Credits: (3)
**Variable Title**

**Description:** This seminar explores major texts of one particular American era. The course focuses on literature which articulates the selected period.

This variable emphasis course may be repeated 10 times for credit with different content.

**MENG 6250 - Seminar in British Literature**

Credits: (3)
**Variable Title**

**Description:** This seminar explores major texts of one particular British era. This course focuses on the literature which articulates the selected period. This variable emphasis course may be repeated 3 times up to 6 credit hours with different subject matter.

This course may be repeated four times for a maximum of 12 credit hours.

**MENG 6260 - Seminar in World Literature**

Credits: (3)
**Variable Title**

**Description:** This seminar explores literature other than American or British. The course focuses on the literature
which articulates the selected time and place. This variable emphasis course may be repeated 10 times for credit with different subject matter.

**MENG 6280 - TESOL Practicum**

**Credits:** (1)

**Description:** TESOL practicum provides guided and supported experience in one or more of the following: tutorial, small group teaching, whole class lesson planning. Candidates will practice a variety of instructional modes for speaking, reading and writing.

Note: Instructor permission is required for registration.

**MENG 6310 - Language and Sociolinguistics for Teachers**

**Credits:** (3)

**Typically Taught Fall Semester:** Full Sem

**Typically Taught Spring Semester:** Full Sem

**Description:** Designed primarily for in-service teachers, this course explores recent research in linguistics and sociolinguistics, and applies it to issues in the classroom.

**MENG 6320 - World Languages**

**Credits:** (3)

**Description:** This course broadens students' awareness of diversity among the world's languages, thereby fostering understanding and appreciation of the nature of human language in general. Issues may include language obsolescence and maintenance, writing systems of the world, prosody and poetic forms in other languages, language history, and language families. Some prior experience in linguistics or language structures will be helpful as students study profiles of selected languages representing major language families of the world and various geographical areas.

**MENG 6330 - Literary and Rhetorical Stylistics**

**Credits:** (3)

**Description:** This course surveys the literature on style in linguistics, literature, and rhetoric. Some prior background in grammar will be useful as students engage in quantitative and qualitative stylistic analysis of texts from a literary period, genre, or particular author and learn how diction, syntax, and figurative language can be deployed to communicative and artistic ends.

**MENG 6410 - Strategies and Methodology of Teaching ESL/Bilingual**

**Credits:** (3)

**Typically Taught Summer Semester:** 2nd Blk, Odd Years

**Typically Taught Spring Semester:** Full Sem

**Description:** This course emphasizes practical strategies and methods of teaching English as a Second Language in elementary and secondary schools.

**MENG 6420 - English Phonology and Syntax for ESL/Bilingual Teachers**

**Credits:** (3)

**Typically Taught Summer Semester:** 2nd Blk

**Typically Taught Fall Semester:** Full Sem, Odd Years

**Description:** This course provides the foundation for ESL/Bilingual teachers in the workings of the English language: its pronunciation and spelling systems, its word-forming strategies, and its sentence structure patterns.

**MENG 6450 - ESL/Bilingual Assessment: Theory, Methods, and Practices**

**Credits:** (3)

**Typically Taught Summer Semester:** 2nd Blk, Even Years

**Typically Taught Fall Semester:** Full Sem

**Description:** This course explores how to evaluate and implement assessment processes effectively for ESL/Bilingual pupils in public schools. Students will gain experience with both standardized test and authentic assessment.

**MENG 6510 - Seminar in Eminent Writers:**

**Credits:** (2-3)

**Variable Title**

**Description:** This seminar examines significant works of and relevant criticism on an influential writer or a small group of writers.

This variable emphasis course may be repeated 10 times for credit with different subject matter.

**MENG 6520 - Seminar in Shakespeare**

**Credits:** (3)

**Typically Taught Summer Semester:** 1st Blk, Even Years
**Description:** This seminar examines a range of Shakespeare's major works as well as relevant criticism.

**MENG 6610 - Advanced Studies in Genre**

**Credits:** (2-3)
**Variable Title**
**Description:** Students will analyze primary and secondary texts about one genre or sub-genre to develop a definition and understanding of the form.
This variable emphasis course may be repeated 10 times for credit with different subject matter.

**MENG 6710 - Variable Topics**

**Credits:** (2-3)
**Variable Title**
**Description:** Topics will vary based on student interest and instructor expertise.
This course may be repeated 10 times for credit with different subject matter.

**MENG 6730 - Creative Writing Forms and Crafts**

**Credits:** (3)
**Variable Title**
**Typically Taught Fall Semester:** Full Sem
**Description:** This course will investigate the relationship of form and function in creative work and explore how the underlying structure affects the impact of the work. This course will examine a variety of work to examine the effect of formal choices on readers' response. The course will then put these strategies and insights to work by drafting, workshopping, and revising students' own original writing.
May be repeated 2 times and up to 9 credit hours.

**MENG 6740 - Creative Nonfiction Writing**

**Credits:** (3)
**Variable Title**
**Typically Taught Spring Semester:** Full Sem
**Description:** In this course, students will study the art and craft of writing creative nonfiction. Along with writing their own original work, students will read a variety of contemporary texts and will critique their peers' writing.
May be repeated 2 times and up to 9 credit hours.

**MENG 6750 - Fiction Writing**

**Credits:** (3)
**Variable Title**
**Typically Taught Spring Semester:** Full Sem
**Description:** In this course, students will study the art and craft of writing fiction. Along with writing their own original work, students will read a variety of contemporary texts and will critique their peers' writing.
May be repeated 2 times and up to 9 credit hours.

**MENG 6760 - Poetry Writing**

**Credits:** (3)
**Variable Title**
**Typically Taught Spring Semester:** Full Sem
**Description:** In this course, students will study the art and craft of writing poetry. Along with writing their own original work, students will read a variety of contemporary texts and will critique their peers' writing.
May be repeated 2 times and up to 9 credit hours.

**MENG 6770 - Screenwriting**

**Credits:** (3)
**Variable Title**
**Typically Taught Spring Semester:** Full Sem
**Description:** This course provides advanced study and practice in the craft of screenwriting. Students will analyze screenplays, read and discuss craft advice from professional screen writers, watch films and compare script to screen, complete exercises on craft theory, and practice the craft by writing scenes and short scripts. The course will also provide context in terms of current issues in the screenwriting industry.

**MENG 6810 - Experimental Course**

**Credits:** (1-6)
**Experimental**
**Description:** Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript.
May be repeated for a total maximum of 6 credit hours.

**MENG 6821 - Teaching Developmental Reading and Writing**

**Credits:** (2)
**Description:** This course introduces first-time teachers to the theory and practice of teaching developmental reading and writing.
Note: Permission of instructor required to register.

**MENG 6822 - Teaching College Writing**
Credits: (2)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: This course introduces first-time teachers to the theory and practice of teaching college writing.
Note: Permission of instructor required to register.

MENG 6823 - Teaching Practicum

Credits: (1)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: This course supports teachers in their second semester of teaching college writing. Students will meet regularly to develop teaching strategies, enhance grading skills, resolve problems that have arisen in their classes, and plan strategies and procedures for classes they are teaching.
Note: Permission of instructor required to register.

MENG 6830 - Directed Readings

Credits: (1-3)
Description: This course allows students credit for individual study with a professor, usually for further study that grows out of course work. The student and professor agree to a written contract for study which must be approved by the program director. No more than 3 credit hours of directed readings may apply toward the MA degree unless approved by the program director. This course is designed to allow students to explore in depth and/or breadth, subject matter which goes beyond the established courses in the Master's Degree Program. May be repeated 3 times with a maximum of 9 credit hours.

MENG 6861 - Practicum in Secondary English Education

Credits: (2)
Description: This course provides a broad, practical background in teaching young adult (YA) literature for MENG students seeking secondary school licensure. Selection, evaluation, curriculum planning, and assessment in teaching literature will receive primary emphasis. Issues concerning community values and censorship will also receive our attention.
Pre-requisite(s): EDUC 6050 Curriculum Design, Evaluation, Assessment (3) must be taken prior to MED 6120/6861. We strongly recommend that MENG 6110 Writing for Teachers (3) or MENG 6230 Wasatch Range Writing Project Summer Institutes (3) be taken prior to MENG 6120/6861. MENG 6120 and MENG 6861 must be taken concurrently.

MENG 6920 - Short Courses, Workshops, Institutes, and Special Programs

Credits: (1-6)
Workshop
Description: Consult the semester class schedule for the current offering under this number. The specific title with the credit authorized for the particular offering will appear on the student transcript.
May be repeated for a total maximum of 6 credit hours.

MENG 6940 - Masters Project

Credits: (2-6)
Description: This course provides for the creation and execution of a project growing out of graduate study particularly as it applies to the workplace. Project credit may be taken in increments of 1-3 hours in any term.
May be repeated twice up to 6 credits.

MENG 6950 - Creative Writing Thesis: Fiction, Nonfiction, Poetry

Credits: (1-6)
Description: The course is designed as a rigorous academic and professional mentorship for students who intend to produce a MA thesis in creative writing. The thesis will include a manuscript of original writing with a critical foreword, both of which require extensive research and substantial writing on the thesis topic. The manuscript can be a creative response to literary works or original creative poetry, fiction, and/or nonfiction. The critical introduction will situate the creative component within the literary, historical, and/or theoretical context(s) of the creative component. Minimum of 3 hours required, with a possible maximum of 6 hours with approval.
Pre-requisite(s): MENG 6730 - Creative Writing Forms and Crafts (3), must complete at least two workshops (6 Credits), MENG 6740 - Creative Nonfiction Writing (3)*, MENG 6750 - Fiction Writing (3)*, MENG 6760 - Poetry Writing (3)*. *Repeated with different titles.
May be repeated three times for a maximum of six credit hours.

MENG 6960 - Thesis

Credits: (1-6)
Description: Thesis credit may be taken in increments of
1-3 hours in any term. The thesis is a capstone writing course for the Master's Degree Program. May be repeated 5 times with a maximum of 6 credit hours.

**MENG 6990 - Extension of Thesis/Project**

Credits: (1)
Description: This course allows students to continue to work on their thesis/project. The course is graded credit/no credit. May be repeated up to two times for a maximum of two credit hours.

**MET 1000 - Introduction to Mechanical Engineering Technology**

Credits: (3)
Typically Taught Fall Semester: Full Sem
Course Fee: $30.00
Course Fee Purpose: Course fees are used to cover materials needed to complete the semester project and to replace small tools in the Freshman Project Lab as needed.
Description: Introductory course for students majoring in mechanical engineering technology. The role of mechanical engineering technology and its place in the occupational spectrum. The experimental and analytical tools used in mechanical engineering technology and fundamentals of mechanical design and problem solving. College algebra and trigonometry strongly recommended.
Pre-requisite(s): MATH 1010 or Math ACT score of 23 or higher or placement test.

**MET 1500 - Mechanical Design for Engineering Technology**

Credits: (3)
Typically Taught Spring Semester: Full Sem
Description: This course will focus on understanding the engineering design process within the MET discipline. Students will develop problem statements and use brainstorming techniques to generate design concepts. These design concepts are evaluated and implemented for possible solutions to bring a factious engineered product to market.
Pre-requisite(s): (MATH 1060 or MATH 1080) and MET 1000.

**MET 1890 INT - Cooperative Work Experience**

Credits: (1-3)
Description: Provides academic credit for on-the-job experience. Grade and amount of credit will be determined by the department. Prior consent of the department chair and the employer are required.
Pre-requisite(s): PDD 1010, MATH 1080 and Permission of Instructor.

**MET 2500 - Modern Engineering Technologies**

Credits: (3)
Typically Taught Spring Semester: Full Sem
Description: A survey of modern engineering technologies including, but not necessarily limited to, energy generation, nano systems, smart materials, robotics, lasers, transportation systems, and bioengineering.
Pre-requisite(s): MET 1500.

**MET 2890 INT - Cooperative Work Experience**

Credits: (1-3)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Provides academic credit for on-the-job experience. Grade and amount of credit will be determined by the department. Prior consent of the department chair and the employer are required. May be repeated for credit up to 3 times for a max of 3 credit hours total.
Pre-requisite(s): Credit or concurrent enrollment in MFET 2300.

**MET 3050 - Dynamics for Engineering Technology**

Credits: (3)
Typically Taught Fall Semester: Full Sem
Description: Fundamentals of force, mass and acceleration, work and energy, and impulse and momentum applied to particles and rigid bodies.
Pre-requisite(s): MATH 1210 and PHYS 2210 and (MFET 2300 or MFET 2310).

**MET 3150 - Engineering Technology Materials**

Credits: (3)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Material properties, processing and selection
of materials for technological applications. Design parameters for material selection of metals and nonmetals. Mechanical behavior and service failures of metallic alloys and other engineering materials at high and low temperatures. Lecture plus laboratory work in materials testing.

Pre-requisite(s): CHEM 1110 and (MFET 2300 or MFET 2320).

MET 3300 - Computer Programming
Applications of Mechanical Engineering Technology

Credits: (3)
Typically Taught Fall Semester: Full Sem
Description: Applications of computer programming and computer software to problems in mechanical engineering technology. Lecture plus computer-based laboratory work.
Pre-requisite(s): MFET 2300 or MFET 2310.

MET 3400 - Machine Design for Engineering Technology

Credits: (3)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Application of engineering technology fundamentals to machine design. Techniques involved in designing and selecting individual machine parts.
Pre-requisite(s): MFET 2300 or MFET 2320.

MET 3500 - Mechanical Measurements and Instrumentation

Credits: (3)
Typically Taught Fall Semester: Full Sem
Description: Principles of temperature, pressure, strain, flow, force, and vibration measurements. Techniques of computerized data acquisition and reduction. Students will learn how to specify instrumentation systems, take data and interpret the results. Lecture plus laboratory work in selected topics.
Pre-requisite(s): EET 1850 and (MFET 2300 or MFET 2310).

MET 3700 - Testing and Failure Analysis

Credits: (3)
Typically Taught Fall Semester: Full Sem
Description: Mechanical testing of materials, fatigue, fracture, wear, corrosion, embrittlement, failure mechanisms and analysis, case studies of failures. Lecture plus laboratory work.
Pre-requisite(s): MET 3150 and (MFET 2300 or MFET 2320).

MET 3890 INT - Cooperative Work Experience

Credits: (1-3)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Provides academic credit for on-the-job experience. Grade and amount of credit will be determined by the department. Prior consent of the department chair and the employer are required. May be repeated for credit up to 3 times for a max of 3 credit hours total.
Pre-requisite(s): Credit or concurrent enrollment in MET 3400.

MET 4200 - Mechanical Design with FEA

Credits: (3)
Description: Application of engineering technology fundamentals in mechanical design using Finite Element Analysis. Lecture plus computer-based laboratory work.
Pre-requisite(s): MET 3400 and (MFET 2300 or MFET 2320).

MET 4300 - Heating, Ventilating & Air Conditioning

Credits: (3)
Description: Principles of heating, ventilating and air conditioning of buildings. Refrigeration systems, air and water distribution and solar energy. Indoor thermal environmental control.
Pre-requisite(s): Permission of instructor.

MET 4500 SUS - Senior Project I

Credits: (3)
Typically Taught Fall Semester: Full Sem
Description: A mechanical engineering technology project will be selected for team participation. Projects will require planning, analysis, design, development, production, testing, and documentation.
Pre-requisite(s): MET 3400; AAS or AS Degree.

MET 4510 SUS - Senior Project II

1596
Credits: (3)  
Typically Taught Spring Semester: Full Sem  
Description: A mechanical engineering technology project will be selected for team participation. Projects will require planning, analysis, design, development, production, testing and documentation.  
Pre-requisite(s): MET 4500.  
Note: MET 4500 and MET 4510 are a two-course sequence, with MET 4500 only taught in fall semester and MET 4510 only taught in spring semester. The courses must be taken back-to-back.

MET 4650 - Thermal Science  
Credits: (3)  
Typically Taught Spring Semester: Full Sem  
Description: Fundamental principles of thermal science for mechanical engineering technology. Basic thermal science theory with an emphasis on technological applications and systems. Lecture plus laboratory work in selected thermal science topics.  
Pre-requisite(s): MATH 1210, PHYS 2210 and CHEM 1110 or CHEM 1210.

MET 4800 - Individual Research in Mechanical Engineering Technology  
Credits: (1-3)  
Typically Taught Fall Semester: Full Sem  
Typically Taught Spring Semester: Full Sem  
Description: Special individual research and development projects in mechanical engineering technology. Credit and time determined by the student and the faculty project supervisor. May be repeated for credit up to 3 times for a max of 3 credit hours total.  
Pre-requisite(s): Permission of instructor.

MET 4830 - Directed Readings  
Credits: (1-3)  
Typically Taught Fall Semester: Full Sem  
Typically Taught Spring Semester: Full Sem  
Description: Directed individual readings in mechanical engineering technology. Topic selected in consultation with instructor.  
Pre-requisite(s): Permission of instructor.

MET 4890 INT - Cooperative Work Experience  
Credits: (1-3)  
Typically Taught Spring Semester: Full Sem  
Description: Provides academic credit for on-the-job experience. Grade and amount of credit will be determined by the department. Prior consent of the department chair and the employer are required. May be repeated for credit up to 3 times for a max of 3 credit hours total.  
Pre-requisite(s): MET 3400 and Permission of instructor.

MET 4920 - Short Courses, Workshops, Institutes, and Special Programs  
Credits: (1-6)  
Workshop  
Description: Consult the semester class schedule for the current offering under this number. The specific title with the credit authorized for the particular offering will appear on the student transcript. May be repeated for a total maximum of 6 credit hours.

MET 4990 - Seminar in Mechanical Engineering Technology  
Credits: (1)  
Typically Taught Spring Semester: Full Sem  
Description: Guest lectures from local industry, professionalism and engineering ethics, technology and society, and employment preparation.  
Pre-requisite(s): MET 4500.

MFET 1000 - Manufacturing Engineering Technology Fundamentals  
Credits: (3)  
Typically Taught Fall Semester: Full Sem  
Typically Taught Spring Semester: Full Sem  
Course Fee: $65.00  
Course Fee Purpose: Lab related consumables and maintenance of laboratory equipment.  
Description: This is an introductory course for students interested in majoring in Manufacturing Engineering Technology. Students will be exposed to Manufacturing Engineering Technology through several hands-on laboratory experiences that introduce them to concepts needed for future classes. Students will gain a clear understanding of degree requirements and possible career paths.

MFET 1150 - Pre-Professional Seminar in Manufacturing
MFET 1210 - Machining Principles
Lecture/Lab I

Credits: (3)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Course Fee: $45.00
Course Fee Purpose: Consumables (aluminum, steel, tools), paper, lab support, computers, software licenses, lab equipment
Description: Introduction to machining processes through theory and practice including: setup and operation of the engine lathe & milling machine, machine and tool performance, inspection techniques, basic blueprint reading, and process planning. Students will utilize lab time to complete assignments as required.
One lecture per week and two 3-hour labs per week are required.

MFET 1810 - Experimental Course

Credits: (1-6)
Experimental
Description: Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript. May be repeated for a total maximum of 6 credit hours.

MFET 1820 - Manufacturing Electricity and Electronics

Credits: (4)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Introduction to basic electrical and electronic principles and the application of these principles to AC and DC circuits. The course will give students the foundation for required manufacturing courses in welding power supplies, motor controls and automation. An integrated hands-on lab will reinforce concepts taught in the classroom
Pre-requisite(s): MATH 1010 or QL.

MFET 1890 INT - Cooperative Work Experience

Credits: (1-3)
Typically Taught Fall Semester: Full Sem
Description: Open to all first year students in Manufacturing Engineering Technology. Department approval required before registration. Provides academic credit for on-the-job experience. Grade and amount of credit will be determined by the department.

MFET 2150 - Metal Forming, Casting and Welding

Credits: (2)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Course Fee: $10.00
Course Fee Purpose: Paper, lab support, computers, software licenses, lab equipment
Description: Introduction to industrial metal forming, casting and welding processes, equipment selection, design criteria, shop procedures and terminology.
Two one-hour lectures per week and one two-hour lab
Co-Requisite(s): MFET 2150L. (MFET 2150L) is required.

MFET 2150L - Metal Forming, Casting & Welding Lab

Credits: (1)
Typically Taught Fall Semester: Full Sem
Course Fee: $75.00
Course Fee Purpose: Paper, lab support, shop supplies for casting/welding/sheet metal
Description: Lab application of theories taught in MFET 2150 by use of student projects.
Co-Requisite(s): MFET 2150.

MFET 2151 - Metal Forming Lecture/Lab

Credits: (1)
Typically Taught Fall Semester: Full Sem
Course Fee: $25.00
Course Fee Purpose: Paper, lab support, shop supplies for casting/welding/sheet metal
Description: Introduction to industrial metal forming processes, equipment selection, design criteria, shop procedures and terminology.
Pre-requisite(s): Instructor Approval.

MFET 2152 - Metal Casting Lecture/Lab
MFET 2153 - Metal Welding Lecture/Lab

Credits: (1)
Typically Taught Fall Semester: Full Sem
Course Fee: $25.00
Course Fee Purpose: Paper, lab support, shop supplies for casting/welding/sheet metal

Description: Introduction to industrial metal casting processes, equipment selection, design criteria, shop procedures and terminology.

Pre-requisite(s): Instructor Approval.

MFET 2300 - Statics and Strength of Materials

Credits: (5)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem

Description: Principles of forces, moments, resultants & static equilibrium of force systems, center of gravity, friction, and free body diagram analysis. Also concept of stress and strain, shear, bending moments, torsion, bending stresses in beams and stress resolution and shear.

Five lectures per week.

Pre-requisite(s): PHYS 2010/L or PHYS 2210/L; MATH 1060 or MATH 1080 or MATH 1210.

MFET 2310 - Statics for Engineering Technology

Credits: (3)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem

Course Fee: $15.00

Course Fee Purpose: Course fees support computer lab aids, lab computers, and software licensing in the computer labs.

Description: Topics include: Principles of forces, moments, resultants & static equilibrium of force systems, center of gravity, friction, and free body diagram analysis.

Pre-requisite(s): MATH 1080 or MATH 1050 and MATH 1060.

MFET 2320 - Mechanics of Materials

Credits: (3)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem

Course Fee: $15.00

Course Fee Purpose: Course fees support computer lab aids, lab computers, and software licensing in the computer labs.

Description: Topics include: Principles of stress and strain, shear, bending moments, torsion, and bending stresses in beams.

Pre-requisite(s): MFET 2310.

MFET 2360 - Manufacturing Processes and Materials

Credits: (3)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem

Course Fee: $25.00

Course Fee Purpose: Paper, lab support, computers, software licenses, lab equipment

Description: Survey of industrially important processes used to change material shape and condition for industrial use. Survey of industrially important materials and the principles of material behavior.

MFET 2410 - Quality Concepts and Statistical Applications

Credits: (3)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem

Course Fee: $40.00

Course Fee Purpose: Paper, lab support, consumables, instructor supplies, simulation materials, computers, software licenses, lab equipment

Description: This is the first course in a series of three designed to impart the Six Sigma body of knowledge. It integrates managerial, technological and statistical concepts across all functions of an organization to ensure that a product is fit for use. Provides a foundation in current quality paradigms and introduces students to software tools (MS Excel and Minitab) used to statistically analyze problems encountered in manufacturing firms.

Three lectures per week.

Pre-requisite(s): MATH 1010 or Aleks (score: 30 or above).
MFET 2440 - Computer Numeric Control (CNC) in Manufacturing

Credits: (2)
Typically Taught Spring Semester: Full Sem
Course Fee: $25.00
Course Fee Purpose: Paper, lab support, computers, software licenses, lab equipment
Description: This course is designed for those who have little or no experience with CNC programming, setup or operations. Manual programming, APT programming, and Mazatrol (a conversational programming language) will be taught. In addition, an introduction to CAD/CAM will also be discussed. A three-hour lab, once a week is required.
Pre-requisite(s): MATH 1080 or MATH 1050 and MATH 1060; MFET 1210.
Co-Requisite(s): MFET 2440L. May be repeated 3 times up to 6 credit hours.

MFET 2440L - CNC in Manufacturing Lab

Credits: (1)
Course Fee: $25.00
Course Fee Purpose: Paper, lab support, computers, software licenses, lab equipment
Description: Applications of the theory taught in MFET 2440. Introduction to the setup & operation of the CNC lathe and mill. One 3-hour lab per week.
Co-Requisite(s): MFET 2440.

MFET 2500 - Process Automation I

Credits: (1)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Course Fee: $25.00
Course Fee Purpose: Computer lab refurbishment, software, lab aide
Description: A study of the elements used in manufacturing automation and control technologies including: basic elements of an automated system, cost benefit analysis, programmable logic controllers, robotics (servo and non-servo), material handling devices and automated inspection technologies. One 50 minute lecture per week.
Pre-requisite(s): EET 1850.
Co-Requisite(s): MFET 2510.

MFET 2510 - Process Automation I Lab

Credits: (2)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Course Fee: $75.00
Course Fee Purpose: Automation equipment and consumables
Description: Students duplicate demonstration sequences of automation equipment and develop new routines in: Controlling servo and non-servo robots, computer-aided manufacturing systems, programmable logic controllers, and other devices used in process automation. Labs will include additional lectures.
Pre-requisite(s): EET 1850.
Co-Requisite(s): MFET 2500.

MFET 2550 - Basics of Quality Engineering

Credits: (2)
Description: Approaches quality from the perspective of the production technician using applied statistics, total quality concepts, inspection techniques and methods and nonconforming material control. Addresses sampling principles used in production management as well as a review of industry accepted standards. (ASQC Series) Note: This course is offered in the evenings only.

MFET 2610 - Quality Improvement Principles and Techniques

Credits: (2)
Description: This course assesses vital knowledge of quality tools and their uses by individuals, from non-traditional quality areas, who are involved in quality improvement projects. The course examines the rapid spread of quality principles and practices throughout organizations, and covers the essentials of quality management for individuals who manage quality programs, but who are not necessarily specialized in traditional quality areas. The course prepares students for the Certified Quality Improvement Associate examination administered by the American Society for Quality.

MFET 2670 - GMA, FCA and GTA Welding

Credits: (1)
Typically Taught Spring Semester: Full Sem
Course Fee: $25.00
Course Fee Purpose: Paper, lab support, computers, software licenses, lab equipment
Description: Theory and skills course covering Gas Metal
Arc Welding, Flux Core Arc Welding, and Gas Tungsten Arc Welding.

**Pre-requisite(s):** MFET 2150/MFET 2150L or MFET 2153.

**Co-Requisite(s):** MFET 2670L.

**MFET 2670L - GMA, FCA and GTA Welding Lab**

**Credits:** (2)
**Typically Taught Spring Semester:** Full Sem
**Course Fee:** $75.00
**Course Fee Purpose:** Paper, lab support, computers, software licenses, lab equipment

**Description:** A "hands on" lab that reinforces the theory and skills course (MFET 2670) covering Gas Metal Arc Welding, Flux Core Arc Welding, and Gas Tungsten Arc Welding.

**Pre-requisite(s):** MFET 2150/MFET 2150L.

**Co-Requisite(s):** MFET 2670.

**MFET 2830 - Directed Readings in Manufacturing Engineering Technology**

**Credits:** (1-3)
**Typically Taught Fall Semester:** Full Sem
**Description:** Individual research on topics requested by industry or which meet special needs of Manufacturing Engineering Technology students.

**Pre-requisite(s):** Departmental approval.

**MFET 2850 - CNC/CAM for Plastics and Composites Lecture/Lab**

**Credits:** (3)
**Typically Taught Fall Semester:** Full Sem
**Course Fee:** $60.00
**Course Fee Purpose:** Plastic material, paper, lab support, computers, software licenses, lab equipment

**Description:** Traditional and nontraditional methods for machining organic-matrix and metal-matrix composites are reviewed. Traditional machining procedures are discussed together with the damage introduced into composites by these manipulations. Computer Numerical Control (CNC) codes and Computer Aided Manufacturing are covered, focusing on the production of plastic products and tooling. Machining concepts also including laser, water-jet, electro-discharge, electrochemical spark, and ultrasonic machining.

**Pre-requisite(s):** MFET 1210/L.

**MFET 2860 - Plastics/Composites Materials & Properties**

**Credits:** (3)
**Typically Taught Fall Semester:** Full Sem
**Course Fee:** $60.00
**Course Fee Purpose:** Plastic material, paper, lab support, computers, software licenses, lab equipment

**Description:** Coverage of the most common commercial plastics including their additives, fillers, and fibers; includes common physical tests used to determine material characteristics; writing intensive.

**Pre-requisite(s):** CHEM 1110.

**MFET 2870 - Design of Plastics/Composites Products**

**Credits:** (3)
**Typically Taught Spring Semester:** Full Sem

**Description:** Designing plastic parts utilizing CAD and CAE technologies for the design and for structural, dimensional, and process evaluation and optimization. A strong emphasis in design principles related to design of plastics products. Also analysis of functional requirements, structural properties, aesthetic qualities and cost relationships. The student will gain experience in product design and material evaluation.

**Pre-requisite(s):** PDD 1160 and MFET 2860.

**MFET 2890 INT - Cooperative Work Experience**

**Credits:** (1-3)
**Typically Taught Fall Semester:** Full Sem

**Description:** Open to all second year students in Manufacturing Engineering Technology. A continuation of MFET 1890.

**MFET 2920 - Short Courses, Workshops, Institutes, and Special Programs**

**Credits:** (1-6)

**Workshop**

**Description:** Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript.

**Pre-requisite(s):** Departmental approval.

May be repeated for a total maximum of 6 credit hours.
MFET 3010 - Tool Design

Credits: (3)
Description: Principles of workpiece control including: Geometric, dimensional, and mechanical control. Other topics include: process tolerance stacks, design of special tools and gauges, applications in the production of manufactured parts, tool drawings, specifications, and modular tooling.
Three lectures per week.
Pre-requisite(s): MFET 1210; PDD 1160.

MFET 3060 - Codes, Weld Inspection, and Quality Assurance

Credits: (3)
Typically Taught Fall Semester: Full Sem
Course Fee: $35.00
Course Fee Purpose: Computer lab fees and supplies used in the Lab portion of this course.
Description: Study of ASME and AWS codes as relating to procedure qualification and welder qualification for fabrication of pressure vessels and structures, and how codes relate to quality assurance and ISO 9000.
Pre-requisite(s): MFET 2150/MFET 2150L or MFET 2153.

MFET 3310 - Material Selection and Heat Treat

Credits: (2)
Description: Terminology, concepts and principles involved in the selection, specification and processing of engineering materials so they meet design criteria including load, life, and appearance. Testing methods to determine those properties and characteristics. Manual and computer assessing of material data.
Two lectures per week.
Pre-requisite(s): MFET 1210/L, MFET 2300, CHEM 1110.
Co-Requisite(s): MFET 3310L.

MFET 3310L - Material Selection and Heat treat Lab

Credits: (1)
Description: Application of theory taught in MFET 3310.
One 2-hour lab per week.
Co-Requisite(s): MFET 3310.

MFET 3320 - Machine Design

Credits: (2)
Description: Application of engineering fundamentals to the design of individual machine components such as shafts, couplings, springs, bearings, gears, fasteners, clutches, and breaks. Students will be required to complete a design project emphasizing manufacturing equipment.
Two lectures per week.
Pre-requisite(s): MFET 2300.

MFET 3340 - Applied Fluid Power

Credits: (2)
Typically Taught Fall Semester: Full Sem
Course Fee: $10.00
Course Fee Purpose: Paper, lab support, Hydraulic fluid, hydraulic lab components, computers, software licenses, lab equipment
Description: Principles of fluid mechanics and component operation as they apply to the design of hydraulic and pneumatic systems. Computer programs may be used to analyze and design systems. Two lectures per week.
Pre-requisite(s): MFET 2300 or MFET 2320 or ENGR 2140; PHYS 2010/L or PHYS 2210/L.
Co-Requisite(s): MFET 3340L.

MFET 3340L - Applied Fluid Power Lab

Credits: (1)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Course Fee: $30.00
Course Fee Purpose: Paper, lab support, Hydraulic fluid, hydraulic lab components, computers, software licenses, lab equipment
Description: Application of the theory taught in MFET 3340.
One 2-hr lab per week.
Co-Requisite(s): MFET 3340.

MFET 3350 - Plastic and Composite Manufacturing

Credits: (2)
Typically Taught Fall Semester: Full Sem
Course Fee: $10.00
Course Fee Purpose: Plastic material, paper, lab support, computers, software licenses, lab equipment
Description: Design and processing of plastic and composite materials for industrial applications.
Two lectures per week.
Pre-requisite(s): CHEM 1110 or CHEM 1210.
Co-Requisite(s): MFET 3350L.
MFET 3350L - Plastic and Composite Manufacturing Lab

Credits: (2)
Typically Taught Fall Semester: Full Sem
Course Fee: $60.00
Course Fee Purpose: Plastic material, paper, lab support, computers, software licenses, lab equipment
Description: Application of the theory taught in MFET 3350. Two 2-hr labs per week.
Pre-requisite/Co-requisite: MFET 3350.

MFET 3460 - Engineering Design using Solid Modeling

Credits: (2)
Typically Taught Fall Semester: Full Sem
Course Fee: $10.00
Course Fee Purpose: Paper, lab support, 3D print material, computers, software licenses, lab equipment
Description: An advanced computer-aided design course using state-of-the-art solid modeling CAD/CAM software. Topics include: 3D parametric solid modeling, applications associativity, design-by-feature, assembly modeling, injection mold design, flat pattern development, design analysis using FEA, realistic rendering, and detailing.
Pre-requisite(s): PDD 1010.
Co-Requisite(s): MFET 3460L.

MFET 3460L - Engineering Design using Solid Modeling Lab

Credits: (1)
Typically Taught Fall Semester: Full Sem
Course Fee: $15.00
Course Fee Purpose: Paper, lab support, 3D print material, computers, software licenses, lab equipment
Description: Lab assignments will include: Fundamentals of 3D parametric solid modeling, Extrude & Revolve Features, Sweep & Loft Features, Assembly Modeling, Injection Mold Design, Flat Pattern Development, Design Analysis using FEA, and others.
Pre-requisite(s): PDD 1010 and WEB 1700.
Co-Requisite(s): MFET 3460.

MFET 3510 - Basics of Supply Chain Management

Credits: (2)
Description: Introductory course for production and inventory management personnel which provides basic definitions and concepts for planning and controlling flow of materials into, through, and out of an organization. Explains fundamental relationships of supply chain from suppliers to customers. Addresses manufacturing systems, forecasting, master planning, material requirements planning, capacity management, production activity control, purchasing, inventory management, distribution, quality management, and Just-in-Time manufacturing. (APICS Series).
Note: This course is offered in the evenings only.

MFET 3550 - Manufacturing Supervision

Credits: (3)
Typically Taught Fall Semester: Full Sem Online
Typically Taught Spring Semester: Full Sem
Course Fee: $25.00
Course Fee Purpose: Paper, lab support, computers, software licenses, lab equipment
Description: The application of supervision skills. Students will gain an understanding of: motivation of subordinates, personal leadership theories, problem-solving and decision-making techniques, organizational communication, employee selection, evaluation and training process, and organizational structures. Topics will include: the American Disabilities Act, OSHA and environmental issues, Equal opportunity Employment, and Affirmative Action issues. Three lectures per week.
Pre-requisite(s): MFET 2410 (or MATH 1040).

MFET 3560 - Advanced Quality Engineering

Credits: (2)
Description: Addresses the application of advanced quality techniques by personnel in positions of responsibility such as manufacturing leads and supervisors. Uses statistics, metrology, inspection methods, quality management concepts, and sampling principles to address process decisions involving both overall quality and costs. (ASQC Series).
Pre-requisite(s): MFET 2550.
Note: This course is offered in the evenings only.

MFET 3570 - Manufacturing Quality Auditing

Credits: (2)
Description: Utilizes auditing principles and quality management tools and techniques to prepare an individual to plan and conduct, or prepare an organization, for a
quality audit. Links directly to process associated with implementation of ISO 9000 standards.
Two one-hour lectures per week. (ASQC Series).
Pre-requisite(s): MFET 2410 or equivalent.
Note: This course is offered in the evenings only.

**MFET 3580 - Certified Mechanical Inspector**

Credits: (2)
Description: Provides the student with terminology, concepts and tools needed to be professionally competent in advanced quality management. The course will also be helpful to those preparing to take the ASQC CMI Certification Exam. (ASQC Series).
Note: This course is offered in the evenings only.

**MFET 3610 - Machining Processes Lecture/Lab II**

Credits: (3)
Description: The manufacture and assembly of precision and interchangeable parts using conventional lathes, mills, drills, and grinders. Introduction to geometric dimensioning & tolerancing (GD&T), and advanced inspection techniques. Students will utilize lab time to complete assignments as required.
One lecture per week and two 3-hour labs per week are required.
Pre-requisite(s): MFET 1210.

**MFET 3620 - Senior Capstone Project Planning**

Credits: (.5)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: This course must be taken the semester prior to beginning the MFET senior project sequence of classes (MFET 4610, MFET 4610L and MFET 4620L). Capstone requirements will be discussed. Capstone projects will be selected and teams formed with faculty input.
Pre-requisite(s): Department Approval.

**MFET 3630 - Fusion Joining and Brazing Processes**

Credits: (2)
Typically Taught Fall Semester: Full Sem
Course Fee: $10.00
Course Fee Purpose: Paper, lab support, welding supplies, computers, software licenses, lab equipment
Description: Study of SAW, ESW, GMAW, EG, RW, PAW, PAC, Electron Beam, Laser, Friction, Brazing, and other welding processes.
Pre-requisite(s): MFET 2670/MFET 2670L.
Co-Requisite(s): MFET 3630L.

**MFET 3630L - Fusion Joining and Brazing Processes**

Credits: (1)
Typically Taught Fall Semester: Full Sem
Course Fee: $85.00
Course Fee Purpose: Paper, lab support, welding supplies, computers, software licenses, lab equipment
Description: A "hands-on" lab that reinforces the concepts taught in MFET 3630 of SAW, ESW, GMAW, EG, RW, PAW, PAC, Electron Beam, Laser, Friction, Brazing, and other welding processes.
Pre-requisite(s): MFET 2670/MFET 2670L.
Co-Requisite(s): MFET 3630.

**MFET 3650 - Quality Management Institute**

Credits: (3)
Description: This course consists of application process control and problem solving techniques including statistical process control (SPC), measurement systems analysis, and process capability analysis. Students will apply cause-and-effect diagrams, check sheets, sampling, line and bar charts, Pareto charts, scatter diagrams, variation, probability plots, x-R charts, gate repeatability and reproducibility (gage R & R) on course projects. Curriculum will include practical application exercises.
Pre-requisite(s): MFET 2410, MATH 1010 Intermediate Algebra or equivalent, and Basic Statistics course (MATH 1040) or equivalent.

**MFET 3710 - Computer Aided Manufacturing and Rapid Prototyping**

Credits: (2)
Typically Taught Spring Semester: Full Sem
Course Fee: $25.00
Course Fee Purpose: Paper, lab support, software licenses
Description: This course will introduce and explain concepts behind Computer-Automated Manufacturing (CAM). It will define elements, terms, and concepts involved with CAM. Elements of rapid prototyping will also be covered from conceptual design in solids to production of tooling and parts. This course is designed for
those who have the basic understanding of the setup and operation of CNC machine tools and programming. Software will be used to perform the CAM operations, such as part generation and post processing.

Pre-requisite(s): MFET 2440/MFET 2440L, PDD 1010, PDD 1160 or MFET 3460.

Co-Requisite(s): MFET 3710L.

**MFET 3710L - Computer Aided Manufacturing and Rapid Prototyping Lab**

Credits: (1)
Typically Taught Spring Semester: Full Sem
Course Fee: $35.00
Course Fee Purpose: Waterjet nozzles, steel, plastic shop consumables

Description: A "hands-on" lab that reinforces the concepts taught in MFET 3710. Students will learn how to transfer CNC part programs from a PC to the CNC machine controller. Testing, editing and running their part programs on the CNC machines will also be covered.

May be repeated twice up to 3 credit hours.

**MFET 3750 - Welding Metallurgy I**

Credits: (2)
Typically Taught Fall Semester: Full Sem
Course Fee: $10.00
Course Fee Purpose: Paper, lab support, software licenses

Description: Metallurgical principles applied to welding and weldability of ferrous metals.

Pre-requisite(s): MFET 2150/MFET 2150L or MFET 2153, CHEM 1110 or CHEM 1210.

Co-Requisite(s): MFET 3750L.

**MFET 3750L - Welding Metallurgy I Lab**

Credits: (1)
Typically Taught Fall Semester: Full Sem
Course Fee: $85.00

Description: A "hands-on" lab that reinforces the concepts taught in MFET 3750 of metallurgical principles applied to welding and weldability of ferrous metals.

Pre-requisite(s): MFET 2150/MFET 2150L, CHEM 1110.

Co-Requisite(s): MFET 3750.

**MFET 3760 - Welding Metallurgy II**

Credits: (2)
Typically Taught Spring Semester: Full Sem
Course Fee: $10.00
Course Fee Purpose: Paper, lab support, software licenses

Description: Metallurgical principles applied to welding and weldability of nonferrous metals.

Pre-requisite(s): MFET 3750/MFET 3750L.

Co-Requisite(s): MFET 3760L.

**MFET 3760L - Welding Metallurgy II Lab**

Credits: (1)
Typically Taught Spring Semester: Full Sem
Course Fee: $85.00
Course Fee Purpose: Welding supplies

Description: A "hands-on" lab that reinforces the concepts taught in MFET 3760 of metallurgical principles applied to welding and weldability of nonferrous metals.

Pre-requisite(s): MFET 3750/MFET 3750L.

Co-Requisite(s): MFET 3760.

**MFET 3810 - Experimental Course**

Credits: (1-6)
Experimental

Description: Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript.

May be repeated for a total maximum of 6 credit hours.

**MFET 3820 - Nondestructive Testing**

Credits: (3)
Typically Taught Spring Semester: Full Sem
Course Fee: $30.00
Course Fee Purpose: Paper, lab support, computers, software licenses, lab equipment

Description: Fundamental concepts relating to liquid penetrant, magnetic particle, ultrasonics, and radiography and other NDT processes.

Pre-requisite(s): MATH 1210 or MATH 1110 and PHYS 2010 or PHYS 2210.

**MFET 3830 - Reinforced Plastics/Advanced Composite Lecture/Lab**

Credits: (3)
Typically Taught Spring Semester: Full Sem
Course Fee: $135.00
Course Fee Purpose: Paper, lab support, lab consumables
Description: Polymer and reinforcement systems; material testing; mold design and development; laboratory involvement in reinforced plastics production processes.  
Pre-requisite(s): MFET 3350/MFET 3350L and MFET 2860.

MFET 3870 - Mold Design and Process Strategies Lecture/Lab

Credits: (3)  
Typically Taught Fall Semester: Full Sem  
Course Fee: $50.00  
Course Fee Purpose: Paper, lab support, lab consumables  
Description: Overview of mold design and the development of strategies and techniques integrating CAD and CAE technologies for optimizing part quality, moldability, and productivity. Additional study on design and construction of various types of production molds that are used for processing plastics in final shape. Product design in relationship to molding techniques and various techniques and materials used to construct the molds are the major units of study.  
Pre-requisite(s): MFET 2850 and MFET 2870.

MFET 3890 INT - Cooperative Work Experience

Credits: (1-3)  
Typically Taught Fall Semester: Full Sem  
Typically Taught Spring Semester: Full Sem  
Description: Open to all third year students in Manufacturing Engineering Technology. A continuation of MFET 1890.

MFET 4050 - Detailed Scheduling and Planning I

Credits: (2)  
Description: Techniques and practices of detailed scheduling and planning of inventory management including order review methodologies, policies and functions of inventory. Covers lot sizing, safety stock techniques, demand, and Just-in-Time as they relate to detailed scheduling and planning.  
Pre-requisite(s): MFET 3510 or equivalent. (APICS Series)  
Note: This course is offered in the evenings only.

MFET 4090 - Welding Power Sources

Credits: (2)  
Typically Taught Fall Semester: Full Sem  
Course Fee: $25.00  
Course Fee Purpose: Paper, lab support, computers, software licenses, lab equipment  
Description: Study of power sources used to generate and control voltage and amperage for welding. Two lectures per week.  
Pre-requisite(s): EET 1850.

MFET 4150 - Execution and Control of Operations

Credits: (2)  
Description: Focuses on prioritizing and sequencing work, executing work plans, implementing controls, reporting activity results, and evaluating and providing feedback on performance. Eval.  
Pre-requisite(s): MFET 3510 or equivalent. (APICS Series)  
Note: This course is offered in the evenings only.

MFET 4200 - Manufacturing Processes

Credits: (2)  
Description: Manufacturing processes define the methods that companies use in designing, producing, and delivering goods and services required by customers. The manufacturing processes provide the execution component to the other activities of the integrated manufacturing system. Beginning with customer requirements and needs, they design, build, operate, upgrade, and maintain a manufacturing process which is most supportive of and consistent with those needs and requirements. To achieve these objectives, manufacturing processes draw on three different but very interrelated subsystems: industrial facilities management, process design and development, and manufacturing. (APICS Series)  
Note: This course is offered in the evenings only.

MFET 4210 - Cost Estimating and Engineering Economics

Credits: (2)  
Description: Production cost structure, operation costing, break-even analysis, make buy decision, and capital equipment justification. Computer aids are used to analyze cost data. Three lectures per week.  
Pre-requisite(s): MATH 1080; WEB 1700.  
Co-requirestite(s): MFET 4610.
MFET 4250 - Detailed Scheduling and Planning

Credits: (2)
Description: Detailed explanation of inventory management including order review methodologies, policies and functions of inventory. Covers material requirements planning (MRP) and other material planning and capacity requirements planning techniques. Includes concepts, principles, interfaces, desired characteristics, applications, and supplier relations.
Pre-requisite(s): MFET 3510 or equivalent. (APICS Series)
Note: This course is offered in the evenings only.

MFET 4300 - Design of Experiments

Credits: (2)
Description: A step-by-step description of procedures used to organize, conduct and evaluate industrial experiments. Emphasizes the usefulness of results and the decision criteria for choosing the proper design.
Pre-requisite(s): MFET 2410

MFET 4310 - Corrosion and Corrosion Control

Credits: (2)
Typically Taught Spring Semester: Full Sem
Course Fee: $25.00
Course Fee Purpose: Paper, lab support, computers, software licenses, lab equipment
Description: Analysis of corrosion mechanisms for ferrous metals, nonferrous metals, and nonmetallic materials, as well as the control of corrosion.
Pre-requisite(s): CHEM 1110 and MATH 1080.

MFET 4315 - Welding Robotics

Credits: (2)
Typically Taught Spring Semester: Full Sem
Course Fee: $30.00
Course Fee Purpose: Paper, lab support, software licenses
Description: This course is designed to introduce students to welding robot programming and applications. Students will demonstrate skills learned in welding robot programming in applied labs. They will learn parameters, terms and nomenclature and obtain knowledge of applications and configurations in industry settings.
Pre-requisite(s): MFET 2670, MFET 2670L.

MFET 4350 - Principles of Lean Manufacturing

Credits: (2)
Typically Taught Spring Semester: Online
Description: This course introduces students to lean manufacturing and waste reduction concepts such as work standardization, visual manufacturing & workplace organization, value stream mapping, setup reduction & batch size reduction, quality at the source, point of use storage, total productive maintenance, pull systems/kanbans, takt time calculation and cellular/synchronous manufacturing design concepts. A combination of lectures, videos and hands on exercise will be used.

MFET 4550 - Advanced Quality Principles

Credits: (2)
Description: Provides advanced study in all aspects of the application of quality principles to a production environment. The course will involve case study and application of quality theory. Students should have a broad knowledge of organizational structure and planning, quality techniques, customer satisfaction and focus, project management, and human resource management. Cooperative experience in a business/industry is recommended. (ASQC Series)
Pre-requisite(s): MFET 2410 or equivalent.
Note: This course is offered in the evenings only.

MFET 4580 - Process Automation II & Robotics

Credits: (1)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Course Fee: $25.00
Course Fee Purpose: Computer lab refurbishment, software, lab aide
Description: An advanced study of the elements used in manufacturing automation and control technologies including: the use of basic elements of an automated system, cost benefit analysis, programmable logic controllers, robotics (servo and non-servo), material handling devices and automated inspection technologies. One 1-hour lecture per week.
Pre-requisite(s): MFET 2500 and MFET 2510.
Co-Requisite(s): MFET 4585.

MFET 4585 - Process Automation II Lab
Credits: (2)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Course Fee: $75.00
Course Fee Purpose: Mechatronics automation equipment and consumables

Description: Students work in teams to demonstrate proficiency programming individual automated manufacturing stations using Allen Bradley PLCs (Cognex Vision Systems, RF Systems, bar coding, pick and place feeding station, gauging station, part orientation processing station, sorting-buffering station, servo robotic assembly station-Fanuc, torque assembly station, inventory storage station, electro-hydraulic station). Students then work as a class to integrate an entire manufacturing process using all of the stations for a small part. Labs will include additional lectures.

Pre-requisite(s): MFET 2500 and MFET 2510.
Co-Requisite(s): MFET 4580.

MFET 4610 - Senior Project Management & Cost Estimating

Credits: (3)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Course Fee: $25.00
Course Fee Purpose: Paper, lab support, computers, software licenses, lab equipment

Description: This is designed as a capstone course for students and is to be taken in the senior year of their program. The course will teach students fundamental principles in Project Management, Cost Estimating, and Engineering Economics that will be necessary to successfully complete their Senior Project experience. Students must apply and gain departmental approval before entering Senior Project. Approval is based on an interview with department faculty and fulfilling the prerequisites listed on the "Senior Project Requirements Sheet" available from the department secretary. All students approved for Senior project will register for this course regardless of individual project group assignments.

Pre-requisite(s): MFET 3620 and AAS or AS Degree.
Co-Requisite(s): MFET 4610L for manufacturing students or PDD 4600 for design graphics students.

MFET 4610L - Senior Project Lab

Credits: (2)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Course Fee: $50.00

Course Fee Purpose: Senior Project consumables

Description: Must apply for senior project before March 1 of the previous year. Must have department approval. Approval is based on an interview with department faculty and fulfilling the prerequisites listed on the "Senior Project Requirements Sheet" available from the department secretary. Time: as required to complete the project. Two consecutive semesters.

Co-Requisite(s): MFET 4610 (with MFET 4610L only).

MFET 4620L - Senior Project Lab

Credits: (2)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Course Fee: $50.00

Course Fee Purpose: Senior Project consumables

Description: Must apply for senior project before March 1 of the previous year. Must have department approval. Approval is based on an interview with department faculty and fulfilling the prerequisites listed on the "Senior Project Requirements Sheet" available from the department secretary. Time: as required to complete the project. Two consecutive semesters.

MFET 4650 - Software Quality Engineering Principles

Credits: (2)

Description: This course prepares the student to incorporate quality development and implementation as a software design team member. The course provides instruction on concepts, principles and techniques to develop a comprehensive understanding of software inspection, testing, verification, and validation. Participants will learn to implement software development and maintenance processes and methods. This course also prepares the student for the Certified Systems Quality Engineer examination administered through American Society for Quality.

MFET 4670 - Reliability Engineering Principles

Credits: (2)

Description: This course prepares the student to work as a design team member to incorporate reliability considerations into a basic design. Course provides information on application of proven techniques to achieve quality product results. This course also prepares the student for the Certified Reliability Engineer examination administered through American Society for Quality.
MFET 4750 - Master Planning of Resources  
Credits: (2)  
Description: Explore processes used to develop sales and operations plans, forecast internal and external demand, create the master schedule consistent with business policies, objectives and resource constraints. (APICS series).  
Pre-requisite(s): MFET 3510.  
Note: This course is offered in the evenings only.

MFET 4770 - Strategic Management of Resources  
Credits: (2)  
Description: The relationship of existing and emerging processes and technologies to manufacturing strategy and supply chain related functions. Addressing aligning resources with strategic plan, integrating operating processes to support the strategic plan, and implementing change.  
Pre-requisite(s): MFET 3510 and be familiar with concepts addressed in all other APICS courses. (APICS series).  
Note: This course is offered in the evenings only.

MFET 4800 - Individual Research in Manufacturing Technology  
Credits: (1-3)  
Description: Special individual research and development projects in Manufacturing and Engineering Technology. Credit and time determined by the student and the faculty project supervisor.  
Pre-requisite(s): Permission of instructor.

MFET 4830 - Directed Readings in Manufacturing Engineering Technology  
Credits: (1-3)  
Typically Taught Fall Semester: Full Sem  
Typically Taught Spring Semester: Full Sem  
Description: Must have department approval.

MFET 4850 - Integration of Automated Systems  
Credits: (3)  
Typically Taught Spring Semester: Full Sem

Course Fee: $50.00  
Course Fee Purpose: Paper, lab support, automation lab supplies  
Description: An Advanced Automation course designed to give the student both theory and practical application in control and integration issues dealing with automated equipment. Selected topics include motor controllers, PID's, data collection and transfer devices, vision systems, and systems integration issues.  
Pre-requisite(s): MFET 4580/MFET 4585.

MFET 4890 INT - Cooperative Work Experience  
Credits: (1-3)  
Typically Taught Fall Semester: Full Sem  
Typically Taught Spring Semester: Full Sem  
Description: Open to all fourth year students in Manufacturing Engineering Technology. A continuation of MFET 1890.

MFET 4920 - Short Courses, Workshops, Institutes and Special Programs  
Credits: (1-3)  
Variable Title  
Description: Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript. Juniors and Seniors only. Faculty approval required.

MFET 4995 - Certified Manufacturing Technologist (CMfgT) Exam Review  
Credits: (1)  
Typically Taught Fall Semester: Full Sem  
Typically Taught Spring Semester: Full Sem  
Course Fee: $115.00  
Course Fee Purpose: SME CmfgT exam, paper, lab support  
Description: This course is designed to provide a structured review for the student to take the Certified Manufacturing Technologist (CMfgT) Exam.  
Pre-requisite(s): MSE 3910.

MFET 5100G - Introduction to Engineering Design (IED)  
Credits: (5)  
Description: IED provides students with opportunities to be creative and to apply their decision-making and
problem-solving skills to design problems. Students use powerful computer hardware and software (Inventor) to develop 3-D models or solid renderings of objects. Using a Computer Aided Design System, students learn the product design process through creating, analyzing, rendering and producing a model. The course meets for a total of 75 hours over a two-week period and focuses on the content as well as teaching methods appropriate for the course. This course is designed specifically and only for current high school teachers who have been assigned by their schools and districts to teach the Project Lead the Way courses in their respective schools. These courses carry graduate credit for those teachers who would use them as part of a master's degree program or for recertification.

**MFET 5300G - Principles of Engineering (POE)**

**Credits:** (5)  
**Description:** POE is designed to help students understand the field and the career possibilities of engineering and engineering technology. Students work on the problem-solving skills that are used at the college level and in the workplace, and they explore engineering systems and manufacturing processes. Students learn how engineers address concerns about the social and political consequences of technological change. The course meets for a total of 75 hours over a two-week period and focuses on the content as well as teaching methods appropriate for the course. This course is designed specifically and only for current high school teachers who have been assigned by their schools and districts to teach the Project Lead the Way courses in their respective schools. These courses carry graduate credit for those teachers who would use them as part of a master's degree program or for recertification.

**MFET 5400G - Computer Integrated Manufacturing (CIM)**

**Credits:** (5)  
**Description:** CIM is a course that applies principles of prototyping, robotics, and automation. It builds on the solid modeling skills developed in Introduction to Engineering Design. Students use computer-controlled equipment to solve problems by constructing models of their three-dimensional designs. Students are also introduced to the fundamentals of robotics and to how this equipment is used in an automated environment. Students evaluate their design solutions using various techniques and modifications before they produce the prototype. The course meets for a total of 75 hours over a two-week period and focuses on the content as well as teaching methods appropriate for the course. This course is designed specifically and only for current high school teachers who have been assigned by their schools and districts to teach the Project Lead the Way courses in their respective schools. These courses carry graduate credit for those teachers who would use them as part of a master's degree program or for recertification.

**MFET 5500G - Engineering Design and Development (EDD)**

**Credits:** (5)  
**Description:** In this course, students work on a team with one or two others to design and construct the solution to an engineering problem. The problems involve a wide range of engineering applications (e.g., a school robo-mascot, automated solar water heater, remote control hover craft). The course serves as a capstone course where students apply the principles they developed in previous courses. A journal is part of each student's portfolio. Each team is responsible for delivering progress reports and making final presentations to an outside review panel. The course meets for a total of 75 hours over a two-week period and focuses on the content as well as teaching methods appropriate for the course. This course is designed specifically and only for current high school teachers who have been assigned by their schools and districts to teach the Project Lead the Way courses in their respective schools. These courses carry graduate credit for those teachers who would use them as part of a master's degree program or for recertification.

**MFET 6050 - Gateway to Technology**

**Credits:** (1-4)  
**Typically Taught Summer Semester:** 2nd Blk  
**Description:** Gateway to Technology is a course designed specifically and only for current high school teachers who have been assigned by districts to teach the related Project Lead the Way course in their respective schools. Gateway to Technology introduces the Project Lead the Way series of courses covering the principles of engineering and technology. The course promotes an understanding of the field of technology and covers the continuous evolution of technology, the positive and negative impact of technology on our society, and career opportunities in technology. The various modules in this course will utilize a train the trainer approach. Teachers will learn technical content, teaching methodologies used to present the course, and the Project Lead the Way learning management system (Canvas). Credit hours will be based on the number of modules taken (two credits for each one-week module). May be repeated 4 times and up to 8 credit hours.
MGMT 3010 - Organizational Behavior and Management

Credits: (3)
Typically Taught Summer Semester: Full Sem, Full Sem Online
Typically Taught Fall Semester: Full Sem, Full Sem Online
Typically Taught Spring Semester: Full Sem, Full Sem Online

Description: Focus of the course is on individual and group behavior in an organizational setting and on decision processes. Examples of topics included are motivation, group behavior, organizational design and development, organizational culture, and decision making theory.

MGMT 3200 - Managerial Communications

Credits: (3)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem

Description: Study of corporate communication methods to improve communication in organizations. Written and oral reports tailored to achieve strategic goals contingent upon business situations.

Pre-requisite(s): ENGL 1010, ENGL 2010.

MGMT 3300 - Human Resource Management

Credits: (3)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem

Description: Study of principles and methods in managing specific aspects of human resources, either as an operating manager or as a human resource specialist. Topics include legal constraints in managing human resources, strategic planning of human resources, recruitment, selection, orientation, performance evaluation, employee/ labor relations and communication programs, safety and health, and work scheduling. The computer will be used for analysis in certain areas studied.

Pre-requisite(s): BSAD 2899; MGMT 3010.

MGMT 3350 - Employment and Labor Law

Credits: (3)
Typically Taught Fall Semester: Full Sem

Description: This course will focus on legal and ethical issues most closely associated with Human Resource Management. Title VII of the Civil Rights Act of 1964, ADEA, and ADA form the heart of this course. Other topics include FLSA, OSHA, ERISA, sexual harassment, drug testing and privacy. Labor law issues include preventing unionization, and dealing effectively with a union.

Pre-requisite(s): BSAD 2899; MGMT 3300.

MGMT 3400 - International Business

Credits: (3)
Typically Taught Fall Semester: Full Sem

Description: An exploration of the role of multi-national corporations in worldwide economic development and an analysis of the management processes of such corporations.

Pre-requisite(s): BSAD 2899.

MGMT 3450 - Business Studies Abroad-International Management

Credits: (3)

Description: An exploration of the internationalization of economies and the analysis of international decision-making. Focus is internationalization as the central challenge for management. This course is taught at Fachhochschule Hof, Germany during each fall semester. Students enrolled in this course have to participate in the Study Abroad Program (Contact: Doris Geide-Stevenson, ext. 7634, dgsteven@weber.edu).

Pre-requisite(s): BSAD 2899, MGMT 3010.
May be repeated 3 times for credit.

MGMT 3550 - The Cultural Environment of International Business

Credits: (3)

Description: This course considers issues in communication, negotiation and culture in international business relations. Topics include the role of language and nonverbal communication, contrasting cultural values and using sources of information on the culture of international business.

Pre-requisite(s): BSAD 2899.

MGMT 4300 - Leadership and Group Effectiveness

Credits: (3)

Typically Taught Summer Semester: 1st Blk
Typically Taught Fall Semester: 1st Blk
Typically Taught Spring Semester: 1st Blk
Description: This course is about getting things done through the use of influence. The course emphasizes influencing others and influencing a situation. Power and other forms of influence are studied in-depth. Topics also include an examination of group behavior in work setting and the management of work groups. All stages of group development are studied from the forming stage of a group to its development as a high performance, self-managed team.
Pre-requisite(s): MGMT 3010 or COMM 3550 or HAS 3260.

MGMT 4310 - Compensation and Benefits

Credits: (3)
Typically Taught Spring Semester: Full Sem
Description: This course is intended to provide the student with a basic working knowledge of compensation and benefits as an important part of the broader Human Resources field. The topics to be covered include: benefits management, job analysis, job evaluation, performance appraisal and recognition, and different approaches to employee compensation. The course is also designed to assist the student in their preparation for professional certification examinations in related areas.
Pre-requisite(s): BSAD 2899, MGMT 3300.

MGMT 4320 - Staffing Organizations

Credits: (3)
Typically Taught Fall Semester: Full Sem
Description: Designed to provide students with the knowledge and skills necessary to effectively analyze and project organizational staffing requirements, recruit and select candidates, and effectively place employees in today's complex organizations. Includes treatment of legal aspects of staffing process.
Pre-requisite(s): BSAD 2899, MGMT 3300.

MGMT 4350 - Training

Credits: (3)
Typically Taught Spring Semester: Full Sem
Description: This course is designed to provide prospective human resource managers with an understanding of the applicable theory and with the "tools" required to effectively manage the training function within an organization.
Pre-requisite(s): BSAD 2899, MGMT 3300.

MGMT 4400 - Advanced Organizational Behavior

Credits: (3)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: An in-depth study of leadership and organizational behavior. Focus is on the structural and behavioral variables that are most significant for organizational effectiveness. Both theory and application are emphasized.
Pre-requisite(s): MGMT 3010 or COMM 3550 or HAS 3260.

