspects of language structure, involving syntax, vocabulary and style, as well as basic theoretical-historical concepts are employed. Students are given ample opportunity to apply these techniques and concepts through a series of written translation assignments, which form the basis for class discussion. Prerequisite/Co-requisite: FL 3740 is strongly advised, but not required.

JPNS 4830 - Directed Readings

Credits: (1-3)

(IH=Intermediate High) Independent readings under the direction of a faculty member.

May be repeated up to 10 times.

Note: Check with Department for course availability.

JPNS 4850 - Study Abroad

Credits: (3)

(A=Advanced) Language and culture studies for students whose language proficiency is Advanced or Superior. All tasks are performed in the target language. Prior travel experience does not apply.

JPNS 4920 - Short Courses, Workshops, Institutes and Special Programs

Credits: (1-4)

(minimal proficiency level varies with content) Consult the class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript.

May be repeated 5 times with a maximum of 6 credit hours.

Note: Course not currently being offered.

KOR 1010 - First Semester Korean

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Course Fee: \$8.00

(N=Novice) Introductory course assuming no significant previous experience with the language. Beginners and students with less than two years of high school language should register for this class. Emphasis on everyday conversation and exposure to cultural perspectives.

KOR 1020 - Second Semester Korean

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$8.00

(N=Novice) Continuation of KOR 1010. Basic language skills including listening, speaking, reading, writing and culture.

Suggested Requisite(s): KOR 1010.

KOR 2010 - Third Semester Korean

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Course Fee: \$8.00

(NH=Novice High) Continuation of KOR 1020. Assumes completion of first-year or equivalent experience. Students learn to understand and express ideas about their community and the world. Includes listening, speaking, reading, writing and culture.

Suggested Requisite(s): KOR 1020.

KOR 2020 - Fourth Semester Korean

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$8.00

(NH=Novice High) Continuation of KOR 2010. The learning and application of strategies for acquiring a foreign language. Students also learn how cultural products and practices reflect a culture's attitudes, values, ideas and meaning. The process of language acquisition and the seeking of cross-cultural understanding provide insights into the commonalities of how the human family learns, thinks and communicates.

Suggested Requisite(s): KOR 2010.

KOR 4810 - Experimental

Credits: (1-6)

Experimental

Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript.

5

KOR 4830 - Directed Readings

Credits: (1-3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

(IH=Intermediate High) Independent readings under the direction of a faculty member.

Note: Check with Department for course availability.

LEAP 2510 - LEAP Pathway Academic Writing

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This advanced-mid writing course for English language learners focuses on writing academic essays that incorporate outside sources

Pre-requisite(s): Placed according to the Department Placement test or a TOEFL score of 54 or above (or equivalent.)

Suggested Requisite(s): LEAP 2520.

LEAP 2520 - LEAP Pathway Academic Reading

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

In this course, advanced-mid English language learners practice reading and comprehending authentic academic texts.

Pre-requisite(s): Must be placed by the Department Placement Test or score 54 or above on TOEFL test (or equivalent).

Suggested Requisite(s): LEAP 2510.

LEAP 2750 - Special Projects and Activities for Language Learning American Culture I & II

Credits: (1-3)

Variable Title

Typically Taught Summer Semester: *1st Blk; 2nd Blk*

Typically Taught Fall Semester: *1st Blk; 2nd Blk*

Typically Taught Spring Semester: *1st Blk; 2nd Blk*

Students will become more familiar with aspects of American culture.

Pre-requisite(s):

Must have LEAP approval and LEAP Placement test.

May be repeated 3 times for up to six hours of credit.

Note: Contact the LEAP Department for programs offered.

LEAP 2751 - Special Projects and Activities for Language Learning: Campus Activities and Events I and II

Credits: (1-3)

Typically Taught Summer Semester: *2nd Blk*

Typically Taught Fall Semester: *1st Blk, 2nd Blk*

Typically Taught Spring Semester: *1st Blk, 2nd Blk*

Students will become more familiar with American university culture and activities and with the student support services offered at Weber State University.

Pre-requisite(s): Must have LEAP Department approval and LEAP placement test.

May be repeated 3 times for up to 6 credit hours.

LEAP 2752 - Special projects and Activities for Language Learning: Reading I and II

Credits: (1-3)

Typically Taught Summer Semester: *1st Blk, 2nd Blk*

Typically Taught Fall Semester: *1st Blk, 2nd Blk*

Typically Taught Spring Semester: *1st Blk, 2nd Blk*

The goal of this course is to develop ESL students' English language learning through extensive reading. The reading books for this class are modern fiction, developed for adult learners of English as a second language. Themes include thrillers, science fiction, murder mystery, and ghost stories as well as romance, comedy, adventure and human interest.

Pre-requisite(s): Must have LEAP Department approval and LEAP placement test.

May be repeated 3 times, for up to 6 credit hours.

LIBS 1504 - Information Literacy Competency Exam

Credits: (1)

Typically Taught Summer Semester: *Full Sem Online, 1st Blk, 2nd Blk*

Typically Taught Fall Semester: *Full Sem Online, 1st Blk, 2nd Blk*

Typically Taught Spring Semester: *Full Sem Online, 1st Blk, 2nd Blk*

This exam verifies a student's information literacy competency. Review materials are available for students to study for this exam at libguides.weber.edu/LIBS1504. The exam must be completed during the block/semester registered, and may be retaken one time within the same block/semester. The grade for this course is credit/no credit. For more information, call (801) 626-7034 or email libinstruct@weber.edu.

LIBS 1704 - Information Navigator

Credits: (1)

Typically Taught Summer Semester: *Full Sem, 1st Blk,*

2nd Blk, Online

Typically Taught Fall Semester: *Full Sem, 1st Blk, 2nd Blk, Online*

Typically Taught Spring Semester: *Full Sem, 1st Blk, 2nd Blk, Online*

Students completing this course will be able to use an academic library and the Internet to successfully identify, access, evaluate and use information resources to support academic success and lifelong learning.

LIBS 2504 - Information Resources in History

Credits: (1)

Typically Taught Spring Semester: *Full Sem, Online*

Intended for students interested in history, this one credit hour course will assist them in developing information literacy and basic research skills to support life-long learning. Students will develop skills in identifying, locating, retrieving, documenting and critically evaluating both electronic and print resources that are appropriate for undergraduate research, with an emphasis on resources in history.

LIBS 2604 - Information Resources in Education

Credits: (1)

Typically Taught Summer Semester: *1st Blk, Online*

Typically Taught Fall Semester: *1st Blk, 2nd Blk, Online*

Typically Taught Spring Semester: *1st Blk, 2nd Blk, Online*

Intended for students interested in education, this one-credit hour course will assist in developing information literacy and academic research skills, and an understanding of academic integrity issues unique to the field of education. Students will develop skills in identifying, locating, retrieving, documenting, and critically evaluating both electronic and print resources that are appropriate for undergraduate research, with emphasis in education and related disciplines.

Cross-Listed with EDUC 2604.

LIBS 2704 - Information Resources in the Business Disciplines

Credits: (1)

Typically Taught Fall Semester: *1st Blk, 2nd Blk, Online*

Typically Taught Spring Semester: *1st Blk, 2nd Blk, Online*

Information Resources in the Business Disciplines is a one credit hour course that will assist students in developing

information literacy and basic research skills to support life-long learning. Students will develop skills in identifying, locating, retrieving, documenting, and critically evaluating both electronic and print resources that are appropriate for undergraduate research, with emphasis in the business disciplines.

Cross listed with BSAD 2704.

LIBS 2804 - Information Resources in the Social Sciences

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Intended for students interested in the social sciences, this one credit hour course will assist them in developing information literacy and basic research skills to support life-long learning. Students will develop skills in identifying, locating, retrieving, documenting and critically evaluating both electronic and print resources that are appropriate for undergraduate research, with an emphasis on resources in the social sciences.

LIBS 2904 - Information Resources in the Health Professions

Credits: (1)

Typically Taught Summer Semester: *Full Sem, Online*

Typically Taught Fall Semester: *Full Sem, Online*

Typically Taught Spring Semester: *Full Sem, Online*

Intended for students interested in the health professions, this one-credit hour course will assist in developing information literacy and research skills. Students completing this course will be able to use an academic library and the Internet to successfully identify, access, evaluate and use information resources to support academic and clinical success and lifelong learning. Emphasis is placed on resources in the health sciences.

Cross-listed as HTHS 2904.

LING 4830 - Directed Readings in Linguistics

Credits: (1-3)

Directed readings may be undertaken in the general area of linguistics, whether theoretical or applied. Specific topics are to be selected in consultation with the instructor and the linguistics minor program coordinator. The amount of material to be read, and any written assignments based on the reading, will be at the discretion of the instructor; it will be based on the level of the topic and the degree of difficulty of the reading, consistent with existing

departmental or university guidelines.

Pre-requisite(s): ENGL 3010 Introduction to Linguistics is a prerequisite for this course. The prerequisite may be waived or replaced by an equivalent at the discretion of the instructor in consultation with the linguistics minor program coordinator.

May be repeated twice with a maximum of 3 credit hours.

Note: This course is offered as needed.

LING 4900 - Variable Topics in Linguistics

Credits: (1-3)

Variable Title

Typically Taught Spring Semester: *Full Sem*

This course will offer opportunities for classroom study beyond those available in the regular course offerings for the linguistics minor. Topics will vary according to the interests of students and the expertise of the instructor; for example, advanced syntax, sociolinguistics, language typology, language and the law, artificial intelligence, neurolinguistics, and language death. The course may be taken more than once with different content.

Pre-requisite(s): ENGL 3010 Introduction to Linguistics is a prerequisite for this course. The prerequisite may be waived or replaced by an equivalent at the discretion of the instructor in consultation with the linguistics minor program coordinator.

May be repeated twice with a maximum of 3 credit hours.

Note: This course is offered as needed.

LING 4990 - Centering Experience

Credits: (.5)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

The Centering Experience is the final requirement for the minor in linguistics at Weber State. Students will assemble a portfolio of their work in linguistics and write a reflection paper.

Note: This course is credit/no credit.

MACC 6120 - Financial Accounting & Reporting

Credits: (3)

Typically Taught Summer Semester: *Full Sem, First or Second Block*

Typically Taught Spring Semester: *Full Sem*

In-depth coverage of financial accounting and reporting topics from a theoretical and practical standpoint through a combination of lectures, research projects, case studies, and other homework assignments. Topics include accounting for leases, income taxes, investments, consolidations, foreign currency transactions, FASB Accounting Standards Codification, etc.

MACC 6130 - Governmental and Nonprofit Accounting

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

A study of governmental and nonprofit accounting concepts including revenue and expense recognition; asset and liability valuation; and reporting, disclosure, and financial analysis. Includes in-depth discussion of the new GASB reporting model for governments and analysis of actual government financial statements produced using the new model.

MACC 6160 - Financial Statement Analysis

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

Comprehensive study of the analysis and interpretation of financial statements by external decision makers and the impact of accounting conventions and alternative standards on analytical measures.

MACC 6210 - Business Law and Legal Liability

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

A study of important business law topics accounting and taxation professionals should be familiar with including contracts, business organizations, securities, discrimination, banking, and property will be discussed. Legal liability of accounting and taxation professionals will also be addressed.

MACC 6310 - Advanced Cost Accounting

Credits: (3)

Advanced cost accounting topics including cost accounting for non-manufacturing organizations, human information processing, activity resource usage, pricing, performance measurement, and non-routine decisions.

Note: This course is not currently offered.

MACC 6330 - Strategic Management Accounting

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

A study and analysis of advanced managerial accounting subjects. Examines the impact of accounting information on managerial processes including planning, organizing, and controlling.

MACC 6560 - Advanced Auditing & Assurance Services

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Advanced topics of auditing and assurance services including professional and technical aspects of auditing practice, introduction to SEC, ethics and legal responsibilities, fraud, recent auditing developments, sampling techniques for decision making, internal control, and risk assessment.

MACC 6570 - Information Systems Auditing

Credits: (3)

Methods, techniques, controls, and procedures used in the audit of computerized accounting systems.

Note: This course is not currently offered.

MACC 6580 - Internal Auditing

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

Internal audit profession, internal control, risk assessment, evidence gathering, audit management, internal/external auditor relations, environmental auditing and federal sentencing guidelines, and audit reporting.

MACC 6610 - Advanced Accounting Information Systems

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

An advanced study of accounting information systems including general ledger, principles, tools, and techniques for controls, database systems, management query, and data analysis tools and systems. Course integrates projects and case studies where applicable.

MACC 6695 INT - Graduate Accounting Internship

Credits: (1-3)

Typically Taught: Various

A significant professional-level field experience in the area of accounting or taxation. The student will be counseled and supervised as he/she applies and integrates the knowledge and skills obtained through MAcc/MTax courses.

Pre-requisite(s): Admission to the MAcc or MTax program; approval by department chair and program director.

Can be repeated once up to 6 credit hours.

MACC 6700 - CPA Examination Review: FAR

Credits: (3)

Typically Taught Summer Semester: Full Sem

Typically Taught Fall Semester: Full Sem

Typically Taught Spring Semester: Full Sem

This is a directed self-study course designed to help students prepare for the Financial Accounting and Reporting (FAR) section of the CPA examination. This is a review course and assumes that the student has already taken a number of financial accounting courses. A faculty member will monitor the student's progress and a grade will be determined by the student's performance on weekly quizzes and a final examination.

Pre-requisite(s): The student must be admitted to the Master of Accounting (MAcc) or Master of Taxation (MTax) program.

MACC 6750 - Study Abroad

Credits: (3)

Variable Title

This course integrates international travel and site visits with the study of accounting and international business practices. Through readings, assignments, discussions, and visits to important business and cultural sites, the course builds understanding and competence as it relates to the history of accounting, the global accounting profession, and the business and cultural environment in the host countries.

Pre-requisite(s): The student must be admitted to the MAcc or MTax program.

MACC 6801 - Individual Study

Credits: (1-3)

Individual work or work in small groups, by arrangement,

on special topics not included in the announced course offerings.

Pre-requisite(s): Approval of Graduate Coordinator and Instructor.

MACC 6802 - Individual Study

Credits: (1-3)

Individual work or work in small groups, by arrangement, on special topics not included in the announced course offerings.

Pre-requisite(s): Approval of Graduate Coordinator and Instructor.

MACC 6803 - Individual Study

Credits: (1-3)

Individual work or work in small groups, by arrangement, on special topics not included in the announced course offerings.

Pre-requisite(s): Approval of Graduate Coordinator and Instructor.

MACC 6991 - Lecture Seminar

Credits: (1-3)

Lecture and discussion of current accounting topics by individuals from business and industry.

MACC 6992 - Lecture Seminar

Credits: (1-3)

Lecture and discussion of current accounting topics by individuals from business and industry.

MACC 6993 - Lecture Seminar

Credits: (1-3)

Lecture and discussion of current accounting topics by individuals from business and industry.

MATH 0810 - Experimental Course

Credits: (1-6)

Experimental

Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript.

MATH 0810 - Math Preparation and Practice

Credits: (1)

Experimental

The curriculum is tailored to the unique strengths and weaknesses of students, providing group problem solving activities, an individual assessment and study plan for mastering target material. In class, students will alternate between online math practice and mathematical tasks that will encourage students to reason proportionally, interpret data displays, look for patterns, practice operations with numbers, and practice verbalizing mathematical concepts. Progress in the online learning will be monitored by the instructor.

MATH 0950 ND - Pre-algebra

Credits: (4)

Typically Taught Summer Semester: *Full Sem, 1st Blk, 2nd Blk, Online*

Typically Taught Fall Semester: *Full Sem, Online*

Typically Taught Spring Semester: *Full Sem, Online*

An introduction to mathematical literacy including number sense, algebraic thinking, proportional reasoning, and math learning strategies. Topics include properties of and operations with whole numbers, integers, decimals, fractions and percent; introductory operations and applications with exponents, algebraic expressions, linear equations, and basic geometry. Course fees include math assistance from tutoring services. Does not count toward graduation. Prerequisite: none.

MATH 0970 ND - Pathway to Contemporary Mathematics

Credits: (5)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course integrates geometry, numeracy, proportional reasoning, algebraic reasoning, and topics in statistics and functions (linear, quadratic, rational, radical, exponential and logarithmic) using modeling, problem solving, and critical thinking. The course fee for this course includes homework software and math assistance from tutoring services. This course may not be transferred to other USHE schools.

Pre-requisite(s): MATH 0950 or Level 2 placement.

MATH 0990 ND - Beginning Algebra

Credits: (4)

Typically Taught Summer Semester: *Full Sem, 1st Blk, 2nd Blk, Online*

Typically Taught Fall Semester: *Full Sem, Online*

Typically Taught Spring Semester: *Full Sem, Online*

An introduction to algebraic literacy using properties of real numbers, solving linear equations and inequalities, geometry, ratio and proportion, applications, graphing, solving linear systems, exponents, scientific notation, polynomials, factoring, and solving quadratic equations. Learning strategies for mathematics success, including development of a mathematical growth mindset are integrated into the course.

The course fee includes math assistance from tutoring services. Does not count toward graduation.

Prerequisite:MATH 0950 or equivalent placement.

MATH 1010 - Intermediate Algebra

Credits: (4-5)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Inequalities (including absolute value and systems), systems of equations, applications, functions (inverse, exponential, and logarithmic), variation, factoring, rational expressions, radicals, complex numbers, quadratic equations, parabolas, circles, quadratic formula, formulas, properties and applications of logarithms. The course fee for this course includes homework software and math assistance from tutoring services.

Pre-requisite(s): MATH 0990 or Level 3 placement.

MATH 1020 - Fundamentals of Geometry

Credits: (3)

An introduction to the definitions, methods, and logic of geometry.

Pre-requisite(s): MATH 0990 or placement test.

Note: This course is offered as needed.

MATH 1030 QL - Contemporary Mathematics

Credits: (3)

Typically Taught Summer Semester: *Full Sem, Full Sem Online*

Typically Taught Fall Semester: *Full Sem, Full Sem Online*

Typically Taught Spring Semester: *Full Sem, Full Sem Online*

Topics from mathematics which convey to the student the beauty and utility of mathematics, and which illustrate its application to modern society. Topics include geometry, statistics, probability, and growth and form.

Pre-requisite(s): MATH 0970 or MATH 1010 or ACT Math score 21 or higher or placement test.

MATH 1035 QL - Contemporary Mathematics with Prerequisite Topics

Credits: (6)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course will center on topics including: proportional reasoning, financial mathematics, linear and exponential modeling, geometry, probability and statistics. Material will be introduced in the form of real-life problems. Pre-requisite material will be incorporated as appropriate.

Pre-requisite(s): MATH 0950 or ALEKS score of 14 or instructor approval.

MATH 1040 QL - Introduction to Statistics

Credits: (3)

Typically Taught Summer Semester: *Full Sem, Online*

Typically Taught Fall Semester: *Full Sem, Online*

Typically Taught Spring Semester: *Full Sem, Online*

Basic concepts of probability and statistics including data collection and analysis, correlation and regression, probability, discrete and continuous distributions (binomial, normal and t distributions), estimation and hypothesis testing, with an emphasis on applications and understanding of the main ideas.

Pre-requisite(s): MATH 1010, Math ACT score 23 or higher, Placement Test, MATH 1050, MATH 1080, or MATH 1210 and above.

MATH 1050 QL - College Algebra

Credits: (4)

Typically Taught Summer Semester: *Full Sem, Online*

Typically Taught Fall Semester: *Full Sem, Online*

Typically Taught Spring Semester: *Full Sem, Online*

This course covers a survey of college mathematics and is also a preparatory course for calculus. Topics from continuous mathematics include polynomial, rational, exponential and logarithmic functions, equations and their applications, absolute value, polynomial and rational inequalities, and nonlinear systems. Topics from discrete mathematics include matrices, matrix algebra and inverses, and determinants.

Pre-requisite(s): MATH 1010 or Math ACT score of 23 or higher or placement test.

MATH 1060 - Trigonometry

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course is true to its Greek title root "triangle-measure" and is a preparatory course for calculus. Topics include trigonometric functions and their graphs, trigonometric identities, inverse trigonometric functions, trigonometric equations, solving triangles, and applications of trigonometry. Complex numbers, polar coordinates and vectors are also introduced.

Pre-requisite(s): MATH 1010 or Math ACT score of 23 or higher or placement test.

MATH 1080 QL - Pre-calculus

Credits: (5)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This is an accelerated course that covers the main topics of College Algebra and Trigonometry. It is a single course prerequisite to calculus and is primarily for those students that need a review. Topics include polynomial, rational, exponential and logarithmic functions, equations and their applications, absolute value, polynomial and rational inequalities, and nonlinear systems; matrices, matrix algebra and inverses, determinants, sequences and series; trigonometric functions and their graphs, trigonometric identities, inverse trigonometric functions, trigonometric equations, solving triangles, and applications of trigonometry. In addition, conics and polar coordinates are also covered.

Pre-requisite(s): MATH 1010 or Math ACT score of 23 or higher or placement test.

MATH 1090 QL - Business College Algebra

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Concepts and applications of functions and graphs, polynomial and rational functions, matrices, Gaussian elimination, exponential and logarithmic functions, growth, periodic and continuously compounded interest, arithmetic

and geometric series, annuities and loans. Applications mainly to business and economic problems.

Pre-requisite(s): MATH 1010 with a grade of C or better or ACT math score of at least 23, or placement test. Math prerequisites (courses and test scores) expire after 24 months (see www.weber.edu/placement/math-details.html).

MATH 1110 QL - Calculus Concepts and Applications

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A conceptual understanding of the fundamental notions of calculus (limits, continuity, differentiation and integration). Application of these ideas to economics, the social and life sciences, and natural resource modeling is central to the course.

Pre-requisite(s): MATH 1050 QL or MATH 1080 QL or placement test.

MATH 1120 QL - Foundations of Data Science

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Students will acquire the knowledge and skills used in data science at an introductory level. The course will focus on interaction between statistical and mathematical reasoning and their application to the collection, preparation, and presentation of data and underlying data management skill for such analysis. Access to a computer is required.

Pre-requisite(s): MATH 1010, or ACT math score of 23 or higher, or a placement test.

MATH 1200 - Mathematics Computer Laboratory

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Solving mathematics problems at the appropriate level for students' backgrounds using a computer algebra system.

Pre-requisite(s): MATH 1050 and MATH 1060, or MATH 1080, or

Pre-requisite/Co-requisite: MATH 1210.

MATH 1210 - Calculus I

Credits: (4)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Limits, continuity, differentiation, integration.

Pre-requisite(s): MATH 1050 and MATH 1060 or MATH 1080 or placement test.

Co-Requisite(s): The ability to use a computer algebra system.

MATH 1216 - Integral Calculus

Credits: (4)

Typically Taught Summer Semester: *NA*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Definite, indefinite, and improper integrals, transcendental functions, inverse functions, techniques of integration, applications of integration.

Pre-requisite(s): MATH 1210.

MATH 1220 - Calculus II

Credits: (4)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Transcendental functions, techniques of integration, analytic geometry, infinite series.

Pre-requisite(s): MATH 1210.

Co-Requisite(s): The ability to use a computer algebra system.

MATH 1630 - Discrete Mathematics Applied to Computing

Credits: (4)

An overview of the fundamentals of algorithmic, discrete mathematics applied to computation using a contemporary programming language. Topics include logic, proofs, sets, functions, counting, relations, graphs, trees, Boolean algebra, and models of computation. This course includes programming.

Pre-requisite(s): MATH 1050 or MATH 1080, and CS 1400 or ability to program in a contemporary computer language and the consent of the instructor.

Note: This course is offered as needed.

MATH 1810 - Co-requisite Contemporary Math

Credits: (6)

Experimental Course, Contact Department for More Information

Topics from mathematics which convey to the student the beauty and utility of mathematics, and which illustrate its application to modern society. Mathematical material in this course will center on topics including: proportional reasoning, linear and exponential modeling, geometry, scaling factors, probability and expectations, statistical inference, and financial mathematics. Material will be introduced to students in the form of a real life problem and the mathematics necessary to solve that problem will be developed. QL math course.

MATH 1810 - Experimental Courses

Credits: (1-6)

Topics from mathematics which convey to the student the beauty and utility of mathematics, and which illustrate its application to modern society. Mathematical material in this course will center on topics including: proportional reasoning, linear and exponential modeling, geometry, scaling factors, probability and expectations, statistical inference, and financial mathematics. Material will be introduced to students in the form of a real life problem and the mathematics necessary to solve that problem will be developed. Refer to Experimental Courses.

Note: Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript.

MATH 1810 - Integral Calculus

Credits: (4)

Experimental

Definite, indefinite, and improper integrals, transcendental functions, inverse functions, techniques of integration, applications of integration.

Pre-requisite(s): MATH 1210

MATH 2010 - Arithmetic for Elementary Teachers

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Prospective school teachers revisit mathematics topics from the K-8 school curriculum and examine them from an advanced perspective including arithmetic, number theory, and problem solving.

Pre-requisite(s): ACT score of 23 or better, Accuplacer

CLM of 50 or better, MATH 1010 with a C or better, MATH 0970 with a C or better or completion of any math course MATH 1030 or above with a C or better.

MATH 2015 - Algebra for Elementary Teachers

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Prospective school teachers revisit mathematics topics from the K-8 school curriculum and examine them from an advanced perspective including variables, expressions, equations and inequalities, and functions. This course includes recitation and hands on activities. The goal is to present mathematical concepts and effective teaching strategies in an integrated manner. Underlying goals are to stimulate variety in solution processes, provide concrete, pictorial and abstract models, develop communication, collaboration and math reading skills in an environment rich with manipulatives and technology.

Pre-requisite(s): MATH 2010.

MATH 2020 QL - Geometry for Elementary Teachers

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Prospective elementary school teachers revisit mathematics topics from the elementary school curriculum and examine them from an advanced perspective including probability, statistics, geometry and measurement.

Pre-requisite(s): MATH 2015

MATH 2120 - Euclidean Geometry

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Exploration of Euclidean geometry, from basic concepts to advanced theorems.

Pre-requisite(s): MATH 1210 or consent of instructor.

MATH 2210 - Calculus III

Credits: (4)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Vector algebra, vector valued functions, multivariable

functions, partial derivatives, multiple integrals, line integrals, integration in vector fields.

Pre-requisite(s): MATH 1220.

MATH 2250 - Linear Algebra and Differential Equations

Credits: (4)

Typically Taught Spring Semester: *Full Sem*

Introduction to Linear Algebra and Differential Equations.

Systems of linear equations, matrices, vector spaces, eigenvalues. First and second order differential equations and models, higher order linear equations, linear systems.

Pre-requisite(s): MATH 1220.

MATH 2270 - Elementary Linear Algebra

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Systems of linear equations, matrices, vector spaces, eigenvalues linear transformations, orthogonality.

Pre-requisite(s): MATH 1220 OR MATH 1210 and a choice of MATH 3110 or MATH 3160.

MATH 2280 - Ordinary Differential Equations

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Methods of solution for ordinary differential equations. Exact equations, linear equations Laplace Transforms, series solutions.

Pre-requisite(s): MATH 1220.

MATH 2410 - Foundations of Probability and Statistics

Credits: (3)

An introduction to probability and statistics with special emphasis on concepts in the K-12 school curriculum.

Pre-requisite(s): MATH 1210 or MATH 1050 and consent of instructor.

Note: This course is offered as needed.

MATH 2920 - Short Courses, Workshops, Institutes and Special Programs

Credits: (1-4)

Variable Title

Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript.

May be repeated 3 times for a maximum of 4 credit hours.

Note: This course is offered as needed.

MATH 2925 - Mathematics Monday

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A high impact mathematical educational experience through diverse topics and methods of learning.

To form a mathematical community for appreciation and dissemination of mathematics. To develop skills of independent learning, critical thinking, effective verbal and written communication skills, and working within a group.

Learning Outcomes:

1. Exposure to a variety of mathematical topics.
2. Opportunity for mathematical and interpersonal growth.

Topics not typically covered in standard mathematics courses. Topics and activities are at the discretion of the instructor.

Pre-requisite(s): MATH 1220 Calculus II with a grade of C or better.

This course may be taken three times for a total of 3 credit hours.

MATH 2990 - Seminar in Mathematics

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Joint sessions of students and faculty dedicated to the discussion of topics in mathematics and mathematics education. Students will attend seminars, participate in discussions, and write reviews of the presentations.

Pre-requisite(s): MATH 1210 and ENGL 2010, or consent of instructor.

The course may be taken 5 times and up to 6 credits.

MATH 3050 - History of Mathematics

Credits: (3)

A survey of the history of mathematics and its impact on

world culture with emphasis on mathematical motivations, original methods and applications.

Pre-requisite(s): MATH 1220.

Note: Check with Department for course availability.

MATH 3110 - Foundations of Algebra

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

An introduction to Abstract Algebra, Number Theory and Logic with an emphasis on problem solving and proof writing.

Pre-requisite(s): MATH 1210.

MATH 3120 - Foundations of Euclidean and Non-Euclidean Geometry

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

Axiomatic development of geometry; Euclidean and non-Euclidean.

Pre-requisite(s): MTHE 2120 or instructor consent.

MATH 3160 - Number Theory

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

An overview of beginning number theory including the integers, modulo arithmetic, congruencies, Fermat's theorem and Euler's theorem.

Pre-requisite(s): MATH 1210.

MATH 3270 - Linear Algebra

Credits: (3)

Typically Taught Spring Semester: *Full Sem, alternate years*

Theory and applications of linear algebra including abstract vector spaces and canonical forms of matrices.

Pre-requisite(s): MATH 2270.

MATH 3280 - Dynamical Systems

Credits: (3)

Typically Taught Spring Semester: *Full Sem, alternate even years*

Linear and nonlinear systems of differential equations, qualitative behavior and stability of solutions, applications.

Pre-requisite(s): MATH 2270 and MATH 2280.

MATH 3410 - Probability and Statistics I

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Introductory probability theory and mathematical statistics, including applications.

Pre-requisite(s): MATH 1220.

MATH 3420 - Probability and Statistics II

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

A continuation of MATH 3410-Introductory probability theory and mathematical statistics, including applications.

Pre-requisite(s): MATH 2210 and MATH 3410.

MATH 3450 - Advanced Statistical Methods

Credits: (4)

Typically Taught Spring Semester: *Full Sem*

This applied statistics course discusses study design, data exploration and visualization, choosing among statistical techniques, and the interpretation of statistical results.

Analyses, including T-tests, ANOVA, regression and their non-parametric versions, will be performed on real-world data sets using statistical software.

Pre-requisite(s): MATH 3410 or MATH 1040 and a three credit 3000 or 4000 level course with one of the following designations: MATH, BTNY, CHEM, PHYS, GEO, MICR, ZOOL, CS, ECE, ME, FIN, ECON. Students may also enroll with permission of instructor.

MATH 3550 - Introduction to Mathematical Modeling

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Formulation, solution and interpretation of mathematical models for problems occurring in areas of physical, biological and social science.

Pre-requisite(s): MATH 1200, MATH 1220, and Co-requisite MATH 2270 or MATH 2280.

MATH 3610 - Graph Theory

Credits: (3)

Typically Taught Fall Semester: *Full Sem, odd years*

Principles of Graph Theory including methods and models, special types of graphs, paths and circuits, coloring, networks, and other applications.

Pre-requisite(s): MATH 1220 OR MATH 1210 and a choice of MATH 3110 or MATH 3160.

MATH 3620 - Enumeration

Credits: (3)

Typically Taught Spring Semester: *Full Sem, even years*
Principles of Enumeration including counting principles, generating functions, recurrence relations, inclusion-exclusion, and applications.

Pre-requisite(s): MATH 1220 OR MATH 1210 and a choice of MATH 3110 or MATH 3160.

MATH 3710 - Boundary Value Problems

Credits: (3)

Typically Taught Fall Semester: *Full Sem*
Fourier series and the method of separation of variables. Heat, wave, and potential equations, Sturm-Liouville problems, orthogonal functions, special functions.

Pre-requisite(s): MATH 2210 and [MATH 2250 or MATH 2280].

MATH 3810 - Complex Variables

Credits: (3)

Typically Taught Fall Semester: *Full Sem, odd years*
Analysis and applications of a function of a single complex variable. Analytic function theory, path integration, Taylor and Laurent series and elementary conformal mapping are studied.

Pre-requisite(s): MATH 2210.

MATH 4010 - Capstone Mathematics for High School Teachers

Credits: (3)

Typically Taught Fall Semester: *Full Sem*
Prospective high school teachers revisit mathematics topics from the secondary school curriculum and examine them from an advanced perspective. The major emphasis is on topics from algebra and geometry.

Pre-requisite(s): MATH 3110 and MATH 3120.

MATH 4110 - Modern Algebra I

Credits: (3)

Typically Taught Fall Semester: *Full Sem, odd years*
Logic, sets, and the study of algebraic systems including groups, rings, and fields.

Pre-requisite(s): MATH 2270 and MATH 3110.

MATH 4120 - Modern Algebra II

Credits: (3)

Typically Taught Spring Semester: *Full Sem, even years*
A continuation of MATH 4110: advanced topics from groups, rings, and fields including the Sylow theorems and Galois theory.

Pre-requisite(s): MATH 4110.

MATH 4160 - Introduction to Mathematical Cryptography

Credits: (3)

An introduction to the mathematical concepts on which cryptography is based and an introduction to basic cryptographic systems. The course will typically be offered every other year.

Pre-requisite(s): (MATH 3110 or 3160 or 4110 or 3410) and CS 1400.

Note: This course is offered as needed.

MATH 4210 - Introductory Real Analysis I

Credits: (3)

Typically Taught Fall Semester: *Full Sem*
Develop the analysis underlying calculus. In-depth study of limits, continuity, integration, differentiation, sequences and series. Other topics may include Lebesgue measure and integration and Fourier Analysis.

Pre-requisite(s): MATH 2210, MATH 2270, and MATH 3110.

MATH 4220 - Introductory Real Analysis II

Credits: (3)

Typically Taught Spring Semester: *Full Sem, odd years*
A continuation of MATH 4210-Develop the analysis underlying calculus. In-depth study of limits, continuity, integration, differentiation, sequences and series. Other topics may include Lebesgue measure and integration and Fourier Analysis.

Pre-requisite(s): MATH 4210

MATH 4320 - Topology

Credits: (3)

Typically Taught Fall Semester: *Full Sem, even years*
Introduction to point-set topology, including metric and topological spaces, continuity, homeomorphisms, compact and connected spaces, and complete metric spaces. Other

topics may include the Baire Category Theorem and Tietze Extension Theorem.

Pre-requisite(s): MATH 2210, MATH 2270 and MATH 3110.

MATH 4400 - Statistical Analysis of Big and Small Data

Credits: (3)

This course combines and develops the knowledge and skills used in big and small data using both theory and application. The course deals with methods to analyze data with varying volume, velocity, and variety and their associated challenges. Topics such as data mining, predictive analytics, heteroskedasticity of data, and data visualization will be explored.

Pre-requisite(s): MATH 3410 or (MATH 1220 and MATH 1040).

Pre-requisite/Co-requisite: CS 1400 or CS 2550.

Note: This course is offered as needed.

MATH 4610 - Numerical Analysis I

Credits: (3)

Typically Taught Fall Semester: *Full Sem, even years*

Introduction to numerical methods. Use of the digital computer in solving otherwise intractable problems.

Pre-requisite(s): MATH 2270 and an ability to use a programming language

MATH 4620 - Numerical Analysis II

Credits: (3)

Typically Taught Spring Semester: *Full Sem, odd years*

A continuation of MATH 4610-Introduction to numerical methods. Use of the digital computer in solving otherwise intractable problems.

Pre-requisite(s): MATH 4610

MATH 4710 - Partial Differential Equations

Credits: (3)

Typically Taught Spring Semester: *Full Sem, odd years*

Partial differential equations. First and second order equations, characteristics and classifications, methods of solution, applications.

Pre-requisite(s): MATH 3710.

MATH 4750 - Topics in Mathematics

Credits: (2-4)

Variable Title

This course will vary with the demand.

Pre-requisite(s): Consent of the instructor.

May be taken more than once for a maximum of 8 credit hours.

Note: This course is offered as needed.

MATH 4910 - Senior Research Project

Credits: (3)

Mathematical research project for seniors. Students may not register for this course the last semester before they intend to graduate.

Pre-requisite(s): Instructor approval.

Note: This course is offered as needed.

MATH 4920 - Short Courses, Workshops, Institutes and Special Programs

Credits: (1-4)

Variable Title

Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript.

Note: This course is offered as needed.

MATH 4925 - Problems, Journals, and Research in Mathematics

Credits: (1)

Typically Taught Fall Semester: *Full Sem, 2nd Blk*

Typically Taught Spring Semester: *Full Sem, 2nd Blk*

Development and demonstration of independent learning and communication skills through advanced problems solving, presenting journal articles, or undergraduate research under guidance of an advisor.

Pre-requisite/Co-requisite: MATH 2925

This course may be repeated once for a total of 2 credit hours.

MBA 6010 - Legal and Regulatory Environment of Business

Credits: (3)

Typically Taught Spring Semester: *2nd Blk*

This course is an introduction to business law, emphasizing basic legal principles and the broad application of domestic and international public and private law. Its overriding objective is to provide a working understanding of the legal environment of business for MBA students. Its focus is on

regulatory law, business organizations, and other legal topics of special importance to managers of businesses.
Note: Course offerings are subject to change.

MBA 6020 - Financial and Managerial Accounting

Credits: (3)

Typically Taught Summer Semester: 2nd Blk

A general study of the use of accounting information by internal and external decision makers with emphasis on the use of accounting information by managers of an entity. Topics covered include the accounting cycle, the basic financial statements, inventories, long-term liabilities, cost concepts and behaviors, cost-volume-profit analysis, and financial statement analysis.

Note: Course offerings are subject to change.

MBA 6040 - Managerial Economics

Credits: (3)

Typically Taught Summer Semester: 2nd Blk

This course develops the basic concepts and analytical tools of economics which include opportunity cost, marginal analysis, constraints, and optimizing behavior. Applications include theories of the firm, its organizational architecture, transactions costs, markets, pricing, and other managerial issues.

Note: Course offerings are subject to change.

MBA 6050 - Quantitative Methods I

Credits: (3)

Typically Taught Fall Semester: 1st Blk-Online

This class will give students the opportunity to learn how to write, read, and analyze statistical data as it pertains to business and society. The basic premise of this course is to provide the student with an understanding of statistics as it is used in business and economics. This course will give special emphasis to understanding, interpreting and communicating statistics. Topics covered include descriptive statistics, probability, probability distributions, sampling distributions and hypothesis testing.

Pre-requisite(s): Additional course work in College Algebra may be required prior to course registration as per department advisement and student's program of study requirements.

Note: Course offerings subject to change.

MBA 6051 - Quantitative Methods II

Credits: (3)

Typically Taught Fall Semester: 2nd Blk

This course will build on the first foundation course on descriptive statistics by emphasizing inferential statistics. This course will be application oriented and will focus on hypothesis testing and regression analysis. Students will learn how to design a survey and evaluate the data in order to test theories learned in other MBA classes. Students will also learn basic concepts and methods of optimization using elementary concepts in differential calculus.

Additional foundation course work in statistics may be required prior to course registration as per department advisement and student's program of study requirements.

Pre-requisite(s): MBA 6050, or equivalent course in statistics.

Note: Course offerings are subject to change.

MBA 6110 - Fundamentals of Ethical Leadership

Credits: (3)

Typically Taught Summer Semester: 2nd Blk

Typically Taught Fall Semester: 2nd Blk

Typically Taught Spring Semester: 1st Blk

This course is designed to be taken at the beginning of formal course work in the MBA program. Students will explore various aspects of moral reasoning and apply these concepts to common ethical issues faced in business. Students will work individually and in groups to explore issues of personal values, self-awareness, teamwork, communication, managing differences, and career management. Students in this course will be introduced to analytical, communication, and technological tools used throughout the program.

Note: Course offerings are subject to change.

MBA 6120 - Organizational Behavior

Credits: (3)

Typically Taught Fall Semester: 1st Blk

Typically Taught Spring Semester: 1st Blk

This is a course for graduate students who have already been exposed to the principles of management and organizational behavior and who are now seeking a more advanced preparation for the behavioral role of the manager. It offers a critical review of the factors that influence behavior within the organizational setting. Behavioral concepts are emphasized which particularly relate to group dynamics, interpersonal relations, and ultimately, organizational effectiveness. In short, this course deals with the human aspects of management--the kinds of problems most frequently experienced in day-to-day interaction with others. The format will include

discussions, group and individual exercises, case studies, and student reports.

Note: Course offerings are subject to change.

MBA 6130 - Financial Management

Credits: (3)

Typically Taught Fall Semester: *1st Blk*

Typically Taught Spring Semester: *1st Blk*

Financial Management is a detailed presentation of the practices, techniques, and applications of theory in corporate finance. The focus is an understanding of how companies operate and acquire the tools necessary to analyze and evaluate corporate financial policies. Cases and applied research in the form of outside readings will assist students to focus on key issues. The purpose of the course is to assist current and prospective managers in making better investment and financing decisions. The course addresses (1) the investment decision (capital budgeting) as well as (2) the financing decision. Class discussion and cases will focus on capital budgeting and specifically on the establishment of goals, development of strategy, identification of investment opportunities, evaluation of projects, implementation of projects, and the monitoring processes. Shareholder wealth maximization is the standard for determining why one decision is "better" than another. The ethical considerations of wealth maximization will also be addressed. Additional foundation course work in accounting and statistics may be required prior to course registration as per department advisement and student's program of study requirements.

Pre-requisite(s): MBA 6020, MBA 6050 & MBA 6051, or equivalent courses in accounting and statistics.

Note: Course offerings are subject to change.

MBA 6140 - Marketing Management

Credits: (3)

Typically Taught Fall Semester: *1st Blk*

Typically Taught Spring Semester: *2nd Blk*

This course centers on creating customer value profitability in competitive markets. In an integrative fashion, it covers analyzing customer needs and preferences; estimating market potential; assessing market opportunities and threats in view of the focal company's and its competitors' resources and capabilities; developing market and marketing strategies; making astute product, pricing, distribution, and promotion decisions; and measuring marketing performance.

Pedagogical vehicles include lectures, reading assignments, and case-based discussions and reports.

Note: Course offerings are subject to change.

MBA 6150 - Operations/Supply Chain Management

Credits: (3)

Typically Taught Fall Semester: *1st Blk*

Typically Taught Spring Semester: *1st Blk*

"Manufacturing of the future will be required to meet customer-driven demand instantaneously." The future is now! The requirements for faster response, more customer input, and greater product variety have not diminished, but instead have escalated. This course builds upon basic production and operations management knowledge to meet the needs of customers generated in today's global market. It is designed to enhance the student's understanding of how to analyze problems related to design, planning, control, and improvement of manufacturing and service operations. Topics include, but are not limited to, supply chain management, materials management, production planning and control, scheduling, capacity and facilities planning, manufacturing strategy, and global operations. Additional foundation course work in statistics may be required prior to course registration as per department advisement and student's program of study requirements.

Pre-requisite(s): MBA 6050 & MBA 6051, or equivalent courses in statistics.

Note: Course offerings are subject to change.

MBA 6160 - Applications of Decision Models

Credits: (3)

Typically Taught Fall Semester: *2nd Blk*

This course presents a rigorous treatment of quantitative decision-making with emphasis on data collection, analysis, and model building. This course emphasizes experience in structuring realistic business problems, collecting data, developing an appropriate model for analysis, and interpreting and defending results. A number of cases are employed. Additional foundation course work in statistics may be required prior to course registration as per department advisement and student's program of study requirements.

Pre-requisite(s): MBA 6050 & MBA 6051, or equivalent courses in statistics.

Note: Course offerings are subject to change.

MBA 6170 - Corporate Communications

Credits: (3)

The focus of this course is to develop an integrated corporate communications program in organizations which will provide effective communication both to internal and

external stakeholders. Among the topics to be discussed are corporate image and identity, corporate advertising and advocacy, media relations, marketing, communication, financial communication, community relations, corporate philanthropy, government affairs and crisis communication. Attention will also be given to effective communication internally through various methods, such as meetings, programs and publications.

Note: This course is not currently offered.

MBA 6180 - Strategic Management

Credits: (3)

Typically Taught Summer Semester: *1st Blk*

Typically Taught Fall Semester: *2nd Blk*

Typically Taught Spring Semester: *2nd Blk*

This course takes a broad view of the entire organization. In some instances, the organization will have one line of business. In other cases, the organization may be a large diversified corporation with many lines of business. We will examine the strategic issues facing diversified corporations including: vertical integration, diversification into related and unrelated businesses, and operating synergies.

Pre-requisite(s): MBA 6130, MBA 6140, MBA 6150.

Note: Course offerings are subject to change.

MBA 6210 - Management Accounting and Control

Credits: (3)

Typically Taught Fall Semester: *2nd Blk*

Typically Taught Spring Semester: *2nd Blk*

This course is designed to introduce the student to the concepts and procedures of managerial accounting through readings and case studies. The course emphasizes the use of accounting data in the decision-making process by internal decision-makers (e.g., management), rather than external decision-makers (e.g., stockholders, investors, creditors, and regulatory bodies). The course topics include cost terms and concepts, job-order costing, activity-based costing, quality management, cost behavior, cost-volume-profit analysis, profit planning, relevant costs, capital budgeting, cost allocation, and pricing. Additional foundation course work in accounting may be required prior to course registration as per department advisement and student's program of study requirements.

Pre-requisite(s): MBA 6020, or equivalent courses in accounting.

Note: Course offerings are subject to change.

MBA 6260 - Data Visualization Using Tableau

Credits: (3)

Typically Taught Summer Semester: *1st Blk, 2nd Blk*

Typically Taught Fall Semester: *1st Blk, 2nd Blk*

Typically Taught Spring Semester: *1st Blk, 2nd Blk*

This course will provide a solid foundational understanding of data visualization with plenty of opportunities to practice and develop visualization skills. This course aims to provide students with a foundational understanding of data visualization and enable them to think through and interact with big data. The overall goal of the course is to teach problem-solving and analysis skills that can be applied to any type of data with any of the numerous tools available.

MBA 6310 - Information Technology in the Enterprise

Credits: (3)

Typically Taught Summer Semester: *1st Blk*

Typically Taught Fall Semester: *2nd Blk*

Information technology from an enterprise perspective with an orientation toward the management of technology for competitive/ strategic advantage. Managers will be increasingly responsible for making decisions with respect to implementing new technology. This course will provide the background knowledge to enable managers in traditional business units to function as full participants in decisions involving the purchase and application of technology to create a business advantage.

Note: Course offerings are subject to change.

MBA 6360 - Aerospace Program Management

Credits: (3)

Typically Taught Summer Semester: *1st Blk*

Within the context of the aerospace industry, students will be taught how to manage change across multiple projects using program management techniques. In organizations in which multiple strategic initiatives as well as continuous improvement projects are ongoing, understanding how to successfully plan and execute is vital.

Note: Course offerings are subject to change.

MBA 6370 - CPI & Strategy in Aerospace Management

Credits: (3)

Typically Taught Spring Semester: *2nd Blk*

This management course is designed to teach aerospace business managers how to use the tools in Continuous Process Improvement (CPI) to attain and maintain operational excellence. The course includes relevant CPI tools such as Lean, Six Sigma, Theory of Constraints and Benchmarking. The course will also show managers how to conduct a strategic planning session with senior leadership and strategically align their organizations to maximize the use of CPI tools.

Pre-requisite(s): Admission to the MBA Program or approval to seek the stand-alone Graduate Certificate in Aerospace Management. This course is an elective for all MBA students, but is a required course for students seeking the Graduate Certificate in Aerospace Management. Students must complete prerequisites of MBA 6050, 6051 and MBA 6150 prior to registering for this course. Note: Course offerings are subject to change.

MBA 6410 - Global Macroeconomic Conditions

Credits: (3)

Typically Taught Fall Semester: *1st Blk*

Typically Taught Spring Semester: *1st Blk*

This course will focus on the impact of global macroeconomic conditions on firm decision-making. To review and analyze current macroeconomic topics, a theoretical framework is developed, from the start showing the linkages among national economies. This framework is used to analyze and forecast business cycles, interest rates, exchange rates, causes of trade deficits, short- and long-term consequences of fiscal and monetary policy decisions, and the globalization of financial markets. Examples from different countries are used to enhance knowledge of the world economy. Additional foundation course work in economics may be required prior to course registration as per department advisement and student's program of study requirements.

Pre-requisite(s): MBA 6040, or equivalent course in economics.

Note: Course offerings are subject to change.

MBA 6420 - The Economics of Industry

Credits: (3)

This course will focus on the behavior of the individual firm in different market settings, competitive and imperfectly competitive. We are concerned with the strategic behavior of firms under different industry structures as they struggle with the pressures of competition. Students will study how differing levels of the firm's market power impacts pricing and output policies, product differentiation, and barriers to entry. In addition,

the student will learn the basics of game theory and use it to analyze the strategic behavior of firms. Topics will include different types of pricing strategies including price discrimination, pricing of product lines, predatory pricing, peak load pricing, and entry deterrence. Issues of non-price competition such as research and development, information, externalities, moral hazard, and firm structure will also be discussed. The course includes both supplemental readings designed to illustrate real-world applications of the theoretical principles developed as well as in-class experiments in strategic behavior designed to illustrate certain theoretical conclusions. Additional foundation course work in economics may be required prior to course registration as per department advisement and student's program of study requirements.

Pre-requisite(s): MBA 6040, or equivalent course in economics.

Note: This course is not currently offered.

MBA 6430 - International Marketing

Credits: (3)

Typically Taught Spring Semester: *1st Blk*

The course provides foundational knowledge and practical application of international marketing principles and practices so as to prepare participants for entry-level marketing positions in the global context.

Note: Course offerings are subject to change.

MBA 6440 - Strategic Leadership

Credits: (3)

Typically Taught Fall Semester: *1st Blk*

This course will expose students to the strategic nature of leadership. Students will evaluate and discuss key principles and frameworks of leadership through the case method. Students will study leadership styles, situational leadership, personal leadership, and power & influence, as they relate to strategy.

Note: Course offerings are subject to change.

MBA 6450 - Leadership Through People Skills

Credits: (3)

Typically Taught Fall Semester: *1st Blk*

Typically Taught Spring Semester: *1st Blk*

This course will provide a highly applied introduction to the interpersonal dynamics of leading and motivating others. Emphasis will be placed on the development and acquisition of key behaviors, skills, techniques and mental models for influencing others through sound people skills.

By means of hands-on application, role-playing and "learning-by-doing" activities, students will learn to listen for understanding and insight; gain commitment rather than compliance; manage conflict; adapt their style to different people; apply influence skills in all directions; and develop insights into their impact on others.

Note: Course offerings are subject to change.

MBA 6510 - Investment Analysis and Portfolio Management

Credits: (3)

This course engages class participants in a detailed study of the practices, techniques, policies and applications of theory in investments. Emphasis will be on an understanding of security markets, analysis, asset allocation, portfolio management and evaluation. Students will examine and apply investment tools and evaluate financial policies. Cases and applied research in the form of outside readings will assist students to focus on key issues and current topics. Course work in finance may be required prior to course registration as per department advisement and student's program of study requirements.

Pre-requisite(s): MBA 6130.

Note: This course is not currently offered.

MBA 6520 - International Business Field Studies

Credits: (3)

Typically Taught Summer Semester: *1st Blk*

This course integrates international travel and site visits with the study of international business topics. Through readings, assignments, discussions, and visits to important business and cultural sites in the destination countries, the course builds understanding and competence in international business practices and managing across cultures. This course entails travel expenses beyond regular tuition and may be repeated when offered to a different world region.

May be repeated 3 times with a maximum of 9 credit hours.

Note: Course offerings are subject to change.

MBA 6530 - E-Business

Credits: (3)

Typically Taught Spring Semester: *2nd Blk*

The Internet has become an important influence in the world. Business on the internet, in terms of operations, marketing, security, etc., has increased concomitantly in influence. This course will provide a foundation for understanding the possibilities and potential pitfalls for

doing e-business.

Note: Course offerings are subject to change.

MBA 6540 - Negotiations

Credits: (3)

Typically Taught Summer Semester: *1st Blk*

The purpose of this course is to provide opportunities for class participants to develop their negotiating abilities for use in organizational and other settings. The course is premised on the assumption that negotiating concepts are best learned through practice which is grounded in rigorous analysis and reflection. While theoretical principles and concepts from various reference disciplines (such as social psychology, sociology, and economics) will be presented through lectures and readings, this course will focus primarily on improving practical skills. Class participants will not only learn to enhance their individual abilities in dyadic and group situations, but also to analyze contexts for the most effective application of these skills.

Note: Course offerings are subject to change.

MBA 6550 - Managing and Improving Quality

Credits: (3)

This course examines how organizations can gain competitive advantage by improving the quality and productivity of their business processes, manufactured goods and service outputs. Customer-focused approaches for designing, controlling and improving processes are emphasized, together with other concepts and approaches of quality management. Specific topics include process analysis, problem-solving methods, variability and statistical process control, performance measurement, and quality management systems. Guest lectures from industry professionals, experiential learning exercises and cases from manufacturing and service industries will assist students in understanding key issues and current topics.

Pre-requisite(s): MBA 6050 & MBA 6051, or equivalent courses in statistics.

Note: Courses offered as needed.

MBA 6560 - Business/Market Planning Using Online Resources

Credits: (3)

In this hands-on project-oriented course, students learn to (1) develop and write effective business/marketing plans and (2) use online resources to gather pertinent market, competitor, and environmental information. Students may develop a business/marketing plan for an existing business

or for a potential start-up of interest to them. Alternatively, they may write a business/marketing plan and conduct requisite research and data analyses for a business suggested by the course instructor. Learning is facilitated primarily via practical discovery exercises, an extensive term project, and coaching.

Although lectures and reading assignments serve to convey essential background knowledge, especially during the first half of the course, much class time is devoted to working on plans in teams under the instructor's guidance.

Note: This course is not currently offered.

MBA 6580 - Project Management

Credits: (3)

Typically Taught Spring Semester: *1st Blk*

This course is a study of topics involved with managing projects. It examines the roles and skills of the project manager and the project office. Students will study the phases of the project life cycle, specifically the activities, requirements, methodologies, and tools common in project management.

Note: Course offerings are subject to change.

MBA 6590 - Strategic Business Tax Planning

Credits: (3)

This course examines tax strategy and planning topics related to making important business decisions. The course addresses business formations, operations, terminations, reorganizations, acquisitions, and divisions. The course also covers tax issues related to multi-state and multi-national business transactions. Unique issues related to executive compensation, partnerships, limited liability companies, S corporations and C corporations are also addressed.

Pre-requisite(s): MBA 6010 or equivalent course in business law; MBA 6020 or equivalent courses in accounting.

Note: This course is not currently offered.

MBA 6620 - Data Mining for Business

Credits: (3)

Typically Taught Fall Semester: *Full Sem, 1st Blk, 2nd Blk*

Typically Taught Spring Semester: *Full Sem, 1st Blk, 2nd Blk*

The broad availability of data, either within organization or about market trends, has led to increasing interest in the methods for extracting useful information and knowledge from

data. This course will change the way you think about data and its role in organization. We will examine how data mining technologies can be used to improve decision-making. We will study the principles and techniques of data mining, and we will examine real-world examples and cases to place data-mining techniques in context, to develop data-analytic thinking, and to illustrate that proper application is as much an art as it is a science.

Pre-requisite(s): MBA 6050 & MBA 6051 or equivalent courses in statistics or instructor approval.

MBA 6630 - Networking

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course covers the role of networking technology in information systems. Through hands-on and conceptual knowledge, students will learn how data communications and networks are used to facilitate decentralized and distributed systems in support of decision making. Various aspects of networking including standards, media, network design and applications will be covered. Students will gain hands-on familiarity with a local area network and the Internet.

Pre-requisite(s): Admittance to MACC, MBA or MHA program.

Note: Course offerings are subject to change.

MBA 6640 - Cyber Security

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course covers the basic principles and concepts in information assurance. It examines the managerial, operational, and organizational issues of securing information systems. Topics include legal and ethical issues in computer security; privacy concerns; malware; security awareness at the executive, technical and user levels; physical security, personnel security issues; policies and procedures; the need for enterprise security awareness; and the need for an enterprise security organization. Case studies and exercises in the computer lab will be used to provide examples of the need for organizations to develop security procedures and policies.

Pre-requisite(s): Admittance to MACC, MBA or MHA program.

Note: Course offerings are subject to change.

MBA 6650 - Penetration Testing

Credits: (3)

Typically Taught Summer Semester: *Full Sem, 1st Blk, 2nd Blk*

This course looks at how penetration testing can help improve information security within organizations. This course will discuss issues related to ethical hacking, scanning, enumeration, systems hacking, social engineering, malware, vulnerability analysis, session hijacking, denial of service attacks, Web attacks, IDS, cryptographic attacks, and IoT vulnerabilities.

Pre-requisite(s): MBA 6640 or instructor approval.

MBA 6660 - Forecasting and Time Series

Credits: (3)

Typically Taught Spring Semester: *Full Sem, 1st Blk, 2nd Blk*

This course is intended to provide students with applied interest with up to date techniques used in the forecasting of time series. These techniques will be motivated by specific practical problems and will be used in forecasting practices. Although the flavor of this course will be mainly applied, we will need to review and develop some technical background. The emphasis of the class is on practical application and computer implementation.

Pre-requisite(s): MBA 6050 & MBA 6051 or equivalent courses in statistics or instructor approval.

MBA 6670 - Cloud Computing

Credits: (3)

Typically Taught Fall Semester: *Full Sem, 1st Blk, 2nd Blk*

Cloud computing is widely used by nearly all organizations to store and process data, host applications, and scale growth effectively. This course will look at how cloud providers (AWS) operate. It will also discuss issues related to security, maintenance, scalability, cost effectiveness, service models, architecture, and deployment models.

MBA 6680 - Graduate Consulting Project

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Graduate students are given the opportunity to consult with an existing organization, make recommendations for improvements, and assist in implementing changes in the organization. Students meet periodically with supervising faculty to review results.

Pre-requisite(s): Instructor approval.

Note: Course offerings are subject to change.

MBA 6700 - Managing for Sustainability

Credits: (3)

This course explores how business organizations can address environmental issues to meet societal needs and create competitive advantages. Emphasis is placed on understanding the impacts of businesses on the natural environment; identifying the opportunities for businesses to align their strategies and practices toward more sustainable business models; and using various methods and tools for measuring and improving the environmental performance of individual business organizations and the business system as a whole. Major topics include frameworks for understanding business and environmental sustainability; innovation, design and assessment of green products/services; green marketing issues; green purchasing; environmental management systems; operations and supply chain management issues for environmental sustainability.

Pre-requisite(s): Admission to MBA program; or graduate standing with permission of the MBA program.

Note: This course is not currently offered.

MBA 6710 - Accounting and Finance for Environmental Sustainability

Credits: (3)

This course will expose MBA students to contemporary accounting and finance thought on environmental sustainability. The course will be divided into accounting and finance modules. The focus of the accounting module will include measurement and reporting of the environmental sustainability of business practices. The focus of the finance module will include capital budgeting for sustainability, financial assessment of sustainable business practices, and investing in environmental sustainability.

Note: This course is not currently offered.

MBA 6715 - Sustainability Tools and Methods

Credits: (3)

This hybrid 8-week course consists of weekly modules, each of which addresses key aspects of sustainability-related business practices. Weekly topics are designed to explore in more depth specific sustainability-related tools and methods as they relate and add value to various aspects of business operations, including finance, accounting,

supply chain management, information technology, stakeholder relations, and strategic planning. Secondly, students will gain an overview of the tools, techniques and bodies of knowledge through which they may pursue sustainability-related projects or entrepreneurship within their organizations. The course will utilize sustainability practitioners and subject-matter experts from a variety of organizational backgrounds.

Pre-requisite(s): MBA 6700; Admission to the MBA Program or Graduate Certificate in Sustainability in Business.

Note: This course is not currently offered.

MBA 6720 - Business, Economics, and the Environment

Credits: (3)

Environmental economics considers the efficient and equitable use of society's scarce environmental resources. Environmental resources include air, water, land, wildlife, biodiversity, and ecological systems. The allocation of environmental resources will be considered from different perspectives: (1) market allocations; (2) efficient allocations; (3) equitable allocations; and (4) government attempts to allocate these resources efficiently. Topics of the course include property rights, market failures, benefit-cost analysis, welfare economics, non-market valuation, environmental regulation, and sustainable development and business practices. Emphasis will be placed on the impacts on the firm resulting from environmental problems and regulations; and on sustainable business practices.

Pre-requisite(s): MBA 6040, MBA 6051 or equivalent.

Note: This course is not currently offered.

MBA 6730 - Consulting Project in Sustainability

Credits: (3)

Graduate students are given the opportunity to consult with an existing organization, evaluate sustainable business practices, make recommendations for improvements, and assist in implementing changes in the organization. Students meet periodically with supervising faculty to review results.

Pre-requisite(s): Instructor approval and MBA 6700, MBA 6710, and MBA 6720.

Note: This course is not currently offered.

MBA 6740 - Principles of Contract Management

Credits: (3)

Typically Taught Summer Semester: 2nd Blk

Students will gain an overview of the fundamentals of contract management from the development of acquisition requirements, solicitation/proposal, negotiation, contract formation, contract performance, and contract closeout. Learn the basics of what it takes to solicit, procure, negotiate and administer contracts and subcontracts while gaining a broad understanding of business principles to establish long-term relationships with customers, suppliers and other stakeholders. Explore an insider's view of the roles and responsibilities of contract administrators and the various interfaces with program management and other internal disciplines. Learn how to identify the basic differences between contract types and how they are selected to mitigate risk in a contractual environment, as well as exploring the key distinctions between commercial, government and international contracting processes.

Note: Course offerings are subject to change.

MBA 6750 - Financial Aspects of Contract Management

Credits: (3)

Typically Taught Fall Semester: 1st Blk

Within the context of contract management, students will learn how to structure cash flow through financial methods that include invoice timing, pricing, overhead considerations, advance payments, letters of credit and other financial sources. Gain a comprehensive knowledge of accounting systems, budgeting, reporting, auditing and settlements. Enhance the profitability of your business through prudent contracting financial practices.

Note: Course offerings are subject to change.

MBA 6760 - Legal Aspects of Contract Management

Credits: (3)

Typically Taught Fall Semester: 2nd Blk

Within the context of contract management, students will gain a working knowledge of stakeholder requirements, applicable common law, Federal Acquisition Regulations (FAR), Uniform Commercial Code (UCC) and other local, state and federal regulations and law that must be adhered to throughout the contract management process. Students will learn the legal aspects of contract management with an emphasis on real world, day-to-day application. Students will explore all phases of managing an approved contract successfully through completion of performance including change management, communications, negotiations, contract types, terms and conditions, risks, defaults,

terminations, claims and much more. Students will participate in projects and discussions to rapidly enhance knowledge and proficiency in contract management in order to apply classroom concepts in the workplace.
Note: Course offerings are subject to change.

MBA 6800 - Directed Study

Credits: (1-3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Directed individual study and research on special topics related to business.

Pre-requisite(s): Written approval of MBA program and instructor.

May be repeated for a cumulative total of three credits.

Note: Course offerings are subject to change.

MBA 6810 - Data Analytics for Managers

Credits: (3)

Experimental Course, Contact Department for More Information

This course will provide students with a solid foundation for understanding several data analysis tools through learning experiences in real business situations. This course will help students develop skills with several of the market leading data analytic tools.

MBA 6810 - Highly Successful Business Executives Understand How to Sell

Credits: (3)

Experimental Course, Contact Department for More Information

Within the context of business, MBA students will be taught selling principles and practices that are relevant for executives to achieve success. Topics include world-class selling fundamentals and practices; sales strategy; marketing strategy; routes to markets and channels; building a sales organization and managing performance of the sales team.

MBA 6850 - Business Development and Entrepreneurship

Credits: (3)

Typically Taught Summer Semester: *2nd Blk*

Students will learn how to effectively come up with an idea, iterate around that idea, and validate customers

around their final direction so that they can learn how to successfully launch an idea into a business with low risk, low capital, and higher degrees for success. In addition, if a student is interested in learning how to be a better "intrapreneur" this course will help them use some of these same skills in a corporate or employee environment. Being innovative and creative is always valuable.

Note: Course offerings are subject to change.

MBA 6870 - Sales Strategy & Management

Credits: (3)

Typically Taught Summer Semester: *1st Blk, 2nd Blk*

This course looks at advanced selling techniques or the skills that make a salesperson and/or business leader successful in large or complex sales. These sales differ from the simple sales because they involve high-value goods or services, a sophisticated customer or business executive, and there is a continuing relationship after the sale. This course will build managerial relationship-selling skills that can be used in many settings.

MBA 6890 - MBA Internship

Credits: (1-3)

Typically Taught Summer Semester: *Full Sem - Online*

Typically Taught Fall Semester: *Full Sem - Online*

Typically Taught Spring Semester: *Full Sem - Online*

The Master's of Business Administration offers MBA students the opportunity to earn 1 to 3 elective credits for a work internship.

Pre-requisite(s):

For requirements and guidelines, contact the MBA office. May be repeated three times for a maximum of three credit hours.

MBA 6920 - Short Courses, Workshops, Institutes and Special Programs

Credits: (1-3)

Variable Title

Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript.

MCJ 6000 - Criminal Justice Statistics

Credits: (3)

Typically Taught Fall Semester: *Full Sem-Online*

Typically Taught Spring Semester: *Full Sem-Online*

Criminal Justice Statistics is a focus on the role of data collection and analysis in formal, empirical research projects. The course begins with a review of statistical applications including measures of central tendency, dispersion, and hypothesis testing. The course concludes with an examination of more complex analytical tools such as MANOVA, Factor Analysis, Path Analysis, and Logistical Regression. Students will review various styles of multivariate analysis in peer-reviewed scholarly literature as well as use computing resources to conduct their own multivariate analysis of a criminal justice dataset.

MCJ 6100 - Contemporary Criminal Justice

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Course provides an analysis of the policies and practices of agencies of the criminal justice system including the police, prosecution, courts and corrections. Additionally, the latest technology and developments in the field of criminal justice will be addressed.

MCJ 6110 - Research Methods in Criminal Justice

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Course teaches quantitative and qualitative research design, data collection and analysis techniques, and research presentation and dissemination methods. Descriptive and inferential statistics will be covered as well as basic computer applications in criminal justice.

MCJ 6120 - Theories of Crime and Delinquency

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Course focuses on a review of classical and current theories of criminology and delinquency and the underlying assumptions of each. Advancements in profiling and classification as well as other applications of theoretical models will be studied.

MCJ 6130 - Law and Social Control

Credits: (3)

Typically Taught Spring Semester: *Full Sem-Online*

Course focuses on the nature of law and legal institutions and the relationships between law and social control.

Concepts of law and justice from the perspectives of its effects on the American criminal justice system will be investigated as well as the public policy concerns of laws and their relationship to our society.

MCJ 6140 - Technology and Innovation in Criminal Justice

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Course explores the latest developments in technology and innovations in criminal justice. Included will be current developments in forensic science, i.e. DNA and the use of computer applications in criminal justice. Specific topics will be adjusted as new technologies arrive. Emphasis will be on impact and management rather than the strict science of the protocols.

MCJ 6150 - Diversity Issues in Criminal Justice

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

Course will sensitize and educate criminal justice professionals to issues of diversity. It explores the cross-cultural contact that criminal justice professionals have with citizens, victims, suspects, and co-workers, and the influence of culture, race and gender in the criminal justice field.

MCJ 6160 - Criminal Justice Policy Analysis

Credits: (3)

Typically Taught Summer Semester: *Full Sem Online*

Typically Taught Fall Semester: *Full Sem Online*

Typically Taught Spring Semester: *Full Sem Online*

Course focuses on crime as a political issue and examines how conflicting political philosophies influence criminal justice policy. Emphasis will be placed on how decisions in politics affect criminal justice organizations and how these decisions can be influenced by executive managers.

MCJ 6170 - Juvenile Justice & Delinquency

Credits: (3)

Typically Taught Summer Semester: *Full Sem Online*

Typically Taught Fall Semester: *Full Sem Online*

Typically Taught Spring Semester: *Full Sem Online*

Course examines the origins and development of the

juvenile justice system with particular emphasis on the current policies and practices of the agencies which process young offenders through the juvenile system. Course examines a variety of political initiatives designed to reduce the jurisdiction of the juvenile court, enhance the due process rights of juveniles, and create a more punitive approach in the juvenile justice system.

MCJ 6180 - Contemporary Legal Issues

Credits: (3)

Typically Taught Summer Semester: *Full Sem Online*

Typically Taught Fall Semester: *Full Sem Online*

Typically Taught Spring Semester: *Full Sem Online*

This course exposes students to current law impacting criminal justice professionals. Topics will change depending upon current legal developments, but will include the general areas of corrections, law enforcement, employment, civil liability and criminal procedure.

MCJ 6190 - Legal Foundations of Criminal Justice

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Broad survey of foundational legal topics relevant to criminal justice, including: criminal law, search and seizure, bail, right to counsel, self-incrimination, lineups, responsibilities of courtroom legal actors, speedy trial, impartial jury, plea bargaining, double jeopardy, sentencing law, inmate rights, juvenile law, death penalty law, and basic rules of evidence.

MCJ 6200 - Advanced Victimology

Credits: (3)

Typically Taught Summer Semester: *Full Sem Online*

Typically Taught Fall Semester: *Full Sem Online*

Typically Taught Spring Semester: *Full Sem Online*

This is a graduate-level seminar designed to provide an overview of key research areas in victimology. Particular emphasis will be placed on theory, measurement, and empirical results related to different types, consequences, and prevention of victimization.

MCJ 6210 - Judicial Administration

Credits: (3)

Typically Taught Summer Semester: *Full Sem Online*

Typically Taught Fall Semester: *Full Sem Online*

Typically Taught Spring Semester: *Full Sem Online*

Course exposes students to the dynamics of the American

criminal courthouse. Students will examine how defense attorneys, defendants, prosecutors, judges, juries and others interact and contribute to America's version of criminal case disposition. Course also examines the mechanics of criminal case processing, as well as how the court system is supposed to work, how it really does work, and the implications for American democracy.

MCJ 6220 - Contemporary Law Enforcement

Credits: (3)

Typically Taught Summer Semester: *Full Sem Online*

Typically Taught Fall Semester: *Full Sem Online*

Typically Taught Spring Semester: *Full Sem Online*

From the response and investigation of crimes committed, to the theory and practice involved in crime prevention, this course studies the development, theory, history and contemporary organizational structure of America's law enforcement organizations.

MCJ 6230 - Contemporary Corrections

Credits: (3)

Typically Taught Summer Semester: *Full Sem Online*

Typically Taught Fall Semester: *Full Sem Online*

Typically Taught Spring Semester: *Full Sem Online*

Course provides an analysis of critical problems confronting contemporary adult corrections agencies. Course examines the problems of institutions, the affect of judicial intervention in corrections, alternatives to incarceration, and the political milieu in which this occurs.

MCJ 6250 - Topics in Criminal Justice

Credits: (1-3)

Variable Title

Typically Taught Summer Semester: *Online*

Typically Taught Fall Semester: *Online*

Typically Taught Spring Semester: *Online*

Course focuses on a special issue or topic in criminal justice. A new topic/issue will be selected each time the course is offered.

May be repeated with a maximum of 10 credit hours.

MCJ 6255 - Great Thoughts in Criminal Justice

Credits: (3)

Typically Taught Fall Semester: *Full Sem-Online*

This course explores the broader context of criminal justice

studies and concepts through the writings of significant authors and thinkers. Readings will focus on subjects such as justice, punishment, law and social control. Students will be expected to read extensively and participate in analysis and discussion.

MCJ 6260 - Graduate Readings

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course allows the student to examine the scholarly literature on a subject of special interest under the supervision of faculty. Reading list and accompanying assignments must be approved by the supervising faculty member. Periodic progress meetings will be scheduled throughout the semester.

May be repeated once with a maximum of 6 credit hours.

MCJ 6810 - Crime and Media

Credits: (3)

Experimental

This class uses a combination of criminal justice, sociology, and cultural studies to guide students as they examine the relationship between broad media (including social, movies, television, and music), and crime. Students will become familiar with the theoretical lenses used to assess media effects and cultural criminology. Crime and media construction, image, moral panics, and the impact of the internet on crime and deviance will also be explored. This class will allow students to better understand the following questions: If I watch a behavior on television will I act that way in real life? Are the crime statistics the news shares accurate? How are stereotypes perpetuated in movies?

MCJ 6810 - Ethics in Criminal Justice

Credits: (3)

Experimental Course, Contact Department for More Information

Course provides an overview of the ethical issues and dilemmas affecting the modern American Criminal Justice System. In addition, the processes used to investigate and punish ethical violations among criminal justice professionals will be addressed.

MCJ 6810 - Experimental Course

Credits: (1-3)

Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript. Refer to Experimental Courses.

May be repeated 5 times with a maximum of 6 credit hours.

Note: This course is offered as needed.

MCJ 6810 - Punishment and Society

Credits: (3)

Experimental

This class examines the use of punishment in historic and modern society. It will specifically review evolution of punishment, the purposes of punishment, and specific types of punishment. This class will explore critical questions related to societal perspectives of punishment, and will allow students to explore: What is the best way to punish criminals? When did we stop using corporal punishment? What is life in prison like for offenders? Why do/don't we use the death penalty?

MCJ 6920 - Workshops and Conference

Credits: (1-3)

Variable Title

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript.

May be repeated 5 times with a maximum of 6 credit hours.

ME 3040 - Dynamic System Modeling

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Fundamentals of analysis, design and control of physical engineering systems. Analytical and numerical modeling of mechanical, electrical, fluid and thermal systems with applications.

Pre-requisite(s): MATH 2250 and ENGR 2080.

ME 3050 - Machine Design

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Design and analysis of machine elements and machines. Material selection, connections and joints, shafts and bearings, fits and tolerances, fasteners, material failure and reliability.

Pre-requisite(s): ENGR 2080 and ENGR 2140.

ME 3060 - Sensors, Instrumentation and Control Systems

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

Fundamental principles of sensors for the measurement of physical quantities. Instrumentation for processing the inputs and outputs of sensor signals. Control of mechanical, electrical and thermal systems. Lecture plus laboratory.

Pre-requisite(s): ME 3040 and ME 3050.

ME 3300 - Fluid Mechanics

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Fundamental principles of fluid statics and dynamics. Fluid properties, flow regimes, pressure, velocity, flow rate, internal and external flow, and dimensional analysis. Applications of fluid mechanics. Lecture plus laboratory.

Pre-requisite(s): MATH 1220, ENGR 2080 and ENGR 2300.

ME 3350 - Engineering Computing

Credits: (2)

Typically Taught Fall Semester: *Full Sem*

Introduction to engineering computing with applications to the analysis and design of engineering systems using an industry-standard software platform.

Pre-requisite(s): MATH 2250.

ME 3500 - Numerical Methods for Engineering

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

Fundamental methods for the numerical solution of engineering problems. Topics include root finding, interpolation, curve fitting, differentiation, integration, differential equations and curve fitting.

Pre-requisite(s): ME 3040 and ME 3350.

ME 4000 - Heat Transfer

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

Fundamental principles of conduction, convection and radiation. Heat transfer with phase change, heat exchangers, and applications of heat transfer. Lecture plus

laboratory.

Pre-requisite(s): MATH 2250 or MATH 2280 and ME 3300.

ME 4100 - Senior Project I

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

A mechanical engineering project will be selected for team participation. Team assignments will lead to the completion of a preliminary design phase which includes concept generation, engineering analysis and design, prototype testing, and preliminary economic analyses. Senior Project I culminates in a preliminary design review based on formal student presentations of documented engineering drawings of the proposed design.

Pre-requisite(s): Departmental permission.

ME 4150 - Vibrations

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Fundamental principles of free and forced vibrations of discrete linear systems with and without damping. Multiple-degree-of freedom systems, continuous systems, shock isolation and vibration control.

Pre-requisite(s): MATH 2250 and ENGR 2080.

ME 4200 - Senior Project II

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

Continuation of ME 4100. Team assignments will lead to the construction, testing and optimization of the design. This includes detailed engineering analysis and testing of prototypes, final parameter and tolerance design, and economic analysis of the project. Senior Project II culminates in a final design review based on formal student presentations of the documented final product and verification that the final product meets all requirements.

Pre-requisite(s): ME 4100.

ME 4250 - Finite Element Analysis

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Introduction to the finite element method. Survey of FEA theory, including element formulation, stiffness matrix operations, shape functions, etc. Application and use of commercial FEA software for engineering design and analysis.

Pre-requisite(s): MATH 2250 and ME 3050.

ME 4300 - Material Failure Analysis

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

A survey of material failure modes, including fatigue, fracture, wear and corrosion. Introduction to damage tolerant design methodologies. Case studies in material failure.

Pre-requisite(s): ENGR 2160 and ME 3050.

ME 4350 - Advanced Mechanics of Materials

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Advanced topics in mechanics of materials such as three-dimensional combined stress fields, stress concentrations, dynamic loads, torsion of non-circular members, plates and shells, stability and buckling of columns, and energy methods.

Pre-requisite(s): ENGR 2140.

ME 4400 - Aerodynamics

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

Airfoil theory, lifting bodies, boundary layers, lift and drag, compressible aerodynamics.

Pre-requisite(s): ME 3300.

ME 4440 - Compressible Fluid Flow

Credits: (3)

Typically Taught Summer Semester: *NA*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Fundamentals of compressible fluid flow. Normal shock waves, Fanno flow and Rayleigh flow. Two-dimensional supersonic flows with oblique shocks and Prandtl-Meyer expansion fans. Compressible flow in nozzles and supersonic wind tunnels.

Pre-requisite(s): ME 3300 and ME 4000.

ME 4450 - Aerospace Propulsion

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

Design and analysis of gas turbine engines and rocket motors. Liquid and solid fuel propulsion systems. Thermodynamics of flow associated with aerospace propulsion systems. Introduction to fuel combustion

processes.

Pre-requisite(s): ME 4440.

ME 4500 - Heating, Ventilating and Air-Conditioning

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

Principles of heating, ventilating and air-conditioning (HVAC) of buildings. Refrigeration systems and indoor thermal environmental control system analysis and design.

Pre-requisite(s): ME 4000.

ME 4550 - Robotics

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

The mechanics and dynamics of robots. Kinematics, kinetics and trajectories of motion. Instrumentation, sensors and control system theory of robotic systems. Programming of robotic systems. Human/robot interfaces and safety.

Pre-requisite(s): ME 3040.

ME 4600 - Advanced Thermal-Fluids

Credits: (3)

Typically Taught Summer Semester: *NA*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Advanced topics in thermal-fluid sciences built upon knowledge from thermodynamics, fluid mechanics and heat transfer. Topics include thermodynamic cycles, psychrometrics, piping systems, boundary layers, heat transfer with phase change, radiation, and thermal design. Lecture plus laboratory.

Pre-requisite(s): ME 4000.

ME 4800 - Individual Research Problems

Credits: (1-3)

Typically Taught Spring Semester: *Full Sem*

With permission and under the direction of faculty, the student researches a specific problem in the mechanical engineering field.

Pre-requisite(s): Permission of department.

ME 4830 - Readings in Mechanical Engineering

Credits: (1-3)

Typically Taught Spring Semester: *Full Sem*

With permission and under the direction of faculty, the student studies a topic taken from the mechanical engineering literature.

Pre-requisite(s): Permission of department.

ME 4890 - Cooperative Work Experience

Credits: (1-3)

Typically Taught Spring Semester: *Full Sem*

Provides academic credit for engineering work experience. Permission of department required.

Pre-requisite(s): Permission of department.

ME 4900 - Special Topics

Credits: (1-3)

Variable Title

Typically Taught Spring Semester: *Full Sem*

A special topic in mechanical engineering is selected by the faculty to be taught on a one-time basis. With departmental approval, may substitute for a technical elective.

Pre-requisite(s): Permission of department.

ME 4920 - Short Courses, Workshops, Institutes and Special Programs

Credits: (1-3)

Variable Title

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Academic credit for attendance at short courses, workshops, seminars, special training, etc.

Pre-requisite(s): Permission of department.

ME 4990 - Seminar in Mechanical Engineering

Credits: (1)

Typically Taught Spring Semester: *Full Sem*

Seminar is designed to prepare the student for professional engineering employment. Topics include resumes, interviewing techniques, engineering ethics, professionalism, patent law, social issues, lifelong learning, diversity, communication, timeliness, and continuous improvement. Lectures and presentations by faculty, staff,

and guests from local engineering industry.

Pre-requisite(s): ME 4100.

MED 6000 - Fundamentals of Graduate Study

Credits: (2)

Typically Taught Fall Semester: *1st Blk*

This course serves as an introduction to the MED program and to scholarship in education. Students will draw from diverse fields of educational inquiry (e.g. psychology, sociology, philosophy, history) to develop and present critically informed perspectives on current topics in P16 education. Multiple approaches to scholarly writing will be addressed.

MED 6010 - Advanced Historical Foundations

Credits: (2)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Study of the relationship of contemporary schooling issues to historical practices and philosophies.

MED 6020 - Diversity in Education

Credits: (2)

Typically Taught Summer Semester: *1st Blk*

Typically Taught Fall Semester: *1st Blk*

Typically Taught Spring Semester: *1st Blk*

This course is designed to integrate classical and contemporary education theory and practice as a way to understand the nature and scope of how equity manifests itself in an ever-changing society. Students will apply their understanding of equity in education as they critically reflect, empirically investigate, and apply their knowledge as skillful transformative educational leaders.

MED 6030 - Advanced Educational Psychology

Credits: (2)

Typically Taught Fall Semester: *2nd Blk*

Typically Taught Spring Semester: *1st Blk*

This course is designed to provide an in-depth understanding of behavioral, cognitive and brain based psychological theories. The focus will be how this knowledge can impact and inform educational decisions and practices.

MED 6040 - Politics, Policy, and Practices of Education

Credits: (2)

Typically Taught Summer Semester: *1st Blk*

Typically Taught Spring Semester: *2nd Blk*

This course explores interactions among the relationship of political actions, policies, and practices in education, with particular attention to sociological concepts such as institutions, civil society, structure and agency, shared governance, neoliberal capitalism, and equal access. that develop from those actions, and the educational practices implemented in response to policy.

MED 6050 - Curriculum Design, Evaluation & Assessment

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

An overview of the theories of curriculum development as well as a practical appraisal of curriculum design, implementation, evaluation and assessment.

Pre-requisite(s): (Recommended) MED 6080.

MED 6055 - Curriculum Theory

Credits: (2)

Typically Taught Fall Semester: *2nd Blk*

This course will focus on advancing students' understanding of the historical and contemporary theoretical underpinnings of curriculum development in the United States. In exploring these issues, students will gain a broad perspective of curriculum, recognize historical orientations of curricular theories, and investigate the societal consequences of the implementation of individual curricular frameworks.

MED 6060 - Instructional Strategies

Credits: (2)

Typically Taught Summer Semester: *1st Blk*

Typically Taught Fall Semester: *1st Blk*

Typically Taught Spring Semester: *2nd Blk*

This methods course will include organizing and universal teaching strategies that can accommodate the variety of

learning contexts and content that is taught to a diverse audience of learners.

Pre-requisite(s): (Recommended) MED 6080.

MED 6065 - Assessment and Informed Decisions in the Classroom

Credits: (2)

Typically Taught Spring Semester: *1st Blk*

This course explores making ethical and practical decisions in the classroom informed by a variety quantitative and qualitative data as well as formal and informal assessments relative to students' safety, academic achievement, and overall well-being.

MED 6080 - Conducting Educational Research

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Students learn to locate and interpret educational research, and to apply research methods to their own education issues.

Pre-requisite(s): MED 6000.

Note: (Only taught fall and spring)

MED 6082 - Educational Inquiry

Credits: (2)

Typically Taught Fall Semester: *1st Blk*

This course is a comprehensive exploration of the ways that researchers answer questions and solve problems in education based on historical, philosophical, sociological, and psychological foundations. Additionally, this course examines the epistemic limits of any method of research representation and the political and ethical implications of those limits for researchers. Students will conduct a literature review to advance their research project.

Pre-requisite(s): MED 6000.

MED 6085 - Developing a Project Proposal

Credits: (2)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course is designed to help students develop a Master's project proposal that is carefully researched and professionally written.

Pre-requisite(s): MED 6082.

MED 6090 - Master's Project

Credits: (2)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

The student independently works with the project chair and committee to complete the master's project.

Pre-requisite(s): MED 6085 or MED 6150.

MED 6091 - Graduate Synthesis

Credits: (1)

Typically Taught Summer Semester: *2nd Blk*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A review and synthesis of the program and its course work. The course includes opportunity to work with the development of personal portfolios.

Pre-requisite(s): All core requirements completed; Master's Project Proposal committee-approved, and Master's Project Report completed or in progress. Student must have a signed proposal and program approval to register. Prerequisite: MED 6085.

MED 6100 - Leadership and Organizational Theory

Credits: (2)

Typically Taught Summer Semester: *2nd Blk*

Typically Taught Fall Semester: *1st Blk*

This course focuses on the multiple facets of organizational cultures, leadership styles, and organizational change for educational leaders. Students will examine how organizational theory is applied in the educational setting.

MED 6101 - Assessment and Program Evaluation

Credits: (3)

Typically Taught Summer Semester: *2nd Blk*

Typically Taught Spring Semester: *1st Blk*

This course will provide an overview of planning and decision making including assessment, strategic planning, and program evaluation and review processes. Concepts will include the gathering and use of data as well as the utilization of that data in the decision making process.

MED 6102 - Public Education Finance

Credits: (3)

Typically Taught Spring Semester: *2nd Blk*

This course will examine the economics and financing of public and higher education. Course topics will include an exploration of the different funding pools and regulations for both public and higher education as well as the economic and political forces driving these concepts and processes.

MED 6110 - Introduction to Classroom Management

Credits: (3)

Typically Taught Summer Semester: *2nd Blk*

Typically Taught Spring Semester: *Full Sem*

This course serves as an introduction to classroom management for those who have not had classroom experience or have been hired by a school district on a "letter of authorization," (hired without a license). The focus will be on current issues, methodology, and application of a variety of approaches for behavior change, discipline, and management of diverse learners in the context of classroom environments. Classroom management as a function of good teaching will be examined.

Note: This course or MED 6120 is required for licensure.

MED 6120 - Advanced Classroom Management

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Eclectic review of the popular teacher-pupil interaction models as they are classified into ideological camps and effect, and management and strategies for the classroom. May be repeated up to four times.

Note: This course or MED 6110 is required for licensure.

MED 6130 - Topic in Education: (i.e., School Finance, Cooperative Learning, TRIBES, Teaching for Inquiry, etc.)

Credits: (1-3)

Typically Taught Summer Semester: *1st Blk*

This course explores a topic receiving current attention by educators and the public and deemed worthy of in-depth study. Credit will be determined by the nature of the topic. May be repeated up to four times.

MED 6140 - Adolescent Development

Credits: (2)

Study of physical, mental, social, and psychological characteristics of adolescents, their needs and problems, and methods of working with those who have behavior problems.

MED 6150 - Classroom- and School-Based Research

Credits: (2)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Students will explore effective classroom-based research techniques, complete classroom-based research projects, and engage in ongoing application of action research for the improvement of teaching practice.

Pre-requisite(s): MED 6082, MED 6055, MED 6060.
May be repeated up to three times.

MED 6160 - Effective Mentoring in the Classroom

Credits: (2)

Course will cover strategies for effectively mentoring student teachers and novice teachers by expert teachers. Expectations for the course include journal keeping, writing assignments, and mentoring project.

MED 6180 - Teaching Interpersonal Skills

Credits: (2)

Typically Taught Fall Semester: *Full Sem*

Study and application of interpersonal skills leading to the application and teaching of selected techniques and systems in the classroom.

MED 6200 - Current Trends in Early Childhood Education

Credits: (3)

variable title

A variable title advanced course in Early Childhood

Education (birth through age eight) based upon examination of the current trends in curriculum and instruction for young children. When this number is used it will be accompanied by a brief and specific descriptive title, i.e. literacy, math, science.

May be repeated 2 times up to 9 credit hours.

MED 6201 - Coaching EC/ECE Professionals: Foundation & Organization of Coaching Application: Organization & Self Reflection

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

Educator coaching is an evidence-based strategy to increase program quality and teacher effectiveness in early childhood/early childhood education classrooms, programs, and home delivery systems. This course will train EC/ECE coaches using material from research-based sources, program experiences, and related theory. Participants will learn recommended practices in coaching related to early childhood and develop a systematic, individualized approach to effective coaching. Participants will learn practical strategies for coaching early childhood staff of diverse backgrounds and varying adult learning styles. Materials and discussions will include theory, research, interpersonal communication skills, and a systematic approach to more intentional coaching. Students will apply these strategies to Case Studies and field work experiences throughout the course and will participate in hands-on activities in class to apply new skills. Educator coaching skills will apply to any early childhood/early childhood education curriculum or model. This is course 1 of a three course series for the Utah Coaching Credential.

MED 6202 - Coaching EC/ECE Professionals: Connecting Awareness with Application & Deepening of Practice

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Becoming an effective educator coach is a result of theoretical understanding, introspection, thoughtful planning, application of coaching skills and knowledge, and continuous self-improvement. This course will identify effective ongoing support strategies for individuals providing educator coaching. Participants will integrate skills with effective application in real life coaching experiences. Discussions will include self-reflective practices, self-directed action, planning and goal setting, and managing progress and accountability. Students will apply these strategies to case studies and real life

experiences throughout the course. Students will be encouraged to engage in self-reflection and share ideas, successes, and challenges with other students in this course. This is course 2 in a three course series for the Utah Coaching Credential.

Pre-requisite(s): CHF 4201/MED 6201 or instructor permission.

MED 6203 - Coaching EC/ECE Professionals: Attuning for Personal and Organizational Change

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

The success of the educator coaching relationship has been based on the trusting relationship between two peers, coach, and adult learner, through a collaborative process of co-learning. The opportunity for the adult learner to self-monitor, self-analyze, and self-modify enhances the adult learner's own resourcefulness and alters his/her own personal understanding. In addition, when the act of coaching is a collaborative process, the coach is also allowed the same opportunity to reflect on self as part of their learning. This course is designed to support the coach in creating a social learning climate where a synergy of shared learning and reflective dialogue about practice are examined, analyzed and refined. Participants will integrate skills from Course 1 and 2 with opportunities to engage in conducting and constructing ongoing support strategies the coach can apply, refine and alter based on the adult learners' needs, readiness, and values about practice. Using strategies and protocols, coaching for organizational change in diverse settings (home-based programming, early care settings, classrooms, and school districts, etc.), and identifying effective ongoing personal supports will also be addressed. Students will apply these strategies to case studies and real life experiences throughout the course. This is course 3 of a three course series for the Utah Coaching Credential.

Pre-requisite(s): CHF 4201/MED 6201 and CHF 4202/MED 6202 or instructor approval.

MED 6210 - School Law

Credits: (3)

Typically Taught Summer Semester: *1st Blk*

This course considers the rights and responsibilities of students, teachers, and other educational practitioners. Relates these to school programs and operations as determined by state and federal constitutions, laws, and court decisions; specifically content from ESEA, IDEA, Section 504, and ADA.

MED 6220 - Current Problems in Education

Credits: (3)

Typically Taught Summer Semester: *1st Blk*

A survey course which identifies and gives opportunity to research current problems in education at national, state, and local levels. Solutions and responses are developed from the research to address problems.

MED 6229 - Instructional Technology for Pre-service Teachers

Credits: (2)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course allows students to apply existing technology literacy into educational environments to promote use of technology for teaching and instructional support in learning environments. The curriculum is based on teacher skills required to teach Utah State Educational Technology Standards.

Pre-requisite(s): Verification of technology literacy training (through coursework or job experience) within the past five years.

MED 6230 - Instructional Technology for Teachers

Credits: (3)

Typically Taught Summer Semester: *1st Blk*

Typically Taught Spring Semester: *Full Sem*

Designed for students who have had a prior introduction to technology. Topics could include classroom applications of technology, software evaluations, and technology integration.

Pre-requisite(s): Verification of technology literacy training (through coursework or job experience) within the past five years.

MED 6240 - Foundations of Teaching for Cultural and Language Differences

Credits: (2)

This course will address the nature of pluralism in American Society, including but not limited to exploration of multiculturalism, bilingualism, first and second language acquisition and instructional strategies. Establishes the core foundations for valuing diversity.

MED 6250 - Second Language Acquisition: Theories and Implementation

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

This course explores second language acquisition processes, current theories, and effective strategies as a knowledge base in planning appropriate curriculum and instruction for English language learners.

MED 6265 - Foundations of Inclusive Teaching

Credits: (2)

Typically Taught Summer Semester: *2nd Blk*

Typically Taught Spring Semester: *Full Sem*

This course, designed for non-special education teacher candidates, will introduce candidates to the legal, philosophical, historical, and ethical foundations of special education. An emphasis is placed on strategies and methods for instructing students with exceptionalities in the general education setting and the expanded roles and responsibilities of school personnel for providing appropriate educational experiences for all students.

Pre-requisite(s): Admission to the masters of education program.

MED 6270 - Literacy Strategies for Teaching English Language Learners

Credits: (3)

Typically Taught Summer Semester: *1st Blk*

Typically Taught Spring Semester: *Full Sem*

This course will examine literacy strategies for English Language Learners. Teacher candidates will learn how to apply literacy strategies to teach reading, writing, listening and speaking skills, while including culture, to scaffold language development in both the second language and mainstream classrooms.

MED 6280 - Family and Community Involvement in Education

Credits: (2)

Examination of methods which would facilitate the interaction between the parent/community and the teacher/school through reciprocal communication, home-based involvement, school-based involvement and decision making. Special emphasis will be given to the importance

of parental involvement in the education of second language learners.

MED 6300 - Conducting Qualitative Research

Credits: (3)

Designed as an introduction to the philosophy, theory, and methodology of qualitative research. This course is a companion course to MED 6080, Conducting Educational Research. Special emphasis is placed on designing qualitative research proposals for master's degree projects.

MED 6311 - Content Instruction in the Elementary School: Science

Credits: (2)

Typically Taught Summer Semester: *1st Blk*

Explores new concepts in curriculum and methods of science instruction in the elementary schools.

Note: This course is required for elementary licensure.

MED 6312 - Content Instruction in the Elementary School: Mathematics

Credits: (2)

Typically Taught Spring Semester: *Full Sem*

Explores new concepts in curriculum and methods of mathematics instruction in the elementary schools.

Note: This course is required for elementary licensure.

MED 6313 - Content Instruction in the Elementary School: Social Studies

Credits: (2)

Typically Taught Fall Semester: *Full Sem*

Explores new concepts in curriculum and methods of social studies instruction in the elementary schools.

Note: This course is required for elementary licensure.

MED 6314 - Reading Instruction in Elementary Schools

Credits: (2)

Typically Taught Fall Semester: *Full Sem*

An exploration of current research theories and their pedagogical implications related to teaching vocabulary, reading comprehension, fluency, phonics, and phonemic awareness in elementary school classrooms.

Note: This course is required for elementary licensure.

MED 6316 - Language Arts Instruction in Elementary Schools

Credits: (2)

Typically Taught Spring Semester: *Full Sem*

Students will explore theory, instructional methodology, and activities for supporting students in developing expertise in the essential skills of communication: listening, speaking, reading, writing, viewing, and visually representing.

Note: This course is required for elementary licensure.

MED 6317 - Arts Integration for Elementary Teachers

Credits: (2)

Typically Taught Summer Semester: *1st Blk*

This course is designed to prepare students to successfully teach the arts in the elementary classroom. Students are expected to design, prepare, and teach lessons to engage elementary students in arts and music activities. State curriculum guidelines will be reviewed and discussed.

MED 6320 - Content Area Literacy Instruction

Credits: (3)

Typically Taught Summer Semester: *Online odd years*

Typically Taught Fall Semester: *Online*

Typically Taught Spring Semester: *Online*

Use of reading as an effective means to help students comprehend their course material. Explores how to incorporate these skills into the curriculum of the content areas.

Note: This course is required for secondary licensure.

MED 6322 - Advanced Music Integration

Credits: (2)

Typically Taught Summer Semester: *2nd Blk*

This course is designed to prepare students to fully integrate the Utah State Music Core within the elementary classroom. Participants will gain an understanding of key processes for helping students develop musical skills and understanding. We will also design and participate in lessons to actively engage elementary students in experiences that integrate music with other subjects.

Pre-requisite(s): MED 6317 and MED 6340.

MED 6323 - Advanced Drama Integration

Credits: (2)

Typically Taught Summer Semester: *2nd Blk*

This course emphasizes credible connections between drama and core subjects and how arts integration fosters problem solving and creative agency. In addition to readings and discussions from arts integration literature, much of the course will involve students participating in existing lesson plans that connect the arts with other curricula, and analyzing their value and role in education.

Pre-requisite(s): MED 6317 and MED 6340.

MED 6324 - Advanced Dance Integration

Credits: (2)

Typically Taught Summer Semester: *2nd Blk*

This course emphasizes credible connections between dance and core subjects and how arts integration fosters problem solving and creative agency. In addition to readings and discussions from arts integration literature, much of the course will involve students participating in existing lesson plans that connect the arts with other curricula, and analyzing their value and role in education.

Pre-requisite(s): MED 6317 and MED 6340.

MED 6325 - Advanced Visual Arts Integration

Credits: (2)

Typically Taught Spring Semester: *Full Sem*

This course explores the history, theory, and practice of what it means to be a visual pedagogue or a teacher who incorporates the visual arts within day-to-day classroom instruction. It provides an orientation to arts integration in Utah schools with and through a visual arts lens. The curriculum aligns with State of Utah's core curriculum and national standards in the visual arts.

Pre-requisite(s): MED 6317 and MED 6340.

May be repeated twice for a maximum of two credit hours.

MED 6330 - Using Children's Literature and Informational Text in the Classroom

Credits: (2)

Typically Taught Spring Semester: *Full Sem*

This course will provide a broad basis for using children's literature for instructional purposes in elementary classrooms to enhance literacy development.

MED 6340 - Reading Assessment and Instructional Interventions

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

Assessment of reading problems and corrective procedures for remediation in elementary classrooms.

MED 6350 - Reading Comprehension Instruction

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

An exploration of current research theories and their pedagogical implications related to teaching vocabulary, reading comprehension, and metacognition.

Note: This course is required for the Level 1 Reading Endorsement.

MED 6352 - Early Literacy Instruction (K-6)

Credits: (2)

Typically Taught Fall Semester: *Full Sem*

The purpose of this course is to focus on the research on emergent and early literacy development so that teachers may construct well-designed, appropriate literacy learning environments, and experiences for young language learners. Because this is an advanced course, students will be expected to have a reading background in early literacy.

Note: This course is required for the Level 1 Reading Endorsement.

MED 6353 - Understanding and Supporting Reading Development (grades 6-12)

Credits: (3)

Typically Taught Summer Semester: *2nd Blk*

This course is to help practicing secondary teachers acquire skills and strategies to support struggling readers. Specifically, this course will provide teachers with a systematic and ongoing approach to classroom intervention to prevent continued failure in reading.

Note: Required for the Level 1 Basic Secondary Reading Endorsement.

MED 6354 - Literacy Leadership and Professional Development

Credits: (2)

This course is designed to increase understanding of the administration and supervision of school literacy programs. Major topics will include: professional development,

school/community relations, mentoring partnerships, student diversity, curriculum evaluation and development, and assessment. This course is required for the Reading Specialist Endorsement.

Pre-requisite(s): Basic Reading Endorsement.

MED 6355 - Research in Reading

Credits: (3)

This course will engage students in studying and understanding primary research documents in reading. Students will be guided to explore both classical and contemporary reading research studies. Students will also be instructed in basic research techniques in reading. This course is required for the Reading Specialist Endorsement.

Pre-requisite(s): Level 1 Basic Reading Endorsement.

MED 6356 INT - Internship in Reading

Credits: (3)

This course is a field-based experience designed to give students an opportunity to work with curriculum and school leaders for improving reading instruction on a district or school level.

Pre-requisite(s): Level I Basic Reading Endorsement, MED 6354, MED 6355. The course is graded Credit/No Credit.

MED 6360 - Foundations of Literacy

Credits: (3)

Typically Taught Summer Semester: *1st Blk*

An exploration of current reading, oral and written language theories, and their applications for the improvement of literacy practices in schools.

MED 6370 - International and Comparative Education: Case Studies

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course uses case studies of education systems and practices from Japan, China, South Korea, Finland, Cuba, Germany, Poland, and the U.S. to demonstrate the interactions of social-cultural contexts, school policies and practices, as well as the individuals' learning processes. Theories of and perspectives on examining educational policies and practices will be introduced throughout the class along with case studies covering a diverse range of contexts. The class will be a mix of lectures, discussions,

and in-class demonstrations, so students will have many opportunities to actively engage with the material in multiple ways. Students will also have opportunities to discuss educational issues with college students from China, Japan, India and Singapore via a virtual platform. This course may be repeated once.

MED 6375 - Foundations of Dual Immersion or Immersion Education

Credits: (3)

The course examines the background, underlying theory, and research foundations that support dual language and immersion education practices. Issues for teachers and administrators will be addressed. Practices and principles that inform language attentive curriculum will be a focus of the course.

MED 6380 - Values Education

Credits: (3)

Typically Taught Summer Semester: *Hybrid*

Designed for teachers, administrators, parents and community leaders. Examines the developmental processes of socialization and moral development. Four separate approaches of values education are evaluated.

MED 6415 - Content-Based Second Language Curriculum, Instruction and Assessment

Credits: (3)

Participants in this course learn to plan curriculum and instruction for dual language and immersion classrooms that combine language and content goals using standards-based and backwards design approaches. They also learn a range of classroom-based strategies for assessing language and content.

MED 6420 - Foundations of Education of the Gifted

Credits: (3)

An overview of education for the gifted and talented: historical and philosophical background; characteristics, needs, and developmental patterns of the gifted; issues in identification, differentiating curriculum and educational program options; special populations of gifted students.

MED 6430 - Creative Processes in the Elementary School

Credits: (3)

Typically Taught Summer Semester: *1st Blk*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$15.00

This course focuses on the development of attitudes, methods, and skills in creative teaching, including an exploration of using music, art, dance, and drama in the elementary classroom. Graduate students will also explore philosophy, research, and theories which support arts integration, and development of teaching strategies and materials for use in the elementary classroom.

MED 6440 - Social and Emotional Needs of the Gifted

Credits: (2)

This course examines social and emotional developmental needs of gifted and talented children and proposes strategies for recognizing and meeting those needs in classrooms and with families.

MED 6450 - Creativity and Applied Imagination

Credits: (2)

Typically Taught Fall Semester: *Full Sem*

Exploration and development of readily available personal and community resources to encourage creative thinking/reasoning, classroom involvement, and transfer of learning.

MED 6470 - Teaching for Thinking

Credits: (2)

Typically Taught Fall Semester: *Full Sem*

Theory and practice for teaching thinking skills in elementary, middle, and high school classrooms.

MED 6480 - Differentiated Curriculum for the Gifted

Credits: (3)

Curriculum theories and educational strategies for educating gifted and talented students. A practical course with special attention to the development of instructional

materials appropriate for use by gifted students in special programs as well as in the regular classroom.

MED 6490 - Assessment and Evaluation in Education of the Gifted

Credits: (3)

Principles of assessment applied to identification of gifted and talented students including identification of gifted in minority populations, diagnosis of student learning needs, learning styles, evaluation of student progress, and evaluation of program effectiveness.

MED 6495 - Action Research in Education of the Gifted

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This is a capstone course in the program leading to a Utah teaching endorsement in education of the gifted and talented and meets the USOE endorsement requirement for a field experience or practicum in education of the gifted by requiring a community-based project in which learning from previous endorsement courses is synthesized in a practical way. Students are expected to take initiative in planning, implementing, documenting, and evaluating meaningful action research projects relevant to education of the gifted and talented.

Pre-requisite(s): Bachelor's degree, teaching license, and MED 6420, MED 6480, MED 6490.

MED 6510D - Advanced Foundations in Special Education Practice & Law (Special Education License)

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

This course focuses on the learning and social characteristics of young people with exceptionalities - that is, disabilities (physical, mental, learning) or giftedness - and about public policy and services available to them. As future teachers, students will learn about how such individuals are identified and served by the school system, what strategies are effective for instructing them, and roles and responsibilities of school personnel in providing appropriate educational experiences for all students in an inclusive classroom.

Pre-requisite(s): Admission to Masters of Education.

MED 6515 - Foundations in Special Education: Law and Practice

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

This course will introduce students to the philosophical, historical, legal, and ethical foundations of special education. Students will examine in depth the laws and practices related to special education and how those laws are influencing children with special needs today. Students will also learn about individuals with special needs as they are identified and served in our school system.

MED 6520 - Collaboration, Consultation, and IEP Development

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Roles of the special educator and families. IEP development, Least Restrictive environment, managing multidisciplinary team activities, and techniques of collaboration and consultation.

MED 6521 - Practicum in Special Education

Credits: (2)

Typically Taught Spring Semester: *Full Sem*

This Practicum experience will focus on examining in depth the lives of students with mild to moderate disabilities in school, home, and community settings. Students will be introduced to the IEP process and will practice developing collaborative relationships within school settings.

Pre-requisite/Co-requisite: This Practicum must be taken either concurrently with, or after completion of MED 6520.

MED 6530 - Principles and Applications of Special Education Assessment

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Administer, score, and interpret norm-referenced assessment instruments, analyze in combination with data from other assessment processes, and use to determine eligibility and develop educational programs.

MED 6540 - Advanced Managing Student Behavior

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

This course will address current issues, practices, and application of a variety of approaches for behavior change. It is designed to teach students validated classroom management strategies, behavioral intervention strategies and techniques for use with students who have behavioral and social skill deficits. The primary goal of this course is for each student to conduct a functional assessment and implement and evaluate a behavior intervention plan.

MED 6550 - Advanced Instructional Planning and Learning Environments for Special Education Students

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

Effective teaching methods, instructional programming and modification of curriculum for students with disabilities. A direct instruction model is emphasized.

Pre-requisite(s): Admission to Masters of Education.

MED 6555 - Advanced Instructional Methods and Practicum: Reading

Credits: (4)

This course is designed to introduce principles and techniques for diagnosis and remediation of reading problems. The course will cover student characteristics and school setting demands which contribute to lack of success in reading classrooms. Field experience required.

MED 6560 - Advanced Instructional Methods and Practicum: Mathematics

Credits: (4)

Typically Taught Spring Semester: *Full Sem*

Assessment and diagnosis of mathematics problems and corrective procedures for remediation. This course focuses on the needs of students with learning problems or who are at-risk for school failure. Students will apply the concepts learned in an action research project in a K-12 classroom.

MED 6565 - Advanced Instructional Methods and Practices: English Language Arts

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

The purpose of this course is to prepare teacher candidates

to teach English Language Arts to elementary and secondary students. Teacher candidates learn to identify reading and writing difficulties, using evidence-based interventions. They will also learn how to implement effective instruction, using data-based instructional decision model to monitor students' ELA progress. This course is to be taken concurrently with MED 6860 Practicum in Education.

Co-Requisite(s): MED 6860.

MED 6570 - Advanced Instructional Methods and Practicum: Written Expression

Credits: (4)

Typically Taught Fall Semester: *Full Sem*

This course is designed to introduce principles and validated strategies for teaching written expression to students with mild/moderate disabilities. The course will cover student characteristics and school setting demands that contribute to lack of success in written expression. Field experience required.

MED 6575 - Advanced Instructional Methods and Practices: Mathematics

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

The purpose of this course is to prepare teacher candidates to teach mathematics to Tier 2 and 3 students in elementary and secondary classrooms. Teacher candidates will acquire a set of skills that will enable them to determine what math concepts to teach to pupils and effective instructional methods to aid in the teaching of these concepts. This course is to be taken concurrently with MED 6860 Practicum in Education.

Co-Requisite(s): MED 6860.

MED 6580 - Advanced Learning Strategies and Transition for Special Education Students

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Effective teaching methods, strategies, and practices for secondary age level students with disabilities. A cognitive learning strategies approach is emphasized.

MED 6581 - Pre-Student Teaching in Special Education

Credits: (4)

The purpose of pre-student teaching is to continue field experience in a supportive and professional manner. The student will have the opportunity to experience teaching and the responsibilities that it entails under the direct guidance of the cooperating teacher and the course instructor. This course is designed to provide students with practical experiences in the areas of: (a) assessment, (b) behavior management, (c) curriculum and instruction for students K-12, and (d) planning and developing post secondary transition plans.

Pre-requisite(s): EDUC 4521/MED 6521 Practicum in Special Education, with a grade of B or better.

Suggested Requisite(s): Must be taken either concurrently with, or after completion of, EDUC 4530/MED 6530, EDUC 4540/MED 6540, EDUC 4550/MED 6550, and EDUC 4580/MED 6580.

Note: Course not currently being offered.

MED 6600 - Ethical Leadership**Credits: (2)**

Typically Taught Fall Semester: *1st Blk*

This course will explore issues of ethical and professional conduct as a steward of school resources, student academic success and well being, and faculty and staff professional development. This course will be based on the Utah Educator Professional Standards as described in Utah State School Board rule.

MED 6601 - Community Engagement and Advocacy**Credits: (2)**

Typically Taught Fall Semester: *2nd Blk*

Typically Taught Spring Semester: *Full Sem*

This course will explore strategies effective educational leaders engage families and the community in order to create an inclusive, caring, safe, and supportive school environment to advocate for each student's academic success and well-being.

MED 6602 - Organizational Change and School Improvement**Credits: (3)**

Typically Taught Summer Semester: *2nd Blk*

This course includes systematic processes of sustainable and continuous school and classroom improvement. Concepts include climate and culture, process of change, building teacher and leadership capacity, development of effective leadership practices, and strategic planning that supports continuous school improvement.