MGMT 4410 - Leadership Through Character

Credits: (3)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: This course will provide students access to the concepts and skills to possess the competencies, commitment, emotional intelligence and character to be effective leaders. While competencies and commitment are important, character plays a critical role in leadership behavior and will be the focus of this course. By character it is meant the combination of traits, values and virtues that are recognized as admired and appreciated in leaders, providing them with the expertise to exercise quality of judgment and decision-making. For example, in the financial crisis of 2008 - 2009 some corporate leaders' needs for instant gratification triumphed over temperance; and others who knew ethical risks were taken remained silent because they did not have the skills or courage to speak up. A component of this course is to explore the fundamentals of corporate governance, emphasizing the leader's responsibility to make ethical, socially responsible, legal, and wise financial decisions on behalf of the organization. We will explore a number of corporate examples that demonstrate positive and negative character development. Effective corporate governance requires leaders know the purpose or values of the organization, design the space of the organization to achieve its purpose, organize the flow of power within the organization, and manage the relationships of the key stakeholders in the organization: owners, directors, managers, employees, customers, suppliers, regulators, and the wider community of which the organization is a member. The skills and knowledge acquired in this course are transferable to other areas of life including one's community service and interaction with family and friends.
Pre-requisite(s): MGMT 3010, or HAS 3260, or COMM 3550.

MGMT 4420 - Critical Thinking for Leaders

Credits: (3)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: The purpose of this course is to apply a well-rounded and experiential learning process to developing critical thinking skills for leaders. Course topics are broad and include the major branches of philosophy, the nature of thinking and knowledge, the formation of beliefs, perceptual biases, cognitive biases, the nature of memory, the structure and purpose of argument, logic and logical fallacies, the practice of street epistemology, probabilities and statistics, culture and mass delusions, the philosophy of science, the scientific method, skepticism, and pseudoscience. Application of critical thinking skills will target the human side of business in areas most relevant to leaders - leading, decision making, influence, conflict management and the development of conceptual skills and human capital.
Pre-requisite(s): MGMT 3010, or HAS 3260, or COMM 3550.

MGMT 4650 - Negotiations

Credits: (3)
Typically Taught Spring Semester: Full Sem
Description: This course provides an opportunity for management students to obtain an understanding of negotiation concepts and to develop management negotiation skills. Because the objective is skill building, the course emphasizes hands-on experience through negotiation simulations. These role playing exercises are designed to simulate the situations and issues commonly faced in management/organizational settings (e.g., labor negotiations, contract provisions, vendor arrangements).
Pre-requisite(s): BSAD 2899.

MGMT 4800 - Independent Research

Credits: (1-3)
Description: Directed research and study on an individual basis.
Pre-requisite(s): BSAD 2899; Senior Standing; Written Instructor Approval.
May be repeated until a total of 4 hours credit is accumulated.

MGMT 4810 - Experimental Course

Credits: (1-6)
Experimental
Description: Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript. May be repeated for a total maximum of 6 credit hours.

MGMT 4850 - Management Study Abroad

Credits: (1-3)
Description: This course is designed for students who wish to explore management theory and practice in countries other than the U.S. Students will study international business as offered through a partner university (or other university with department chair approval).
Pre-requisite(s): BSAD 2899.
May be repeated once up to 6 credits.

MGMT 4860 - Management Internship

Credits: (3)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: A structured professional-level field experience. The student will be counseled and supervised as he/she applies and integrates the knowledge and skills obtained through the Management program courses. Students receiving credit in this course cannot receive credit in MGMT 4865.
Pre-requisite(s): BSAD 2899; Instructor approval.

MGMT 4865 INT - Human Resource Internship

Credits: (3)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: A structured professional-level field experience. The student will be counseled and supervised as he/she applies and integrates the knowledge and skills obtained through the Human Resource or Management program. Students receiving credit in this course cannot receive credit for MGMT 4860.
Pre-requisite(s): BSAD 2899; Instructor approval.

MHA 6000 - Health Systems & the Healthcare Economy
MHA 6100 - Leading & Managing People in Healthcare

Credits: (3)
Typically Taught Fall Semester: 1st Blk, 1st Blk Online
Description: The course content emphasizes visionary leadership and management of diverse healthcare professionals in complex organizational structures. Individual leadership talents in handling various organizational challenges, such as leading organization change, building strong culture, developing effective teams, resolving conflicts, implementing effective motivational systems, and nurturing a learning organization are investigated.

MHA 6140 - Post Acute Care Administration

Credits: (3)
Description: Seminar analysis of effect of chronic conditions and aging on delivery of health services, nursing homes and alternatives, mental health facilities and agencies, and rehabilitation facilities and services. Field trips and individual research projects.
Note: Check with department for course availability.

MHA 6160 - Medical Group Management

Credits: (3)
Description: Theory and principles of practice management. Emphasis on the fundamentals of organizing, staffing, and controlling a physician practice. Financial applications and resource consumption.
Note: Check with department for course availability.

MHA 6180 - Healthcare Entrepreneurship

Credits: (3)
Description: Develops an understanding of entrepreneurship, its importance for a healthcare organization and the health economy, and the challenges associated with promoting entrepreneurship within healthcare organizations.
Note: Check with department for course availability.

MHA 6200 - Population Health and Data Analytics

Credits: (3)
Typically Taught Fall Semester: 2nd Blk, 2nd Blk Online
Description: The course addresses the integration of population health into strategic planning and managerial decision-making in health services organizations. Epidemiological principles, social determinates of health, and the improvement of health of the entire population from clinical and managerial perspectives are addressed. This course teaches the necessary fundamentals of data analytics and engages students in the process of analyzing data related to population health topics. Course work includes environmental analysis of community health, and health behaviors and lifestyle that impact demand on health care delivery systems. The student will evaluate models for integration of health services, preventive programs, demand management, and policy issues affecting continuity of care.
Pre-requisite(s): MHA 6000 (may be taken concurrently) or Instructor Approval.

MHA 6240 - Human Resources Management in Healthcare

Credits: (3)
Typically Taught Fall Semester: 2nd Blk, 2nd Blk Online
Description: Human resources management in healthcare organizations including recruitment and selection of employees, benefits and compensation management, privileging and credentialing of health professionals, performance evaluation, staffing plans, labor relations and labor law relevant to health care organizations.

MHA 6249 - Accounting and Finance Principles for Healthcare Managers

Credits: (3)
Typically Taught Spring Semester: 1st Blk, 1st Blk Online
Description: The first course in a two-course sequence addressing the accounting and finance knowledge and skills required of successful healthcare managers. It emphasizes the understanding of accounting and finance functions, use
and interpretation of documents, reports, and statements, and the ability to work with the accounting and finance professionals in one's organization.

Pre-requisite/Co-requisite: MHA 6000.

MHA 6250 - Healthcare Finance

Credits: (3)
Typically Taught Spring Semester: 2nd Blk, 2nd Blk
Online
Description: Application of financial management techniques to decision making for healthcare providers. Financial management functions and organizations, financial statement analysis, working capital management, present value analysis, capital budgeting, cost of capital, variance analysis, financing techniques, and financial analysis case studies.
Pre-requisite(s): MHA 6000 and MHA 6249 (6249 may be taken concurrently).

MHA 6300 - Quality Improvement and Risk Management in Health Services Organizations

Credits: (3)
Typically Taught Spring Semester: 1st Blk, 1st Blk
Online
Description: A study of the effects of sophisticated quality and health outcome measures as used by individuals, employers and insurers to compare the results of various providers. The course will cover the forces of external customers and in addition to internal pressures to justify costs, provide continuous quality improvement, risk management, and changes within a complex health care system. Course content will include systems behavior and relationships, creating a culture of safety, using measurement to improve quality, fostering teamwork, and understanding the role of risk management in quality improvement.
Pre-requisite(s): MHA 6000 or Instructor Approval.

MHA 6320 - Health Policy and Economics

Credits: (3)
Typically Taught Spring Semester: 1st Blk, 1st Blk
Online
Description: Economic analysis applied to health services sector; concept of efficiency applied to production and distribution of health services, health insurance, government programs, health care personnel, and health services organizations; current public policy issues; emphasis on student application of economic principles to health care issues.

MHA 6350 - Decision Making for Healthcare Leaders

Credits: (3)
Typically Taught Fall Semester: 1st Blk
Description: Course focuses on concepts for approaching executive decision-making in addressing key strategic, tactical execution, operational, and competitive issues facing healthcare organizations. Emphasis is placed on the development of analytical skills and the use of data to enable effective decision-making and sustained high organizational performance.

MHA 6360 - Comparative International Health Systems

Credits: (3)
Description: Analysis of key attributes of health care policy in selected countries and comparisons with the US health care system. This course includes an international field trip and appropriate travel expenses will be required of the students. Please check with the course instructor for more details.
Note: Check with department for course availability.

MHA 6370 - Executive Leadership Seminars in Healthcare

Credits: (3)
Description: Via a series of in-depth seminars, dialogues, interactions, and/or lectures with top level clinical leaders and healthcare executives, this course will explore complex and timely healthcare topics and issues of the day from the perspective of successful leaders in the healthcare industry, exploring and analyzing their implementation and application of management and leadership theory and practice as put into effect in a variety of healthcare settings and facilities.
Note: This course is offered as needed.

MHA 6400 - Strategic Health Planning and Marketing

Credits: (3)
Typically Taught Spring Semester: 2nd Blk, 2nd Blk
Online
Description: Various planning approaches, styles and theories are considered from a corporate decision-making
perspective within the unique governance structures of health service organizations. Issues covered include strategic planning and resource allocation within integrated health systems. Environmental analysis explores national health care delivery policy, unique financing structures such as third party payment systems, and open vs. regulated markets and development of comprehensive marketing plans.

**Pre-requisite(s):** MHA 6100 and MHA 6200.

### MHA 6440 - Health Ethics and Law

**Credits:** (3)

**Typically Taught Fall Semester:** 1st Blk, 1st Blk Online

**Description:** Selected legal principles and their application to health field. Legal aspects of corporate liability, medical malpractice, admission and discharge processes, medical staff bylaws, informed consent, nursing, patients' rights, medical records, and governmental regulation of personnel and health facilities.

### MHA 6450 - Health Informatics

**Credits:** (3)

**Typically Taught Fall Semester:** 2nd Blk, 2nd Blk Online

**Description:** This course addresses the concepts and application of health informatics. Topics addressed in the course include: interoperability, IT standards, privacy and security of health information, cybersecurity, strategic planning for IT, and emerging trends in health informatics. Emphasis is placed on the use of data analytics to support management decision making.

### MHA 6500 INT - Field Work

**Credits:** (3)

**Typically Taught Summer Semester:** Full Sem

**Typically Taught Spring Semester:** Full Sem, Full Sem Online

**Description:** This course provides a capstone experience where the student synthesizes theory learned the classroom and applies it real world problem solving in health care organizations. Designed to integrate the knowledge gained in other graduate courses into an applied management project. The project will have enterprise wide applicability to a health services organization. The Student will develop and present a deliverable product that could be implemented by management to improve their organizational performance, specifically with analysis and recommendations for policy and strategic improvements.

**Pre-requisite(s):** MHA 6000, MHA 6200, MHA 6300, MHA 6400.

### MHA 6810 - Experimental Course

**Credits:** (1-6)

**Experimental**

**Description:** Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript.

**Pre-requisite(s):** MHA 6000 and permission of instructor. May be repeated for a total maximum of 6 credit hours.

### MHA 6830 - Directed Study

**Credits:** (1-3)

**Description:** Directed individual study and research on special topics related to health care.

**Pre-requisite(s):** Approval of MHA program and instructor.

May be repeated for a cumulative total of three credits.

Note: This course is offered as needed.

### MHA 6840 - Case Study Analysis

**Credits:** (3)

**Description:** Analysis, Preparation, and Presentation at a national Case Study Competition. Students synthesize theory and apply it to the explicit healthcare circumstance outlined in the case. Case studies require the demonstration and integration of knowledge, skills, and competencies from prior graduate courses and the application of them to a specific case situation. Students will travel and present their case analysis at a national case competition.

**Pre-requisite(s):** MHA 6000, and permission of instructor.

Note: Check with department for course availability.

### MHA 6850 GLB - MHA Study Abroad

**Credits:** (3)

**Description:** Healthcare has become a global phenomenon. Travel to other countries to see firsthand how their health industries are planned and organized, how care is delivered, and to interact with health leaders, providers, and patients from other countries provides an inarguably rich experience for healthcare leaders. In addition, the study abroad experience requires both sound knowledge of the health industry being observed and scholarly reflection on its effectiveness, efficiency, and success in addressing and meeting that country's healthcare needs.

**Pre-requisite(s):** MHA 6000 and permission of instructor.

Note: Check with department for course availability.
MHA 7080 - Healthcare Finance/Economics

Credits: (2)
Typically Taught Spring Semester: Full Sem, Full Sem - Online
Description: This course focuses on principles of healthcare economics and finance to develop and implement effective planning, decision-making, and evaluation for healthcare delivery within healthcare organizations and systems. It provides a financial management perspective to advanced nursing practice and general health care issues. This course offers 15 practicum hours 1:4 credit to clock hours (0.25 credit = 15 clock hours).

MICR 1113 LS - Introductory Microbiology

Credits: (3)
Typically Taught Summer Semester: Full Sem, Full Sem Online, 1st Blk Online, 2nd Blk Online
Typically Taught Fall Semester: Full Sem, Full Sem Online
Typically Taught Spring Semester: Full Sem, Full Sem Online
Description: An overview of how microorganisms are used as model systems to study biology, genetics, metabolism, and ecology; how microorganisms play an integral role in disease and how microbial and immunological methods are used to treat and prevent disease; why microorganisms are found inhabiting a wide range of ecological habitats; how microorganisms play a vital role in biotechnology, fermentation, medicine, and other industries important to human well-being; and how microorganisms play an indispensable role in element cycles, biodegradation, and other aspects of the environment. This course is intended for all students who are not Microbiology majors. This course consists of 3 one-hour lectures/demonstrations per week.

MICR 1153 LS - Public Health: Sex, Travel, Food, & Drugs

Credits: (3)
Typically Taught Summer Semester: Full Sem, Full Sem - Online, 1st Blk Online, 2nd Blk Online
Typically Taught Fall Semester: Full Sem, Full Sem - Online
Typically Taught Spring Semester: Full Sem, Full Sem - Online
Description: We live in a microbial world. In this course, we will explore our complicated relationships with microbes, from those used to make bread, beer, and yogurt, to those that cause disease and death. To understand how microbes spread, cause illness, and evolve, we will use current important public health examples and case studies, such as sexually transmitted diseases, antibiotic resistance, measles outbreaks, food-borne illnesses, and drug use and abuse. Students will also learn about current efforts to understand and control our microscopic neighbors, such as vaccines, hand sanitizer, and antibiotics. We will discuss how public health issues are studied, how they influence society, and how we make policy decisions to prevent disease. This course consists of 3 one-hour lectures/demonstrations per week.

MICR 1280 - Life in Medicine

Credits: (1)
Typically Taught Spring Semester: Full Sem
Description: This one credit course for premedical students is designed to provide insight into many of the aspects associated with a career in medicine. The objectives of this course include 1.) provision of basic information regarding admission to medical training programs; 2.) exposure to some of the basic tenants necessary for professional success; 3.) investigation of some of the benefits and detriments associated with this challenging career; and 4.) establishing a forum through which students can question and self-assess the feasibility and desire to pursue a medical career. Presentations, group discussions and introspective analysis of selected topics will be led by a local physicians of various specialties to accomplish these goals. May be repeated once.

MICR 1353 LS - Microbes Rule the World - Power of Disease

Credits: (3)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: We will explore the intimate relationships between infectious diseases and humans. Students will examine the biology of influential diseases and the biological principles that allow diseases to influence human events. The course uses scientific explanations and case studies to investigate the effects of diseases on human society. Each disease will be examined from different angles including its natural history (reservoirs, host factors, transmission), pathogenicity, historical impacts, and appropriate interventions. The diseases chosen reflect plagues that have occurred throughout history, especially
those that have important lessons for the fields of microbiology or public health.

**MICR 1370 LS - Principles of Life Science**

**Credits:** (3)
**Typically Taught Spring Semester:** Full Sem
**Description:** A survey course for elementary education majors. Course content includes cells, cell chemistry, genetics, plant and animal anatomy, plant and animal classification, physiology, immune systems, evolution, and ecology. Unifying concepts of all living things will be emphasized.
This course consists of 2 hours of lecture and 1 three-hour laboratory per week.
Cross-listed with BTNY 1370 and ZOOL 1370.

**MICR 1810 - Experimental Course**

**Credits:** (1-6)
**Experimental**
**Description:** Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript. May be repeated for a total maximum of 6 credit hours.

**MICR 2051 - LS - Principles of Microbiology Lab**

**Credits:** (1)
**Typically Taught Summer Semester:** 2nd Block
**Typically Taught Fall Semester:** Full Sem
**Typically Taught Spring Semester:** Full Sem
**Course Fee:** $25.00
**Course Fee Purpose:** Consumable laboratory supplies including, but not limited to, culture tubes, Petri plates, broth and agar media, gloves, pipets, staining reagents, microscope slides and coverslips, disinfectant, swabs, and chemicals and reagents used in media preparation.
**Description:** MICR 2051 is a stand-alone laboratory version of the MICR 2054 laboratory. The laboratory experience focuses on the microscopy, cultivation, control, and identification of microorganisms. This course has the same syllabus content; including textbook, supplies, laboratory fee, and assessment as MICR 2054 laboratory. This laboratory course is to accommodate transfer students from other universities, departments, or microbiology majors that have completed an Introductory Microbiology course without a laboratory. To register for this course a grade of B- or higher is required in MICR 1113 or an equivalent course and instructor approval is needed.

**Pre-requisite(s):** A passing grade of B- or higher in MICR 1113 or equivalent course and CHEM 1110 or CHEM 1200 or CHEM 1200. Instructor approval is required.
**Pre-requisite/Co-requisite:** CHEM 1210 may be taken concurrently.

**MICR 2054 LS - Principles of Microbiology**

**Credits:** (4)
**Typically Taught Summer Semester:** 2nd Blk
**Typically Taught Fall Semester:** Full Sem
**Typically Taught Spring Semester:** Full Sem
**Course Fee:** $25.00
**Course Fee Purpose:** Consumable laboratory supplies including, but not limited to, culture tubes, Petri plates, broth and agar media, gloves, pipets, staining reagents, microscope slides and coverslips, disinfectant, swabs, and chemicals and reagents used in media preparation.
**Description:** Comprehensive introduction to the microbial world, including cell structure and function, metabolism, genetics, ecology, and interactions with humans and other organisms. Discussions include current research topics and applications of microbiology. Laboratory experience focuses on the microscopy, cultivation, control, and identification of microorganisms. This course is designed for science majors, pre-professional students, and Biology Composite Teaching majors. However, anyone meeting the pre- or co-requisites may take this course. This course consists of 3 one-hour lectures and 1 two-hour laboratory per week.

**Pre-requisite(s):** CHEM 1110/CHEM 1115 or CHEM 1200 or CHEM 1210/CHEM 1215. CHEM 1210/CHEM 1215 may be taken concurrently.

**MICR 2600 - Laboratory Safety**

**Credits:** (1)
**Typically Taught Fall Semester:** Full Sem
**Typically Taught Spring Semester:** Full Sem
**Description:** An interdisciplinary, course that will be an overview of the major chemical, biological and physical safety issues related to science laboratories and field work. Class will meet once per week and will be taught in a lecture/demonstration format.
Cross-listed with BTNY, CHEM, GEO, and PHYS.

**MICR 2890 INT - Cooperative Work Experience**

**Credits:** (1-5)
**Description:** Open to all students in the Microbiology
Department who meet the minimum Cooperative Work Experience requirements of the department. Provides academic credit for on-the-job experience. Grade and amount of credit will be determined by the department. Pre-requisite(s): MICR 2054.

Note: This course is offered as needed.

MICR 2920 - Short Courses, Workshop, Institutes, and Special Programs

Credits: (1-6)
Workshop
Description: Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript. May be repeated for a total maximum of 6 credit hours.

Note: This course is offered as needed.

MICR 3012 GLB - Microbiology and Global Public Health

Credits: (2)
Typically Taught Summer Semester: Full Sem - Online
Typically Taught Fall Semester: Full Sem - Online
Typically Taught Spring Semester: Full Sem
Description: This course focuses on microbial diseases that are major causes of morbidity and mortality worldwide (e.g. HIV, tuberculosis, malaria, influenza, etc.), diseases that are classified as emerging diseases (e.g. Ebola) and diseases that are being eliminated or eradicated, including certain Neglected Tropical Diseases. This course will analyze the pathogenesis, life cycles, epidemiology and societal impacts of these diseases, while emphasizing preventative interventions such as vaccinations, water and sewage treatment, and elimination and eradication strategies. The role of various agencies (e.g. WHO and CDC) in improving global health will also be discussed. This course consists of 1 two-hour lecture per week.

Pre-requisite(s): MICR 1113 or MICR 1153 or MICR 2054 or ZOOL 1110 or permission of the instructor.

MICR 3053 - Microbiological Procedures

Credits: (3)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Course Fee: $25.00
Course Fee Purpose: Consumable laboratory supplies including, but not limited to, culture tubes, Petri plates, broth and agar media, gloves, pipets, staining reagents, microscope slides and coverslips, disinfectant, swabs, and chemicals and reagents used in media preparation.

Description: This course is designed to increase proficiency with basic laboratory skills in microscopy, staining methods, preparation of media, aseptic technique, preservation and maintenance of cultures, culture identification, and enumeration methods while developing practical and professional skills in data analysis, presentation, and instrumentation.

This course consists of 2 two-hour combined lecture and laboratory sessions per week.

Pre-requisite(s): MICR 2054, CHEM 1210/CHEM 1215, and MATH 1050 or MATH 1080 or MATH 1210.

MICR 3154 - Microbial Ecology

Credits: (4)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Course Fee: $25.00
Course Fee Purpose: This course has a lab fee that will help fund unique activities done in this course. This will include materials and kits needed for DNA extraction and sequencing. It will also support providing other laboratory materials, media, and reagents.

Description: Microbial Ecology is the study of microorganisms in their natural habitats and their interactions with other living organisms. Topics explored in this course include the evolution of life on Earth, the diversity of microorganisms, microbial biogeography, symbiotic microbial interactions, and biogeochemical cycles. Current and historical research in microbial ecology is emphasized throughout the course. The laboratory experiments may involve isolating, identifying, and studying novel microorganisms from unique environments, studying environmental microbiomes, finding novel antibiotic producing organisms, and modeling biogeochemical cycles. Experimental techniques used in the laboratory involve advanced methods of cultivation, molecular identification techniques, and chemical assays.

This course consists of 3 one-hour lectures and 1 three-hour laboratory per week.

Pre-requisite(s): MICR 2054 and CHEM 1210/CHEM 1215.

MICR 3203 - The Immune System in Health & Disease

Credits: (3)
Typically Taught Summer Semester: Full Sem Online
Typically Taught Fall Semester: Full Sem, Full Sem Online
Typically Taught Spring Semester: Full Sem Online
Description: This course will focus on the study of the
human immune system and its role in health and disease. The course topics include the innate and adaptive immune responses and their role in host defense as well as immunodeficiency and hypersensitivity responses. Manipulation of the immune system through pharmacological means, vaccination or transplantation will also be studied. This course is intended for the student studying Medical Lab Sciences or someone who wants to know more about the human immune system and who has already taken a course in Microbiology. The course is not intended as a first course in biology and it cannot be used as a Microbiology elective course for Microbiology majors. This course is only offered online with the exception of Fall Semester which also offers a face-to-face option consisting of 3 one-hour lectures per week.

**MICR 3254 - Immunology**

Credits: (4)
Typically Taught Fall Semester: *Full Sem*
Course Fee: $25.00
Course Fee Purpose: Consumable laboratory supplies including, but not limited to, culture tubes, Petri plates, broth and agar media, gloves, pipets, staining reagents, microscope slides and coverslips, disinfectant, swabs, and chemicals and reagents used in media preparation.
Description: This course will focus on the study of the human immune system and its role in health and disease. The course topics include the innate and adaptive immune responses and their role in host defense as well as immunodeficiency and hypersensitivity responses. Manipulation of the immune system through pharmacological means, vaccination or transplantation will also be studied. This course consists of 3 one-hour lectures and 1 three-hour laboratory per week.
Pre-requisite(s): MICR 2054 or consent of instructor.

**MICR 3305 - Medical Microbiology**

Credits: (5)
Typically Taught Spring Semester: *Full Sem*
Course Fee: $30.00
Course Fee Purpose: This course has a fee of $30 that will help offset the costs of the laboratory supplies used in this course. This includes, but is not limited to, the purchase of supplies for microscopy, antibiotics, media, and DNA sequencing. Other consumable supplies, such as pipettes, Petri plates, and basic reagents are provided in the lab.
Description: Characteristics of clinically relevant pathogenic bacteria, fungi, and other microbes. From the point of view of the microbe, topics will include pathogenesis, virulence factors and toxins, mechanisms of immune evasion, and unique biological features. From the point of view of the human host, we will discuss epidemiology, disease symptoms, diagnosis, treatment, prevention, and control. This course consists of 3 one-hour lectures and 2 two-hour laboratory per week.
Pre-requisite(s): MICR 2054.
Suggested Requisite(s): Pre-requisite of MICR 3254 or MICR 3203 is strongly recommended.

**MICR 3340 - Information Resources in the Life Sciences**

Credits: (2)
Description: A practical introduction to the literature and information resources of the life sciences. Students will expand their research skills and be able to develop effective research strategies to find and synthesize information available in academic libraries.
Two lecture hours per week.
Pre-requisite(s): ENGL 2010.
Cross listed in Botany, Library Sciences and Zoology.
Note: This course is offered as needed.

**MICR 3403 GLB - Tropical Diseases**

Credits: (3)
Typically Taught Spring Semester: *Full Sem, Full Sem - Online*
Description: Study of tropical diseases caused by viral, bacterial, protozoan, fungal, and helminthic agents, including their transmission, disease course, pathogenesis, treatment, prevention, and control using a multi-disciplinary approach integrating case studies, labs, epidemiology, immunopathology as well as microbiology. This course consists of 2 hours of lecture and 1 three-hour laboratory per week.
Pre-requisite(s): MICR 2054.

**MICR 3484 - Environmental Microbiology**

Credits: (4)
Typically Taught Spring Semester: *Full Sem*
Description: Applied environmental microbiology and biotechnology including transport of microorganisms through environment, microbial pathogens, and toxins in the environment. Biodegradation, contamination control, and biosafety. Pollution microbiology, environmental management, bioremediation, waste treatment, biological insecticides. Microbiology of man-made environments. This course consists of 3 one-hour lectures and 1 three-hour laboratory per week.
Pre-requisite(s): MICR 2054 and CHEM 1210/CHEM 1215.

MICR 3502 SUS - Environmental Health

Credits: (2)
Typically Taught Summer Semester: Full Sem - Online
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem - Online
Description: Air and water quality, solid and hazardous waste management, food protection, environmental inspection, and testing.
This course consists of 1 two-hour lecture per week.
Pre-requisite(s): MICR 1113 or MICR 2054 or consent of instructor.

MICR 3570 - Foundations of Science Education

Credits: (3)
Typically Taught Spring Semester: Full Sem
Description: A thorough investigation of research in science learning and curricular standards at the state and national levels. Foundations of the philosophy of science and scientific inquiry as applicable to science teaching at the secondary level. This course serves as a foundation to a pre-service science teacher's education coursework.
Cross-listed with BTNY, CHEM, GEO, PHYS, and ZOOL.

MICR 3603 - Advanced Microbiology for the Health Professions

Credits: (3)
Typically Taught Summer Semester: Full Sem Online
Typically Taught Fall Semester: Full Sem Online
Typically Taught Spring Semester: Full Sem Online
Description: Characteristics of microorganisms and parasites - emphasizing mechanisms by which they cause disease in humans. Intended for students in the Clinical Laboratory Sciences program and those working in that field. The course is not intended as a first course in biology and it cannot be used as a Microbiology elective course for Microbiology majors. This course is only offered online.

MICR 3753 - Geomicrobiology

Credits: (3)
Typically Taught Fall Semester: Full Sem
Course Fee: $30.00
Course Fee Purpose: This course charges a fee. That fee is used to purchase specialty media and supplies used in the lab. These supplies are meant to help you practice valuable workplace skills. Any unused portion of the course fee will be used to purchase other consumable supplies or media required for this course.
Description: Role of microorganisms in food production,
preservation, spoilage, and food borne disease. This course consists of 2 one-hour lectures and 1 two-hour laboratory per week.

**Pre-requisite(s):** MICR 2054 and CHEM 1210/CHEM 1215.

**MICR 4054 - Microbial Physiology**

**Credits:** (4)

**Typically Taught Fall Semester:** Full Sem

**Typically Taught Spring Semester:** Full Sem

**Course Fee:** $25.00

**Course Fee Purpose:** Course Fee: As part of your registration, you paid a course fee for this course. That fee is used to purchase lab supplies for this class including: slides, staining reagents, culture media, pipettes, gloves, and other disposable supplies. Any remaining money is used for maintenance of equipment used in this course.

**Description:** Structure, function, and physiology of microorganisms, with emphasis upon the bacteria. The course highlights the amazing diversity in metabolism found among bacteria.

This course consists of 3 one-hour lectures and 1 three-hour laboratory per week.

**Pre-requisite(s):** MICR 2054, CHEM 1220/CHEM 1225 and CHEM 2310/CHEM 2315.

**Suggested Requisite(s):** Completion of or concurrent registration in CHEM 3070/ CHEM 3075 is recommended.

**MICR 4154 - Microbial Genetics**

**Credits:** (4)

**Typically Taught Fall Semester:** Full Sem

**Typically Taught Spring Semester:** Full Sem

**Course Fee:** $25.00

**Course Fee Purpose:** Consumable laboratory supplies including, but not limited to, culture tubes, Petri plates, broth and agar media, gloves, pipets, staining reagents, microscope slides and coverslips, disinfectant, swabs, and chemicals and reagents used in media preparation.

**Description:** The genetics of microorganisms and its applications, including isolation and characterization of mutants, the biology and uses of plasmids, conjugation, transformation, the biology and uses of bacteriophages, transposition, recombinant DNA technology, gene regulation, and bioinformatics.

This course consists of 3 one-hour lectures and 1 three-hour laboratory per week.

**Pre-requisite(s):** MICR 2054 and CHEM 2310/CHEM 2315.

**Suggested Requisite(s):** Completion or concurrent of CHEM 3070/CHEM 3075 is recommended.

**MICR 4252 - Cell Culture**

**Credits:** (2)

**Typically Taught Fall Semester:** Full Sem

**Course Fee:** $30.00

**Course Fee Purpose:** Consumable laboratory supplies including, but not limited to, culture tubes, Petri plates, broth and agar media, gloves, pipets, staining reagents, microscope slides and coverslips, disinfectant, swabs, and chemicals and reagents used in media preparation.

**Description:** Introduction to core skills used in the biotechnology industry for culturing animal, insect, and plant cells in vitro. Skills include sterile technique, cell counts, and the culture, maintenance, and preservation of cell lines. Specialized experiences include transfections with foreign DNA, confocal microscopy, real-time PCR and viral infections.

This course consists of 2 two-hour combined lecture and laboratory sessions per week.

**Pre-requisite(s):** MICR 2054 or BTNY 2104 and BTNY 2121 and CHEM 1220 /CHEM 1225.

**MICR 4354 - Industrial Microbiology and Biotechnology**

**Credits:** (4)

**Typically Taught Spring Semester:** Full Sem

**Description:** Experimental design for application of microbial physiology and biochemical ecology as potential solutions to current world problems, as well as exposure to traditional topics in product development.

This course consists of 3 one-hour lectures (presented in a laboratory) and 1 three-hour laboratory per week.

**Pre-requisite(s):** MICR 2054 and CHEM 1220/CHEM 1225.

**Suggested Requisite(s):** Pre-requisite of MICR 3053 is recommended.

**MICR 4554 - Virology**

**Credits:** (4)

**Typically Taught Spring Semester:** Full Sem

**Description:** The study of viruses and virus-like agent structure, classification, genetics, replication, and other interaction with the host, with emphasis on bacteriophage and animal viruses.

This course consists of 3 one-hour lectures and 1 three-hour laboratory per week.

**Pre-requisite(s):** MICR 2054 and CHEM 1220/CHEM 1225.
MICR 4570 - Secondary School Science Teaching Methods

Credits: (3)
Typically Taught Fall Semester: Full Sem
Description: Acquaintance and practice with various teaching and assessment methods. Development of science curricula including lesson and unit plans. It is recommended that this course be completed immediately before student teaching.
Pre-requisite(s): Admission to the Teacher Education Program.
Cross-listed with BTNY, CHEM, GEO, PHYS, and ZOOL.

MICR 4800 - Directed Research

Credits: (1-2)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Independent research under the advisement of a faculty member. No more than 3 credit hours may count toward the major.
Pre-requisite(s): Consent of instructor and a minimum of 6 credits of upper division microbiology course work.
May be repeated up to 10 times for credit.

MICR 4830 - Directed Readings

Credits: (1-2)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Independent readings on advanced special topics under the direction of a faculty member. No more than 2 credit hours may count toward the major.
Pre-requisite(s): Consent of instructor and a minimum of 6 credits of upper division microbiology course work.
May be repeated up to 10 times for credit.

MICR 4890 INT - Cooperative Work Experience

Credits: (1-5)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Open to all students in the Microbiology Department who meet the minimum Cooperative Work Experience requirements of the department. Provides academic credit for on-the-job experience. Grade and amount of credit will be determined by the department.
Pre-requisite(s): CHEM 1210/CHEM 1215, CHEM 1220/CHEM 1225, and MICR 2054.
May be repeated up to 10 times for credit.

MICR 4920 - Short Courses, Workshops, Institutes, and Special Programs

Credits: (1-6)
Workshop
Description: Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript.
May be repeated for a total maximum of 6 credit hours.
Note: This course is offered as needed.

MICR 4991 - Microbiology Seminar

Credits: (1)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Current topics in Microbiology.
This course consists of 1 one-hour lecture per week.
Pre-requisite(s): MICR 2054 and MICR 3053 or MICR 3154 or MICR 4054 or MICR 4154.

MICR 5034G - Microbiology for Teachers

Credits: (1-4)
Description: Science content course for teachers in the MEd Science Emphasis Program. To register, select another departmental course and develop a contract detailing additional work required for graduate credit.
Contract must be approved by instructor, department chair, and Director of the Master of Education Program.
May be repeated twice with a maximum of 4 credit hours.
Note: This course is offered as needed.

MILS 1010 - Introduction to the Army and Critical Thinking

Credits: (3)
Typically Taught Fall Semester: Full Sem
Description: Introduces cadets to the personal challenges and competencies critical for effective leadership. Cadets learn how the personal development of life skills such as critical thinking, time management, goal setting, stress management and comprehensive fitness relate to leadership and the Army profession. A three hour weekly leadership lab is included, as well as one weekend field training exercise during the semester.
Participation in weekly physical fitness training is expected and should be taken as MILS 2400.

**MILS 1020 - Introduction to Profession of Arms**

**Credits:** (3)  
**Typically Taught Spring Semester:** Full Sem  
**Description:** Introduces cadets to the personal challenges and competencies that are critical for adaptive leadership. Cadets learn the basics of the communications process and the importance for leaders to develop the essential skills to effectively communicate in the Army. Students will examine the Army profession and what it means to be a professional in the U.S. Army. A three-hour weekly leadership lab is included as well as one weekend field training exercise during the semester. Participation in weekly physical fitness training is expected and should be taken as MILS 2400.

**MILS 1110 - Basic Rifle Marksmanship**

**Credits:** (1)  
**Typically Taught Fall Semester:** Full Sem  
**Description:** Open to all Weber State University students. Introduction to safe use of a rifle and practical application of rifle marksmanship. Course includes weapons safety, mechanics, capabilities, and fundamentals of marksmanship. Includes visit to fire at indoor air rifle range. Materials and equipment furnished by Department of Military Science and Leadership (Army ROTC). May be repeated twice for up to two hours of credit.

**MILS 1220 - Wilderness Survival Skills**

**Credits:** (1)  
**Typically Taught Fall Semester:** 1st Blk  
**Typically Taught Spring Semester:** 2nd Blk  
**Description:** Open to all WSU students. This class will teach you how to build makeshift shelters, procure food and water, cook a meal, identify edible and poisonous plants, avoid dangerous animals, treat wounds and illness, navigate with the sun and stars, make equipment, and much more. The class covers wilderness survival and an urban survival situation. Materials and equipment furnished by Department of Military Science. This course may be repeated once for a total of two credit hours.

**MILS 2010 - Innovative Team Leadership**

**Credits:** (3)  
**Typically Taught Fall Semester:** Full Sem  
**Description:** Builds on previous leadership instruction enhancing student skills in land navigation, small unit tactics, written and oral communication, event planning, group coordination and effectiveness and first aid. During this course, students develop basic skills for leading others in a tactical environment. A three-hour weekly leadership lab is included as well as one weekend field training exercise during the semester. Participation in weekly physical fitness training is expected and should be taken as MILS 2400.

**MILS 2020 - Foundations of Tactical Leadership**

**Credits:** (3)  
**Typically Taught Spring Semester:** Full Sem  
**Description:** This course focuses on leader effectiveness. Course content includes analysis of selected historical leaders and battles using the principles of war and other tenets. Student led discussions highlight lessons learned relative to leadership and organizational success. Oral communications skills are central to this course. A three-hour weekly leadership lab is included as well as one weekend field training exercise during the semester. Participation in weekly physical fitness training is expected and should be taken as MILS 2400.

**MILS 2220 - Advanced Rifle Marksmanship**

**Credits:** (1)  
**Typically Taught Spring Semester:** Full Sem  
**Description:** Open to all Weber State University students. Course provides instruction on the fundamentals of Advanced Rifle Marksmanship. Class is conducted once a week with topics including: Air Rifle, Small Bore firing, and advanced practical exercises of different shooting positions. Prerequisite: MILS 1110 or permission of Instructor. May be repeated two times for credit for a total of two credit hours.

**MILS 2400 - Physical Readiness**

**Credits:** (1)  
**Typically Taught Fall Semester:** Full Sem  
**Typically Taught Spring Semester:** Full Sem  
**Description:** A physical conditioning course that employs U.S. Army principles of fitness. Subjects include: body composition, nutrition, cardiorespiratory fitness, muscle
endurance and strength, circuit training and drills. Students registered for MILS 1010, MILS 1020, MILS 2010, or MILS 2020 are encouraged to enroll in this course to gain the full perspective of the physical demands required to be an Army officer. May be repeated 3 times with a maximum of 4 credit hours.

**MILS 2600 - Leadership Under Fire**

Credits: (3)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: This course will explore both functional and dysfunctional behavior in leadership roles. Using examples from military and civilian leadership, this course will teach leadership techniques essential for future managers and leaders that will be of great value to both civilian and military leaders. It will focus on ethical/moral, historical, and social influences and examine outlook, styles, skills, and behavior essential for providing successful leadership. This will culminate in a hands-on team-building exercise. No prerequisites. Students are NOT required to be enrolled in a ROTC course, nor to do so in the future.

**MILS 2830 - Directed Readings, Projects and Research**

Credits: (1-3)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Independent reading/research on topic(s) of military interest under the supervision of a Military Science faculty member.
Pre-requisite(s): Requires instructor permission. May be repeated 2 times with a maximum of 3 credit hours.

**MILS 2921 - Cadet Initial Entry Training**

Credits: (3)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: A four-week leadership camp conducted at Fort Knox, Kentucky. Designed to introduce students to basic military skills and leadership requirements. Training includes rappelling, marksmanship, small unit tactics, physical fitness, leadership, and adventure training. Credit/no credit grade only.
Pre-requisite(s): Requires instructor permission.

**MILS 2922 - Northern Warfare**

Credits: (2)
Typically Taught Summer Semester: Full Sem
Description: A two week course conducted in Alaska. Provides training in cold weather survival and small unit tactics. Credit/no credit grade only.
Pre-requisite(s): include the completion of the basic course and instructor permission.

**MILS 2923 - Air Assault**

Credits: (2)
Typically Taught Summer Semester: Full Sem
Description: A two week course conducted at an Army installation in the continental U.S. Provides students training in helicopter operations to include sling loading and rappelling. Credit/no credit grade only.
Pre-requisite(s): include successful completion of the basic course and instructor approval.

**MILS 3000 - Leadership in Military History**

Credits: (3)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: The Army Pre-Commissioning Military History course covers military history from early colonial warfare in the eighteenth century to the global war on terrorism in the twenty-first century. The purpose of this course is to lead Reserve Officer Training Corps (ROTC) Cadets to understanding the role military officers have played in the development of our country.
Completion of this block of instruction is a prerequisite for commissioning as a Lieutenant in the United States Army.
Pre-requisite(s): Instructor approval is required.

**MILS 3010 - Adaptive Team Leadership**

Credits: (4)
Typically Taught Fall Semester: Full Sem
Description: Develops leadership skills within the framework of the U.S. Army. This course focuses on theory and application of decision making, planning, organizing, management control and communications. The course also emphasizes small unit tactics and advanced land navigation skills; it includes a three-hour weekly leadership lab. Students must participate in up to three, one-hour physical fitness sessions per week, which may be taken as MILS 4400, to satisfy requirements of the Military
Science minor. One weekend field training exercise is required during the semester.

**MILS 3020 - Leadership in Changing Environments**

Credits: (4)
Typically Taught Spring Semester: Full Sem
Description: Focuses on theory and application of small unit tactics, leadership and land warfare. Subjects include preparing and issuing combat orders, organizing for combat, unit and individual movement techniques, communications and security.
A three-hour weekly leadership lab is included. Students must participate in up to three, one-hour physical fitness sessions per week, which may be taken as MILS 4400, to satisfy requirements of the Military Science minor. One weekend field training exercise is required during the semester.

**MILS 3810 - Experimental Course**

Credits: (1-6)
Experimental
Description: Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript. May be repeated for a total maximum of 6 credit hours.

**MILS 4010 - Mission Command and the Army Profession, Part 1**

Credits: (4)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: This course focuses on the functions and roles of the commander/leader and the staff. Subject matter includes problem solving, planning techniques and procedures, written and oral communications, training management and evaluation systems.
A three-hour weekly leadership lab to enhance leadership skills and apply classroom instruction to hands-on training and execution is included. Students must participate in up to three, one-hour physical fitness sessions per week, which should be taken as MILS 4400, to satisfy requirements of the Military Science minor. One weekend field training exercise is required during the semester.

**MILS 4020 - Mission Command and the Army Profession, Part 2**

Credits: (4)
Typically Taught Spring Semester: Full Sem
Description: A conference course addressing future roles and responsibilities of junior Army officers. Subject matter includes the world environment and future threats to U.S. security, the spectrum of Army requirements, Army modernization initiatives, the laws of war, joint operations and other issues designed to complete the cadet-to-lieutenant process.
A three-hour weekly leadership lab to enhance leadership skills and apply classroom instruction to hands-on training and execution is included. Students must participate in up to three, one-hour physical fitness sessions per week, which should be taken as MILS 4400, to satisfy requirements of the Military Science minor. One weekend field training exercise is required during the semester.

**MILS 4400 - Advanced Physical Readiness**

Credits: (2)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: This course provides advanced instruction in physical fitness employing Army techniques and procedures. Students assist Military Science faculty in the planning/conduct of physical fitness training activities performed by lower division students.
Pre-requisite(s): Requires instructor permission.
Suggested Requisite(s): (Students must be enrolled in one of the following courses: MILS 3010, MILS 3020, MILS 4010, or MILS 4020.)
May be repeated 3 times with a maximum of 8 credit hours.

**MILS 4830 - Directed Readings, Projects and Research**

Credits: (1-3)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Independent reading/research on topics of military interest under the supervision of a Military Science faculty member. For each credit awarded the student will read approximately 1000 pages and prepare a written review or summary.
Pre-requisite(s): Requires instructor permission.
May be repeated for a maximum of 6 credit hours.

**MILS 4921 - Cadet Leadership Course (CLC)**
Credits: (3)
Typically Taught Summer Semester: Full Sem
Description: A five week leadership camp conducted at Fort Lewis, Washington. The Advanced Camp environment stresses small unit leadership under varying and challenging conditions. Credit/no credit grade only.
Pre-requisite(s): Requires instructor approval. Open only to students who have successfully completed basic course requirements, MILS 3010 and MILS 3020.

MILS 4922 - Airborne Operations

Credits: (2)
Typically Taught Summer Semester: Full Sem
Description: A three week course conducted at Fort Benning, Georgia. Provides students training in military sky diving techniques with practical applications. Credit/no credit grade only.
Pre-requisite(s): Requires instructor approval. Prerequisite includes completion of the basic course.

MILS 4923 - Cadet Troop Leader Training

Credits: (2)
Typically Taught Summer Semester: Full Sem
Description: A two week course conducted at an Army installation in the continental U.S. or overseas. Provides firsthand experience in an Army unit. Students learn about military life and the duties of a lieutenant. Credit/no credit grade only.
Pre-requisite(s): MILS 3010, MILS 3020, Advanced Camp, and instructor approval.

MIS 1100 SS - The Digital Society

Credits: (3)
Typically Taught Summer Semester: Full Sem Online
Typically Taught Fall Semester: Full Sem, Full Sem Online
Typically Taught Spring Semester: Full Sem, Full Sem Online
Course Fee: $5.00
Course Fee Purpose: The course fees collected from students enrolled in this class are used for student-related expenditures. Examples of such expenditures are for periodic technology upgrades in the MIS Lab, software licenses, and program assessment materials.
Description: The explosive growth of information technologies in general, and the Internet in particular, has irreversibly changed the way we work and play. This course prepares students to be knowledgeable citizens of cyberspace. It reviews our social institutions and how they are being impacted by information technology as well as the ways in which technology has been shaped by our social institutions. The course also provides hands-on experience with a variety of Internet tools.

MIS 2010 - Business Computer Skills

Credits: (1)
Typically Taught Summer Semester: Full Sem Online
Typically Taught Fall Semester: Full Sem Online
Typically Taught Spring Semester: Full Sem Online
Course Fee: $5.00
Course Fee Purpose: The course fees collected from students enrolled in this class are used for student-related expenditures. Examples of such expenditures are for periodic technology upgrades in the MIS Lab, software licenses, and program assessment materials.
Description: This course prepares all students in business and economics to demonstrate current competence in desktop software commonly used in the business environment. The course covers computer competencies students will use in their business functional and cross-functional core courses, using more complex features of desktop software. It is followed by a hands-on exam that tests these competencies. Credit/No credit.

MIS 2015 - Introduction to Information Systems & Technologies

Credits: (1)
Description: This course introduces the student to the role played by computer technology in business strategy and problem resolution. It also introduces information technologies used in information systems, including: software development, hardware, operating systems, network management, project planning, and career paths. Students will develop their academic MIS program plan. Lecture series by MIS Faculty.
Note: Course not currently being offered.

MIS 2020 - Introduction to Information Systems

Credits: (3)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Course Fee: $30.00
Course Fee Purpose: The course fees collected from students enrolled in this class are used for student-related expenditures. Examples of such expenditures are for periodic technology upgrades in the MIS Lab, software
licenses, and program assessment materials.

**Description:** Overview of the role and use of information systems to support individual, group, and business decision-making. Includes coverage of technology's role in supporting the business decision-making process. It will prepare students to use information technologies effectively to improve productivity and promote competitive position in the marketplace.

**MIS 2030 - Introduction to Business Analytics**

**Credits:** (3)
**Typically Taught Fall Semester:** Full Sem
**Typically Taught Spring Semester:** Full Sem

**Description:** Business analytics refer to the ways in which organizations use data to gain insights and make better decisions, and has become a critical capability for organizations of all types and sizes. It is applied in various business functions including marketing, finance, human resources, operation and strategic planning. This course covers basic analytic methods used by organizations. Students will learn how to explore, manipulate and present data. They will also learn how to use data to develop insights and predictive capabilities by using predictive analytics techniques.

**Pre-requisite(s):** MATH 1040 or QUAN 2600.

**MIS 2040 - Business Analytics with Python**

**Credits:** (3)
**Typically Taught Fall Semester:** Full Sem
**Typically Taught Spring Semester:** Full Sem

**Description:** This course introduces Python within the context of business analytics. Students will learn Python programming basics and be exposed to the business analytics workflow, starting with interacting with SQL databases to query and retrieve data, through data wrangling, reshaping, summarizing, analyzing and ultimately reporting their results.

**Pre-requisite(s):** MATH 1040 or QUAN 2600.

**MIS 2110 - Software Development I**

**Credits:** (3)
**Typically Taught Fall Semester:** Full Sem
**Typically Taught Spring Semester:** Full Sem

**Course Fee:** $30.00

**Course Fee Purpose:** The course fees collected from students enrolled in this class are used for student-related expenditures. Examples of such expenditures are for periodic technology upgrades in the MIS Lab, software licenses, and program assessment materials.

**Description:** This course introduces the student to the fundamentals of software construction using a contemporary programming language. This includes the IDE (Integrated Development Environment), syntaxes of the language, basic programming constructs, data representation, object concepts, programming flow control and problem solving logic. Students will design, program and debug several business application projects.

**Pre-requisite(s):** Earn a "C" or better in MATH 1050, MATH 1080, or MATH 1210 or; earn a "C" or better in any math course for which either MATH 1050 or MATH 1080 or MATH 1090 is a prerequisite or; score 3 or higher on AP Calculus exam or; score 70 or higher on ACCUPLACER College Level Math (CLM) or; score of 26 or higher on Math ACT or; score of 65 or higher on ALEKS.

**MIS 2410 - Information Systems Architecture**

**Credits:** (3)

**Description:** This course provides students with a thorough grounding in computer hardware and operating system software, peripheral devices and contemporary information system architecture, including its structure, theory, and applications.

**Note:** Course not currently being offered.

**MIS 2720 - Data Structures and Algorithms**

**Credits:** (3)

**Description:** This course introduces the basics of specifying abstract data types, control structures and modularization, and using them to design programs. Commonly used data structures and algorithms are studied. Emphasis is made on choosing data structures and algorithms appropriate for solving given business problems.

**Pre-requisite(s):** MATH 1050 and MIS 2110.

**Note:** Course not currently being offered.

**MIS 2810 - Experimental Course**

**Credits:** (1-6)

**Experimental**

**Description:** Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript. May be repeated for a total maximum of 6 credit hours.
MIS 2891 - Cooperative Work Experience

Credits: (1)
Description: Open to all associate's degree-seeking students who have been selected to serve an internship in the information technology field or who have identified a special MIS project with their current employer, subject to approval by the Management Information Systems Department.
Pre-requisite(s): Department Approval.

MIS 2892 - Cooperative Work Experience

Credits: (2)
Description: Open to all associate's degree-seeking students who have been selected to serve an internship in the information technology field or who have identified a special MIS project with their current employer, subject to approval by the Management Information Systems Department.
Pre-requisite(s): Department Approval.

MIS 2893 - Cooperative Work Experience

Credits: (3)
Description: Open to all associate's degree-seeking students who have been selected to serve an internship in the information technology field or who have identified a special MIS project with their current employer, subject to approval by the Management Information Systems Department.
Pre-requisite(s): Department Approval.

MIS 2894 - Cooperative Work Experience

Credits: (4)
Description: Open to all associate's degree-seeking students who have been selected to serve an internship in the information technology field or who have identified a special MIS project with their current employer, subject to approval by the Management Information Systems Department.
Pre-requisite(s): Department Approval.

MIS 3210 - Database Design and Implementation

Credits: (3)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Course Fee: $30.00

Course Fee Purpose: The course fees collected from students enrolled in this class are used for student-related expenditures. Examples of such expenditures are for periodic technology upgrades in the MIS Lab, software licenses, and program assessment materials.

Description: This course provides a comprehensive coverage of business database systems. Students will learn how to design, implement and manage databases. They will learn both GUI interface and how to use the Structured Query Language (SQL). They will also gain experience in using an enterprise level, multi-user database.
Pre-requisite(s): MIS 2110 or MIS 2020 and earn a "C" or better in any math course for which either MATH 1050, MATH 1080, or MATH 1090 is a prerequisite or score 3 or higher on AP Calculus exam or score 70 or higher on ACCUPLACER College Level Math (CLM) or score of 26 or higher on Math ACT or score of 65 or higher on ALEKS.

MIS 3220 - Business Intelligence

Credits: (3)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem

Description: This course provides an understanding of the concepts of Business Intelligence (BI) as an information technology approach of data collection and data analysis to help enterprise users make better managerial decisions. The course explores the detailed discussion of the analysis, design, and implementation of systems for BI including enterprise data-warehousing, knowledge management systems, big data, and text mining. The course will help students learn analytical components and technologies to integrate, analyze and report data. The course will utilize Microsoft BI tools including Microsoft Power BI desktop, SQL Server Integration Services (SSIS), SQL Server Analysis Services (SSAS) and SQL Server Reporting Services (SSRS).
Pre-requisite(s): MIS 2030.

MIS 3230 - Data Mining for Business

Credits: (3)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem

Description: This course will examine how data mining technologies can be used to improve decision-making. Students will study the principles and techniques of data mining, including gaining knowledge of the algorithms and computational paradigms that allow computers to find patterns in large datasets. Students will examine real-world examples and cases to place data-mining techniques in
context, to develop data-analytic thinking, and to illustrate that proper application is as much an art as it is a science.  

**Pre-requisite(s):** MIS 2030.

**MIS 3610 - Networks & Data Communications I**

Credits: (3)  
**Typically Taught Fall Semester:** Full Sem  
**Typically Taught Spring Semester:** Full Sem  
**Course Fee:** $30.00  
**Course Fee Purpose:** The course fees collected from students enrolled in this class are used for student-related expenditures. Examples of such expenditures are for periodic technology upgrades in the MIS Lab, software licenses, and program assessment materials.  
**Description:** This course provides an introduction to the design, operation, and management of telecommunication systems. It covers computer network definitions, concepts and principles, including (but not limited to): server management; topologies; protocols; standards; and fundamental concepts related to data communication networks.  
**Pre-requisite(s):** MIS 2020 or MIS 2410.

**MIS 3620 - Networks and Data Communications II**

Credits: (3)  
**Typically Taught Fall Semester:** Full Sem  
**Course Fee:** $30.00  
**Course Fee Purpose:** The course fees collected from students enrolled in this class are used for student-related expenditures. Examples of such expenditures are for periodic technology upgrades in the MIS Lab, software licenses, and program assessment materials.  
**Description:** In this intensive hands-on course, the student will acquire the skills and techniques needed to configure, troubleshoot and support reliable TCP/IP internetworks. The student will learn the essentials of building an internetwork, including routing, configuring the Domain Name Server (DNS), setting up and managing a web server, configuring a firewall and IDS, and standards-based email. Students will also participate in configuring clients, redesigning networks and troubleshooting routing.  
**Pre-requisite(s):** BSAD 2899 and MIS 3610.

**MIS 3700 - E-business Technologies & Web Development**

Credits: (3)  
**Typically Taught Spring Semester:** Full Sem

**Course Fee:** $30.00  
**Course Fee Purpose:** The course fees collected from students enrolled in this class are used for student-related expenditures. Examples of such expenditures are for periodic technology upgrades in the MIS Lab, software licenses, and program assessment materials.  
**Description:** This course provides students with knowledge of technologies needed in planning, implementing and supporting web-hosted applications and on-line commerce. Topics include web and commerce server design and deployment, search engines n-tier web architecture and supporting software, client-side/server-side programming with data-bound controls and session management, e-business application languages, markup languages, on-line payment mechanisms, systems reliability and security, scalability analysis, and solutions sourcing.  
**Pre-requisite(s):** BSAD 2899 and MIS 2110, or MIS 2020.

**MIS 3710 - Global Issues in Information Technology**

Credits: (3)  
**Typically Taught Fall Semester:** Full Sem  
**Typically Taught Spring Semester:** Full Sem  
**Description:** This course shows how information technology is used as a key competitive advantage by multinational and transnational businesses. Topics include global perspectives on coordination and control, cultural dimensions, and geo-political considerations of global information technology applications.  
**Pre-requisite(s):** BSAD 2899.

**MIS 3720 - Software Development II**

Credits: (3)  
**Description:** This course builds on the software development skills learned in Software Development I. Topics include class hierarchies, inheritance and interfaces, object aggregation, data structure and collections, file management, threading, network programming, and the design of multi-tiered, distributed computing applications involving relational databases.  
**Pre-requisite(s):** BSAD 2899 and MIS 2720.  
Note: Course not currently being offered.

**MIS 3730 - Systems Analysis and Design**

Credits: (3)  
**Description:** This course provides the knowledge and skills to design and implement computer-based systems to solve business problems. Topics include feasibility studies,
requirement analysis, system design and development, implementation and testing. Students will learn the use of appropriate methodologies and tools, including object-oriented modeling and the use of computer-aided software engineering (CASE).

Pre-requisite(s): BSAD 2899 and MIS 3210.
Note: Course not currently being offered.

MIS 3740 - Business Machine Learning

Credits: (3)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: This course is designed to teach and give students hands-on experience with cutting-edge machine learning methods used frequently in business contexts. Many companies have made significant contributions to the field of data analytics with products and services they've launched. This class is designed to prepare students to participate in such analysis to make significant business impact. We examine Netflix- and Amazon-style recommender systems and market basket analyses, customer segmentation and classification, Zillow-style prediction of home sale prices, and other business-relevant examples.
Pre-requisite(s): MIS 2030.

MIS 3750 - Electronic Business Communications

Credits: (3)
Description: This course gives students knowledge regarding the best practices in designing or developing electronic presentations, meetings, and collaborations. This course also familiarizes students with technologies fostering effective communication in virtual situations.
Pre-requisite(s): BSAD 2899, MGMT 3200 or PS 3250.
Note: Course not currently being offered.

MIS 4600 - Information Security I

Credits: (3)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Course Fee: $30.00
Course Fee Purpose: The course fees collected from students enrolled in this class are used for student-related expenditures. Examples of such expenditures are for periodic technology upgrades in the MIS Lab, software licenses, and program assessment materials.
Description: This course looks at management issues and practical implications related to securing information systems. This course focuses on the threat environment, security policy and planning, cryptography, secure networks, access control, firewalls, host hardening, application security, data protection, incident response, and networking and a review of TCP/IP.
Pre-requisite(s): Business Foundations; BSAD 2899 and MIS 2020, or MIS 3610.

MIS 4620 - Information Security Basics

Credits: (3)
Typically Taught Spring Semester: Full Sem
Course Fee: $30.00
Course Fee Purpose: The course fees collected from students enrolled in this class are used for student-related expenditures. Examples of such expenditures are for periodic technology upgrades in the MIS Lab, software licenses, and program assessment materials.
Description: In a computer-literate age, sophisticated criminals use computers in their illegal and destructive activities. This course discusses cybercrime and teaches students to understand networks; the phases of computer hacking; and setting up a secure environment.
Pre-requisite(s): BSAD 2899 and MIS 2410 or MIS 3610.
Note: Course not currently being offered.

MIS 4700 - Information Security II

Credits: (3)
Typically Taught Spring Semester: Full Sem
Course Fee: $30.00
Course Fee Purpose: The course fees collected from students enrolled in this class are used for student-related expenditures. Examples of such expenditures are for periodic technology upgrades in the MIS Lab, software licenses, and program assessment materials.
Description: This course covers the basic principles and concepts in information security and information assurance. It examines the technical, operational, and organizational issues of securing information systems. Topics include operating system issues, viruses, security awareness at the executive, technical and user levels, physical security, personnel security issues, policies, procedures, and the need for an enterprise security organization. Case studies and exercises in the computer lab will be used to provide examples of the need for organizations to develop security procedures and policies.
Pre-requisite(s): BSAD 2899 and MIS 4600.

MIS 4710 - Enterprise Software Development

Credits: (3)
Typically Taught Spring Semester: Full Sem
Course Fee: $30.00
Course Fee Purpose: The course fees collected from students enrolled in this class are used for student-related expenditures such as periodic technology upgrades in the MIS Lab, software licenses, and materials.
Description: This course introduces students to the concept of a business as an integrated set of business processes and associated systems designed to deliver value to customers. It focuses on enterprise systems, product lifecycle management, and supply chain management. This course also focuses on how to effectively manage enterprise projects with respect to organizational constraints. Students will learn how to manage project initiation, planning, execution, monitoring and closing.
Pre-requisite(s): BSAD 2899 and MIS 2020.

**MIS 4720 - Emerging Information Technologies**

Credits: (3)
Variable Title
Typically Taught Fall Semester: Full Sem
Course Fee: $30.00
Course Fee Purpose: The course fees collected from students enrolled in this class are used for student-related expenditures. Examples of such expenditures are for periodic technology upgrades in the MIS Lab, software licenses, and program assessment materials.
Description: New information technologies can give early adopters significant competitive advantage when used with careful planning, or they can mean disaster if hastily implemented. This course covers how to conduct an environmental scan toward evaluating and implementing new information technologies.
Pre-requisite(s): BSAD 2899, and MIS 2410, or MIS 2020.

**MIS 4730 - IT Project Management and Systems Design**

Credits: (3)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Course Fee: $30.00
Course Fee Purpose: The course fees collected from students enrolled in this class are used for student-related expenditures. Examples of such expenditures are for periodic technology upgrades in the MIS Lab, software licenses, and program assessment materials.
Description: This course covers project management principles, methodology, and tools. It also provides the knowledge and skills to design and implement computer-based systems to solve business problems. Topics include the planning and management of IT and software development projects, requirement analysis, system design and development, implementation and testing.
Pre-requisite(s): Business Foundations; BSAD 2899 and MIS 3210 and MIS 3610 and MIS 2110.

**MIS 4801 - Individual Projects**

Credits: (1)
Description: This course is open only to senior MIS majors. Students will be required to complete an individual project, program, system, or research paper which will enhance their skills and marketability.
Pre-requisite(s): BSAD 2899, Management Information Systems Department approval, and Senior standing.

**MIS 4802 - Individual Projects**

Credits: (2)
Description: This course is open only to senior MIS majors. Students will be required to complete an individual project, program, system, or research paper which will enhance their skills and marketability.
Pre-requisite(s): BSAD 2899, Management Information Systems Department approval, and Senior standing.

**MIS 4803 - Individual Projects**

Credits: (3)
Description: This course is open only to senior MIS majors. Students will be required to complete an individual project, program, system, or research paper which will enhance their skills and marketability.
Pre-requisite(s): BSAD 2899, Management Information Systems Department approval, and Senior standing.

**MIS 4810 - Experimental Course**

Credits: (1-6)
Experimental
Description: Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript. May be repeated for a total maximum of 6 credit hours.

**MIS 4850 - Information Systems & Technology Study Abroad**

Credits: (1-3)
Description: This course is designed for students who wish to explore information systems and technology theory and practice in countries other than the U.S. Students will study global information systems as offered through a partner university (or other university with department
MIS 4891 - Cooperative Work Experience

Credits: (1)
Description: A structured professional-level field experience. The student will be counseled and supervised as he/she applies and integrates the knowledge and skills obtained through the MIS courses.
Pre-requisite(s): BSAD 2899 and instructor approval.

MIS 4892 - Cooperative Work Experience

Credits: (2)
Description: A structured professional-level field experience. The student will be counseled and supervised as he/she applies and integrates the knowledge and skills obtained through the MIS courses.
Pre-requisite(s): BSAD 2899 and instructor approval.

MIS 4893 INT - Cooperative Work Experience

Credits: (3)
Description: A structured professional-level field experience. The student will be counseled and supervised as he/she applies and integrates the knowledge and skills obtained through the MIS courses.
Pre-requisite(s): BSAD 2899 and instructor approval.

MIS 4894 - Cooperative Work Experience

Credits: (4)
Description: A structured professional-level field experience. The student will be counseled and supervised as he/she applies and integrates the knowledge and skills obtained through the MIS courses.
Pre-requisite(s): BSAD 2899 and instructor approval.

MIS 5930G - Professional Development Workshop in Information Technology

Credits: (1–4)
Description: Information technology professionals must remain current with new technologies to remain competitive in their careers. This course offers professional development in new systems and software as they enter the mainstream of information technology practice.
Pre-requisite(s): Permission of instructor.

MIS 6610 - Information and Communications Technologies for e-Business

Credits: (3)
Description: Covers the information and communications technology infrastructure required to support a robust e-business activity. Issues such as reliability, scalability, security, and responsiveness as well as n-tier architectures are reviewed.
Pre-requisite(s): MACC, MBA, or MIS Certificate program standing.

MIS 6620 - Databases & Information Systems

Credits: (3)
Description: This course covers the role of database technology in information systems. Through hands-on and conceptual knowledge, students will learn how databases are used to construct and operate information systems designed to support decision making. Various aspects of database systems including both correct methods and problems encountered during the design, implementation and operation of database systems will be covered. Students will gain hands-on familiarity with a relational database system.
Pre-requisite(s): Admittance to MACC or MBA program and MIS 2020 or equivalent.

MIS 6800 - Directed Studies

Credits: (1)
Description: Directed individual study and research on special topics related to information assurance.
Pre-requisite(s): Approval of Management Information Systems Department Chair and course instructor. May be repeated for a cumulative total of three credit hours.

MKTG 3010 - Marketing Concepts and Practices

Typically Taught Summer Semester: 1st Blk, Full Sem Online
Typically Taught Fall Semester: Full Sem, Full Sem Online
Typically Taught Spring Semester: Full Sem, Full Sem Online
Description: This course includes planning,
implementation, and control of the marketing process; consumer behavior; marketing research; segmentation and target marketing; and consideration of price, place, and promotion.

**MKTG 3100 - Consumer Behavior**

**Credits:** (3)  
**Typically Taught Fall Semester:** Full Sem  
**Typically Taught Spring Semester:** Full Sem  
**Description:** The application of psychological, sociological, and anthropological findings to the purchase and consumption of goods and services by ultimate and industrial consumers.  
**Pre-requisite/Co-requisite:** Prerequisite or concurrent enrollment: MKTG 3010.

**MKTG 3200 - Selling and Sales Management**

**Credits:** (3)  
**Typically Taught Fall Semester:** Full Sem  
**Typically Taught Spring Semester:** Full Sem  
**Description:** Theory, methods, and techniques of personal selling in professional settings including analysis of buyer behavior, the delivery of customer satisfaction, and integration of personal selling with other marketing communication tools. Sales management includes managing the sales force, salesperson selection, deployment, compensation, training, field supervision and industrial marketing management.  
**Pre-requisite(s):** MKTG 3010.

**MKTG 3450 - Promotion Management**

**Credits:** (3)  
**Typically Taught Fall Semester:** Full Sem  
**Typically Taught Spring Semester:** Full Sem  
**Description:** Strategic development of advertising, sales, sales management, public relations, and sales promotion programs.  
**Pre-requisite(s):** BSAD 2899, MKTG 3010. Prerequisite or concurrent enrollment: MKTG 3100.

**MKTG 3500 - Services and Sports Marketing**

**Credits:** (3)  
**Typically Taught Fall Semester:** Full Sem  
**Description:** Marketing education has traditionally focused on the marketing of goods. However, services account for the majority of the economic activity in the United States and much of the developed world. In order to successfully develop and manage service products, marketers must understand the characteristics that differentiate them from conventionally manufactured goods. This course aims to systematically study these characteristics and the challenges they present to marketers in service organizations. The latter half of the course will focus on sports marketing as a special form of services marketing.  
**Pre-requisite(s):** BSAD 2899, MKTG 3010.

**MKTG 3600 GLB - International Marketing**

**Credits:** (3)  
**Typically Taught Fall Semester:** Full Sem Online  
**Typically Taught Spring Semester:** Full Sem Online  
**Description:** In this course students will learn the problems and procedures of marketing in foreign countries, including effects of foreign cultures and marketing systems on the design of marketing programs.  
**Pre-requisite(s):** BSAD 2899; MKTG 3010.

**MKTG 3700 - Business Studies Abroad - International Marketing**

**Credits:** (3)  
**Description:** Basic principles of international marketing. Fundamentals of international market research including macro and micro-level analysis. Discusses international marketing as part of a global strategy. This course is taught at Fachhochschule Hof, Germany during each fall semester. Students enrolled in this course have to participate in the Study Abroad Program (Contact: Doris Geide-Stevenson, ext. 7634, dgsteven@weber.edu).  
**Pre-requisite(s):** BSAD 2899, MKTG 3010.

**MKTG 4200 - Digital Marketing**

**Credits:** (3)  
**Typically Taught Fall Semester:** Full Sem  
**Typically Taught Spring Semester:** Full Sem  
**Description:** This course is an elective course for Marketing majors that integrates proven marketing concepts with contemporary tools. Topics will include, but are not limited to, the modern consumer decision process, paid search, website usability, search engine optimization, social media, and mobile marketing.  
**Pre-requisite(s):** BSAD 2899, MKTG 3010.

**MKTG 4300 - Social Media Marketing & Strategy**
MKTG 4400 - Marketing Strategy

Credits: (3)
Typically Taught Fall Semester: Online
Typically Taught Spring Semester: Online
Description: This course centers on gaining and sustaining competitive advantages. It entails analyzing customers, competitors, and internal capabilities; then making appropriate product, pricing, promotion, and distribution decisions.
Pre-requisite(s): BSAD 2899; ACTG 2020; MGMT 3200 or PS 3250; ENGL 3100 or ENGL 3530 or SCM 4500.

MKTG 4800 - Independent Research

Credits: (1-3)
Description: Directed research and study on an individual basis.
Pre-requisite(s): BSAD 2899; Senior Standing; Written Instructor Approval.
May be repeated until a total of 4 hours credit is accumulated.

MKTG 4850 - Marketing Study Abroad

Credits: (1-3)
Description: This course is designed for students who wish to explore marketing theory and practice in countries other than the U.S. Students will study international marketing as offered through a partner university (or other university with department chair approval).
Pre-requisite(s): BSAD 2899.
May be repeated once up to 6 credits.

MKTG 4860 INT - Marketing Internship

Credits: (3)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Effective professional-level field experience. The student will be counseled and supervised as he/she applies and integrates the knowledge and skills obtained through the Marketing courses.
Pre-requisite(s): BSAD 2899; Instructor approval.

MLS 1001 - Online Orientation for AAS Degree

Credits: (1)
Typically Taught Summer Semester: Full Sem Online
Typically Taught Fall Semester: Full Sem Online
Typically Taught Spring Semester: Full Sem Online
Description: This course is designed to prepare the student for the online environment and specifics of the MLS program. Course components include: study and computer skills, learning styles, MLS student handbook, library tutorial, faculty introductions, contact and troubleshooting information, and academic advisement tailor-made specifically for AAS degree MLS students online.

MLS 1010 INT - Core Clinical Laboratory Skills

Credits: (4)
Typically Taught Summer Semester: Full Sem Online
Typically Taught Fall Semester: Full Sem Online
Typically Taught Spring Semester: Full Sem Online
Description: The MLS 1010 course is designed to teach core clinical laboratory skills to individuals from various health care professions. The curriculum will focus on basic laboratory methods in quality control, quality assurance, information recording and transfer, normal and abnormal laboratory values, and problem recognition. Students will receive basic technical instruction in laboratory safety, microscopy, phlebotomy, specimen collection and processing, and laboratory instrumentation in the areas of hematology, serology, urinalysis, and clinical chemistry and microbiology. Students must have the support of a clinical laboratory to fulfill the laboratory requirement. The laboratory component will address applications with a focus on Point of Care testing (POCT). Students will be required to spend a minimum of 4 unpaid hours per week working on laboratory competency. Upon successful completion of the course students will receive a Certificate of Completion from the Dr. Ezekiel R. Dumke College of
Health Profession's Clinical Laboratory Assistant (CLA) program.

**Pre-requisite(s):** Departmental Approval.

**MLS 1113 - Introduction to Medical Laboratory Practices**

**Credits:** (4)

**Typically Taught Summer Semester:** Full Sem Online

**Typically Taught Fall Semester:** Full Sem, Full Sem Online

**Typically Taught Spring Semester:** Full Sem, Full Sem Online

**Course Fee:** $52.00

**Course Fee Purpose:** The course fees that are assigned to this course will pay for consumables (e.g. pipette tips and reagents), non-consumables (e.g. instrumentation), and in some cases software and instrument maintenance.

**Description:** Principles and applications to laboratory testing including safe practices for the laboratory practitioner, specimen quality assurance, phlebotomy, urinalysis, basic concepts in clinical immunology, clinical chemistry, and clinical microbiology. Laboratory session addresses the principles and applications involved in medical laboratory assisting to include safety, microscopy, specimen processing, quality assurance, phlebotomy, and urinalysis; with a focus on Point of Care testing (POCT) in clinical immunology, clinical chemistry, and clinical microbiology. *Acceptance into the Online MLS AAS Program required to take this course Online.

**Note:** *Acceptance into the MLS AAS Program required.

**MLS 1114 - Principles of Hematology and Hemostasis**

**Credits:** (4)

**Typically Taught Summer Semester:** Full Sem Online

**Typically Taught Fall Semester:** Full Sem, Full Sem Online

**Typically Taught Spring Semester:** Full Sem, Full Sem Online

**Course Fee:** $52.00

**Course Fee Purpose:** The course fees that are assigned to this course will pay for consumables (e.g. pipette tips and reagents), non-consumables (e.g. instrumentation), and in some cases software and instrument maintenance.

**Description:** Fundamental theories of hematopoiesis, routine laboratory evaluation of blood components using standard instrumentation and microscopic methods, including safety and quality control. Fundamental theories of hemostasis and introduction to abnormal hematology. Introduction to routine laboratory methods in hemostasis.

At least one semester of chemistry and one semester of anatomy/physiology is recommended prior to taking this course. *Acceptance into the Online MLS AAS Program required to take this course Online.

**Pre-requisite(s):** MLS 1113. *Acceptance into the MLS AAS Program required.

**MLS 2003 - Applied Laboratory Mathematics and Operations**

**Credits:** (3)

**Typically Taught Summer Semester:** Full Sem Online

**Typically Taught Fall Semester:** Full Sem, Full Sem Online

**Typically Taught Spring Semester:** Full Sem, Full Sem Online

**Course Fee:** $52.00

**Course Fee Purpose:** The course fees that are assigned to this course will pay for consumables (e.g. pipette tips and reagents), non-consumables (e.g. instrumentation), and in some cases software and instrument maintenance.

**Description:** A discipline-specific course that covers basic laboratory mathematics and statistics, along with applications to discipline-specific areas. Topics to include; reagent preparation, specimen dilution protocols, quality assurance and quality control, practical applications of common statistical tests, and method comparison.

**MLS 2210 - Principles of Immunohematology**

**Credits:** (5)

**Typically Taught Summer Semester:** Full Sem Online

**Typically Taught Fall Semester:** Full Sem Online

**Typically Taught Spring Semester:** Full Sem Online

**Course Fee:** $65.00

**Course Fee Purpose:** The course fees that are assigned to this course will pay for consumables (e.g. pipette tips and reagents), non-consumables (e.g. instrumentation), and in some cases software and instrument maintenance.

**Description:** Lecture and laboratory covering the theory and principles of Immunohematology relevant to blood group serology, antibody detection and identification, compatibility testing, component preparation and therapy in blood transfusion service, quality controls, donor screening and phlebotomy, transfusion reactions and hemolytic disease of the newborn.

**Pre-requisite(s):** MLS 1113. *Acceptance into the MLS AAS Program required.

**MLS 2211 - Principles of Clinical Chemistry I**

**Credits:** (4)

**Typically Taught Summer Semester:** Full Sem - Online

**Typically Taught Fall Semester:** Full Sem, Full Sem - Online

**Typically Taught Spring Semester:** Full Sem - Online
**Course Fee:** $65.00

**Course Fee Purpose:** The course fees that are assigned to this course will pay for consumables (e.g. pipette tips and reagents), non-consumables (e.g. instrumentation), and in some cases software and instrument maintenance.

**Description:** Basic concepts and techniques in clinical chemistry and quality control utilizing manual and automated laboratory procedures. Emphasis on blood and body fluid assessments of carbohydrates, bilirubin, non-protein nitrogen testing and electrolyte acid/base balance.

**Pre-requisite(s):** CHEM 1110 and CHEM 1120 or CHEM 1210 and CHEM 1220.

*Acceptance into the MLS AAS Program required

**MLS 2212 - Principles of Clinical Microbiology I**

**Credits:** (5)

**Typically Taught Summer Semester:** Full Sem - Online
**Typically Taught Fall Semester:** Full Sem, Full Sem - Online
**Typically Taught Spring Semester:** Full Sem - Online

**Course Fee:** $52.00

**Course Fee Purpose:** The course fees that are assigned to this course will pay for consumables (e.g. pipette tips and reagents), non-consumables (e.g. instrumentation), and in some cases software and instrument maintenance.

**Description:** This course provides an in-depth coverage of clinically significant pathogenic cocci and Gram negative rods, including epidemiology, pathogenicity, and procedures for traditional laboratory identification.

**Pre-requisite/Co-requisite:** MICR 1113 or MICR 2054.

*Acceptance into the MLS AAS Program required

**MLS 2213 - Principles of Clinical Chemistry II**

**Credits:** (4)

**Typically Taught Summer Semester:** Full Sem - Online
**Typically Taught Fall Semester:** Full Sem - Online
**Typically Taught Spring Semester:** Full Sem, Full Sem - Online

**Course Fee:** $65.00

**Course Fee Purpose:** The course fees that are assigned to this course will pay for consumables (e.g. pipette tips and reagents), non-consumables (e.g. instrumentation), and in some cases software and instrument maintenance.

**Description:** Continuation of MLS 2211 with the introduction to methods for the assessment of proteins, lipids, enzymology, therapeutic drug monitoring, toxicology and basic endocrinology.

**Pre-requisite(s):** MLS 2211.

*Acceptance into the MLS AAS Program required

**MLS 2214 - Principles of Clinical Microbiology II**

**Credits:** (5)

**Typically Taught Summer Semester:** Full Sem - Online
**Typically Taught Fall Semester:** Full Sem - Online
**Typically Taught Spring Semester:** Full Sem, Full Sem - Online

**Course Fee:** $52.00

**Course Fee Purpose:** The course fees that are assigned to this course will pay for consumables (e.g. pipette tips and reagents), non-consumables (e.g. instrumentation), and in some cases software and instrument maintenance.

**Description:** This course is a continuation of MLS 2212 including, antimicrobial testing, clinical mycology, virology, parasitology and miscellaneous clinical bacteria including Gram positive bacteria, mycobacteria, and anaerobes.

**Pre-requisite(s):** MLS 2212. *Acceptance into the MLS AAS Program required

**MLS 2256 INT - Supervised Clinical Experience I**

**Credits:** (1)

**Typically Taught Spring Semester:** Full Sem

**Course Fee:** $13.00

**Course Fee Purpose:** The course fees that are assigned to this course will pay for consumables (e.g. pipette tips and reagents), non-consumables (e.g. instrumentation), and in some cases software and instrument maintenance.

**Description:** Off campus supervised clinical experiences administered in conjunction with clinical faculty in WSU affiliated health care institutions. Offered CR/NC only.

**Co-Requisite(s):** MLS 2257.

*Acceptance into the MLS AAS Program required

**Online students receive credit for clinical experience.

**MLS 2257 INT - Supervised Clinical Experience II**

**Credits:** (1)

**Typically Taught Spring Semester:** Full Sem

**Course Fee:** $13.00

**Course Fee Purpose:** The course fees that are assigned to this course will pay for consumables (e.g. pipette tips and reagents), non-consumables (e.g. instrumentation), and in some cases software and instrument maintenance.

**Description:** Off campus supervised clinical experiences
administered in conjunction with clinical faculty in WSU affiliated health care institutions. Offered CR/NC only.

**Co-Requisite(s):** MLS 2256.

Online students receive credit for clinical experience.

*Acceptance into the MLS AAS Program required

**MLS 2830 - Directed Reading**

Credits: (1-3)
Typically Taught Summer Semester: Full Sem, Full Sem Online
Typically Taught Fall Semester: Full Sem, Full Sem Online
Typically Taught Spring Semester: Full Sem, Full Sem Online

Description: Topics in Laboratory Medicine under the direction of departmental faculty advisor.

*Acceptance into the MLS AAS Program required  May be repeated for a maximum of 6 hours.

**MLS 2920 - Short Courses, Workshops, Institutes, and Special Programs**

Credits: (1-6)
Workshop
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem

Description: Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript. May be repeated for a total maximum of 6 credit hours.

Note: Acceptance into the MLS AAS Program required.

**MLS 3301 - Online Orientation for BS Degree**

Credits: (2)
Typically Taught Summer Semester: Full Sem Online
Typically Taught Fall Semester: Full Sem Online
Typically Taught Spring Semester: Full Sem Online

Description: This course is designed to prepare the student for the online environment and specifics of the MLS program. Course components include: study and computer skills, learning styles, MLS student handbook, library tutorial, faculty introductions, contact and troubleshooting information, academic advisement, Power Point Presentations, an abbreviated overview of the core MLS disciplines such as hematology, clinical chemistry, clinical microbiology, clinical immunohematology, and a short referenced paper writing and using library resources tailored specifically for BS degree MLS students online.

**MLS 3302 - Biostatistics, Research Methods, and Laboratory Practices**

Credits: (4)
Typically Taught Summer Semester: Full Sem Online
Typically Taught Fall Semester: Full Sem, Full Sem Online
Typically Taught Spring Semester: Full Sem Online

Course Fee: $0.00

Course Fee Purpose: The course fees that are assigned to this course will pay for consumables (e.g. pipette tips and reagents), non-consumables (e.g. instrumentation), and in some cases software and instrument maintenance.

Description: Advanced theory to include laboratory instrument systems comparison, evaluation, and CLIA 88 validation procedures with emphasis on scientific research design and statistical analysis. Interrelated topics in the medical laboratory sciences to include educational strategies for laboratory personnel, approaches to workload management, budgeting and marketing strategies for laboratory services. Students also learn about and evaluate the new diagnostic technology available to medical laboratories, as well as learning how to select, evaluate, design, perform, and document CLIA-88 acceptable validations studies on new chemistry instrumentation or analytical methods. Interrelated topics in the medical laboratory to include workload management, designing and implementing standards for quality assurance, budgeting laboratory operations, and investigative concepts related to new method and instrument evaluation, selection, and validation.

**Acceptance into the MLS BS Program required

**MLS 3310 - Advanced Immunohematology**

Credits: (4)
Typically Taught Summer Semester: Full Sem Online
Typically Taught Fall Semester: Full Sem, Full Sem Online
Typically Taught Spring Semester: Full Sem Online

Course Fee: $52.00

Course Fee Purpose: The course fees that are assigned to this course will pay for consumables (e.g. pipette tips and reagents), non-consumables (e.g. instrumentation), and in some cases software and instrument maintenance.

Description: Advanced blood banking theory and specialized procedures as they pertain to transfusion, quality assurance and regulatory issues pertaining to Transfusion Medicine. **Acceptance into the MLS BS Program required

1638
**MLS 3312 - Clinical Laboratory Immunology and Virology**

Credits: (4)
Typically Taught Summer Semester: Full Sem Online
Typically Taught Fall Semester: Full Sem Online
Typically Taught Spring Semester: Full Sem, Full Sem Online
Course Fee: $52.00

**Course Fee Purpose:** The course fees that are assigned to this course will pay for consumables (e.g. pipette tips and reagents), non-consumables (e.g. instrumentation), and in some cases software and instrument maintenance.

**Description:** This course provides MLS students with clinical immunology theory and simulated laboratory experience necessary to prepare students for a career in a clinical laboratory setting. The course will be divided into four sections: basic concepts in immunology, clinical immunology techniques, immune related disease states, and diagnostic virology and will focus heavily on clinical immunology laboratory methods as well as in-depth clinical immunology techniques applicable for the clinical laboratory sciences student. **Acceptance into the MLS BS Program required**

**MLS 3313 - Advanced Hematology and Hemostasis**

Credits: (4)
Typically Taught Summer Semester: Full Sem Online
Typically Taught Fall Semester: Full Sem, Full Sem Online
Typically Taught Spring Semester: Full Sem Online
Course Fee: $52.00

**Course Fee Purpose:** The course fees that are assigned to this course will pay for consumables (e.g. pipette tips and reagents), non-consumables (e.g. instrumentation), and in some cases software and instrument maintenance.

**Description:** Correlation of medical laboratory hematology and hemostasis with emphasis on hematopathology specialized procedures and hematological abnormalities in human cellular components. Routine and specialized coagulation procedures will also be used to detect hemorrhagic and thrombotic problems.

**Pre-requisite(s):** Acceptance into the BS program required

**MLS 3314 - Advanced Clinical Chemistry**

Credits: (4)
Typically Taught Summer Semester: Full Sem - Online
Typically Taught Fall Semester: Full Sem - Online
Typically Taught Spring Semester: Full Sem, Full Sem - Online
Course Fee: $39.00

**Course Fee Purpose:** The course fees that are assigned to this course will pay for consumables (e.g. pipette tips and reagents), non-consumables (e.g. instrumentation), and in some cases software and instrument maintenance.

**Description:** This problem-solving oriented course provides a review of basic clinical chemistry test results and then goes deeper and allows students to make connections to organ-related diseases, such as renal, hepatic, and endocrine diseases. The students will learn how to use clinical correlation as a quality assurance tool to detect patient testing errors. Students also learn about and evaluate the new diagnostic technology available to medical laboratories. Students also learn about and evaluate the new diagnostic technology available to medical laboratories, as well as learning how to select, evaluate, design, perform, and document CLIA-88 acceptable validations studies on new chemistry instrumentation or analytical methods. Interrelated topics in the medical laboratory include workload management, and designing and implementing standards for quality assurance. Additionally, Therapeutic Drug Monitoring and Toxicology studies are presented. Urinalysis is also reviewed throughout the semester, to include the full scope of both microscopic and macroscopic evaluations.

**Pre-requisite(s):** Acceptance into the BS program.

**MLS 3316 - Advanced Clinical Microbiology and Molecular Diagnostics**

Credits: (4)
Typically Taught Summer Semester: Full Sem - Online
Typically Taught Fall Semester: Full Sem - Online
Typically Taught Spring Semester: Full Sem, Full Sem - Online
Course Fee: $52.00

**Course Fee Purpose:** The course fees that are assigned to this course will pay for consumables (e.g. pipette tips and reagents), non-consumables (e.g. instrumentation), and in some cases software and instrument maintenance.

**Description:** This course begins with a comprehensive review of introductory clinical bacteriology and mycology, along with a culture site approach to clinical bacteriology for the laboratory identification of pathogens by traditional manual methods. Diagnostic molecular biology of infectious microorganisms will also be covered and will include background of nucleic acid chemistry along with current molecular methodologies of detection.

**MLS 4409 - Clinical Correlation**
Typically Taught Summer Semester: Full Sem Online
Typically Taught Fall Semester: Full Sem, Full Sem Online
Typically Taught Spring Semester: Full Sem Online

Description: This course will enable students to better integrate material from all the major medical laboratory science disciplines including Blood Bank, Chemistry, Hematology, Immunology, Microbiology, and Urinalysis. The case studies presented will also include information about the pathophysiology, etiology and epidemiology. Students will correlate results with disease states, and develop problem solving and critical thinking skills based on real scenarios. Students will also develop skills on how to write and present a case study of their own based on an assigned disease, which will include data gathered from all disciplines and will be presented to the class. **Acceptance into the MLS BS Program required.

MLS 4410 SUS - Interdisciplinary Health Care Teams

Credits: (3)
Typically Taught Summer Semester: Full Sem online
Typically Taught Fall Semester: Full Sem Online
Typically Taught Spring Semester: Full Sem, Full Sem Online

Course Fee: $39.00

Course Fee Purpose: The course fees that are assigned to this course will pay for consumables (e.g. pipette tips and reagents), non-consumables (e.g. instrumentation), and in some cases software and instrument maintenance.

Description: This course provides an interdisciplinary experience with the team concept as a priority. The students learn the role of the health care team members, each with their different skills and objectives. The course teaches students to practice an interdisciplinary approach as they research, interact, and learn in the interdisciplinary environment of a health care setting. **Acceptance into the MLS BS Program required.

MLS 4411 - MLS Simulated Laboratory I

Credits: (3)
Typically Taught Summer Semester: Full Sem - Online
Typically Taught Fall Semester: Full Sem, Full Sem - Online
Typically Taught Spring Semester: Full Sem - Online

Course Fee: $52.00

Course Fee Purpose: The course fees that are assigned to this course will pay for consumables (e.g. pipette tips and reagents), non-consumables (e.g. instrumentation), and in some cases software and instrument maintenance.

Description: Foundational principles for establishing a simulated working laboratory in which students refine technical skills, problem identification and solving, refine work-load management and decision-making skills, development of strategies for managing and implementing the rules and regulations that govern medical laboratory testing.

Pre-requisite/Co-requisite: MLS 3302.

MLS 4412 - MLS Simulated Laboratory II

Credits: (3)
Typically Taught Summer Semester: Full Sem - Online
Typically Taught Fall Semester: Full Sem - Online
Typically Taught Spring Semester: Full Sem, Full Sem - Online

Course Fee: $52.00

Course Fee Purpose: The course fees that are assigned to this course will pay for consumables (e.g. pipette tips and reagents), non-consumables (e.g. instrumentation), and in some cases software and instrument maintenance.

Description: A continuation of project-based applications set forth in MLS 4411. Students staff a simulated medical laboratory and assume responsibilities associated with all facets of laboratory operations. Clinical and academic faculty serve as advisors/managers to each team of students. The process develops team building skills critical to the modern health care setting. MLS 4411 expands to examine issues that cross all health care disciplines.

Pre-requisite(s): MLS 4411.

MLS 4415 - Laboratory Teaching and Supervision

Credits: (3)
Typically Taught Summer Semester: Full Sem online
Typically Taught Fall Semester: Full Sem Online
Typically Taught Spring Semester: Full Sem, Full Sem Online

Description: On Campus: Students will learn basic instructional and pedagogical theory as it applies to the field of medical laboratory science. Theory will be applied through collaborative learning and short presentations, as well as laboratory employee in-service training projects. Basic principles and applications of running a medical laboratory to include system approaches to management, leadership of groups, human resource management, and technical supervision will also be covered. Concepts will be reinforced through case study analysis and online discussions. Campus students will also participate as laboratory assistants in at least two lower division MLS courses, assisting the faculty in the administration of laboratory instruction, and applying instructional skills one-
on-one with students entering the MLS program. Online: Students fulfill the laboratory requirement by completing a series of management projects specifically designed for the laboratory provided in their clinical rotation.

Pre-requisite(s): **Acceptance into the MLS BS Program required.

**MLS 4453 INT - Supervised Clinical Experience I**

Credits: (1)

Typically Taught Spring Semester: Full Sem

Course Fee: $13.00

Course Fee Purpose: The course fees that are assigned to this course will pay for consumables (e.g. pipette tips and reagents), non-consumables (e.g. instrumentation), and in some cases software and instrument maintenance.

Description: Off campus supervised clinical experiences administered in conjunction with clinical faculty in WSU affiliated health care institutions. Emphasis on experiences associated with laboratory administrative functions. Offered CR/NC only.

Co-Requisite(s): MLS 4454.

Online students receive credit for clinical experience.

**Acceptance into the MLS BS Program required.

**MLS 4454 INT - Supervised Clinical Experience II**

Credits: (1)

Typically Taught Spring Semester: Full Sem

Course Fee: $13.00

Course Fee Purpose: The course fees that are assigned to this course will pay for consumables (e.g. pipette tips and reagents), non-consumables (e.g. instrumentation), and in some cases software and instrument maintenance.

Description: Off campus supervised clinical experiences administered in conjunction with clinical faculty in WSU affiliated health care institutions. Emphasis on experiences associated with laboratory administrative functions. Offered CR/NC only.

Co-Requisite(s): MLS 4453.

Online students receive credit for clinical experience.

**Acceptance into the MLS BS Program required.

**MLS 4800 - Special Problems**

Credits: (1-3)

Typically Taught Summer Semester: Full Sem

Typically Taught Fall Semester: Full Sem

Typically Taught Spring Semester: Full Sem

Pre-requisite(s): Consent of instructor prior to registration.

May be repeated twice for a maximum 3 credit hours.

Note: **Acceptance into the MLS BS Program required.

**MLS 4803 CRE - Research Projects in Medical Laboratory Sciences I**

Credits: (2)

Typically Taught Fall Semester: Full Sem

Course Fee: $26.00

Course Fee Purpose: The course fees that are assigned to this course will pay for consumables (e.g. pipette tips and reagents), non-consumables (e.g. instrumentation), and in some cases software and instrument maintenance.

Description: In this first of two courses, students will identify a significant laboratory related research question and develop an original research design to address that question. Students will work closely with faculty mentors and will prepare a grant application for funding of supplies and reagents, and write an IRB (Institutional Review Board) application. Actual research will be conducted spring semester in the course MLS 4804.

Pre-requisite/Co-requisite: Pre/Co-requisite: MLS 3302. **Acceptance into the MLS BS Program required.

**MLS 4804 CRE - Research Projects in Medical Laboratory Sciences II**

Credits: (2)

Typically Taught Spring Semester: Full Sem

Course Fee: $26.00

Course Fee Purpose: The course fees that are assigned to this course will pay for consumables (e.g. pipette tips and reagents), non-consumables (e.g. instrumentation), and in some cases software and instrument maintenance.

Description: This course is a continuation of MLS 4803, Research Projects in MLS I. Students will continue working on their original research project that was initiated fall semester. After completing the project, students will present their research findings in poster and oral formats, along with preparing a formal manuscript for publication in the university undergraduate research journal ERGO and possibly in other appropriate scientific journals.

Pre-requisite(s): MLS 4803. Acceptance into the MLS BS Program required.

**MLS 4830 - Directed Readings**

Credits: (1-3)

Typically Taught Summer Semester: Full Sem, Full Sem Online
Typically Taught Fall Semester: *Full Sem, Full Sem Online*

Typically Taught Spring Semester: *Full Sem, Full Sem Online*

**Description:** Advance topics related to the correlation of medical laboratory data to disease processes. Students may work as a group or independently with academic or clinical faculty. Consent of instructor prior to registration. May be repeated twice for a maximum 3 credit hours.

Note: **Acceptance into the MLS BS Program required.**

**MLS 4850 - Study Abroad**

**Credits:** (1-6)

**Variable Title**

**Description:** The purpose of this course is to provide opportunities for students in health professions to experience a study abroad program that is designed to explore healthcare, culture, and clinical experience. May be repeated 5 times with a maximum 6 credit hours.

Note: Check with Department for course availability.

**MLS 4920 - Short Courses, Workshops, Institutes, and Special Programs**

**Credits:** (1-6)

**Workshop**

**Typically Taught Fall Semester:** *Full Sem*

**Typically Taught Spring Semester:** *Full Sem*

**Description:** Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript. May be repeated for a total maximum of 6 credit hours.

Note: Acceptance into the MLS BS Program required.

**MLS 5101 - Applications in Clinical Chemistry in Medical Laboratory Sciences**

**Credits:** (4)

**Typically Taught Summer Semester:** *Full Sem Online*

**Typically Taught Fall Semester:** *Full Sem Online*

**Typically Taught Spring Semester:** *Full Sem Online*

**Description:** Concepts, methods and clinical correlation of clinical chemistry tests are presented. Emphasis is on testing methods and quality control practices covering carbohydrates, bilirubin, non-protein nitrogen, electrolytes, proteins, lipids, enzymes, therapeutic drug monitoring, toxicology, and endocrinology. These topics will include clinical correlation with diseases, allowing students to understand conditions in which abnormal results and or data might be obtained.

**MLS 5102 - Clinical Applications in Hematology and Hemostasis**

**Credits:** (3)

**Typically Taught Summer Semester:** *Full Sem Online*

**Typically Taught Fall Semester:** *Full Sem Online*

**Typically Taught Spring Semester:** *Full Sem Online*

**Description:** This course covers the concepts, analytical methods, and clinical correlation of hematology and hemostasis as it applies to the medical laboratory. In addition to normal functions, the topics will include clinical correlation with various hematological and hemostatic disease processes. Current testing and instrumentation will be included as well as regulatory and competency information.

**Pre-requisite(s):** For medical laboratory personnel.

**MLS 5103 - Clinical Laboratory Microbiology I**

**Credits:** (3)

**Typically Taught Fall Semester:** *Full Sem Online*

**Description:** This course provides an in-depth coverage of clinically significant pathogenic cocci and Gram negative rods, including epidemiology, pathogenicity, procedures for traditional laboratory identification.

**Pre-requisite(s):** For medical laboratory personnel.

**MLS 5104 - Clinical Laboratory Microbiology II**

**Credits:** (3)

**Typically Taught Spring Semester:** *Full Sem Online*

**Description:** This course is a continuation of MLS 5103, including antimicrobial testing clinical mycology, virology, parasitology and miscellaneous clinical bacteria including Gram positive bacteria, mycobacteria, and anerobes.

**Pre-requisite(s):** MLS 5103; for medical laboratory personnel.

Note: This course is not offered on campus.

**MLS 5105 - Clinical Immunohematology**

**Credits:** (3)

**Typically Taught Summer Semester:** *Full Sem Online*

**Typically Taught Fall Semester:** *Full Sem, Online*

**Typically Taught Spring Semester:** *Full Sem Online*

**Description:** This course covers the theory and principles of immunohematology relevant to blood group serology, antibody detection and identification, compatibility testing, component preparation and therapy in blood transfusion.
service, quality control parameters, donor screening and phlebotomy, transfusion reactions and hemolytic disease of the newborn. This non-laboratory course is for MLS or MLT professionals who would like to update their didactic skills and knowledge in immunohematology as it is practiced in today's hospitals and clinics. Additionally, the course may also be of interest to individuals with a BS/BA degrees in non-medical laboratory science who wish to obtain current education in clinical immunohematology.

**Pre-requisite(s):** For medical laboratory personnel.

**MLS 5112 - Clinical Laboratory Immunology**

**Credits:** (3)
**Typically Taught Summer Semester:** Full Sem  
**Typically Taught Fall Semester:** Full Sem  
**Typically Taught Spring Semester:** Full Sem  

**Description:** This course provides MLS students with clinical immunology theory and virtual laboratory simulations necessary to prepare for a career in a clinical laboratory setting. The course will be divided into four sections: basic concepts in immunology, clinical immunology techniques, immune related disease states, and diagnostic virology and will focus heavily on clinical immunology laboratory methods as well as in-depth clinical immunology techniques applicable for the clinical laboratory sciences student.

**MLS 5201 - Technologist in Microbiology: Clinical Microbiology I**

**Credits:** (3)
**Typically Taught Summer Semester:** Full Sem - Online  
**Typically Taught Fall Semester:** Full Sem - Online  
**Typically Taught Spring Semester:** Full Sem - Online  

**Description:** This course will cover bacterial structures, bacterial metabolism, taxonomy, Gram staining, media selection and composition, colony morphology, biochemical tests, antimicrobials, and identification of pathogens. The organisms studied will include aerobic Gram-positive cocci, aerobic Gram-negative diplococci, Gram positive rods, spirochetes, and aerobic Gram-negative bacilli.

**MLS 5202 - Technologist in Microbiology: Clinical Microbiology II**

**Credits:** (3)
**Typically Taught Summer Semester:** Full Sem - Online  
**Typically Taught Fall Semester:** Full Sem - Online  
**Typically Taught Spring Semester:** Full Sem - Online  

**Description:** This course will cover anaerobes of clinical importance, mycobacteria, obligate intracellular parasites, viruses, parasites of clinical importance, mycology, and molecular diagnostics. The identification and pathogenesis of these organisms will also be reviewed. The emphasis of this course will be to present clinically relevant material to the clinical microbiology laboratory.

**MLS 5203 - Technologist in Microbiology: Applied Laboratory Mathematics and Operations**

**Credits:** (3)  
**Typically Taught Summer Semester:** Full Sem - Online  
**Typically Taught Fall Semester:** Full Sem - Online  
**Typically Taught Spring Semester:** Full Sem - Online  

**Description:** This course covers basic concepts in clinical laboratory mathematics and calculations, quality assurance and control, discipline specific calculations, postanalytical procedures, and laboratory administration.

**MLS 5204 - Technologist in Microbiology: Supervised Clinical Experience**

**Credits:** (3)  
**Typically Taught Summer Semester:** Full Sem - Online  
**Typically Taught Fall Semester:** Full Sem - Online  
**Typically Taught Spring Semester:** Full Sem - Online  

**Description:** The student will attend a four-week rotation at a clinical affiliate of the Medical Laboratory Science (MLS) Program at Weber State University. It is the goal of these institutions to assist students in completing their education by providing a variety of clinical laboratory experiences and exposure to the professional workplace. All student placements are scheduled and coordinated through the clinical rotation coordinator.

**MLS 5810 - Experimental Course**

**Credits:** (1-6)  
**Experimental**  
**Description:** Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript. May be repeated for a total maximum of 12 credit hours.

**MPAS 6001 - Professional Development**

1
Credits: (1)  
Typically Taught Spring Semester: Full Sem  
Description: The first in a series of courses focused on historical and future directions of the PA profession, the importance of professionalism in medical practice, medical ethics, fiduciary duty, and working as part of a healthcare delivery team.  
Pre-requisite(s): Student must be accepted to the PA program.

MPAS 6002 - Professional Development 2

Credits: (1)  
Typically Taught Summer Semester: Full Sem  
Description: The second course in the Professional Development series focuses on the health care provider's roles and responsibilities in the area of public health and the practice of preventive medicine. There is a continued emphasis on the display and development of professionalism as it applies to clinical practice.  
Pre-requisite(s): Student must be accepted into the PA Program.

MPAS 6003 - Professional Development 3

Credits: (1)  
Typically Taught Fall Semester: Full Sem  
Description: The third course in the series of Professional Development teaches students strategies to build the confidence, skills, and presence needed to become leaders in the field of medicine. There is a continued emphasis on the display and development of professionalism as it applies to clinical practice.  
Pre-requisite(s): Student must be accepted into the PA Program.

MPAS 6004 - Professional Development 4

Credits: (1)  
Description: The fourth course in the Professional Development series is taken at the onset of the student's supervised clinical practice experiential learning. The focus during this transitional phase is in preparation for clinical practice. There is a continued emphasis on the display and development of professionalism as it applies to clinical practice.  
Pre-requisite(s): Admission to the Physician Assistant Program.

MPAS 6005 - Professional Development 5

Credits: (1)  
Description: The fifth course in the Professional Development series introduces students to topics related to their future roles as a medical provider and what it means to be a medical professional. This course examines the organizational and economic elements of a systems-based practice. There is continued emphasis on the display and development of professionalism as it applies to clinical practice.  
Pre-requisite(s): Admission to the Physician Assistant Program.

MPAS 6006 - Professional Development 6

Credits: (1)  
Typically Taught Summer Semester: Full Sem  
Description: The sixth and final course in the Professional Development series has students discussing and reflecting on issues they will face as they head toward graduation and enter into clinical practice.  
Pre-requisite(s): Admission to the Physician Assistant Program.

MPAS 6010 - Mechanisms of Health and Disease

Credits: (2)  
Typically Taught Spring Semester: Full Sem  
Description: The MOHD course provides an introduction to fundamental mechanisms of general pathology covering the basic principles of cell biology, immunology, genetics, infectious processes, microbiology, biochemistry, and environmental effects on health. Integration of this material will allow for an understanding of human disease processes and the molecular mechanisms underlying disease development. Disease-specific pathophysiology is integrated and taught in systems-based courses.  
Pre-requisite(s): Student must be accepted to the PA program.

MPAS 6020 - Introduction to History and Physical

Credits: (3)  
Typically Taught Spring Semester: Full Sem  
Description: This foundational course introduces students to the art and science of taking an effective, culturally
sensitive history and performing a thorough, technically proficient general physical examination. It focuses on normal physical exam findings in pediatric, adult, and geriatric populations. Students participate in small group, application-based laboratory exercises focusing on the general principles of physical examination as well as recognition of topographic anatomical landmarks on classmates and identification of important surgical anatomy. In addition, students receive instruction and practice in documenting comprehensive health histories and physical exam findings.

Pre-requisite(s): Student must be accepted to the PA program.

MPAS 6030 - Introduction to Clinical Pharmacology

Credits: (1)
Typically Taught Spring Semester: Full Sem
Description: This course provides a foundation for students to understand and utilize the basic principles of pharmacotherapy in the practice of medicine. Topics include pharmacokinetics, pharmacodynamics, drug-drug interactions, adverse drug reactions, and autonomic nervous system pharmacology. Emphasis is placed on individualization of drug therapy and patient-centered care. Specific drug classes will be introduced in relevant medicine courses.

Pre-requisite(s): Student must be accepted to the PA program.

MPAS 6040 - Introduction to Medical Diagnostics

Credits: (2)
Typically Taught Spring Semester: Full Sem
Description: This course focuses on the fundamental principles of, and provides practical experience in selecting, ordering, and interpreting common diagnostic studies used to screen and diagnose disease. Further detail and use of diagnostic studies is integrated within systems-based medicine courses.

Pre-requisite(s): Student must be accepted to the PA program.

MPAS 6050 - Evidence-Based Practice 1

Credits: (1)
Typically Taught Spring Semester: Full Sem
Description: This course provides foundational knowledge needed by students to integrate evidence-based medicine into their clinical practice. It reviews basic statistics, epidemiological concepts and principles, research methodology and design, and ethical standards in research. Students will learn how to critically evaluate scientific evidence and will be asked to use that knowledge to critically appraise research articles in this course and during systems-based medicine courses.

Pre-requisite(s): Student must be accepted to the PA program.

MPAS 6051 - Evidence-Based Practice 2

Credits: (1)
Typically Taught Fall Semester: Full Sem
Description: The second EBP course continues teaching the principles of evidence-based medicine, and is designed to assist students in planning their masters project, which will be completed and presented during their clinical year of training. Students will create a PICO question that will be the basis of their masters project, develop an annotated bibliography, and create a plan for writing a literature review.

Pre-requisite(s): Student must be accepted to the PA program.

MPAS 6060 - Eyes, Ears, Nose, and Throat

Credits: (2)
Typically Taught Spring Semester: Full Sem
Description: A systems-based course that examines and integrates the epidemiology, anatomy, physiology, pathophysiology, clinical presentation, diagnosis, and medical management of commonly encountered medical conditions affecting the eyes, ears, nose, and throat (EENT).

Pre-requisite(s): Student must be accepted to the PA program.

MPAS 6070 - Dermatology

Credits: (1)
Typically Taught Spring Semester: Full Sem
Description: A systems-based course that examines and integrates the epidemiology, anatomy, physiology, pathophysiology, clinical presentation, diagnosis, and medical management of conditions commonly encountered in Dermatology.

Pre-requisite(s): Student must be accepted to the PA program.

MPAS 6080 - Infectious Disease
**Typically Taught Spring Semester: Full Sem**

**Description:** This course provides a solid foundation in the diagnosis and management of infectious diseases. Common bacterial, viral, fungal, and parasitic pathogens are explored by examining mechanisms of disease transmission and pathogenicity, epidemiology, pathophysiology, clinical presentation, diagnosis, and medical management, including antimicrobial pharmacotherapy.

**Pre-requisite(s):** Student must be accepted to the PA program.

**MPAS 6100 - Hematology/Oncology**

**Credits:** (1)

**Typically Taught Summer Semester: Full Sem**

**Description:** A systems-based course that examines and integrates the epidemiology, anatomy, physiology, pathophysiology, clinical presentation, diagnosis, and medical management of commonly encountered medical disorders in hematology and oncology. Specific oncology disorders are covered in systems-based courses.

**Pre-requisite(s):** Student must be accepted to the PA program.

**MPAS 6101 - Clinical Integration 1**

**Credits:** (2)

**Typically Taught Spring Semester: Full Sem**

**Description:** The first Clinical Integration course teaches students how to care for patients (and their families) from diverse backgrounds and various life phases, in ways that are meaningful and valuable to individual patient preferences. Students learn about healthcare disparities and their impact on health and wellness, and are challenged to identify and reflect on how their own potential biases may affect patient care.

**Pre-requisite(s):** Student must be accepted to the PA program.

**MPAS 6102 - Clinical Integration 2**

**Credits:** (2)

**Typically Taught Summer Semester: Full Sem**

**Description:** The second Clinical Integration course focuses on ambulatory care medicine with integration of preventive care and principles of public health.

**Pre-requisite(s):** Student must be accepted to the PA program.

**MPAS 6103 - Clinical Integration 3**

**Credits:** (2)

**Typically Taught Fall Semester: Full Sem**

**Description:** The third in this series of Clinical Integration courses focuses on longitudinal management of established patients, admission orders, inpatient management, progress notes, discharge summaries, management of surgical patients, rehabilitative care, and issues surrounding end-of-life care.

**Pre-requisite(s):** Student must be accepted to the PA program.

**MPAS 6110 - Pulmonology**

**Credits:** (3)

**Typically Taught Summer Semester: Full Sem**

**Description:** A systems-based course that examines and integrates the epidemiology, anatomy, physiology, pathophysiology, clinical presentation, diagnosis, and medical management of commonly encountered pulmonary disorders.

**Pre-requisite(s):** Student must be accepted to the PA program.

**MPAS 6120 - Genitourinary (Nephrology/Urology)**

**Credits:** (3)

**Typically Taught Summer Semester: Full Sem**

**Description:** A systems-based course that examines and integrates the epidemiology, anatomy, physiology, pathophysiology, clinical presentation, diagnosis, and medical management of commonly encountered medical disorders in nephrology and urology.

**Pre-requisite(s):** Student must be accepted to the PA program.

**MPAS 6130 - Endocrinology**

**Credits:** (3)

**Typically Taught Summer Semester: Full Sem**

**Description:** A systems-based course that examines and integrates the epidemiology, anatomy, physiology, pathophysiology, clinical presentation, diagnosis, and medical management of commonly encountered medical conditions affecting metabolism and organs of the endocrine system.

**Pre-requisite(s):** Student must be accepted to the PA program.

**MPAS 6140 - Obstetrics and Gynecology**
MPAS 6150 - Musculoskeletal Disorders

Credits: (1)
Typically Taught Summer Semester: Full Sem
Description: A systems-based course that examines and integrates the epidemiology, anatomy, physiology, pathophysiology, clinical presentation, diagnosis, and medical management of commonly encountered musculoskeletal disorders. The first course in this series focuses on rheumatological disorders, osteoarthritis, osteoporosis, and bone tumors.
Pre-requisite(s): Student must be accepted to the PA program.

MPAS 6170 - Neurology

Credits: (3)
Typically Taught Fall Semester: Full Sem
Description: A systems-based course that examines and integrates the epidemiology, anatomy, physiology, pathophysiology, clinical presentation, diagnosis, and medical management of commonly encountered medical conditions in neurology.
Pre-requisite(s): Student must be accepted to the PA program.

MPAS 6180 - Cardiovascular Medicine

Credits: (3)
Typically Taught Fall Semester: Full Sem
Description: A systems-based course that examines and integrates the epidemiology, anatomy, physiology, pathophysiology, clinical presentation, diagnosis, and medical management of commonly encountered medical conditions affecting the cardiovascular system. Students will also be challenged to learn the fundamentals of interpreting an electrocardiogram (EKG) with an emphasis on identifying common abnormal EKG patterns and differentiating these patterns from normal and normal variant EKG tracings.
Pre-requisite(s): Student must be accepted to the PA program.

MPAS 6190 - Gastroenterology

Credits: (3)
Typically Taught Fall Semester: Full Sem
Description: A systems-based course that examines and integrates the epidemiology, anatomy, physiology, pathophysiology, clinical presentation, diagnosis, and medical management of commonly encountered medical disorders in gastroenterology.
Pre-requisite(s): Student must be accepted to the PA program.

MPAS 6200 - Musculoskeletal Disorders

Credits: (2)
Typically Taught Fall Semester: Full Sem
Description: A systems-based course that examines and integrates the epidemiology, anatomy, physiology, pathophysiology, clinical presentation, diagnosis, and medical management of commonly encountered musculoskeletal disorders. This second course in the series focuses on orthopedic injuries and disorders.
Pre-requisite(s): Student must be accepted to the PA program.

MPAS 6210 - Psychiatry

Credits: (3)
Typically Taught Fall Semester: Full Sem
Description: A systems-based course that emphasizes the psychosocial aspects of medicine, examining and integrating the epidemiology, anatomy, physiology, pathophysiology, clinical presentation, diagnosis, and medical management of commonly encountered medical disorders in psychiatry. This course also emphasizes internal behavior patterns that motivate or cause behaviors.
Pre-requisite(s): Student must be accepted to the PA program.

MPAS 6500 - Preceptorship 1

Credits: (12)
Typically Taught Spring Semester: Full Sem
Description: Supervised clinical practicum experience in primary care or specialty care in medical practice settings. May also include assignments and objective examinations.
Pre-requisite(s): Student must be accepted to the PA program.
MPAS 6510 - Preceptorship 2

Credits: (12)
Typically Taught Summer Semester: Full Sem
Description: Supervised clinical practicum experience in primary care or specialty care in medical practice settings. May also include assignments and objective examinations.
Pre-requisite(s): Student must be accepted to the PA program.

MPAS 6520 - Preceptorship 3

Credits: (12)
Typically Taught Fall Semester: Full Sem
Description: Supervised clinical practicum experience in primary care or specialty care in medical practice settings. May also include assignments and objective examinations.
Pre-requisite(s): Student must be accepted to the PA program.

MPC 5080G - Intercultural Communication

Credits: (3)
Typically Taught Fall Semester: Full Sem
Description: Explores theoretical perspectives in intercultural communication. Through analysis of various intercultural theories, students will become aware of cultural influences on communication in both international and domestic cultures. This course may not apply toward graduate degree requirements if an undergraduate course of the same name or content has been used for undergraduate credit.

MPC 5090G - Gender and Communication

Credits: (3)
Typically Taught Spring Semester: Full Sem
Description: This course is designed to help students understand the influence that communication has upon the shaping of gender and the influence that gender has in shaping communication interactions. Students become aware of, sensitive to, and more experienced in the issues, implications and skills necessary to successfully and meaningfully communicate with males and females, and about males and females in a wide range of communication contexts. This course may not apply toward graduate degree requirements if an undergraduate course of the same name or content has been used for undergraduate credit.
Pre-requisite(s): Permission of MPC program director.

MPC 5100G - Small Group Facilitation and Leadership

Credits: (3)
Typically Taught Spring Semester: Full Sem
Description: Theories and practical communication processes are examined and applied to develop fundamental attitudes and skills for facilitating and leading effective groups. This course may not apply toward graduate degree requirements if an undergraduate course of the same name or content has been used for undergraduate credit.
Pre-requisite(s): Permission of MPC program director.

MPC 5220G - Editing

Credits: (3)
Typically Taught Fall Semester: Online
Description: Develops editing knowledge and skills for print and online publications. Covers copy editing, content editing and page editing. This course may not apply toward graduate degree requirements if an undergraduate course of the same name or content has been used for undergraduate credit.
Pre-requisite(s): Permission of MPC program director.

MPC 5400G - Public Relations Media and Campaigns

Credits: (3)
Typically Taught Spring Semester: Full Sem
Description: Apply communication principles to internal and external publics; research, plan and evaluate social interrelationships; study of the controlled and uncontrolled media and their role in public relations; prepare a major public relations campaign for a selected client. This course may not apply toward graduate degree requirements if an undergraduate course of the same name or content has been used for undergraduate credit.

MPC 5500G - Topics in Communication

Credits: (1-3)
Variable Title
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: The study and application of communication in contemporary society is dynamic and ever changing. This course will provide students with opportunities to explore specialized topics in contemporary journalism, electronic mediated communication, human
communication studies, and public relations in a seminar format. This course may not apply toward graduate degree requirements if an undergraduate course of the same name or content has been used for undergraduate credit.

Pre-requisite(s): Permission of MPC program director.

This course may be taken twice with different designations (topics).

**MPC 5550G - Organizational Communication**

Credits: (3)
Typically Taught Fall Semester: Full Sem
Typically Taught Summer Semester: Full Sem
Description: Study of communication organizations from various theoretical perspectives with an emphasis on the organizational culture perspective. Includes topics such as communicating with external audiences, decision-making, conflict resolution, and power relationships. This course may not apply toward graduate degree requirements if an undergraduate course of the same name or content has been used for undergraduate credit.

Pre-requisite(s): Permission of MPC program director.

**MPC 5650G - Communication Law**

Credits: (3)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: First Amendment origins, interpretations and philosophy underlying regulation of the mass media. This course may not apply toward graduate degree requirements if an undergraduate course of the same name or content has been used for undergraduate credit.

Pre-requisite(s): Permission of MPC program director.

**MPC 5820G - Persuasive Communication**

Credits: (3)
Typically Taught Fall Semester: Full Sem
Description: Study of theories and principles of persuasion from classical to modern times. Examines persuasion as a means of influence in interpersonal communication, public speaking, advertising, politics, and other contexts. This course may not apply toward graduate degree requirements if an undergraduate course of the same name or content has been used for undergraduate credit.

Pre-requisite(s): Permission of MPC program director.

**MPC 5850G - Advertising**

Credits: (3)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: A practical and theoretical study of advertising. Course is designed for students planning careers in advertising, as well as for those who are simply lifelong consumers of advertising and want to understand its role in the economic system. This course may not apply toward graduate degree requirements if an undergraduate course of the same name or content has been used for undergraduate credit.

Pre-requisite(s): Permission of MPC program director.

**MPC 6010 - Introduction to Graduate Study and Communication Theory**

Credits: (3)
Typically Taught Fall Semester: 1st Blk
Typically Taught Spring Semester: 1st Blk
Description: This course provides a survey of major theoretical perspectives in the field of communication with an emphasis on how theory can be applied in interpersonal, group, organizational and mass communication contexts. Students also learn about the logic of communication inquiry, the nature and expectations of graduate study, and techniques for conducting literature searches and writing literature reviews.

**MPC 6100 - Team Building and Facilitation**

Credits: (3)
Typically Taught Fall Semester: Full Sem
Description: Creating, facilitating and coaching effective work groups and teams is one of the hardest soft skills for organizational professionals to master. This course examines the impact that different structures and communication processes have on group and team collaboration effectiveness, as well as the central role competent communication plays in effective group and team facilitation. It investigates structural and process issues of team building, interpersonal and group communication, and effective problem solving and decision-making skills in collaborative environments. Students should have a greater understanding of their own collaborative teaming abilities upon completion. The purpose of this course is to teach-and have students experience-strategies and tactics for building, working effectively within, and facilitating collaborative teams in the work place.
MPC 6150 - Writing for Professional Communicators

Credits: (3)
Typically Taught Fall Semester: 1st Blk
Typically Taught Spring Semester: 1st Blk
Course Fee: $15.00
Course Fee Purpose: Maintaining computer lab & software for writing course

Description: Good writing skills are critical to achieving a professional image. Individuals and organizations are judged by the quality of written documents they produce. In this course, students learn to plan and organize, to write clearly, concisely and correctly, and to develop polished final projects. Students undergo an intensive review of basic writing and editing principles and then apply them to specific writing projects. Genres of writing may include funding proposals, yearly reports, executive plans, organizational descriptions, Web sites, social networking messages, and marketing materials.

MPC 6210 - Presentational Speaking in the Workplace

Credits: (3)
Typically Taught Summer Semester: 1st Blk, 2nd Blk

Description: The professional work environment benefits from the communication competency of its members. This course is designed to enhance the communication skills required by the professional communicator across a broad set of communication media: oral presentations, written texts, and digital interactions. Primary emphasis will be placed on combining strategic thinking with powerful writing to produce a variety of effective messages aimed at different audiences. In addition, students will develop a broad-based understanding of how each of these modes of communications function both separately and independently to produce a coherent organizational message.

MPC 6250 - Interviewing

Credits: (3)

Description: This course will explore various types of interviews conducted in work and personal situations: Recruiting, Performance Appraisals, Informational, Survey, Persuasion, Counseling, and Health Care. While core communication skills are important across types of interviews, interviewing strategies can differ greatly based on different contexts, specific situations, and personalities of interviewers and interviewees.

Note: This course is offered as needed.

MPC 6300 - New Media in Professional Communication

Credits: (3)
Typically Taught Summer Semester: 1st Blk, 2nd Blk
Course Fee: $50.00
Course Fee Purpose: Purchasing of required items on a yearly basis necessary to teaching digital media course

Description: New media allow all individuals and organizations to effectively interact with their audiences on an ongoing basis. This course addresses how new and emerging media technologies such as social networks, social media, blogs, podcasts, video sites, search engine management tools, and even virtual worlds can be leveraged by communication professionals in order to further meaningful relationships with their internal and external audiences. This course will give students greater understanding of new media required to allow a rethinking of the overall communication process. As a result students will develop effective communication strategies specifically geared toward the needs of their organization or field of interest.

MPC 6350 - Visual Communication in the Workplace

Credits: (3)
Typically Taught Summer Semester: 1st Blk, 2nd Blk

Description: Visual messages are a powerful way to inform, persuade and educate. Within the workplace, the ability to effectively communicate goals, ideas and client information through combinations of visual and textual elements is an invaluable skill. This course introduces students to philosophical and theoretical perspectives that enable effective visual presentation in the organization. It also exposes them to practical design principles, skills and tactics that generally guide effective screen and print design. Additionally, students will learn how to critically analyze visual communication materials and aids according to standards that reflect sensitivity to fairness, diversity, good ethics and effectiveness.

MPC 6400 - Leadership Communication

Credits: (3)
Typically Taught Spring Semester: 1st Blk, 2nd Blk

Description: Communication is the core of organizational leadership. This course is designed to explore both the theoretical and practical aspects of leader- and followership embedded in complex environments with an emphasis on recognizing and managing change. Leadership in organizations will be examined from a variety of
perspectives including historical, ethical and critical. Key topics include leadership traits and skills, leadership roles and behaviors, power and influence, theories of leadership, leading change, ethical leadership, and developing leadership skills. The course includes experiential activities using cases, role plays, and action learning projects to develop relevant skills.

**MPC 6450 - Advanced Organizational Communication**

**Credits:** (3)

**Typically Taught Fall Semester:** Full Sem

**Description:** This course provides a graduate-level overview and introduction to the discipline of organizational communication in a global world. Class readings and discussions will include topics such as organizational structure/process, rationality and decision-making, (sub)cultures and socialization, individual and collective identities, networks, leadership, teams, power/control, conflict, change, technologies, and ethics. Case studies from current events and guest speakers will be used to apply theoretical concepts to actual organizational life.

**MPC 6500 - Org Comm Consulting**

**Credits:** (3)

**Variable Title**

**Typically Taught Summer Semester:** 2nd Blk

**Description:** The purpose of this course is to explore organizational communication assessment, organizational consulting, and executive coaching concepts, practices, and methodologies. This class will teach students how to effectively work with and in organizations to improve their communication processes, management communication strategies, and strategic long-term planning in order to optimize talent and performance. The skills acquired in this class will prepare students to apply evidence-based communication best practices in organizations.

**MPC 6500 - Topics in Professional Communication**

**Credits:** (3)

**Variable Title**

**Description:** The study and application of professional communication in contemporary society is dynamic and ever changing. This course will provide students with opportunities to explore specialized topics in a seminar format.

**Pre-requisite(s):** MPC 6010 or permission of MPC program director.

This course may be taken twice as elective credit with different titles and topics.

**Note:** This course is offered as needed.

**MPC 6600 - Strategic Communication**

**Credits:** (3)

**Typically Taught Spring Semester:** 1st Blk, 2nd Blk

**Description:** Effective strategic communication and planning is essential to any organization. This course helps students to understand and develop skills to create and manage internal and external messages for different situations, industries, and locations. Students prepare for effective strategic communication by asking and answering the right questions about the goals of the organization, its members, stakeholders and others who impact its operation, such as regulatory bodies. Effective strategic communication and its planning consist of the optimal use of people, budgets, tactical elements, and media in a chaotic, changing world.

**MPC 6620 - Conflict Resolution and Mediation**

**Credits:** (3)

**Typically Taught Summer Semester:** 2nd Blk

**Description:** Communication is at the center of any negotiation or mediation process. It is in and through communication that resolution becomes possible. This class will explore the key interpersonal skills that are central to managing the processes of conflict resolution and mediation competently.

**MPC 6700 - Qualitative Communication Research & Analysis**

**Credits:** (3)

**Typically Taught Fall Semester:** 2nd Blk

**Typically Taught Spring Semester:** 2nd Blk

**Course Fee:** $15.00

**Course Fee Purpose:** Maintaining computer lab & software for research purposes

**Description:** Research skills are essential for answering questions and solving problems. This course reviews qualitative investigations in communication. In this course, students will learn to read, interpret, and critically evaluate qualitative communication research. Students will be exposed to qualitative concepts, research designs, and the fundamentals of conducting and analyzing research using interviewing, ethnography, constant comparative analysis, and content analysis. In addition, students will design and
execute their own research study, which entails: an appropriate qualitative design, data collection, data analysis, and a formal research report.