MED 6603 - Positive Academic and Behavior Supports in Schools**Credits: (2)**

Typically Taught Spring Semester: *2nd Blk*

This course includes systematic processes of sustainable and continuous school and classroom improvement. Concepts include climate and culture, process of change, building teacher and leadership capacity, development of effective leadership practices, and strategic planning that supports continuous school improvement.

MED 6604 - Educational Leader Internship**Credits: (4)**

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course will provide directed and supervised leadership experiences in public education settings. Students will complete the hours required by Utah State Board Rule.

MED 6610 - Life Science for Elementary Teachers**Credits: (3)**

This course provides a background in concepts relating to living organisms and the interactions among them and their environment. The flexibility of these concepts is examined in light of research activities.

MED 6620 - Physical Science for Elementary Teachers**Credits: (3)**

Basic concepts of the physical sciences (chemistry and physics) are covered. The importance of the scientific method and the design of experiments is addressed as well as basic facts and discoveries. Hands-on laboratory activities are an important part of the course.

MED 6630 - Earth Science for Elementary Teachers

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

A background in basic concepts relating to the formation, development, and history of the earth is provided. General concepts of the structure, composition, and modification of the planet (atmosphere, lithosphere, and hydrosphere) are investigated through laboratory activities applicable to elementary classrooms. Activities emphasize inquiry and appropriate activities for developing content, process skills, laboratory skills, and positive attitudes toward science.

MED 6640 - The World As A Classroom

Credits: (1-3)

variable title

This course is designed to provide enrichment opportunities for those who undertake either domestic or foreign travel to participate in study tours, research, and other professional development experiences. It offers participants an opportunity to learn outside the classroom in locations available only through travel.

May be repeated up to 3 credit hours.

MED 6650 - Understanding Science

Credits: (3)

This course will examine the nature of science, the philosophy of science, and research in science education. Students will engage in authentic scientific research.

MED 6661 - Life Science for Secondary Teachers: Zoology

Credits: (3)

This course examines basic concepts relating to living organisms, interactions among them, and relationships with their environment. Concepts of structure, function, ecology, behavior, and evolution will be investigated through laboratory activities applicable to secondary classrooms. Content relates to current areas of public concern and advances in the life sciences.

MED 6662 - Life Science for Secondary Teachers: Microbiology

Credits: (3)

This course examines basic concepts relating to living organisms, interactions among them, and relationships with

their environment. Concepts of structure, function, ecology, behavior, and evolution will be investigated through laboratory activities applicable to secondary classrooms. Content relates to current areas of public concern and advances in the life sciences.

MED 6663 - Life Science for Secondary Teachers: Botany

Credits: (3)

This course examines basic concepts relating to living organisms, interactions among them, and relationships with their environment. Concepts of structure, function, ecology, behavior, and evolution will be investigated through laboratory activities applicable to secondary classrooms. Content relates to current areas of public concern and advances in the life sciences.

MED 6670 - Physics for Secondary Teachers

Credits: (3)

A background in the basic concepts of physics is provided. Topics include laws of motion, gravity, energy, light, heat, sound, electricity, magnetism, atomic and nuclear physics, radioactivity, and relativity. Laboratories investigate concepts applicable to secondary classrooms. Activities associate science content with appropriate activities designed to develop process skills, laboratory skills, and positive attitudes toward science.

MED 6680 - Chemistry for Secondary Teachers

Credits: (3)

A background in the basic concepts related to matter, its properties, and its reactions is provided. Laboratories investigate concepts applicable to secondary classrooms. Activities associate science content with appropriate activities designed to develop process skills, laboratory skills, and positive attitudes toward science.

MED 6691 - Earth Science for Secondary Teachers: Geology

Credits: (3)

A background in basic concepts relating to the information, development, and history of the earth is provided. General concepts of the structure, composition, and modification of the planet's lithosphere are investigated through laboratory activities applicable to secondary classrooms. Activities

emphasize inquiry and appropriate activities for developing content, process skills, laboratory skills, and positive attitudes toward science.

MED 6692 - Earth Science for Secondary Teachers: Meteorology

Credits: (3)

A background in basic concepts relating to the information, development, and history of the earth is provided. General concepts of the structure, composition, and modification of the planet's atmosphere are investigated through laboratory activities applicable to secondary classrooms. Activities emphasize inquiry and appropriate activities for developing content, process skills, laboratory skills, and positive attitudes toward science.

MED 6693 - Earth Science for Secondary Teachers: Oceanography

Credits: (3)

A background in basic concepts relating to the information, development, and history of the earth is provided. General concepts of the structure, composition, and modification of the planet's hydrosphere are investigated through laboratory activities applicable to secondary classrooms. Activities emphasize inquiry and appropriate activities for developing content, process skills, laboratory skills, and positive attitudes toward science.

MED 6700 - Higher Education Administration

Credits: (3)

Typically Taught Fall Semester: Full Sem

This course provides an overview of the various types of institutions of higher education including a brief history, typical institutional organizational structures, principal administrative functions, and the philosophy of administration overall. Strategic decision making within organizations will also be discussed.

MED 6701 - Current Issues in Higher Education

Credits: (2)

Typically Taught Spring Semester: Full Sem

This course provides an overview of current issues and trends, challenges, research, and policies impacting higher

education at the institutional, state, national, and international level.

MED 6702 - Organizational Change and Human Resource Management

Credits: (3)

Typically Taught Summer Semester: 1st Blk

This course will focus on financial and personnel management strategies, techniques for developing a projected budget and strategic plan, strategies for managing personnel and addressing the evaluation protocols.

MED 6703 - Group Dynamics

Credits: (2)

Typically Taught Summer Semester: 1st Blk

This course will provide an examination of advising other practices on campus designed to enhance and support today's college student. Concepts that will be discussed include student demographics, individualized advising approaches, emotional intelligence, and student retention theories.

MED 6704 - Higher Education Internship

Credits: (2)

Typically Taught Summer Semester: Full Sem

Typically Taught Fall Semester: Full Sem

Typically Taught Spring Semester: Full Sem

This course will provide directed and supervised experiences in higher education administrative settings. Students will spend the required hours per semester in a structured, supervised setting.

This course can be taken 2 times for credit for a maximum of 4 credit hours.

MED 6730 - Mathematics for Teaching K-8: Assessment and Intervention

Credits: (3)

Practicing teachers will gain a deeper understanding of the various types of assessment and their appropriate use for guiding instruction, intervention, and evaluation of student learning of mathematics content. This course is part of the Elementary Mathematics Endorsement.

MED 6800 - Advanced Web-based Methods for Evaluation, Research, and Practice

Credits: (3)

Typically Taught Summer Semester: *1st Blk, even years*

This course is designed to introduce students to the latest techniques of web-based research and experience management that can be used within the field of Family Science and Education (and other related fields of social inquiry). Students taking the course will learn and demonstrate the best practices for conducting online surveys that can be used to gather cross-sectional, longitudinal, experimental data.

MED 6801 - Specialized Family and School Programs

Credits: (2)

Typically Taught Summer Semester: *1st Blk, odd years*

The Specialized Family and School Programs class is an advanced review of the theoretical foundations for established and emerging family life education programs. Furthermore, a review of best practices in disseminating and evaluating family life education programs in diverse settings and with diverse populations. Implications for policy are reviewed.

MED 6802 - Family Theories

Credits: (2)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *1st Blk*

This course provides students with the ability to critically review and assess theories in family science. Additionally, they will learn and practice the construction and application of family theory vital for conducting research and practicing family life education.

MED 6803 - Diverse Family Contexts

Credits: (2)

Typically Taught Summer Semester: *Full Sem*

This class will proceed via comparative analysis of culture, ethnicity, and family life in the United States reflecting social and political dynamics with extensive coverage of the family lifestyles, traditions, and values. Several American ethnic groups will be examined including historical background, key ethnic cultural components, traditional, and current ethnic family characteristics, and changes and adaptations to families and individuals. Emphasis will be made on how to address ethnocentrism, and serve families due to their various strengths and challenges.

MED 6805 - Family Life Education Coaching

Credits: (2)

Typically Taught Spring Semester: *Full Sem*

This course is to prepare students to become family life coaches. The course covers topics from the foundational theories/models of coaching (positive psychology, cognitive behavioral coaching, and others), how to conduct coaching sessions, the delineation between counseling and coaching, and how to run a coaching business. Students will practice coaching with other students as well as with actual practice clients.

MED 6806 - Advanced Skills for Family Life Educators

Credits: (2)

Typically Taught Summer Semester: *2nd Blk*

This theory-based course will provide students with hands-on skills and experiences that are vital for today's family life educators by reviewing and presenting family life education materials in both the classroom and among the community. This course also provides students with a number of teaching tools and philosophies considered key to becoming effective in the field of Family Life Education.

MED 6807 - Parenting

Credits: (2)

Typically Taught Spring Semester: *1st Blk*

This course will provide students with the latest research and theory on developmentally appropriate practices for parents. Also, students will learn the theory- and research-based methods for educating parents.

MED 6810 - Experimental

Credits: (1-6)

Individual courses offered on an experimental basis, identified by specific name and description. The specific title will appear on student's transcript along with the authorized credit. Refer to Experimental Courses.

This course may be repeated up to 5 times or a total of 6 credit hours.

MED 6810 - Organization and Leadership

Credits: (3)

Experimental Course, Contact Department for More Information

MED 6810 will introduce the student to theories and structures of family service organizations, best practices for planning, managing people, customer service models, working budgets and evaluating family service programs. Class discussions, case studies, and guest speakers will be used to help students understand the application of the basic concepts. Leadership styles will be examined as an overall context within which the management of family service programs occurs.

MED 6820 - Organization and Leadership in Non-profit Family Services

Credits: (3)

Typically Taught Summer Semester: *1st Blk*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

MED 6820 will introduce the student to theories and structures of family service organizations, best practices for planning, managing people, customer service models, working budgets and evaluating family service programs. Class discussions, case studies, and guest speakers will be used to help students understand the application of the basic concepts. Leadership styles will be examined as an overall context within which the management of family service programs occurs.

MED 6860 INT - Practicum in Education

Credits: (1-4)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Practical synthesis and application of knowledge and skills gained in previous education courses. Students must have approval from the program director, and should follow specific graduate certificate in teaching program guidelines for prerequisites and other requirements. This course does not grant credit towards the MED degree, but is required for a teaching license in the state of Utah.

MED 6870 INT - Student Teaching in Elementary Education for MED Students

Credits: (3-6)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

The student teaching experience is the culminating learning experience for the elementary licensure track. Student teaching is a time for developing one's classroom

management style, instructional design, and collaborating with a mentor teacher. Student teaching is a rigorous experience, which is carefully planned, guided, assessed, and evaluated. Offered CR/NC only; this course does not grant credit towards the MED degree but is required for a teaching license in the state of Utah.

Pre-requisite(s): MED 6860, MED 6110 or MED 6120, MED 6050, MED 6265, MED 6020, MED 6311, MED 6312, MED 6313, MED 6314, MED 6316.

MED 6880 INT - Student Teaching in Secondary Education for MED Students

Credits: (3-6)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Student teaching experience, with supervision, in a public school to synthesize theory and practice from previous education courses. Offered CR/NC only; this course does not grant credit toward the MED degree but is required for a teaching license in the state of Utah.

Pre-requisite(s): MED 6860, MED 6020, MED 6060, MED 6120 or MED 6110, MED 6050, MED 6320, and MED 6265.

MED 6890 INT - Student Teaching in Special Education for MED Students

Credits: (4-6)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

The student teaching experience is the culminating learning experience for the special education licensure track. Student teaching is a time for developing one's classroom management style, instructional design, and collaborating with a mentor teacher. Student teaching is a rigorous experience, which is carefully planned, guided, assessed, and evaluated. Offered CR/NC only; this course does not grant credit towards the MED degree but is required for a teaching license in the state of Utah.

Pre-requisite(s): MED 6050, MED 6565, MED 6575, and MED 6860.

MED 6900 - Individual Study

Credits: (1-3)

Intended for the candidate who has special needs and who would benefit from an individual study program. Forms are available from Room ED 234 MED program office and must be approved by the instructor and the director at time of registration.

May be repeated up to 3 credit hours.

MED 6920 - Short Courses, Workshops, Institutes and Special Programs

Credits: (1-4)

Variable Title

In order to provide flexibility and to meet many different needs, a number of specific offerings are possible using this catalog number. When the number is used it will be accompanied by a brief and specific descriptive title. The specific title with the credit authorized for the particular offering will appear on the student transcript. May be repeated 5 times up to 6 credit hours.

MED 6990 - Continuing Graduate Advisement

Credits: (1)

This course is used to fill the continuous enrollment requirement while completing the Master's project. The course is graded Credit/ No Credit.

MENG 5010G - Introduction to Linguistics

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course introduces students to the scientific study of language. It explores what languages have in common, as well as what distinguishes them. Students learn basic analytic techniques in articulatory phonetics, phonology, morphology, syntax, and semantics and apply them to data drawn from various languages. These core concepts may be expanded and applied to other areas, such as language acquisition, language history, language and culture, language and thought, and language and literary expression. This course is designed for students with bachelor's degrees who have no upper-division undergraduate coursework in linguistics.

MENG 5020G - Introduction to the Study of Language for Teachers

Credits: (3)

This course is designed for English teaching majors and minors. It introduces students to the nature of language and linguistics and reviews the elements of traditional grammar. This course surveys prescribed applications for prospective secondary school English teachers, including language variation, contemporary alternatives to traditional grammar, the history of English, and linguistics and composition.

This course is designed for students who have no upper-division undergraduate coursework in linguistics.

MENG 5050G - Grammar, Style, and Usage for Advanced Writing

Credits: (3)

This course presents the concepts and nomenclature of traditional grammar as a context for students wishing to increase their control of punctuation, style, and usage to become more proficient writers. It offers practical guidance in how grammatical concepts can be applied to revising and editing one's own or others' writing to more effectively express one's intended meaning. The course is designed for students with bachelor's degrees who have no upper-division undergraduate coursework in linguistics.

MENG 5080G - Critical Approaches to Literature

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Students will study and practice critical approaches to literature. The course will begin with New Criticism and proceed to study more resistant reading strategies such as feminism, Marxism, and deconstruction. Students will not only learn the theoretical premises behind these theories, but also practice explicating various texts from a particular critical perspective.

MENG 5510G - World Literature

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Students in this course read texts from a variety of eras and of authors and regions outside the United States and Great Britain. This course may not be applied to graduate degree requirements if an undergraduate survey covering the same period was applied toward an undergraduate degree.

MENG 5520G - American Literature: Early and Romantic

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Students in this course read texts from the late eighteenth century to the decades just before the Civil War. This course may not be applied to graduate degree requirements

if an undergraduate survey covering the same period was applied toward an undergraduate degree.

MENG 5530G - American Literature: Realism and Naturalism

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Students in this course read texts from the Civil War through World War I. This course may not be applied to graduate degree requirements if an undergraduate survey covering the same time period was applied towards undergraduate degree.

MENG 5540G - American Literature: Modern

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Students in this course read texts from the first half of the twentieth century. This course may not be applied to graduate degree requirements if an undergraduate survey covering the same time period was applied towards an undergraduate degree.

MENG 5550G - American Literature: Contemporary

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Students in this course read texts from the 1950s to the present. This course may not be applied to graduate degree requirements if an undergraduate survey covering the same time period was applied towards undergraduate degree.

MENG 5570G - American Literature I

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course will introduce students to the study of American Literature from its earliest known works to those produced prior to the American Civil War. We will examine its history, major works, and literary concepts.

MENG 5580G - American Literature II

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course will introduce students to the study of American Literature from the American Civil War to the contemporary period. We will examine its history, major works, and literary concepts.

MENG 5620G - British Literature: Renaissance

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Students in this course read texts from the beginning of the sixteenth century to the middle of the seventeenth. This course may not be applied to graduate degree requirements if an undergraduate survey covering the same time period was applied towards undergraduate degree.

MENG 5630G - British Literature: Neoclassical and Romantic

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Students in this course read texts from the late seventeenth century to the early nineteenth century. This course may not be applied to graduate degree requirements if an undergraduate survey covering the same time period was applied towards undergraduate degree.

MENG 5640G - British Literature: Victorian

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Students in this course read texts from 1830 until roughly World War I. This course may not be applied to graduate degree requirements if an undergraduate survey covering the same time period was applied towards undergraduate degree.

MENG 5650G - British Literature: Modern

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Students in this course read texts from the first half of the twentieth century. This course may not be applied to

graduate degree requirements if an undergraduate survey covering the same time period was applied towards undergraduate degree.

MENG 5660G - British Literature: Contemporary

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Students in this course read British and Anglo-Irish literature since 1950. This course may not be applied to graduate degree requirements if an undergraduate survey covering the same time period was applied towards undergraduate degree.

MENG 5670G - British Literature I

Credits: (3)

Typically Taught Fall Semester: *Full Sem - Online*

Typically Taught Spring Semester: *Full Sem*

This course will introduce students to the study of British Literature from its earliest known works to those produced in the eighteenth century. We will examine its history, major works, and literary concepts.

MENG 5680G - British Literature II

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course will introduce students to the study of British Literature from the eighteenth century to the contemporary period. We will examine its history, major works, and literary concepts.

MENG 5730G - Literature of Cultures and Places

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Students in this course read texts focusing on a single national culture or works from various cultures. This course may not be applied to graduate degree requirements if an undergraduate survey covering the same time period was applied towards undergraduate degree.

MENG 5920G - Short Courses, Workshops, Institutes and Special Programs

Credits: (1-4)

Variable Title

In order to provide flexibility and to meet many different needs, a number of specific offerings are possible using this catalog number. When the number is used it will be accompanied by a brief and specific descriptive title. The specific title with the credit authorized for the particular offering will appear on the student transcript. May be repeated 5 times with a maximum of 6 credit hours.

MENG 6005 - Intercultural Classroom Discourse

Credits: (3)

Students will read, discuss and experience interactive learning tools from the fields of sociolinguistics, intercultural communication, and TESOL pedagogy. Students will analyze dialects and personal/social conversational styles. Examples from literature and film will help provide a contextualized means of observing and understanding cultural identities.

MENG 6010 - Introduction to Graduate Studies

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Students will learn research methods and methodologies that will allow them to produce publishable, sophisticated pieces of academic prose of the kind expected of professional academics. Students will compose abstracts, conference paper proposals, annotated bibliographies, and surveys of scholarship. Students will explore academic databases extensively and learn to evaluate rigorously other scholars' work. Students will be encouraged to submit their work in the class to journals, conferences, or collections of essays. Students should take this course within their first year of study and focus their research on topics that may support future work on a thesis or project. Required in first or second semester.

MENG 6030 - Studies in Literary Theory and Criticism

Credits: (3)

Variable Title

Students will study influential works in literary theory--potentially ranging from Plato's REPUBLIC to Gayatri Spivak's groundbreaking feminist studies to Stephen Greenblatt's New Historicist studies to Homi Bhabha's postcolonial analyses--paying specific attention to the

influence of these theories on English studies.
May be repeated 10 times for credit hours with different content.

MENG 6110 - Writing for Teachers

Credits: (3)

Designed primarily for in-service teachers, this course explores the most current research and theory concerning the teaching of writing and applies it to issues in the secondary classroom. Permission of instructor required to register.

MENG 6120 - Teaching Traditional and Contemporary Young Adult Literature

Credits: (4)

Typically Taught Spring Semester: Full Sem

This course provides a broad, practical background in young adult literature, both traditional and contemporary, with emphasis on current theories and methods in literature pedagogy. Selection and evaluation of texts that appeal to young adults, reading strategies, censorship, themes and genres will be given special attention.

Pre-requisite(s): MED 6050 Curriculum Design, Evaluation, Assessment (3) must be taken prior to MENG 5210G/6120. We strongly recommend that MENG 6110 Writing for Teachers (3) or MENG 6230 Wasatch Range Writing Project Summer Institutes (3) be taken prior to MENG 5210G/6120.

Co-Requisite(s): MENG 5210G [Inactive] and MENG 6120 must be taken concurrently.

Note: Permission of instructor required to register.

MENG 6130 - Theories of Rhetoric and Writing Studies

Credits: (3)

Typically Taught Spring Semester: Full Sem

This course is an intensive study of rhetoric and writing theory. Selected works of major composition and rhetorical theorists will be examined and historicized within a survey of the teaching of academic writing from antiquity to the present.

MENG 6140 - Foundations of Professional and Technical Writing

Credits: (3)

Typically Taught Spring Semester: Full Sem

This course will study the theoretical foundations and

scholarly practices of professional and technical writing and communication. The course will examine the major ideas of those who practice professional and technical writing and the main values and practices of the field.

MENG 6210 - Teaching Literature in the Secondary Schools

Credits: (3)

Designed primarily for in-service teachers, this course explores the most current research and theory concerning the teaching of literature and applies it to issues in the secondary classroom.

MENG 6230 - Wasatch Range Writing Project Summer Institute

Credits: (1-6)

Typically Taught Summer Semester: 1st Blk, 2nd Blk

This course is designed to follow the National Writing Project model. The four-week Invitational Institute is for inservice teachers nominated by their school district or their peers. It is designed to develop leadership skills in those teachers to enable them to impact the quality of writing instruction in their individual schools and district. It is also designed to develop teacher leadership for the Wasatch Range Writing Project. The One Week Open Institute is open to any inservice teacher wishing to improve writing instruction in his/her classroom.

Can be repeated once up to eight (8) credit hours total.

Note: Permission of instructor required to register.

MENG 6231 - Wasatch Range Writing Project Advanced Institute

Credits: (1-6)

Variable Title

This is a variable topics variable title course designed for Wasatch Range Writing Project Teacher Consultants, teachers who have taken the WRWP Summer Institute and work with WRWP providing professional development to local school districts. It allows those teachers to increase their effectiveness as teachers, add to their expertise for work with inservice teachers and research possible solutions to literacy issues facing elementary and secondary education in our region. Course titles may include: Developing Utah State Core Standards Workshops, Digital Writing, Developing Argument Writing Across the disciplines. Only six hours can be used for meeting elective requirements in the MENG program.

Pre-requisite(s): Six hours credit in MENG 6230.

May be repeated 6 times and up to 18 credit hours.

MENG 6240 - Seminar in American Literature

Credits: (3)

Variable Title

This seminar explores major texts of one particular American era. The course focuses on literature which articulates the selected period.

This variable emphasis course may be repeated 10 times for credit with different content.

MENG 6250 - Seminar in British Literature

Credits: (3)

Variable Title

This seminar explores major texts of one particular British era. This course focuses on the literature which articulates the selected period. This variable emphasis course may be repeated 3 times up to 6 credit hours with different subject matter.

This course may be repeated four times for a maximum of 12 credit hours.

MENG 6260 - Seminar in World Literature

Credits: (3)

Variable Title

This seminar explores literature other than American or British. The course focuses on the literature which articulates the selected time and place.

This variable emphasis course may be repeated 10 times for credit with different subject matter.

MENG 6280 - TESOL Practicum

Credits: (1)

TESOL practicum provides guided and supported experience in one or more of the following: tutorial, small group teaching, whole class lesson planning. Candidates will practice a variety of instructional modes for speaking, reading and writing.

Note: Instructor permission is required for registration.

MENG 6310 - Language and Linguistics for Teachers

Credits: (3)

Designed primarily for in-service teachers, this course explores recent research in linguistics and applies it to issues in the secondary classroom.

MENG 6320 - World Languages

Credits: (3)

This course broadens students' awareness of diversity among the world's languages, thereby fostering understanding and appreciation of the nature of human language in general. Issues may include language obsolescence and maintenance, writing systems of the world, prosody and poetic forms in other languages, language history, and language families. Some prior experience in linguistics or language structures will be helpful as students study profiles of selected languages representing major language families of the world and various geographical areas.

MENG 6330 - Literary and Rhetorical Stylistics

Credits: (3)

This course surveys the literature on style in linguistics, literature, and rhetoric. Some prior background in grammar will be useful as students engage in quantitative and qualitative stylistic analysis of texts from a literary period, genre, or particular author and learn how diction, syntax, and figurative language can be deployed to communicative and artistic ends.

MENG 6410 - Strategies and Methodology of Teaching ESL/Bilingual

Credits: (3)

Typically Taught Summer Semester: *2nd Blk, Odd Years*

Typically Taught Spring Semester: *Full Sem*

This course emphasizes practical strategies and methods of teaching English as a Second Language in elementary and secondary schools.

MENG 6420 - English Phonology and Syntax for ESL/Bilingual Teachers

Credits: (3)

Typically Taught Summer Semester: *2nd Blk*

Typically Taught Fall Semester: *Full Sem, Odd Years*

This course provides the foundation for ESL/Bilingual teachers in the workings of the English language: its pronunciation and spelling systems, its word-forming strategies, and its sentence structure patterns.

MENG 6450 - ESL/Bilingual Assessment: Theory, Methods, and Practices

Credits: (3)

Typically Taught Summer Semester: *2nd Blk, Even Years*

Typically Taught Fall Semester: *Full Sem*

This course explores how to evaluate and implement assessment processes effectively for ESL/Bilingual pupils in public schools. Students will gain experience with both standardized test and authentic assessment.

MENG 6510 - Seminar in Eminent Writers:

Credits: (2-3)

Variable Title

This seminar examines significant works of and relevant criticism on an influential writer or a small group of writers.

This variable emphasis course may be repeated 10 times for credit with different subject matter.

MENG 6520 - Seminar in Shakespeare

Credits: (3)

Typically Taught Summer Semester: *1st Blk, Even Years*

This seminar examines a range of Shakespeare's major works as well as relevant criticism.

MENG 6610 - Advanced Studies in Genre

Credits: (2-3)

Variable Title

Students will analyze primary and secondary texts about one genre or sub-genre to develop a definition and understanding of the form.

This variable emphasis course may be repeated 10 times for credit with different subject matter.

MENG 6710 - Variable Topics

Credits: (2-3)

Variable Title

Topics will vary based on student interest and instructor expertise.

This course may be repeated 10 times for credit with different subject matter.

MENG 6730 - Creative Writing Forms and Crafts

Credits: (3)

Variable Title

Typically Taught Fall Semester: *Full Sem*

This course will investigate the relationship of form and function in creative work and explore how the underlying structure affects the impact of the work. This course will examine a variety of work to examine the effect of formal choices on readers' response. The course will then put these strategies and insights to work by drafting, workshopping, and revising students' own original writing.

May be repeated 2 times and up to 9 credit hours.

MENG 6740 - Creative Nonfiction Writing

Credits: (3)

Variable Title

Typically Taught Spring Semester: *Full Sem*

In this course, students will study the art and craft of writing creative nonfiction. Along with writing their own original work, students will read a variety of contemporary texts and will critique their peers' writing.

May be repeated 2 times and up to 9 credit hours.

MENG 6750 - Fiction Writing

Credits: (3)

Variable Title

Typically Taught Spring Semester: *Full Sem*

In this course, students will study the art and craft of writing fiction. Along with writing their own original work, students will read a variety of contemporary texts and will critique their peers' writing.

May be repeated 2 times and up to 9 credit hours.

MENG 6760 - Poetry Writing

Credits: (3)

Variable Title

Typically Taught Spring Semester: *Full Sem*

In this course, students will study the art and craft of writing poetry. Along with writing their own original work, students will read a variety of contemporary texts and will critique their peers' writing.

May be repeated 2 times and up to 9 credit hours.

MENG 6821 - Teaching Developmental Reading and Writing

Credits: (2)

This course introduces first-time teachers to the theory and practice of teaching developmental reading and writing.

Note: Permission of instructor required to register.

MENG 6822 - Teaching College Writing

Credits: (2)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course introduces first-time teachers to the theory and practice of teaching college writing.

Note: Permission of instructor required to register.

MENG 6823 - Teaching Practicum

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course supports teachers in their second semester of teaching college writing. Students will meet regularly to develop teaching strategies, enhance grading skills, resolve problems that have arisen in their classes, and plan strategies and procedures for classes they are teaching.

Note: Permission of instructor required to register.

MENG 6830 - Directed Readings

Credits: (1-3)

This course allows students credit for individual study with a professor, usually for further study that grows out of course work. The student and professor agree to a written contract for study which must be approved by the program director. No more than 3 credit hours of directed readings may apply toward the MA degree unless approved by the program director. This course is designed to allow students to explore in depth and/or breadth, subject matter which goes beyond the established courses in the Master's Degree Program.

May be repeated 3 times with a maximum of 9 credit hours.

MENG 6861 - Practicum in Secondary English Education

Credits: (2)

This course provides a broad, practical background in teaching young adult (YA) literature for MENG students seeking secondary school licensure. Selection, evaluation, curriculum planning, and assessment in teaching literature will receive primary emphasis. Issues concerning community values and censorship will also receive our attention.

Pre-requisite(s): MED 6050 Curriculum Design, Evaluation, Assessment (3) must be taken prior to MED 6120/6861. We strongly recommend that MENG 6110 Writing for Teachers (3) or MENG 6230 Wasatch Range Writing Project Summer Institutes (3) be taken prior

to MENG 6120/6861. MENG 6120 and MENG 6861 must be taken concurrently.

MENG 6920 - Short Courses, Workshops, Institutes and Special Programs

Credits: (1-4)

Variable Title

In order to provide flexibility and to meet many different needs, a number of specific offerings are possible using this catalog number. When the number is used it will be accompanied by a brief and specific descriptive title. The specific title with the credit authorized for the particular offering will appear on the student transcript.

May be repeated 5 times with a maximum of 6 credit hours.

MENG 6940 - Masters Project

Credits: (2-6)

This course provides for the creation and execution of a project growing out of graduate study particularly as it applies to the workplace. Project credit may be taken in increments of 1-3 hours in any term.

May be repeated twice up to 6 credits.

MENG 6950 - Creative Writing Thesis: Fiction, Nonfiction, Poetry

Credits: (1-6)

The course is designed as a rigorous academic and professional mentorship for students who intend to produce a MA thesis in creative writing. The thesis will include a manuscript of original writing with a critical foreword, both of which require extensive research and substantial writing on the thesis topic. The manuscript can be a creative response to literary works or original creative poetry, fiction, and/or nonfiction. The critical introduction will situate the creative component within the literary, historical, and/or theoretical context(s) of the creative component. Minimum of 3 hours required, with a possible maximum of 6 hours with approval. Credit/No Credit grading.

Pre-requisite(s): MENG 6730 - Creative Writing Forms and Crafts (3), must complete at least two workshops (6 Credits), MENG 6740 - Creative Nonfiction Writing (3)*, MENG 6750 - Fiction Writing (3)*, MENG 6760 - Poetry Writing (3)*. *Repeated with different titles.

May be repeated three times for a maximum of six credit hours.

MENG 6960 - Thesis

Credits: (1-6)

Thesis credit may be taken in increments of 1-3 hours in any term. The thesis is a capstone writing course for the Master's Degree Program.
May be repeated 5 times with a maximum of 6 credit hours.

MENG 6990 - Extension of Thesis/Project**Credits: (1)**

This course allows students to continue to work on their thesis/project. The course is graded credit/no credit.
May be repeated up to two times for a maximum of two credit hours.

MET 1000 - Introduction to Mechanical Engineering Technology and Design**Credits: (3)**

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Introductory course for students majoring in mechanical engineering technology. The role of mechanical engineering technology and its place in the occupational spectrum. The experimental and analytical tools used in mechanical engineering technology and fundamentals of mechanical design and problem solving. College algebra and trigonometry strongly recommended.

MET 1500 - Mechanical Design Engineering**Credits: (3)**

Typically Taught Spring Semester: *Full Sem*

This course will focus on understanding the engineering design process within the MET discipline. Students will develop problem statements and use brainstorming techniques to generate design concepts. These design concepts are evaluated and implemented for possible solutions to bring a factious engineered product to market.
Pre-requisite(s): MET 1000, Math ACT score of 23 or above or MATH 1010 or MATH 1030 or MATH 1040 or MATH 1050 or MATH 1060 or MATH 1080.

MET 1890 INT - Cooperative Work Experience**Credits: (1-3)**

Provides academic credit for on-the-job experience. Grade and amount of credit will be determined by the department. Prior consent of the department chair and the employer are required.

Pre-requisite(s): PDD 1010, MATH 1080 and Permission of Instructor.

MET 2500 - Modern Engineering Technologies**Credits: (3)**

Typically Taught Spring Semester: *Full Sem*

A survey of modern engineering technologies including, but not necessarily limited to, energy generation, nano systems, smart materials, robotics, lasers, transportation systems, and bioengineering.

Pre-requisite(s): MET 1500.

MET 2890 INT - Cooperative Work Experience**Credits: (1-3)**

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Provides academic credit for on-the-job experience. Grade and amount of credit will be determined by the department. Prior consent of the department chair and the employer are required.

Pre-requisite(s): Credit or concurrent enrollment in MFET 2300.

MET 3050 - Dynamics**Credits: (3)**

Typically Taught Fall Semester: *Full Sem*

Fundamentals of force, mass and acceleration, work and energy, and impulse and momentum applied to particles and rigid bodies.

Pre-requisite(s): MATH 1210, PHYS 2210 and MFET 2300.

MET 3150 - Engineering Technology Materials**Credits: (3)**

Typically Taught Fall Semester: *Full Sem*

Material properties, processing and selection of materials for technological applications. Design parameters for material selection of metals and nonmetals. Mechanical behavior and service failures of metallic alloys and other engineering materials at high and low temperatures. Lecture plus laboratory work in materials testing.

Pre-requisite(s): CHEM 1110 and MFET 2300 or MFET 2320.

MET 3300 - Computer Programming Applications of Mechanical Engineering Technology

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Applications of computer programming and computer software to problems in mechanical engineering technology.

Lecture plus computer-based laboratory work.

Pre-requisite(s): MFET 2300.

MET 3400 - Machine Design

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Application of engineering technology fundamentals to machine design. Techniques involved in designing and selecting individual machine parts.

Pre-requisite(s): MFET 2300.

MET 3500 - Mechanical Measurements and Instrumentation

Credits: (3)

Principles of temperature, pressure, strain, flow, force, and vibration measurements. Techniques of computerized data acquisition and reduction. Students will learn how to specify instrumentation systems, take data and interpret the results.

Lecture plus laboratory work in selected topics.

Pre-requisite(s): EET 1850 and MFET 2300.

MET 3700 - Testing and Failure Analysis

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Mechanical testing of materials, fatigue, fracture, wear, corrosion, embrittlement, failure mechanisms and analysis, case studies of failures.

Lecture plus laboratory work.

Pre-requisite(s): MET 3150 and MFET 2300.

MET 3890 INT - Cooperative Work Experience

Credits: (1-3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Provides academic credit for on-the-job experience. Grade and amount of credit will be determined by the department. Prior consent of the department chair and the employer are required.

Pre-requisite(s): Credit or concurrent enrollment in MET 3400.

MET 4200 - Mechanical Design with FEA

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

Application of engineering technology fundamentals in mechanical design using Finite Element Analysis.

Lecture plus computer-based laboratory work.

Pre-requisite(s): MET 3400 and MFET 2300.

MET 4300 - Heating, Ventilating & Air Conditioning

Credits: (3)

Principles of heating, ventilating and air conditioning of buildings. Refrigeration systems, air and water distribution and solar energy. Indoor thermal environmental control.

Pre-requisite(s): Permission of instructor.

MET 4500 - Senior Project

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

A mechanical engineering technology project will be selected for team participation. Projects will require planning, analysis, design, development, production, testing and documentation.

Pre-requisite(s): MET 4200; AAS or AS Degree.

MET 4510 - Senior Project

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

A mechanical engineering technology project will be selected for team participation. Projects will require planning, analysis, design, development, production, testing and documentation.

Pre-requisite(s): MET 4500.

MET 4650 - Thermal Science

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

Fundamental principles of thermal science for mechanical engineering technology. Basic thermal science theory with

an emphasis on technological applications and systems. Lecture plus laboratory work in selected thermal science topics.

Pre-requisite(s): MATH 1210, PHYS 2210 and CHEM 1110 or CHEM 1210.

MET 4800 - Individual Research in Mechanical Engineering Technology

Credits: (1-3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Special individual research and development projects in mechanical engineering technology. Credit and time determined by the student and the faculty project supervisor.

Pre-requisite(s): Permission of instructor.

MET 4830 - Directed Readings

Credits: (1-3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Directed individual readings in mechanical engineering technology. Topic selected in consultation with instructor.

Pre-requisite(s): Permission of instructor.

MET 4890 INT - Cooperative Work Experience

Credits: (1-3)

Typically Taught Spring Semester: *Full Sem*

Provides academic credit for on-the-job experience. Grade and amount of credit will be determined by the department. Prior consent of the department chair and the employer are required.

Pre-requisite(s): MET 3400 and Permission of instructor.

MET 4920 - Short Courses, Workshops, Institutes, and Special Programs

Credits: (1-3)

Variable Title

Consult the semester class schedule for the current offering under this number. The specific title with the credit authorized for the particular offering will appear on the student transcript.

MET 4990 - Seminar in Mechanical Engineering Technology

Credits: (1)

Guest lectures from local industry, professionalism and engineering ethics, technology and society, and employment preparation.

Pre-requisite(s): MET 4500.

MFET 1000 - Manufacturing Engineering Technology Fundamentals

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This is an introductory course for students interested in majoring in Manufacturing Engineering Technology. Students will be exposed to Manufacturing Engineering Technology through several hands-on laboratory experiences that introduce them to concepts needed for future classes. Students will gain a clear understanding of degree requirements and possible career paths.

MFET 1150 - Pre-Professional Seminar in Manufacturing

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

An introductory course for students planning to major in Manufacturing Engineering Technology. An explanation of the Manufacturing Engineering Technology curriculum and its place in the occupational spectrum. Current job functions of manufacturing engineering technologists will be discussed by manufacturing engineers and technologists from industry.

MFET 1210 - Machining Principles Lecture/Lab I

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Introduction to machining processes through theory and practice including: setup and operation of the engine lathe & milling machine, machine and tool performance, inspection techniques, basic blueprint reading, and process planning. Students will utilize lab time to complete assignments as required.

One lecture per week and two 3-hour labs per week are required.

MFET 1810 - Experimental Courses

Credits: (1-4)

Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript. Refer to Experimental Courses.

MFET 1810 - Manufacturing Electronics**Credits: (4)****Experimental Course, Contact Department for More Information**

Introduction to basic electricity, electrical and electronics principles and the applications of these principles to AC and DC circuitry and motor controls. The course will give students the foundation for required courses in welding power supplies and automation. An integrated hands-on lab will reinforce concepts taught in the classroom.

MFET 1820 - Manufacturing Electricity and Electronics**Credits: (4)**

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Introduction to basic electrical and electronic principles and the application of these principles to AC and DC circuits. The course will give students the foundation for required manufacturing courses in welding power supplies, motor controls and automation. An integrated hands-on lab will reinforce concepts taught in the classroom

Pre-requisite(s): MATH 1010 or QL.

MFET 1890 INT - Cooperative Work Experience**Credits: (1-3)**

Typically Taught Fall Semester: *Full Sem*

Open to all first year students in Manufacturing Engineering Technology. Department approval required before registration. Provides academic credit for on-the-job experience. Grade and amount of credit will be determined by the department.

MFET 2150 - Metal Forming, Casting and Welding**Credits: (2)**

Typically Taught Fall Semester: *Full Sem*

Introduction to industrial metal forming, casting and welding processes, equipment selection, design criteria,

shop procedures and terminology.

Two one-hour lectures per week and one two-hour lab

Co-Requisite(s): MFET 2150L. (MFET 2150L) is required.

MFET 2150L - Metal Forming, Casting & Welding Lab**Credits: (1)**

Typically Taught Fall Semester: *Full Sem*

Lab application of theories taught in MFET 2150 by use of student projects.

Co-Requisite(s): MFET 2150.

MFET 2151 - Metal Forming Lecture/Lab**Credits: (1)**

Typically Taught Fall Semester: *Full Sem*

Introduction to industrial metal forming processes, equipment selection, design criteria, shop procedures and terminology.

Pre-requisite(s): Instructor Approval.

MFET 2152 - Metal Casting Lecture/Lab**Credits: (1)**

Typically Taught Fall Semester: *Full Sem*

Introduction to industrial metal casting processes, equipment selection, design criteria, shop procedures and terminology.

Pre-requisite(s): Instructor Approval.

MFET 2153 - Metal Welding Lecture/Lab**Credits: (1)**

Typically Taught Fall Semester: *Full Sem*

Introduction to industrial metal welding processes, equipment selection, design criteria, shop procedures and terminology.

Pre-requisite(s): Instructor Approval.

MFET 2300 - Statics and Strength of Materials**Credits: (5)**

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Principles of forces, moments, resultants & static equilibrium of force systems, center of gravity, friction, and free body diagram analysis. Also concept of stress and strain, shear, bending moments, torsion, bending stresses in

beams and stress resolution and shear.

Five lectures per week.

Pre-requisite(s): PHYS 2010/L or PHYS 2210/L; MATH 1060 or MATH 1080 or MATH 1210.

MFET 2310 - Statics for Engineering Technology

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Topics include: Principles of forces, moments, resultants & static equilibrium of force systems, center of gravity, friction, and free body diagram analysis.

Pre-requisite(s): PS PHYS 2010/L or PS PHYS 2210/L and MATH 1210 or MATH 1110.

MFET 2320 - Mechanics of Materials

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Topics include: Principles of stress and strain, shear, bending moments, torsion, and bending stresses in beams.

Pre-requisite(s): MFET 2310.

MFET 2360 - Manufacturing Processes and Materials

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Survey of industrially important processes used to change material shape and condition for industrial use. Survey of industrially important materials and the principles of material behavior.

MFET 2410 - Quality Concepts and Statistical Applications

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This is the first course in a series of three designed to impart the Six Sigma body of knowledge. It integrates managerial, technological and statistical concepts across all functions of an organization to ensure that a product is fit for use. Provides a foundation in current quality paradigms and introduces students to software tools (MS Excel and Minitab) used to statistically analyze problems encountered in manufacturing firms.

Three lectures per week.

Pre-requisite(s): MATH 1010 or Aleks (score: 30 or above).

MFET 2440 - Computer Numeric Control (CNC) in Manufacturing

Credits: (2)

Typically Taught Spring Semester: *Full Sem*

This course is designed for those who have little or no experience with CNC programming, setup or operations. Manual programming, APT programming, and Mazatrol (a conversational programming language) will be taught. In addition, an introduction to CAD/CAM will also be discussed.

A three-hour lab, once a week is required.

Pre-requisite(s): MATH 1080 or MATH 1050 and MATH 1060; MFET 1210.

Co-Requisite(s): MFET 2440L.

May be repeated 3 times up to 6 credit hours.

MFET 2440L - CNC in Manufacturing Lab

Credits: (1)

Applications of the theory taught in MFET 2440.

Introduction to the setup & operation of the CNC lathe and mill.

One 3-hour lab per week.

Co-Requisite(s): MFET 2440.

MFET 2500 - Process Automation I

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A study of the elements used in manufacturing automation and control technologies including: basic elements of an automated system, cost benefit analysis, programmable logic controllers, robotics (servo and non-servo), material handling devices and automated inspection technologies.

One 50 minute lecture per week.

Pre-requisite(s): EET 1850.

Co-Requisite(s): MFET 2510.

MFET 2510 - Process Automation I Lab

Credits: (2)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Students duplicate demonstration sequences of automation equipment and develop new routines in: Controlling servo and non-servo robots, computer-aided manufacturing

systems, programmable logic controllers, and other devices used in process automation. Labs will include additional lectures.

Pre-requisite(s): EET 1850.

Co-Requisite(s): MFET 2500.

MFET 2550 - Basics of Quality Engineering

Credits: (2)

Approaches quality from the perspective of the production technician using applied statistics, total quality concepts, inspection techniques and methods and nonconforming material control. Addresses sampling principles used in production management as well as a review of industry accepted standards. (ASQC Series)

Note: This course is offered in the evenings only.

MFET 2610 - Quality Improvement Principles and Techniques

Credits: (2)

This course assesses vital knowledge of quality tools and their uses by individuals, from non-traditional quality areas, who are involved in quality improvement projects. The course examines the rapid spread of quality principles and practices throughout organizations, and covers the essentials of quality management for individuals who manage quality programs, but who are not necessarily specialized in traditional quality areas. The course prepares students for the Certified Quality Improvement Associate examination administered by the American Society for Quality.

MFET 2670 - GMA, FCA and GTA Welding

Credits: (1)

Typically Taught Spring Semester: Full Sem

Theory and skills course covering Gas Metal Arc Welding, Flux Core Arc Welding, and Gas Tungsten Arc Welding.

Pre-requisite(s): MFET 2150/MFET 2150L or MFET 2153.

Co-Requisite(s): MFET 2670L.

MFET 2670L - GMA, FCA and GTA Welding Lab

Credits: (2)

Typically Taught Spring Semester: Full Sem

A "hands on" lab that reinforces the theory and skills

course (MFET 2670) covering Gas Metal Arc Welding, Flux Core Arc Welding, and Gas Tungsten Arc Welding.

Pre-requisite(s): MFET 2150/MFET 2150L.

Co-Requisite(s): MFET 2670.

MFET 2830 - Directed Readings in Manufacturing Engineering Technology

Credits: (1-3)

Typically Taught Fall Semester: Full Sem

Individual research on topics requested by industry or which meet special needs of Manufacturing Engineering Technology students.

Pre-requisite(s): Departmental approval.

MFET 2850 - CNC/CAM for Plastics and Composites Lecture/Lab

Credits: (3)

Typically Taught Fall Semester: Full Sem

Traditional and nontraditional methods for machining organic-matrix and metal-matrix composites are reviewed. Traditional machining procedures are discussed together with the damage introduced into composites by these manipulations. Computer Numerical Control (CNC) codes and Computer Aided Manufacturing are covered, focusing on the production of plastic products and tooling. Machining concepts also including laser, water-jet, electrodischarge, electrochemical spark, and ultrasonic machining.

Pre-requisite(s): MFET 1210/L.

MFET 2860 - Plastics/Composites Materials & Properties

Credits: (3)

Typically Taught Fall Semester: Full Sem

Coverage of the most common commercial plastics including their additives, fillers, and fibers; includes common physical tests used to determine material characteristics; writing intensive.

Pre-requisite(s): CHEM 1110.

MFET 2870 - Design of Plastics/Composites Products

Credits: (3)

Typically Taught Spring Semester: Full Sem

Designing plastic parts utilizing CAD and CAE technologies for the design and for structural, dimensional, and process evaluation and optimization. A strong

emphasis in design principles related to design of plastics products. Also analysis of functional requirements, structural properties, aesthetic qualities and cost relationships. The student will gain experience in product design and material evaluation.

Pre-requisite(s): PDD 1160 and MFET 2860.

MFET 2890 INT - Cooperative Work Experience

Credits: (1-3)

Typically Taught Fall Semester: *Full Sem*

Open to all second year students in Manufacturing Engineering Technology. A continuation of MFET 1890.

MFET 2920 - Short Courses, Workshops, Institutes and Special Programs

Credits: (1-3)

Variable Title

Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript.

Pre-requisite(s): Departmental approval.

MFET 3010 - Tool Design

Credits: (3)

Principles of workpiece control including: Geometric, dimensional, and mechanical control. Other topics include: process tolerance stacks, design of special tools and gauges, applications in the production of manufactured parts, tool drawings, specifications, and modular tooling.

Three lectures per week.

Pre-requisite(s): MFET 1210; PDD 1160.

MFET 3060 - Codes, Weld Inspection, and Quality Assurance

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Study of ASME and AWS codes as relating to procedure qualification and welder qualification for fabrication of pressure vessels and structures, and how codes relate to quality assurance and ISO 9000.

Pre-requisite(s): MFET 2150/MFET 2150L or MFET 2153.

MFET 3310 - Material Selection and Heat Treat

Credits: (2)

Terminology, concepts and principles involved in the selection, specification and processing of engineering materials so they meet design criteria including load, life, and appearance. Testing methods to determine those properties and characteristics. Manual and computer assessing of material data.

Two lectures per week.

Pre-requisite(s): MFET 1210/L, MFET 2300, CHEM 1110.

Co-Requisite(s): MFET 3310L.

MFET 3310L - Material Selection and Heat treat Lab

Credits: (1)

Application of theory taught in MFET 3310.

One 2-hour lab per week.

Co-Requisite(s): MFET 3310.

MFET 3320 - Machine Design

Credits: (2)

Application of engineering fundamentals to the design of individual machine components such as shafts, couplings, springs, bearings, gears, fasteners, clutches, and breaks. Students will be required to complete a design project emphasizing manufacturing equipment.

Two lectures per week.

Pre-requisite(s): MFET 2300.

MFET 3340 - Applied Fluid Power

Credits: (2)

Typically Taught Fall Semester: *Full Sem*

Principles of fluid mechanics and component operation as they apply to the design of hydraulic and pneumatic systems. Computer programs may be used to analyze and design systems. Two lectures per week.

Pre-requisite(s): MFET 2300 or MFET 2320 or ENGR 2010 and ENGR 2140; PHYS 2010/L or PHYS 2210/L.

Co-Requisite(s): MFET 3340L.

MFET 3340L - Applied Fluid Power Lab

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Application of the theory taught in MFET 3340.

One 2-hr lab per week.

Co-Requisite(s): MFET 3340.

MFET 3350 - Plastic and Composite Manufacturing

Credits: (2)

Typically Taught Fall Semester: *Full Sem*

Design and processing of plastic and composite materials for industrial applications.

Two lectures per week.

Pre-requisite(s): CHEM 1110 or CHEM 1210.

Co-Requisite(s): MFET 3350L.

MFET 3350L - Plastic and Composite Manufacturing Lab

Credits: (2)

Typically Taught Fall Semester: *Full Sem*

Application of the theory taught in MFET 3350.

Two 2-hr labs per week.

Pre-requisite/Co-requisite: MFET 3350.

MFET 3460 - Engineering Design using Solid Modeling

Credits: (2)

Typically Taught Fall Semester: *Full Sem*

An advanced computer-aided design course using state-of-the-art solid modeling CAD/CAM software. Topics include: 3D parametric solid modeling, applications associativity, design-by-feature, assembly modeling, injection mold design, flat pattern development, design analysis using FEA, realistic rendering, and detailing.

Pre-requisite(s): PDD 1010.

Co-Requisite(s): MFET 3460L.

MFET 3460L - Engineering Design using Solid Modeling Lab

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Lab assignments will include: Fundamentals of 3D parametric solid modeling, Extrude & Revolve Features, Sweep & Loft Features, Assembly Modeling, Injection Mold Design, Flat Pattern Development, Design Analysis using FEA, and others.

Pre-requisite(s): PDD 1010 and WEB 1700.

Co-Requisite(s): MFET 3460.

MFET 3510 - Basics of Supply Chain Management

Credits: (2)

Introductory course for production and inventory management personnel which provides basic definitions and concepts for planning and controlling flow of materials into, through, and out of an organization. Explains fundamental relationships of supply chain from suppliers to customers. Addresses manufacturing systems, forecasting, master planning, material requirements planning, capacity management, production activity control, purchasing, inventory management, distribution, quality management, and Just-in-Time manufacturing. (APICS Series).

Note: This course is offered in the evenings only.

MFET 3550 - Manufacturing Supervision

Credits: (3)

Typically Taught Fall Semester: *Full Sem Online*

Typically Taught Spring Semester: *Full Sem*

The application of supervision skills. Students will gain an understanding of; motivation of subordinates, personal leadership theories, problem-solving and decision-making techniques, organizational communication, employee selection, evaluation and training process, and organizational structures. Topics will include; the American Disabilities Act, OSHA and environmental issues, Equal opportunity Employment, and Affirmative Action issues. Three lectures per week.

Pre-requisite(s): MFET 2410 (or MATH 1040).

MFET 3560 - Advanced Quality Engineering

Credits: (2)

Addresses the application of advanced quality techniques by personnel in positions of responsibility such as manufacturing leads and supervisors. Uses statistics, metrology, inspection methods, quality management concepts, and sampling principles to address process decisions involving both overall quality and costs. (ASQC Series).

Pre-requisite(s): MFET 2550.

Note: This course is offered in the evenings only.

MFET 3570 - Manufacturing Quality Auditing

Credits: (2)

Utilizes auditing principles and quality management tools and techniques to prepare an individual to plan and conduct, or prepare an organization, for a quality audit. Links directly to process associated with implementation of ISO 9000 standards.

Two one-hour lectures per week. (ASQC Series).
Pre-requisite(s): MFET 2410 or equivalent.
Note: This course is offered in the evenings only.

MFET 3580 - Certified Mechanical Inspector

Credits: (2)

Provides the student with terminology, concepts and tools needed to be professionally competent in advanced quality management. The course will also be helpful to those preparing to take the ASQC CMI Certification Exam. (ASQC Series).

Note: This course is offered in the evenings only.

MFET 3610 - Machining Processes Lecture/Lab II

Credits: (3)

The manufacture and assembly of precision and interchangeable parts using conventional lathes, mills, drills, and grinders. Introduction to geometric dimensioning & tolerancing (GD&T), and advanced inspection techniques. Students will utilize lab time to complete assignments as required.

One lecture per week and two 3-hour labs per week are required.

Pre-requisite(s): MFET 1210.

MFET 3620 - Senior Capstone Project Planning

Credits: (.5)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course must be taken the semester prior to beginning the MFET senior project sequence of classes (MFET 4610, MFET4610L and MFET 4620L). Capstone requirements will be discussed. Capstone projects will be selected and teams formed with faculty input.

Pre-requisite(s): Department Approval.

MFET 3630 - Fusion Joining and Brazing Processes

Credits: (2)

Typically Taught Fall Semester: *Full Sem*

Study of SAW, ESW, GMAW, EG, RW, PAW, PAC, Electron Beam, Laser, Friction, Brazing, and other welding processes.

Pre-requisite(s): MFET 2670/MFET 2670L.

Co-Requisite(s): MFET 3630L.

MFET 3630L - Fusion Joining and Brazing Processes

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

A "hands-on" lab that reinforces the concepts taught in MFET 3630 of SAW, ESW, GMAW, EG, RW, PAW, PAC, Electron Beam, Laser, Friction, Brazing, and other welding processes.

Pre-requisite(s): MFET 2670/MFET 2670L.

Co-Requisite(s): MFET 3630.

MFET 3650 - Quality Management Institute

Credits: (3)

This course consists of application process control and problem solving techniques including statistical process control (SPC), measurement systems analysis, and process capability analysis. Students will apply cause-and-effect diagrams, check sheets, sampling, line and bar charts, Pareto charts, scatter diagrams, variation, probability plots, x-R charts, gate repeatability and reproducibility (gage R & R) on course projects. Curriculum will include practical application exercises.

Pre-requisite(s): MFET 2410, MATH 1010 Intermediate Algebra or equivalent, and Basic Statistics course (MATH 1040) or equivalent.

MFET 3710 - Computer Aided Manufacturing and Rapid Prototyping

Credits: (2)

Typically Taught Spring Semester: *Full Sem*

This course will introduce and explain concepts behind Computer-Automated Manufacturing (CAM). It will define elements, terms, and concepts involved with CAM. Elements of rapid prototyping will also be covered from conceptual design in solids to production of tooling and parts. This course is designed for those who have the basic understanding of the setup and operation of CNC machine tools and programming. Software will be used to perform the CAM operations, such as part generation and post processing.

Pre-requisite(s): MFET 2440/MFET 2440L, PDD 1010, PDD 1160 or MFET 3460.

Co-Requisite(s): MFET 3710L.

MFET 3710L - Computer Aided Manufacturing and Rapid Prototyping Lab

Credits: (1)

Typically Taught Spring Semester: *Full Sem*

A "hands-on" lab that reinforces the concepts taught in MFET 3710. Students will learn how to transfer CNC part programs from a PC to the CNC machine controller.

Testing, editing and running their part programs on the CNC machines will also be covered.

May be repeated twice up to 3 credit hours.

MFET 3750 - Welding Metallurgy I

Credits: (2)

Typically Taught Fall Semester: *Full Sem*

Metallurgical principles applied to welding and weldability of ferrous metals.

Pre-requisite(s): MFET 2150/MFET 2150L or MFET 2153, CHEM 1110 or CHEM 1210.

Co-Requisite(s): MFET 3750L.

MFET 3750L - Welding Metallurgy I Lab

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

A "hands-on" lab that reinforces the concepts taught in MFET 3750 of metallurgical principles applied to welding and weldability of ferrous metals.

Pre-requisite(s): MFET 2150/MFET 2150L, CHEM 1110.

Co-Requisite(s): MFET 3750.

MFET 3760 - Welding Metallurgy II

Credits: (2)

Typically Taught Spring Semester: *Full Sem*

Metallurgical principles applied to welding and weldability of nonferrous metals.

Pre-requisite(s): MFET 3750/MFET 3750L.

Co-Requisite(s): MFET 3760L.

MFET 3760L - Welding Metallurgy II Lab

Credits: (1)

Typically Taught Spring Semester: *Full Sem*

A "hands-on" lab that reinforces the concepts taught in MFET 3760 of metallurgical principles applied to welding and weldability of nonferrous metals.

Pre-requisite(s): MFET 3750/MFET 3750L.

Co-Requisite(s): MFET 3760.

MFET 3810 - Manufacturing Process Planning and Introduction to Systems Design

Credits: (3)

Experimental Course, Contact Department for More Information

Fundamentals of process planning. Analyzing product specifications and production requirements for manufacturing. Equipment selection and its relationship to basic facility layout, production management systems and material-handling system design for mrp based systems and lean flow systems.

MFET 3820 - Nondestructive Testing

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

Fundamental concepts relating to liquid penetrant, magnetic particle, ultrasonics, and radiography and other NDT processes.

Pre-requisite(s): MATH 1210 or MATH 1110 and PHYS 2010 or PHYS 2210.

MFET 3830 - Reinforced Plastics/Advanced Composite Lecture/Lab

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

Polymer and reinforcement systems; material testing; mold design and development; laboratory involvement in reinforced plastics production processes.

Pre-requisite(s): MFET 3350/MFET 3350L and MFET 2860.

MFET 3870 - Mold Design and Process Strategies Lecture/Lab

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Overview of mold design and the development of strategies and techniques integrating CAD and CAE technologies for optimizing part quality, moldability, and productivity.

Additional study on design and construction of various types of production molds that are used for processing plastics in final shape. Product design in relationship to molding techniques and various techniques and materials used to construct the molds are the major units of study.

Pre-requisite(s): MFET 2850 and MFET 2870.

MFET 3890 INT - Cooperative Work Experience

Credits: (1-3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Open to all third year students in Manufacturing Engineering Technology. A continuation of MFET 1890.

MFET 4050 - Detailed Scheduling and Planning I

Credits: (2)

Techniques and practices of detailed scheduling and planning of inventory management including order review methodologies, policies and functions of inventory. Covers lot sizing, safety stock techniques, demand, and Just-in-Time as they relate to detailed scheduling and planning.

Pre-requisite(s): MFET 3510 or equivalent. (APICS series).

Note: This course is offered in the evenings only.

MFET 4090 - Welding Power Sources

Credits: (2)

Typically Taught Fall Semester: *Full Sem*

Study of power sources used to generate and control voltage and amperage for welding.

Two lectures per week.

Pre-requisite(s): EET 1850.

MFET 4150 - Execution and Control of Operations

Credits: (2)

Focuses on prioritizing and sequencing work, executing work plans, implementing controls, reporting activity results, and evaluating and providing feedback on performance. Eval.

Pre-requisite(s): MFET 3510 or equivalent. (APICS Series).

Note: This course is offered in the evenings only.

MFET 4200 - Manufacturing Processes

Credits: (2)

Manufacturing processes define the methods that companies use in designing, producing, and delivering goods and services required by customers. The manufacturing processes provide the execution component to the other activities of the integrated manufacturing

system. Beginning with customer requirements and needs, they design, build, operate, upgrade, and maintain a manufacturing process which is most supportive of and consistent with those needs and requirements. To achieve these objectives, manufacturing processes draw on three different but very interrelated subsystems: industrial facilities management, process design and development, and manufacturing. (APICS Series)

Note: This course is offered in the evenings only.

MFET 4210 - Cost Estimating and Engineering Economics

Credits: (2)

Production cost structure, operation costing, break-even analysis, make buy decision, and capital equipment justification. Computer aids are used to analyze cost data. Three lectures per week.

Pre-requisite(s): MATH 1080; WEB 1700.

Co-Requisite(s): MFET 4610.

MFET 4250 - Detailed Scheduling and Planning

Credits: (2)

Detailed explanation of inventory management including order review methodologies, policies and functions of inventory. Covers material requirements planning (MRP) and other material planning and capacity requirements planning techniques. Includes concepts, principles, interfaces, desired characteristics, applications, and supplier relations.

Pre-requisite(s): MFET 3510 or equivalent. (APICS Series)

Note: This course is offered in the evenings only.

MFET 4300 - Design of Experiments

Credits: (2)

A step-by-step description of procedures used to organize, conduct and evaluate industrial experiments. Emphasizes the usefulness of results and the decision criteria for choosing the proper design.

Pre-requisite(s): MFET 2410

MFET 4310 - Corrosion and Corrosion Control

Credits: (2)

Typically Taught Spring Semester: *Full Sem*

Analysis of corrosion mechanisms for ferrous metals,

nonferrous metals, and nonmetallic materials, as well as the control of corrosion.

Pre-requisite(s): CHEM 1110 and MATH 1080.

MFET 4315 - Welding Robotics

Credits: (2)

Typically Taught Spring Semester: *Full Sem*

This course is designed to introduce students to welding robot programming and applications. Students will demonstrate skills learned in welding robot programming in applied labs. They will learn parameters, terms and nomenclature and obtain knowledge of applications and configurations in industry settings.

Pre-requisite(s): MFET 2670, MFET 2670L.

MFET 4350 - Principles of Lean Manufacturing

Credits: (2)

Typically Taught Spring Semester: *Online*

This course introduces students to lean manufacturing and waste reduction concepts such as work standardization, visual manufacturing & workplace organization, value stream mapping, setup reduction & batch size reduction, quality at the source, point of use storage, total productive maintenance, pull systems/kanbans, tack time calculation and cellular/synchronous manufacturing design concepts. A combination of lectures, videos and hands on exercise will be used.

MFET 4550 - Advanced Quality Principles

Credits: (2)

Provides advanced study in all aspects of the application of quality principles to a production environment. The course will involve case study and application of quality theory. Students should have a broad knowledge of organizational structure and planning, quality techniques, customer satisfaction and focus, project management, and human resource management. Cooperative experience in a business/industry is recommended. (ASQC Series)

Pre-requisite(s): MFET 2410 or equivalent.

Note: This course is offered in the evenings only.

MFET 4580 - Process Automation II & Robotics

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

An advanced study of the elements used in manufacturing automation and control technologies including: the use of basic elements of an automated system, cost benefit analysis, programmable logic controllers, robotics (servo and non-servo), material handling devices and automated inspection technologies. One 1-hour lecture per week.

Pre-requisite(s): MFET 2500 and MFET 2510.

Co-Requisite(s): MFET 4585.

MFET 4585 - Process Automation II Lab

Credits: (2)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Students work in teams to demonstrate proficiency programming individual automated manufacturing stations using Allen Bradley PLCs (Cognex Vision Systems, RF Systems, bar coding, pick and place feeding station, gauging station, part orientation processing station, sorting-buffering station, servo robotic assembly station-Fanuc, torque assembly station, inventory storage station, electro-hydraulic station). Students then work as a class to integrate an entire manufacturing process using all of the stations for a small part. Labs will include additional lectures.

Pre-requisite(s): MFET 2500 and MFET 2510.

Co-Requisite(s): MFET 4580.

MFET 4610 - Senior Project Management & Cost Estimating

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This is designed as a capstone course for students and is to be taken in the senior year of their program. The course will teach students fundamental principles in Project Management, Cost Estimating, and Engineering Economics that will be necessary to successfully complete their Senior Project experience. Students must apply and gain departmental approval before entering Senior Project. Approval is based on an interview with department faculty and fulfilling the prerequisites listed on the "Senior Project Requirements Sheet" available from the department secretary. All students approved for Senior project will register for this course regardless of individual project group assignments.

Pre-requisite(s): MFET 3620 and AAS or AS Degree.

Co-Requisite(s): MFET 4610L for manufacturing students or PDD 4600 for design graphics students.

MFET 4610L - Senior Project Lab

Credits: (2)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Must apply for senior project before March 1 of the previous year. Must have department approval. Approval is based on an interview with department faculty and fulfilling the prerequisites listed on the "Senior Project Requirements Sheet" available from the department secretary. Time: as required to complete the project. Two consecutive semesters.

Co-Requisite(s): MFET 4610 (with MFET 4610L only).

MFET 4620L - Senior Project Lab

Credits: (2)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Must apply for senior project before March 1 of the previous year. Must have department approval. Approval is based on an interview with department faculty and fulfilling the prerequisites listed on the "Senior Project Requirements Sheet" available from the department secretary. Time: as required to complete the project. Two consecutive semesters.

MFET 4650 - Software Quality Engineering Principles

Credits: (2)

This course prepares the student to incorporate quality development and implementation as a software design team member. The course provides instruction on concepts, principles and techniques to develop a comprehensive understanding of software inspection, testing, verification, and validation. Participants will learn to implement software development and maintenance processes and methods. This course also prepares the student for the Certified Systems Quality Engineer examination administered through American Society for Quality.

MFET 4670 - Reliability Engineering Principles

Credits: (2)

This course prepares the student to work as a design team member to incorporate reliability considerations into a basic design. Course provides information on application of proven techniques to achieve quality product results. This course also prepares the student for the Certified Reliability Engineer examination administered through American Society for Quality.

MFET 4750 - Master Planning of Resources

Credits: (2)

Explore processes used to develop sales and operations plans, forecast internal and external demand, create the master schedule consistent with business policies, objectives and resource constraints. (APICS series).

Pre-requisite(s): MFET 3510.

Note: This course is offered in the evenings only.

MFET 4770 - Strategic Management of Resources

Credits: (2)

The relationship of existing and emerging processes and technologies to manufacturing strategy and supply chain related functions. Addressing aligning resources with strategic plan, integrating operating processes to support the strategic plan, and implementing change.

Pre-requisite(s): MFET 3510 and be familiar with concepts addressed in all other APICS courses. (APICS series).

Note: This course is offered in the evenings only.

MFET 4800 - Individual Research in Manufacturing Technology

Credits: (1-3)

Special individual research and development projects in Manufacturing and Engineering Technology. Credit and time determined by the student and the faculty project supervisor.

Pre-requisite(s): Permission of instructor.

MFET 4830 - Directed Readings in Manufacturing Engineering Technology

Credits: (1-3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Must have department approval.

MFET 4850 - Integration of Automated Systems

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

An Advanced Automation course designed to give the student both theory and practical application in control and

integration issues dealing with automated equipment. Selected topics include motor controllers, PID's, data collection and transfer devices, vision systems, and systems integration issues.

Pre-requisite(s): MFET 4580/MFET 4585.

MFET 4890 INT - Cooperative Work Experience

Credits: (1-3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Open to all fourth year students in Manufacturing Engineering Technology. A continuation of MFET 1890.

MFET 4920 - Short Courses, Workshops, Institutes and Special Programs

Credits: (1-3)

Variable Title

Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript. Juniors and Seniors only. Faculty approval required.

MFET 4995 - Certified Manufacturing Technologist (CMfgT) Exam Review

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course is designed to provide a structured review for the student to take the Certified Manufacturing Technologist (CMfgT) Exam.

Pre-requisite(s): MSE 3910 or MFET 3910.

MFET 5100G - Introduction to Engineering Design (IED)

Credits: (5)

IED provides students with opportunities to be creative and to apply their decision-making and problem-solving skills to design problems. Students use powerful computer hardware and software (Inventor) to develop 3-D models or solid renderings of objects. Using a Computer Aided Design System, students learn the product design process through creating, analyzing, rendering and producing a model. The course meets for a total of 75 hours over a two-week period and focuses on the content as well as teaching methods appropriate for the course. This course is designed specifically and only for current high school teachers who

have been assigned by their schools and districts to teach the Project Lead the Way courses in their respective schools. These courses carry graduate credit for those teachers who would use them as part of a master's degree program or for recertification.

MFET 5300G - Principles of Engineering (POE)

Credits: (5)

POE is designed to help students understand the field and the career possibilities of engineering and engineering technology. Students work on the problem-solving skills that are used at the college level and in the workplace, and they explore engineering systems and manufacturing processes. Students learn how engineers address concerns about the social and political consequences of technological change. The course meets for a total of 75 hours over a two-week period and focuses on the content as well as teaching methods appropriate for the course. This course is designed specifically and only for current high school teachers who have been assigned by their schools and districts to teach the Project Lead the Way courses in their respective schools. These courses carry graduate credit for those teachers who would use them as part of a master's degree program or for recertification.

MFET 5400G - Computer Integrated Manufacturing (CIM)

Credits: (5)

CIM is a course that applies principles of prototyping, robotics, and automation. It builds on the solid modeling skills developed in Introduction to Engineering Design. Students use computer-controlled equipment to solve problems by constructing models of their three-dimensional designs. Students are also introduced to the fundamentals of robotics and to how this equipment is used in an automated environment. Students evaluate their design solutions using various techniques and modifications before they produce the prototype. The course meets for a total of 75 hours over a two-week period and focuses on the content as well as teaching methods appropriate for the course. This course is designed specifically and only for current high school teachers who have been assigned by their schools and districts to teach the Project Lead the Way courses in their respective schools. These courses carry graduate credit for those teachers who would use them as part of a master's degree program or for recertification.

MFET 5500G - Engineering Design and Development (EDD)

Credits: (5)

In this course, students work on a team with one or two others to design and construct the solution to an engineering problem. The problems involve a wide range of engineering applications (e.g., a school robo-mascot, automated solar water heater, remote control hover craft). The course serves as a capstone course where students apply the principles they developed in previous courses. A journal is part of each student's portfolio. Each team is responsible for delivering progress reports and making final presentations to an outside review panel. The course meets for a total of 75 hours over a two-week period and focuses on the content as well as teaching methods appropriate for the course. This course is designed specifically and only for current high school teachers who have been assigned by their schools and districts to teach the Project Lead the Way courses in their respective schools. These courses carry graduate credit for those teachers who would use them as part of a master's degree program or for recertification.

MFET 6050 - Gateway to Technology**Credits: (1-4)****Typically Taught Summer Semester: 2nd Blk**

Gateway to Technology is a course designed specifically and only for current high school teachers who have been assigned by districts to teach the related Project Lead the Way course in their respective schools. Gateway to Technology introduces the Project Lead the Way series of courses covering the principles of engineering and technology. The course promotes an understanding of the field of technology and covers the continuous evolution of technology, the positive and negative impact of technology on our society, and career opportunities in technology. The various modules in this course will utilize a train the trainer approach. Teachers will learn technical content, teaching methodologies used to present the course, and the Project Lead the Way learning management system (Canvas). Credit hours will be based on the number of modules taken (two credits for each one-week module). May be repeated 4 times and up to 8 credit hours.

MGMT 3010 - Organizational Behavior and Management**Credits: (3)**

Typically Taught Summer Semester: *Full Sem, Full Sem Online*

Typically Taught Fall Semester: *Full Sem, Full Sem Online*

Typically Taught Spring Semester: *Full Sem, Full Sem Online*

Focus of the course is on individual and group behavior in

an organizational setting and on decision processes. Examples of topics included are motivation, group behavior, organizational design and development, organizational culture, and decision making theory.

MGMT 3200 - Managerial Communications**Credits: (3)**

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Study of corporate communication methods to improve communication in organizations. Written and oral reports tailored to achieve strategic goals contingent upon business situations.

Pre-requisite(s): ENGL 1010, ENGL 2010.

MGMT 3300 - Human Resource Management**Credits: (3)**

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Study of principles and methods in managing specific aspects of human resources, either as an operating manager or as a human resource specialist. Topics include: legal constraints in managing human resources, strategic planning of human resources, recruitment, selection, orientation, performance evaluation, employee/ labor relations and communication programs, safety and health, and work scheduling. The computer will be used for analysis in certain areas studied.

Pre-requisite(s): BSAD 2899; MGMT 3010.

MGMT 3350 - Employment and Labor Law**Credits: (3)**

Typically Taught Fall Semester: *Full Sem*

This course will focus on legal and ethical issues most closely associated with Human Resource Management. Title VII of the Civil Rights Act of 1964, ADEA, and ADA form the heart of this course. Other topics include FLSA, OSHA, ERISA, sexual harassment, drug testing and privacy. Labor law issues include preventing unionization, and dealing effectively with a union.

Pre-requisite(s): BSAD 2899; MGMT 3300.

MGMT 3400 - International Business

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

An exploration of the role of multi-national corporations in worldwide economic development and an analysis of the management processes of such corporations.

Pre-requisite(s): BSAD 2899.

MGMT 3450 - Business Studies Abroad- International Management

Credits: (3)

An exploration of the internationalization of economies and the analysis of international decision-making. Focus is internationalization as the central challenge for management. This course is taught at Fachhochschule Hof, Germany during each fall semester. Students enrolled in this course have to participate in the Study Abroad Program (Contact: Doris Geide-Stevenson, ext. 7634, dgsteven@weber.edu).

Pre-requisite(s): BSAD 2899, MGMT 3010.

May be repeated 3 times for credit.

MGMT 3550 - The Cultural Environment of International Business

Credits: (3)

This course considers issues in communication, negotiation and culture in international business relations. Topics include the role of language and nonverbal communication, contrasting cultural values and using sources of information on the culture of international business.

Pre-requisite(s): BSAD 2899.

MGMT 4300 - Leadership and Group Effectiveness

Credits: (3)

Typically Taught Summer Semester: *1st Blk*

Typically Taught Fall Semester: *1st Blk*

Typically Taught Spring Semester: *1st Blk*

This course is about getting things done through the use of influence. The course emphasizes influencing others and influencing a situation. Power and other forms of influence are studied in-depth. Topics also include an examination of group behavior in work setting and the management of work groups. All stages of group development are studied from the forming stage of a group to its development as a high performance, self managed team.

Pre-requisite(s): MGMT 3010 or COMM 3550 or HAS 3260.

MGMT 4310 - Compensation and Benefits

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

This course is intended to provide the student with a basic working knowledge of compensation and benefits as an important part of the broader Human Resources field. The topics to be covered include: benefits management, job analysis, job evaluation, performance appraisal and recognition, and different approaches to employee compensation. The course is also designed to assist the student in their preparation for professional certification examinations in related areas.

Pre-requisite(s): BSAD 2899, MGMT 3300.

MGMT 4320 - Staffing Organizations

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Designed to provide students with the knowledge and skills necessary to effectively analyze and project organizational staffing requirements, recruit and select candidates, and effectively place employees in today's complex organizations. Includes treatment of legal aspects of staffing process.

Pre-requisite(s): BSAD 2899, MGMT 3300.

MGMT 4350 - Training

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

This course is designed to provide prospective human resource managers with an understanding of the applicable theory and with the "tools" required to effectively manage the training function within an organization.

Pre-requisite(s): BSAD 2899, MGMT 3300.

MGMT 4400 - Advanced Organizational Behavior

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

An in-depth study of leadership and organizational behavior. Focus is on the structural and behavioral variables that are most significant for organizational effectiveness. Both theory and application are emphasized.

Pre-requisite(s): MGMT 3010 or COMM 3550 or HAS 3260.

MGMT 4410 - Leadership Through Character

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course will provide students access to the concepts and skills to possess the competencies, commitment, emotional intelligence and character to be effective leaders. While competencies and commitment are important, character plays a critical role in leadership behavior and will be the focus of this course. By character it is meant the combination of traits, values and virtues that are recognized as admired and appreciated in leaders, providing them with the expertise to exercise quality of judgment and decision-making. For example, in the financial crisis of 2008 - 2009 some corporate leaders' needs for instant gratification triumphed over temperance; and others who knew ethical risks were taken remained silent because they did not have the skills or courage to speak up. A component of this course is to explore the fundamentals of corporate governance, emphasizing the leader's responsibility to make ethical, socially responsible, legal, and wise financial decisions on behalf of the organization. We will explore a number of corporate examples that demonstrate positive and negative character development. Effective corporate governance requires leaders know the purpose or values of the organization, design the space of the organization to achieve its purpose, organize the flow of power within the organization, and manage the relationships of the key stakeholders in the organization: owners, directors, managers, employees, customers, suppliers, regulators, and the wider community of which the organization is a member. The skills and knowledge acquired in this course are transferable to other areas of life including one's community service and interaction with family and friends.

Pre-requisite(s): MGMT 3010, or HAS 3260, or COMM 3550.

MGMT 4420 - Critical Thinking for Leaders

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

The purpose of this course is to apply a well-rounded and experiential learning process to developing critical thinking skills for leaders. Course topics are broad and include the major branches of philosophy, the nature of thinking and knowledge, the formation of beliefs, perceptual biases, cognitive biases, the nature of memory, the structure and purpose of argument, logic and logical fallacies, the practice of street epistemology, probabilities and statistics,

culture and mass delusions, the philosophy of science, the scientific method, skepticism, and pseudoscience. Application of critical thinking skills will target the human side of business in areas most relevant to leaders - leading, decision making, influence, conflict management and the development of conceptual skills and human capital.

Pre-requisite(s): MGMT 3010, or HAS 3260, or COMM 3550.

MGMT 4650 - Negotiations

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

This course provides an opportunity for management students to obtain an understanding of negotiation concepts and to develop management negotiation skills. Because the objective is skill building, the course emphasizes hands-on experience through negotiation simulations. These role playing exercises are designed to simulate the situations and issues commonly faced in management/organizational settings (e.g., labor negotiations, contract provisions, vendor arrangements).

Pre-requisite(s): BSAD 2899.

MGMT 4800 - Independent Research

Credits: (1-3)

Directed research and study on an individual basis.

Pre-requisite(s): BSAD 2899; Senior Standing; Written Instructor Approval.

May be repeated until a total of 4 hours credit is accumulated.

MGMT 4810 - Experimental Courses

Credits: (1-3)

Experimental or one-time courses designed to fill a need in the community or investigate interesting and unusual topics. Refer to Experimental Courses.

May be repeated 5 times with a maximum of 6 credit hours with different topics.

MGMT 4810 - HRM Consulting

Credits: (3)

Experimental Course, Contact Department for More Information

This course provides learners with a high impact educational experience through a "real life" Human Resource Management (HRM) Consulting Project with an actual client, which will be a local Utah company. This

course offers both theoretical and practical experiences. Participants will be instructed in the consultancy lifecycle and project management principles. Students will be placed in "consulting groups" and will compete to deliver an HRM solution (end to end) for the client. The first 3 weeks will be dedicated to principle instruction and client meetings. The remaining weeks will be utilized to work on the client project, culminating in a presentation of the solution to the client Senior Management team.

MGMT 4810 - Seminar in Advanced Leadership

Credits: (3)

Experimental Course, Contact Department for More Information

This is primarily an online course but will be combined with a 3-hour Zoom session one night a week. The course will take students through a deep and introspective consideration of the following questions and issues related to leadership: (1) What are the values and character traits needed to be an effective leader? (2) How can people assess and develop the requisite competencies and attributes for effective leadership? (3) How can leaders best use power to influence and motivate followers to engage with their "hearts, minds and souls" through a compelling mission, vision and purpose? (4) And finally, what is the connection between leadership, character, company culture and a business's potential competitive advantage?

MGMT 4850 - Management Study Abroad

Credits: (1-3)

This course is designed for students who wish to explore management theory and practice in countries other than the U.S. Students will study international business as offered through a partner university (or other university with department chair approval).

Pre-requisite(s): BSAD 2899.

May be repeated once up to 6 credits.

MGMT 4860 - Management Internship

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A structured professional-level field experience. The

student will be counseled and supervised as he/she applies and integrates the knowledge and skills obtained through the Management program courses. Students receiving credit in this course cannot also receive credit in MGMT 4865.

Pre-requisite(s): BSAD 2899; Instructor approval.

MGMT 4865 INT - Human Resource Internship

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A structured professional-level field experience. The student will be counseled and supervised as he/she applies and integrates the knowledge and skills obtained through the Human Resource or Management program. Students receiving credit in this course cannot receive credit for MGMT 4860.

Pre-requisite(s): BSAD 2899; Instructor approval.

MHA 6000 - Health Systems & the Healthcare Economy

Credits: (3)

Typically Taught Fall Semester: *1st Blk, 1st Blk Online*

In-depth analysis and synthesis of all aspects of the health care delivery system emphasizing improvement of health care delivery and access. Examines the complex organizational dynamics and structures that predicate the interaction among major components of the U. S. health care system, including service provider settings in which care is provided. The course surveys the funding systems and regulatory structures for financing healthcare delivery and resource management in health services organizations. Current reform debates will be challenged.

MHA 6100 - Leading & Managing People in Healthcare

Credits: (3)

Typically Taught Fall Semester: *1st Blk, 1st Blk Online*

The course content emphasizes visionary leadership and management of diverse healthcare professionals in complex organizational structures. Individual leadership talents in handling various organizational challenges, such as leading organization change, building strong culture, developing effective teams, resolving conflicts, implementing effective motivational systems, and nurturing a learning organization are investigated.

MHA 6140 - Post Acute Care Administration

Credits: (3)

Seminar analysis of effect of chronic conditions and aging on delivery of health services, nursing homes and alternatives, mental health facilities and agencies, and rehabilitation facilities and services. Field trips and individual research projects.

Note: Check with department for course availability.

MHA 6160 - Medical Group Management

Credits: (3)

Theory and principles of practice management. Emphasis on the fundamentals of organizing, staffing, and controlling a physician practice. Financial applications and resource consumption.

Note: Check with department for course availability.

MHA 6180 - Healthcare Entrepreneurship

Credits: (3)

Develops an understanding of entrepreneurship, its importance for a healthcare organization and the health economy, and the challenges associated with promoting entrepreneurship within healthcare organizations.

Note: Check with department for course availability.

MHA 6200 - Population Health and Data Analytics

Credits: (3)

Typically Taught Fall Semester: *2nd Blk, 2nd Blk Online*

The course addresses the integration of population health into strategic planning and managerial decision-making in health services organizations. Epidemiological principles, social determinates of health, and the improvement of health of the entire population from clinical and managerial perspectives are addressed. This course teaches the necessary fundamentals of data analytics and engages students in the process of analyzing data related to population health topics. Course work includes environmental analysis of community health, and health behaviors and lifestyle that impact demand on health care delivery systems. The student will evaluate models for integration of health services, preventive programs, demand management, and policy issues affecting continuity of care.

Pre-requisite(s): MHA 6000 (may be taken concurrently) or Instructor Approval.

MHA 6240 - Human Resources Management in Healthcare

Credits: (3)

Typically Taught Fall Semester: *2nd Blk, 2nd Blk Online*

Human resources management in healthcare organizations including recruitment and selection of employees, benefits and compensation management, privileging and credentialing of health professionals, performance evaluation, staffing plans, labor relations and labor law relevant to health care organizations.

MHA 6249 - Accounting and Finance Principles for Healthcare Managers

Credits: (3)

Typically Taught Spring Semester: *1st Blk, 1st Blk Online*

The first course in a two-course sequence addressing the accounting and finance knowledge and skills required of successful healthcare managers. It emphasizes the understanding of accounting and finance functions, use and interpretation of documents, reports, and statements, and the ability to work with the accounting and finance professionals in one's organization.

Pre-requisite/Co-requisite: MHA 6000.

MHA 6250 - Healthcare Finance

Credits: (3)

Typically Taught Spring Semester: *2nd Blk, 2nd Blk Online*

Application of financial management techniques to decision making for healthcare providers. Financial management functions and organizations, financial statement analysis, working capital management, present value analysis, capital budgeting, cost of capital, variance analysis, financing techniques, and financial analysis case studies.

Pre-requisite(s): MHA 6000 and MHA 6249 (6249 may be taken concurrently).

MHA 6300 - Quality Improvement and Risk Management in Health Services Organizations

Credits: (3)

Typically Taught Spring Semester: *1st Blk, 1st Blk Online*

A study of the effects of sophisticated quality and health outcome measures as used by individuals, employers and

insurers to compare the results of various providers. The course will cover the forces of external customers and in addition to internal pressures to justify costs, provide continuous quality improvement, risk management, and changes within a complex health care system. Course content will include systems behavior and relationships, creating a culture of safety, using measurement to improve quality, fostering teamwork, and understanding the role of risk management in quality improvement.

Pre-requisite(s): MHA 6000 or Instructor Approval.

MHA 6320 - Health Policy and Economics

Credits: (3)

Typically Taught Spring Semester: *1st Blk, 1st Blk Online*

Economic analysis applied to health services sector; concept of efficiency applied to production and distribution of health services, health insurance, government programs, health care personnel, and health services organizations; current public policy issues; emphasis on student application of economic principles to health care issues.

MHA 6350 - Decision Making for Healthcare Leaders

Credits: (3)

Typically Taught Fall Semester: *1st Blk, 1st Blk Online*

The exploration and application of both quantitative and qualitative data analysis in healthcare organizations. How top level healthcare leaders use the myriad data that comes across their desks to work toward, and to achieve, their organization's mission.

MHA 6360 - Comparative International Health Systems

Credits: (3)

Analysis of key attributes of health care policy in selected countries and comparisons with the US health care system. This course includes an international field trip and appropriate travel expenses will be required of the students. Please check with the course instructor for more details. Note: Check with department for course availability.

MHA 6370 - Executive Leadership Seminars in Healthcare

Credits: (3)

Via a series of in-depth seminars, dialogues, interactions, and/or lectures with top level clinical leaders and healthcare

executives, this course will explore complex and timely healthcare topics and issues of the day from the perspective of successful leaders in the healthcare industry, exploring and analyzing their implementation and application of management and leadership theory and practice as put into effect in a variety of healthcare settings and facilities.

Note: This course is offered as needed.

MHA 6400 - Strategic Health Planning and Marketing

Credits: (3)

Typically Taught Spring Semester: *2nd Blk, 2nd Blk Online*

Various planning approaches, styles and theories are considered from a corporate decision-making perspective within the unique governance structures of health service organizations. Issues covered include strategic planning and resource allocation within integrated health systems. Environmental analysis explores national health care delivery policy, unique financing structures such as third party payment systems, and open vs. regulated markets and development of comprehensive marketing plans.

Pre-requisite(s): MHA 6100 and MHA 6200.

MHA 6440 - Health Ethics and Law

Credits: (3)

Typically Taught Fall Semester: *1st Blk, 1st Blk Online*

Selected legal principles and their application to health field. Legal aspects of corporate liability, medical malpractice, admission and discharge processes, medical staff bylaws, informed consent, nursing, patients' rights, medical records, and governmental regulation of personnel and health facilities.

MHA 6450 - Health Informatics

Credits: (3)

Typically Taught Fall Semester: *2nd Blk, 2nd Blk Online*

This course addresses the concepts and application of health informatics. Topics addressed in the course include: interoperability, IT standards, privacy and security of health information, cybersecurity, strategic planning for IT, and emerging trends in health informatics. Emphasis is placed on the use of data analytics to support management decision making.

MHA 6500 INT - Field Work

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem, Full Sem Online*

This course provides a capstone experience where the student synthesizes theory learned in the classroom and applies it to real world problem solving in health care organizations. Designed to integrate the knowledge gained in other graduate courses into an applied management project. The project will have enterprisewide applicability to a health services organization. The student will develop and present a deliverable product that could be implemented by management to improve their organizational performance, specifically with analysis and recommendations for policy and strategic improvements.

Pre-requisite(s): MHA 6000, MHA 6200, MHA 6300, MHA 6400.

MHA 6810 - Case Study Analysis

Credits: (3)

Experimental Course, Contact Department for More Information

Analysis, Preparation, and Presentation at a national Case Study Competition. Students synthesize theory and apply it to the explicit healthcare circumstance outlined in a case study. Case studies require the demonstration and integration of knowledge, skills, and competencies from prior graduate courses and the application of them to a specific case situation. Students will travel and present their case analysis at a national case competition.

Pre-requisite(s): MHA 6000, and permission of instructor.

MHA 6830 - Directed Study

Credits: (1-3)

Directed individual study and research on special topics related to health care.

Pre-requisite(s): Approval of MHA program and instructor.

May be repeated for a cumulative total of three credits.

Note: This course is offered as needed.

MHA 6840 - Case Study Analysis

Credits: (3)

Analysis, Preparation, and Presentation at a national Case Study Competition. Students synthesize theory and apply it to the explicit healthcare circumstance outlined in the case. Case studies require the demonstration and integration of knowledge, skills, and competencies from prior graduate courses and the application of them to a specific case situation. Students will travel and present their case

analysis at a national case competition.

Pre-requisite(s): MHA 6000, and permission of instructor.

Note: Check with department for course availability.

MHA 6850 - MHA Study Abroad

Credits: (3)

Healthcare has become a global phenomenon. Travel to other countries to see firsthand how their health industries are planned and organized, how care is delivered, and to interact with health leaders, providers, and patients from other countries provides an inarguably rich experience for healthcare leaders. In addition, the study abroad experience requires both sound knowledge of the health industry being observed and scholarly reflection on its effectiveness, efficiency, and success in addressing and meeting that country's healthcare needs.

Pre-requisite(s):

MHA 6000 and permission of instructor.

Note: Check with department for course availability.

MICR 1113 LS - Introductory Microbiology

Credits: (3)

Typically Taught Summer Semester: *Full Sem, Full Sem Online, 1st Blk Online, 2nd Blk Online*

Typically Taught Fall Semester: *Full Sem, Full Sem Online*

Typically Taught Spring Semester: *Full Sem, Full Sem Online*

An overview of how microorganisms are used as model systems to study biology, genetics, metabolism, and ecology; how microorganisms play an integral role in disease and how microbial and immunological methods are used to treat and prevent disease; why microorganisms are found inhabiting a wide range of ecological habitats; how microorganisms play a vital role in biotechnology, fermentation, medicine, and other industries important to human well-being; and how microorganisms play an indispensable role in element cycles, biodegradation, and other aspects of the environment. This course is intended for all students who are not Microbiology majors. This course consists of 3 one-hour lectures/demonstrations per week.

MICR 1153 LS - Public Health: Sex, Travel, Food, & Drugs

Credits: (3)

Typically Taught Summer Semester: *Full Sem, Full Sem Online, 1st Blk Online, 2nd Blk Online*

Typically Taught Fall Semester: *Full Sem, Full Sem - Online*

Typically Taught Spring Semester: *Full Sem, Full Sem - Online*

We live in a microbial world. In this course, we will explore our complicated relationships with microbes, from those used to make bread, beer, and yogurt, to those that cause disease and death. To understand how microbes spread, cause illness, and evolve, we will use current important public health examples and case studies, such as sexually transmitted diseases, antibiotic resistance, measles outbreaks, food-borne illnesses, and drug use and abuse. Students will also learn about current efforts to understand and control our microscopic neighbors, such as vaccines, hand sanitizer, and antibiotics. We will discuss how public health issues are studied, how they influence society, and how we make policy decisions to prevent disease.

MICR 1280 - Life in Medicine

Credits: (1)

Typically Taught Spring Semester: *Full Sem*

This one credit course for premedical students is designed to provide insight into many of the aspects associated with a career in medicine. The objectives of this course include 1.) provision of basic information regarding admission to medical training programs; 2.) exposure to some of the basic tenants necessary for professional success; 3.) investigation of some of the benefits and detriments associated with this challenging career; and 4.) establishing a forum through which students can question and self-assess the feasibility and desire to pursue a medical career. Presentations, group discussions and introspective analysis of selected topics will be lead by a local physicians of various specialties to accomplish these goals. May be repeated once.

MICR 1370 LS - Principles of Life Science

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

A survey course for elementary education majors. Course content includes cells, cell chemistry, genetics, plant and animal anatomy, plant and animal classification, physiology, immune systems, evolution, and ecology. Unifying concepts of all living things will be emphasized. This course consists of 2 hours of lecture and 1 three-hour laboratory per week. Cross-listed with BTNY 1370 and ZOOL 1370.

MICR 1810 - Experimental

Credits: (1-6)

Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript.

This course may be repeated up to five times for credit.

MICR 2054 LS - Principles of Microbiology

Credits: (4)

Typically Taught Summer Semester: *2nd Blk*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Comprehensive introduction to the microbial world, including cell structure and function, metabolism, genetics, ecology, and interactions with humans and other organisms. Discussions include current research topics and applications of microbiology. Laboratory experience focuses on the microscopy, cultivation, control, and identification of microorganisms. This course is designed for science majors, pre-professional students, and Biology Composite Teaching majors. However, anyone meeting the pre- or co-requisites may take this course. This course consists of 3 one-hour lectures and 1 two-hour laboratory per week.

Pre-requisite(s): CHEM 1110 or CHEM 1200 or CHEM 1210. CHEM 1210 may be taken concurrently.

MICR 2600 - Laboratory Safety

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

An interdisciplinary, team-taught course that will be an overview of the major chemical, biological and physical safety issues related to science laboratories and field work. Class will meet once per week and will be taught in a lecture/demonstration format.

Cross-listed with BTNY, CHEM, GEO, and PHYS.

MICR 2890 INT - Cooperative Work Experience

Credits: (1-5)

Open to all students in the Microbiology Department who meet the minimum Cooperative Work Experience requirements of the department. Provides academic credit for on-the-job experience. Grade and amount of credit will be determined by the department.

Co-Requisite(s): MICR 2054.

Note: This course is offered as needed.

MICR 2920 - Short Courses, Workshop, Institutes and Special Programs

Credits: (1-3)

Variable Title

Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript.

May be repeated up to 10 times for credit.

Note: This course is offered as needed.

MICR 3012 - Microbiology and Global Public Health

Credits: (2)

Typically Taught Spring Semester: Full Sem

This course focuses on microbial diseases that are major causes of morbidity and mortality worldwide (e.g. HIV, tuberculosis, malaria, influenza, etc.), diseases that are classified as emerging diseases (e.g. Ebola) and diseases that are being eliminated or eradicated, including certain Neglected Tropical Diseases. This course will analyze the pathogenesis, life cycles, epidemiology and societal impacts of these diseases, while emphasizing preventative interventions such as vaccinations, water and sewage treatment, and elimination and eradication strategies. The role of various agencies (e.g. WHO and CDC) in improving global health will also be discussed.

This course consists of 1 two-hour lecture per week.

Pre-requisite(s): MICR 1113 or MICR 1153 or MICR 2054 or ZOOL 1110 or permission of the instructor.

MICR 3053 - Microbiological Procedures

Credits: (3)

Typically Taught Fall Semester: Full Sem

Typically Taught Spring Semester: Full Sem

This course is designed to increase proficiency with basic laboratory skills in microscopy, staining methods, preparation of media, aseptic technique, preservation and maintenance of cultures, culture identification, and enumeration methods while developing practical and professional skills in data analysis, presentation, and instrumentation.

This course consists of 2 one-hour lectures and 1 two-hour laboratory per week.

Pre-requisite(s): MICR 2054, CHEM 1210, and MATH 1050 or MATH 1080 or MATH 1210.

MICR 3154 - Microbial Ecology

Credits: (4)

Typically Taught Fall Semester: Full Sem

Typically Taught Spring Semester: Full Sem

Microbial Ecology is the study of microorganisms in their natural habitats and their interactions with other living organisms. Topics explored in this course include the evolution of life on Earth, the diversity of microorganisms, microbial biogeography, symbiotic microbial interactions, and biogeochemical cycles. Current and historical research in microbial ecology is emphasized throughout the course. The laboratory experiments may involve isolating, identifying, and studying novel microorganisms from unique environments, studying environmental microbiomes, finding novel antibiotic producing organisms, and modeling biogeochemical cycles. Experimental techniques used in the laboratory involve advanced methods of cultivation, molecular identification techniques, and chemical assays.

This course consists of 3 one-hour lectures and 1 three-hour laboratory per week.

Pre-requisite(s): MICR 2054 and CHEM 1210.

MICR 3203 - The Immune System in Health & Disease

Credits: (3)

Typically Taught Summer Semester: Full Sem Online

Typically Taught Fall Semester: Full Sem, Full Sem Online

Typically Taught Spring Semester: Full Sem Online

This course will focus on the study of the human immune system and its role in health and disease. The course topics include the innate and adaptive immune responses and their role in host defense as well as immunodeficiency and hypersensitivity responses. Manipulation of the immune system through pharmacological means, vaccination or transplantation will also be studied. This course is intended for the student studying Medical Lab Sciences or someone who wants to know more about the human immune system and who has already taken a course in Microbiology. The course is not intended as a first course in biology and it cannot be used as a Microbiology elective course for Microbiology majors. This course is only offered online with the exception of Fall Semester which also offers a face-to-face option consisting of 3 one-hour lectures per week.

MICR 3254 - Immunology

Credits: (4)

Typically Taught Fall Semester: Full Sem

This course will focus on the study of the human immune system and its role in health and disease. The course topics

include the innate and adaptive immune responses and their role in host defense as well as immunodeficiency and hypersensitivity responses. Manipulation of the immune system through pharmacological means, vaccination or transplantation will also be studied.

This course consists of 3 one-hour lectures and 1 three-hour laboratory per week.

Pre-requisite(s): MICR 2054 or consent of instructor.

MICR 3305 - Medical Microbiology

Credits: (5)

Typically Taught Spring Semester: *Full Sem*

Characteristics of clinically relevant pathogenic bacteria, fungi, and other microbes. From the point of view of the microbe, topics will include pathogenesis, virulence factors and toxins, mechanisms of immune evasion, and unique biological features. From the point of view of the human host, we will discuss epidemiology, disease symptoms, diagnosis, treatment, prevention, and control.

This course consists of 3 one-hour lectures and 2 two-hour laboratory per week.

Pre-requisite(s): MICR 2054.

Suggested Requisite(s): Pre-requisite of MICR 3254 or MICR 3203 is strongly recommended.

MICR 3340 - Information Resources in the Life Sciences

Credits: (2)

A practical introduction to the literature and information resources of the life sciences. Students will expand their research skills and be able to develop effective research strategies to find and synthesize information available in academic libraries.

Two lecture hours per week.

Pre-requisite(s): ENGL 2010.

Cross listed in Botany, Library Sciences and Zoology.

Note: This course is offered as needed.

MICR 3403 - Tropical Diseases

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Study of tropical diseases caused by viral, bacterial, protozoan, fungal, and helminthic agents, including their transmission, disease course, pathogenesis, treatment, prevention, and control using a multi-disciplinary approach integrating case studies, labs, epidemiology, immunopathology as well as microbiology.

This course consists of 2 hours of lecture and 1 three-hour

laboratory per week.

Pre-requisite(s): MICR 2054.

MICR 3484 - Environmental Microbiology

Credits: (4)

Typically Taught Spring Semester: *Full Sem*

Applied environmental microbiology and biotechnology including transport of microorganisms through environment, microbial pathogens, and toxins in the environment. Biodeterioration, contamination control, and biosafety. Pollution microbiology, environmental management, bioremediation, waste treatment, biological insecticides. Microbiology of man-made environments. This course consists of 3 one-hour lectures and 1 three-hour laboratory per week.

Pre-requisite(s): MICR 2054 and CHEM 1210.

MICR 3502 SUS - Environmental Health

Credits: (2)

Typically Taught Fall Semester: *Full Sem*

Air and water quality, solid and hazardous waste management, food protection, environmental inspection, and testing.

This course consists of 1 two-hour lecture per week.

Pre-requisite(s): MICR 1113 or MICR 2054 or consent of instructor.

MICR 3570 - Foundations of Science Education

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

A thorough investigation of research in science learning and curricular standards at the state and national levels. Foundations of the philosophy of science and scientific inquiry as applicable to science teaching at the secondary level. This course serves as a foundation to a pre-service science teacher's education coursework.

Cross-listed with BTNY, CHEM, GEO, PHYS, and ZOOL.

MICR 3603 - Advanced Microbiology for the Health Professions

Credits: (3)

Typically Taught Summer Semester: *Full Sem Online*

Typically Taught Fall Semester: *Full Sem Online*

Typically Taught Spring Semester: *Full Sem Online*

Characteristics of microorganisms and parasites - emphasizing mechanisms by which they cause disease in

humans. Intended for students in the Clinical Laboratory Sciences program and those working in that field. The course is not intended as a first course in biology and it cannot be used as a Microbiology elective course for Microbiology majors. This course is only offered online.

MICR 3753 - Geomicrobiology

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Geomicrobiology is the study of the interactions between microorganisms and minerals. This course will explore the geological change mediated by microorganisms, microbial evolution driven by geologically diverse habitats, and applications of geomicrobiology, including understanding the evolution of life on earth, the study of life in extreme environments, and industrial application of geomicrobiology. The course includes classroom discussion, laboratories, and field trips.

This course consists of 2 hours of lecture and 1 two-hour laboratory.

Pre-requisite(s): CHEM 1210 or approval of the instructor.

Cross-listed with GEO 3753.

MICR 3810 - Bioinformatics

Credits: (3)

Experimental Course, Contact Department for More Information

This bioinformatics course explores solutions to biological questions that can only be provided by information technologies. Students will learn the basic concepts, methods, and tools used in bioinformatics. Course activities will include DNA alignment and assembly, gene prediction, functional genomics, phylogenetics, protein structure prediction, protein folding, protein-protein interaction, metagenomics, and next-generation sequencing analysis. Students will also experience simple programming language approaches such as Python or R to automate the use of bioinformatics tools and interpret their output. Our objective is to provide basic competency in bioinformatics so that in their own research students can solve problems using these advanced tools. Students should have prior knowledge of college algebra (logarithms, exponents, factorials, sets) and the basic molecular biology of genes (DNA, RNA, proteins).

MICR 3810 - Experimental

Credits: (1-6)

Experimental Course, Contact Department for More

Information

Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript.

Note: Refer to Experimental Courses.

MICR 3853 - Food Microbiology

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Role of microorganisms in food production, preservation, spoilage, and food borne disease.

This course consists of 2 one-hour lectures and 1 two-hour laboratory per week.

Pre-requisite(s): MICR 2054 and CHEM 1210.

MICR 4054 - Microbial Physiology

Credits: (4)

Typically Taught Fall Semester: *Full Sem*

Structure, function, and physiology of microorganisms, with emphasis upon the bacteria. The course highlights the amazing diversity in metabolism found among bacteria.

This course consists of 3 one-hour lectures and 1 three-hour laboratory per week.

Pre-requisite(s): MICR 2054, CHEM 1220 and CHEM 2310/CHEM 2315 series (lecture & lab).

Suggested Requisite(s): Completion of or concurrent registration in CHEM 3070/ CHEM 3075 (lecture & lab) is recommended.

MICR 4154 - Microbial Genetics

Credits: (4)

Typically Taught Spring Semester: *Full Sem*

The genetics of microorganisms and its applications, including isolation and characterization of mutants, the biology and uses of plasmids, conjugation, transformation, the biology and uses of bacteriophages, transposition, recombinant DNA technology, gene regulation, and bioinformatics.

This course consists of 3 one-hour lectures and 1 three-hour laboratory per week.

Pre-requisite(s): MICR 2054 and CHEM 2310/CHEM 2315 (lecture & lab).

Suggested Requisite(s): Completion or concurrent of CHEM 3070/CHEM 3075 (lecture & lab) is recommended.

MICR 4252 - Cell Culture

Credits: (2)

Typically Taught Fall Semester: *Full Sem*

Introduction to core skills used in the biotechnology industry for culturing animal, insect, and plant cells in vitro. Skills include sterile technique, cell counts, and the culture, maintenance, and preservation of cell lines. Specialized experiences include transfections with foreign DNA, confocal microscopy, real-time PCR and viral infections.

This course consists of 2 two-hour combined lecture and laboratory sessions per week.

Pre-requisite(s): MICR 2054 or BTNY 2104 and BTNY 2121 and CHEM 1220.

(cross-listed with Botany)

MICR 4354 - Industrial Microbiology and Biotechnology

Credits: (4)

Typically Taught Spring Semester: *Full Sem*

Experimental design for application of microbial physiology and biochemical ecology as potential solutions to current world problems, as well as exposure to traditional topics in product development.

This course consists of 3 one-hour lectures (presented in a laboratory) and 1 three-hour laboratory per week.

Pre-requisite(s): MICR 2054 and CHEM 1220.

Suggested Requisite(s): Pre-requisite of MICR 3053 is recommended.

MICR 4554 - Virology

Credits: (4)

Typically Taught Spring Semester: *Full Sem*

The study of viruses and virus-like agent structure, classification, genetics, replication, and other interaction with the host, with emphasis on bacteriophage and animal viruses.

This course consists of 3 one-hour lectures and 1 three-hour laboratory per week.

Pre-requisite(s): MICR 2054 and CHEM 1220.

MICR 4570 - Secondary School Science Teaching Methods

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Acquaintance and practice with various teaching and assessment methods. Development of science curricula including lesson and unit plans. It is recommended that this course be completed immediately before student teaching.

Pre-requisite(s): Admission to the Teacher Education Program.

Cross-listed with BTNY, CHEM, GEO, PHYS, and ZOOL.

MICR 4800 - Directed Research

Credits: (1-2)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Independent research under the advisement of a faculty member. No more than 3 credit hours may count toward the major.

Pre-requisite(s): Consent of instructor and a minimum of 6 credits of upper division microbiology course work. May be repeated up to 10 times for credit.

MICR 4830 - Directed Readings

Credits: (1-2)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Independent readings on advanced special topics under the direction of a faculty member. No more than 2 credit hours may count toward the major.

Pre-requisite(s): Consent of instructor and a minimum of 6 credits of upper division microbiology course work. May be repeated up to 10 times for credit.

MICR 4890 INT - Cooperative Work Experience

Credits: (1-5)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Open to all students in the Microbiology Department who meet the minimum Cooperative Work Experience requirements of the department. Provides academic credit for on-the-job experience. Grade and amount of credit will be determined by the department.

Co-Requisite(s): MICR 2054.

May be repeated up to 10 times for credit.

MICR 4920 - Short Courses, Workshops, Institutes and Special Programs

Credits: (1-3)

Variable Title

Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript.

May be repeated up to 10 times for credit.

Note: This course is offered as needed.

MICR 4991 - Microbiology Seminar

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Current topics in Microbiology.

This course consists of 1 one-hour lecture per week.

Pre-requisite(s): MICR 2054 and MICR 3053 or MICR 3154 or MICR 4054 or MICR 4154.

MICR 5034G - Microbiology for Teachers

Credits: (1-4)

Science content course for teachers in the MEd Science Emphasis Program. To register, select another departmental course and develop a contract detailing additional work required for graduate credit. Contract must be approved by instructor, department chair, and Director of the Master of Education Program.

May be repeated twice with a maximum of 4 credit hours.

Note: This course is offered as needed.

MILS 1010 - Introduction to the Army and Critical Thinking

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Introduces cadets to the personal challenges and competencies critical for effective leadership. Cadets learn how the personal development of life skills such as critical thinking, time management, goal setting, stress management and comprehensive fitness relate to leadership and the Army profession. A three hour weekly leadership lab is included, as well as one weekend field training exercise during the semester.

Participation in weekly physical fitness training is expected and should be taken as MILS 2400.

MILS 1020 - Introduction to Profession of Arms

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

Introduces cadets to the personal challenges and competencies that are critical for adaptive leadership. Cadets learn the basics of the communications process and the importance for leaders to develop the essential skills to effectively communicate in the Army. Students will examine the Army profession and what it means to be a professional in the U.S. Army. A three-hour weekly leadership lab is included as well as one weekend field training exercise during the semester.

Participation in weekly physical fitness training is expected and should be taken as MILS 2400.

MILS 1110 - Basic Rifle Marksmanship

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Open to all Weber State University students. Introduction to safe use of a rifle and practical application of rifle marksmanship. Course includes weapons safety, mechanics, capabilities, and fundamentals of marksmanship. Includes visit to fire at indoor air rifle range. Materials and equipment furnished by Department of Military Science and Leadership (Army ROTC). May be repeated twice for up to two hours of credit.

MILS 1220 - Wilderness Survival Skills

Credits: (1)

Typically Taught Fall Semester: *1st Blk*

Typically Taught Spring Semester: *2nd Blk*

Open to all WSU students. This class will teach you how to build makeshift shelters, procure food and water, cook a meal, identify edible and poisonous plants, avoid dangerous animals, treat wounds and illness, navigate with the sun and stars, make equipment, and much more. The class covers wilderness survival and an urban survival situation. Materials and equipment furnished by Department of Military Science.

This course may be repeated once for a total of two credit hours.

MILS 2010 - Innovative Team Leadership

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Builds on previous leadership instruction enhancing student skills in land navigation, small unit tactics, written and oral communication, event planning, group coordination and effectiveness and first aid. During this course, students develop basic skills for leading others in a tactical environment.

A three-hour weekly leadership lab is included as well as one weekend field training exercise during the semester. Participation in weekly physical fitness training is expected and should be taken as MILS 2400.

MILS 2020 - Foundations of Tactical Leadership

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

This course focuses on leader effectiveness. Course content includes analysis of selected historical leaders and battles using the principles of war and other tenets. Student led discussions highlight lessons learned relative to leadership and organizational success. Oral communications skills are central to this course.

A three-hour weekly leadership lab is included as well as one weekend field training exercise during the semester. Participation in weekly physical fitness training is expected and should be taken as MILS 2400.

MILS 2220 - Advanced Rifle Marksmanship

Credits: (1)

Typically Taught Spring Semester: *Full Sem*

Open to all Weber State University students. Course provides instruction on the fundamentals of Advanced Rifle Marksmanship. Class is conducted once a week with topics including: Air Rifle, Small Bore firing, and advanced practical exercises of different shooting positions. Prerequisite: MILS 1110 or permission of Instructor. May be repeated two times for credit for a total of two credit hours.

MILS 2400 - Physical Readiness

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A physical conditioning course that employs U.S. Army principles of fitness. Subjects include: body composition, nutrition, cardiorespiratory fitness, muscle endurance and strength, circuit training and drills. Students registered for MILS 1010, MILS 1020, MILS 2010, or MILS 2020 are encouraged to enroll in this course to gain the full perspective of the physical demands required to be an Army officer.

May be repeated 3 times with a maximum of 4 credit hours.