**Pre-requisite(s):** MPC 6010 or permission of MPC program director.

**MPC 6710 - Communication Survey Design and Analysis**

**Credits:** (3)

**Typically Taught Fall Semester:** 2nd Blk  
**Description:** Research skills are essential for answering questions and solving problems. This course reviews quantitative communication research methods, with an emphasis on survey design and statistical analysis, and explores vocational/professional applications of communication research. In this course, students will learn to read, interpret, and critically evaluate quantitative communication research reports. Students will be exposed to basic social science concepts, research designs, and the fundamentals of conducting and analyzing research. In addition, students will design and execute their own research study, which entails: a survey design, data collection, data analysis, and a formal research report.

**Pre-requisite(s):** MPC 6010

**MPC 6840 - Data Visualization & Storytelling**

**Credits:** (3)

**Typically Taught Fall Semester:** 2nd Block  
**Description:** This course teaches students the skills necessary to be effective data storytellers. Students taking this course will study the fundamentals of compelling data-driven storytelling and become familiar with associated Visual Communication tools. Moreover, students will learn how to detect and articulate the stories behind datasets and how to tell data stories in different ways for different audiences and stakeholders. Finally, students will sharpen their skills to evaluate data visualizations and visual analysis tools.

**MPC 6900 - Thesis/Project I**

**Credits:** (3)

**Typically Taught Fall Semester:** Full Sem  
**Typically Taught Spring Semester:** Full Sem  
**Description:** In this course students will begin their theses or projects under the direction and with the support of their faculty committees. They will write, present and have their thesis or project proposal approved.

**Pre-requisite(s):** MPC 6010 or permission of MPC program director.

Note: *Please note that students who, for any reason, do not finish their thesis or project or program of courses within the two-year framework suggested in this program, must pay continuing enrollment and tuition the semester they defend their thesis or project.

**MPC 6950 - Thesis/Project II**

**Credits:** (3)

**Typically Taught Spring Semester:** Full Sem  
**Description:** This course will allow students to complete their workplace project or traditional academic thesis. Students will prepare, present and defend their projects or theses during this semester for review and approval.

**Pre-requisite(s):** MPC 6010 or permission of MPC program director.

This course is repeatable for a total of two times for a total of nine credit hours of which only three will apply to degree completion.

Note: *Please note that students who, for any reason, do not finish their thesis or project within the two-year framework suggested in this program, must pay continuing enrollment and tuition the semester they defend their thesis or project.

**MSAT 6080 - Research Methods I**

**Credits:** (3)

**Typically Taught Fall Semester:** Full Sem  
**Description:** This course explores the process and methods of scientific inquiry and interpretation of research findings in athletic training. Students will gain familiarity with the major elements of research including literature review, quantitative and qualitative methodology, design, evaluation of research, statistical analysis, presentation of data, and ethical considerations. This course also provides an overview of statistics including descriptive and inferential statistics and one-way ANOVA. Students should have a basic understanding of conducting library and Internet information searches prior to taking this course.

**MSAT 6085 - Research Methods II**

**Credits:** (3)

**Typically Taught Spring Semester:** Full Sem  
**Course Fee:** $100.00  
**Course Fee Purpose:** Thesis research supplies.  
**Description:** This course is designed to help students develop a master's thesis research project proposal that is carefully researched and professionally written. Students will prepare an introduction, literature review, detailed...
methodology, and IRB proposal.

Pre-requisite(s): MSAT 6080.

**MSAT 6090 - Research Methods III**

Credits: (3)
Typically Taught Fall Semester: Full Sem

Description: This course is designed to help students complete a master's thesis research project. Basic statistical analysis will be reviewed and advanced statistics will be introduced. Students will collect and analyze data and synthesize results. At the completion of the course, students will submit a full manuscript, suitable for publication, along with an abstract and a professional poster.

Pre-requisite(s): MSAT 6085.

**MSAT 6095 - Research Methods IV**

Credits: (1-3)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem

Description: This course allows students to choose one of the following options: 1) complete their master's thesis requirements from MSAT 6090; 2) prepare a manuscript for publication or formal oral presentation for a professional conference, or 3) participate in additional research above and beyond the master's thesis. May be taken twice up to 9 credit hours.

**MSAT 6100 - Advanced Emergency Care in AT**

Credits: (3)
Typically Taught Fall Semester: Full Sem

Course Fee: $61.00

Course Fee Purpose: American Red Cross Emergency Responder (EMR) Certification, blood pressure kit with stethoscope, pressure dressing and hemostatic gauze.

Description: To prepare graduate athletic training students to respond to life and limb-threatening emergencies. This course also includes advanced wound care, equipment removal, and emergency drug administration. When successfully completed, this course leads to a two-year American Red Cross certification in Emergency Medical Response, CPR/AED for Professional Rescuers, Emergency Oxygen administration, and one-year certification in Bloodborne Pathogens Training.

**MSAT 6200 - Mental and Behavioral Health in Injury and Rehabilitation**

Credits: (3)
Typically Taught Summer Semester: Full Sem, 1st Blk, 2nd Blk

Description: This course is designed to provide a basic understanding of the psychology of sport, injury, and rehabilitation. Topics covered include emotional and cognitive response to injury and rehabilitation, motivation, mental skills training and use, psychological antecedents of injury, psychology of injury and rehabilitation, using mental skills with injured athletes, career transition and termination, disabilities, rehabilitation/exercise adherence, eating disorders, alcohol and drug/substance abuse, gender and cultural diversity, and research methods related to psychology of sport, injury and rehabilitation. The graduate student will get an advanced approach, including in-depth application of psychological interventions with injured athletes and a more comprehensive investigation of psychosocial aspects.

Pre-requisite(s): PSY 1010.

**MSAT 6300 - Orthopedic Assessment and Diagnosis I**

Credits: (3)
Typically Taught Fall Semester: Full Sem

Course Fee: $15.00

Course Fee Purpose: Goniometers, anatomical models, 2-point discriminators.

Description: Content of this course addresses the principles of orthopedic evaluation techniques and the diagnosis and care for most common musculoskeletal injuries for master's of athletic training students. The student must integrate knowledge of anatomical structures, physiology principles and evaluative techniques to provide a basis for critical decision-making in an injury management environment.

**MSAT 6301 - Orthopedic Assessment and Diagnosis II**

Credits: (3)
Typically Taught Fall Semester: Full Sem

Course Fee: $15.00

Course Fee Purpose: Inclinometers, penlights, anatomical models.

Description: This course is a continuation of MSAT 6300 - Orthopedic Assessment and Diagnosis I. Content from this course will further develop students' current knowledge and skills to evaluate musculoskeletal injuries while furthering their understanding of less commonly reported injuries. The students will integrate knowledge of anatomical structures and principles of physiology to
appropriately select, perform, and correctly interpret results from an orthopedic evaluation technique, and to make critical decisions regarding treatment, injury management, and return to play.
Pre-requisite(s): MSAT 6300.

**MSAT 6350 - Assessment and Care of General Medical Conditions**

Credits: (3)
Typically Taught Fall Semester: Full Sem
Course Fee: $15.00
Course Fee Purpose: Stethoscopes, blood pressure cuffs, otoscopes, ophthalmoscopes, glucose meters, peak flow meters.
Description: Content of this course addresses evaluation and care for general medical conditions of athletes and active individuals. The student must integrate knowledge of anatomy, physiology, pharmacology and injury related to athletics and sport in order to provide a basis for clinical decision making as athletic trainers.

**MSAT 6390 - Foundations of Therapeutic Interventions**

Credits: (2)
Typically Taught Fall Semester: Full Sem
Description: This course is designed to introduce students to the contemporary usage and foundation of common therapeutic interventions in musculoskeletal rehabilitation (i.e., cryotherapy, thermotherapy, proprioceptive neuromuscular facilitation, etc.). Through lecture, discussion, and laboratory experience, the scientific basis of musculoskeletal rehabilitation involving these therapeutic interventions will be examined. Students will learn about the body's response to musculoskeletal injury and the subsequent healing process. Emphasis will be placed on theoretical and physiological effects of therapeutic interventions, their indications and contraindications, and application based on the goals in each phase of rehabilitation.

**MSAT 6400 - Therapeutic Modalities for Musculoskeletal Injuries**

Credits: (2)
Typically Taught Fall Semester: Full Sem
Course Fee: $45.00
Course Fee Purpose: Equipment and supplies for ice, heat, massage, compression.
Description: Through lecture, discussion, and laboratory experience, the scientific basis of musculoskeletal rehabilitation involving therapeutic modalities will be examined. This course is designed to build upon the introductory foundations of therapeutic modalities established in MSAT 6390. Topics for discussion include the application of electrotherapy devices, therapeutic ultrasound, and other therapeutic modalities.

**MSAT 6401 - Innovations in Therapeutic Modalities**

Credits: (2)
Typically Taught Spring Semester: Full Sem, 1st Blk, 2nd Blk
Course Fee: $45.00
Course Fee Purpose: Equipment and supplies for electrical stimulation, ultrasound, laser, diathermy, and traction.
Description: This course is designed to introduce students to novel therapeutic modalities that are being integrated in modern musculoskeletal rehabilitation. Through lecture, discussion, and laboratory experience, both the theoretical and scientific basis of new therapeutic modalities will be examined. Students will learn the foundational concepts and techniques of these modalities, and review the literature to determine their effectiveness from an evidence-based perspective.
Pre-requisite(s): MSAT 6400.

**MSAT 6430 - Principles of Athletic Training**

Credits: (3)
Description: This course is designed to give graduate-level athletic training students an overview of athletic training principles. Students will gain knowledge in the areas of musculoskeletal injuries, environmental risk factors, mechanisms and characteristics of sports trauma, and the cooperative sports medicine team.
Pre-requisite(s): HLTH 2300 or RHS 2300.
Note: This course is not currently offered.

**MSAT 6431 - Orthopedic Taping and Durable Medical Equipment**

Credits: (1)
Typically Taught Fall Semester: Full Sem
Course Fee: $110.00
Course Fee Purpose: White and elastic tape, kinesiotape, braces.
Description: Graduate students in this course will be
instructed in evidence-based applications and use of orthopedic and kinesiology taping, padding, and wrapping techniques as well as durable medical equipment including sport performance or stability braces, manufactured splints, and crutches/canes. Students will also learn how to properly fit protective sports equipment. Students will learn to apply a variety of techniques to support the trunk and extremities.

**MSAT 6432 - Casting and Orthotic Fabrication**

**Credits:** (1)
**Typically Taught Fall Semester:** Full Sem
**Course Fee:** $120.00
**Course Fee Purpose:** Casting supplies.
**Description:** Graduate students in this course will be exposed to evidence-based applications including orthopedic casting custom splints, and orthotics. Students will learn to apply a variety of techniques to support orthopedic injuries of the trunk and extremities.
**Pre-requisite(s):** MSAT 6431.

**MSAT 6450 - Therapeutic Rehabilitation I**

**Credits:** (3)
**Typically Taught Spring Semester:** Full Sem
**Course Fee:** $15.00
**Course Fee Purpose:** Therapy tables, towels, cleaning supplies, hand sanitizer, goniometers, tape measures.
**Description:** Content of this course provides a foundational understanding and concepts of therapeutic exercise as it relates to the rehabilitation process of musculoskeletal injuries. Course provides understanding and skills associated with hands-on techniques used in the rehabilitation of athlete/patient from an injury state to a high level of function for return to sport, occupational activities, and/or general activities of daily living.
**Pre-requisite(s):** MSAT 6300.

**MSAT 6451 - Therapeutic Rehabilitation II**

**Credits:** (3)
**Typically Taught Fall Semester:** Full Sem
**Course Fee:** $15.00
**Course Fee Purpose:** Rehabilitation equipment such as weights, swiss balls, theraband, wobble boards, etc.
**Description:** Content of this course provides advanced understanding of therapeutic rehabilitation as it relates to designing, implementing, and instructing patients through a therapeutic rehabilitation program. This course provides advanced instruction and hands-on techniques in the rehabilitation of a patient from an injury state to a high performance level in sport, occupation, or other activities reflective of the patient's environment and movement goals.
**Pre-requisite(s):** MSAT 6450.

**MSAT 6452 - Advanced Manual Therapy Techniques**

**Credits:** (3)
**Typically Taught Fall Semester:** Full Sem
**Description:** Content of this course provides a specialized understanding of therapeutic rehabilitation as it pertains to manual therapy techniques. This course provides advanced instruction and hands-on techniques such as massage, soft-tissue mobilization, joint mobilizations, myofascial release, traction, and muscle energy techniques. This course will also introduce and discuss emerging rehabilitation techniques.
**Pre-requisite(s):** MSAT 6390.

**MSAT 6480 - Advanced Principles of Evidence-Based Practice**

**Credits:** (3)
**Typically Taught Summer Semester:** Full Sem, 1st Blk, 2nd Blk
**Description:** This course will expand students' understanding and application of Evidence-Based Practice (EBP) skills introduced in MSAT 6080. Students will be expected to read, critically analyze, and participate in the discussion of peer-reviewed research articles.

**MSAT 6500 INT - Foundations of Athletic Training**

**Credits:** (3)
**Typically Taught Fall Semester:** Full Sem
**Course Fee:** $210.00
**Course Fee Purpose:** Polo shirt, jacket, crutches, canes, student supply kits.
**Description:** Through lecture, discussion, and laboratory experiences, the recognition and management of environmental illnesses will be examined. Explores the history and governance of the AT profession. Orient students to the graduate athletic training program including professional writing and clinical experiences.

**MSAT 6501 INT - Graduate Practicum I**

**Credits:** (3)
**Typically Taught Spring Semester:** Full Sem
Course Fee: $40.00
Course Fee Purpose: Taping supplies, football helmets, shoulder pads, spineboards, anatomical models, goniometers, inclinometers.
Description: Provides an opportunity for graduate-level athletic training students to review athletic training concepts and skills from prior coursework and demonstrate proficiency in orthopedic assessment and treatment. Students will participate in clinical rotations and other clinical experiences.
Pre-requisite(s): MSAT 6500.

MSAT 6502 INT - Graduate Practicum II

Credits: (3)
Typically Taught Summer Semester: Full Sem, 1st Blk, 2nd Blk
Course Fee: $20.00
Course Fee Purpose: Anatomical models, goniometers, inclinometers.
Description: Provides an opportunity for graduate-level athletic training students to review athletic training concepts and skills from prior coursework and demonstrate proficiency in orthopedic assessment and treatment. Students will participate in clinical rotations and other clinical experiences.
Pre-requisite(s): MSAT 6501.

MSAT 6503 INT - Graduate Practicum III

Credits: (3)
Typically Taught Fall Semester: Full Sem
Course Fee: $25.00
Course Fee Purpose: Basic modalities equipment and supplies.
Description: Provides an opportunity for graduate-level athletic training students to review athletic training concepts and skills from previous coursework and demonstrate proficiency in orthopedic assessment, therapeutic rehabilitation, and treatment. Students will participate in clinical rotations and other clinical experiences.
Pre-requisite(s): MSAT 6502.

MSAT 6504 INT - Graduate Practicum IV

Credits: (3)
Typically Taught Spring Semester: Full Sem
Course Fee: $15.00
Course Fee Purpose: Advanced modalities equipment and supplies such as E-stim, Ultrasound, laser, diathermy.
Description: Provides an opportunity for graduate-level athletic training students to review athletic training concepts and skills from previous coursework and demonstrate proficiency in orthopedic assessment, therapeutic rehabilitation, manual therapy, and treatment. Students will participate in clinical rotations and other clinical experiences.
Pre-requisite(s): MSAT 6503.

MSAT 6600 - Administration and Management in Athletic Training

Credits: (3)
Typically Taught Spring Semester: Full Sem
Description: Provides an overview of the necessary policies, procedures, maintenance, and daily operation of athletic training facilities. Applies principles of facility design and planning, information management, legal and ethical considerations in health care, and professional development as it relates to athletic training.
Pre-requisite(s): MSAT 6502.

MSAT 6700 - Advanced Diagnostic Imaging for the Athletic Training Profession

Credits: (1)
Typically Taught Spring Semester: Full Sem
Description: This course provides an opportunity for students to gain exposure to the diagnostic imaging techniques commonly used by the medical community in diagnosis of injury in the athlete. Upon completion of the course, students will be able to identify anatomy and understand terminology used by health professionals when discussing diagnostic images and have an advanced understanding of indications, contraindications, and clinical implications.
Pre-requisite(s): MSAT 6350.

MSAT 6740 - Nutrition for Athletic Trainers

Credits: (1)
Typically Taught Summer Semester: 1st Blk, 1st Blk Online
Description: Graduate students in this course will expand their nutritional knowledge and skills in counseling athletes in common athletic training situations. This course will also include special situations like nutrition role in concussion recovery and popular diet and sports misconceptions.
MSAT 6750 - Evidence-Based Evaluation and Treatment of the SI Joint and Spine

Credits: (2)
Typically Taught Spring Semester: 1st Blk
Description: This course will focus on evidence-based evaluation and management of the spine and pelvis, including the cervical spine, thoracic spine, lumbar spine and the sacroiliac joints. The student must integrate anatomical structures, physiology principles, and evaluative techniques to provide a basis for critical decision-making and management for these pathologies.
Pre-requisite(s): MSAT 6300, MSAT 6301.

MSAT 6760 - Suturing, Joint Relocation and Advanced AT Skills

Credits: (1)
Typically Taught Fall Semester: 1st Blk
Typically Taught Spring Semester: 2nd Blk, 1st Blk
Course Fee: $40.00
Course Fee Purpose: Suturing Practice Kit and e-book.
Description: Graduate students in this course will learn advanced wound closure techniques such as skin adhesives and basic suturing. This course will also include advanced clinical skills such as reducing dislocations.

MSAT 6810 - Experimental Course

Credits: (1-6)
Experimental
Description: Consult the semester class schedule for the current offering under this number. The specific title will appear on student's transcript along with the authorized credit.
May be repeated for a total maximum of 6 credit hours.

MSAT 6998 - Master's Board of Certification (BOC) Exam Preparation

Credits: (1)
Typically Taught Fall Semester: Full Sem
Description: This course prepares Graduate Athletic Training students to take the Athletic Trainer Board of Certification (BOC) Exam. This course will review content from all courses in the Master of Science in Athletic Training program as well as content from the program's prerequisite courses.
Pre-requisite(s): MSAT 6450.
May be repeated 2 times up to 3 credit hours.

MSAT 6999 - Special Topics in Athletic Training

Credits: (1-3)
Typically Taught Spring Semester: Full Sem
Description: The profession of Athletic Training evolves quickly and frequently new skills and techniques are required. This course will present cutting edge athletic training skills and concepts.

MSE 1210 - Metal Processing and Joining for Engineers

Credits: (3)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Course Fee: $45.00
Course Fee Purpose: Consumables (aluminum, steel, tools), paper, lab support, computers, software licenses, lab equipment
Description: Manufacturing processes for cost-effective, high-quality production. Consideration of technical capabilities and limitations of alternative methods. Includes Metal Removal, forming, welding concepts and non-tradition manufacturing processes. Course project required. Laboratory experiments include mill and lathe work, welding techniques, friction coefficients analysis and milled surface evaluation.

MSE 3040 - Cost Estimating and Engineering Economic Analysis

Credits: (3)
Typically Taught Spring Semester: Full Sem
Course Fee: $25.00
Course Fee Purpose: Software licensing, lab computers and support
Description: This course focuses on effective design and implementation of reliable, economically competitive, and environmentally benign manufacturing processes and systems. Topics will include an overview of the manufacturing systems approach in production, control, quality, automation, an introduction to facilities planning and design, an introduction to operations research and simulation in manufacturing, and engineering economics. An introduction to government manufacturing systems engineering will also be presented.
Pre-requisite(s): MATH 1210, MSE 3700.

MSE 3360 - Manufacturing Process and Materials Lab
Credits: (3)  
Typically Taught Fall Semester: Full Sem  
Course Fee: $25.00  
Course Fee Purpose: Paper, lab support, computers, software licenses, lab equipment  
Description: Manufacturing processes for cost-effective, high-quality production. Consideration of technical capabilities and limitations of alternative methods. Includes forming, removal, casting, joining, heat treating, molding, finishing and coating. Course project required. Laboratory experiments include heat treating, deep drawing, powder metallurgy, casting, injection molding, fabricating composites, friction coefficients analysis and milled surface evaluation.  
Pre-requisite(s): ENGR 2010, ENGR 2160.

MSE 3460 - Product Design and Development

Credits: (3)  
Typically Taught Fall Semester: Full Sem  
Course Fee: $25.00  
Course Fee Purpose: Software licensing, lab computers and support  
Description: An advanced computer-aided design course using state-of-the-art solid modeling CAD/CAM software. Topics include: 3D parametric solid modeling, applications associativity, design-by- feature, assembly modeling, injection mold design, flat pattern development, design analysis using FEA, realistic rendering, and detailing.  
Pre-requisite(s): ENGR 1000, PDD 1160.

MSE 3700 - Manufacturing Systems I

Credits: (3)  
Typically Taught Fall Semester: Full Sem  
Course Fee: $35.00  
Course Fee Purpose: Software licensing, lab computers, and support.  
Description: This course focuses on effective design and implementation of reliable, economically competitive, and environmentally benign manufacturing processes and systems. Topics will include an overview of the manufacturing systems approach in production, control, quality, automation, an introduction to facilities planning and design, an introduction to operations research and simulation in manufacturing, and engineering economics. Students will also be introduced to DoD systems engineering terminology.  
Pre-requisite(s): MFET 2320 and ENGR 2140.

MSE 3710 - Computer Aided Manufacturing and Additive Manufacturing/Lab

Credits: (3)  
Typically Taught Spring Semester: Full Sem  
Course Fee: $35.00  
Course Fee Purpose: Software licensing, lab computers and support  
Description: This course will introduce and explain concepts behind Computer-Automated Manufacturing (CAM). It will define elements, terms, and concepts involved with CAM. Elements of rapid prototyping will also be covered from conceptual design in solids to production of tooling and parts. This course is designed for those who have the basic understanding of the setup and operation of CNC machine tools and programming. Software will be used to perform the CAM operations, such as part generation and post processing.  
Pre-requisite(s): MSE 1210, PDD 1010, PDD 1160 or MSE 3460.

MSE 3850 - Statistical Process Control and Reliability

Credits: (3)  
Typically Taught Spring Semester: Full Sem  
Course Fee: $25.00  
Course Fee Purpose: Software licensing, lab computers and support  
Description: Control of quality with statistical analysis; typical control techniques and underlying theory. Development of reliability models and procedures for product assurance. Course will utilize Minitab and Microsoft Excel Spreadsheet software.  
Pre-requisite(s): MFET 2410 or MATH 1040 or MATH 3410.  
Pre-requisite/Co-requisite: MATH 1210 or MATH 1110

MSE 3910 - Six Sigma Methods and Tools in Manufacturing

Credits: (3)  
Typically Taught Fall Semester: Full Sem  
Typically Taught Spring Semester: Full Sem  
Description: Six Sigma methods use statistical tools to bring about continual improvement of quality in manufactured goods and services and to document that positive change has occurred. These tools include Failure Mode and Effects Analysis (FMEA), Measurement Systems Analysis (gage R&R), Control Charts, Process Capability Analysis, and Design of Experiments. Students
will learn and apply these methods and tools through class participation and completion of required projects. Course will utilize Minitab and Microsoft Excel spreadsheet software.

Pre-requisite(s): MSE 3850 or MFET 3810.

MSE 4010 - Facility Design and Material Handling

Credits: (3)
Typically Taught Fall Semester: Full Sem
Course Fee: $25.00
Course Fee Purpose: Software licensing, lab computers and support
Description: In-depth concepts in the planning and design of manufacturing facilities, product analysis, manufacturing processes and equipment selection, and schedule design; flow, space, activity relationships and space planning; location and layout; material handling systems; and facilities planning models.
Pre-requisite(s): MSE 3360, MSE 3460, and MSE 3700.

MSE 4590 - Lean Manufacturing Systems

Credits: (3)
Typically Taught Fall Semester: Full Sem
Course Fee: $30.00
Course Fee Purpose: Software licensing, lab computers and support
Description: This course addresses the organization, design, and management of production systems using lean manufacturing techniques. Topics include work standardization, visual manufacturing, workplace organization, poke-yoke methodology, value stream mapping, setup reduction, batch size reduction, kaizen, total productive maintenance, pull systems/kanbans, cellular manufacturing design concepts, & cellular plant layout concepts.
Pre-requisite(s): MFET 2300 or MFET 2320.

MSE 4600 - Production Systems Modeling and Analysis/Lab

Credits: (3)
Typically Taught Spring Semester: Full Sem
Course Fee: $35.00
Course Fee Purpose: Software licensing, lab computers and support
Description: Design and analysis of production systems. Fixed, flexible, and programmable automation. Modeling and simulation of alternative production systems in conjunction with the systems-design process.

Pre-requisite(s): MSE 3460, MSE 3700.

MSE 4610 - Project Management for Engineers

Credits: (3)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Course Fee: $35.00
Course Fee Purpose: Software licensing, lab computers and support
Description: This course is focused on teaching methods and tools for planning and managing complex product and system development projects. The class will focus on the preparation, planning, monitoring and adaptation of projects. The class is organized into five loosely interwoven modules; project planning and simulation techniques, case studies, project tracking, international projects, and project management resources.
Pre-requisite(s): MSE 3040, MSE 3460.
Co-Requisite(s): MSE 4615.

MSE 4615 - Lab: Senior Project Design I

Credits: (2)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Course Fee: $35.00
Course Fee Purpose: Software licensing, lab computers and support
Description: This is an engineering laboratory subject for manufacturing systems engineering seniors. Major emphasis is on interaction between analytical and experimental methods in solution of research and development problems. Communication (written and oral) of results is also a strong component of the course. Groups of three or more students work together for two terms on an assigned engineering and design project. Must be taken concurrent with MSE 4610 Project Management for Engineers.
Co-Requisite(s): MSE 4610.

MSE 4620 - Lab: Senior Project Design II

Credits: (3)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Course Fee: $35.00
Course Fee Purpose: Software licensing, lab computers and support
Description: Continuation of MSE 4615. Team assignments will lead to the construction, testing and optimization of the design. This includes detailed engineering analysis and testing of prototypes, final parameter and tolerance design, and economic analysis of the project. Senior Project II culminates in a final design review based on formal student presentations of the documented final product and verification that the final product meets all requirements.
Pre-requisite(s): MSE 4610, MSE 4615.

MSE 4700 - Manufacturing Systems Engineering II
Credits: (3)
Typically Taught Spring Semester: Full Sem
Course Fee: $25.00
Course Fee Purpose: Course consumables (controllers, robotics, etc.), software licensing, lab computers and support.
Description: This course covers the following topics: models of manufacturing systems, including transfer lines and flexible manufacturing systems; calculation of performance measures, including throughput, in-process inventory, and meeting production commitments; real-time control of scheduling; effects of machine failure, set-ups, and other disruptions on system performance. Also a study of the elements used in the automation of manufacturing processes including: programmable logic controllers, robotics (servo and non-servo), vision systems, and material handling devices.
Pre-requisite(s): MSE 3040, MSE 3700.

MSE 4800 - Individual Research Problems
Credits: (1-3)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Course Fee: $25.00
Course Fee Purpose: Software licensing, lab computers and support
Description: With permission and under the direction of faculty, the student researches a specific problem in the manufacturing systems engineering field.
Pre-requisite(s): Permission of department.
May be taken 3 times and up to 3 credits.

MSE 4830 - Directed Readings for Manufacturing Systems Engineering
Credits: (1-3)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: With permission and under the direction of faculty, the student studies a topic taken from the mechanical engineering literature.
Pre-requisite(s): Permission of department.
May be taken 3 times and up to 3 credits.

MSE 4890 INT - Cooperative Work Experience
Credits: (1-3)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Provides academic credit for engineering work experience. Permission of department required.
Pre-requisite(s): Permission of department.
May be taken 3 times and up to 3 credits.

MSE 4900 - Special Topics
Credits: (1-3)
Variable Title
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: A special topic in manufacturing systems engineering is selected by the faculty to be taught on a one-time basis. With departmental approval, may substitute for a technical elective.
Pre-requisite(s): Permission of department.
May be repeated three times with a maximum of three credit hours.

MSE 4920 - Short Courses, Workshops, Institutes, and Special Programs
Credits: (1-6)
Workshop
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Consult the semester class schedule for current offering under this number. The specific title and credit authorized will appear on the student transcript.
Pre-requisite(s): Permission of department.
May be repeated for a total maximum of 6 credit hours.
Note: With departmental approval, may substitute for a technical elective.

MSE 5010 - Foundation of Systems Engineering
MSE 5020 - Engineering Project and Program Management

Credits: (3)
Typically Taught Fall Semester: Full Sem - Online
Typically Taught Spring Semester: Full Sem - Online
Course Fee: $25.00
Course Fee Purpose: Per class registration, allocated partially to computer lab refurbishment, lab aids and software licenses.
Description: The Engineering Project and Program Management course provides participants the opportunity to gain skills and experience applying the framework, processes, and knowledge areas of the Project Management Body of Knowledge (PMBOK) as defined by the Project Management Institute (PMI). Students apply methods and tools through in-class lab work, deliverables, and portfolio generation.

MSE 5140 - Design for Operational Feasibility

Credits: (3)
Typically Taught Fall Semester: Full Sem - Online
Typically Taught Spring Semester: Full Sem - Online
Course Fee: $25.00
Course Fee Purpose: Per class registration, allocated partially to computer lab refurbishment, lab aids and software licenses.
Description: This course will introduce the application of engineering and management efforts to maximize the likelihood that the resulting system design will be operationally feasible and perform as intended in an effective and efficient manner. The objective of the course is to study the characteristics that are known to have a significant impact on the success of a system and the customer's need. Topics include Design for reliability, maintainability, human factors, logistics, producibility, and affordability.

MSE 5810 - Experimental Course

Credits: (1-6)
Experimental
Description: Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript. May be repeated for a total maximum of 6 credit hours.

MSRS 6100 - Research Methods

Credits: (3)
Typically Taught Fall Semester: Full Sem
Description: This course assists students to critique, evaluate, and use research within their health science education careers. The research process including the theoretical/conceptual basis of health sciences research, methods, and critique strategies are examined in detail. There is a focus on evaluation of published research reports to evaluate the appropriateness of application of findings to clinical practice.
This course is cross-listed with NRSG 6110.

MSRS 6120 - Research and Statistics

Credits: (3)
Typically Taught Spring Semester: Full Sem
Description: This course focuses on the development of research skills used to evaluate data in support of the utilization of findings in clinical practice. Skills related to statistical analysis of quantitative data will be emphasized. Parametric and non-parametric methods of statistical analysis will be discussed.
This course is cross-listed with NRSG 6120.

MSRS 6130 - Functional Hemodynamics

Credits: (3)
Typically Taught Spring Semester: Full Sem
Description: This course offers the fundamental principles and indications for invasive hemodynamic monitoring. The indications, possible contraindications and possible complications involved with the insertion of central Venous lines, arterial lines, Pulmonary artery catheters and ICP monitoring with the expected CVP, RV, PAP, PCWP, CO and CI reading, waveforms and troubleshooting.
MSRS 6140 - Clinical Laboratory Correlation

Credits: (3)
Typically Taught Fall Semester: Full Sem
Description: This course covers the concepts, analytical methods and clinical correlation of laboratory values as they relate to radiographic imaging, pathology and patient history.

MSRS 6150 - Grant Writing for the Imaging Clinical Scientist

Credits: (3)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Students will learn to write competitive imaging clinical grant proposals. These proposals will be specific to resources required by professionals within Radiologic Sciences. For example, grants may be obtained for equipment, International RADAID (a humanitarian imaging group), and/or professional development. Learners will achieve competence in writing typical grant components including statements of need/rationale, implementation of strategies, outcomes, personnel, evaluation, budgets, and executive summaries.

MSRS 6200 - Population Health in Radiologic Sciences

Credits: (3)
Typically Taught Summer Semester: Full Sem
Description: The course addresses the integration of population health concepts into strategic planning and managerial decision-making in health services organizations. Course work includes environmental analysis of health behaviors and lifestyle that impact demand on health care delivery systems. The student will evaluate models for integration of health services, preventive programs, demand management, and policy issues affecting continuity of care. This course is cross-listed with MHA 6000.

MSRS 6210 - Global Health in Medical Imaging

Credits: (3)
Typically Taught Fall Semester: Full Sem
Description: The purpose of this course is to explore the role of radiology in addressing healthcare disparities. This course will identify the challenges and strategies in providing radiologic services within a resource-poor complex systems with various stakeholders, advanced technologies, diverse education, volunteer management, and legal and financial considerations.

MSRS 6220 - International Competency in Medical Imaging

Credits: (3)
Typically Taught Spring Semester: Full Sem
Description: The purpose of this course is to identify the clinical role of medical imaging in developing worlds. The current challenges of managing unique illnesses with limited resources will be discussed. Some common diseases and radiologic findings will be addressed regarding diagnosis and treatment.

Course Objectives

Students will gain and understanding and develop skills necessary to:

- Identify methods for optimization of Radiologic services in the developing world.
- Discuss public health and international epidemiology for radiology.
- Identify appropriate disaster response.
- Discuss infectious disease and imaging.
- Discuss interventional, cardiac, and pediatric services in a global health environment.
- Identify challenges in maternal-fetal medicine and women's health in a global health environment.

MSRS 6263 - Advanced Diagnostic Services Pharmacology

Credits: (3)
Typically Taught Spring Semester: Full Sem
Description: This course is designed to enhance student knowledge of pharmaceuticals and their impact on patients undergoing advanced imaging procedures. The content addresses the intent of pharmaceuticals and their effect on patient diseases, conditions, and physiology. After acquiring this content and the appropriate clinical skills, students will review the patients' past and current clinical condition and history to gain an understanding of medication significance relevant to the imaging procedure.

MSRS 6310 - Evaluation of the Cardiac System
Credits: (3)
Typically Taught Fall Semester: Full Sem
Description: The content of this course is designed to enhance student knowledge of the diagnostic procedures performed in the cardiac catheterization laboratory to identify atherosclerotic coronary or peripheral artery disease, abnormalities of the heart muscle, and valvular or congenital heart abnormalities.

MSRS 6311 - Interventional Cardiac Procedures I

Credits: (3)
Typically Taught Spring Semester: Full Sem
Description: This course is designed to enhance student knowledge of the interventional procedures performed in the cardiac catheterization laboratory that address coronary artery disease & myocardial infarction; The foundations of percutaneous coronary intervention techniques will be presented including indications, contraindications, and complications.

MSRS 6312 - Interventional Cardiac Procedures II

Credits: (3)
Typically Taught Summer Semester: Full Sem
Description: This course is designed to enhance student knowledge of the interventional procedures performed in the cardiac catheterization laboratory that address pericardial and myocardial disease, heart failure and cardiogenic shock. The principles of hemodynamic data collection techniques will be presented including pressure pathology, waveform interpretation and cardiac output. Course content will also include mechanical circulatory support technologies such as the left ventricular assist devices (LVAD) and the intra-aortic balloon pump (IABP).

MSRS 6313 - Interventional Cardiac Procedures III

Credits: (3)
Typically Taught Fall Semester: Full Sem
Description: This course is designed to enhance student knowledge of the interventional procedures performed in the cardiac catheterization laboratory that address valvular disease, septal defects, and vascular disease. Transcatheter structural heart repair devices deployed in the cath lab have largely replaced open-heart surgery as the therapy of choice and many labs are incorporating vascular procedures into cardiac cath. Patient preparation, medical instrumentation, and performance of these procedures will be presented.

MSRS 6403 - Evaluation of the Osseous System

Credits: (3)
Typically Taught Fall Semester: Full Sem
Description: Imaging evaluation of pathological conditions, abnormalities and anomalies of the osseous system.

MSRS 6413 - Evaluation of the Chest

Credits: (3)
Typically Taught Fall Semester: Full Sem
Description: Imaging evaluation of pathological conditions, abnormalities and anomalies of the chest.

MSRS 6423 - Evaluation of the Abdomen and G I System

Credits: (3)
Typically Taught Spring Semester: Full Sem
Description: Imaging evaluation of pathological conditions, abnormalities and anomalies of the abdomen and gastrointestinal system.

MSRS 6433 - Evaluation of the Genitourinary System

Credits: (3)
Typically Taught Spring Semester: Full Sem
Description: Imaging evaluation of pathological conditions, abnormalities and anomalies of the genitourinary system.

MSRS 6443 - Clinical Pathways

Credits: (3)
Typically Taught Fall Semester: Full Sem
Description: Studying clinical pathways for patients based on disease processes and trauma.

MSRS 6450 - Managing Health Information

Credits: (3)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
**Description:** This introductory course is to help students develop a basic vocabulary and understanding of the principles of medical information systems. Students will additionally be introduced to the basic principles of health insurance and medical billing and coding. The main goals of this course are (1) Understanding current networking and communication systems and (2) Application of knowledge of specialized medical terminologies, insurance, and regulation systems. This course is cross-listed with MHA 6450.

**MSRS 6453 - Evaluation/CNS and Facial Structures**

Credits: (3)
Typically Taught Fall Semester: Full Sem
Description: Imaging evaluation of pathological conditions, abnormalities and anomalies of the central nervous system and facial structures.

**MSRS 6461 - Leadership in Clinical Practice**

Credits: (3)
Typically Taught Summer Semester: Full Sem
Description: The purpose of this course is to identify essential leadership and management behaviors that support a clinical practice in medical imaging. Students will gain an essential understanding of clinical organization, power, and empowerment. Career and professional considerations regarding quality, safety, work environment, communication, and career development will be critically discussed.

**MSRS 6463 - Problem Patient Management**

Credits: (3)
Typically Taught Summer Semester: Full Sem
Description: Determination of pathological conditions utilizing problem-solving case studies.

**MSRS 6473 - Non-vascular Invasive Imaging**

Credits: (3)
Typically Taught Summer Semester: Full Sem
Description: Patient preparation and student performance of medical imaging non-vascular invasive procedures.

**MSRS 6481 - Current Trends in Pediatric Imaging**

Credits: (3)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: The purpose of this course is to help students develop the knowledge and cognitive skills required for advanced pediatric imaging. The main goals of this course are (1) Understanding the differences in the appearance of neonate, infant, and child normal anatomy; (2) Assisting or performing various pediatric imaging studies; (3) Recognizing normal/pathologic advanced imaging appearance of common pediatric conditions; (4) Becoming familiar with common conditions diagnosed in the pediatric patient.

**MSRS 6482 - Current Trends in Cardiovascular Imaging**

Credits: (3)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: The content of this course is designed to enhance student knowledge of contemporary cardiovascular imaging techniques and the pathology they address. Advances in modalities used to image the heart, including conventional radiography, angiography, echocardiography, cardiac magnetic resonance, and cardiovascular computed tomography, have fundamentally advanced the understanding and treatment of cardiovascular disease in the 21st century. This course will present the latest advances in the field and compare the strengths and weaknesses of each modality. Course content will focus on heart defects, endocarditis, coronary heart disease, cardiomyopathies, myocarditis, cardiac tumors, pericardial diseases, pulmonary vascular diseases, and diseases of the thoracic aorta. Student will discuss anatomy, pathophysiology, and clinical features, encouraging the technologist to think critically, problem-solve, and evaluate the need for therapeutic intervention.

**MSRS 6483 - Musculoskeletal Sonography**

Credits: (3)
Typically Taught Fall Semester: Full Sem
Description: The (MSK) Sonography course will provide concepts in musculoskeletal anatomy and sonographic scanning technique and protocols necessary to produce and evaluate diagnostic images in the clinical setting for diagnosis of musculoskeletal pathology.
MSRS 6484 - Sonographic Fundamentals for Invasive Guidance

Credits: (3)
Typically Taught Fall Semester: Full Sem
Description: The purpose of this course is to aid in the development of knowledge and skills necessary to perform invasive procedures under the guidance of medical imaging.

Course Objectives

Students will review and become competent in concepts and skills including (1) common invasive procedures (2) location, appearance, and approach for masses, cysts, and/or vascular access using medical imaging (3) procedural safety, confidence, and risks. Areas of interest will include:

- Liver Biopsy
- Renal Biopsy
- Extra Visceral Abdominal Mass Biopsy
- Chest Mass Biopsy
- Breast Biopsy
- Fine-Needle Aspiration of Thyroid Nodules
- Superficial Lymph Node Biopsy
- Endovaginal Procedures
- Transrectal Prostate Biopsy
- Ultrasound Guided Access and Drainage for Vascular, Percutaneous Nephrostomy, and Transhepatic Biliary Drainage

MSRS 6485 - Current Trends in Visual Analytics

Credits: (3)
Typically Taught Spring Semester: Full Sem
Description: The purpose of this course is to provide an understanding of the evolution in the application for artificial intelligence (AI) within healthcare and radiology. Students will learn about the technological background of AI and how this technology has impacted emerging technology, clinical practice, and patient care.

MSRS 6486 - Pathological Review Across Imaging Modalities

Credits: (3)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: The purpose of this course is to help students develop the knowledge and cognitive skills required for advanced imaging in various modalities. Students will become familiar with how different imaging modalities enhance and complement radiographic diagnosis of common pathologies and conditions.

MSRS 6487 - Current Trends in Pain Management

Credits: (3)
Typically Taught Spring Semester: Full Sem
Description: The purpose of this course is to overview the etiology, classification, evaluation, imaging, and treatment for pain management.

Course Objectives

Students will gain and understanding and develop skills necessary to:

- Discuss the taxonomy of chronic and acute pain.
- Identify challenges in the training, education, and certification of pain medicine
- Determine psychosocial aspects of pain and consider appropriate assessments
- Identify clinical conditions related to pain and pharmacologic treatments.
- Discuss nerve block techniques and interventional techniques.
- Characterize best practice in image modalities for procedures targeted for pain management.
- Consider research, ethics, and reimbursement in regards to pain management.

MSRS 6493 - Advanced 3D Medical Imaging

Credits: (3)
Typically Taught Summer Semester: Full Sem
Course Fee: $25.00
Course Fee Purpose: Lab Supplies, Phantoms, software upgrades and maintenance
Description: The Advanced 3D Medical Imaging course will provide instruction on the creation, manipulation, and printing of three-dimensional data-sets of different anatomical parts of the body. The data-sets will originate from diagnostic images (provided by the department or the student), particularly Magnetic Resonance Imaging (MRI) and Computer Tomography (CT) images. The course will include a hands-on learning lab where the student will use software to create a three-dimensional digital image and a three-dimensional print of an anatomical body part.
MSRS 6501 - Advanced Practice Simulation I

Credits: (1)
Typically Taught Fall Semester: Full Sem
Description: Advanced imaging simulation courses are designed to help students develop the knowledge and cognitive skills required for the performance of advanced imaging clinical assignments.

Typically Taught Spring Semester: Full Sem

Description: Simulation of advanced imaging and evaluation of pathological conditions, abnormalities, and anomalies of the pediatric systems.

MSRS 6502 - Advanced Practice Simulation II

Credits: (1)
Typically Taught Spring Semester: Full Sem
Description: Advanced imaging simulation courses help students develop the knowledge and cognitive skills required for the performance of advanced medical imaging clinical assignments.

MSRS 6503 - Advanced Practice Simulation III

Credits: (1)
Typically Taught Summer Semester: Full Sem
Description: Advanced imaging simulation courses help students develop the knowledge and cognitive skills required for the performance of advanced medical imaging clinical assignments.

MSRS 6504 - Pediatric Sedation and Physical Exam

Credits: (3)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: This course provides information for advanced imaging procedure-related sedation and physical exam. Sedation standards, techniques, and regulations for pediatric imaging procedures will be provided. Essential aspects of collaboration with other medical providers are emphasized in the course to benefit pediatric patients during imaging exams and procedures.

MSRS 6505 - Pediatric Simulation Imaging I

 Credits: (3)
Typically Taught Fall Semester: Full Sem

Typically Taught Spring Semester: Full Sem

Typically Taught Winter Semester: Full Sem

Description: Simulation, practice, and discussion of the performance of advanced imaging and evaluation of pediatric patients.

MSRS 6506 - Pediatric Simulation Imaging II

Credits: (3)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Simulation, practice, and discussion of the performance of advanced imaging and evaluation of pediatric patients.

MSRS 6507 - Pediatric GI and GU Imaging

Credits: (6)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Advanced imaging and evaluation of pathological conditions, abnormalities and anomalies of the pediatric GI and GU systems.

MSRS 6508 - Pediatric Respiratory and Musculoskeletal Imaging

Credits: (6)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Advanced imaging and evaluation of pathological conditions, abnormalities, and anomalies of the pediatric respiratory and musculoskeletal systems.

MSRS 6509 - Pediatric Neurologic Imaging

Credits: (3)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Advanced imaging and evaluation of pathological conditions, abnormalities, and anomalies of the pediatric neurologic system.

MSRS 6850 - Study Abroad

Credits: (3)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Students will gain knowledge and cultural experiences developed to address historical, community, political, economic, educational, geographical, and literary/artistic variables.

MSRS 6860 INT - Clinical Preceptorship I

Credits: (3)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Experience in a radiology department. Consent of instructor needed.

MSRS 6861 INT - Clinical Preceptorship II

Credits: (3)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Continuation of MSRS 6860.

MSRS 6862 INT - Clinical Preceptorship III

Credits: (3)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Continuation of MSRS 6861.

MSRS 6863 - Vascular Invasive Imaging Procedures

Credits: (3)
Typically Taught Summer Semester: Full Sem
Description: Patient preparation and performance of medical imaging vascular invasive procedures are presented.

MSRS 6900 INT - Capstone: Clinical Fellowship & Portfolio

Credits: (3)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Experience in a radiology department and interventional Radiology coordinated by Weber State University under the supervision of a radiologist or other Medical Practitioner. Review and evaluation of student competencies, clinical performance and professional development as required by certification.

MSRS 6910 - Transition to Practice

Credits: (2)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Transition to practice provides students with a pertinent review of the content, skills, and processes necessary to gain and maintain imaging credentials and elevate professional practice. The course explores the fundamental aspects of professionalism, interprofessional communication, quality in practice, and professional resilience.

MSRS 6992 - Advanced Practice Seminar

Credits: (1-3)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: This course is designed to enhance students' knowledge of current research and advances in the Radiologic Sciences.

MSRS 6999 - Master's Thesis in Radiologic Sciences

Credits: (3)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Description: Students will enroll for this course as they complete their master's thesis under the direction of a departmental graduate advisor. Departmental seminars and readings may also be assigned as part of this course. Students will finish their Master of Science in Radiologic Sciences degree by first completing a course of classroom or didactic study, then writing an original research monograph for their thesis. This course is to be used during the time the student is writing the thesis and getting approval for the thesis.

MSRT 6010 - Medical Writing, Research Methods & Design

Credits: (3)
Typically Taught Fall Semester: 2nd Blk - Online
Description: This course will assist students in developing
writing skills that meet professional journal requirements. Students will learn how to write research reports, abstracts, clinical case reports and scientific posters. Students will develop skills in effective editing, reviewing and proofreading. They will also develop skills that allow them to critically read published research articles in order to understand the validity and implications of the study results.

**Pre-requisite(s):** Acceptance into MSRT program.

**MSRT 6020 - Medical Pathophysiology/Cardiopulmonary Case Reviews**

**Credits:** (3)
**Typically Taught Spring Semester:** 1st Blk
**Description:** Advanced-practice pathology of the heart and lungs presented in case study format for articulating a working diagnosis, treatment, and follow-up care based on an abundance of patient assessment techniques including patient history/physical, signs, symptoms, and ancillary radiographic evidence. Medical information gathered from research database articles are presented to enhance a decision-making rationale for the treatment of cardiopulmonary diseases.

**Pre-requisite(s):** Acceptance into MSRT program.

**MSRT 6030 - Adult Learning Theory & Simulation Strategies**

**Credits:** (3)
**Typically Taught Spring Semester:** 1st Blk - Online
**Description:** An application of teaching and learning theories for adult learners across variable clinical, laboratory, simulation lab, and in face-to-face interactions are explored within both traditional and non-traditional classroom settings. Teaching strategies and simulation designs are designed to support student learning for future respiratory therapy educators and clinical instructors.

**Pre-requisite(s):** Acceptance into MSRT program.

**MSRT 6040 - Respiratory Care Education**

**Credits:** (3)
**Typically Taught Spring Semester:** 2nd Block Online
**Description:** This course aims to explore concepts of teaching and learning theories (adult learners) in a rapidly changing healthcare environment. Included are knowledge, attitudes, and skills needed to train future respiratory therapy educators, clinical educators for expanding roles in healthcare.

**Pre-requisite(s):** Admitted to MSRT Program

**MSRT 6050 - Respiratory Care Curriculum and Course Design**

**Credits:** (3)
**Typically Taught Fall Semester:** 1st Block Online
**Description:** This course aims to explore concepts of course design and curriculum development specific to respiratory therapy education. Essential elements will include developing a syllabus, determining course materials, selecting optimal teaching methods, and designing appropriate assessments. The course will also address course management, teaching diverse students, using technology in teaching, and meeting accreditation standards.

**Pre-requisite(s):** Acceptance into MSRT program.

**MSRT 6130 - Evidence-based Practice**

**Credits:** (3)
**Typically Taught Fall Semester:** 1st Blk
**Description:** This course explores research-based evidence of best practices for advanced respiratory care practitioners (RCP’s) by identifying important questions, i.e., medication, ventilation strategies, protocols, etc. in the evaluation, diagnosis, or treatment of patients suffering abnormalities of the cardiopulmonary system. A methodological approach to evaluate practice is explored through a systematic literature search whereby the evidence manifest through particular treatments of a population can be expected.

**Pre-requisite(s):** Acceptance into MSRT program.

**MSRT 6140 - Applied Research in Respiratory Care**

**Credits:** (3)
**Typically Taught Fall Semester:** Full Sem
**Description:** Research is a fundamental part of healthcare. This course will explore research opportunities specifically in the field of respiratory care. Basic statistical concepts will be reviewed. Nominal, ordinal, and continuous methods will also be studied. Publishing the findings through an original research paper, an abstract, case report, and poster presentation will be a main focus for this course.

**Pre-requisite(s):** Acceptance into MSRT program.

**MSRT 6150 - Research Methods in Respiratory Care**
Credits: (3)
Typically Taught Summer Semester: 1st Block Online, 2nd Block Online

Typically Taught Fall Semester: 1st Block Online, 2nd Block Online

Typically Taught Spring Semester: 1st Block Online, 2nd Block Online

Description: Research involves a process of "sense-making" of interrelated activities rather than a simple description or basic understanding of unrelated events. Appreciating the sequence of events and the diverse methods of inquiry can lead a researcher in multiple directions. It is important to ground your initial question in methods that enhance understanding. Researchers must develop a "toolkit" with methods that address a central question and provide a means to thoroughly evaluate a stated outcome. Methods can assist healthcare researchers to identify problems to be studied with ideas that answer the questions or central problem in the inquiry process. In this way, practitioners need to know quantitative, qualitative, and mixed approaches of inquiry to develop an in-depth understanding of multiple research designs and procedures used in research today. Through this course, students will gain an understanding of research used in the field of Respiratory Care and apply and evaluate methods of inquiry in the discovery of new medical knowledge.

Pre-requisite(s): Acceptance in the MSRT program

MSRT 6410 - Certified Pulmonary Function Technologist (CPFT)

Credits: (3)
Typically Taught Fall Semester: Full Sem

Description: Evaluation and assessment of pulmonary disease is an important skill for the advanced-practice respiratory care practitioner (RCP). Requisite to making an accurate diagnosis, practitioners must understand diagnostic measurements and recommend treatment of patients with specific pulmonary diseases. This course is essential to gain knowledge to pass the CPFT (NBRC) exam for Certified Pulmonary Function Technologists.

Pre-requisite(s): Acceptance into MSRT program.

MSRT 6420 - Sleep Disorders Specialty (SDS)

Credits: (3)
Typically Taught Spring Semester: Full Sem

Description: This course is essential to gain knowledge in the evaluation and treatment of sleep disorders in the context of a polysomnography lab and to pass the SDS (NBRC) credential for sleep disorder specialists.

Pre-requisite(s): Acceptance into MSRT program.

MSRT 6460 - Neonatal Pediatric Specialty (NPS)

Credits: (3)
Typically Taught Spring Semester: Full Sem

Description: This course is essential to gain knowledge in the evaluation and treatment of sleep disorders in the context of a polysomnography lab and to pass the SDS (NBRC) credential for sleep disorder specialists.

Pre-requisite(s): Acceptance into MSRT program.

MSRT 6470 - Adult Critical Care Specialty (ACCS)

Credits: (3)
Typically Taught Spring Semester: Full Sem

Description: This course prepares the advanced-practice respiratory care practitioner (RCP) to effectively evaluate, assess, manage and provide appropriate care to critically ill adult patients. This course extensively covers advanced airway and cardiovascular management, mechanisms of respiratory failure, analysis of laboratory and imaging results, specialty medical gasses and pharmacological agents, management of patients with infectious disease and sepsis, assisting and performing advanced procedures, and end-of-life care in the adult population. This course will prepare the practitioner for an advanced critical care specialty credentialing examination (ACCS).

Pre-requisite(s): Acceptance into MSRT program.

MSRT 6480 - Asthma Educator Specialty Credential (AE-C)

Credits: (3)
Typically Taught Spring Semester: Full Sem

Description: This course prepares the advanced-practice respiratory care practitioner (RCP) to optimally educate patients and family members of patients suffering with asthma. The course includes disease pathophysiology, assessment, pharmacology, classification, and management of asthma based on severity, emergency treatment and evaluation of treatment programs. This course will prepare the practitioner for a national asthma education certification.
examination (AE-C).

Pre-requisite(s): Acceptance into MSRT program.

**MSRT 6700 - Capstone Project**

**Credits: (3)**
**Typically Taught Fall Semester: Full Sem**
**Typically Taught Spring Semester: Full Sem**
**Description:** This course is designed to be self-directed, faculty supervised culminating project specific to the educational track that the student has chosen within the MSRT program (Education, Research or Health Administration). The student will demonstrate their firm grasp of their educational track and their mastery of professional/scientific writing through the development of a research paper. This course requires that the student develop a research question, prepare a learning contract that outlines their approach to the research question, and complete 40 hours of documented time with a mentor(s) who have a minimum of a Master's degree in a related area or in performing original research. The student will also assemble a formative committee to act as a resource as the student develops the research project and summative committee to evaluate and validate the student's research. The formative and summative committees each consist of three professionals with a minimum of a Master's degree. The student will complete a Masters level research paper that is a minimum of 40-50 pages in APA format.

Pre-requisite(s): Acceptance into MSRT program.
May be repeated once up to 6 credit hours.

**MSRT 6810 - Experimental Course**

**Credits: (1-6)**
**Experimental**
**Description:** Individual courses offered on an experimental basis, identified by specific name and description. The specific title will appear on student's transcript along with the authorized credit.
May be repeated for a total maximum of 6 credit hours.

**MSW 6010 - Foundations of Social Work**

**Credits: (3)**
**Typically Taught Fall Semester: Full Sem**
**Description:** A thorough review of the history, philosophy, and fundamental principles of social work, emphasizing the knowledge, values and skills needed for social work practice in all settings.

Pre-requisite(s): Formal admittance to the MSW program.

**MSW 6100 - Behavior, Environment & Social Systems**

**Credits: (3)**
**Typically Taught Fall Semester: Full Sem**
**Description:** A graduate level introduction to the ecological model, examining in-depth, the relationship between human development (individuals, families, groups, communities, and organizations) and the social environment. Systems and theory are examined critically in the biological, psychological, sociological, and spiritual arenas, with an emphasis on social justice and the intersectionality of race, ethnicity, sexuality, gender, economic status and other dimensions of diversity on the developmental process.

Pre-requisite(s): Formal admittance to the MSW program.

**MSW 6150 - Behavioral Health, Diagnostics, and Mental Health**

**Credits: (3)**
**Typically Taught Fall Semester: Full Sem**
**Typically Taught Spring Semester: Full Sem**
**Description:** This course is designed to introduce students understanding to the mental health diagnoses associated with the DSM-V.

**MSW 6200 - Human and Social Diversity and Oppression**

**Credits: (3)**
**Typically Taught Fall Semester: Full Sem**
**Typically Taught Spring Semester: Full Sem**
**Description:** A study of diversity among individuals, groups, and communities and dynamics of oppression locally, regionally, nationally, and globally. Application of knowledge, skills, and interventions to alleviate social inequities and human suffering will be stressed.

Pre-requisite(s): Formal admittance to Master of Social Work program.

**MSW 6235 - Loss Across the Lifespan**

**Credits: (3)**
**Typically Taught Fall Semester: Full Sem**
**Typically Taught Spring Semester: Full Sem**
**Description:** This course will provide an overview of loss as a normal and necessary part of life and growth. It will also provide the foundation of classical grief theory and its evolution to more modern grief theory and work. While death and dying at different stages in the lifespan will be
addressed, each life stage will also be explored for the normative losses that occur at that stage.

**Pre-requisite(s):** Formal admittance to Master of Social Work Program, or other WSU graduate program.

**MSW 6245 - Aging Services**

Credits: (3)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Overview of older adults as a population group and of aging as a biopsychosocial process. The course explores aspects of social services and health care systems intended to help individuals, families, and communities confront aging-related challenges and capitalize upon aging-related strengths.

**Pre-requisite(s):** Formal admittance to Master of Social Work program or WSU graduate program.

**MSW 6255 - Sexuality in Social Work Practice**

Credits: (3)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: A graduate-level introduction and thorough overview of the nature and meaning of sexuality and an in-depth consideration of various ways that sexuality is part of social work practice. Students will examine the knowledge, values, and skills needed to address sexuality in social work practice.

**Pre-requisite(s):** Formal admittance to the MSW program, MSW 6300, MSW 6910.

**MSW 6265 - Crisis Intervention and Trauma**

Credits: (3)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: This course is designed to prepare students to develop assessment, diagnostic and evidenced based interventions to assist those in critical need during and after a crisis or trauma. A crisis is defined as an event that exceeds and overwhelms an individual's coping skills to the point where equilibrium is disrupted. Micro, mezzo, and macro crises as well as trauma will be explored.

**Pre-requisite(s):** Formal admittance into the MSW program, or other WSU graduate program.

**MSW 6275 - Harm Reduction in Practice**

Credits: (3)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: An in-depth analysis of harm reduction and its use in clinical social work practice. Considers harm reduction in assessment, treatment planning, intervention, and evaluation of effectiveness of services. Explores the history and context of harm reduction as a therapeutic model, as well as its applications at the micro, mezzo, and macro areas of practice.

**Pre-requisite(s):** Formal admittance to Master of Social Work Program, or other WSU graduate program.

**MSW 6285 - Dialectical Behavior Therapy**

Credits: (3)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Dialectical Behavior Therapy or DBT, is a theoretical practice model that was conceptualized to address suicidal and para-suicidal behaviors. It is one of the first evidence-based models to document reductions in para-suicidal and suicidal behaviors. Originally developed as an adult model working with Borderline Personality Disorder it has proven effective in treating many other disorders and in working with adolescents and their families as well. It has gained in popularity as a treatment model and many states and insurance payers have recognized it as the treatment of choice for certain diagnoses.

**Pre-requisite(s):** Formal admittance to the MSW program, or other WSU graduate program.

**MSW 6300 - Ethics, Ethical Practice, Ethical Decision-Making**

Credits: (3)
Typically Taught Summer Semester: 2nd Blk
Typically Taught Fall Semester: Full Sem
Description: An exploration of professional social work roles, values, and ethical principles. Students will review the history and evolution of the National Association of Social Workers' Code of Ethics, as well as other statements of ethical principles in social welfare. An ethical problem-solving model will be introduced and course activities will assist students in using these guidelines in making ethical decisions in professional practice.

**Pre-requisite(s):** Formal admittance to the MSW program and MSW 6900 OR formal admittance to the MSW program with advanced standing.

**Co-Requisite(s):** Must be taken concurrently with MSW 6910.
MSW 6400 - Macro Aspects of Clinical Practice

Credits: (3)
Typically Taught Fall Semester: Full Sem
Description: A consideration of practical aspects of clinical social work practice and social service programs. Content covers administration, budgeting, program development, marketing, and institutional policy. Work with Latino communities provides a context for exploring these topics.
Pre-requisite(s): Formal admittance to MSW program, Advanced Standing Status, or MSW 6300 and MSW 6500.

MSW 6500 - Social Policy and Social Work Practice

Credits: (3)
Typically Taught Spring Semester: Full Sem
Description: An examination of the major political issues faced by social work as a profession. Examples of challenges and related social, public and social welfare policies will be identified and studied. Knowledge of local, state, and federal legislation, as well as professional, membership, and international organizations will assist in review of lobbying, funding, development, and implementation strategies used in the support of clinical social work practice and meeting human service needs. Methods for political and organizational analysis of processes and policy will be discussed.
Pre-requisite(s): Formal admission to the MSW program.

MSW 6600 - Research I: Research Informed Practice

Credits: (3)
Typically Taught Fall Semester: Full Sem
Description: A study of advanced research methods and statistical procedures as they inform and shape professional social work practice. The class reviews basic qualitative, quantitative, and single system research methodologies; analysis of data, including statistical procedures; analysis and evaluation of theoretical bases, research questions, methodologies, statistical procedures, and conclusions of research reports; and relevant technological advances. Students apply activities such as needs assessments, satisfaction surveys, and other research tools to the creation, implementation, and evaluation of evidence-based practices. The course also prepares students to examine the empirical basis of practice models and how to effectively access, critique and appraise literature in order to find best evidence-based solutions. Ethics and sensitivity to research with various groups will be emphasized.
Pre-requisite(s): Formal admittance to the MSW program, MSW 6010 (or advanced-standing status), MSW 6300, and MSW 6910.

MSW 6700 - Research II: Practice-Informed Research

Credits: (3)
Typically Taught Spring Semester: Full Sem
Description: Research II: Practice-Informed Research - A study of advanced research methods and statistical procedures as they relate to and are guided by professional social work practice. Students learn about empirical research designs and how to conduct program evaluations, including needs assessments, process evaluations and outcome evaluations. Students also learn about strategies to communicate research outcomes effectively with clients, colleagues, and stakeholders to ensure the implementation sound and empirically supported prevention and intervention strategies and models of practice. Ethics and sensitivity to research with various groups will be emphasized.
Pre-requisite(s): Formal admittance to the MSW program, MSW 6010 (or advanced-standing status), MSW 6300, MSW 6910, and MSW 6930.

MSW 6760 - Foundation Field I

Credits: (3)
Typically Taught Fall Semester: Full Sem
Course Fee: $0.00
Course Fee Purpose: The course fee for MSW 6760 is used to support the preparation and ongoing training of field placement supervisors. Course fee funds are also be used to cover the tangible costs and materials associated with field contracts and the formal review and evaluation of student interns.
Description: The first 200 hours of the first-year supervised field practicum in an approved social service setting, with a focus on the application of social work knowledge, ethics, values, theory, skills, and practice evaluation and the development of competencies and behaviors necessary for effective clinical practice with individuals, families, and groups. The course includes regular meetings with an on-site field supervisor, the program's field director, and other field students in a professional seminar. The seminar links professional social work practice with academic content.
Pre-requisite(s): Formal admittance to the MSW program.
MSW 6761 - Foundation Field II

Credits: (3)
Typically Taught Spring Semester: Full Sem
Course Fee: $0.00
Course Fee Purpose: The course fee for MSW 6761 is used to support the preparation and ongoing training of field placement supervisors. Course fee funds are also used to cover the tangible costs and materials associated with field contracts and the formal review and evaluation of student interns.
Description: The second 200 hours of the first-year supervised field practicum in an approved social service setting, with a focus on the application of social work knowledge, ethics, values, theory, skills, and practice evaluation and the development of competencies and behaviors necessary for effective clinical practice with individuals, families, and groups. The course includes regular meetings with an on-site field supervisor, the program's field director, and other field students in a professional seminar. The seminar links professional social work practice with academic content.
Pre-requisite(s): Formal admittance to the MSW program.

MSW 6850 - Graduate Social Work Study Abroad

Credits: (1-4)
Description: The purpose of this course is to provide opportunities for graduate students in social work to experience study abroad or study away programs that are designed to explore issues relevant to graduate-level social work theory and practice with individuals, families, groups, communities, and organizations.
Pre-requisite(s): Admission into the Master of Social Work (MSW) program or other graduate program with permission of the instructor.

MSW 6860 - Advanced Field I

Credits: (3)
Typically Taught Fall Semester: Full Sem
Course Fee: $0.00
Course Fee Purpose: The course fee for MSW 6860 is used to support the preparation and ongoing training of field placement supervisors. Course fee funds are also used to cover the tangible costs and materials associated with field contracts and the formal review and evaluation of student interns.
Description: The first 250 hours of the second-year supervised field practicum in an approved social service setting, with a focus on the application of social work knowledge, ethics, values, theory, skills, and practice evaluation and the development of competencies and behaviors necessary for effective clinical practice with individuals, families, and groups. The course includes regular meetings with an on-site field supervisor, the program's field director, and other field students in a professional seminar. The seminar links professional social work practice with academic content.
Pre-requisite(s): Formal admittance to the MSW program, MSW 6760 (or advanced-standing status), and MSW 6761 (or advanced-standing status).

MSW 6861 - Advanced Field II

Credits: (3)
Typically Taught Spring Semester: Full Sem
Course Fee: $0.00
Course Fee Purpose: The course fee for MSW 6861 is used to support the preparation and ongoing training of field placement supervisors. Course fee funds are also used to cover the tangible costs and materials associated with field contracts and the formal review and evaluation of student interns.
Description: The second 250 hours of the second-year supervised field practicum in an approved social service setting, with a focus on the application of social work knowledge, ethics, values, theory, skills, and practice evaluation and the development of competencies and behaviors necessary for effective clinical practice with individuals, families, and groups. The course includes regular meetings with an on-site field supervisor, the program's field director, and other field students in a professional seminar. The seminar links professional social work practice with academic content.
Pre-requisite(s): Formal admittance to the MSW program, MSW 6760 (or advanced-standing status), and MSW 6761 (or advanced-standing status).

MSW 6900 - Clinical Practice I: Traditional Theories and Model

Credits: (3)
Typically Taught Fall Semester: Full Sem
Description: An overview of common traditional theories and models of social work practice at micro, mezzo, and macro levels. The course combines lecture and hands on application experiences.
Pre-requisite(s): Formal admittance to the MSW program.

MSW 6910 - Clinical Practice II: Vulnerable and At-Risk Populations
Credits: (3)
Typically Taught Spring Semester: Full Sem
Description: A study of clinical social work practice theories and models with vulnerable and at-risk populations at micro, mezzo, and macro levels, with an emphasis on work with Latino clients, families, and communities. Content also covers harm reduction, advocacy, social action, and social justice practice. The course combines lecture and hands on application experiences.
Pre-requisite(s): Formal admittance to the MSW program and MSW 6900, OR formal admittance to the MSW program with advanced standing.
Co-Requisite(s): Must be taken concurrently with MSW 6300.

MSW 6930 - Clinical Practice III:
Evidence-Based Practice

Credits: (3)
Typically Taught Fall Semester: Full Sem
Description: An advanced course of study of evidence-based clinical social work practice theories and models for work with individuals (e.g., EMDR, DBT, CBT, Trauma-Focused CBT, Cue Exposure-Response Prevention, ACT, PCIT, Motivational Interviewing). The course combines lecture and hands on application experiences.
Pre-requisite(s): Formal admittance to the MSW program, MSW 6900 (or advanced-standing status), and MSW 6910.

MSW 6940 - Clinical Practice IV: Group Work

Credits: (3)
Typically Taught Spring Semester: Full Sem
Description: An advanced course of study of evidence-based clinical social work practice theories and models for work with groups and families. The course combines lecture and hands on application experiences.
Pre-requisite(s): Formal admittance to the MSW program, MSW 6900 (or advanced-standing status), MSW 6910, and MSW 6930.

MTAX 6210 - Business Law and Legal Liability

Credits: (3)
Description: A study of important business law topics accounting and taxation professionals should be familiar with including contracts, business organizations, securities, discrimination, banking, and property will be discussed. Legal liability of accounting and taxation professionals will also be addressed.

MTAX 6400 - Tax Research & Procedure

Credits: (3)
Typically Taught Summer Semester: 1st Blk or 2nd Blk
Typically Taught Fall Semester: Full Sem
Description: Techniques in effective tax research, planning and communication. Also includes a discussion of tax policy.

MTAX 6405 - Accounting for Income Taxes

Credits: (3)
Typically Taught Fall Semester: Full Sem
Description: Cash and accrual methods of accounting, inventories, accounting for book/tax disparities, income statement tax provision, original issue discount, depreciation methods, amortization, long-term contracts, changes in methods of accounting, accounting periods, capitalization vs. expense, and other topics critical to bridging financial accounting and tax accounting.

MTAX 6410 - International Taxation

Credits: (3)
Typically Taught Spring Semester: Full Sem
Description: Principles of U.S. taxation applicable to inbound and outbound international transactions. Also covers issues related to international tax treaties.

MTAX 6430 - Advanced Individual Taxation

Credits: (3)
Typically Taught Spring Semester: Full Sem
Description: In-depth coverage of advanced individual tax issues such as alternative minimum tax, loss limitations, real estate transactions, stock options, employment taxes, tax credits, charitable contributions, interest classification, related-party transactions, and timing of income/loss recognition.

MTAX 6435 - State & Local Taxation/Federal Tax Practice

Credits: (3)
Description: State income taxation, nexus,
multijurisdictional operations, constitutional limitations, sales tax, excise tax, property tax; federal tax procedure, handling IRS audits, appeals, petitions to U.S. Tax Court, and other issues related to tax practice.

Note: This course is not currently offered.

MTAX 6437 - State & Local Tax/Exempt Orgs

Credits: (3)
Typically Taught Fall Semester: Full Sem
Description: State income taxation, nexus multijurisdictional operations, constitutional limitations, sales tax, excise tax, property tax; types of exempt organizations, application for exempt status, public charities, private foundations, unrelated business income tax, and compliance issues.

MTAX 6445 - Gifts, Estates, Trusts and Exempt Organizations

Credits: (3)
Description: Principles of estate & gift taxation, exclusions, deductions, valuation issues, the unified credit, wills and intestate succession, income in respect of a decedent, income taxation of estates and trusts, income and estate/gift issues affecting donations to charity, nonprofit corporations, public charities, private foundations, excise taxes, unrelated business income, and compliance issues for tax-exempt entities.

Note: This course is not currently being offered.

MTAX 6450 - Real Estate Taxation

Credits: (3)
Description: In-depth study and analysis of the taxation of real estate transactions. Covers topics such as like-kind exchanges, personal residences, real estate development, passive loss rules, involuntary conversions, casualty losses, and real estate investment trusts.

Note: Course not currently being offered.

MTAX 6455 - Gifts, Estates, Trusts & Real Estate Taxation

Credits: (3)
Typically Taught Fall Semester: Full Sem
Description: Principles of gift and estate taxation. Includes a discussion of wills and the income taxation of estates and trusts. Also covers taxation of real estate transactions including like-kind exchanges, involuntary conversions, leases, personal residences, real estate development, and cost segregation.

MTAX 6460 - Advanced Corporate Taxation

Credits: (3)
Typically Taught Summer Semester: 1st Blk or 2nd Blk
Typically Taught Spring Semester: Full Sem
Description: Income taxation of corporations and shareholders. Includes in-depth analysis of tax issues related to corporate formations, operations, distributions and liquidations. Also covers the taxation of S corporations.

MTAX 6470 - Advanced Partnership Taxation

Credits: (3)
Typically Taught Summer Semester: 1st Blk or 2nd Blk
Typically Taught Fall Semester: Full Sem
Description: Income taxation of partnerships and partners. Includes in-depth analysis of tax issues related to partnership formations, operations, distributions and liquidations. Also covers issues related to limited liability companies.

MTAX 6480 - Retirement Planning & Employee Benefits

Credits: (3)
Description: Consideration of tax, insurance, investment and estate planning principles from a retirement perspective. Includes discussion of sources of retirement income and anticipated retirement expenses.

Note: Course not currently being offered.

MTAX 6485 - Retirement Plans & Exempt Organizations

Credits: (3)
Description: Discussion of IRAs, Roth IRAs, defined contribution plans such as 401(k)s. Qualification of retirement plans as tax-favored under the Internal Revenue Code. Discussion of retirement plans available to small business. In-depth discussion of nonprofit organizations, charities, qualifying for tax-exempt status, private foundations, unrelated business income, and tax compliance for exempt entities.

Note: This course is not currently offered.

MTAX 6487 - Retirement Plans
MTAX 6490 - Mergers, Acquisitions and Consolidations

Credits: (3)
Typically Taught Spring Semester: Full Sem
Description: Discussion of qualified retirement plans including defined contribution and defined benefit plans. Also includes discussion of IRA's, Roth IRA's, and other retirement-related, tax favored investments provided for in the Internal Revenue Code.

MTAX 6495 - Graduate Tax Internship

Credits: (1-3)
Typically Taught: Various
Description: A significant professional-level field experience in the area of accounting or taxation. The student will be counseled and supervised as he/she applies and integrates the knowledge and skills obtained through MAcc/MTax courses. Credit/No Credit.
Pre-requisite(s): Admission to the MAcc or MTax program; approval by department chair and program director.
Can be repeated once up to three credit hours.

MTAX 6700 - CPA Examination Review: FAR

Credits: (3)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: This is a directed self-study course designed to help students prepare for the Financial Accounting and Reporting (FAR) section of the CPA examination. This is a review course and assumes that the student has already taken a number of financial accounting courses. A faculty member will monitor the student's progress and a grade will be determined by the student's performance on weekly quizzes and a final examination.
Pre-requisite(s): The student must be admitted to the Master of Accounting (MAcc) or Master of Taxation (MTax) program.

MTAX 6750 - Study Abroad

Credits: (3)
Variable Title
Description: This course integrates international travel and site visits with the study of accounting and international business practices. Through readings, assignments, discussions, and visits to important business and cultural sites, the course builds understanding and competence as it relates to the history of accounting, the global accounting profession, and the business and cultural environment in the host countries.
Pre-requisite(s): The student must be admitted to the Master of Accounting (MAcc) or Master of Taxation (MTax) program.

MTAX 6801 - Individual Study

Credits: (1)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Individual work, or work in small groups, by arrangement, on special topics, not included in the announced course offerings.
Pre-requisite(s): Approval of the Master of Taxation Program Director and instructor.

MTAX 6802 - Individual Study

Credits: (2)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Individual work, or work in small groups, by arrangement, on special topics, not included in the announced course offerings.
Pre-requisite(s): Approval of the Master of Taxation Program Director and instructor.

MTAX 6803 - Individual Study

Credits: (3)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Individual work, or work in small groups, by arrangement, on special topics, not included in the announced course offerings.
Pre-requisite(s): Approval of the Master of Taxation Program Director and instructor.
MTHE 3015 - Middle School Algebra from a Teaching Perspective

Credits: (3)
Typically Taught Fall Semester: Full Sem
Description: Students will explore algebraic topics pertinent to teaching middle school algebra standards from Grade 6 to Grade 9.
Pre-requisite(s): MATH 2015.

MTHE 3020 - Methods and Technology for Teaching Advanced Secondary Mathematics

Credits: (3)
Description: Aspects of teaching advanced mathematics in a high school setting, including methods of presentation, exploration, assessment and classroom management. An emphasis is placed on the use of computers, graphing calculators, and other technology.
Pre-requisite(s): MTHE 4000.
Note: This course is offered as needed.

MTHE 3060 - Probability and Statistics from a Teaching Perspective

Credits: (3)
Typically Taught Spring Semester: Full Sem
Description: Students will explore topics in probability beginning with concepts in middle and high school standards and extending to the college level. These ideas will be interwoven with strategies for teaching probability and statistics at the appropriate levels.
Pre-requisite(s): MATH 1210 or MATH 2010.

MTHE 3070 - Middle School Geometry from a Teaching Perspective

Credits: (3)
Typically Taught Fall Semester: Full Sem
Description: Basic Geometry with an emphasis on the topics and methods pertinent to prospective elementary school teachers.
Pre-requisite(s): MATH 2020.

MTHE 3080 - Number Theory for Elementary Teachers

Credits: (3)
Typically Taught Fall Semester: Full Sem

MTHE 3115 - Algebra from a Secondary Teaching Perspective

Credits: (3)
Typically Taught Fall Semester: Full Sem
Description: Students will explore topics in algebra, beginning with concepts in middle and high school standards and extending to college level algebra. These ideas will be interwoven with strategies for teaching algebraic ideas at the middle and high school level.
Pre-requisite(s): MATH 1210.

MTHE 3117 - Geometry from a Secondary Teaching Perspective

Credits: (3)
Typically Taught Fall Semester: Full Sem
Description: Students will explore topics in Euclidean geometry, beginning with concepts in secondary geometry standards and extending beyond these topics. These ideas will be interwoven with strategies for teaching geometry at the secondary level.
Pre-requisite(s): MATH 3110

MTHE 4000 - Methods and Technology for Teaching Secondary Mathematics

Credits: (3)
Typically Taught Spring Semester: Full Sem
Description: Basic topics in secondary mathematics are taught to prospective teachers using a variety of methods of presentation and up-to-date technology, including the use of graphing calculators and computers.
Pre-requisite(s): MTHE 2120, MTHE 3015, MTHE 3060, MTHE 3070, MTHE 3080, MTHE 3115, MTHE 3117, or MTHE 4110.

MTHE 4010 - Capstone Mathematics for High School Teachers II

Credits: (3)
Description: Prospective high school teachers revisit mathematics topics from the secondary school curriculum and examine them from an advanced perspective. The major emphasis is on topics from geometry.
Pre-requisite(s): MTHE 3115.
Note: This course is offered as needed.

MTHE 4040 - Mathematical Problem Solving for Grade K-8 Teachers

Credits: (3)
Typically Taught Spring Semester: Full Sem
Description: Mathematical problem solving, discussion of process, writing solutions, and writing extensions.
Pre-requisite/Co-requisite: MATH 2015.

MTHE 4100 - Intuitive Calculus for Elementary Teachers

Credits: (3)
Description: An active, hands-on, discovery approach to understanding the three main components of calculus (limits, integration, differentiation), and how they relate to the improved teaching of elementary school mathematics. This course is no longer offered.
Pre-requisite(s): MATH 2010 and MATH 2020.

MTHE 4700 - Senior Project in Elementary Mathematics Teaching

Credits: (3)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Projects in preparing, teaching and revising sequential mathematics lessons for elementary students.
Pre-requisite(s): MATH 2010 and MATH 2020.

MTHE 5010G - Methods and Technology for Teaching Secondary Mathematics

Credits: (3)
Description: Topics in secondary mathematics are taught to in-service teachers using a variety of methods and technology to make them better prepared for teaching secondary mathematics. Expository presentations about a current mathematics education research area are expected.
Note: This course is offered as needed.

MTHE 5210G - Calculus with Analytic Geometry

Credits: (4)
Pre-requisite(s): MATH 1050 and MATH 1060 or MATH 1080 or placement test.
Note: This course is offered as needed.

MTHE 5220G - Calculus with Analytic Geometry

Credits: (4)
Description: Transcendental functions, techniques of integration, conic sections, polar coordinates, infinite series, introduction to partial derivatives.
Pre-requisite(s): MTHE 5210G.
Note: This course is offered as needed.

MTHE 5230G - Mathematics Computer Laboratory

Credits: (1)
Description: Computer solution of mathematics problems.
Pre-requisite(s): Approval of instructor.
Suggested Requisite(s): May be taken concurrently with any lower division mathematics course.

MTHE 5310G - Multivariable and Vector Calculus

Credits: (4)
Description: Vectors, vector valued functions, motion in space, multivariable functions, partial derivatives, multiple integrals, integration in vector fields.
Pre-requisite(s): MTHE 5220G.
Note: This course is offered as needed.

MTHE 5350G - Linear Algebra and Differential Equations

Credits: (4)
Description: Introduction to Linear Algebra and Differential Equations. Systems of linear equations, matrices, vector spaces, eigenvalues. First and second order differential equations and models, higher order linear equations, linear systems.
Pre-requisite(s): MTHE 5220G.
Note: This course is offered as needed.

MTHE 5920G - Short Courses, Workshops, Institutes and Special Programs
### Credits: (1-6)

**Variable Title**

**Description:** This course provides professional development workshops for inservice K-12 teachers around the teaching and learning of mathematics. This is a flexible credit hour course ranging from 1-6 credit hours. May be repeated up to 24 credit hours.  
Note: This course is offered as needed.

### MTHE 6120 - Euclidean and Non-Euclidean Geometry

**Credits:** (3)

**Description:** Axiomatic development of geometry; Euclidean and non-Euclidean.  
**Pre-requisite(s):** MTHE 5220G.  
Note: This course is offered as needed.

### MTHE 6160 - Number Theory

**Credits:** (3)

**Description:** An overview of beginning number theory including the integers, modulo arithmetic, congruencies, Fermat's theorem and Euler's theorem.  
**Pre-requisite(s):** MTHE 5210G.  
Note: This course is offered as needed.

### MTHE 6350 - Linear Algebra

**Credits:** (3)

**Description:** Theory and applications of linear algebra including abstract vector spaces and canonical forms of matrices.  
**Pre-requisite(s):** MTHE 5350G.  
Note: This course is offered as needed.

### MTHE 6410 - Probability and Statistics

**Credits:** (3)

**Description:** The mathematical content of probability and statistics at the undergraduate post calculus level. An understanding of the application of probability and statistics is also stressed.  
**Pre-requisite(s):** MTHE 6410  
Note: This course is offered as needed.

### MTHE 6550 - Introduction to Mathematical Modeling

**Credits:** (3)

**Description:** Formulation, solution and interpretation of mathematical models for problems occurring in areas of physical, biological and social science.  
**Pre-requisite(s):** MTHE 5310 and 5350.  
Note: This course is offered as needed.

### MTHE 6610 - Graph Theory

**Credits:** (3)

**Description:** Principles of Graph Theory including methods and models, special types of graphs, paths and circuits, coloring, networks, and other applications.  
**Pre-requisite(s):** MTHE 5210.  
Note: This course is offered as needed.

### MTHE 6620 - Enumeration

**Credits:** (3)

**Description:** Principles of Enumeration including counting principles, generating functions, recurrence relations, inclusion-exclusion, and applications.  
**Pre-requisite(s):** MTHE 5210.  
Note: This course is offered as needed.

### MTHE 6630 - Boundary Value Problems

**Credits:** (3)

**Description:** Series solutions, Fourier series, separation of variables, orthogonal functions.  
**Pre-requisite(s):** MTHE 5350.  
Note: This course is offered as needed.

### MTHE 6640 - Differential Equations II

**Credits:** (3)

**Description:** Matrix approach to linear systems, nonlinear systems, Laplace transforms.  
**Pre-requisite(s):** MTHE 5350.  
Note: This course is offered as needed.

### MTHE 6650 - Complex Variables

**Credits:** (3)

**Description:**
Credits: (3)
Description: Analysis and applications of a function of a single complex variable. Analytic function theory, path integration, Taylor and Laurent series and elementary conformal mapping are studied.
Pre-requisite(s): MTHE 5310G and MTHE 5350G.
Note: This course is offered as needed.

MTHE 6660 - Modern Algebra I

Credits: (3)
Description: Logic, sets, and the study of algebraic systems including groups, rings, and fields.
Pre-requisite(s): MTHE 5350G.
Note: This course is offered as needed.

MTHE 6670 - Modern Algebra II

Credits: (3)
Description: Continuation of MATH 4110: advanced topics from groups, rings, and fields including the Sylow theorems and Galois theory.
Pre-requisite(s): MTHE 6660.
Note: This course is offered as needed.

MTHE 6680 - Introductory Real Analysis

Credits: (3)
Description: Develop the analysis underlying calculus. In-depth study of limits, continuity, integration, differentiation, sequences and series. Other topics may include Lebesgue measure and integration and Fourier Analysis.
Pre-requisite(s): MTHE 5310G and MTHE 5350G
Note: This course is offered as needed.

MTHE 6690 - Introductory Real Analysis

Credits: (3)
Description: Develop the analysis underlying calculus. In-depth study of limits, continuity, integration, differentiation, sequences and series. Other topics may include Lebesgue measure and integration and Fourier Analysis.
Pre-requisite(s): MTHE 6680
Note: This course is offered as needed.

MTHE 6700 - Topology

Credits: (3)
Description: Introduction to point-set topology, including metric and topological spaces, continuity, homeomorphisms, compact and connected spaces, and complete metric spaces. Other topics may include the Baire Category Theorem and Tietze Extension Theorem.
Pre-requisite(s): MTHE 5310G and MTHE 5350G.
Note: This course is offered as needed.

MTHE 6710 - Numerical Analysis

Credits: (3)
Description: Introduction to numerical methods. Use of the digital computer in solving otherwise intractable problems.
Pre-requisite(s): MTHE 5350G and CS 1410 or other approved programming language
Note: This course is offered as needed.

MTHE 6720 - Numerical Analysis

Credits: (3)
Description: Introduction to numerical methods. Use of the digital computer in solving otherwise intractable problems.
Pre-requisite(s): MTHE 6710
Note: This course is offered as needed.

MTHE 6730 - Partial Differential Equations

Credits: (3)
Description: First order equations, characteristics and classifications, Green's identities, models, transforms.
Pre-requisite(s): MTHE 6630.
Note: This course is offered as needed.

MTHE 6740 - Mathematics for Teaching - Numbers and Operations

Credits: (3)
Description: Provides teachers a deeper understanding of our number system and relate its structure to computation, arithmetic, algebra and problem solving. Course topics will include number, number sense, computation, and estimation and instructional strategies to facilitate the instruction of this content for elementary teachers.
Pre-requisite(s): A Bachelor's degree and at least one year of experience teaching elementary or junior high school mathematics.
Note: This course is offered as needed.

MTHE 6750 - Mathematics for Teaching - Rational Numbers and Proportional Reasoning

Credits: (3)
Description: Provides teachers a deeper understanding of our number system and relate its structure to computation, arithmetic, algebra and problem solving. Course topics will include number, number sense, computation, and estimation and instructional strategies to facilitate the instruction of this content for elementary teachers.
Pre-requisite(s): A Bachelor's degree and at least one year of experience teaching elementary or junior high school mathematics.
Note: This course is offered as needed.
MTHE 6760 - Mathematics for Teaching - Algebraic Reasoning

Credits: (3)
Description: Provides practicing teachers a deeper understanding of algebraic expressions, equations, functions, real numbers, and instructional strategies to facilitate the instruction of this content for elementary students.
Pre-requisite(s): A Bachelor's Degree and at least one year of teaching experience in an elementary or junior high school.
Note: This course is offered as needed.

MTHE 6770 - Mathematics for Teaching - Geometry and Measurement

Credits: (3)
Description: Provides practicing teachers a deeper understanding of the geometry and measurement content that exists in the state core and instructional strategies to facilitate the instruction of this content.
Pre-requisite(s): A Bachelor's Degree and at least one year of teaching experience in an elementary or junior high school.
Note: This course is offered as needed.

MTHE 6780 - Mathematics for Teaching - Problem Solving and Data Analysis

Credits: (3)
Description: This course will develop a firm problem-solving foundation. Using skills and strategies applied in mathematical contexts practicing teachers will learn to think, work with others, present solutions, and facilitate problem solving instruction in the classroom. This course will also provide practicing teachers a deeper understanding of probability and statistics content in the state core and instructional strategies to facilitate the instruction of this content.
Pre-requisite(s): A Bachelor's degree and at least one year of teaching experience in an elementary or junior high school.
Note: This course is offered as needed.

MUSC MUSC 1025 CA - History of Country Music

Credits: (3)
Typically Taught Summer Semester: N/A
Typically Taught Fall Semester: Full Sem, Full Sem - Online
Typically Taught Spring Semester: Full Sem, Full Sem - Online
Description: This course is a survey of Country Music styles from ca. 1920 to the present. We also discuss related styles such as Hillbilly, Rock, jazz, folk, Bluegrass and popular song, reaching back into the nineteenth century. We will not only study the changing history of country music (which requires discussion of non-country music as well), but also the cultural forces that gave rise to those changes. Because of this historical perspective, our approach will be largely chronological, with an eye toward how various styles influenced one another.

MUSC 1006 - Concert Attendance I

Credits: (0)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: To be a successful musician, it is essential to develop excellent listening skills. Professional musicians are familiar with a wide variety of genres and styles. This course provides music students with opportunities to become familiar with the diversity of music that exists in our world. With this in mind, music majors and minors are expected to attend concerts and recitals on a regular basis. During the first two years of study, concert attendance is required and tracked by the department office staff. Students must concurrently enroll in applied music lessons. Credit/No Credit grading. May be repeated once.

MUSC 1010 CA - Introduction to Music

Credits: (3)
Typically Taught Summer Semester: Full Sem, Online
Typically Taught Fall Semester: Full Sem, Online
Typically Taught Spring Semester: Full Sem, Online
Course Fee: $6.00
Course Fee Purpose: This fee will be used to support instructional technology.
Description: An introduction to music, its elements, language, and historical development. The course focuses on European and American music with components of jazz, world, and popular genres. Concert attendance outside of regularly scheduled class time is required. Not available to music majors.

MUSC 1020 - What Makes Us Human?: Creativity and the Humanities

Credits: (3)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: This course will provide a broad Introduction to the Arts and Humanities as seen through the lenses of Plato’s "Big Three": The Good, The True and The Beautiful. The perspective of the Good will be taken to look at the Arts and Humanities in society (their Role), that of the True to explore their scientific side (their Nature), and that of the Beautiful to investigate our interior, personal experience (their Meaning).

MUSC 1025 CA - History of Country Music

Credits: (3)
Typically Taught Fall Semester: Full Sem, Full Sem - Online
Typically Taught Spring Semester: Full Sem, Full Sem - Online
Course Fee: $6.00
Course Fee Purpose: Course fees are used to support the technological infrastructure to support audio and visual presentations.
Description: This course is a survey of Country Music styles from ca. 1920 to the present. We also discuss related styles such as Hillbilly, Rock, jazz, folk, Bluegrass and popular song, reaching back into the nineteenth century. We will not only study the changing history of country music (which requires discussion of non-country music as well), but also the cultural forces that gave rise to those changes. Because of this historical perspective, our approach will be largely chronological, with an eye toward how various styles influenced one another.

MUSC 1030 CA - Introduction to Jazz

Credits: (3)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Course Fee: $6.00
Course Fee Purpose: This fee will be used to support instructional technology.
Description: A survey of jazz in America, including blues, ragtime, traditional jazz, swing, bebop, cool, and fusion. Concert attendance outside of regularly scheduled class time is required.

MUSC 1033 CA - Introduction to American Music

Credits: (3)
Typically Taught Fall Semester: Online
Typically Taught Spring Semester: Full Sem
Course Fee: $6.00
Course Fee Purpose: This fee will be used to support instructional technology.
Description: Survey of music in America, including classical, jazz, rock, folk, and ethnic, within the context of American history.

MUSC 1035 CA - History of Rock and Roll

Credits: (3)
Typically Taught Fall Semester: Full Sem, Online
Typically Taught Spring Semester: Full Sem, Online
Course Fee: $6.00
Course Fee Purpose: This fee will be used to support instructional technology.
Description: This course is a survey of Rock Music styles from ca. 1950 to the present. We also discuss pre- and proto- rock styles such as Jazz, Blues, and popular song, reaching back into the late nineteenth century. In the course we will not only study the changing history of rock music (which requires discussion of non-rock music as well), but also the cultural forces that gave rise to those changes. Because of this historical perspective, our approach will be largely chronological, with an eye toward how various styles influenced one another.

MUSC 1040 CA - Music of World Cultures

Credits: (3)
Typically Taught Summer Semester: Online
Typically Taught Fall Semester: Full Sem, Online
Typically Taught Spring Semester: Full Sem, Online
Course Fee: $6.00
Course Fee Purpose: This fee will be used to support instructional technology.
Description: An introduction to the music of cultures around the world, including India, Middle East, China,
Japan, Indonesia, Sub-Saharan Africa, Europe, Latin America, Caribbean, Native American music, and Ethnic North America. The course discusses the influence of music on, and its relationship to, the various cultures and populations.

**MUSC 1043 HU - Music, the Arts & Civilizations**

Credits: (3)
Typically Taught Fall Semester: Full Sem
Description: This course is a chronological introduction to mostly western music that also explores its relationship to the other arts.

**MUSC 1063 CA - Music in Religion**

Credits: (3)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Course Fee: $6.00
Course Fee Purpose: This fee will be used to support instructional technology.
Description: An introduction to music in world religions such as Judaism, Christianity, Islam, Hinduism, Sikhism, and Buddhism.

**MUSC 1100 - Fundamentals of Music**

Credits: (2)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Course Fee: $25.00
Course Fee Purpose: This fee will be used to support instructional technology.
Description: Melody, harmony, rhythm, notation, ear training, and sight-singing skills needed to meet entrance requirements for MUSC 1110 & MUSC 1130. Exempt if passing score achieved on theory placement exam or a score of 3 or 4 on AP Music Theory exam.

**MUSC 1110 - Music Theory I**

Credits: (2)
Typically Taught Fall Semester: Full Sem
Course Fee: $4.00
Course Fee Purpose: This fee will be used to support instructional technology.
Description: Elementary harmony, primary and secondary triads with inversions, non-harmonic tones, and modulation.

Pre-requisite(s): Complete Theory Placement exam with a score of 70% or higher or MUSC 1100 with a grade of "C" or higher or AP Music Theory exam score of 3 or higher. Students with an AP Music Theory score of 5 are exempt from MUSC 1110 and may enroll in MUSC 1120. In either case, AP scores are only recognized for one year after taking the exam.
Co-Requisite(s): Must be taken concurrently with MUSC 1130.
Note: Music Majors and Minors only.

**MUSC 1120 - Music Theory II**

Credits: (2)
Typically Taught Spring Semester: Full Sem
Course Fee: $4.00
Course Fee Purpose: This fee will be used to support instructional technology.
Description: Continuing study of elementary harmony, primary and secondary triads with inversions, non-harmonic tones, and modulation.
Pre-requisite(s): Completion of both MUSC 1110 and MUSC 1130 with a grade of C or better. Students with an AP Music Theory score of 5 may enroll directly in MUSC 1120.
Co-Requisite(s): Must be taken concurrently with MUSC 1140.
Note: Music Majors and Minors only.

**MUSC 1130 - Sight-Singing & Aural Skills I**

Credits: (1)
Typically Taught Fall Semester: Full Sem
Course Fee: $20.00
Course Fee Purpose: This fee will be used to support instructional technology.
Description: Development of aural skills needed to function as a musician and teacher. Emphasis on progressively advancing aural perception.
Pre-requisite(s): Complete Theory Placement exam with a score of 70% or higher or MUSC 1100 with a grade of "C" or higher. A student scoring a 3 on the AP Music Theory Exam may enroll in Sight-Singing and Aural Skills without taking the placement exam. A student scoring a 4 on the AP Music Theory Exam may enroll in Sight-Singing and Aural Skills II (MUSC 1140) without taking the placement exam. A student scoring a 5 on the AP Music Theory Exam may enroll in Sight-Singing and Aural Skills III (MUSC 2130). The student, however, must enroll in these courses within a year of completing the AP Music Theory Exam. After one year, the student will be required to take the Music Theory Placement Exam and their former AP
score is no longer recognized.

**Co-Requisite(s):** Must be taken concurrently with MUSC 1110.

**Note:** Music Majors and Minors only.

**MUSC 1140 - Sight-Singing & Aural Skills II**

**Credits:** (1)

**Typically Taught Summer Semester:** Full Sem

**Typically Taught Spring Semester:** Full Sem

**Course Fee:** $20.00

**Course Fee Purpose:** This fee will be used to support instructional technology.

**Description:** Development of aural skills needed to function as a musician and teacher. Emphasis on progressively advancing aural perception. Continuation of MUSC 1130.

**Pre-requisite(s):** MUSC 1130 and MUSC 1110. A student scoring a 4 on the AP Music Theory Exam may enroll in Sight-Singing and Aural Skills II (MUSC 1140) without taking the placement exam. A student scoring a 5 on the AP Music Theory Exam may enroll in Sight-Singing and Aural Skills III (MUSC 2130). The student, however, must enroll in these courses within a year of completing the AP Music Theory Exam. After one year, the student will be required to take the Music Theory Placement Exam and their former AP score is no longer recognized.

**Co-Requisite(s):** Must be taken concurrently with MUSC 1120.

**Note:** Music Majors and Minors only.

**MUSC 1143 - Music Theory and Piano for Musical Theatre**

**Credits:** (4)

**Typically Taught Fall Semester:** Full Sem

**Typically Taught Spring Semester:** Full Sem

**Course Fee:** $29.00

**Course Fee Purpose:** Your student fee is used to purchase and update software programs, such as Auralia, for maintenance of computer modules in the music tech lab, replacing faulty headsets, and for general technology infrastructure in the Dept. of Performing Arts.

**Description:** Development of aural, piano and sight-singing skills as they pertain to the Musical Theatre performer and practitioner. Emphasis on harmony, melody, rhythm, notation and applicable keyboard skills.

**MUSC 1150 - Class Piano I**

**Credits:** (1)

**Typically Taught Spring Semester:** Full Sem

**Course Fee:** $9.00

**Course Fee Purpose:** This fee will be used to support instructional technology.

**Description:** Beginning piano instruction with emphasis on reading, technical facility and sound musicianship.

**Pre-requisite(s):** Complete Theory Placement exam with a score of 70% or higher or MUSC 1100 with a grade of "C" or higher. A student scoring a 4 or 5 on the AP Music Theory Exam may enroll in MUSC 1150 (Class Piano I) without taking the placement exam. The student, however, must enroll in this course within a year of completing the AP Music Theory Exam. After one year, the student will be required to take the Music Theory Placement Exam and their former AP score is no longer recognized.

**Pre-requisite/Co-requisite:** MUSC 1110.

**Note:** Music Majors and Minors only

**MUSC 1160 - Class Piano II**

**Credits:** (1)

**Typically Taught Summer Semester:** Full Sem

**Typically Taught Spring Semester:** Full Sem

**Course Fee:** $9.00

**Course Fee Purpose:** This fee will be used to support instructional technology.

**Description:** Continuation of MUSC 1150 with emphasis on further development of music reading, technical facility, and expanded concepts of musicianship in the students’ piano skills.

**Pre-requisite(s):** MUSC 1150

**Pre-requisite/Co-requisite:** MUSC 1120

**Note:** Music Majors and Minors only

**MUSC 1321 - Basic Piano for Adults**

**Credits:** (1)

**Typically Taught Fall Semester:** Full Sem

**Typically Taught Spring Semester:** Full Sem

**Course Fee:** $9.00

**Course Fee Purpose:** This fee will be used to support instructional technology.

**Description:** Beginning instruction in keyboard for non-music majors and minors. Students must have access to a piano for practice.

**MUSC 1500 - Beginning & Intermediate Classical Guitar**

**Credits:** (2)

**Typically Taught Fall Semester:** Full Sem

**Typically Taught Spring Semester:** Full Sem

**Description:** Beginner and intermediate class instruction in
classical guitar, including technique, repertoire, and history of the instrument. May be repeated up to 10 times for credit.

**MUSC 1501 - Modern Guitar Styles**

**Credits:** (1)

**Description:** This entry-level course offers instruction in pick-style guitar. Styles covered include folk, rock, jazz, and popular. Special emphasis on note reading and basic musicianship.

**MUSC 1502 - Violin Master Class**

**Credits:** (1)

**Typically Taught Fall Semester:** Full Sem

**Description:** Masterclasses have been a staple learning methodology since 1869. Their invention is attributed to the virtuosic Hungarian pianist, Franz Liszt (1811-1886). Since then, Masterclasses have been held by professionals ranging from experienced instructors to legendary performers, for aspiring musicians all over the world. In a masterclass, individuals perform for the class and are offered instruction by the teaching artist. This allows the entire class to learn from the interaction between the instructor and the performing student. This class is no longer being offered.

May be repeated 7 times with a maximum of 8 credit hours.

**MUSC 1720 - Analog Audio**

- **Credits:** (2)
- **Typically Taught Fall Semester:** Full Sem
- **Course Fee:** $39.00
- **Course Fee Purpose:** The assessed course fee is used for consumable and non-consumable items as used in class for hands on activities and lab / studio.
maintenance.

**Description:** Emphasis on the electrical (non-digital) transmission of sound. Covers cable types, uses, and construction as well as microphones, speakers, and signal processors. Students will achieve familiarity with the fundamentals and best practices regarding audio components, studio communication, and studio infrastructure. Critical listening skills will be developed throughout the course.

**Pre-requisite(s):** Acceptance in the Sound Production/Recording program.

**MUSC 1721 INT - Live Sound in the 21st Century**

**Credits:** (2)

**Typically Taught Spring Semester:** Full Sem

**Course Fee:** $29.00

**Course Fee Purpose:** Course fee: The assessed course fee is used for consumable and non-consumable items as used in class for hands on activities and lab / studio / performance space maintenance.

**Description:** Focusing on advances in live sound technologies students will learn to assemble and optimize modern sound systems using DANTE and AVB network protocols and digital consoles. Best practices and common system setup will also be covered.

**Pre-requisite(s):** Acceptance in the Sound Production/Recording program, MUSC 1720.

**MUSC 1722 - History of Recording**

**Credits:** (2)

**Typically Taught Fall Semester:** Full Sem

**Description:** Multimedia based course examining the complete history of recorded sound. Covering everything from Edison's cylinder to the advent of the MP3 and modern digital recording. Focusing on the inventors and milestones of the last 150 years.

**Pre-requisite(s):** Acceptance in the Sound Production/Recording program.

**MUSC 1723 - Field Recording/Sound for Picture**

**Credits:** (2)

**Typically Taught Fall Semester:** Full Sem

**Course Fee:** $27.00

**Course Fee Purpose:** Course fee: The assessed course fee is used for consumable and non-consumable items as used in class for hands on activities and lab / studio maintenance.

**Description:** This course will combine the art of capturing live sound in the field, Foley, and ADR in a post-production workflow combining dialog and music to video.

**Pre-requisite(s):** Acceptance in the Sound Production/Recording program.

**MUSC 1724 - Studio Construction**

**Credits:** (1)

**Typically Taught Spring Semester:** Full Sem

**Course Fee:** $27.00

**Course Fee Purpose:** Course fee: The assessed course fee is used for consumable and non-consumable items as used in class for hands on activities and lab / studio maintenance.

**Description:** During construction of the recording spaces students will observe and understand the recording studio construction process. This experience may be repeated until studio completion. Credit/No Credit grading.

**Pre-requisite(s):** Acceptance in the Sound Production/Recording program.

May be taken 3 times up to 3 credits.

**MUSC 1725 - Alternative Digital Audio Workstations**

**Credits:** (2)

**Typically Taught Spring Semester:** Full Sem

**Course Fee:** $54.00

**Course Fee Purpose:** Course fee: The assessed course fee is used for consumable and non-consumable items as used in class for hands on activities and lab maintenance.

**Description:** An introduction to non-Pro Tools recording and music production applications. Covering setup, optimization, and basic operation. This may include but is not limited to Reason, Ableton LIVE, Digital Performer, Logic, and Garageband.

**Pre-requisite(s):** Acceptance in the Sound Production/Recording program.

**MUSC 1726 - Creative Lab**

**Credits:** (1)

**Typically Taught Fall Semester:** Full Sem

**Typically Taught Spring Semester:** Full Sem

**Course Fee:** $27.00

**Course Fee Purpose:** Course fee: The assessed course fee is used for consumable and non-consumable items as used in class for hands on activities and lab maintenance.

**Description:** A live performance / recording project ensemble. Turntables, folk instruments, world instruments, electronic musicians, rock / pop musicians etc. Audition not
required.

Pre-requisite(s): Acceptance in the Sound Production/Recording program.
May be taken 3 times up to 3 credits.

**MUSC 1730 - Keyboard Ensemble**

Credits: (1)
Description: Training in piano ensemble situations to develop fluency in reading. Keyboard majors and minors only. Fulfills the major ensemble requirement for music majors.
May be repeated 7 times with a maximum of 8 credit hours.

**MUSC 1740 INT - Weber State Concert Choir**

Credits: (1)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Fulfills the major ensemble requirement for music majors and minors. No audition required.
May be repeated 7 times with a maximum of 8 credit hours.

**MUSC 1741 INT - Chamber Choir**

Credits: (1)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: A highly select group of approximately 24 singers performing the entire range of small choir literature. Fulfills the chamber ensemble requirement for music majors. By audition only.
May be repeated 7 times with a maximum of 8 credit hours.

**MUSC 1743 INT - Vocal Chamber Ensemble**

Credits: (1)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Training in small vocal groups such as trios, quartets, and sextets. Fulfills the chamber ensemble requirement for music majors.
May be repeated 7 times with a maximum of 8 credit hours.

**MUSC 1744 INT - Musical Theatre**

Credits: (1-2)
Description: Rehearsal and performance of musical theatre productions. By audition only.
May be repeated 7 times with a maximum of 8 credit hours.

**MUSC 1745 INT - Weber State Community Choir**

Credits: (1)
Description: Membership by audition or consent of instructor. Does not fulfill any ensemble requirement for music majors or minors.
May be repeated 7 times with a maximum of 8 credit hours.
Note: Note: This course is not currently active. It is typically taught in the evenings when offered.

**MUSC 1750 - Symphonic Band**

Credits: (1-2)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Membership by audition or consent of instructor. Emphasis is on the study and preparation of modern symphonic band literature. Fulfills the major ensemble requirement for music majors and minors.
May be repeated 7 times with a maximum of 14 credit hours.

**MUSC 1751 - Wind Ensemble**

Credits: (1)
Typically Taught Spring Semester: Full Sem
Description: Membership by audition or consent of instructor. Emphasis is on study and performance of literature for selected wind and percussion ensembles of varying size. Participants may be required to participate in symphonic band. Fulfills the major ensemble requirement for music majors and minors.
May be repeated 7 times with a maximum of 8 credit hours.

**MUSC 1752 - Marching Band**

Credits: (2)
Typically Taught Fall Semester: Full Sem
Description: By audition and/or consent of the director to students on flags, rifles, and band instruments. Fulfills the major ensemble requirement for music majors and minors.
May be repeated 7 times with a maximum of 8 credit hours.

**MUSC 1753 INT - Jazz Ensemble**

Credits: (1)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Membership by audition or consent of instructor. Fulfills the chamber ensemble requirement for music majors.
May be repeated 7 times with a maximum of 8 credit hours.

MUSC 1754 - Percussion Ensemble

Credits: (1)
Typically Taught Spring Semester: Full Sem
Description: Membership by audition or consent of instructor. Fulfills the chamber ensemble requirement for music majors.
May be repeated 7 times with a maximum of 8 credit hours.

MUSC 1755 INT - Instrumental Chamber Ensemble

Credits: (1)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Membership by audition or consent of instructor. Fulfills the chamber ensemble requirement for music majors.
May be repeated 7 times with a maximum of 8 credit hours.

MUSC 1756 INT - Pep Band

Credits: (1)
Typically Taught Spring Semester: Full Sem
Description: Membership by audition or consent of instructor. Fulfills the chamber ensemble requirement for music majors.
May be repeated 7 times with a maximum of 8 credit hours.

MUSC 1760 INT - Weber State Symphony Orchestra

Credits: (1-2)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Membership by audition or consent of instructor. Full symphony orchestra instrumentation. Fulfills the major ensemble requirement for music majors and minors.
May be repeated 7 times with a maximum of 14 credit hours.

MUSC 1761 INT - Chamber Orchestra

Credits: (1)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Membership by audition or consent of instructor. Fulfills the chamber ensemble requirement for music majors.
May be repeated 7 times with a maximum of 8 credit hours.

MUSC 1762 INT - Theatre Orchestra

Credits: (1-2)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Membership by audition or consent of instructor. Instrumentation determined by the music production being presented. Does not fulfill any ensemble requirement for music majors or minors.
May be repeated 7 times with a maximum of 8 credit hours.

MUSC 1763 INT - Guitar Ensemble

Credits: (1)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Membership by audition or consent of instructor. Instrumentation determined by the music production being presented. Does not fulfill any ensemble requirement for music majors or minors.
May be repeated 7 times with a maximum of 8 credit hours.

MUSC 1810 - Experimental Course

Credits: (1-6)
Experimental
Description: Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript.
May be repeated for a total maximum of 6 credit hours.

MUSC 1820 INT - The Art and Science of Recording I

Credits: (3)
Typically Taught Fall Semester: Full Sem
Course Fee: $31.00
Course Fee Purpose: Course fee: The assessed course fee is used for consumable and non-consumable items as used in class for hands on activities and lab / studio maintenance.
Description: Utilizing the “flipped classroom” model, students will learn the fundamentals and best practices of capturing live audio in a multimedia-rich environment that is self-paced. In the classroom, students will receive face-to-face instruction from experienced producers, engineers, and visionaries delivering real world experience and
valuable career guidance.

Pre-requisite(s): Acceptance in the Sound Production/Recording program. MUSC 2820 / MUSC 4820, MUSC 2823 / MUSC 4823, MUSC 1720.

MUSC 1821 INT - The Art and Science of Recording II

Credits: (3)
Typically Taught Spring Semester: Full Sem
Course Fee: $31.00
Course Fee Purpose: Course fee: The assessed course fee is used for consumable and non-consumable items as used in class for hands on activities and lab / studio maintenance.
Description: Utilizing the "flipped classroom" model, students will learn the fundamentals and best practices of capturing live audio in a multimedia-rich environment that is self-paced. In the classroom, students will receive face-to-face instruction from experienced producers, engineers, and visionaries delivering real world experience and valuable career guidance.
Pre-requisite(s): 80% or better completion of MUSC 1820 INT - The Art and Science of Recording I. Acceptance in the Sound Production/Recording program.

MUSC 1901 - Music: The Successful Musician

Credits: (1)
Typically Taught Fall Semester: Full Sem
Course Fee: $2.00
Course Fee Purpose: This fee will be used to support instructional technology.
Description: The purpose of this course is to help students survive and thrive as music majors/minors by exploring success strategies applicable to all college students alongside those addressing the specific needs of music students.
Note: Music Majors and Minors only

MUSC 1911 - Introduction to Music Technology

Credits: (1)
Typically Taught Spring Semester: Full Sem
Course Fee: $2.00
Course Fee Purpose: The fee for these courses is used to compensate the instructor for teaching this class and overhead assessed by the university.
Description: Introduction to uses of technology in music teaching and performance, including use of music composition and multimedia software.
Note: Music Majors and Minors only

MUSC 2006 - Concert Attendance II

Credits: (0)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: To be a successful musician, it is essential to develop excellent listening skills. Professional musicians are familiar with a wide variety of genres and styles. This course provides music students with opportunities to become familiar with the diversity of music that exists in our world. With this in mind, music majors and minors are expected to attend concerts and recitals on a regular basis. During the first two years of study, concert attendance is required and tracked by the department office staff. Students must concurrently enroll in applied music lessons. Credit/No Credit grading. May be repeated once.

MUSC 2110 - Music Theory III

Credits: (2)
Typically Taught Fall Semester: Full Sem
Course Fee: $6.00
Course Fee Purpose: This fee will be used to support instructional technology.
Description: Continuation of Theory II. Includes altered, borrowed, and other unique chord sonorities; advanced modulation; 20th century compositional techniques; analysis; and projects that will explore application of theoretical concepts.
Pre-requisite(s): MUSC 1120 and MUSC 1140 or equivalents. A student scoring a 5 on the AP Music Theory Exam may enroll in Music Theory III for up to one year after completing the AP Music Theory Exam. After one year, their former AP score is no longer recognized.
Co-Requisite(s): Must be taken concurrently with MUSC 2130.
Note: Music Majors and Minors only.

MUSC 2120 - Music Theory IV

Credits: (2)
Typically Taught Spring Semester: Full Sem
Course Fee: $4.00
Course Fee Purpose: This fee will be used to support instructional technology.
Description: Continuation of Theory III. Includes altered,
borrowed, and other unique chord sonorities; advanced modulation; 20th century compositional techniques; analysis; and projects that will explore application of theoretical concepts. Prerequisite: MUSC 2110. Must be taken concurrently with MUSC 2140. Music Majors and Minors only.

Pre-requisite(s): MUSC 2110 with a grade of "C" or better.

MUSC 2130 - Sight Singing & Aural Skills III

Credits: (1)
Typically Taught Fall Semester: Full Sem
Course Fee: $20.00

Description: Continuation of Sight-Singing & Aural Skills II. Development of more advanced listening skills and of ability to recognize and correct performance errors.

Pre-requisite(s): MUSC 1120 and MUSC 1140. A student scoring a 5 on the AP Music Theory Exam may enroll in MUSC 2130 (Sight-singing & Aural Skills III) for up to one year after completing the AP Music Theory Exam. After one year, their former AP score is no longer recognized.

Co-Requisite(s): Must be taken concurrently with MUSC 2110.

Note: Music Majors and Minors only.

MUSC 2140 - Sight Singing & Aural Skills IV

Credits: (1)
Typically Taught Spring Semester: Full Sem
Course Fee: $20.00

Description: Continuation of Sight Singing & Aural Skills III. Development of more advanced listening skills and of ability to recognize and correct performance errors.

Pre-requisite(s): MUSC 2110 and MUSC 2130 or equivalents.

Co-Requisite(s): Must be taken concurrently with MUSC 2120.

Note: Music Majors and Minors only

MUSC 2150 - Class Piano III

Credits: (1)
Typically Taught Fall Semester: Full Sem
Course Fee: $20.00

Description: Continuation of MUSC 1160 with emphasis on advanced reading, further development of music reading, technical facility, and expanded concepts of musicianship in the students' piano skills.

Pre-requisite(s): MUSC 1160 or placement by audition.

Pre-requisite/Co-requisite: MUSC 2100.

Note: Music Majors and Minors only.

MUSC 2160 - Functional Piano Skills for Piano Majors/Minors

Credits: (1)
Typically Taught Spring Semester: Full Sem
Course Fee: $9.00

Description: Continuation of MUSC 1160 with emphasis on advanced reading, further development of technical facility and expanded concepts of musicianship.

Pre-requisite(s): MUSC 1160 or placement by audition, and MUSC 1120 and MUSC 1140.

Note: Music Majors and Minors only

MUSC 2202 - Survey of Music History & Literature I

Credits: (2)

Description: A survey of the development of the historical and stylistic periods of European art music from ca 400-1750. Required for Music History credit for all Music Minors.

Pre-requisite(s): MUSC 1110 and MUSC 1130. Open to all university students who have completed MUSC 1010. Does not fulfill Creative Arts or Humanities credit.

Note: Music Majors and Minors only

MUSC 2212 - Survey of Music History & Literature II

Credits: (2)
Typically Taught Spring Semester: Full Sem

Description: A survey of the development of the historical and stylistic periods of European art music from ca 1750-20th century. Required for Music History credit for all Music Minors.

Pre-requisite(s): MUSC 1110 and MUSC 1130. Open to all university students who have completed MUSC 1010.
MUSC 2321 - The Principles of Collaborative Piano I

Credits: (1)
Typically Taught Fall Semester: Full Sem
Course Fee: $2.00
Course Fee Purpose: This fee will be used to support instructional technology.
Description: To learn the art of accompaniment, to become knowledgeable about repertoire and style, and to improve sight reading.
Pre-requisite(s): Music Major (Piano Performance or Pedagogy emphasis) - successful completion of MUSC 2160 (Functional Piano Skills). Music Major (all other emphases) - successful completion of MUSC 2150 (Group Piano III)
Note: Music Majors and Minors only

MUSC 2331 - The Principles of Collaborative Piano II

Credits: (1)
Typically Taught Spring Semester: Full Sem
Course Fee: $2.00
Course Fee Purpose: This fee will be used to support instructional technology.
Description: To learn the art of accompaniment, to become knowledgeable about repertoire and style, and to improve sight reading.
Pre-requisite(s): Piano majors only.
Note: Music Majors and Minors only

MUSC 2401 - Musical Improvisation

Credits: (2)
Typically Taught Spring Semester: Full Sem
Description: Students will be presented with basic improvisation concepts in the course, including improvising rhythmically, diatonically, over functional harmony, using extra-musical inspiration, and creating free and collaborative improvisations. Through demonstration and practice, students will learn how all of these methods in totality or combination can work to create successful improvisations. Students will be judged based on their ability to demonstrate mastery over a particular concept through their own performance. Possible assignments include in-class performances and a final concert featuring student improvisations.
Pre-requisite(s): MUSC 1120.

MUSC 2540 - Instrumental Techniques for Choral Majors

Credits: (2)
Typically Taught Fall Semester: Full Sem even years
Course Fee: $4.00
Course Fee Purpose: This fee will be used to support instructional technology.
Description: A course for Music Education majors with a Choral emphasis that encompasses a practical and analytical approach to the understanding of basic playing and teaching techniques of the band and orchestral instruments.
Note: Music Majors and Minors only

MUSC 2610 - Applied Keyboard: Piano

Credits: (1)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Course Fee: $445.00
Course Fee Purpose: Standard DPA Technology fee.
Description: Music majors and minors only. Students are responsible for contacting individual instructors to schedule lessons. See the Music website for a list of private instructors.
May be repeated 3 times with a maximum of 4 credit hours.

MUSC 2611 - Applied Keyboard: Organ

Credits: (1)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Course Fee: $445.00
Course Fee Purpose: Standard DPA Technology fee.
Description: Music majors and minors only. Students are responsible for contacting individual instructors to schedule lessons. See the Music website for a list of private instructors.
May be repeated 3 times with a maximum of 4 credit hours.

MUSC 2673 - Private Instruction

Credits: (2)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Course Fee: $890.00
Course Fee Purpose: The fee for these courses is used to compensate the instructor for teaching this class and
overhead assessed by the university.

**Description:** Music majors and minors only. For vocal or instrumental students. Two hours of instruction/week. Minimum of 18 hours/week practice required. One-half hour special assignment. By consent of instructor only. Students are responsible for contacting individual instructors to schedule lessons. See the Music website for a list of private instructors. May be taken for credit up to three times in any area of specialization.

### MUSC 2681 - Private Instruction

**Credits:** (1)  
**Typically Taught Summer Semester:** Full Sem  
**Typically Taught Fall Semester:** Full Sem  
**Typically Taught Spring Semester:** Full Sem  
**Course Fee:** $445.00  
**Course Fee Purpose:** The fee for these courses is used to compensate the instructor for teaching this class and overhead assessed by the university.  
**Description:** Individual private instruction for music majors and minors only. Students are responsible for contacting individual instructors to schedule lessons. See the Music website for a list of private instructors.  
**Pre-requisite(s):**  
Completion of two semesters of MUSC 1681 or MUSC 1682 with a grade of "C" or better. May be repeated 4 times with a maximum of 4 credit hours.

### MUSC 2682 - Private Instruction

**Credits:** (2)  
**Typically Taught Summer Semester:** Full Sem  
**Typically Taught Fall Semester:** Full Sem  
**Typically Taught Spring Semester:** Full Sem  
**Course Fee:** $445.00  
**Course Fee Purpose:** The fee for these courses is used to compensate the instructor for teaching this class and overhead assessed by the university.  
**Description:** Individual private instruction for music majors and minors only. Students are responsible for contacting individual instructors to schedule lessons. See the Music website for a list of private instructors.  
**Pre-requisite(s):**  
Completion of two semesters of MUSC 1681 or MUSC 1682 with a grade of "C" or better. May be repeated 4 times with a maximum of 8 credit hours.

### MUSC 2820 - Pro Tools 101

**Credits:** (2)  
**Typically Taught Spring Semester:** Full Sem  
**Course Fee:** $79.00  
**Course Fee Purpose:** Course fee: The assessed course fee is used for consumable and non-consumable items as used in class for hands on activities and lab maintenance.  
**Description:** This course covers basic Pro Tools principles. It provides everything you need to complete a Pro Tools project from initial set up to final mix-down. The course focuses on Pro Tools software and covers a multitude of new functions and feature enhancements. Whether your project involves recording live instruments, MIDI sequencing of software synthesizers, or audio editing or region looping, this course will give you the basic skills to succeed.

### MUSC 2821 - Percussion Methods I

**Credits:** (1)  
**Typically Taught Fall Semester:** Full Sem even years  
**Course Fee:** $17.00  
**Course Fee Purpose:** The fee for this course is used to support classroom technology and the purchase and maintenance of musical instruments used in the course.  
**Description:** A practical and analytical approach to teaching and playing percussion instruments, including selection of appropriate repertoire and minor repair.  
**Note:** Music Majors and Minors only

### MUSC 2822 - Percussion Methods II

**Credits:** (1)  
**Typically Taught Spring Semester:** Full Sem odd years  
**Course Fee:** $17.00  
**Course Fee Purpose:** The fee for this course is used to support classroom technology and the purchase and maintenance of musical instruments used in the course.  
**Description:** A continuation of MUSC 2821.  
**Pre-requisite(s):** MUSC 2821.  
**Note:** Music Majors and Minors only

### MUSC 2823 - Pro Tools 110

**Credits:** (2)  
**Typically Taught Fall Semester:** Full Sem  
**Course Fee:** $79.00  
**Course Fee Purpose:** Course fee: The assessed course fee is used for consumable and non-consumable items as used in class for hands on activities and lab / studio maintenance.  
**Description:** This course provides a more detailed look at the Pro Tools system above and beyond the knowledge you
gained in the Pro Tools 101 course. It covers all the key concepts and skills needed to operate a Pro Tools system at the User level. The course along with Pro Tools 101: An Introduction to Pro Tools, provides the foundation to Pro Tools Certification and for the later 200-series of courses on Pro Tools music and post-production.

**Pre-requisite(s):** MUSC 2820/MUSC 4820.

**MUSC 2841 - Brass Methods I**

**Credits:** (1)

**Typically Taught Fall Semester:** Full Sem even years  
**Course Fee:** $16.00  
**Course Fee Purpose:** The fee for this course is used to support classroom technology and the purchase and maintenance of musical instruments used in the course.  
**Description:** A practical and analytical approach to teaching and playing brass instruments, including selection of appropriate repertoire and minor repair.  
**Note:** Music Majors and Minors only

**MUSC 2842 - Brass Methods II**

**Credits:** (1)

**Typically Taught Spring Semester:** Full Sem odd years  
**Course Fee:** $15.00  
**Course Fee Purpose:** The fee for this course is used to support classroom technology and the purchase and maintenance of musical instruments used in the course.  
**Description:** A continuation of MUSC 2841.  
**Pre-requisite(s):** MUSC 2841.  
**Note:** Music Majors and Minors only

**MUSC 2851 - Woodwind Methods I**

**Credits:** (1)

**Typically Taught Fall Semester:** Full Sem odd years  
**Course Fee:** $17.00  
**Course Fee Purpose:** The fee for this course is used to support classroom technology and the purchase and maintenance of musical instruments used in the course.  
**Description:** A practical and analytical approach to teaching and playing woodwind instruments, including selection of appropriate repertoire and minor repair.  
**Note:** Music Majors and Minors only

**MUSC 2852 - Woodwind Methods II**

**Credits:** (1)

**Typically Taught Spring Semester:** Full Sem even years  
**Course Fee:** $17.00  
**Course Fee Purpose:** The fee for this course is used to support classroom technology and the purchase and maintenance of musical instruments used in the course.  
**Description:** A continuation of MUSC 2851.  
**Pre-requisite(s):** MUSC 2851  
**Note:** Music Majors and Minors only

**MUSC 2871 - String Methods**

**Credits:** (1)  
**Typically Taught Fall Semester:** Full Sem odd years  
**Course Fee:** $17.00  
**Course Fee Purpose:** The fee for this course is used to support classroom technology and the purchase and maintenance of musical instruments used in the course.  
**Description:** A practical and analytical approach to teaching and playing string instruments, including selection of appropriate repertoire and minor repair.  
**Note:** Music Majors and Minors only

**MUSC 2881 - Vocal Workshop**

**Credits:** (1)  
**Course Fee:** $2.00  
**Course Fee Purpose:** This fee will be used to support instructional technology.  
**Description:** Development of the singing voice with special attention to freedom of tones, purity of vowels, interpretation, diction, and flexibility.  
**Note:** Music Majors and Minors only

**MUSC 2890 INT - Cooperative Work Experience**

**Credits:** (1-6)  
**Typically Taught Fall Semester:** Full Sem  
**Typically Taught Spring Semester:** Full Sem  
**Description:** Open to all students in the music area who meet the minimum cooperative work experience requirements of the department. Provides academic credit for on-the-job experience. Grade and amount of credit will be determined by the department. May be repeated to a maximum of 6 credits.  
**Note:** Music Majors and Minors only

**MUSC 2910 INT - Opera Production**

**Credits:** (2)  
**Typically Taught Fall Semester:** Full Sem  
**Typically Taught Spring Semester:** Full Sem  
**Description:** By audition only. Preparation of operatic scenes and music. Music and staging rehearsal venue for
the preparation of fully staged opera productions. May be repeated up to 10 times.