MILS 2600 - Leadership Under Fire

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course will explore both functional and dysfunctional behavior in leadership roles. Using examples from military and civilian leadership, this course will teach leadership techniques essential for future managers and leaders that will be of great value to both civilian and military leaders. It will focus on ethical/moral, historical, and social

influences and examine outlook, styles, skills, and behavior essential for providing successful leadership. This will culminate in a hands-on team-building exercise. No prerequisites. Students are NOT required to be enrolled in a ROTC course, nor to do so in the future.

MILS 2830 - Directed Readings, Projects and Research

Credits: (1-3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Independent reading/research on topic(s) of military interest under the supervision of a Military Science faculty member.

Pre-requisite(s): Requires instructor permission.

May be repeated 2 times with a maximum of 3 credit hours.

MILS 2921 - Cadet Initial Entry Training

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

A four-week leadership camp conducted at Fort Knox, Kentucky. Designed to introduce students to basic military skills and leadership requirements. Training includes rappelling, marksmanship, small unit tactics, physical fitness, leadership, and adventure training. Credit/no credit grade only.

Pre-requisite(s): Requires instructor permission.

MILS 2922 - Northern Warfare

Credits: (2)

Typically Taught Summer Semester: *Full Sem*

A two week course conducted in Alaska. Provides training in cold weather survival and small unit tactics. Credit/no credit grade only.

Pre-requisite(s): include the completion of the basic course and instructor permission.

MILS 2923 - Air Assault

Credits: (2)

Typically Taught Summer Semester: *Full Sem*

A two week course conducted at an Army installation in the continental U.S. Provides students training in helicopter operations to include sling loading and rappelling. Credit/no credit grade only.

Pre-requisite(s): include successful completion of the basic course and instructor approval.

MILS 3010 - Adaptive Team Leadership

Credits: (4)

Typically Taught Fall Semester: *Full Sem*

Develops leadership skills within the framework of the U.S. Army. This course focuses on theory and application of decision making, planning, organizing, management control and communications.

The course also emphasizes small unit tactics and advanced land navigation skills; it includes a three-hour weekly leadership lab. Students must participate in up to three, one-hour physical fitness sessions per week, which may be taken as MILS 4400, to satisfy requirements of the Military Science minor. One weekend field training exercise is required during the semester.

MILS 3020 - Leadership in Changing Environments

Credits: (4)

Typically Taught Spring Semester: *Full Sem*

Focuses on theory and application of small unit tactics, leadership and land warfare. Subjects include preparing and issuing combat orders, organizing for combat, unit and individual movement techniques, communications and security.

A three-hour weekly leadership lab is included. Students must participate in up to three, one-hour physical fitness sessions per week, which may be taken as MILS 4400, to satisfy requirements of the Military Science minor. One weekend field training exercise is required during the semester.

MILS 4010 - Mission Command and the Army Profession, Part 1

Credits: (4)

Typically Taught Fall Semester: *Full Sem*

This course focuses on the functions and roles of the commander/ leader and the staff. Subject matter includes problem solving, planning techniques and procedures, written and oral communications, training management and evaluation systems.

A three-hour weekly leadership lab to enhance leadership skills and apply classroom instruction to hands on training and execution is included. Students must participate in up to three, one-hour physical fitness sessions per week, which should be taken as MILS 4400, to satisfy requirements of

the Military Science minor. One weekend field training exercise is required during the semester.

MILS 4020 - Mission Command and the Army Profession, Part 2

Credits: (4)

Typically Taught Spring Semester: *Full Sem*

A conference course addressing future roles and responsibilities of junior Army officers. Subject matter includes the world environment and future threats to U.S. security, the spectrum of Army requirements, Army modernization initiatives, the laws of war, joint operations and other issues designed to complete the cadet-to-lieutenant process.

A three-hour weekly leadership lab to enhance leadership skills and apply classroom instruction to hands-on training and execution is included. Students must participate in up to three, one-hour physical fitness sessions per week, which should be taken as MILS 4400, to satisfy requirements of the Military Science minor. One weekend field training exercise is required during the semester.

MILS 4400 - Advanced Physical Readiness

Credits: (2)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course provides advanced instruction in physical fitness employing Army techniques and procedures. Students assist Military Science faculty in the planning/conduct of physical fitness training activities performed by lower division students.

Pre-requisite(s): Requires instructor permission.

Suggested Requisite(s): (Students must be enrolled in one of the following courses: MILS 3010, MILS 3020, MILS 4010, or MILS 4020.)

May be repeated 3 times with a maximum of 8 credit hours.

MILS 4830 - Directed Readings, Projects and Research

Credits: (1-3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Independent reading/research on topics of military interest under the supervision of a Military Science faculty member. For each credit awarded the student will read approximately 1000 pages and prepare a written review or summary.

Pre-requisite(s): Requires instructor permission. May be repeated for a maximum of 6 credit hours.

MILS 4921 - Cadet Leadership Course (CLC)

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

A five week leadership camp conducted at Fort Lewis, Washington. The Advanced Camp environment stresses small unit leadership under varying and challenging conditions. Credit/no credit grade only.

Pre-requisite(s): Requires instructor approval. Open only to students who have successfully completed basic course requirements, MILS 3010 and MILS 3020.

MILS 4922 - Airborne Operations

Credits: (2)

Typically Taught Summer Semester: *Full Sem*

A three week course conducted at Fort Benning, Georgia. Provides students training in military sky diving techniques with practical applications. Credit/no credit grade only.

Pre-requisite(s): Requires instructor approval. Prerequisite includes completion of the basic course.

MILS 4923 - Cadet Troop Leader Training

Credits: (2)

Typically Taught Summer Semester: *Full Sem*

A two week course conducted at an Army installation in the continental U.S. or overseas. Provides first hand experience in an Army unit. Students learn about military life and the duties of a lieutenant. Credit/no credit grade only.

Pre-requisite(s): include completion of MILS 3010, MILS 3020 and Advanced Camp. Requires instructor approval.

MIS 1100 SS - The Digital Society

Credits: (3)

Typically Taught Summer Semester: *Full Sem Online*

Typically Taught Fall Semester: *Full Sem, Full Sem Online*

Typically Taught Spring Semester: *Full Sem, Full Sem Online*

The explosive growth of information technologies in general, and the Internet in particular, has irreversibly changed the way we work and play. This course prepares students to be knowledgeable citizens of cyberspace. It reviews our social institutions and how they are being impacted by information technology as well as the ways in which technology has been shaped by our social

institutions. The course also provides hands-on experience with a variety of Internet tools.

MIS 2010 - Business Computer Skills

Credits: (1)

Typically Taught Summer Semester: *Full Sem Online*

Typically Taught Fall Semester: *Full Sem Online*

Typically Taught Spring Semester: *Full Sem Online*

This course prepares all students in business and economics to demonstrate current competence in desktop software commonly used in the business environment. The course covers computer competencies students will use in their business functional and cross-functional core courses, using more complex features of desktop software. It is followed by a hands-on exam that tests these competencies.

Credit/No credit.

MIS 2015 - Introduction to Information Systems & Technologies

Credits: (1)

This course introduces the student to the role played by computer technology in business strategy and problem resolution. It also introduces information technologies used in information systems, including: software development, hardware, operating systems, network management, project planning, and career paths. Students will develop their academic MIS program plan. Lecture series by MIS Faculty.

Note: Course not currently being offered.

MIS 2020 - Introduction to Information Systems

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Overview of the role and use of information systems to support individual, group, and business decision-making. Includes coverage of technology's role in supporting the business decision-making process. It will prepare students to use information technologies effectively to improve productivity and promote competitive position in the marketplace.

MIS 2030 - Introduction to Business Analytics

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Business analytics refer to the ways in which organizations use data to gain insights and make better decisions, and has become a critical capability for organizations of all types and sizes. It is applied in various business functions including marketing, finance, human resources, operation and strategic planning. This course covers basic analytic methods used by organizations. Students will learn how to explore, manipulate and present data. They will also learn how to use data to develop insights and predictive capabilities by using predictive analytics techniques.

Pre-requisite(s): MATH 1040 or QUAN 2600.

MIS 2110 - Software Development I

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course introduces the student to the fundamentals of software construction using a contemporary programming language. This includes the IDE (Integrated Development Environment), syntaxes of the language, basic programming constructs, data representation, object programming concepts, programming flow control and problem solving logic. Students will design, program and debug several business application projects.

Pre-requisite(s): Earn a "C" or better in MATH 1050, MATH 1080, or MATH 1210 or; earn a "C" or better in any math course for which either MATH 1050 or MATH 1080 or MATH 1090 is a prerequisite or; score 3 or higher on AP Calculus exam or; score 70 or higher on ACCUPLACER College Level Math (CLM) or; score of 26 or higher on Math ACT or; score of 65 or higher on ALEKS.

MIS 2410 - Information Systems Architecture

Credits: (3)

This course provides students with a thorough grounding in computer hardware and operating system software, peripheral devices and contemporary information system architecture, including its structure, theory, and applications.

Note: Course not currently being offered.

MIS 2720 - Data Structures and Algorithms

Credits: (3)

This course introduces the basics of specifying abstract data types, control structures and modularization, and using them to design programs. Commonly used data structures and algorithms are studied. Emphasis is made on choosing data structures and algorithms appropriate for solving given business problems.

Pre-requisite(s): MATH 1050 and MIS 2110.

Note: Course not currently being offered.

MIS 2891 - Cooperative Work Experience

Credits: (1)

Open to all associate's degree-seeking students who have been selected to serve an internship in the information technology field or who have identified a special MIS project with their current employer, subject to approval by the Management Information Systems Department.

Pre-requisite(s): Department Approval.

MIS 2892 - Cooperative Work Experience

Credits: (2)

Open to all associate's degree-seeking students who have been selected to serve an internship in the information technology field or who have identified a special MIS project with their current employer, subject to approval by the Management Information Systems Department.

Pre-requisite(s): Department Approval.

MIS 2893 - Cooperative Work Experience

Credits: (3)

Open to all associate's degree-seeking students who have been selected to serve an internship in the information technology field or who have identified a special MIS project with their current employer, subject to approval by the Management Information Systems Department.

Pre-requisite(s): Department Approval.

MIS 2894 - Cooperative Work Experience

Credits: (4)

Open to all associate's degree-seeking students who have been selected to serve an internship in the information technology field or who have identified a special MIS project with their current employer, subject to approval by the Management Information Systems Department.

Pre-requisite(s): Department Approval.

MIS 3210 - Database Design and Implementation

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course provides a comprehensive coverage of business database systems. Students will learn how to design, implement and manage databases. They will learn both GUI interface and how to use the Structured Query Language (SQL). They will also gain experience in using an enterprise level, multi-user database.

Pre-requisite(s): MIS 2110 or MIS 2020 and earn a "C" or better in any math course for which either MATH 1050, MATH 1080, or MATH 1090 is a prerequisite or score 3 or higher on AP Calculus exam or score 70 or higher on ACCUPLACER College Level Math (CLM) or score of 26 or higher on Math ACT or score of 65 or higher on ALEKS.

MIS 3220 - Business Intelligence

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course provides an understanding of the concepts of Business Intelligence (BI) as an information technology approach of data collection and data analysis to help enterprise users make better managerial decisions. The course explores the detailed discussion of the analysis, design, and implementation of systems for BI including enterprise data-warehousing, knowledge management systems, big data, and text mining. The course will help students learn analytical components and technologies to integrate, analyze and report data. The course will utilize Microsoft BI tools including Microsoft Power BI desktop, SQL Server Integration Services (SSIS), SQL Server Analysis Services (SSAS) and SQL Server Reporting Services (SSRS).

Pre-requisite(s): MIS 2030.

MIS 3230 - Data Mining for Business

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course will examine how data mining technologies can be used to improve decision-making. Students will study the principles and techniques of data mining, including gaining knowledge of the algorithms and computational paradigms that allow computers to find patterns in large

datasets. Students will examine real-world examples and cases to place data-mining techniques in context, to develop data-analytic thinking, and to illustrate that proper application is as much an art as it is a science.

Pre-requisite(s): MIS 2030.

MIS 3610 - Networks & Data Communications I

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course provides an introduction to the design, operation, and management of telecommunication systems. It covers computer network definitions, concepts and principles, including (but not limited to): server management; topologies; protocols; standards; and fundamental concepts related to data communication networks.

Pre-requisite(s): MIS 2020 or MIS 2410.

MIS 3620 - Networks and Data Communications II

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

In this intensive hands-on course, the student will acquire the skills and techniques needed to configure, troubleshoot and support reliable TCP/IP internetworks. The student will learn the essentials of building an internetwork, including routing, configuring the Domain Name Server (DNS), setting up and managing a web server, configuring a firewall and IDS, and standards-based email. Students will also participate in configuring clients, redesigning networks and troubleshooting routing.

Pre-requisite(s): BSAD 2899 and MIS 3610.

MIS 3700 - E-business Technologies & Web Development

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

This course provides students with knowledge of technologies needed in planning, implementing and supporting web-hosted applications and on-line commerce. Topics include web and commerce server design and deployment, search engines n-tier web architecture and supporting software, client-side/server-side programming with data-bound controls and session management, e-business application languages, markup languages, on-line payment mechanisms, systems reliability and security,

scalability analysis, and solutions sourcing.

Pre-requisite(s): BSAD 2899 and MIS 2110, or MIS 2020.

MIS 3710 - Global Issues in Information Technology

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course shows how information technology is used as a key competitive advantage by multinational and transnational businesses. Topics include global perspectives on coordination and control, cultural dimensions, and geo-political considerations of global information technology applications.

Pre-requisite(s): BSAD 2899.

MIS 3720 - Software Development II

Credits: (3)

This course builds on the software development skills learned in Software Development I. Topics include class hierarchies, inheritance and interfaces, object aggregation, data structure and collections, file management, threading, network programming, and the design of multi-tiered, distributed computing applications involving relational databases.

Pre-requisite(s): BSAD 2899 and MIS 2720.

Note: Course not currently being offered.

MIS 3730 - Systems Analysis and Design

Credits: (3)

This course provides the knowledge and skills to design and implement computer-based systems to solve business problems. Topics include feasibility studies, requirement analysis, system design and development, implementation and testing. Students will learn the use of appropriate methodologies and tools, including object-oriented modeling and the use of computer-aided software engineering (CASE).

Pre-requisite(s): BSAD 2899 and MIS 3210.

Note: Course not currently being offered.

MIS 3740 - Business Machine Learning

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course is designed to teach and give students hands-on experience with cutting-edge machine learning methods used frequently in business contexts. Many companies

have made significant contributions to the field of data analytics with products and services they've launched. This class is designed to prepare students to participate in such analysis to make significant business impact. We examine Netflix- and Amazon-style recommender systems and market basket analyses, customer segmentation and classification, Zillow-style prediction of home sale prices, and other business-relevant examples.

Pre-requisite(s): MIS 2030.

MIS 3750 - Electronic Business Communications

Credits: (3)

This course gives students knowledge regarding the best practices in designing or developing electronic presentations, meetings, and collaborations. This course also familiarizes students with technologies fostering effective communication in virtual situations.

Pre-requisite(s): BSAD 2899, MGMT 3200 or PS 3250.

Note: Course not currently being offered.

MIS 4600 - Information Security I

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course looks at management issues and practical implications related to securing information systems. This course focuses on the threat environment, security policy and planning, cryptography, secure networks, access control, firewalls, host hardening, application security, data protection, incident response, and networking and a review of TCP/IP.

Pre-requisite(s): Business Foundations; BSAD 2899 and MIS 2020, or MIS 3610.

MIS 4620 - Information Security Basics

Credits: (3)

In a computer-literate age, sophisticated criminals use computers in their illegal and destructive activities. This course discusses cybercrime and teaches students to understand networks; the phases of computer hacking; and setting up a secure environment.

Pre-requisite(s): BSAD 2899 and MIS 2410 or MIS 3610.

Note: Course not currently being offered.

MIS 4700 - Information Security II

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

This course covers the basic principles and concepts in information security and information assurance. It examines the technical, operational, and organizational issues of securing information systems. Topics include operating system issues, viruses, security awareness at the executive, technical and user levels, physical security, personnel security issues, policies, procedures, and the need for an enterprise security organization. Case studies and exercises in the computer lab will be used to provide examples of the need for organizations to develop security procedures and policies.

Pre-requisite(s): BSAD 2899 and MIS 4600.

MIS 4710 - Enterprise Software Development

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

This course introduces students to the concept of a business as an integrated set of business processes and associated systems designed to deliver value to customers. It focuses on enterprise systems, product lifecycle management, and supply chain management. This course also focuses on how to effectively manage enterprise projects with respect to organizational constraints. Students will learn how to manage project initiation, planning, execution, monitoring and closing.

Pre-requisite(s): BSAD 2899 and MIS 2020.

MIS 4720 - Emerging Information Technologies

Credits: (3)

Variable Title

Typically Taught Fall Semester: *Full Sem*

New information technologies can give early adopters significant competitive advantage when used with careful planning, or they can mean disaster if hastily implemented. This course covers how to conduct an environmental scan toward evaluating and implementing new information technologies.

Pre-requisite(s): BSAD 2899, and MIS 2410, or MIS 2020.

MIS 4730 - IT Project Management and Systems Design

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course covers project management principles, methodology, and tools. It also provides the knowledge and

skills to design and implement computer-based systems to solve business problems. Topics include the planning and management of IT and software development projects, requirement analysis, system design and development, implementation and testing.

Pre-requisite(s): Business Foundations; BSAD 2899 and MIS 3210 and MIS 3610 and MIS 2110.

MIS 4801 - Individual Projects

Credits: (1)

This course is open only to senior MIS majors. Students will be required to complete an individual project, program, system, or research paper which will enhance their skills and marketability.

Pre-requisite(s): BSAD 2899, Management Information Systems Department approval, and Senior standing.

MIS 4802 - Individual Projects

Credits: (2)

This course is open only to senior MIS majors. Students will be required to complete an individual project, program, system, or research paper which will enhance their skills and marketability.

Pre-requisite(s): BSAD 2899, Management Information Systems Department approval, and Senior standing.

MIS 4803 - Individual Projects

Credits: (3)

This course is open only to senior MIS majors. Students will be required to complete an individual project, program, system, or research paper which will enhance their skills and marketability.

Pre-requisite(s): BSAD 2899, Management Information Systems Department approval, and Senior standing.

MIS 4810 - Experimental Courses

Credits: (1-3)

Experimental or one-time courses designed to fill a need in the community or investigate interesting and unusual topics. Refer to Experimental Courses.

May be repeated 5 times with a maximum of 6 credit hours with different topics.

MIS 4850 - Information Systems & Technology Study Abroad

Credits: (1-3)

This course is designed for students who wish to explore information systems and technology theory and practice in countries other than the U.S. Students will study global information systems as offered through a partner university (or other university with department chair approval).

Pre-requisite(s): BSAD 2899.

May be repeated once up to 6 credits.

MIS 4891 - Cooperative Work Experience**Credits: (1)**

A structured professional-level field experience. The student will be counseled and supervised as he/she applies and integrates the knowledge and skills obtained through the MIS courses. Prerequisite: BSAD 2899 ; Instructor approval.

Pre-requisite(s): Management Information Systems Department Approval.

MIS 4892 - Cooperative Work Experience**Credits: (2)**

A structured professional-level field experience. The student will be counseled and supervised as he/she applies and integrates the knowledge and skills obtained through the MIS courses. Prerequisite: BSAD 2899 ; Instructor approval.

Pre-requisite(s): Management Information Systems Department Approval.

MIS 4893 INT - Cooperative Work Experience**Credits: (3)**

A structured professional-level field experience. The student will be counseled and supervised as he/she applies and integrates the knowledge and skills obtained through the MIS courses. Prerequisite: BSAD 2899 ; Instructor approval.

Pre-requisite(s): Management Information Systems Department Approval.

MIS 4894 - Cooperative Work Experience**Credits: (4)**

A structured professional-level field experience. The student will be counseled and supervised as he/she applies and integrates the knowledge and skills obtained through the MIS courses. Prerequisite: BSAD 2899 ; Instructor approval.

Pre-requisite(s): Management Information Systems Department Approval.

MIS 5930G - Professional Development Workshop in Information Technology**Credits: (1-4)**

Information technology professionals must remain current with new technologies to remain competitive in their careers. This course offers professional development in new systems and software as they enter the mainstream of information technology practice.

Pre-requisite(s): Permission of instructor.

MIS 6610 - Information and Communications Technologies for e-Business**Credits: (3)**

Covers the information and communications technology infrastructure required to support a robust e-business activity. Issues such as reliability, scalability, security, and responsiveness as well as n-tier architectures are reviewed.

Pre-requisite(s): MACC, MBA, or MIS Certificate program standing.

MIS 6620 - Databases & Information Systems**Credits: (3)**

This course covers the role of database technology in information systems. Through hands-on and conceptual knowledge, students will learn how databases are used to construct and operate information systems designed to support decision making. Various aspects of database systems including both correct methods and problems encountered during the design, implementation and operation of database systems will be covered. Students will gain hands-on familiarity with a relational database system.

Pre-requisite(s): Admittance to MACC or MBA program and MIS 2020 or equivalent.

MIS 6800 - Directed Studies**Credits: (1)**

Directed individual study and research on special topics related to information assurance.

Pre-requisite(s): Approval of Management Information Systems Department Chair and course instructor.

May be repeated for a cumulative total of three credit hours.

MKTG 3010 - Marketing Concepts and Practices

Credits: (3)

Typically Taught Summer Semester: *1st Blk, Full Sem Online*

Typically Taught Fall Semester: *Full Sem, Full Sem Online*

Typically Taught Spring Semester: *Full Sem, Full Sem Online*

This course includes planning, implementation, and control of the marketing process; consumer behavior; marketing research; segmentation and target marketing; and consideration of price, place, and promotion.

MKTG 3100 - Consumer Behavior

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

The application of psychological, sociological, and anthropological findings to the purchase and consumption of goods and services by ultimate and industrial consumers.

Pre-requisite/Co-requisite: Prerequisite or concurrent enrollment: MKTG 3010.

MKTG 3200 - Selling and Sales Management

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Theory, methods, and techniques of personal selling in professional settings including analysis of buyer behavior, the delivery of customer satisfaction, and integration of personal selling with other marketing communication tools. Sales management includes managing the sales force, salesperson selection, deployment, compensation, training, field supervision and industrial marketing management.

Pre-requisite(s): MKTG 3010.

MKTG 3450 - Promotion Management

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Strategic development of advertising, sales, sales management, public relations, and sales promotion programs.

Pre-requisite(s): BSAD 2899, MKTG 3010. Prerequisite or concurrent enrollment: MKTG 3100.

MKTG 3500 - Services and Sports Marketing

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Marketing education has traditionally focused on the marketing of goods. However, services account for the majority of the economic activity in the United States and much of the developed world. In order to successfully develop and manage service products, marketers must understand the characteristics that differentiate them from conventionally manufactured goods. This course aims to systematically study these characteristics and the challenges they present to marketers in service organizations. The latter half of the course will focus on sports marketing as a special form of services marketing.

Pre-requisite(s): BSAD 2899, MKTG 3010.

MKTG 3600 - International Marketing

Credits: (3)

Typically Taught Fall Semester: *Full Sem Online*

Typically Taught Spring Semester: *Full Sem Online*

In this course students will learn the problems and procedures of marketing in foreign countries, including effects of foreign cultures and marketing systems on the design of marketing programs.

Pre-requisite(s): BSAD 2899; MKTG 3010.

MKTG 3700 - Business Studies Abroad - International Marketing

Credits: (3)

Basic principles of international marketing. Fundamentals of international market research including macro and micro-level analysis. Discusses international marketing as part of a global strategy. This course is taught at Fachhochschule Hof, Germany during each fall semester. Students enrolled in this course have to participate in the Study Abroad Program (Contact: Doris Geide-Stevenson, ext. 7634, dgsteven@weber.edu).

Pre-requisite(s): BSAD 2899, MKTG 3010.

MKTG 4200 - Internet Marketing

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course is an elective course for Management Information Systems and Marketing majors. The course deals with the steps used in developing a marketing plan, orienting the plan to developing an Internet presence, and developing a World-Wide Web site to implement the on-line components of the plan.

Pre-requisite(s): BSAD 2899, MKTG 3010.

MKTG 4400 - Marketing Strategy

Credits: (3)

Typically Taught Fall Semester: *Online*

Typically Taught Spring Semester: *Online*

This course centers on gaining and sustaining competitive advantages. It entails analyzing customers, competitors, and internal capabilities; then making appropriate product, pricing, promotion, and distribution decisions.

Pre-requisite(s): BSAD 2899; ACTG 2020; MGMT 3200 or PS 3250; MKTG 3010.

MKTG 4800 - Independent Research

Credits: (1-3)

Directed research and study on an individual basis.

Pre-requisite(s): BSAD 2899; Senior Standing; Written Instructor Approval.

May be repeated until a total of 4 hours credit is accumulated.

MKTG 4850 - Marketing Study Abroad

Credits: (1-3)

This course is designed for students who wish to explore marketing theory and practice in countries other than the U.S. Students will study international marketing as offered through a partner university (or other university with department chair approval).

Pre-requisite(s): BSAD 2899.

May be repeated once up to 6 credits.

MKTG 4860 INT - Marketing Internship

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A structured professional-level field experience. The student will be counseled and supervised as he/she applies and integrates the knowledge and skills obtained through the Marketing courses.

Pre-requisite(s): BSAD 2899; Instructor approval.

MLS 1001 - Online Orientation for AAS Degree

Credits: (1)

Typically Taught Summer Semester: *Full Sem Online*

Typically Taught Fall Semester: *Full Sem Online*

Typically Taught Spring Semester: *Full Sem Online*

This course is designed to prepare the student for the online environment and specifics of the MLS program. Course components include: study and computer skills, learning styles, MLS student handbook, library tutorial, faculty introductions, contact and troubleshooting information, and academic advisement tailor-made specifically for AAS degree MLS students online.

MLS 1010 INT - Core Clinical Laboratory Skills

Credits: (4)

Typically Taught Summer Semester: *Full Sem Online*

Typically Taught Fall Semester: *Full Sem Online*

Typically Taught Spring Semester: *Full Sem Online*

The MLS 1010 course is designed to teach core clinical laboratory skills to individuals from various health care professions. The curriculum will focus on basic laboratory methods in quality control, quality assurance, information recording and transfer, normal and abnormal laboratory values, and problem recognition. Students will receive basic technical instruction in laboratory safety, microscopy, phlebotomy, specimen collection and processing, and laboratory instrumentation in the areas of hematology, serology, urinalysis, and clinical chemistry and microbiology. Students must have the support of a clinical laboratory to fulfill the laboratory requirement. The laboratory component will address applications with a focus on Point of Care testing (POCT). Students will be required to spend a minimum of 4 unpaid hours per week working on laboratory competency. Upon successful completion of the course students will receive a Certificate of Completion from the Dr. Ezekiel R. Dumke College of Health Profession's Clinical Laboratory Assistant (CLA) program.

Pre-requisite(s): Departmental Approval.

MLS 1113 - Introduction to Medical Laboratory Practices

Credits: (4)

Typically Taught Summer Semester: *Full Sem Online*

Typically Taught Fall Semester: *Full Sem, Full Sem Online*

Typically Taught Spring Semester: *Full Sem, Full Sem*

Online

Principles and applications to laboratory testing including safe practices for the laboratory practitioner, specimen quality assurance, phlebotomy, urinalysis, basic concepts in clinical immunology, clinical chemistry, and clinical microbiology. Laboratory session addresses the principles and applications involved in medical laboratory assisting to include safety, microscopy, specimen processing, quality assurance, phlebotomy, and urinalysis; with a focus on Point of Care testing (POCT) in clinical immunology, clinical chemistry, and clinical microbiology. *Acceptance into the Online MLS AAS Program required to take this course Online.

Note: *Acceptance into the MLS AAS Program required

MLS 1114 - Principles of Hematology and Hemostasis

Credits: (4)

Typically Taught Summer Semester: *Full Sem Online*

Typically Taught Fall Semester: *Full Sem, Full Sem*

Online

Typically Taught Spring Semester: *Full Sem, Full Sem*

Online

Fundamental theories of hematopoiesis, routine laboratory evaluation of blood components using standard instrumentation and microscopic methods, including safety and quality control. Fundamental theories of hemostasis and introduction to abnormal hematology. Introduction to routine laboratory methods in hemostasis. At least one semester of chemistry and one semester of anatomy/physiology is recommended prior to taking this course. *Acceptance into the Online MLS AAS Program required to take this course Online.

Pre-requisite(s): MLS 1113. *Acceptance into the MLS AAS Program required.

MLS 2003 - Applied Laboratory Mathematics and Laboratory Statistics

Credits: (3)

Typically Taught Summer Semester: *Full Sem Online*

Typically Taught Fall Semester: *Full Sem, Full Sem*

Online

A discipline-specific course which tailors applied laboratory mathematics and clinical statistics to all areas of the medical laboratory with emphasis in clinical chemistry. Topics to include reagent preparation, specimen dilution protocols, quality assurance and quality control, practical applications of common statistical tests, and statistical analysis using Microsoft Excel. The course is designed to

complement the mathematics component of Clinical Chemistry MLS 2211 and MLS 2213.

MLS 2210 - Principles of Immunoematology

Credits: (5)

Typically Taught Summer Semester: *Full Sem Online*

Typically Taught Fall Semester: *Full Sem Online*

Typically Taught Spring Semester: *Full Sem, Full Sem Online*

Lecture and laboratory covering the theory and principles of Immunoematology relevant to blood group serology, antibody detection and identification, compatibility testing, component preparation and therapy in blood transfusion service, quality controls, donor screening and phlebotomy, transfusion reactions and hemolytic disease of the newborn. **Pre-requisite(s):** MLS 1113. *Acceptance into the MLS AAS Program required.

MLS 2211 - Principles of Clinical Chemistry I

Credits: (5)

Typically Taught Summer Semester: *Full Sem Online*

Typically Taught Fall Semester: *Full Sem, Full Sem Online*

Typically Taught Spring Semester: *Full Sem Online*

Basic concepts and techniques in clinical chemistry and quality control utilizing manual and automated laboratory procedures. Emphasis on blood and body fluid assessments of carbohydrates, bilirubin, non-protein nitrogen testing and electrolyte acid/base balance.

Pre-requisite(s): CHEM 1110 and CHEM 1120 or CHEM 1210 and CHEM 1220.

*Acceptance into the MLS AAS Program required

MLS 2212 - Principles of Clinical Microbiology I

Credits: (4)

Typically Taught Summer Semester: *Full Sem Online*

Typically Taught Fall Semester: *Full Sem, Full Sem Online*

Typically Taught Spring Semester: *Full Sem Online*

This course provides an in-depth coverage of clinically significant pathogenic cocci and Gram negative rods, including epidemiology, pathogenicity, and procedures for traditional laboratory identification.

Pre-requisite/Co-requisite: Pre/Co-requisite: MICR 1113 or MICR 2054. *Acceptance into the MLS AAS Program required.

MLS 2213 - Principles of Clinical Chemistry II

Credits: (5)

Typically Taught Summer Semester: *Full Sem Online*

Typically Taught Fall Semester: *Full Sem Online*

Typically Taught Spring Semester: *Full Sem, Full Sem Online*

Continuation of MLS 2211 with the introduction to methods for the assessment of proteins, lipids, enzymology, therapeutic drug monitoring, toxicology and basic endocrinology.

Pre-requisite(s): MLS 2211.

*Acceptance into the MLS AAS Program required

MLS 2214 - Principles of Clinical Microbiology II

Credits: (4)

Typically Taught Summer Semester: *Full Sem Online*

Typically Taught Fall Semester: *Full Sem Online*

Typically Taught Spring Semester: *Full Sem, Full Sem Online*

This course is a continuation of MLS 2212 including, antimicrobial testing, clinical mycology, virology, parasitology and miscellaneous clinical bacteria including Gram positive bacteria, mycobacteria, and anaerobes.

Pre-requisite(s): MLS 2212. *Acceptance into the MLS AAS Program required.

MLS 2256 INT - Supervised Clinical Experience I

Credits: (1)

Typically Taught Spring Semester: *Full Sem*

Off campus supervised clinical experiences administered in conjunction with clinical faculty in WSU affiliated health care institutions. Offered CR/NC only.

Co-Requisite(s): MLS 2257.

Online students receive credit for clinical experience.

*Acceptance into the MLS AAS Program required

MLS 2257 INT - Supervised Clinical Experience II

Credits: (1)

Typically Taught Spring Semester: *Full Sem*

Off campus supervised clinical experiences administered in conjunction with clinical faculty in WSU affiliated health care institutions. Offered CR/NC only.

Co-Requisite(s): MLS 2256.

Online students receive credit for clinical experience.

*Acceptance into the MLS AAS Program required

MLS 2830 - Directed Reading

Credits: (1-3)

Typically Taught Summer Semester: *Full Sem, Full Sem Online*

Typically Taught Fall Semester: *Full Sem, Full Sem Online*

Typically Taught Spring Semester: *Full Sem, Full Sem Online*

Topics in Laboratory Medicine under the direction of departmental faculty advisor.

*Acceptance into the MLS AAS Program required May be repeated for a maximum of 6 hours.

MLS 2920 - Short Courses, Workshops, Institutes and Special Programs

Credits: (1-3)

Variable Title

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript.

May be repeated twice for a maximum 3 credit hours.

Note: *Acceptance into the MLS AAS Program required

MLS 3301 - Online Orientation for BS Degree

Credits: (2)

Typically Taught Summer Semester: *Full Sem Online*

Typically Taught Fall Semester: *Full Sem Online*

Typically Taught Spring Semester: *Full Sem Online*

This course is designed to prepare the student for the online environment and specifics of the MLS program. Course components include: study and computer skills, learning styles, MLS student handbook, library tutorial, faculty introductions, contact and troubleshooting information, academic advisement, Power Point Presentations, an abbreviated overview of the core MLS disciplines such as hematology, clinical chemistry, clinical microbiology, clinical immunohematology, and a short referenced paper writing and using library resources tailor-made specifically for BS degree MLS students online.

MLS 3302 - Biostatistics, Research Methods, and Laboratory Practices

Credits: (4)

Typically Taught Summer Semester: *Full Sem Online*

Typically Taught Fall Semester: *Full Sem, Full Sem Online*

Typically Taught Spring Semester: *Full Sem Online*

Advanced theory to include laboratory instrument systems comparison, evaluation, and CLIA 88 validation procedures with emphasis on scientific research design and statistical analysis. Interrelated topics in the medical laboratory sciences to include educational strategies for laboratory personnel, approaches to work-load management, budgeting and marketing strategies for laboratory services. Students also learn about and evaluate the new diagnostic technology available to medical laboratories, as well as learning how to select, evaluate, design, perform, and document CLIA-88 acceptable validations studies on new chemistry instrumentation or analytical methods. Interrelated topics in the medical laboratory to include workload management, designing and implementing standards for quality assurance, budgeting laboratory operations, and investigative concepts related to new method and instrument evaluation, selection, and validation.

**Acceptance into the MLS BS Program required

MLS 3310 - Advanced Immunoematology

Credits: (4)

Typically Taught Summer Semester: *Full Sem Online*

Typically Taught Fall Semester: *Full Sem, Full Sem Online*

Typically Taught Spring Semester: *Full Sem Online*

Advanced blood banking theory and specialized procedures as they pertain to transfusion, quality assurance and regulatory issues pertaining to Transfusion Medicine.

**Acceptance into the MLS BS Program required.

MLS 3312 - Clinical Laboratory Immunology and Virology

Credits: (4)

Typically Taught Summer Semester: *Full Sem Online*

Typically Taught Fall Semester: *Full Sem Online*

Typically Taught Spring Semester: *Full Sem, Full Sem Online*

This course provides MLS students with clinical immunology theory and simulated laboratory experience necessary to prepare students for a career in a clinical

laboratory setting. The course will be divided into four sections: basic concepts in immunology, clinical immunology techniques, immune related disease states, and diagnostic virology and will focus heavily on clinical immunology laboratory methods as well as in-depth clinical immunology techniques applicable for the clinical laboratory sciences student. **Acceptance into the MLS BS Program required

MLS 3313 - Advanced Hematology and Hemostasis

Credits: (4)

Typically Taught Summer Semester: *Full Sem Online*

Typically Taught Fall Semester: *Full Sem, Full Sem Online*

Typically Taught Spring Semester: *Full Sem Online*

Correlation of medical laboratory hematology and hemostasis with emphasis on hematopathology specialized procedures and hematological abnormalities in human cellular components. Routine and specialized coagulation procedures will also be used to detect hemorrhagic and thrombotic problems.

**Acceptance into the MLS BS Program required

MLS 3314 - Advanced Clinical Chemistry

Credits: (4)

Typically Taught Summer Semester: *Full Sem - Online*

Typically Taught Fall Semester: *Full Sem - Online*

Typically Taught Spring Semester: *Full Sem, Full Sem - Online*

This problem-solving oriented course provides a review of basic clinical chemistry test results and then goes deeper and allows students to make connections to organ-related diseases, such as renal, hepatic, and endocrine diseases.

The students will learn how to use clinical correlation as a quality assurance tool to detect patient testing errors.

Students also learn about and evaluate the new diagnostic technology available to medical laboratories. Students also learn about and evaluate the new diagnostic technology available to medical laboratories, as well as learning how to select, evaluate, design, perform, and document CLIA-88 acceptable validations studies on new chemistry instrumentation or analytical methods. Interrelated topics in the medical laboratory include workload management, and designing and implementing standards for quality assurance. Additionally, Therapeutic Drug Monitoring and Toxicology studies are presented. Urinalysis is also reviewed throughout the semester, to include the full scope of both microscopic and macroscopic evaluations.

Pre-requisite(s): Acceptance into the BS program.

MLS 3316 - Advanced Clinical Microbiology and Molecular Diagnostics

Credits: (4)

Typically Taught Summer Semester: *Full Sem - Online*

Typically Taught Fall Semester: *Full Sem - Online*

Typically Taught Spring Semester: *Full Sem, Full Sem - Online*

This course begins with a comprehensive review of introductory clinical bacteriology and mycology, along with a culture site approach to clinical bacteriology for the laboratory identification of pathogens by traditional manual methods. Diagnostic molecular biology of infectious microorganisms will also be covered and will include background of nucleic acid chemistry along with current molecular methodologies of detection.

MLS 4409 - Clinical Correlation

Credits: (1)

Typically Taught Summer Semester: *Full Sem Online*

Typically Taught Fall Semester: *Full Sem, Full Sem Online*

Typically Taught Spring Semester: *Full Sem Online*

This course will enable students to better integrate material from all the major medical laboratory science disciplines including Blood Bank, Chemistry, Hematology, Immunology, Microbiology, and Urinalysis. The case studies presented will also include information about the pathophysiology, etiology and epidemiology. Students will correlate results with disease states, and develop problem solving and critical thinking skills based on real scenarios. Students will also develop skills on how to write and present a case study of their own based on an assigned disease, which will include data gathered from all disciplines and will be presented to the class. **Acceptance into the MLS BS Program required

MLS 4410 - Interdisciplinary Health Care Teams

Credits: (3)

Typically Taught Summer Semester: *Full Sem online*

Typically Taught Fall Semester: *Full Sem Online*

Typically Taught Spring Semester: *Full Sem, Full Sem Online*

This course provides an interdisciplinary experience with the team concept as a priority. The students learn the role of the health care team members, each with their different skills and objectives. The course teaches students to practice an interdisciplinary approach as they research, interact, and learn in the interdisciplinary environment of a

health care setting. **Acceptance into the MLS BS Program required.

MLS 4411 - MLS Simulated Laboratory I

Credits: (3)

Typically Taught Summer Semester: *Full Sem - Online*

Typically Taught Fall Semester: *Full Sem, Full Sem - Online*

Typically Taught Spring Semester: *Full Sem - Online*

Foundational principles for establishing a simulated working laboratory in which students refine technical skills, problem identification and solving, refine work-load management and decision-making skills, development of strategies for managing and implementing the rules and regulations that govern medical laboratory testing.

Pre-requisite/Co-requisite: MLS 3302.

MLS 4412 - MLS Simulated Laboratory II

Credits: (3)

Typically Taught Summer Semester: *Full Sem - Online*

Typically Taught Fall Semester: *Full Sem - Online*

Typically Taught Spring Semester: *Full Sem, Full Sem - Online*

A continuation of project-based applications set forth in MLS 4411. Students staff a simulated medical laboratory and assume responsibilities associated with all facets of laboratory operations. Clinical and academic faculty serve as advisors/managers to each team of students. The process develops team building skills critical to the modern health care setting. MLS 4411 expands to examine issues that cross all health care disciplines.

Pre-requisite(s): MLS 4411.

MLS 4415 - Laboratory Teaching and Supervision

Credits: (3)

Typically Taught Summer Semester: *Full Sem online*

Typically Taught Fall Semester: *Full Sem Online*

Typically Taught Spring Semester: *Full Sem, Full Sem Online*

On Campus: Students will learn basic instructional and pedagogical theory as it applies to the field of medical laboratory science. Theory will be applied through collaborative learning and short presentations, as well as laboratory employee in-service training projects. Basic principles and applications of running a medical laboratory to include system approaches to management, leadership of groups, human resource management, and technical supervision will also be covered. Concepts will be

reinforced through case study analysis and online discussions. Campus students will also participate as laboratory assistants in at least two lower division MLS courses, assisting the faculty in the administration of laboratory instruction, and applying instructional skills one-on-one with students entering the MLS program.

Online: Students fulfill the laboratory requirement by completing a series of management projects specifically designed for the laboratory provided in their clinical rotation.

Pre-requisite(s): **Acceptance into the MLS BS Program required.

MLS 4453 INT - Supervised Clinical Experience I

Credits: (1)

Typically Taught Spring Semester: *Full Sem*

Off campus supervised clinical experiences administered in conjunction with clinical faculty in WSU affiliated health care institutions. Emphasis on experiences associated with laboratory administrative functions. Offered CR/NC only.

Co-Requisite(s): MLS 4454.

Online students receive credit for clinical experience.

**Acceptance into the MLS BS Program required

MLS 4454 INT - Supervised Clinical Experience II

Credits: (1)

Typically Taught Spring Semester: *Full Sem*

Off campus supervised clinical experiences administered in conjunction with clinical faculty in WSU affiliated health care institutions. Emphasis on experiences associated with laboratory administrative functions. Offered CR/NC only.

Co-Requisite(s): MLS 4453.

Online students receive credit for clinical experience.

**Acceptance into the MLS BS Program required

MLS 4800 - Special Problems

Credits: (1-3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Pre-requisite(s): Consent of instructor prior to registration.

May be repeated twice for a maximum 3 credit hours.

Note: **Acceptance into the MLS BS Program required

MLS 4803 - Research Projects in Medical Laboratory Sciences I

Credits: (2)

Typically Taught Fall Semester: *Full Sem*

In this first of two courses, students will identify a significant laboratory related research question and develop an original research design to address that question. Students will work closely with faculty mentors and will prepare a grant application for funding of supplies and reagents, and write an IRB (Institutional Review Board) application. Actual research will be conducted spring semester in the course MLS 4804.

Pre-requisite/Co-requisite: Pre/Co-requisite: MLS 3302. **Acceptance into the MLS BS Program required.

MLS 4804 - Research Projects in Medical Laboratory Sciences II

Credits: (2)

Typically Taught Spring Semester: *Full Sem*

This course is a continuation of MLS 4803, Research Projects in MLS I. Students will continue working on their original research project that was initiated fall semester. After completing the project, students will present their research findings in poster and oral formats, along with preparing a formal manuscript for publication in the university undergraduate research journal ERGO and possibly in other appropriate scientific journals.

Pre-requisite(s): MLS 4803. **Acceptance into the MLS BS Program required.

MLS 4830 - Directed Readings

Credits: (1-3)

Typically Taught Summer Semester: *Full Sem, Full Sem Online*

Typically Taught Fall Semester: *Full Sem, Full Sem Online*

Typically Taught Spring Semester: *Full Sem, Full Sem Online*

Advance topics related to the correlation of medical laboratory data to disease processes. Students may work as a group or independently with academic or clinical faculty. Consent of instructor prior to registration. May be repeated twice for a maximum 3 credit hours.

Note: **Acceptance into the MLS BS Program required.

MLS 4850 - Study Abroad

Credits: (1-6)

Variable Title

The purpose of this course is to provide opportunities for students in health professions to experience a study abroad program that is designed to explore healthcare, culture, and clinical experience.

May be repeated 5 times with a maximum 6 credit hours.

Note: Check with Department for course availability.

MLS 4920 - Short Courses, Workshops, Institutes and Special Programs

Credits: (1-3)

Variable Title

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript.

May be repeated twice for a maximum 3 credit hours.

Note: **Acceptance into the MLS BS Program required.

MLS 5101 - Applications in Clinical Chemistry in Medical Laboratory Sciences

Credits: (4)

Typically Taught Summer Semester: *Full Sem Online*

Typically Taught Fall Semester: *Full Sem Online*

Typically Taught Spring Semester: *Full Sem Online*

Concepts, methods and clinical correlation of clinical chemistry tests are presented. Emphasis is on testing methods and quality control practices covering carbohydrates, bilirubin, non-protein nitrogen, electrolytes, proteins, lipids, enzymes, therapeutic drug monitoring, toxicology, and endocrinology. These topics will include clinical correlation with diseases, allowing students to understand conditions in which abnormal results and or data might be obtained.

MLS 5102 - Clinical Applications in Hematology and Hemostasis

Credits: (3)

Typically Taught Summer Semester: *Full Sem Online*

Typically Taught Fall Semester: *Full Sem Online*

Typically Taught Spring Semester: *Full Sem Online*

This course covers the concepts, analytical methods, and clinical correlation of hematology and hemostasis as it applies to the medical laboratory. In addition to normal functions, the topics will include clinical correlation with various hematological and hemostatic disease processes. Current testing and instrumentation will be included as well as regulatory and competency information.

Pre-requisite(s): For medical laboratory personnel.

MLS 5103 - Clinical Laboratory Microbiology I

Credits: (3)

Typically Taught Fall Semester: *Full Sem Online*

This course provides an in-depth coverage of clinically significant pathogenic cocci and Gram negative rods, including epidemiology, pathogenicity, procedures for traditional laboratory identification.

Pre-requisite(s): For medical laboratory personnel.

MLS 5104 - Clinical Laboratory Microbiology II

Credits: (3)

Typically Taught Spring Semester: *Full Sem Online*

This course is a continuation of MLS 5103, including antimicrobial testing clinical mycology, virology, parasitology and miscellaneous clinical bacteria including Gram positive bacteria, mycobacteria, and anaerobes.

Pre-requisite(s): MLS 5103; for medical laboratory personnel.

Note: This course is not offered on campus.

MLS 5105 - Clinical Immunohematology

Credits: (3)

Typically Taught Summer Semester: *Full Sem Online*

Typically Taught Fall Semester: *Full Sem, Online*

Typically Taught Spring Semester: *Full Sem Online*

This course covers the theory and principles of immunohematology relevant to blood group serology, antibody detection and identification, compatibility testing, component preparation and therapy in blood transfusion service, quality control parameters, donor screening and phlebotomy, transfusion reactions and hemolytic disease of the newborn. This non-laboratory course is for MLS or MLT professionals who would like to update their didactic skills and knowledge in immunohematology as it is practiced in today's hospitals and clinics. Additionally, the course may also be of interest to individuals with a BS/BA degrees in non-medical laboratory science who wish to

obtain current education in clinical immunohematology.

Pre-requisite(s): For medical laboratory personnel.

MLS 5112 - Clinical Laboratory Immunology

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course provides MLS students with clinical immunology theory and virtual laboratory simulations necessary to prepare for a career in a clinical laboratory setting. The course will be divided into four sections: basic concepts in immunology, clinical immunology techniques, immune related disease states, and diagnostic virology and will focus heavily on clinical immunology laboratory methods as well as in-depth clinical immunology techniques applicable for the clinical laboratory sciences student.

MLS 5810 - Experimental

Credits: (1-6)

Experimental

Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript. Refer to Experimental Courses.

MLS 5810 - Technologist in Microbiology: Biostatistics and Laboratory Operations

Credits: (3)

Experimental

This course covers advanced concepts in the clinical laboratory. Material covered will include basic statistical concepts and procedures, experimental design and basic research concepts, analyzer selections and method validation, and various laboratory management theories and techniques. This course will focus on performing a variety of statistical techniques used in method verification/validation studies. The main software package used in this course is Microsoft Excel.

MLS 5810 - Technologist in Microbiology: Clinical Microbiology I

Credits: (4)

Experimental

This class is part of a two-semester program that is designed to give the student the knowledge needed to pass the ASCP Board of Certification Technologist in Microbiology examination by route 3. This semester we will cover bacterial structures, bacterial metabolism, taxonomy, Gram staining, media selection and composition, colony morphology, biochemical tests, antimicrobials, and identification of pathogens. The organisms studied will include aerobic Gram-positive cocci, aerobic Gram-negative diplococci, Gram positive rods, spirochetes, and aerobic Gram-negative bacilli.

MLS 5810 - Technologist in Microbiology: Clinical Microbiology II

Credits: (3)

Experimental

This class is the second in a two-semester regimen that is designed to give the student the knowledge needed to pass the ASCP Board of Certification categorical examination for microbiology by route 3. This semester we will cover anaerobes of clinical importance, mycobacteria, obligate intracellular parasites, viruses, parasites of clinical importance, mycology, and molecular diagnostics. We will also study of identification and disease processes of these organisms. The emphasis of this course will be to present relevant material to the clinical microbiology laboratory.

MLS 5810 - Technologist in Microbiology: Supervised Clinical Experience

Credits: (1)

Experimental

This class is part of a two-semester program that is designed to give the student the knowledge needed to pass the ASCP Board of Certification Technologist in Microbiology examination by route 3. The student will attend a rotation at a clinical affiliate of the Medical Laboratory Science (MLS) Program at Weber State University. It is the goal of these institutions to assist students in completing their education by providing a variety of clinical laboratory experiences and exposure to the professional workplace.

MPAS 6001 - Professional Development

1

Credits: (1)

Typically Taught Spring Semester: *Full Sem*

The first in a series of courses focused on historical and future directions of the PA profession, the importance of professionalism in medical practice, medical ethics, fiduciary duty, and working as part of a healthcare delivery team.

Pre-requisite(s): Student must be accepted to the PA program.

MPAS 6002 - Professional Development 2

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

The second course in the Professional Development series focuses on the health care provider's roles and responsibilities in the area of public health and the practice of preventive medicine. There is a continued emphasis on the display and development of professionalism as it applies to clinical practice.

Pre-requisite(s): Student must be accepted into the PA Program.

MPAS 6003 - Professional Development 3

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

The third course in the series of Professional Development teaches students strategies to build the confidence, skills, and presence needed to become leaders in the field of medicine. There is a continued emphasis on the display and development of professionalism as it applies to clinical practice.

Pre-requisite(s): Student must be accepted into the PA Program

MPAS 6004 - Professional Development 4

Credits: (1)

The fourth course in the Professional Development series is taken at the onset of the student's supervised clinical practice experiential learning. The focus during this transitional phase is in preparation for clinical practice. There is a continued emphasis on the display and development of professionalism as it applies to clinical practice.

Pre-requisite(s): Admission to the Physician Assistant Program.

MPAS 6005 - Professional Development 5

Credits: (1)

The fifth course in the Professional Development series introduces students to topics related to their future roles as a medical provider and what it means to be a medical professional. This course examines the organizational and economic elements of a systems-based practice. There is continued emphasis on the display and development of professionalism as it applies to clinical practice.

Pre-requisite(s): Admission to the Physician Assistant Program.

MPAS 6006 - Professional Development 6

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

The sixth and final course in the Professional Development series has students discussing and reflecting on issues they will face as they head toward graduation and enter into clinical practice.

Pre-requisite(s): Admission to the Physician Assistant Program.

MPAS 6010 - Mechanisms of Health and Disease

Credits: (2)

Typically Taught Spring Semester: *Full Sem*

The MOHD course provides an introduction to fundamental mechanisms of general pathology covering the basic principles of cell biology, immunology, genetics, infectious processes, microbiology, biochemistry, and environmental effects on health. Integration of this material will allow for an understanding of human disease processes and the molecular mechanisms underlying disease development. Disease-specific pathophysiology is integrated and taught in systems-based courses.

Pre-requisite(s): Student must be accepted to the PA program.

MPAS 6020 - Introduction to History and Physical

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

This foundational course introduces students to the art and science of taking an effective, culturally sensitive history and performing a thorough, technically proficient general

physical examination. It focuses on normal physical exam findings in pediatric, adult, and geriatric populations. Students participate in small group, application-based laboratory exercises focusing on the general principles of physical examination as well as recognition of topographic anatomical landmarks on classmates and identification of important surgical anatomy. In addition, students receive instruction and practice in documenting comprehensive health histories and physical exam findings. **Pre-requisite(s):** Student must be accepted to the PA program.

MPAS 6030 - Introduction to Clinical Pharmacology

Credits: (1)

Typically Taught Spring Semester: *Full Sem*

This course provides a foundation for students to understand and utilize the basic principles of pharmacotherapy in the practice of medicine. Topics include pharmacokinetics, pharmacodynamics, drug-drug interactions, adverse drug reactions, and autonomic nervous system pharmacology. Emphasis is placed on individualization of drug therapy and patient-centered care. Specific drug classes will be introduced in relevant medicine courses.

Pre-requisite(s): Student must be accepted to the PA program.

MPAS 6040 - Introduction to Medical Diagnostics

Credits: (2)

Typically Taught Spring Semester: *Full Sem*

This course focuses on the fundamental principles of, and provides practical experience in selecting, ordering, and interpreting common diagnostic studies used to screen and diagnose disease. Further detail and use of diagnostic studies is integrated within systems-based medicine courses.

Pre-requisite(s): Student must be accepted to the PA program.

MPAS 6050 - Evidence-Based Practice 1

Credits: (1)

Typically Taught Spring Semester: *Full Sem*

This course provides foundational knowledge needed by students to integrate evidence-based medicine into their clinical practice. It reviews basic statistics, epidemiological concepts and principles, research methodology and design, and ethical standards in research. Students will learn how to

critically evaluate scientific evidence and will be asked to use that knowledge to critically appraise research articles in this course and during systems-based medicine courses. **Pre-requisite(s):** Student must be accepted to the PA program.

MPAS 6051 - Evidence-Based Practice 2

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

The second EBP course continues teaching the principles of evidence-based medicine, and is designed to assist students in planning their masters project, which will be completed and presented during their clinical year of training. Students will create a PICO question that will be the basis of their masters project, develop an annotated bibliography, and create a plan for writing a literature review.

Pre-requisite(s): Student must be accepted to the PA program.

MPAS 6060 - Eyes, Ears, Nose, and Throat

Credits: (2)

Typically Taught Spring Semester: *Full Sem*

A systems-based course that examines and integrates the epidemiology, anatomy, physiology, pathophysiology, clinical presentation, diagnosis, and medical management of commonly encountered medical conditions affecting the eyes, ears, nose, and throat (EENT).

Pre-requisite(s): Student must be accepted to the PA program.

MPAS 6070 - Dermatology

Credits: (1)

Typically Taught Spring Semester: *Full Sem*

A systems-based course that examines and integrates the epidemiology, anatomy, physiology, pathophysiology, clinical presentation, diagnosis, and medical management of conditions commonly encountered in DERMATOLOGY.

Pre-requisite(s): Student must be accepted to the PA program.

MPAS 6080 - Infectious Disease

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

This course provides a solid foundation in the diagnosis and management of infectious diseases. Common bacterial,

viral, fungal, and parasitic pathogens are explored by examining mechanisms of disease transmission and pathogenicity, epidemiology, pathophysiology, clinical presentation, diagnosis, and medical management, including antimicrobial pharmacotherapy.

Pre-requisite(s): Student must be accepted to the PA program.

MPAS 6100 - Hematology/Oncology

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

A systems-based course that examines and integrates the epidemiology, anatomy, physiology, pathophysiology, clinical presentation, diagnosis, and medical management of commonly encountered medical disorders in hematology and oncology. Specific oncology disorders are covered in systems-based courses.

Pre-requisite(s): Student must be accepted to the PA program.

MPAS 6101 - Clinical Integration 1

Credits: (2)

Typically Taught Spring Semester: *Full Sem*

The first Clinical Integration course teaches students how to care for patients (and their families) from diverse backgrounds and various life phases, in ways that are meaningful and valuable to individual patient preferences. Students learn about healthcare disparities and their impact on health and wellness, and are challenged to identify and reflect on how their own potential biases may affect patient care.

Pre-requisite(s): Student must be accepted to the PA program.

MPAS 6102 - Clinical Integration 2

Credits: (2)

Typically Taught Summer Semester: *Full Sem*

The second Clinical Integration course focuses on ambulatory care medicine with integration of preventive care and principles of public health.

Pre-requisite(s): Student must be accepted to the PA program.

MPAS 6103 - Clinical Integration 3

Credits: (2)

Typically Taught Fall Semester: *Full Sem*

The third in this series of Clinical Integration courses focuses on longitudinal management of established

patients, admission orders, inpatient management, progress notes, discharge summaries, management of surgical patients, rehabilitative care, and issues surrounding end-of-life care.

Pre-requisite(s): Student must be accepted to the PA program.

MPAS 6110 - Pulmonology

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

A systems-based course that examines and integrates the epidemiology, anatomy, physiology, pathophysiology, clinical presentation, diagnosis, and medical management of commonly encountered pulmonary disorders.

Pre-requisite(s): Student must be accepted to the PA program.

MPAS 6120 - Genitourinary (Nephrology/Urology)

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

A systems-based course that examines and integrates the epidemiology, anatomy, physiology, pathophysiology, clinical presentation, diagnosis, and medical management of commonly encountered medical disorders in nephrology and urology.

Pre-requisite(s): Student must be accepted to the PA program.

MPAS 6130 - Endocrinology

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

A systems-based course that examines and integrates the epidemiology, anatomy, physiology, pathophysiology, clinical presentation, diagnosis, and medical management of commonly encountered medical conditions affecting metabolism and organs of the endocrine system.

Pre-requisite(s): Student must be accepted to the PA program.

MPAS 6140 - Obstetrics and Gynecology

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

A systems-based course that examines and integrates the epidemiology, anatomy, physiology, pathophysiology, clinical presentation, diagnosis, and medical management of disorders commonly encountered in women's health.

Pre-requisite(s): Student must be accepted to the PA program.

MPAS 6150 - Musculoskeletal Disorders 1

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

A systems-based course that examines and integrates the epidemiology, anatomy, physiology, pathophysiology, clinical presentation, diagnosis, and medical management of commonly encountered musculoskeletal disorders. The first course in this series focuses on rheumatological disorders, osteoarthritis, osteoporosis, and bone tumors.

Pre-requisite(s): Student must be accepted to the PA program.

MPAS 6170 - Neurology

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

A systems-based course that examines and integrates the epidemiology, anatomy, physiology, pathophysiology, clinical presentation, diagnosis, and medical management of commonly encountered medical conditions in neurology.

Pre-requisite(s): Student must be accepted to the PA program.

MPAS 6180 - Cardiovascular Medicine

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

A systems-based course that examines and integrates the epidemiology, anatomy, physiology, pathophysiology, clinical presentation, diagnosis, and medical management of commonly encountered medical conditions affecting the cardiovascular system. Students will also be challenged to learn the fundamentals of interpreting an electrocardiogram (EKG) with an emphasis on identifying common abnormal EKG patterns and differentiating these patterns from normal and normal variant EKG tracings.

Pre-requisite(s): Student must be accepted to the PA program.

MPAS 6190 - Gastroenterology

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

A systems-based course that examines and integrates the epidemiology, anatomy, physiology, pathophysiology, clinical presentation, diagnosis, and medical management of commonly encountered medical disorders

in gastroenterology.

Pre-requisite(s): Student must be accepted to the PA program.

MPAS 6200 - Musculoskeletal Disorders 2

Credits: (2)

Typically Taught Fall Semester: *Full Sem*

A systems-based course that examines and integrates the epidemiology, anatomy, physiology, pathophysiology, clinical presentation, diagnosis, and medical management of commonly encountered musculoskeletal disorders. This second course in the series focuses on orthopedic injuries and disorders.

Pre-requisite(s): Student must be accepted to the PA program.

MPAS 6210 - Psychiatry

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

A systems-based course that emphasizes the psychosocial aspects of medicine, examining and integrating the epidemiology, anatomy, physiology, pathophysiology, clinical presentation, diagnosis, and medical management of commonly encountered medical disorders in psychiatry. This course also emphasizes internal behavior patterns that motivate or cause behaviors.

Pre-requisite(s): Student must be accepted to the PA program.

MPAS 6500 - Preceptorship 1

Credits: (12)

Typically Taught Spring Semester: *Full Sem*

Supervised clinical practicum experience in primary care or specialty care in medical practice settings. May also include assignments and objective examinations.

Pre-requisite(s): Student must be accepted to the PA program.

MPAS 6510 - Preceptorship 2

Credits: (12)

Typically Taught Summer Semester: *Full Sem*

Supervised clinical practicum experience in primary care or specialty care in medical practice settings. May also include assignments and objective examinations.

Pre-requisite(s): Student must be accepted to the PA program.

MPAS 6520 - Preceptorship 3

Credits: (12)

Typically Taught Fall Semester: *Full Sem*

Supervised clinical practicum experience in primary care or specialty care in medical practice settings. May also include assignments and objective examinations.

Pre-requisite(s): Student must be accepted to the PA program.

MPC 5080G - Intercultural Communication

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Explores theoretical perspectives in intercultural communication. Through analysis of various intercultural theories, students will become aware of cultural influences on communication in both international and domestic cultures. This course may not apply toward graduate degree requirements if an undergraduate course of the same name or content has been used for undergraduate credit.

MPC 5090G - Gender and Communication

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

This course is designed to help students understand the influence that communication has upon the shaping of gender and the influence that gender has in shaping communication interactions. Students become aware of, sensitive to, and more experienced in the issues, implications and skills necessary to successfully and meaningfully communicate with males and females, and about males and females in a wide range of communication contexts. This course may not apply toward graduate degree requirements if an undergraduate course of the same name or content has been used for undergraduate credit.

Pre-requisite(s): Permission of MPC program director.

MPC 5100G - Small Group Facilitation and Leadership

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

Theories and practical communication processes are examined and applied to develop fundamental attitudes and skills for facilitating and leading effective groups. This course may not apply toward graduate degree requirements if an undergraduate course of the same name or content has

been used for undergraduate credit.

Pre-requisite(s): Permission of MPC program director.

MPC 5220G - Editing

Credits: (3)

Typically Taught Fall Semester: *Online*

Develops editing knowledge and skills for print and online publications. Covers copy editing, content editing and page editing. This course may not apply toward graduate degree requirements if an undergraduate course of the same name or content has been used for undergraduate credit.

Pre-requisite(s): Permission of MPC program director.

MPC 5400G - Public Relations Media and Campaigns

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

Apply communication principles to internal and external publics; research, plan and evaluate social interrelationships; study of the controlled and uncontrolled media and their role in public relations; prepare a major public relations campaign for a selected client. This course may not apply toward graduate degree requirements if an undergraduate course of the same name or content has been used for undergraduate credit.

MPC 5500G - Topics in Communication

Credits: (1-3)

Variable Title

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

The study and application of communication in contemporary society is dynamic and ever changing. This course will provide students with opportunities to explore specialized topics in contemporary journalism, electronic mediated communication, human communication studies, and public relations in a seminar format. This course may not apply toward graduate degree requirements if an undergraduate course of the same name or content has been used for undergraduate credit.

Pre-requisite(s): Permission of MPC program director.

This course may be taken twice with different designations (topics).

MPC 5550G - Organizational Communication

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Study of communication organizations from various theoretical perspectives with an emphasis on the organizational culture perspective. Includes topics such as communicating with external audiences, decision-making, conflict resolution, and power relationships. This course may not apply toward graduate degree requirements if an undergraduate course of the same name or content has been used for undergraduate credit.

Pre-requisite(s): Permission of MPC program director.

MPC 5650G - Communication Law

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

First Amendment origins, interpretations and philosophy underlying regulation of the mass media. This course may not apply toward graduate degree requirements if an undergraduate course of the same name or content has been used for undergraduate credit.

Pre-requisite(s): Permission of MPC program director.

MPC 5820G - Persuasive Communication

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Study of theories and principles of persuasion from classical to modern times. Examines persuasion as a means of influence in interpersonal communication, public speaking, advertising, politics, and other contexts. This course may not apply toward graduate degree requirements if an undergraduate course of the same name or content has been used for undergraduate credit.

Pre-requisite(s): Permission of MPC program director.

MPC 5850G - Advertising

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A practical and theoretical study of advertising. Course is designed for students planning careers in advertising, as well as for those who are simply lifelong consumers of advertising and want to understand its role in the economic system. This course may not apply toward graduate degree requirements if an undergraduate course of the same name or content has been used for undergraduate credit.

Pre-requisite(s): Permission of MPC program director.

MPC 6010 - Introduction to Graduate Study and Communication Theory

Credits: (3)

Typically Taught Fall Semester: *1st Blk*

Typically Taught Spring Semester: *1st Blk*

This course provides a survey of major theoretical perspectives in the field of communication with an emphasis on how theory can be applied in interpersonal, group, organizational and mass communication contexts. Students also learn about the logic of communication inquiry, the nature and expectations of graduate study, and techniques for conducting literature searches and writing literature reviews.

MPC 6100 - Team Building and Facilitation

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Creating, facilitating and coaching effective work groups and teams is one of the hardest soft skills for organizational professionals to master. This course examines the impact that different structures and communication processes have on group and team collaboration effectiveness, as well as the central role competent communication plays in effective group and team facilitation. It investigates structural and process issues of team building, interpersonal and group communication, and effective problem solving and decision-making skills in collaborative environments. Students should have a greater understanding of their own collaborative teaming abilities upon completion. The purpose of this course is to teach-and have students experience-strategies and tactics for building, working effectively within, and facilitating collaborative teams in the work place.

MPC 6150 - Writing for Professional Communicators

Credits: (3)

Typically Taught Fall Semester: *1st Blk*

Typically Taught Spring Semester: *1st Blk*

Course Fee: \$15.00

Good writing skills are critical to achieving a professional image. Individuals and organizations are judged by the quality of written documents they produce. In this course, students learn to plan and organize, to write clearly, concisely and correctly, and to develop polished final projects. Students undergo an intensive review of basic writing and editing principles and then apply them to specific writing projects. Genres of writing may include

funding proposals, yearly reports, executive plans, organizational descriptions, Web sites, social networking messages, and marketing materials.

MPC 6210 - Presentational Speaking in the Workplace

Credits: (3)

Typically Taught Summer Semester: *1st Blk, 2nd Blk*

The professional work environment benefits from the communication competency of its members. This course is designed to enhance the communication skills required by the professional communicator across a broad set of communication media: oral presentations, written texts, and digital interactions. Primary emphasis will be placed on combining strategic thinking with powerful writing to produce a variety of effective messages aimed at different audiences. In addition, students will develop a broad-based understanding of how each of these modes of communications function both separately and interdependently to produce a coherent organizational message.

MPC 6250 - Interviewing

Credits: (3)

This course will explore various types of interviews conducted in work and personal situations: Recruiting, Performance Appraisals, Informational, Survey, Persuasion, Counseling, and Health Care. While core communication skills are important across types of interviews, interviewing strategies can differ greatly based on different contexts, specific situations, and personalities of interviewers and interviewees.

Note: This course is offered as needed.

MPC 6300 - New Media in Professional Communication

Credits: (3)

Typically Taught Summer Semester: *1st Blk, 2nd Blk*
Course Fee: \$50.00

New media allow all individuals and organizations to effectively interact with their audiences on an ongoing basis. This course addresses how new and emerging media technologies such as social networks, social media, blogs, podcasts, video sites, search engine management tools, and even virtual worlds can be leveraged by communication professionals in order to further meaningful relationships with their internal and external audiences. This course will give students greater understanding of new media required to allow a rethinking of the overall communication process.

As a result students will develop effective communication strategies specifically geared toward the needs of their organization or field of interest.

MPC 6350 - Visual Communication in the Workplace

Credits: (3)

Typically Taught Summer Semester: *1st Blk, 2nd Blk*

Visual messages are a powerful way to inform, persuade and educate. Within the workplace, the ability to effectively communicate goals, ideas and client information through combinations of visual and textual elements is an invaluable skill. This course introduces students to philosophical and theoretical perspectives that enable effective visual presentation in the organization. It also exposes them to practical design principles, skills and tactics that generally guide effective screen and print design. Additionally, students will learn how to critically analyze visual communication materials and aids according to standards that reflect sensitivity to fairness, diversity, good ethics and effectiveness.

MPC 6400 - Leadership Communication

Credits: (3)

Typically Taught Spring Semester: *1st Blk, 2nd Blk*

Communication is the core of organizational leadership. This course is designed to explore both the theoretical and practical aspects of leader- and followership embedded in complex environments with an emphasis on recognizing and managing change. Leadership in organizations will be examined from a variety of perspectives including historical, ethical and critical. Key topics include leadership traits and skills, leadership roles and behaviors, power and influence, theories of leadership, leading change, ethical leadership, and developing leadership skills. The course includes experiential activities using cases, role plays, and action learning projects to develop relevant skills.

MPC 6450 - Advanced Organizational Communication

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

This course provides a graduate-level overview and introduction to the discipline of organizational communication in a global world. Class readings and discussions will include topics such as organizational structure/process, rationality and decision-making, (sub)cultures and socialization, individual and collective identities, networks, leadership, teams, power/control,

conflict, change, technologies, and ethics. Case studies from current events and guest speakers will be used to apply theoretical concepts to actual organizational life.

MPC 6500 - Org Comm Consulting

Credits: (3)

Variable Title

Typically Taught Summer Semester: 2nd Blk

The purpose of this course is to explore organizational communication assessment, organizational consulting, and executive coaching concepts, practices, and methodologies. This class will teach students how to effectively work with and in organizations to improve their communication processes, management communication strategies, and strategic long-term planning in order to optimize talent and performance. The skills acquired in this class will prepare students to apply evidence-based communication best practices in organizations.

MPC 6500 - Topics in Professional Communication

Credits: (3)

Variable Title

The study and application of professional communication in contemporary society is dynamic and ever changing. This course will provide students with opportunities to explore specialized topics in a seminar format.

Pre-requisite(s): MPC 6010 or permission of MPC program director.

This course may be taken twice as elective credit with different titles and topics.

Note: This course is offered as needed.

MPC 6600 - Strategic Communication

Credits: (3)

Typically Taught Spring Semester: 1st Blk, 2nd Blk

Effective strategic communication and planning is essential to any organization. This course helps students to understand and develop skills to create and manage internal and external messages for different situations, industries, and locations. Students prepare for effective strategic communication by asking and answering the right questions about the goals of the organization, its members, stakeholders and others who impact its operation, such as regulatory bodies. Effective strategic communication and its planning consist of the optimal use of people, budgets, tactical elements, and media in a chaotic, changing world.

MPC 6620 - Conflict Resolution and Mediation

Credits: (3)

Typically Taught Summer Semester: 2nd Blk

Communication is at the center of any negotiation or mediation process. It is in and through communication that resolution becomes possible. This class will explore the key interpersonal skills that are central to managing the processes of conflict resolution and mediation competently.

MPC 6700 - Qualitative Communication Research & Analysis

Credits: (3)

Typically Taught Fall Semester: 2nd Blk

Typically Taught Spring Semester: 2nd Blk

Course Fee: \$15.00

Research skills are essential for answering questions and solving problems. This course reviews qualitative investigations in communication. In this course, students will learn to read, interpret, and critically evaluate qualitative communication research. Students will be exposed to qualitative concepts, research designs, and the fundamentals of conducting and analyzing research using interviewing, ethnography, constant comparative analysis, and content analysis. In addition, students will design and execute their own research study, which entails: an appropriate qualitative design, data collection, data analysis, and a formal research report.

Pre-requisite(s): MPC 6010 or permission of MPC program director.

MPC 6710 - Communication Survey Design and Analysis

Credits: (3)

Typically Taught Fall Semester: 2nd Blk

Research skills are essential for answering questions and solving problems. This course reviews quantitative communication research methods, with an emphasis on survey design and statistical analysis, and explores vocational/professional applications of communication research. In this course, students will learn to read, interpret, and critically evaluate quantitative communication research reports. Students will be exposed to basic social science concepts, research designs, and the fundamentals of conducting and analyzing research. In addition, students will design and execute their own research study, which entails: a survey design, data collection, data analysis, and a formal research report.

Pre-requisite(s): MPC 6010

MPC 6900 - Thesis/Project I

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

In this course students will begin their theses or projects under the direction and with the support of their faculty committees. They will write, present and have their thesis or project proposal approved.

Pre-requisite(s): MPC 6010 or permission of MPC program director.

Note: **Please note that students who, for any reason, do not finish their thesis or project or program of courses within the two-year framework suggested in this program, must pay continuing enrollment and tuition the semester they defend their thesis or project.*

MPC 6950 - Thesis/Project II

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

This course will allow students to complete their workplace project or traditional academic thesis. Students will prepare, present and defend their projects or theses during this semester for review and approval.

Pre-requisite(s): MPC 6010 or permission of MPC program director.

This course is repeatable for a total of two times for a total of nine credit hours of which only three will apply to degree completion.

Note: **Please note that students who, for any reason, do not finish their thesis or project within the two-year framework suggested in this program, must pay continuing enrollment and tuition the semester they defend their thesis or project.*

MSAT 6080 - Research Methods I

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

This course explores the process and methods of scientific inquiry and interpretation of research findings in athletic training. Students will gain familiarity with the major elements of research including literature review, quantitative and qualitative methodology, design, evaluation of research, statistical analysis, presentation of data, and ethical considerations. This course also provides an overview of statistics including descriptive and inferential statistics and one-way ANOVA. Students should have a basic understanding of conducting library and Internet information searches prior to taking this course.

MSAT 6085 - Research Methods II

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

This course is designed to help students develop a master's thesis research project proposal that is carefully researched and professionally written. Students will prepare an introduction, literature review, detailed methodology, and IRB proposal.

Pre-requisite(s): MSAT 6080.

MSAT 6090 - Research Methods III

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

This course is designed to help students complete a master's thesis research project. Basic statistical analysis will be reviewed and advanced statistics will be introduced. Students will collect and analyze data and synthesize results. At the completion of the course, students will submit a full manuscript, suitable for publication, along with an abstract and a professional poster.

Pre-requisite(s): MSAT 6085.

MSAT 6095 - Research Methods IV

Credits: (1-3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course allows students to choose one of the following options: 1) complete their masters thesis requirements from MSAT 6090; 2) prepare a manuscript for publication or formal oral presentation for a professional conference, or 3) participate in additional research above and beyond the masters thesis.

May be taken twice up to 9 credit hours.

MSAT 6100 - Advanced Emergency Care in AT

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Course Fee: \$61.00

To prepare graduate athletic training students to respond to life and limb-threatening emergencies. This course also includes advanced wound care, equipment removal, and emergency drug administration. When successfully completed, this course leads to a two-year American Red Cross certification in Emergency Medical Response, CPR/AED for Professional Rescuers, Emergency Oxygen

administration, and one-year certification in Bloodborne Pathogens Training.

MSAT 6200 - Mental and Behavioral Health in Injury and Rehabilitation

Credits: (3)

Typically Taught Summer Semester: *Full Sem, 1st Blk, 2nd Blk*

This course is designed to provide a basic understanding of the psychology of sport, injury, and rehabilitation. Topics covered include emotional and cognitive response to injury and rehabilitation, motivation, mental skills training and use, psychological antecedents of injury, psychology of injury and rehabilitation, using mental skills with injured athletes, career transition and termination, disabilities, rehabilitation/exercise adherence, eating disorders, alcohol and drug/substance abuse, gender and cultural diversity, and research methods related to psychology of sport, injury and rehabilitation. The graduate student will get an advanced approach, including in-depth application of psychological interventions with injured athletes and a more comprehensive investigation of psychosocial aspects.

Pre-requisite(s): PSY 1010.

MSAT 6300 - Orthopedic Assessment and Diagnosis I

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Content of this course addresses the principles of orthopedic evaluation techniques and the diagnosis and care for most common musculoskeletal injuries for master's of athletic training students. The student must integrate knowledge of anatomical structures, physiology principles and evaluative techniques to provide a basis for critical decision-making in an injury management environment.

MSAT 6301 - Orthopedic Assessment and Diagnosis II

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

This course is a continuation of MSAT 6300 - Orthopedic Assessment and Diagnosis I. Content from this course will further develop students' current knowledge and skills to evaluate musculoskeletal injuries while furthering their understanding of less commonly reported injuries. The students will integrate knowledge of anatomical structures and principles of physiology to appropriately select, perform, and correctly interpret results from an orthopedic evaluation technique, and to make critical decisions

regarding treatment, injury management, and return to play.

Pre-requisite(s): MSAT 6300.

MSAT 6350 - Assessment and Care of General Medical Conditions

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Content of this course addresses evaluation and care for general medical conditions of athletes and active individuals. The student must integrate knowledge of anatomy, physiology, pharmacology and injury related to athletics and sport in order to provide a basis for clinical decision making as athletic trainers.

MSAT 6390 - Foundations of Therapeutic Interventions

Credits: (2)

Typically Taught Fall Semester: *Full Sem*

This course is designed to introduce students to the contemporary usage and foundation of common therapeutic interventions in musculoskeletal rehabilitation (i.e., cryotherapy, thermotherapy, proprioceptive neuromuscular facilitation, etc.). Through lecture, discussion, and laboratory experience, the scientific basis of musculoskeletal rehabilitation involving these therapeutic interventions will be examined. Students will learn about the body's response to musculoskeletal injury and the subsequent healing process. Emphasis will be placed on theoretical and physiological effects of therapeutic interventions, their indications and contraindications, and application based on the goals in each phase of rehabilitation.

MSAT 6400 - Therapeutic Modalities for Musculoskeletal Injuries

Credits: (2)

Typically Taught Fall Semester: *Full Sem*

Through lecture, discussion, and laboratory experience, the scientific basis of musculoskeletal rehabilitation involving therapeutic modalities will be examined. This course is designed to build upon the introductory foundations of therapeutic modalities established in MSAT 6390. Topics for discussion include the application of electrotherapy devices, therapeutic ultrasound, and other therapeutic modalities.

Two lecture and 2 lab hours per week.

Pre-requisite(s): MSAT 6300 and MSAT 6390

MSAT 6401 - Innovations in Therapeutic Modalities

Credits: (2)

Typically Taught Spring Semester: *Full Sem, 1st Blk, 2nd Blk*

This course is designed to introduce students to novel therapeutic modalities that are being integrated in modern musculoskeletal rehabilitation. Through lecture, discussion, and laboratory experience, both the theoretical and scientific basis of new therapeutic modalities will be examined. Students will learn the foundational concepts and techniques of these modalities, and review the literature to determine their effectiveness from an evidence-based perspective.

Pre-requisite(s): MSAT 6400.

MSAT 6430 - Principles of Athletic Training

Credits: (3)

This course is designed to give graduate-level athletic training students an overview of athletic training principles. Students will gain knowledge in the areas of musculoskeletal injuries, environmental risk factors, mechanisms and characteristics of sports trauma, and the cooperative sports medicine team.

Pre-requisite(s): HLTH 2300 or RHS 2300.

Note: This course is not currently offered.

MSAT 6431 - Orthopedic Taping and Durable Medical Equipment

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Graduate students in this course will be instructed in evidence-based applications and use of orthopedic and kinesiology taping, padding, and wrapping techniques as well as durable medical equipment including sport performance or stability braces, manufactured splints, and crutches/canes. Students will also learn how to properly fit protective sports equipment. Students will learn to apply a variety of techniques to support the trunk and extremities.

MSAT 6432 - Casting and Orthotic Fabrication

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Course Fee: \$120.00

Graduate students in this course will be exposed to

evidence-based applications including orthopedic casting custom splints, and orthotics. Students will learn to apply a variety of techniques to support orthopedic injuries of the trunk and extremities.

Pre-requisite(s): MSAT 6431.

MSAT 6450 - Therapeutic Rehabilitation I

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

Content of this course provides a foundational understanding and concepts of therapeutic exercise as it relates to the rehabilitation process of musculoskeletal injuries. Course provides understanding and skills associated with hands-on techniques used in the rehabilitation of athlete/patient from an injury state to a high level of function for return to sport, occupational activities, and/or general activities of daily living.

Pre-requisite(s): MSAT 6300.

MSAT 6451 - Therapeutic Rehabilitation II

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Content of this course provides advanced understanding of therapeutic rehabilitation as it relates to designing, implementing, and instructing patients through a therapeutic rehabilitation program. This course provides advanced instruction and hands-on techniques in the rehabilitation of a patient from an injury state to a high performance level in sport, occupation, or other activities reflective of the patient's environment and movement goals.

Pre-requisite(s): MSAT 6450.

MSAT 6452 - Advanced Manual Therapy Techniques

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Content of this course provides a specialized understanding of therapeutic rehabilitation as it pertains to manual therapy techniques. This course provides advanced instruction and hands-on techniques such as massage, soft-tissue mobilization, joint mobilizations, myofascial release, traction, and muscle energy techniques. This course will also introduce and discuss emerging rehabilitation techniques.

Pre-requisite(s): MSAT 6390.

MSAT 6480 - Advanced Principles of Evidence-Based Practice

Credits: (3)

Typically Taught Summer Semester: *Full Sem, 1st Blk, 2nd Blk*

This course will expand students' understanding and application of Evidence-Based Practice (EBP) skills introduced in MSAT 6080. Students will be expected to read, critically analyze, and participate in the discussion of peer-reviewed research articles.

MSAT 6500 INT - Foundations of Athletic Training

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Through lecture, discussion, and laboratory experiences, the recognition and management of environmental illnesses will be examined. Explores the history and governance of the AT profession. Orients students to the graduate athletic training program including professional writing and clinical experiences.

MSAT 6501 INT - Graduate Practicum I

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

Provides an opportunity for graduate-level athletic training students to review athletic training concepts and skills from prior coursework and demonstrate proficiency in orthopedic assessment and treatment. Students will participate in clinical rotations and other clinical experiences.

Pre-requisite(s): MSAT 6500.

MSAT 6502 INT - Graduate Practicum II

Credits: (3)

Typically Taught Summer Semester: *Full Sem, 1st Blk, 2nd Blk*

Provides an opportunity for graduate-level athletic training students to review athletic training concepts and skills from prior coursework and demonstrate proficiency in orthopedic assessment and treatment. Students will participate in clinical rotations and other clinical experiences.

Pre-requisite(s): MSAT 6501.

MSAT 6503 INT - Graduate Practicum III

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Provides an opportunity for graduate-level athletic training students to review athletic training concepts and skills from

previous coursework and demonstrate proficiency in orthopedic assessment, therapeutic rehabilitation, and treatment. Students will participate in clinical rotations and other clinical experiences.

Pre-requisite(s): MSAT 6502

MSAT 6504 INT - Graduate Practicum IV

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

Provides an opportunity for graduate-level athletic training students to review athletic training concepts and skills from previous coursework and demonstrate proficiency in orthopedic assessment, therapeutic rehabilitation, manual therapy, and treatment. Students will participate in clinical rotations and other clinical experiences.

Pre-requisite(s): MSAT 6503

MSAT 6600 - Administration and Management in Athletic Training

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

Provides an overview of the necessary policies, procedures, maintenance, and daily operation of athletic training facilities. Applies principles of facility design and planning, information management, legal and ethical considerations in health care, and professional development as it relates to athletic training.

Pre-requisite(s): MSAT 6502.

MSAT 6700 - Advanced Diagnostic Imaging for the Athletic Training Profession

Credits: (1)

Typically Taught Spring Semester: *Full Sem*

This course provides an opportunity for students to gain exposure to the diagnostic imaging techniques commonly used by the medical community in diagnosis of injury in the athlete. Upon completion of the course, students will be able to identify anatomy and understand terminology used by health professionals when discussing diagnostic images and have an advanced understanding of indications, contraindications, and clinical implications.

Pre-requisite(s): MSAT 6350.

MSAT 6740 - Nutrition for Athletic Trainers

Credits: (1)

Typically Taught Summer Semester: *1st Blk, 1st Blk Online*

Typically Taught Fall Semester: *NA*

Typically Taught Spring Semester: *NA*

Graduate students in this course will expand their nutritional knowledge and skills in counseling athletes in common athletic training situations. This course will also include special situations like nutrition role in concussion recovery and popular diet and sports misconceptions.

MSAT 6750 - Evidence-Based Evaluation and Treatment of the SI Joint and Spine

Credits: (2)

Typically Taught Spring Semester: *1st Blk*

This course will focus on evidence-based evaluation and management of the spine and pelvis, including the cervical spine, thoracic spine, lumbar spine and the sacroiliac joints. The student must integrate anatomical structures, physiology principles, and evaluative techniques to provide a basis for critical decision-making and management for these pathologies.

Pre-requisite(s): MSAT 6300, MSAT 6301.

MSAT 6760 - Suturing, Joint Relocation and Advanced AT Skills

Credits: (1)

Typically Taught Fall Semester: *1st Blk*

Typically Taught Spring Semester: *2nd Blk, 1st Blk*
Course Fee: \$40.00

Graduate students in this course will learn advanced wound closure techniques such as skin adhesives and basic suturing. This course will also include advanced clinical skills such as reducing dislocations.

MSAT 6810 - Adv. Wound Closure and Skill

Credits: (1)

Experimental Course, Contact Department for More Information

Graduate students in this course will learn advanced wound closure techniques such as skin adhesives and basic suturing. This course will also include advanced clinical skills related to reducing dislocations.

MSAT 6810 - Experimental Courses

Credits: (1-6)

Individual courses offered on an experimental basis, identified by specific name and description. The specific title will appear on student's transcript along with the authorized credit. May be repeated up to 3 credit hours. Refer to Experimental Courses.

MSAT 6998 - Master's Board of Certification (BOC) Exam Preparation

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

This course prepares Graduate Athletic Training students to take the Athletic Trainer Board of Certification (BOC) Exam. This course will review content from all courses in the Master of Science in Athletic Training program as well as content from the program's prerequisite courses.

Pre-requisite(s): MSAT 6450.

May be repeated 2 times up to 3 credit hours.

MSAT 6999 - Special Topics in Athletic Training

Credits: (1-3)

Typically Taught Spring Semester: *Full Sem*

The profession of Athletic Training evolves quickly and frequently new skills and techniques are required. This course will present cutting edge athletic training skills and concepts.

MSE 1210 - Metal Processing and Joining for Engineers

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Manufacturing processes for cost-effective, high-quality production. Consideration of technical capabilities and limitations of alternative methods. Includes Metal Removal, forming, welding concepts and non-tradition manufacturing processes. Course project required. Laboratory experiments include mill and lathe work, welding techniques, friction coefficients analysis and milled surface evaluation.

MSE 3040 - Cost Estimating and Engineering Economic Analysis

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

This course focuses on effective design and implementation

of reliable, economically competitive, and environmentally benign manufacturing processes and systems. Topics will include an overview of the manufacturing systems approach in production, control, quality, automation, an introduction to facilities planning and design, an introduction to operations research and simulation in manufacturing, and engineering economics. An introduction to government manufacturing systems engineering will also be presented.

Pre-requisite(s): MATH 1210, MSE 3700.

MSE 3360 - Manufacturing Process and Materials Lab

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Manufacturing processes for cost-effective, high-quality production. Consideration of technical capabilities and limitations of alternative methods. Includes forming, removal, casting, joining, heat treating, molding, finishing and coating. Course project required. Laboratory experiments include heat treating, deep drawing, powder metallurgy, casting, injection molding, fabricating composites, friction coefficients analysis and milled surface evaluation.

Pre-requisite(s): ENGR 2010, ENGR 2160.

MSE 3460 - Product Design and Development

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

An advanced computer-aided design course using state-of-the-art solid modeling CAD/CAM software. Topics include: 3D parametric solid modeling, applications associativity, design-by-feature, assembly modeling, injection mold design, flat pattern development, design analysis using FEA, realistic rendering, and detailing.

Pre-requisite(s): ENGR 1000, PDD 1160.

MSE 3700 - Manufacturing Systems I

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

This course focuses on effective design and implementation of reliable, economically competitive, and environmentally benign manufacturing processes and systems. Topics will include an overview of the manufacturing systems approach in production, control, quality, automation, an introduction to facilities planning and design, an introduction to operations research and simulation in manufacturing, and engineering economics. Students will

also be introduced to DoD systems engineering terminology.

Pre-requisite(s): MFET 2320.

MSE 3710 - Computer Aided Manufacturing and Additive Manufacturing/Lab

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

This course will introduce and explain concepts behind Computer-Automated Manufacturing (CAM). It will define elements, terms, and concepts involved with CAM. Elements of rapid prototyping will also be covered from conceptual design in solids to production of tooling and parts. This course is designed for those who have the basic understanding of the setup and operation of CNC machine tools and programming. Software will be used to perform the CAM operations, such as part generation and post processing.

Pre-requisite(s): MSE 1210, PDD 1010, PDD 1160 or MSE 3460.

MSE 3850 - Statistical Process Control and Reliability

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

Control of quality with statistical analysis; typical control techniques and underlying theory. Development of reliability models and procedures for product assurance. Course will utilize Minitab and Microsoft Excel Spreadsheet software.

Pre-requisite(s): MFET 2410 or MATH 1040 or MATH 3410.

MSE 3910 - Six Sigma Methods and Tools in Manufacturing

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Six Sigma methods use statistical tools to bring about continual improvement of quality in manufactured goods and services and to document that positive change has occurred. These tools include Failure Mode and Effects Analysis (FMEA), Measurement Systems Analysis (gage R&R), Control Charts, Process Capability Analysis, and Design of Experiments. Students will learn and apply these methods and tools through class participation and completion of required projects. Course will utilize Minitab

and Microsoft Excel spreadsheet software.
Pre-requisite(s): MSE 3850 or MFET 3810.

MSE 4010 - Facility Design and Material Handling

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

In-depth concepts in the planning and design of manufacturing facilities, product analysis, manufacturing processes and equipment selection, and schedule design; flow, space, activity relationships and space planning; location and layout; material handling systems; and facilities planning models.

Pre-requisite(s): MSE 3360, MSE 3460.

MSE 4590 - Lean Manufacturing Systems

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

This course addresses the organization, design, and management of production systems using lean manufacturing techniques. Topics include work standardization, visual manufacturing, workplace organization, poke-yoke methodology, value stream mapping, setup reduction, batch size reduction, kaizen, total productive maintenance, pull systems/kanbans, cellular manufacturing design concepts, & cellular plant layout concepts.

Pre-requisite(s): MFET 2300 or MFET 2320.

MSE 4600 - Production Systems Modeling and Analysis/Lab

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

Design and analysis of production systems. Fixed, flexible, and programmable automation. Modeling and simulation of alternative production systems in conjunction with the systems-design process.

Pre-requisite(s): MSE 3460, MSE 3700.

MSE 4610 - Project Management for Engineers

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course is focused on teaching methods and tools for planning and managing complex product and system development projects. The class will focus on the

preparation, planning, monitoring and adaptation of projects. The class is organized into five loosely interwoven modules; project planning and simulation techniques, case studies, project tracking, international projects, and project management resources.

Pre-requisite(s): MSE 3040, MSE 3460.

Co-Requisite(s): MSE 4615.

MSE 4615 - Lab: Senior Project Design I

Credits: (2)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This is an engineering laboratory subject for manufacturing systems engineering seniors. Major emphasis is on interplay between analytical and experimental methods in solution of research and development problems.

Communication (written and oral) of results is also a strong component of the course. Groups of three or more students work together for two terms on an assigned engineering and design project. Must be taken concurrent with MSE 4610 Project Management for Engineers.

Co-Requisite(s): MSE 4610.

MSE 4620 - Lab: Senior Project Design II

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Continuation of MSE 4615. Team assignments will lead to the construction, testing and optimization of the design.

This includes detailed engineering analysis and testing of prototypes, final parameter and tolerance design, and economic analysis of the project. Senior Project II culminates in a final design review based on formal student presentations of the documented final product and verification that the final product meets all requirements.

Pre-requisite(s): MSE 4610, MSE 4615.

MSE 4700 - Manufacturing Systems Engineering II

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

This course covers the following topics: models of manufacturing systems, including transfer lines and flexible manufacturing systems; calculation of performance measures, including throughput, in-process inventory, and meeting production commitments; real-time control of scheduling; effects of machine failure, set-ups, and other disruptions on system performance. Also A study of the elements used in the automation of manufacturing

processes including: programmable logic controllers, robotics (servo and non-servo), vision systems, and material handling devices.

Pre-requisite(s): MSE 3040, MSE 3700.

MSE 4800 - Individual Research Problems

Credits: (1-3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

With permission and under the direction of faculty, the student researches a specific problem in the manufacturing systems engineering field.

Pre-requisite(s): Permission of department.

May be taken 3 times and up to 3 credits.

MSE 4830 - Directed Readings for Manufacturing Systems Engineering

Credits: (1-3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

With permission and under the direction of faculty, the student studies a topic taken from the mechanical engineering literature.

Pre-requisite(s): Permission of department.

May be taken 3 times and up to 3 credits.

MSE 4890 INT - Cooperative Work Experience

Credits: (1-3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Provides academic credit for engineering work experience. Permission of department required.

Pre-requisite(s): Permission of department.

May be taken 3 times and up to 3 credits.

MSE 4900 - Special Topics

Credits: (1-3)

Variable Title

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A special topic in manufacturing systems engineering is selected by the faculty to be taught on a one-time basis. With departmental approval, may substitute for a technical elective.

Pre-requisite(s): Permission of department.

May be repeated three times with a maximum of three credit hours.

MSE 4920 - Short Courses, Workshops, Institutes and Special Programs

Credits: (1-3)

Variable Title

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A special topic in manufacturing systems engineering is selected by the faculty to be taught on a one-time basis.

With departmental approval, may substitute for a technical elective.

Pre-requisite(s): Permission of department.

May be repeated three times for a maximum of three credit hours.

MSRS 6100 - Research Methods

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

This course assists students to critique, evaluate, and use research within their health science education careers. The research process including the theoretical/conceptual basis of health sciences research, methods, and critique strategies are examined in detail. There is a focus on evaluation of published research reports to evaluate the appropriateness of application of findings to clinical practice.

This course is cross-listed with NRS 6110.

MSRS 6120 - Research and Statistics

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

This course focuses on the development of research skills used to evaluate data in support of the utilization of findings in clinical practice. Skills related to statistical analysis of quantitative data will be emphasized. Parametric and non-parametric methods of statistical analysis will be discussed.

This course is cross-listed with NRS 6120.

MSRS 6130 - Functional Hemodynamics

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

This course offers the fundamental principles and indications for invasive hemodynamic monitoring. The indications, possible contraindications and possible complications involved with the insertion of central Venous lines, arterial lines, Pulmonary artery catheters and ICP

monitoring with the expected CVP, RV, PAP, PCWP, CO and CI reading, waveforms and troubleshooting.

MSRS 6140 - Clinical Laboratory Correlation

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

This course covers the concepts, analytical methods and clinical correlation of laboratory values as they relate to radiographic imaging, pathology and patient history.

MSRS 6200 - Population Health in Radiologic Sciences

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

The course addresses the integration of population health concepts into strategic planning and managerial decision-making in health services organizations. Course work includes environmental analysis of health behaviors and lifestyle that impact demand on health care delivery systems. The student will evaluate models for integration of health services, preventive programs, demand management, and policy issues affecting continuity of care. This course is cross-listed with MHA 6000.

MSRS 6263 - Advanced Diagnostic Services Pharmacology

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course is designed to enhance student knowledge of pharmaceuticals and their impact on patients undergoing advanced imaging procedures. The content addresses the intent of pharmaceuticals and their effect on patient diseases, conditions, and physiology. After acquiring this content and the appropriate clinical skills, students will review the patients' past and current clinical condition and history to gain an understanding of medication significance relevant to the imaging procedure.

MSRS 6310 - Evaluation of the Cardiac System

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

The content of this course is designed to enhance student knowledge of the diagnostic procedures performed in the cardiac catheterization laboratory to identify atherosclerotic coronary or peripheral artery disease, abnormalities of the heart muscle, and valvular or congenital heart abnormalities.

MSRS 6311 - Interventional Cardiac Procedures I

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course is designed to enhance student knowledge of the interventional procedures performed in the cardiac catheterization laboratory that address coronary artery disease & myocardial infarction; The foundations of percutaneous coronary intervention techniques will be presented including indications, contraindications, and complications.

MSRS 6312 - Interventional Cardiac Procedures II

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course is designed to enhance student knowledge of the interventional procedures performed in the cardiac catheterization laboratory that address pericardial and myocardial disease, heart failure and cardiogenic shock. The principles of hemodynamic data collection techniques will be presented including pressure pathology, waveform interpretation and cardiac output. Course content will also include mechanical circulatory support technologies such as the left ventricular assist devices (LVAD) and the intra-aortic balloon pump (IABP).

MSRS 6313 - Interventional Cardiac Procedures III

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course is designed to enhance student knowledge of

the interventional procedures performed in the cardiac catheterization laboratory that address valvular disease, septal defects, and vascular disease. Transcatheter structural heart repair devices deployed in the cath lab have largely replaced open-heart surgery as the therapy of choice and many labs are incorporating vascular procedures into cardiac cath. Patient preparation, medical instrumentation, and performance of these procedures will be presented.

MSRS 6403 - Evaluation of the Osseous System

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Imaging evaluation of pathological conditions, abnormalities and anomalies of the osseous system.

MSRS 6413 - Evaluation of the Chest

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

Imaging evaluation of pathological conditions, abnormalities and anomalies of the chest.

MSRS 6423 - Evaluation of the Abdomen and G I System

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Imaging evaluation of pathological conditions, abnormalities and anomalies of the abdomen and gastrointestinal system.

MSRS 6433 - Evaluation of the Genitourinary System

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Imaging evaluation of pathological conditions, abnormalities and anomalies of the genitourinary system.

MSRS 6443 - Clinical Pathways

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

Studying clinical pathways for patients based on disease processes and trauma.

MSRS 6450 - Managing Health Information

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Introductory course that provides basic vocabulary and principles of modern information architectures. Computer networking and communication technologies needed to support modern information infrastructures. Differences between integrated and quilted systems are examined. Emphasis on management and use of information to support management decision making. This course is cross-listed with MHA 6450.

MSRS 6453 - Evaluation/CNS and Facial Structures

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

Imaging evaluation of pathological conditions, abnormalities and anomalies of the central nervous system and facial structures.

MSRS 6463 - Problem Patient Management

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Determination of pathological conditions utilizing problem-solving case studies.

MSRS 6473 - Non-vascular Invasive Imaging

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Patient preparation and student performance of medical imaging non-vascular invasive procedures.

MSRS 6483 - Musculoskeletal Sonography

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

The (MSK) Sonography course will provide concepts in musculoskeletal anatomy and sonographic scanning technique and protocols necessary to produce and evaluate

diagnostic images in the clinical setting for diagnosis of musculoskeletal pathology.

MSRS 6493 - Advanced 3D Medical Imaging

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

The Advanced 3D Medical Imaging course will provide instruction on the creation, manipulation, and printing of three-dimensional data-sets of different anatomical parts of the body. The data-sets will originate from diagnostic images (provided by the department or the student), particularly Magnetic Resonance Imaging (MRI) and Computer Tomography (CT) images. The course will include a hands-on learning lab where the student will use software to create a three-dimensional digital image and a three-dimensional print of an anatomical body part.

MSRS 6501 - Advanced Practice Simulation I

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Advanced imaging simulation courses are designed to help students develop the knowledge and cognitive skills required for the performance of advanced imaging clinical assignments.

MSRS 6502 - Advanced Practice Simulation II

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Advanced imaging simulation courses help students develop the knowledge and cognitive skills required for the performance of advanced medical imaging clinical assignments.

MSRS 6503 - Advanced Practice Simulation III

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Advanced imaging simulation courses help students develop the knowledge and cognitive skills required for the performance of advanced medical imaging clinical assignments.

MSRS 6850 - Study Abroad

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Students will gain knowledge and cultural experiences developed to address historical, community, political, economic, educational, geographical, and literary/artistic variables.

MSRS 6860 INT - Clinical Preceptorship I

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Experience in a radiology department. Consent of instructor needed.

MSRS 6861 INT - Clinical Preceptorship II

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Continuation of MSRS 6860.

MSRS 6862 INT - Clinical Preceptorship III

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Continuation of MSRS 6861.

MSRS 6863 - Vascular Invasive Imaging Procedures

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Patient preparation and performance of medical imaging vascular invasive procedures are presented.

MSRS 6900 INT - Capstone: Clinical Fellowship & Portfolio

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

Experience in a radiology department and interventional Radiology coordinated by Weber State University under the supervision of a radiologist or other Medical Practitioner. Review and evaluation of student competencies, clinical performance and professional development as required by certification.

MSRS 6910 - Transition to Practice

Credits: (2)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Transition to practice provides students with a pertinent review of the content, skills, and processes necessary to gain and maintain imaging credentials and elevate professional practice. The course explores the fundamental aspects of professionalism, interprofessional communication, quality in practice, and professional resilience.

MSRS 6992 - Advanced Practice Seminar

Credits: (1-3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course is designed to enhance students' knowledge of current research and advances in the Radiologic Sciences.

MSRS 6999 - Master's Thesis in Radiologic Sciences

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

Students will enroll for this course as they complete their Masters thesis under the direction of a departmental graduate advisor. Departmental seminars and readings may also be assigned as part of this course. Students will finish their Master of Science in Radiologic Sciences degree by first completing a course of classroom or didactic study, then writing an original research monograph for their thesis. This course is to be used during the time the student is writing the thesis and getting approval for the thesis.

MSRT 6010 - Medical Writing, Research Methods & Design

Credits: (3)

Typically Taught Fall Semester: *2nd Blk - Online*

This course will assist students in developing writing skills that meet professional journal requirements. Students will learn how to write research reports, abstracts, clinical case reports and scientific posters. Students will develop skills in effective editing, reviewing and proofreading. They will also develop skills that allow them to critically read published research articles in order to understand the validity and implications of the study results.

Pre-requisite(s): Acceptance into MSRT program.

MSRT 6020 - Medical Pathophysiology/Cardiopulmonary Case Reviews

Credits: (3)

Typically Taught Spring Semester: *1st Blk*

Advanced-practice pathology of the heart and lungs presented in case study format for articulating a working diagnosis, treatment, and follow-up care based on an abundance of patient assessment techniques including patient history/physical, signs, symptoms, and ancillary radiographic evidence. Medical information gathered from research database articles are presented to enhance a decision-making rationale for the treatment of cardiopulmonary diseases.

Pre-requisite(s): Acceptance into MSRT program.

MSRT 6030 - Adult Learning Theory & Simulation Strategies

Credits: (3)

Typically Taught Spring Semester: *1st Blk - Online*

An application of teaching and learning theories for adult learners across variable clinical, laboratory, simulation lab, and in face-to-face interactions are explored within both traditional and non-traditional classroom settings. Teaching strategies and simulation designs are designed to support student learning for future respiratory therapy educators and clinical instructors.

Pre-requisite(s): Acceptance into MSRT program.

MSRT 6130 - Evidence-based Practice

Credits: (3)

Typically Taught Fall Semester: *1st Blk*

This course explores research-based evidence of best

practices for advanced respiratory care practitioners (RCP's) by identifying important questions, i.e., medication, ventilation strategies, protocols, etc. in the evaluation, diagnosis, or treatment of patients suffering abnormalities of the cardiopulmonary system. A methodological approach to evaluate practice is explored through a systematic literature search whereby the evidence manifest through particular treatments of a population can be expected.

Pre-requisite(s): Acceptance into MSRT program.

MSRT 6140 - Applied Research in Respiratory Care

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Research is a fundamental part of healthcare. This course will explore research opportunities specifically in the field of respiratory care. Basic statistical concepts will be reviewed. Nominal, ordinal, and continuous methods will also be studied. Publishing the findings through an original research paper, an abstract, case report, and poster presentation will be a main focus for this course.

Pre-requisite(s): Acceptance into MSRT program.

MSRT 6410 - Certified Pulmonary Function Technologist (CPFT)

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Evaluation and assessment of pulmonary disease is an important skill for the advanced-practice respiratory care practitioner (RCP). Requisite to making an accurate diagnosis, practitioners must understand diagnostic measurements and recommend treatment of patients with specific pulmonary diseases. This course is essential to gain knowledge to pass the CPFT (NBRC) exam for Certified Pulmonary Function Technologists.

Pre-requisite(s): Acceptance into MSRT program.

MSRT 6420 - Sleep Disorders Specialty (SDS)

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

This course is essential to gain knowledge in the evaluation and treatment of sleep disorders in the context of a polysomnography lab and to pass the SDS (NBRC) credential for sleep disorder specialists.

Pre-requisite(s): Acceptance into MSRT program.

MSRT 6460 - Neonatal Pediatric Specialty (NPS)

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

This course prepares the advanced-practice respiratory care practitioner (RCP) to optimally participate in the assessment, management, and care of newborn and pediatric populations. The course includes development, common disease pathology, pharmacology, and management of neonatal patients, emergency treatment, and evaluation of conditions and abnormalities of the cardiopulmonary systems. This course will prepare the practitioner for a national neonatal and pediatric specialty examination (NPS).

Pre-requisite(s): Acceptance into MSRT program.

MSRT 6470 - Adult Critical Care Specialty (ACCS)

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

This course prepares the advanced-practice respiratory care practitioner (RCP) to effectively evaluate, assess, manage and provide appropriate care to critically ill adult patients. This course extensively covers advanced airway and cardiovascular management, mechanisms of respiratory failure, analysis of laboratory and imaging results, specialty medical gasses and pharmacological agents, management of patients with infectious disease and sepsis, assisting and performing advanced procedures, and end-of-life care in the adult population. This course will prepare the practitioner for an advanced critical care specialty credentialing examination (ACCS).

Pre-requisite(s): Acceptance into MSRT program.

MSRT 6480 - Asthma Educator Specialty Credential (AE-C)

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

This course prepares the advanced-practice respiratory care practitioner (RCP) to optimally educate patients and family members of patients suffering with asthma. The course includes disease pathophysiology, assessment, pharmacology, classification, and management of asthma based on severity, emergency treatment and evaluation of treatment programs. This course will prepare the practitioner for a national asthma education certification examination (AE-C).

Pre-requisite(s): Acceptance into MSRT program.

MSRT 6700 - Capstone Project

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course is designed to be self-directed, faculty supervised culminating project specific to the educational track that the student has chosen within the MSRT program (Education, Research or Health Administration). The student will demonstrate their firm grasp of their educational track and their mastery of professional/scientific writing through the development of a research paper. This course requires that the student develop a research question, prepare a learning contract that outlines their approach to the research question, and complete 40 hours of documented time with a mentor(s) who have a minimum of a Master's degree in a related area or in performing original research. The student will also assemble a formative committee to act as a resource as the student develops the research project and summative committee to evaluate and validate the student's research. The formative and summative committees each consist of three professionals with a minimum of a Master's degree. The student will complete a Masters level research paper that is a minimum of 40-50 pages in APA format.

Pre-requisite(s): Acceptance into MSRT program.

May be repeated once up to 6 credit hours.

MSRT 6810 - Experimental Course

Credits: (1-6)

Experimental

Individual courses offered on an experimental basis, identified by specific name and description. The specific title will appear on student's transcript along with the authorized credit.

May be repeated for a maximum of up to six total credit hours.

MSRT 6810 - Respiratory Care Curriculum and Course Design

Credits: (3)

Experimental

This course aims to explore concepts of course design and curriculum development specific to respiratory therapy education. Essential elements will include developing a syllabus, determining course materials, selecting optimal teaching methods, and designing appropriate assessments. The course will also address course management, teaching diverse students, using technology in teaching, and meeting accreditation standards.

MSW 6010 - Foundations of Social Work

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

A thorough review of the history, philosophy, and fundamental principles of social work, emphasizing the knowledge, values and skills needed for social work practice in all settings.

Pre-requisite(s): Formal admittance to the MSW program.

MSW 6100 - Behavior, Environment & Social Systems

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

A graduate level introduction to the ecological model, examining in-depth, the relationship between human development (individuals, families, groups, communities, and organizations) and the social environment. Systems and theory are examined critically in the biological, psychological, sociological, and spiritual arenas, with an emphasis on social justice and the intersectionality of race, ethnicity, sexuality, gender, economic status and other dimensions of diversity on the developmental process.

Pre-requisite(s): Formal admittance to the MSW program.

MSW 6150 - Behavioral Health, Diagnostics, and Mental Health

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course is designed to introduce students understanding to the mental health diagnoses associated with the DSM-V.

MSW 6200 - Human and Social Diversity and Oppression

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A study of diversity among individuals, groups, and communities and dynamics of oppression locally, regionally, nationally, and globally. Application of knowledge, skills, and interventions to alleviate social inequities and human suffering will be stressed.

Pre-requisite(s): Formal admittance to Master of Social Work program.

MSW 6235 - Loss Across the Lifespan

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course will provide an overview of loss as a normal and necessary part of life and growth. It will also provide the foundation of classical grief theory and its evolution to more modern grief theory and work. While death and dying at different stages in the lifespan will be addressed, each life stage will also be explored for the normative losses that occur at that stage.

Pre-requisite(s): Formal admittance to Master of Social Work Program, or other WSU graduate program.

MSW 6245 - Aging Services

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Overview of older adults as a population group and of aging as a biopsychosocial process. The course explores aspects of social services and health care systems intended to help individuals, families, and communities confront aging-related challenges and capitalize upon aging-related strengths.

Pre-requisite(s): Formal admittance to Master of Social Work program or WSU graduate program.

MSW 6255 - Sexuality in Social Work Practice

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A graduate-level introduction and thorough overview of the nature and meaning of sexuality and an in-depth consideration of various ways that sexuality is part of social work practice. Students will examine the knowledge, values, and skills needed to address sexuality in social work practice.

Pre-requisite(s): Formal admittance to the MSW program, MSW 6300, MSW 6910.