**MUSC 2920 - Short Courses, Workshops, Institutes, and Special Programs**

**Credits:** (1-6)

**Workshop**

**Description:** Consult the class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript. May be repeated for a total maximum of 6 credit hours.

Note: Music Majors and Minors only

**MUSC 3102 - Counterpoint**

**Credits:** (2)

**Typically Taught Spring Semester:** Full Sem odd years

**Description:** Eighteenth century polyphonic techniques including the five contrapuntal species, formal processes, analysis, and compositional application of concepts studied.

**Pre-requisite(s):** MUSC 2120 and MUSC 2140 or equivalents.

Note: Music Majors and Minors only

**MUSC 3112 - Orchestration**

**Credits:** (2)

**Typically Taught Spring Semester:** Full Sem even years

**Course Fee:** $20.00

**Course Fee Purpose:** The fee for this course is used to support classroom technology and the purchase and maintenance of musical instruments used in the course.

**Description:** An exploration of principles of arranging music for instrumental sections and instrumental combinations.

**Pre-requisite(s):** MUSC 2120 and MUSC 2140 or equivalents.

Note: Music Majors and Minors only

**MUSC 3122 - Choral Arranging**

**Credits:** (2)

**Typically Taught Spring Semester:** Full Sem odd years

**Course Fee:** $20.00

**Course Fee Purpose:** The fee for this course is used to support classroom technology and the purchase and maintenance of musical instruments used in the course.

**Description:** An exploration of principles of arranging music for various voice groups.

**Pre-requisite(s):** MUSC 2120 and MUSC 2140 or equivalent.

Note: Music Majors and Minors only

**MUSC 3020 - Winds/Percussion Literature**

**Credits:** (2)

**Typically Taught Fall Semester:** Full Sem

**Description:** A study of a cross-section of music leading to knowledge of styles, composers, and performance practice related to the student's instrument and family of instruments.

**MUSC 3205 - Music History I: Music before 1800**

**Credits:** (3)

**Typically Taught Fall Semester:** Full Sem

**Course Fee:** $4.00

**Course Fee Purpose:** This fee will be used to support instructional technology.

**Description:** A survey of the developments in European art music, ca. 400-1800. The course emphasizes stylistic and critical analysis of representative compositions within historical and cultural contexts.

**Pre-requisite(s):** MUSC 1120 and MUSC 1140.

**MUSC 3206 - Music History II: Music after 1800**

**Credits:** (3)

**Typically Taught Spring Semester:** Full Sem

**Course Fee:** $6.00

**Course Fee Purpose:** This fee will be used to support instructional technology.

**Description:** A survey of the developments in European art music, ca. 1800 to the present. The course emphasizes stylistic and critical analysis of representative compositions within historical and cultural contexts.

**Pre-requisite(s):** MUSC 3205.

**MUSC 3207 - Music History III: Music of the 20th century to the present**

**Credits:** (3)

**Typically Taught Fall Semester:** Full Sem

**Course Fee:** $6.00

**Course Fee Purpose:** Standard DPA Technology fee.

**Description:** A survey of the developments in European art music from ca.1890 to the present. The course emphasizes stylistic and critical analysis of representative compositions.
within historical and cultural contexts.

**MUSC 3208 - World Music**

**Credits:** (3)
**Typically Taught Spring Semester:** Full Sem
**Course Fee:** $6.00
**Course Fee Purpose:** This fee will be used to support instructional technology.
**Description:** An in-depth exploration of selected music outside the European/ American art and popular traditions. Attention will be given to musical elements and systems, as well as to the participation of music within culture and society.

**Pre-requisite(s):** MUSC 3402.

**Note:** Music Majors and Minors only

**MUSC 3502 - Violin Master Class**

**Credits:** (1)
**Typically Taught Fall Semester:** Full Sem
**Typically Taught Spring Semester:** Full Sem
**Description:** Masterclasses have been a staple learning methodology since 1869. Their invention is attributed to the virtuosic Hungarian pianist, Franz Liszt (1811-1886). Since then, Masterclasses have been held by professionals ranging from experienced instructors to legendary performers, for aspiring musicians all over the world. In a masterclass, individuals perform for the class and are offered instruction by the teaching artist. This allows the entire class to learn from the interaction between the instructor and the performing student. This class is no longer being offered.

**May be repeated 7 times with a maximum of 8 credit hours.**

**MUSC 3503 - Viola Master Class**

Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Course Fee: $445.00
Course Fee Purpose: Standard DPA Technology fee.
Description: Music majors and minors only. Students are responsible for contacting individual instructors to schedule lessons. See the Music website for a list of private instructors.
May be repeated 3 times with a maximum of 4 credit hours.

**MUSC 3652 - Applied Strings: Violoncello**

Credits: (1)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Course Fee: $445.00
Course Fee Purpose: Standard DPA Technology fee.
Description: Music majors and minors only. Students are responsible for contacting individual instructors to schedule lessons. See the Music website for a list of private instructors.
May be repeated 3 times with a maximum of 4 credit hours.
MUSC 3653 - Applied Strings: String Bass

Credits: (1)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Course Fee: $445.00
Course Fee Purpose: Standard DPA Technology fee.
Description: Music majors and minors only. Students are responsible for contacting individual instructors to schedule lessons. See the Music website for a list of private instructors.
May be repeated 3 times with a maximum of 4 credit hours.

MUSC 3654 - Applied Strings: Guitar

Credits: (1)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Course Fee: $445.00
Course Fee Purpose: Standard DPA Technology fee.
Description: Music majors and minors only. Students are responsible for contacting individual instructors to schedule lessons. See the Music website for a list of private instructors.
May be repeated 3 times with a maximum of 4 credit hours.

MUSC 3655 - Applied Strings: Harp

Credits: (1)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Course Fee: $445.00
Course Fee Purpose: Standard DPA Technology fee.
Description: Music majors and minors only. Students are responsible for contacting individual instructors to schedule lessons. See the Music website for a list of private instructors.
May be repeated 3 times with a maximum of 4 credit hours.

MUSC 3660 - Applied Percussion

Credits: (1)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Course Fee: $445.00
Course Fee Purpose: Standard DPA Technology fee.
Description: Music majors and minors only. Students are responsible for contacting individual instructors to schedule lessons. See the Music website for a list of private instructors.
May be repeated 3 times with a maximum of 4 credit hours.

MUSC 3673 - Private Instruction

Credits: (2)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Course Fee: $890.00
Course Fee Purpose: The fee for these courses is used to compensate the instructor for teaching this class and overhead assessed by the university.
Description: Music majors and minors only. Students are responsible for contacting individual instructors to schedule lessons. See the Music website for a list of private instructors.
May be taken for credit up to three times in any area of specialization.

MUSC 3681 - Private Instruction

Credits: (1)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Course Fee: $445.00
Course Fee Purpose: The fee for these courses is used to compensate the instructor for teaching this class and overhead assessed by the university.
Description: Individual private instruction for music majors and minors only. Students are responsible for contacting individual instructors to schedule lessons. See the Music website for a list of private instructors.
Pre-requisite(s): Completion of two semesters of MUSC 2681 or MUSC 2682 with a grade of "C" or better.
May be repeated 4 times with a maximum of 4 credit hours.

MUSC 3682 - Private Instruction

Credits: (2)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Course Fee: $445.00
Course Fee Purpose: The fee for these courses is used to compensate the instructor for teaching this class and
overhead assessed by the university.

**Description:** Individual private instruction for music majors and minors only. Students are responsible for contacting individual instructors to schedule lessons. See the Music website for a list of private instructors.

**Pre-requisite(s):** Completion of two semesters of MUSC 2681 or MUSC 2682 with a grade of "C" or better.

May be repeated 4 times with a maximum of 8 credit hours.

**MUSC 3701 - Music Entrepreneurship and You**

**Credits:** (3)

**Typically Taught Fall Semester:** *Full Sem*

**Typically Taught Spring Semester:** *Full Sem*

**Description:** Training in piano ensemble situations to develop fluency in reading. Keyboard majors and minors only. Fulfills the major ensemble requirement for music majors.

May be repeated 7 times with a maximum of 8 credit hours.

Note: Music Majors and Minors only.

**MUSC 3740 INT - Weber State Concert Choir**

**Credits:** (1)

**Typically Taught Fall Semester:** *Full Sem*

**Typically Taught Spring Semester:** *Full Sem*

**Description:** Fulfills the major ensemble requirement for music majors and minors. No audition required.

May be repeated 7 times with a maximum of 8 credit hours.

**MUSC 3741 INT - Chamber Choir**

**Credits:** (1)

**Typically Taught Fall Semester:** *Full Sem*

**Typically Taught Spring Semester:** *Full Sem*

**Description:** A highly select group of approximately 24 singers performing the entire range of small choir literature. Fulfills the chamber ensemble requirement for music majors. By audition only.

May be repeated 7 times with a maximum of 8 credit hours.

**MUSC 3743 INT - Vocal Chamber Ensemble**

**Credits:** (1)

**Typically Taught Fall Semester:** *Full Sem*

**Typically Taught Spring Semester:** *Full Sem*

**Description:** Training in small vocal groups such as trios, quartets, and sextets. Fulfills the chamber ensemble requirement for music majors.

May be repeated 7 times with a maximum of 8 credit hours.

**MUSC 3744 INT - Musical Theatre**

**Credits:** (1-2)

**Description:** Rehearsal and performance of musical theatre productions. By audition only.

May be repeated 7 times with a maximum of 8 credit hours.

**MUSC 3745 INT - Weber State Community Choir**

**Credits:** (1)

**Typically Taught Fall Semester:** *Full Sem*

**Typically Taught Spring Semester:** *Full Sem*

**Description:** Membership by audition or consent of instructor. Does not fulfill any ensemble requirement for music majors or minors.

May be repeated 7 times with a maximum of 8 credit hours.

Note: Note: This course is not currently active. It is only available in the evenings when offered.

**MUSC 3750 - Symphonic Band**

**Credits:** (1-2)

**Typically Taught Fall Semester:** *Full Sem*

**Typically Taught Spring Semester:** *Full Sem*

**Description:** Membership by audition or consent of instructor. Emphasis is on the study and preparation of modern symphonic band literature. Fulfills the major ensemble requirement for music majors and minors.

May be repeated up to 7 times.

**MUSC 3751 - Wind Ensemble**

**Credits:** (1)

**Typically Taught Spring Semester:** *Full Sem*

**Description:** Membership by audition or consent of instructor. Emphasis is on study and performance of literature for selected wind and percussion ensembles of varying size. Participants may be required to participate in
MUSC 3752 - Marching Band

Credits: (2)
Typically Taught Fall Semester: Full Sem
Description: By audition and/or consent of the director to students on flags, rifles, and band instruments. Fulfills the major ensemble requirement for music majors and minors. May be repeated 7 times with a maximum of 8 credit hours.

MUSC 3753 INT - Jazz Ensemble

Credits: (1)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Membership by audition or consent of instructor. Fulfills the chamber ensemble requirement for music majors. May be repeated up to 10 times.

MUSC 3754 - Percussion Ensemble

Credits: (1)
Typically Taught Spring Semester: Full Sem
Description: Membership by audition or consent of instructor. Fulfills the chamber ensemble requirement for music majors. May be repeated 7 times with a maximum of 8 credit hours.

MUSC 3755 INT - Instrumental Chamber Ensemble

Credits: (1)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Training in instrumental chamber ensembles such as trios, quartets, quintets, and sextets. Fulfills the chamber ensemble requirement for music majors. May be repeated 7 times with a maximum of 8 credit hours.

MUSC 3756 INT - Pep Band

Credits: (1)
Typically Taught Spring Semester: Full Sem
Description: Plays at athletic functions using contemporary jazz, rock, and popular music. By audition. Does not fulfill any ensemble requirement for music majors or minors. May be repeated 7 times with a maximum of 8 credit hours.

MUSC 3760 INT - Weber State Symphony Orchestra

Credits: (1-2)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Membership by audition or consent of instructor. Full symphony orchestra instrumentation. Fulfills the major ensemble requirement for music majors and minors. May be repeated up to 7 times.

MUSC 3761 INT - Chamber Orchestra

Credits: (1)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Membership by audition or consent of instructor. Fulfills the chamber ensemble requirement for music majors. May be repeated 7 times with a maximum of 8 credit hours.

MUSC 3762 - Theatre Orchestra

Credits: (1-2)
Description: Membership by audition or consent of instructor. Instrumentation determined by the music production being presented. Does not fulfill any ensemble requirement for music majors or minors. May be repeated 7 times with a maximum of 8 credit hours.

MUSC 3763 INT - Guitar Ensemble

Credits: (1)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Membership by audition or consent of instructor. Fulfills the major ensemble requirement for music majors and minors. May be repeated 7 times with a maximum of 8 credit hours.

MUSC 3801 - Jazz Improvisation I

Credits: (2)
Typically Taught Fall Semester: Full Sem
Description: Beginning study of jazz improvisation. Topics covered include basic jazz harmony, chord/scale relationships, and basic jazz repertoire.
MUSC 3802 - Jazz Improvisation II

Credits: (2)
Typically Taught Spring Semester: Full Sem
Description: Continuing study of jazz improvisation. Topics covering include common jazz patterns, complex harmony and harmonic resolution, transcription, and analysis.

MUSC 3803 - Jazz and Commercial Arranging

Credits: (2)
Typically Taught Fall Semester: Full Sem
Description: Introduction to arranging jazz and commercial music. Topics include elements of arranging, instrumental considerations, voicing techniques, and compositional techniques.
Pre-requisite(s): Completion of MUSC 1110 - Music Theory I with a grade of "C" or better.

MUSC 3804 - Jazz Pedagogy

Credits: (1)
Typically Taught Fall Semester: Full Sem
Description: This class will prepare students for teaching jazz to students in secondary education. Topics include specific instrumental considerations, improvisation, and jazz ensemble rehearsal technique.

MUSC 3805 - Jazz Keyboard Skills

Credits: (2)
Typically Taught Fall Semester: Full Sem
Description: Basic jazz keyboard and jazz theory. Topics include beginning to intermediate jazz harmony, tertiary and quartal voicings, harmonic substitutions and reharmonization, and well as jazz piano performance practice.
Pre-requisite(s): Completion of MUSC 1160 - Class Piano II with a grade of "C" or better.

MUSC 3806 - Jazz History

Credits: (3)
Typically Taught Spring Semester: Full Sem
Description: In depth study of the history of jazz for music majors. Students will learn about important individuals, historical events, and stylistic trends that have shaped jazz from its inception to the modern day and relate those topics to their instrument of study.

MUSC 3810 - Experimental Course

Credits: (1-6)
Experimental
Description: Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript. May be repeated for a total maximum of 6 credit hours.

MUSC 3822 - Instrumental Conducting I

Credits: (2)
Typically Taught Fall Semester: Full Sem
Course Fee: $4.00
Course Fee Purpose: This fee will be used to support instructional technology.
Description: Basic conducting technique and advanced techniques for conducting instrumental ensembles.
Pre-requisite(s): MUSC 1120/MUSC 1140.
Note: Music Majors and Minors only

MUSC 3823 - Instrumental Conducting I-II

Credits: (2)
Typically Taught Spring Semester: Full Sem
Course Fee: $4.00
Course Fee Purpose: This fee will be used to support instructional technology.
Description: Basic conducting technique and advanced techniques for conducting instrumental ensembles.
Pre-requisite(s): MUSC 1120 and MUSC 1140.
Note: Music Majors and Minors only

MUSC 3824 - Music for Elementary Teachers

Credits: (4)
Typically Taught Spring Semester: Full Sem
Course Fee: $23.00
Course Fee Purpose: This fee will be used to support instructional technology.
Description: Methods and materials for teaching elementary school music (grades K-6) including skill development on selected elementary classroom instruments.

MUSC 3840 - Form and Analysis

Credits: (2)
Typically Taught Fall Semester: Full Sem
Course Fee: $4.00
Course Fee Purpose: This fee will be used to support instructional technology.

Description: A study of basic musical form with particular emphasis on the most important contrapuntal and homophonic styles from the Baroque Period forward. The course coordinates the study of the forms of individual genres with their history and role in the continuous development of music.

Pre-requisite(s): MUSC 2120 and MUSC 2140.
Note: Music Majors and Minors only

MUSC 3842 - Producing the School Musical

Credits: (2)
Typically Taught Spring Semester: Full Sem odd years
Course Fee: $4.00
Course Fee Purpose: This fee will be used to support instructional technology.
Description: A detailed study of musical theatre and the practical application of skills, techniques, and materials necessary for production in secondary schools.
Note: Music Majors and Minors only

MUSC 3851 - Stringed Instrument Pedagogy I

Credits: (2)
Typically Taught Fall Semester: Full Sem
Course Fee: $2.00
Course Fee Purpose: This fee will be used to support instructional technology.
Description: An in-depth study of pedagogical methods employed in teaching the four orchestral stringed instruments to beginning and intermediate level students. May be repeated up to 9 credit hours.
Note: Music Majors and Minors only

MUSC 3852 - Stringed Instrument Pedagogy II

Credits: (2)
Course Fee: $4.00
Course Fee Purpose: This fee will be used to support instructional technology.
Description: Continued in-depth study of pedagogical methods employed in teaching the four orchestral stringed instruments with a focus on upper intermediate and advanced level students.
Pre-requisite(s): MUSC 3851.
Note: Music Majors and Minors only

MUSC 3872 - Choral Conducting I

Credits: (2)
Typically Taught Fall Semester: Full Sem even years
Course Fee: $4.00
Course Fee Purpose: This fee will be used to support instructional technology.
Description: Basic conducting technique and advanced techniques for conducting choral ensembles.
Pre-requisite(s): MUSC 1120 and MUSC 1140.
Note: Music Majors and Minors only

MUSC 3882 - Choral Conducting II

Credits: (2)
Typically Taught Spring Semester: Full Sem even years
Course Fee: $4.00
Course Fee Purpose: This fee will be used to support instructional technology.
Description: Basic conducting technique and advanced techniques for conducting choral ensembles.
Pre-requisite(s): MUSC 1120 and MUSC 1140.
Note: Music Majors and Minors only

MUSC 3924 - Music Teaching and Learning in the Elementary School

Credits: (3)
Typically Taught Fall Semester: Full Sem
Course Fee: $15.00
Course Fee Purpose: The fee for this course is used to support classroom technology and the purchase and maintenance of musical instruments used in the course.
Description: As an introduction to the role of music in the lives of children, this course provides opportunities for music majors to develop their rapport with elementary students. The course will include selecting literature and designing effective instructional strategies aligned with the Utah K-6 music core curriculum as well as the national music standards. Students will be introduced to different philosophical and pedagogical approaches as well as develop and implement age-appropriate assessment strategies. Students will develop their understanding of music's role in an interdisciplinary curriculum. A field experience with elementary-age students is required.
Pre-requisite(s): Completion of MUSC 2150 - Class Piano III with a grade of "C" or passing the piano proficiency exam.
Note: Music Majors and Minors only

MUSC 3991 INT - Junior Recital
MUSC 4302 - Keyboard Pedagogy I

Credits: (2)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Course Fee: $4.00
Course Fee Purpose: This fee will be used to support instructional technology.
Description: Comprehensive study of keyboard pedagogy. Piano Majors and Minors only.

MUSC 4312 - Keyboard Pedagogy II

Credits: (2)
Typically Taught Spring Semester: Full Sem even years
Course Fee: $4.00
Course Fee Purpose: This fee will be used to support instructional technology.
Description: Continuation of MUSC 4302. Comprehensive study of keyboard pedagogy. Piano Majors and Minors only.

MUSC 4322 - Keyboard Pedagogy III

Credits: (2)
Typically Taught Fall Semester: Full Sem
Description: Continuation of MUSC 4312.
Pre-requisite(s): MUSC 4312.

MUSC 4332 - Keyboard Pedagogy IV

Credits: (2)
Typically Taught Spring Semester: Full Sem
Description: Continuation of MUSC 4322.
Pre-requisite(s): MUSC 4322.

MUSC 4402 - Vocal Pedagogy I

Credits: (2)
Typically Taught Fall Semester: Full Sem even years
Course Fee: $4.00
Course Fee Purpose: This fee will be used to support instructional technology.
Description: Comprehensive study of the principles, rules and procedures pertaining to the development, exercise, and practice of the art of singing and the science of teaching singing.
Pre-requisite(s): Two semesters of piano required.
Note: Music Majors and Minors only

MUSC 4412 - Vocal Pedagogy II

Credits: (2)
Typically Taught Spring Semester: Full Sem odd years
Course Fee: $4.00
Course Fee Purpose: This fee will be used to support instructional technology.
Description: Comprehensive study of the principles, rules and procedures pertaining to the development, exercise, and practice of the art of singing and the science of teaching singing.
Note: Music Majors and Minors only

MUSC 4610 - Applied Keyboard: Piano

Credits: (1)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Course Fee: $445.00
Course Fee Purpose: Standard DPA Technology fee.
Description: Music Majors or Minors with a Keyboard Emphasis only. Students are responsible for contacting individual instructors to schedule lessons. See the Music website for a list of private instructors.
May be repeated 3 times with a maximum of 4 credit hours.

MUSC 4611 - Applied Keyboard: Organ

Credits: (1)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Course Fee: $445.00
Course Fee Purpose: Standard DPA Technology fee.
Description: Music Majors and Minors only. Students are responsible for contacting individual instructors to schedule lessons. See the Music website for a list of private instructors.
May be repeated 3 times with a maximum of 4 credit hours.

MUSC 4620 - Applied Voice

Credits: (1)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Course Fee: $445.00
Course Fee Purpose: Standard DPA Technology fee.
Description: Music majors and minors only. Students are responsible for contacting individual instructors to schedule lessons. See the Music website for a list of private instructors.
May be repeated 3 times with a maximum of 4 credit hours.

MUSC 4630 - Applied Woodwinds: Flute

Credits: (1)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Course Fee: $445.00
Course Fee Purpose: Standard DPA Technology fee.
Description: Music majors and minors only. Students are responsible for contacting individual instructors to schedule lessons. See the Music website for a list of private instructors.
May be repeated 3 times with a maximum of 4 credit hours.

MUSC 4631 - Applied Woodwinds: Oboe

Credits: (1)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Course Fee: $445.00
Course Fee Purpose: Standard DPA Technology fee.
Description: Music majors and minors only. Students are responsible for contacting individual instructors to schedule lessons. See the Music website for a list of private instructors.
May be repeated 3 times with a maximum of 4 credit hours.

MUSC 4632 - Applied Woodwinds: Clarinet

Credits: (1)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Course Fee: $445.00
Course Fee Purpose: Standard DPA Technology fee.
Description: Music majors and minors only. Students are responsible for contacting individual instructors to schedule lessons. See the Music website for a list of private instructors.
May be repeated 3 times with a maximum of 4 credit hours.

MUSC 4633 - Applied Woodwinds: Saxophone

Credits: (1)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Course Fee: $445.00
Course Fee Purpose: Standard DPA Technology fee.
Description: Music majors and minors only. Students are responsible for contacting individual instructors to schedule lessons. See the Music website for a list of private instructors.
May be repeated 3 times with a maximum of 4 credit hours.

MUSC 4634 - Applied Woodwinds: Bassoon

Credits: (1)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Course Fee: $445.00
Course Fee Purpose: Standard DPA Technology fee.
Description: Music majors and minors only. Students are responsible for contacting individual instructors to schedule lessons. See the Music website for a list of private instructors.
May be repeated 3 times with a maximum of 4 credit hours.

MUSC 4640 - Applied Brass: Trumpet

Credits: (1)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Course Fee: $445.00
Course Fee Purpose: Standard DPA Technology fee.
Description: Music majors and minors only. Students are responsible for contacting individual instructors to schedule lessons. See the Music website for a list of private instructors.
May be repeated 3 times with a maximum of 4 credit hours.

MUSC 4641 - Applied Brass: French Horn

Credits: (1)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Course Fee: $445.00
Course Fee Purpose: Standard DPA Technology fee.
MUSC 4642 - Applied Brass: Trombone

Credits: (1)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Course Fee: $445.00
Course Fee Purpose: Standard DPA Technology fee.
Description: Music majors and minors only. Students are responsible for contacting individual instructors to schedule lessons. See the Music website for a list of private instructors.
May be repeated 3 times with a maximum of 4 credit hours.

MUSC 4643 - Applied Brass: Euphonium/Tuba

Credits: (1)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Course Fee: $445.00
Course Fee Purpose: Standard DPA Technology fee.
Description: Music majors and minors only. Students are responsible for contacting individual instructors to schedule lessons. See the Music website for a list of private instructors.
May be repeated 3 times with a maximum of 4 credit hours.

MUSC 4650 - Applied Strings: Violin

Credits: (1)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Course Fee: $445.00
Course Fee Purpose: Standard DPA Technology fee.
Description: Music majors and minors only. Students are responsible for contacting individual instructors to schedule lessons. See the Music website for a list of private instructors.
May be repeated 3 times with a maximum of 4 credit hours.

MUSC 4651 - Applied Strings: Viola

Credits: (1)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Course Fee: $445.00
Course Fee Purpose: Standard DPA Technology fee.
Description: Music majors and minors only. Students are responsible for contacting individual instructors to schedule lessons. See the Music website for a list of private instructors.
May be repeated 3 times with a maximum of 4 credit hours.

MUSC 4652 - Applied Strings: Violoncello

Credits: (1)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Course Fee: $445.00
Course Fee Purpose: Standard DPA Technology fee.
Description: Music majors and minors only. Students are responsible for contacting individual instructors to schedule lessons. See the Music website for a list of private instructors.
May be repeated 3 times with a maximum of 4 credit hours.

MUSC 4653 - Applied Strings: String Bass

Credits: (1)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Course Fee: $445.00
Course Fee Purpose: Standard DPA Technology fee.
Description: Music majors and minors only. Students are responsible for contacting individual instructors to schedule lessons. See the Music website for a list of private instructors.
May be repeated 3 times with a maximum of 4 credit hours.

MUSC 4654 - Applied Strings: Guitar

Credits: (1)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Course Fee: $445.00
Course Fee Purpose: Standard DPA Technology fee.
Description: Music majors and minors only. Students are responsible for contacting individual instructors to schedule lessons. See the Music website for a list of private instructors.
May be repeated 3 times with a maximum of 4 credit hours.
lessons. See the Music website for a list of private instructors. May be repeated 3 times with a maximum of 4 credit hours.

**MUSC 4655 - Applied Strings: Harp**

Credits: (1)

- Typically Taught Spring Semester: Full Sem
- Course Fee: $445.00

Description: Music majors and minors only. Students are responsible for contacting individual instructors to schedule lessons. See the Music website for a list of private instructors. May be repeated 3 times with a maximum of 4 credit hours.

**MUSC 4673 - Private Instruction**

Credits: (2)
- Typically Taught Summer Semester: Full Sem
- Typically Taught Fall Semester: Full Sem
- Typically Taught Spring Semester: Full Sem
- Course Fee: $890.00

Course Fee Purpose: The fee for these courses is used to compensate the instructor for teaching this class and overhead assessed by the university.

Description: Individual private instruction for music majors and minors only. For vocal or instrumental students. Two hours of instruction/week. Minimum of 18 hours/week practice required. One-half hour special assignment. By consent of instructor only. Students are responsible for contacting individual instructors to schedule lessons. See the Music website for a list of private instructors. May be taken for credit up to three times in any area of specialization.

**MUSC 4681 - Private Instruction**

Credits: (1)
- Typically Taught Summer Semester: Full Sem
- Typically Taught Fall Semester: Full Sem
- Typically Taught Spring Semester: Full Sem
- Course Fee: $445.00

Course Fee Purpose: The fee for these courses is used to compensate the instructor for teaching this class and overhead assessed by the university.

Description: Individual private instruction for music majors and minors only. Students are responsible for contacting individual instructors to schedule lessons. See the Music website for a list of private instructors. Pre-requisite(s): Completion of two semesters of MUSC 3681 or MUSC 3682 with a grade of "C" or better. May be repeated 4 times with a maximum of 4 credit hours.

**MUSC 4682 - Private Instruction**

Credits: (2)
- Typically Taught Summer Semester: Full Sem
- Typically Taught Fall Semester: Full Sem
- Typically Taught Spring Semester: Full Sem
- Course Fee: $445.00

Course Fee Purpose: The fee for these courses is used to compensate the instructor for teaching this class and overhead assessed by the university.

Description: Individual private instruction for music majors and minors only. Students are responsible for contacting individual instructors to schedule lessons. See the Music website for a list of private instructors. Pre-requisite(s): Completion of two semesters of MUSC 3681 or MUSC 3682 with a grade of "C" or better. May be repeated 4 times with a maximum of 8 credit hours.

**MUSC 4701 - Grant Writing & Non-Profits**

Credits: (3)
- Typically Taught Summer Semester: Full Sem

Description: Students will become familiar with the process of grant research, writing, and compliance. Theory will be applied into practice as students identify real-world organizations in need of funding, locate potential funding sources (including government, corporate, and foundation grants), write grant proposals, and submit those proposals to the funding organization. Pre-requisite(s): Completion of MUSC 3701 with a grade of "C" or better.

**MUSC 4771 - Stringed Instrument Literature I**
MUSC 4772 - Stringed Instrument Literature II

Credits: (2)
Course Fee: $4.00
Course Fee Purpose: This fee will be used to support instructional technology.
Description: A study of music for technical development, plus solo, and chamber music literature of the stringed instruments of the orchestra. This class will focus on music for beginning and intermediate students.
Note: Music Majors and Minors only

MUSC 4801 - College of Arts & Humanities Leadership Lecture Series

Credits: (1)
Typically Taught Spring Semester: Full Sem
Description: This one-credit elective course will give arts and humanities' majors the opportunity to interact with successful guest lecturers whose undergraduate backgrounds are in the arts and humanities. Lecturers will clarify how the talents and skills associated with their degrees have contributed to their pursuit of successful careers and lives.

MUSC 4820 - Pro Tools 101

Credits: (2)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Course Fee: $75.00
Course Fee Purpose: This fee will be used to support instructional technology.
Description: This course covers basic Pro Tools principles. It provides everything you need to complete a Pro Tools project from initial set up to final mix-down. The course focuses on Pro Tools software and covers a multitude of new functions and feature enhancements. Whether your project involves recording live instruments, MIDI sequencing of software synthesizers, or audio editing or region looping, this course will give you the basic skills to succeed.
May be taken twice for 4 credits.

MUSC 4822 - Secondary Music Methods

Credits: (3)
Typically Taught Spring Semester: Full Sem
Course Fee: $6.00
Course Fee Purpose: The fee for this course is used to support classroom technology and the purchase and maintenance of musical instruments used in the course. The fee for these courses is used to compensate the instructor for teaching this class and overhead assessed by the university.
Description: Provides music teachers with an introduction into methods of instruction, organization and presentation of appropriate content and musical literature in secondary school music classes
Pre-requisite(s): Completion of MUSC 3924 and MUSC 2150 with a grade of "C" or better.
Note: Music Majors and Minors only.

MUSC 4823 - Pro Tools 110

Credits: (2)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Course Fee: $79.00
Course Fee Purpose: Course fee: The assessed course fee is used for consumable and non-consumable items as used in class for hands on activities and lab / studio maintenance.
Description: This course provides a more detailed look at the Pro Tools system above and beyond the knowledge you gained in the Pro Tools 101 course. It covers all the key concepts and skills needed to operate a Pro Tools system at the User level. The course along with Pro Tools 101: An Introduction to Pro Tools, provides the foundation to Pro Tools Certification and for the later 200-series of courses on Pro Tools music and post-production.
Pre-requisite(s): MUSC 4820.
May be taken twice for 4 credits.

MUSC 4830 - Directed Readings

Credits: (1-3)
Description: To be arranged.
May be taken for a maximum of 7 hours of credit.
Note: Music Majors and Minors only

MUSC 4842 - High School Music Methods
MUSC 4860 INT - Internship in Music

Credits: (2)
Typically Taught Spring Semester: Full Sem
Course Fee: $4.00
Course Fee Purpose: This fee will be used to support instructional technology.
Description: Methods of instruction, organization and presentation of appropriate content and musical literature in high school music classes. Emphasis is placed on the administration of the school music program.
Pre-requisite(s): Piano proficiency and MUSC 4822.
Note: Music Majors and Minors only

MUSC 4890 INT - Cooperative Work Experience

Credits: (1-6)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Practical synthesis and application of knowledge and skills gained in pedagogy and methods courses. Students plan and implement lessons, document progress, and evaluate their teaching assignments in group or private settings.
May be repeated for a maximum of 12 credits.
Note: Music Majors and Minors only

MUSC 4900 INT - Senior Project--BA in Music

Credits: (3)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: This course will serve as a capstone project for the BA in Music. It will be taken during a student's final semester, and shall demonstrate the student's ability to synthesize the various components of her musical education. In conjunction with the general syllabus (attached), this individualized course will be governed by a contract (also attached). Depending upon the student's chosen track within the BA, examples of projects might include a major composition, a research paper, an analysis paper, a lecture-recital, etc.
Pre-requisite(s): Instructor approval.

MUSC 4910 INT - Opera Production

Credits: (2)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Preparation of operatic scenes and music. Music and staging rehearsal venue for the preparation of fully staged opera productions. By audition only.
May be repeated up to 10 times for credit hours.

MUSC 4920 INT - Short Courses, Workshops, Institutes, and Special Programs

Credits: (1-6)
Workshop
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Consult the class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript.
May be repeated for a total maximum of 6 credit hours.
Note: Music Majors and Minors only.

MUSC 4991 INT - Senior Recital

Credits: (0)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Private instruction in preparation for and public performance of a one hour recital.
Note: Music Majors and Minors only.

MUSC 4992 INT - Senior Project

Credits: (1)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Music education majors have the option of completing a senior project in lieu of the senior recital and should register for MUSC 4992 during the semester in which they plan to complete the project. Requires submission of a project proposal and approval by a faculty committee.
Pre-requisite(s): MUSC 4830.
Note: Music Majors and Minors only

MUSC 4995 INT - Capstone Project
Typically Taught Spring Semester: Full Sem
Course Fee: $25.00
Course Fee Purpose: The fee for this course is used to support classroom technology and the purchase of a software site license.
Description: Under instructor guidance and mentorship, the student will submit a Capstone proposal based on the culmination of coursework and garnered experience. This may include, but is not limited to, producing and/or engineering a multitrack recording session with live musicians, creating the soundtrack for a video, or a scholarly presentation based on any relevant topic from the sound and recording BOK. Capstone completion required for minor.
Pre-requisite(s): Acceptance in the Sound Production/Recording program.

MUSC 6681 - Private Instruction

Credits: (1)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Individual private instruction for music majors and minors only. Students are responsible for contacting individual instructors to schedule lessons. See the Music website for a list of private instructors.
Pre-requisite(s): Bachelor's degree in Music.
May be repeated 4 times with a maximum of 4 credit hours.

MUSC 6682 - Private Instruction

Credits: (2)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Individual private instruction for music majors and minors only. Students are responsible for contacting individual instructors to schedule lessons. See the Music website for a list of private instructors.
Pre-requisite(s): Bachelor's Degree in Music.
May be repeated 4 times with a maximum of 8 credit hours.

NAVS 1010 - Introduction to Naval Science

Credits: (2)
Typically Taught Fall Semester: Full Sem
Description: A general introduction to the USN and USMC that emphasizes organizational structure, warfare components and assigned roles/missions of USN/USMC; covers all aspects of Naval Service from its relative position within DoD to the specific warfare communities/career paths; and includes basic elements of leadership and USN and USMC Core Values. The course will provide students with initial exposure to many elements of Naval culture and provides conceptual framework/working vocabulary for student to use on summer cruise.
Note: Cohort Code

NAVS 1020 - Seapower and Maritime Affairs

Credits: (3)
Typically Taught Spring Semester: Full Sem
Description: The NROTC Seapower and Maritime Affairs course is intended to be a study of the U.S. Navy and the influence of sea power upon history that incorporates both a historical and political perspective to explore the major events, attitudes, personalities, and circumstances that have imbued the U.S. Navy with its proud history and rich tradition. This course necessarily deals with issues of national imperative in peacetime as well as in war; varying maritime philosophies that were interpreted into Naval strategies and doctrines; and budgetary concerns which shaped force realities and the pursuit of American diplomatic objectives. It concludes with a discussion of the Navy's strategic and structural changes at the end of the Cold War and its new focus, mission, and strategy in the post September 11, 2001 world.
Note: Cohort Code

NAVS 2000 - Leadership and Management

Credits: (3)
Typically Taught Fall Semester: Full Sem
Description: The course introduces the student to many of the fundamental concepts of leading Sailors and Marines, which will be further expanded during the continuum of leadership development throughout the NROTC program. It introduces those elements of leadership vital to the effectiveness of Navy/Marine Corps officers by reviewing the theories and parameters of leadership and management within and outside of the Naval Service while additionally addressing values development, interpersonal skills, management skills, and application theory. Practical applications are explored through the use of experiential exercises, readings, case studies, and laboratory discussions.
Note: Cohort Code
NAVS 2020 - Naval Ship Systems II: Naval Engineering

Credits: (3)
Typically Taught Spring Semester: Full Sem
Description: Students learn detailed ship design, hydrodynamic forces, stability, propulsion, electrical theory and distribution, hydraulic theory and ship control, and damage control. The course includes basic concepts of theory/design of steam, gas turbine, diesel, and nuclear propulsion. Case studies on leadership/ethical issues in the engineering arena are also covered.
Note: Cohort Code

NAVS 2110 - Evolution of Warfare

Credits: (3)
Typically Taught Spring Semester: Full Sem
Description: The purpose of this course is to provide a very basic understanding of the art of warfare and its evolving nature from the beginning of recorded history to the present day. The intent is to define war, introduce the student to the concepts of conducting war, and show how technology and the human element of conflict have combined to evolve the way war is conducted from ancient times to now.
Note: Cohort Code

NAVS 3010 - Navigation

Credits: (3)
Typically Taught Spring Semester: Full Sem
Description: In-depth study of the theory, principles, procedures, and application of plotting, piloting, and electronic navigation, as well as an introduction to maneuvering boards. Students learn piloting techniques, the use of charts, the use of visual and electronic aids, and the theory of operation of both magnetic and gyrocompasses. Students develop practical skills in plotting and electronic navigation. Other topics include tides, currents, effects of wind/weather, voyage planning, and an application and introduction to the international/inland rules of navigation. The course is supplemented with a review/analysis of case studies involving moral/ethical/leadership issues pertaining to the concepts listed above.
Note: Cohort Code

NAVS 3020 - Naval Operations and Navigation II

Credits: (3)
Typically Taught Fall Semester: Full Sem
Description: A continued study of relative motion, formation tactics, and ship employment. Introductions to Naval operations and operations analysis, ship behavior and characteristics in maneuvering, applied aspects of ship handling, afloat communications, Naval command and control, Naval warfare areas, and joint warfare are also included. The course is supplemented with a review/analysis of case studies involving moral/ethical/leadership issues pertaining to the concepts listed above.
Note: Cohort Code

NAVS 3110 - Fundamentals of Maneuver Warfare

Credits: (3)
Typically Taught Fall Semester: Full Sem
Description: This course prepares future military officers and other leaders for service by studying modern tactical principles, current military developments, and other aspects of warfare and their interactions with and influences on maneuver warfare doctrine. There is a specific focus on the United States Marine Corps as the premier maneuver warfighting organization. Study also includes historical influences on tactical, operational, and strategic levels of maneuver warfare practices in the current and future operating environments. The course will also examine amphibious operations.
Note: Cohort Code

NAVS 3210 - Marine Corps Bulldog Preparation

Credits: (2)
Typically Taught Spring Semester: Full Sem
Description: Course prepares Marine Option Midshipmen (MO), Marine Enlisted Commissioning Program (MECEP) candidates, Platoon Leader's Class (PLC), and Officer Candidate Class (OCC) students to attend Marine Corps Officer Candidate School. The course exposes candidates to the theory and principles of military tactics, Marine Corps leadership and decision making, and the vigorous physical fitness requirements necessary to successfully complete Marine Corps Officer Candidate School. NOTE: This is an extremely strenuous physical fitness course, including an extensive outdoor component, which requires students to achieve superior levels of fitness at a military mandated standard.
Pre-requisite/Co-requisite: NROTC Student or be able to pass the Marine Corps Physical Fitness Test, possess satisfactory athletics physical, and possess evidence of
health and accident insurance.
Note: Cohort Code

**NAVS 4000 - Naval Ship Systems I: Weapons**

**Credits:** (3)
**Typically Taught Fall Semester:** Full Sem
**Description:** This course outlines the theory and employment of weapons systems. Students explore the processes of detection, evaluation, threat analysis, weapon selection, delivery, guidance, and explosives. Fire control systems and major weapons types are discussed, including capabilities and limitations. The physical aspects of radar and underwater sound are described. Facets of command, control, communications, computers, and intelligence are explored as a means of weapons system integration. The tactical and strategic significance of command and control warfare and information warfare is discussed. This course is supplemented with review/analysis of case studies involving the moral and ethical responsibilities of leaders in the employment of weapons.
Note: Cohort Code

**NAVS 4020 - Leadership and Ethics**

**Credits:** (3)
**Typically Taught Spring Semester:** Full Sem
**Description:** The course completes the final preparations of ensigns and second Lieutenants for service in the Navy and Marine Corps. The course integrates an intellectual exploration of Western moral traditions and ethical philosophy with a variety of topics, such as military leadership, core values, and professional ethics; the UCMJ and Navy regulations; and discussions relating to the roles of enlisted members, junior and senior officers, command relationships, and the conduct of warfare. The course provides midshipmen with a foundation of moral traditions, combined with a discussion of actual current and historical events in the United States Navy and Marine Corps, to prepare them for the role and responsibilities of leadership in the Naval Service of the 21st century.
Note: Cohort Code

**NET 1030 - Foundations of Computing**

**Credits:** (4)
**Typically Taught Summer Semester:** Full Sem, Full Sem Online
**Typically Taught Fall Semester:** Full Sem, Full Sem Online
**Typically Taught Spring Semester:** Full Sem, Full Sem

**Online**
**Description:** This course follows the core body of knowledge specified by the ACM which provides students with a broad overview of topics they might encounter within the major areas of computing. The course is taught at an introductory level and includes topics such as: history of computers, computer architecture, operating systems, web design and development, programming, database, software engineering, networking, and more. Cross-listed with CS 1030 and WEB 1030.

**NET 1300 - Networks and Emerging Technologies**

**Credits:** (3)
**Typically Taught Fall Semester:** Full Sem
**Typically Taught Spring Semester:** Full Sem
**Description:** This course is designed to introduce the fundamentals of voice and data networking technologies. The course includes topics such as history of telecommunications, history of data networking, study of industry, transport media, common networking protocols, and emerging technologies.

**NET 1400 - Introduction to Cyber Defense and Ethics**

**Credits:** (3)
**Typically Taught Spring Semester:** Full Sem
**Course Fee:** $20.00
**Course Fee Purpose:** Course fees are designed to cover the costs of lab equipment maintenance and replacement including desktop and server computer systems and software; consumable materials and supplies; and support for lab aides, student tutors, and online instructional resources.
**Description:** This course will introduce the terminology, concepts, and defense techniques related to cyber defense. An overview of careers and professional organizations related to cybersecurity is also included. The ethics of working with information and cyber tools will be discussed.

**NET 2010 - Business English Applications**

**Credits:** (3)
**Typically Taught Fall Semester:** Full Sem Online
**Description:** Includes Business English essentials: grammar, punctuation, and proofreading. Keyboarding 40 wpm recommended.
**Pre-requisite(s):** WEB 1700 or WEB 1701/WEB 1501.
NET 2200 - Cybersecurity and System Fundamentals

Credits: (3)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Course Fee: $20.00
Course Fee Purpose: Course fees are designed to cover the costs of lab equipment maintenance and replacement including desktop and server computer systems and software; consumable materials and supplies; and support for lab aides, student tutors, and online instructional resources.
Description: Students enrolling in this course will be exposed to current computer hardware and software technologies including computer processors, memory, storage, motherboards, graphical processing units, and other related hardware. Current operating systems will be installed, configured, and optimized following industry best practice. Cybersecurity topics such as password policies, patch management, and system hardening will be emphasized throughout the course.

NET 2210 - Linux Systems Administration

Credits: (3)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: This course gives students a solid foundation in the fundamentals of the Linux operating system. Students gain system-level experience through problem-solving exercises at the command line and in the graphical user interface (GUI). By the end of the course, students will have learned the major, essential, command-line commands necessary to be accomplished users of Linux.
Pre-requisite(s): NET 2200

NET 2300 - Introduction to LAN Management

Credits: (3)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Course Fee: $20.00
Course Fee Purpose: Course fees are designed to cover the costs of lab equipment maintenance and replacement including desktop and server computer systems and software; consumable materials and supplies; and support for lab aides, student tutors, and online instructional resources.
Description: Local area networking concepts including needs analysis, applications, topologies and configurations, and troubleshooting using hands-on labs.
Pre-requisite/Co-requisite: NET 2200 or instructor approval.

NET 2310 - Network Server Administration

Credits: (3)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Students will learn how to install, configure, manage, and troubleshoot hardware and applications in a Server environment in different cloud ecosystems. With a specific focus on Server fundamentals, this course will teach students how to install servers, configure active directories, create and manage users, install server roles and features, perform diagnostics, and troubleshoot malfunctioning servers.
Pre-requisite(s): NET 2300.

NET 2415 - Cisco TCP/IP Routing Protocols and Router Configuration

Credits: (3)
Typically Taught Fall Semester: Full Sem
Course Fee: $20.00
Course Fee Purpose: Course fees are designed to cover the costs of lab equipment maintenance and replacement including desktop and server computer systems and software; consumable materials and supplies; and support for lab aides, student tutors, and online instructional resources.
Description: This course is the first in a two-course series designed to prepare students to pass the examinations for Cisco Certified Network Associate (CCNA). This course covers the OSI model, network components and topologies, IP addressing, beginning router configuration and routing protocols.
Pre-requisite(s): NET 2300 or CS 2705.

NET 2435 - Cisco Advanced LAN and WAN Switching and Routing Theory and Design

Credits: (3)
Typically Taught Spring Semester: Full Sem
Course Fee: $20.00
Course Fee Purpose: Course fees are designed to cover the costs of lab equipment maintenance and replacement including desktop and server computer systems and
software; consumable materials and supplies; and support for lab aides, student tutors, and online instructional resources.

**Description:** This course is the second in a two-course series designed to prepare students to pass the examinations for Cisco Certified Network Associate (CCNA). This course covers advanced router configurations, LAN switching theory and VLANs, advanced LAN and LAN switched design, Novell IPX, WAN theory design and technology, PPP, frame relay, ISDN, network troubleshooting, national SCANs skills, and threaded case studies.

**Pre-requisite(s):** NET 2415.

**NET 2500 - Practical Cybersecurity Infrastructure**

**Credits:** (3)

**Typically Taught Fall Semester:** Full Sem  
**Typically Taught Spring Semester:** Full Sem

**Description:** Students enrolled in this course will be exposed to hands-on application of concepts and topics in the computer networking and cybersecurity fields. Topics covered in this course include exposure to current physical desktop and server hardware, configuration of networking devices such as switches, routers, access points, firewalls, copper and/or fiber optic cable installation, and applying theory and concepts from prior courses in a hands-on environment.

**Pre-requisite(s):** NET 2210 and NET 2310 and NET 2415.

**NET 2510 - Cyberethics**

**Credits:** (1)

**Typically Taught Fall Semester:** 1st Blk, 1st Blk - Online  
**Typically Taught Spring Semester:** 1st Blk, 1st Blk - Online

**Description:** Explores how the structural, competitive, economic, environmental, and ethical forces affect the continuing transformation of the networking industry both domestically and internationally.

**Pre-requisite(s):** CS 1030

**NET 3210 - Advanced Linux Systems Administration**

**Credits:** (3)

**Typically Taught Spring Semester:** Full Sem

**Description:** This course presents advanced administrative skills common to mid- to senior-level administrators in an enterprise environment. Students learn how to apply security to network users and resources, manage and compile the Linux kernel, and troubleshoot network processes and services.

**Pre-requisite(s):** NET 2210.

**NET 3300 - Advanced LAN Security Management**

**Credits:** (3)

**Typically Taught Spring Semester:** Full Sem  
**Course Fee:** $20.00

**Course Fee Purpose:** Course fees are designed to cover the costs of lab equipment maintenance and replacement including desktop and server computer systems and software; consumable materials and supplies; and support for lab aides, student tutors, and online instructional resources.

**Description:** This course provides an in-depth look into the field of network security. Specific topics to be examined include networking protocols and threats, authentication models, cryptography, layer 2 security, application security, social engineering, access control lists, firewalls, risk management, and OS hardening.

**Pre-requisite(s):** NET 2300 or CS 2705.

**NET 3415 - Cisco CCNP-Building Cisco Advanced Router Configuration**

**Credits:** (3)

**Description:** Building Scalable Cisco Networks (BSCN). Addresses tasks network managers and administrators need to perform when managing access and controlling overhead traffic in growing routed networks once basic connectivity has been established. Discusses router capabilities used to control traffic over LANs and WANs, as well as connecting corporate networks to an Internet Service Provider (ISP).

**Pre-requisite(s):** NET 2435 or CCNA Certification or CS 3705.

Note: This course is not currently offered.

**NET 3425 - Cisco CCNP-Building Cisco Switched Networks**

**Credits:** (3)

**Description:** Building Cisco Multilayer Switched Networks (BCMSN). Teaches network administrators how to build campus networks using multilayer switching technologies over high speed Ethernet. Teaches how routing and switching concepts and implementations technologies work together.

**Pre-requisite(s):** NET 2435 or CCNA Certification.

Note: This course is not currently offered.
NET 3435 - Cisco CCNP--Remote Access Networks

Credits: (3)
Description: Teaches how to build a remote access network to interconnect central sites to branch offices and home office/telecommuters. Further teaches students how to control access to the central site as well as maximizes bandwidth utilization over remote links.
Pre-requisite(s): NET 2435 or CCNA Certification.
Note: This course is not currently offered.

NET 3445 - Cisco CCNP--Internetwork Troubleshooting

Credits: (3)
Description: Hands-on lab exercises. Covers developments in Cisco IOS and Catalyst software. Teaches how to baseline and troubleshoot an environment using Cisco routers and switches for multiprotocol client hosts and servers connected with: Ethernet, Fast Ethernet, and Token Ring LANS; and Serial, Frame Relay and ISDN BRI WANs.
Pre-requisite(s): NET 2435 or CCNA Certification.
Note: This course is not currently offered.

NET 3550 - Supervising Information Technology

Credits: (3)
Typically Taught Fall Semester: Full Sem
Course Fee: $20.00
Course Fee Purpose: Course fees are designed to cover the costs of lab equipment maintenance and replacement including desktop and server computer systems and software; consumable materials and supplies; and support for lab aides, student tutors, and online instructional resources.
Description: Application of supervisory functions in network management and multimedia settings including planning, structure, design, implementation, evaluation, problem-solving, and human resources.
Pre-requisite(s): NET 2300 or WEB 2300 or CS 2705.

NET 3600 - Principles of Business/Marketing Education

Credits: (3)
Typically Taught Spring Semester: Full Sem
Description: This course includes professionalism, curriculum, standards, counseling, tech prep, competency-based testing, research, and current issues and trends in Business/Marketing Education. Along with advanced electronic presentations, this course will include a review of other technologies used in teaching.
Pre-requisite(s): WEB 1700; or WEB 1701/WEB 1501 and WEB 1702/WEB 1502 and WEB 1703/WEB 1503.

NET 3610 - Methods of Teaching Marketing Education Subjects

Credits: (3)
Typically Taught Fall Semester: Full Sem
Description: Analysis and research into methods of teaching business and marketing subjects with emphasis on teaching demonstrations and practices, objectives, outcome measurements, testing, and grading.
Pre-requisite(s): WEB 1700 or WEB 1701/WEB 1501 and WEB 1702/WEB 1502 and WEB 1703/WEB 1503.

NET 3710 - Switching and Transmission Network Systems Management

Credits: (4)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Course Fee: $20.00
Course Fee Purpose: Course fees are designed to cover the costs of lab equipment maintenance and replacement including desktop and server computer systems and software; consumable materials and supplies; and support for lab aides, student tutors, and online instructional resources.
Description: This course covers management of switching and transport systems and their technologies from industry carrier systems to private business networks. Hands-on labs working with TDM lines and trunks, transport, IP routing, and SIP. Applications will be run on live LAN/WAN networks. Also, the course includes discussion of new technologies.
Pre-requisite(s): NET 2300 or CS 2705.

NET 3715 - Transmission Network Applications

Credits: (2)
Typically Taught Fall Semester: Fall [Full Sem]
Course Fee: $20.00
Course Fee Purpose: Course fees are designed to cover the costs of lab equipment maintenance and replacement including desktop and server computer systems and software; consumable materials and supplies; and support for lab aides, student tutors, and online instructional resources.
software; consumable materials and supplies; and support for lab aides, student tutors, and online instructional resources.

**Description:** Hands-on labs working with TDM lines and trunks, transport, IP routing, and SIP. Applications will be run on live LAN/WAN networks. Also, the course includes discussion of new technologies.

**Pre-requisite(s):** NET 2300.

**Co-Requisite(s):** NET 3710.

**NET 3720 - Wireless Networking and Security**

**Credits:** (3)

**Typically Taught Fall Semester:** Full Sem

**Course Fee:** $20.00

**Course Fee Purpose:** Course fees are designed to cover the costs of lab equipment maintenance and replacement including desktop and server computer systems and software; consumable materials and supplies; and support for lab aides, student tutors, and online instructional resources.

**Description:** A study of wireless networks and wireless security. Topics include: WLAN standards, RF technologies, WLAN network security, WLAN troubleshooting, wireless administration, and wireless equipment configuration.

**Pre-requisite(s):** NET 2415

**NET 3730 - Cyber Policy and Ethics**

**Credits:** (3)

**Typically Taught Fall Semester:** Full Sem

**Course Fee:** $20.00

**Course Fee Purpose:** Course fees are designed to cover the costs of lab equipment maintenance and replacement including desktop and server computer systems and software; consumable materials and supplies; and support for lab aides, student tutors, and online instructional resources.

**Description:** Explores how the structural, competitive, economic, environmental, and ethical forces affect the continuing transformation of the networking industry both domestically and internationally. Discussion of the impact of contemporary issues on the provider and the consumer of telecommunication services including the legal and ethical requirements and ramifications of electronic privacy are included.

**Pre-requisite(s):** NET 3300

**NET 4700 - Data and Voice Network Design**

**Credits:** (4)

**Typically Taught Spring Semester:** Full Sem

**Course Fee:** $20.00

**Course Fee Purpose:** Course fees are designed to cover the costs of lab equipment maintenance and replacement including desktop and server computer systems and software; consumable materials and supplies; and support for lab aides, student tutors, and online instructional resources.

**Description:** As a capstone course, students will design data and voice networks using industry metrics and rationale. Architecture, technologies, and standards associated with the design and management of modern data and voice networks will be covered.

**Pre-requisite(s):** NET 3710 and NET 3720.

**NET 4740 - Security Vulnerabilities and Intrusion Mitigation**

**Credits:** (4)

**Typically Taught Spring Semester:** Full Sem

**Course Fee:** $20.00

**Course Fee Purpose:** Course fees are designed to cover the costs of lab equipment maintenance and replacement including desktop and server computer systems and software; consumable materials and supplies; and support for lab aides, student tutors, and online instructional resources.

**Description:** A treatment of security issues related to computers and computer networking. This course is designed for advanced users, system administrators and network administrators. The course covers TCP/IP security issues, security policies, packet filtering, Internet firewall architecture and theory, detecting and monitoring unauthorized activity, password authentication, intrusion detection and prevention and other security issues involving Linux, UNIX and Microsoft Windows operating systems. A team project is included.

**Pre-requisite(s):** NET 3300, PS 3250, and CS 3705.

**NET 4760 INT - Network Management Technology Internship**

**Credits:** (3)

**Typically Taught Summer Semester:** Full Sem

**Typically Taught Fall Semester:** Full Sem

**Typically Taught Spring Semester:** Full Sem

**Course Fee:** $10.00

**Course Fee Purpose:** Course fees are designed to cover the costs of lab equipment maintenance and replacement including desktop and server computer systems and software; consumable materials and supplies; and support
for lab aides, student tutors, and online instructional resources.

**Description:** Must be completed senior year in an information technology environment with company placement and outcomes approved by the department.

**Pre-requisite/Co-requisite:** NET 4700

### NET 4790 INT - Network Management Technology Senior Project

**Credits:** (3)
**Typically Taught Summer Semester:** Full Sem
**Typically Taught Fall Semester:** Full Sem
**Typically Taught Spring Semester:** Full Sem
**Course Fee:** $15.00

**Course Fee Purpose:** Course fees are designed to cover the costs of lab equipment maintenance and replacement including desktop and server computer systems and software; consumable materials and supplies; and support for lab aides, student tutors, and online instructional resources.

**Description:** Capstone course applying the principles learned in the Network Management Technology program to complete a student designed project.

**Pre-requisite/Co-requisite:** NET 4700

### NET 4850 - Faculty Directed Research

**Credits:** (1–4)
**Typically Taught Fall Semester:** Full Sem
**Typically Taught Spring Semester:** Full Sem

**Description:** The purpose of this course is to permit Network Management Technology majors to work closely and consistently with a faculty mentor on specific research related to current, experimental topics in Network Management Technology. The final grade and amount of credit awarded will be determined by the faculty mentor, depending on the complexity of the advanced, upper division work performed. May be repeated 3 times up to 4 credit hours. Note: Only a maximum of 6 hours of NET 4800, NET 4850, and NET 4890 may be taken to satisfy missing credits or to achieve full time academic status.

**Pre-requisite(s):** WEB 2860 or equivalent.

Note: This course is offered as needed.

### NET 4990 - Senior Project

**Credits:** (3)
**Course Fee:** $10.00

**Course Fee Purpose:** Course fees are designed to cover the costs of lab equipment maintenance and replacement including desktop and server computer systems and software; consumable materials and supplies; and support for lab aides, student tutors, and online instructional resources.

**Description:** Research, analysis, presentation, and discussion of topics relative to graduating majors and minors.

**Pre-requisite(s):** WEB 2860 or equivalent.

### NET 6600 - Principles of Business/Marketing Education

**Credits:** (3)

**Typically Taught Spring Semester:** Full Sem

**Description:** This graduate-level course includes professionalism, curriculum, standards, counseling, tech prep, competency-based testing, research, and current issues and trends in Business/Marketing Education. Along with advanced electronic presentations, this course will include a review of other technologies used in teaching. NET 6600 may be substituted for NET 3600 in the undergraduate Business Education Composite Teaching major, Business Education Teaching minor, or Business/Marketing Teaching minor for those working on a second bachelor's degree.

**Pre-requisite(s):** WEB 1700; or WEB 1701/WEB 1501, WEB 1702/WEB 1502, and WEB 1703/WEB 1503 and a bachelor's degree.

### NET 6610 - Methods of Teaching Business Education

**Credits:** (3)

**Typically Taught Fall Semester:** Full Sem

**Course Fee:** $10.00
Course Fee Purpose: Course fees are designed to cover the costs of lab equipment maintenance and replacement including desktop and server computer systems and software; consumable materials and supplies; and support for lab aides, student tutors, and online instructional resources.

Description: This graduate-level course includes an evaluation and application of the methods of teaching business and marketing subjects with emphasis on teaching demonstrations and practices, objectives, outcome measurements, testing, and grading. The students will write a unit-long Learning Activity Package (LAP) and will demonstrate teaching in a business/marketing course. NET 6610 may be substituted for NET 3610 in the undergraduate Business Education Composite Teaching major, Business Education Teaching minor, or Business/Marketing Teaching minor for those working on a second bachelor's degree.

Pre-requisite(s): WEB 1700; or WEB 1701/WEB 1501, WEB 1702/WEB 1502, and WEB 1703/WEB 1503; and a bachelor's degree.

NEUR 2950 - Introduction to Neuroscience

Credits: (3)
Course Fee: $15.00
Course Fee Purpose: Course fees are used to assist with the purchase of lab supplies and equipment needed to facilitate instruction of neuroscience principles and techniques.

Description: Introduction to the interdisciplinary field of neuroscience, which examines the function and dysfunction of the human and animal nervous system. The course spans the major areas of neuroscience including cellular/molecular factors, neuron physiology, brain structure and function, and medical/clinical applications. The topics addressed are critical to multiple fields of study (e.g. health sciences, psychology, and zoology) and provides the skills necessary for students to succeed in upper-division courses related to the brain and behavior.

Pre-requisite(s): PSY 2710 or CHEM 1010 or CHEM 1110 or CHEM 1130 or ZOOL 2200 or ZOOL 1020 or ZOOL 1370.

NEUR 3750 - Cognitive and Behavioral Neuroscience

Credits: (3)
Description: This course challenges students to apply knowledge of nervous system structure and function to higher order cognitive functions and motor abilities including attention, memory, emotions, language and symbolic functions, reasoning, decision making, problem solving, voluntary movement, and consciousness.

Pre-requisite(s): NEUR 2950 or NEUR 2050 or PSY 2710 or instructor approval.

Co-Requisite(s): N/A

NEUR 3850 - Clinical Neuroscience

Credits: (3)
Description: This is an advanced undergraduate course primarily for Neuroscience minors, but open to all students. Students will apply a knowledge of neuroanatomy, neurophysiology, cognition, and behavior to discuss and solve in-depth clinical case studies in the classroom setting. The course will consist of instructor-led and student-led activities to explore a range of nervous system disorders.

Pre-requisite(s): NEUR 2950 or NEUR 2050 or consent of instructor.

NEUR 3950 - Cellular and Molecular Neuroscience

Credits: (3)

Description: Students will explore the cellular and molecular basis for nerve cell function.

Pre-requisite(s): NEUR 2950 or NEUR 2050

NEUR 3998 - EEG in Epilepsy

Typically Taught Spring Semester: Full Sem

Credits: (3)

Description: This course is part of the Bachelor of Integrated Studies in Electroneurodiagnostics (END), a partnership between Weber State University and the END program at the University of Utah. Students will complete lecture and lab hours primarily at the University of Utah. In addition, five meetings during the spring semester, probably at the University of Utah, will be required and there is a required research paper.