MSW 6265 - Crisis Intervention and Trauma

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course is designed to prepare students to develop assessment, diagnostic and evidenced based interventions to assist those in critical need during and after a crisis or trauma. A crisis is defined as an event that exceeds and

overwhelms an individual's coping skills to the point where equilibrium is disrupted. Micro, mezzo, and macro crises as well as trauma will be explored.

Pre-requisite(s): Formal admittance into the MSW program, or other WSU graduate program.

MSW 6275 - Harm Reduction in Practice

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

An in-depth analysis of harm reduction and its use in clinical social work practice. Considers harm reduction in assessment, treatment planning, intervention, and evaluation of effectiveness of services. Explores the history and context of harm reduction as a therapeutic model, as well as its applications at the micro, mezzo, and macro areas of practice.

Pre-requisite(s): Formal admittance to Master of Social Work Program, or other WSU graduate program.

MSW 6285 - Dialectical Behavior Therapy

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Dialectical Behavior Therapy or DBT, is a theoretical practice model that was conceptualized to address suicidal and para-suicidal behaviors. It is one of the first evidence-based models to document reductions in para-suicidal and suicidal behaviors. Originally developed as an adult model working with Borderline Personality Disorder it has proven effective in treating many other disorders and in working with adolescents and their families as well. It has gained in popularity as a treatment model and many states and insurance payers have recognized it as the treatment of choice for certain diagnoses.

Pre-requisite(s): Formal admittance to the MSW program, or other WSU graduate program.

MSW 6300 - Ethics, Ethical Practice, Ethical Decision-Making

Credits: (3)

Typically Taught Summer Semester: *2nd Blk*

Typically Taught Fall Semester: *Full Sem*

An exploration of professional social work roles, values, and ethical principles. Students will review the history and evolution of the National Association of Social Workers' Code of Ethics, as well as other statements of ethical principles in social welfare. An ethical problem-solving model will be introduced and course activities will assist

students in using these guidelines in making ethical decisions in professional practice.

Pre-requisite(s): Formal admittance to the MSW program and MSW 6900 OR formal admittance to the MSW program with advanced standing.

Co-Requisite(s): Must be taken concurrently with MSW 6910.

MSW 6400 - Macro Aspects of Clinical Practice

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

A consideration of practical aspects of clinical social work practice and social service programs. Content covers administration, budgeting, program development, marketing, and institutional policy. Work with Latino communities provides a context for exploring these topics.

Pre-requisite(s): Formal admittance to MSW program, Advanced Standing Status, or MSW 6300 and MSW 6500.

MSW 6500 - Social Policy and Social Work Practice

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

An examination of the major political issues faced by social work as a profession. Examples of challenges and related social, public and social welfare policies will be identified and studied. Knowledge of local, state, and federal legislation, as well as professional, membership, and international organizations will assist in review of lobbying, funding, development, and implementation strategies used in the support of clinical social work practice and meeting human service needs. Methods for political and organizational analysis of processes and policy will be discussed.

Pre-requisite(s): Formal admission to the MSW program.

MSW 6600 - Research I: Research Informed Practice

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

A study of advanced research methods and statistical procedures as they inform and shape professional social work practice. The class reviews basic qualitative, quantitative, and single system research methodologies; analysis of data, including statistical procedures; analysis and evaluation of theoretical bases, research questions, methodologies, statistical procedures, and conclusions of

research reports; and relevant technological advances. Students apply activities such as needs assessments, satisfaction surveys, and other research tools to the creation, implementation, and evaluation of evidence-based practices. The course also prepares students to examine the empirical basis of practice models and how to effectively access, critique and appraise literature in order to find best evidence-based solutions. Ethics and sensitivity to research with various groups will be emphasized.

Pre-requisite(s): Formal admittance to the MSW program, MSW 6010 (or advanced-standing status), MSW 6300, and MSW 6910.

MSW 6700 - Research II: Practice-Informed Research

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

Research II: Practice-Informed Research - A study of advanced research methods and statistical procedures as they relate to and are guided by professional social work practice. Students learn about empirical research designs and how to conduct program evaluations, including needs assessments, process evaluations and outcome evaluations. Students also learn about strategies to communicate research outcomes effectively with clients, colleagues, and stakeholders to ensure the implementation sound and empirically supported prevention and intervention strategies and models of practice. Ethics and sensitivity to research with various groups will be emphasized.

Pre-requisite(s): Formal admittance to the MSW program, MSW 6010 (or advanced-standing status), MSW 6300, MSW 6910, and MSW 6930.

MSW 6760 - Foundation Field I

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Course Fee: \$10.00

The first 200 hours of the first-year supervised field practicum in an approved social service setting, with a focus on the application of social work knowledge, ethics, values, theory, skills, and practice evaluation and the development of competencies and behaviors necessary for effective clinical practice with individuals, families, and groups. The course includes regular meetings with an on-site field supervisor, the program's field director, and other field students in a professional seminar. The seminar links professional social work practice with academic content.

Pre-requisite(s): Formal admittance to the MSW program.

MSW 6761 - Foundation Field II

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$10.00

The second 200 hours of the first-year supervised field practicum in an approved social service setting, with a focus on the application of social work knowledge, ethics, values, theory, skills, and practice evaluation and the development of competencies and behaviors necessary for effective clinical practice with individuals, families, and groups. The course includes regular meetings with an on-site field supervisor, the program's field director, and other field students in a professional seminar. The seminar links professional social work practice with academic content.

Pre-requisite(s): Formal admittance to the MSW program.

MSW 6860 - Advanced Field I

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Course Fee: \$10.00

The first 250 hours of the second-year supervised field practicum in an approved social service setting, with a focus on the application of social work knowledge, ethics, values, theory, skills, and practice evaluation and the development of competencies and behaviors necessary for effective clinical practice with individuals, families, and groups. The course includes regular meetings with an on-site field supervisor, the program's field director, and other field students in a professional seminar. The seminar links professional social work practice with academic content.

Pre-requisite(s): Formal admittance to the MSW program, MSW 6760 (or advanced-standing status), and MSW 6761 (or advanced-standing status).

MSW 6861 - Advanced Field II

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$10.00

The second 250 hours of the second-year supervised field practicum in an approved social service setting, with a focus on the application of social work knowledge, ethics, values, theory, skills, and practice evaluation and the development of competencies and behaviors necessary for effective clinical practice with individuals, families, and groups. The course includes regular meetings with an on-site field supervisor, the program's field director, and other field students in a professional seminar. The seminar links professional social work practice with academic content.

Pre-requisite(s): Formal admittance to the MSW program,

MSW 6760 (or advanced-standing status), and MSW 6761 (or advanced-standing status).

MSW 6900 - Clinical Practice I: Traditional Theories and Model

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

An overview of common traditional theories and models of social work practice at micro, mezzo, and macro levels. The course combines lecture and hands on application experiences.

Pre-requisite(s): Formal admittance to the MSW program.

MSW 6910 - Clinical Practice II: Vulnerable and At-Risk Populations

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

Clinical Practice II - A study of clinical social work practice theories and models with vulnerable and at-risk populations at micro, mezzo, and macro levels, with an emphasis on work with Latino clients, families, and communities. Content also covers harm reduction, advocacy, social action, and social justice practice. The course combines lecture and hands on application experiences.

Pre-requisite(s): Formal admittance to the MSW program and MSW 6900, OR formal admittance to the MSW program with advanced standing.

Co-Requisite(s): Must be taken concurrently with MSW 6300.

MSW 6930 - Clinical Practice III: Evidence-Based Practice

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

An advanced course of study of evidence-based clinical social work practice theories and models for work with individuals (e.g., EMDR, DBT, CBT, Trauma-Focused CBT, Cue Exposure-Response Prevention, ACT, PCIT, Motivational Interviewing). The course combines lecture and hands on application experiences.

Pre-requisite(s): Formal admittance to the MSW program, MSW 6900 (or advanced-standing status), and MSW 6910.

MSW 6940 - Clinical Practice IV: Group Work

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

An advanced course of study of evidence-based clinical social work practice theories and models for work with groups and families. The course combines lecture and hands on application experiences.

Pre-requisite(s): Formal admittance to the MSW program, MSW 6900 (or advanced-standing status), MSW 6910, and MSW 6930.

MTAX 6210 - Business Law and Legal Liability

Credits: (3)

A study of important business law topics accounting and taxation professionals should be familiar with including contracts, business organizations, securities, discrimination, banking, and property will be discussed. Legal liability of accounting and taxation professionals will also be addressed.

MTAX 6400 - Tax Research & Procedure

Credits: (3)

Typically Taught Summer Semester: *1st Blk or 2nd Blk*

Typically Taught Spring Semester: *Full Sem*

Techniques in effective tax research, planning and communication. Also includes a discussion of tax policy.

MTAX 6405 - Accounting for Income Taxes

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Cash and accrual methods of accounting, inventories, accounting for book/tax disparities, income statement tax provision, original issue discount, depreciation methods, amortization, long-term contracts, changes in methods of accounting, accounting periods, capitalization vs. expense, and other topics critical to bridging financial accounting and tax accounting.

MTAX 6410 - International Taxation

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

Principles of U.S. taxation applicable to inbound and outbound international transactions. Also covers issues related to international tax treaties.

MTAX 6430 - Advanced Individual Taxation

Credits: (3)

Typically Taught Summer Semester: *1st Blk or 2nd Blk*

Typically Taught Fall Semester: *Full Sem*

Course Fee: \$30.00

In-depth coverage of advanced individual tax issues such as alternative minimum tax, loss limitations, real estate transactions, stock options, employment taxes, tax credits, charitable contributions, interest classification, related-party transactions, and timing of income/loss recognition.

MTAX 6435 - State & Local Taxation/Federal Tax Practice

Credits: (3)

State income taxation, nexus, multijurisdictional operations, constitutional limitations, sales tax, excise tax, property tax; federal tax procedure, handling IRS audits, appeals, petitions to U.S. Tax Court, and other issues related to tax practice.

Note: This course is not currently offered.

MTAX 6437 - State & Local Tax/Exempt Orgs

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

State income taxation, nexus multijurisdictional operations, constitutional limitations, sales tax, excise tax, property tax; types of exempt organizations, application for exempt status, public charities, private foundations, unrelated business income tax, and compliance issues.

MTAX 6445 - Gifts, Estates, Trusts and Exempt Organizations

Credits: (3)

Principles of estate & gift taxation, exclusions, deductions, valuation issues, the unified credit, wills and intestate succession, income in respect of a decedent, income taxation of estates and trusts, income and estate/gift issues affecting donations to charity, nonprofit corporations, public charities, private foundations, excise taxes, unrelated business income, and compliance issues for tax-exempt entities.

Note: This course is not currently being offered.

MTAX 6450 - Real Estate Taxation

Credits: (3)

In-depth study and analysis of the taxation of real estate transactions. Covers topics such as like-kind exchanges, personal residences, real estate development, passive loss rules, involuntary conversions, casualty losses, and real estate investment trusts.

Note: Course not currently being offered.

MTAX 6455 - Gifts, Estates, Trusts & Real Estate Taxation

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Principles of gift and estate taxation. Includes a discussion of wills and the income taxation of estates and trusts. Also covers taxation of real estate transactions including like-kind exchanges, involuntary conversions, leases, personal residences, real estate development, and cost segregation.

MTAX 6460 - Advanced Corporate Taxation

Credits: (3)

Typically Taught Summer Semester: *1st Blk or 2nd Blk*

Typically Taught Spring Semester: *Full Sem*

Income taxation of corporations and shareholders. Includes in-depth analysis of tax issues related to corporate formations, operations, distributions and liquidations. Also covers the taxation of S corporations.

MTAX 6470 - Advanced Partnership Taxation

Credits: (3)

Typically Taught Summer Semester: *1st Blk or 2nd Blk*

Typically Taught Fall Semester: *Full Sem*

Income taxation of partnerships and partners. Includes in-depth analysis of tax issues related to partnership formations, operations, distributions and liquidations. Also covers issues related to limited liability companies.

MTAX 6480 - Retirement Planning & Employee Benefits

Credits: (3)

Consideration of tax, insurance, investment and estate planning principles from a retirement perspective. Includes discussion of sources of retirement income and anticipated retirement expenses.

Note: Course not currently being offered.

MTAX 6485 - Retirement Plans & Exempt Organizations

Credits: (3)

Discussion of IRAs, Roth IRAs, defined contribution plans such as 401(k)s. Qualification of retirement plans as tax-favored under the Internal Revenue Code. Discussion of retirement plans available to small business. In-depth discussion of nonprofit organizations, charities, qualifying for tax-exempt status, private foundations, unrelated business income, and tax compliance for exempt entities.

Note: This course is not currently offered.

MTAX 6487 - Retirement Plans

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

Discussion of qualified retirement plans including defined contribution and defined benefit plans. Also includes discussion of IRA's, Roth IRA's, and other retirement-related, tax favored investments provided for in the Internal Revenue Code.

MTAX 6490 - Mergers, Acquisitions and Consolidations

Credits: (3)

Typically Taught Summer Semester: *1st Blk or 2nd Blk*

In-depth coverage of advanced corporate tax topics such as tax-free corporate reorganizations, taxable stock acquisitions, taxable asset acquisitions, affiliated groups, consolidated returns, and corporate tax shelters.

Pre-requisite(s): (Recommended) MTAX 6460.

MTAX 6495 - Graduate Tax Internship

Credits: (1-3)

Typically Taught: Various

A significant professional-level field experience in the area of accounting or taxation. The student will be counseled and supervised as he/she applies and integrates the knowledge and skills obtained through MAcc/MTax courses. Credit/No Credit.

Pre-requisite(s): Admission to the MAcc or MTax program; approval by department chair and program director.

Can be repeated once up to three credit hours.

MTAX 6700 - CPA Examination Review: FAR

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This is a directed self-study course designed to help students prepare for the Financial Accounting and Reporting (FAR) section of the CPA examination. This is a review course and assumes that the student has already taken a number of financial accounting courses. A faculty member will monitor the student's progress and a grade will be determined by the student's performance on weekly quizzes and a final examination.

Pre-requisite(s): The student must be admitted to the Master of Accounting (MAcc) or Master of Taxation (MTax) program.

MTAX 6750 - Study Abroad

Credits: (3)

Variable Title

This course integrates international travel and site visits with the study of accounting and international business practices. Through readings, assignments, discussions, and visits to important business and cultural sites, the course builds understanding and competence as it relates to the history of accounting, the global accounting profession, and the business and cultural environment in the host countries.

Pre-requisite(s): The student must be admitted to the Master of Accounting (MAcc) or Master of Taxation (MTax) program.

MTHE 2120 - Geometry from a Teaching Perspective

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Students will explore topics in Euclidean geometry, beginning with concepts in secondary geometry standards and extending beyond these topics. These ideas will be interwoven with strategies for teaching geometry at the secondary level.

Pre-requisite(s): MATH 1210.

MTHE 3010 - Methods and Technology for Teaching Secondary Mathematics

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

Basic topics in secondary mathematics are taught to prospective teachers using a variety of methods of

presentation and up-to-date technology, including the use of graphing calculators and computers.

Pre-requisite(s): MATH 1220 and at least 6 credit hours of MATH courses numbered 3000 or above.

MTHE 3020 - Methods and Technology for Teaching Advanced Secondary Mathematics

Credits: (3)

Aspects of teaching advanced mathematics in a high school setting, including methods of presentation, exploration, assessment and classroom management. An emphasis is placed on the use of computers, graphing calculators, and other technology.

Pre-requisite(s): MTHE 3010.

Note: This course is offered as needed.

MTHE 3060 - Probability and Statistics from a Teaching Perspective

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

Students will explore topics in probability and statistics, beginning with concepts in middle and high school standards and extending to the college level. These ideas will be interwoven with strategies for teaching probability and statistics at the appropriate levels.

Pre-requisite(s): MATH 1210 or MATH 2010.

MTHE 3070 - Geometry for Grade K-8 Teachers

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Basic Geometry with an emphasis on the topics and methods pertinent to prospective elementary school teachers.

Pre-requisite(s): MATH 2020.

MTHE 3080 - Number Theory for Elementary Teachers

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Survey of elementary number theory concepts with applications to topics of interest plus teaching suggestions.

Pre-requisite(s): MATH 2015.

MTHE 4010 - Capstone Mathematics for High School Teachers II

Credits: (3)

Prospective high school teachers revisit mathematics topics from the secondary school curriculum and examine them from an advanced perspective. The major emphasis is on topics from geometry.

Pre-requisite(s): MTHE 4110.

Note: This course is offered as needed.

MTHE 4040 - Mathematical Problem Solving for Grade K-8 Teachers

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

Mathematical problem solving, discussion of process, writing solutions, and writing extensions.

Pre-requisite/Co-requisite: MATH 2015.

MTHE 4100 - Intuitive Calculus for Elementary Teachers

Credits: (3)

An active, hands-on, discovery approach to understanding the three main components of calculus (limits, integration, differentiation), and how they relate to the improved teaching of elementary school mathematics. This course is no longer offered.

Pre-requisite(s): MATH 2010 and MATH 2020.

MTHE 4110 - Algebra from a Teaching Perspective

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Students will explore topics in algebra, beginning with concepts in middle and high school standards and extending to college level algebra. These ideas will be interwoven with strategies for teaching algebraic ideas at the middle and high school level.

Pre-requisite(s): MATH 3110.

MTHE 4700 - Senior Project in Elementary Mathematics Teaching

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Projects in preparing, teaching and revising sequential mathematics lessons for elementary students.

Pre-requisite(s): MATH 2010 and MATH 2020.

MTHE 5010G - Methods and Technology for Teaching Secondary Mathematics

Credits: (3)

Topics in secondary mathematics are taught to in-service teachers using a variety of methods and technology to make them better prepared for teaching secondary mathematics.

Expository presentations about a current mathematics education research area are expected.

Note: This course is offered as needed.

MTHE 5210G - Calculus with Analytic Geometry

Credits: (4)

Analytic geometry, differentiation, integration, and applications.

Pre-requisite(s): MATH 1050 and MATH 1060 or MATH 1080 or placement test.

Note: This course is offered as needed.

MTHE 5220G - Calculus with Analytic Geometry

Credits: (4)

Transcendental functions, techniques of integration, conic sections, polar coordinates, infinite series, introduction to partial derivatives.

Pre-requisite(s): MTHE 5210G.

Note: This course is offered as needed.

MTHE 5230G - Mathematics Computer Laboratory

Credits: (1)

Computer solution of mathematics problems.

Pre-requisite(s): Approval of instructor.

Suggested Requisite(s): May be taken concurrently with any lower division mathematics course.

MTHE 5310G - Multivariable and Vector Calculus

Credits: (4)

Vectors, vector valued functions, motion in space, multivariable functions, partial derivatives, multiple

integrals, integration in vector fields.

Pre-requisite(s): MTHE 5220G.

Note: This course is offered as needed.

MTHE 5350G - Linear Algebra and Differential Equations

Credits: (4)

Introduction to Linear Algebra and Differential Equations. Systems of linear equations, matrices, vector spaces, eigenvalues. First and second order differential equations and models, higher order linear equations, linear systems.

Pre-requisite(s): MTHE 5220G.

Note: This course is offered as needed.

MTHE 5920G - Short Courses, Workshops, Institutes and Special Programs

Credits: (1-6)

Variable Title

This course provides professional development workshops for inservice K-12 teachers around the teaching and learning of mathematics. This is a flexible credit hour course ranging from 1-6 credit hours.

May be repeated up to 24 credit hours.

Note: This course is offered as needed.

MTHE 6120 - Euclidean and Non-Euclidean Geometry

Credits: (3)

Axiomatic development of geometry; Euclidean and non-Euclidean.

Pre-requisite(s): MTHE 5220G.

Note: This course is offered as needed.

MTHE 6160 - Number Theory

Credits: (3)

An overview of beginning number theory including the integers, modulo arithmetic, congruencies, Fermat's theorem and Euler's theorem.

Pre-requisite(s): MTHE 5210G.

Note: This course is offered as needed.

MTHE 6350 - Linear Algebra

Credits: (3)

Theory and applications of linear algebra including abstract

vector spaces and canonical forms of matrices.

Pre-requisite(s): MTHE 5350G.

Note: This course is offered as needed.

MTHE 6410 - Probability and Statistics

Credits: (3)

The mathematical content of probability and statistics at the undergraduate post calculus level. An understanding of the application of probability and statistics is also stressed.

Co-Requisite(s): MTHE 5310G or prerequisite of MTHE 5220G and consent of instructor.

Note: This course is offered as needed.

MTHE 6420 - Probability and Statistics

Credits: (3)

The mathematical content of probability and statistics at the undergraduate post calculus level. An understanding of the application of probability and statistics is also stressed.

Pre-requisite(s): MTHE 6410

Note: This course is offered as needed.

MTHE 6550 - Introduction to Mathematical Modeling

Credits: (3)

Formulation, solution and interpretation of mathematical models for problems occurring in areas of physical, biological and social science.

Pre-requisite(s): MTHE 5310 and 5350.

Note: This course is offered as needed.

MTHE 6610 - Graph Theory

Credits: (3)

Principles of Graph Theory including methods and models, special types of graphs, paths and circuits, coloring, networks, and other applications.

Pre-requisite(s): MTHE 5210.

Note: This course is offered as needed.

MTHE 6620 - Enumeration

Credits: (3)

Principles of Enumeration including counting principles, generating functions, recurrence relations, inclusion-exclusion, and applications.

Pre-requisite(s): MTHE 5210.

Note: This course is offered as needed.

MTHE 6630 - Boundary Value Problems

Credits: (3)

Series solutions, Fourier series, separation of variables, orthogonal functions.

Pre-requisite(s): MTHE 5350.

Note: This course is offered as needed.

MTHE 6640 - Differential Equations II

Credits: (3)

Matrix approach to linear systems, nonlinear systems, Laplace transforms.

Pre-requisite(s): MTHE 5350.

Note: This course is offered as needed.

MTHE 6650 - Complex Variables

Credits: (3)

Analysis and applications of a function of a single complex variable. Analytic function theory, path integration, Taylor and Laurent series and elementary conformal mapping are studied.

Pre-requisite(s): MTHE 5310G and MTHE 5350G.

Note: This course is offered as needed.

MTHE 6660 - Modern Algebra I

Credits: (3)

Logic, sets, and the study of algebraic systems including groups, rings, and fields.

Pre-requisite(s): MTHE 5350G.

Note: This course is offered as needed.

MTHE 6670 - Modern Algebra II

Credits: (3)

Continuation of MATH 4110: advanced topics from groups, rings, and fields including the Sylow theorems and Galois theory.

Pre-requisite(s): MTHE 6660.

Note: This course is offered as needed.

MTHE 6680 - Introductory Real Analysis

Credits: (3)

Develop the analysis underlying calculus. In-depth study of limits, continuity, integration, differentiation, sequences and series. Other topics may include Lebesgue measure and integration and Fourier Analysis.

Pre-requisite(s): MTHE 5310G and MTHE 5350G

Note: This course is offered as needed.

MTHE 6690 - Introductory Real Analysis

Credits: (3)

Develop the analysis underlying calculus. In-depth study of limits, continuity, integration, differentiation, sequences and series. Other topics may include Lebesgue measure and integration and Fourier Analysis.

Pre-requisite(s): MTHE 6680

Note: This course is offered as needed.

MTHE 6700 - Topology

Credits: (3)

Introduction to point-set topology, including metric and topological spaces, continuity, homeomorphisms, compact and connected spaces, and complete metric spaces. Other topics may include the Baire Category Theorem and Tietze Extension Theorem.

Pre-requisite(s): MTHE 5310G and MTHE 5350G.

Note: This course is offered as needed.

MTHE 6710 - Numerical Analysis

Credits: (3)

Introduction to numerical methods. Use of the digital computer in solving otherwise intractable problems.

Pre-requisite(s): MTHE 5350G and CS 1410 or other approved programming language

Note: This course is offered as needed.

MTHE 6720 - Numerical Analysis

Credits: (3)

Introduction to numerical methods. Use of the digital computer in solving otherwise intractable problems.

Pre-requisite(s): MTHE 6710

Note: This course is offered as needed.

MTHE 6730 - Partial Differential Equations

Credits: (3)

First order equations, characteristics and classifications, Green's identities, models, transforms.

Pre-requisite(s): MTHE 6630.

Note: This course is offered as needed.

MTHE 6740 - Mathematics for Teaching - Numbers and Operations

Credits: (3)

Provides teachers a deeper understanding of our number system and relate its structure to computation, arithmetic, algebra and problem solving. Course topics will include number, number sense, computation, and estimation and instructional strategies to facilitate the instruction of this content for elementary teachers.

Pre-requisite(s): A Bachelor's degree and at least one year of experience teaching elementary or junior high school mathematics.

Note: This course is offered as needed.

MTHE 6750 - Mathematics for Teaching - Rational Numbers and Proportional Reasoning

Credits: (3)

Provides practicing teachers a deeper understanding of rational numbers, operations with rational numbers, and proportionality, and instructional strategies to facilitate the instruction of this content for elementary students.

Pre-requisite(s): A Bachelor's Degree and at least one year of teaching experience in an elementary or junior high school.

Note: This course is offered as needed.

MTHE 6760 - Mathematics for Teaching - Algebraic Reasoning

Credits: (3)

Provides practicing teachers a deeper understanding of algebraic expressions, equations, functions, real numbers, and instructional strategies to facilitate the instruction of this content for elementary students.

Pre-requisite(s): A Bachelor's Degree and at least one year of teaching experience in an elementary or junior high school.

Note: This course is offered as needed.

MTHE 6770 - Mathematics for Teaching - Geometry and Measurement

Credits: (3)

Provides practicing teachers a deeper understanding of the geometry and measurement content that exists in the state core and instructional strategies to facilitate the instruction of this content.

Pre-requisite(s): A Bachelor's Degree and at least one year

of teaching experience in an elementary or junior high school.

Note: This course is offered as needed.

MTHE 6780 - Mathematics for Teaching - Problem Solving and Data Analysis

Credits: (3)

This course will develop a firm problem-solving foundation. Using skills and strategies applied in mathematical contexts practicing teachers will learn to think, work with others, present solutions, and facilitate problem solving instruction in the classroom. This course will also provide practicing teachers a deeper understanding of probability and statistics content in the state core and instructional strategies to facilitate the instruction of this content.

Pre-requisite(s): A Bachelor's degree and at least one year of teaching experience in an elementary or junior high school.

Note: This course is offered as needed.

MUSC 1006 - Concert Attendance I

Credits: (0)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

To be a successful musician, it is essential to develop excellent listening skills. Professional musicians are familiar with a wide variety of genres and styles. This course provides music students with opportunities to become familiar with the diversity of music that exists in our world. With this in mind, music majors and minors are expected to attend concerts and recitals on a regular basis. During the first two years of study, concert attendance is required and tracked by the department office staff. Students must concurrently enroll in applied music lessons. Credit/No Credit grading.

May be repeated once.

MUSC 1010 CA - Introduction to Music

Credits: (3)

Typically Taught Summer Semester: *Full Sem, Online*

Typically Taught Fall Semester: *Full Sem, Online*

Typically Taught Spring Semester: *Full Sem, Online*

Course Fee: \$6.00

An introduction to music, its elements, language, and historical development. The course focuses on European and American music with components of jazz, world, and popular genres. Concert attendance outside of regularly

scheduled class time is required. Not available to music majors.

MUSC 1020 - What Makes Us Human?: Creativity and the Humanities

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course will provide a broad Introduction to the Arts and Humanities as seen through the lenses of Plato's "Big Three": The Good, The True and The Beautiful. The perspective of the Good will be taken to look at the Arts and Humanities in society (their Role), that of the True to explore their scientific side (their Nature), and that of the Beautiful to investigate our interior, personal experience (their Meaning).

MUSC 1030 CA - Introduction to Jazz

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$6.00

A survey of jazz in America, including blues, ragtime, traditional jazz, swing, bebop, cool, and fusion. Concert attendance outside of regularly scheduled class time is required.

MUSC 1033 CA - Introduction to American Music

Credits: (3)

Typically Taught Fall Semester: *Online*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$6.00

Survey of music in America, including classical, jazz, rock, folk, and ethnic, within the context of American history.

MUSC 1035 CA - History of Rock and Roll

Credits: (3)

Typically Taught Fall Semester: *Full Sem, Online*

Typically Taught Spring Semester: *Full Sem, Online*

Course Fee: \$6.00

This course is a survey of Rock Music styles from ca. 1950 to the present. We also discuss pre- and proto- rock styles such as Jazz, Blues, and popular song, reaching back into

the late nineteenth century. In the course we will not only study the changing history of rock music (which requires discussion of non-rock music as well), but also the cultural forces that gave rise to those changes. Because of this historical perspective, our approach will be largely chronological, with an eye toward how various styles influenced one another.

MUSC 1040 CA/DV - Music of World Cultures

Credits: (3)

Typically Taught Summer Semester: *Online*

Typically Taught Fall Semester: *Full Sem, Online*

Typically Taught Spring Semester: *Full Sem, Online*

Course Fee: \$6.00

An introduction to the music of cultures around the world, including India, Middle East, China, Japan, Indonesia, Sub-Saharan Africa, Europe, Latin America, Caribbean, Native American music, and Ethnic North America. The course discusses the influence of music on, and its relationship to, the various cultures and populations.

MUSC 1043 HU - Music, the Arts & Civilizations

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

This course is a chronological introduction to mostly western music that also explores its relationship to the other arts.

MUSC 1063 CA - Music in Religion

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$6.00

An introduction to music in world religions such as Judaism, Christianity, Islam, Hinduism, Sikhism, and Buddhism.

MUSC 1100 - Fundamentals of Music

Credits: (2)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$29.00

Melody, harmony, rhythm, notation, ear training, and sight-singing skills needed to meet entrance requirements for

MUSC 1110 & MUSC 1130. Exempt if passing score achieved on theory placement exam or a score of 3 or 4 on AP Music Theory exam.

MUSC 1110 - Music Theory I

Credits: (2)

Typically Taught Fall Semester: *Full Sem*

Course Fee: \$6.00

Elementary harmony, primary and secondary triads with inversions, non harmonic tones, and modulation.

Pre-requisite(s): Complete Theory Placement exam with a score of 70% or higher or MUSC 1100 with a grade of "C" or higher or AP Music Theory exam score of 3 or higher. Students with an AP Music Theory score of 5 are exempt from MUSC 1110 and may enroll in MUSC 1120. In either case, AP scores are only recognized for one year after taking the exam.

Co-Requisite(s): Must be taken concurrently with MUSC 1130.

Note: Music Majors and Minors only.

MUSC 1120 - Music Theory II

Credits: (2)

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$6.00

Continuing study of elementary harmony, primary and secondary triads with inversions, non harmonic tones, and modulation.

Pre-requisite(s): Completion of both MUSC 1110 and MUSC 1130 with a grade of C or better. Students with an AP Music Theory score of 5 may enroll directly in MUSC 1120.

Co-Requisite(s): Must be taken concurrently with MUSC 1140.

Note: Music Majors and Minors only.

MUSC 1130 - Sight-Singing & Aural Skills I

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Development of aural skills needed to function as a musician and teacher. Emphasis on progressively advancing aural perception.

Pre-requisite(s): Complete Theory Placement exam with a score of 70% or higher or MUSC 1100 with a grade of "C" or higher. A student scoring a 3 on the AP Music Theory Exam may enroll in Sight-Singing and Aural Skills without taking the placement exam. A student scoring a 4 on the AP Music Theory Exam may enroll in Sight-Singing and Aural

Skills II (MUSC 1140) without taking the placement exam. A student scoring a 5 on the AP Music Theory Exam may enroll in Sight-Singing and Aural Skills III (MUSC 2130). The student, however, must enroll in these courses within a year of completing the AP Music Theory Exam. After one year, the student will be required to take the Music Theory Placement Exam and their former AP score is no longer recognized.

Co-Requisite(s): Must be taken concurrently with MUSC 1110.

Note: Music Majors and Minors only.

MUSC 1140 - Sight-Singing & Aural Skills II

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Development of aural skills needed to function as a musician and teacher. Emphasis on progressively advancing aural perception. Continuation of MUSC 1130.

Pre-requisite(s): MUSC 1130 and MUSC 1110. A student scoring a 4 on the AP Music Theory Exam may enroll in Sight-Singing and Aural Skills II (MUSC 1140) without taking the placement exam. A student scoring a 5 on the AP Music Theory Exam may enroll in Sight-Singing and Aural Skills III (MUSC 2130). The student, however, must enroll in these courses within a year of completing the AP Music Theory Exam. After one year, the student will be required to take the Music Theory Placement Exam and their former AP score is no longer recognized.

Co-Requisite(s): Must be taken concurrently with MUSC 1120.

Note: Music Majors and Minors only.

MUSC 1143 - Music Theory and Piano for Musical Theatre

Credits: (4)

Typically Taught Fall Semester: *Full Sem*

Course Fee: \$60.00

Development of aural, piano and sight-singing skills as they pertain to the Musical Theatre performer and practitioner. Emphasis on harmony, melody, rhythm, notation and applicable keyboard skills.

MUSC 1150 - Class Piano I

Credits: (1)

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$9.00

Beginning piano instruction with emphasis on reading,

technical facility and sound musicianship.

Pre-requisite(s): Complete Theory Placement exam with a score of 70% or higher or MUSC 1100 with a grade of "C" or higher. A student scoring a 4 or 5 on the AP Music Theory Exam may enroll in MUSC 1150 (Class Piano I) without taking the placement exam. The student, however, must enroll in this course within a year of completing the AP Music Theory Exam. After one year, the student will be required to take the Music Theory Placement Exam and their former AP score is no longer recognized.

Pre-requisite/Co-requisite: MUSC 1110.

Note: Music Majors and Minors only

MUSC 1160 - Class Piano II

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$9.00

Continuation of MUSC 1150 with emphasis on further development of music reading, technical facility, and expanded concepts of musicianship in the students' piano skills.

Pre-requisite(s): MUSC 1150

Pre-requisite/Co-requisite: MUSC 1120

Note: Music Majors and Minors only

MUSC 1321 - Basic Piano for Adults

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$9.00

Beginning instruction in keyboard for non-music majors and minors. Students must have access to a piano for practice.

MUSC 1500 - Beginning & Intermediate Classical Guitar

Credits: (2)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Beginner and intermediate class instruction in classical guitar, including technique, repertoire, and history of the instrument.

May be repeated up to 10 times for credit.

MUSC 1501 - Modern Guitar Styles

Credits: (1)

This entry-level course offers instruction in pick-style

guitar. Styles covered include folk, rock, jazz, and popular. Special emphasis on note reading and basic musicianship.

MUSC 1502 - Violin Master Class

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Masterclasses have been a staple learning methodology since 1869. Their invention is attributed to the virtuosic Hungarian pianist, Franz Liszt (1811-1886). Since then, Masterclasses have been held by professionals ranging from experienced instructors to legendary performers, for aspiring musicians all over the world. In a masterclass, individuals perform for the class and are offered instruction by the teaching artist. This allows the entire class to learn from the interaction between the instructor and the performing student. This class is no longer being offered. May be repeated 7 times with a maximum of 8 credit hours.

MUSC 1503 - Viola Master Class

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Masterclasses have been a staple learning methodology since 1869. Their invention is attributed to the virtuosic Hungarian pianist, Franz Liszt (1811-1886). Since then, Masterclasses have been held by professionals ranging from experienced instructors to legendary performers, for aspiring musicians all over the world. In a masterclass, individuals perform for the class and are offered instruction by the teaching artist. This allows the entire class to learn from the interaction between the instructor and the performing student. This class is no longer being offered. May be repeated 7 times with a maximum of 8 credit hours.

MUSC 1504 - Cello Master Class

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Masterclasses have been a staple learning methodology since 1869. Their invention is attributed to the virtuosic Hungarian pianist, Franz Liszt (1811-1886). Since then, Masterclasses have been held by professionals ranging from experienced instructors to legendary performers, for aspiring musicians all over the world. In a masterclass, individuals perform for the class and are offered instruction by the teaching artist. This allows the entire class to learn from the interaction between the instructor and the performing student. This class is no longer being offered. May be repeated 7 times with a maximum of 8 credit hours.

MUSC 1505 - String Bass Master Class

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Masterclasses have been a staple learning methodology since 1869. Their invention is attributed to the virtuosic Hungarian pianist, Franz Liszt (1811-1886). Since then, Masterclasses have been held by professionals ranging from experienced instructors to legendary performers, for aspiring musicians all over the world. In a masterclass, individuals perform for the class and are offered instruction by the teaching artist. This allows the entire class to learn from the interaction between the instructor and the performing student. This class is no longer being offered. May be repeated 7 times with a maximum of 8 credit hours.

MUSC 1506 - Guitar Master Class

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Masterclasses have been a staple learning methodology since 1869. Their invention is attributed to the virtuosic Hungarian pianist, Franz Liszt (1811-1886). Since then, Masterclasses have been held by professionals ranging from experienced instructors to legendary performers, for aspiring musicians all over the world. In a masterclass, individuals perform for the class and are offered instruction by the teaching artist. This allows the entire class to learn from the interaction between the instructor and the performing student. This class is no longer being offered. May be repeated 7 times with a maximum of 8 credit hours.

MUSC 1507 - Harp Master Class

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Masterclasses have been a staple learning methodology since 1869. Their invention is attributed to the virtuosic Hungarian pianist, Franz Liszt (1811-1886). Since then, Masterclasses have been held by professionals ranging from experienced instructors to legendary performers, for aspiring musicians all over the world. In a masterclass, individuals perform for the class and are offered instruction by the teaching artist. This allows the entire class to learn from the interaction between the instructor and the performing student. This class is no longer being offered. May be repeated 7 times with a maximum of 8 credit hours.

MUSC 1510 - Trumpet Master Class

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Masterclasses have been a staple learning methodology since 1869. Their invention is attributed to the virtuosic Hungarian pianist, Franz Liszt (1811-1886). Since then, Masterclasses have been held by professionals ranging from experienced instructors to legendary performers, for aspiring musicians all over the world. In a masterclass, individuals perform for the class and are offered instruction by the teaching artist. This allows the entire class to learn from the interaction between the instructor and the performing student. This class is no longer being offered. May be repeated 7 times with a maximum of 8 credit hours.

MUSC 1511 - French Horn Master Class

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Masterclasses have been a staple learning methodology since 1869. Their invention is attributed to the virtuosic Hungarian pianist, Franz Liszt (1811-1886). Since then, Masterclasses have been held by professionals ranging from experienced instructors to legendary performers, for aspiring musicians all over the world. In a masterclass, individuals perform for the class and are offered instruction by the teaching artist. This allows the entire class to learn from the interaction between the instructor and the performing student. This class is no longer being offered. May be repeated 7 times with a maximum of 8 credit hours.

MUSC 1512 - Trombone Master Class

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Masterclasses have been a staple learning methodology since 1869. Their invention is attributed to the virtuosic Hungarian pianist, Franz Liszt (1811-1886). Since then, Masterclasses have been held by professionals ranging from experienced instructors to legendary performers, for aspiring musicians all over the world. In a masterclass, individuals perform for the class and are offered instruction by the teaching artist. This allows the entire class to learn from the interaction between the instructor and the performing student. This class is no longer being offered. May be repeated 7 times with a maximum of 8 credit hours.

MUSC 1513 - Euphonium/Tuba Master Class

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Masterclasses have been a staple learning methodology since 1869. Their invention is attributed to the virtuosic Hungarian pianist, Franz Liszt (1811-1886). Since then, Masterclasses have been held by professionals ranging from experienced instructors to legendary performers, for aspiring musicians all over the world. In a masterclass, individuals perform for the class and are offered instruction by the teaching artist. This allows the entire class to learn from the interaction between the instructor and the performing student. This class is no longer being offered. May be repeated 7 times with a maximum of 8 credit hours.

MUSC 1520 - Percussion Master Class

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Masterclasses have been a staple learning methodology since 1869. Their invention is attributed to the virtuosic Hungarian pianist, Franz Liszt (1811-1886). Since then, Masterclasses have been held by professionals ranging from experienced instructors to legendary performers, for aspiring musicians all over the world. In a masterclass, individuals perform for the class and are offered instruction by the teaching artist. This allows the entire class to learn from the interaction between the instructor and the performing student. This class is no longer being offered. May be repeated 7 times with a maximum of 8 credit hours.

MUSC 1530 - Voice Master Class

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Masterclasses have been a staple learning methodology since 1869. Their invention is attributed to the virtuosic Hungarian pianist, Franz Liszt (1811-1886). Since then, Masterclasses have been held by professionals ranging from experienced instructors to legendary performers, for aspiring musicians all over the world. In a masterclass, individuals perform for the class and are offered instruction by the teaching artist. This allows the entire class to learn from the interaction between the instructor and the performing student. This class is no longer being offered. May be repeated 7 times with a maximum of 8 credit hours.

MUSC 1601 - Private Instruction

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$320.00

Individual lessons, vocal or instrumental. For those students not pursuing a major or minor in music. Students are responsible for contacting individual instructors to schedule lessons. See the Music website for a list of private instructors.

May be repeated 19 times with a maximum of 20 credit hours.

MUSC 1610 - Applied Keyboard: Piano

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$445.00

Music Majors or Minors with a Keyboard Emphasis only. Students are responsible for contacting individual instructors to schedule lessons. See the Music website for a

list of private instructors.

May be repeated 3 times with a maximum of 4 credit hours.

MUSC 1611 - Applied Keyboard: Organ

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$445.00

Music majors and minors only. Students are responsible for contacting individual instructors to schedule lessons. See the Music website for a list of private instructors.

May be repeated 3 times with a maximum of 4 credit hours.

MUSC 1620 - Applied Voice

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$445.00

Music majors and minors only. Students are responsible for contacting individual instructors to schedule lessons. See the Music website for a list of private instructors.

May be repeated 3 times with a maximum of 4 credit hours.

MUSC 1630 - Applied Woodwinds: Flute

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$445.00

Music majors and minors only. Students are responsible for contacting individual instructors to schedule lessons. See the Music website for a list of private instructors.

May be repeated 3 times with a maximum of 4 credit hours.

MUSC 1631 - Applied Woodwinds: Oboe

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$445.00

Music majors and minors only. Students are responsible for contacting individual instructors to schedule lessons. See the Music website for a list of private instructors.

May be repeated 3 times with a maximum of 4 credit hours.

MUSC 1632 - Applied Woodwinds: Clarinet

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$445.00

Music majors and minors only. Students are responsible for contacting individual instructors to schedule lessons. See the Music website for a list of private instructors. May be repeated 3 times with a maximum of 4 credit hours.

MUSC 1633 - Applied Woodwinds: Saxophone

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$445.00

Music majors and minors only. Students are responsible for contacting individual instructors to schedule lessons. See the Music website for a list of private instructors. May be repeated 3 times with a maximum of 4 credit hours.

MUSC 1634 - Applied Woodwinds: Bassoon

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$445.00

Music majors and minors only. Students are responsible for contacting individual instructors to schedule lessons. See the Music website for a list of private instructors. May be repeated 3 times with a maximum of 4 credit hours.

MUSC 1640 - Applied Brass: Trumpet

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$445.00

Music majors and minors only. Students are responsible for contacting individual instructors to schedule lessons. See the Music website for a list of private instructors. May be repeated 3 times with a maximum of 4 credit hours.

MUSC 1641 - Applied Brass: French Horn

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$445.00

Music majors and minors only. Students are responsible for contacting individual instructors to schedule lessons. See the Music website for a list of private instructors. May be repeated 3 times with a maximum of 4 credit hours.

MUSC 1642 - Applied Brass: Trombone

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$445.00

Music majors and minors only. Students are responsible for contacting individual instructors to schedule lessons. See the Music website for a list of private instructors. May be repeated 3 times with a maximum of 4 credit hours.

MUSC 1643 - Applied Brass: Euphonium/Tuba

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$445.00

Music majors and minors only. Students are responsible for contacting individual instructors to schedule lessons. See the Music website for a list of private instructors. May be repeated 3 times with a maximum of 4 credit hours.

MUSC 1650 - Applied Strings: Violin

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$445.00

Music majors and minors only. Students are responsible for contacting individual instructors to schedule lessons. See the Music website for a list of private instructors. May be repeated 3 times with a maximum of 4 credit hours.

MUSC 1651 - Applied Strings: Viola

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$445.00

Music majors and minors only. Students are responsible for contacting individual instructors to schedule lessons. See the Music website for a list of private instructors.

May be repeated 3 times with a maximum of 4 credit hours.

MUSC 1652 - Applied Strings: Violoncello

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$445.00

Music majors and minors only. Students are responsible for contacting individual instructors to schedule lessons. See the Music website for a list of private instructors.

May be repeated 3 times with a maximum of 4 credit hours.

MUSC 1653 - Applied Strings: String Bass

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$445.00

Music majors and minors only. Students are responsible for contacting individual instructors to schedule lessons. See the Music website for a list of private instructors.

May be repeated 3 times with a maximum of 4 credit hours.

MUSC 1654 - Applied Strings: Guitar

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$445.00

Music majors and minors only. Students are responsible for contacting individual instructors to schedule lessons. See the Music website for a list of private instructors.

May be repeated 3 times with a maximum of 4 credit hours.

MUSC 1655 - Applied Strings: Harp

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$445.00

Music majors and minors only. Students are responsible for contacting individual instructors to schedule lessons. See the Music website for a list of private instructors.

May be repeated 3 times with a maximum of 4 credit hours.

MUSC 1660 - Applied Percussion

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$445.00

Music majors and minors only. Students are responsible for contacting individual instructors to schedule lessons. See the Music website for a list of private instructors.

May be repeated 3 times with a maximum of 4 credit hours.

MUSC 1673 - Private Instruction

Credits: (2)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$890.00

Music majors and minors only. For vocal or instrumental students. Two hours of instruction/week. Minimum of 18 hours/week practice required. One-half hour special assignment. By consent of instructor only. Students are responsible for contacting individual instructors to schedule lessons. See the Music website for a list of private instructors.

May be taken for credit up to three times in any area of specialization.

MUSC 1681 - Private Instruction

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Individual private instruction for music majors and minors only. Students are responsible for contacting individual instructors to schedule lessons. See the Music website for a list of private instructors.

May be repeated 4 times with a maximum of 4 credit hours.

MUSC 1682 - Private Instruction

Credits: (2)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Individual private instruction for music majors and minors only. Students are responsible for contacting individual instructors to schedule lessons. See the Music website for a list of private instructors.

May be repeated 4 times with a maximum of 8 credit hours.

MUSC 1720 - Analog Audio

Credits: (2)

Typically Taught Fall Semester: *Full Sem*

Course Fee: \$39.00

Emphasis on the electrical (non-digital) transmission of sound. Covers cable types, uses, and construction as well as microphones, speakers, and signal processors. Students will achieve familiarity with the fundamentals and best practices regarding audio components, studio communication, and studio infrastructure. Critical listening skills will be developed throughout the course.

Pre-requisite(s): Acceptance in the Sound Production/Recording program.

MUSC 1721 INT - Live Sound in the 21st Century

Credits: (2)

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$31.00

Focusing on advances in live sound technologies students will learn to assemble and optimize modern sound systems using DANTE and AVB network protocols and digital consoles. Best practices and common system setup will also be covered.

Pre-requisite(s): Acceptance in the Sound Production/Recording program.

MUSC 1722 - History of Recording

Credits: (2)

Typically Taught Fall Semester: *Full Sem*

Course Fee: \$29.00

Multimedia based course examining the complete history of recorded sound. Covering everything from Edison's cylinder to the advent of the MP3 and modern digital recording. Focusing on the inventors and milestones of the last 150 years.

Pre-requisite(s): Acceptance in the Sound Production/Recording program.

MUSC 1723 - Field Recording/Sound for Picture

Credits: (2)

Typically Taught Fall Semester: *Full Sem*

Course Fee: \$29.00

This course will combine the art of capturing live sound in the field, Foley, and ADR in a post-production workflow combining dialog and music to video.

Pre-requisite(s): Acceptance in the Sound Production/Recording program.

MUSC 1724 - Studio Construction

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$27.00

During construction of the recording spaces students will observe and understand the recording studio construction process. This experience may be repeated until studio completion. Credit/No Credit grading.

Pre-requisite(s): Acceptance in the Sound Production/Recording program.

May be taken 3 times up to 3 credits.

MUSC 1725 - Alternative Digital Audio Workstations

Credits: (2)

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$27.00

An introduction to non-Pro Tools recording and music production applications. Covering setup, optimization, and basic operation. This may include but is not limited to Reason, Ableton LIVE, Digital Performer, Logic, and Garageband.

Pre-requisite(s): Acceptance in the Sound Production/Recording program.

MUSC 1726 - Creative Lab

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$54.00

A live performance / recording project ensemble. Turntables, folk instruments, world instruments, electronic musicians, rock / pop musicians etc. Audition not required.

Pre-requisite(s): Acceptance in the Sound Production/Recording program.

May be taken 3 times up to 3 credits.

MUSC 1730 - Keyboard Ensemble

Credits: (1)

Training in piano ensemble situations to develop fluency in reading. Keyboard majors and minors only. Fulfills the major ensemble requirement for music majors.

May be repeated 7 times with a maximum of 8 credit hours.

MUSC 1740 INT - Weber State Concert Choir

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Fulfills the major ensemble requirement for music majors and minors. No audition required.

May be repeated 7 times with a maximum of 8 credit hours.

MUSC 1741 INT - Chamber Choir

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A highly select group of approximately 24 singers performing the entire range of small choir literature.

Fulfills the chamber ensemble requirement for music majors. By audition only.

May be repeated 7 times with a maximum of 8 credit hours.

MUSC 1743 INT - Vocal Chamber Ensemble

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Training in small vocal groups such as trios, quartets, and sextets. Fulfills the chamber ensemble requirement for music majors.

May be repeated 7 times with a maximum of 8 credit hours.

MUSC 1744 INT - Musical Theatre

Credits: (1-2)

Rehearsal and performance of musical theatre productions.

By audition only.

May be repeated 7 times with a maximum of 8 credit hours.

MUSC 1745 INT - Weber State Community Choir

Credits: (1)

Membership by audition or consent of instructor. Does not fulfill any ensemble requirement for music majors or minors.

May be repeated 7 times with a maximum of 8 credit hours.

Note: Note: This course is not currently active. It is typically taught in the evenings when offered.

MUSC 1750 - Symphonic Band

Credits: (1-2)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Membership by audition or consent of instructor. Emphasis is on the study and preparation of modern symphonic band literature. Fulfills the major ensemble requirement for music majors and minors.

May be repeated 7 times with a maximum of 14 credit hours.

MUSC 1751 - Wind Ensemble

Credits: (1)

Typically Taught Spring Semester: *Full Sem*

Membership by audition or consent of instructor. Emphasis is on study and performance of literature for selected wind and percussion ensembles of varying size. Participants may be required to participate in symphonic band. Fulfills the major ensemble requirement for music majors and minors.

May be repeated 7 times with a maximum of 8 credit hours.

MUSC 1752 - Marching Band

Credits: (2)

Typically Taught Fall Semester: *Full Sem*

By audition and/or consent of the director to students on flags, rifles, and band instruments. Fulfills the major ensemble requirement for music majors and minors.

May be repeated 7 times with a maximum of 8 credit hours.

MUSC 1753 INT - Jazz Ensemble

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Membership by audition or consent of instructor. Fulfills the chamber ensemble requirement for music majors.

May be repeated 7 times with a maximum of 8 credit hours.

MUSC 1754 - Percussion Ensemble

Credits: (1)

Typically Taught Spring Semester: *Full Sem*

Membership by audition or consent of instructor. Fulfills the chamber ensemble requirement for music majors. May be repeated 7 times with a maximum of 8 credit hours.

MUSC 1755 INT - Instrumental Chamber Ensemble

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Training in instrumental chamber ensembles such as trios, quartets, quintets, and sextets. Fulfills the chamber ensemble requirement for music majors. May be repeated 7 times with a maximum of 8 credit hours.

MUSC 1756 INT - Pep Band

Credits: (1)

Typically Taught Spring Semester: *Full Sem*

Plays at athletic functions using contemporary jazz, rock, and popular music. By audition. Does not fulfill any ensemble requirement for music majors or minors. May be repeated 7 times with a maximum of 8 credit hours.

MUSC 1760 INT - Weber State Symphony Orchestra

Credits: (1-2)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Membership by audition or consent of instructor. Full symphony orchestra instrumentation. Fulfills the major ensemble requirement for music majors and minors. May be repeated 7 times with a maximum of 14 credit hours.

MUSC 1761 INT - Chamber Orchestra

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Membership by audition or consent of instructor. Fulfills the chamber ensemble requirement for music majors. May be repeated 7 times with a maximum of 8 credit hours.

MUSC 1762 INT - Theatre Orchestra

Credits: (1-2)

Membership by audition or consent of instructor.

Instrumentation determined by the music production being presented. Does not fulfill any ensemble requirement for music majors or minors.

May be repeated 7 times with a maximum of 8 credit hours.

MUSC 1763 INT - Guitar Ensemble

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Membership by audition or consent of instructor. Fulfills the major ensemble requirement for music majors and minors.

May be repeated 7 times with a maximum of 8 credit hours.

MUSC 1810 - Weber State Vocal Jazz

Credits: (3)

Experimental Course, Contact Department for More Information

Vocal ensemble that performs music from various jazz and pop music traditions, often with rhythm section.

MUSC 1820 INT - The Art and Science of Recording I

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Course Fee: \$27.00

Utilizing the "flipped classroom" model, students will learn the fundamentals and best practices of capturing live audio in a multimedia-rich environment that is self-paced. In the classroom, students will receive face-to-face instruction from experienced producers, engineers, and visionaries delivering real world experience and valuable career guidance.

Pre-requisite(s): Acceptance in the Sound Production/Recording program.

MUSC 1821 INT - The Art and Science of Recording II

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$31.00

Utilizing the "flipped classroom" model, students will learn the fundamentals and best practices of capturing live audio in a multimedia-rich environment that is self-paced. In the classroom, students will receive face-to-face instruction from experienced producers, engineers, and visionaries

delivering real world experience and valuable career guidance.

Pre-requisite(s): 80% or better completion of MUSC 1820 INT - The Art and Science of Recording I. Acceptance in the Sound Production/Recording program.

MUSC 1901 - Music: The First-Year Experience

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Course Fee: \$2.00

Introduction to the music area and its programs, including email usage, department policies and procedures, career options, and curriculum.

Note: Music Majors and Minors only

MUSC 1911 - Introduction to Music Technology

Credits: (1)

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$20.00

Introduction to uses of technology in music teaching and performance, including use of music composition and multimedia software.

Note: Music Majors and Minors only

MUSC 2006 - Concert Attendance II

Credits: (0)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

To be a successful musician, it is essential to develop excellent listening skills. Professional musicians are familiar with a wide variety of genres and styles. This course provides music students with opportunities to become familiar with the diversity of music that exists in our world. With this in mind, music majors and minors are expected to attend concerts and recitals on a regular basis. During the first two years of study, concert attendance is required and tracked by the department office staff. Students must concurrently enroll in applied music lessons. Credit/No Credit grading.

May be repeated once.

MUSC 2110 - Music Theory III

Credits: (2)

Typically Taught Fall Semester: *Full Sem*

Course Fee: \$6.00

Continuation of Theory II. Includes altered, borrowed, and other unique chord sonorities; advanced modulation; 20th century compositional techniques; analysis; and projects that will explore application of theoretical concepts.

Pre-requisite(s): MUSC 1120 and MUSC 1140 or equivalents. A student scoring a 5 on the AP Music Theory Exam may enroll in Music Theory III for up to one year after completing the AP Music Theory Exam. After one year, their former AP score is no longer recognized.

Co-Requisite(s): Must be taken concurrently with MUSC 2130.

Note: Music Majors and Minors only.

MUSC 2120 - Music Theory IV

Credits: (2)

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$6.00

Continuation of Theory III. Includes altered, borrowed, and other unique chord sonorities; advanced modulation; 20th century compositional techniques; analysis; and projects that will explore application of theoretical concepts.

Prerequisite: MUSC 2110. Must be taken concurrently with MUSC 2140. Music Majors and Minors only.

Pre-requisite(s): MUSC 2110 with a grade of "C" or better.

Co-Requisite(s): Must be taken concurrently with MUSC 2140.

Note: Music Majors and Minors only.

MUSC 2130 - Sight Singing & Aural Skills III

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Continuation of Sight-Singing & Aural Skills II.

Development of more advanced listening skills and of ability to recognize and correct performance errors.

Pre-requisite(s): MUSC 1120 and MUSC 1140. A student scoring a 5 on the AP Music Theory Exam may enroll in MUSC 2130 (Sight -singing & Aural Skills III) for up to one year after completing the AP Music Theory Exam. After one year, their former AP score is no longer recognized.

Co-Requisite(s): Must be taken concurrently with MUSC 2110.

Note: Music Majors and Minors only.

MUSC 2140 - Sight Singing & Aural Skills IV

Credits: (1)

Typically Taught Spring Semester: *Full Sem*

Continuation of Sight Singing & Aural Skills III.

Development of more advanced listening skills and of ability to recognize and correct performance errors.

Prerequisite: MUSC 2110 and MUSC 2130 or equivalents.

Must be taken concurrently with MUSC 2120 Music Majors and Minors only

Pre-requisite(s): MUSC 2110 and MUSC 2130 or equivalents.

Co-Requisite(s): Must be taken concurrently with MUSC 2120.

Note: Music Majors and Minors only

MUSC 2150 - Class Piano III

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Course Fee: \$9.00

Continuation of MUSC 1160 with emphasis on advanced reading, further development of music reading, technical facility, and expanded concepts of musicianship in the students' piano skills.

Pre-requisite(s): MUSC 1160 or placement by audition.

Pre-requisite/Co-requisite: MUSC 2110.

Note: Music Majors and Minors only.

MUSC 2160 - Functional Piano Skills for Piano Majors/Minors

Credits: (1)

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$9.00

Continuation of MUSC 1160 with emphasis on advanced reading, further development of technical facility and expanded concepts of musicianship.

Pre-requisite(s): MUSC 1160 or placement by audition, and MUSC 1120 and MUSC 1140.

Note: Music Majors and Minors only

MUSC 2202 - Survey of Music History & Literature I

Credits: (2)

A survey of the development of the historical and stylistic periods of European art music from ca 400-1750. Required for Music History credit for all Music Minors.

Pre-requisite(s): MUSC 1110 and MUSC 1130. Open to all university students who have completed MUSC 1010.

Does not fulfill Creative Arts or Humanities credit.

Note: Music Majors and Minors only

MUSC 2212 - Survey of Music History & Literature II

Credits: (2)

Typically Taught Spring Semester: *Full Sem*

A survey of the development of the historical and stylistic periods of European art music from ca 1750-20th century. Required for Music History credit for all Music Minors.

Pre-requisite(s): MUSC 1110 and MUSC 1130. Open to all university students who have completed MUSC 1010.

Does not fulfill Creative Arts or Humanities credit.

Note: Music Majors and Minors only

MUSC 2321 - The Principles of Collaborative Piano I

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Course Fee: \$2.00

To learn the art of accompaniment, to become knowledgeable about repertoire and style, and to improve sight reading.

Pre-requisite(s): Piano, Music Education, Vocal majors only.

Note: Music Majors and Minors only

MUSC 2331 - The Principles of Collaborative Piano II

Credits: (1)

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$2.00

To learn the art of accompaniment, to become knowledgeable about repertoire and style, and to improve sight reading.

Pre-requisite(s): Piano majors only.

Note: Music Majors and Minors only

MUSC 2401 - Musical Improvisation

Credits: (2)

Typically Taught Spring Semester: *Full Sem*

Students will be presented with basic improvisation concepts in the course, including improvising rhythmically, diatonically, over functional harmony, using extra-musical inspiration, and creating free and collaborative improvisations. Through demonstration and practice, students will learn how all of these methods in totality or combination can work to create successful improvisations. Students will be judged based on their ability to demonstrate mastery over a particular concept

through their own performance. Possible assignments include in-class performances and a final concert featuring student improvisations.

Pre-requisite(s): MUSC 1120.

MUSC 2540 - Instrumental Techniques for Choral Majors

Credits: (2)

Typically Taught Fall Semester: *Full Sem even years*

Course Fee: \$4.00

A course for Music Education majors with a Choral emphasis that encompasses a practical and analytical approach to the understanding of basic playing and teaching techniques of the band and orchestral instruments.

Note: Music Majors and Minors only

MUSC 2610 - Applied Keyboard: Piano

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$445.00

Music Majors or Minors with a Keyboard Emphasis only. Students are responsible for contacting individual instructors to schedule lessons. See the Music website for a list of private instructors.

May be repeated 3 times with a maximum of 4 credit hours.

MUSC 2611 - Applied Keyboard: Organ

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$445.00

Music majors and minors only. Students are responsible for contacting individual instructors to schedule lessons. See the Music website for a list of private instructors.

May be repeated 3 times with a maximum of 4 credit hours.

MUSC 2620 - Applied Voice

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$445.00

Music majors and minors only. Students are responsible for contacting individual instructors to schedule lessons. See

the Music website for a list of private instructors.

May be repeated 3 times with a maximum of 4 credit hours.

MUSC 2630 - Applied Woodwinds: Flute

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$445.00

Music majors and minors only. Students are responsible for contacting individual instructors to schedule lessons. See the Music website for a list of private instructors.

May be repeated 3 times with a maximum of 4 credit hours.

MUSC 2631 - Applied Woodwinds: Oboe

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$445.00

Music majors and minors only. Students are responsible for contacting individual instructors to schedule lessons. See the Music website for a list of private instructors.

May be repeated 3 times with a maximum of 4 credit hours.

MUSC 2632 - Applied Woodwinds: Clarinet

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$445.00

Music majors and minors only. Students are responsible for contacting individual instructors to schedule lessons. See the Music website for a list of private instructors.

May be repeated 3 times with a maximum of 4 credit hours.

MUSC 2633 - Applied Woodwinds: Saxophone

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$445.00

Music majors and minors only. Students are responsible for contacting individual instructors to schedule lessons. See

the Music website for a list of private instructors.
May be repeated 3 times with a maximum of 4 credit hours.

MUSC 2634 - Applied Woodwinds: Bassoon

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$445.00

Music majors and minors only. Students are responsible for contacting individual instructors to schedule lessons. See the Music website for a list of private instructors.
May be repeated 3 times with a maximum of 4 credit hours.

MUSC 2640 - Applied Brass: Trumpet

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$445.00

Music majors and minors only. Students are responsible for contacting individual instructors to schedule lessons. See the Music website for a list of private instructors.
May be repeated 3 times with a maximum of 4 credit hours.

MUSC 2641 - Applied Brass: French Horn

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$445.00

Music majors and minors only. Students are responsible for contacting individual instructors to schedule lessons. See the Music website for a list of private instructors.
May be repeated 3 times with a maximum of 4 credit hours.

MUSC 2642 - Applied Brass: Trombone

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$445.00

Music majors and minors only. Students are responsible for contacting individual instructors to schedule lessons. See the Music website for a list of private instructors.
May be repeated 3 times with a maximum of 4 credit hours.

MUSC 2643 - Applied Brass: Euphonium/Tuba

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$445.00

Music majors and minors only. Students are responsible for contacting individual instructors to schedule lessons. See the Music website for a list of private instructors.
May be repeated 3 times with a maximum of 4 credit hours.

MUSC 2650 - Applied Strings: Violin

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$445.00

Music majors and minors only. Students are responsible for contacting individual instructors to schedule lessons. See the Music website for a list of private instructors.
May be repeated 3 times with a maximum of 4 credit hours.

MUSC 2651 - Applied Strings: Viola

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$445.00

Music majors and minors only. Students are responsible for contacting individual instructors to schedule lessons. See the Music website for a list of private instructors.
May be repeated 3 times with a maximum of 4 credit hours.

MUSC 2652 - Applied Strings: Violoncello

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$445.00

Music majors and minors only. Students are responsible for contacting individual instructors to schedule lessons. See the Music website for a list of private instructors.
May be repeated 3 times with a maximum of 4 credit hours.

MUSC 2653 - Applied Strings: String Bass

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$445.00

Music majors and minors only. Students are responsible for contacting individual instructors to schedule lessons. See the Music website for a list of private instructors. May be repeated 3 times with a maximum of 4 credit hours.

MUSC 2654 - Applied Strings: Guitar

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$445.00

Music majors and minors only. Students are responsible for contacting individual instructors to schedule lessons. See the Music website for a list of private instructors. May be repeated 3 times with a maximum of 4 credit hours.

MUSC 2655 - Applied Strings: Harp

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$445.00

Music majors and minors only. Students are responsible for contacting individual instructors to schedule lessons. See the Music website for a list of private instructors. May be repeated 3 times with a maximum of 4 credit hours.

MUSC 2660 - Applied Percussion

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$445.00

Music majors and minors only. Students are responsible for contacting individual instructors to schedule lessons. See the Music website for a list of private instructors. May be repeated 3 times with a maximum of 4 credit hours.

MUSC 2673 - Private Instruction

Credits: (2)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$890.00

Music majors and minors only. For vocal or instrumental students. Two hours of instruction/week. Minimum of 18 hours/week practice required. One-half hour special assignment. By consent of instructor only. Students are responsible for contacting individual instructors to schedule lessons. See the Music website for a list of private instructors.

May be taken for credit up to three times in any area of specialization.

MUSC 2681 - Private Instruction

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Individual private instruction for music majors and minors only. Students are responsible for contacting individual instructors to schedule lessons. See the Music website for a list of private instructors.

Pre-requisite(s):

Completion of two semesters of MUSC 1681 or MUSC 1682 with a grade of "C" or better.

May be repeated 4 times with a maximum of 4 credit hours.

MUSC 2682 - Private Instruction

Credits: (2)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Individual private instruction for music majors and minors only. Students are responsible for contacting individual instructors to schedule lessons. See the Music website for a list of private instructors.

Pre-requisite(s):

Completion of two semesters of MUSC 1681 or MUSC 1682 with a grade of "C" or better.

May be repeated 4 times with a maximum of 8 credit hours.

MUSC 2810 - Musical Improvisation

Credits: (2)

Experimental Course, Contact Department for More Information

Students will be presented with basic improvisation concepts in the course, including improvising rhythmically,

diatonically, over functional harmony, using extra-musical inspiration, and creating free and collaborative improvisations. Through demonstration and practice, students will learn how all of these methods in totality or combination can work to create successful improvisations. Students will be judged based on their ability to demonstrate mastery over a particular concept through their own performance.

MUSC 2820 - Pro Tools 101

Credits: (2)

Typically Taught Spring Semester: *Full Sem*

This course covers basic Pro Tools principles. It provides everything you need to complete a Pro Tools project from initial set up to final mix-down. The course focuses on Pro Tools software and covers a multitude of new functions and feature enhancements. Whether your project involves recording live instruments, MIDI sequencing of software synthesizers, or audio editing or region looping, this course will give you the basic skills to succeed.

MUSC 2821 - Percussion Methods I

Credits: (1)

Typically Taught Fall Semester: *Full Sem even years*

Course Fee: \$17.00

A practical and analytical approach to teaching and playing percussion instruments, including selection of appropriate repertoire and minor repair.

Note: Music Majors and Minors only

MUSC 2822 - Percussion Methods II

Credits: (1)

Typically Taught Spring Semester: *Full Sem odd years*

Course Fee: \$17.00

A continuation of MUSC 2821.

Pre-requisite(s): MUSC 2821.

Note: Music Majors and Minors only

MUSC 2823 - Pro Tools 110

Credits: (2)

Typically Taught Fall Semester: *Full Sem*

This course provides a more detailed look at the Pro Tools system above and beyond the knowledge you gained in the Pro Tools 101 course. It covers all the key concepts and skills needed to operate a Pro Tools system at the User level. The course along with Pro Tools 101: An Introduction to Pro Tools, provides the foundation to Pro

Tools Certification and for the later 200-series of courses on Pro Tools music and post-production.

Pre-requisite(s): MUSC 2820/MUSC 4820.

MUSC 2841 - Brass Methods I

Credits: (1)

Typically Taught Fall Semester: *Full Sem even years*

A practical and analytical approach to teaching and playing brass instruments, including selection of appropriate repertoire and minor repair.

Note: Music Majors and Minors only

MUSC 2842 - Brass Methods II

Credits: (1)

Typically Taught Spring Semester: *Full Sem odd years*

Course Fee: \$17.00

A continuation of MUSC 2841.

Pre-requisite(s): MUSC 2841.

Note: Music Majors and Minors only

MUSC 2851 - Woodwind Methods I

Credits: (1)

Typically Taught Fall Semester: *Full Sem odd years*

Course Fee: \$17.00

A practical and analytical approach to teaching and playing woodwind instruments, including selection of appropriate repertoire and minor repair.

Note: Music Majors and Minors only

MUSC 2852 - Woodwind Methods II

Credits: (1)

Typically Taught Spring Semester: *Full Sem even years*

Course Fee: \$17.00

A continuation of MUSC 2851.

Pre-requisite(s): MUSC 2851

Note: Music Majors and Minors only

MUSC 2871 - String Methods

Credits: (1)

Typically Taught Fall Semester: *Full Sem odd years*

Course Fee: \$17.00

A practical and analytical approach to teaching and playing string instruments, including selection of appropriate repertoire and minor repair.

Note: Music Majors and Minors only

MUSC 2872 - String Methods II

Credits: (1)

Typically Taught Spring Semester: *Full Sem even years*

Course Fee: \$17.00

A continuation of MUSC 2871.

Pre-requisite(s): MUSC 2871

Note: Music Majors and Minors only

MUSC 2881 - Vocal Workshop

Credits: (1)

Course Fee: \$2.00

Development of the singing voice with special attention to freedom of tones, purity of vowels, interpretation, diction, and flexibility.

Note: Music Majors and Minors only

MUSC 2890 INT - Cooperative Work Experience

Credits: (1-6)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Open to all students in the music area who meet the minimum cooperative work experience requirements of the department. Provides academic credit for on-the-job experience. Grade and amount of credit will be determined by the department.

May be repeated to a maximum of 6 credits.

Note: Music Majors and Minors only

MUSC 2910 INT - Opera Production

Credits: (2)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

By audition only. Preparation of operatic scenes and music. Music and staging rehearsal venue for the preparation of fully staged opera productions.

May be repeated up to 10 times.

MUSC 2920 - Short Courses, Workshops, Institutes, and Special Programs

Credits: (1-4)

Variable Title

Consult the class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript

May be repeated 3 times with a maximum of 6 credit hours.

Note: Music Majors and Minors only

MUSC 3102 - Counterpoint

Credits: (2)

Typically Taught Spring Semester: *Full Sem odd years*

Eighteenth century polyphonic techniques including the five contrapuntal species, formal processes, analysis, and compositional application of concepts studied.

Pre-requisite(s): MUSC 2120 and MUSC 2140 or equivalents.

Note: Music Majors and Minors only

MUSC 3112 - Orchestration

Credits: (2)

Typically Taught Spring Semester: *Full Sem even years*

An exploration of principles of arranging music for instrumental sections and instrumental combinations.

Pre-requisite(s): MUSC 2120 and MUSC 2140 or equivalents.

Note: Music Majors and Minors only

MUSC 3122 - Choral Arranging

Credits: (2)

Typically Taught Spring Semester: *Full Sem odd years*

An exploration of principles of arranging music for various voice groups.

Pre-requisite(s): MUSC 2120 and MUSC 2140 or equivalent.

Note: Music Majors and Minors only

MUSC 3202 - Winds/Percussion Literature

Credits: (2)

Typically Taught Fall Semester: *Full Sem*

A study of a cross-section of music leading to knowledge of styles, composers, and performance practice related to the student's instrument and family of instruments.

MUSC 3205 - Music History I: Music before 1800

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Course Fee: \$4.00

A survey of the developments in European art music, ca. 400-1800. The course emphasizes stylistic and critical analysis of representative compositions within historical and cultural contexts.

Pre-requisite(s): MUSC 1120 and MUSC 1140.

MUSC 3206 - Music History II: Music after 1800

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$6.00

A survey of the developments in European art music, ca. 1800 to the present. The course emphasizes stylistic and critical analysis of representative compositions within historical and cultural contexts.

Pre-requisite(s): MUSC 3205.

MUSC 3207 - Music History III: Music of the 20th century to the present

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Course Fee: \$6.00

A survey of the developments in European art music from ca.1890 to the present. The course emphasizes stylistic and critical analysis of representative compositions within historical and cultural contexts.

Pre-requisite(s): MUSC 3206.

MUSC 3208 - World Music

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$4.00

An in-depth exploration of selected music outside the European/ American art and popular traditions. Attention will be given to musical elements and systems, as well as to the participation of music within culture and society.

Note: Course restricted to Music majors/minors only.

MUSC 3302 - Keyboard Literature I

Credits: (2)

Typically Taught Fall Semester: *Full Sem even years*

Course Fee: \$4.00

This course is designed to acquaint pianists with the principal keyboard composers of the Baroque and Classical periods. Piano majors and minors only.

MUSC 3312 - Keyboard Literature II

Credits: (2)

Typically Taught Spring Semester: *Full Sem odd years*

Course Fee: \$4.00

This course is designed to acquaint pianists with the principal keyboard composers of the Romantic and 20th century periods. Piano majors and minors only.

MUSC 3402 - Vocal Literature I

Credits: (2)

Typically Taught Fall Semester: *Full Sem odd years*

Course Fee: \$4.00

A study of a cross-section of vocal literature leading to knowledge of styles, composers, performance practice, and basic phonetics in commonly-used languages.

Pre-requisite(s): At least two semesters of piano and a minimum of two years of private voice instruction.

Note: Music Majors and Minors only

MUSC 3412 - Vocal Literature II

Credits: (2)

Typically Taught Spring Semester: *Full Sem even years*

Course Fee: \$4.00

A continuation of MUSC 3402.

Pre-requisite(s): MUSC 3402.

Note: Music Majors and Minors only

MUSC 3502 - Violin Master Class

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Masterclasses have been a staple learning methodology since 1869. Their invention is attributed to the virtuosic Hungarian pianist, Franz Liszt (1811-1886). Since then, Masterclasses have been held by professionals ranging from experienced instructors to legendary performers, for aspiring musicians all over the world. In a masterclass, individuals perform for the class and are offered instruction by the teaching artist. This allows the entire class to learn from the interaction between the instructor and the performing student. This class is no longer being offered. May be repeated 7 times with a maximum of 8 credit hours.

MUSC 3503 - Viola Master Class

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Masterclasses have been a staple learning methodology since 1869. Their invention is attributed to the virtuosic Hungarian pianist, Franz Liszt (1811-1886). Since then, Masterclasses have been held by professionals ranging from experienced instructors to legendary performers, for aspiring musicians all over the world. May be repeated 7 times with a maximum of 8 credit hours.

MUSC 3525 - ArtsBridge

Credits: (1-6)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

ArtsBridge is a course that provides undergraduate students with an internship and academic credit for designing and implementing a comprehensive, needs-based, integrated arts project with community organizations or area schools. The course will offer students a clear structure and process for navigating the complexities of community engagement. ArtsBridge students will work closely with a WSU faculty mentor, community/school stakeholder, peers, and the ArtsBridge program coordinator throughout the process culminating in the development of an arts integrated project.

Pre-requisite(s): Recommendation by education supervisor in fine arts content area faculty mentor. Content methodology course(s) completed or in progress.
Note: Following faculty recommendation, please contact the ArtsBridge coordinator for an interview.

MUSC 3530 - Voice Master Class

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Masterclasses have been a staple learning methodology since 1869. Their invention is attributed to the virtuosic Hungarian pianist, Franz Liszt (1811-1886). Since then, Masterclasses have been held by professionals ranging from experienced instructors to legendary performers, for aspiring musicians all over the world. MUSC 3544 - Bassoon Master Class

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Masterclasses have been a staple learning methodology since 1869. Their invention is attributed to the virtuosic Hungarian pianist, Franz Liszt (1811-1886). Since then, Masterclasses have been held by professionals ranging from experienced instructors to legendary performers, for aspiring musicians all over the world. In a masterclass, individuals perform for the class and are offered instruction by the teaching artist. This allows the entire class to learn from the interaction between the instructor and the performing student. This class is no longer being offered. May be repeated 7 times with a maximum of 8 credit hours.

MUSC 3601 - Private Instruction

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$320.00

Individual lessons, vocal or instrumental. For those students not pursuing a major or minor in music. Students are responsible for contacting individual instructors to schedule lessons. See the Music website for a list of private instructors.

May be repeated 19 times with a maximum of 20 credit hours.

MUSC 3610 - Applied Keyboard: Piano

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$445.00

Music Majors or Minors with a Keyboard Emphasis only. Students are responsible for contacting individual instructors to schedule lessons. See the Music website for a list of private instructors.

May be repeated 3 times with a maximum of 4 credit hours.

MUSC 3611 - Applied Keyboard: Organ

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$445.00

Music majors and minors only. Students are responsible for contacting individual instructors to schedule lessons. See the Music website for a list of private instructors.

May be repeated 3 times with a maximum of 4 credit hours.

MUSC 3620 - Applied Voice

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$445.00

Music majors and minors only. Students are responsible for contacting individual instructors to schedule lessons. See the Music website for a list of private instructors.

May be repeated 3 times with a maximum of 4 credit hours.

MUSC 3630 - Applied Woodwinds: Flute

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$445.00

Music majors and minors only. Students are responsible for contacting individual instructors to schedule lessons. See the Music website for a list of private instructors.

May be repeated 3 times with a maximum of 4 credit hours.

MUSC 3631 - Applied Woodwinds: Oboe

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$445.00

Music majors and minors only. Students are responsible for contacting individual instructors to schedule lessons. See the Music website for a list of private instructors.

May be repeated 3 times with a maximum of 4 credit hours.

MUSC 3632 - Applied Woodwinds: Clarinet

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$445.00

Music majors and minors only. Students are responsible for contacting individual instructors to schedule lessons. See the Music website for a list of private instructors.

May be repeated 3 times with a maximum of 4 credit hours.

MUSC 3633 - Applied Woodwinds: Saxophone

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$445.00

Music majors and minors only. Students are responsible for contacting individual instructors to schedule lessons. See the Music website for a list of private instructors.

May be repeated 3 times with a maximum of 4 credit hours.

MUSC 3634 - Applied Woodwinds: Bassoon

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$445.00

Music majors and minors only. Students are responsible for contacting individual instructors to schedule lessons. See the Music website for a list of private instructors.

May be repeated 3 times with a maximum of 4 credit hours.

MUSC 3640 - Applied Brass: Trumpet

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$445.00

Music majors and minors only. Students are responsible for contacting individual instructors to schedule lessons. See the Music website for a list of private instructors. May be repeated 3 times with a maximum of 4 credit hours.

MUSC 3641 - Applied Brass: French Horn

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$445.00

Music majors and minors only. Students are responsible for contacting individual instructors to schedule lessons. See the Music website for a list of private instructors. May be repeated 3 times with a maximum of 4 credit hours.

MUSC 3642 - Applied Brass: Trombone

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$445.00

Music majors and minors only. Students are responsible for contacting individual instructors to schedule lessons. See the Music website for a list of private instructors. May be repeated 3 times with a maximum of 4 credit hours.

MUSC 3643 - Applied Brass: Euphonium/Tuba

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$445.00

Music majors and minors only. Students are responsible for contacting individual instructors to schedule lessons. See the Music website for a list of private instructors. May be repeated 3 times with a maximum of 4 credit hours.

MUSC 3650 - Applied Strings: Violin

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$445.00

Music majors and minors only. Students are responsible for contacting individual instructors to schedule lessons. See the Music website for a list of private instructors. May be repeated 3 times with a maximum of 4 credit hours.

MUSC 3651 - Applied Strings: Viola

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$445.00

Music majors and minors only. Students are responsible for contacting individual instructors to schedule lessons. See the Music website for a list of private instructors. May be repeated 3 times with a maximum of 4 credit hours.

MUSC 3652 - Applied Strings: Violoncello

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$445.00

Music majors and minors only. Students are responsible for contacting individual instructors to schedule lessons. See the Music website for a list of private instructors. May be repeated 3 times with a maximum of 4 credit hours.

MUSC 3653 - Applied Strings: String Bass

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$445.00

Music majors and minors only. Students are responsible for contacting individual instructors to schedule lessons. See the Music website for a list of private instructors. May be repeated 3 times with a maximum of 4 credit hours.

MUSC 3654 - Applied Strings: Guitar

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$445.00

Music majors and minors only. Students are responsible for contacting individual instructors to schedule lessons. See the Music website for a list of private instructors. May be repeated 3 times with a maximum of 4 credit hours.

MUSC 3655 - Applied Strings: Harp

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$445.00

Music majors and minors only. Students are responsible for contacting individual instructors to schedule lessons. See the Music website for a list of private instructors. May be repeated 3 times with a maximum of 4 credit hours.

MUSC 3660 - Applied Percussion

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$445.00

Music majors and minors only. Students are responsible for contacting individual instructors to schedule lessons. See the Music website for a list of private instructors. May be repeated 3 times with a maximum of 4 credit hours.

MUSC 3673 - Private Instruction

Credits: (2)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$890.00

Music majors and minors only. For vocal or instrumental students. Two hours of instruction/week. Minimum of 18 hours/week practice required. One-half hour special assignment. By consent of instructor only. Students are responsible for contacting individual instructors to schedule lessons. See the Music website for a list of private instructors.

May be taken for credit up to three times in any area of specialization.

MUSC 3681 - Private Instruction

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Individual private instruction for music majors and minors only. Students are responsible for contacting individual instructors to schedule lessons. See the Music website for a list of private instructors.

Pre-requisite(s):

Completion of two semesters of MUSC 2681 or MUSC 2682 with a grade of "C" or better.

May be repeated 4 times with a maximum of 4 credit hours.

MUSC 3682 - Private Instruction

Credits: (2)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Individual private instruction for music majors and minors only. Students are responsible for contacting individual instructors to schedule lessons. See the Music website for a list of private instructors.

Pre-requisite(s):

Completion of two semesters of MUSC 2681 or MUSC 2682 with a grade of "C" or better.

May be repeated 4 times with a maximum of 8 credit hours.

MUSC 3701 - Music Entrepreneurship and You

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

This course will provide an introduction and overview of topics relevant to creating and managing a career as a professional musician in the 21st Century. Specific topics covered include marketing, networking, finances, and other topics as they relate to music and musicians.

MUSC 3730 - Keyboard Ensemble

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Training in piano ensemble situations to develop fluency in reading. Keyboard majors and minors only. Fulfills the major ensemble requirement for music majors.

May be repeated 7 times with a maximum of 8 credit hours.

Note: Music Majors and Minors only.

MUSC 3740 INT - Weber State Concert Choir

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Fulfills the major ensemble requirement for music majors and minors. No audition required.

May be repeated 7 times with a maximum of 8 credit hours.

MUSC 3741 INT - Chamber Choir

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A highly select group of approximately 24 singers performing the entire range of small choir literature.

Fulfills the chamber ensemble requirement for music majors. By audition only.

May be repeated 7 times with a maximum of 8 credit hours.

MUSC 3743 INT - Vocal Chamber Ensemble

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Training in small vocal groups such as trios, quartets, and sextets. Fulfills the chamber ensemble requirement for music majors.

May be repeated 7 times with a maximum of 8 credit hours.

MUSC 3744 INT - Musical Theatre

Credits: (1-2)

Rehearsal and performance of musical theatre productions.

By audition only.

May be repeated 7 times with a maximum of 8 credit hours.

MUSC 3745 INT - Weber State Community Choir

Credits: (1)

Membership by audition or consent of instructor. Does not fulfill any ensemble requirement for music majors or minors.

May be repeated 7 times with a maximum of 8 credit hours.

Note: Note: This course is not currently active. It is only available in the evenings when offered.

MUSC 3750 - Symphonic Band

Credits: (1-2)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Membership by audition or consent of instructor. Emphasis is on the study and preparation of modern symphonic band literature. Fulfills the major ensemble requirement for music majors and minors.

May be repeated up to 7 times.

MUSC 3751 - Wind Ensemble

Credits: (1)

Typically Taught Spring Semester: *Full Sem*

Membership by audition or consent of instructor. Emphasis is on study and performance of literature for selected wind and percussion ensembles of varying size. Participants may be required to participate in symphonic band. Fulfills the major ensemble requirement for music majors and minors.

May be repeated 7 times with a maximum of 8 credit hours.

MUSC 3752 - Marching Band

Credits: (2)

Typically Taught Fall Semester: *Full Sem*

By audition and/or consent of the director to students on flags, rifles, and band instruments. Fulfills the major ensemble requirement for music majors and minors.

May be repeated 7 times with a maximum of 8 credit hours.

MUSC 3753 INT - Jazz Ensemble

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Membership by audition or consent of instructor. Fulfills the chamber ensemble requirement for music majors.

May be repeated up to 10 times.

MUSC 3754 - Percussion Ensemble

Credits: (1)

Typically Taught Spring Semester: *Full Sem*

Membership by audition or consent of instructor. Fulfills the chamber ensemble requirement for music majors.

May be repeated 7 times with a maximum of 8 credit hours.

MUSC 3755 INT - Instrumental Chamber Ensemble

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Training in instrumental chamber ensembles such as trios, quartets, quintets, and sextets. Fulfills the chamber ensemble requirement for music majors.

May be repeated 7 times with a maximum of 8 credit hours.

MUSC 3756 INT - Pep Band

Credits: (1)

Typically Taught Spring Semester: *Full Sem*

Plays at athletic functions using contemporary jazz, rock, and popular music. By audition. Does not fulfill any ensemble requirement for music majors or minors.

May be repeated 7 times with a maximum of 8 credit hours.

MUSC 3760 INT - Weber State Symphony Orchestra

Credits: (1-2)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Membership by audition or consent of instructor. Full symphony orchestra instrumentation. Fulfills the major ensemble requirement for music majors and minors.

May be repeated up to 7 times.

MUSC 3761 INT - Chamber Orchestra

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Membership by audition or consent of instructor. Fulfills the chamber ensemble requirement for music majors.

May be repeated 7 times with a maximum of 8 credit hours.

MUSC 3762 - Theatre Orchestra

Credits: (1-2)

Membership by audition or consent of instructor.

Instrumentation determined by the music production being presented. Does not fulfill any ensemble requirement for music majors or minors.

May be repeated 7 times with a maximum of 8 credit hours.

MUSC 3763 INT - Guitar Ensemble

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Membership by audition or consent of instructor. Fulfills the major ensemble requirement for music majors and minors.

May be repeated 7 times with a maximum of 8 credit hours.

MUSC 3801 - Jazz Improvisation I

Credits: (2)

Typically Taught Fall Semester: *Full Sem*

Beginning study of jazz improvisation. Topics covered include basic jazz harmony, chord/scale relationships, and basic jazz repertoire.

MUSC 3802 - Jazz Improvisation II

Credits: (2)

Typically Taught Spring Semester: *Full Sem*

Continuing study of jazz improvisation. Topics covering include common jazz patterns, complex harmony and harmonic resolution, transcription, and analysis.

MUSC 3803 - Jazz and Commercial Arranging

Credits: (2)

Typically Taught Fall Semester: *Full Sem*

Introduction to arranging jazz and commercial music. Topics include elements of arranging, instrumental considerations, voicing techniques, and compositional techniques.

Pre-requisite(s): Completion of MUSC 1110 - Music Theory I with a grade of "C" or better.

MUSC 3804 - Jazz Pedagogy

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

This class will prepare students for teaching jazz to students in secondary education. Topics include specific instrumental considerations, improvisation, and jazz ensemble rehearsal technique.

MUSC 3805 - Jazz Keyboard Skills

Credits: (2)

Typically Taught Fall Semester: *Full Sem*

Basic jazz keyboard and jazz theory. Topics include beginning to intermediate jazz harmony, tertiary and

quartal voicings, harmonic substitutions and reharmonization, and well as jazz piano performance practice.

Pre-requisite(s):

Completion of MUSC 1160 - Class Piano II with a grade of "C" or better.

MUSC 3806 - Jazz History

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

In depth study of the history of jazz for music majors. Students will learn about important individuals, historical events, and stylistic trends that have shaped jazz from its inception to the modern day and relate those topics to their instrument of study.

MUSC 3810 - The Business of the Touring Artist

Credits: (1)

Experimental Course, Contact Department for More Information

This course is designed to offer students methods of doing work in the field of the arts. Areas of discussion will include information for Artists, for Presenters and an in-depth look at contracting. Areas to be covered will include readiness to participate in the professional field, representation, working with both artists and presenters, budgeting, timelines, development of residency options, professional behavior and associated areas of attention.

MUSC 3822 - Instrumental Conducting I

Credits: (2)

Typically Taught Fall Semester: *Full Sem*

Course Fee: \$4.00

Basic conducting technique and advanced techniques for conducting instrumental ensembles.

Pre-requisite(s): MUSC 1120/MUSC 1140.

Note: Music Majors and Minors only

MUSC 3823 - Instrumental Conducting I-II

Credits: (2)

Typically Taught Spring Semester: *Full Sem*

Basic conducting technique and advanced techniques for conducting instrumental ensembles.

Pre-requisite(s): MUSC 1120 and MUSC 1140.

Note: Music Majors and Minors only

MUSC 3824 - Music for Elementary Teachers

Credits: (4)

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$23.00

Methods and materials for teaching elementary school music (grades K-6) including skill development on selected elementary classroom instruments.

MUSC 3840 - Form and Analysis

Credits: (2)

Typically Taught Fall Semester: *Full Sem*

A study of basic musical form with particular emphasis on the most important contrapuntal and homophonic styles from the Baroque Period forward. The course coordinates the study of the forms of individual genres with their history and role in the continuous development of music.

Pre-requisite(s): MUSC 2120 and 2140.

Note: Music Majors and Minors only

MUSC 3842 - Producing the School Musical

Credits: (2)

Typically Taught Spring Semester: *Full Sem odd years*

Course Fee: \$4.00

A detailed study of musical theatre and the practical application of skills, techniques, and materials necessary for production in secondary schools.

Note: Music Majors and Minors only

MUSC 3851 - Stringed Instrument Pedagogy I

Credits: (2)

Typically Taught Fall Semester: *Full Sem*

Course Fee: \$2.00

An in-depth study of pedagogical methods employed in teaching the four orchestral stringed instruments to beginning and intermediate level students.

May be repeated up to 9 credit hours.

Note: Music Majors and Minors only

MUSC 3852 - Stringed Instrument Pedagogy II

Credits: (2)

Course Fee: \$2.00

Continued in-depth study of pedagogical methods employed in teaching the four orchestral stringed instruments with a focus on upper intermediate and advanced level students.

Pre-requisite(s): MUSC 3851.

Note: Music Majors and Minors only

MUSC 3872 - Choral Conducting I

Credits: (2)

Typically Taught Fall Semester: *Full Sem even years*

Course Fee: \$4.00

Basic conducting technique and advanced techniques for techniques for conducting choral ensembles.

Pre-requisite(s): MUSC 1120 and MUSC 1140.

Note: Music Majors and Minors only

MUSC 3882 - Choral Conducting II

Credits: (2)

Typically Taught Spring Semester: *Full Sem even years*

Course Fee: \$4.00

Basic conducting technique and advanced techniques for techniques for conducting choral ensembles.

Pre-requisite(s): MUSC 1120 and MUSC 1140.

Note: Music Majors and Minors only

MUSC 3924 - Music Teaching and Learning in the Elementary School

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Course Fee: \$23.00

As an introduction to the role of music in the lives of children, this course provides opportunities for music majors to develop their rapport with elementary students. The course will include selecting literature and designing effective instructional strategies aligned with the Utah K-6 music core curriculum as well as the national music standards. Students will be introduced to different philosophical and pedagogical approaches as well as develop and implement age-appropriate assessment strategies. Students will develop their understanding of music's role in an interdisciplinary curriculum. A field experience with elementary-age students is required.

Pre-requisite(s): Completion of MUSC 2150 - Class Piano III with a grade of "C" or passing the piano proficiency exam.

Note: Music Majors and Minors only

MUSC 3991 INT - Junior Recital

Credits: (0)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Applied instruction in preparation for and public performance of a 30 minute recital.

Pre-requisite(s): Approval of instructor.

Note: Music Majors and Minors only.

MUSC 4302 - Keyboard Pedagogy I

Credits: (2)

Typically Taught Fall Semester: *Full Sem odd years*

Course Fee: \$4.00

Comprehensive study of keyboard pedagogy. Piano Majors and Minors only.

MUSC 4312 - Keyboard Pedagogy II

Credits: (2)

Typically Taught Spring Semester: *Full Sem even years*

Course Fee: \$4.00

Continuation of MUSC 4302. Comprehensive study of keyboard pedagogy. Piano Majors and Minors only.

MUSC 4322 - Keyboard Pedagogy III

Credits: (2)

Typically Taught Fall Semester: *Full Sem*

Continuation of MUSC 4312.

Pre-requisite(s): MUSC 4312.

MUSC 4332 - Keyboard Pedagogy IV

Credits: (2)

Typically Taught Spring Semester: *Full Sem*

Continuation of MUSC 4322.

Pre-requisite(s): MUSC 4322.

MUSC 4402 - Vocal Pedagogy I

Credits: (2)

Typically Taught Fall Semester: *Full Sem even years*

Course Fee: \$4.00

Comprehensive study of the principles, rules and procedures pertaining to the development, exercise, and practice of the art of singing and the science of teaching

singing.

Pre-requisite(s): Two semesters of piano required.

Note: Music Majors and Minors only

MUSC 4412 - Vocal Pedagogy II

Credits: (2)

Typically Taught Spring Semester: *Full Sem odd years*

Course Fee: \$4.00

Comprehensive study of the principles, rules and procedures pertaining to the development, exercise, and practice of the art of singing and the science of teaching singing.

Note: Music Majors and Minors only

MUSC 4610 - Applied Keyboard: Piano

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$445.00

Music Majors or Minors with a Keyboard Emphasis only. Students are responsible for contacting individual instructors to schedule lessons. See the Music website for a list of private instructors.

May be repeated 3 times with a maximum of 4 credit hours.

MUSC 4611 - Applied Keyboard: Organ

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$445.00

Music majors and minors only. Students are responsible for contacting individual instructors to schedule lessons. See the Music website for a list of private instructors.

May be repeated 3 times with a maximum of 4 credit hours.

MUSC 4620 - Applied Voice

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$445.00

Music majors and minors only. Students are responsible for contacting individual instructors to schedule lessons. See the Music website for a list of private instructors.

May be repeated 3 times with a maximum of 4 credit hours.

MUSC 4630 - Applied Woodwinds: Flute

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$445.00

Music majors and minors only. Students are responsible for contacting individual instructors to schedule lessons. See the Music website for a list of private instructors.

May be repeated 3 times with a maximum of 4 credit hours.

MUSC 4631 - Applied Woodwinds: Oboe

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$445.00

Music majors and minors only. Students are responsible for contacting individual instructors to schedule lessons. See the Music website for a list of private instructors.

May be repeated 3 times with a maximum of 4 credit hours.

MUSC 4632 - Applied Woodwinds: Clarinet

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$445.00

Music majors and minors only. Students are responsible for contacting individual instructors to schedule lessons. See the Music website for a list of private instructors.

May be repeated 3 times with a maximum of 4 credit hours.

MUSC 4633 - Applied Woodwinds: Saxophone

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$445.00

Music majors and minors only. Students are responsible for contacting individual instructors to schedule lessons. See the Music website for a list of private instructors.

May be repeated 3 times with a maximum of 4 credit hours.

MUSC 4634 - Applied Woodwinds: Bassoon

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$445.00

Music majors and minors only. Students are responsible for contacting individual instructors to schedule lessons. See the Music website for a list of private instructors. May be repeated 3 times with a maximum of 4 credit hours.

MUSC 4640 - Applied Brass: Trumpet

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$445.00

Music majors and minors only. Students are responsible for contacting individual instructors to schedule lessons. See the Music website for a list of private instructors. May be repeated 3 times with a maximum of 4 credit hours.

MUSC 4641 - Applied Brass: French Horn

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$445.00

Music majors and minors only. Students are responsible for contacting individual instructors to schedule lessons. See the Music website for a list of private instructors. May be repeated 3 times with a maximum of 4 credit hours.

MUSC 4642 - Applied Brass: Trombone

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$445.00

Music majors and minors only. Students are responsible for contacting individual instructors to schedule lessons. See the Music website for a list of private instructors. May be repeated 3 times with a maximum of 4 credit hours.

MUSC 4643 - Applied Brass: Euphonium/Tuba

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$445.00

Music majors and minors only. Students are responsible for contacting individual instructors to schedule lessons. See the Music website for a list of private instructors. May be repeated 3 times with a maximum of 4 credit hours.

MUSC 4650 - Applied Strings: Violin

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$445.00

Music majors and minors only. Students are responsible for contacting individual instructors to schedule lessons. See the Music website for a list of private instructors. May be repeated 3 times with a maximum of 4 credit hours.

MUSC 4651 - Applied Strings: Viola

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$445.00

Music majors and minors only. Students are responsible for contacting individual instructors to schedule lessons. See the Music website for a list of private instructors. May be repeated 3 times with a maximum of 4 credit hours.

MUSC 4652 - Applied Strings: Violoncello

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$445.00

Music majors and minors only. Students are responsible for contacting individual instructors to schedule lessons. See the Music website for a list of private instructors. May be repeated 3 times with a maximum of 4 credit hours.

MUSC 4653 - Applied Strings: String Bass

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$445.00

Music majors and minors only. Students are responsible for contacting individual instructors to schedule lessons. See the Music website for a list of private instructors.

May be repeated 3 times with a maximum of 4 credit hours.

MUSC 4654 - Applied Strings: Guitar

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$445.00

Music majors and minors only. Students are responsible for contacting individual instructors to schedule lessons. See the Music website for a list of private instructors.

May be repeated 3 times with a maximum of 4 credit hours.

MUSC 4655 - Applied Strings: Harp

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$445.00

Music majors and minors only. Students are responsible for contacting individual instructors to schedule lessons. See the Music website for a list of private instructors.

May be repeated 3 times with a maximum of 4 credit hours.

MUSC 4660 - Applied Percussion

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$445.00

Music majors and minors only. Students are responsible for contacting individual instructors to schedule lessons. See the Music website for a list of private instructors.

May be repeated 3 times with a maximum of 4 credit hours.

MUSC 4673 - Private Instruction

Credits: (2)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$890.00

Music majors and minors only. For vocal or instrumental students. Two hours of instruction/week. Minimum of 18 hours/week practice required. One-half hour special assignment. By consent of instructor only. Students are responsible for contacting individual instructors to schedule lessons. See the Music website for a list of private instructors.

May be taken for credit up to three times in any area of specialization.

MUSC 4681 - Private Instruction

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Individual private instruction for music majors and minors only. Students are responsible for contacting individual instructors to schedule lessons. See the Music website for a list of private instructors.

Pre-requisite(s):

Completion of two semesters of MUSC 3681 or MUSC 3682 with a grade of "C" or better.

May be repeated 4 times with a maximum of 4 credit hours.

MUSC 4682 - Private Instruction

Credits: (2)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Individual private instruction for music majors and minors only. Students are responsible for contacting individual instructors to schedule lessons. See the Music website for a list of private instructors.

Pre-requisite(s):

Completion of two semesters of MUSC 3681 or MUSC 3682 with a grade of "C" or better.

May be repeated 4 times with a maximum of 8 credit hours.

MUSC 4701 - Grant Writing & Non-Profits

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

Students will become familiar with the process of grant research, writing, and compliance. Theory will be applied into practice as students identify real-world organizations in need of funding, locate potential funding sources (including government, corporate, and foundation grants), write grant proposals, and submit those proposals to the

funding organization.

Pre-requisite(s):

Completion of MUSC 3701 with a grade of "C" or better.

MUSC 4771 - Stringed Instrument Literature I

Credits: (2)

Course Fee: \$4.00

A study of music for technical development, plus solo, and chamber music literature of the stringed instruments of the orchestra. This class will focus on music for beginning and intermediate students.

Note: Music Majors and Minors only

MUSC 4772 - Stringed Instrument Literature II

Credits: (2)

Course Fee: \$4.00

Advanced study of music for technical development, plus solo, and chamber music literature of the stringed instruments of the orchestra. This class will focus on music for upper intermediate and advanced students.

Pre-requisite(s): MUSC 4771.

MUSC 4801 - College of Arts & Humanities Leadership Lecture Series

Credits: (1)

Typically Taught Spring Semester: *Full Sem*

This one-credit elective course will give arts and humanities' majors the opportunity to interact with successful guest lecturers whose undergraduate backgrounds are in the arts and humanities. Lecturers will clarify how the talents and skills associated with their degrees have contributed to their pursuit of successful careers and lives.

MUSC 4820 - Pro Tools 101

Credits: (2)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$79.00

This course covers basic Pro Tools principles. It provides everything you need to complete a Pro Tools project from initial set up to final mix-down. The course focuses on Pro Tools software and covers a multitude of new functions and feature enhancements. Whether your project involves

recording live instruments, MIDI sequencing of software synthesizers, or audio editing or region looping, this course will give you the basic skills to succeed.

May be taken twice for 4 credits.

MUSC 4822 - Secondary Music Methods

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

Provides music teachers with an introduction into methods of instruction, organization and presentation of appropriate content and musical literature in secondary school music classes

Pre-requisite(s): Completion of MUSC 3924 and MUSC 2150 with a grade of "C" or better.

Note: Music Majors and Minors only.

MUSC 4823 - Pro Tools 110

Credits: (2)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$79.00

This course provides a more detailed look at the Pro Tools system above and beyond the knowledge you gained in the Pro Tools 101 course. It covers all the key concepts and skills needed to operate a Pro Tools system at the User level. The course along with Pro Tools 101: An Introduction to Pro Tools, provides the foundation to Pro Tools Certification and for the later 200-series of courses on Pro Tools music and post-production.

Pre-requisite(s): MUSC 4820.

May be taken twice for 4 credits.

MUSC 4830 - Directed Readings

Credits: (1-3)

To be arranged.

May be taken for a maximum of 7 hours of credit.

Note: Music Majors and Minors only

MUSC 4842 - High School Music Methods

Credits: (2)

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$4.00

Methods of instruction, organization and presentation of appropriate content and musical literature in high school music classes. Emphasis is placed on the administration of the school music program.

Pre-requisite(s): Piano proficiency and MUSC 4822.
Note: Music Majors and Minors only

MUSC 4860 INT - Internship in Music

Credits: (1-3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Practical synthesis and application of knowledge and skills gained in pedagogy and methods courses. Students plan and implement lessons, document progress, and evaluate their teaching assignments in group or private settings. May be repeated for a maximum of 12 credits.

Note: Music Majors and Minors only

MUSC 4890 INT - Cooperative Work Experience

Credits: (1-6)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A continuation of MUSC 2890. Open to all students. May be repeated to a maximum of 6 credits.

Note: Music Majors and Minors only

MUSC 4900 INT - Senior Project--BA in Music

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course will serve as a capstone project for the BA in Music. It will be taken during a student's final semester, and shall demonstrate the student's ability to synthesize the various components of her musical education. In conjunction with the general syllabus (attached), this individualized course will be governed by a contract (also attached). Depending upon the student's chosen track within the BA, examples of projects might include a major composition, a research paper, an analysis paper, a lecture-recital, etc.

Pre-requisite(s): Instructor approval.

MUSC 4910 INT - Opera Production

Credits: (2)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Preparation of operatic scenes and music. Music and staging rehearsal venue for the preparation of fully staged

opera productions. By audition only.
May be repeated up to 10 times for credit hours.

MUSC 4920 INT - Short Courses, Workshops, Institutes, and Special Programs

Credits: (1-4)

Variable Title

Typically Taught Fall Semester: *Full Sem*

Consult the class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript.

May be repeated 3 times with a maximum of 4 credit hours.

Note: Music Majors and Minors only

MUSC 4991 INT - Senior Recital

Credits: (0)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Private instruction in preparation for and public performance of a one hour recital.

Note: Music Majors and Minors only

MUSC 4992 INT - Senior Project

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Music education majors have the option of completing a senior project in lieu of the senior recital and should register for MUSC 4992 during the semester in which they plan to complete the project. Requires submission of a project proposal and approval by a faculty committee.

Pre-requisite(s): MUSC 4830.

Note: Music Majors and Minors only

MUSC 4995 INT - Capstone Project

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$31.00

Under instructor guidance and mentorship, the student will submit a Capstone proposal based on the culmination of coursework and garnered experience. This may include, but is not limited to, producing and/or engineering a multitrack recording session with live musicians, creating the soundtrack for a video, or a scholarly presentation based on any relevant topic from the sound and recording BOK.

Capstone completion required for minor.
Pre-requisite(s): Acceptance in the Sound Production/Recording program.

MUSC 6681 - Private Instruction

Credits: (1)
Typically Taught Summer Semester: *Full Sem*
Typically Taught Fall Semester: *Full Sem*
Typically Taught Spring Semester: *Full Sem*
Individual private instruction for music majors and minors only. Students are responsible for contacting individual instructors to schedule lessons. See the Music website for a list of private instructors.
Pre-requisite(s): Bachelor's degree in Music.
May be repeated 4 times with a maximum of 4 credit hours.

MUSC 6682 - Private Instruction

Credits: (2)
Typically Taught Summer Semester: *Full Sem*
Typically Taught Fall Semester: *Full Sem*
Typically Taught Spring Semester: *Full Sem*
Individual private instruction for music majors and minors only. Students are responsible for contacting individual instructors to schedule lessons. See the Music website for a list of private instructors.
Pre-requisite(s): Bachelor's Degree in Music.
May be repeated 4 times with a maximum of 8 credit hours.

NET 1030 - Foundations of Computing

Credits: (4)
Typically Taught Summer Semester: *Full Sem, Full Sem Online*
Typically Taught Fall Semester: *Full Sem, Full Sem Online*
Typically Taught Spring Semester: *Full Sem, Full Sem Online*
This course follows the core body of knowledge specified by the ACM which provides students with a broad overview of topics they might encounter within the major areas of computing. The course is taught at an introductory level and includes topics such as: history of computers, computer architecture, operating systems, web design and development, programming, database, software engineering, networking, and more. Cross-listed with CS 1030 and WEB 1030.

NET 1300 - Networks and Emerging Technologies

Credits: (3)
Typically Taught Fall Semester: *Full Sem*
Typically Taught Spring Semester: *Full Sem*
This course is designed to introduce the fundamentals of voice and data networking technologies. The course includes topics such as history of telecommunications, history of data networking, study of industry, transport media, common networking protocols, and emerging technologies.

NET 2010 - Business English Applications

Credits: (3)
Typically Taught Fall Semester: *Full Sem Online*
Includes Business English essentials: grammar, punctuation, and proofreading. Keyboarding 40 wpm recommended.
Pre-requisite(s): WEB 1700 or WEB 1701/WEB 1501.

NET 2200 - Microcomputer Operating Systems

Credits: (3)
Typically Taught Fall Semester: *Full Sem*
Typically Taught Spring Semester: *Full Sem*
Study of hardware and software components through managing programs, directories, files, and disks. Includes integrating applications, customizing windows, and managing printing.

NET 2210 - Linux Systems Administration

Credits: (3)
Typically Taught Fall Semester: *Full Sem*
Typically Taught Spring Semester: *Full Sem*
This course gives students a solid foundation in the fundamentals of the Linux operating system. Students gain system-level experience through problem-solving exercises at the command line and in the graphical user interface (GUI). By the end of the course, students will have learned the major, essential, command-line commands necessary to be accomplished users of Linux.
Pre-requisite/Co-requisite: CS 1030 and NET 2200 or instructor approval.

NET 2300 - Introduction to LAN Management

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Local area networking concepts including needs analysis, applications, topologies and configurations, and troubleshooting using hands-on labs.

Pre-requisite/Co-requisite: NET 2200 or instructor approval.

NET 2415 - Cisco TCP/IP Routing Protocols and Router Configuration

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

This course is the first in a two-course series designed to prepare students to pass the examinations for Cisco Certified Network Associate (CCNA). This course covers the OSI model, network components and topologies, IP addressing, beginning router configuration and routing protocols.

Pre-requisite(s): NET 2300 or CS 2705.

NET 2435 - Cisco Advanced LAN and WAN Switching and Routing Theory and Design

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

This course is the second in a two-course series designed to prepare students to pass the examinations for Cisco Certified Network Associate (CCNA). This course covers advanced router configurations, LAN switching theory and VLANs, advanced LAN and LAN switched design, Novell IPX, WAN theory design and technology, PPP, frame relay, ISDN, network troubleshooting, national SCANS skills, and threaded case studies.

Pre-requisite(s): NET 2415.

NET 2610 - NetWare Administration

Credits: (3)

This is the introductory course to Novell Administration involving setting up, managing, and using basic network services, including file systems, network printing, security, and Z.E.N. Works. After completing this course and successfully passing the Novell test, the candidate becomes a Certified Novell Administrator (CNA).

Pre-requisite(s): WEB 1700 or WEB 1701/WEB 1501 and WEB 1702/WEB 1502 and WEB 1703/WEB 1503.

Note: This course is not currently offered.

NET 3210 - Advanced Linux Systems Administration

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

This course presents advanced administrative skills common to mid- to senior-level administrators in an enterprise environment. Students learn how to apply security to network users and resources, manage and compile the Linux kernel, and troubleshoot network processes and services.

Pre-requisite(s): NET 2210.

NET 3300 - Advanced LAN Security Management

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

This course provides an in-depth look into the field of network security. Specific topics to be examined include networking protocols and threats, authentication models, cryptography, layer 2 security, application security, social engineering, access control lists, firewalls, risk management, and OS hardening.

Pre-requisite(s): NET 2300 or CS 2705.

NET 3310 - Network Server Administration

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Students will learn how to install, configure, manage, and troubleshoot hardware and applications in a Server environment. With a specific focus on Server fundamentals, this course will teach students how to install servers, configure active directories, create and manage users, install server roles and features, perform diagnostics, and troubleshoot malfunctioning servers.

Pre-requisite(s): NET 2300.

NET 3415 - Cisco CCNPB-Advanced Router Configuration

Credits: (3)

Building Scalable Cisco Networks (BSCN). Addresses tasks network managers and administrators need to perform when managing access and controlling overhead traffic in growing routed networks once basic connectivity has been established. Discusses router capabilities used to control traffic over LANs and WANs, as well as connecting corporate networks to an Internet Service Provider (ISP).

Pre-requisite(s): NET 2435 or CCNA Certification or CS 3705.

Note: This course is not currently offered.

NET 3425 - Cisco CCNP-Building Cisco Switched Networks

Credits: (3)

Building Cisco Multilayer Switched Networks (BCMSN). Teaches network administrators how to build campus networks using multilayer switching technologies over high speed Ethernet. Teaches how routing and switching concepts and implementations technologies work together.

Pre-requisite(s): NET 2435 or CCNA Certification.

Note: This course is not currently offered.

NET 3435 - Cisco CCNP--Remote Access Networks

Credits: (3)

Teaches how to build a remote access network to interconnect central sites to branch offices and home office/telecommuters. Further teaches students how to control access to the central site as well as maximizes bandwidth utilization over remote links.

Pre-requisite(s): NET 2435 or CCNA Certification.

Note: This course is not currently offered.

NET 3445 - Cisco CCNP--Internetwork Troubleshooting

Credits: (3)

Hands-on lab exercises. Covers developments in Cisco IOS and Catalyst software. Teaches how to baseline and troubleshoot an environment using Cisco routers and switches for multiprotocol client hosts and servers connected with: Ethernet, Fast Ethernet, and Token Ring LANS; and Serial, Frame Relay and ISDN BRI WANs.

Pre-requisite(s): NET 2435 or CCNA Certification.

Note: This course is not currently offered.

NET 3550 - Supervising Information Technology

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Application of supervisory functions in network management and multimedia settings including planning, structure, design, implementation, evaluation, problem-solving, and human resources.

Pre-requisite(s): NET 2300 or WEB 2300 or CS 2705.

NET 3600 - Principles of Business/Marketing Education

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

This course includes professionalism, curriculum, standards, counseling, tech prep, competency-based testing, research, and current issues and trends in Business/Marketing Education. Along with advanced electronic presentations, this course will include a review of other technologies used in teaching.

Pre-requisite(s): WEB 1700; or WEB 1701/WEB 1501 and WEB 1702/WEB 1502 and WEB 1703/WEB 1503.

NET 3610 - Methods of Teaching Marketing Education Subjects

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Analysis and research into methods of teaching business and marketing subjects with emphasis on teaching demonstrations and practices, objectives, outcome measurements, testing, and grading.

Pre-requisite(s): WEB 1700 or WEB 1701/WEB 1501 and WEB 1702/WEB 1502 and WEB 1703/WEB 1503.

NET 3710 - Switching and Transmission Network Systems Management

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

This course covers management of switching and transport systems and their technologies from industry carrier systems to private business networks. Also included are cellular/mobile/fixed wireless technologies including network elements, routing, packet delivery, handoff technology, and the evolution of generations of wireless technologies and systems.

Pre-requisite(s): NET 2300.

Co-Requisite(s): NET 3715.

NET 3715 - Transmission Network Applications

Credits: (2)

Typically Taught Fall Semester: *Fall [Full Sem]*

Hands-on labs working with TDM lines and trunks, transport, IP routing, and SIP. Applications will be run on live LAN/WAN networks. Also, the course includes

discussion of new technologies.

Pre-requisite(s): NET 2300.

Co-Requisite(s): NET 3710.

NET 3720 - Advanced Transport Media

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

An examination of the growing wireless technologies, fiber optics, their roles within the telecommunications data and media industries and to introduce associated fiber optic technical skills.

Pre-requisite(s): NET 2300

NET 3730 - Cyber Policy and Ethics

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Explores how the structural, competitive, economic, environmental, and ethical forces affect the continuing transformation of the networking industry both domestically and internationally. Discussion of the impact of contemporary issues on the provider and the consumer of telecommunication services including the legal and ethical requirements and ramifications of electronic privacy are included.

Pre-requisite(s): NET 3710 and NET 1300 or CS 1030.

NET 4700 - Data and Voice Network Design

Credits: (4)

Typically Taught Spring Semester: *Full Sem*

As a capstone course, students will design data and voice networks using industry metrics and rationale. Architecture, technologies, and standards associated with the design and management of modern data and voice networks will be covered.

Pre-requisite(s): NET 3710 and NET 3720.

NET 4740 - Security Vulnerabilities and Intrusion Mitigation

Credits: (4)

Typically Taught Spring Semester: *Full Sem*

A treatment of security issues related to computers and computer networking. This course is designed for advanced users, system administrators and network administrators. The course covers TCP/IP security issues, security policies, packet filtering, Internet firewall architecture and theory, detecting and monitoring unauthorized activity, password

authentication, intrusion detection and prevention and other security issues involving Linux, UNIX and Microsoft Windows operating systems. A team project is included.

Pre-requisite(s): NET 3300, PS 3250, and CS 3705.

NET 4760 INT - Network/Telecommunications Internship

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Must be completed senior year in a

network/telecommunications environment with company placement and outcomes approved by the department.

Pre-requisite(s): NET 4700 (may be taken concurrently).

Co-Requisite(s): Simultaneous enrollment in NET 4790 is required.

NET 4790 INT - Network/Telecommunications Senior Project

Credits: (2)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Capstone project applying the principles of network/telecommunications to the development of a network/telecommunications system within a company.

Pre-requisite(s): NET 4700 (may be taken concurrently).

Co-Requisite(s): Simultaneous enrollment in NET 4760 is required.

NET 4850 - Faculty Directed Research

Credits: (1-4)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

The purpose of this course is to permit Network Management Technology majors to work closely and consistently with a faculty mentor on specific research related to current, experimental topics in Network Management Technology. The final grade and amount of credit awarded will be determined by the faculty mentor, depending on the complexity of the advanced, upper division work performed. May be repeated 3 times up to 4 credit hours. Note: Only a maximum of 6 hours of NET 4800, NET 4850 and NET 4890 may be taken to satisfy missing credits or to achieve full time academic status.

Pre-requisite(s): NET 2300.

NET 4890 - Cooperative Work Experience

Credits: (1-4)

The purpose of this course is to permit Network Management Technology majors who are currently working in a computer related job or internship to receive academic credit for their work, with coordination and approval of a faculty mentor and their supervisor. The amount of upper division credit awarded will be determined by the department, depending on the nature and quantity of work performed. May be repeated 3 times up to 4 credit hours. Note: Only a maximum of 6 hours of NET 4800, NET 4850, and NET 4890 may be taken to satisfy missing credits or to achieve full time academic status

Pre-requisite(s): NET 2300.

NET 4990 - Senior Project

Credits: (3)

Research, analysis, presentation, and discussion of topics relative to graduating majors and minors.

Pre-requisite(s): WEB 2860 or equivalent.

Note: This course is offered as needed.

NET 6600 - Principles of Business/Marketing Education

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

This graduate-level course includes professionalism, curriculum, standards, counseling, tech prep, competency-based testing, research, and current issues and trends in Business/Marketing Education. Along with advanced electronic presentations, this course will include a review of other technologies used in teaching. NET 6600 may be substituted for NET 3600 in the undergraduate Business Education Composite Teaching major, Business Education Teaching minor, or Business/Marketing Teaching minor for those working on a second bachelor's degree.

Pre-requisite(s): WEB 1700; or WEB 1701/WEB 1501, WEB 1702/WEB 1502, and WEB 1703/WEB 1503 and a bachelor's degree.

NET 6610 - Methods of Teaching Business Education

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

This graduate-level course includes an evaluation and application of the methods of teaching business and marketing subjects with emphasis on teaching

demonstrations and practices, objectives, outcome measurements, testing, and grading. The students will write a unit-long Learning Activity Package (LAP) and will demonstrate teaching in a business/marketing course. NET 6610 may be substituted for NET 3610 in the undergraduate Business Education Composite Teaching major, Business Education Teaching minor, or Business/Marketing Teaching minor for those working on a second bachelor's degree.

Pre-requisite(s): WEB 1700; or WEB 1701/WEB 1501, WEB 1702/WEB 1502, and WEB 1703/WEB 1503; and a bachelor's degree.

NEUR 2050 - Introduction to Neuroscience

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$15.00

Introduction to the interdisciplinary field of neuroscience, which examines the function and dysfunction of the human and animal nervous system. The course spans the major areas of neuroscience including cellular/molecular factors, neuron physiology, brain structure and function, and medical/clinical applications. The topics addressed are critical to multiple fields of study (e.g. health sciences, psychology, and zoology) and provides the skills necessary for students to succeed in upper-division courses related to the brain and behavior.

Pre-requisite(s): none; recommend some background in basic biology, chemistry, or psychology.

NEUR 3750 - Cognitive and Behavioral Neuroscience

Credits: (3)

Typically Taught Spring Semester: *Full Sem even years*

This course challenges students to apply knowledge of nervous system structure and function to higher order cognitive functions and motor abilities including attention, memory, emotions, language and symbolic functions, reasoning, decision making, problem solving, voluntary movement, and consciousness.

Pre-requisite(s): NEUR 2050 or PSY 2710 or instructor approval.

NEUR 3850 - Clinical Neuroscience

Credits: (3)

Typically Taught Spring Semester: *Full Sem odd years*

This is an advanced undergraduate course primarily for Neuroscience minors, but open to all students. Students will apply a knowledge of neuroanatomy, neurophysiology, cognition, and behavior to discuss and solve in-depth clinical case studies in the classroom setting. The course will consist of instructor-led and student-led activities to explore a range of nervous system disorders.

Pre-requisite(s): NEUR 2050 or PSY 2710 or consent of instructor.

NEUR 3950 - Cellular and Molecular Neuroscience

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

Students will explore the cellular and molecular basis for nerve cell function.

Pre-requisite(s): NEUR 2050.

NEUR 3998 - EEG in Epilepsy

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

This course is part of the Bachelor of Integrated Studies in Electroneurodiagnostics (END), a partnership between Weber State University and the END program at the University of Utah. Students will complete lecture and lab hours primarily at the University of Utah. In addition, five meetings during the spring semester, probably at the University of Utah, will be required and there is a required research paper.

NEUR 3999 - EEG in Ped Patients & Neonates

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

This course is part of the Bachelor of Integrated Studies in Electroneurodiagnostics (END), a partnership between Weber State University and the END program at the University of Utah. Students will complete lecture and lab hours primarily at the University of Utah. In addition, five meetings during the spring semester, probably at the University of Utah, will be required and there is a required research paper.

NEUR 4800 - Projects and Research

Credits: (1-3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Supervised participation in projects and/or primary research with a faculty mentor in various areas of neuroscience.

Limited to advanced students upon consent of neuroscience faculty mentor and the Neuroscience Program director. A paper written in APA style and an oral report are required at the end of the semester.

Pre-requisite(s): NEUR 2050 (Introduction to Neuroscience), PSY 3600 (Statistics) or equivalent, and faculty mentor permission.

Students may enroll in this course twice for a maximum of 6 credit hours.

NEUR 4810 - Experimental

Credits: (1-6)

Typically Taught Spring Semester: *Full Sem odd years*

Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript. Refer to Experimental Courses.

May be repeated 5 times for a maximum of 6 credit hours.

NEUR 4830 - Directed Readings

Credits: (1-3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Independent readings or secondary research on advanced neuroscience special topics under the direction of a faculty mentor. For each hour of credit in a readings project the student is required to read an appropriate number of primary research journal articles and book chapters. A paper written in APA style and oral report are required at the end of the term.

Pre-requisite(s): NEUR 2050 (Introduction to Neuroscience), PSY 3600 (Statistics) or equivalent, and faculty mentor permission.

Students may enroll in this course twice for a maximum of 6 credit hours.

NEUR 4900 - Topics in Neuroscience

Credits: (2-3)

Variable Title

Typically Taught Spring Semester: *Full Sem*

This course offers an in-depth exploration of selected topics and issues in the discipline. The prerequisite may be waived or replaced by an equivalent at the discretion of the instructor in consultation with the Neuroscience Program

Director.

Pre-requisite(s): NEUR 2050 or PSY 2710 or consent of instructor.

The course may be taken up to three times for a maximum of six credit hours.

Note: This course is taught as needed.

NRSG 2100 - Pharmacology for Nurses 1

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Basic pharmacological treatments used by the nurse to promote health across the lifespan. Included in the course will be administering medications safely through various routes and specific agents that affect health and wellbeing. 3 lecture hours per week.

Pre-requisite(s): Admission to the Nursing Program.

Co-Requisite(s): NRSG 2200.

NRSG 2200 - Nursing Foundations

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Students are socialized into the profession of nursing, taught scope of practice, rules and ethics. Building nursing care on a health/wellness continuum is introduced. Students begin the nursing process through assessment of health and wellness in individuals, families and populations throughout the lifespan, and in diverse cultures and environments. 3 lecture hours per week.

Pre-requisite(s): Admission to the Nursing Program.

Co-Requisite(s): NRSG 2100.

NRSG 2251 INT/CEL - Foundations of Nursing Laboratory and Clinical

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course will include a combination of lab, simulation, and clinical experiences. Students will focus on identifying and implementing foundational nursing skills. Students will have the opportunity to practice in a controlled environment, where they will pass off required skills and simulate clinical experiences. Students will also apply learned skills in clinical facilities. In order to pass the course, students must pass all three components of the

course (lab, clinical, and simulation). This course focuses on application of concepts related to nursing care of patients in multiple environments and across the lifespan in various settings. Admission to the ADN Nursing Program is a pre-requisite, and registration in NRSG 2100 and NRSG 2200 are co-requisites.

NRSG 2283 - Directed Readings and Projects

Credits: (1-3)

Typically Taught Summer Semester: *Full Sem, Online*

Typically Taught Fall Semester: *Full Sem, Online*

Typically Taught Spring Semester: *Full Sem, Online*

Pre-requisite(s): Instructor approval.

(Maximum of 3 semester hours per year).

NRSG 2300 - Patient Centered Nursing Care 1

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Focused theory with emphasis on nursing care across the lifespan for patients experiencing changes in health status. Focus will be on identifying chronic diseases and developing a nursing strategy to promote wellness and quality of life for the patient. Clinical will focus on application of theory related to nursing care of patients in multiple environments and across the life-span. 3 lecture hours per week.

Pre-requisite(s): NRSG 2100, NRSG 2200.

NRSG 2351 INT/CEL - Patient Centered Nursing Care Experience I

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course will include a combination of clinical, simulation, and laboratory experiences. Students will build on previous skills and knowledge and focus on demonstrating and examining safe and efficient patient care. Students will have the opportunity to practice in a controlled environment, where they will pass off required skills and simulate clinical experiences. Students will also apply learned skills in clinical facilities. In order to pass the course, students must pass all three components of the course (lab, clinical, and simulation). This course focuses on application of concepts related to nursing care of

patients in multiple environments and across the lifespan in various settings.

Pre-requisite(s): Admission to Nursing Program, NRS 2100, NRS 2200, and NRS 2251.

Co-Requisite(s): NRS 2300.

NRS 2500 - Patient Centered Nursing Care 3

Credits: (3)

Typically Taught Summer Semester: *Full Sem, Online*

Typically Taught Fall Semester: *Full Sem, Online*

Typically Taught Spring Semester: *Full Sem, Online*

Focused theory with emphasis on nursing care across the lifespan for patients experiencing changes in health care status. Focus will be on caring for patients in the acute care setting with a goal of restoring optimal health and wellness.

Pre-requisite(s): NRS 2300, or Admission to the PN to RN nursing program.

Co-Requisite(s): NRS 3100.

NRS 2551 INT/CEL - Patient Centered Nursing Care Experience II

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course will include a combination of clinical, simulation, and laboratory experiences. Students will build on previous skills and knowledge and focus on developing and critiquing safe and efficient patient care. Students will have the opportunity to practice in a controlled environment, where they will pass off required skills and simulate clinical experiences. Students will also apply learned skills in clinical facilities. In order to pass the course, students must pass all three components of the course (lab, clinical, and simulation). This course focuses on application of concepts related to nursing care of patients in multiple environments and across the lifespan in various settings.

Pre-requisite(s): NRS 2100, NRS 2200, NRS 2251, NRS 2300, and NRS 2351.

Co-Requisite(s): NRS 2500 and NRS 3100.

NRS 3100 - Pharmacology for Nurses 2

Credits: (3)

Typically Taught Summer Semester: *Full Sem, Online*

Typically Taught Fall Semester: *Full Sem, Online*

Typically Taught Spring Semester: *Full Sem, Online*

Advanced pharmacological treatments used by the nurse to

promote health across the lifespan. Included in the course will be administering medications safely through intravenous and other routes along with specific agents that affect health and well-being. Credit hours (3): 3 lecture hours per week.

Pre-requisite(s): NRS 2300, or admission to the PN to RN Program.

Co-Requisite(s): NRS 2500.

NRS 3200 - Complex Patient Centered Nursing Care 1

Credits: (3)

Typically Taught Summer Semester: *Full Sem, Online*

Typically Taught Fall Semester: *Full Sem, Online*

Typically Taught Spring Semester: *Full Sem, Online*

Theory focuses on nursing care of patients with complex changes in health status requiring extensive multifaceted resources. Credit hours (3): 3 lecture hours per week.

Pre-requisite(s): NRS 2500 and NRS 3100.

Co-Requisite(s): NRS 3300 and NRS 3350.

NRS 3300 - Entry Into Nursing Professional Practice

Credits: (3)

Typically Taught Summer Semester: *Full Sem, Online*

Typically Taught Fall Semester: *Full Sem, Online*

Typically Taught Spring Semester: *Full Sem, Online*

Theory focuses on synthesis of nursing knowledge and skills necessary for entrance into registered nursing practice and includes preparation for licensing exams and synthesis of previous concepts. Credit hours (3): 3 lecture hours per week.

Pre-requisite(s): NRS 2500, and NRS 3100.

Co-Requisite(s): NRS 3200 and NRS 3350.

NRS 3350 INT/CEL - Entry Into Nursing Professional Practice Capstone

Credits: (3)

Typically Taught Summer Semester: *Full Sem, Online*

Typically Taught Fall Semester: *Full Sem, Online*

Typically Taught Spring Semester: *Full Sem, Online*

Clinical preceptorship focuses on synthesis of nursing knowledge, skills, and conduct necessary for entrance into registered nursing practice. Credit hours (3): 9 clinical hours per week.

Pre-requisite(s): NRS 2500 and NRS 3100.

Co-Requisite(s): NRS 3200 and NRS 3300.

NRSG 3400 - Mental Health: The Complex Role

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem Online*

Typically Taught Spring Semester: *Full Sem Online*

Advanced theories and concepts of nursing practice are explored across the lifespan for those experiencing alterations in mental health.

NRSG 3440 - Coping in Your Profession

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

The healthcare profession can be a highly rewarding career, but it can also be riddled with stress. This course will explore contributing factors that may cause stress among healthcare professionals. Burnout can be a direct result of stress in the workplace. The student will examine the causes of burnout, and more importantly, explore tools to prevent and treat burnout.

NRSG 3810 - Experimental Courses

Credits: (1-6)

Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript. May be repeated 5 times with a maximum of 6 credit hours. Refer to Experimental Courses.

NRSG 4000 - Culture and Health Care

Credits: (2)

This course is an exploration of culture, health care issues and experiences at the local, regional, national, or international levels. The learner will study and compare the health care of a selected country/community from the cultural, political and educational perspective.

Credit hours (2), 2 lecture hours per week.

Pre-requisite(s): Admission to Weber State University; recommended for nursing students, Licensed Nurses, and other healthcare providers.

May be repeated up to 99 times.

NRSG 4001 - Clinical Experience Related to Culture and Health Care of Nurses

Credits: (1-3)

This course is a Study Abroad Experience for Health Care Workers to explore the relationship between culture, health care and nursing issues at local, regional, national, and/or international levels. Information gained during NRSG 4000 will assist the student to put into practice the concepts learned.

Credit hours (1-3). Lab hours depend on the country visited.

Pre-requisite/Co-requisite: Co-requisite or prerequisite: NRSG 4000 related to area being visited.

May be repeated up to 99 times.

NRSG 4010 - Interdisciplinary Health Care Teams

Credits: (3)

This course provides an interdisciplinary experience with the team concept as a priority. The students learn the role of the health care team members, each with their different skills and objectives. The course teaches students to practice an interdisciplinary approach as they research, interact and learn in the interdisciplinary environment of a health care setting.

Cross-listed with DENT 4010 & HTHS 4010.

May be repeated once up to 6 credit hours.

NRSG 4045 - ELNEC: End-of-Life Nursing Education Consortium

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course is designed from the nationally recognized guidelines of the End-of-Life Nursing Education Consortium (ELNEC) project. These guidelines are revised regularly to reflect current advances in the field. The purpose of the ELNEC project is to support the knowledge and skills of nurses in providing palliative care to patients who are experiencing serious illness or end of life. ELNEC content focuses on nursing care at the end of life; pain management; symptom management; ethical/legal issues; cultural considerations in end-of-life care; communication; loss, grief, bereavement; and preparation for and care at time of death.

Pre-requisite(s): Admission to a nursing program or current registered nurse.

NRSG 4050 - Nursing Assessment Across the Life Span

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course provides the theory requisite for the systematic examination and analysis of subjective and objective health assessment data obtained during the health assessment process. The health status of a client will be determined through the process of differential analysis of both the anecdotal evidence provided by the client and empirical evidence gathered during the physical examination. With this evidence, students will learn to apply the scientific process of formulating and testing hypothetical diagnoses. The overall purpose will be focused upon developing strategies and skills to assess the health care needs of people across the life span. Students are challenged to identify normal assessment findings and critically analyze variations from normal.

NRSG 4060 - Oncology Nursing

Credits: (3)

Typically Taught Summer Semester: *Full Sem Online*

Typically Taught Fall Semester: *Full Sem Online*

Typically Taught Spring Semester: *Full Sem Online*

This course provides learning opportunities for nurses who work in various areas of health care with minimal opportunities to care for patients with cancer. The learning activities are based on current evidence, clinical experts, and patient values-evidenced-based practice. Throughout the course, an emphasis is placed on the collaborative interprofessional team tasked with managing the care of the patients regarding cancer diagnosis, cancer treatments, unintentional consequences stemming from treatment, and emotional aspects involved in caring for patients with cancer.

NRSG 4070 - Disaster Nursing

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Terrorism, war and natural disasters present new challenges to nurses and requires they be trained to care for resultant victims. Learning emphasizes crisis management, specific patient/health issues and unique nursing interventions. (Hybrid)

NRSG 4080 - Adult Critical Care

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem, Online*

Typically Taught Spring Semester: *Full Sem, Online*

Advanced theories and concepts of nursing practice are explored in relation to adults experiencing life threatening alterations in health. (Hybrid)

NRSG 4090 - Nursing: High Risk OB/Pediatric Patient

Credits: (3)

Typically Taught Summer Semester: *Full Sem Online*

Typically Taught Fall Semester: *Full Sem, Full Sem Online*

Typically Taught Spring Semester: *Full Sem, Full Sem Online*

At risk pediatric and obstetric populations require multiple interventions from knowledgeable caregivers. In this course, students will learn theory and concepts associated with caring for these high-risk populations. By the end of this course students will have an increased understanding of nursing care and application of evidence-based care for improved outcomes. (Hybrid).

NRSG 4100 - Care Coordination and Interdisciplinary Collaboration for Safe Patient Outcomes

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem, Online*

Typically Taught Spring Semester: *Full Sem, Online*

Nursing 4100 is designed to assist students in learning theory and concepts related to nursing care of patients with chronic conditions, including illness implications and education for patients and families. Topics will include areas such as genetic conditions, caregiver stress and grieving, as well as advocacy for vulnerable populations. The course will incorporate application of advanced skills and knowledge to address coordination of complex care issues and healthcare resources inherent in caring for patients and families experiencing chronic conditions.

NRSG 4200 SUS - Scholarship for Evidence-Based Practice

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem, Online*

Typically Taught Spring Semester: *Full Sem, Online*

Nursing 4200 focuses on a basic understanding of how multiple sources of evidence are developed and integrated into an evidence-based nursing environment. These sources include the formal research process, quality improvement data, clinical judgment, inter-professional perspectives, and patient preference. This course will include the application of advanced knowledge and skills required for translating reliable evidence into evidence-based practice and clinical judgments. The course will also support the establishment of a research-base for the student's personal nursing practice, as well as influence the continual improvement of healthcare quality and safety.

NRS 4300 - Healthcare Policy and Decision Making

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem, Online*

Typically Taught Spring Semester: *Full Sem, Online*

NRS 4300 will explore healthcare policies, including financial and regulatory policies, which directly and indirectly influence nursing practice. These policies shape responses to organizational, local, national, and global issues of equity, access, affordability, and social justice. Students will apply advanced skills and knowledge to identify, analyze and problem-solve variables affecting nursing decisions and healthcare policy encountered in nursing practice. Topics will be presented that provide an overview of legal and ethical principles and theories, emphasizing the role of ethics and healthcare policy in nursing.

NRS 4392 - Care Management: Implications for Nursing Practice

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem Online*

Typically Taught Spring Semester: *Full Sem Online*

The Principles of Care Management course presents students with the opportunity to gain insight and understanding into the various roles that nurses play in patient care management. Learners will have the opportunity to examine the major characteristics of care management including the forces that influence patient care planning. During the course the student will learn the necessary skills to create and apply a care management plan to a specific patient population. The course is appropriate for individuals who have an interest in the care management field and who are focusing their careers

working with populations and individuals over their life-time of care within illness and wellness issues.

NRS 4400 SUS/CEL - Population Health in Nursing

Credits: (4)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem, Online*

Typically Taught Spring Semester: *Full Sem, Online*

NRS 4400 explores nursing in diverse populations in a local and global context emphasizing disease prevention, health promotion and cultural competency for the improvement of health status throughout the lifespan. Focus will include disparities in health and health care services, and the impact of behavior and lifestyle choices. Course projects will incorporate application of advanced skills and knowledge related to health needs and health promotion at the individual and community level. Students will examine frameworks of community and public health, assess and analyze prevalent population-based health issues, and explore population-based interventions.

NRS 4500 - Nursing Management and Leadership

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem, Online*

Typically Taught Spring Semester: *Full Sem, Online*

NRS 4500 is designed to facilitate student learning and application of advanced skills and knowledge related to nursing leadership and nursing management. In accordance with this, students will explore and examine personal and professional characteristics of nurse leaders and nurse managers which will prepare them to lead through evidence-based principles. Students will also gain experience in communication and collaboration with community partners and interdisciplinary teams, which will prepare them to assist in the advancement of the profession of nursing through empowerment, change, and anticipation of nursing's future.

NRS 4600 - Communication, Collaboration, and Information Management in Healthcare

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem, Online*

Typically Taught Spring Semester: *Full Sem, Online*
Nursing 4600 will incorporate application of advanced skills and knowledge related to information management, patient care technology, and effective interpersonal communication modalities. These skills are critical in preparing nurses to deliver quality patient care in a variety of healthcare settings. Students will examine information management tools used to monitor: outcomes of care processes, patient care technologies essential to ensuring high quality, safe patient care, and communication and collaboration skills necessary to providing optimal patient-centered care.

NRSNG 4700 - Forensic Nursing

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course explores nursing in the field of forensics in both criminal and civil contexts. The different roles and responsibilities of forensic nurses will be explored and best-practices for evidence collection and preservation will be reviewed. Holistic care of victims and families will be emphasized. Students will review victimology, evaluate prevalent population-based health issues, and explore forensic nursing interventions.

NRSNG 4830 - Directed Theoretical Readings

Credits: (1-3)

Involves a contract with faculty to include reading and writing of materials relevant to baccalaureate level nursing. Subject emphasis arranged with faculty.
May be repeated once up to 6 credit hours.

NRSNG 4840 - Departmental Honors in Nursing Seminar

Credits: (3)

Completion of this course is required for students participating in the honors program in nursing. Students explore scholarly activity in nursing through the guided completion of one of three different learning options: creating a research proposal, writing a scholarly paper, or performing a service project. Learning through active and individualized scholarly inquiry is the focus of this class.

NRSNG 4850 - Study Abroad

Credits: (1-6)

Variable Title

The purpose of this course is to provide opportunities for students in health professions to experience a study abroad program that is designed to explore healthcare, culture, and clinical experience.

May be repeated 5 times up to 6 credit hours.

NRSNG 6110 - Translating Research and Evidence into Practice

Credits: (3)

Typically Taught Summer Semester: *Full Sem Online*

Typically Taught Fall Semester: *Full Sem Online*

Typically Taught Spring Semester: *Full Sem Online*

This course prepares the student to critically appraise, compare, and evaluate published Quantitative and Qualitative research reports to develop and implement and maintain an evidence-based innovation and/or practice within the professional settings of the nurse administrator and the nurse educator. In order to register for this course, the student must be officially accepted into Weber State University's MSN program.

May be repeated up to three times.

NRSNG 6120 - Research and Statistics

Credits: (3)

Typically Taught Summer Semester: *Full Sem Online*

Typically Taught Fall Semester: *Full Sem Online*

Typically Taught Spring Semester: *Full Sem Online*

This course focuses on the development of the knowledge and skill required to evaluate numerical data in support of an evidence-based environment for nursing administration and nursing education. Skills related to utilization of parametric and non-parametric methods of statistical analysis of quantitative data will be emphasized.

Pre-requisite(s):

The student must be officially accepted into Weber State University's MSN program to register for this class.

NRSNG 6130 - Theoretical Foundations of Nursing Practice

Credits: (3)

Typically Taught Summer Semester: *Full Sem Online*

Typically Taught Fall Semester: *Full Sem Online*

Typically Taught Spring Semester: *Full Sem Online*

This course introduces the student to processes associated with the development and application of both nursing and non-nursing theory. These processes include the varied yet interdependent activities of theory analysis, description,

critical reflection, and utilization of theory. In addition, the student will explore the utilization of both nursing and non-nursing theory in his or her practice of nursing.

Pre-requisite(s):

The student must be officially accepted into the MSN program to register for this class.

NRSG 6140 SUS/CEL - Collaborative Approaches in Population Health

Credits: (3)

Typically Taught Summer Semester: *2nd Blk, Online*

This course examines the principles of ecological, global, and social determinants of health to design, deliver, and evaluate culturally relevant clinical prevention and health promotion interventions and strategies for individuals, families, communities, and aggregate populations. Ethical approaches to equitable, efficient, effective, and sustainable population-based health policies are also examined.

NRSG 6141 - Advanced Nursing Theory

Credits: (3)

This course is intended to introduce the student to the multiple patterns of knowing within nursing and the processes associated with the development of nursing knowledge and theory. These processes include the varied yet interdependent activities of critical reflection, validation, confirmation, and utilization of nursing knowledge. In addition, the student will explore the utilization of nursing theory and knowledge to his or her own experiences and everyday nursing practice.

Co-Requisite(s): NRSG 6110 and NRSG 6180.

NRSG 6150 - Advanced Pathophysiology, Pharmacology and Assessment for the Nurse Educator

Credits: (3)

Typically Taught Spring Semester: *1st Blk, Online*

This course prepares the graduate with advanced knowledge and skills in the three areas of pathophysiology, pharmacology, and health assessment. Students will build upon previous knowledge in these three areas by participating in case-based learning and integrating advanced principles with educational practices.

NRSG 6160 - Evidence-Based Practice

Credits: (3)

This course provides students the knowledge and skill

required to develop and implement evidence-based processes within the professional settings of the nurse administrator and the nurse educator.

Pre-requisite(s): NRSG 6110, NRSG 6141, NRSG 6180.

Co-Requisite(s): NRSG 6120.

NRSG 6170 - Teaching Strategies

Credits: (3)

Typically Taught Summer Semester: *Full Sem Online*

Typically Taught Fall Semester: *Full Sem Online*

Typically Taught Spring Semester: *Full Sem Online*

This course prepares the student to apply teaching and learning theories within both the traditional and non-traditional classroom setting and clinical practice settings. Teaching strategies designed to support student learning across varied settings and modalities will be emphasized.

Pre-requisite(s):

The student must be officially accepted into the MSN program and have completed the first semester of the program prior to registering for NRSG 6170.

NRSG 6180 - Improving Patient Care and Nursing Practice through Information Systems

Credits: (2)

Typically Taught Summer Semester: *Full Sem Online*

Typically Taught Fall Semester: *Full Sem Online*

Typically Taught Spring Semester: *Full Sem Online*

This course provides students the knowledge and skill required to effectively apply the principles of information technology within the healthcare setting. Course content includes the utilization of information technology to analyze healthcare data for the improvement of nursing decision-making and to support quality in nursing administration and nursing education settings.

Pre-requisite(s): Must be officially accepted into Weber State University's MSN program to register for this course.

NRSG 6200 - Theoretical Foundations of Nursing Administration

Credits: (3)

This course focuses upon the knowledge and skills required to utilize established theoretical and concepts frameworks to critically analyze clinical and non-clinical leadership issues and apply theory-based principles within the nursing administration setting.

Pre-requisite(s): NRSG 6110, NRSG 6141, NRSG 6180.

NRSG 6205 - Transitions to Advanced Practice

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

This course is designed to present a foundation for understanding nursing theory and the relationship of theory and research to evidence based practice and conceptual models of advanced practice nursing.

Pre-requisite(s): Admission to an MSN Family Nurse Practitioner Program.

NRSG 6210 - Advanced Pathophysiology I

Credits: (2)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This is the first foundational pathophysiology course for nurse practitioners (NP's). Students are taught pathophysiology associated with disease and non-disease processes such as pain. Alterations in physiology result in clinical problems and diseases managed by NP's. Cell dysfunction or deregulation manifests as systemic symptoms and associated disease. Content includes etiology, modifiable risk factors, exposures, physiological mutations, and specific/nonspecific mechanisms to optimize cell-tissue-organ-system function. Students identify, analyze, and evaluate evidence related to disease pathology of specified body systems across the lifespan for future patient management.

NRSG 6211 - Advanced Pathophysiology II and Genetics

Credits: (2)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This is the second foundational pathophysiology course for nurse practitioners (NP's). Students are taught pathophysiology associated with disease and non-disease processes and clinical genetics principles as applied to nurse practitioner patient care. Alterations in physiology result in clinical problems and diseases managed by NP's. Cell dysfunction or deregulation manifests as systemic symptoms and associated disease. Content includes etiology, modifiable risk factors, exposures, physiological mutations, and specific/nonspecific mechanisms to optimize cell-tissue-organ-system function. Students identify, analyze, and evaluate evidence related to

disease pathology of specified body systems across the lifespan for future patient management.

NRSG 6215 - Advanced Pharmacology I

Credits: (2)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This foundational core course overviews pharmacokinetics and pharmacodynamics for nurse practitioners and provides the foundation for safe efficacious patient-centered medication management in a clinical setting. Course content includes information on pharmacology principles, terminology, drugs that affect the autonomic nervous system (ANS), special populations, clinical guidelines, and evidenced-based pharmaceutical interventions for infectious disease, endocrine function, and pain or comfort. Ethical and legal parameters for prescriptive practice are reviewed related to specific medication choice, dosing, drug interactions and side effects, and patient monitoring, education, and evaluation for effectiveness across the lifespan. Advanced Pharmacology I adheres to accreditation criteria for graduate nursing prescriptive principles and nurse practitioner practice.

NRSG 6216 - Advanced Pharmacology II

Credits: (2)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This foundational core course is a continuation of NRSG 6215 - Advanced Pharmacology I. It continues to overview efficacious patient-centered medication management in a clinical setting. Course content includes information on evidenced-based pharmaceutical interventions for central nervous system pathology, mental and behavioral disorders, cardiovascular and renal system disease, gastrointestinal illness, and respiratory, ENT, dermatology, and immunity syndromes. Prescriptive practice principles medication choice, dosing, drug interactions and side effects, and patient monitoring, education, and evaluation for effectiveness across the lifespan are considered and analyzed. Advanced Pharmacology II adheres to accreditation criteria for graduate nursing prescriptive principles and nurse practitioner practice.

NRSG 6220 - Advanced Health Assessment/Diagnostic Reasoning

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$275.00

This course allows students to transition into the role of the nurse practitioner through practice of clinically relevant activities such as a comprehensive holistic health history, use of motivational interviewing, a systematic physical assessment, and critical reasoning to determine appropriate differential diagnoses. Classroom student learning activities, nursing practice lab, and select standardized patient encounters are used to present and practice physical assessment and diagnostic reasoning for nurse practitioner (NP) patient-centered care. Students focus weekly on a body system and incorporate assessment and diagnostic reasoning skills for patients across the lifespan. NP students use a systematic critical thinking approach to diagnostic reasoning and assessment competency.

Pre-requisite(s): Faculty permission.

NRSG 6225 - FNP Clinical Skills

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$275.00

This clinical skill course provides opportunities for the nurse practitioner (NP) students to learn and practice a variety of essential clinical care skills. Students attend clinical skill lab weekly for instruction from interprofessional peers and nurse practitioner faculty. NP students acquire clinical skill performance, gather diagnostic and objective data for conditions requiring procedures, management strategies, patient education, and ICD-10 & CPT billing and coding instruction for common clinical issues.

NRSG 6230 - FNP Patient Care Lab

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$275.00

This laboratory skill course provides opportunities for the nurse practitioner (NP) students to learn and practice a variety of essential ambulatory care skills for patients across the lifespan. There is a focus on women's health and pediatric health care conditions. Students attend skill lab weekly for instruction from interprofessional peers and nurse practitioner faculty. NP students acquire knowledge

of skill performance, diagnostic and objective information for conditions requiring procedures, management strategies, patient education, and ICD-10 & CPT billing and coding instruction for common health care issues.

Pre-requisite(s): NRSG 6220 - Advanced Health Assessment/Diagnostic Reasoning and NRSG 6225 - FNP Clinical Skills.

Co-Requisite(s): NRSG 6245 - FNP Patient Care III, NRSG 6246 - Advanced Practice Primary Care Clinical III.

NRSG 6235 - FNP Patient Care I

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This is one of the theory companion courses to NRSG 6236. The course is designed to provide advanced theoretical knowledge and emphasis on adult healthcare for the nurse practitioner student. The course prepares students to manage prevalent healthcare concerns encountered across the lifespan of male and female adults. Nurse practitioner students include significant others, family, and available community resources for patient health promotion and illness management, assessment, diagnosis, intervention, healthcare plans, follow-up, and evaluation of adults in a variety of settings.

Co-Requisite(s): NRSG 6236 - Advanced Practice Primary Care Clinical I.

NRSG 6236 - Advanced Practice Primary Care Clinical I

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

This course is designed for the nurse practitioner student to deliver high quality healthcare to adults. The course prepares students to apply acquired skills, magnify diagnostic reasoning through psychomotor, affective and cognitive domains. This course also requires students to diagnose and determine best practice to treat illness and prevent disease.

Co-Requisite(s): NRSG 6235 - FNP Patient Care I.

NRSG 6240 - FNP Patient Care II

Credits: (2)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This is one of the theory companion courses to NRSG 6236 - Advanced Practice Primary Care Clinical I. The course

provides advanced theoretical knowledge and emphasis on nurse practitioner primary care of older adults. Students learn management of common older adult healthcare problems in the community and a variety of health care settings. The course focuses on the various health issues for older adults, including health promotion, functional ability, chronic disease management, polypharmacy, palliative intervention, and end-of-life care.

Co-Requisite(s): NRSRG 6236.

NRSRG 6241 - Advanced Practice Primary Care Clinical II

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

This is the clinical companion course to MSN 6240 Advanced Practice Nursing: Older Adult Health. This clinical course is designed for the nurse practitioner student to deliver high quality healthcare with a focus on adults or older adults. The course prepares students to apply acquired skills, magnify diagnostic reasoning through psychomotor, affective and cognitive domains. This course requires students to diagnose and determine best practice to treat illness and prevent disease as a primary care FNP provider.

Co-Requisite(s): NRSRG 6240 - FNP Patient Care II.

NRSRG 6245 - FNP Patient Care III

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This is one of the theory companion courses to NRSRG 6246 - Advanced Practice Primary Care Clinical III. The course is designed to provide advanced theoretical knowledge and emphasis on pediatric (newborn to adolescent) healthcare for the nurse practitioner student. The course prepares students to manage prevalent healthcare concerns encountered across the pediatric lifespan. Nurse practitioner students include significant others, family, and available community resources for patient health promotion and illness management, assessment, diagnosis, intervention, healthcare plans, follow-up, and evaluation of adults in a variety of settings.

Co-Requisite(s): NRSRG 6246 - Advanced Practice Primary Care Clinical III.

NRSRG 6246 - Advanced Practice Primary Care Clinical III

Credits: (2)

Typically Taught Fall Semester: *Full Sem*

This is the clinical companion course to NRSRG 6245 and NRSRG 6250. The course is designed for the nurse practitioner student to deliver high quality healthcare to patients of all ages with a focus on primary care. Students apply evidenced-based practice clinical reasoning principles for assessment, diagnosis, and treatment interventions for a variety of health conditions. Students practice history taking, perform physical examination, order and analyze diagnostic tests, determine differential diagnoses, plan interventions, and prescribe medications. Students apply health promotion principles to prevent disease and manage individualized healthcare outcomes through psychomotor, affective and cognitive domains. Associated theory courses focus on pediatric and female health conditions.

Co-Requisite(s): NRSRG 6245 - FNP Patient Care III.

NRSRG 6250 - FNP Patient Care IV

Credits: (2)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This is one of the theory companion courses to NRSRG 6246 - Advanced Practice Primary Care Clinical III. The course is designed to provide advanced theoretical knowledge and emphasis on unique health care needs of women. The course prepares students to manage prevalent health care concerns of women, including; maturation, sexuality, family planning, contraception, perinatal care (preconception through pregnancy), and menopause. Concepts will focus on strategies for health promotion and disease prevention through the lifespan of a woman, as well as management of selected issues related to fertility, pregnancy, and aging.

Co-Requisite(s): NRSRG 6246.

NRSRG 6251 - Advanced Practice Primary Care Clinical IV

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

This is the clinical companion course to MSNP 6250 Advanced Practice Nursing: Women's Health. This clinical course is designed for the nurse practitioner student to deliver high quality healthcare with a focus on women's health. The course prepares students to apply acquired skills, magnify diagnostic reasoning through psychomotor, affective and cognitive domains. This course requires students to diagnose and determine best practice to treat illness and prevent disease as a primary care FNP provider.

Co-Requisite(s): NRSRG 6250 - FNP Patient Care IV.

NRSG 6255 - Leadership and Accountability in Advanced Nursing

Credits: (2)

Typically Taught Summer Semester: *1st Blk Online*

The purpose of this course is to provide graduate nursing students with an overview of personal, organizational and systems leadership. At the conclusion of this course, students will be able to apply leadership skills and ethical decision making as it relates to healthcare policy, legal regulation, quality improvement and patient safety.

Pre-requisite(s): Must be officially accepted into the MSN program to register for this class.

NRSG 6256 - Transition to Advanced Practice II

Credits: (4)

Typically Taught Spring Semester: *Full Sem*

This course is designed to complement NRSG 6260 Advanced Practice Nursing Clinical Practicum in preparing the family practice nursing student for the certification examination and the advanced practice role. The course allow students to investigate a variety of topics that impact advanced practice nursing, issues for special populations, leadership competencies, impact of policies on healthcare, and principles of independent or NP managed practices.

Pre-requisite(s): NRSG 6205 - Transitions to Advanced Practice.

Co-Requisite(s): NRSG 6260 - Nurse Practitioner Immersion.

NRSG 6260 - Nurse Practitioner Immersion

Credits: (4)

Typically Taught Spring Semester: *Full Sem*

This is the final clinical course of the FNP Program. This course is designed for the nurse practitioner student to evaluate individual and system effectiveness in delivery of quality healthcare to patients across the lifespan. The course evaluates the student's ability to apply acquired skills, magnify diagnostic reasoning through psychomotor, affective and cognitive domains. This course also evaluates the student's ability to diagnose and determine best practice to treat illness and prevent disease.

Pre-requisite(s): NRSG 6236, NRSG 6241, NRSG 6246, NRSG 6251.

NRSG 6270 - Mental Health for Primary Care

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Family nurse practitioners (FNPs) identify physiological and mental health concerns to promote optimal health. Evidenced-based mental / behavioral health assessment, diagnosis, and interventions across the lifespan, ensure intuitive and analytical clinical diagnostic reasoning for intentional healthcare recommendations. Advanced practice concepts, theories, current research, mental/behavioral healthcare diagnosis principles, and pharmacotherapeutic decision-making for FNPs are explored in this course.

Pre-requisite(s): Acceptance into DNP-FNP program.

NRSG 6300 - Quality Improvement, Patient Safety and Risk Issues in Patient Care Delivery

Credits: (3)

Typically Taught Summer Semester: *Full Sem Online*

Typically Taught Fall Semester: *Full Sem Online*

Typically Taught Spring Semester: *Full Sem Online*

This course focuses upon the nurse administrator's responsibility to develop and maintain a culture of safety, reduce and prevent harm to patients, and reduce institutional risk and liability issues through the utilization of healthcare outcomes measurement and application of sound principles and practices associated with quality improvement.

Pre-requisite(s):

The student must be officially accepted into Weber State University's MSN program and have completed the first semester of study to register for this course.

NRSG 6324 - Financial Issues in Nursing Administration

Credits: (2)

Typically Taught Fall Semester: *1st Blk Online*

This course provides a conceptual foundation for the nurse administrator's accountability to provide fiscal resource planning, forecasting and resource allocation, strategic planning that addresses future trends, oversight of all nursing related operating aspects, and the achievement of the financial goals of the healthcare organization.

Pre-requisite(s):

Must be officially accepted into Weber State University's MSN program to register for this course.

NRSRG 6340 - Compliance with Legal and Regulatory Systems in Patient Care Delivery

Credits: (3)

This course focuses upon the nurse administrator's responsibility to develop and maintain a healthcare environment that fulfills the compliance standards and criteria established by both state and national legal and regulatory systems.

Pre-requisite(s): NRSRG 6110, NRSRG 6120, NRSRG 6141, NRSRG 6160, NRSRG 6180, NRSRG 6200.

Co-Requisite(s): NRSRG 6324, NRSRG 6360.

NRSRG 6360 - Scope and Practice of Nursing Administration

Credits: (1)

Typically Taught Spring Semester: *1st Blk Online*

This course addresses the nurse administrator's responsibility for the overall administration of patient care delivery services and representation of nursing services at the highest level of the organization and across a wide variety of settings.

Pre-requisite(s): Must be officially accepted into Weber State University's MSN program.

NRSRG 6380 - Retaining and Developing a Competent Workforce in Nursing

Credits: (2)

Typically Taught Spring Semester: *1st Blk Online*

This course addresses the overall operational management and administration functions related to staffing, staff development, and managerial issues including coaching, discipline and employee support. Processes related to labor relations within healthcare is addressed.

Pre-requisite(s): Must be officially accepted into Weber State University's MSN program to register for this course.

NRSRG 6400 INT - Nurse Executive Residency

Credits: (2)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This 85 hour on-site practicum is designed to prepare the student for a career in nursing administration and leadership. The student will participate in focused participative learning activities with nurse leaders at either

the executive, director or manager level. A variety of focused nursing administrator residency areas will be available. The student, faculty, and assigned nurse administrator residency preceptor will collaboratively design the residency experience.

Pre-requisite(s): The student must be officially accepted into the MSN program and have completed required core courses prior to registering for NRSRG 6400.

NRSRG 6500 - Theoretical Foundations in Nursing Education

Credits: (3)

This course focuses upon the knowledge and skills required to utilize established teaching and learning theories developed to enhance the nursing educational process. The practical utility of these teaching and learning theories in diverse nursing education learning environments will be emphasized.

Pre-requisite(s): NRSRG 6110, NRSRG 6141, NRSRG 6180.

NRSRG 6520 - Curriculum Development for Nursing Educators

Credits: (3)

Typically Taught Summer Semester: *Full Sem Online*

Typically Taught Fall Semester: *Full Sem Online*

Typically Taught Spring Semester: *Full Sem Online*

This course focuses on the concepts and organizing frameworks for curriculum design, course development and desired outcomes, standards of nursing education and practice, continuing education, and health care educational programs. Issues related to program accreditation and related social and legal issues will be examined.

Pre-requisite(s):

The student must be officially accepted into Weber State University's MSN program to register for this course.

NRSRG 6540 - Measurement of Competence and Outcomes in Nursing Education

Credits: (3)

Typically Taught Summer Semester: *Full Sem Online*

Typically Taught Fall Semester: *Full Sem Online*

Typically Taught Spring Semester: *Full Sem Online*

This course focuses upon established theories of measurement and evaluation coupled with strategies for implementing evaluation of student learning, program outcomes, and faculty performance targets. Accurate interpretation of evaluation data to support an evidence-

based response to student and program evaluation results will be emphasized.

Pre-requisite(s):

The student must be officially accepted into Weber State University's MSN program to register for this course.

NRSRG 6560 - Socialization in the Role of Nursing Educator

Credits: (2)

Typically Taught Spring Semester: *1st Blk Online*

This course prepares the student to function proficiently in the nurse educator role within a variety of learning environments and social settings. The development of professional and personal adaptive strategies will be emphasized.

Pre-requisite(s):

Must be officially accepted into Weber State University's MSN program to register for this course.

NRSRG 6580 - Clinical Nursing Instruction in Higher Education and Community Settings

Credits: (3)

This course prepares the student to apply teaching and learning theories within the practice laboratory and clinical settings. The clinical application component of this course will provide the student the opportunity to participate, with supervision, in a practice laboratory and/or clinical instruction environment.

Pre-requisite(s): NRSRG 6110, NRSRG 6120, NRSRG 6141, NRSRG 6160, NRSRG 6180, NRSRG 6520, NRSRG 6540, NRSRG 6560.

Co-Requisite(s): NRSRG 6600, NRSRG 6700.

NRSRG 6600 - Nursing Instruction in Higher Education and Community Settings

Credits: (3)

This course prepares the student to apply teaching and learning theories within both the traditional and non-traditional classroom setting. Teaching strategies designed to support student learning across varied settings and modalities will be emphasized.

Pre-requisite(s): NRSRG 6110, NRSRG 6120, NRSRG 6141, NRSRG 6160, NRSRG 6180, NRSRG 6500, NRSRG 6520, NRSRG 6540, NRSRG 6560.

Co-Requisite(s): NRSRG 6580, NRSRG 6700.

NRSRG 6700 INT - Nurse Educator Residency

Credits: (2)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This on-site 85 hour practicum is designed to prepare the student for a career in nursing education and leadership. During the MSN Educator Residency, students will participate in focused participative learning activities with advanced prepared nurse educators at an academic and/or healthcare service educational setting. A variety of nurse educator residency areas will be available. The student, faculty, and assigned nurse educator residency preceptor will collaboratively design the residency experience.

Pre-requisite(s):

The student must be officially accepted into the MSN program and have completed required core courses prior to registering for NRSRG 6700.

NRSRG 6710 - Advanced Health Assessment for the Nurse Educator

Credits: (2)

Typically Taught Summer Semester: *Full Sem Online*

Typically Taught Fall Semester: *Full Sem Online*

Typically Taught Spring Semester: *Full Sem Online*

This course lays the groundwork for students to perform comprehensive and holistic health histories, review of systems, and physical examinations for patients. The overall purpose will be focused upon developing strategies and skills to assess the health care needs of people across the life span. Students are challenged to identify normal assessment findings and critically analyze variations from normal and apply that knowledge for health education.

Pre-requisite(s): The student must be officially accepted into the MSN program and have completed the first semester of study prior to registering for NRSRG 6710.

NRSRG 6720 - Advanced Pharmacology for the Nurse Educator

Credits: (2)

Typically Taught Summer Semester: *Full Sem Online*

Typically Taught Fall Semester: *Full Sem Online*

Typically Taught Spring Semester: *Full Sem Online*

This course overviews pharmacokinetics and pharmacodynamics for optimum individual client management. Advanced practice nursing students are prepared to safely monitor medication regimens for patients across the lifespan based on clinically relevant ethical and

legal parameters and consideration of evidenced based practice guidelines and protocols for effective pharmacology management and education.

Pre-requisite(s): The student must be officially accepted into the MSN program and have completed the first semester of study prior to registering for NRSRG 6720.

NRSRG 6730 - Advanced Pathophysiology for the Nurse Educator

Credits: (2)

Typically Taught Summer Semester: *Full Sem Online*

Typically Taught Fall Semester: *Full Sem Online*

Typically Taught Spring Semester: *Full Sem Online*

This course is a core graduate level course. This course is designed to teach the master level nursing student frequently seen alterations in physiology. The course will focus on modifiable risk factors, exposures, physiological mutations, and presenting signs and symptoms. Students will utilize evidence-based practice and research to identify, analyze and evaluate disease pathology across the lifespan.

Pre-requisite/Co-requisite: The student must be officially accepted into the MSN program and have completed the first semester of study prior to registering for MSN 6730.

NRSRG 6801 - Integrating Scholarship into Practice

Credits: (2)

The NRSRG 6801 course is designed as a foundational course to prepare graduates to be information literate and to practice from an evidence-based approach in their direct and indirect advanced nursing roles. In addition, students will begin the compilation of a scholarly paper through identification of a problem in practice and that reflects reflect educational theory, interprofessional collaboration, research, and current standards of practice. In this course students will be asked to critically appraise research and evidence summaries related to area of practice and apply it to their practice problem. Completion of 6801 and the MSN Scholarly Project is a graduation requirement for the Master of Science in nursing degree.

Pre-requisite(s):

The student must be officially accepted into Weber State University's MSN program to register for this course.

NRSRG 6802 - Integrating Scholarship into Practice

Credits: (1)

Typically Taught Summer Semester: *Full Sem Online*

Typically Taught Fall Semester: *Full Sem Online, 1st Blk Online*

Typically Taught Spring Semester: *Full Sem Online*

The NRSRG 6802 course is designed as a continuation of NRSRG 6801. In this course, students will design scholarly activities in an established area of expertise. Students will be asked to develop a project deliverable which demonstrates skill in proposal writing for initiatives that include, but are not limited to evidence-based practice, clinical guidelines, resource acquisition, course development, and policy development. Completion of 6802 and the MSN Scholarly Project is a graduation requirement for the Master of Science in nursing degree.

Pre-requisite(s):

The student must be officially accepted into Weber State University's MSN program to register for this course.

NRSRG 6803 - Integrating Scholarship into Practice

Credits: (1)

Typically Taught Summer Semester: *Full Sem Online*

Typically Taught Fall Semester: *Full Sem Online*

Typically Taught Spring Semester: *Full Sem Online*

The NRSRG 6803 course is designed as a continuation of NRSRG 6802. In this course, students will integrated all components of their scholarly project and develop strategies for dissemination of nursing knowledge to a variety of audiences through various means. Completion of 6803 and the MSN Scholarly Project is a graduation requirement for the Master of Science in nursing degree.

Pre-requisite(s):

NRSRG 6801 and NRSRG 6802. The student must be officially accepted into Weber State University's MSN program to register for this course.

NRSRG 6850 - MSN Project Development and Implementation Extension Course

Credits: (1)

For students who have completed all course requirements for MSN, but have not completed the MSN project requirement. Students must register for a minimum of 1 credit of NRSRG 6850 to remain enrolled in the MSN program.

Pre-requisite(s): Faculty approval.

May be repeated two (2) times with a maximum of 2 credit hours.

NRSRG 6860 INT - Fieldwork Practicum

Credits: (1-9)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This practicum provides students with graduate level health-related fieldwork experience in a self-selected setting, under the direction of a faculty member. Instructor consent required. This is a pass/fail course.

May be repeated for a maximum of nine credit hours.

NRSG 6920 - Short Courses, Workshops, Institutes, and Special Programs

Credits: (1-6)

Workshop

Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript.

NRSG 7000 - Introduction to DNP Degree

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course allows students to explore how the DNP prepared nurse leader participates in evolving healthcare environments through translation of knowledge for advocacy, quality improvement, systems change, and policy revision. Role transition and professionalism are explored through the foundational DNP practice essentials, identification of healthcare challenges, and the educational and practice requirements for a Post-Masters DNP prepared advance practice nurse.

Pre-requisite(s): Student must be accepted to the DNP program.

NRSG 7001 - Transitions to Practice I

Credits: (2)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course allows students to explore how the DNP prepared FNP participates in evolving healthcare environments through translation of knowledge for leadership, advocacy, quality improvement, and policy revision. Role transition and professionalism are explored through the foundational DNP practice essentials and FNP clinical competencies, identification of practice challenges, and the educational, clinical, and practice requirements for

a BSN to DNP-FNP degreed advance practice nurse.

Pre-requisite(s): Student must be accepted to the DNP program.

NRSG 7002 - Transitions to Practice II

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

The course provides students with a foundation for understanding the process and phases of transition to the role of a nurse practitioner, the requirements for credentialing as a Family Nurse Practitioner (FNP), participation in professional organizations, and regulatory compliance. An understanding of issues related to health policy, healthcare delivery, access and quality of care, ethical and legal role expansion implications, negotiating contracts, billing and reimbursement, and general leadership competencies are presented. Students explore and articulate a variety of nurse practitioner roles including direct and indirect healthcare possibility.

NRSG 7010 - Scholarly/Ethical Foundations

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course examines scientific, philosophical, and ethical underpinnings of advanced nursing practice including the relationships among theory, research, and practice. Students critically appraise types of evidence in nursing and/or other health care disciplines to begin the initial literature review for the DNP Project.

Pre-requisite(s): Student must be accepted to the DNP program.

NRSG 7020 - Biostatistics/Epidemiology

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course focuses on the basic tools needed for the collection, analysis, and interpretation of research, in particular findings and recommendations for individuals and population health and health policy. Epidemiological principles, models, and approaches/strategies related to health and illness in at-risk populations are examined. General principle of research design and hypothesis testing are reviewed and research and non-research studies examined for human health and disease treatment.

Pre-requisite(s): Student must be admitted to the DNP program.

NRSG 7030 - Information Technology & EBP

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course examines principles of nursing informatics and how they are integrated in health care systems. Advanced informatics skills of database design, knowledge management, clinical decision support, and project management to guide the DNP student in recommending, evaluating, and implementing patient care technologies.

Pre-requisite(s): Student must be admitted to the Post Master's DNP or BSN to DNP-FNP program.

NRSG 7040 - Systems Approach and QI

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

This course focuses on the DNP student critically appraising the evidence of quality improvement (QI) measures, strategies, and outcomes in health care systems. The DNP student designs and evaluates care delivery approaches within the current organizational, political, cultural, and economic context to ensure accountability for quality of health care and patient safety in diverse organizations.

Pre-requisite(s): Student must be admitted to the DNP program.

NRSG 7050 - Advanced Population Health

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

This course synthesizes concepts related to clinical prevention and at-risk populations. Using epidemiological and informatics principles, the DNP student assesses select population needs, with consideration of psychosocial, cultural, and ecological factors and their impact on health disparities across healthcare systems. Students evaluate care delivery models for population health services addressing health promotion/disease prevention that are responsive to diverse cultural needs. Upon completion of this course, the student completes 30 DNP practice hours.

Pre-requisite(s): Student must be admitted to the DNP program.

NRSG 7060 - DNP Leadership

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course examines theories and strategies to enhance the DNP student's leadership skills. Students are prepared to effectively lead change, facilitate interdisciplinary collaboration, and transform practice to impact quality of health care and outcomes within complex health care systems.

Pre-requisite(s): Student must be admitted to the Post Master's DNP or BSN to DNP-FNP program.

NRSG 7070 - Healthcare Policy

Credits: (2)

Typically Taught Fall Semester: *Full Sem*

This course prepares the DNP student to critically analyze healthcare policy interventions and evaluate health care policy and regulation. This course examines safe, effective, ethical, equitable, patient-centered care within healthcare systems. Upon completion of this course, the student completes 30 DNP practice hours.

Pre-requisite(s): Student must be admitted to the DNP program.

NRSG 7080 - Healthcare Finance/Economics

Credits: (2)

Typically Taught Spring Semester: *Full Sem*

This course focuses on principles of healthcare economics and finance to develop and implement effective planning, decision-making, and evaluation for healthcare delivery within healthcare organizations and systems. It provides a financial management perspective to advanced nursing practice and general health care issues.

Pre-requisite(s): Student must be admitted to the DNP program.

NRSG 7801 - DNP Project I

Credits: (1)

Typically Taught Spring Semester: *Full Sem*

The DNP project courses produce a tangible and deliverable academic product created from a practice immersion experience, which is reviewed and evaluated by an academic committee. The final product shows evidence of the student's competence in critical thinking by translating evidence into practice and evaluating the

evidence in the practice environment aimed toward improving healthcare outcomes. This course is the first of six courses (NRSG 7801 to NRSG 7806) and reflects a synthesis of the student's growth in knowledge and expertise throughout the program. NRSG 7801 focuses on the background and significance of the problem and outlines the synthesized evidence. This course may contain 30 to 120 DNP practicum hours.

Pre-requisite(s): Student must be admitted to the DNP program.

NRSG 7802 - DNP Project II

Credits: (1)

Typically Taught Summer Semester: *Full Sem, Full Sem - Online*

Typically Taught Fall Semester: *Full Sem, Full Sem - Online*

Typically Taught Spring Semester: *Full Sem, Full Sem - Online*

The DNP project courses produce a tangible and deliverable academic product created from a practice immersion experience, which is reviewed and evaluated by an academic committee. The final product shows evidence of the student's competence in critical thinking by translating evidence into practice and evaluating the evidence in the practice environment aimed toward improving healthcare outcomes. This course is the second of six courses (NRSG 7801 to NRSG 7806) and reflects a synthesis of the student's growth in knowledge and expertise throughout the program. NRSG 7802 focuses on creating implementation and evaluation plans, presenting project proposals, and obtaining academic committee and IRB approval. This course may contain 30 to 120 DNP practicum hours.

Pre-requisite(s): Students must be admitted to the DNP program and have successfully completed NRSG 7801.

NRSG 7803 - DNP Project III

Credits: (1-2)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

The DNP project courses produce a tangible and deliverable academic product created from a practice immersion experience, which is reviewed and evaluated by an academic committee. The final product shows evidence of the student's competence in critical thinking by translating evidence into practice and evaluating the evidence in the practice environment aimed toward improving healthcare outcomes. This course is the third of six courses (NRSG 7801 to NRSG 7806) and reflects a

synthesis of the student's growth in knowledge and expertise throughout the program. NRSG 7803 focuses on the project plan for implementation evaluation, and data analysis. This course may contain 60 practicum hours (1 credit = 60 practicum hours).

Pre-requisite(s): Student must be admitted to the DNP program.

NRSG 7804 - DNP Project IV

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

The DNP project courses produce a tangible and deliverable academic product created from a practice immersion experience, which is reviewed and evaluated by an academic committee. The final product shows evidence of the student's competence in critical thinking by translating evidence into practice and evaluating the evidence in the practice environment aimed toward improving healthcare outcomes. This course is the fourth of six courses (NRSG 7801 to NRSG 7806) and reflects a synthesis of the student's growth in knowledge and expertise throughout the program. NRSG 7804 focuses on the implementation of the project. This course may contain 30 to 120 DNP practicum hours

NRSG 7805 - DNP Project V

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

The DNP project courses produce a tangible and deliverable academic product created from a practice immersion experience, which is reviewed and evaluated by an academic committee. The final product shows evidence of the student's competence in critical thinking by translating evidence into practice and evaluating the evidence in the practice environment aimed toward improving healthcare outcomes. This course is the fifth of six courses (NRSG 7801 to NRSG 7806) and reflects a synthesis of the student's growth in knowledge and expertise throughout the program. NRSG 7805 focuses on project results, discussion, conclusions, and recommendations. This course may contain 30 to 120 DNP practicum hours.

NRSG 7806 - DNP Project VI

Credits: (1)**Typically Taught Summer Semester:** *Full Sem***Typically Taught Fall Semester:** *Full Sem***Typically Taught Spring Semester:** *Full Sem*

The DNP project courses produce a tangible and deliverable academic product created from a practice immersion experience, which is reviewed and evaluated by an academic committee. The final product shows evidence of the student's competence in critical thinking by translating evidence into practice and evaluating the evidence in the practice environment aimed toward improving healthcare outcomes. This course is the sixth of six courses (NRS 7801 to NRS 7806) and reflects a synthesis of the student's growth in knowledge and expertise throughout the program. NRS 7806 focuses on project evaluation and dissemination. This course may contain 30 to 120 DNP practicum hours.

NRS 7900 INT - DNP Practicum**Credits: (1-2)****Typically Taught Summer Semester:** *Full Sem***Typically Taught Fall Semester:** *Full Sem***Typically Taught Spring Semester:** *Full Sem*

This practicum is for DNP nursing students to build on concepts and skills derived from DNP courses and focuses on developing advanced skills in integration and synthesis of practice and knowledge.

Pre-requisite(s): Students must be admitted to the DNP program.

May be repeated up for a maximum of 8 credit hours.

NRS 7902 - NP Clinical I**Credits: (4)****Typically Taught Fall Semester:** *Full Sem*

This is the clinical companion course to NRS 6235 and NRS 6240. The course is designed for the nurse practitioner student to deliver high quality healthcare to patients of all ages with a focus on primary care. Students apply evidenced-based practice clinical reasoning principles for assessment, diagnosis, and treatment interventions for a variety of health conditions. Students practice history taking, perform physical examination, order and analyze diagnostic tests, determine differential diagnoses, plan interventions, and prescribe medications. Students apply health promotion principles to prevent disease and manage individualized healthcare outcomes through psychomotor, affective and cognitive domains. Associated theory courses focus on adult and older adult health conditions.

NRS 7903 - NP Clinical II**Credits: (3)****Typically Taught Spring Semester:** *Full Sem*

This is the clinical companion course to NRS 6245 and NRS 6250. The course is designed for the nurse practitioner student to deliver high quality healthcare to patients of all ages with a focus on primary care. Students apply evidenced-based practice clinical reasoning principles for assessment, diagnosis, and treatment interventions for a variety of health conditions. Students practice history taking, perform physical examination, order and analyze diagnostic tests, determine differential diagnoses, plan interventions, and prescribe medications. Students apply health promotion principles to prevent disease and manage individualized healthcare outcomes through psychomotor, affective and cognitive domains. Associated theory courses focus on pediatric and female health conditions.

NRS 7904 INT - FNP Clinical Immersion**Credits: (4)****Typically Taught Summer Semester:** *Full Sem***Typically Taught Fall Semester:** *Full Sem***Typically Taught Spring Semester:** *Full Sem*

This is the final clinical immersion for nurse practitioner students. The NP student's ability to apply evidenced-based practice principles, perform acquired skills, and magnify diagnostic reasoning through psychomotor, affective and cognitive domains reevaluated. Clinical competency for a pertinent history, physical assessment, diagnostic test decisions with analysis, differential diagnoses determination, optimal plan interventions, patient management of acute and chronic illness, and health promotion are appraised. The clinical immersion may be an audition rotation for future employment.

NUCM 4103 - Radiopharmaceuticals and Dosages**Credits: (3)****Typically Taught Fall Semester:** *Full Sem*

Radiopharmacology, characterization of radiopharmaceuticals used in performing examinations and calculation of dosages.

NUCM 4203 - Scanning and Imaging Procedures I**Credits: (3)****Typically Taught Spring Semester:** *Full Sem*

Organ concentration, excretion and absorption, measurements and imaging.

NUCM 4213 - Scanning and Imaging Procedures II

Credits: (3)

Typically Taught Summer Semester: Full Sem

Organ concentration, excretion and absorption, measurements and imaging.

NUCM 4223 - Nuclear Cardiology

Credits: (3)

Typically Taught Summer Semester: Full Sem

Pathology, indications for examination and procedures in nuclear cardiology.

NUCM 4303 - Radionuclide Physics & Instrumentation

Credits: (3)

Typically Taught Spring Semester: Full Sem

Production and properties of radionuclides, decay schemes, radiation measurements and special characteristics of radiopharmaceuticals.

NUCM 4333 SI - Quality Assurance

Credits: (3)

Typically Taught Summer Semester: Full Sem

Nuclear Medicine departmental policies and procedures.

NUCM 4861 INT - Clinical Education

Credits: (3)

Typically Taught Fall Semester: Full Sem

A minimum of 24 hours per week in an active Nuclear Medicine department.

NUCM 4862 INT - Clinical Education

Credits: (3)

Typically Taught Spring Semester: Full Sem

A minimum of 24 hours per week in an active Nuclear Medicine department.

NUCM 4863 INT - Clinical Education

Credits: (3)

Typically Taught Summer Semester: Full Sem

A minimum of 24 hours per week in an active Nuclear Medicine department.

NUCM 4912 - Comprehensive Review

Credits: (2)

Typically Taught Summer Semester: Full Sem

Review of learned material.

NUCM 4991 - Seminar

Credits: (1)

Typically Taught Summer Semester: Full Sem

Typically Taught Fall Semester: Full Sem

Typically Taught Spring Semester: Full Sem

New technology, procedures and equipment.

NUTR 1020 LS SUS - Science and Application of Human Nutrition

Credits: (3)

Typically Taught Summer Semester: Full Sem, 1st Blk, 2nd Blk Hybrid, Online

Typically Taught Fall Semester: Full Sem, 1st Blk, 2nd Blk Hybrid, Online

Typically Taught Spring Semester: Full Sem, 1st Blk, 2nd Blk Hybrid, Online

Course Fee: \$15.00

Human nutrition is the platform to study the nature and integration of science across disciplines and in society through applied problem solving and data analysis. Nutritional balance and good health are explored in context of the levels of organization, metabolism and homeostasis, genetics and evolution, and ecological interactions. Note: *This course is taught Web enhanced.*

NUTR 1120 - Nutrition for the Athlete

Credits: (2)

Typically Taught Fall Semester: Full Sem

Typically Taught Spring Semester: Full Sem

The course will address nutrition, eating behavior, and lifestyle issues of the athlete in the typical collegiate athletic environment. Topics in nutrition for the performance athlete, meal planning for the collegiate athlete, menu evaluation, personal diet analysis, and common fad diets aimed at the performance athlete are included.

NUTR 1240 SUS - Nutrition and Sustainable Cooking

Credits: (3)

Typically Taught Summer Semester: 1st Blk, 2nd Blk

Online

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Sustainable ways to acquire, prepare and consume food to support a healthier individual, population, and environment are explored. Food science principles will be emphasized in the laboratory experience.

NUTR 2020 - Nutrition in the Life Cycle

Credits: (3)

Typically Taught Fall Semester: *Full Sem, Online*

Typically Taught Spring Semester: *Full Sem, Online*

This course examines the nutritional needs of humans along with food and nutrition education and programs through the life cycle stages from pre-conception through older adulthood. Students assess normal nutrition and various conditions and interventions across the lifespan through applied case studies.

Pre-requisite(s): NUTR 1020.

NUTR 2220 - Prenatal and Infant Nutrition

Credits: (2)

Typically Taught Summer Semester: *1st Blk or 2nd Blk Online*

Typically Taught Fall Semester: *1st Blk, 2nd Blk Hybrid, or Online*

Typically Taught Spring Semester: *1st Blk, 2nd Blk Hybrid, or Online*

This course focuses on nutrition and diet as they apply to birth outcome, the maintenance of maternal health, and the growth of the infant. Breastfeeding and community programs will be discussed in support of maternal and infant health.

Pre-requisite(s): NUTR 1020 or HLTH 1020.

NUTR 2320 - Food Values, Diet Design and Health

Credits: (3)

Typically Taught Summer Semester: *1st Blk or 2nd Blk Online*

Typically Taught Fall Semester: *Full Sem, Online, 1st Blk, 2nd Blk Hybrid, or Online*

Typically Taught Spring Semester: *Full Sem, Online, 1st Blk, 2nd Blk Hybrid, or Online*

Course Fee: \$10.00

The relationships between dietary components and the development of chronic diseases provides the foundation for designing diets that support life-long "good health". Topics in nutrigenomics, food allergy and food technology

are introduced.

Pre-requisite(s): NUTR 1020 or HLTH 1020.

This course is taught Web enhanced.

NUTR 2420 - Childhood and Adolescent Nutrition

Credits: (2)

Typically Taught Summer Semester: *1st Blk or 2nd Blk Online*

Typically Taught Fall Semester: *1st Blk, 2nd Blk Hybrid, or Online*

Typically Taught Spring Semester: *1st Blk, 2nd Blk Hybrid, or Online*

The effects of nutrition and diet on child growth, health and behavior are explored from toddler through adolescence.

The processes of growth and puberty provide the foundations for understanding nutritional support. Common nutritionally-related problems such as obesity, anemia, and eating disorders are also addressed.

Pre-requisite(s): NUTR 1020 or HLTH 1020.

NUTR 3020 - Sports Nutrition

Credits: (3)

Typically Taught Fall Semester: *Full Sem, 1st Blk, 2nd Blk, Hybrid, Online*

Typically Taught Spring Semester: *Full Sem, 1st Blk, 2nd Blk, Hybrid, Online*

The nutritional support necessary to achieve optimum athletic performance will be discussed in the context of diet and metabolism. In addition, the use of ergogenic aids will be addressed with reference to athletic performance.

Pre-requisite(s): NUTR 1020 or HLTH 1020 and NUTR 2320.

May be repeated up to two times.

NUTR 3040 - Nutrition Assessment

Credits: (3)

Typically Taught Fall Semester: *Full Sem, Online*

Typically Taught Spring Semester: *Full Sem, Online*

This course covers foundational assessment methods used to determine population and individual nutritional status. Students will learn the scientific foundation on nutrition assessment and how to apply this knowledge in medical, community and research settings.

Pre-requisite(s): NUTR 1020 and NUTR 2320.

NUTR 3070 - Advanced Food Science

Credits: (3)

Typically Taught Fall Semester: *Full Sem, Full Sem Online*

Course Fee: \$45.00

The advanced study of the physical, biological, and chemical make-up of food. Effects of food preparation, storage and processing on nutrient content, taste and shelf-life.

Pre-requisite(s): (CHEM 1110 or CHEM 1210) and NUTR 1020.

NUTR 3220 - Foundations in Diet Therapy

Credits: (3)

Typically Taught Summer Semester: *1st Blk Online, 2nd Blk Online*

Typically Taught Fall Semester: *Full Sem, Full Sem Online*

Typically Taught Spring Semester: *Full Sem, Full Sem Online*

The nutrition care process, practice and methods of nutrition support are studied for the management of nutritionally-related medical conditions by body system in which diet is crucial for control of the disease or condition.

Pre-requisite(s): (NUTR 1020 or HLTH 1020) and NUTR 2320.

Suggested Requisite(s): ZOOL 2200 or HTHS 1110/HTHS 1111 are recommended.

NUTR 3320 - Health and Nutrition in the Older Adult

Credits: (3)

Typically Taught Summer Semester: *2nd Blk or 2nd Blk Online*

Typically Taught Fall Semester: *Online*

Typically Taught Spring Semester: *Online*

The developmental process of late adulthood with focus on the physiological age-related changes provides the foundation for understanding physical, mental, and social health and well-being in the older adult. Nutrition and exercise assessments and prescriptions, clinical services, community and social support services, complementary and alternative medicine, and other topics are explored in the context of promoting healthy aging.

Pre-requisite(s): NUTR 1020 or HLTH 1020.

NUTR 3420 - Multicultural Health & Nutrition

Credits: (3)

Typically Taught Summer Semester: *3rd Blk or 2nd Blk Online*

Typically Taught Fall Semester: *Full Sem Online*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$5.00

The application and understanding of social, religious, economic and aesthetic qualities of foods provides the knowledge for the explorations of the food patterns of various cultures. The understanding of world food problems as they pertain to the health will also be discussed.

Pre-requisite(s): NUTR 1020 or HLTH 1020 and NUTR 2320.

This course is taught Web enhanced.

NUTR 4320 - Current Issues in Nutrition

Credits: (2)

Typically Taught Fall Semester: *Full Sem, Online, 1st Blk, 2nd Blk Hybrid, or Online*

Typically Taught Spring Semester: *Full Sem, Online, 1st Blk, 2nd Blk Hybrid, or Online*

Technology-aided literature review of the nutritional and medical sciences provides the information for presentation to peers in both written and oral forms.

Pre-requisite(s): NUTR 1020 or HLTH 1020 and NUTR 2320 or consent of instructor.

NUTR 4420 - Nutrition and Fitness

Credits: (3)

Typically Taught Fall Semester: *1st Blk or 2nd Blk Hybrid*

Typically Taught Spring Semester: *1st Blk or 2nd Blk Online*

Principles of sports nutrition and fitness are applied to achieve a healthy body weight. Consideration of exercise and dietary practices along with fitness evaluation, dietary analysis and body composition testing are utilized to create a plan to improve physiological health.

Pre-requisite(s): NUTR 1020 or HLTH 1020 and NUTR 2320.

This course is taught Web enhanced.

NUTR 4440 - Advanced Human Nutrition

Credits: (3)

Typically Taught Fall Semester: *Full Sem, Online*

Typically Taught Spring Semester: *Full Sem, Online*

The advanced study of human nutrition with focus on the metabolism of vitamins, minerals, and energy-producing

nutrients. The structure, properties, and functions of the nutrients and their regulatory roles in metabolism, body composition and weight, fluid balance, health, and disease states are covered with clinical examples and across the lifespan.

Pre-requisite(s): NUTR 1020 and NUTR 2320.

Co-Requisite(s): CHEM 3070.

NUTR 4520 - Directed Undergraduate Nutrition Research

Credits: (1-4)

Typically Taught Summer Semester: *Full Sem Online*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course will provide undergraduate students an opportunity to engage in research processes and participate in ongoing nutrition research projects.

Pre-requisite(s): NUTR 4320 or NUTR 1020 or HLTH 1020 and Permission of Instructor.

May be repeated 3 times up to 6 credit hours.

NUTR 4830 - Directed Readings

Credits: (1-3)

Typically Taught Summer Semester: *Full Sem Online, 1st Blk Online or 2nd Blk Online*

Typically Taught Fall Semester: *Full Sem Online, 1st Blk Online or 2nd Blk Online*

Typically Taught Spring Semester: *Full Sem Online, 1st Blk Online or 2nd Blk Online*

Independent and directed readings or secondary research on advanced special topics under the direction of a faculty mentor.

Pre-requisite(s): NUTR 2320 and consent of faculty supervisor prior to registration.

May be repeated for up to 3 credit hours.

NUTR 4860 INT - Field Experience

Credits: (1-2)

Typically Taught Summer Semester: *Full Sem Online*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Work experience, which applies prior academic learning in a supervised setting.

Pre-requisite(s): NUTR 1240 and consent of faculty supervisor prior to registration.

May be repeated up to 2 credit hours.

NUTR 4990 - Senior Seminar

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem Online*

This is a capstone course for Nutrition seniors only. The experiences in the Nutrition major will be summarized and students will be prepared for graduate study or future employment.

Pre-requisite(s): NUTR 3420.

NUTR 6320 - Current Issues in Nutrition

Credits: (2)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Technology-aided literature review of the nutritional and medical sciences provides the information for presentation to peers in both written and oral forms.

Pre-requisite(s): NUTR 1020 or HLTH 1020 and NUTR 2320 or consent of instructor.

NUTR 6420 - Nutrition and Fitness

Credits: (3)

Typically Taught Fall Semester: *1st Blk or 2nd Blk Hybrid*

Typically Taught Spring Semester: *1st Blk or 2nd Blk Online*

Principles of sports nutrition and fitness are applied to achieve a healthy body weight. Consideration of exercise and dietary practices along with fitness evaluation, dietary analysis and body composition testing are utilized to create a plan to improve physiological health.

Pre-requisite(s): Consent of instructor.

This course is taught Web enhanced.

NUTR 6520 - Directed Graduate Nutrition Research

Credits: (1-4)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course will provide graduate students an opportunity to engage in research processes and participate in ongoing nutrition research projects.

Pre-requisite(s): NUTR 4320 or NUTR 1020 or HLTH 1020 and Permission of Instructor. Graduate students taking this class as 6520 must have completed a statistical methods course.

May be repeated 3 times up to 4 credit hours.

OCRE 2300 - Wilderness First Responder (WFR)

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Wilderness First Responder (WFR) is an industry-standard, internationally recognized 72-80 hour (per provider) certification course focused on emergency response for remote settings in the backcountry. The course is designed for professionals who intend to work in a position of leadership in an outdoor setting, or for individuals who want a high level of wilderness medical training for extended personal backcountry trips or expeditions. Participants will learn systems for patient assessment, extended care (including CPR), and rescue/evacuation in remote settings. Emphasis will be placed on the acquisition and application of knowledge and skills necessary for responsible practice in the field of outdoor recreation. Upon successful completion of the course (including a written and practical exam), students will earn an internationally recognized professional certification.

OCRE 2500 - Introduction to Outdoor Pursuits

Credits: (4)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Introduction to Outdoor Pursuits is focused on engaging and introducing students to discover, explore, and practice a variety of outdoor adventure and recreation activities. This includes, but is not limited to, group development, outdoor living, backpacking, flat- and whitewater paddling, mountain biking, rock climbing, caving, and winter-based pursuits. Emphasis is placed on activity-specific technical skill development, equipment management, risk management, environmental ethics, and basic instructional and facilitation strategies. Field Sessions are required.

OCRE 2550 - Leadership and Safety Management for Outdoor Pursuits

Credits: (4)

Typically Taught Summer Semester: *1st Blk*

Course Fee: \$225.00

This course introduces students to many of the skills needed to be a safe and effective outdoor leader. The course is intended for individuals wishing to pursue employment as outdoor leaders in various outdoor adventure activities. Topics will include trip preparation, planning, logistics, planning for and managing risks in outdoor pursuits, group dynamics, leadership styles,

emergency response, and environmental considerations.

The majority of class time will be spent in the field as part of a multi-day expedition.

Pre-requisite(s): OCRE 2500.

Suggested Requisite(s): OCRE 2300, GEOG 1002.

OCRE 2610 - Introduction to Outdoor Living Skills I

Credits: (2)

Typically Taught Fall Semester: *Full Sem*

This course will provide students with an overview of backcountry skills. Students will learn about backcountry travel and camping skills, equipment use, and hazard identification. One lecture and 3 hour field trip are required each week.

OCRE 2860 - Outdoor Leadership Practicum

Credits: (4)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

The purpose of *Outdoor Leadership Practicum* is to provide students with the opportunity to apply the requisite knowledge and skills to organize and lead outdoor activities. Under the supervision of OCRE faculty, students will gain experience designing and leading outdoor activities in a volunteer or work setting for a minimum of 40 supervised hours. Emphasis will be placed on client/participant assessment, curriculum design and delivery, safety, and environmental impact. Approval for practicum experiences is coordinated and assigned by OCRE faculty.

Pre-requisite(s): OCRE 2300, 2500, 2610, 4 credits of REC courses or permission of the instructor

This course may be repeated for up to 4 credit hours.

OCRE 2890 INT - Cooperative Work Experience

Credits: (1-9)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Provides academic credit for on-the-job experience. Grade and amount of credit will be determined by the department. Open to all students in Recreation who meet the minimum Cooperative Work Experience requirements of the department.

May be repeated 8 times up to 9 credit hours.

OCRE 3050 - Recreation and Leisure in Society

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Content, nature, extent and significance of recreation and leisure; their role in our lives, relevant service delivery agencies/organizations/businesses, leadership functions and styles, and an introduction to team-building/adventure programming activities.

OCRE 3100 - Recreation Leadership and Group Facilitation

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

Customer/client-based leisure services, role delineation, settings, theories of leadership and group dynamics. Skills: apply various experiential techniques for different populations that recreational professionals may encounter.

OCRE 3230 - Wilderness Nutrition & Backcountry Cooking

Credits: (4)

Typically Taught Spring Semester: *1st Blk*

For outdoor professionals and those who spend extensive time in the outdoors, wilderness nutrition and backcountry cooking are critical components to providing safe, healthy, and enjoyable outdoor recreation experiences. Concepts of nutritional balance, energy needs, menu planning, and cooking are explored and applied within the context of a backcountry setting. Multiple field experiences are required.

Pre-requisite(s): HLTH 1030 or NUTR 1020.

OCRE 3300 - Inclusive and Adaptive Recreation

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Students will explore and apply concepts of leisure and recreation experiences and the related social impacts across a wide variety of populations including: ethnicity, race, ability, gender, age, religion and nationality.

OCRE 3320 - Adventure Programming

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

In this course, students will gain a theoretical and applied understanding of adventure programming within the field of Community and Outdoor Recreation. Students will have the opportunity to explore program planning and preparation, and activity implementation through individual and collaborative learning experiences. Upon completion of this course, students will have a Program Plan that reflects the theoretical and logistical elements that comprise programs in Community and Outdoor Recreation. This course also requires an adventure program implementation field experience.

Pre-requisite(s): OCRE 3100 (formerly REC 3810).

OCRE 3400 - Outdoor Equipment Production and Retailing

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Students will learn about key outdoor gear manufacturers, materials used in equipment, and practices retail operation use in the sales of outdoor apparel and equipment. Students will apply course information to analyze, critique, and create an outdoor gear concept. In class exercises, site visits, field trips, and assignments will challenge students to engage in critical thinking and complex quantitative and communication skills.

Pre-requisite(s): OCRE 2500 or permission from the instructor.

OCRE 3450 - Adventure Travel and Sustainable Tourism

Credits: (3)

Typically Taught Summer Semester: *Full Sem, 1st Blk, 2nd Blk*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course will provide an overview of history, development, organization, impacts and trends within adventure travel and tourism industries. Students will learn about development and evolution of adventure travel and sustainable tourism; socio-cultural, economic, and environmental dimensions within adventure travel and sustainable tourism; positive and negative impacts of tourism; and principles and practices conducive to sustainable tourism. Students will gain experience in critically analyzing and evaluating adventure travel and sustainable tourism industries.

OCRE 3500 - Community Recreation and Park Planning

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course will focus on principles and methods of recreation and park design and planning. The student should expect to learn how to: assess community recreation facilities, parks, open spaces, recreation trends, industry standards, create planning goals and objectives, and make planning recommendations. Classification of recreation areas according to primary function, location and clientele will also be explored.

Pre-requisite(s): OCRE 3320.

OCRE 3520 - Risk Management and Legal Issues in Recreation Services

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Risk Management and Legal Issues is focused on the examination of general legal concepts, federal and state legislation, and legal liabilities as these relate to and impact programming with the fields of community and outdoor recreation. Emphasis is placed on the process of identifying and managing potential risks in recreation, education, developmental, and social service settings, as well as organizational structures. The course content is interdisciplinary in nature, and is grounded in the tenets of experiential education.

Pre-requisite(s): OCRE 3320 or permission from the instructor.

OCRE 3600 - Administration and Management of Outdoor and Community Recreations Services

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

This course provides an examination of administration and management skills tied to outdoor recreation agencies/businesses/organizations. Emphasis will be placed on site visits, services delivery, environmental impacts, legal issues, human resources and administration and management skills. Outdoor activities (backpacking/hiking/camping/ropes course leadership, and use of technology in leisure research and programming) will be explored in the context of program management and administration. Field trips are required.

Pre-requisite/Co-requisite: OCRE 3320.

OCRE 3700 - Recreation and Sports Facilities and Events Management

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

Studies the principles, guidelines, and fundamental practices involved in indoor and outdoor facilities planning, construction, use and management, as well as publicity and management of events for recreation and sports. Integrates tenets of the law and risk management as they relate to recreational and athletic facilities and events.

Pre-requisite(s): ESS 2200 or OCRE 3050.

OCRE 3900 - Commercial Outdoor Recreation

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course will cover outdoor and adventure recreation business development. Particular emphasis will be on analyzing the types of commercial and private recreation enterprises, trends and directions, regulations, financial requirements and procedures for planning and organizing commercial recreation services.

Pre-requisite(s): OCRE 3320.

OCRE 4000 - Recreation Programming for Youth Development

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course will review and apply theories of youth development to recreation-based settings. Topics addressed include: youth development theories, political, social, and cultural issues relevant to youth development, types of youth serving organizations, youth professional roles and responsibilities; quality youth programming, logic modeling, program evaluation, and theory-driven program design.

Pre-requisite(s): OCRE 3100 or permission from the instructor.

OCRE 4020 - Nature Interpretation

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Nature Interpretation is focused on providing the student

with an in-depth investigation of the fundamental principles and concepts of nature interpretation. This includes, but is not limited to historical development of the field, principles of exhibit design, interpretative program designs and techniques, common field techniques, and current trends used by outdoor leaders. In addition, an overview of employment opportunities in the field will be explored. This course emphasizes experimental learning theories and their application to natural history interpretation and environmental education program design. The course content is interdisciplinary in nature, and is grounded in the tenets of experiential education and learning (per the work of John Dewey).

Pre-requisite(s): OCRE 3050 and OCRE 3100 (formerly 3810).

OCRE 4300 - Trends and Ethical Issues in Recreation Services

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

Current Trends and Ethical Issues in Recreation examines major ethical theories and their relation to the development of personal and professional ethics in practitioners working in the field of community and outdoor recreation. The differences between ethics and morality will be analyzed, and selected codes of ethics will be presented for review and discussion. The application of ethical decision making and problem solving in recreation settings will be explored.

Pre-requisite(s): OCRE 3600.

OCRE 4500 - Grant and Proposal Writing for Recreation Professionals

Credits: (3)

Typically Taught Summer Semester: *1st Blk; 2nd Blk*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Grant and Proposal Writing for Recreation Professionals is focused on providing the student with an in-depth investigation of grant writing and management. The course will provide students with an opportunity for primary and authentic experience in researching and writing grants. Students will explore the process of identifying prospective funders, developing relationships with funders, comprehending the basics of writing grants, submitting proposals, working in collaborative partnerships, and preparing for follow up and evaluation. Students will apply course learning to write and prepare actual grant proposals. The course content is interdisciplinary in nature, and is grounded in the tenets of experiential education and learning.

Pre-requisite(s): OCRE 3050 or permission from the instructor.

OCRE 4550 - Outdoor Education Philosophies & Principles

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Provides basic concepts of outdoor education, and direct, firsthand experience with learning resources beyond the classroom.

Pre-requisite(s): OCRE 2500.

OCRE 4800 - Individual Projects

Credits: (1-3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A comprehensive study of a significant problem in the field of recreation. Hours to be arranged. For seniors only.

May be repeated 2 times up to 3 credit hours.

OCRE 4890 INT - Cooperative Work Experience

Credits: (1-6)

Typically Taught Summer Semester: *Full Sem*

A continuation of OCRE 2890.

May be repeated 5 times up to 6 credit hours.

OCRE 4930 - Outdoor Education Workshop

Credits: (2)

Typically Taught Summer Semester: *Full Sem*

A broad inter-disciplinary approach to the methodology of outdoor education teaching techniques; experiential learning-course taught almost totally outdoors.

OCRE 6930 - Outdoor Education Workshop

Credits: (2)

Typically Taught Fall Semester: *Full Sem*

A broad interdisciplinary approach to the methodology of outdoor education teaching techniques; experiential learning-course taught almost totally outdoors.

PAR 1000 INT - Emergency Medical Technician

Credits: (4)

Typically Taught Summer Semester: *1st Blk*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course teaches the student to recognize and instruct the response to emergency calls to provide efficient and immediate care to the critically ill and injured, and deliver transport needs for the patient to the appropriate medical facility. The student will be able to determine the nature and extent of illness or injury and establish priority for required emergency care. Theory will include the emergency medical care to the adult, infant and child, medical, and trauma patients. This course meets all of the requirements of the National EMS Education Standards. Successful evaluation of professionalism, interpersonal relationships, skills, and knowledge must be completed for recommendation of certification. (Must be taken with PAR 1001.)

May be repeated up to 99 times.

PAR 1001 - Emergency Medical Technician Lab

Credits: (2)

Typically Taught Summer Semester: *1st Blk*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem, 2nd Blk*

At the completion of this course the student will be able to demonstrate competency managing emergencies, utilizing all Basic Support equipment and skills in accordance with all behavioral objectives in the current National EMS Education Standards. In addition to the lab, this course requires that the student have patient interactions in a clinical setting. Based on assessment finding, renders emergency medical care to the adult, infant and child, medical, and trauma patients. Successful evaluation of professionalism, interpersonal relationships, skills, and knowledge must be completed for recommendation of certification. (Must be taken with PAR 1000).

PAR 1005 INT - EMT-Basic Field Experience - I

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Minimum of 120 hours of supervised EMT-Basic patient care experience provided through assigned day shifts on the ambulance and/or pre-hospital setting. A preceptor evaluates basic life support knowledge, skills and affective

abilities.

Pre-requisite(s): PAR 1000/PAR 1001 and HTHS 1101, HTHS 1110/HTHS 1111 and 70% minimum on EMT-B assessment exam. Department permission required.

PAR 1006 INT - EMT-Basic Field Experience - II

Credits: (3)

Minimum of 120 additional hours of continued supervised EMT-Basic patient care experience provided through assigned shifts on the ambulance and/or pre-hospital setting. A preceptor evaluates basic life support knowledge, skills and affective abilities.

Pre-requisite(s): PAR 1005, ENGL 1010, and MATH 0990 or MATH 1010.

Note: This course is not currently being offered.

PAR 1010 - Emergency Medical Technician - Intermediate Introduction

Credits: (2)

Introduction of Intermediate EMT concepts of basic and advanced life support utilizing cognitive knowledge objects using the State Department of Health and current National Standard EMT-I Curriculum. Application of pre-hospital care will be demonstrated through written assignments and exams. Course may be challenged for credit. Course is required, or equivalent work experience, before admission into the paramedic program.

Pre-requisite(s): Must have Basic EMT certification.

May be repeated up to 99 times.

Note: PAR 1010 combined with PAR 1011 will provide a certificate of 60 hours of continuing medical education hours toward recertification requirements for the Utah State Department of Health. This course is not currently being offered.

PAR 1011 - Emergency Medical Technician - Intermediate Introduction Lab

Credits: (2)

This course requires clinical hours with an emergency facility and ambulance as scheduled. Application of basic EMT skills involving pre-hospital care with staged and real emergencies and demonstration of psychomotor skills through laboratory, ambulance riding time, and clinical assignments. Clinical activities are adapted to previous documented work experiences. This course may be challenged for credit. This course is required, or equivalent

work experience, before admission into the paramedic program.

Pre-requisite(s): Must have Basic EMT certification.

Note: PAR 1010 combined with PAR 1011 will provide a certificate of 60 hours of continuing medical education hours toward recertification requirements for the Utah State Department of Health. This course is not currently being offered.

PAR 1020 - Emergency Medical Technician - Intermediate

Credits: (2)

Curriculum includes but is not limited to the US Department of Transportation National Standard Curriculum for the EMT-Intermediate. This course consists of the cognitive knowledge and theory components of the USDOT Curriculum and builds upon the EMT Basic knowledge. State certification eligibility of EMT Intermediate upon successful completion of both PAR 1020 and PAR 1021. Students will demonstrate mastery of cognitive knowledge skills through written assignments and examinations. Course format consists of didactic lecture. Paramedic Program application, faculty review, and committee selection are required to be admitted to this course.

Pre-requisite(s): PAR 1011 or equivalent.

May be repeated up to 99 times.

Note: This course is not currently being offered.

PAR 1021 - Emergency Medical Technician - Intermediate Lab

Credits: (2)

Curriculum includes but is not limited to the U.S. Department of Transportation National Standard Curriculum for the EMT-Intermediate. Builds upon the EMT Basic psychomotor skills. State certification eligibility of EMT I upon successful completion of both PAR 1020 and PAR 1021. This course consists of clinical instruction and supervised field experiences in an advanced life support rescue unit which functions under a medical command authority. Students will demonstrate their mastery of the educational psychomotor skills through practical exams and staged and real emergencies. Must have department approval by application process involving an admissions committee final selection.

Pre-requisite(s): PAR 1020 or equivalent.

Note: This course is not currently being offered.

PAR 1030 - Pediatric Advanced Life Support (PALS)

Credits: (1)

Subject and case based approach to American Heart Association protocols and skills required for successful resuscitation of child and infant. The cognitive and psychomotor skills needed to resuscitate and stabilize infants and children in respiratory failure, shock, or cardiopulmonary arrest.

Pre-requisite(s): Basic Life Support course completion card.

May be repeated up to 99 times.

Note: This course is not currently being offered.

PAR 1031 - Advanced Cardiac Life Support (ACLS)

Credits: (1)

Subject and case based approach to American Heart Association protocols and skills required for successful resuscitation of the adult. This course is designed to help all participants succeed in acquiring the cognitive knowledge psychomotor skills needed by medical professionals in adult resuscitation attempts.

May be repeated up to 99 times.

Note: This course is not currently being offered.

PAR 2000 - Introduction to Paramedic Practice

Credits: (4)

Typically Taught Summer Semester: *1st Blk*

Typically Taught Fall Semester: *1st Blk*

Typically Taught Spring Semester: *1st Blk*

Introduces the paramedic student to basic pathophysiology, pharmacology, research methods, airway management, plus patient interaction and assessment skills. Includes professional and wellness considerations for the individual practitioner and patient. Basic knowledge of medical incident command, rescue awareness, hazardous materials incidents, and crime scene awareness is included. Meets all national EMS Education Standards. Prospective students must be EMT certified, accomplish Dumke College of Health Professions advising, complete the department application process, and then be accepted to the program prior to registration.

PAR 2020 - Traumatic Emergencies

Credits: (3)

Typically Taught Summer Semester: *1st Blk*

Typically Taught Fall Semester: *1st Blk*

Typically Taught Spring Semester: *1st Blk*

Prepares the student to recognize, assess and provide

paramedic interventions related to bodily traumatic injuries. Current PHTLS/BTLS/ABLS principles are utilized.
Pre-requisite(s): PAR 2000 and PAR 3010.

PAR 2030 - Special Populations in Paramedic Practice

Credits: (3)

Typically Taught Summer Semester: *1st Blk*

Typically Taught Fall Semester: *1st Blk*

Typically Taught Spring Semester: *1st Blk*

Prepares the student to recognize, assess and provide paramedic interventions related to the special challenges posed by neonate, pediatric, obstetric, geriatrics, and psychiatric patients. Acute interventions for the chronically ill and home care patient are discussed. Current AHA, PEPP, and national EMS Education Standards are utilized.

Pre-requisite(s): PAR 2000 and PAR 3010.

PAR 2040 - Paramedic Skills and Simulation Lab

Credits: (4)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Skills application using the theory of paramedic practice. This course will complete the National Registry Paramedic Psychomotor Competency Portfolio. Students must pass all skills before advancing into clinical and field internship rotations.

Pre-requisite(s): PAR 2000.
(\$225 lab fee)

PAR 2100 - Capstone Course in Paramedic Practice

Credits: (4)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Pathophysiology and advanced concepts applied to recognition of Advanced Life Support patient problems and treatment modalities. Student research and presentation projects are designed to meet professional goals and experiences. All paramedic terminal competencies will be re-verified prior to a recommendation to certify. Student must pass the physician oral examination to be recommended for certification testing.

Pre-requisite(s): PAR 2000, PAR 3010, PAR 2020, PAR 2030, PAR 2040.

PAR 2110 INT - Paramedic Clinical Experience

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Clinical rotations in various medical settings provide the student with the opportunity to perform skills and apply knowledge of paramedic practice. Includes, but is not limited to, areas in the operating room, emergency department, labor/delivery, psychiatric, pediatric, burn and cardiac cath units.

Pre-requisite(s): PAR 2000, PAR 3010, PAR 2020, PAR 2030, PAR 2040.

PAR 2120 INT - Paramedic Field Internship

Credits: (9)

Typically Taught Summer Semester: *2nd Blk*

Typically Taught Fall Semester: *2nd Blk*

Typically Taught Spring Semester: *2nd Blk*

Rotations with various paramedic Fire/EMS agencies providing rescue vehicle response to advance the skills and performance of paramedic practice. Successful evaluation of professionalism, interpersonal relationships and problem solving under stress, must be completed for recommendation to test for certification/licensure. Student will nominally complete 480 hours of ride time and successfully complete 50 ALS Team Leads.

Pre-requisite(s): PAR 2000, PAR 2020, PAR 2030, PAR 2040, PAR 2110, PAR 3010.

PAR 3010 - Cardiac and Medical Emergencies

Credits: (6)

Typically Taught Summer Semester: *2nd Blk*

Typically Taught Fall Semester: *2nd Blk*

Typically Taught Spring Semester: *2nd Blk*

Integrates assessment findings with principles of epidemiology and pathophysiology to formulate a field impression and implement a comprehensive treatment and/or disposition plan for a patient with a cardiac or medical complaint. This course prepares the paramedic student to recognize, assess, develop and implement paramedic interventions related to cardiac and other medical emergencies. Topical areas include the cardiac, circulatory, digestive, endocrine, HEENT, hematologic, respiratory, and urinary systems. Concepts of infectious diseases, toxicology, anaphylaxis, environmental exposure,

and shock will also be presented. Current AHA Guidelines and the 2010 National EMS Standards will be fully utilized.

Pre-requisite(s): PAR 2000.

May be repeated once for credit.

PAR 3110 - Critical Care Transport Course

Credits: (6)

Typically Taught Summer Semester: *1st Blk*

This course will prepare experienced paramedics and registered nurses to become part of a highly functioning critical care transport team, often transporting high risk patients. Topics covered include; 1) History and role of critical care transport; 2) General principles of critical care transport, 3) Patient care principles 4) Trauma emergencies; 5) Medical emergencies; 6) Environmental emergencies 7) Special populations, and 8) Medical, legal and patient care issues in critical care transport. While the course is primarily oriented to ground transportation, the content presented will allow a student take the National Flight Nurse/Paramedic exam.

Pre-requisite(s): Paramedic or registered nurse (2-3 years experience nominal) or department approval.

May be repeated up to two times.

PAR 3120 - Tactical Emergency Medicine

Credits: (3)

This rigorous course provides the principles of tactical medicine. Topics include instruction in the tenets of tactical emergency medicine, particularly in providing acute care in tactical combat situations and the medical operations support of tactical teams. This course is designed to provide the EMS provider with a variety of skills necessary to support a tactical law enforcement team.

Pre-requisite(s): EMT-Basic certification

May be repeated up to two times.

Note: This course is not currently being offered.

PAR 3130 - Mobile Integrated Healthcare

Credits: (2)

Typically Taught Spring Semester: *1st Blk, Online*

Mobile Integrated Healthcare (MIH) is the provision of healthcare using patient-centered, mobile resources in the out-of-hospital environment. This course is intended to provide the Emergency Healthcare Services student the tools needed to perform an organizational readiness assessment leading to the development of a community MIH program. The history of MIH, potential stakeholders, types of MIH programs along with data collection, QA/QI,

and reimbursement will be explored. As the course capstone, each student will submit a MIH implementation plan that could be utilized in their current EMS response area. (This course does not have a clinical component nor leads to any potential state licensure.)

Pre-requisite(s): Allied Health or Nursing background suggested or departmental approval.

PAR 4110 - Emergency Medical Services Management Topics

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

The principles of management and process that contribute to the effectiveness of day-to-day operations within an EMS organization. Topics include human resource management, communications systems, deployment strategies, and risk management. Additional topics include an emphasis on demand analysis, staffing, medical direction, reimbursement, capital investment, and cost control.

May be repeated up to two times.

PAR 4120 - Emergency Medical Service Teaching Topics

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Using the USDOT/NHTSA National Guidelines for Educating EMS Instructors, this course will prepare emergency medical service instructors for classroom and skill lab teaching. Topics discussed include; 1) instructor roles and responsibilities; 2) the student; 3) foundations of education; 4) delivering the message; 5) evaluation and 6) course administration. Students will demonstrate EMS teaching in both a class room and skill lab environment.

Pre-requisite(s): EMT-Basic certification.

May be repeated up to two times.

PAR 4130 - Capstone Seminar in Emergency Medicine Research

Credits: (3)

Typically Taught Spring Semester: *Full Sem, Online*

This course is designed to offer students the basic principles and methods of empirical inquiry in emergency healthcare. The course will provide an understanding of emergency medicine research through serious exploration of its language, ethics, and methods. The course examines the processes of quantitative, qualitative, and mixed methods approaches to experimental and observed analysis. Students will develop the skills to begin to

critically review literature relevant to emergency medicine research and determine why evidence-based practices are important for the development and progression of the emergency healthcare discipline.

Pre-requisite(s): Must be enrolled in Bachelor of Science in Emergency Healthcare Services or by departmental approval.

PAR 4850 - Study Abroad

Credits: (1-6)

Variable Title

The purpose of this course is to provide opportunities for students in health professions to experience a study abroad program that is designed to explore healthcare, culture, and clinical experience.

May be repeated six times for a maximum of six credit hours.

Note: This course is not currently being offered.

PDD 1010 - Introduction to Engineering & Technical Design (Solidworks)

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

An introductory course to explore engineering and technical design solutions using critical thinking in Science, Technology, Engineering and Mathematics (STEM). Learning modules include; The Engineering Design Process & Professions, Sketching & Documentation, Design Measuring, Introduction to CAD & Geometric Constraints, Design Visualization, Orthographic Projection & Multi-View Drawings, Fasteners, Assembly Drawings, Dimensioning, Tolerancing, Final Team Design Projects, and Final Review & Assessment.

Pre-requisite(s): MATH 1010 or placement.

PDD 1020 - Introduction to 2D CAD Software

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

An introductory course to explore engineering and technical design solutions using critical thinking in Science, Technology, Engineering and Mathematics. Topics include Engineering Design Processes & Professions, Sketching and Documentation, Design Measuring, Introduction to 2 D CAD Software, Design Visualization, Orthographic Projection and Multi-View Drawings, Fasteners, Assembly Drawings, Dimensioning, and Tolerancing.

PDD 1160 - Geometric Dimensioning & Tolerancing Using 3D CAD

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

The use of CAD to create industrial level production working drawings. Includes the latest ASME Y14.5 standards for Geometric Dimensioning & Tolerancing. Topics of discussion will include: dimensions, fits, tolerances, surface finishes, symbols for welding, piping, machined elements/processes and sheet metal flat patterns.

Pre-requisite(s): PDD 1010.

PDD 2460 - Product Design Fundamentals Using 3D CAD

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Product Design is the creative process of applying scientific and mathematical principles, experience, and judgment to the development of the solution of a technical product or system to meet a specific need. Turning ideas into design will incorporate problem identification, market research and brainstorming possible solutions, develop detailed part and assembly drawings, implementation, and evaluation. Sketching, gears/cams/shafts, advanced GD&T, tolerance build-up, tolerances for assemblies, introduction to rapid prototyping, and CNC design for manufacturing concepts will be presented. Advanced 3-D modeling software applications will include: library of parts, assembly constraints, motion constraints, drive constraints, and adaptive design. Three lectures per week.

Three lectures per week.

Pre-requisite(s): PDD 1160.

PDD 2650 - Product Design & Development

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

Uses CAD to lay out advanced production drawings and design. Uses the Machinery's Handbook, ANSI standards, geometric dimensioning and tolerances and manufacturer's reference materials. Supports the design and drafting required for senior project.

Pre-requisite(s): PDD 2460.

PDD 2830 - Directed Readings

Credits: (1-3)

Typically Taught Spring Semester: *Full Sem*

Directed readings in Design Engineering Technology including product design and development and architectural areas. Must have department approval.

Can be taken for 1-3 credit hours twice for a maximum of 6 credits.

PDD 2890 INT - Cooperative Work Experience

Credits: (1-3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Open to all advanced students in Design Engineering Technology. Department approval required before registration. Provides academic credit for on-the-job experience. Grade and amount of credit will be determined by the department.

Can be taken for 1-3 credit hours twice for a maximum of 6 credits.

PDD 2920 - Short Courses, Workshops, Institutes and Special Programs

Credits: (1-4)

Variable Title

Typically Taught Spring Semester: *Full Sem*

Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript.

May be repeated 3 times for a maximum of four credit hours.

PDD 3100 - Tool Design

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Tool design principals used for work piece control in manufacturing and production. Topics include responsibilities of a tool designer, the design process, economics of design, tooling materials, and tool drawings and specifications. Other topics will include jigs, fixtures, gages, dies and tooling required by specialized manufacturing processes.

Pre-requisite(s): MFET 1210, PDD 2460, and MATH 1080 (or MATH 1050 and MATH 1060).

PDD 3300 - Applied Kinematic Analysis

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

Graphical representation of the motion of bodies without reference to the forces that cause the motion. Devices will be modeled and the limits of movement of components defined so that overall machine design can be animated and analyzed.

Pre-requisite(s): MFET 2300.

PDD 3400 - Rendering Basics (Photoshop/3ds Max)

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

This course introduces students to the basic tools and concepts used in Adobe Photoshop and 3ds Max. Photoshop instruction includes using layers, image editing using selection tools, filtering, and touching up a 3D render. 3ds Max instruction includes importing models, adding materials, lighting a scene, and creating a basic animation.

PDD 3460 - Parametric Design Graphics

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

An advanced design graphics course using state-of-the-art parametric modeling software. Topics include: parametric modeling fundamentals, constructive solid geometry concepts, model history, parent/child relationships, parametric constraints & relations, datum features, symmetrical features, 3D construction tools, advanced modeling tools, and assembly modeling.

Pre-requisite(s): PDD 1010 and WEB 1700.

PDD 3470 - Introduction to CATIA V5

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Use of parametric 3D modeling software to prepare engineering documentation and model analysis for the automotive and aerospace manufacturing industries. Students will complete a series of laboratory assignments and term projects in an open lab environment.

Pre-requisite(s): PDD 1010, PDD 1160, and PDD 2460 or MFET 2870 or instructor's approval.

PDD 3810 - Experimental

Credits: (1-6)

Experimental Course, Contact Department for More Information

Individual courses offered on an experimental basis, identified by specific name and description. The specific title will appear on student's transcript along with the authorized credit.