NEUR 3999 - EEG in Ped Patients & Neonates

Typically Taught Spring Semester: Full Sem

Credits: (3)

Description: This course is part of the Bachelor of Integrated Studies in Electroneurodiagnostics (END), a partnership between Weber State University and the END
program at the University of Utah. Students will complete lecture and lab hours primarily at the University of Utah. In addition, five meetings during the spring semester, probably at the University of Utah, will be required and there is a required research paper.

**NEUR 4444 - Human Neuroanatomy**

**Credits:** (3)
**Description:** An advanced course in human neuroanatomy. Students will learn the major structures of the human brain and spinal cord as well as the pathways that connect them.
**Pre-requisite(s):** NEUR 2950 or NEUR 2050.

**NEUR 4800 - Projects and Research**

**Credits:** (1-3)
**Description:** Supervised participation in projects and/or primary research with a faculty mentor in various areas of neuroscience. Limited to advanced students upon consent of neuroscience faculty mentor and the Neuroscience Program director. A paper written in APA style and an oral report are required at the end of the semester.
**Pre-requisite(s):** NEUR 2950 or NEUR 2050 (Introduction to Neuroscience), PSY 3600 (Statistics) or equivalent, and faculty mentor permission.
Students may enroll in this course twice for a maximum of 6 credit hours.

**NEUR 4810 - Experimental Course**

**Credits:** (1-6)
**Experimental**
**Typically Taught Spring Semester:** Full Sem odd years
**Description:** Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript. May be repeated for a total maximum of 6 credit hours.

**NEUR 4830 - Directed Readings**

**Credits:** (1-3)
**Description:** Independent readings or secondary research on advanced neuroscience special topics under the direction of a faculty mentor. For each hour of credit in a readings project the student is required to read an appropriate number of primary research journal articles and book chapters. A paper written in APA style and oral report are required at the end of the term.
**Pre-requisite(s):** NEUR 2950 or NEUR 2050 (Introduction to Neuroscience), PSY 3600 (Statistics) or equivalent, and faculty mentor permission.

Students may enroll in this course twice for a maximum of 6 credit hours.

**NEUR 4900 - Topics in Neuroscience**

**Credits:** (1-3)
**Variable Title**
**Description:** This course offers an in-depth exploration of selected topics and issues in the discipline. The prerequisite may be waived or replaced by an equivalent at the discretion of the instructor in consultation with the Neuroscience Program Director.
**Pre-requisite(s):** NEUR 2950 or NEUR 2050 or consent of instructor.
The course may be taken up to three times for a maximum of six credit hours.
Note: This course is taught as needed.

**NEUR 4949 - The Neuroscience of Sex, Romance, and Sexual Orientation**

**Credits:** (3)
**Description:** This course will examine three human imperatives (sex, romance, and sexual orientation) from a neuroscience perspective. The neuroscience basis for each of these aspects of human behavior will be examined through directed readings and in-class discussions.
**Pre-requisite(s):** PSY 1010

**NRSG 2100 - Pharmacology for Nurses I**

**Credits:** (1.5)
**Typically Taught Summer Semester:** Full Sem
**Typically Taught Fall Semester:** Full Sem
**Typically Taught Spring Semester:** Full Sem
**Description:** This course incorporates basic pharmacological and nonpharmacological interventions used by the nurse to promote health across the lifespan. Course content includes principles of safe medication administration and pharmacotherapeutics with a focus on prototype medications. This course provides a foundation of pharmacology knowledge for the nurse.
**Pre-requisite(s):** Admission to the Nursing Program.
**Co-Require(s):** NRSG 2200 and NRSG 2251.

**NRSG 2200 - Nursing Foundations**

**Credits:** (3)
**Typically Taught Summer Semester:** Full Sem
**Typically Taught Fall Semester:** Full Sem
**Typically Taught Spring Semester:** Full Sem
**Description:** Students are socialized into the profession of
nursing, taught scope of practice, rules and ethics. Building nursing care on a health/wellness continuum is introduced. Students begin the nursing process through assessment of health and wellness in individuals, families and populations throughout the lifespan, and in diverse cultures and environments. 3 lecture hours per week.

**Pre-requisite(s):** Admission to the Nursing Program.

**Co-Requisite(s):** NRSG 2100.

**NRSG 2251 INT/CEL - Foundations of Nursing Lab and Clinical**

**Credits:** (4.5)

**Typically Taught Summer Semester:** Full Sem

**Typically Taught Fall Semester:** Full Sem

**Typically Taught Spring Semester:** Full Sem

**Course Fee:** $320.00

**Course Fee Purpose:** Course fees are used for expenses connected with a course that goes beyond the standard expectation of university support. The funds are used for expensive items, non-expendable items, technology, and lab support.

**Description:** This course will include a combination of lab, simulation, and clinical experiences. Students will focus on identifying and implementing foundational nursing skills. Students will have the opportunity to practice in a controlled environment, where they will pass off required skills and simulate clinical experiences. Students will also apply learned skills in clinical facilities. In order to pass the course, students must pass all three components of the course (lab, clinical, and simulation). This course focuses on application of concepts related to nursing care of patients in multiple environments and across the lifespan in various settings.

**Pre-requisite(s):** Admission into the nursing program.

**Co-Requisite(s):** NRSG 2200 and NRSG 2100.

**NRSG 2283 - Directed Readings and Projects**

**Credits:** (1-3)

**Typically Taught Summer Semester:** Full Sem, Online

**Typically Taught Fall Semester:** Full Sem, Online

**Typically Taught Spring Semester:** Full Sem, Online

**Pre-requisite(s):** Instructor approval.

(Maximum of 3 semester hours per year).

**NRSG 2300 - Patient-Centered Nursing Care I**

**Credits:** (3)

**Typically Taught Summer Semester:** Full Sem

**Typically Taught Fall Semester:** Full Sem

**Typically Taught Spring Semester:** Full Sem

**Description:** Focused theory with emphasis on nursing care across the lifespan for patients experiencing changes in health status. Focus will be on identifying chronic diseases and developing a nursing strategy to promote wellness and quality of life for the patient. Clinical will focus on application of theory related to nursing care of patients in multiple environments and across the lifespan. 3 lecture hours per week.

**Pre-requisite(s):** NRSG 2100, NRSG 2200.

**NRSG 2351 INT/CEL - Patient-Centered Nursing Care Experience I**

**Credits:** (4.5)

**Typically Taught Summer Semester:** Full Sem

**Typically Taught Fall Semester:** Full Sem

**Typically Taught Spring Semester:** Full Sem

**Course Fee:** $320.00

**Course Fee Purpose:** Course fees are used for expenses connected with a course that goes beyond the standard expectation of university support. The funds are used for expensive items, non-expendable items, and lab support.

**Description:** This course will include a combination of clinical, simulation, and laboratory experiences. Students will build on previous skills and knowledge and focus on demonstrating and examining safe and efficient patient care. Students will have the opportunity to practice in a controlled environment, where they will pass off required skills and simulate clinical experiences. Students will also apply learned skills in clinical facilities. In order to pass the course, students must pass all three components of the course (lab, clinical, and simulation). This course focuses on application of concepts related to nursing care of patients in multiple environments and across the lifespan in various settings.

**Pre-requisite(s):** Admission to Nursing Program; NRSG 2100, NRSG 2200, and NRSG 2251.

**Co-Requisite(s):** NRSG 2300 and NRSG 2700.

**NRSG 2500 - Patient-Centered Nursing Care II**

**Credits:** (3)

**Typically Taught Summer Semester:** Full Sem

**Typically Taught Fall Semester:** Full Sem

**Typically Taught Spring Semester:** Full Sem

**Description:** Focused theory with emphasis on nursing care across the lifespan for patients experiencing changes in health care status. Focus will be on caring for patients in
the acute care setting with a goal of restoring optimal health and wellness.

**NRSG 2551 INT/CEL - Patient-Centered Nursing Care Experience II**

**Credits:** (4.5)
**Typically Taught Summer Semester:** Full Sem
**Typically Taught Fall Semester:** Full Sem
**Typically Taught Spring Semester:** Full Sem

**Course Fee:** $350.00

**Course Fee Purpose:** Course fees are used for expenses connected with a course that go beyond the normal expectation of university support. These funds are used for expendable items, non-expendable items, and lab support.

**Description:** This course will include a combination of clinical, simulation, and laboratory experiences. Students will build on previous skills and knowledge and focus on developing and critiquing safe and efficient patient care. Students will have the opportunity to practice in a controlled environment, where they will pass off required skills and simulate clinical experiences. Students will also apply learned skills in clinical facilities. In order to pass the course, students must pass all three components of the course (lab, clinical, and simulation). This course focuses on application of concepts related to nursing care of patients in multiple environments and across the lifespan in various settings.

**NRSG 2700 - Pharmacology for Nurses II**

**Credits:** (1.5)
**Typically Taught Summer Semester:** Full Sem
**Typically Taught Fall Semester:** Full Sem
**Typically Taught Spring Semester:** Full Sem

**Description:** This course builds on basic pharmacological principles from NRSG 2100 to promote health across the lifespan with an emphasis on patient safety. Prototype drugs are used to explore a variety of pharmacologic and therapeutic medication classes to promote patient health and well-being.

**Pre-requisite(s):** NRSG 2100, NRSG 2200, and NRSG 2251.
**Co-Requisite(s):** NRSG 2300 and NRSG 2351.

**NRSG 3100 - Pharmacology for Nurses III**

**Credits:** (3)
**Typically Taught Summer Semester:** Full Sem
**Typically Taught Fall Semester:** Full Sem
**Typically Taught Spring Semester:** Full Sem

**Description:** This course explores advanced pharmacological treatments used by the nurse to promote health across the lifespan. Course content has emphasis on the administration of intravenous medication in the provision of acute medical care.

**Co-Requisite(s):** NRSG 2500, NRSG 2551.

**NRSG 3200 - Complex Patient Centered Nursing Care**

**Credits:** (3)
**Typically Taught Summer Semester:** Full Sem
**Typically Taught Fall Semester:** Full Sem
**Typically Taught Spring Semester:** Full Sem

**Description:** Theory focuses on nursing care of patients with complex changes in health status requiring extensive multifaceted resources.

Three hours of lecture per week.

**Pre-requisite(s):** NRSG 2500 and NRSG 3100.
**Co-Requisite(s):** NRSG 3300 and NRSG 3350.

**NRSG 3300 - Entry Into Nursing Professional Practice**

**Credits:** (3.5)
**Typically Taught Summer Semester:** Full Sem
**Typically Taught Fall Semester:** Full Sem
**Typically Taught Spring Semester:** Full Sem

**Description:** Entry into Nursing Professional Practice focuses on synthesis of nursing knowledge, skills, and attitudes necessary for transition to professional nursing practice. Students use advanced testing strategies and comprehensive content review to prepare for successfully completing the NCLEX-RN® licensing examination. In addition, a cumulative pharmacology review will be included in the course.

**Pre-requisite(s):** NRSG 2500 and NRSG 3100.
**Co-Requisite(s):** NRSG 3200 and NRSG 3350.

**NRSG 3350 INT/CEL - Entry Into Nursing Professional Practice Capstone**

**Credits:** (3)
**Typically Taught Summer Semester:** Full Sem, Online
**Typically Taught Fall Semester:** Full Sem, Online
**Typically Taught Spring Semester:** Full Sem, Online

**Description:** Clinical preceptorship focuses on synthesis of nursing knowledge, skills, and conduct necessary for entrance into registered nursing practice.

9 clinical hours per week.

**Pre-requisite(s):** NRSG 2500 and NRSG 3100.
**Co-Requisite(s):** NRSG 3200 and NRSG 3300.
NRSG 3400 - Mental Health: The Complex Role

Credits: (3)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem Online
Typically Taught Spring Semester: Full Sem Online

Description: Advanced theories and concepts of nursing practice are explored across the lifespan for those experiencing alterations in mental health.

NRSG 3440 - Coping in Your Profession

Credits: (3)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem

Description: The healthcare profession can be a highly rewarding career, but it can also be riddled with stress. This course will explore contributing factors that may cause stress among healthcare professionals. Burnout can be a direct result of stress in the workplace. The student will examine the causes of burnout, and more importantly, explore tools to prevent and treat burnout.

NRSG 3810 - Experimental Course

Credits: (1-6)
Experimental

Description: Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript. May be repeated for a total maximum of 6 credit hours.

NRSG 4000 - Culture and Health Care

Credits: (2)

Description: This course is an exploration of culture, health care issues and experiences at the local, regional, national, or international levels. The learner will study and compare the health care of a selected country/community from the cultural, political and educational perspective.

Credit hours (2), 2 lecture hours per week.

Pre-requisite(s): Admission to Weber State University; recommended for nursing students, Licensed Nurses, and other healthcare providers.

May be repeated up to 99 times.

NRSG 4001 - Clinical Experience Related to Culture and Health Care of Nurses

Credits: (1-3)

Description: This course is a Study Abroad Experience for Health Care Workers to explore the relationship between culture, health care and nursing issues at local, regional, national, and/or international levels. Information gained during NRSG 4000 will assist the student to put into practice the concepts learned.

Credit hours (1-3). Lab hours depend on the country visited.

Pre-requisite/Co-requisite: Co-requisite or prerequisite: NRSG 4000 related to area being visited.

May be repeated up to 99 times.

NRSG 4010 - Interdisciplinary Health Care Teams

Credits: (3)

Description: This course provides an interdisciplinary experience with the team concept as a priority. The students learn the role of the health care team members, each with their different skills and objectives. The course teaches students to practice an interdisciplinary approach as they research, interact and learn in the interdisciplinary environment of a health care setting.

Cross-listed with DENT 4010 & HTHS 4010.

May be repeated once up to 6 credit hours.

NRSG 4022 - Nursing Care of the Trauma Patient

Credits: (3)

Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem

Description: This course will cover the systematic and standardized approach for assessing and managing patients who have sustained traumatic injuries. Students will be able to identify assessment findings that may vary in special populations such as pediatrics, geriatric, bariatrics and pregnancy. Students will be able to identify roles and responsibilities of each member of the trauma team and coordinate care to improve the patients' outcomes.

This course will collaborate with other disciplines such as PARA 2020 to exchange case studies, allowing nursing and students from other disciplines the opportunity to share how they would approach and provide for the traumatically injured client. The exchange between these two classes will give students from both disciplines insights into the challenges, strengths, and limitations of their counterparts.
NRSG 4045 - ELNEC: End-of-Life Nursing Education Consortium

Credits: (3)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem

Description: This course is designed from the nationally recognized guidelines of the End-of-Life Nursing Education Consortium (ELNEC) project. These guidelines are revised regularly to reflect current advances in the field. The purpose of the ELNEC project is to support the knowledge and skills of nurses in providing palliative care to patients who are experiencing serious illness or end of life. ELNEC content focuses on nursing care at the end of life; pain management; symptom management; ethical/legal issues; cultural considerations in end-of-life care; communication; loss, grief, bereavement; and preparation for and care at time of death.

Pre-requisite(s): Admission to a nursing program or current registered nurse.

NRSG 4050 - Nursing Assessment Across the Life Span

Credits: (3)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem

Description: This course provides the theory requisite for the systematic examination and analysis of subjective and objective health assessment data obtained during the health assessment process. The health status of a client will be determined through the process of differential analysis of both the anecdotal evidence provided by the client and empirical evidence gathered during the physical examination. With this evidence, students will learn to apply the scientific process of formulating and testing hypothetical diagnoses. The overall purpose will be focused upon developing strategies and skills to assess the health care needs of people across the life span. Students are challenged to identify normal assessment findings and critically analyze variations from normal.

NRSG 4060 - Oncology Nursing

Credits: (3)
Typically Taught Summer Semester: Full Sem Online
Typically Taught Fall Semester: Full Sem Online
Typically Taught Spring Semester: Full Sem Online

Description: This course provides learning opportunities for nurses who work in various areas of health care with minimal opportunities to care for patients with cancer. The learning activities are based on current evidence, clinical experts, and patient values-evidenced-based practice. Throughout the course, an emphasis is placed on the collaborative interprofessional team tasked with managing the care of the patients regarding cancer diagnosis, cancer treatments, unintentional consequences stemming from treatment, and emotional aspects involved in caring for patients with cancer.

NRSG 4070 - Disaster Nursing

Credits: (3)
Typically Taught Summer Semester: Full Sem Online
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem

Description: This course provides learning opportunities for nurses who work in various areas of health care with minimal opportunities to care for patients with cancer. The learning activities are based on current evidence, clinical experts, and patient values-evidenced-based practice. Throughout the course, an emphasis is placed on the collaborative interprofessional team tasked with managing the care of the patients regarding cancer diagnosis, cancer treatments, unintentional consequences stemming from treatment, and emotional aspects involved in caring for patients with cancer.

NRSG 4080 - Adult Critical Care

Credits: (3)
Typically Taught Summer Semester: Full Sem, Full Sem Online
Typically Taught Fall Semester: Full Sem, Online
Typically Taught Spring Semester: Full Sem, Online

Description: Advanced theories and concepts of nursing practice are explored in relation to adults experiencing life threatening alterations in health. (Hybrid)

NRSG 4090 - Nursing: High Risk OB/Pediatric Patient

Credits: (3)
Typically Taught Summer Semester: Full Sem Online
Typically Taught Fall Semester: Full Sem, Full Sem Online
Typically Taught Spring Semester: Full Sem, Full Sem Online

Description: At risk pediatric and obstetric populations require multiple interventions from knowledgeable caregivers. In this course, students will learn theory and concepts associated with caring for these high-risk populations. By the end of this course students will have an increased understanding of nursing care and application of evidence-based care for improved outcomes. (Hybrid)
NRSG 4100 - Care Coordination and Interdisciplinary Collaboration for Safe Patient Outcomes

Credits: (3)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem, Online
Typically Taught Spring Semester: Full Sem, Online
Description: Nursing 4100 is designed to assist students in learning theory and concepts related to nursing care of patients with chronic conditions, including illness implications and education for patients and families. Topics will include areas such as genetic conditions, caregiver stress and grieving, as well as advocacy for vulnerable populations. The course will incorporate application of advanced skills and knowledge to address coordination of complex care issues and healthcare resources inherent in caring for patients and families experiencing chronic conditions.

NRSG 4200 SUS - Scholarship for Evidence-Based Practice

Credits: (3)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem, Online
Typically Taught Spring Semester: Full Sem, Online
Description: Nursing 4200 focuses on a basic understanding of how multiple sources of evidence are developed and integrated into an evidence-based nursing environment. These sources include the formal research process, quality improvement data, clinical judgment, interprofessional perspectives, and patient preference. This course will include the application of advanced knowledge and skills required for translating reliable evidence into evidence-based practice and clinical judgments. The course will also support the establishment of a research-base for the student's personal nursing practice, as well as influence the continual improvement of healthcare quality and safety.

NRSG 4300 - Healthcare Policy and Decision Making

Credits: (3)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem, Online
Typically Taught Spring Semester: Full Sem, Online
Description: Nursing 4300 will explore healthcare policies, including financial and regulatory policies, which directly and indirectly influence nursing practice. These policies shape responses to organizational, local, national, and global issues of equity, access, affordability, and social justice. Students will apply advanced skills and knowledge to identify, analyze and problem-solve variables affecting nursing decisions and healthcare policy encountered in nursing practice. Topics will be presented that provide an overview of legal and ethical principles and theories, emphasizing the role of ethics and healthcare policy in nursing.

NRSG 4400 SUS/CEL - Population Health in Nursing

Credits: (4)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem, Online
Typically Taught Spring Semester: Full Sem, Online
Description: Nursing 4400 explores nursing in diverse populations in a local and global context emphasizing disease prevention, health promotion and cultural competency for the improvement of health status throughout the lifespan. Focus will include disparities in health and health care services, and the impact of behavior and lifestyle choices. Course projects will incorporate application of advanced skills and knowledge related to health needs and health promotion at the individual and community level. Students will examine frameworks of community and public health, assess and analyze prevalent population-based health issues, and explore population-based interventions.

NRSG 4450 - Providing Identity-Affirming Care

Credits: (3)
Typically Taught Summer Semester: Full Sem - Online
Typically Taught Fall Semester: Full Sem - Online
Typically Taught Spring Semester: Full Sem - Online
Description: This course explores how aspects of identity such as age, disability status, spiritual orientation, race/ethnicity, sexual orientation, gender identity and expression, culture, and ancestry shape how we interact with one another, and provide care. An understanding of terminology, history, cultural contexts, and social justice surrounding identity and intersectionality will prepare health and helping professionals as they emerge into an increasingly diverse society.

NRSG 4500 - Nursing Management and Leadership

Credits: (3)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem, Online
Typically Taught Spring Semester: Full Sem, Online

**Description:** Nursing 4500 is designed to facilitate student learning and application of advanced skills and knowledge related to nursing leadership and nursing management. In accordance with this, students will explore and examine personal and professional characteristics of nurse leaders and nurse managers which will prepare them to lead through evidence-based principles. Students will also gain experience in communication and collaboration with community partners and interdisciplinary teams, which will prepare them to assist in the advancement of the profession of nursing through empowerment, change, and anticipation of nursing's future.

**NRSG 4600 - Communication, Collaboration, and Information Management in Healthcare**

Credits: (3)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem, Online
Typically Taught Spring Semester: Full Sem, Online

**Description:** Nursing 4600 will incorporate application of advanced skills and knowledge related to information management, patient care technology, and effective interpersonal communication modalities. These skills are critical in preparing nurses to deliver quality patient care in a variety of healthcare settings. Students will examine information management tools used to monitor: outcomes of care processes, patient care technologies essential to ensuring high quality, safe patient care, and communication and collaboration skills necessary to providing optimal patient-centered care.

**NRSG 4700 - Forensic Nursing**

Credits: (3)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem

**Description:** This course explores nursing in the field of forensics in both criminal and civil contexts. The different roles and responsibilities of forensic nurses will be explored and best-practices for evidence collection and preservation will be reviewed. Holistic care of victims and families will be emphasized. Students will review victimology, evaluate prevalent population-based health issues, and explore forensic nursing interventions.

**NRSG 4830 - Directed Theoretical Readings**

Credits: (1-3)

**Description:** Involves a contract with faculty to include reading and writing of materials relevant to baccalaureate level nursing. Subject emphasis arranged with faculty. May be repeated once up to 6 credit hours.

**NRSG 4840 - Nursing Honors Project Development & Implementation**

Credits: (3)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem

**Description:** Completion of this course is required for students enrolled in the Annie Taylor Dee School of Nursing Honors Program and working toward earning Departmental Honors in Nursing. Enrollment in this course requires program approval. This course facilitates nursing honors students in the development, implementation, evaluation, and presentation of their capstone honors project.

**NRSG 4850 - Study Abroad**

Credits: (1-6)
Variable Title

**Description:** The purpose of this course is to provide opportunities for students in health professions to experience a study abroad program that is designed to explore healthcare, culture, and clinical experience. May be repeated 5 times up to 6 credit hours.

**NRSG 6010 - Fundamentals of Occupational Health Nursing**

Credits: (3)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem

**Description:** This course is an introduction to Occupational Health Nursing. NRSG 6010 describes the fundamentals of the profession and duties of nurses working in Occupational Health. The course explores environmental, sociopolitical and legal factors influencing Occupational Health. NRSG 6010 provides a foundation for NRSG 6020 and prepares learners for taking the ABOHN Occupational Health Certification Exam.

**NRSG 6020 - Occupational Health Nursing Role Development**
NRSG 6110 - Translating Research and Evidence into Practice

Credits: (3)
Typically Taught Summer Semester: 2nd Blk Online
Typically Taught Fall Semester: N/A
Typically Taught Spring Semester: N/A

Description: In the school of nursing, each course outcome specifies the knowledge and skills students should attain upon completion of the course. Course outcomes are based on the end-of-program student learning outcomes (EPSLOs), which include: Patient-Centered Care, Evidence-Based Practice, Teamwork and Collaboration, Safety, Quality Improvement, and Informatics. Please refer to the Student Handbook for more information on EPSLOs. This course has been designed to expand on students' education and background regarding establishing an individual evidence-based practice to lead change at the organizational level. Students will critically appraise, compare, and evaluate published quantitative and qualitative research reports to develop, implement and maintain an evidence-based innovation and/or practice within the professional settings of the nurse administrator, nurse practitioner, and nurse educator. May be repeated up to three times.

NRSG 6120 - Research and Statistics

Credits: (3)
Typically Taught Summer Semester: Full Sem Online
Typically Taught Fall Semester: Full Sem Online
Typically Taught Spring Semester: Full Sem Online

Description: This course focuses on the development of the knowledge and skill required to evaluate numerical data in support of an evidence-based environment for nursing administration and nursing education. Skills related to utilization of parametric and non-parametric methods of statistical analysis of quantitative data will be emphasized.

Pre-requisite(s): The student must be officially accepted into Weber State University's MSN program to register for this class.

NRSG 6130 - Theoretical Foundations of Nursing Practice

Credits: (3)
Typically Taught Summer Semester: Full Sem Online
Typically Taught Fall Semester: Full Sem Online
Typically Taught Spring Semester: Full Sem Online

Description: This course introduces the student to processes associated with the development and application of both nursing and non-nursing theory. These processes include the varied yet interdependent activities of theory analysis, description, critical reflection, and utilization of theory. In addition, the student will explore the utilization of both nursing and non-nursing theory in his or her practice of nursing.

Pre-requisite(s): The student must be officially accepted into the MSN program to register for this class.

NRSG 6140 SUS/CEL - Collaborative Approaches in Population Health

Credits: (3)
Typically Taught Summer Semester: 2nd Blk, Online

Description: This course examines the principles of ecological, global, and social determinants of health to design, deliver, and evaluate culturally relevant clinical prevention and health promotion interventions and strategies for individuals, families, communities, and aggregate populations. Ethical approaches to equitable, efficient, effective, and sustainable population-based health policies are also examined.

NRSG 6141 - Advanced Nursing Theory

Credits: (3)

Description: This course is intended to introduce the student to the multiple patterns of knowing within nursing and the processes associated with the development of nursing knowledge and theory. These processes include the varied yet interdependent activities of critical reflection, validation, confirmation, and utilization of nursing knowledge. In addition, the student will explore the utilization of nursing theory and knowledge to his or her own experiences and everyday nursing practice.

Co-Requisite(s): NRSG 6110 and NRSG 6180.
NRSG 6150 - Advanced Pathophysiology, Pharmacology and Assessment for the Nurse Educator

Credits: (3)
Typically Taught Spring Semester: 1st Blk, Online
Description: This course prepares the graduate with advanced knowledge and skills in the three areas of pathophysiology, pharmacology, and health assessment. Students will build upon previous knowledge in these three areas by participating in case-based learning and integrating advanced principles with educational practices.

NRSG 6160 - Evidence-Based Practice

Credits: (3)
Description: This course provides students the knowledge and skill required to develop and implement evidence-based processes within the professional settings of the nurse administrator and the nurse educator.
Pre-requisite(s): NRSG 6110, NRSG 6141, NRSG 6180.
Co-Requisite(s): NRSG 6120.

NRSG 6170 - Teaching Strategies

Credits: (3)
Typically Taught Summer Semester: Full Sem - Online
Typically Taught Fall Semester: Full Sem - Online
Typically Taught Spring Semester: Full Sem - Online
Description: This course prepares the student to apply teaching and learning theories within both the traditional and non-traditional classroom setting and clinical practice settings. Teaching strategies designed to support student learning across varied settings and modalities will be emphasized.
Pre-requisite(s): The student must be officially accepted into the MSN program and have completed the first semester of the program prior to registering for NRSG 6170.

NRSG 6180 - Improving Patient Care and Nursing Practice through Information Systems

Credits: (2)
Typically Taught Summer Semester: Full Sem Online
Typically Taught Fall Semester: Full Sem Online
Typically Taught Spring Semester: Full Sem Online
Description: This course provides students the knowledge and skill required to effectively apply the principles of information technology within the healthcare setting. Course content includes the utilization of information technology to analyze healthcare data for the improvement of nursing decision-making and to support quality in nursing administration and nursing education settings.
Pre-requisite(s): Must be officially accepted into Weber State University's MSN program to register for this course.

NRSG 6190 - Professional Foundations for Graduate Nursing Students

Credits: (1)
Typically Taught Summer Semester: 1st Blk Online
Typically Taught Fall Semester: 1st Blk Online
Description: This foundational course provides incoming graduate students with nursing communication proficiencies required for course work and scholarly projects. In this course, students will develop the knowledge and skills required for graduate scholarly projects, scientific community dissemination, and professional workplace collaboration.

NRSG 6205 - Transitions to Advanced Practice

Credits: (1)
Typically Taught Fall Semester: Full Sem
Description: This course is designed to present a foundation for understanding nursing theory and the relationship of theory and research to evidence based practice and conceptual models of advanced practice nursing.
Pre-requisite(s): Admission to an MSN Family Nurse Practitioner Program.

NRSG 6210 - Advanced Pathophysiology I

Credits: (2)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: This is the first foundational pathophysiology course for nurse practitioners (NP's). Students are taught pathophysiology associated with disease and non-disease processes such as pain. Alterations in physiology result in clinical problems and diseases managed by NP's. Cell dysfunction or deregulation manifests as systemic symptoms and associated disease. Content includes etiology, modifiable risk factors, exposures, physiological mutations, and specific/nonspecific mechanisms to optimize cell-tissue-organ-system function. Students identify, analyze, and evaluate evidence related to disease...
pathology of specified body systems across the lifespan for future patient management.

**NRSG 6211 - Advanced Pathophysiology II**

**Credits:** (2)
**Typically Taught Summer Semester:** Full Sem, Full Sem - Online
**Typically Taught Fall Semester:** Full Sem, Full Sem - Online
**Typically Taught Spring Semester:** Full Sem, Full Sem - Online

**Description:** This is the second foundational pathophysiology course for nurse practitioners (NPs). Students are taught pathophysiology associated with disease and non-disease processes as applied to nurse practitioner-patient care. Alterations in physiology result in clinical problems and diseases managed by nurse practitioners. Cell dysfunction or deregulation manifests as systemic symptoms and associated disease. Content includes etiology, modifiable risk factors, exposures, physiological mutations, and specific/nonspecific mechanisms to optimize cell-tissue-organ-system function. Students identify, analyze, and evaluate evidence related to disease pathology of specified body systems across the lifespan for future patient management.

**NRSG 6215 - Advanced Pharmacology I**

**Credits:** (2)
**Typically Taught Summer Semester:** Full Sem
**Typically Taught Fall Semester:** Full Sem
**Typically Taught Spring Semester:** Full Sem

**Description:** This foundational core course overviews pharmacokinetics and pharmacodynamics for nurse practitioners and provides the foundation for safe efficacious patient-centered medication management in a clinical setting. Course content includes information on pharmacology principles, terminology, drugs that affect the autonomic nervous system (ANS), special populations, clinical guidelines, and evidenced-based pharmaceutical interventions for infectious disease, endocrine function, and pain or comfort. Ethical and legal parameters for prescriptive practice are reviewed related to specific medication choice, dosing, drug interactions and side effects, and patient monitoring, education, and evaluation for effectiveness across the lifespan. Advanced Pharmacology I adheres to accreditation criteria for graduate nursing prescriptive principles and nurse practitioner practice.

**NRSG 6216 - Advanced Pharmacology II**

**Credits:** (2)
**Typically Taught Summer Semester:** Full Sem
**Typically Taught Fall Semester:** Full Sem
**Typically Taught Spring Semester:** Full Sem

**Description:** This foundational core course is a continuation of NRSG 6215 - Advanced Pharmacology I. It continues to overview efficacious patient-centered medication management in a clinical setting. Course content includes information on evidenced-based pharmaceutical interventions for central nervous system pathology, mental and behavioral disorders, cardiovascular and renal system disease, gastrointestinal illness, and respiratory, ENT, dermatology, and immunity syndromes. Prescriptive practice principles medication choice, dosing, drug interactions and side effects, and patient monitoring, education, and evaluation for effectiveness across the lifespan are considered and analyzed. Advanced Pharmacology II adheres to accreditation criteria for graduate nursing prescriptive principles and nurse practitioner practice.

**NRSG 6220 - Advanced Health Assessment/Diagnostic Reasoning**

**Credits:** (3)
**Typically Taught Fall Semester:** Full Sem
**Course Fee:** $395.00

**Course Fee Purpose:** Course fees are used for the purchase of assessment kits, ophthalmoscopes, otoscopes, tuning forks, reflex hammers, task trainers, lab supplies, teaching technology, maintenance and supplies of nurse practitioner exam rooms, and standardized patients.

**Description:** This course allows students to transition into the role of the nurse practitioner through practice of clinically relevant activities such as a comprehensive holistic health history, use of motivational interviewing, a systematic physical assessment, and critical reasoning to determine appropriate differential diagnoses. Classroom student learning activities, nursing practice lab, and select standardized patient encounters are used to present and practice physical assessment and diagnostic reasoning for nurse practitioner (NP) patient-centered care. Students focus weekly on a body system and incorporate assessment and diagnostic reasoning skills for patients across the lifespan. NP students use a systematic critical thinking approach to diagnostic reasoning and assessment competency.

**NRSG 6221 - Diagnostic Reasoning**
NRSG 6225 - FNP Clinical Skills

Credits: (1)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Course Fee: $395.00
Course Fee Purpose: Course fees are used for the purchase of task trainers, lab supplies, teaching technology, maintenance and supplies of nurse practitioner exam rooms.
Description: This clinical skill course provides opportunities for the nurse practitioner (NP) students to learn and practice a variety of essential ambulatory care skills for patients across the lifespan. There is a focus on women's health and pediatric health care conditions. Students attend clinical skill lab weekly for instruction from interprofessional peers and nurse practitioner faculty. NP students acquire clinical skill performance, diagnostic and objective data for conditions requiring procedures, management strategies, patient education, and ICD-10 & CPT billing and coding instruction for common clinical issues.

NRSG 6230 - FNP Patient Care Lab

Credits: (1)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Course Fee: $395.00
Course Fee Purpose: Course fees are used for the purchase of task trainers, lab supplies, teaching technology, maintenance and supplies of nurse practitioner exam rooms.
Description: This laboratory skill course provides opportunities for the nurse practitioner (NP) students to learn and practice a variety of essential ambulatory care skills for patients across the lifespan. There is a focus on women's health and pediatric health care conditions. Students attend skill lab weekly for instruction from interprofessional peers and nurse practitioner faculty. NP students acquire knowledge of skill performance, diagnostic and objective information for conditions requiring procedures, management strategies, patient education, and ICD-10 & CPT billing and coding instruction for common health care issues.

NRSG 6235 - FNP Patient Care I

Credits: (3)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: The course is designed to provide advanced theoretical knowledge and emphasis on adult healthcare for the nurse practitioner student. The course prepares students to manage prevalent healthcare concerns encountered across the lifespan of male and female adults. Nurse practitioner students include significant others, family, and available community resources for patient health promotion and illness management, assessment, diagnosis, intervention, healthcare plans, follow-up, and evaluation of adults in a variety of settings.

NRSG 6240 - FNP Patient Care II: Adult

Credits: (2)
Typically Taught Spring Semester: Full Sem
Description: The course provides advanced theoretical knowledge and emphasizes nurse practitioner primary care of older adults. Students learn the management of common older adult healthcare problems in the community and a variety of healthcare settings. The course focuses on the various health issues for older adults, including health promotion, functional ability, chronic disease management, polypharmacy, palliative intervention, and end-of-life care.

NRSG 6241 - Advanced Practice Primary Care Clinical II

Credits: (1)
Typically Taught Summer Semester: Full Sem
Description: This is the clinical companion course to MSN 6240 Advanced Practice Nursing: Older Adult Health. This clinical course is designed for the nurse practitioner student to deliver high quality healthcare with a focus on adults or older adults. The course prepares students to apply acquired skills, magnify diagnostic reasoning through psychomotor, affective and cognitive domains. This course requires
students to diagnose and determine best practice to treat illness and prevent disease as a primary care FNP provider.  

Co-Requisite(s): NRSG 6240 - FNP Patient Care II: Adult.

NRSG 6245 - FNP Patient Care III

Credits: (3)  
Typically Taught Summer Semester: Full Sem  
Typically Taught Fall Semester: Full Sem  
Typically Taught Spring Semester: Full Sem  
Description: The course is designed to provide advanced theoretical knowledge and emphasis on pediatric (newborn to adolescent) healthcare for the nurse practitioner student. The course prepares students to manage prevalent healthcare concerns encountered across the pediatric lifespan. Nurse practitioner students include significant others, family, and available community resources for patient health promotion and illness management, assessment, diagnosis, intervention, healthcare plans, follow-up, and evaluation of adults in a variety of settings.

NRSG 6250 - FNP Patient Care IV

Credits: (2)  
Typically Taught Summer Semester: Full Sem  
Typically Taught Fall Semester: Full Sem  
Typically Taught Spring Semester: Full Sem  
Description: The course is designed to provide advanced theoretical knowledge and emphasis on unique health care needs of women. The course prepares students to manage prevalent health care concerns of women, including; maturation, sexuality, family planning, contraception, perinatal care (preconception through pregnancy), and menopause. Concepts will focus on strategies for health promotion and disease prevention through the lifespan of a woman, as well as management of selected issues related to fertility, pregnancy, and aging.

NRSG 6251 - Advanced Practice Primary Care Clinical IV

Credits: (1)  
Typically Taught Fall Semester: Full Sem  
Description: This is the clinical companion course to MSNP 6250 Advanced Practice Nursing: Women's Health. This clinical course is designed for the nurse practitioner student to deliver high quality healthcare with a focus on women's health. The course prepares students to apply acquired skills, magnify diagnostic reasoning through psychomotor, affective and cognitive domains. This course requires students to diagnose and determine best practice to treat illness and prevent disease as a primary care FNP provider.  

Co-Requisite(s): NRSG 6250 - FNP Patient Care IV.

NRSG 6255 - Leadership and Accountability in Advanced Nursing

Credits: (2)  
Typically Taught Summer Semester: 1st Blk Online  
Description: The purpose of this course is to provide graduate nursing students with an overview of personal, organizational and systems leadership. At the conclusion of this course, students will be able to apply leadership skills and ethical decision making as it relates to healthcare policy, legal regulation, quality improvement and patient safety.  

Pre-requisite(s): Must be officially accepted into the MSN program to register for this class.

NRSG 6256 - Transition to Advanced Practice II

Credits: (4)  
Typically Taught Spring Semester: Full Sem  
Description: This course is designed to complement NRSG 6260 Advanced Practice Nursing Clinical Practicum in preparing the family practice nursing student for the certification examination and the advanced practice role. The course allow students to investigate a variety of topics that impact advanced practice nursing, issues for special populations, leadership competencies, impact of policies on healthcare, and principles of independent or NP managed practices.  

Pre-requisite(s): NRSG 6205 - Transitions to Advanced Practice.  
Co-Requisite(s): NRSG 6260 - Nurse Practitioner Immersion.

NRSG 6260 - Nurse Practitioner Immersion

Credits: (4)  
Typically Taught Spring Semester: Full Sem  
Description: This is the final clinical course of the FNP Program. This course is designed for the nurse practitioner student to evaluate individual and system effectiveness in delivery of quality healthcare to patients across the lifespan. The course evaluates the student's ability to apply acquired skills, magnify diagnostic reasoning through psychomotor, affective and cognitive domains. This course also evaluates the student's ability to diagnose and determine best practice to treat illness and prevent disease.  

Pre-requisite(s): NRSG 6241, NRSG 6251.
NRSG 6270 - Mental Health for Primary Care

Credits: (3)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem, Full Sem - Online
Typically Taught Spring Semester: Full Sem

Description: Family nurse practitioners (FNPs) identify physiological and mental health concerns to promote optimal health. Evidenced-based mental/behavioral health assessment, diagnosis, and interventions across the lifespan ensure intuitive and analytical clinical diagnostic reasoning for intentional healthcare recommendations. Advanced practice concepts, theories, current research, mental/behavioral healthcare diagnosis principles, and pharmacotherapeutic decision-making for FNPs are explored in this course.

NRSG 6300 - Quality Improvement, Patient Safety and Risk Issues in Patient Care Delivery

Credits: (3)
Typically Taught Summer Semester: Full Sem Online
Typically Taught Fall Semester: Full Sem Online
Typically Taught Spring Semester: Full Sem Online

Description: This course focuses upon the nurse administrator's responsibility to develop and maintain a culture of safety, reduce and prevent harm to patients, and reduce institutional risk and liability issues through the utilization of healthcare outcomes measurement and application of sound principles and practices associated with quality improvement.

Pre-requisite(s): The student must be officially accepted into Weber State University's MSN program and have completed the first semester of study to register for this course.

NRSG 6324 - Financial Issues in Nursing Administration

Credits: (2)
Typically Taught Fall Semester: 1st Blk Online

Description: This course provides a conceptual foundation for the nurse administrator's accountability to provide fiscal resource planning, forecasting and resource allocation, strategic planning that addresses future trends, oversight of all nursing related operating aspects, and the achievement of the financial goals of the healthcare organization.

Pre-requisite(s): Must be officially accepted into Weber State University's MSN program to register for this course.

NRSG 6340 - Compliance with Legal and Regulatory Systems in Patient Care Delivery

Credits: (3)

Description: This course focuses upon the nurse administrator's responsibility to develop and maintain a healthcare environment that fulfills the compliance standards and criteria established by both state and national legal and regulatory systems.

Pre-requisite(s): NRSG 6110, NRSG 6120, NRSG 6141, NRSG 6160, NRSG 6180,

Co-Requisite(s): NRSG 6324, NRSG 6360.

NRSG 6360 - Scope and Practice of Nursing Administration

Credits: (2)
Typically Taught Spring Semester: 1st Blk Online

Description: This course addresses the nurse administrator's responsibility for the overall management of patient care delivery services and the representation of nursing services at the highest level of the organization across a wide variety of settings.

NRSG 6380 - Retaining and Developing a Competent Workforce in Nursing

Credits: (2)
Typically Taught Spring Semester: 1st Blk Online

Description: This course addresses the overall operational management and administration functions related to staffing, staff development, and managerial issues including coaching, discipline and employee support. Processes related to labor relations within healthcare is addressed.

Pre-requisite(s): Must be officially accepted into Weber State University's MSN program to register for this course.

NRSG 6400 INT - Nurse Executive Residency

Credits: (2)

Typically Taught Summer Semester: Full Sem - Online, 1st Blk Online, 2nd Blk Online
Typically Taught Fall Semester: Full Sem, Full Sem - Online, 1st Blk Online, 2nd Blk Online
Typically Taught Spring Semester: Full Sem - Online, 1st Blk Online, 2nd Blk Online

Description: This practicum is designed to prepare the student for a career in nursing administration and
leadership. During the MSN Executive Residency, students will participate in focused participative learning activities with advanced prepared nurse leaders at the executive, director, or manager level. The student, faculty, and assigned nurse administrator residency preceptor will collaboratively design the residency experience.

Pre-requisite(s): The student must be officially accepted into the MSN program and have completed required core courses prior to registering for NRSG 6400.

NRSG 6500 - Theoretical Foundations in Nursing Education

Credits: (3)
Description: This course focuses upon the knowledge and skills required to utilize established teaching and learning theories developed to enhance the nursing educational process. The practical utility of these teaching and learning theories in diverse nursing education learning environments will be emphasized.

Pre-requisite(s): NRSG 6110, NRSG 6141, NRSG 6180.

NRSG 6520 - Curriculum Development for Nursing Educators

Credits: (3)
Typically Taught Summer Semester: Full Sem Online
Typically Taught Fall Semester: Full Sem Online
Typically Taught Spring Semester: Full Sem Online
Description: This course focuses on the concepts and organizing frameworks for curriculum design, course development and desired outcomes, standards of nursing education and practice, continuing education, and health care educational programs. Issues related to program accreditation and related social and legal issues will be examined.

Pre-requisite(s): The student must be officially accepted into Weber State University's MSN program to register for this course.

NRSG 6540 - Measurement of Competence and Outcomes in Nursing Education

Credits: (3)
Typically Taught Summer Semester: Full Sem Online
Typically Taught Fall Semester: Full Sem Online
Typically Taught Spring Semester: Full Sem Online
Description: This course focuses upon established theories of measurement and evaluation coupled with strategies for implementing evaluation of student learning, program outcomes, and faculty performance targets. Accurate interpretation of evaluation data to support an evidence-based response to student and program evaluation results will be emphasized.

Pre-requisite(s): The student must be officially accepted into Weber State University's MSN program to register for this course.

NRSG 6560 - Socialization in the Role of Nursing Educator

Credits: (2)
Typically Taught Spring Semester: 1st Blk Online
Description: This course prepares the student to function proficiently in the nurse educator role within a variety of learning environments and social settings. The development of professional and personal adaptive strategies will be emphasized.

Pre-requisite(s): Must be officially accepted into Weber State University's MSN program to register for this course.

NRSG 6580 - Clinical Nursing Instruction in Higher Education and Community Settings

Credits: (3)
Description: This course prepares the student to apply teaching and learning theories within the practice laboratory and clinical settings. The clinical application component of this course will provide the student the opportunity to participate, with supervision, in a practice laboratory and/or clinical instruction environment.

Pre-requisite(s): NRSG 6110, NRSG 6120, NRSG 6141, NRSG 6160, NRSG 6180, NRSG 6520, NRSG 6540, NRSG 6560.
Co-Requisite(s): NRSG 6600, NRSG 6700.

NRSG 6600 - Nursing Instruction in Higher Education and Community Settings

Credits: (3)
Description: This course prepares the student to apply teaching and learning theories within both the traditional and non-traditional classroom setting. Teaching strategies designed to support student learning across varied settings and modalities will be emphasized.

Pre-requisite(s): NRSG 6110, NRSG 6120, NRSG 6141, NRSG 6160, NRSG 6180, NRSG 6500, NRSG 6520, NRSG 6540, NRSG 6560.
Co-Requisite(s): NRSG 6580, NRSG 6700.
NRSG 6700 INT - Nurse Educator Residency

Credits: (2)

Typically Taught Summer Semester: Full Sem - Online, 1st Blk Online, 2nd Blk Online
Typically Taught Fall Semester: Full Sem, Full Sem - Online, 1st Blk Online, 2nd Blk Online
Typically Taught Spring Semester: Full Sem, Full Sem - Online, 1st Blk Online, 2nd Blk Online

Description: This practicum is designed to prepare the student for a career in nursing education and leadership. During the MSN Educator Residency, students will participate in focused participative learning activities with advanced prepared nurse educators at an academic and/or healthcare service educational setting. The student, faculty, and assigned nurse educator residency preceptor will collaboratively design the residency experience.

Pre-requisite(s): The student must be officially accepted into the MSN program and have completed required core courses prior to registering for NRSG 6700.

NRSG 6710 - Advanced Health Assessment for the Nurse Educator

Credits: (2)

Typically Taught Summer Semester: Full Sem Online
Typically Taught Fall Semester: Full Sem Online
Typically Taught Spring Semester: Full Sem Online

Description: This course lays the groundwork for students to perform comprehensive and holistic health histories, review of systems, and physical examinations for patients. The overall purpose will be focused upon developing strategies and skills to assess the health care needs of people across the lifespan. Students are challenged to identify normal assessment findings and critically analyze variations from normal and apply that knowledge for health education.

Pre-requisite(s): The student must be officially accepted into the MSN program and have completed the first semester of study prior to registering for NRSG 6710.

NRSG 6720 - Advanced Pharmacology for the Nurse Educator

Credits: (2)

Typically Taught Summer Semester: Full Sem Online
Typically Taught Fall Semester: Full Sem Online
Typically Taught Spring Semester: Full Sem Online

Description: This course overviews pharmacokinetics and pharmacodynamics for optimum individual client management. Advanced practice nursing students are prepared to safely monitor medication regimens for patients across the lifespan based on clinically relevant ethical and legal parameters and consideration of evidenced based practice guidelines and protocols for effective pharmacology management and education.

Pre-requisite(s): The student must be officially accepted into the MSN program and have completed the first semester of study prior to registering for NRSG 6720.

NRSG 6730 - Advanced Pathophysiology for the Nurse Educator

Credits: (2)

Typically Taught Summer Semester: Full Sem Online
Typically Taught Fall Semester: Full Sem Online
Typically Taught Spring Semester: Full Sem Online

Description: This course is a core graduate level course. This course is designed to teach the master level nursing student frequently seen alterations in physiology. The course will focus on modifiable risk factors, exposures, physiological mutations, and presenting signs and symptoms. Students will utilize evidence-based practice and research to identify, analyze and evaluate disease pathology across the lifespan.

Pre-requisite/Co-requisite: The student must be officially accepted into the MSN program and have completed the first semester of study prior to registering for MSN 6730.

NRSG 6801 - Integrating Scholarship into Practice

Credits: (2)

Description: The NRSG 6801 course is designed as a foundational course to prepare graduates to be information literate and to practice from an evidence-based approach in their direct and indirect advanced nursing roles. In addition, students will begin the compilation of a scholarly paper through identification of a problem in practice and that reflects reflect educational theory, interprofessional collaboration, research, and current standards of practice. In this course students will be asked to critically appraise research and evidence summaries related to area of practice and apply it to their practice problem. Completion of 6801 and the MSN Scholarly Project is a graduation requirement for the Master of Science in nursing degree.

Pre-requisite(s): The student must be officially accepted into Weber State University's MSN program to register for this course.

NRSG 6802 - Integrating Scholarship into Practice
NRSG 6802 INT - Independent Study Graduate Programs

Credits: (1-3)
Typically Taught Summer Semester: Full Sem, Full Sem - Online
Typically Taught Fall Semester: Full Sem, Full Sem - Online
Typically Taught Spring Semester: Full Sem, Full Sem - Online

Description: Students must have prior approval of the independent study option from the Program Director or Department Chair. This is an independent study course designed for graduate students to apply specific knowledge and skills related to high-impact educational experiences (HIEE) under the supervision of a faculty member. HIEE includes experiences for graduate students and may include leadership and/or community immersion experiences such as graduate project extensions, DNP practicum hours, study abroad, or similar activities. For practicum and study abroad, this course offers 60-180 HIEE hours with one credit= of 60 clock hours.
May be repeated for a maximum of nine credit hours.

NRSG 6920 - Short Courses, Workshops, Institutes, and Special Programs

Credits: (1-6)
Workshop
Description: Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript.
May be repeated for a total maximum of 6 credit hours.

NRSG 7002 - Transition to Practice

Credits: (1)
Typically Taught Spring Semester: Full Sem, Full Sem - Online

Description: The course provides students with a foundation for understanding the process and phases of transition to the role of the FNP, the requirements for credentialing as a Family Nurse Practitioner (FNP), participation in professional organizations, and regulatory compliance. An understanding of issues related to health policy, healthcare delivery, access and quality of care, ethical and legal role expansion implications, negotiating contracts, billing and reimbursement, and general leadership competencies are presented.
NRSG 7003 - Telehealth for Advanced Practice Nurses

Credits: (0.5)
Typically Taught Fall Semester: 1st Block Online
Description: Telehealth for Advanced Practice Nurses explores the ongoing development of telehealth technology since the COVID-19 pandemic and the need to provide video and/or telephone visits with patients. In light of sweeping policy changes, it is essential that nurse practitioners are cognizant of this powerful tool to promote continuity of care and offer convenient, routine care across a broad range of patient scenarios.

NRSG 7004 - Complementary Medicine & Alternative Therapy for Advanced Practice Nursing

Credits: (1)
Typically Taught Spring Semester: Full Sem - Online
Description: Complementary Medicine and Alternative Therapies for Advanced Nursing Practice explores analysis and appropriateness of practices related to alternative medicine, which are frequently requested by consumers seeking health care from nurse practitioners. Clients in distress, pain, or diagnosed with illnesses may be seeking new and novel approaches for the alleviation of symptoms. Based on strong patient relationships, nurse practitioners are in an ideal position to reduce harm from and maximize the benefits of complementary medicine and alternative therapies. This course focuses on a holistic and patient-centered approach to health care and treatment based on the whole person.

NRSG 7010 - Scholarly and Ethical Foundations for Advanced Practice Nursing

Credits: (3)
Typically Taught Spring Semester: Full Sem, Full Sem - Online
Description: This course examines the scientific, philosophical, and ethical underpinnings of advanced nursing practice, including the relationships among theory, research, and practice. Students critically appraise types of evidence in nursing and/or other healthcare disciplines to begin the initial literature review for the DNP Project.
Pre-requisite(s): Student must be accepted to the DNP program.

NRSG 7020 - Biostatistics/Epidemiology

Credits: (3)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: This course focuses on the basic tools needed for the collection, analysis, and interpretation of research, in particular findings and recommendations for individuals and population health and health policy. Epidemiological principles, models, and approaches/strategies related to health and illness in at-risk populations are examined. General principle of research design and hypothesis testing are reviewed and research and non-research studies examined for human health and disease treatment.
Pre-requisite(s): Student must be admitted to the DNP program.

NRSG 7030 - Information Technology to Support Evidence-Based Practice

Credits: (2)
Typically Taught Summer Semester: Full Sem - Online
Typically Taught Fall Semester: Full Sem - Online
Typically Taught Spring Semester: Full Sem - Online
Description: This course examines principles of nursing informatics and how they are integrated in health care systems. Advanced informatics skills of database design, knowledge management, clinical decision support, and project management to guide the DNP student in recommending, evaluating, and implementing patient care technologies. This course offers 15 course practicum hours 1:4 credit to clock hours. (0.25 credit = 15 clock hours).
Pre-requisite(s): Student must be admitted to the Post Master's DNP or BSN to DNP-FNP program.

NRSG 7040 - Systems Approach and QI

Credits: (3)
Typically Taught Spring Semester: Full Sem
Description: This course focuses on the DNP student critically appraising the evidence of quality improvement (QI) measures, strategies, and outcomes in health care systems. The DNP student designs and evaluates care delivery approaches within the current organizational, political, cultural, and economic context to ensure accountability for quality of health care and patient safety in diverse organizations.
Pre-requisite(s): Student must be admitted to the DNP program.
NRSG 7050 - Advanced Population Health

Credits: (3)
Typically Taught Summer Semester: Full Sem
Description: This course synthesizes concepts related to clinical prevention and at-risk populations. Using epidemiological and informatics principles, the DNP student assesses select population needs, with consideration of psychosocial, cultural, and ecological factors and their impact on health disparities across healthcare systems. Students evaluate care delivery models for population health services addressing health promotion/disease prevention that are responsive to diverse cultural needs. Upon completion of this course, the student completes 30 DNP practice hours.
Pre-requisite(s): Student must be admitted to the DNP program.

NRSG 7060 - DNP Organizational Leadership

Credits: (3)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem, Full Sem - Online
Typically Taught Spring Semester: Full Sem
Description: This course examines theories and strategies to enhance the DNP student's leadership skills. Students are prepared to effectively lead change, facilitate interdisciplinary collaboration, and transform practice to impact the quality of health care and outcomes within complex healthcare systems.
Pre-requisite(s): Student must be admitted to the Post Master's DNP or BSN to DNP-FNP program.

NRSG 7070 - Healthcare Policy & Professionalism

Credits: (2)
Typically Taught Summer Semester: Full Sem - Online
Typically Taught Fall Semester: Full Sem - Online
Typically Taught Spring Semester: Full Sem - Online
Description: In this course, learners will incorporate principles of professionalism to engage with decision-makers in respectful and meaningful ways. Learners will then examine the policy-making process to identify opportunities that advanced practice nurses can employ to influence the development of strong healthcare policies. Finally, students will use their knowledge to analyze healthcare policies and identify strategies that could be used to advocate for individuals and the profession of nursing to ensure healthcare systems that are safe, equitable, and ethical. Upon completion of this course, the student achieves course practicum hours.
Pre-requisite(s): Student must be admitted to the DNP program.

NRSG 7801 - DNP Project I

Credits: (3)
Typically Taught Summer Semester: Full Sem - Online
Description: The DNP project courses produce a tangible and deliverable academic product created from a practice immersion experience, which is reviewed and evaluated by an academic committee. The final product shows evidence of the student's competence in critical thinking by translating evidence into practice and evaluating the evidence in the practice environment to improve healthcare outcomes. This course is the first of three courses (NRSG 7801 to NRSG 7803) and reflects a synthesis of the student's growth in knowledge and expertise throughout the program. NRSG 7801 focuses on project planning with the proposal presentation and IRB approval. The combined practicum hours within the project courses total 270-project practicum hours.

NRSG 7802 - DNP Project II

Credits: (3)
Typically Taught Fall Semester: Full Sem - Online
Description: The DNP project courses produce a tangible and deliverable academic product created from a practice immersion experience, which is reviewed and evaluated by an academic committee. The final product shows evidence of the student's competence in critical thinking by translating evidence into practice and evaluating the evidence in the practice environment to improve healthcare outcomes. This course is the second of three courses (NRSG 7801 to NRSG 7803) and reflects a synthesis of the student's growth in knowledge and expertise throughout the program. NRSG 7802 focuses on project implementation and evaluation. The combined practicum hours within the project courses total 270-project practicum hours.

NRSG 7803 - DNP Project III

Credits: (3)
Typically Taught Spring Semester: Full Sem, Full Sem - Online
Description: The DNP project courses produce a tangible and deliverable academic product created from a practice immersion experience, which is reviewed and evaluated by an academic committee. The final product shows evidence
of the student's competence in critical thinking by translating evidence into practice and evaluating the evidence in the practice environment to improve healthcare outcomes. This course is the third of three courses (NRSG 7801 to NRSG 7803) and reflects a synthesis of the student's growth in knowledge and expertise throughout the program. NRSG 7803 focuses on project completion and dissemination with the final poster presentation.

NRSG 7804 - DNP Project IV

Credits: (1)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: The DNP project courses produce a tangible and deliverable academic product created from a practice immersion experience, which is reviewed and evaluated by an academic committee. The final product shows evidence of the student's competence in critical thinking by translating evidence into practice and evaluating the evidence in the practice environment aimed toward improving healthcare outcomes. This course is the fourth of six courses (NRSG 7801 to NRSG 7806) and reflects a synthesis of the student's growth in knowledge and expertise throughout the program. NRSG 7804 focuses on the implementation of the project. This course may contain 30 to 120 DNP practicum hours.

NRSG 7805 - DNP Project V

Credits: (3)
Typically Taught Summer Semester: Full Sem - Online
Typically Taught Fall Semester: Full Sem - Online
Typically Taught Spring Semester: Full Sem - Online
Description: The DNP project courses produce a tangible and deliverable academic product created from a practice immersion experience, which is reviewed and evaluated by an academic committee. The final product shows evidence of the student's competence in critical thinking by translating evidence into practice and evaluating the evidence in the practice environment aimed toward improving healthcare outcomes. This course is the fifth of five courses (NRSG 7801 to NRSG 7805) and reflects a synthesis of the student's growth in knowledge and expertise throughout the program. NRSG 7805 focuses on project results, discussion, conclusions, recommendations, project evaluation, and dissemination. Project practicum hours follow a 1:4 credit-to-clock hours ratio, which is variable per project course, at 0.5-1 credit-to-clock hours. For example, a 1 credit hour project course offers 0.5 credit-to-clock hours (1:4) for 30 practicum hours. A 2-credit hour project course offers 1 credit-to-clock hour (1:4) for 60 practicum hours. The combined practicum hours within the project courses total 240-project practicum hours. Pre-requisite(s): NRSG 7801 and NRSG 7802 and NRSG 7803 and NRSG 7804.

NRSG 7806 - DNP Project VI

Credits: (1-2)
Typically Taught Summer Semester: Full Sem - Online
Typically Taught Fall Semester: Full Sem - Online
Typically Taught Spring Semester: Full Sem - Online
Description: The DNP project courses produce a tangible and deliverable academic product created from a practice immersion experience, which is reviewed and evaluated by an academic committee. The final product shows evidence of the student's competence in critical thinking by translating evidence into practice and evaluating the evidence in the practice environment aimed toward improving healthcare outcomes. This course is an extension course for those students who do not complete their projects or who do not complete their required DNP Practicum hours in the allotted program of study. This course reflects a synthesis of the student's growth in knowledge and expertise throughout the program. NRSG 7806 focuses on project completion and practicum hours completion. Project practicum hours follow a 1:4 credit-to-clock hours ratio, which is variable per project course, at 0.5-1 credit-to-clock hours. For example, a 1 credit hour project course offers 0.5 credit-to-clock hours (1:4) for 30 practicum hours. A 2-credit hour project course offers 1 credit-to-clock hour (1:4) for 60 practicum hours. The combined practicum hours within the project courses total 240-project practicum hours. Pre-requisite(s): NRSG 7801 and NRSG 7802 and NRSG 7803 and NRSG 7804 and NRSG 7805 must be completed with a B- or higher and requires program director approval.

NRSG 7900 INT - DNP Practicum

Credits: (1-2)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: This practicum is for DNP nursing students to build on concepts and skills derived from DNP courses and focuses on developing advanced skills in integration and synthesis of practice and knowledge. Pre-requisite(s): Students must be admitted to the DNP program. May be repeated up for a maximum of 8 credit hours.
NRSG 7902 - FNP Clinical I

Credits: (4)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: This course is designed to prepare the nurse practitioner student to deliver high quality primary care to patients of all ages, under the direction of a clinical preceptor. Students will enter the clinical setting and apply evidence-based practice and clinical reasoning principles to both diagnosing and treatment of patients across the lifespan. This course will also improve the student's ability to collect patient histories, perform physical examination, order and analyze diagnostic tests, determine differential diagnoses, plan intervention, prescribe medication, and document patient encounters. Emphasis is placed on the student learning to apply health promotion principles in order to prevent disease and manage individualized patient healthcare outcomes.

NRSG 7903 - FNP Clinical II

Credits: (3)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: This course is designed to prepare the nurse practitioner student to deliver high-quality primary care to patients of all ages, under the direction of a clinical preceptor. Students will enter the clinical setting and apply evidence-based practice and clinical reasoning principles to both diagnosing and treatment of patients across the lifespan. This course will also improve the student's ability to collect patient histories, perform physical examinations, order and analyze diagnostic tests, determine differential diagnoses, plan intervention, prescribe medication, and document patient encounters. Emphasis is placed on the student learning to apply health promotion principles in order to prevent disease and manage individualized patient healthcare outcomes.

NRSG 7904 INT - FNP Clinical Immersion

Credits: (4)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: This course is designed to prepare the nurse practitioner student to deliver high-quality primary care to patients of all ages, under the direction of a clinical preceptor. Students will enter the clinical setting and apply evidence-based practice and clinical reasoning principles to both diagnosing and treatment of patients across the lifespan. This course will also improve the student's ability to collect patient histories, perform physical examinations, order and analyze diagnostic tests, determine differential diagnoses, plan intervention, prescribe medication, and document patient encounters. Emphasis is placed on the student learning to apply health promotion principles in order to prevent disease and manage individualized patient healthcare outcomes.