PDD 3810 - Machines and Mechanisms

Credits: (1-3)

Experimental Course, Contact Department for More Information

Uses 3D parametric design software to create production designs and drawings for open-ended design projects, focusing on the relationship between "make" and "buy" parts. Gives students the opportunity to become familiar with engineering functions and manufacturing processes as related to mechanical design. Introduces the iterative process required to optimize design solutions. Studies elements inherent to the design of components fabricated from traditional engineering materials using practical manufacturing methods. Examines the characteristics of mechanical components and the integration of said components to specific machine designs. Uses select information from manufacturer's data for components integral to the comprehensive design and detailing of complete machines. Covers concepts such as position, velocity, and acceleration analysis as related to four-bar linkages. Covers mechanism design including cams, gear trains, and belt and chain drives. Supports the design and drawing requirements for senior projects.

PDD 4200 - Advanced Mechanical Design

Credits: (3)

Typically Taught Spring Semester: Full Sem

Uses 3D CAD (3-dimensional computer-aided design) software to create production designs and drawings for heavy industrial applications. Uses the American Institute of Steel Construction (AISC) Manual and the Structural Aluminum Design Handbook in conjunction with metal supplier's product engineering data to design and analyze mechanical systems using traditional and Finite Element Analysis (FEA) Methods in quantifying component mechanics of material integrity. Preparation of fabrication drawings for said systems will also be covered in the course.

Pre-requisite(s): MFET 2320.

PDD 4400 - Animation Basics (3ds Max)

Credits: (3)

Typically Taught Spring Semester: Full Sem

This course is a continuation of DET 3400. An in-depth

look into 3ds Max focusing more on photorealism and animation. Students will learn how to take models created in other programs learned throughout the DET program into 3ds Max and bring them to life. Video editing is covered to allow students to create professional animations and videos.

Pre-requisite(s): PDD 3400.

PDD 4470 - Advanced CATIA V5

Credits: (3)

Typically Taught Spring Semester: Full Sem

An advanced 3D CAD course featuring 3-D parametric modeling using commercially available software. Studies in parametric design and design intent, applying surfaces, rendering, and creating animated presentations for the automotive and aerospace industries.

Pre-requisite(s): PDD 3470.

PDD 4500 - Hydraulic and Pneumatic Applications

Credits: (3)

Typically Taught Spring Semester: Full Sem

Examines the components of hydraulic and pneumatic systems, including a detailed study of each type of system and the integration of all components required for machine design. The symbols used to document hydraulic and pneumatic systems and the selection of components from vendor catalogs will be included in the detailing of complete machines.

Pre-requisite(s): MET 3400.

PDD 4600 - Senior Project I (Design)

Credits: (2)

Typically Taught Fall Semester: Full Sem

Typically Taught Spring Semester: Full Sem

A Capstone project spanning two consecutive semesters. This semester concentrates on documenting the design solution. The project includes application of skills, knowledge, techniques and concepts to design and manufacture or construct a project. Emphasis placed on integrated project management including preparation of drawings, creation of presentations, project organization, control, and documentation. Prerequisite: Senior Project Application form, senior standing, approval of the department, and Associates Degree in DET or equivalent. (A student must apply for senior project one semester before the start of the senior project.)

Co-Requisite(s): MFET 4610. Cross-listed with MFET 4610L.

PDD 4610 - Senior Project II (Build)

Credits: (2)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A Capstone project spanning two consecutive semesters. This semester concentrates on manufacturing or building the design solution. The project includes application of skills, knowledge, techniques and concepts to design and manufacture or construct a project. Emphasis placed on integrated project management including preparation of drawings, creation of presentations, project organization, control, and documentation.

Pre-requisite(s): PDD 4600. Cross-listed with: MFET 4620L.

PDD 4830 - Directed Readings

Credits: (1-3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Directed readings in Design Engineering Technology including product design and development and architectural areas. Must have department approval.

Can be taken for 1-3 credit hours twice for a maximum of 6 credits.

PDD 4890 INT - Cooperative Work Experience

Credits: (1-3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Open to all advanced students in Design Engineering Technology. Department approval required before registration. Provides academic credit for on-the-job experience. Grade and amount of credit will be determined by the department.

Can be taken for 1-3 credit hours twice for a maximum of 6 credits.

PDD 4920 - Short Courses, Workshops, Institutes and Special Programs

Credits: (1-4)

Variable Title

Typically Taught Summer Semester: *Full Sem*

Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript.

May be repeated 3 times.

PE 1010 - Aerobics, Level I

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A physical activity course that engages students in aerobic exercises to improve cardiovascular and respiratory functioning.

PE 1011 - Aerobics, Level II

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A physical activity course that engages students in aerobic exercises to improve cardiovascular and respiratory functioning.

PE 1012 - Aerobics, Level III

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A physical activity course that engages students in aerobic exercises to improve cardiovascular and respiratory functioning.

PE 1035 - Zumba, Level I

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A physical activity course that introduces students to Zumba; an activity that fuses cardiovascular fitness, upbeat world rhythms, and easy-to-follow choreography for a total-body workout.

PE 1036 - Zumba, Level II

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A physical activity course that introduces students to Zumba; an activity that fuses cardiovascular fitness, upbeat world rhythms, and easy-to-follow choreography for a total-body workout.

PE 1037 - Zumba, Level III

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A physical activity course that introduces students to Zumba; an activity that fuses cardiovascular fitness, upbeat world rhythms, and easy-to-follow choreography for a total-body workout.

PE 1040 - Walking for Fitness, Level I

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A physical activity course that engages students in walking to improve physical fitness.

PE 1041 - Walking for Fitness, Level II

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A physical activity course that engages students in walking to improve physical fitness.

PE 1042 - Walking for Fitness, Level III

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A physical activity course that engages students in walking to improve physical fitness.

PE 1043 - Jogging, Level I

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A physical activity course that engages students in jogging to improve physical fitness and health. Topics in the biomechanics of running efficiently and safely, heart rate, energy expenditure, body composition, and diet may be taught.

PE 1044 - Jogging, Level II

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A physical activity course that engages students in jogging to improve physical fitness and health. Topics in the biomechanics of running efficiently and safely, heart rate, energy expenditure, body composition, and diet may be taught.

PE 1045 - Jogging, Level III

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A physical activity course that engages students in jogging to improve physical fitness and health. Topics in the biomechanics of running efficiently and safely, heart rate, energy expenditure, body composition, and diet may be taught.

PE 1055 - Pilates

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A physical activity course that introduces students to Pilates training; a mind-body exercise program designed to tone the body, stabilize the core, improve balance, and increase flexibility.

PE 1057 - Hatha Yoga, Level I

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A beginner physical activity course that allows students to learn and experience the physical benefits and body awareness associated with practicing yoga.

PE 1058 - Hatha Yoga, Level II

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A physical activity course that allows students to learn and experience the physical benefits and body awareness associated with practicing yoga. This Level II course allows students to build on skills developed in Level I.

PE 1068 - Kettlebell Conditioning

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A vigorous introductory physical conditioning course primarily utilizing kettlebells. Exercises designed to enhance strength, power, endurance, and agility will be emphasized.

PE 1070 - Cross Training For Fitness, Level I

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A physical activity course that engages students in cross training activities to improve overall levels of physical fitness.

PE 1071 - Cross Training For Fitness, Level II

Credits: (1)

Typically Taught Summer Semester: *Full Sem, Online*

Typically Taught Fall Semester: *Full Sem, Online*

Typically Taught Spring Semester: *Full Sem, Online*

A physical activity course that engages students in cross training activities to improve overall levels of physical fitness.

PE 1072 - Cross Training For Fitness, Level III

Credits: (1)

Typically Taught Summer Semester: *Full Sem, Online*

Typically Taught Fall Semester: *Full Sem, Online*

Typically Taught Spring Semester: *Full Sem, Online*

A physical activity course that engages students in cross training activities to improve overall levels of physical fitness.

PE 1077 - Weightlifting, Level I

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A vigorous physical conditioning course intended to assist students in skill development specific to Olympic weightlifting. The snatch and clean-and-jerk, will be

emphasized as will assistance exercises to increase strength.

PE 1078 - Weightlifting, Level II

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A vigorous physical conditioning course intended to assist students in skill development specific to Olympic weightlifting. The snatch and clean-and-jerk, will be emphasized as will assistance exercises to increase strength.

PE 1079 - Weightlifting, Level III

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A vigorous physical conditioning course intended to assist students in skill development specific to Olympic weightlifting. The snatch and clean-and-jerk, will be emphasized as will assistance exercises to increase strength.

PE 1080 - Strength Training, Level I

Credits: (1)

Typically Taught Summer Semester: *Full Sem, Online*

Typically Taught Fall Semester: *Full Sem, Online*

Typically Taught Spring Semester: *Full Sem, Online*

A physical activity course that engages students in neuromuscular conditioning. Course subject matter will include neuromuscular conditioning, developing strength training programs, and learning and practicing proper lifting techniques.

PE 1081 - Strength Training, Level II

Credits: (1)

Typically Taught Summer Semester: *Full Sem, Online*

Typically Taught Fall Semester: *Full Sem, Online*

Typically Taught Spring Semester: *Full Sem, Online*

A physical activity course that engages students in neuromuscular conditioning. Course subject matter will include neuromuscular conditioning, developing strength training programs, and learning and practicing proper lifting techniques.

PE 1082 - Strength Training, Level III

Credits: (1)

Typically Taught Summer Semester: *Full Sem, Online*

Typically Taught Fall Semester: *Full Sem, Online*

Typically Taught Spring Semester: *Full Sem, Online*

A physical activity course that engages students in neuromuscular conditioning. Course subject matter will include neuromuscular conditioning, developing strength training programs, and learning and practicing proper lifting techniques.

PE 1098 - Fitness for Life

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A physical activity course that teaches students the importance of engaging in lifetime fitness. Strategies for maintaining and enhancing cardiovascular fitness, muscular strength, flexibility, and body composition will be taught.

PE 1100 - Tennis, Level I

Credits: (1)

Typically Taught Fall Semester: *1st Blk*

A physical activity course that allows students to learn and develop the skills needed to play tennis.

PE 1101 - Tennis, Level II

Credits: (1)

Typically Taught Fall Semester: *2nd Blk*

A physical activity course that allows students to learn and develop the skills needed to play tennis.

PE 1102 - Tennis, Level III

Credits: (1)

A physical activity course that allows students to learn and develop the skills needed to play tennis.

PE 1105 - Badminton, Level I

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A physical activity course that allows students to learn and develop the skills needed to play badminton.

PE 1106 - Badminton, Level II

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A physical activity course that allows students to learn and develop the skills needed to play badminton.

PE 1110 - Racquetball, Level I

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A physical activity course that allows students to learn and develop the skills needed to play racquetball.

PE 1111 - Racquetball, Level II

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A physical activity course that allows students to learn and develop the skills needed to play racquetball.

PE 1112 - Racquetball, Level III

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A physical activity course that allows students to learn and develop the skills needed to play racquetball.

PE 1115 - Pickleball, Level 1

Credits: (1)

Typically Taught Summer Semester: *Full Sem, 1st Blk, 2nd Blk*

Typically Taught Fall Semester: *Full Sem, 1st Blk, 2nd Blk*

Typically Taught Spring Semester: *Full Sem, 1st Blk, 2nd Blk*

A physical activity course that allows students to study, practice, and develop skill and competency at a proficient level, and to be able to successfully participate and play a game of pickleball.

May be repeated twice.

PE 1116 - Pickleball, Level II

Credits: (1)

Typically Taught Summer Semester: *Full Sem, 1st Blk, 2nd Blk*

Typically Taught Fall Semester: *Full Sem, 1st Blk, 2nd Blk*

Typically Taught Spring Semester: *Full Sem, 1st Blk, 2nd Blk*

A physical activity course that allows students to study, practice, and develop skill and competency at a proficient level, and to be able to successfully participate and play a game of pickleball.

May be repeated twice.

PE 1117 - Pickleball, Level III

Credits: (1)

Typically Taught Summer Semester: *Full Sem, 1st Blk, 2nd Blk*

Typically Taught Fall Semester: *Full Sem, 1st Blk, 2nd Blk*

Typically Taught Spring Semester: *Full Sem, 1st Blk, 2nd Blk*

A physical activity course that allows students to study, practice, and develop skill and competency at a proficient level, and to be able to successfully participate and play a game of pickleball.

May be repeated twice.

PE 1130 - Golf, Level I

Credits: (1)

Typically Taught Summer Semester: *Full Sem, 1st Blk*

Typically Taught Fall Semester: *1st Blk*

A beginning level physical activity course that allows students to learn and develop the skills needed to play golf.

PE 1131 - Golf, Level II

Credits: (1)

Typically Taught Summer Semester: *Full Sem, 1st Blk*

Typically Taught Fall Semester: *2nd Blk*

An intermediate level physical activity course that allows students to learn and develop the skills needed to play golf.

PE 1132 - Golf, Level III

Credits: (1)

Typically Taught Summer Semester: *Full Sem, 1st Blk*

Typically Taught Fall Semester: *3rd Blk*

An advanced level physical activity course that allows students to learn and develop the skills needed to play golf.

PE 1135 - Archery, Level I

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

A physical activity course that allows students to learn and develop the skills needed to practice archery.

PE 1136 - Archery, Level II

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

A physical activity course that allows students to learn and develop the skills needed to practice archery.

PE 1137 - Archery, Level III

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

A physical activity course that allows students to learn and develop the skills needed to practice archery.

PE 1140 - Marksmanship

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A physical activity course that allows students to learn and develop the skills needed to practice shooting and other skills related to marksmanship.

PE 1145 - Bowling, Level I

Credits: (1)

Typically Taught Summer Semester: *2nd Blk*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A physical activity course that allows students to learn and develop the skills needed to practice bowling.

PE 1146 - Bowling, Level II

Credits: (1)

Typically Taught Summer Semester: *3rd Blk*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A physical activity course that allows students to learn and develop the skills needed to practice bowling.

PE 1147 - Bowling, Level III

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A physical activity course that allows students to learn and develop the skills needed to practice bowling.

PE 1150 - Billiards, Level I

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A physical activity course that allows students to learn and develop the skills needed to practice billiards.

PE 1151 - Billiards, Level II

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A physical activity course that allows students to learn and develop the skills needed to practice billiards.

PE 1152 - Billiards, Level III

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A physical activity course that allows students to learn and develop the skills needed to practice billiards.

PE 1155 - Fencing, Level I

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A physical activity course that allows students to learn and develop the skills needed to practice fencing.

PE 1156 - Fencing, Level II

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A physical activity course that allows students to learn and develop the skills needed to practice fencing.

PE 1157 - Fencing, Level III

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A physical activity course that allows students to learn and develop the skills needed to practice fencing.

PE 1200 - Basketball, Level I

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A physical activity course that allows students to learn and develop the skills needed to play basketball.

PE 1201 - Basketball, Level II

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A physical activity course that allows students to learn and develop the skills needed to play basketball.

PE 1202 - Basketball, Level III

Credits: (1)

Typically Taught Spring Semester: *Full Sem*

A physical activity course that allows students to learn and develop the skills needed to play basketball.

PE 1210 - Volleyball, Level I

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A physical activity course that allows students to learn and develop the skills needed to play volleyball.

PE 1211 - Volleyball, Level II

Credits: (1)

Typically Taught Spring Semester: *Full Sem*

A physical activity course that allows students to learn and develop the skills needed to play volleyball.

PE 1212 - Volleyball, Level III

Credits: (1)

Typically Taught Spring Semester: *Full Sem*

A physical activity course that allows students to learn and develop the skills needed to play volleyball.

PE 1225 - Softball

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A physical activity course that allows students to learn and develop the skills needed to play softball.

PE 1230 - Soccer, Level I

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A physical activity course that allows students to learn and develop the skills needed to play soccer.

PE 1231 - Soccer, Level II

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A physical activity course that allows students to learn and develop the skills needed to play soccer.

PE 1232 - Soccer, Level III

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A physical activity course that allows students to learn and develop the skills needed to play soccer.

PE 1235 - Flag Football

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This physical activity course is intended to engage students in the sport of flag football. Students will learn techniques, drills, and games to assist with development of skills and competitive game play.

PE 1245 - Ultimate Frisbee, Level I

Credits: (1)

Typically Taught Summer Semester: *1st Blk; 2nd Blk*

Typically Taught Fall Semester: *Full Sem, 1st Blk, 2nd*

Blk

Typically Taught Spring Semester: *1st Blk; 2nd Blk*

This physical activity course is intended to engage students in the sport of Ultimate Frisbee. Students will learn techniques, drills, and games to assist with development of skills and competitive game play.

May be repeated up to 20 times.

PE 1246 - Ultimate Frisbee, Level II

Credits: (1)

Typically Taught Summer Semester: *Full Sem, 1st Blk, 2nd Blk*

Typically Taught Fall Semester: *Full Sem, 1st Blk, 2nd Blk*

Typically Taught Spring Semester: *Full Sem, 1st Blk, 2nd Blk*

This physical activity course is intended to engage students in the sport of Ultimate Frisbee. Students will learn techniques, drills, and games to assist with development of skills and competitive game play.

May be repeated up to 20 times.

PE 1247 - Ultimate Frisbee, Level III

Credits: (1)

Typically Taught Summer Semester: *Fall Sem, 1st Blk, 2nd Blk*

Typically Taught Fall Semester: *Fall Sem, 1st Blk, 2nd Blk*

Typically Taught Spring Semester: *Fall Sem, 1st Blk, 2nd Blk*

This physical activity course is intended to engage students in the sport of Ultimate Frisbee. Students will learn techniques, drills, and games to assist with development of skills and competitive game play.

May be repeated up to 20 times.

PE 1265 - Water Sports

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A physical activity course that allows students to learn and develop skills needed to play water sports. Water sports include, but are not limited to: swimming, water aerobics, water polo, and snorkeling.

PE 1300 - Swimming, Level I

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$18.00

A physical activity course that allows students to engage in the sport of swimming.

PE 1301 - Swimming, Level II

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$18.00

A physical activity course that allows students to engage in the sport of swimming.

PE 1302 - Swimming, Level III

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$18.00

A physical activity course that allows students to engage in the sport of swimming.

PE 1310 - Water Aerobics, Level I

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$18.00

This physical activity course will introduce students to water conditioning. Through aerobic conditioning, abdominal toning, and stretching, students will learn how to maintain a high level of fitness through application of aerobic training principles in an aquatic environment.

PE 1311 - Water Aerobics, Level II

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$18.00

This physical activity course will introduce students to water conditioning. Through aerobic conditioning, abdominal toning, and stretching, students will learn how to maintain a high level of fitness through application of aerobic training principles in an aquatic environment.

PE 1312 - Water Aerobics, Level III

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$18.00

This physical activity course will introduce students to water conditioning. Through aerobic conditioning, abdominal toning, and stretching, students will learn how to maintain a high level of fitness through application of aerobic training principles in an aquatic environment.

PE 1340 - Lifeguarding

Credits: (2)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Skills and knowledge needed by lifeguards to prevent and respond to aquatic emergencies. The course content and activities prepare lifeguard candidates to recognize emergencies, respond quickly and effectively to emergencies, and prevent drownings and other incidents. The course also teaches other skills and individual needs to become a professional lifeguard. Upon successful completion of this course participants will be certified in American Red Cross CPR for Professional Rescuer and Lifeguard Training.

Pre-requisite(s): Skills screening will be required.

Please note: The Lifeguard Training certificate includes certification in first aid.

PE 1400 - Self Defense, Level I

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A physical activity course that allows students to learn and develop the skills needed to perform the art of self-defense, in a safe and controlled environment.

PE 1401 - Self Defense, Level II

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A physical activity course that allows students to learn and develop the skills needed to perform the art of self-defense, in a safe and controlled environment.

PE 1402 - Self Defense, Level III

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A physical activity course that allows students to learn and develop the skills needed to perform the art of self-defense, in a safe and controlled environment.

PE 1410 - TaiChi, Level I

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A physical activity course that allows students to learn and develop the skills needed to perform TaiChi, which engages the body and mind and to reduce stress.

PE 1411 - TaiChi, Level II

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A physical activity course that allows students to learn and develop the skills needed to perform TaiChi, which engages the body and mind and to reduce stress.

PE 1412 - TaiChi, Level III

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A physical activity course that allows students to learn and develop the skills needed to perform TaiChi, which engages the body and mind and to reduce stress.

PE 1425 - Jiu Jitsu, Level I

Credits: (1)

Typically Taught Summer Semester: *Full Sem, 1st Blk, 2nd Blk*

Typically Taught Fall Semester: *Full Sem, 1st Blk, 2nd Blk*

Typically Taught Spring Semester: *Full Sem, 1st Blk, 2nd Blk*

A physical activity course that allows students to learn and develop skills needed to perform the various styles of Jiu

Jits.

May be repeated twice.

PE 1426 - Jiu Jitsu, Level II

Credits: (1)

Typically Taught Summer Semester: *Full Sem, 1st Blk, 2nd Blk*

Typically Taught Fall Semester: *Full Sem, 1st Blk, 2nd Blk*

Typically Taught Spring Semester: *Full Sem, 1st Blk, 2nd Blk*

A physical activity course that allows students to learn and develop skills needed to perform the various styles of Jiu Jits.

May be repeated twice.

PE 1427 - Jiu Jitsu, Level III

Credits: (1)

Typically Taught Summer Semester: *1st Blk; 2nd Blk*

Typically Taught Fall Semester: *Full Sem, 1st Blk, 2nd Blk*

Typically Taught Spring Semester: *Full Sem, 1st Blk, 2nd Blk*

A physical activity course that allows students to learn and develop skills needed to perform the various styles of Jiu Jits.

May be repeated twice.

PE 1435 - Kempo, Level I

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A physical activity course that allows students to learn and develop the skills needed to perform the various fighting styles of Kempo Karate.

PE 1436 - Kempo, Level II

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A physical activity course that allows students to learn and develop the skills needed to perform the various fighting styles of Kempo Karate.

PE 1437 - Kempo, Level III

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A physical activity course that allows students to learn and develop the skills needed to perform the various fighting styles of Kempo Karate.

PE 1440 - Mixed Martial Arts, Level I

Credits: (1)

Typically Taught Summer Semester: *Fall Sem, 1st Blk, 2nd Blk*

Typically Taught Fall Semester: *Fall Sem, 1st Blk, 2nd Blk*

Typically Taught Spring Semester: *Fall Sem, 1st Blk, 2nd Blk*

A physical activity course that allows students to learn how to improve physical fitness and become mentally strong while mastering self-discipline and self-control to master the various techniques and forms of martial arts as they pertain to the sport of Mixed Martial Arts. May be repeated up to 20 times.

PE 1441 - Mixed Martial Arts, Level II

Credits: (1)

Typically Taught Summer Semester: *Fall Sem, 1st Blk, 2nd Blk*

Typically Taught Fall Semester: *Fall Sem, 1st Blk, 2nd Blk*

Typically Taught Spring Semester: *Fall Sem, 1st Blk, 2nd Blk*

A physical activity course that allows students to learn how to improve physical fitness and become mentally strong while mastering self-discipline and self-control to master the various techniques and forms of martial arts as they pertain to the sport of Mixed Martial Arts. May be repeated up to 20 times.

PE 1442 - Mixed Martial Arts, Level III

Credits: (1)

Typically Taught Summer Semester: *Fall Sem, 1st Blk, 2nd Blk*

Typically Taught Fall Semester: *Fall Sem, 1st Blk, 2nd Blk*

Typically Taught Spring Semester: *Fall Sem, 1st Blk, 2nd Blk*

A physical activity course that allows students to learn how to improve physical fitness and become mentally strong while mastering self-discipline and self-control to master

the various techniques and forms of martial arts as they pertain to the sport of Mixed Martial Arts. May be repeated up to 20 times.

PE 1445 - Tae Kwon-do, Level I

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A physical activity course that allows students to learn and develop the skills needed to perform the martial art of Tae Kwon-do through combat and self-defense while incorporating sport and exercise.

PE 1446 - Tae Kwon-do, Level II

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A physical activity course that allows students to learn and develop the skills needed to perform the martial art of Tae Kwon-do through combat and self-defense while incorporating sport and exercise.

PE 1447 - Tae Kwon-do, Level III

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A physical activity course that allows students to learn and develop the skills needed to perform the martial art of Tae Kwon-do through combat and self-defense while incorporating sport and exercise.

PE 1515 - Sailboating

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A physical activity course that introduces students to the outdoor activity of sailboating. The fundamental skills of sailboating will be addressed for both beginning and recreational sailors.

PE 1557 - Bicycling, Level I

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A physical activity course that allows students to learn and develop the skills and knowledge needed to safely enjoy bicycling.

PE 1558 - Bicycling, Level II

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A physical activity course that allows students to learn and develop the skills and knowledge needed to safely enjoy bicycling.

PE 1559 - Bicycling, Level III

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A physical activity course that allows students to learn and develop the skills and knowledge needed to safely enjoy bicycling.

PE 1575 - Rodeo I

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A physical activity course that engages students to learn how to participate in rodeo events. Students will learn various skills, history and culture, and styles, as well as how to maintain a high level of fitness through participation in rodeo.

May be repeated 2 times up to 3 credit hours.

PE 1670 - Ice Skating, Level I

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A physical activity course that introduces students to ice skating. The fundamental skills of ice skating will be addressed for both beginning and recreational skaters.

PE 1710 - Country Swing Dance Level I

Credits: (1)

Typically Taught Summer Semester: *Full Sem, 1st Blk, 2nd Blk*

Typically Taught Fall Semester: *Full Sem, 1st Blk, 2nd*

Blk

Typically Taught Spring Semester: *Full Sem, 1st Blk, 2nd Blk*

A physical activity course that engages students to learn how to dance in the form of Country swing. Students will learn various skills, history and culture, and styles, as well as how to maintain a high level of fitness through participation in Country Swing Dancing. May be repeated 12 times with a maximum of 12 credit hours.

PE 1711 - Country Swing Dance Level II

Credits: (1)

Typically Taught Summer Semester: *Full Sem, 1st Blk, 2nd Blk*

Typically Taught Fall Semester: *Full Sem, 1st Blk, 2nd Blk*

Typically Taught Spring Semester: *Full Sem, 1st Blk, 2nd Blk*

A physical activity course that engages students to learn how to dance in the form of Country swing. Students will learn various skills, history and culture, and styles, as well as how to maintain a high level of fitness through participation in Country Swing Dancing.

May be repeated 12 times with a maximum of 12 credit hours.

PE 1712 - Country Swing Dance Level III

Credits: (1)

Typically Taught Summer Semester: *Full Sem, 1st Blk, 2nd Blk*

Typically Taught Fall Semester: *Full Sem, 1st Blk, 2nd Blk*

Typically Taught Spring Semester: *Full Sem, 1st Blk, 2nd Blk*

A physical activity course that engages students to learn how to dance in the form of Country swing. Students will learn various skills, history and culture, and styles, as well as how to maintain a high level of fitness through participation in Country Swing Dancing.

May be repeated 12 times with a maximum of 12 credit hours.

PE 1765 - Hip Hop for Fitness Level I

Credits: (1)

Typically Taught Summer Semester: *Full Sem, 1st Blk, 2nd Blk*

Typically Taught Fall Semester: *Full Sem, 1st Blk, 2nd Blk*

Typically Taught Spring Semester: *Full Sem, 1st Blk, 2nd Blk*

A physical activity course that engages students to learn how to dance in the form of Hip-Hop. Students will learn various skills, history and culture, and styles, as well as how to maintain a high level of fitness through participation in Hip-Hop.

May be repeated 12 times with a maximum of 12 credit hours.

PE 1766 - Hip Hop for Fitness Level II

Credits: (1)

Typically Taught Summer Semester: *Full Sem, 1st Blk, 2nd Blk*

Typically Taught Fall Semester: *Full Sem, 1st Blk, 2nd Blk*

Typically Taught Spring Semester: *Full Sem, 1st Blk, 2nd Blk*

A physical activity course that engages students to learn how to dance in the form of Hip-Hop. Students will learn various skills, history and culture, and styles, as well as how to maintain a high level of fitness through participation in Hip-Hop.

May be repeated 12 times for a maximum of 12 credit hours.

PE 1767 - Hip Hop for Fitness Level III

Credits: (1)

Typically Taught Summer Semester: *Full Sem, 1st Blk, 2nd Blk*

Typically Taught Fall Semester: *Full Sem, 1st Blk, 2nd Blk*

Typically Taught Spring Semester: *Full Sem, 1st Blk, 2nd Blk*

A physical activity course that engages students to learn how to dance in the form of Hip-Hop. Students will learn various skills, history and culture, and styles, as well as how to maintain a high level of fitness through participation in Hip-Hop.

May be repeated 12 times for a maximum of 12 credit hours.

PEP 1079 - Weightlifting, Level III

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A vigorous physical conditioning course intended to assist students in skill development specific to Olympic weightlifting. The clean-and-jerk, and snatch, lifts will be emphasized exclusively.

Pre-requisite(s): PE 1080, or instructor approval.

PEP 2000 - Foundations of Physical Education

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Examination of history, philosophy, career opportunities, issues, and trends in physical education. Emphasis on professional preparation requirements and competencies.

PEP 2100 - Introduction to Coaching Sport

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Examines various coaching philosophies and styles along with the duties and responsibilities of the coach, with an emphasis on leadership skills, organizational and administrative duties, the legal responsibilities that affects sport and the evaluation of the athletic program.

PEP 2480 - Fitness for Life Concepts

Credits: (1)

Prescribe individualized programs for weight control, cardiovascular endurance, strength and flexibility.

Note: This course is not currently offered.

PEP 2500 - Sport Pedagogy

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course is designed to provide information on skill development, practice and game planning, season schedules, creating drills and practice sessions, motivating players and coaching tips.

PEP 2600 - Growth and Motor Development

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Description of the structural and functional principles of human growth and development. Introduction of motor learning principles with emphasis on their application to pedagogy.

Pre-requisite(s): PEP 2000 or concurrent enrollment in PEP 2000.

PEP 2700 SS - Sociohistorical Aspects of Sport

Credits: (3)

Typically Taught Summer Semester: *Online*

Typically Taught Fall Semester: *Online*

Typically Taught Spring Semester: *Online*

This course examines the sociological and historical aspects of sport in American society with the purpose of gaining an understanding of how race, class, gender, ethnicity, politics, and religion can bind Americans in a community of shared values and aspirations. Students will explore the unifying power of sport, as well as how sport serves to reproduce many inequalities present in the larger society. Gaining an understanding of how these issues, and others, interplay with sport is critical for those aspiring to become successful sport coaches, as well as for those who simply wish to gain an understanding of the complex relationship between sport and society (e.g., parents, fans, and sport participants).

PEP 2800 - Individual Projects

Credits: (1-4)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A comprehensive study of a significant problem in the field of physical education. Hours to be arranged.

May be repeated 3 times up to 4 credit hours.

PEP 2920 - Short Courses, Workshops, Institutes and Special Programs

Credits: (1-4)

Variable Title

Consult the semester class schedule for current offering under this number. The specific title and credit authorized will appear on the student transcript.

May be repeated 2 times up to 4 credit hours.

Note: This course is taught as needed.

PEP 3100 - Principles of Motor Learning and Motor Development

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

The purpose of this course is to introduce and explore motor learning and motor development principles. Particular focus will be on how the application of motor learning and motor development impact the physical education and coaching learning environments.

Pre-requisite(s): PEP 2000.

PEP 3240 - Skill Development and Methods of Field Sports

Credits: (2)

Typically Taught Fall Semester: *Full Sem*

The purpose of this course is to provide prospective physical education teachers experiences that will lead to skill acquisition, the ability to analyze, diagnose and correct errors in skill performance, the development of skills, drills, and game progressions, and the pedagogical skills needed to teach a variety of field sports (e.g., flag football, soccer, and softball).

Pre-requisite/Co-requisite: Prerequisite or concurrent enrollment in PEP 2000.

PEP 3242 - Skill Development and Methods of Court Sports

Credits: (2)

Typically Taught Spring Semester: *Full Sem*

The purpose of this course is to provide prospective physical education teachers experiences that will lead to skill acquisition the ability to analyze, diagnose and correct errors in skill performance, the development of skills, drills, and game progressions, and the pedagogical skills needed to teach a variety of court sports (e.g., basketball and volleyball).

Pre-requisite/Co-requisite: Prerequisite or concurrent enrollment in PEP 2000.

PEP 3260 - Methods of Teaching Lifelong Activities

Credits: (2)

Typically Taught Fall Semester: *Full Sem*

Designed to give students a broad variety of noncompetitive/nonconventional activities and sports that are beneficial as lifetime sports.

Pre-requisite/Co-requisite: Prerequisite or concurrent enrollment in PEP 2000.

PEP 3262 - Methods of Teaching Individual Sports

Credits: (2)

Typically Taught Spring Semester: *Full Sem*

The purpose of this course is to provide prospective physical education teachers experiences that will lead to skill acquisition, the ability to analyze, diagnose and correct errors in skill performance, the development of skills, drills, and game progressions, and the pedagogical skills needed to teach a variety of individual sports (e.g., golf, swimming, and track and field).

Pre-requisite/Co-requisite: Prerequisite or concurrent enrollment in PEP 2000.

PEP 3264 - Skill Development and Methods of Teaching Racket Sports

Credits: (2)

Typically Taught Fall Semester: *Full Sem*

The purpose of this course is to provide prospective physical education teachers experiences that will lead to skill acquisition, the ability to analyze, diagnose and correct errors in skill performance, the development of skills, drills, and game progressions, and the pedagogical skills needed to teach a variety of racket sports (e.g., badminton, racketball, and tennis/pickleball).

Pre-requisite/Co-requisite: Prerequisite or concurrent enrollment in PEP 2000.

PEP 3270 - Methods of Teaching Aerobic Conditioning

Credits: (2)

Typically Taught Spring Semester: *Full Sem*

Examine, evaluate and practice aerobic conditioning theories and current practices for the purpose of preparing entry level professionals to select, incorporate, and facilitate appropriate aerobic activities, as well as, design and evaluate the effectiveness of aerobic conditioning programs.

Two lecture/labs per week.

Pre-requisite(s): PEP 2000, PEP 2600 or concurrent enrollment in PEP 2000 or PEP 2600.

Pre-requisite/Co-requisite: Prerequisite or concurrent enrollment in PEP 2000.

PEP 3280 - Methods of Teaching Strength and Conditioning

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Examine, evaluate and practice strength and conditioning theories and current practices for the purpose of preparing entry level professionals to select, incorporate, and facilitate appropriate conditioning activities, as well as, design and evaluate the effectiveness of strength and conditioning programs.

Two lecture/labs per week.

Pre-requisite(s): PE 1080.

PEP 3290 - Methods of Teaching Fitness for Life

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course is designed to introduce the fundamental principles of cardiovascular fitness, flexibility, and strength development, as well as to assist each individual to design and implement their own personal fitness program based on individual needs, assessments, and personal preferences. Students will explore resources for and methods of teaching the principles of fitness in the secondary school setting. This is a required course for the physical education major and the physical education/coaching minor.

Pre-requisite/Co-requisite: Prerequisite or concurrent enrollment in PEP 2000.

PEP 3310 - Techniques for Teaching Aquatics

Credits: (2)

Practice of swimming and related aquatic skills, teaching techniques for all levels of swimming, and the acquisition of materials to use for teaching swimming. Course leads to American Red Cross certification as a Water Safety Instructor.

Pre-requisite(s): Skills screening will be required.

Note: This course is not currently offered.

PEP 3320 - Techniques for Teaching Lifeguarding

Credits: (2)

Professional techniques and methods in teaching water safety, educational programs, lifeguard training and

reviews, and lifeguard progressions are taught. This course leads to Red Cross certification as a lifeguard instructor.

Note: This course is taught as needed.

PEP 3400 - Sport Psychology for Coaches

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course involves understanding the study and analysis of human behavior patterns as they relate to sport performance. Students (coaches) are provided with necessary information regarding mental processes, and applicable uses for this information. Recommended Prerequisite: PSY 1010.

PEP 3520 - Curriculum and Assessment

Credits: (2)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course emphasis is on developing curriculum necessary to meet the needs of diverse learners. Emphasis is also on development of assessment strategies that correctly match objectives and instruction. The students are given a basic understanding of the statistical use of data for grade determination. Students will have hands on experience in designing and implementing various assessments and grading methods relating to physical education objectives. Students will also be provided the opportunity to learn how to design and implement lessons using up-to-date forms of technology that are currently being used in public schools.

Pre-requisite(s): PEP 2000.

Co-Requisite(s): PEP 3520L.

PEP 3520L - Curriculum and Assessment Lab

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course will avail students a practicum opportunity to apply in an area K-12 school the theory learned and the curriculum prepared in the Curriculum and Assessment PEP 3520 course. Students will develop lessons and assessments to determine students learning and implement them in a teaching experience in the school setting.

Co-Requisite(s): PEP 3520.

PEP 3600 - Measurement and Statistics in Exercise Science

Credits: (3)

Typically Taught Summer Semester: *1st Blk*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

The selection, administration, and interpretation of measurement techniques and statistical procedures for the purpose of evaluation and research as related to exercise science and health promotion.

Pre-requisite(s): Meet WSU Quantitative Literacy requirement and complete WEB 1700.

PEP 3610 - Assessment/Technology in Physical Education

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course is designed to help students develop assessment strategies that correctly match objectives and instruction. The students are given a basic understanding of the statistical use of data for grade determination. Students will have hands on experience in designing and implementing various assessment (affective, cognitive, and psychomotor) and grading methods relating to physical education objectives. Students will also be provided the opportunity to learn how to design and implement lessons using up-to-date forms of technology that are currently being used in public schools.

Pre-requisite(s): A minimum of 3 Skill Development and Methods of Teaching Courses.

PEP 3620 - Methods of Teaching Physical Education and Health for Elementary Teachers

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

The course is designed to provide students with instructional methods, activities and skills for teaching Physical Education K-6 and Health Education. The course will include a 15-hour hands-on-practicum teaching experience in an area public school. The content of this course will be presented through various instructional strategies and teaching models.

Pre-requisite/Co-requisite: Prerequisite/Co-requisite: EDUC 3100.

PEP 3630 - Methods of Teaching Elementary School Physical Education

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Provides prospective elementary physical education teachers with the knowledge, skills, and experience necessary to delivering quality physical education lessons for elementary school-aged students. Principles, concepts, strategies, classroom management, skill development, and assessment will be explored.

Pre-requisite(s): PEP 2000 or PEP 3100.

PEP 3660 - Adapted Physical Education

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

The purpose of this course is to introduce and explore various congenital and acquired disabilities as well as gain an understanding of the legal mandates for individuals with disabilities and their educational rights. Particular emphasis and focus of this course will be on the application of various teaching methodologies to ensure inclusion for all in the physical education learning environment. In addition to meeting in the classroom, students will be required to participate in practicums both in the local school systems and at Weber State University.

Pre-requisite(s): PEP 3100; 3 classes of PEP 3240 - 3290.

PEP 4700 - Methods of Teaching Junior High School Physical Education

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Provides prospective Junior High School physical education teachers with the knowledge, skills, and experience necessary to delivering quality physical education lessons for Junior High School-aged students. Principles, concepts, strategies, classroom management, skill development, and assessment will be explored.

Pre-requisite(s): PEP 2000, PEP 3100.

PEP 4710 - Methods of Teaching High School Physical Education

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Provides prospective high school physical education

teachers with the knowledge, skills, and experience necessary to delivering quality physical education lessons for high school-aged students. Principles, concepts, strategies, classroom management, skill development, and assessment will be explored.

Pre-requisite(s): PEP 2000, PEP 3100.

PEP 4800 - Individual Projects

Credits: (1-4)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A comprehensive study of a significant problem in the field of physical education. Hours to be arranged. For seniors only.

May be repeated 3 times up to 4 credit hours.

PEP 4830 - Directed Readings

Credits: (1-3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Individualized readings and investigation of professional literature and its application to current and future specialized topics supervised by a faculty member. Extensive reading and formal writing required. Hours to be arranged. For seniors only.

May be repeated 2 times up to 3 credit hours.

PEP 4860C INT - Field Experience Coaching

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Work experience which applies prior academic learning in a supervised setting.

Pre-requisite/Co-requisite: PEP 2100 and PEP 2500.

PEP 4920 - Short Courses, Workshops, Institutes and Special Events

Credits: (1-4)

Variable Title

Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript.

May be repeated 3 times up to 4 credit hours.

Note: This course is taught as needed.

PEP 4990 INT - Field Experience/Senior Seminar

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course is designed to provide students with the opportunity to gain practical experiences in the field of physical education by teaching a class or classes in local public school grades 6-12. The course is also designed for students to meet and discuss a variety of issues relevant to preparing students to be physical educators.

Pre-requisite(s): PEP 3520, 12 credits of PEP 3240 - 3290. No substitutions can be made for this course.

PEP 6010 - Leadership in Physical Education

Credits: (3)

Designed to provide graduate students with an understanding of both theoretical and practical aspects of leadership in their respective fields of study. The ultimate goal of the course is to encourage daily application of leadership concepts in the personal and professional lives of the students.

Note: This course is taught as needed.

PEP 6100 - Current Trends in Health and Physical Education

Credits: (3)

A study of health and physical education perspectives with an emphasis on the changes, trends, and future prospects that will affect the profession and the needs of those they serve.

Note: This course is taught as needed.

PEP 6370 - Exercise Management for Special Populations

Credits: (2)

Exercise management for populations with special conditions. Overview of each condition's unique physiology, effects of the condition on the exercise response, effects of exercise training on the condition, and recommendations for exercise testing and programming are presented in a selected topics format.

Pre-requisite(s): ESS 2300 and ESS 3510.

Note: This course is taught as needed.

PEP 6420 - Curriculum in Physical Education

Credits: (3)

Designed to provide an understanding of the role and importance of physical education in today's society, steps involved in curriculum planning, trends and issues in curriculum and to orient the student to various ideas in curriculum design.

Note: This course is taught as needed.

PEP 6520 - Improving Physical Education

Credits: (3)

Designed for elementary classroom teachers to provide an opportunity for the teacher to further develop teaching skills, personal performance skills, knowledge and competencies. A major goal of this course will be to help the classroom teacher gain additional confidence in teaching physical education activities.

Note: This course is taught as needed.

PEP 6830 - Motor Learning

Credits: (3)

An in-depth study of the psychomotor domain of development. Special emphasis is given to skilled performance, learning theory, motor abilities, individual differences, developmental considerations, instructional and training procedures. Secondary school and athletic populations are considered regarding these topics.

Note: This course is taught as needed.

PHIL 1000 HU - Introduction to Philosophy

Credits: (3)

Typically Taught Summer Semester: *Online*

Typically Taught Fall Semester: *Full Sem, Online*

Typically Taught Spring Semester: *Full Sem, Online*

An introduction to the methods and problems of philosophy, with special emphasis on topics pertaining to the nature of reality, the theory of knowledge, and value theory.

PHIL 1120 HU - Contemporary Moral Problems

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem, Online*

Typically Taught Spring Semester: *Full Sem, Online*

An introduction to ethical theories and their application to contemporary moral issues, such as human cloning, abortion, and physician-assisted suicide.

PHIL 1250 HU - Critical Thinking

Credits: (3)

Typically Taught Summer Semester: *Online*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

An introduction to informal logic, focusing on issues of logical form, standards of good and bad reasoning, and argumentative writing.

PHIL 2200 - Deductive Logic

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

An introduction to the concepts and methods of modern symbolic logic. Emphasis is placed on problems of translating English expressions into logical symbols, on the development of skills in using the formal proof procedures of sentential and predicate logic, and development of the predicate calculus.

PHIL 2920 - Short Courses, Workshops, Institutes and Special Programs

Credits: (1-3)

Variable Title

Consult the semester class schedule for the current offering under this number. The specific title and number of credits authorized will appear on the student's transcript.

May be repeated three times for a maximum of 6 credits.

Note: This course is offered as needed.

PHIL 3010 - History of Philosophy: Classical & Medieval

Credits: (3)

Typically Taught Spring Semester: *Full Sem even years*

A survey of the major philosophers and issues from the Presocratics to the beginning of the early modern period, covering such major figures as Plato, Aristotle, Plotinus, Augustine, and Aquinas.

PHIL 3020 - History of Philosophy: Modern

Credits: (3)

Typically Taught Spring Semester: *Full Sem odd years*

A topical survey of the major philosophers and issues from the seventeenth century to the beginning of the nineteenth century (Descartes to Kant).

PHIL 3150 - Existentialism

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

An examination of central themes in Existentialism, including anxiety, dread, freedom, awareness of death, and the consciousness and meaning of existence. These themes will be traced through the writings of such writers as Kierkegaard, Nietzsche, Heidegger, Camus, Sartre, and Simone de Beauvoir.

PHIL 3200 - Philosophy of Democracy

Credits: (3)

Typically Taught Spring Semester: *Full Sem odd years*

An examination of the ideals of and justifications for democratic institutions.

PHIL 3250 - Philosophy of Law

Credits: (3)

Typically Taught Spring Semester: *Full Sem even years*

An examination of central topics in the philosophy of law, including the relationship between law and morality, the justification of punishment, and legal reasoning.

PHIL 3350 - Medical Ethics

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

A survey of fundamental moral issues arising from the practice of medicine and from advances in medical science.

PHIL 3500 - Philosophy of Western Religion

Credits: (3)

Typically Taught Fall Semester: *Full Sem even years*

A survey of topics in the philosophy of religion, especially as they pertain to Judaism, Christianity, and Islam.

PHIL 3550 - Philosophy of Eastern Religion

Credits: (3)

Typically Taught Spring Semester: *Full Sem even years*

An examination of classic philosophical issues in Eastern religious thought, with a special emphasis on Hinduism, Buddhism, Taoism, and Confucianism.

PHIL 3650 - Aesthetics

Credits: (3)

Typically Taught Fall Semester: *Full Sem even years*

An examination of philosophical issues concerning the nature and importance of aesthetic experience and appreciation in the arts and the environment, including questions about the definition of art, artistic representation and expression, and aesthetic value.

PHIL 4400 - Great Issues in Philosophy

Credits: (3)

A selected study of one of the traditional questions of philosophy, such as the nature of knowledge and truth, the mind/body problem, free will/determinism, and the nature of moral/aesthetic value.

May be repeated once up to six credits covering a different topic.

Note: This course is offered as needed.

PHIL 4450 - Great Thinkers of Philosophy

Credits: (3)

Selected study of the major works of a single central figure in philosophy. Philosophers whose works may be taught include, but are not limited to: Plato, Aristotle, Augustine, Aquinas, Descartes, Leibniz, Spinoza, Locke, Berkeley, Hume, Kant, Nietzsche, Mill, and Wittgenstein.

May be repeated once up to six credits covering a different philosopher.

Note: This course is offered as needed.

PHIL 4510 - Metaphysics

Credits: (3)

Typically Taught Fall Semester: *Full Sem odd years*

A study of enduring topics concerning the nature of reality, such as the mind/body problem, free will/determinism, the problem of universals, and the existence of God. Historical and contemporary philosophers are discussed.

PHIL 4520 - Epistemology

Credits: (3)

Typically Taught Fall Semester: *Full Sem even years*

A study of enduring topics in the theory of knowledge, such as the nature of justification; the relationship between knowledge, justification, and belief; the nature of truth; and sources of knowledge. Historical and contemporary philosophers are discussed.

PHIL 4530 - Philosophy of Mind

Credits: (3)

Typically Taught Spring Semester: *Full Sem odd years*

A study of enduring topics in the philosophy of mind, such as the nature of mind; the mind-body problem; consciousness; the individuation of mental content; artificial intelligence. Historical and contemporary philosophers are discussed.

PHIL 4540 - Philosophy of Language

Credits: (3)

Typically Taught Fall Semester: *Full Sem odd years*

A survey of central topics in the philosophy of language, including semantic content, speech acts, and the connection between meaning and truth. Historical and contemporary philosophers are discussed.

PHIL 4600 - Ethical Theory

Credits: (3)

Typically Taught Fall Semester: *Full Sem odd years*

An in-depth study of western ethical theories, including utilitarianism, Kantian ethics, virtue ethics, and social contract theory.

PHIL 4810 - Experimental

Credits: (1-6)

Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript. Refer to Experimental Courses.

May be repeated 5 times up to 6 credit hours.

Note: This course is offered as needed.

PHIL 4810 - Phil of Gender and Sexuality

Credits: (3)

Experimental Course, Contact Department for More Information

This course explores philosophical and political questions that arise about gender and sexuality. What have figures in the history of philosophy said about women, sex, and the family? Do we still hold some of their views, and are those views plausible? How should we understand contemporary notions of sexism and oppression? How many sexes are there? How many genders? What is sexual orientation? What is sexual perversion? What are sexual ethics? What are the moral status of practices such as prostitution and pornography? What are trans rights? To what do they extend? We will explore these questions by looking at the work of a variety of theorists, both historical and contemporary.

PHIL 4830 - Directed Readings

Credits: (1-2)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Individually designed tutorial for philosophy minors and majors, intended to satisfy program requirements not available through scheduled class offerings. May be repeated 8 times for a maximum of 9 credits.

PHIL 4900 - Senior Capstone Seminar

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

A comprehensive review of the various areas of philosophy and an in-depth study of a single philosopher with the goal of producing a substantial thesis paper.

PHIL 4920 - Short Courses, Workshops, Institutes and Special Programs

Credits: (1-3)

Variable Title

Consult the semester class schedule for the current offering under this number. The specific title and number of credits authorized will appear on the student's transcript. May be repeated three times for a maximum of 6 credit hours. Note: This course is offered as needed.

PHYS 1010 PS - Elementary Physics

Credits: (3)

Typically Taught Summer Semester: *Full Sem Online*

Typically Taught Fall Semester: *Full Sem, Full Sem Online*

Typically Taught Spring Semester: *Full Sem, Full Sem Online*

A brief survey of physics at the introductory level. Topics covered include laws of motion, gravity, energy, light, heat, sound, electricity, magnetism, atomic and nuclear physics, radioactivity, and relativity.

Three hours of lecture per week.

PHYS 1040 PS - Elementary Astronomy

Credits: (3)

Typically Taught Fall Semester: *Full Sem, Full Sem Online*

Typically Taught Spring Semester: *Full Sem, Full Sem Online*

A brief survey of the physical universe using the fundamental laws of physics. Topics include the history of astronomy, the solar system, the sun, the evolution of stars, pulsars, black holes, the Milky Way galaxy, galaxies, quasars, and the Big Bang.

Three hours of lecture per week.

Cross-listed with ASTR 1040.

PHYS 1360 PS - Principles of Physical Science

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

A lecture/laboratory course designed to provide an introduction to the scientific method and its application to the study of selected topics in physics and chemistry.

Two hours of lecture and one 3-hour lab per week.

Recommended for Elementary Education majors.

PHYS 2010 PS - College Physics I

Credits: (5)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

First semester of a two-semester sequence in general physics, primarily for students in pre-medicine, pre-dentistry, technology and other disciplines requiring physics without calculus. This semester covers topics in mechanics, including kinematics, Newton's laws, and the conservation laws of energy, linear momentum, and angular momentum. Also covered are topics in gravity, fluid mechanics, waves, and thermodynamics.

Class meets five hours per week in lecture/discussion format. One 3-hour lab per week (PHYS 2019).

Pre-requisite(s): MATH 1060 OR MATH 1080 OR MATH 1210.

Co-Requisite(s): PHYS 2019.

PHYS 2015 - College Physics I Lab

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Enrollment limited to transfer students.

One 3-hour lab per week.

Co-Requisite(s): PHYS 2010.

Enrollment limited to transfer students.

PHYS 2019 - College Physics I Lab

Credits: (0)

3-hour lab to be taken concurrently with PHYS 2010.

Co-Requisite(s): PHYS 2010.

PHYS 2020 - College Physics II

Credits: (5)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Second semester of a two-semester sequence in general physics. This semester covers topics in electricity and magnetism, electromagnetic waves, light and optics, relativity, atomic, and nuclear physics.

Class meets five hours per week in lecture/discussion format. One 3-hour lab per week (PHYS 2029).

Pre-requisite(s): PHYS 2010.

Co-Requisite(s): PHYS 2029.

PHYS 2025 - College Physics II Lab

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Enrollment limited to transfer students.

One 3-hour lab per week.

Co-Requisite(s): PHYS 2020.

Enrollment limited to transfer students.

PHYS 2029 - College Physics II Lab

Credits: (0)

3-hour lab to be taken concurrently with PHYS 2020.

Co-Requisite(s): PHYS 2020.

PHYS 2040 PS - Principles of Observational Astronomy

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

An introductory course in observational astronomy. Topics will include planetary, stellar, and galactic astronomy, with a focus on modern observational techniques, including digital imagery, spectroscopy, and observing with science-grade astronomical instrumentation. *Cross-listed with ASTR 2040.*

Pre-requisite(s): MATH 1060 (minimum grade of C).

PHYS 2090 PS SUS - Energy and the Environment

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

This interdisciplinary course explores how energy moves through our modern technological society. We will study the many forms of energy, traditional, and emerging sources of energy, and how energy use affects our environment. Much of the course will focus on identifying energy-related problems and their potential solutions.

PHYS 2210 PS - Physics for Scientists and Engineers I

Credits: (5)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

First semester of a two-semester sequence in calculus-based physics, primarily for students in science, math, computer science, and pre engineering. This semester covers topics in mechanics, including kinematics, Newton's laws, and the conservation laws of energy, linear momentum, and angular momentum. Also covered are topics in gravity, fluid mechanics, waves, and thermodynamics.

Class meets five hours per week in lecture/discussion format. One 3-hour lab per week (PHYS 2219).

Co-Requisite(s): MATH 1210 and PHYS 2219.

PHYS 2215 - Physics for Scientists and Engineers I Lab

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Enrollment limited to transfer students.

One 3-hour lab per week.

Co-Requisite(s): PHYS 2210.

Enrollment limited to transfer students.

PHYS 2219 - Physics for Scientists and Engineers I Lab

Credits: (0)

3-hour lab to be taken concurrently with PHYS 2210.

Co-Requisite(s): PHYS 2210.

PHYS 2220 - Physics for Scientists and Engineers II

Credits: (5)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Second semester of a two semester sequence in calculus-based physics. This semester covers topics in electricity and magnetism, electromagnetic waves, light and optics, relativity, and quantum, atomic, and nuclear physics. Class meets five hours per week in lecture/discussion format. One 3-hour lab per week (PHYS 2229).

Pre-requisite(s): PHYS 2210.

Co-Requisite(s): MATH 1220.

PHYS 2225 - Physics for Scientists and Engineers II Lab

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Enrollment limited to transfer students.

One 3-hour lab per week.

Co-Requisite(s): PHYS 2220.

Enrollment limited to transfer students.

PHYS 2229 - Physics for Scientists and Engineers II Lab

Credits: (0)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

One 3-hour lab per week.

Co-Requisite(s): PHYS 2220.

PHYS 2300 - Scientific Computing for Physical Systems

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

An introduction to computer programming and fundamental numerical algorithms as used for problem solving and visualization in the natural sciences.

Applications may include nonlinear dynamics, chaos, many-particle systems, and Monte Carlo techniques.

Pre-requisite(s): PHYS 2210, MATH 1210, and either MATH 1200 or CS 1030 or permission of the instructor.

PHYS 2600 - Laboratory Safety

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

An interdisciplinary, team-taught course that will be an overview of the major chemical, biological and physical safety issues related to science laboratories and field work. Class will meet once per week and will be taught in a lecture/demonstration format.

PHYS 2710 - Introductory Modern Physics

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Relativity, quantum effects, the hydrogen atom, many-electron atoms, molecular and solid-state bonding, quantum effect devices, nuclear structure, nuclear reactions and devices, elementary particles.

Pre-requisite(s): PHYS 2220, MATH 1200 (may be taken concurrently), and MATH 1220.

PHYS 2800 - Introductory Individual Research Problems

Credits: (1-3)

Time and credit to be arranged. Intended for students working on a directed research project which includes physics/astronomy at the lower division level for one or more semesters.

Pre-requisite(s): Consent of instructor.

Cross-listed with ASTR 2800.

May be repeated up to 10 times.

PHYS 2820 - Elements of Research in the Sciences

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

This interdisciplinary course provides concrete skills for productive entry-level scientific research. Students engage in a hands-on introduction to scientific research and methods, including an introduction to sample handling, data analysis, and dissemination of results through papers and presentations. Upon completion of the course, a student will be prepared for potential internships, summer research programs, and research assistantships both on and off campus.

Pre-requisite(s): MATH 1060 or MATH 1080 or MATH 1210; and CHEM 1210 or PHYS 2210 or PHYS 2010 or (GEO 1110 and GEO 1115).

Cross-listed with CHEM 2820 and GEO 2820.

PHYS 2830 - Introductory Readings in Physics/Astronomy

Credits: (1-3)

Time and credit to be arranged. Intended for students working on a directed reading project which includes physics/astronomy at the lower division level for one or more semesters.

Pre-requisite(s): Consent of instructor.

Cross-listed with ASTR 2830.

May be repeated up to 10 times.

PHYS 2890 INT - Cooperative Work Experience

Credits: (1-6)

Open to all students in the Physics Department who meet the minimum Cooperative Work Experience requirements of the department. Provides academic credit for on-the-job experience. Grade and amount of credit will be determined by the department.

PHYS 2920 - Short Courses, Workshops, Institutes and Special Programs

Credits: (1-4)

Variable Title

Consult the class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript.

PHYS 3160 - Stellar and Planetary Astrophysics

Credits: (3)

Typically Taught Spring Semester: *Full Sem odd years*

Selected topics in astrophysics, with a focus on stellar and planetary systems. Topics may include celestial mechanics, interaction of light and matter, stellar and planetary spectroscopy, stellar atmospheres and interiors, binary star systems, planets and planet formation, and extrasolar planets.

Pre-requisite(s): PHYS 2220.

Cross-listed with ASTR 3160.

PHYS 3170 - Galaxies and Cosmology

Credits: (3)

Typically Taught Spring Semester: *Full Sem even years*

Selected topics in astrophysics, with a focus on galactic astronomy and cosmology. Topics may include gravitational dynamics, interaction of light and matter, galaxy classification, galaxy formation and evolution, the structure of the universe, cosmology, and the origin and fate of the universe.

Pre-requisite(s): PHYS 2220.

Cross-listed with ASTR 3170.

PHYS 3180 - Thermal Physics

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

An introduction to thermodynamics and statistical mechanics. Topics include heat and work; ideal gases; equipartition of energy; entropy; the Boltzmann, Fermi-Dirac, and Bose-Einstein distributions; applications to heat engines, refrigeration, chemical equilibrium, phase transitions, blackbody radiation, and properties of solids.

Pre-requisite(s): PHYS 2220, MATH 1200 and MATH 1220.

PHYS 3190 - Applied Optics

Credits: (3)

Typically Taught Fall Semester: *Full Sem odd years*

Geometrical and physical optics, lasers, lenses, optical instruments, interference, thin films, interferometry, holography, diffraction, gratings, crystal diffraction, polarization.

Two lectures and one 3-hour lab a week.

Pre-requisite(s): PHYS 2220 and MATH 1220.

PHYS 3300 - Advanced Computational Physics

Credits: (3)

Typically Taught Spring Semester: *Full Sem even years*

This course extends the computational skills developed in PHYS 2300 to address a wider range of problems in modern physics. Students will explore the limits of computational methods and develop techniques suited to high-performance computing. Applications may be chosen from nonlinear dynamics, astrophysics, condensed matter physics, and quantum mechanics.

Pre-requisite(s): PHYS 2220 and PHYS 2300.

PHYS 3410 - Electronics for Scientists

Credits: (4)

Typically Taught Fall Semester: *Full Sem*

An introductory course in electronics for students in physics and other sciences. The course includes D.C. and a.c. circuit analysis using complex impedances and covers basic principles of semiconductor operation, transistors, analog and digital integrated circuits, analog-to-digital conversion techniques used in computer interfacing, and noise.

Three lectures and one 3-hour lab a week.

Pre-requisite(s): PHYS 2220.

PHYS 3420 - Data Analysis, Statistics, and Instrumentation

Credits: (3)

Typically Taught Spring Semester: *Full Sem odd years*

Intermediate-level course in computer interfacing (data acquisition and analysis) for students in physics and all other sciences. Topics may include: data acquisition with industry-standard software packages, computerized test and measurement, analog-to-digital and digital-to-analog conversion, data acquisition electronics, electronic sensors (thermal sensors, light sensors, etc.), least squares curve fitting, fast Fourier transforms (FFT), Nyquist's theorem, noisy and weak signals.

Two lectures and one 3-hour lab a week.

Pre-requisite(s): PHYS 2020 or PHYS 2220.

PHYS 3500 - Analytical Mechanics

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Particle motion, oscillating systems; planetary motion, stability of orbits; collisions; Euler's equations, gyroscopic motion; Lagrange's equations, Hamilton's equations, theory of vibrations.

Pre-requisite(s): PHYS 2220, MATH 1200 and MATH 2280.

PHYS 3510 - Electromagnetic Theory

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Vector analysis; electrostatics; calculating electric potentials; solving Laplace's equation; multipole expansions; electrostatic fields in matter; magnetostatics; charges in motion; electrodynamics; Faraday's law; Maxwell's equations.

Pre-requisite(s): PHYS 2220, MATH 1200, MATH 2210 and MATH 2280.

PHYS 3540 - Mechanical and Electromagnetic Waves

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

Periodic motions, free and forced vibrations; resonance; normal modes; dispersion; boundary conditions; electromagnetic waves and light; the Fresnel equations; electromagnetic radiation from accelerating charges.

Pre-requisite(s): PHYS 3500, PHYS 3510.

PHYS 3570 - Foundations of Science Education

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

A thorough investigation of research in science learning and curricular standards at the state and national levels. Foundations of the philosophy of science and scientific inquiry as applicable to science teaching at the secondary level. This course serves as a foundation to a preservice science teacher's education coursework.

PHYS 3710 - Nuclear and Particle Physics

Credits: (3)

Typically Taught Spring Semester: *Full Sem odd years*

Nuclear structure and nuclear reactions including radioactive decay, fission, and fusion, with selected applications. The standard model of elementary particles and interactions. Collider experiments and their interpretation in terms of Feynman diagrams. Topics of current research at the high-energy frontier.

Pre-requisite(s): PHYS 2710.

PHYS 3810 - Experimental

Credits: (1-6)

Individual courses offered on an experimental basis, identified by specific name and description. The specific title will appear on student's transcript along with the authorized credit. May be repeated up to 6 times. Refer to Experimental Courses.

PHYS 3810 - Physics of Space**Credits: (3)****Experimental**

An overview of space around the Earth, our atmosphere, ionosphere, space weather, including the active sun, its thermonuclear core energy production. The course studies the dynamics of the solar-terrestrial connection, the nature of space plasmas and their extensive wave activity.

Pre-requisite(s): PHYS 2710, PHYS 3180, PHYS 3500, PHYS 3510.

PHYS 4200 - The Physics of Materials**Credits: (3)**

Typically Taught Spring Semester: *Full Sem even years*

An introduction to the modern theory of condensed matter. Emphasis is placed on the structural, electrical, and thermal properties of solids, with particular attention to materials of current research interest.

Pre-requisite(s): (May also be taken concurrently): PHYS 2710, PHYS 3180, CHEM 1220.

PHYS 4400 - Advanced Physics Laboratory**Credits: (2)**

Typically Taught Spring Semester: *Full Sem*

Advanced experiments in mechanics, electromagnetism, modern physics, and nuclear physics. This course also covers general laboratory practice, data analysis, and error propagation. Four hours of lab per week.

Four hours of lab per week.

Pre-requisite(s): PHYS 2220; either PHYS 3190 or PHYS 3410.

PHYS 4410 - Materials Characterization Laboratory**Credits: (2)**

Typically Taught Fall Semester: *Full Sem even years*

A series of experiments for advanced students employing modern methods of measurement of properties of materials. The course will teach microscopic and spectroscopic

techniques and general laboratory practice, data analysis, and error propagation.

Four hours of lab per week.

Pre-requisite(s): PHYS 2220 and PHYS 3410.

PHYS 4570 - Secondary School Science Teaching Methods**Credits: (3)**

Typically Taught Fall Semester: *Full Sem*

Acquaintance and practice with various teaching and assessment methods. Development of science curricula including lesson and unit plans. It is recommended that this course be completed immediately before student teaching.

Pre-requisite(s): Admission to the Teacher Education Program.

PHYS 4610 - Quantum Mechanics**Credits: (3)**

Typically Taught Spring Semester: *Full Sem*

Wave-particle duality, Schrodinger equation, wave function, quantization rules, one-dimensional motion, one-electron atoms, spin and orbital angular momentum.

Pre-requisite(s): PHYS 2710, MATH 2270.

Co-Requisite(s): PHYS 3500; MATH 3710.

PHYS 4620 - Advanced Quantum Mechanics**Credits: (3)**

Typically Taught Fall Semester: *Full Sem*

Approximation methods and other selected topics in pure and applied quantum mechanics.

Pre-requisite(s): PHYS 4610.

PHYS 4800 - Individual Research Problems**Credits: (1-3)**

Time and credit to be arranged. Open to qualified students for one or more semesters.

Pre-requisite(s): Consent of instructor.

Cross-listed with ASTR 4800.

May be repeated up to 10 times.

PHYS 4830 - Readings in Physics/Astronomy

Credits: (1-3)

Topics which can be studied include (but are not limited to): mechanics, thermodynamics, kinetic theory, statistical mechanics, electronics, electromagnetism, optics, solid-state physics, modern physics, nuclear physics, relativity, cosmology, and astrophysics. These courses may be taken at any time on a personalized basis. Time and credit to be arranged.

Pre-requisite(s): Consent of instructor.

Cross-listed with ASTR 4830.

May be repeated up to 10 times.

PHYS 4890 INT - Cooperative Work Experience

Credits: (1-6)

A continuation of PHYS 2890. Open to all students.

PHYS 4920 - Short Courses, Workshops, Institutes and Special Programs

Credits: (1-4)**Variable Title**

Consult the class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript.

PHYS 4970 - Senior Thesis

Credits: (2)

An individual research program pursued under faculty supervision. It is expected that one or more semesters of research (PHYS 4800) will precede registration for this course. Course evaluation will include an oral and a written report.

Pre-requisite(s): senior class standing and consent of departmental committee.

PHYS 4990 - Seminar in Physics

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Joint sessions of faculty and students devoted to current topics in physics. Students taking this course for credit will make a presentation based on individual library research of a topic agreed on with the faculty advisor. One credit required for physics majors.

Pre-requisite(s): previous upper division physics course. May be taken twice for credit.

PHYS 5030G - Physics for Teachers

Credits: (2-3)

Science content course for teachers in the MED Science Emphasis Program. To register, select another departmental course and develop a contract detailing additional work required for graduate credit. Contract must be approved by instructor, department chair, and Director of the Master of Education Program.

May be repeated once up to 6 credit hours.

POLS 1010 - Introduction to Political Science

Credits: (3)

Typically Taught Summer Semester: *Online*

Typically Taught Spring Semester: *Full Sem*

The purpose of this course is to define the discipline of political science. By discipline we mean the way in which political science has developed over the past 150 years. We will assess the basic sub-disciplines of political science: American, Comparative, International Relations, Political Theory, Public Administration and Public Law.

POLS 1100 AI - American National Government

Credits: (3)

Typically Taught Summer Semester: *Full Sem, 1st Blk, Online*

Typically Taught Fall Semester: *Full Sem, Online*

Typically Taught Spring Semester: *Full Sem, Online*

A study of American constitutional democracy at the national level, including political institutions, interests, ideals, and the processes through which policies are formulated and implemented.

POLS 1520 SS - Leadership and Political Life

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

The purpose of the Leadership and Political Life class is to introduce students to the theory and practice of leadership in the public realm, which is applicable to the private sector.

POLS 2100 SS - Introduction to International Politics

Credits: (3)

Typically Taught Summer Semester: *Full Sem, Online*

Typically Taught Fall Semester: *Full Sem, Online*

Typically Taught Spring Semester: *Full Sem, Online*

Examines international political theories and concepts such as traditional Realism (power, state, and nationalism) with contrasting theories of Liberalism (globalization, organizations, and law). Application of these theories will be examined through case studies of powerful countries and regions in addition to problems such as the refugee crises, environmental concerns, and threats of global terrorism.

POLS 2200 SS - Introduction to Comparative Politics

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

An introductory survey, comparing and contrasting political ideas, institutions and processes in the political systems of the world to gain a deeper knowledge of, and a broader perspective on, political phenomena.

POLS 2300 SS - Introduction to Political Theory

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

An examination of the arguments behind and the implications of the dominant theories of politics. Theories that are studied include liberalism, conservatism, socialism, and republicanism, among others. In studying these theories, the works of such theorists as Plato, Aristotle, Locke, Rousseau, Marx, and Mill will be examined.

POLS 2400 SS - Introduction to Law and Courts

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

An introductory survey of law and courts emphasizing the structure of courts, different forms of law, and the various actors involved in legal conflicts.

POLS 2500 SS/DV - Human Rights in the World

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Human rights (HR) are a powerful idea in the modern world, but also the focus of controversy. This course will provide students with a broad foundation in human rights

including the ability to analyze HR in domestic and int'l law, examine prevention and prosecution techniques, and debate current issues at home and abroad. Emphasis will be placed on women and gender studies (including LGBT issues), vulnerable populations such as refugees, and atrocity crimes.

POLS 2700 - Introduction to Public Administration

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

To understand the role of public administration in the United States, this course examines the administrators who manage and implement policy, the tools they use, and the environments in which they work. We will cover the economic, political, and social dynamics within public administration as well as management challenges related to human resources, finance, program development, evaluation, and strategic planning. Introduction to public administration would not be complete without discussions about the values and ethics unique to the public sector. We will be using textbooks, other assigned readings, case studies, simulations of ethical quandaries, and whenever possible hands-on learning experiences. The first half of the course will include historical milestones in the history of the administrative state, the logic of public service and the constitutional context of executive power, and management challenges for the public sector in the 21st century. The second half of the course will focus on the policy cycle, program implementation and evaluation, budgeting, leadership and ethics, and the future of public administration.

POLS 2920 - Short Courses, Workshops, Institutes and Special Programs

Credits: (1-3)

Variable Title

Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript.

May be repeated once up to 6 credit hours with a different title.

Note: Course not currently being offered.

POLS 2930 - Peacebuilding in Rwanda

Credits: (3)

Typically Taught Summer Semester: *1st Blk*

In this course, students will travel to Rwanda (Africa) to participate in a Peacebuilding Institute (PBI) with Weber State University and Never Again Rwanda. Weber State students and Rwandan University students will work together for an unforgettable academic experience.

Through readings, site visits, lectures from specialists, and group discussions, students will explore themes of genocide, human rights, transitional justice, and good governance. In addition they will develop skills in cross-cultural dialogue exchange.

POLS 3140 - Foreign Policy of the United States

Credits: (3)

Typically Taught Spring Semester: *Full Sem even years*

An analysis of the making of American foreign policy with reference to the role and influences of beliefs, interests, public opinion, media and especially the institutional struggle between President & Congress. The challenges facing contemporary U.S. foreign policy will also be examined.

POLS 3150 - Model United Nations

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

A study of the current events before the United Nations General Assembly as well as in-depth research on selected countries; includes preparation for the Model United Nations of the Far West and the Northern Utah Model UN. May be repeated once for 6 credit hours.

POLS 3151 - Model United Nations Team

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course prepares students on the Model UN team for the upcoming Fall/Spring conference.

Pre-requisite(s): POLS 3150 with a minimum grade of B. Permission of the instructor.

May be repeated up to 12 credit hours.

POLS 3200 - Middle East and North Africa

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

A survey of the political dynamics of selected states and societies in the Middle East and North Africa (MENA).

Issues to be covered: the impact of early Middle Eastern/North African history upon today's politics; class structures in the MENA countries and their impact on politics; the rise of Arab nationalism; Zionism; the politics of oil; the status of women; the political impact of economic restructuring; Islamic movements; state-building; and political liberalization and democratization in the Middle East and North Africa.

POLS 3210 - Politics in the European Union

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

This course examines the origins and development of the European community/EU and its institutions, theories of integration, and challenges in the creation of a supranational authority. It also compares the impact of EU policies on domestic politics in the individual European states with emphasis on relevant issues of the day, such as EU enlargement, immigration, and the political economy.

POLS 3290 - Democratization and Political Transitions

Credits: (3)

Typically Taught Spring Semester: *Full Sem odd years*

A survey of the democratic transitions literature with focus on political transitions in comparative perspective. This course will compare a variety of different kinds of political transitions in different regions of the world, including cases in which countries have transitioned back to authoritarianism.

POLS 3330 - American Political Thought

Credits: (3)

Typically Taught Spring Semester: *Full Sem odd years*

Historical examination of American thought with stress on its influences on the development of the American Government.

POLS 3340 - Environmental Political Theory

Credits: (3)

Typically Taught Fall Semester: *Full Sem even years*

This is an upper division course in political theory, with the specific focus being environmental political theory. The

course examines a range of theoretical perspectives on a range of issues including how we conceptualize humans, nature, and politics.

POLS 3400 - LGBTQ Politics

Credits: (3)

Social movements employ a variety of methods to achieve the protection of their members' rights and interests. This course focuses on these issues through the study of gender and sexual minorities in the United States from the mid-Twentieth Century to the present. It examines the strategies, both formal and informal, adopted to achieve social change.

Note: This course is taught during odd years.

POLS 3600 - Political Parties

Credits: (3)

Typically Taught Fall Semester: *Full Sem odd years*

A study of the organization and function of the American political parties, political organizations that play a role alongside political parties in the American political system, such as interest groups, and a comparative study of political parties in other countries.

POLS 3610 - Campaigns and Elections

Credits: (3)

Typically Taught Fall Semester: *Full Sem even years*

A study of the electoral process in the United States with an examination of national institutional elections, state and local elections, as well as election rules. Also a study of campaigning techniques in elections at all levels.

POLS 3620 - Political Behavior

Credits: (3)

Typically Taught Spring Semester: *Full Sem odd years*

This course is designed to introduce students to the nature of mass political behavior and its role in the political process. Further, it examines the interaction between and among diverse social groups, the media, and policy makers. The course will also emphasize the political psychology of public opinion formation and political decision of those outside the mainstream political institutions.

POLS 3640 - Media and Politics

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

In terms of influencing American politics, media perform three functions: supplying information about issues and candidates; setting the agenda for public debate; conveying messages between elected officials and the public. In this course we will focus on the effect media has on political discourse in the United States.

POLS 3700 - Bureaucratic Politics

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

Presents basic theories, concepts, and analysis of current practices and problems in governmental administration.

POLS 3750 - Urban Government and Politics

Credits: (3)

Typically Taught Fall Semester: *Full Sem odd years*

A study of local government organization and policy problems, with an emphasis on problems of the metropolitan areas.

POLS 3760 - State Government and Politics

Credits: (3)

Typically Taught Spring Semester: *Full Sem even years*

An examination of governmental organization, operation, policy making, and electoral politics of state governments and the dynamics of relationships with other levels of government.

POLS 3780 - Lobbying: Theory and Practice

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

This course looks at both the theory and practice of lobbying, primarily at the state and local governmental levels; and it examines the business of lobbying, how the profession of lobbying has developed, what lobbyists do, the ethical constraints of lobbying, and from where the right to petition the government is derived.

POLS 3990 - Political Analysis

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

An introduction to the scope and methods of political science. This course focuses on the formulation of

hypotheses, the collection of data, appropriate study design, and study analysis through statistical testing and interpretation.

Pre-requisite(s): POLS 1010.

POLS 4020 - Constitutional Law: Powers

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

An introduction to many of the doctrines of American Constitutional Law around the structure of the U.S. Constitution, governmental powers, and federalism. Topics include constitutional theory; congressional, executive, and judicial power; and the relationship between federal and state governments.

POLS 4030 - Constitutional Law: Rights

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

An introduction to many of the doctrines of American Constitutional Law. Topics include the study of various fundamental rights including free speech, religious freedom, equal protection, and privacy rights.

POLS 4060 - Law and Society

Credits: (3)

This course explores how law operates in society and how society influences the nature of the law. Topics may include the role of race in law, legal consciousness, efficacy of legal action, and the nature of the legal profession.

Note: Course not currently being offered.

POLS 4100 - Free Speech

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

This course explores the historical meaning of free speech in the United States, the modern development of free speech principles in constitutional law, and the application of those principles to modern controversies.

POLS 4160 - Topics in Global Politics

Credits: (3)

Variable Title

Typically Taught Fall Semester: *Full Sem*

The study of selected contemporary problem areas in world politics to assess their impact within the international arena.

May be repeated for a maximum of 6 hours toward the hours required for Political Science majors and only 3 hours will be counted toward the political science minor requirement.

POLS 4180 - International Law and Organization

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

In-depth exploration of international society through the basic principles of international law and the organizations that comprise our world. Emphasis is given to international criminal law, international humanitarian law, human rights law and the prominence of the United Nations.

POLS 4190 - Theories of International Politics

Credits: (3)

Typically Taught Fall Semester: *Full Sem even years*

An analysis of traditional and contemporary theories offered to explain politics in the international arena.

POLS 4200 - Dictatorships

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Political science has long had a bias towards democracies. Authoritarian governments, however, are far more common both over history and today. This course will thus expand the coverage of governmental types and instruct students in the varieties of authoritarian governments and their methods of governance.

POLS 4210 - Violence and Contestation

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

This course examines theories and case studies on the processes shaping collective challenges to authority in different countries around the world. Topics include causes and mechanics of mobilization, the contexts in which protest movements emerge, repression and violence, strategies, and determinants of political outcomes.

POLS 4360 - Classical Political Thought

Credits: (3)

Typically Taught Spring Semester: *Full Sem even years*
An examination of ideas of God, human nature, society, the state, the problem of evil, etc., from Ancient Greece to the middle ages.

POLS 4380 - Modern Political Thought

Credits: (3)

Typically Taught Fall Semester: *Full Sem even years*
A survey of political theory from the 17th century to the present, with a focus on theoretical formulations and critiques of democratic government and the political subject.

POLS 4600 - American Congress

Credits: (3)

Typically Taught Fall Semester: *Full Sem odd years*
A study of the United States Congress and its members. This course examines the legislative decision making process as well as an emphasis on the history of the institution.

POLS 4620 - The U.S. Supreme Court

Credits: (3)

Typically Taught Fall Semester: *Full Sem even years*
A study of the U.S. Supreme Court as a legal and political institution. This course examines the historical development of the Supreme Court, its relationship to other institutions, and judicial decision-making.

POLS 4640 - American Presidency

Credits: (3)

Typically Taught Spring Semester: *Full Sem even years*
A study of the United States presidency and the people who have held the office. This course examines individual presidential character and personality as well as providing a survey of the history of the institution.

POLS 4750 - Public Policy Analysis

Credits: (3)

Typically Taught Fall Semester: *Full Sem odd years*
A study of the American policy process, with an emphasis on the dynamics involved in the creation, adoption and implementation of selected domestic policies.

POLS 4760 - Rwanda: Genocide and Aftermath

Credits: (3)

Typically Taught Summer Semester: *Online*
This course will examine the 1994 Rwandan genocide and its aftermath. The class will discuss the historical legacy of colonialism and the impact that post-colonial policies had in pre-genocide Rwanda. Next, the events surrounding the genocide within Rwanda will be discussed in addition to its immediate impact on the surrounding Great Lakes countries of Africa. Finally, the legacy of the Rwandan genocide will be examined, especially in regards to politics and international law. Specific issues to be addressed include the complex relationship between political and legislated memories, ethnic identities before and after the genocide, the creation and implementation of transitional justice measures including the national courts, gacaca courts, and the International Criminal Tribunal for Rwanda.

POLS 4770 - Genocide, War, and Human Rights

Credits: (3)

Typically Taught Fall Semester: *Full Sem*
Typically Taught Spring Semester: *Full Sem*
This course examines the complexity of genocide studies, within the framework of war and human rights abuses, including an examination of genocide theories, definitions and debates. Within this context, both internationally recognized genocides will be examined (Germany, Rwanda, former Yugoslavia) and those which are more contested such as indigenous and political based massacres. The course will also examine Crimes Against Humanity, War Crimes and how societies recover from these types of crimes. The course will take an interdisciplinary approach; with an emphasis on law and politics.

POLS 4800 - Individual Projects and Research

Credits: (1-2)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Pre-requisite(s): Department approval required.

A maximum of 6 hours may be counted toward the major or 3 hours toward the minor.

POLS 4830 - Directed Readings

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Pre-requisite(s): Department approval required.

A maximum of 6 hours may be counted toward the major or 3 hours toward the minor.

POLS 4860 INT - Washington D.C. Internships

Credits: (1-6)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Pre-requisite(s): Department approval required.

A maximum of 6 hours may be counted toward the major or 3 hours toward the minor.

POLS 4861 INT - International Internships

Credits: (1-6)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Internships located outside of the United States. Department approval required.

A maximum of 6 hours may be counted toward the major or 3 hours toward the minor.

POLS 4865 INT - State and Local Internship

Credits: (1-6)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

State or Local internship credits. Professor approval required.

May be repeated up to 5 times and up to 6 credit hours.

POLS 4870 INT - Internship in Perspective

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course is designed to put the internship experience in broader context. Students will read books and articles on

current issues and then focus on the way that government and non-governmental institutions combine to make policy. In this students will take their political science knowledge and apply it to practical politics.

Co-Requisite(s): POLS 4860.

POLS 4880 INT - Internship Research

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course is designed to complement the student intern's experience while in the placement. This course is designed to give the student a chance to do a research project based on his or her experience in the internship. The research evolves out of assignments given at the internship.

Pre-requisite(s): POLS 4860.

POLS 4920 - Short Courses, Workshops, Institutes and Special Programs

Credits: (1-3)

Variable Title

Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript.

May be repeated once up to 6 credit hours with a different title.

Note: Course not currently being offered.

POLS 4940 - Topics in American Politics & Thought

Credits: (3)

Variable Title

The study of selected contemporary problem areas in American politics and thought to assess the impact and implication within the U.S. domestic arena. This course may count once to satisfy a subfield requirement at the discretion of the department chair.

This course may be repeated once up to 6 credit hours (in different topics).

Note: Course not currently being offered.

POLS 4990 - Senior Seminar/Senior Thesis

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

A seminar in the field of political science. Students will be

required to produce a major paper out of this seminar.
Required for Political Science majors.

Pre-requisite(s): POLS 1010. Department approval required.

Note: Note: Political Science BS students must take POLS 3990 before POLS 4990.

PS 1143 - Principles of Selling and Persuasion

Credits: (3)

Typically Taught Summer Semester: *Full Sem Online*

Typically Taught Fall Semester: *Full Sem; Full Sem Online*

Typically Taught Spring Semester: *Full Sem; Full Sem Online*

A retail, wholesale, and direct selling and persuasion course. Emphasis upon mastering and applying the fundamentals of selling and persuasion. Preparation for and execution of sales demonstrations required.

PS 1303 - Sales Channels

Credits: (3)

Typically Taught Summer Semester: *Full Sem Online*

Typically Taught Fall Semester: *Full Sem; Full Sem Online*

Typically Taught Spring Semester: *Full Sem; Full Sem Online*

Examination of the distribution process of goods and services, the interrelationships of customer demands, production, pricing, promotion, and the movement of goods from producer to consumer.

PS 1401 - Introduction to Sales and Service Technology

Credits: (1)

Typically Taught Summer Semester: *Full Sem Online*

Typically Taught Fall Semester: *Full Sem; Full Sem Online*

Typically Taught Spring Semester: *Full Sem; Full Sem Online*

This course is designed to help those new PS majors or those exploring the PS major field learn more about the career/ employment options available. This course is also designed to review the various academic emphases, major requirements, and decision making process.

PS 1403 - Introduction to Customer Care

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A study of the basic techniques for providing quality service to clients.

PS 1503 - Introduction to Fashion Merchandising

Credits: (3)

Typically Taught Fall Semester: *Full Sem; Full Sem Online*

Typically Taught Spring Semester: *Full Sem; Full Sem Online*

A study of the Fashion Merchandising industry, including careers in design, manufacturing, wholesaling, promotion, and retailing, including well-known designers, manufacturers, promotion media and apparel and accessory retail institutions.

PS 1890 INT - Work Experience

Credits: (1-3)

Typically Taught Fall Semester: *Ful Sem*

Typically Taught Spring Semester: *Full Sem*

Open to all first year declared majors in Professional Sales. Provides academic credit for on-the-job experience. Grade and amount of credit will be determined by department. May be repeated a maximum of 3 times or until a maximum of 6 credit hours is reached.

PS 2182 - Credit and Collection Methods

Credits: (2)

Typically Taught Fall Semester: *Full Sem Online*

Typically Taught Spring Semester: *Full Sem Online*

The study of specific credit and collection methods for retail, wholesale, and service industries; including cost of retail credit, credit investigation, methods of collecting bad accounts, securing new business through credit applications, and credit control.

PS 2383 - Retail Merchandising and Buying Methods

Credits: (3)

Typically Taught Summer Semester: *Full Sem Online*

Typically Taught Fall Semester: *Full Sem; Full Sem Online*

Typically Taught Spring Semester: *Full Sem; Full Sem Online*

The study of the retail buyer's duties, different buying organizations, and techniques, procedures of purchasing merchandise for resale and retail merchandising strategies.

PS 2443 - Advertising Methods

Credits: (3)

Typically Taught Summer Semester: *Full Sem Online*

Typically Taught Fall Semester: *Full Sem; Full Sem Online*

Typically Taught Spring Semester: *Full Sem; Full Sem Online*

A study of advertising methods as they relate to local retail, wholesale, and service industries, including newspaper, magazine, radio, TV, mail, outdoor and special promotion events.

PS 2603 - Advanced Selling Techniques

Credits: (3)

Typically Taught Summer Semester: *Full Sem Online*

Typically Taught Fall Semester: *Full Sem; Full Sem Online*

Typically Taught Spring Semester: *Full Sem; Full Sem Online*

Study of advanced techniques including, opening, investigating, demonstrating capability and obtaining commitment of the consultative and strategic seller.

PS 2703 - Internet Sales and Service

Credits: (3)

Typically Taught Fall Semester: *Full Sem Online*

Typically Taught Spring Semester: *Full Sem Online*

The study of Internet sales, service and technology. Understanding the process of establishing an online business, setting up online shopping capabilities and database integration. Online customer service and retention, buyer behavior and current Internet sales issues are presented.

PS 2890 INT - Work Experience II

Credits: (1-3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Open to second year declared majors in Professional Sales. A continuation of PS 1890.

May be repeated a maximum of 3 times or until a maximum of 6 credit hours is reached.

PS 2903 - Professional Selling Methodologies

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

The study of selling and customer service techniques as they apply to virtual, inside and field sales.

PS 2991 - Sales/Service Technology Seminar

Credits: (1-3)

Typically Taught Spring Semester: *Full Sem*

Directed studies, group discussions, and analysis of selected topics pertinent to sales and service technology. Also designed to prepare sales and service majors for the job market and career opportunities.

May be repeated until a maximum of 3 credit hours is reached.

PS 3001 - Sales Career Strategies

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

The study of developing a sales career including finding sales opportunities and how to market yourself into landing those opportunities.

PS 3003 - Relational Selling

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

The study of relational selling techniques as they apply to virtual, inside and field sales in all industries and sales situations.

PS 3103 - Sales Personalities and Profiles

Credits: (3)

Typically Taught Summer Semester: *Full Sem Online*

Typically Taught Fall Semester: *Full Sem; Full Sem Online*

Typically Taught Spring Semester: *Full Sem; Full Sem Online*

Discovering and understanding your own personality style

and how to adapt to your client for selling success is the focus of this course. We will utilize the Everything DISC Sales assessment to distinguish the 4 behavior styles and the Strengths Finder assessment to utilize our talents throughout the selling process.

Pre-requisite(s): PS 1143.

PS 3203 - Customer Service Techniques

Credits: (3)

Typically Taught Summer Semester: *Full Sem Online*

Typically Taught Fall Semester: *Full Sem; Full Sem Online*

Typically Taught Spring Semester: *Full Sem; Full Sem Online*

A study of customer service techniques required in order to sell and service products, systems, or services needed by industrial manufacturing, processing, mining, construction firms, or other related technical areas.

PS 3250 - Business Communication

Credits: (3)

Typically Taught Summer Semester: *Full Sem Online*

Typically Taught Fall Semester: *Full Sem; Full Sem Online*

Typically Taught Spring Semester: *Full Sem; Full Sem Online*

Application of oral and written communication, including diversity and international aspects of communication.

Pre-requisite(s): ENGL 2010.

PS 3303 - Technology in Sales

Credits: (3)

Typically Taught Summer Semester: *Full Sem online*

Typically Taught Fall Semester: *Full Sem, Full Sem Online*

Typically Taught Spring Semester: *Full Sem, Full Sem Online*

This course will teach professional sales people to use sales technologies to (1) attract new clientele (2) strengthen customer relationships (3) expand existing accounts and (4) establish a position as an authority in the field.

Pre-requisite(s): PS 1143.

PS 3363 - Contract and Sales Negotiation Techniques

Credits: (3)

Typically Taught Summer Semester: *Full Sem Online*

Typically Taught Fall Semester: *Full Sem; Full Sem*

Online

Typically Taught Spring Semester: *Full Sem; Full Sem Online*

Principles, techniques and analysis of strategies involved in contract and sales negotiations. Development of integrated strategies through group and individual interaction.

Pre-requisite(s): PS 1143.

PS 3403 - Pharmaceutical and Medical Device Sales

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

A study of the opportunities that exist in the medical field as it pertains to selling. The course examines the integral relationship that pharmaceutical and medical device representatives have within the medical community.

Pre-requisite(s): PS 1143 and PS 2603.

PS 3503 - Sales Planning and Forecasting

Credits: (3)

Typically Taught Summer Semester: *Full Sem Online*

Typically Taught Fall Semester: *Full Sem*

A study of sales planning and forecasting. Special emphasis will be given to goal setting, prioritizing, sales forecasting and establishing and managing a sales territory. The student will also learn techniques for individual goal setting and time management.

Pre-requisite(s): MATH 1030 or higher.

PS 3563 - Principles of Sales Supervision

Credits: (3)

Typically Taught Summer Semester: *Full Sem Online*

Typically Taught Fall Semester: *Full Sem; Full Sem Online*

Typically Taught Spring Semester: *Full Sem; Full Sem Online*

Practical application of first-line supervisory skills including choosing, organizing, training, and evaluating entry-level employees; making supervisory decisions; and solving first-line supervisory problems. Understanding the basic responsibilities of a supervisor in production organizations and service organizations.

PS 3702 - Developing Team Leadership Skills

Credits: (2)

Typically Taught Summer Semester: *Full Sem; Full Sem Online*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A skills based course designed to develop the interpersonal and leadership skills necessary to work effectively in teams and guide teams through the group stages of development. This course will be facilitated in such a way the participants will learn how to diagnose team developmental level and develop a high performing team by applying the principles of situational leadership and the DISC personality profiles system.

Pre-requisite(s): PS 3563.

PS 3703 - Professional Sales Simulations

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Application of advanced persuasion skills to use in professionally organized competitions. This course will use simulations and role-playing to develop persuasive techniques and theoretical applications.

Pre-requisite(s): PS 1143.

May be repeated three times for a maximum of six credit hours.

PS 3803 - Sales Proposals

Credits: (3)

Typically Taught Summer Semester: *Full Sem Online*

Typically Taught Fall Semester: *Full Sem; Full Sem Online*

Typically Taught Spring Semester: *Full Sem; Full Sem Online*

A study of selling techniques required in order to sell products, systems, or services needed by industrial manufacturing, processing, mining, construction firms, or other related technical areas.

Pre-requisite(s): PS 3563.

PS 3903 - Sales Presentation Strategies and Techniques

Credits: (3)

Typically Taught Summer Semester: *Full Sem; 1st Blk Online*

Typically Taught Fall Semester: *Full Sem; Full Sem Online*

Typically Taught Spring Semester: *Full Sem; Full Sem Online*

Principles and practices for the five major categories of professional sales consultants.

Pre-requisite(s): PS 1143 and PS 3803.

PS 4203 - Ethical Sales and Service

Credits: (3)

Typically Taught Summer Semester: *Full Sem Online*

Typically Taught Fall Semester: *Full Sem; Full Sem Online*

Typically Taught Spring Semester: *Full Sem; Full Sem Online*

Principles, techniques and analysis of ethics in the sales and service professions. Utilizes group interaction, individualized hands-on experiences and a field based experience.

Pre-requisite(s): PS 3563.

PS 4610 INT - Senior Project I

Credits: (3)

Typically Taught Summer Semester: *Full Sem Online*

Typically Taught Fall Semester: *Full Sem, Full Sem Online*

Typically Taught Spring Semester: *Full Sem, Full Sem Online*

A capstone project for students in their final year of the professional sales degree. Provides hands-on experiences in the areas of sales and service including sales, customer service techniques, presentation strategies, and team leadership development. This course focuses on working with sales and service problems in a departmentally approved work environment.

Co-Requisite(s): PS 4620.

Pre-requisite/Co-requisite: PS 3103, PS 3363, PS 3903.

PS 4620 INT - Senior Project II

Credits: (3)

Typically Taught Summer Semester: *Full Sem Online*

Typically Taught Fall Semester: *Full Sem, Full Sem Online*

Typically Taught Spring Semester: *Full Sem, Full Sem Online*

A continuation of PS 4610.

Co-Requisite(s): PS 4610.

Pre-requisite/Co-requisite: PS 3103, PS 3363, PS 3903.

PS 4830 - Directed Readings

Credits: (1-3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*
Individual readings supervised by a faculty member.
Pre-requisite(s): Approval of instructor.
May be repeated twice for a maximum of 3 credit hours.

PS 4920 - Workshop Lecture

Credits: (1-2)
Variable Title
Typically Taught Fall Semester: *Full Sem*
Upper division workshop class based on honing the skills of identifying a specific target market, investigating the value proposition of a degree and career in Professional Sales and applying sales strategies and packaging a presentation for area high school students.
May be repeated up to 3 times for a maximum of 4 credit hours with different content.

PS 4993 - Sales Career Seminar

Credits: (3)
Typically Taught Summer Semester: *Full Sem Online*
Typically Taught Fall Semester: *Full Sem; Full Sem Online*
Typically Taught Spring Semester: *Full Sem; Full Sem Online*
Research and discussion of sales and service related problems. Also designed to prepare sales and service majors for the job market and career opportunities.

PSY 1010 SS - Introductory Psychology

Credits: (3)
Typically Taught Summer Semester: *Full Sem, 1st Blk, 2nd Blk, Full Sem Online*
Typically Taught Fall Semester: *Full Sem, 1st Blk, 2nd Blk, Full Sem Online*
Typically Taught Spring Semester: *Full Sem, 1st Blk, 2nd Blk, Full Sem Online*
Course Fee: \$3.00
Introduction to the scientific study of human behavior.

PSY 1540 - Designing Your Life

Credits: (3)
Typically Taught Spring Semester: *Full Sem*
The course is designed to help students understand and overcome the challenges many college students face in the transition to adulthood, a period known as emerging adulthood. Because the course examines issues relevant to self and identity development, students will learn the

psychological principles and developmental processes associated with becoming functional college students and young adults.

PSY 2000 SS - The Psychology of Human Relationships

Credits: (3)
Typically Taught Summer Semester: *Full Sem, Full Sem Online*
Typically Taught Fall Semester: *Full Sem, Full Sem Online*
Typically Taught Spring Semester: *Full Sem, Full Sem Online*
A systematic review of the research on interpersonal relationships, including the study of multiple factors that contribute to relationship development and functioning and the diverse socio-cultural contexts in which relationships occur.

PSY 2010 - Science and Profession of Psychology

Credits: (3)
Typically Taught Fall Semester: *Full Sem, Full Sem Online*
Typically Taught Spring Semester: *Full Sem, Full Sem Online*
The purpose of this course is to build upon Introductory Psychology so that students may better understand the discipline as both a science and a profession. The course covers a range of topics, including research, statistics, ethics, career options, graduate school options and preparation, critical to all fields of psychology and provides the skills necessary for students to succeed in upper-division courses and career preparation. This course is designed for students who are interested in or beginning to pursue psychology as an academic major or minor.
Pre-requisite(s): PSY 1010.

PSY 2020 - Mental Health Awareness

Credits: (3)
Typically Taught Fall Semester: *1st Blk*
Typically Taught Spring Semester: *1st Blk*
Students in this course will learn how to recognize when someone is in crisis, how to listen to a peer in distress, and how to refer them to appropriate services. Students will gain a basic understanding of common types of disorders and distress seen on campus (e.g., depression, anxiety). Students will also gain an understanding of

adaptive coping skills and how to implement them in their own lives.

PSY 2250 - Learning and Memory

Credits: (3)

Typically Taught Summer Semester: *Full Sem, Full Sem Online*

Typically Taught Fall Semester: *Full Sem, Full Sem Online*

Typically Taught Spring Semester: *Full Sem, Full Sem Online*

This course will involve a survey and analysis of the basic processes involved in acquisition, retention, and expression of new behaviors and alterations of existing behaviors in animals and humans. The course will examine the central theoretical concepts and issues in the fields of learning and memory.

Pre-requisite(s): PSY 1010.

PSY 2370 - Psychology of Women and Gender

Credits: (3)

Typically Taught Summer Semester: *Full Sem, Full Sem Online*

Typically Taught Fall Semester: *Full Sem, Full Sem Online*

Typically Taught Spring Semester: *Full Sem, Full Sem Online*

The philosophical, theoretical, and empirical issues of psychology of gender. Issues include gender differences, stereotypes, androgyny, sexuality, health issues, achievement motivation, gender stereotypes, global women's issues, sexual orientation, issues for women with disabilities, and violence.

Pre-requisite(s): PSY 1010.

PSY 2400 - Positive Psychology

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course surveys the scientific study of how and why people flourish, achieve lasting happiness, and are able to live "The Good Life." The course includes classic and contemporary psychological theory and psychological research dedicated to understanding how people achieve optimal functioning.

Pre-requisite(s): PSY 1010.

PSY 2710 - Biopsychology

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$5.00

Biological basis of human & animal behavior, with emphasis upon sensory and nervous system processes underlying motivation, learning, perception, emotion, & abnormal behavior.

PSY 2800 INT - Projects and Research

Credits: (1-3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Supervised participation in faculty research projects in various areas of psychology. Written report required at end of semester; oral report assigned at discretion of faculty supervisor.

Pre-requisite(s): PSY 1010 and permission of the instructor.

May be repeated 4 times for a maximum of 4 credit hours.

PSY 2830 - Directed Readings

Credits: (1-3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Independent readings or secondary research on advanced special topics under the direction of a faculty mentor. For each hour of credit in a readings project the student is required to read an appropriate number of primary research journal articles and book chapters. A paper written in APA style and oral report are required at the end of the term.

Pre-requisite(s): PSY 1010 and faculty mentor permission. May be repeated 4 times for a maximum of 4 credit hours.

PSY 2860 - Practicum

Credits: (1-3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Lower division practicum course that involves placement of students in state and community agencies for the purpose of providing supervised practice in application of psychological skills and knowledge.

Pre-requisite(s): PSY 1010.

May be repeated for a maximum of 6 credit hours.

PSY 2890 INT - Cooperative Work Experience

Credits: (1-2)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Open to all students who meet the following requirements.

Provides academic credit for on-the-job learning experience. Learning experiences will be specified in a learning contract. Grade and amount of credit will be determined by the department. Limited to two credit hours per semester and four credit hours counted toward the psychology major and minor from the following courses: PSY 2890, PSY 4890, PSY 4860 and PSY 4390. Federal regulations restrict all Cooperative Work Experience to no more than six semester hours. Must be employed in a position that uses psychological training. By prior permission of instructor only.

Pre-requisite(s): PSY 1010.

May be repeated 4 times for a maximum of 4 credit hours.

PSY 2920 - Short Courses, Workshops, Institutes and Special Programs

Credits: (1-3)

Variable Title

Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript.

Pre-requisite(s): PSY 1010.

PSY 3000 - Child Psychology

Credits: (3)

Typically Taught Summer Semester: *1st Blk, 2nd Blk*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Principles and theories of physiological, psychological, emotional, cognitive, personality and social child development and parent-child relations and developmental problems.

Pre-requisite(s): PSY 1010.

PSY 3010 - Abnormal Psychology

Credits: (3)

Typically Taught Summer Semester: *1st Blk, Full Sem Online*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

An overview of abnormal human behavior, its etiology,

symptoms and treatment as seen by current psychological paradigms.

Pre-requisite(s): PSY 1010.

PSY 3020 - Child and Adolescent Psychopathology

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

An overview of the etiology, diagnosis, developmental course, treatment, and prevention of disorders first evident in childhood and adolescence.

Pre-requisite(s): PSY 1010.

PSY 3030 - Health Psychology

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

This course examines how psychological states (e.g. anxiety, stress) influence physical health, and how physical states (e.g. illness, pain) and the environment influence psychological health. Topics will include stress, coping, adherence to treatment, pain, chronic disease, psychoneuroimmunology and health behavior change. The course will emphasize the biopsychosocial model in understanding health and disease.

Pre-requisite(s): PSY 1010.

PSY 3100 - Psychology of Diversity

Credits: (3)

Typically Taught Summer Semester: *1st Blk*

Typically Taught Spring Semester: *Full Sem*

This course examines the psychological issues associated with human diversity including culture, disabling conditions, gender, class, ethnicity, and others. It addresses the psychological principles underlying these issues and offers effective ways of dealing with these issues.

Pre-requisite(s): PSY 1010.

PSY 3140 - Adolescent Psychology

Credits: (3)

Typically Taught Summer Semester: *1st Blk, 2nd Blk, Full Sem Online*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Principles and theories of physiological, psychological, emotional, cognitive, personality and social adolescent development and parent-adolescent relations and

developmental problems.

Pre-requisite(s): PSY 1010.

PSY 3200 - Psychology of Sport, Injury & Rehabilitation

Credits: (3)

This course is designed to provide a basic understanding of the psychology of sport, injury, and rehabilitation. Topics covered include: emotion, motivation, mental skills training and use, psychological antecedents of injury, psychology of injury and rehabilitation, career transition and termination, disabilities, rehabilitation/exercise adherence, eating disorders, alcohol and drug/substance abuse, gender and cultural diversity, and research methods related to psychology of sport, injury and rehabilitation.

Pre-requisite(s): PSY 1010 or HLTH 1110.

Cross-listed with RHS 3200.

Note: Course not currently being offered.

PSY 3240 - The Psychology of Drug Use and Abuse

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

The course addresses the biopsychology factors influencing the use and abuse of drugs and the behavioral and social consequences of such use and abuse.

Pre-requisite(s): PSY 1010.

Note: This course is offered on the SLCC Miller campus

PSY 3255 - Conditioning, Learning, & Behavior Modification

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course will involve an analysis of the complex processes involved in the acquisition, retention, and expression of new behaviors and the mechanisms related to altering existing behaviors in all types of animals (human and nonhuman). The course will examine the historical and current central theoretical concepts and issues in the fields of conditioning and learning. Additionally, the course will provide you with an understanding of the principles of applied behavioral analysis and modification.

Pre-requisite(s): PSY 1010.

PSY 3270 - Motivation and Emotion

Credits: (3)

Typically Taught Fall Semester: *Full Sem-SLCC Miller Campus*

Theories, content areas, research methods, measurement and practical applications in the psychology of motivation and emotion.

Pre-requisite(s): PSY 1010.

PSY 3430 - Theories of Personality

Credits: (3)

Typically Taught Summer Semester: *1st Blk*

Typically Taught Fall Semester: *Full Sem, Full Sem Online*

Typically Taught Spring Semester: *Full Sem, Full Sem Online*

A survey of the major theories of personality.

Pre-requisite(s): PSY 1010.

PSY 3450 - Psychology of Language

Credits: (3)

Typically Taught Spring Semester: *Full Sem even years*

This course will provide a comprehensive overview of psycholinguistics. It will focus on the cognitive and social aspects of language production and comprehension in both spoken and written language.

Pre-requisite(s): PSY 1010 or ENGL 3010.

PSY 3460 - Social Psychology

Credits: (3)

Typically Taught Summer Semester: *Full Sem Online*

Typically Taught Fall Semester: *Full Sem, Full Sem Online*

Typically Taught Spring Semester: *Full Sem, Full Sem Online*

An empirically based survey of the effects of social influence on the basic psychological processes of individuals. Included are the individual in culture and society, the development of attitudes, and the impact of the group.

Pre-requisite(s): PSY 1010.

PSY 3500 - Cognition

Credits: (3)

Typically Taught Summer Semester: *Full Sem, Full Sem Online*

Typically Taught Fall Semester: *Full Sem, Full Sem Online*

Typically Taught Spring Semester: *Full Sem, Full Sem*

Online

Principles of cognition and thinking including attention, memory, concept learning, decision making, and problem solving.

Pre-requisite(s): PSY 1010.

PSY 3550 - Psychology of Consciousness

Credits: (3)

The study of the nature, origins, evolution, and functions of brain, mind and consciousness as these pertain to sensation, perception, learning, memory, cognition, motivation, emotion, behavior, and social relationships from a contemporary neuro-cognitive science perspective.

Pre-requisite(s): Introductory Psychology (PSY 1010), Biopsychology (PSY 2710) and instructor consent required; recommend some background in Introductory Philosophy, Perception, and/or Cognition.

Note: Course not currently being offered.

PSY 3560 - Group Dynamics and Counseling

Credits: (3)

Principles of effective small group behavior. Awareness of group forces and pressures and development of insights into personal relationships in groups. Theoretical and experiential approaches to Group Counseling.

Pre-requisite(s): PSY 1010.

Note: Course not currently being offered.

PSY 3600 - Statistics in Psychology

Credits: (3)

Typically Taught Summer Semester: *1st Blk*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Techniques of data collection and analysis for application to experimental research in Psychology.

Pre-requisite(s): MATH 1010 or QL with passing grade of C or better.

PSY 3605 - Psychology Statistics Lab

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$5.00

This course covers the application of statistical, database,

and graphical software for psychological research analysis and presentation.

Pre-requisite/Co-requisite: Pre-requisite or co-requisite: PSY 3600 or equivalent.

PSY 3610 - Research Methods in Psychology

Credits: (4)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$5.00

Scientific methods of behavioral research. Emphasis upon design, conducting, and analysis of experiments on human and animal behavior as well as proposal writing and critiques of experimental literature.

Pre-requisite(s): PSY 1010 and PSY 3600 or equivalent with prior approval from the Department Chair.

Pre-requisite/Co-requisite: PSY 3605 or equivalent with prior approval from the Department Chair.

PSY 3615 - Psychological Statistics and Methods I

Credits: (4)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$5.00

This course will focus on the scientific methods of behavioral and psychological research. Specific emphasis will be placed upon research design, study preparation, data collection, and analysis of experiments on human and animal behavior as well as proposal writing and critiques of experimental literature.

Pre-requisite(s): MATH 1010 or QL and PSY 1010.

PSY 3616 - Psychological Statistics and Methods II

Credits: (4)

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$5.00

This course will focus on the scientific methods of behavioral and psychological research. Specific emphasis will be placed upon research design, study preparation, data collection, and analysis of experiments on human and animal behavior as well as proposal writing and critiques of experimental literature. The course will cover experimental and quasi-experimental approaches and the statistical tools associated with these approaches (e.g., ANOVAs).

Pre-requisite(s): MATH 1010 or equivalent, PSY 1010 and PSY 3615.

PSY 3730 - Perception

Credits: (3)

Typically Taught Spring Semester: *Full Sem even years*
Sensory and perceptual processes whereby living organisms acquire information about the world through the sensory structures, and then select, organize and interpret that information.

Pre-requisite(s): PSY 1010.

PSY 3740 - Neuropsychopharmacology

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course provides an in depth analysis of drugs on behavior. Topics include how drugs affect the brain, and consequently behavior, the underlying brain and environmental factors thought to be responsible for drug addiction, tolerance, and sensitivity, pharmacological treatment of major psychological disorders, the classification of common psychoactive drugs, and mechanisms of action of commonly abused drugs.

Pre-requisite(s): NEUR 2050 or PSY 2710 or instructor approval.

PSY 3850 - Forensic Psychology

Credits: (3)

Typically Taught Fall Semester: *Full Sem, Full Sem Online*

Typically Taught Spring Semester: *Full Sem, Full Sem Online*

A survey course examining the application of fundamental issues in psychology to the criminal justice system.

Pre-requisite(s): PSY 1010.

PSY 4000 - Advanced General

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A senior level review of modern concepts in all the major areas of psychology. Designed to help a student prepare for the advanced part of the GRE in psychology. Strongly recommended for those who plan to teach psychology. 24 credit hours of psychology courses and instructor approval required.

Pre-requisite(s): PSY 1010.

PSY 4050 - Evolutionary Psychology

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Examines origins and evolutionary development of early hominid and contemporary human behavior, e.g., competition and cooperation, mating, reproductive and care-giving strategies, and kinship behaviors. Includes ethological, sociobiological, and social psychological perspectives.

Pre-requisite(s):

24 credit hours of psychology courses and instructor approval and PSY 1010.

PSY 4090 - History and Systems of Psychology

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Early philosophical origins and contributions to psychology; critical contrasts of systems and schools on major issues. 24 credit hours of psychology courses and instructor approval.

Pre-requisite(s): PSY 1010.

PSY 4100 - Psychology in the Media

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This capstone course will highlight how psychological concepts, principles, and theories are depicted in the popular media (e.g., film, documentary). Students will watch psychologically-relevant media, read classic and contemporary research connected to the concepts depicted in the media, and synthesize what they have learned from these sources in oral and written formats. Students will understand how the discipline of psychology provides a framework for understanding the world as depicted in media. 24 credits of Psychology coursework and instructor approval required.

Pre-requisite(s): 24 credits of Psychology coursework and instructor approval.

PSY 4140 - Theories of Development

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

This capstone course examines current research and theoretical models that focus on human development. Students will read various theories of development to explore 1) the main issues of developmental psychology that theories address, 2) the mechanisms of development, 3) applications, 4) strengths and weaknesses, and 5) contemporary research to highlight how the theory is alive today. Finally, students will synthesize their learning in oral and written formats to address the question, "What is my theory of development?". Students will understand how developmental theory provides a "big picture" framework for understanding the significance of research findings in developmental psychology. Pre-requisite: 24 credits of Psychology coursework and instructor approval.

PSY 4310 - Introduction to Counseling Theories

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A didactic introduction to the major theories of counseling and therapy plus an introduction to the research findings associated with effectiveness of therapy and principles of behavioral change. 24 credit hours of psychology courses and instructor approval required.

Pre-requisite(s): (Required) PSY 1010 and PSY 3010.

PSY 4340 - Skills and Techniques of Counseling

Credits: (3)

Provides skills and techniques for counselors, ministers, social workers, and other professionals who serve a helping function.

Three hours of lecture and two hours of lab/week.

Pre-requisite(s): (Recommended) PSY 4310 or equivalent and permission of the instructor.

Note: Course not currently being offered.

PSY 4390 CEL - Capstone Practicum

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Capstone version of PSY 4860 in which students are placed in state or community agencies for the purpose of providing supervised experiences in applying psychological skills and knowledge. The capstone practicum additionally provides students with an extensive reading list to review with the instructor to better apply their skills and knowledge and understand their experiences on site. 24 credit hours of psychology courses and instructor approval.

Pre-requisite(s): PSY 3610 or PSY 3616 (or equivalent) and other specific courses at the discretion of the supervising instructor. Also, permission of the instructor is required.

PSY 4510 - Industrial and Organizational Behavior

Credits: (3)

The psychological aspects of the work setting including selection, training, motivation, attitudes, and the effects of the organization.

Pre-requisite(s): (Recommended) PSY 1010.

Note: Course not currently being offered.

PSY 4575 - Psychology of Criminal Behavior

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

A comprehensive account of the biological, psychological, and social factors underlying criminal behavior.

Pre-requisite(s): PSY 3850.

PSY 4760 - Tests and Measurements

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Course Fee: \$5.00

Survey of methods, techniques, and instruments for measuring individual differences in behavior, a critical analysis of representative tests, values and limitations of test, methods of test selection, lab experience with tests. 24 credit hours of psychology courses and instructor approval required.

Pre-requisite(s): PSY 1010, PSY 3600 and PSY 3010.

PSY 4800 INT - Projects and Research

Credits: (1-3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Supervised participation in projects and/or primary research with a faculty mentor in various areas of psychology.

Limited to advanced students upon consent of psychology mentor and department chair. A paper written in APA style and an oral report are required at the end of the semester.

Pre-requisite(s): PSY 1010, PSY 3600 (Statistics), and PSY 3610 (Research Methods) or equivalent, and faculty mentor permission.

May be repeated 3 times for a maximum of 6 credit hours.

PSY 4805 - Capstone Projects and Research

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Capstone version of PSY 4800, supervised participation in projects and/or primary research with a faculty supervisor in various areas of psychology. Limited to advanced students upon consent of psychology supervisor and department chair. A paper written APA style and an oral report are required at the end of the semester. 24 credit hours of psychology courses and instructor approval required.

Pre-requisite(s): PSY 3610 or PSY 3616 or equivalent, and permission of a faculty supervisor and the chair.

PSY 4830 INT - Directed Readings

Credits: (1-3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Independent readings or secondary research on advanced special topics under the direction of a faculty mentor. For each hour of credit in a readings project the student is required to read an appropriate number of primary research journal articles and book chapters. A paper written in APA style and oral report are required at the end of the term.

Pre-requisite(s): PSY 1010, PSY 3600 (Statistics), PSY 3610 (Research Methods) or equivalent, and faculty mentor permission.

Suggested Requisite(s): PSY 3610 may be taken concurrently with PSY 4830.

May be repeated 3 times for a maximum of 6 credit hours.

PSY 4835 - Capstone Directed Readings

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Capstone version of PSY 4830 which involves independent readings or secondary research on advanced special topics under the direction of a faculty supervisor. Limited to advanced students upon consent of psychology supervisor and department chair. A paper written in APA style and an oral report are required at the end of the semester. 24 credit hours of psychology courses and instructor approval required.

Pre-requisite(s): PSY 3610 or PSY 3616 (or equivalent) and permission of a faculty supervisor and the chair.

PSY 4860 CEL - Practicum

Credits: (1-4)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Placement of students in state and community agencies for the purpose of providing supervised practice in application of psychological skills and knowledge. A maximum of four credit hours counted toward the psychology major and minor from the following courses: PSY 2890, PSY 4890, PSY 4860, and PSY 4390.

Pre-requisite(s): 18 credit hours of psychology courses, one of which must be PSY 1010. Other courses will be at the discretion of the supervising instructor. Also, permission of the instructor is required.

May be repeated one time for a maximum of six credit hours.

PSY 4890 INT - Cooperative Work Experience

Credits: (1-2)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Open to all students. Provides academic credit for on-the-job learning experience. Learning experiences will be specified in a learning contract. Grade and amount of credit will be determined by the department. Limited to two credit hours per semester and four credit hours counted toward the psychology major and minor from the following courses: PSY 2890, 4890, PSY 4860 and PSY 4390.

Federal regulations restrict all Cooperative Work Experience to no more than six semester hours. Must be employed in a position that uses psychological training. By prior permission of instructor only.

Pre-requisite(s): PSY 1010.

May be repeated 4 times for a maximum of 4 credit hours.

PSY 4900 - Selected Topics in Psychology

Credits: (2-3)

Variable Title

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

An in-depth exploration of selected topics and issues in the discipline, designed as an upper division course.

Pre-requisite(s): PSY 1010.

May be repeated 3 times for a maximum of 9 credit hours.

PSY 4905 - Capstone Selected Topics in Psychology

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

An in-depth exploration of selected topics and issues in the discipline, which fulfills the goals of a capstone class in the discipline. Students will be expected to read, analyze, and integrate research in a seminar style setting.

Pre-requisite(s): PSY 3610 or PSY 3616 (or equivalent), 24 credit hours of psychology courses, and instructor approval.

PSY 4910 - Senior Thesis

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A research project to be written by a senior student under the supervision of a faculty member. Successful completion of the research project will fulfill the capstone requirement of the major (as an alternative to PSY 4000 or PSY 4090) and the senior project requirement for honors. The student must apply for acceptance into the course (applications available from the chair), and the research proposal and the final project must be approved by a faculty committee. It is expected that the course will be taken once for the writing and defense of a proposal and repeated for the writing and defense of the final project. 24 credit hours of psychology courses and instructor approval required.

May be repeated once for a maximum of 6 credit hours.

PSY 4920 INT - Workshops, Institutes and Special Programs

Credits: (1-3)

Variable Title

Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript.

May be repeated 2 times for a maximum of 3 credit hours.

Note: Course not currently being offered.

PSY 4950 - Capstone Experience: Promoting Psychological Literacy

Credits: (1)

Typically Taught Fall Semester: *Full Sem Online*

Typically Taught Spring Semester: *Full Sem Online*

Course Fee: \$25.00

This course is designed for graduating seniors to reflect on and integrate the knowledge and skills acquired during their training in psychology. 24 credit hours of psychology courses and instructor approval required.

Pre-requisite(s): PSY 1010.

PSY 4990 - Seminar

Credits: (1)

Variable Title

Readings and active discussions of selected psychological topics.

Repeatable for up to a total of 2 hours.

Note: Course is not currently offered.

PTGS 1010 - First Semester Portuguese

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Course Fee: \$8.00

(N=Novice) Introductory course assuming no significant previous experience with the language. Beginners and students with less than two years of high school language should register for this class. Emphasis on everyday conversation and exposure to cultural perspectives.

PTGS 1020 - Second Semester Portuguese

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$8.00

(N=Novice) Continuation of PTGS 1010. Basic language

skills including listening, speaking, reading, writing and culture.

PTGS 2010 - Third Semester Portuguese

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Course Fee: \$8.00

(NH=Novice High) Continuation of PTGS 1020. Assumes completion of first-year or equivalent experience. Students learn to understand and express ideas about their community and the world. Includes listening, speaking, reading, writing and culture.

PTGS 2020 HU - Fourth Semester Portuguese

Credits: (3)

Course Fee: \$8.00

(NH=Novice High) Continuation of PTGS 2010. The learning and application of strategies for acquiring a foreign language. Students also learn how cultural products and practices reflect a culture's attitudes, values, ideas and meaning. The process of language acquisition and the seeking of cross-cultural understanding provide insights into the commonalities of how the human family learns, thinks and communicates.

PTGS 2021 - Second Year II

Credits: (3)

(NH=Novice High) Continuation of PTGS 2010 without General Education Humanities credit. Offered through examination only.

Pre-requisite(s): Only available through testing.

PTGS 2030 - Second Year Language Review

Credits: (3)

Course Fee: \$8.00

(NH=Novice High) This course will prepare students who wish to continue language study. Emphasis on conversational skills and a review of language structure and usage.

Note: Check with department for course availability.

PTGS 3060 - Grammar & Composition

Credits: (3)

Course Fee: \$8.00

(IL=Intermediate Low) This is a transition course to upper division. The course focuses on oral proficiency development. Students will learn a variety of techniques and strategies to increase their oral proficiency in a variety of social, educational and cultural settings. Native-speaking students or those who have acquired proficiency through residence in the target language community are not eligible to take this class.

Note: Check with department for course availability.

PTGS 3116 - DLI Bridge Course I

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Taught in DLI High Schools for students who have passed the AP Exam with a 4 or higher. Although this is a three credit-hour class, it will meet over the course of a full academic year. Credit will count toward a major or minor in the language.

Pre-requisite(s): PTGS 2020 or AP exam with a score of 4 or better

PTGS 3117 - DLI Bridge Course II

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Taught in DLI High Schools for students who have passed the AP Exam with a 4 or higher. Although this is a three credit-hour class, it will meet over the course of a full academic year. Credit will count toward a major or minor in the language.

Pre-requisite(s): PTGS 2020 or AP exam with a score of 4 or better

PTGS 3118 - DLI Bridge Course III

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Taught in DLI High Schools for students who have passed the AP Exam with a 4 or higher. Although this is a three credit-hour class, it will meet over the course of a full academic year. Credit will count toward a major or minor in the language.

Pre-requisite(s): PTGS 2020 or AP exam with a score of 4 or better

PTGS 3160 - Introduction to Literature

Credits: (3)

Course Fee: \$8.00

(IL=Intermediate Low) Required of all majors and minors. 3160 may be taken concurrently with other literature

courses. One sheltered section may be offered to students who have not had extensive in-country experience.
Note: Check with department for course availability.

PTGS 3175 - Business Language II

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

(IM=Intermediate High) Advanced Business Language and Practices. Required of all commercial majors.

PTGS 3220 - Phonetics and Phonology

Credits: (3)

Course Fee: \$8.00

(IL=Intermediate Low) Analysis of the sounds of language and word formation: practice of native like speech patterns. Required of all teaching majors and minors.

Note: Check with department for course availability.

PTGS 3270 - Special Topics in Linguistics

Credits: (3)

Variable Title

Course Fee: \$8.00

(IM=Intermediate Mid) An introduction to linguistic structures and semantic elements. The course provides useful information and practice in the language, its structures and usage. The sub-disciplines of linguistics, other than phonetics and phonology (covered in FL 3220), will be studied. These may include lexical analysis, semantics, morphology, syntax, linguistic change and dialectal variation.

Note: Check with department for course availability.

PTGS 3320 - Applied Language Studies

Credits: (1-3)

Variable Title

Course Fee: \$8.00

(Minimal proficiency level varies with content).

May be repeated up to 10 times under different titles.

PTGS 3360 - Advanced Grammar

Credits: (3)

Course Fee: \$8.00

(IL=Intermediate Low) Analysis and application of syntactic principles and discourse structure.

Note: Check with department for course availability.

PTGS 3540 - Latin American Environment and Cultures

Credits: (3)

Course Fee: \$8.00

(IM=Intermediate Med) Studies in culture, history, geography, social customs, fine arts and civilization. May be repeated for other non-English-speaking cultures.

PTGS 3550 - Cultural Heritage I

Credits: (3)

Variable Title

Course Fee: \$8.00

(Intermediate Mid) In-depth studies in culture, history, geography, social customs, fine arts and civilization. May be repeated up to 7 times for credit and for other non-English speaking cultures.

PTGS 3560 - Cultural Heritage II

Credits: (3)

Variable Title

Course Fee: \$8.00

(IM=Intermediate Med) Studies in culture, history, geography, social customs, fine arts, and civilization. May be repeated 3 times for other non-English speaking cultures.

PTGS 3570 - Special Topics in Culture

Credits: (3)

Variable Title

Course Fee: \$8.00

(Intermediate Mid) In-depth studies in culture, history, geography, social customs, fine arts and civilization.

May be repeated up to 7 times for credit and for other non-English speaking cultures.

Note: Check with Department for course availability.

PTGS 3610 - Literature Survey I

Credits: (3)

Variable Title

Course Fee: \$8.00

(IH=Intermediate High) A survey of the authors and works of a particular period or place. May be repeated under different titles.

PTGS 3620 - Literature Survey II

Credits: (3)

Variable Title

Course Fee: \$8.00

(IH=Intermediate High) A survey of the authors and works of a particular period or place. May be repeated under different titles.

PTGS 3631 - Literature: Prose

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Course Fee: \$8.00

(IM=Intermediate Mid) A survey of works in prose by one or various authors of a particular period or place, or spanning several literary movements and geographical regions. May be taken 3 times up to 9 credits under different titles.

PTGS 3632 - Literature: Drama

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Course Fee: \$8.00

(IM=Intermediate Mid) A survey of theater plays by one or various authors of a particular period or place, or spanning several literary movements and geographical regions. May be taken 3 times up to 9 credits under different titles.

PTGS 3680 - Literature: Film

Credits: (3)

Course Fee: \$8.00

(IM=Intermediate Mid) A survey of film by one or various filmmakers of a particular period or place, or spanning several literary movements and geographical regions. May be taken 3 times up to 9 credits under different titles.

Note: Check with department for course availability.

PTGS 3710 - Business Language I

Credits: (3)

Course Fee: \$8.00

(IM=Intermediate Mid) Business Language and Practices. Required of all commercial majors.

PTGS 3715 - Business Language II

Credits: (3)

Course Fee: \$8.00

(IM=Intermediate High) Advanced Business Language and Practices. Required of all commercial majors.

PTGS 3720 - Language for Specific Purposes I

Credits: (3)

Course Fee: \$8.00

(IM=Intermediate Mid) This course is content, vocabulary and culture-based. The course focuses on practical vocabulary, idiomatic expressions, professional terminology and cultural interactions on a variety of topics such as language for the medical professions, social workers, law enforcement or tourism.

PTGS 3730 - Language for Specific Purposes II

Credits: (3)

Course Fee: \$8.00

(IM=Intermediate Mid) This course is content, vocabulary and culture-based. The course focuses on practical vocabulary, idiomatic expressions, professional terminology and cultural interactions on a variety of topics, such as language for medical professions, social work, law enforcement or tourism.

PTGS 3740 - Translation I

Credits: (3)

Course Fee: \$8.00

(IM=Intermediate Mid) Introduction to basic techniques and skills needed for bilingual translation of non-fiction texts. Emphasis will be on the translation into English, and on the stylistic, syntactic, cultural, lexical, and terminological problems. Students are given ample opportunity to apply these techniques through a series of written translation assignments, which form the basis for class discussion.

PTGS 3850 - Study Abroad

Credits: (1-6)

(IM=Intermediate Mid) Language and culture studies for students whose language proficiency is Intermediate Low to Intermediate High. All Intermediate and Advanced tasks will be performed in the target language. All Superior tasks may be performed in English. Prior travel experience does not apply. May be repeated up to 10 times for credit.

PTGS 4740 - Translation II

Credits: (3)

Course Fee: \$8.00

(IH=Intermediate High) Development of techniques and skills needed for bilingual translation of non-fiction texts. Emphasis will be on the translation into the target language. Methods of contrastive linguistics to analyze pertinent aspects of language structure, involving syntax, vocabulary and style, as well as basic theoretical-historical concepts are employed. Students are given ample opportunity to apply these techniques and concepts through a series of written translation assignments, which form the basis for class discussion. Prerequisite/Co-requisite: PTGS 3740 is strongly advised, but not required.

PTGS 4830 - Directed Readings

Credits: (1-3)

(IH=Intermediate High) Independent readings under the direction of a faculty member.

May be repeated up to 10 times.

Note: Check with Department for course availability.

PTGS 4850 - Study Abroad

Credits: (3)

(A=Advanced) Language and culture studies for students whose language proficiency is Advanced or Superior. All tasks are performed in the target language. Prior travel experience does not apply.

QS 2900 - Topics in Queer Studies

Credits: (3)

Variable Title

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Varied topics as described in the semester schedule. Topics will be drawn from issues related to queer studies.

Pre-requisite(s): WGS 1500.

May be repeated 3 times up to 9 credits with different course content.

QS 3050 - Queer Theories

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

This course provides an introduction to the study of queer theories. Students will study historical accounts of queer

activism and literature, exploring cultural norms and power structures that contribute to the marginalization of those who identify as part of the queer community.

Pre-requisite(s): WGS 1500.

QS 3100 - LGBTQ America Since 1945

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

This course explores American LGBTQ experience since 1945. Topics include the history of state abuses as well as how LGBTQ people mobilized to overcome such abuses and win recognition, to some degree, of their right to equal treatment and citizenship.

QS 4150 - Research Methods in Queer Studies

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

This course is designed to introduce students to a variety of approaches to research in queer studies. Students will consider some of the assumptions, which underlie research methodologies that may limit our knowledge about research subjects and affect individuals as researchers.

Pre-requisite(s): QS 3050.

QS 4830 - Directed Readings

Credits: (1-3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Directed individual readings in the general area of queer studies. Specific topic selected in consultation with instructor; amount of material to be read determined at discretion of instructor, based on level of topic and degree of difficulty of reading and consistent with any existing university and departmental guidelines.

Pre-requisite(s): WGS 1500 and QS 3050 with a grade of 'C' or higher.

May be repeated up to 6 credit hours.

QS 4860 - Internship in Queer Studies

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This internship course is a chance for you to consolidate and enrich your undergraduate learning while building the transition to life beyond college. Queer Studies students

learn to think critically and act strategically on issues of gender and sexuality, particularly relating to issues of social justice.

Pre-requisite(s): QS 3050.

QS 4900 - Topics in Queer Studies

Credits: (3)

Variable Title

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Varied topics as described in the semester schedule. Topics will be drawn from issues related to queer studies.

Pre-requisite(s): WGS 1500 and QS 3050 with a grade of 'C' or higher.

This course may be taken 2 times for up to 6 credits with different course content.

QUAN 2400 - Business Calculus

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Emphasis on applications of calculus to problems in business. Topics include functions, limits, differentiation, and integration. Applications include profit maximization, cost functions, demand analysis, and output maximization with budget constraints and resource allocation.

Pre-requisite(s): Earn a "C" or better in MATH 1050, 1080, or 1210 or earn a "C" or better in any math course for which either MATH 1050 or MATH 1080 or MATH 1090 is a prerequisite or; score 3 or higher on AP Calculus exam or; score 70 or higher on ACCUPLACER College Level Math (CLM) or; score of 26 on Math ACT or; score of 65 or higher on ALEKS.

QUAN 2600 - Business Statistics I

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Introduction to concepts and applications of statistics in business and economics. Topics include summary statistics, probability distributions of random variables, sampling, and estimation. Class will include use of computers.

Pre-requisite(s): Earn a "C" or better in MATH 1050, MATH 1080 or MATH 1210 or earn a "C" or better in any math course for which either MATH 1050 or MATH

1080 or MATH 1090 is a prerequisite or; score 3 or higher on AP Calculus exam or; score 70 or higher on ACCUPLACER College Level Math (CLM) or; score of 26 or higher on Math ACT or; score of 65 or higher on ALEKS.

QUAN 3610 - Business Statistics II

Credits: (3)

Typically Taught Summer Semester: *1st Blk*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Continuation of QUAN 2600. Topics include test of hypotheses, correlation, time series, and multiple regression analysis with specific application to problems in business and economics. Computers will be used extensively in regression analysis.

Pre-requisite(s): QUAN 2600.

RADT 1021 - Limited Clinical Simulation

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Limited clinical simulation for the limited radiographer to gain skills in radiographic imaging processes.

Co-Requisite(s): RADT 1023, RADT 1024, RADT 1025.

RADT 1022 - Introduction to Radiologic Technology

Credits: (2)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Program orientation, elementary radiation protection and basic darkroom procedures.

RADT 1023 - Limited Radiographic Anatomy & Positioning

Credits: (2)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Limited Radiographic Anatomy & Positioning will cover procedures in the limited scope of radiographic examinations, as well as the basics of human anatomy associated with those exams.

Co-Requisite(s): RADT 1024, RADT 1025, and RADT 1021

RADT 1024 - Limited Principles of Radiographic Exposure

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Limited Principles of Radiographic Exposure will cover all radiation safety, exposure factors, and image production concepts.

Co-Requisite(s): RADT 1023, RADT 1025, and RADT 1021

RADT 1025 - Limited Patient Care and Assessment

Credits: (2)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

To provide patient care skills that will sustain students in a medical clinic as a limited radiographer.

Co-Requisite(s): RADT 1023, RADT 1024, and RADT 1021

RADT 1303 - Principles of Radiographic Exposure I

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Theory of x-ray production; image production and radiographic equipment.

RADT 1502 - Radiographic Anatomy and Positioning I

Credits: (2)

Typically Taught Fall Semester: *Full Sem*

Terminology, pathology and radiographic positioning.

RADT 1512 - Radiographic Anatomy and Positioning II

Credits: (2)

Typically Taught Spring Semester: *Full Sem*

Continuation of RADT 1502.

Pre-requisite(s): RADT 1502.

RADT 1522 - Radiographic Anatomy and Positioning III

Credits: (2)

Typically Taught Summer Semester: *Full Sem*

Continuation of RADT 1512.

RADT 1532 - Radiographic Anatomy and Positioning IV

Credits: (2)

Typically Taught Fall Semester: *Full Sem*

Continuation of RADT 1522.

Pre-requisite(s): RADT 1522.

RADT 1542 - Radiographic Anatomy and Positioning V

Credits: (2)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Continuation of RADT 1532.

RADT 1601 - Clinical Simulation I

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Patient positioning, darkroom experience and review of radiographic quality.

RADT 1621 - Clinical Simulation II

Credits: (1)

Typically Taught Spring Semester: *Full Sem*

Continuation of RADT 1601.

Pre-requisite(s): RADT 1601.

RADT 1641 - Clinical Simulation III

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Continuation of RADT 1621.

RADT 1661 - Clinical Simulation IV

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Continuation of RADT 1641.

RADT 1681 - Clinical Simulation V

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*
Typically Taught Spring Semester: *Full Sem*

RADT 2042 - Community-Based Patient Care I

Credits: (1-2)
Typically Taught Fall Semester: *Full Sem*
Patient case studies and critical care situations.
May be repeated once for credit.

RADT 2043 - Specialty Based Patient Care

Credits: (2)
Typically Taught Spring Semester: *Full Sem*
Patient care and management in radiology.

RADT 2272 - Basic Sectional Anatomy

Credits: (2)
Typically Taught Spring Semester: *Full Sem*
The anatomical appearance of each organ system and common pathology on sectional medical images.

RADT 2403 - Principles of Radiographic Exposure II

Credits: (3)
Typically Taught Spring Semester: *Full Sem*
Radiographic imaging, instrumentation, image production and factors affecting radiologic quality.

RADT 2803 - Independent Research

Credits: (1-3)
Typically Taught Summer Semester: *Full Sem*
Typically Taught Fall Semester: *Full Sem*
Typically Taught Spring Semester: *Full Sem*
Individualized projects.
May be repeated 3 times for credit.

RADT 2821 - Directed Readings & Research I

Credits: (2)
Typically Taught Summer Semester: *Full Sem*
Typically Taught Fall Semester: *Full Sem*
Typically Taught Spring Semester: *Full Sem*
Selecting readings and/or a research project on medical

imaging procedures, new technology, patient satisfaction, patient safety, and professional behavior.

RADT 2822 - Directed Readings & Research II

Credits: (2)
Typically Taught Summer Semester: *Full Sem*
Typically Taught Fall Semester: *Full Sem*
Typically Taught Spring Semester: *Full Sem*

Selecting readings and/or a research project on medical imaging procedures, new technology, patient satisfaction, patient safety, and professional behavior.

RADT 2823 - Directed Readings & Research III

Credits: (2)
Typically Taught Summer Semester: *Full Sem*
Typically Taught Fall Semester: *Full Sem*
Typically Taught Spring Semester: *Full Sem*
Selecting readings and/or a research project on medical imaging procedures, new technology, patient satisfaction, patient safety, and professional behavior.

RADT 2824 - Directed Readings & Research IV

Credits: (2)
Typically Taught Fall Semester: *Full Sem*
Selecting readings and/or a research project on medical imaging procedures, new technology, patient satisfaction, patient safety, and professional behavior.

RADT 2825 - Directed Readings & Research V

Credits: (2)
Typically Taught Summer Semester: *Full Sem*
Typically Taught Fall Semester: *Full Sem*
Typically Taught Spring Semester: *Full Sem*
Selecting readings and/or a research project on medical imaging procedures, new technology, patient satisfaction, patient safety, and professional behavior.

RADT 2861 INT - Clinical Education

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Experience gained in a health care facility.

Pre-requisite(s): Acceptance into the program.

RADT 2862 INT - Clinical Education

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

Continuation of RADT 2861.

RADT 2863 INT - Clinical Education

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Continuation of RADT 2862.

RADT 2864 INT - Clinical Education

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Continuation of RADT 2863.

RADT 2865 INT - Clinical Education

Credits: (2)

Typically Taught Spring Semester: *Full Sem*

Continuation of RADT 2864.

RADT 2866 INT - Final Competency Evaluation

Credits: (2)

Typically Taught Spring Semester: *Full Sem*

Demonstration of competency performing the procedures required by the certification agency.

RADT 2913 - Comprehensive Review

Credits: (2)

Typically Taught Spring Semester: *Full Sem*

Review of didactic and clinical applications.

RADT 2921 - Workshop, Conferences and Telecourses

Credits: (1-3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

May be repeated twice for a maximum of 3 credit hours.

RADT 2942 - Transition to Clinical Practice

Credits: (2)

Typically Taught Fall Semester: *Full Sem*

Assistance with career planning and an introduction to specialized imaging procedures and new and future imaging procedures.

RADT 3003 - Psycho-Social Medicine

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Designed to prepare students to better understand their patient and the patient's family through comparison of diverse populations based on their value systems, cultural and ethnic influences, communication styles, socio-economic influences, health risks and life stages. Study of factors that influence the interrelationships with patients and professional peers. Understanding multicultural diversity assists the student in providing better patient care.

RADT 3043 - Medical Ethics and Law

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Medical ethics and law and case studies in medical imaging and radiation therapy.

RADT 3123 - Sectional Anatomy

Credits: (2)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Anatomical study of the body in the sagittal, transverse and coronal imaging planes.

RADT 3143 - Imaging Pathophysiology I

Credits: (2)

Typically Taught Fall Semester: *Full Sem*

Imaging adaptations and alterations in anatomy and physiology with variation outside of the normal range (Unit 1).

RADT 3144 - Imaging Pathophysiology II

Credits: (2)

Typically Taught Spring Semester: *Full Sem*

Imaging adaptations and alterations in anatomy and physiology with variation outside of the normal range (Unit 2).

Pre-requisite(s): RADT 3143 - Imaging Pathophysiology I.

RADT 3243 - Community-Based Patient Care II

Credits: (2)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Advanced level patient care, assessment, and management in the community-based environment.

RADT 3253 - Specialty-Based Patient Care II

Credits: (2)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Advanced level patient care, assessment, and management in the specialty-based environment.

RADT 3263 - Diagnostic Services Pharmacology

Credits: (2)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Concepts of pharmacology including modes of action, uses, modes of excretion effects, side effects and patient care required for specific pharmacologic agents.

RADT 3403 - Radiobiology & Health Physics

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Effects of ionizing radiation on the human body, patient

and personnel protection, exposure monitoring health physics and oncology.

RADT 3423 - Federal Regulations

Credits: (2)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Regulations governing health care, equipment and application of ionizing radiation.

RADT 3443 - Quality Assurance in Radiology

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Development of a quality assurance program and manual to meet accreditation requirements.

RADT 3463 - Computerized Imaging

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Digital radiography, image acquisition, image processing and digital image management.

RADT 3563 - Managing Clinical Information

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Digital and volumetric imaging, emerging technologies, secure computerized management practice, and patient privacy regulations.

RADT 3863 INT - Clinical Internship

Credits: (2-6)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Experience in a radiology specialty area. Consent of instructor is required.

May be repeated twice for credit.

RADT 4203 - Patient Education in Radiology

Credits: (2)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Skills necessary to assess, plan and evaluate a variety of educational programs specific to radiology patients.

RADT 4213 - Supervision and Staff Development

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Federal regulations, developing department protocol, designing departments personnel supervision and quality of care assessment.

RADT 4223 - Promotional Strategies

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Assessment of needs, development and implementation of promotional strategies for Radiology Departments.

RADT 4233 - Fiscal Analysis in Radiology

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

Justification, acquisition and leasing of imaging equipment and accessories, staffing formulas and review of maintenance contracts.

RADT 4243 - Quality Management in Radiology

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

Concepts and principles of quality management, collection and analysis of data.

RADT 4253 - Risk Management

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Study of management of risk associated with the delivery of health care in clinical and non-clinical settings.

RADT 4303 - Cardiology

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Detailed study of the heart: anatomy, physiology, pathophysiology, pharmacology, EKGs and imaging modalities.

RADT 4313 - Visceral, Pelvic and Extremity Angiography

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Anatomy, pathology, protocols and interventional procedures of abdominal viscera, extremities and pelvis.

RADT 4333 - Head and Neck Angiography

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Anatomy, pathology, protocols and interventional procedures of the aortic arch, brachiocephalic, thyroid and other facial and neck arteries.

RADT 4343 - Thoracic and Venous Procedures

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

Anatomy, pathology, protocols and interventional procedures of the venous and cardiac systems.

RADT 4403 - Imaging Pathology

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Radiographic presentation of pathological conditions, abnormalities and anomalies.

RADT 4413 - Forensic Radiology

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course provides a comprehensive study of medical imaging's role in forensic medicine. Forensic Radiology is used to determine identity of remains, evaluate injury or cause of death and assist in the detection of abuse. Junior or Senior standing required.

RADT 4433 - PACS Administration

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Digital imaging and communication standards, PACS administration, image quality, and emerging technology standards.

RADT 4443 - Imaging Informatics

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

Analyzing system needed, project management, quality improvement, bioinformatics, clinical informatics, and medical informatics.

RADT 4543 - Bone Densitometry

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

This course comprehensively covers the methods of bone density measurement (bone densitometry, DEXA), the pathogenesis of osteoporosis, quality management issues, therapies for osteoporosis and a review of additional analysis methods.

RADT 4553 - Breast Anatomy, Physiology and Pathology

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Normal breast anatomy and physiology compared to pathological conditions.

RADT 4563 - Mammographic Positioning/Imaging Techniques

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Routine positions, risk versus benefit; tissue variations, specialized procedures and imaging modalities.

RADT 4572 - Advanced Breast Imaging

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course will highlight advanced breast imaging and correlate findings between modalities; discuss associated patient education and medicolegal considerations; and highlight best practice in relation to pathology and patient history.

RADT 4573 - The Female Patient and Medical Imaging

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course will familiarize the student to disease processes specific to the female patient and the imaging methods that may be used in diagnosis and treatment. The clinical pathways that are commonly used, involving all radiologic imaging modalities, will be explored. Students who enroll in this course must be certified by the American Registry of Radiologic Technologists.

RADT 4583 - Mammographic Equipment and Quality Assurance

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Equipment operation, technical factors and quality assurance procedures in mammography.

RADT 4603 - Magnetic Resonance Imaging Physics, Instrumentation & Safety

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Physical principles and theories of magnetic resonance, instrumentation, safety, imaging sequences and methods in normal and abnormal tissue, and computer parameters of magnetic resonance.

RADT 4610 - Clinical Simulation I

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Clinical Simulation in the Radiology and Computer Labs.

RADT 4611 - Clinical Simulation II

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Clinical Simulation in the Radiology and Computer Labs.

RADT 4612 - Clinical Simulation III

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Clinical Simulation in the Radiology and Computer Labs.

RADT 4613 - Computed Tomography of the Torso and Limbs

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

Sectional anatomy, pathology and imaging protocols of the abdominal viscera, pelvis, thorax and extremities.

RADT 4623 - Advanced MRI Procedures

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

Evaluation of organ function and diagnosis of disease process using advanced MRI procedures with emphasis on spectroscopy and functional MR.

RADT 4633 - Magnetic Resonance Imaging of the Central Nervous System

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Sectional anatomy, pathology and imaging protocol of the head, spine and central nervous system.

RADT 4643 - Magnetic Resonance of the Torso and Limbs

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

Sectional anatomy, pathology and imaging protocols of the abdominal viscera, pelvis, thorax and extremities.

RADT 4653 - Computed Tomography of the Central Nervous System

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Sectional anatomy, pathology and imaging protocols of the head, spine and central nervous system.

RADT 4663 - Computed Tomography Physics, Instrumentation & Safety

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Interactions of electromagnetic waves, instrumentation, imaging sequences, computer parameters, and safety of computerized tomography imaging.

RADT 4803 - Individual Research

Credits: (1-3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Research projects developed for district, state, regional or national presentation.

May be repeated for a maximum of 3 credit hours.

RADT 4833 - Directed Readings and Research

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Synthesis and analysis of journal articles resulting in a research paper for the purpose of publication.

RADT 4850 - Study Abroad

Credits: (1-6)

Variable Title

Typically Taught Summer Semester: *Full Sem*

The purpose of this course is to provide opportunities for students in health professions to experience a study abroad program that is designed to explore healthcare, culture, and clinical experience.

May be repeated 5 times with a maximum of 6 credit hours.

RADT 4861 - Clinical Internship

Credits: (2)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Experience in a radiology specialty area. Consent of instructor is needed.

RADT 4862 - Clinical Internship

Credits: (2)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Experience in a radiology specialty area. Consent of instructor is needed.

RADT 4863 INT - Clinical Internship

Credits: (2-4)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Experience in a radiology specialty area. Consent of instructor is needed.

May be repeated twice for credit.

RADT 4911 - Comprehensive Review/CT

Credits: (2)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Preparation for advanced certification examination.

RADT 4912 - Comprehensive Review/MRI

Credits: (2)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Preparation for advanced certification examination.

RADT 4913 - Comprehensive Review/CIT

Credits: (2)

Typically Taught Summer Semester: *Full Sem*

Preparation for advanced certification examination.

RADT 4914 - Comprehensive Review/M

Credits: (2)

Typically Taught Summer Semester: *Full Sem*

Preparation for advanced certification examination.

RADT 4915 - Comprehensive Review/QM

Credits: (2)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Preparation for advanced certification examination.

RADT 4922 - Workshop, Conferences and Telecourses

Credits: (2)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

RADT 4933 - Research Methods

Credits: (2)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Apply research strategies in health care and clinical practice, obtain certificate for human subject research, formulate a research proposal, and complete an institutional review board application.

RADT 4942 - Transition to Specialty Practice

Credits: (2)

Typically Taught Summer Semester: *Full Sem*

Review of the program educational requirements. Professional responsibilities and requirements as the student transitions into the healthcare marketplace.

RADT 4943 - Baccalaureate Thesis

Credits: (2)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Research in health professions utilizing the scientific inquiry method.

RADT 4992 - Seminar

Credits: (1-2)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

New developments and procedures in imaging and therapy and preparing for the future.

May be repeated for a maximum of 2 credit hours.

RADT 5864G - Clinical Preceptorship

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Continuation of RADT 6863.

RADT 5867G - Competency Assessment/Residency

Credits: (3)

Assessment of competency knowledge and skills in the clinical setting.

Note: This course is offered as needed.

RADT 6863 - Clinical Preceptorship

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Continuation of MSRS 6862.

RATH 4330 - Radiation Therapy Physics

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

An overview of the profession of radiation therapy. Radiation therapy physics, dosimetry, isodose distribution for isotopes and electrically-produced beams. Mechanics of Linear accelerators and Cobalt.

RATH 4342 - Introduction to Treatment Planning

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

Basic quantities and concepts in radiotherapeutic dosimetry. Current aspects of the anatomical and physical consideration involved in planning and delivery of the therapy prescription.

RATH 4410 - Radiation Oncology I

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Pathology of cancer; combined therapy and surgery; chemotherapy and radiation therapy; clinical application of treatment techniques; and case studies.

RATH 4412 - Radiation Oncology II

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

Pathology of cancer; combined therapy and surgery; chemotherapy and radiation therapy; clinical application of treatment techniques; and case studies.

RATH 4414 - Radiation Oncology III

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Pathology of cancer; combined therapy and surgery; chemotherapy and radiation therapy; clinical application of treatment techniques; and case studies.

RATH 4444 - Advanced Treatment Planning/Brachytherapy

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Prescription interpretation, nuclide implants, brachytherapy and treatment techniques involving hyperthermia. Beam modification devices and theory of beam placement will be discussed.

RATH 4446 - Quality Assurance

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Establishment of a quality assurance program for linear accelerators, simulators and therapeutic isotopes.

RATH 4448 - New Technology in Radiation Therapy

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

Exploration of the emerging technology and new equipment used in radiation therapy.

Pre-requisite(s): Graduate of an approved Radiography Program or equivalent.

RATH 4861 INT - Clinical Education I

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Clinical education designed to facilitate transference of didactic instruction to practical clinical practice.

RATH 4862 INT - Clinical Education II

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

Clinical education designed to facilitate transference of didactic instruction to practical clinical practice.

RATH 4863 INT - Clinical Education III

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Clinical education designed to facilitate transference of didactic instruction to practical clinical practice.

RATH 4913 - Comprehensive Review

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Review of all didactic and clinical courses and competencies. Guest lecturer and multiple mock registry examinations will be presented.

REC 1241 - Mountain Biking, Level I

Credits: (1)

Typically Taught Summer Semester: *1st Blk; 2nd Blk*

Typically Taught Fall Semester: *1st Blk*

Typically Taught Spring Semester: *2nd Blk*

Course Fee: \$60.00

This physical activity course introduces students to mountain biking and trail riding. Students will explore and apply topics to enable safe, independent bike travel over a variety of terrain and surfaces. Course content will focus on trail awareness and selection, choosing appropriate equipment, and basic bike maintenance and repair. May be repeated twice and up to 3 credits.

REC 1242 - Mountain Biking, Level II

Credits: (1)

Typically Taught Summer Semester: *1st Blk; 2nd Blk*

Typically Taught Fall Semester: *1st Blk*

Typically Taught Spring Semester: *2nd Blk*

Course Fee: \$60.00

This physical activity course introduces students to mountain biking and trail riding. Students will explore and apply topics to enable safe, independent bike travel over a variety of terrain and surfaces. Course content will focus on trail awareness and selection, choosing appropriate equipment, and basic bike maintenance and repair. May be repeated twice and up to 3 credits.

REC 1243 - Mountain Biking, Level III

Credits: (1)

Typically Taught Summer Semester: *1st Blk; 2nd Blk*

Typically Taught Fall Semester: *1st Blk*

Typically Taught Spring Semester: *2nd Blk*

Course Fee: \$60.00

This physical activity course introduces students to mountain biking and trail riding. Students will explore and apply topics to enable safe, independent bike travel over a variety of terrain and surfaces. Course content will focus on trail awareness and selection, choosing appropriate equipment, and basic bike maintenance and repair. May be repeated twice and up to 3 credits.

REC 1304 - Backcountry Touring, Level I

Credits: (1)

Typically Taught Spring Semester: *1st Blk*

This physical activity course introduces students to skiing and/or snowboarding safely in the backcountry, outside of resort boundaries where avalanche control and ski patrol are not present. The course covers basic avalanche hazard recognition, evaluation, and mitigation, single-burial avalanche companion rescue, uphill snow travel, and downhill skiing and/or snowboarding techniques for variable snow conditions and hazards.

May be repeated three times for a maximum of three credit hours.

REC 1305 - Backcountry Touring, Level II

Credits: (1)

Typically Taught Spring Semester: *1st Blk*

This physical activity course introduces students to skiing and/or snowboarding safely in the backcountry, outside of resort boundaries where avalanche control and ski patrol are not present. The course covers basic avalanche hazard recognition, evaluation, and mitigation, single-burial avalanche companion rescue, uphill snow travel, and downhill skiing and/or snowboarding techniques for variable snow conditions and hazards.

May be repeated three times for a maximum of three credit hours.

REC 1306 - Backcountry Touring, Level III

Credits: (1)

Typically Taught Spring Semester: *1st Blk*

This physical activity course introduces students to skiing and/or snowboarding safely in the backcountry, outside of

resort boundaries where avalanche control and ski patrol are not present. The course covers basic avalanche hazard recognition, evaluation, and mitigation, single-burial avalanche companion rescue, uphill snow travel, and downhill skiing and/or snowboarding techniques for variable snow conditions and hazards.

May be repeated three times for a maximum of three credit hours.

REC 1307 - Avalanche I

Credits: (1)

Typically Taught Spring Semester: *1st Blk*

Course Fee: \$125.00

This course is intended for individuals wishing to pursue travel in avalanche terrain, whether backcountry skiing and snowboarding, snowshoeing, or mountaineering. Different sections of this course may be appropriate for various modes of travel, for example, skiing and snowboarding vs. snowshoeing. Instruction will take place predominantly at local backcountry mountainous areas through practical skills sessions. The course also includes relevant lecture, discussion, group decision making, and travel plan exercises. Emphasis will be placed on development of skills and knowledge to select appropriate terrain to avoid avalanches.

REC 1310 - Whitewater Paddling, Level I

Credits: (1)

Typically Taught Summer Semester: *Full Sem, 1st Blk, 2nd Blk*

Typically Taught Fall Semester: *1st Blk*

Typically Taught Spring Semester: *2nd Blk*

This physical activity course introduces students to the basic skills required for whitewater paddling in a number of potential watercraft such as rafts, kayaks, paddleboards, and canoes. Skills taught include boat maneuvering, reading rapids, and basic rescue skills. May be repeated twice and up to 3 credits.

REC 1311 - Whitewater Paddling, Level II

Credits: (1)

Typically Taught Summer Semester: *Full Sem, 1st Blk, 2nd Blk*

Typically Taught Fall Semester: *1st Blk*

Typically Taught Spring Semester: *2nd Blk*

This physical activity course introduces students to the basic skills required for whitewater paddling in a number of

potential watercraft such as rafts, kayaks, paddleboards, and canoes. Skills taught include boat maneuvering, reading rapids, and basic rescue skills.

May be repeated twice and up to 3 credits.

REC 1312 - Whitewater Paddling, Level III

Credits: (1)

Typically Taught Summer Semester: *Full Sem, 1st Blk, 2nd Blk*

Typically Taught Fall Semester: *1st Blk*

Typically Taught Spring Semester: *2nd Blk*

This physical activity course introduces students to the basic skills required for whitewater paddling in a number of potential watercraft such as rafts, kayaks, paddleboards, and canoes. Skills taught include boat maneuvering, reading rapids, and basic rescue skills.

May be repeated twice and up to 3 credits.

REC 1313 - Swiftwater Rescue

Credits: (1)

Typically Taught Summer Semester: *1st Blk, 2nd Blk*

Typically Taught Spring Semester: *2nd Blk*

This course combines classroom and on-river instruction in avoidance and rapid resolution of accidents and injuries in swiftly moving whitewater. The course emphasizes skill demonstration and practice on or near the river and in-water. The course teaches effective rope based and/or rescue PFD based techniques that minimize rescuer risk in these complex systems. The course also includes relevant lecture, discussion, and group management exercises.

REC 1316 - Stand-Up Paddleboard

Credits: (1)

Typically Taught Summer Semester: *1st Blk*

Typically Taught Fall Semester: *1st Blk*

This physical activity course is intended to introduce students to the fundamental skills and knowledge necessary to enjoy Stand Up Paddleboarding (SUP). The course will cover: 1) technical knowledge (i.e., history, terminology, equipment, regulations, safety); 2) technical skills (i.e., carrying, launching, landing, balance, stances, strokes, maneuvers, equipment maintenance); and 3) rescue/safety (i.e. self-rescues).

REC 1350 - Scuba Diving, Level I

Credits: (1)

Typically Taught Summer Semester: *Full Sem, 1st Blk, 2nd Blk*

Typically Taught Fall Semester: *Full Sem, 1st Blk, 2nd Blk*

Typically Taught Spring Semester: *Full Sem, 1st Blk, 2nd Blk*

A beginner level physical activity course that allows students to learn and develop the skills and knowledge needed to safely engage in the underwater activity of scuba diving.

Note: This course is offered through Continuing Education only.

REC 1351 - Scuba Diving, Level II

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A physical activity that engages students in the underwater activity of scuba diving. This Level II course allows students to build on skills developed in Level I.

Pre-requisite(s): REC 1350.

REC 1404 - Mountaineering, Level I

Credits: (1)

Typically Taught Summer Semester: *1st Blk*

Typically Taught Spring Semester: *1st Blk, 2nd Blk*

This physical activity course introduces students to the basic skills required for mountaineering, including snow climbing and descending, ice climbing, ice axe use, basic avalanche hazard identification, and technical rope systems in these environments. Course offering dependent on weather and snow pack expectations and conditions. May be repeated twice and up to 3 credits.

REC 1405 - Mountaineering, Level II

Credits: (1)

Typically Taught Summer Semester: *1st Blk*

Typically Taught Spring Semester: *1st Blk, 2nd Blk*

This physical activity course introduces students to the basic skills required for mountaineering, including snow climbing and descending, ice climbing, ice axe use, basic avalanche hazard identification, and technical rope systems in these environments. Course offering dependent on weather and snow pack expectations and conditions. May be repeated twice and up to 3 credits.

REC 1406 - Mountaineering, Level III

Credits: (1)

Typically Taught Summer Semester: *1st Blk*

Typically Taught Spring Semester: *1st Blk, 2nd Blk*

This physical activity course introduces students to the basic skills required for mountaineering, including snow climbing and descending, ice climbing, ice axe use, basic avalanche hazard identification, and technical rope systems in these environments. Course offering dependent on weather and snow pack expectations and conditions. May be repeated twice and up to 3 credits.

REC 1505 - Kayaking, Level I

Credits: (1)

Typically Taught Spring Semester: *2nd Blk*

A physical activity course that introduces students to the outdoor activity of kayaking. The fundamental skills of kayaking will be addressed for both beginning and recreational paddlers.

REC 1510 - Fishing, Level I

Credits: (1)

Typically Taught Summer Semester: *1st Blk, 2nd Blk*

Typically Taught Fall Semester: *1st Blk*

Typically Taught Spring Semester: *2nd Blk*

A physical activity course that allows students to learn and develop the skills needed to practice fishing.

REC 1511 - Fishing, Level II

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

A physical activity course that allows students to learn and develop the skills needed to practice fishing.

REC 1512 - Fishing, Level III

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

A physical activity course that allows students to learn and develop the skills needed to practice fishing.

REC 1520 - Hiking, Level I

Credits: (1)

Typically Taught Summer Semester: *1st Blk*

Typically Taught Fall Semester: *1st Blk*

Typically Taught Spring Semester: *2nd Blk*

A physical activity course that allows students to learn and develop the skills needed to safely enjoy hiking through the

use of trail resources, environmental conscientiousness, planning, and conduct.

REC 1521 - Hiking, Level II

Credits: (1)

Typically Taught Fall Semester: *1st Blk*

Typically Taught Spring Semester: *2nd Blk*

A physical activity course that allows students to learn and develop the skills needed to safely enjoy hiking through the use of trail resources, environmental conscientiousness, planning, and conduct.

REC 1522 - Hiking, Level III

Credits: (1)

Typically Taught Fall Semester: *1st Blk*

Typically Taught Spring Semester: *2nd Blk*

A physical activity course that allows students to learn and develop the skills needed to safely enjoy hiking through the use of trail resources, environmental conscientiousness, planning, and conduct.

REC 1527 - Rock Climbing, Level I

Credits: (1)

Typically Taught Summer Semester: *Full Sem, 1st Blk*

Typically Taught Fall Semester: *Full Sem, 1st Blk*

Typically Taught Spring Semester: *Full Sem, 2nd Blk*

A beginner level physical activity course that allows students to learn and develop the skills and knowledge needed to safely enjoy rock climbing.

REC 1528 - Rock Climbing, Level II

Credits: (1)

Typically Taught Summer Semester: *1st Blk*

Typically Taught Fall Semester: *1st Blk*

Typically Taught Spring Semester: *2nd Blk*

An intermediate level physical activity course that allows students to learn and develop the skills and knowledge needed to safely enjoy rock climbing.

REC 1529 - Rock Climbing, Level III

Credits: (1)

Typically Taught Fall Semester: *1st Blk*

An advanced level physical activity course that allows students to learn and develop the skills and knowledge needed to safely enjoy rock climbing.

REC 1530 - Rock Climbing for Instructors, Level I

Credits: (1)

Typically Taught Fall Semester: *1st Blk*

This course is intended for individuals pursuing work as climbing instructors or guides and covers the curriculum of the American Mountain Guides Association (AMGA) Single Pitch Instructor Course. Instruction will take place predominantly at local outdoor climbing areas through practical skills sessions. The course also includes relevant lecture, discussion, and teaching exercises. Emphasis will be placed on development of skills and knowledge base for rock climbing instructors.

REC 1531 - Rock Climbing for Instructors, Level II

Credits: (1)

Typically Taught Fall Semester: *1st Blk*

This course is intended for individuals pursuing work as climbing instructors or guides and covers the curriculum of the American Mountain Guides Association (AMGA) Single Pitch Instructor Course. Instruction will take place predominantly at local outdoor climbing areas through practical skills sessions. The course also includes relevant lecture, discussion, and teaching exercises. Emphasis will be placed on development of skills and knowledge base for rock climbing instructors.

REC 1535 - Leave No Trace Trainer

Credits: (1)

Typically Taught Summer Semester: *1st Blk*

Typically Taught Fall Semester: *1st Blk*

Course Fee: \$50.00

The Leave No Trace (LNT) Trainer course is designed to train current and future outdoor recreation leaders on the principles of Leave No Trace. Participants will gain an in-depth understanding of the seven LNT principles and how to provide LNT awareness workshops in a variety of settings including camps, schools, parks, and backcountry areas. Students who successfully complete this course will be recognized as Leave No Trace Trainers by the Leave No Trace Center for Outdoor Ethics

REC 1610 - Skiing, Level I

Credits: (1)

Typically Taught Fall Semester: *1st Blk*

Course Fee: \$139.00

A physical activity course that allows students to learn and develop the skills and technique needed to safely enjoy skiing and advance through specified skill levels.(CR/NC).

REC 1611 - Skiing, Level II

Credits: (1)

Typically Taught Fall Semester: *2nd Blk*

Course Fee: \$139.00

A physical activity course that allows students to learn and develop the skills and technique needed to safely enjoy skiing and advance through specified skill levels. (CR/NC).

REC 1612 - Skiing, Level III

Credits: (1)

Typically Taught Fall Semester: *3rd Blk*

Course Fee: \$139.00

A physical activity course that allows students to learn and develop the skills and technique needed to safely enjoy skiing and advance through specified skill levels. (CR/NC).

REC 1620 - Snowboarding, Level I

Credits: (1)

Typically Taught Fall Semester: *4th Blk*

Course Fee: \$139.00

A physical activity course that allows students to learn and develop the skills and technique needed to safely enjoy snowboarding and advance through specified skill levels. (CR/NC).

REC 1621 - Snowboarding, Level II

Credits: (1)

Typically Taught Fall Semester: *5th Blk*

Course Fee: \$139.00

A physical activity course that allows students to learn and develop the skills and technique needed to safely enjoy snowboarding and advance through specified skill levels. (CR/NC).

REC 1622 - Snowboarding, Level III

Credits: (1)

Typically Taught Fall Semester: *6th Blk*

Course Fee: \$139.00

A physical activity course that allows students to learn and

develop the skills and technique needed to safely enjoy snowboarding and advance through specified skill levels. (CR/NC).

REC 1630 - Cross-Country Skiing, Level I

Credits: (1)

Typically Taught Fall Semester: *7th Blk*

A physical activity course that allows students to learn and develop the skills and technique needed to safely enjoy cross-country skiing. (CR/NC).

REC 1631 - Cross-Country Skiing, Level II

Credits: (1)

Typically Taught Fall Semester: *8th Blk*

A physical activity course that allows students to learn and develop the skills and technique needed to safely enjoy cross-country skiing. (CR/NC).

REC 1632 - Cross-Country Skiing, Level III

Credits: (1)

Typically Taught Fall Semester: *9th Blk*

A physical activity course that allows students to learn and develop the skills and technique needed to safely enjoy cross-country skiing. (CR/NC).

REC 1640 - Skiing for Instructors

Credits: (1)

Typically Taught Fall Semester: *2nd Blk*

This course is intended for individuals pursuing work as skiing instructors. Instruction will take place at Powder Mountain ski resort. The course includes relevant lecture, discussion, and teaching exercises. Emphasis will be placed on development of skills and knowledge base for skiing instructors through practical demonstrations and exercise on the snow.

REC 1650 - Snowboarding for Instructors, Level I

Credits: (1)

Typically Taught Fall Semester: *2nd Blk*

This course is intended for individuals pursuing work as snowboarding instructors. Instruction will take place at Powder Mountain ski resort. The course includes relevant lecture, discussion, and teaching exercises. Emphasis will

be placed on development of skills and knowledge base for snowboarding instructors through practical demonstrations and exercise on the snow.

REC 1651 - Snowboarding for Instructors, Level II

Credits: (1)

Typically Taught Fall Semester: *2nd Blk*

This course is intended for individuals pursuing work as snowboarding instructors. Instruction will take place at Powder Mountain ski resort. The course includes relevant lecture, discussion, and teaching exercises. Emphasis will be placed on development of skills and knowledge base for snowboarding instructors through practical demonstrations and exercise on the snow.

REC 1652 - Snowboarding for Instructors, Level III

Credits: (1)

Typically Taught Fall Semester: *2nd Blk*

This course is intended for individuals pursuing work as snowboarding instructors. Instruction will take place at Powder Mountain ski resort. The course includes relevant lecture, discussion, and teaching exercises. Emphasis will be placed on development of skills and knowledge base for snowboarding instructors through practical demonstrations and exercise on the snow.

REST 1540 - Survey of Respiratory Therapy

Credits: (1)

Typically Taught Summer Semester: *1st Blk, 2nd Blk*

Typically Taught Fall Semester: *Full Sem, Online*

Typically Taught Spring Semester: *Full Sem, Online*

This course is designed to introduce allied health and other students to the profession of respiratory therapy. It includes field trips, group discussions, lecture/demonstrations and limited lab activities. Open to all students.

REST 1560 - Multi-Skilled Health Care Worker

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course prepares students from different health care disciplines to understand the hospital environment, patient

needs, and perform basic skills of patient care. Topics include the patient's right to privacy, confidentiality, ethical, legal, and cultural issues, documentation, team building, age related concerns, medical terminology, and death and dying. Patient skills include vital signs, oxygen administration, specimen collection, personal care and cleanliness, environmental cleanliness, nutrition and diet, elimination, positioning and ambulating, patient safety and comfort, and OSHA guidelines for healthcare worker safety.

REST 2140 - Introduction to Basic Therapeutic Modalities Lab

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Course Fee: \$200.00

Introductory Laboratory course emphasizing basic patient interaction and assessment skills. Includes infection control, the administration of medical gases, humidity and aerosol, pharmacologic agents, hyperinflation therapy, airway clearance techniques and methods of care, and artificial ventilation.

REST 2160 - Equipment Management Lab

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$200.00

Laboratory course emphasizing patient assessment skills relating to ventilation techniques and equipment. Includes equipment used by the respiratory care practitioner in initiating, troubleshooting, monitoring, and weaning from mechanical ventilation.

REST 2210 - Elementary Cardiopulmonary Anatomy and Physiology

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Cardiopulmonary anatomy and physiology specifically for the entry-level respiratory care practitioner. Includes physics of respiration, oxygen and carbon dioxide transport, and control of ventilation.

REST 2230 - Cardiopulmonary Pathophysiology

Credits: (2)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A synopsis of medical and surgical cardiopulmonary disorders for the entry-level practitioner. Etiology, symptomatology, pathology, diagnosis, treatment, and prognosis of these disorders are presented.

REST 2250 - Basic Patient Assessment

Credits: (2)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A basic orientation to patient assessment techniques used to obtain a patient medical history and physical examination. Discussion of pulmonary disease integrates assessment information with laboratory and radiographic data.

REST 2270 - Application of Cardiopulmonary Diagnostics

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Introduction to theory and clinical application of basic cardiopulmonary diagnostic studies, including simple spirometry, arterial and mixed venous blood gases, and electrocardiograms. Course emphasizes critical thinking skills in the application of diagnostic findings and utilizes case studies, class discussions, and extensive study guides.

Pre-requisite(s): Program acceptance required.

REST 2300 - Basic Modalities in Respiratory Care I

Credits: (3)

Typically Taught Fall Semester: *Full Sem, 1st Blk*

Typically Taught Spring Semester: *Full Sem, 1st Blk*

Theory and clinical application of basic therapies. Course includes indications, complications, hazards, equipment needed, side effects, and assessment for medical gases, humidity, aerosols, airway clearance, hyperinflation therapy, and pharmacologic agents. Course emphasizes patient assessment and critical thinking skills.

Co-Requisite(s): Concurrent enrollment in REST 2140.

REST 2310 - Basic Modalities in Respiratory Care II

Credits: (3)

Typically Taught Fall Semester: *Full Sem, 2nd Blk*

Typically Taught Spring Semester: *Full Sem, 2nd Blk*

Theory and clinical applications of airway management and artificial ventilation, including IPPB and introduction to modes of mechanical ventilation. Also includes the theory of invasive and non-invasive monitoring technology, and equipment decontamination.

REST 2320 - Essentials of Mechanical Ventilation

Credits: (2)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course provides a basic understanding of essentials for mechanical ventilation. Includes determining the need for ventilatory support, the associated physiology and how ventilatory support is initiated, maintained, monitored, and discontinued.

Pre-requisite(s): Program acceptance required.

REST 2330 - Entry Level Respiratory Therapy Review

Credits: (1)

Typically Taught Spring Semester: *Full Sem*

Course is a comprehensive review intended to prepare the student for the entry-level certification/licensure examination. The material covered is based on the examination matrix provided by the National Board for Respiratory Care (N.B.R.C.).

REST 2500 - Survey of Polysomnography

Credits: (1)

Typically Taught Summer Semester: *1st Blk*

Introduction to polysomnography as a profession. Course includes an overview of the polysomnogram, sleep disorders as they affect the general population, typical employment in the field, and employment opportunities. Also includes an introduction to the professional organization of sleep and requirements to become a registered polysomnographic technologist (R.PSG.T). Students taking REST 3500 are required to write a 6-10 page paper outlining the assessment of sleep disorders or neurodiagnostics. Students taking REST 2500 cannot take REST 3500 for credit.

Pre-requisite(s): Medical terminology, anatomy, and physiology or completion of respiratory therapy program or C.R.T., R.R.T., or R.N. credential.

REST 2501 - Anatomy and Physiology of Sleep

Credits: (3)

Introduction to the anatomy and physiology of the neurologic, cardiac, and respiratory systems during sleep. Basic anatomy and physiology of wake-sleep cycles are studied, with emphasis on changes that occur during varying stages of sleep and during common sleep disorders. Introduction to the EEG, EOG, EKG, EMG, and other polysomnography data recorders. Students taking REST 3501 are required to write a 6-10 page paper outlining physiologic components affecting quality of sleep. Students taking REST 2501 cannot take REST 3501 for credit.

Pre-requisite(s): medical terminology, anatomy, and physiology or completion of respiratory therapy program or C.R.T., R.R.T., or R.N. credential.

REST 2502 - Introduction to Sleep Disorders

Credits: (2)

Typically Taught Summer Semester: *1st Blk*

Course provides an overview of the history of sleep medicine, normal sleep physiology, effects of the sleep-wake stage, sleep disorders and abnormal sleep physiology, and an introduction to polysomnography (including patient interaction, sensor and lead placements, and instrumentation). Course also introduces the fundamentals of therapeutic interventions utilized to treat sleep disorders. Students taking REST 3502 are required to write a 6-10 page paper outlining the implications for assisted ventilation to sleep disorders. Students taking REST 2502 cannot take REST 3502 for credit.

Pre-requisite(s): medical terminology, anatomy, and physiology or completion of respiratory therapy program or C.R.T., R.R.T., or R.N. credential.

REST 2503 - Instrumentation and Computers in Polysomnography

Credits: (2)

Course provides study of equipment, instrumentation, and recording devices utilized in polysomnography. Includes EEG waves, signal pathway and derivation of waves, impedance, sensitivity, time constants, amplifiers, filters, calibration, electrodes, artifacts (both equipment and patient-generated), computer basics, and monitoring devices. Students taking REST 3503 are required to write a 6-10 page paper outlining specific instrumentation in polysomnography assessing sleep disorders. Students taking REST 2503 cannot take REST 3503 for credit.

Pre-requisite(s): REST 2500/REST 3500 and REST 2502/REST 3502 or medical terminology, human anatomy and human physiology.

REST 2505 - Therapeutics of Managing Sleep Apnea

Credits: (2)

Course provides current therapies and interventions for treatment of sleep apneas. Interventions include positive airway pressure therapy (nocturnal CPAP and bi-level CPAP), surgery, and dental devices. Patient compliance and outcomes of these treatments are included. Students taking REST 3505 are required to write a 6-10 page paper outlining strategies managing sleep apnea. Students taking REST 2505 cannot take REST 3505 for credit.

Pre-requisite(s): REST 2501/REST 3501 and REST 2502/REST 3502 or medical terminology, human anatomy and human physiology.

REST 2520 - Principles of Pharmacology

Credits: (2)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Introduction to pharmacology, including general principles, autonomic and central nervous system agents, and cardiovascular agents. Also includes drugs used in managing renal, GI tract, endocrine, and infectious or neoplastic diseases and disorders.

REST 2700 INT - Clinical Applications

Credits: (4)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Clinical rotations in various medical settings performing skills learned and practiced in REST 2140. Recommending and modifying basic therapies will be emphasized utilizing patient assessment skills and review of patient medical history.

Suggested Requisite(s): Concurrent enrollment in REST 2140.

REST 2710 INT - Specialty Clinical Experiences

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Clinical rotations in various medical settings providing the opportunity to observe and participate in various specialty areas within the profession, including PFTs, cardiac testing, EKGs, ABGs, and longterm artificial airway care.

Suggested Requisite(s): Concurrent enrollment in REST 2160.

REST 2720 INT - Clinical Applications

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Clinical rotations in various medical settings performing skills learned and practiced in REST 2140. Initiating, monitoring, and weaning from mechanical ventilation will be emphasized utilizing patient assessment skills. Case studies will be used to practice critical thinking skills in the management of ICU patients.

Suggested Requisite(s): Concurrent enrollment in REST 2160.

REST 2800 - Independent Projects

Credits: (1-3)

Projects must meet departmental and professional goals and standards and must have instructor approval prior to beginning project; enrollment by permission only. May be repeated twice for a maximum of 3 credit hours.

REST 2830 - Directed Readings

Credits: (1-2)

Typically Taught Spring Semester: *Full Sem*

Readings must meet departmental and professional goals and standards and must have instructor approval prior to beginning; enrollment by permission only.

May be repeated twice for a maximum of 3 credit hours.

REST 2920 - Short Courses, Workshops, Institutes and Special Programs

Credits: (1-3)

Variable Title

Consult semester schedule for current offerings. The specific title and credit authorized will appear on student transcript.

May be repeated 5 times with a maximum of 6 credit hours with different course content.

REST 3210 - Advanced Cardiopulmonary Anatomy and Physiology

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Cardiopulmonary anatomy and physiology specifically for the therapist-level practitioner. Includes advanced anatomical considerations for the cardiac, pulmonary and renal systems in neonates and adults. Includes developing abstracts from evidence-based research.

Pre-requisite(s):

Enrollment in baccalaureate respiratory therapy program, CRT credential, or equivalent.

REST 3220 - Advanced Cardiopulmonary Pathophysiology

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

Pathology and prognosis of coronary artery disease, interpreting 12-lead ECG's, fungal lung diseases, bronchogenic carcinomas, ARDS, chest injuries, shock in relation to the care of the trauma patient, and differentiation of intracellular and extracellular fluid compartments with renal pathology are presented. Includes developing abstracts from evidence-based research.

Pre-requisite(s): Enrollment in baccalaureate respiratory therapy program, CRT credential, or equivalent.

REST 3230 - Advanced Cardiopulmonary Technology

Credits: (2)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Advanced diagnostic procedures and interpretive skills in cardiopulmonary function, lung dynamics, specialty gases, blood gas analysis, and metabolic assessment.

REST 3260 - Neonatal/Pediatric Respiratory Care

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$137.18

Pediatric and neonatal respiratory care with emphasis on intensive care activities, therapeutic procedures, life support modalities and fetal, neonatal, pediatric pathophysiology.

Pre-requisite(s): Enrollment in baccalaureate respiratory care program, CRT credential, or equivalent.

REST 3270 - Adult Critical Care

Credits: (2)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$137.18

Advanced adult respiratory intensive care, including hemodynamic monitoring, ventilation/perfusion monitoring, pulmonary assessment and airway management.

REST 3280 - Patient Care Continuum/ Quality Management

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Theory and principles of pulmonary and spinal cord rehabilitation, polysomnography, discharge planning, patient education, quality management, home and self care, legal, ethical, and moral considerations of chronic and extended care.

REST 3500 - Survey of Polysomnography

Credits: (1)

Typically Taught Fall Semester: *1st Blk*

Typically Taught Spring Semester: *1st Blk*

Introduction to polysomnography as a profession. Course includes an overview of the polysomnogram, sleep disorders as they affect the general population, typical employment in the field, and employment opportunities. Also includes an introduction to the professional organization of sleep and requirements to become a registered polysomnographic technologist (R.PSG.T). Students taking REST 3500 are required to write a 6-10 page paper outlining the assessment of sleep disorders or neurodiagnostics. Students taking REST 2500 cannot take REST 3500 for credit.

Pre-requisite(s): Medical terminology, anatomy, and physiology or completion of respiratory therapy program or C.R.T., R.R.T., or R.N. credential.

REST 3501 - Anatomy and Physiology of Sleep

Credits: (3)

Typically Taught Summer Semester: *1st Blk*

Introduction to the anatomy and physiology of the neurologic, cardiac, and respiratory systems during sleep. Basic anatomy and physiology of wake-sleep cycles are studied, with emphasis on changes that occur during varying stages of sleep and during common sleep disorders. Introduction to the EEG, EOG, EKG, EMG, and other polysomnography data recorders. Students taking REST 3501 are required to write a 6-10 page paper outlining physiologic components affecting quality of sleep. Students taking REST 2501 cannot take REST 3501 for credit.

Pre-requisite(s): medical terminology, anatomy, and physiology or completion of respiratory therapy program or C.R.T., R.R.T., or R.N. credential.

REST 3502 - Introduction to Sleep Disorders

Credits: (2)

Course provides an overview of the history of sleep medicine, normal sleep physiology, effects of the sleep-wake stage, sleep disorders and abnormal sleep physiology, and an introduction to polysomnography (including patient interaction, sensor and lead placements, and instrumentation). Course also introduces the fundamentals of therapeutic interventions utilized to treat sleep disorders. Students taking REST 3502 are required to write a 6-10 page paper outlining the implications for assisted ventilation to sleep disorders. Students taking REST 2505 cannot take REST 3502 for credit.

Pre-requisite(s): medical terminology, anatomy, and physiology or completion of respiratory therapy program or C.R.T., R.R.T., or R.N. credential.

REST 3503 - Instrumentation and Computers in Polysomnography

Credits: (2)

Typically Taught Summer Semester: *1st Blk*

Typically Taught Fall Semester: *1st Blk*

Typically Taught Spring Semester: *1st Blk*

Course provides study of equipment, instrumentation, and recording devices utilized in polysomnography. Includes EEG waves, signal pathway and derivation of waves, impedance, sensitivity, time constants, amplifiers, filters, calibration, electrodes, artifacts (both equipment and patient-generated), computer basics, and monitoring devices. Students taking 3503 are required to write a 6-10 page paper outlining specific instrumentation in polysomnography assessing sleep disorders. Students taking REST 2503 cannot take REST 3503 for credit.

Pre-requisite(s): REST 2500/REST 3500 and REST 2502/REST 3502 or medical terminology, human anatomy

and human physiology.
May be repeated twice with a maximum of 6 credit hours.

REST 3504 - Laboratory Practice of Instrumentation in Polysomnography

Credits: (1)

Course provides practice and application of operating principles of equipment, instrumentation, and recording devices utilized in polysomnography. Includes EEG waves, signal pathway and derivation of waves, impedance, sensitivity, time constants, amplifiers, filters, calibration, electrodes, artifacts (both equipment and patient-generated), computer basics, and monitoring devices.

Pre-requisite(s): REST 3502/REST 2502 or medical terminology, human anatomy and human physiology

Co-Requisite(s): Concurrent enrollment with REST 3503.

REST 3505 - Therapeutics of Managing Sleep Apnea

Credits: (2)

Course provides current therapies and interventions for treatment of sleep apneas. Interventions include positive airway pressure therapy (nocturnal CPAP and bi-level CPAP), surgery, and dental devices. Patient compliance and outcomes of these treatments are included. Students taking REST 3505 are required to write a 6-10 page paper outlining strategies managing sleep apnea. Students taking REST 2505 cannot take REST 3505 for credit.

Pre-requisite(s): REST 2501/REST 3501 and REST 2502/REST 3502 or medical terminology, human anatomy and human physiology.

May be repeated once for a maximum of 4 credit hours.

REST 3506 - Advanced Technical Procedures

Credits: (3)

Course provides detailed description and discussion of specific diagnostic procedures in PSG, including multiple sleep latency tests, maintenance of wakefulness test, REM behavior disorder studies, MMPI, movement disorders, TCM, nocturnal seizure disorders, esophageal balloon procedures, and others.

Pre-requisite(s): REST 3502 and REST 3503.

May be repeated once for a maximum of 6 credit hours.

REST 3507 - Event Recognition and Polysomnography Scoring

Credits: (3)

Course provides advanced study of sleep stages and recognition of EEG characteristics of each stage. Multi-channel recording of breathing events, leg movements, ocular movements, cardiac and oxygenation monitoring, parasomnias, and interictal and ictal epileptic events are also presented. Course will include review and scoring of 12-hour polysomnography records to determine the overall sleep score.

Pre-requisite(s): REST 3501 and REST 3502.

REST 3508 - Sleep Center Management

Credits: (1)

Course is designed to prepare students for sleep center management in hospitals and independent facilities. Course includes sleep laboratory requirements for accreditation, personnel requirements and training, PSG study documentation, technician manuals, quality assurance, policies and procedures, and lab protocols. REST 3500 or credentialed as C.R.T., R.R.T., or R.N.

REST 3509 - Cases in Sleep Medicine

Credits: (2)

Typically Taught Summer Semester: *1st Blk*

Typically Taught Spring Semester: *1st Blk*

Course will include physician presentations or case studies of patients with a variety of sleep disorders. Case-based learning is applied in the context of patient presentation and initial interview and diagnostic findings, determination of appropriate sleep medicine studies, interpretation of patient findings, recommendation for patient therapy, and follow-up of patient compliance and outcome(s) of therapeutic intervention.

Pre-requisite(s): REST 3502 and REST 3505.

May be repeated once for a maximum of 4 credit hours.

REST 3510 - Clinical Practice I in Polysomnography

Credits: (2)

Introduction to the sleep laboratory and the set-up, monitoring, and therapeutic interventions associated with polysomnography. Students will be oriented to patient interviewing and selection, OSHA standards, sleep laboratory standards, and confidentiality. Competency is demonstrated in patient set-up, producing a reliable PSG, recognizing artifact, and basic therapeutic interventions for common sleep disorders.

Pre-requisite(s): REST 3502.

Co-Requisite(s): Concurrent enrollment in REST 3503 and

REST 3504.
May be repeated twice for credit.

REST 3511 - Clinical Practice II in Polysomnography

Credits: (2)

Case-based clinical applications course. Course requires competency in complete patient management (patient referral and interview, physician consult, patient study[ies], therapeutic intervention and follow-up of patient compliance). Students will develop the patient history and physical, perform the study, score the patient record, interpret the report, apply therapy, and follow-up patient compliance.

Pre-requisite(s): REST 3502 and REST 3510.

Co-Requisite(s): Concurrent enrollment in REST 3505.
May be repeated once for a maximum of 4 credit hours.

REST 3512 - Clinical Practice III in Polysomnography

Credits: (4)

Clinical applications course providing experience in performing advanced technical procedures, including multiple sleep latency tests, maintenance of wakefulness tests, REM behavior disorders studies, MMPI, movement disorders, TCM, nocturnal seizure disorders, esophageal balloon procedures, and others.

Pre-requisite(s): REST 3502, REST 3510, and REST 3511.

Co-Requisite(s): Concurrent enrollment in REST 3506.
May be repeated once for a maximum of 8 credit hours.

REST 3760 INT - Clinical Applications of Neonatal/Pediatric Respiratory Care

Credits: (4)

Typically Taught Spring Semester: Full Sem

The clinical application of pediatric and neonatal assessments as they relate to selection and use of respiratory care procedures and equipment specific for this patient population.

REST 3770 INT - Clinical Applications of Adult Critical Care

Credits: (4)

Typically Taught Fall Semester: Full Sem

Adult respiratory care in the intensive care setting [shock-trauma, thoracic, burn ICUs] with emphasis on

hemodynamic monitoring, ventilation/perfusion monitoring, pulmonary assessment and airway management.

Co-Requisite(s): To be taken concurrently with REST 3270.

REST 3780 INT - Clinical Applications

Credits: (2)

Typically Taught Fall Semester: Full Sem

Typically Taught Spring Semester: Full Sem

Clinical experiences related to REST 3280: rehabilitation, extended care, home care agencies, polysomnography, patient assessment and planning for discharge, and quality management.

Co-Requisite(s): To be taken concurrently with REST 3280.

REST 3800 - Respiratory Care Certifications

Credits: (3)

Typically Taught Summer Semester: Full Sem

Typically Taught Fall Semester: Full Sem

Typically Taught Spring Semester: Full Sem

Best practice for advanced resuscitation skills for neonates, children, and adults are demonstrated and effective team-based care for health professionals presented. Advanced life-support skills are presented and practiced prior to entry into the workforce.

REST 3900 - Clinical Simulation Seminar

Credits: (1)

Typically Taught Summer Semester: Full Sem

Typically Taught Fall Semester: Full Sem

Typically Taught Spring Semester: Full Sem

Problem-based clinical concepts course: comprehensive program review including written and clinical simulation examinations.

Pre-requisite(s): Enrollment in baccalaureate respiratory therapy program; CRT credential, or equivalent.

REST 4600 - Patient Education and Disease Management

Credits: (3)

Typically Taught Fall Semester: Full Sem

Quality of care issues arise in a variety of management roles throughout the spectrum of care. Practitioners are increasingly serving as supervisors, managers, and clinical

preceptors in their roles involving case management, disease navigation, and home management in chronic respiratory patients. This course focuses on improving communication and coordination of care to educate patients and reduce readmissions, understand reimbursement systems, and quality outcomes for patients in our care.

REST 4610 - Advanced Patient Assessment

Credits: (1-2)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

The advanced patient assessment project is designed to be a physician intensive, interactive experience that emphasizes an understanding of diagnostic processes involved in assessing, evaluating, and treating patients with cardiopulmonary diseases. Enrollment by permission only.

REST 4620 - Health Promotion

Credits: (1-2)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

The health promotion project addresses the growing role of the Respiratory Care Practitioner (RCP) in patient education, public education, and health promotion in general. Enrollment by permission only.

REST 4630 - Continuous Quality Improvement

Credits: (1-2)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

The continuous quality improvement project enhances an understanding of how to construct and conduct a quality improvement (quality assurance) project in the workplace. Enrollment by permission only.

REST 4800 - Independent Projects

Credits: (1-6)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Student designed, instructor approved projects which will further develop cognitive or psychomotor skills for the

baccalaureate level respiratory care practitioner. Projects must meet departmental and professional goals and standards and must have instructor approval prior to beginning project. Enrollment by permission only. May be repeated for a maximum of 6 credit hours.

REST 4830 - Directed Readings

Credits: (1-3)

Typically Taught Spring Semester: *Full Sem*

Student designed, instructor approved readings which will further develop professional knowledge or understanding for the baccalaureate level respiratory care practitioner. Readings must meet departmental and professional goals and standards and must have instructor approval prior to beginning. Enrollment by permission only. May be repeated twice with a maximum of 3 credit hours.

REST 4850 - Study Abroad

Credits: (1-6)

Variable Title

Typically Taught Summer Semester: *Full Sem*

The purpose of this course is to provide opportunities for students in health professions to experience a study abroad program that is designed to explore healthcare, culture, and clinical experience.

May be repeated 5 times with a maximum of 6 credit hours.

REST 4990 - Senior Seminar

Credits: (2)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Moderated discussion and/or laboratory experiences relating to current events in healthcare, legislative, credentialing, and licensing issues as well as emergent technologies and advanced educational opportunities in the field.

RHS 1300 - First Aid: Responding to Emergencies

Credits: (2)

Typically Taught Summer Semester: *1st Blk*

Typically Taught Fall Semester: *1st Blk*

Typically Taught Spring Semester: *1st Blk*

Trains the lay person to respond correctly in emergencies and act as the first link in the emergency medical service system. Course leads to American Heart Association Basic Life Support (BLS) and Heartsaver First Aid OR American Red Cross certification in Adult, Infant and Child CPR with

AED and First Aid: Responding to Emergencies.
Cross-listed with HLTH 1300.

RHS 1550 - Introduction to Rehabilitation Sciences

Credits: (2)

Typically Taught Fall Semester: *Full Sem, Full Sem - Online*

Typically Taught Spring Semester: *Full Sem, Full Sem - Online*

This course is designed to introduce students to health care professions that the majority of athletic therapy majors pursue. These health care professions include: athletic training (AT), physical therapy (PT), occupational therapy (OT), physician assistant (PA), and medicine (MD or DO). Through lectures, assignments, and guest speaker presentations, students will be introduced to a variety of health care professions, learn about the application process for various graduate programs, use resources to prepare their graduate program applications, and develop/revise their degree plans for their Bachelor's degree and graduate program prerequisites.

RHS 2175 - Introduction to Sports Medicine

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Presents the duties, functions, and collaboration of sports medicine professionals in the care and supervision of athletes. The course will focus on the prevention, diagnosis, and treatment of common musculoskeletal injuries/illnesses, strength and conditioning of athletes, environmental factors and guidelines, and management and administration of the sports medicine team.

RHS 2300 - Emergency Response

Credits: (3)

Typically Taught Summer Semester: *2nd Blk*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Meets the needs of the non-health care professional who has a duty to respond in an emergency. Provides more skills and in-depth training than the First Aid: Responding to Emergencies course. Course leads to American Red Cross certification in Emergency Response and CPR for the Professional Rescuer.

Cross-listed with HLTH 2300.

RHS 2431 - Taping, Wrapping, Bracing, Padding, and Splinting

Credits: (1)

Typically Taught Fall Semester: *Full Sem, 1st Blk, 2nd Blk*

This course is designed to give a basic understanding of athletic training taping, wrapping, bracing, padding, and splinting techniques. Students will apply a variety of techniques to support all areas of the body.

RHS 2890 - Introduction to Cooperative Work Experience

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Provides academic credit for an introductory internship (paid or unpaid) experience.

RHS 3080 - Evidence Based Practice for Rehabilitation Sciences

Credits: (3)

Typically Taught Summer Semester: *Full Sem, 2nd Blk, 1st Blk*

Typically Taught Spring Semester: *Full Sem*

This course explores the concepts necessary to ensure future allied health professionals are well prepared to utilize an evidence-based practice approach to treatment. Students will gain familiarity with the major elements of evidenced-based practice, such as developing a clinically-relevant research question, research design, evaluation, statistical analysis, presentation of data, and ethical considerations. This course also provides an overview of descriptive and inferential statistics. Students should have a basic understanding of conducting library and Internet information searches prior to taking this course.

Pre-requisite(s): MATH 1010 or higher; or Math ACT score of 23 or higher.

RHS 3200 - Psychology of Sport, Injury & Rehabilitation

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course is designed to provide a basic understanding of the psychology of sport, injury, and rehabilitation. Topics covered include: emotion, motivation, psychosocial skills

training and application, psychological antecedents of injury, psychology of injury and rehabilitation including individual response and effect on self-identity and physical function, and outcomes topics related to rehabilitation and exercise adherence, eating disorders, alcohol and drug/substance abuse, cultural competence, and research methods within the area of sport, injury, and rehabilitation psychology.

Pre-requisite(s): PSY 1010.

RHS 3300 - Evaluation and Care of Musculoskeletal Injuries: Lower Extremities

Credits: (3)

Typically Taught Summer Semester: *1st Blk*

Typically Taught Fall Semester: *Full Sem*

Content of this course addresses evaluation techniques and care for musculoskeletal injuries to the trunk and lower extremities. The student must integrate knowledge of anatomical structures, physiology principles and evaluative techniques to provide a basis for critical decision-making in an injury management environment.

Pre-requisite(s): ZOOL 2100 or HTHS 1110.

Note: Must be admitted to the Rehabilitation Sciences (formerly Athletic Therapy) program in order to register for this course.

RHS 3301 - Evaluation and Care of Musculoskeletal Injuries: Upper Extremities

Credits: (3)

Typically Taught Summer Semester: *2nd Blk*

Typically Taught Spring Semester: *Full Sem*

Content of this course addresses evaluation techniques and care for musculoskeletal injuries to the head, face and upper extremities. The student must integrate knowledge of anatomical structures, physiology principles and evaluative techniques to provide a basis for critical decision-making in an injury management environment.

Pre-requisite(s): ZOOL 2100 or HTHS 1110; AND RHS 3300.

Note: Must be admitted to the Rehabilitation Sciences (formerly Athletic Therapy) program in order to register for this course.

RHS 3505 - Standardized Patient Training

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

The purpose of this course is to provide experiential learning for WSU health professions students by training them to act as standardized patients for simulated exam experiences in different health professions courses. Students will learn to respond to health professions students with consistent, reliable, professional responses to a variety of simulated scenarios. In this course, students will be introduced to orthopedic evaluation and assessment, the role of a patient, basic acting skills, training on how to portray patients, case simulations, and instructions on how to provide constructive feedback to health professions students.

RHS 3600 - Ergonomics for Health and Safety

Credits: (2)

Examines and analyzes the effects of the workplace on employees and adaptations of the work environment to suit the individual. The focus is on the interaction of work and people, i.e., physiological and environmental stresses with the primary intent to establish ways to reduce injuries, accidents, and fatigue and to improve human performance at work.

Pre-requisite(s): ESS 3500 or consent of instructor.

Note: This course is not currently offered.

RHS 4150 - Therapeutic Modalities for Rehabilitation Sciences majors

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Specifically designed for the pre-professional student, the course will introduce the student to contemporary usage and basic foundation of therapeutic modalities. Through lecture, discussion, and laboratory experience, the scientific basis of musculoskeletal rehabilitation involving therapeutic modalities will be examined. Emphasis will be placed on fundamental concepts of tissue healing and pain control techniques, as well as an introduction to cryo/thermotherapy, massage, traction, ultrasound and electrical stimulation.

Pre-requisite(s): RHS 3300, RHS 3301.

Note: Must be admitted to the Rehabilitation Sciences (formerly Athletic Therapy) program in order to register for this course.

RHS 4250 - Rehabilitation for Rehabilitation Sciences majors

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course provides an overview of therapeutic exercise as it relates to the rehabilitation process of musculoskeletal injuries for Rehabilitation Sciences majors. This course provides instruction and hands-on techniques in basic therapeutic rehabilitation techniques.

Pre-requisite(s): RHS 3300, RHS 3301, ESS 3450.

Note: Must be admitted to the Rehabilitation Sciences (formerly Athletic Therapy) program in order to register for this course.

RHS 4650 - Management for Rehabilitation Sciences Majors

Credits: (3)

Typically Taught Summer Semester: *Full Sem - Online, 2nd Blk Online, 1st Blk Online*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem - Online, 2nd Blk Online, 1st Blk Online*

Provides an overview of the necessary policies, procedures, maintenance, and daily operation of healthcare facilities.

Applies principles of facility design and planning, information management, legal and ethical considerations in healthcare, and professional development as it relates to future healthcare professionals.

Pre-requisite/Co-requisite: RHS 4890.

RHS 4800 - Individual Projects

Credits: (1-4)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A comprehensive study or project in the field of Athletic Training. Hours to be arranged for seniors only.

May be repeated 3 times up to 16 credit hours.

RHS 4810 - Experimental Courses

Credits: (1-6)

Individual courses offered on an experimental basis, identified by specific name and description. The specific title will appear on student's transcript along with the authorized credit. May be repeated up to 9 credit hours. Refer to Experimental Courses.

RHS 4890 INT - Cooperative Work Experience

Credits: (1-6)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Provides academic credit for on-the-job experience.

May be repeated 5 times and up to 6 credit hours.

Note: Must be admitted to the Rehabilitation Sciences program to register for this course.

RHS 4999 - Special Topics in Rehabilitation Sciences

Credits: (3)

Typically Taught Summer Semester: *2nd Blk, 2nd Blk Online, 1st Blk, 1st Blk Online*

Typically Taught Fall Semester: *2nd Blk, 2nd Blk Online, 1st Blk, 1st Blk Online*

Typically Taught Spring Semester: *2nd Blk, 2nd Blk Online, 1st Blk, 1st Blk Online*

This course will focus on introducing students to special topics which may include but are not limited to: women's health, instrument assisted soft tissue mobilization, or sacroiliac joint conditions.

SBS 2810 - Data Visualization Bootcamp

Credits: (1)

The use of data to convey a message is more prevalent today than ever before, and requires a unique set of skills. This course teaches students about data storytelling from the perspective of data messaging, data literacy, data visualization and creating data narratives. Students will learn to engage with data in meaningful ways using tools such as Visme and Tableau. Data used in the course will focus on political narratives and how they shape our world.

SBS 2810 - Experimental Course

Credits: (1-6)

Experimental

Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript.

May be repeated 5 times with a maximum of 6 credit hours.

SBS 2810 - Political Internship Preparation

Credits: (1)

Political internships are an important way to understand

how the political world operates, which is useful information regardless of your future career path as they are all affected by policy decisions made by the government. This course will prepare students for internships so that we can guarantee them an intern placement that best serves their career goals.

SBS 2920 - How did we get so polarized?

Credits: (1)

Workshop

Typically Taught Spring Semester: 2nd Blk

Are Americans more polarized and less united than ever before? If so, why? In this course, psychologists, historians, economists, political scientists, communications experts will take on the question of polarization, discuss how Americans came to be so divided, and explore what the future holds.

SBS 2920 - Short Courses, Workshops, Institutes and Special Programs

Credits: (1-6)

Variable Title

Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript.

SBS 2920 - Workshop

Credits: (1-6)

Variable Title

Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript.

SCM 2400 - Fundamentals of Project Management

Credits: (3)

Typically Taught Spring Semester: Full Sem

Provides practical knowledge and skills for managing a project from inception to completion to meet time, cost, and performance objectives. Prepares students from all backgrounds to successfully perform the role of a project manager in any profit or non-profit context, including business, government, engineering, healthcare, arts, humanities, or education. Topics include management of project teams, stakeholders, communications, schedule, cost, scope, performance and risk for achieving project success.

SCM 3050 - Operations and Supply Chain Management

Credits: (3)

Typically Taught Summer Semester: Full Sem

Typically Taught Fall Semester: Full Sem

Typically Taught Spring Semester: Full Sem

Supply chain management is the value creation engine of every organization. The focus of this course is to acquaint students with the core elements of supply chain management: 1) customer value, 2) collaborative value creation, and 3) systems thinking. The course introduces and defines the three primary functions that compose supply chain activities- 1) purchasing, 2) operations, and 3) logistics-and shows how they need to work together to create the high-quality, low-cost, and innovative products and services that customers expect to find in today's marketplace. Important analytical tools are introduced.

Pre-requisite(s): Earn a "C" or better in MATH 1010, MATH 1050, MATH 1080 or MATH 1210; or earn a "C" or better in any math course for which either MATH 1010, MATH 1050, MATH 1080, or MATH 1090 is a prerequisite; or score 3 or higher on AP Calculus exam or; score 70 or higher on ACCUPLACER College Level Math (CLM) or; score of 23 or higher on Math ACT or; score of 55 or higher on ALEKS.

SCM 3500 - Spreadsheet Modeling for Prescriptive Analytics

Credits: (3)

Typically Taught Summer Semester: Full Sem

Typically Taught Fall Semester: Full Sem

Typically Taught Spring Semester: Full Sem

Spreadsheet software enables business people to model and analyze quantitative problems in a wide variety of business contexts. This course covers spreadsheet modeling in terms of optimization models for deciding the best set of decisions to meet constraints and performance objectives; simulation models for considering uncertainty in business operations and decisions; and other decision models and tools. Through conceptual and applied topics, this course will enhance one's problems solving and modeling capabilities as well as Excel spreadsheet skills.

Pre-requisite(s): MIS 2010, QUAN 2600.

SCM 3600 - Logistics & Transportation

Credits: (3)

Typically Taught Fall Semester: Full Sem

This course incorporates readings, site visits, and case analysis to convey state-of-the-art and emerging business logistics practices. The focus of this course is on forecasting, inventory management, transportation, distribution and warehousing, with an introduction to contemporary issues in logistics such as HADR and sustainability. Development of leading-edge strategies, which promote a firm's ability to differentiate itself in terms of its supply chain performance is emphasized.

Pre-requisite(s): BSAD 2899; SCM 3050.

Pre-requisite/Co-requisite: SCM 3500.

SCM 3700 - Purchasing & Strategic Sourcing

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

This course provides students an introduction to the supply management discipline, focusing on the development of category management skills and the purchasing process. Companies have always sourced a large percent of their COGS--up to 50-80%. However, today's emphasis on core competencies and increased use of outsourcing makes sourcing even more strategic. Sourcing managers are responsible for managing supplier capacity and capabilities. The course emphasizes costing and relationship management tools. This course builds the foundation for students to pass the Certified Profession in Supply Management (CPSM) exam.

Pre-requisite(s): BSAD 2899; SCM 3050.

Pre-requisite/Co-requisite: SCM 3500.

SCM 4100 - Quality Management and Process Improvement

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Introduces principles and practices for achieving quality, customer satisfaction, and performance excellence. Emphasis on process improvement, problem-solving, variation and statistical thinking, customer and supplier relationships, service quality, employee involvement, project management, and quality management frameworks. Presents tools and methods for analyzing and improving business processes, including Six Sigma, lean, and theory of constraints. This course builds the foundation for students to pass the ASQ Certified Quality Process Analyst exam.

Pre-requisite(s): BSAD 2899; SCM 3050; or Instructor

Permission.

Pre-requisite/Co-requisite: QUAN 3610.

SCM 4400 - Global Supply Chain Management

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Globalization has changed the rules of competition. Globalization also raises complex and controversial issues such as job displacement and worker exploitation. Winning companies now use worldwide resources to meet the needs of global consumers. This course introduces and is built around a scanning model. Students are expected to actively scan, using emerging information to identify inflection points and determine their strategic and tactical implication. From this analysis, strategic objectives are renewed to guide the design of a global supply chain. Effective communication and teamwork are emphasized via the in class activities and projects.

Pre-requisite(s): BSAD 2899 and SCM 3050.

SCM 4500 - Supply Chain Relational Strategies

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

This course focuses on the soft side of supply chain management, addressing both the internal (including individual) and external relationships that allow a supply chain to function. Key elements of the course include the perspective on supply chain strategic relationships, managing cultural disparities and conflict between businesses and functional units within them, and change management issues. Students will learn core processes around initial exploration and assessment of supply chain relationships, establish metrics/expectations for the relationship, craft and manage teams and work groups, and develop negotiation skills.

Pre-requisite(s): SCM 3600, SCM 3700; MGMT 3200 or PS 3250.

SCM 4550 - Strategic Supply Chain Design

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

Supply chain management is integrative in nature, requiring a systems approach to process design and management. The goal is to co-create value across organizational boundaries. This capstone SCM course emphasizes the

analytical aspects of identifying the right capabilities required to design a collaborative business model and create distinctive customer value. This analysis answers the question, "Who should be on the value-creation team?" The course is designed as a collaborative laboratory, employing extensive experiential learning and case analysis.

Pre-requisite(s): SCM 3600, SCM 3700, SCM 4100; MGMT 3200 or PS 3250.

SCM 4700 - Supply Chain Case Analysis, Logic, and Presentation

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course is designed around the case analysis methodology and has the explicit goal of preparing student teams for participation in specific competitive supply chain case competitions (both regionally and nationally). Preparation time will be extensive and students must possess an advanced level of SCM mastery prior to enrollment in this class. Class meetings will be scheduled with the students throughout the semester for presentation and preparation. Please see the instructor for information on enrollment eligibility. Credit/no credit grading.

Pre-requisite(s): SCM 3050, instructor approval.

SCM 4800 - Independent Research

Credits: (1-3)

Directed research and study on an individual basis.

Pre-requisite(s): Business Foundations; BSAD 2899; Senior Standing; Written Instructor Approval.

May be repeated until a total of 4 hours credit is accumulated.

SCM 4840 - Operations & Supply Chain Industry Projects

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Early in their careers, many choose to work for a management consulting company or get involved in rotations within a company. These jobs and programs expose the worker to a wide variety of job types and functions and prepare the worker for whatever opportunities the future may bring. In this course, students are exposed to operations and supply chain management consulting projects typical of what they could expect in a full-time consulting position or in a company's early-career leadership rotation program.

Pre-requisite(s): SCM 3500.

Co-Requisite(s): SCM 3600 and SCM 3700.

May be repeated up to two times for a total of 6 hours of credit.

SCM 4850 - Supply Chain Management Study Abroad

Credits: (1-3)

Typically Taught Spring Semester: *Full Sem*

This course is designed for students who wish to explore supply chain management theory and practice in countries other than the U.S. Students will study global supply chain management as offered through a partner university (or other university with department chair approval).

Pre-requisite(s): BSAD 2899.

Can be repeated once up to 6 credits.

SCM 4860 INT - Supply Chain Management Internship

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A structured professional-level field experience. The student will be counseled and supervised as he/she applies and integrates the knowledge and skills obtained through operations management and logistics courses.

Pre-requisite(s): BSAD 2899; Senior Standing; Instructor approval.

SOC 1010 SS/DV - Introduction to Sociology

Credits: (3)

Typically Taught Summer Semester: *1st Blk, Full Sem Online*

Typically Taught Fall Semester: *Full Sem, Full Sem Online*

Typically Taught Spring Semester: *Full Sem, Full Sem Online*

An introduction to the study of Sociology through the concepts and principles used to understand and evaluate society. It focuses on all aspects of society: culture; social interaction; institutions; group processes; deviance and social control; stratification, diversity, and inequality based on race, ethnicity, class, gender, etc.; and social stability and change.

SOC 1020 SS/DV - Social Problems

Credits: (3)

Typically Taught Summer Semester: *2nd Blk, Full Sem Online*

Typically Taught Fall Semester: *Full Sem, Full Sem Online*

Typically Taught Spring Semester: *Full Sem, Full Sem Online*

A study of major social problems in contemporary society, including issues of age, gender, family, race, ethnicity, wealth and poverty, politics, education, public safety, health care, substance abuse, and environment. Special emphasis is given to these issues and their consequences for today's global and diverse society.

SOC 2370 - Sociology of Gender

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course examines gender as an organizing principle of social life and the ways in which gender influences individuals' identities, behaviors, and life experiences. Students will study gender within a variety of contexts, such as the workplace, family, politics, athletics, education, health, media, and religion. Attention will also be given to sociological theories of gender, gender socialization, and the intersection of gender, race, class, and sexuality.

SOC 2600 - Sociology of Family

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

The course analyzes family arrangements and structures, changes in such arrangements over time, and contemporary issues facing families. Emphasis is placed on variations in family experiences with regard to race, gender, social class, and sexual orientation. Students examine the relationship between families and other social institutions such as politics, religion, and the economy.

SOC 2810 - Experimental Course Offerings

Credits: (2-3)

Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript. Refer to Experimental Courses.

May be repeated 5 times up to 6 credit hours.

Note: This course is offered as needed. Please check with the department for availability.

SOC 2920 - Short Courses, Workshops, Institutes, and Special Programs

Credits: (1-3)

Variable Title

Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript.

May be repeated 5 times up to 6 credit hours.

Note: This course is offered as needed. Please check with the department for availability.

SOC 3000 - Self and Society

Credits: (3)

Typically Taught Spring Semester: *Full Sem odd years*

Sociological Social Psychology is the study of individual, group, and social behavior through analysis of the relationship between individuals and social institutions. Individuals actively create social structure while they are simultaneously shaped by it. Students will analyze how social interaction, processes, roles, and statuses are created and maintained by individuals. Students will also analyze how these same processes, roles, and statuses shape their individual behavior. Social Psychological theories and methodologies are also addressed.

Pre-requisite(s): SOC 1010 or SOC 1020.

SOC 3010 - Social Inequality

Credits: (3)

Typically Taught Spring Semester: *Full Sem odd years*

The study of social stratification and inequality in the United States and globally. The course focuses on economic class and status groups, such as gender, race and ethnicity, age, sexuality, and physical ability.

Pre-requisite(s): SOC 1010 or SOC 1020.

SOC 3030 - Classical Sociological Theory

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A study of the classical tradition of sociological thought in late 18th to early 20th century Europe and 19th to early 20th century U.S. The course introduces the main theories of Comte, Martineau, Marx, Weber, Simmel, Durkheim,

and others, including early theorists of gender and race. To be taken before SOC 4030.

Pre-requisite(s): SOC 1010.

SOC 3250 - Deviance and Social Control

Credits: (3)

Typically Taught Spring Semester: *Full Sem even years*
Introduces the student to the various sociological concepts of deviance and social control. Deviance and social control are examined in their positive and negative forms. The benefits and contributions as well as the consequences and disruptions of these forms are considered in the context of the formal and informal socialization processes and the internalization of social norms.

Pre-requisite(s): SOC 1010 or SOC 1020.

SOC 3260 - Juvenile Delinquency

Credits: (3)

Typically Taught Fall Semester: *Full Sem even years*
Juvenile delinquency as a social phenomenon and its causes involving definitions, agencies of law enforcement, and the courts.

Pre-requisite(s): SOC 1010 or SOC 1020.

SOC 3270 - Criminology

Credits: (3)

Typically Taught Fall Semester: *Full Sem odd years*
Study of the nature, extent, causes, and treatment of crime.

Pre-requisite(s): SOC 1010 or SOC 1020.

SOC 3300 - Environment and Society

Credits: (3)

Typically Taught Spring Semester: *Full Sem even years*
An in-depth study of societal-environmental interactions including population, technology and organization impacts of human societies on the physical environment, and environmental impacts on human behavior and social organization.

SOC 3400 - Social Change

Credits: (3)

Typically Taught Fall Semester: *Full Sem odd years*
The factors which change society and how society changes, emphasizing technological innovations and its implications, social movements, and the role of individuals.

Pre-requisite(s): SOC 1010 or SOC 1020.

SOC 3410 - Sociology of Religion

Credits: (3)

Typically Taught Spring Semester: *Full Sem even years*
Examination of religion and religious activities globally from the theoretical perspectives of Sociology.

SOC 3420 - Sociology of Education

Credits: (3)

Typically Taught Fall Semester: *Full Sem even years*
Analysis of the structure and function of education as a central social institution in contemporary society.

SOC 3430 - Medicine and Healthcare in Society

Credits: (3)

Typically Taught Fall Semester: *Full Sem odd years*
Utilizes the Sociological perspective to explore the Institution of Medicine and the Medical Healthcare Delivery System; its function as a social institution and its capability, accessibility, and the related issues of providing Healthcare. The various organizational system structures, and their economic and political dimensions are also examined. Further emphasis is placed on the various professional roles, supporting roles, and patient behaviors. Additional focus is placed upon selected international comparisons, as well as medical research, ethical considerations, and international health issues.

SOC 3550 - Organizations in Society

Credits: (3)

Typically Taught Spring Semester: *Full Sem odd years*
Surveys the nature and structure of organizations in general and modern formal organizations and globalization in specific. How organizations work, function and affect contemporary society and individuals' lives and behavior. Sociological theories about modern organizations and globalization will be examined.

Pre-requisite(s): SOC 1010.

SOC 3600 - Social Statistics

Credits: (3)

Typically Taught Summer Semester: *1st Blk*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Introduction to descriptive and inferential statistical

analysis techniques and the presentation of results.

Pre-requisite(s): MATH 1010 or equivalent.

SOC 3660 - Sociological Research

Credits: (3)

Typically Taught Summer Semester: *2nd Blk*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Examines the scientific foundations of Sociology and methods of Sociological Research.

Pre-requisite(s): SOC 1010 or SOC 1020.

SOC 3840 - Cities and Urban Life

Credits: (3)

Typically Taught Fall Semester: *Full Sem even years*

In-depth analysis of the urbanization, modernization, and development of the system of cities. The relationship between cities and culture, mental illness, and social problems are examined.

SOC 3850 - Race & Ethnicity

Credits: (3)

Typically Taught Spring Semester: *Full Sem even years*

Examines the social construction of race and ethnicity and the conditions of racial and ethnic groups in the United States and globally, based on statistical and ethnographic data. Includes a survey of theories of the origins, causes, and dynamics of ethnic and race relations.

SOC 4030 - Contemporary Sociological Theory

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

The works of major contemporary theorists (Mead, Parsons, Merton, Goffman, Garfinkel, etc.) and the emergence of current schools of sociological thought.

Pre-requisite(s): SOC 1010 and SOC 3030.

SOC 4220 - Life in a Consumer Society

Credits: (3)

Typically Taught Spring Semester: *Full Sem even years*

Examination of consumption, consumerism, and the increasing commercialization of contemporary life. Students study the history of consumerism and advertising; explore how consumer culture influences their

own consumption choices; and analyze the relationship between consumerism and social inequality.

SOC 4270 - Sociology of Law

Credits: (3)

Typically Taught Spring Semester: *Full Sem odd years*

A study of the interchange between law and society, where society creates the law, yet law regulates society.

Pre-requisite(s): SOC 1010 or SOC 1020.

SOC 4300 - Qualitative Methods

Credits: (3)

Typically Taught Summer Semester: *Full Sem, Full Sem Online*

Typically Taught Fall Semester: *Full Sem, Full Sem Online*

Typically Taught Spring Semester: *Full Sem, Full Sem Online*

This course provides students with a practical introduction to qualitative research methods, focusing on ethnography, interviewing, and content analysis. Framing qualitative research in the context of contemporary theory and ethical concerns, it provides hands-on exposure to qualitative research's unique logic, design, practice, analysis, and writing in a variety of research and applied contexts.

Pre-requisite(s): Junior or Senior standing.

SOC 4410 - Sociology of Globalization

Credits: (3)

Typically Taught Fall Semester: *Full Sem odd years*

Study of economic, political, and cultural globalization in the late 20th and early 21st century. The course examines the history, theories and critiques of globalization, the key actors in global political-economy, the institutions and events that shape global processes, and globalization's impact on local economies, politics, culture, and the natural environment.

SOC 4550 - Sociology of Work

Credits: (3)

Typically Taught Fall Semester: *Full Sem even years*

Explores the relationship between work and social class, gender, technology, race, and ethnicity. Additionally, the nature of occupational subcultures is analyzed.

SOC 4810 - Experimental Course Offerings

Credits: (2-3)

Individual courses offered on an experimental basis, identified by specific name and description. The specific title will appear on student's transcript along with the authorized credit. Refer to Experimental Courses.

May be repeated 5 times up to 6 credit hours.

Note: This course is offered as needed. Please check with the department for availability.

SOC 4830 INT - Readings and/or Projects**Credits: (1-3)**

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Individual readings and/or projects for sociology majors or minors. (Maximum of 5 hours applied toward graduation, 3 of which can be applied toward the sociology major or minor.)

Pre-requisite(s): SOC 1010, senior standing, permission of instructor, approval of program coordinator.

May be repeated 4 times up to 5 credit hours.

SOC 4890 INT - Internship**Credits: (1-6)**

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Qualified juniors and seniors may apply for internships among federal, state and private agencies. Internships are anticipated to provide the student with both practical and research experiences. A student may complete up to 9 hours, but not more than 6 hours in any one type of internship. A maximum of 3 hours may be applied towards the sociological major or sociological minor.

Pre-requisite(s): SOC 1010, junior or senior status, approval of program coordinator.

May be repeated 8 times up to 9 credit hours.

SOC 4900 - Senior Capstone Course**Credits: (3)**

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A course designed to organize all of the knowledge that the student has gleaned from his/her major into an integrated whole. This course will help the student make relevant the knowledge that he/ she has learned. This will be accomplished by having the student write a senior thesis as well as attend lectures.

Pre-requisite(s): SOC 1010, SOC 3030, SOC 3600, SOC 3660, senior standing.

SOC 4920 - Short Courses, Workshops, Institutes, and Special Programs**Credits: (1-3)****Variable Title**

Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript.

May be repeated 5 times up to 6 credit hours.

Note: This course is offered as needed. Please check with the department for availability.

SOC 4930 INT - Community Engaged Capstone**Credits: (3)**

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A course designed to organize all of the knowledge that the student has gleaned from his/her major into an integrated whole. This course will help the student make relevant the knowledge that he/ she has learned. This will be accomplished by having the student prepare a project based on a previously completed internship as well as attend lectures. Prerequisite: SOC 1010, SOC 3030, SOC 3600, SOC 3660, 3 credit hours minimum of SOC 4890, senior standing.

SOC 4990 - Seminar in Sociology**Credits: (3)****Variable Title**

Typically Taught Spring Semester: *Full Sem*

An advanced course allowing in-depth study of selected topics in Sociology. When the course number is used, it will be accompanied by a specific title with the credit authorized, which will appear on the student transcript.

Pre-requisite(s): SOC 1010 or consent of instructor.

May be repeated 3 times up to 9 credit hours.

Note: (Formerly Contemporary Issues.)

SPAN 1000 - Proficiency Development**Credits: (1-2)**

(N=Novice) (Cr/NCr) Non-graded courses for entry-level students to augment foreign language instruction in stress-free activities such as reading children's literature, learning and performing skits, folk dancing, singing, cooking, etc.

Suggested Requisite(s): May be repeated for credit under different titles.

Course not currently being offered.

SPAN 1010 - First Semester Spanish

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Course Fee: \$8.00

(N=Novice) Introductory course assuming no significant previous experience with the language. Beginners and students with less than two years of high school language should register for this class. Emphasis on everyday conversation and exposure to cultural perspectives.

SPAN 1020 - Second Semester Spanish

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$8.00

(N=Novice) Continuation of SPAN 1010. Basic language skills including listening, speaking, reading, writing and culture.

SPAN 1700 - Conversational Skills

Credits: (1-3)

Specific vocabulary and speaking skills in one semester (e.g., nursing, law enforcement, medical, tourism, family language courses, etc.). May be repeated for credit under different titles.

SPAN 1852 - Study Abroad

Credits: (1-3)

(N=Novice) Language and culture studies for students with no previous experience in the target language and culture. Most assignments are performed in English. Prior travel experience does not apply.

May be repeated twice with a maximum of 3 credit hours.

Note: Check with Department for course availability.

SPAN 2000 - Proficiency Development

Credits: (1-2)

(NH=Novice High) (CR/NC) Non-graded courses for second-year students to augment foreign language instruction in stress-free activities appropriate to the linguistic level of second-year students. May be repeated

under different titles. Note: Course not currently being offered.

SPAN 2010 - Third Semester Spanish

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$8.00

(NH=Novice High) Continuation of FL 1020. Assumes completion of first-year or equivalent experience. Students learn to understand and express ideas about their community and the world. Includes listening, speaking, reading, writing and culture.

SPAN 2020 HU - Fourth Semester Spanish

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$8.00

(NH=Novice High) Continuation of SPAN 2010. The learning and application of strategies for acquiring a foreign language. Students also learn how cultural products and practices reflect a culture's attitudes, values, ideas and meaning. The process of language acquisition and the seeking of cross-cultural understanding provide insights into the commonalities of how the human family learns, thinks and communicates.

SPAN 2021 - Second Year II

Credits: (3)

(NH=Novice High) Continuation of FL 2010 without General Education Humanities credit. Offered through examination only.

Pre-requisite(s): Only available through testing.

SPAN 2030 - Second Year Language Review

Credits: (3)

Course Fee: \$8.00

(NH=Novice High) This course will prepare students who wish to continue language study. Emphasis on conversational skills and a review of language structure and usage.

Note: Check with department for course availability.

SPAN 2600 HU - Introduction to Cultural and Literary Studies in Translation

Credits: (3)

Variable Title

Course Fee: \$8.00

May be offered under any of the languages taught in the department. All Foreign Language HU2600 courses are taught in English and all texts are read in English translation in order to make some of the literature we normally would teach in a foreign language accessible to all students. These courses may introduce students to specific literary periods, literary themes or some prominent authors in specific areas of the world where languages other than English are spoken.

May be repeated up to 10 times for credit under different titles.

Note: Check with Department for course availability.

SPAN 2851 - Study Abroad

Credits: (3)

(NH=Novice High) Language and culture studies for students whose minimal proficiency is Novice High. Language assignments at the Novice or Intermediate-Low levels are performed in the target language. All other assignments are performed in English. Prior travel experience does not apply.

Note: Check with Department for course availability.

SPAN 2852 - Study Abroad

Credits: (1-3)

(NH=Novice High) Language and culture studies for students whose minimal proficiency is at Novice High. Language assignments at the Novice or Intermediate-Low levels are performed in the target language. All other assignments are performed in English. Prior travel experience does not apply.