NRSG 7905 - FNP Clinical IV

Credits: (3)
Typically Taught Spring Semester: Full Sem
Description: This course is designed to prepare the nurse practitioner student to deliver high-quality primary care to patients of all ages, under the direction of a clinical preceptor. Students will enter the clinical setting and apply evidence-based practice and clinical reasoning principles to both diagnosing and treatment of patients across the lifespan. This course will also improve the student's ability to collect patient histories, perform physical examinations, order and analyze diagnostic tests, determine differential diagnoses, plan intervention, prescribe medication, and document patient encounters. Emphasis is placed on the student learning to apply health promotion principles in order to prevent disease and manage individualized patient healthcare outcomes.

NUCM 4103 - Radiopharmaceuticals and Dosages

Credits: (3)
Typically Taught Fall Semester: Full Sem
Description: Radiopharmacology, characterization of radiopharmaceuticals used in performing examinations and calculation of dosages.

NUCM 4203 - Scanning and Imaging Procedures I

Credits: (3)
Typically Taught Fall Semester: Full Sem
Description: Organ concentration, excretion and absorption, measurements and imaging.

NUCM 4213 - Scanning and Imaging Procedures II

Credits: (3)
Typically Taught Summer Semester: Full Sem
Description: Organ concentration, excretion and absorption, measurements and imaging.

**NUCM 4223 - Nuclear Cardiology**

Credits: (3)
Typically Taught Summer Semester: Full Sem
Description: Pathology, indications for examination and procedures in nuclear cardiology.

**NUCM 4303 - Radionuclide Physics & Instrumentation**

Credits: (3)
Typically Taught Spring Semester: Full Sem
Description: Production and properties of radionuclides, decay schemes, radiation measurements and special characteristics of radiopharmaceuticals.

**NUCM 4333 SI - Quality Assurance**

Credits: (3)
Typically Taught Summer Semester: Full Sem
Description: Nuclear Medicine departmental policies and procedures.

**NUCM 4861 INT - Clinical Education**

Credits: (3)
Typically Taught Fall Semester: Full Sem
Description: A minimum of 24 hours per week in an active Nuclear Medicine department.

**NUCM 4862 INT - Clinical Education**

Credits: (3)
Typically Taught Spring Semester: Full Sem
Description: A minimum of 24 hours per week in an active Nuclear Medicine department.

**NUCM 4863 INT - Clinical Education**

Credits: (3)
Typically Taught Summer Semester: Full Sem
Description: A minimum of 24 hours per week in an active Nuclear Medicine department.

**NUCM 4912 - Comprehensive Review**

Credits: (2)
Typically Taught Summer Semester: Full Sem
Description: Review of learned material.

**NUCM 4991 - Seminar**

Credits: (1)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: New technology, procedures and equipment.

**NUTR 1020 LS SUS - Science and Application of Human Nutrition**

Credits: (3)
Typically Taught Summer Semester: Full Sem, 1st Blk, 2nd Blk Hybrid, Online
Typically Taught Fall Semester: Full Sem, 1st Blk, 2nd Blk Hybrid, Online
Typically Taught Spring Semester: Full Sem, 1st Blk, 2nd Blk Hybrid, Online
Course Fee: $15.00
Course Fee Purpose: This course has a fee attached. Course fees are established in order to benefit the students in this course and may, among other things, be used to cover the costs of equipment replacement and maintenance, consumable materials, licensure examinations, or to meet specific regulatory requirements. The course fee expenditure for this specific course covers the health assessment and body composition measurements in the Nutrition Biochemistry lab.

Description: Human nutrition is the platform to study the nature and integration of science across disciplines and in society through applied problem solving and data analysis. Nutritional balance and good health are explored in context of the levels of organization, metabolism and homeostasis, genetics and evolution, and ecological interactions.

Note: This course is taught Web enhanced.

**NUTR 1120 - Nutrition for the Athlete**

Credits: (2)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Course Fee: $8.00
Course Fee Purpose: This course has a fee attached. Course fees are established in order to benefit the students in this course and may, among other things, be used to cover the costs of equipment replacement and maintenance, consumable materials, licensure examinations, or to meet specific regulatory requirements. The course fee
expenditure for this specific course covers the purchase of expendable food and food service items and acquisition and replacement of nonexpendable kitchen items.

Description: The course will address nutrition, eating behavior, and lifestyle issues of the athlete in the typical collegiate athletic environment. Topics in nutrition for the performance athlete, meal planning for the collegiate athlete, menu evaluation, personal diet analysis, and common fad diets aimed at the performance athlete are included.

**NUTR 1240 SUS - Nutrition and Sustainable Cooking**

Credits: (3)
Typically Taught Summer Semester: 1st Blk, 2nd Blk
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Course Fee: $45.00
Course Fee Purpose: This course has a fee attached. Course fees are established in order to benefit the students in this course and may, among other things, be used to cover the costs of equipment replacement and maintenance, consumable materials, licensure examinations, or to meet specific regulatory requirements. The course fee expenditure for this specific course covers the purchase of expendable food and food service items and acquisition and replacement of nonexpendable kitchen items.

Description: Sustainable ways to acquire, prepare and consume food to support a healthier individual, population, and environment are explored. Food science principles will be emphasized in the laboratory experience.

**NUTR 2020 - Nutrition in the Life Cycle**

Credits: (3)
Typically Taught Fall Semester: Full Sem, Online
Typically Taught Spring Semester: Full Sem
Description: This course examines the nutritional needs of humans along with food and nutrition education and programs through the life cycle stages from pre-conception through older adulthood. Students assess normal nutrition and various conditions and interventions across the lifespan through applied case studies.

Pre-requisite(s): NUTR 1020.

**NUTR 2220 - Human Lactation & Infant Nutrition**

Credits: (2)
Typically Taught Fall Semester: Full Sem, Full Sem -

**NUTR 2320 - Food Values, Diet Design and Health**

Credits: (3)
Typically Taught Summer Semester: 1st Blk or 2nd Blk
Typically Taught Fall Semester: Full Sem, Online, 1st Blk, 2nd Blk Hybrid, or Online
Typically Taught Spring Semester: Full Sem, Online, 1st Blk, 2nd Blk Hybrid, or Online
Course Fee: $10.00
Course Fee Purpose: This course has a fee attached. Course fees are established in order to benefit the students in this course and may, among other things, be used to cover the costs of equipment replacement and maintenance, consumable materials, licensure examinations, or to meet specific regulatory requirements. The course fee expenditure for this specific course covers the use of the InBody 770 scanner to determine basal metabolic rate.

Description: The relationships between dietary components and the development of chronic diseases provides the foundation for designing diets that support life-long "good health". Topics in nutrigenomics, food allergy and food technology are introduced.

Pre-requisite(s): NUTR 1020 or HLTH 1020.

This course is taught Web enhanced.

**NUTR 2420 - Childhood and Adolescent Nutrition**

Credits: (2)
Typically Taught Summer Semester: 1st Blk or 2nd Blk
Typically Taught Fall Semester: 1st Blk, 2nd Blk Hybrid, or Online
Typically Taught Spring Semester: 1st Blk, 2nd Blk Hybrid, or Online

Description: The effects of nutrition and diet on child growth, health and behavior are explored from toddler through adolescence. The processes of growth and puberty provide the foundations for understanding nutritional
Common nutritionally-related problems such as obesity, anemia, and eating disorders are also addressed.

Pre-requisite(s): NUTR 1020 or HLTH 1020.

**NUTR 3020 - Sports Nutrition**

Credits: (3)
Typically Taught Fall Semester: Full Sem, 1st Blk, 2nd Blk, Hybrid, Online
Typically Taught Spring Semester: Full Sem, 1st Blk, 2nd Blk, Hybrid, Online
Description: The nutritional support necessary to achieve optimum athletic performance will be discussed in the context of diet and metabolism. In addition, the use of ergogenic aids will be addressed with reference to athletic performance.
Pre-requisite(s): NUTR 1020 or HLTH 1020 and NUTR 2320.
May be repeated up to two times.

**NUTR 3040 - Nutrition Assessment**

Credits: (3)
Typically Taught Fall Semester: Full Sem, Online
Typically Taught Spring Semester: Full Sem, Online
Course Fee: $30.00
Course Fee Purpose: This course has a fee attached. Course fees are established in order to benefit the students in this course and may, among other things, be used to cover the costs of equipment replacement and maintenance, consumable materials, licensure examinations, or to meet specific regulatory requirements. The course fee expenditure for this specific course covers the purchase of expendable food and food service items and acquisition and replacement of nonexpendable kitchen items.
Description: This course covers foundational assessment methods used to determine population and individual nutritional status. Students will learn the scientific foundation on nutrition assessment and how to apply this knowledge in medical, community and research settings.
Pre-requisite(s): NUTR 1020 and NUTR 2320.

**NUTR 3070 - Advanced Food Science**

Credits: (3)
Typically Taught Fall Semester: Full Sem, Full Sem Online
Course Fee: $45.00
Course Fee Purpose: This course has a fee attached. Course fees are established in order to benefit the students in this course and may, among other things, be used to cover the costs of equipment replacement and maintenance, consumable materials, licensure examinations, or to meet specific regulatory requirements. The course fee expenditure for this specific course covers the purchase of expendable food and food service items and acquisition and replacement of nonexpendable kitchen items.
Description: The advanced study of the physical, biological, and chemical make-up of food. Effects of food preparation, storage and processing on nutrient content, taste and shelf-life.
Pre-requisite(s): (CHEM 1110 or CHEM 1210) and NUTR 1020.

**NUTR 3220 - Foundations in Diet Therapy**

Credits: (3)
Typically Taught Summer Semester: 1st Blk Online, 2nd Blk Online
Typically Taught Fall Semester: Full Sem, Full Sem Online
Typically Taught Spring Semester: Full Sem, Full Sem Online
Description: The nutrition care process, practice and methods of nutrition support are studied for the management of nutritionally-related medical conditions by body system in which diet is crucial for control of the disease or condition.
Pre-requisite(s): (NUTR 1020 or HLTH 1020) and NUTR 2320.
Suggested Requisite(s): ZOOL 2200 or HTHS 1110/HTHS 1111 are recommended.

**NUTR 3320 - Health and Nutrition in the Older Adult**

Credits: (3)
Typically Taught Summer Semester: 2nd Blk or 2nd Blk Online
Typically Taught Fall Semester: Online
Typically Taught Spring Semester: Online
Description: The developmental process of late adulthood with focus on the physiological age-related changes provides the foundation for understanding physical, mental, and social health and well-being in the older adult. Nutrition and exercise assessments and prescriptions, clinical services, community and social support services, complementary and alternative medicine, and other topics are explored in the context of promoting healthy aging.
Pre-requisite(s): NUTR 1020 or HLTH 1020.
NUTR 3420 - Multicultural Health & Nutrition

Credits: (3)
Typically Taught Summer Semester: 3rd Blk or 2nd Blk Online
Typically Taught Fall Semester: Full Sem Online
Typically Taught Spring Semester: Full Sem
Course Fee: $5.00
Course Fee Purpose: This course has a fee attached. Course fees are established in order to benefit the students in this course and may, among other things, be used to cover the costs of equipment replacement and maintenance, consumable materials, licensure examinations, or to meet specific regulatory requirements. The course fee expenditure for this specific course covers the use of various body composition analyses as well as the acquisition, replacement, and maintenance of such equipment.
Description: The application and understanding of social, religious, economic and aesthetic qualities of foods provides the knowledge for the explorations of the food patterns of various cultures. The understanding or world food problems as they pertain to the health will also be discussed.
Pre-requisite(s): NUTR 1020 or HLTH 1020 and NUTR 2320.
This course is taught Web enhanced.

NUTR 4320 - Current Issues in Nutrition

Credits: (2)
Typically Taught Fall Semester: Full Sem, Online, 1st Blk, 2nd Blk Hybrid, or Online
Typically Taught Spring Semester: Full Sem, Online, 1st Blk, 2nd Blk Hybrid, or Online
Description: Technology-aided literature review of the nutritional and medical sciences provides the information for presentation to peers in both written and oral forms.
Pre-requisite(s): NUTR 1020 or HLTH 1020 and NUTR 2320 or consent of instructor.

NUTR 4420 - Nutrition and Fitness

Credits: (3)
Typically Taught Fall Semester: 1st Blk or 2nd Blk Hybrid
Typically Taught Spring Semester: 1st Blk or 2nd Blk Online
Course Fee: $50.00
Course Fee Purpose: This course has a fee attached. Course fees are established in order to benefit the students in this course and may, among other things, be used to cover the costs of equipment replacement and maintenance, consumable materials, licensure examinations, or to meet specific regulatory requirements. The course fee expenditure for this specific course covers the use of various body composition analyses as well as the acquisition, replacement, and maintenance of such equipment.
Description: Principles of sports nutrition and fitness are applied to achieve a healthy body weight. Consideration of exercise and dietary practices along with fitness evaluation, dietary analysis and body composition testing are utilized to create a plan to improve physiological health.
Pre-requisite(s): NUTR 1020 or HLTH 1020 and NUTR 2320.
This course is taught Web enhanced.

NUTR 4440 - Advanced Human Nutrition

Credits: (3)
Typically Taught Fall Semester: Full Sem, Online
Typically Taught Spring Semester: Full Sem, Online
Description: The advanced study of human nutrition with focus on the metabolism of vitamins, minerals, and energy-producing nutrients. The structure, properties, and functions of the nutrients and their regulatory roles in metabolism, body composition and weight, fluid balance, health, and disease states are covered with clinical examples and across the lifespan.
Pre-requisite(s): NUTR 1020 and NUTR 2320.
Co-Requisite(s): CHEM 3070.

NUTR 4520 CRE - Directed Undergraduate Nutrition Research

Credits: (1-4)
Typically Taught Summer Semester: Full Sem Online
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: This course will provide undergraduate students an opportunity to engage in research processes and participate in ongoing nutrition research projects.
Pre-requisite(s): NUTR 4320 or NUTR 1020 or HLTH 1020 and Permission of Instructor.
May be repeated 3 times up to 6 credit hours.

NUTR 4830 CRE - Directed Readings

Credits: (1-3)
Typically Taught Summer Semester: Full Sem Online, 1st Blk Online or 2nd Blk Online
Typically Taught Fall Semester: Full Sem Online, 1st Blk Online or 2nd Blk Online
Typically Taught Spring Semester: Full Sem Online, 1st Blk Online or 2nd Blk Online
Description: Independent and directed readings or secondary research on advanced special topics under the direction of a faculty mentor.
Pre-requisite(s): NUTR 2320 and consent of faculty supervisor prior to registration.
May be repeated for up to 3 credit hours.

NUTR 4860 INT - Field Experience

Credits: (1-2)
Typically Taught Summer Semester: Full Sem Online
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Work experience, which applies prior academic learning in a supervised setting.
Pre-requisite(s): NUTR 1240 and consent of faculty supervisor prior to registration.
May be repeated up to 2 credit hours.

NUTR 4990 - Senior Seminar

Credits: (1)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: This is a capstone course for Nutrition seniors only. The experiences in the Nutrition major will be summarized and students will be prepared for graduate study or future employment.
Pre-requisite(s): NUTR 3420.

NUTR 6320 - Current Issues in Nutrition

Credits: (2)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Technology-aided literature review of the nutritional and medical sciences provides the information for presentation to peers in both written and oral forms.
Pre-requisite(s): NUTR 1020 or HLTH 1020 and NUTR 2320 or consent of instructor.

NUTR 6420 - Nutrition and Fitness

Credits: (3)
Typically Taught Fall Semester: 1st Blk or 2nd Blk Hybrid
Typically Taught Spring Semester: 1st Blk or 2nd Blk Online
Description: Principles of sports nutrition and fitness are applied to achieve a healthy body weight. Consideration of exercise and dietary practices along with fitness evaluation, dietary analysis and body composition testing are utilized to create a plan to improve physiological health.
Pre-requisite(s): Consent of instructor.
This course is taught Web enhanced.

NUTR 6520 - Directed Graduate Nutrition Research

Credits: (1-4)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: This course will provide graduate students an opportunity to engage in research processes and participate in ongoing nutrition research projects.
Pre-requisite(s): NUTR 4320 or NUTR 1020 or HLTH 1020 and Permission of Instructor. Graduate students taking this class as 6520 must have completed a statistical methods course.
May be repeated 3 times up to 4 credit hours.

OCRE 2300 - Wilderness Medicine

Credits: (3)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Course Fee: $230.00
Course Fee Purpose: Syllabus Statement in Regard to Course Fees
Course Fee: This course has a fee attached. Course fees are established to benefit the students in this course and may, among other things, be used to cover the costs of equipment replacement and maintenance, consumable materials, or to meet specific regulatory requirements and best practices. The course fees in this course will be used to support nationally recognized certification for students in both wilderness first responder (WFR) and cardiopulmonary resuscitation (CPR). Each student is individually tested and assessed for proficiency to earn the wilderness first responder certification. All students are tested as part of this course. The typical fee range for WFR courses is between $700 and $800. Courses are typically 8-10 days in duration, and fees often do not include lodging or meals.
Description: This course provides training and certification in wilderness medical care with a focus on emergency response in remote settings in the backcountry. The course is designed for professionals who intend to work in a position of leadership in an outdoor setting, or for individuals who want a high level of wilderness medical training for extended personal backcountry trips or expeditions. Participants will learn systems for patient assessment, extended care (including CPR), and
rescue/evacuation in remote settings. Emphasis will be placed on the acquisition and application of knowledge and skills necessary for responsible practice in the field of outdoor recreation. Upon successful completion of the course (including a written and practical exam), students will have the opportunity to earn an internationally recognized professional certification such as Wilderness First Responder (WFR) or Outdoor Emergency Care (OEC).

**OCRE 2500 - Introduction to Outdoor Pursuits**

Credits: (4)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Course Fee: $200.00
Course Fee Purpose: Course Fee: This course has a fee attached. Course fees are established in order to benefit the students in this course and may, among other things, be used to cover the costs of equipment replacement and maintenance, consumable materials, licensure examinations, or to meet specific regulatory requirements and best practices.
Description: Introduction to Outdoor Pursuits is focused on engaging and introducing students to discover, explore, and practice a variety of outdoor adventure and recreation activities. This includes, but is not limited to, group development, outdoor living, backpacking, flat- and whitewater paddling, mountain biking, rock climbing, caving, and winter-based pursuits. Emphasis is placed on activity-specific technical skill development, equipment management, risk management, environmental ethics, and basic instructional and facilitation strategies. Field Sessions are required.

**OCRE 2550 - Leadership and Safety Management for Outdoor Pursuits**

Credits: (4)
Typically Taught Summer Semester: 2nd Blk
Course Fee: $225.00
Course Fee Purpose: This course has a fee attached. Course fees are established in order to benefit the students in this course and may, among other things, be used to cover the costs of equipment replacement and maintenance, consumable materials, licensure examinations, or to meet specific regulatory requirements. Examples of course fee expenditures for this course include food, safety equipment, first aid supplies, and other incidentals, and licensing fees.
Description: This course introduces students to many of the skills needed to be a safe and effective outdoor leader.

The course is intended for individuals wishing to pursue employment as outdoor leaders in various outdoor adventure activities. Topics will include trip preparation, planning, logistics, planning for and managing risks in outdoor pursuits, group dynamics, leadership styles, emergency response, and environmental considerations. The majority of class time will be spent in the field as part of a multi-day expedition.
Pre-requisite(s): OCRE 2500.
Suggested Requisite(s): OCRE 2300, GEOG 1002.

**OCRE 2610 - Introduction to Outdoor Living Skills I**

Credits: (2)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Course Fee: $225.00
Course Fee Purpose: The course fees in this course will be used to support learning experiences in the field, including a multi-day/night backcountry trip. Associated course fees will provide for equipment, travel and permits/entrance fees.
Description: This course will provide students with an overview of backcountry skills. Students will learn about backcountry travel and camping skills, equipment use, and hazard identification. One lecture and 3 hour field trip are required each week.

**OCRE 2810 - Experimental Course**

Credits: (1-6)
Experimental
Description: Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript. May be repeated for a total maximum of 6 credit hours.

**OCRE 2860 - Outdoor Leadership Practicum**

Credits: (2)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: The purpose of Outdoor Leadership Practicum is to provide students with the opportunity to apply the requisite knowledge and skills to organize and lead outdoor activities. Under the supervision of OCRE faculty, students will gain experience designing and leading outdoor activities in a volunteer or work setting for a minimum of 40 supervised hours. Emphasis will be placed on client/participant assessment, curriculum design and
delivery, safety, and environmental impact. Approval for practicum experiences is coordinated and assigned by OCRE faculty.

**Pre-requisite/Co-requisite:** OCRE 2300, 2500, 4 credits of REC courses or permission of the instructor. This course may be repeated for up to 4 credit hours.

**OCRE 2890 INT - Cooperative Work Experience**

**Credits:** (1-9)
**Typically Taught Spring Semester: Full Sem**
**Description:** Provides academic credit for on-the-job experience. Grade and amount of credit will be determined by the department. Open to all students in Recreation who meet the minimum Cooperative Work Experience requirements of the department. May be repeated 8 times up to 9 credit hours.

**OCRE 3050 - Recreation and Leisure in Society**

**Credits:** (3)
**Typically Taught Fall Semester: Full Sem**
**Description:** Content, nature, extent and significance of recreation and leisure; their role in our lives, relevant service delivery agencies/organizations/businesses, leadership functions and styles, and an introduction to team-building/adventure programming activities.

**OCRE 3100 - Recreation Leadership and Group Facilitation**

**Credits:** (3)
**Typically Taught Spring Semester: Full Sem**
**Course Fee: $10.00**
**Course Fee Purpose:** The course fees in this course will be used to purchase resources and materials to support the facilitation of group development activities on an individual and small-group level.
**Description:** Customer/client-based leisure services, role delineation, settings, theories of leadership and group dynamics. Skills: apply various experiential techniques for different populations that recreational professionals may encounter.

**OCRE 3230 - Wilderness Nutrition & Backcountry Cooking**

**Credits:** (4)
**Typically Taught Spring Semester: 1st Blk**

**Course Fee: $141.00**
**Course Fee Purpose:** The course fees in this course will be used to purchase resources and materials to support lab equipment and field experiences

**Description:** For outdoor professionals and those who spend extensive time in the outdoors, wilderness nutrition and backcountry cooking are critical components to providing safe, healthy, and enjoyable outdoor recreation experiences. Concepts of nutritional balance, energy needs, menu planning, and cooking are explored and applied within the context of a backcountry setting. Multiple field experiences are required.

**Pre-requisite(s):** HLTH 1030 or NUTR 1020.

**OCRE 3300 - Inclusive and Adaptive Recreation**

**Credits:** (3)
**Typically Taught Fall Semester: Full Sem**
**Description:** Students will explore and apply concepts of leisure and recreation experiences and the related social impacts across a wide variety of populations including: ethnicity, race, ability, gender, age, religion and nationality.

**OCRE 3320 - Adventure Programming**

**Credits:** (3)
**Typically Taught Spring Semester: Full Sem**
**Description:** In this course, students will gain a theoretical and applied understanding of adventure programming within the field of Community and Outdoor Recreation. Students will have the opportunity to explore program planning and preparation, and activity implementation through individual and collaborative learning experiences. Upon completion of this course, students will have a Program Plan that reflects the theoretical and logistical elements that comprise programs in Community and Outdoor Recreation. This course also requires an adventure program implementation field experience.

**Pre-requisite/Co-requisite:** OCRE 3100 (formerly REC 3810).

**OCRE 3400 - Outdoor Equipment Production and Retailing**

**Credits:** (3)
**Typically Taught Spring Semester: Full Sem**
**Description:** Students will learn about key outdoor gear manufacturers, materials used in equipment, and practices retail operation use in the sales of outdoor apparel and equipment. Students will apply course information to analyze, critique, and create an outdoor gear concept. In
class exercises, site visits, field trips, and assignments will challenge students to engage in critical thinking and complex quantitative and communication skills. 

Pre-requisite(s): OCRE 2500 or permission from the instructor.

OCRE 3450 - Adventure Travel and Sustainable Tourism

Credits: (3)  
Typically Taught Spring Semester: Full Sem  
Course Fee: $75.00  
Course Fee Purpose: Course Fee: This course has a fee attached. Course fees are established in order to benefit the students in this course and may, among other things, be used to cover the costs of equipment replacement and maintenance, consumable materials, licensure examinations, or to meet specific regulatory requirements and best practices.

Description: This course will provide an overview of history, development, organization, impacts and trends within adventure travel and tourism industries. Students will learn about development and evolution of adventure travel and sustainable tourism; socio-cultural, economic, and environmental dimensions within adventure travel and sustainable tourism; positive and negative impacts of tourism; and principles and practices conducive to sustainable tourism. Students will gain experience in critically analyzing and evaluating adventure travel and sustainable tourism industries.

OCRE 3500 - Community Recreation and Park Planning

Credits: (3)  
Typically Taught Spring Semester: Full Sem  
Description: This course will focus on principles and methods of recreation and park design and planning. The student should expect to learn how to: assess community recreation facilities, parks, open spaces, recreation trends, industry standards, create planning goals and objectives, and make planning recommendations. Classification of recreation areas according to primary function, location and clientele will also be explored.

Pre-requisite(s): OCRE 3320.

OCRE 3520 - Risk Management and Legal Issues in Recreation Services

Credits: (3)  
Typically Taught Spring Semester: Full Sem  
Course Fee: $15.00  
Course Fee Purpose: The course fees in this course will be used to purchase access to resources that will support learning outcomes, specifically actual legal cases to be reviewed and analyzed.

Description: Risk Management and Legal Issues is focused on the examination of general legal concepts, federal and state legislation, and legal liabilities as these relate to and impact programming with the fields of community and outdoor recreation. Emphasis is placed on the process of identifying and managing potential risks in recreation, education, developmental, and social service settings, as well as organizational structures. The course content is interdisciplinary in nature, and is grounded in the tenets of experiential education.

Pre-requisite/Co-requisite: OCRE 3320.

OCRE 3600 - Administration and Management of Outdoor and Community Recreations Services

Credits: (3)  
Typically Taught Fall Semester: Full Sem  
Description: This course provides an examination of administration and management skills tied to outdoor recreation agencies/businesses/organizations. Emphasis will be placed on site visits, services delivery, environmental impacts, legal issues, human resources and administration and management skills. Outdoor activities (backpacking/hiking/camping/ropes course leadership, and use of technology in leisure research and programming) will be explored in the context of program management and administration. Field trips are required.

Pre-requisite/Co-requisite: OCRE 3320.

OCRE 3700 - Recreation and Sports Facilities and Events Management

Credits: (3)  
Typically Taught Spring Semester: Full Sem  
Course Fee: $25.00  
Course Fee Purpose: The course fees in this course will be used for two primary purposes. The first is for entrance fees during site visits to local recreation and sport facilities. The second is to purchase access to resources that will support learning outcomes, specifically published articles related to facility design and operations, which will be reviewed and analyzed.

Description: Studies the principles, guidelines, and fundamental practices involved in indoor and outdoor facilities planning, construction, use and management, as well as publicity and management of events for recreation and sports. Integrates tenets of the law and risk
management as they relate to recreational and athletic facilities and events.

**Pre-requisite(s):** ESS 2200 or OCRE 3050.

**OCRE 3810 - Experimental Course**

**Credits:** (1-6)

**Experimental**

**Description:** Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript. May be repeated for a total maximum of 6 credit hours.

**OCRE 3900 - Commercial Outdoor Recreation**

**Credits:** (3)

**Typically Taught Fall Semester:** Full Sem

**Typically Taught Spring Semester:** Full Sem

**Description:** This course will cover outdoor and adventure recreation business development. Particular emphasis will be on analyzing the types of commercial and private recreation enterprises, trends and directions, regulations, financial requirements and procedures for planning and organizing commercial recreation services.

**Pre-requisite(s):** OCRE 3320.

**OCRE 4000 - Recreation Programming for Youth Development**

**Credits:** (3)

**Typically Taught Fall Semester:** Full Sem

**Description:** This course will review and apply theories of youth development to recreation-based settings. Topics addressed include: youth development theories, political, social, and cultural issues relevant to youth development, types of youth serving organizations, youth professional roles and responsibilities; quality youth programming, logic modeling, program evaluation, and theory-driven program design.

**Pre-requisite(s):** OCRE 3100 or permission from the instructor.

**OCRE 4020 - Nature Interpretation**

**Credits:** (3)

**Typically Taught Spring Semester:** Full Sem

**Course Fee:** $50.00

**Course Fee Purpose:** The course fees in this course will be used to support authentic learning experiences in the field, including an overnight trip. Associated course fees will provide for equipment, travel and permits/entrance fees.

**Description:** Nature Interpretation is focused on providing the student with an in-depth investigation of the fundamental principles and concepts of nature interpretation. This includes, but is not limited to historical development of the field, principles of exhibit design, interpretative program designs and techniques, common field techniques, and current trends used by outdoor leaders. In addition, an overview of employment opportunities in the field will be explored. This course emphasizes experimental learning theories and their application to natural history interpretation and environmental education program design. The course content is interdisciplinary in nature, and is grounded in the tenets of experiential education and learning (per the work of John Dewey).

**Pre-requisite(s):** OCRE 3050 and OCRE 3100 (formerly 3810).

**OCRE 4300 - Trends and Ethical Issues in Recreation Services**

**Credits:** (3)

**Typically Taught Spring Semester:** Full Sem

**Description:** Current Trends and Ethical Issues in Recreation examines major ethical theories and their relation to the development of personal and professional ethics in practitioners working in the field of community and outdoor recreation. The differences between ethics and morality will be analyzed, and selected codes of ethics will be presented for review and discussion. The application of ethical decision making and problem solving in recreation settings will be explored.

**Pre-requisite(s):** OCRE 3600.

**OCRE 4500 - Grant and Proposal Writing for Recreation Professionals**

**Credits:** (3)

**Typically Taught Fall Semester:** Full Sem

**Description:** Grant and Proposal Writing for Recreation Professionals is focused on providing the student with an in-depth investigation of grant writing and management. The course will provide students with an opportunity for primary and authentic experience in researching and writing grants. Students will explore the process of identifying prospective funders, developing relationships with funders, comprehending the basics of writing grants, submitting proposals, working in collaborative partnerships, and preparing for follow up and evaluation. Students will apply course learning to write and prepare actual grant proposals. The course content is
interdisciplinary in nature, and is grounded in the tenets of experiential education and learning.

Pre-requisite(s): OCRE 3050 or permission from the instructor.

**OCRE 4550 - Outdoor Education Philosophies & Principles**

Credits: (3)
Typically Taught Fall Semester: Full Sem
Course Fee: $52.00
Course Fee Purpose: The course fees in this course will be used to support field experiences in the field. Associated course fees will provide for equipment, travel and permits/entrance fees.
Description: Provides basic concepts of outdoor education, and direct, firsthand experience with learning resources beyond the classroom.
Pre-requisite(s): OCRE 2500.

**OCRE 4800 - Individual Projects**

Credits: (1-3)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: A comprehensive study of a significant problem in the field of recreation. Hours to be arranged. For seniors only. May be repeated 2 times up to 3 credit hours.

**OCRE 4890 INT - Cooperative Work Experience**

Credits: (1-6)
Typically Taught Summer Semester: Full Sem, 1st Block, 2nd Block
Typically Taught Fall Semester: Full Sem, 1st Block, 2nd Block
Typically Taught Spring Semester: Full Sem, 1st Block, 2nd Block
Description: A continuation of OCRE 2890. May be repeated 5 times up to 6 credit hours.

**OCRE 4930 - Outdoor Education Workshop**

Credits: (2)
Typically Taught Summer Semester: Full Sem
Course Fee: $40.00
Course Fee Purpose: The course fees in this course will be used to cover equipment rental to support activities taking place in field-based settings. Associated course fees will cover the use of 3-4 different types of outdoor equipment used for 3-4 different day trips.
Description: A broad inter-disciplinary approach to the methodology of outdoor education teaching techniques; experiential learning-course taught almost totally outdoors.

**OCRE 6930 - Outdoor Education Workshop**

Credits: (2)
Typically Taught Summer Semester: Full Sem, 1st Block, 2nd Block
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Course Fee: $40.00
Course Fee Purpose: The course fees in this course will be used to cover equipment rental to support activities taking place in field-based settings. Associated course fees will cover the use of 3-4 different types of outdoor equipment used for 3-4 different day trips.
Description: A broad interdisciplinary approach to the methodology of outdoor education teaching techniques; experiential learning-course taught almost totally outdoors.

**OEHS 3520 - Introduction to Occupational Safety and Health**

Credits: (3)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: This course is an introductory course in to the field of Occupational Safety and Health (OSH). The course reviews the antecedents of modern industrial safety going back to ancient origins, the industrial revolution to the current day. The course includes a series of important topics in injury prevention including prevention of fires, falls, accidents, chemical injuries and other workplace problems. The goal is to teach broad principles and to enable students to recognize when they and others may be in danger regardless of their industry or profession.

**OEHS 3530 - Workplace Hazard Recognition**

Credits: (3)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: The course will provide an overview of general hazards common to most workplaces with focus on manual material handling, slips trips and falls, machine guarding and other exposures. Exposures common to most industries will be covered. Generally accepted mitigation methodologies will be reviewed both from a regulatory and
best practice standpoint. The students will be able to recognize inadequately mitigated hazards in their workplaces.

**OEHS 3540 - Ergonomics and Human Factors**

Credits: (3)
Typically Taught Spring Semester: Full Sem
Description: This course will acquaint students with the basic concepts of work design and human capabilities as developed over the last century. Material handling exposures will be reviewed in depth. Industries with special challenges, such as healthcare, will be discussed. Students will gain an understanding of the concepts of basic risk factors such as force, posture and repetition. Students will learn to use peer reviewed exposure assessment tools in a variety of settings and case studies. The frequency, costs and challenges in mitigation and treatment will be reviewed.

**OEHS 3550 - Workplace Health Exposures**

Credits: (3)
Typically Taught Summer Semester: Full Sem
Description: Occupational Health starts by requiring an understanding of the types of chemical, physical, and biological stressors that may be encountered in the work environment. With this knowledge, professionals can anticipate and recognize these potential health hazards. Recognition relies on applying a variety of related concepts including chemical/physical properties; quantities used; exposure potential; routes of entry; and toxicology. Once potential health hazards are identified, knowledge is needed in the types of tools available to evaluate actual worker exposure. Then, how to use the technical resources available to assess relative risk of exposures. There are various sampling instruments and sampling strategies to obtain information on the potential exposure. Following the characterization of exposure, the use of existing standards and best practices allow for risk assessment and prioritization. The final part of the challenge is understanding the various types of controls available to reduce the exposure of workers to significant hazards and thus reduce the risk of injury and disease: administrative programs, engineering fixes, and personal protective equipment are all tools. Therefore, the systematic and programmed-based process of anticipation, recognition, evaluation, and control of workplace health hazards are the basis for this course.
Pre-requisite(s): OEHS 3520

**OEHS 3560 - Managing Occupational Safety & Health Programs**

Credits: (3)
Typically Taught Spring Semester: Full Sem
Description: This course will review the development and management of workplace safety and health programs. Existing regulatory requirements and national consensus standards such as the ANSI Z-10 will be covered. Effective program elements and performance metrics will be reviewed. Special attention will be given to the prevention of fatalities and serious injuries in the workplace.

**OEHS 3570 - Risk Assessment and Management**

Credits: (3)
Typically Taught Summer Semester: Full Sem
Description: This semester course will review the fundamentals of risk, risk assessment and risk management. This will include the history of risk concepts, assessment approaches and risk management tools. Case studies will include examples of catastrophic failures in risk assessment and management where human safety is concerned. Risk management tools will be reviewed and students will gain practice by applying assessment and management tools to real-world industrial settings. Changing societal attitudes and expectations of risk will also be reviewed.

**OEHS 6370 - Occupational Epidemiology**

Credits: (3)
Typically Taught Summer Semester: Full - Online
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem - Online
Description: Investigates concepts, methods, and practice of occupational epidemiology. Prepares students to design, execute, and evaluate occupational epidemiological research as well as evaluate and interpret published occupational safety and health epidemiological literature. Will cover various study designs, biases, confounders, and causation to address the prevention of workplace injuries and illnesses.
Suggested Requisite(s): College Algebra

**OEHS 6703 - Clinical and Behavioral Aspects of Occupational Injuries and Disease (OID)**

Credits: (3)
Typically Taught Fall Semester: Full Sem
Description: This course is a didactic course to teach common diseases encountered in occupational medicine (as well as general medical practice). The course includes a significant amount of instructional time on musculoskeletal disorders and respiratory conditions. Evidence-based treatment regimens for common conditions will be discussed.

**OEHS 6750 - Fundamentals of Industrial Hygiene**

Credits: (3)
Typically Taught Fall Semester: Full Sem
Description: The course will provide an introduction to technical information as well as discussion and insight into the roles, responsibilities, and requirements for practicing occupational health and safety professionals. The course focuses on the principles of anticipation, recognition, evaluation, and control of hazards in occupational environments.
Suggested Requisite(s): College Algebra, College Chemistry, Biology

**OEHS 6752 - Introduction to Industrial and Environmental Toxicology and Physiology**

Credits: (3)
Typically Taught Spring Semester: Full Sem
Description: The course is intended to provide public health and safety professionals a basic understanding of toxicological principles and information about the toxicity of a variety of chemicals likely to be encountered in the workplace and/or the environment.
Pre-requisite(s): OEHS 6750

**OEHS 6760 - Management and Administration of Occupational Environmental and Safety Programs**

Credits: (3)
Typically Taught Spring Semester: Full Sem
Description: This course is structured to enable students to develop the management capabilities needed to design, implement, and evaluate Occupational and Environmental Health and Safety and other Public Health programs. The course is designed to enable participants to develop the management knowledge and skills needed to design, implement, and evaluate occupational and environmental health and safety (OEHS) as well as public health (PH), Aerospace Medicine (AsM) and other health or safety programs. Instruction also includes discussion of pertinent management theories and application of theories in designing, implementing, and evaluating health and safety programs. The program emphasizes the unique management capabilities that those responsible for OEHS, PH, AsM and other health and safety programs must possess.

**PAR 1000 INT - Emergency Medical Technician**

Credits: (4)
Typically Taught Summer Semester: 1st Blk
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: This course teaches the student to recognize and instruct the response to emergency calls to provide efficient and immediate care to the critically ill and injured, and deliver transport needs for the patient to the appropriate medical facility. The student will be able to determine the nature and extent of illness or injury and establish priority for required emergency care. Theory will include the emergency medical care to the adult, infant and child, medical, and trauma patients. This course meets all of the requirements of the National EMS Education Standards. Successful evaluation of professionalism, interpersonal relationships, skills, and knowledge must be completed for recommendation of certification. (Must be taken with PAR 1001.)
May be repeated up to 99 times.

**PAR 1001 - Emergency Medical Technician Lab**

Credits: (2)
Typically Taught Summer Semester: 1st Blk
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem, 2nd Blk
Description: At the completion of this course the student will be able to demonstrate competency managing emergencies, utilizing all Basic Support equipment and skills in accordance with all behavioral objectives in the current National EMS Education Standards. In addition to the lab, this course requires that the student have patient interactions in a clinical setting. Based on assessment finding, renders emergency medical care to the adult, infant and child, medical, and trauma patients. Successful evaluation of professionalism, interpersonal relationships, skills, and knowledge must be completed for recommendation of certification. (Must be taken with PAR 1000).
PAR 1005 INT - EMT-Basic Field Experience - I

Credits: (3)
Typically Taught Summer Semester: Full Sem
Description: Minimum of 120 hours of supervised EMT-Basic patient care experience provided through assigned day shifts on the ambulance and/or pre-hospital setting. A preceptor evaluates basic life support knowledge, skills and affective abilities.
Pre-requisite(s): PAR 1000/PAR 1001 and HTHS 1101, HTHS 1110/HTHS 1111 and 70% minimum on EMT-B assessment exam. Department permission required.

PAR 1006 INT - EMT-Basic Field Experience - II

Credits: (3)
Description: Minimum of 120 additional hours of continued supervised EMT-Basic patient care experience provided through assigned shifts on the ambulance and/or pre-hospital setting. A preceptor evaluates basic life support knowledge, skills and affective abilities.
Pre-requisite(s): PAR 1005, ENGL 1010, and MATH 0990 or MATH 1010.
Note: This course is not currently being offered.

PAR 1010 - Emergency Medical Technician - Intermediate Introduction

Credits: (2)
Description: Introduction of Intermediate EMT concepts of basic and advanced life support utilizing cognitive knowledge objects using the State Department of Health and current National Standard EMT-I Curriculum. Application of pre-hospital care will be demonstrated through written assignments and exams. Course may be challenged for credit. Course is required, or equivalent work experience, before admission into the paramedic program.
Pre-requisite(s): Must have Basic EMT certification. May be repeated up to 99 times.
Note: This course is not currently being offered.

PAR 1011 - Emergency Medical Technician - Intermediate Introduction Lab

Credits: (2)
Description: This course requires clinical hours with an emergency facility and ambulance as scheduled. Application of basic EMT skills involving pre-hospital care with staged and real emergencies and demonstration of psychomotor skills through laboratory, ambulance riding time, and clinical assignments. Clinical activities are adapted to previous documented work experiences. This course may be challenged for credit. This course is required, or equivalent work experience, before admission into the paramedic program.
Pre-requisite(s): Must have Basic EMT certification. Note: PAR 1010 combined with PAR 1011 will provide a certificate of 60 hours of continuing medical education hours toward recertification requirements for the Utah State Department of Health. This course is not currently being offered.

PAR 1020 - Emergency Medical Technician - Intermediate

Credits: (2)
Description: Curriculum includes but is not limited to the US Department of Transportation National Standard Curriculum for the EMT-Intermediate. This course consists of the cognitive knowledge and theory components of the USDOT Curriculum and builds upon the EMT Basic knowledge. State certification eligibility of EMT Intermediate upon successful completion of both PAR 1020 and PAR 1021. Students will demonstrate mastery of cognitive knowledge skills through written assignments and examinations. Course format consists of didactic lecture. Paramedic Program application, faculty review, and committee selection are required to be admitted to this course.
Pre-requisite(s): PAR 1011 or equivalent. May be repeated up to 99 times.
Note: This course is not currently being offered.

PAR 1021 - Emergency Medical Technician - Intermediate Lab

Credits: (2)
Description: Curriculum includes but is not limited to the U.S. Department of Transportation National Standard Curriculum for the EMT-Intermediate. Builds upon the EMT Basic psychomotor skills. State certification eligibility of EMT I upon successful completion of both PAR 1020 and PAR 1021. This course consists of clinical instruction and supervised field experiences in an advanced life support rescue unit which functions under a medical command authority. Students will demonstrate their
mastery of the educational psychomotor skills through practical exams and staged and real emergencies. Must have department approval by application process involving an admissions committee final selection.

**Pre-requisite(s):** PAR 1020 or equivalent.

Note: This course is not currently being offered.

**PAR 1030 - Pediatric Advanced Life Support (PALS)**

**Credits:** (1)

**Description:** Subject and case based approach to American Heart Association protocols and skills required for successful resuscitation of child and infant. The cognitive and psychomotor skills needed to resuscitate and stabilize infants and children in respiratory failure, shock, or cardiopulmonary arrest.

**Pre-requisite(s):** Basic Life Support course completion card.

May be repeated up to 99 times.

Note: This course is not currently being offered.

**PAR 1031 - Advanced Cardiac Life Support (ACLS)**

**Credits:** (1)

**Description:** Subject and case based approach to American Heart Association protocols and skills required for successful resuscitation of the adult. This course is designed to help all participants succeed in acquiring the cognitive knowledge psychomotor skills needed by medical professionals in adult resuscitation attempts.

May be repeated up to 99 times.

Note: This course is not currently being offered.

**PAR 2000 - Introduction to Paramedic Practice**

**Credits:** (4)

**Typically Taught Summer Semester:** 1st Blk

**Typically Taught Fall Semester:** 1st Blk

**Typically Taught Spring Semester:** 1st Blk

**Description:** Introduces the paramedic student to basic pathophysiology, pharmacology, research methods, airway management, plus patient interaction and assessment skills. Includes professional and wellness considerations for the individual practitioner and patient. Basic knowledge of medical incident command, rescue awareness, hazardous materials incidents, and crime scene awareness is included. Meets all national EMS Education Standards. Prospective students must be EMT certified, accomplish Dumke College of Health Professions advising, complete the department application process, and then be accepted to the program prior to registration.

**PAR 2020 - Traumatic Emergencies**

**Credits:** (3)

**Typically Taught Summer Semester:** 1st Blk

**Typically Taught Fall Semester:** 1st Blk

**Typically Taught Spring Semester:** 1st Blk

**Description:** Prepares the student to recognize, assess and provide paramedic interventions related to bodily traumatic injuries. Current PHTLS/BTLS/ABLS principles are utilized.

**Pre-requisite(s):** PAR 2000 and PAR 3010.

**PAR 2030 - Special Populations in Paramedic Practice**

**Credits:** (3)

**Typically Taught Summer Semester:** 1st Blk

**Typically Taught Fall Semester:** 1st Blk

**Typically Taught Spring Semester:** 1st Blk

**Description:** Prepares the student to recognize, assess and provide paramedic interventions related to the special challenges posed by neonate, pediatric, obstetric, geriatrics, and psychiatric patients. Acute interventions for the chronically ill and home care patient are discussed. Current AHA, PEPP, and national EMS Education Standards are utilized.

**Pre-requisite(s):** PAR 2000 and PAR 3010.

**PAR 2040 - Paramedic Skills and Simulation Lab**

**Credits:** (4)

**Typically Taught Summer Semester:** Full Sem

**Typically Taught Fall Semester:** Full Sem

**Typically Taught Spring Semester:** Full Sem

**Course Fee:** $500.00

**Course Fee Purpose:** PAR 2040 requires a skill lab fee of $500 per student. This fee covers skill lab expenses not included within the standard tuition rates. These expenses include both disposable and non-disposable items that will be required for the successful completion of your psychomotor portfolio. Additionally, due to our accreditation body's student to instructor ratio requirements, experienced state certified EMS instructors will be utilized to assist your professors with skill lab rotations. These required fees will also supplement the compensation for these instructors as needed.

**Description:** Skills application using the theory of paramedic practice. This course will complete the National
Registry Paramedic Psychomotor Competency Portfolio. Students must pass all skills before advancing into clinical and field internship rotations.  

**Pre-requisite(s):** PAR 2000. ($225 lab fee)

**PAR 2100 - Capstone Course in Paramedic Practice**

**Credits:** (4)  
**Typically Taught Summer Semester:** Full Sem  
**Typically Taught Fall Semester:** Full Sem  
**Typically Taught Spring Semester:** Full Sem  
**Description:** Pathophysiology and advanced concepts applied to recognition of Advanced Life Support patient problems and treatment modalities. Student research and presentation projects are designed to meet professional goals and experiences. All paramedic terminal competencies will be re-verified prior to a recommendation to certify. Student must pass the physician oral examination to be recommended for certification testing.  

**Pre-requisite(s):** PAR 2000, PAR 3010, PAR 2020, PAR 2030, PAR 2040.

**PAR 2110 INT - Paramedic Clinical Experience**

**Credits:** (3)  
**Typically Taught Summer Semester:** Full Sem  
**Typically Taught Fall Semester:** Full Sem  
**Typically Taught Spring Semester:** Full Sem  
**Course Fee:** $38.00  
**Course Fee Purpose:** PAR 2110 requires an additional student fee of $40 per student. This fee covers the costs of clinical scheduling software not included within the standard tuition rates. The hospital systems at which each student will perform clinical rotations, mandates that the scheduling be managed through this software. The specific software and its use is dictated by the hospital systems and is not optional.  
**Description:** Clinical rotations in various medical settings provide the student with the opportunity to perform skills and apply knowledge of paramedic practice. Includes, but is not limited to, areas in the operating room, emergency department, labor/delivery, psychiatric, pediatric, burn and cardiac cath units.  

**Pre-requisite(s):** PAR 2000, PAR 3010, PAR 2020, PAR 2030, PAR 2040.

**PAR 2120 INT - Paramedic Field Internship**

**Credits:** (9)  
**Typically Taught Summer Semester:** 2nd Blk  
**Typically Taught Fall Semester:** 2nd Blk  
**Typically Taught Spring Semester:** 2nd Blk  
**Description:** Rotations with various paramedic Fire/EMS agencies providing rescue vehicle response to advance the skills and performance of paramedic practice. Successful evaluation of professionalism, interpersonal relationships and problem solving under stress, must be completed for recommendation to test for certification/licensure. Student will nominally complete 480 hours of ride time and successfully complete 50 ALS Team Leads.  

**Pre-requisite(s):** PAR 2000, PAR 2020, PAR 2030, PAR 2040, PAR 2110, PAR 3010.

**PAR 3010 - Cardiac and Medical Emergencies**

**Credits:** (6)  
**Typically Taught Summer Semester:** 2nd Blk  
**Typically Taught Fall Semester:** 2nd Blk  
**Typically Taught Spring Semester:** 2nd Blk  
**Description:** Integrates assessment findings with principles of epidemiology and pathophysiology to formulate a field impression and implement a comprehensive treatment and/or disposition plan for a patient with a cardiac or medical complaint. This course prepares the paramedic student to recognize, assess, develop and implement paramedic interventions related to cardiac and other medical emergencies. Topical areas include the cardiac, circulatory, digestive, endocrine, HEENT, hematologic, respiratory, and urinary systems. Concepts of infectious diseases, toxicology, anaphylaxis, environmental exposure, and shock will also be presented. Current AHA Guidelines and the 2010 National EMS Standards will be fully utilized.  

**Pre-requisite(s):** PAR 2000.  
May be repeated once for credit.

**PAR 3110 - Critical Care Transport Course**

**Credits:** (6)  
**Typically Taught Summer Semester:** 1st Blk  
**Description:** This course will prepare experienced paramedics and registered nurses to become part of a highly functioning critical care transport team, often transporting high risk patients. Topics covered include; 1) History and role of critical care transport; 2) General principles of critical care transport; 3) Patient care principles 4) Trauma emergencies; 5) Medical emergencies; 6) Environmental emergencies 7) Special populations, and 8) Medical, legal and patient care issues in
critical care transport. While the course is primarily oriented to ground transportation, the content presented will allow a student take the National Flight Nurse/Paramedic exam.

**Pre-requisite(s):** Paramedic or registered nurse (2-3 years experience nominal) or department approval. May be repeated up to two times.

**PAR 3120 - Tactical Emergency Medicine**

**Credits:** (3)

**Description:** This rigorous course provides the principles of tactical medicine. Topics include instruction in the tenets of tactical emergency medicine, particularly in providing acute care in tactical combat situations and the medical operations support of tactical teams. This course is designed to provide the EMS provider with a variety of skills necessary to support a tactical law enforcement team.

**Pre-requisite(s):** EMT-Basic certification

May be repeated up to two times.

Note: This course is not currently being offered.

**PAR 3130 - Mobile Integrated Healthcare**

**Credits:** (2)

**Typically Taught Spring Semester:** 1st Blk, Online

**Description:** Mobile Integrated Healthcare (MIH) is the provision of healthcare using patient-centered, mobile resources in the out-of-hospital environment. This course is intended to provide the Emergency Healthcare Services student the tools needed to perform an organizational readiness assessment leading to the development of a community MIH program. The history of MIH, potential stakeholders, types of MIH programs along with data collection, QA/QI, and reimbursement will be explored. As the course capstone, each student will submit a MIH implementation plan that could be utilized in their current EMS response area. (This course does not have a clinical component nor leads to any potential state licensure.)

**Pre-requisite(s):** Allied Health or Nursing background suggested or departmental approval.

**PAR 4110 - Emergency Medical Services Management Topics**

**Credits:** (3)

**Typically Taught Spring Semester:** Full Sem

**Description:** The principles of management and process that contribute to the effectiveness of day-to-day operations within an EMS organization. Topics include human resource management, communications systems, deployment strategies, and risk management. Additional topics include an emphasis on demand analysis, staffing, medical direction, reimbursement, capital investment, and cost control.

May be repeated up to two times.

**PAR 4120 - Emergency Medical Service Teaching Topics**

**Credits:** (3)

**Typically Taught Fall Semester:** Full Sem

**Description:** Using the USDOT/NHTSA National Guidelines for Educating EMS Instructors, this course will prepare emergency medical service instructors for classroom and skill lab teaching. Topics discussed include; 1) instructor roles and responsibilities; 2) the student; 3) foundations of education; 4) delivering the message; 5) evaluation and 6) course administration. Students will demonstrate EMS teaching in both a class room and skill lab environment.

**Pre-requisite(s):** EMT-Basic certification.

May be repeated up to two times.

**PAR 4130 - Capstone Seminar in Emergency Medicine Research**

**Credits:** (3)

**Typically Taught Spring Semester:** Full Sem, Online

**Description:** This course is designed to offer students the basic principles and methods of empirical inquiry in emergency healthcare. The course will provide an understanding of emergency medicine research through serious exploration of its language, ethics, and methods. The course examines the processes of quantitative, qualitative, and mixed methods approaches to experimental and observed analysis. Students will develop the skills to begin to critically review literature relevant to emergency medicine research and determine why evidence-based practices are important for the development and progression of the emergency healthcare discipline.

**Pre-requisite(s):** Must be enrolled in Bachelor of Science in Emergency Healthcare Services or by departmental approval.

**PAR 4850 - Study Abroad**
Variable Title
Description: The purpose of this course is to provide opportunities for students in health professions to experience a study abroad program that is designed to explore healthcare, culture, and clinical experience. May be repeated six times for a maximum of six credit hours.
Note: This course is not currently being offered.

PDD 1010 - Introduction to Engineering & Technical Design (Solidworks)

Credits: (3)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Course Fee: $35.00
Course Fee Purpose: Software licensing, lab computers and support
Pre-requisite(s): MATH 1010 or placement.

PDD 1020 - Introduction to 2D CAD Software

Credits: (3)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: An introductory course to explore engineering and technical design solutions using critical thinking in Science, Technology, Engineering and Mathematics. Topics include Engineering Design Processes & Professions, Sketching and Documentation, Design Measuring, Introduction to 2 D CAD Software, Design Visualization, Orthographic Projection and Multi-View Drawings, Fasteners, Assembly Drawings, Dimensioning, and Tolerancing.

PDD 1030 - Introduction to Product Design and Development

Credits: (3)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem

Course Fee: $35.00
Course Fee Purpose: Fees for this course are designed to cover equipment maintenance and replacement, computer usage, software, consumable materials and supplies, and instructional resources.
Description: This is an introductory course for students interested in majoring in Product Design and Development. Students will be exposed to Product Design and Development through several laboratory experiences that introduce them to concepts needed for future classes. Students will gain a clear understanding of degree requirements and possible career paths.
Pre-requisite(s): PDD 1010.

PDD 1160 - Geometric Dimensioning & Tolerancing Using 3D CAD

Credits: (3)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Course Fee: $35.00
Course Fee Purpose: Software licensing, lab computers and support
Description: The use of CAD to create industrial level production working drawings. Includes the latest ASME Y14.5 standards for Geometric Dimensioning & Tolerancing. Topics of discussion will include: dimensions, fits, tolerances, surface finishes, symbols for welding, piping, machined elements/processes and sheet metal flat patterns.
Pre-requisite(s): PDD 1010.

PDD 1810 - Experimental Course

Credits: (1-6)
Experimental
Description: Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript. May be repeated for a total maximum of 6 credit hrs.

PDD 2460 - Product Design Fundamentals Using 3D CAD

Credits: (3)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Course Fee: $35.00
Course Fee Purpose: Software licensing, lab computers and support
Description: Product Design is the creative process of applying scientific and mathematical principles,
experience, and judgment to the development of the solution of a technical product or system to meet a specific need. Turning ideas into design will incorporate problem identification, market research and brainstorming possible solutions, develop detailed part and assembly drawings, implementation, and evaluation. Sketching, gears/cams/shafts, advanced GD&T, tolerance build-up, tolerances for assemblies, introduction to rapid prototyping, and CNC design for manufacturing concepts will be presented. Advanced 3-D modeling software applications will include: library of parts, assembly constraints, motion constraints, drive constraints, and adaptive design. Three lectures per week.

Pre-requisite(s): PDD 1160.

PDD 2650 - Product Design & Development

Credits: (3)
Typically Taught Spring Semester: Full Sem
Course Fee: $35.00
Course Fee Purpose: Software licensing, lab computers and support
Description: Uses CAD to lay out advanced production drawings and design. Uses the Machinery's Handbook, ANSI standards, geometric dimensioning and tolerances and manufacturer's reference materials. Supports the design and drafting required for senior project.
Pre-requisite(s): PDD 2460.

PDD 2830 - Directed Readings

Credits: (1-3)
Typically Taught Spring Semester: Full Sem
Description: Directed readings in Design Engineering Technology including product design and development and architectural areas. Must have department approval.
Can be taken for 1-3 credit hours twice for a maximum of 6 credits.

PDD 2890 INT - Cooperative Work Experience

Credits: (1-3)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Open to all advanced students in Design Engineering Technology. Department approval required before registration. Provides academic credit for on-the-job experience. Grade and amount of credit will be determined by the department.
Can be taken for 1-3 credit hours twice for a maximum of 6 credits.

PDD 2920 - Short Courses, Workshops, Institutes, and Special Programs

Credits: (1-6)
Workshop
Typically Taught Spring Semester: Full Sem
Description: Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript.
May be repeated for a total maximum of 6 credit hours.

PDD 3100 - Tool Design

Credits: (3)
Typically Taught Fall Semester: Full Sem
Course Fee: $35.00
Course Fee Purpose: Software licensing, lab computers and support
Description: Tool design principals used for work piece control in manufacturing and production. Topics include responsibilities of a tool designer, the design process, economics of design, tooling materials, and tool drawings and specifications. Other topics will include jigs, fixtures, gages, dies and tooling required by specialized manufacturing processes.
Pre-requisite(s): PHYS 2010, MFET 1210, PDD 2460, and MATH 1080 (or MATH 1050 and MATH 1060).

PDD 3210 - Machines and Mechanisms

Credits: (3)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Course Fee: $25.00
Course Fee Purpose: Course fees for this course are designed to cover computer labs, paper usage, software, equipment maintenance and replacement, supplies and instructional resources.
Description: Uses 3D parametric design software to produce design solutions for open-ended design projects, focusing on the relationship between "make" and "buy" parts. Gives students the opportunity to become familiar with engineering functions and manufacturing processes as related to mechanical design. Introduces the iterative process required to optimize design solutions. Studies elements inherent to the design of components fabricated from traditional engineering materials using practical manufacturing methods. Examines the characteristics of mechanical components and the integration of said
components to specific machine designs. Uses select information from manufacturer's data for components integral to the comprehensive design of complete machines. Covers concepts such as position, velocity, and acceleration. Also covers mechanism design including weldments, prime movers, gear pumps, belt and chain drives, hydraulic motors, bearing applications, braking systems, tanks, and sheet metal layout. Supports the design requirements for senior projects.

Pre-requisite(s): MFET 1210, MFET 2150, and PDD 2460.

**PDD 3300 - Applied Kinematic Analysis**

Credits: (3)
Typically Taught Spring Semester: *Full Sem*
Course Fee: $35.00
Course Fee Purpose: Software licensing, lab computers and support
Description: Graphical representation of the motion of bodies without reference to the forces that cause the motion. Devices will be modeled and the limits of movement of components defined so that overall machine design can be animated and analyzed.
Pre-requisite(s): MFET 2300.

**PDD 3400 - Rendering Basics (Photoshop/3ds Max)**

Credits: (3)
Typically Taught Fall Semester: *Full Sem*
Description: This course introduces students to the basic tools and concepts used in Adobe Photoshop and 3ds Max. Photoshop instruction includes using layers, image editing using selection tools, filtering, and touching up a 3D render. 3ds Max instruction includes importing models, adding materials, lighting a scene, and creating a basic animation.

**PDD 3460 - Parametric Design Graphics**

Credits: (3)
Typically Taught Fall Semester: *Full Sem*
Description: An advanced design graphics course using state-of-the-art parametric modeling software. Topics include: parametric modeling fundamentals, constructive solid geometry concepts, model history, parent/child relationships, parametric constraints & relations, datum features, symmetrical features, 3D construction tools, advanced modeling tools, and assembly modeling.
Pre-requisite(s): PDD 1010.

**PDD 3470 - Introduction to CATIA V5**

Credits: (3)
Typically Taught Fall Semester: *Full Sem*
Course Fee: $35.00
Course Fee Purpose: Software licensing, lab computers and support
Description: Use of parametric 3D modeling software to prepare engineering documentation and model analysis for the automotive and aerospace manufacturing industries. Students will complete a series of laboratory assignments and term projects in an open lab environment.
Pre-requisite(s): PDD 1010, PDD 1160, and PDD 2460 or MFET 2870 or instructor's approval.

**PDD 3810 - Experimental Course**

Credits: (1-6)
Experimental
Description: Individual courses offered on an experimental basis, identified by specific name and description. The specific title will appear on student's transcript along with the authorized credit. May be repeated for a total maximum of 6 credit hours.

**PDD 4200 - Advanced Mechanical Design**

Credits: (3)
Typically Taught Spring Semester: *Full Sem*
Course Fee: $35.00
Course Fee Purpose: Fees for this course are designed to cover equipment maintenance and replacement, computer usage, software, consumable materials and supplies, and instructional resources.
Description: Uses 3D CAD (3-dimensional computer-aided design) software to create production designs and drawings for heavy industrial applications. Uses the American Institute of Steel Construction (AISC) Manual and the Structural Aluminum Design Handbook in conjunction with metal supplier's product engineering data to design and analyze mechanical systems using traditional and Finite Element Analysis (FEA) Methods in quantifying component mechanics of material integrity. Preparation of fabrication drawings for said systems will also be covered in the course.
Pre-requisite(s): MFET 2320.

**PDD 4400 - Animation Basics (3ds Max)**
Credits: (3)
Typically Taught Spring Semester: Full Sem
Description: This course is a continuation of DET 3400. An in-depth look into 3ds Max focusing more on photorealism and animation. Students will learn how to take models created in other programs learned throughout the DET program into 3ds Max and bring them to life. Video editing is covered to allow students to create professional animations and videos.
Pre-requisite(s): PDD 3400.

PDD 4470 - Advanced CATIA V5

Credits: (3)
Typically