Twice with a maximum of 3 credit hours.

Note: Check with Department for course availability.

SPAN 2920 - Short Courses, Workshops, Institutes and Special Programs

Credits: (1-6)

Consult the class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript.

SPAN 3000 - Proficiency Development

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Course Fee: \$8.00

(IL=Intermediate Low) This is a transition course to upper division. The course focuses on oral proficiency development. Students will learn a variety of techniques and strategies to increase their oral proficiency in a variety of social, educational and cultural settings. Native-speaking students or those who have acquired proficiency through residence in the target language community are not eligible to take this class.

SPAN 3060 - Grammar & Composition

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Course Fee: \$8.00

(IL=Intermediate Low) This is a transition course to upper division. The course focuses on oral proficiency development. Students will learn a variety of techniques and strategies to increase their oral proficiency in a variety of social, educational and cultural settings. Native-speaking students or those who have acquired proficiency through residence in the target language community are not eligible to take this class.

SPAN 3116 - DLI Bridge Course I

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Taught in DLI High Schools for students who have passed the AP Exam with a 3 or higher. Although this is a three credit-hour class, it will meet over the course of a full academic year. Credit will count toward a major or minor in the language.

Pre-requisite(s): SPAN 2020 or AP exam with a score of 3 or better

SPAN 3117 - DLI Bridge Course II

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Taught in DLI High Schools for students who have passed the AP Exam with a 3 or higher. Although this is a three credit-hour class, it will meet over the course of a full academic year. Credit will count toward a major or minor in the language.

Pre-requisite(s): SPAN 2020 or AP exam with a score of 3 or better

SPAN 3118 - DLI Bridge Course III

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Taught in DLI High Schools for students who have passed the AP Exam with a 3 or higher. Although this is a three credit-hour class, it will meet over the course of a full academic year. Credit will count toward a major or minor in the language.

Pre-requisite(s): SPAN 2020 or AP exam with a score of 3 or better

SPAN 3160 - Introduction to Literature

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$8.00

(IL=Intermediate Low) Required of all majors and minors. 3160 may be taken concurrently with other literature courses. One sheltered section may be offered to students who have not had extensive in-country experience.

Note: Check with department for course availability.

SPAN 3220 - Phonetics and Phonology

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Course Fee: \$8.00

(IL=Intermediate Low) Analysis of the sounds of language and word formation: practice of native like speech patterns. Required of all teaching majors and minors.

Note: Check with department for course availability.

SPAN 3270 - Special Topics in Linguistics

Credits: (3)

Variable Title

Course Fee: \$8.00

(IM=Intermediate Mid) An introduction to linguistic structures and semantic elements. The course provides useful information and practice in the language, its structures and usage. The sub-disciplines of linguistics, other than phonetics and phonology (covered in SPAN 3220), will be studied. These may include lexical analysis, semantics, morphology, syntax, linguistic change and dialectal variation.

Note: Check with department for course availability.

SPAN 3320 - Applied Language Studies

Credits: (1-3)

Variable Title

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$8.00

(Minimal proficiency level varies with content).

May be repeated up to 10 times under different titles.

SPAN 3360 - Advanced Grammar

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Course Fee: \$8.00

(IL=Intermediate Low) Analysis and application of syntactic principles and discourse structure.

SPAN 3540 - Latin American Environment and Cultures

Credits: (3)

Course Fee: \$8.00

In order to provide an interdisciplinary introduction to Latin America, this course presents the region's history, its peoples, their culture and their political and natural environments. Other content to be discussed includes issues of migration, US Latinos and the region's relationship with the US.

SPAN 3550 - Cultural Heritage I

Credits: (3)

Variable Title

Course Fee: \$8.00

(Intermediate Mid) In-depth studies in culture, history, geography, social customs, fine arts and civilization. May be repeated up to 7 times for credit and for other non-English speaking cultures.

SPAN 3560 - Cultural Heritage II

Credits: (3)

Variable Title

Course Fee: \$8.00

(IM=Intermediate Med) Studies in culture, history, geography, social customs, fine arts, and civilization. May be repeated 3 times for other non-English speaking cultures.

SPAN 3570 - Special Topics in Culture

Credits: (3)

Variable Title

Course Fee: \$8.00

(Intermediate Mid) In-depth studies in culture, history, geography, social customs, fine arts and civilization.

May be repeated up to 7 times for credit and for other non-English speaking cultures.

Note: Check with Department for course availability.

SPAN 3610 - Literature Survey I

Credits: (3)

Variable Title

Course Fee: \$8.00

(IH=Intermediate High) A survey of the authors and works of a particular period or place. May be repeated under different titles.

SPAN 3620 - Literature Survey II

Credits: (3)

Variable Title

Course Fee: \$8.00

(IH=Intermediate High) A survey of the authors and works of a particular period or place. May be repeated under different titles.

SPAN 3630 - Literature Poetry

Credits: (3)

Variable Title

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$8.00

(IM= Intermediate Mid) One literature course is required for regular and teaching majors. May be taken concurrently with FL 3160. May be repeated under different titles.

SPAN 3631 - Literature: Prose

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Course Fee: \$8.00

(IM=Intermediate Mid). A survey of works in prose by one or various authors of a particular period or place, or spanning several literary movements and geographical regions. May be taken 3 times up to 9 credits under different titles.

SPAN 3650 - Literature Periods

Credits: (3)

Variable Title

Course Fee: \$8.00

(IM=Intermediate Mid) May be repeated under different titles. One literature course is required for regular and teaching majors. May be taken concurrently with SPAN 3160.

SPAN 3670 - Literature Authors

Credits: (3)

Variable Title

Course Fee: \$8.00

(IN=Intermediate Mid) May be repeated under different titles. One literature course is required for regular and teaching majors.

Suggested Requisite(s): May be taken concurrently with SPAN 3160.

Note: Check with Department for course availability.

SPAN 3680 - Literature: Film

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Course Fee: \$8.00

(IM=Intermediate Mid). A survey of film by one or various filmmakers of a particular period or place, or spanning several literary movements and geographical regions. May be taken 3 times up to 9 credits under different titles.

SPAN 3690 - Literature Special Topics in Literature

Credits: (1-3)

Variable Title

Course Fee: \$8.00

(IM=Intermediate Mid) May be repeated under different titles. One literature course is required for regular and teaching majors.

Suggested Requisite(s): May be taken concurrently with SPAN 3160.

Note: Check with Department for course availability.

SPAN 3710 - Business Language I

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Course Fee: \$8.00

(IM=Intermediate Mid) Business Language and Practices. Required of all commercial majors.

SPAN 3715 - Business Language II

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Course Fee: \$8.00

(IM=Intermediate High) Advanced Business Language and Practices. Required of all commercial majors.

SPAN 3720 CEL - Language for Specific Purposes I

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Course Fee: \$8.00

(IM=Intermediate Mid) This course is content, vocabulary and culture-based. The course focuses on practical vocabulary, idiomatic expressions, professional terminology and cultural interactions on a variety of topics such as language for the medical professions, social workers, law enforcement or tourism.

SPAN 3730 CEL - Language for Specific Purposes II

Credits: (3)

Course Fee: \$8.00

(IM=Intermediate Mid) This course is content, vocabulary and culture-based. The course focuses on practical vocabulary, idiomatic expressions, professional terminology and cultural interactions on a variety of topics, such as language for medical professions, social work, law enforcement or tourism.

SPAN 3740 - Translation I

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Course Fee: \$8.00

(IM=Intermediate Mid) Introduction to basic techniques and skills needed for bilingual translation of non-fiction texts. Emphasis will be on the translation into English, and on the stylistic, syntactic, cultural, lexical, and terminological problems. Students are given ample opportunity to apply these techniques through a series of written translation assignments, which form the basis for class discussion.

SPAN 3750 - Introduction to Interpreting

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Course Fee: \$8.00

Introduction to basic techniques and skills needed for bilingual interpretation in a variety of professional settings. The course includes an overview and history of the interpreting industry and work of interpreters, certification and licensure, and the variety of consumers and modalities with which interpreters work. Ethical decision-making models and the Code of Ethics for interpreters are explored.

SPAN 3760 - Special Topics in Translation

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$8.00

This is a specialized course that offers in-depth studies in selected topics, current developments or recent trends in the fields of Translation and Translation Studies.

SPAN 3850 - Study Abroad

Credits: (1-6)

(IM=Intermediate Mid) Language and culture studies for students whose language proficiency is Intermediate Low to Intermediate High. All Intermediate and Advanced tasks will be performed in the target language. All Superior tasks may be performed in English. Prior travel experience does not apply. May be repeated up to 10 times for credit.

SPAN 4190 - Foreign Language Journal

Credits: (3)

(IM=Intermediate Mid) For foreign language students in the fourth year who work on publishing the foreign language literary journal. Includes selecting articles, editing and preparing journal layout.

SPAN 4620 - Survey of Literature I

Credits: (3)

Course Fee: \$8.00

(IH=Intermediate High) One literature course is required of regular and teaching majors. Prerequisite: FL 3160

SPAN 4630 - Survey of Literature II

Credits: (3)

Course Fee: \$8.00

(IH=Intermediate High) One literature course is required of regular and teaching majors. Prerequisite: FL 3160

SPAN 4690 - Special Topics in Literature

Credits: (3)

Variable Title

Course Fee: \$8.00

(IH=Intermediate High) Detailed analysis of a particular body of literature. For students whose proficiency in the target language is at least Intermediate High.

Prerequisite: SPAN 3160 May be repeated up to 10 times under different titles.

SPAN 4740 - Translation II

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$8.00

(IH=Intermediate High) Development of techniques and skills needed for bilingual translation of non-fiction texts. Emphasis will be on the translation into the target language. Methods of contrastive linguistics to analyze pertinent aspects of language structure, involving syntax, vocabulary and style, as well as basic theoretical-historical concepts are employed. Students are given ample opportunity to apply these techniques and concepts through a series of written translation assignments, which form the basis for class discussion. Prerequisite/Co-requisite: FL 3740 is strongly advised, but not required.

SPAN 4830 - Directed Readings

Credits: (1-3)

(IH=Intermediate High) Independent readings under the direction of a faculty member.

May be repeated up to 10 times.

Note: Check with Department for course availability.

SPAN 4850 - Study Abroad

Credits: (3)

(A=Advanced) Language and culture studies for students whose language proficiency is Advanced or Superior. All tasks are performed in the target language. Prior travel experience does not apply.

SPAN 4920 - Short Courses, Workshops, Institutes and Special Programs

Credits: (1-4)

(minimal proficiency level varies with content) Consult the class schedule for the current offering under this number.

The specific title and credit authorized will appear on the student transcript.

May be repeated 5 times with a maximum of 6 credit hours.

Note: Course not currently being offered.

SPAN 4960 - Senior Project

Credits: (3)

(IH=Intermediate High) For students completing a major with Departmental Honors. Before registration in this course, students must work with a faculty advisor to define the project, create a contract and schedule, and determine the appropriate number of credit hours.

SW 1010 SS CEL - Introduction to Generalist Social Work

Credits: (3)

Typically Taught Summer Semester: *Full Sem Online*

Typically Taught Fall Semester: *Full Sem, 1st Blk, Online*

Typically Taught Spring Semester: *Full Sem, 1st Blk, Online*

A generalist introduction to the relationships between social systems (individuals, groups, and communities) and the social welfare networks which impact them, including the role of the social work profession. Open to all Weber State University students.

SW 2100 SS - Human Behavior and the Social Environment I

Credits: (3)

Typically Taught Summer Semester: *1st Blk Online*

Typically Taught Fall Semester: *Full Sem, 2nd Blk, Online*

Typically Taught Spring Semester: *Full Sem, 2nd Blk, Online*

This is the first course in the Human Behavior and the Social Environment sequence. It identifies the relationships between human developmental stages (from conception to death) and the problems associated with environmental interactions. Systems and theory are examined in the biological, psychological, and sociological arenas.

Pre-requisite(s): (It is recommended for Social Work Majors that SW 1010 be taken before or concurrently with SW 2100. It is also suggested that ZOOL 1020 be taken before or concurrently with SW 2100.)

SW 2200 SS/DV - Issues in Diversity

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A study of diversity among individuals, groups, communities, and of issues social workers will need to understand when interfacing with diverse populations.

SW 2920 - Short Courses, Workshops, Institutes and Special Programs

Credits: (1-4)

Variable Title

Consult the semester class schedule for the current offering under this number. The specific title and credit authorized for these elective courses will appear on the student transcript.

May be repeated up to 3 times for a maximum of 4 credits.

Note: This course is offered as needed. Please check with the department for availability.

SW 3000 - Death and Dying

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

An in-depth study of death, death-related issues and social institutions and practices dealing with death in American society, with special emphasis on the social processes surrounding death and constructive responses to death and dying.

Cross-listed with GERT 3000.

SW 3100 - Human Behavior and the Social Environment II

Credits: (2)

Typically Taught Summer Semester: *1st Blk*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This second course in the Human Behavior and the Social Environment sequence is designed to present basic principles and fundamental concepts necessary for acquiring and organizing knowledge for practice with individuals, families, groups, organizations, and communities and on the interaction among these systems. Alternative paradigms on human behavior and the social environment are also explored.

Pre-requisite(s): SW 1010, SW 2100 and formal admittance to the Social Work Program.

SW 3120 - Aging: Adaptation and Behavior

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

An examination of the physical and psychological processes of aging. The emphasis is upon behavioral and social adaptation to these processes.

Cross-listed with GERT 3120.

SW 3200 - Child and Family Welfare

Credits: (2)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A historical and contemporary examination of child and family welfare issues, and social work intervention strategies.

Pre-requisite(s): SW 1010.

SW 3320 - Ethnicity and Older Women in the American Society

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

The importance of special populations (ethnic, racial and women) as they relate to the aging process.

Cross-listed with GERT 3320.

SW 3500 - Social Welfare & Gerontological Policy Development and Service

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

The history, mission, philosophy and human service aspects used in the development of social work/gerontology as a profession will be covered. Examples of social, public and social welfare policy will be identified and studied. Knowledge of local, state, and federal legislation, professional organizations, and membership organizations will assist in review of lobby, funding and implementation practices used in meeting human service needs. Methods for the political and organizational analysis of processes and policy will be covered.

Pre-requisite(s): SW 1010 or GERT 1010. (SW/GERT 3500 must be completed before entering Field Practice.)

SW 3600 - Social Statistics

Credits: (3)

Typically Taught Summer Semester: *Online*

Typically Taught Fall Semester: *Full Sem, 1st Blk, Online*

Typically Taught Spring Semester: *Full Sem, 2nd Blk, Online*

Introduction to analysis and presentation of data.

Pre-requisite(s): Meet WSU Quantitative Literacy requirement.

Cross-listed with GERT 3600.

SW 3700 - Social Work Research

Credits: (3)

Typically Taught Fall Semester: *Full Sem, 2nd blk*

Typically Taught Spring Semester: *Full Sem, 1st Blk*

Social work research and its relationship to social work theory and practice. The class will include content on qualitative, quantitative and single system research methodologies; analysis of data, including statistical procedures; systematic evaluation of practice; analysis and evaluation of theoretical bases, research questions, methodologies, statistical procedures, and conclusions of research reports; and relevant technological advances. The course will also identify how the research curriculum contributes to the student's use of scientific knowledge for practice.

Pre-requisite(s): SW 1010. (Must be completed before entering SW 4861.) Recommended prerequisite: completion of social statistics class.

SW 3800 - Writing in Social Work

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

This course is designed to help students develop and sharpen professional writing skills and become more effective in various forms of written communication in social work and the broader social welfare delivery system. The course will offer an in-depth overview of APA writing style guidelines and apply these, as appropriate, in the preparation of written documents common in professional practice in social and behavioral sciences.

Pre-requisite(s): University Composition (ENGL 2010 or equivalent).

Suggested Requisite(s): (It is recommended that this course be taken concurrently with SW 3700 and/or SW 4860.)

SW 3900 - Social Work Methods, Values, and Ethics

Credits: (3)

Typically Taught Summer Semester: *1st Blk*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

An ecological system and generalist approach to social work practice methods. Content is germane to various systems and subsystems typically implicated in problems encountered by social workers. A study of values and ethics will assist the social worker to understand the proprieties of professional practice.

Pre-requisite(s): SW 1010, SW 2100, SW 2200 and formal admittance to the social work program. (May be taken prior to or concurrently with SW 3910.)

SW 3910 - Social Work Practice I

Credits: (3)

Typically Taught Summer Semester: *2nd Blk*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

An intensive knowledge-based generalist course concentrating on micro social work intervention skills combining lecture and hands-on experiences.

Pre-requisite(s): Formal admittance to the social work program.

Suggested Requisite(s): (May be taken prior to or concurrently with SW 3900.)

SW 3920 - Social Work Practice II

Credits: (3)

Typically Taught Summer Semester: *1st Blk*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A generalist course directed at understanding and demonstrating the principles, concepts and techniques of planned change in mezzo settings including families and small groups.

Pre-requisite(s): SW 3910.

Co-Requisite(s): (Must be taken concurrently with SW 3930 and SW 4860.)

SW 3930 - Social Work Practice III

Credits: (3)

Typically Taught Summer Semester: *2nd Blk*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A generalist course designed to illustrate the principles, concepts and techniques of planned change in macro settings including institutions, organizations, and communities.

Co-Requisite(s): Must be taken concurrently with SW 3920 and SW 4860.

SW 4140 - Perspectives on Drug Use and Substance Abuse

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

This course examines drug use and substance abuse across the lifespan and addresses issues such as prevention, treatment, and public policy as they affect and relate to individuals, groups, families, organizations, and communities. Course material draws on current research, theory, and practice experience.

SW 4150 - DSM-5

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This elective course is designed to familiarize the student with the Diagnostic Statistical Manual of Mental Disorders (DSM-5 classification). The DSM-5 provides the practitioner with a systematic diagnostic tool for practice and research.

SW 4220 - Societal Responses to Aging

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

This course is designed to cover aspects of retirement relating to job change or discontinuance. The processes, events, social roles, and phases of life will be presented. Cross-listed with GERT 4220.

SW 4240 - Introduction to TeleMental-Health

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

This course explores technology-based mental health, substance abuse treatment, and social service delivery. The course addresses the topic broadly, covering topics such as online tools and technologies, professional ethics, legal considerations, diversity and access, quality assurance, etc. The purpose is to introduce students to the current status and future outlook of web-based mental health and social service delivery.

SW 4250 - Medical Social Work

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

This elective course explores the process and dynamics of the provision of social work services within the medical service delivery system.

SW 4500 - Interventions for Populations at Risk

Credits: (3)

Typically Taught Summer Semester: *1st Blk*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A course designed to study populations at risk with an emphasis on women and people of color. Interventions to alleviate conditions of human suffering are stressed.

Pre-requisite(s): SW 3910, SW 4860.

SW 4600 - Social Work in Special Settings

Credits: (2-4)

Variable Title

This elective course is designed to accommodate special topic areas in Social Work practice.

May be repeated once for a maximum of 4 credits.

Note: This course is offered as needed. Please check with the department for availability.

SW 4650 - Retirement: Adjustment/Planning

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

This course is designed to cover aspects of retirement relating to job change or discontinuance. The processes, events, social roles, and phases of life will be presented.

Cross-listed with GERT 4650.

SW 4800 - Projects and Research

Credits: (1-3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This elective course allows for supervised projects and primary research in various areas of social work. Limited to senior students.

Pre-requisite(s): Consent of department chair.

May be repeated up to 2 times for a maximum of 3 credits.

Note: Check with department for course availability.

SW 4810 - Experimental Courses

Credits: (2-3)

This elective course is designed to accommodate new courses under an experimental format. Refer to Experimental Courses.

No more than 2 experimental courses may be taken up to a maximum of 6 credits.

Note: This course is offered as needed. Please check with the department for availability.

SW 4810 - Introduction to Telehealth

Credits: (3)

Experimental

This course explores technology-based health, mental health, substance abuse treatment, and social welfare service delivery. The course addresses the topic broadly, covering topics such as online tools and technologies, professional ethics, legal considerations, diversity and access, quality assurance, etc. The purpose is to introduce students to the current status and future outlook of web-based health and mental service delivery.

SW 4830 - Directed Readings

Credits: (1-3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This elective course is an individual readings for seniors who are majoring in social work. Permission must be obtained from the instructor. Students are required to complete a minimum of 1000 pages of selected readings per class hour requested for credit.

Pre-requisite(s): Consent of department chair.

May be repeated up to 2 times for a maximum of 3 credits.

Note: Check with department for course availability.

SW 4860 INT - Social Service Field Experience I

Credits: (4)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$10.00

This field practice course requires a minimum of 200 hours of supervised field service in an approved social service agency. The emphasis is to include micro, mezzo, and macro practice opportunities.

Pre-requisite(s): SW 2200, SW 3100, SW 3200, SW 3500,

SW 3900 and SW 3910. Formal admittance to Field Experience required.

Suggested Requisite(s): (Must be taken concurrently with SW 3920 and SW 3930.)

SW 4861 INT - Social Service Field Experience II

Credits: (4)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$10.00

This field practice course requires a minimum of 200 hours of supervised field service in an approved social service agency. The emphasis is to include micro, mezzo, and macro practice opportunities.

Pre-requisite(s): SW 3700, SW 4860, SW/GERT 3600 (or equivalent).

Co-Requisite(s): (To be taken concurrently with SW 4990).

SW 4920 - Short Courses, Workshops, Institutes, and Special Programs

Credits: (2-4)

Variable Title

Consult the semester class schedule for the current offering under this number. The specific title and credit authorized for these elective courses will appear on the student transcript.

May be repeated up to 2 times for a maximum of 6 credits.

Note: This course is offered as needed. Please check with the department for availability.

SW 4990 - Social Work Senior Seminar

Credits: (2)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course requires preparation and discussion of social work concepts and topics, and information and techniques in obtaining a job and selecting a graduate school.

Pre-requisite(s): SW 4860. (Must be taken concurrently with SW 4861.)

SW 5010 - Professional Development: Human Development in the Social Environment

Credits: (3)

This professional development course is designed for non-social work majors who have or wish to have experience in the delivery of social services. The course explores human development in the context of the broader social environment. It identifies the relationship between human developmental stages (from conception to death) and the problems associated with environmental interactions. Systems and theory are examined in the biological, psychological, sociological, and spiritual arenas. *Credit/No credit.*

Note: This course is offered as needed. Please check with the department for availability.

SW 5020 - Professional Development: Social Welfare Policy

Credits: (3)**Typically Taught Spring Semester: 1st Blk**

This professional development course is designed for non-social work majors who have or wish to have experience in the delivery of social services. The history, mission, philosophy and human service aspects used in the development of social welfare policy will be covered. Examples of social, public, and social welfare policy will be identified and studied. Knowledge of local, state, and federal legislation, professional organizations, and membership organizations will assist in review of lobbying, funding, and implementation practices used in meeting human service needs. Methods for the political and organizational analysis of processes and policy will be covered. *Credit/No credit.*

SW 5030 - Professional Development: Social Work Ethics and Practice Methods

Credits: (3)**Typically Taught Spring Semester: 2nd Blk**

This professional development course is designed for non-social work majors who have or wish to have experience in the delivery of social services. Using an ecological and generalist approach to social work practice at the individual, family, group, organization, and community levels, this course provides training in a planned client change process and considers social work roles at various levels. A significant focus of this course is the study of the application of key values and ethical principles, as defined by the National Association of Social Workers (NASW), to professional practice and the resolution of ethical dilemmas. The course also includes content on the evaluation of practice and programs. *Credit/No credit.*

THEA 1013 CA - Introduction to Theatre

Credits: (3)**Typically Taught Summer Semester: Online****Typically Taught Fall Semester: Full Sem, Online****Typically Taught Spring Semester: Full Sem, Online**

An introduction to live theatre and drama and the creative heritage of theatre. Students will develop critical awareness of dramatic theory and performance practice through reading and evaluating historical and contemporary drama, and through applied creative activities. Students are expected to attend theatre performances outside of regularly scheduled class time. Note: Theatre majors are required to enroll in the face-to-face class, not the online section.

THEA 1023 CA - Introduction to Film

Credits: (3)**Typically Taught Summer Semester: Full Sem, Online****Typically Taught Fall Semester: Full Sem, Online****Typically Taught Spring Semester: Full Sem, Online****Course Fee: \$6.00**

Examination and analysis of film and film techniques. Students will develop critical awareness of film as an artistic, social, and cultural phenomenon. Students may be required to attend film screenings outside of the regularly scheduled class time.

Note: A lab fee is required for this class.

THEA 1030 - Voice and Movement for the Actor

Credits: (3)**Typically Taught Fall Semester: Full Sem****Course Fee: \$6.00**

Natural resources of the human voice and body are studied as artistic resources for the performing artist. The course is designed to examine both the process and products of vocal and physical dynamics. The goal of this course is to integrate vocal and physical skills into the working process of the actor.

Pre-requisite(s): THEA 1033. (Theatre majors only).

THEA 1033 CA - Introduction to Acting

Credits: (3)**Typically Taught Summer Semester: Full Sem****Typically Taught Fall Semester: Full Sem****Typically Taught Spring Semester: Full Sem****Course Fee: \$6.00**

This is an introductory class where students learn basic

acting skills through class participation in improvisation, monologue work, and scene study. Students learn a basic understanding of theories and methodologies. Skills demonstrated in areas of body movement, diction, observation, imagination and "action". (For non-theatre majors).

Note: Note: Theatre majors are strongly encouraged to enroll in the "majors only section" offered spring semester and concurrently enroll in THEA 1713.

THEA 1043 CA - Introduction to American Musical Theatre

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$6.00

An introduction to American Musical Theatre, its history and creative elements. Students will develop critical awareness of the differences between traditional and musical theatre by becoming actively involved in reading, observing, and analyzing musical theatre.

Note: Note: Musical Theatre majors are strongly encouraged to enroll in this class fall semester.

THEA 1051 - Freshman (New Student) Seminar

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Course Fee: \$2.00

An introduction to the Theatre Arts Area devoted to the needs of incoming majors, including: faculty and staff introductions and theatrical personnel responsibilities, audition notices and practices, production and Practicum assignments, and opportunities available within the facility. Includes detailed academic advice for majors and minors, and practical methods of library research for theatre topics at WSU.

THEA 1053 - Introduction to Technical Production

Credits: (3)

An introduction to the production components of live theatre in which students will develop an awareness of technical aspects including scenery, lighting, costume, properties and sound. Students are expected to attend theatre performances outside of regularly scheduled class time. This course is recommended for non-theatre majors and minors.

THEA 1063 - Theatre Foundations

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

An introduction to live theatre and drama and the creative heritage of theatre. Students will develop critical awareness of dramatic theory and performance practice through reading and evaluating historical and contemporary drama, and through applied creative activities. This course serves as an introduction to the Theatre area of the Department of Performing Arts, the requirements, and the curriculum. Students are expected to attend theatre performances outside of regularly scheduled class time.

THEA 1075 - Class Voice for Musical Theatre

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course will serve as a preparation for private vocal instruction, departmental production auditions, and the application audition in the musical theatre program. While all theatre majors are welcome to take the course, it's geared specifically for incoming freshman musical theatre applicants. The instruction will cover basic singing technique and an introduction to acting a musical theatre song.

Pre-requisite(s): Must be a theatre major or minor.

May be repeated once up to 2 credit hours.

THEA 1220 - Acting I

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

Required for Theatre Performance and Teaching Majors. Non-majors should enroll in THEA 1033. Students in this course will demonstrate a knowledge of and an ability to integrate fundamental acting principles and analysis skills into performance. Students will develop professional work habits of dependability, promptness, cooperation, a sense of ensemble, and the ability to make independent choices.

Pre-requisite(s): THEA 1013, THEA 1030, THEA 1051.

THEA 1223 - Stage Makeup

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$16.00

A practical investigation of stage makeup techniques and

skills of design and application.
Note: A lab fee is required for this class.

THEA 1513 - Stagecraft

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Course Fee: \$36.00

Introduction to stage scenery: lecture/demonstration of basic materials, shop and stage equipment, construction principles, and elementary technical drawing and design procedures.

THEA 1713 - Script Analysis

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$6.00

An introductory course focusing on plot, character, language, and thematic analysis of varied historical and modern performance texts in the context of contemporary staging practice. This course teaches play analysis from a practical perspective. For students who intend to perform, direct, and design within the collaborative production process.

Co-Requisite(s): (Recommended) THEA 1033.

THEA 1810 - Class Voice

Credits: (1)

Experimental Course, Contact Department for More Information

This is a singing class designed for freshmen and other theatre students who want to explore and develop their singing instruments. There will be a technical portion and repertoire portion.

THEA 1810 - Group Vocal Technique for Musical Theatre

Credits: (3)

Experimental Course, Contact Department for More Information

Group Vocal Technique is a technique-focused course. This is a freshman level course and part of the pre-core requirements of the musical theatre program. This course will allow all incoming freshman musical theatre majors and applicants an opportunity to learn the core skills needed to succeed vocally and be best prepared for juries,

acceptance into the program for applicants, and a base to build from in future private lessons.

THEA 2022 - Costume Fundamentals

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Course Fee: \$36.00

Introduction to stage costume: with lectures, demonstrations and projects to introduce the basic materials, fabrics, costume construction methods, costume history, and design principles and procedures for theatrical costumes.

THEA 2032 - Lighting Fundamentals

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Course Fee: \$21.00

This course provides an introduction to stage lighting. This course includes lectures and demonstration of principles and practical use of electricity, lighting equipment, control systems, elementary technical drawing, and lighting design practice as applied to the stage.

THEA 2033 - Acting II

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Course Fee: \$6.00

Applies the principles learned in Acting I on a more intense level. Includes two arranged acting studio hours per week.
Pre-requisite(s): THEA 1030, THEA 1033, and by audition.

THEA 2203 - Costume Technology

Credits: (3)

Typically Taught Spring Semester: *Full Sem odd years*

Course Fee: \$36.00

A practical exploration of the research and construction techniques used to create contemporary and historic costumes for the stage. A lab fee is required for this class.

Pre-requisite(s): (Recommended) THEA 2022.

Note: Offered spring semester every odd-numbered year.

THEA 2330 - Dramaturgy and Criticism

Credits: (3)

Typically Taught Fall Semester: *Full Sem even years*

This course will be a practical study of the role and duties of a dramaturg in a production as well as a critic reviewing a finished work. Work will include all facets of dramaturgy: historical research, script analysis, audience outreach, and lobby displays. A completed Dramaturgy workbook for a proposed play or practical work on a department play will be the final assignment.

This course may be repeated once up to to 6 credit hours.

THEA 2403 - Production and Stage Management

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Course Fee: \$24.00

A practical study of stage management techniques necessary for efficient theatre production. A conceptual overview of the rehearsal and performance process will be stressed, including an overview of management techniques as applied to the performing arts in general. Front of house management and company management will be studied.

THEA 2443 - Acting for Musical Theatre

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Course Fee: \$6.00

A practical study of acting methods unique to the discipline of musical theatre. Emphasis will be placed on the interpretation of modern musical theatre, literature through imagery, action, characterization, and analysis of the score and libretto.

Pre-requisite(s): THEA 2033 and admittance to the Musical Theatre program.

THEA 2580 - Computer Software for the Theatre

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

The class provides a basic introduction to several important computer programs used in theatre productions, including Vectorworks, Lightwright, Qlab, Google Sketch Up, and Photoshop.

THEA 2821 HU - Period Styles in Design

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

A survey of the history of Western Art, including architecture, clothing, music, art, and decorative arts for the theatre.

THEA 2851 - Design/Tech/Management Practicum

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Provides supervised experience in theatre production and performance. Practicum is an experiential learning course supervised by theatre faculty to provide the student with a practical application of theatrical theory. The student will develop skills and abilities for the theatre through supervised experience in a design, technical, or management production position relating to: Stage Management, Lighting Design, Costume Design, Scenic Design, Props Design, Sound Design, Dramaturgy, Technical Direction, Choreography, House Management. May be repeated up to 3 times for credit.

THEA 2852 - Design/Tech/Management Practicum

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Provides supervised experience in theatre production and performance. Practicum is an experiential learning course supervised by theatre faculty to provide the student with a practical application of theatrical theory. The student will develop skills and abilities for the theatre through supervised experience in a design, technical, or management production position relating to: Stage Management, Lighting Design, Costume Design, Scenic Design, Props Design, Sound Design, Dramaturgy, Technical Direction, Choreography, House Management. May be repeated up to 3 times for credit.

THEA 2853 - Design/Tech/Management Practicum

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Provides supervised experience in theatre production and performance. Practicum is an experiential learning course supervised by theatre faculty to provide the student with a practical application of theatrical theory. The student will develop skills and abilities for the theatre through supervised experience in a design, technical, or

management production position relating to: Stage Management, Lighting Design, Costume Design, Scenic Design, Props Design, Sound Design, Dramaturgy, Technical Direction, Choreography, House Management. May be repeated up to 3 times for credit.

THEA 2854 - Design/Tech/Management Practicum

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Provides supervised experience in theatre production and performance. Practicum is an experiential learning course supervised by theatre faculty to provide the student with a practical application of theatrical theory. The student will develop skills and abilities for the theatre through supervised experience in a design, technical, or management production position relating to: Stage Management, Lighting Design, Costume Design, Scenic Design, Props Design, Sound Design, Dramaturgy, Technical Direction, Choreography, House Management. May be repeated up to 3 times for credit.

THEA 2855 - Design/Tech/Management Practicum

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Provides supervised experience in theatre production and performance. Practicum is an experiential learning course supervised by theatre faculty to provide the student with a practical application of theatrical theory. The student will develop skills and abilities for the theatre through supervised experience in a design, technical, or management production position relating to: Stage Management, Lighting Design, Costume Design, Scenic Design, Props Design, Sound Design, Dramaturgy, Technical Direction, Choreography, House Management. May be repeated up to 3 times for credit.

THEA 2856 - Design/Tech/Management Practicum

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Provides supervised experience in theatre production and performance. Practicum is an experiential learning course supervised by theatre faculty to provide the student with a practical application of theatrical theory. The student will

develop skills and abilities for the theatre through supervised experience in a design, technical, or management production position relating to: Stage Management, Lighting Design, Costume Design, Scenic Design, Props Design, Sound Design, Dramaturgy, Technical Direction, Choreography, House Management. May be repeated up to 3 times for credit.

THEA 2857 - Design/Tech/Management Practicum

THEA 2920 INT - Short Courses, Workshops, Institutes and Special Programs

Credits: (1-6)

Variable Title

Consult the semester class schedule for the current offering under this number. The department will determine the specific title and credit authorized.

THEA 3033 - Advanced Acting

Credits: (3)

Typically Taught Spring Semester: *Full Sem even years*

Course Fee: \$6.00

Introduces students to the techniques required to perform in various styles encountered in contemporary theatre, from Greek tragedy to the most modern forms. Includes two arranged studio hours per week.

Pre-requisite(s): THEA 2033, and by audition.

THEA 3070 - Voice and Movement for the Actor II

Credits: (3)

Typically Taught Spring Semester: *Full Sem odd years*

Course Fee: \$6.00

An intermediate continuation of intensive voice and movement training for the actor, strong focus in movement and voice for extension of range and availability and for character development. Intermediate development and conditioning of the actor's voice and body with emphasis on dialect work and stylized movement.

Pre-requisite(s): THEA 1030.

This course may be repeated once up to 6 credit hours.

THEA 3100 - Projection Design

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

This course is a practical application of the tools and

processes essential to conceptualizing and implementing projection design. This course also examines the history of projection design in theatre performance leading up to current practices.

THEA 3103 INT - Directing I

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Course Fee: \$6.00

Theory and practical application of directing approaches.

Pre-requisite(s): THEA 1033, THEA 1013 and THEA 1713.

THEA 3212 - Scenic Design

Credits: (3)

Typically Taught Spring Semester: *Full Sem even years*

Course Fee: \$36.00

Scenic Design will provide a practical exploration of the methods and materials of scenic design for the theatre. The course includes instruction in visual research, conceptual sketching, rendering, hand and computer aided drafting for theatre, and requires some outside class production contribution.

Pre-requisite(s): THEA 1513.

Note: Class meets the 2nd block of spring semester every even-numbered year.

THEA 3222 - Lighting Design

Credits: (3)

Typically Taught Spring Semester: *Full Sem odd years*

Course Fee: \$21.00

This course will be an advanced exploration of lighting design for theater. This course is a practical exploration of the equipment, materials, and design processes of stage lighting and stage lighting design.

Pre-requisite(s): THEA 2032.

May be repeated twice with a maximum of 6 credit hours.

THEA 3232 - Scenic Art and Painting

Credits: (3)

Typically Taught Spring Semester: *Full Sem odd years*

Course Fee: \$36.00

Applied training in basic scene painting/scenic artist techniques for theatre. Surface preparation, priming, base painting, blending and scumbling, texture and detailing lessons are applied in producing finished demonstration flats including wall surfaces, wallpaper, bricks, rocks, wood grain and molding, marble, foliage, and copying a

selected original.

Pre-requisite(s): THEA 1513.

THEA 3233 - Prop Design

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

A studio course in the process and techniques of prop making techniques. Tools, materials, building, and painting techniques will be demonstrated by the instructor and explored and executed by the student. This course not only places emphasis on artist ability but time management, critical thinking, and problem solving as well.

Pre-requisite(s): THEA 1513.

THEA 3243 - Costume History

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Course Fee: \$6.00

A study of fashion from ancient Egypt to the 20th century in relation to stage applications and contemporary fashion. Students will gain a basic understanding of major periods in Western clothing history as well as the interrelationship of clothing and culture and a working ability to research clothing of any culture or era.

THEA 3303 - History and Literature of Theatre I

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Course Fee: \$6.00

A study of theatre and drama from their Pre-Ancient Greek origins through the Renaissance about 1700. The predominantly lecture format course includes significant readings in theatrical practice, historically significant plays, and basics of dramatic criticism. Additional research assignments are required.

THEA 3313 - History and Literature of Theatre II

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$6.00

A study of theatre and drama from about 1700 until the present. The predominantly lecture format course includes significant readings in theatrical practice, historically significant plays, and basics of dramatic criticism. Additional research assignments are required.

THEA 3323 - History and Literature of Contemporary Theatre

Credits: (3)

Course Fee: \$6.00

A survey of theatre history and literature that will study theatre from the 20th century and into the present time. Specific attention will be given to the plays and producing organizations of minorities and other underrepresented groups.

THEA 3340 - Theatre Management

Credits: (3)

Typically Taught Spring Semester: *Full Sem even years*

Course Fee: \$6.00

An overview of theatre management techniques that includes all the operating functions such as marketing, promotion, fundraising, accounting and personnel management. A functional business plan for a Theatre is the culminating experience of this course.

THEA 3343 - History & Literature of Musical Theatre

Credits: (3)

Typically Taught Spring Semester: *Full Sem even years*

Course Fee: \$6.00

A study of musical theatre from the origins of Opera through contemporary musical theatre. Cultural connections are emphasized through examination of book, score and performance.

Pre-requisite(s): admittance to the Musical Theatre program.

THEA 3350 - Marketing and Communication for the Arts

Credits: (3)

Typically Taught Fall Semester: *Full Sem odd years*

This class explores the dynamics of marketing and communication across dance, music, and theatre. The emphasis is on practical application of course content to enhance students' future roles in a variety of arts related careers.

THEA 3443 - Scene Study for Musical Theatre

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$6.00

Advanced study of acting methods unique to the discipline of musical theatre. Emphasis will be placed on the interrelationship of characters through the use of duets, group scenes, and production numbers.

Pre-requisite(s): Admittance to the Musical Theatre program.

THEA 3500 - Sound Design

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

This class is an introduction to the art and craft of sound design for live theatre productions. This course covers a practical application of the tools and processes essential to conceptualizing and implementing the content of a sound design as well as the sound system for delivery of that content.

THEA 3505 - Playwriting

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

This course will be a practical study of dramatic structure and the process of playwriting, including writing assignments with monologues, scenes, and one-act plays. Extensive writing is required.

Pre-requisite(s): ENGL 1010 and ENGL 2010.

THEA 3525 - ArtsBridge

Credits: (1-6)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

ArtsBridge is a course that provides undergraduate students with an internship and academic credit for designing and implementing a comprehensive, needs-based, integrated arts project with community organizations or area schools. ArtsBridge students will work closely with a WSU faculty mentor, community/school stakeholder, peers, and the ArtsBridge program coordinator throughout the process culminating in the development of an arts integrated project.

Pre-requisite(s): Recommendation by education supervisor in fine arts content area faculty mentor. Content methodology course(s) completed or in progress.

Note: Following faculty recommendation, please contact the ArtsBridge coordinator for an interview.

THEA 3651 - Musical Theatre Repertoire

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Advanced study of standard musical theatre repertoire, audition techniques and the business of musical theatre.

Pre-requisite(s): THEA 2443.

May be repeated for a total of four semester hours.

THEA 3810 - Digital Design Theatre

Credits: (3)

Experimental Course, Contact Department for More Information

Course Fee: \$6.00

This course emphasizes close collaboration among students in Theatre Arts and students in the School of Computing. Software and hardware commonly used in current digital theatre design will be explored. Students will be given an introduction to the "tools" of the trade in a studio setting as they advance through a series of exercises, as well as independent and team projects focusing on both artistic design and software engineering. The course will culminate in a selection of short realized multimedia performance projects with guest student actors. Members of each discipline will be immersed in the problem solving approaches and thinking patterns of peers from a different field, which more accurately represents the experiences of working individuals within their chosen careers. Instructor permission required.

THEA 3810 - Experimental Courses

Credits: (1-3)

Course Fee: \$6.00

Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript. May be repeated 2 times with a maximum of 3 credits. Refer to Experimental Courses.

THEA 3991 - Junior Seminar

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Course Fee: \$2.00

A colloquium that draws theatre students from various interests together in a mutual exploration of theatre research, production, and planning for employment

opportunities and graduate study.

Pre-requisite(s): Theatre major - junior standing.

THEA 4002 - Special Studies in Theatre

Credits: (2)

Variable Title

Typically Taught Fall Semester: *Full Sem*

Allows for the advanced study of a changing series of pertinent theatre topics. All Special Studies in Theatre courses are half-semester.

The maximum time a student can repeat this class for credit is four times.

THEA 4002C - Special Studies in Theatre: Stage Combat

Credits: (2)

Physical training in the art and craft of stage combat.

Emphasis is on safe application of technique to choreograph stage fights. All Special Studies in Theatre courses are half-semester.

May be repeated up to two times.

THEA 4002D - Special Studies in Theatre: Auditioning

Credits: (2)

Typically Taught Fall Semester: *2nd Blk*

Course Fee: \$4.00

A practical exploration of professional audition techniques including cold reading, prepared monologues, improvisation and portfolio preparation. Class meets the 2nd block of fall semester.

May be repeated up to two times.

THEA 4002H - Special Studies in Theatre: Contemporary Topics

Credits: (2)

A diversified exploration of pertinent theatre topics. May be repeated for upper division credit. All Special Studies in Theatre courses are half-semester.

May be repeated up to two times.

THEA 4103 INT - Directing II

Credits: (3)

Typically Taught Spring Semester: *Full Sem odd years*

Course Fee: \$6.00

Advanced theory and application of directing approaches.

Pre-requisite(s): THEA 3103, and by audition.

Note: Offered spring semester every odd-numbered year.

THEA 4120 - Collaboration in the Theatre

Credits: (3)

This class will help theatre students improve collaborative skills specific to production teams in the process of theatrical creation. Students will work in model production teams and explore different modes of communication and collaboration.

Pre-requisite(s): THEA 3103 INT - Directing I or THEA 4203 - Costume Design or THEA 3212 - Scenic Design or THEA 3222 - Lighting Design or THEA 3500 - Sound Design and instructor approval.

THEA 4143 - Directing and Choreographing for Musical Theatre

Credits: (3)

Typically Taught Spring Semester: *Full Sem even years*

Course Fee: \$6.00

Theory and practical application of directing and choreographing approaches as they pertain to Musical Theatre.

Pre-requisite(s): THEA 3103.

Note: Offered spring semester every even-numbered year.

THEA 4203 - Costume Design

Credits: (3)

Typically Taught Spring Semester: *Full Sem even years*

Course Fee: \$6.00

A practical application of the techniques of visual communication used to create costume renderings for dramatic scripts.

Pre-requisite(s): (Recommended) THEA 2022 and THEA 3243.

Note: Offered spring semester every even-numbered year.

THEA 4220 - Design Seminar

Credits: (1-3)

Typically Taught Fall Semester: *Full Sem*

Course Fee: \$2.00

A flexible emphasis course devoted to the design processes of theatrical production; a forum through which advanced design students may further their interests and abilities in the design process and/ or portfolio development and presentation that will change in focus from student to student. THEA 4220 Design Seminar may be used as a capstone design project with faculty approval.

Pre-requisite(s): at least one Theatre Area design course - THEA 3212 or THEA 3222 or THEA 4203, and permission of the instructor.

Note: This class provides an opportunity for in-depth theatrical design work. Since there is only one formal design class in each of the design areas (costume, lighting, and scenery) students can continue their studies in Design Seminar. The course number stays the same from semester to semester but the content; the design projects changes each time. The maximum time a student can repeat this class for credit is eight times.

THEA 4230 - Performance Seminar

Credits: (1-3)

Typically Taught Fall Semester: *2nd Blk*

Course Fee: \$2.00

A flexible emphasis course devoted to the acting and directing process of live theatrical production, a forum through which advanced performance students may further their interests and abilities in the acting/directing process that will change in focus from student to student. THEA 4230 Performance Seminar may be used as a capstone project with faculty approval.

Pre-requisite(s): THEA 1033, THEA 2033, THEA 3103 and permission of the instructor.

May be repeated twice with a maximum of 6 credit hours.

THEA 4270 - Dramatic Theory and Analysis

Credits: (3)

A study of dramatic theory from early Greek thinkers through contemporary theorists. The class will be based on reading primary and secondary texts and will class time will be spent on projects, activities, discussion, and lecture. Additional research assignments are required.

THEA 4603 - Creative Drama

Credits: (3)

Course Fee: \$6.00

Theories and practices incorporating the techniques of creative drama into the elementary school curriculum. Especially recommended to students of elementary education, recreation, and social services.

THEA 4651 - Individual Training in Stage Voice

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$445.00

Twelve individual lessons on vocal technique for the actor. A list of approved voice instructors is maintained in the department office. Students are responsible for contacting individual instructors to schedule lessons.

May be repeated up to nine times.

Note: The Musical Theatre students are required to complete Individual Training in Stage Voice a minimum of six times to complete their degree however it is not uncommon for students to take private voice lessons each semester they are enrolled. The maximum time a student can repeat this class for credit is eight times.

THEA 4713 INT - Teaching Theatre in the Secondary School

Credits: (3)

Typically Taught Fall Semester: *Full Sem even years*

Course Fee: \$6.00

Application of pedagogy to teaching theatre arts in secondary schools. Requires field experiences supervised by Theatre Arts Faculty.

Pre-requisite(s): ENGL 2010 and THEA 1033.

THEA 4801 - College of Arts & Humanities Leadership Lecture Series

Credits: (1)

Typically Taught Spring Semester: *Full Sem*

This one-credit elective course will give arts and humanities' majors the opportunity to interact with successful guest lecturers whose undergraduate backgrounds are in the arts and humanities. Lecturers will clarify how the talents and skills associated with their degrees have contributed to their pursuit of successful careers and lives.

THEA 4830 - Directed Readings

Credits: (1-3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Advanced level, independent study under the direction of faculty member.

Pre-requisite(s): Permission of supervising instructor required for credit.

May be repeated 8 times with a maximum of 9 credit hours.

**THEA 4851 INT -
Design/Tech/Management Practicum**

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Hands on learning through involvement backstage on running crews, through studio work, acting in, or involvement in "front of house" operations for Weber State Theatre productions.

To become a well-rounded theatre student, students are required to participate in the production of the departmental plays as often as their schedule allows. Since there are so many different learning opportunities in the theatre it is through Practicum that they are each exposed to the whole production process. There are 2 different Practicum course numbers, one for performance and the other for the design, technical, and management aspects of theatre. The course numbers stay the same from semester to semester but the content; the plays produced changes each time. Minimally students are required to enroll in a Practicum course 3 times to graduate, however since students are expected to be involved in the production of each play (2 per semester) then they should be completing 4 Practicums each academic year.

The maximum time a student can repeat this or any combination of THEA 4851 and THEA 4861 for credit is sixteen times.

**THEA 4852 INT - Design/Tech
Management Practicum**

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Hands on learning through involvement backstage on running crews, through studio work, acting in, or involvement in "front of house" operations for Weber State Theatre productions.

May be repeated 9 times and receive up to 10 credits.

**THEA 4853 INT -
Design/Tech/Management Practicum**

Credits: (1)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Hands-on learning through involvement backstage on running crews, through studio work, acting in, or involvement in "front of house" operations for Weber

State Theatre productions.

May be repeated 12 times and receive up to 12 credits.

**THEA 4854 INT -
Design/Tech/Management Practicum**

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Hands-on learning through involvement backstage on running crews, through studio work, acting in, or involvement in "front of house" operations for Weber State Theatre productions.

May be repeated 12 times and receive up to 12 credits.

**THEA 4855 INT -
Design/Tech/Management Practicum**

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Hands-on learning through involvement backstage on running crews, through studio work, acting in, or involvement in "front of house" operations for Weber State Theatre productions.

May be repeated 12 times and receive up to 12 credits.

**THEA 4856 INT -
Design/Tech/Management Practicum**

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Hands-on learning through involvement backstage on running crews, through studio work, acting in, or involvement in "front of house" operations for Weber State Theatre productions.

May be repeated 12 times and receive up to 12 credits.

**THEA 4857 INT -
Design/Tech/Management Practicum**

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Hands-on learning through involvement backstage on running crews, through studio work, acting in, or involvement in "front of house" operations for Weber State Theatre productions.

May be repeated 12 times and receive up to 12 credits.

THEA 4858 INT - Design/Tech/Management Practicum

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Hands-on learning through involvement backstage on running crews, through studio work, acting in, or involvement in "front of house" operations for Weber State Theatre productions.

May be repeated 12 times and receive up to 12 credits.

THEA 4859 INT - Design/Tech/Management Practicum

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Hands-on learning through involvement backstage on running crews, through studio work, acting in, or involvement in "front of house" operations for Weber State Theatre productions.

May be repeated 12 times and receive up to 12 credits.

THEA 4860 - Advanced Playwriting

Credits: (3)

This course will be an advanced study of dramatic structure and the process of playwriting, focusing on writing full length plays. Extensive writing is required.

Pre-requisite(s): THEA 3505 and instructor approval. May be repeated up to two times for a maximum of six credit hours.

THEA 4861 INT - Performance Practicum

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Practical applied performance work to be registered for by students who are 1) cast in, 2) have a significant assistant directing responsibility, or 3) are the production director for a WSU production.

To become a well-rounded theatre student, students are required to participate in the production of the departmental plays as often as their schedule allows. Since there are so many different learning opportunities in the theatre it is through Practicum that they are each exposed to the whole production process. There are 2 different Practicum course numbers, one for performance and the other for the design, technical, and management aspects of theatre. The course

numbers stay the same from semester to semester but the content; the plays produced changes each time. Minimally students are required to enroll in a Practicum course 3 times to graduate, however since students are expected to be involved in the production of each play (2 per semester) then they should be completing 4 Practicums each academic year.

Pre-requisite(s): Audition and permission of the instructor/director.

The maximum time a student can repeat this or any combination of THEA 4851 and THEA 4861 for credit is sixteen times.

THEA 4862 INT - Performance Practicum

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Provides supervised experience in theatre production and performance. May be repeated. Practicum is an experiential learning course supervised by theatre faculty to provide the student with a practical application of theatrical theory. The student will develop skills and abilities for the theatre through supervised experience in a performance of an acting role in a production. Prerequisite: Audition and permission of the instructor/director.

May be repeated up to 12 times for a maximum of 12 credit hours.

THEA 4862 INT - Performance Practicum

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Provides supervised experience in theatre production and performance. May be repeated. Practicum is an experiential learning course supervised by theatre faculty to provide the student with a practical application of theatrical theory. The student will develop skills and abilities for the theatre through supervised experience in a performance of an acting role in a production.

Pre-requisite(s): Prerequisite: Audition and permission of the instructor/director. The maximum time a student can repeat this or any combination of practicum for credit is twelve times.

May be repeated up to 12 times with a maximum of 12 credit hours.

THEA 4863 INT - Performance Practicum

Credits: (1)

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Provides supervised experience in theatre production and performance. May be repeated. Practicum is an experiential learning course supervised by theatre faculty to provide the student with a practical application of theatrical theory. The

student will develop skills and abilities for the theatre through supervised experience in a performance of an acting role in a production. Prerequisite: Audition and permission of the instructor/director.

The maximum time a student can repeat this or any combination of practicum for credit is twelve times.

THEA 4890 INT - Cooperative Work Experience or Internship

Credits: (1-3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Actual participation with outside performing arts organizations in the day-to-day activity of a performing arts organization will introduce the student to the professional application of classroom skill and knowledge. Students will arrange their own opportunities by interview or audition. A journal of their experience and a letter from a supervisor are required for credit. Possibilities include but are not limited to: Repertory Dance Theatre, Ballet West or Utah Symphony (management or tech only), Utah Shakespeare Festival, Salt Lake Acting Company, and Pioneer Theatre Company. P

Pre-requisite(s): permission of supervising instructor required for credit.

May be repeated twice with a maximum of 3 credit hours.

THEA 4900 INT - Senior Project

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

The Senior Project is an opportunity for graduating students to generate and realize a project in an area of primary interest. Typically, the project will reflect the student's emphasis in theatre arts (e.g., Acting, Directing, Design, etc.) and will demonstrate a culmination of previous study and may be a collaborative project.

Pre-requisite(s): Faculty approval of the proposal and a faculty advisor and the student must have completed a minimum of 90 credit hours.

THEA 4920 INT - Short Courses, Workshops, Institutes and Special Programs

Credits: (1-6)

Variable Title

Consult the semester class schedule for the current offering under this number. The department will determine the specific title and credit authorized.

The maximum time a student can repeat this class for credit is four times.

THEA 4950 INT - Theatre Festival Participation

Credits: (1)

Attend the Kennedy Center/American College Theatre Festival Region VIII annual meeting or other national theatre conference. Students will have the opportunity to attend theatre performances brought to the festival from throughout the region, display designs, audition, act in new 10-minute plays, and participate in workshops. Students may be responsible for their own registration fees and transportation, lodging and meals.

Pre-requisite(s): Audition and Permission of Instructor.
Note: May be repeated up to 4 times for credit.

UNIV 1105 - Foundations of College Success

Credits: (3)

Typically Taught Summer Semester: *1st Blk, 2nd Blk*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course assists incoming students in making a successful transition to college. Topics include the purpose of higher education, goal setting, time management, study and test taking skills, critical thinking, stress management, academic advisement, career and major exploration, using campus resources, and understanding student responsibilities.

UNIV 1106 - American College Experience

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

To aid in the integration of international students into Weber State campus life, and to foster a better understanding of the relationships between campus and community; comparing the experience with home country and institution. The class combines courses and programs designed to help students transition well to the rigorous academic environment of U.S. higher education.

UNIV 1110 SS - FYS: Introduction to Social Justice in Higher Education

Credits: (3)

Typically Taught Summer Semester: *NA*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

The goal of the course is for first-time students in the Wildcat Scholars program to understand and embrace what it means to be a college student who is cultivating a future. Students will be exposed to and apply ways of thinking, acting, and interacting that social science and educational research has shown to promote success in college and in life. The course requires traditional academic activities coupled with other activities, such as tutoring, designed to help students adopt the beliefs, attitudes, skills, and knowledge necessary to be a person who is cultivating a future through college.

Pre-requisite(s): Acceptance into the Wildcat Scholars program.

UNIV 2900 - Career Planning and Exploration

Credits: (3)

Typically Taught Summer Semester: *Full Sem - Online*

Typically Taught Fall Semester: *Full Sem, Full Sem - Online*

Typically Taught Spring Semester: *Full Sem, Full Sem - Online*

This course provides a comprehensive approach to career development, planning, preparation, and selection. It is designed to assist students as they develop their future goals through assessment of personal strengths, values, interests, and abilities. Students will learn valuable decision-making skills required for choosing a major and career path. The course provides strategies for successfully entering the job market through resume creation, interview preparation, and exploration of labor market information. This class requires the completion of online career assessments for a total cost of \$10. To access online course materials, please go to your student portal, log into eWeber, and click on WSU Online-Canvas.

UNIV 3170 - First Year Experience Mentor Leadership Seminar

Credits: (2)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

In this seminar course, FYE Peer Mentors are taught to effectively help Foundations of College Success (UNIV 1105) students in making a successful transition to college. FYE Mentor requirements are available at

www.weber.edu/fye/. Course enrollment limited to FYE Peer Mentors.

May be repeated once for 2 more credits and additionally for zero credits.

WEB 1010 - Exploring Web and User Experience

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Capabilities and limitations of multimedia technology, evaluation of multimedia products, and creation of a multimedia portfolio.

WEB 1030 - Foundations of Computing

Credits: (4)

Typically Taught Summer Semester: *Full Sem, Full Sem Online*

Typically Taught Fall Semester: *Full Sem, Full Sem Online*

Typically Taught Spring Semester: *Full Sem, Full Sem Online*

This course follows the core body of knowledge specified by the ACM which provides students with a broad overview of topics they might encounter within the major areas of computing. The course is taught at an introductory level and includes topics such as: history of computers, computer architecture, operating systems, web design and development, programming, database, software engineering, networking, and more. Cross-listed with CS 1030 and NET 1030.

WEB 1040 - Speedbuilding Keyboarding

Credits: (1)

Intensive computerized approach for improving speed and accuracy. Keyboarding 25 wpm recommended. The grade for this course is credit/no credit.

Note: This course is not currently offered.

WEB 1400 - Web Design and Usability

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Understand the technicalities of the World Wide Web and the Internet. Plan, design, and implement a successful web site using current web technologies. Topics covered include audience analysis, information architecture, wireframing,

prototyping, responsive design, usability and accessibility, testing, and analytics.

WEB 1430 - Client Side Programming

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This class introduces the JavaScript language, with a focus on advanced language features and client-side web programming. Topics covered include basic syntax, object-oriented programming, higher-order functions, the DOM, and AJAX. The class will also introduce jQuery.

Pre-requisite(s): WEB 1400 and CS 1400.

WEB 1501 - Document Creation Competency Exam

Credits: (.5)

Typically Taught Summer Semester: *Full Sem, Online*

Typically Taught Fall Semester: *Full Sem, Online*

Typically Taught Spring Semester: *Full Sem, Online*

The computer competency exam for this course is a hands-on examination verifying a student's skills at document creation. Practice materials are available on the web for studying the competencies covered on the test. The one-hour exam must be completed during the semester registered. Two repeats of the exam may be taken during the semester with an additional fee charged. The grade for the course is credit/no credit.

Note: Call (801-626-7384) or email CIL@weber.edu for more information.

WEB 1502 - Content, Internet Identity, and Device Management Competency Exam

Credits: (.5)

Typically Taught Summer Semester: *Full Sem, Online*

Typically Taught Fall Semester: *Full Sem, Online*

Typically Taught Spring Semester: *Full Sem, Online*

The computer competency exam for this course is a hands-on examination verifying a student's skills in content, internet identity, and device management. Practice materials are available on the web for studying the competencies covered on the test. The one-hour exam must be completed during the semester registered. Two repeats of the exam may be taken during the semester with an additional fee charged. The grade for this course is credit/no credit.

Note: Call (801-626-7384) or email CIL@weber.edu for more information.

WEB 1503 - Data Manipulation, Visualization, and Presentation Competency Exam

Credits: (.5)

Typically Taught Summer Semester: *Full Sem, Online*

Typically Taught Fall Semester: *Full Sem, Online*

Typically Taught Spring Semester: *Full Sem, Online*

The computer competency exam for this course is a hands-on examination verifying a student's skills at data manipulation, visualization, and presentation. Practice materials are available on the web for studying the competencies covered on the test. The one-hour exam must be completed during the semester registered. Two repeats of the exam may be taken during the semester with an additional fee charged. The grade for the course is credit/no credit.

WEB 1700 - Introduction to Computer Applications

Credits: (3)

Typically Taught Summer Semester: *Full Sem, Online*

Typically Taught Fall Semester: *Full Sem, Online*

Typically Taught Spring Semester: *Full Sem, Online*

Students will use current software to produce correctly formatted research papers with an accepted academic reference format, to produce effective employment documents such as a resume and a cover letter, and to use multiple collaboration mediums to effectively share, communicate, and collaborate with their peers. Students will use current software/technology to manage content on local devices and in the cloud, to manage their web identity and presence according to e-safety, security, and privacy best practices and standards, and to manipulate multiple computing platforms to troubleshoot problems. Students will protect local devices from security threats including viruses, malware, and adware using current best practices and technologies. Students will also manipulate and analyze data using various software applications and basic programming, organize data using graphical methods such as charts and infographics, and create an effective, well-designed presentation. Keyboarding 25 wpm recommended.

WEB 1701 - Document Creation

Credits: (1)

Typically Taught Summer Semester: *1st Blk, Online*

Typically Taught Fall Semester: *1st Blk, Online*

Typically Taught Spring Semester: *1st Blk, Online*
Students will use current software to produce correctly formatted research papers with an accepted academic reference format such as MLA or APA. Students will use current software/technology to produce effective employment documents such as a resume and a cover letter. Students will also be able to use multiple collaboration mediums to effectively share, communicate, and collaborate with their peers. Keyboarding 25 wpm recommended.

WEB 1702 - Content, Internet Identity, and Device Management

Credits: (1)

Typically Taught Summer Semester: *Full Sem, Online*

Typically Taught Fall Semester: *Full Sem, Online*

Typically Taught Spring Semester: *Full Sem, Online*

Students will use current software/technology to manage content on local devices and in the cloud. Students will manage their web identity and presence according to e-safety, security, and privacy best practices and standards. Students will manipulate multiple computing platforms and troubleshoot problems when they arise. Students will protect local devices from security threats including viruses, malware, and adware using current best practices and technologies. Keyboarding 25 wpm recommended.

WEB 1703 - Data Manipulation, Visualization, and Presentation

Credits: (1)

Typically Taught Summer Semester: *Full Sem, Online*

Typically Taught Fall Semester: *Full Sem, Online*

Typically Taught Spring Semester: *Full Sem, Online*

Students will manipulate and analyze data using various software applications and basic programming. Students will organize data using various graphical methods such as charts and infographics to appropriately convey information. Students will create an effective, well-designed presentation using current technologies. Keyboarding 25 wpm recommended.

WEB 2080 - Database Applications

Credits: (1)

Typically Taught Fall Semester: *Full Sem Online*

Use of database software to design and create a database, including objects such as tables, queries, reports, and forms. Use of advanced management features such as macros, switchboards, referential integrity, and compound

criteria.

Pre-requisite(s): WEB 1700 or WEB 1702/WEB 1502.

WEB 2200 - Image Editing

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Introduction to an image creation and editing program such as Adobe Photoshop. Students learn the basics of the program (workspace, selections, and layers). The steps in editing images are completed (cropping, color and tonal adjustments, retouch, noise reduction, sharpening, and exporting). Students also work creatively with layer styles, filters, layer masks, blend modes, and paint brushes. Several of the assignments will involve editing images and creating composites for the web (i.e hero image, web banner ad, Facebook cover).

WEB 2210 - Computer Illustrations

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

In this course you will learn the fundamentals of a vector drawing program such as Adobe Illustrator. Students become skilled using the Pen Tool and other drawing tools to create vector illustrations. Various techniques are learned for applying color, attributes, styles, and effects to illustrations. Students also create, edit, and format type to add to their illustrations. Projects will focus on web illustrations for banners, landing pages, user interface elements, social media, infographics, and other web content.

WEB 2220 - Digital Publishing

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

Use of professional page design and layout software such as Adobe InDesign to design, create, and edit a variety of publications for print and web. Students create publications for print such as a marketing card and business flyer/brochure, as well as interactive online web documents that contain audio, video, slideshows, and HTML content.

Pre-requisite(s): WEB 1400 and WEB 2200 or permission of instructor.

WEB 2300 - Video Editing

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Using video editing software such as Adobe Premiere,

students will combine many separate video recordings to create short digital movies. The following steps of the video production process will be completed: creating storyboards; shooting the video and recording the audio; capturing resources to the computer; importing resources into a video project; adding titles, graphics, transitions, and effects; and exporting the video to formats for the computer, television, DVDs, and the Web.

WEB 2350 - Client Side Web Development

Credits: (4)

Typically Taught Summer Semester: *2nd Blk Online*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course provides an introduction to client-side programming and Web page development. Subjects covered include responsive Web page design and dynamic Web page development. The course will explore various technologies such as HTML5, CSS3, and Javascript with an introduction to JQuery and JQuery Mobile. Cross-listed with CS 2350.

Pre-requisite(s): CS 1400 and WEB 1400.

WEB 2410 - Web Animation I

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

This course introduces various web technologies that aid the creation of web animations for distribution on many platforms. Students discuss technical issues affecting animation such as speed and compression. Students will explore several current tools to create animations for the web.

WEB 2500 - User Experience Design

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

In this course students will be introduced to the four-step user experience design process which includes user research, design, testing, and implementation. The following topics will be covered: history of user experience, user behavior, cognitive processing, personas, web analytics, content strategy, information architecture, writing for the web, user-centered design, usability testing, and accessibility. Using current technologies and tools, students will create a basic web or mobile application.

Pre-requisite(s): WEB 1400.

WEB 2620 - Advanced CSS

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A deep knowledge of CSS properties and specifications is essential in client-side web development and design. This course will expand students knowledge of CSS by covering the following CSS properties: media queries, animation & transitions, transforms, grid layouts, flexbox, web fonts, shapes, variables, exclusions, and regions. Browser support, preprocessors, frameworks, and minification will also be discussed. Using these advanced CSS techniques student will design and implement a consistent user experience and the page layout of a web application.

Pre-requisite(s): WEB 1400 or CS 2350.

WEB 2630 - Client Side Frameworks

Credits: (4)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course covers client-side JavaScript Frameworks and building Single Page Applications (SPA). It starts with a review of the JavaScript programming language (with emphasis on the Document Object Model (DOM) and covers various debugging techniques using the browser developer tools. An overview of Asynchronous JavaScript and XML (AJAX) is introduced before diving deeper into a popular client-side JavaScript framework - like Angular, React or VueJS. Regardless of the primary framework chosen, we will explore and compare the other frameworks as time permits. Cross-listed with CS 2630.

Pre-requisite(s): WEB 1430 or CS 2350.

WEB 2800 - Independent Projects and Research

Credits: (1-4)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Independent project, student assistant, or research on an individual basis. Prerequisite: Permission of instructor. May be taken twice up to 6 credit hours.

WEB 2810 - Experimental

Credits: (1-6)

Experimental

Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript.

Students may repeat experimental courses with different titles up to 5 times for credit.

WEB 2810 - Web Accessibility

Credits: (3)

Experimental

In this course students will be introduced to the disability rights, legislation that governs the rules for accessibility in the United States, and WCAG 2.1 standards. The following topics will be covered: history of disability rights, key leaders in the disability rights movement, groups advocating for disability rights, legislation that governs the rules around accessibility, WCAG 2.1 standards. Using current accommodation software, students will test websites for accessibility and make recommendations to change the code to meet WCAG 2.1 guidelines. Students may repeat experimental courses with different titles up to 5 times for credit.

WEB 2860 - Work Study

Credits: (1-4)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Students can earn variable credit (depending on the number of hours performed) by working in the web and user experience career field or by serving as a teaching assistant for a WEB/UX faculty member. Either way, the student will fulfill objectives that have been pre-approved by a business/organization supervisor or faculty advisor. This lower division elective is primarily intended for WEB/UX majors currently working in entry-level (client side) positions within the career field. Junior and Senior level students, performing more complex server-side web development, should consider taking the Upper Division WEB 4860 course as an alternative.

Pre-requisite(s): Permission of instructor and WEB/UX program coordinator.

May be repeated up to four times with a maximum of four credit hours.

WEB 2890 - Client-Side Portfolio

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

In this project-based course students will design a web portfolio that features the work they have completed during the Web and User Experience AAS degree. Students will

also create several portfolio pieces related to client-side web development.

Pre-requisite(s): WEB 2620

WEB 2920 - Short Courses, Workshops, Institutes, and Special Programs

Credits: (1-4)

Variable Title

Consult the class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript.

May be repeated up to four times with a maximum of four credit hours.

Note: This course is not currently offered.

WEB 3000 - Advanced Word Processing

Credits: (1)

Typically Taught Spring Semester: *Full Sem Online*

Use of word processing software including sorts, tables, columns, reports, merges, graphics, and macros.

Pre-requisite(s): WEB 1700 or WEB 1701/WEB 1501.

WEB 3070 - Advanced Spreadsheet Applications

Credits: (1)

Typically Taught Fall Semester: *Full Sem, Online*

Typically Taught Spring Semester: *Full Sem, Online*

Use of spreadsheet software including macros, sorts, advanced formulas, graphs, and creative presentations.

Pre-requisite(s): WEB 1700 or WEB 1703/WEB 1503.

WEB 3090 - Digital Presentations

Credits: (2)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem Online*

Use of electronic slide presentation software to create slides consisting of short paragraphs, bulleted lists, graphic images, movie clips, audio clips, data charts, diagrams, and imported data from other software. Emphasis will also be placed on professional quality presentation design and animation of slide elements.

Pre-requisite(s): WEB 1700 or WEB 1701/WEB 1501 and WEB 1702/WEB 1502 and WEB 1703/WEB 1503.

WEB 3110 - Training the Trainer

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Real-world strategies and techniques to provide better employee training, including development of materials and methods to enhance the learning process.

Pre-requisite(s): ENGL 2010 and WEB 1700 or WEB 1701, WEB 1702, and WEB 1703, or WEB 1501, WEB 1502, and WEB 1503.

WEB 3130 - Web Accessibility

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

In this course students will be introduced to the disability rights, legislation that governs the rules for accessibility in the United States, and WCAG 2.1 standards. The following topics will be covered: history of disability rights, key leaders in the disability rights movement, groups advocating for disability rights, legislation that governs the rules around accessibility, WCAG 2.1 standards. Using current accommodation software, students will test websites for accessibility and make recommendations to change the code to meet WCAG 2.1 guidelines.

Pre-requisite(s): WEB 2620.

WEB 3200 - Dynamic Languages for Web Development

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

General-purpose dynamic languages like Python and Ruby have become increasingly popular and well suited for the creation of full stack web applications. This course will introduce students to the syntax and programmatic idioms of both Ruby and Python. The following topics will be covered in both languages: complex data types, loops, conditionals, command line applications, and the object-oriented programming paradigm. The commonly used web frameworks of each language will be explored and used to create and deploy a full stack web application to a cloud provider.

Pre-requisite(s): CS 1400 and WEB 2630.

Pre-requisite/Co-requisite: WEB 2890.

WEB 3300 - Motion Graphics

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

In this course you will use Adobe After Effects to create motion graphics and visual effects for film and video. You

will learn how to create sophisticated motion graphics using animated text and objects, compositing videos and images, and adding visual effects to video. You will learn how to set keyframes on a timeline and work with transform properties, motion paths, rotoscoping masks and effects, developing a solid foundation in this increasingly popular and versatile software.

Pre-requisite(s): WEB 2200 and WEB 2300 or approval of instructor.

WEB 3400 - LAMP Stack Web Development

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

This course explores the Linux-Apache-MySQL-PHP, or LAMP Web development framework to build applications that solve common business problems. The course begins with an exploration of the LAMP architecture, then covers fundamentals of the PHP programming language before introducing a PHP framework like Laravel. Additional coverage focuses on database concepts and how to interact with a MySQL database.

Pre-requisite(s): WEB 3200 or NET 2210 or NET 3200.

WEB 3410 - Web Animation II

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

Students will explore native web technologies that are useful for animation including JavaScript, SVG, the HTML canvas element and CSS. Using these native web technologies, students will design and produce advanced multimedia projects applicable for business and industry. These projects will be produced by combining web animation, graphics, video, and text into interactive web and mobile multimedia presentations.

Pre-requisite(s): WEB 2410.

WEB 3430 - Full Stack JavaScript Development

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Modern web development increasingly involves using end-to-end JavaScript-based technologies such as MongoDB, Express.js, Angular, React, Vue.js, Node.js, etc. This course introduces development techniques that capitalize on the strengths of every layer in this JavaScript-based full-

stack.

Pre-requisite(s): WEB 3200.

WEB 3500 - User Interface Prototyping & Design

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

Students will learn the elements of user interface design as it applies to front-end web and mobile app development.

Students will identify best practices in user interface design. Using those best practices they will rapidly prototype an effective user interface.

Pre-requisite(s): WEB 2500 or CS 2335, WEB 1400 or CS 1400, or permission from instructor.

WEB 3530 - Information Architecture

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Course Fee: \$25.00

In this course students will learn the fundamentals of information architecture. They will learn how to create a functional site structure, navigation, taxonomy, metadata, and content strategies for websites. Students will conduct user research to gather the appropriate requirements through competitive analysis, site and content analysis, accessibility analysis, and user testing methods.

Pre-requisite(s): WEB 2500.

WEB 3600 - User Research Methods

Credits: (4)

Typically Taught Spring Semester: *Full Sem*

Course Fee: \$25.00

In this course students will learn the fundamentals of user research. Students will learn the appropriate methods of user research to understand user behaviors, needs, experience, and motivations. Students will conduct qualitative and quantitative research that they will analyze for user insights. Statistical analysis will be applied to quantitative findings to support data-driven decisions. Students will create a research presentation that outlines their key findings, including their big wins and pain points with solutions for designing a better experience for users.

Pre-requisite(s): WEB 2500.

WEB 3620 - Server-Side Web Architecture

Credits: (4)

Typically Taught Fall Semester: *Full Sem*

An introduction to server-side Web development using the most current Web server technologies. General Web development principles such as usability, reliability, maintainability and scalability will be applied to current Web development environments such as PHP, Python, Ruby and Java. Students will gain real-world experience in creating Websites for multiple Web platforms. Cross listed with CS 3620.

Pre-requisite(s): WEB 2350 and CS 2550.

WEB 3650 - Human-Computer Interaction

Credits: (4)

Typically Taught Fall Semester: *Full Sem, Full Sem Online*

This course introduces the skills and concepts of Human-Computer Interaction (HCI) that enable students to design systems that effectively meet human needs. A concrete illustration of the practice of HCI, this course covers usability, user experience, and modern diverse interfaces. This course includes both theoretical and practical best practices. Cross-listed with CS 3650.

Pre-requisite(s): CS 2420 and CS 2450, or WEB 3500.

WEB 3700 - Web Development with .NET

Credits: (4)

Typically Taught Spring Semester: *Full Sem*

Microsoft's ASP.NET Core is a cross-platform, high-performance web framework for building full stack web applications. This course will introduce students to the syntax and programmatic idioms of ASP.NET/C#. The following topics will be covered: REST, Razor, Model Binding and Validation, Entity Framework and the MVC design pattern. Client-side development libraries will also be discussed and integrated, so that student can build and deploy a full stack application.

Pre-requisite(s): WEB 3200.

WEB 4350 - Web Development Capstone

Credits: (4)

Typically Taught Spring Semester: *Full Sem*

Senior level group project capstone course covering full stack client/server web development. The project will be implemented using an advanced web framework (such as Laravel, NPM, Django, Ruby on Rails, or others). Includes implementation and concepts of an MVC web architecture, Web UI design and creation, data modeling and retrieval, input validation, security, and unit

testing

Pre-requisite(s): (CS 3260, WEB 3400, and WEB 3430)
or (WEB 3130, WEB 3500, and WEB 3600)

WEB 4800 - Independent Research

Credits: (1-4)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Directed research and study on an individual basis.

Pre-requisite(s): Permission of instructor.

May be repeated up to 6 credit hours.

WEB 4860 INT - Internship

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Students work in the web and user experience field. The student fulfills objectives that have been approved by a business/organization supervisor and a faculty advisor.

Must have Senior standing or approval of instructor.

Pre-requisite(s): Permission of instructor.

WEB 4890 - Server-Side Portfolio

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

In this project-based course students will revise and update the web portfolio that was created in the WEB 2890 course. They will add to the portfolio work that they have completed during the Web and User Experience BS degree. Students will also create several portfolio pieces related to server-side web development.

Pre-requisite(s): WEB 3500 and WEB 3620/CS 3620.

WEB 4920 - Short Courses, Workshops, Institutes, and Special Programs

Credits: (1-4)

Variable Title

Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript.

May be repeated for a maximum of six credit hours.

Note: This course is not currently offered.

WGS 1500 SS/DV - Introduction to Women and Gender Studies

Credits: (3)

Typically Taught Summer Semester: *Full Sem, Full Sem Online*

Typically Taught Fall Semester: *Full Sem, Full Sem Online*

Typically Taught Spring Semester: *Full Sem, Full Sem Online*

An introduction to the discipline of Women and Gender studies using multicultural sources based on current feminist scholarship. In this course, we will examine the diversity of women's experiences, perspectives, critiques, and theories across the categories of race, ethnicity, class, and gender.

WGS 2500 SS/DV - Human Rights in the World

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Human rights (HR) are a powerful idea in the modern world, but also the focus of controversy. This course will provide students with a broad foundation in human rights including the ability to analyze HR in domestic and int'l law, examine prevention and prosecution techniques, and debate current issues at home and abroad. Emphasis will be placed on women and gender studies (including LGBT issues), vulnerable populations such as refugees, and atrocity crimes.

WGS 2900 - Topics in Women's Studies

Credits: (1-3)

Variable Title

Varied topics as described in the semester schedule. Topics will be drawn from issues related to women's studies. May be repeated 3 times up to 9 credits with different course content.

WGS 3050 - Introduction to Feminist Theories 1700 -- Present

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

An introduction to the study of feminist theories from the 18th Century to the present. Students will study historical accounts of feminism by looking at primary sources written by influential feminists, as well as theoretical treaties on

different kinds of feminism, from liberal feminism, to radical feminism, socialist feminism, black feminism, multicultural or global feminism, and so on. The class will be taught using collaborative learning and will rely on class discussion and interaction, rather than traditional lecture format.

WGS 3090 - Gender and Communication

Credits: (3)

This course is designed to help students understand the influence that communication has upon the shaping of gender and the influence that gender has in shaping communication interactions. Students become aware of, sensitive to, and more experienced in the issues, implications and skills necessary to successfully and meaningfully communicate with males and females, and about males and females, in a wide range of communication contexts.

Pre-requisite(s): Junior or Senior standing required or instructor permission.

Cross listed with COMM 3090.

WGS 4050 - Research Methodologies

Credits: (2)

Designed to introduce students to a variety of approaches to research in women's studies. Students will consider some of the assumptions which underlie research methodologies which may limit our knowledge about women as research subjects and as researchers themselves.

Pre-requisite(s): WGS 3050 (or equivalent coursework) or permission of instructor.

Note: Course not currently being offered.

WGS 4060 - Research Project

Credits: (2)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Directed research project including literature survey and completion of study in area of student's choosing, guided by faculty mentor(s) from Women's Studies program (and, where appropriate, student's major department.)

Pre-requisite(s): WGS 4050 (or equivalent coursework) and permission of instructor.

WGS 4150 - Research Methodologies

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Designed to introduce students to a variety of approaches to

research in women and gender studies. Students will consider some of the assumptions which underlie research methodologies which may limit our knowledge about women as research subjects and as researchers themselves. **Pre-requisite(s):** WGS 3050 (or equivalent coursework) or permission of instructor.

WGS 4250 INT - Community-Based Research/Internship

Credits: (3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

The purpose of this research/internship is to provide students with community experiences related to issues of women and gender. Students in this practicum will apply knowledge skills learned throughout their course of study in either the Women and Gender Studies minor or BIS. For this research/internship students will be required to check in with their course faculty supervisor weekly during the semester.

Pre-requisite(s): WGS 4150.

WGS 4810 - Experimental Courses

Credits: (1-3)

Refer to Experimental Courses.

May be repeated up to 6 hours for credit.

WGS 4830 - Directed Readings

Credits: (1-3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Directed individual readings in the general area of women's studies. Specific topic selected in consultation with instructor; amount of material to be read determined at discretion of instructor, based on level of topic and degree of difficulty of reading and consistent with any existing university and departmental guidelines.

Pre-requisite(s): WGS 1500 (or equivalent coursework) and permission of instructor.

May be repeated 5 times up to 6 credit hours.

WGS 4860 - Internship in Women's Studies

Credits: (1-2)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Opportunity for service learning with campus/community organizations involved with women's issues, applying principles learned in women's studies coursework to bring about beneficial social change.

Pre-requisite(s): completion of WGS 4050 (or equivalent coursework) and permission of the instructor.

This course may be repeated once up to two credits toward the minor.

Note: When taken to fulfill a program requirement, students must register for 2 credit hours.

WGS 4900 - Topics in Women's Studies

Credits: (1-3)

Variable Title

Varied topics as described in the semester schedule. Topics will be drawn from issues related to women's studies.

This course may be taken 3 times up to 9 credits with different course content.

WGS 4990 - Senior Seminar

Credits: (2)

Typically Taught Spring Semester: *Full Sem*

Capstone course including discussion and synthesis of major issues in women's studies. Students will discuss specific projects (completed or in progress) related to their career goals; these projects may have an academic or service orientation.

Pre-requisite(s): completion of the women's studies core (or equivalent) courses and permission of the instructor.

WSU 1450 CA/HU - Perspectives in Creative Arts and Humanities

Credits: (3-5)

Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript.

WSU 1460 SS/CA - Perspectives in Social Science and Creative Arts

Credits: (3-5)

Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript.

WSU 1470 PS/CA - Perspectives in Physical Sciences and Creative Arts

Credits: (3-5)

Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript.

WSU 1480 CA/LS - Perspectives in Creative Arts and Life Sciences

Credits: (3-5)

Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript.

WSU 1560 SS/HU - Perspectives in Social Science and Humanities

Credits: (3-5)

Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript.

WSU 1570 PS/HU - Perspectives in Physical Sciences and Humanities

Credits: (3-5)

Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript.

WSU 1580 HU/LS - Perspectives in Humanities and Life Sciences

Credits: (3-5)

Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript.

WSU 1670 SS/PS - Perspectives in Social Science and Physical Science

Credits: (3-5)

Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript.

WSU 1680 SS/LS - Perspectives in Social Science and Life Science

Credits: (3-5)

Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript.

WSU 1780 PS/LS - Perspectives in Physical Sciences and Life Sciences

Credits: (3-5)

Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript.

WSU 2120 EN/AI - Perspectives in Composition and American Institutions

Credits: (3-5)

Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript.

WSU 2130 EN/QL - Perspectives in Composition and Quantitative Literacy

Credits: (3-5)

Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript.

WSU 2140 EN/CA - Perspectives in Composition and Creative Arts

Credits: (3-5)

Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript.

WSU 2150 EN/HU - Perspectives in Composition and Humanities

Credits: (3-5)

Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript.

WSU 2160 EN/SS - Perspectives in Composition and Social Sciences

Credits: (3-5)

Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript.

WSU 2170 EN/PS - Perspectives in Composition and Physical Sciences

Credits: (3-5)

Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript.

WSU 2180 EN/LS - Perspectives in Composition and Life Sciences

Credits: (3-5)

Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript.

WSU 2230 AI/QL - Perspectives in American Institutions and Quantitative Literacy

Credits: (3-5)

Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript.

WSU 2240 AI/CA - Perspectives in American Institutions and Creative Arts

Credits: (3-5)

Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript.

WSU 2250 AI/HU - Perspectives in American Institutions and Humanities

Credits: (3-5)

Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript.

Credits: (3-5)

Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript.

WSU 2420 PS/SS - Perspectives in Social Science and Physical Sciences

Credits: (3-5)

Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript.

ZOOL 1010 LS - Animal Biology

Credits: (3)

Typically Taught Summer Semester: *Full Sem Online*

Typically Taught Fall Semester: *Full Sem, Full Sem Online*

Typically Taught Spring Semester: *Full Sem, Full Sem Online*

A non-major's introduction to cell biology, genetics, evolution, ecology, and animal diversity with emphasis on diversity of animal architecture and life strategies in relation to the diverse environments of Earth. The overriding theme is the process of evolution, its basis, and its implications for all animals, including humans. Three lecture/discussion hours a week.

ZOOL 1020 LS - Human Biology

Credits: (3)

Typically Taught Summer Semester: *Full Sem Online*

Typically Taught Fall Semester: *Full Sem, Full Sem Online*

Typically Taught Spring Semester: *Full Sem, Full Sem Online*

Survey course for non-science majors. Course content

includes basic structure and function of the human body, homeostasis, heredity, human evolution, and ecology. Implications for personal health, bioethical and environmental issues and the impact of each of these on society will be examined.

Three lecture/discussion hours a week.

ZOOL 1030 LS - The Nature of Sex

Credits: (3)

Typically Taught Summer Semester: *Full Sem Online*

Typically Taught Fall Semester: *Full Sem, Full Sem Online*

Typically Taught Spring Semester: *Full Sem, Full Sem Online*

This course will present an overview of sexual reproduction in animals, including humans. It provides evolutionary, ecological, and behavioral perspectives on sex. Topics cover the value of sex for generating variation among individuals, breeding patterns in nonsocial and social species, mating systems such as monogamy and polygamy, and reproductive behavior. The relevance of this material to human reproduction is addressed.

ZOOL 1110 LS - Principles of Zoology

Credits: (4)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A science major's introduction to the study of cell biology, genetics, inheritance, evolution, and ecology. The nature and practice of science is also emphasized and basic skills in data collection, analysis, and presentation are introduced. Three hours of lecture and two hours of lab per week. The year-long major's introductory sequence is completed with ZOOL 2220.

Pre-requisite/Co-requisite: Completion of or co-registering for CHEM 1200 or 1210 or equivalent is required.

ZOOL 1280 - Life in Medicine

Credits: (1)

This one credit course for premedical students is designed to provide insight into many of the aspects associated with a career in medicine. The objectives of this course include 1.) provision of basic information regarding admission to medical training programs; 2.) exposure to some of the basic tenants necessary for professional success; 3.) investigation of some of the benefits and detriments associated with this challenging career; and 4.) establishing a forum through which students can question and self-

assess the feasibility and desire to pursue a medical career. Presentations, group discussions and introspective analysis of selected topics will be lead by a local physicians of various specialties to accomplish these goals. May be repeated once.

ZOOL 1370 LS - Principles of Life Science

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

A survey course recommended for elementary education majors. Course content includes cells, cell chemistry, genetics, plant and animal anatomy, plant and animal classification, physiology, immune systems, evolution, and ecology. Unifying concepts of all living things will be emphasized.

Two lecture hours and one 3-hour lab a week.

Cross-listed with BTNY 1370 and MICR 1370.

ZOOL 1810 - Experimental

Credits: (1-6)

Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript.

This course may be repeated five times for credit.

ZOOL 1990 - Zoology Orientation

Credits: (1)

This seminar consists of faculty, staff, and professional presentations which will inform students of potential research opportunities in the department and career possibilities in the discipline.

One hour a week.

Suggested Requisite(s): This course should be taken concurrently with ZOOL 1110 or ZOOL 2220.

Note: This course is offered as needed.

ZOOL 2100 - Human Anatomy

Credits: (4)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Systematic study of the organs of the human body with cadaver-based laboratory. ZOOL 1020 or HTHS 1101 strongly recommended prior to enrollment. First semester students are discouraged from registering.

Three hours of lecture and one 2-hour lab per week.

ZOOL 2200 LS - Human Physiology

Credits: (4)

Typically Taught Summer Semester: *1st Blk, 2nd Blk, Full Sem Online*

Typically Taught Fall Semester: *Full Sem, Full Sem Online*

Typically Taught Spring Semester: *Full Sem, Full Sem Online*

Human physiology pertains to the study of the physical, biochemical and mechanical functions of the various human organs and the relationships between these organ systems. Its knowledge is essential in understanding diseases and the development of modern medical therapies. This class is critically important to undergraduate students aspiring to enter professional field in health-science such as medicine, dentistry, nursing, pharmacy, physical and occupational therapies, education, and research. Three hours of lecture and two hours of lab per week.

ZOOL 2220 - Diversity of Animals

Credits: (4)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A major's introduction to the diversity and evolution of vertebrate and invertebrate animals. Three hours of lecture and two hours of lab a week. Completes the year-long major's introductory sequence after ZOOL 1110.

Pre-requisite(s): ZOOL 1110 or permission of instructor.

Pre-requisite/Co-requisite: Completion of or co-registering for CHEM 1210 or equivalent is required.

ZOOL 2800 - History of Life Sciences

Credits: (3)

Examination of the ways in which interaction among personalities, instrumentation, and ideas shape the development of biology - past, present, and future. Three lecture hours a week.

Note: This course is offered as needed.

ZOOL 2900 - Topics in Zoology

Credits: (1-4)

Variable Title

Variable topics related to zoology as announced in the class schedule; may include medical entomology, biostatistics, primatology, etc., and may be taught with a laboratory section.

Pre-requisite(s): ZOOL 1110 and ZOOL 2220, or

approval of instructor.

May be repeated 3 times with a maximum of 4 credit hours.

Note: This course is offered as needed.

ZOOL 2920 - Short Courses, Workshops, Institutes and Special Programs

Credits: (1-4)

Variable Title

Consult class schedule for offerings under this number. The specific title and credit authorized will appear on the student transcript.

Pre-requisite(s): vary and are determined by instructor.

May be repeated 5 times with a maximum of 6 credit hours.

Note: This course is offered as needed.

ZOOL 3099 - Teaching the Human Anatomy Laboratory

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

The purpose of this course is to introduce students to human dissection and the teaching of human cadaver anatomy. In so doing, we will (1) provide a uniform laboratory experience for Zoology 2100 (Human Anatomy), (2) teach the students what and how to teach the human anatomy laboratories, (3) provide the students with the opportunity to teach their peers thus providing experience at public speaking, and, (4) reinforce the knowledge base of the students (the power of knowing something by teaching something).

Pre-requisite(s): Successful completion of ZOOL 2100 with a grade of B+ or higher; completion of interview process, and instructor approval.

ZOOL 3100 - Advanced Human Anatomy

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

The purpose of this course is to further expose and train students in human cadaver dissection and the teaching of human cadaver anatomy. In so doing, we will (1) provide a uniform laboratory experience for Zoology 2100 (Human Anatomy), (2) teach these advanced students what and how to mentor their junior colleagues in teaching the human anatomy laboratories, (3) provide these advanced students with the opportunity to teach both the 2100 students and other student instructors, thus further improving their public speaking, (4) place these advanced students in a more senior leadership position among their lab instructor

peers, and (5) further reinforce the knowledge base of the students (the power of knowing something by teaching something).

Due to the complex and pedagogical nature, this course can be taken up to 4 times. Each semester, the focus of the lecture portion of this course will vary from: histological anatomy, developmental anatomy, evolution and pathological/clinically-relevant anatomy. In addition, the prosection assignments each repeated semester will increase in complexity, difficulty and leadership demand. The student instructor experience is maximized by their ability to repeat this unique course by allowing them to capitalize on and improve their past efforts in both the teaching environment and prosection assignment.

Pre-requisite(s): Successful completion of ZOO 2100 with a grade of B+ or higher, successful completion of ZOO 3099, completion of interview process, and instructor approval.

May be repeated up to four times with a maximum of 12 credit hours.

ZOO 3200 - Cell Biology

Credits: (4)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Cells form the basis of all life on Earth and an understanding of cells is essential for examining the features of all living things, including evolutionary adaptations. This course explores the fundamentals of cellular structure and function, including bioenergetics, protein function, membrane properties, cell transport, and cell signaling. Research techniques are emphasized throughout. Applications of cell biology, such as stem cell biology, tissue organization and cancer are explored. Three hours of lecture and three hours of lab per week.

Three lecture hours and one 3-hour lab a week.

Pre-requisite(s): ZOO 1110 and either the CHEM 1110 and CHEM 1120 series or the CHEM 1210 and CHEM 1220 series, or approval of instructor.

ZOO 3300 - Genetics

Credits: (4)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Genetics is the foundation for all of biology, from anatomy, physiology, and cell biology, to ecology, behavior and evolution. This course is a comprehensive exploration of genetics, from molecular genetics to organismal genetics to population genetics. Specific topics include DNA and chromosome structure, regulation of gene expression,

mutation, Mendelian genetics, and population genetics. The focus is on applications and current research, including biotechnology, forensics, medicine, genetic counseling, wildlife management, and evolution. Three hours of lecture and three hours of lab per week.

Pre-requisite(s): ZOO 1110 and MATH 1050 (or equivalent), or approval of instructor.

ZOO 3340 - Information Resources in the Life Sciences

Credits: (2)

A practical introduction to the literature and information resources of the life sciences. Students will expand their research skills and be able to develop effective research strategies to find and synthesize information available in academic libraries.

Two lecture hours a week.

Pre-requisite(s): ENGL 2010.

Cross listed in Botany, Library Sciences and Microbiology. Note: This course is offered as needed.

ZOO 3450 - Ecology

Credits: (4)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Study of how environmental factors, both nonliving and living, affect the distribution and abundance of organisms at the individual, population, community, and ecosystem levels. Three hours of lecture and three hours of lab (or field trip) a week.

Pre-requisite(s): ZOO 1110 and ZOO 2220, or approval of instructor.

Note: Writing intensive course.

ZOO 3470 - Zoogeography

Credits: (3)

Typically Taught Spring Semester: *Full Sem, alternating years*

Study of factors determining the distributions of animals with emphases on ecological and evolutionary processes occurring across landscapes and around the globe. Three hours of lecture per week.

Pre-requisite(s): ZOO 1110 and ZOO 2220, or approval of instructor.

ZOO 3500 - Conservation Biology

Credits: (3)

Typically Taught Fall Semester: *Full Sem, alternating*

years

The study of how biological principles and concepts are used in conservation. Major emphasis on the preservation and management of biodiversity. Connections between biological and societal issues are explored. Three hours of lecture per week.

Pre-requisite(s): ZOOL 1110 and ZOOL 2220, or approval of instructor.

ZOOL 3570 - Foundations of Science Education

Credits: (3)

Typically Taught Spring Semester: *Full Sem*

A thorough investigation of research in science learning and curricular standards at the state and national levels. Foundations of the philosophy of science and scientific inquiry as applicable to science teaching at the secondary level. This course serves as a foundation to a preservice science teacher's education coursework.

Cross-listed with BTNY, CHEM, GEO, MICR, & PHYS 3570.

ZOOL 3600 - Comparative Physiology

Credits: (4)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

A comparative and evolutionary approach to the study of how animals function in a variety of environments from cellular to whole-body level. Three hours of lecture and three hours of lab per week.

Pre-requisite(s): ZOOL 1110 and ZOOL 2220, or approval of instructor.

ZOOL 3720 - Evolution

Credits: (3)

Typically Taught Summer Semester: *Full Sem Online*

Typically Taught Fall Semester: *Full Sem, Full Sem Online*

Typically Taught Spring Semester: *Full Sem, Full Sem Online*

The patterns and processes involved in changes in natural populations. How organisms evolve at the genetic, organismal, and population levels. Topics include adaptation, taxonomy, sex, speciation & species, coevolution, and extinction. Three lecture hours a week.

Pre-requisite(s): ZOOL 1110 and ZOOL 2220, or approval of instructor.

ZOOL 3730 - Population Biology

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Population biology is an interdisciplinary field combining the areas of ecology, genetics, and evolution. Topics include population growth and regulation, interspecific interactions, population genetics, quantitative genetics, phenotypic plasticity, and evolution of life histories. Emphasis is on current research applications in wildlife management including the structure and dynamics of wildlife populations, competition, predation, and dispersal. Three lecture hours a week.

Pre-requisite(s): ZOOL 1110, ZOOL 2220, and ZOOL 3300, or approval of instructor.

Note: This course is not currently offered.

ZOOL 3810 - Experimental

Credits: (1-6)

Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript. Refer to Experimental Courses.

ZOOL 3810 - Techniques in Field Ornithology

Credits: (3)

Experimental

This course will provide students with a strong practical background in avian monitoring and research techniques and to utilize these techniques to answer relevant research questions. A combination of lectures, reading, discussions, labs and field trips will be used to familiarize students with the common techniques used within the discipline. There will be a strong emphasis on students developing and conducting a research project. Hands on learning opportunities will be acquired through labs and field trips.

Pre-requisite(s): ZOOL 1110 and ZOOL 2220.

ZOOL 3820 - Biology of Cancer

Credits: (3)

This upper-level elective course is designed to investigate the biological foundations and ramifications of cancer by exploring the molecular mechanisms underlying the development and progression of this disease. Outside reading material will be used to provide a platform for discussion of common misconceptions and attitudes regarding cancer, with the goal of conveying a broad understanding of the disease from molecular, clinical, historical and personal perspectives. Three lecture hours a

week.

Pre-requisite(s): ZOOL 1110 or approval of instructor.

ZOOL 4050 - Comparative Vertebrate Anatomy

Credits: (4)

Typically Taught Spring Semester: *Full Sem, alternating years*

In-depth, comparative study of vertebrate functional anatomy. Students learn to dissect and understand the anatomical and evolutionary relationships between fishes, amphibians, reptiles, birds, and mammals. Three hours of lecture and three hours of lab per week.

Pre-requisite(s): ZOOL 1110 and ZOOL 2220, or approval of instructor.

ZOOL 4100 - Vertebrate Embryology

Credits: (4)

Typically Taught Spring Semester: *Full Sem, alternating years*

A study of the principles and processes of embryological development in animals, emphasizing mechanisms of development, evolution, and pathology. Three hours of lecture and three hours of lab per week.

Pre-requisite(s): ZOOL 1110 and ZOOL 2220, or approval of instructor.

Suggested Requisite(s): A prior anatomy class is strongly recommended.

ZOOL 4120 - Histology

Credits: (4)

Typically Taught Fall Semester: *Full Sem, alternating years*

Microscopic study of the structure and function of vertebrate tissues and organs, with an emphasis on human organ systems. Three hours of lecture and three hours of lab per week.

Pre-requisite(s): ZOOL 1110, ZOOL 2220, either ZOOL 2100 or ZOOL 4050, or approval of instructor.

ZOOL 4210 - Advanced Human Physiology

Credits: (4)

Typically Taught Spring Semester: *Full Sem, alternating years*

A study of vertebrate physiological processes with human emphasis, focusing on cardiovascular, digestive, and

neuromuscular systems.

Three lecture hours and one 3-hour lab a week.

Pre-requisite(s): ZOOL 1110, ZOOL 2220, and ZOOL 2200, or approval of instructor; a minimum of one year of (preferably Organic) Chemistry.

ZOOL 4220 - Endocrinology

Credits: (4)

Typically Taught Fall Semester: *Full Sem, alternating years*

The comparative study of the function of the cells, tissues, glands, and organs that secrete hormones and how these hormones affect the physiology of organisms, from invertebrates to vertebrates.

Three lecture hours and one 3-hour lab a week.

Pre-requisite(s): ZOOL 1110 and ZOOL 2220, and either ZOOL 2200 or ZOOL 3600, or approval of instructor.

ZOOL 4250 - Radiation Biology

Credits: (4)

The study of harmful effects of radiation and practical applications of radioactive tracer techniques to biological problems.

Three lecture hours and one 3-hour lab a week.

Pre-requisite(s): ZOOL 1110, ZOOL 2220, and beginning courses in chemistry and physics, or approval of instructor.

Note: This course is not currently offered.

ZOOL 4300 - Research Applications in Genetics

Credits: (4)

Typically Taught Spring Semester: *Full Sem*

The techniques of genetics are essential to all areas of biological research, from human biology and medicine, to ecology, population structure and diversification. This course examines the applications of genetics to a variety of topics, including medicine, forensics, wildlife management and ecology. Laboratory exercises provide hands-on experience with generating, analyzing and interpreting genetic data.

Three lecture/lab hours and one 3-hour lab per week.

Pre-requisite(s): ZOOL 1110, ZOOL 2220, and ZOOL 3300, or permission of instructor.

ZOOL 4350 - Animal Behavior

Credits: (4)

Typically Taught Fall Semester: *Full Sem, alternating years*

All animals are motivated to acquire food, avoid predators and parasites, find and secure mates, select habitat, communicate with other animals, and move through their environment. This course is centered on the concepts that underlie such behaviors in nature, with a strong emphasis on both the ecological context and the evolutionary history that has produced them. The primary focus of the lab is on the development and completion of an original, semester-long research project. Three hours of lecture and three hours of lab per week.

Pre-requisite(s): ZOOL 1110 and ZOOL 2220, or approval of instructor.

ZOOL 4470 - Wildlife Ecology and Management

Credits: (4)

Typically Taught Fall Semester: *Full Sem, alternating years*

Principles of wildlife ecology and the techniques of wildlife population analysis and manipulation.

Three lecture hours and one 3-hour lab a week.

Pre-requisite(s): ZOOL 1110, ZOOL 2220, and ZOOL 3450, or approval of instructor.

Writing intensive course.

ZOOL 4480 - Aquatic Ecology

Credits: (4)

Typically Taught Fall Semester: *Full Sem, alternating years*

Study of the physical, chemical, and biological interactions of freshwater ecosystems with emphasis on streams. Field trips required. Three hours of lecture and three hours of lab per week.

Pre-requisite(s): ZOOL 1110 and ZOOL 2220, or approval of instructor.

Writing intensive course.

ZOOL 4490 - Marine Ecology

Credits: (4)

Typically Taught Spring Semester: *Full Sem*

This course will examine the physical, chemical, and biological interactions within and among marine ecosystems. Topics covered will include: physical and biological oceanography, ecological processes driving the distribution and abundance of marine organisms, and exploration of major marine communities. Emphasis will be placed on reading primary scientific literature and discussion of human impacts such as pollution, overfishing, and climate change on all aspects of marine ecosystems.

This course is a mixed lecture-lab design with six hours of lecture/lab per week.

Pre-requisite(s): ZOOL 1110 and ZOOL 2220 or approval of instructor. ZOOL 3450 recommended.

ZOOL 4500 - Parasitology

Credits: (4)

Course Fee: \$25.00

Survey of representative external and internal parasites of humans, domestic animals, and wildlife. Emphasis is on their ecology and epidemiology.

Three lecture hours and one 3-hour lab a week.

Pre-requisite(s): ZOOL 1110 and ZOOL 2220, or approval of instructor.

Note: This course is not currently offered.

ZOOL 4570 - Secondary School Science Teaching Methods

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Acquaintance and practice with various teaching and assessment methods. Development of science curricula including lesson and unit plans. It is recommended that this course be completed immediately before student teaching.

Pre-requisite(s): Admission to the Teacher Education Program.

Cross-listed with BTNY, CHEM, GEO, MICR, & PHYS 4570.

ZOOL 4600 - Protozoology

Credits: (4)

Structure, function and evolutionary relationships of unicellular organisms.

Three lecture hours and one 3-hour lab a week.

Pre-requisite(s): ZOOL 1110 and ZOOL 2220, or approval of instructor.

Note: This course is not currently offered.

ZOOL 4640 - Entomology

Credits: (4)

Typically Taught Summer Semester: *Full Sem*

Insects are the dominant animal group in terrestrial ecosystems and account for over half of all described species of organisms. This course provides an overview of insect anatomy, physiology, ecology and evolution. It also emphasizes the taxonomy of insects at the order and family

levels and examines their role in natural systems, as well as their harmful and beneficial effects on agriculture and human health. The field-oriented lab focuses on the collection and curation of local insect specimens. Three hours of lecture and three hours of lab per week.

Pre-requisite(s): ZOO 1110 and ZOO 2220, or approval of instructor.

ZOO 4650 - Ichthyology

Credits: (4)

Typically Taught Spring Semester: *Full Sem, alternating years*

Classification, ecology and biology of fishes and emphasis on local freshwater forms. Field trips required.

Three lecture hours and one 3-hour lab a week.

Pre-requisite(s): ZOO 1110 and ZOO 2220, or approval of instructor.

ZOO 4660 - Herpetology

Credits: (4)

Typically Taught Fall Semester: *Full Sem, alternating years*

Structure, function and evolutionary relationships of amphibians and reptiles.

Three lecture hours and one 3-hour lab a week.

Pre-requisite(s): ZOO 1110 and ZOO 2220, or approval of instructor.

ZOO 4670 - Ornithology

Credits: (4)

Typically Taught Spring Semester: *Full Sem, alternating years*

The biology of birds including form, function, behavior and ecology. Lab emphasizes identification of Utah species.

Three lecture hours and one 3-hour lab or a field trip each week.

Pre-requisite(s): ZOO 1110 and ZOO 2220, or approval of instructor.

ZOO 4680 - Mammalogy

Credits: (4)

Typically Taught Spring Semester: *Full Sem, alternating years*

An overview of mammalian anatomy, behavior, conservation, ecology, evolution, physiology, and taxonomy. Three hours of lecture and three hours of lab per week.

Pre-requisite(s): ZOO 1110 and ZOO 2220, or approval of instructor.

ZOO 4700 - Topics in Zoology

Credits: (1-4)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

New and experimental courses, taught infrequently; may be taught with a laboratory section. Check current semester schedule. Specific title and credit hours will appear on the student transcript.

Pre-requisite(s): ZOO 1110 and ZOO 2220, or approval of instructor.

ZOO 4800 - Problems in Zoology

Credits: (1-4)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Directed individual research in zoology guided by faculty member. Specific requirements determined in consultation with faculty member.

Pre-requisite(s): ZOO 1110 and ZOO 2220, and approval of instructor.

May be repeated up to 8 credit hours for university credit.

ZOO 4820 - Human Physiology Laboratory Teaching Assistant

Credits: (1)

Typically Taught Summer Semester: *1st Blk, 2nd Blk*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Students selected to be Laboratory Teaching Assistants (Lab TA) will help in the Human Physiology laboratories. Under the teacher's supervision, they (two teaching assistants per class) will address classes of up to 30 students. They will help set up the instruments, present background information, run the experiments and assess the student's learning by giving and grading short quizzes.

Pre-requisite(s): Students will need to have taken the Human Physiology class (ZOO 2200) and laboratory (ZOO 2200L) and obtained a minimum of a B+ in the class. Students will need to apply for one of the positions. Approval to be a Laboratory Teaching Assistant will be at the teacher's discretion.

May be repeated twice for a maximum of two credit hours.

ZOO 4830 - Readings in Zoology

Credits: (1-4)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Directed individual readings in the general area of zoology.

Specific topic selected in consultation with faculty member.

Pre-requisite(s): ZOOL 1110 and ZOOL 2220, and approval of instructor.

May be repeated up to 8 credit hours for university credit.

ZOOL 4890 INT - Cooperative Work Experience

Credits: (1-4)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Academic credit for employment in career area related to zoology guided by specific written contract design by student, employer, and Zoology Department Chair. Open to all students; requires approval by Department Chair.

May be repeated up to 12 credit hours for university credit.

ZOOL 4900 - Topics in Zoology

Credits: (1-4)

Variable Title

New and experimental courses, taught infrequently; may be taught with a laboratory section. Check current semester schedule. Specific title and credit hours will appear on the student transcript.

Pre-requisite(s): ZOOL 1110 and ZOOL 2220, or approval of instructor.

May be repeated up to 12 credit hours for university credit.

Note: Check with Department for course availability.

ZOOL 4920 - Short Courses, Workshops, Institutes and Special Programs

Credits: (1-4)

Variable Title

Consult class schedule for offerings under this number. The specific title and credit authorized will appear on the student transcript.

Pre-requisite(s): vary and are determined by instructor.

May be repeated for a maximum of 4 credit hours.

Note: This course is not currently offered.

ZOOL 4950 - Field Zoology

Credits: (1-3)

Study conducted on an extended, supervised field trip.

Pre-requisite(s): ZOOL 1110 and ZOOL 2220, or approval of instructor.

May be repeated for a maximum of 3 credit hours.

Note: Check with Department for course availability.

ZOOL 4970 - Thesis

Credits: (2)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

An extended, individual research project planned and completed under faculty supervision. Normally, two semesters of research (ZOOL 4800) will precede registration for this course. Culmination is an oral and written report of results obtained, with the final draft of the latter being due two weeks prior to the beginning of final exam week. Instructor approval required.

Pre-requisite(s): thesis committee approved research proposal, advanced class standing, and ZOOL 1110 and ZOOL 2220.

ZOOL 4980 - Research Design

Credits: (2)

A basic course in the design and analysis of scientific experiments.

Two lecture hours a week.

Pre-requisite(s): minimum of two upper division Zoology courses.

Note: This course is not currently offered.

ZOOL 4990 - Seminar

Credits: (1)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Presentations and discussion concerning a specific topic in zoology. One semester required. May be repeated to fulfill one additional credit of Zoology elective hours if taken beyond the one credit hour required for the major. One hour a week.

Pre-requisite(s): ZOOL 1110 and ZOOL 2220, or approval of instructor.

May be repeated up to 3 credit hours for university credit.

ZOOL 5030G - Zoology for Teachers

Credits: (1-4)

Science content course for teachers in the MEd Science

Emphasis Program. To register, select another Zoology course and develop a contract detailing additional work required for graduating credit. Contract must be approved by instructor, Department Chair, and Director of the Master of Education Program.

Course may be repeated 3 times up to 4 credits.

Note: This course is not currently offered.

Experimental Course Titles for 2021-22

The following experimental courses may be taught during the 2021-22 catalog year at the discretion of the department. Contact the department with any questions regarding when experimental courses may be offered, repeat policies, and appropriate pre-requisites.

MATH 0810 - Math Preparation and Practice
Credits: (1)

MATH 1810 - Co-requisite Contemporary Math
Credits: (6)

MATH 1810 - Integral Calculus **Credits: (4)**

MFET 1810 - Manufacturing Electronics **Credits:**
(4)

MUSC 1810 - Weber State Vocal Jazz **Credits:**
(3)
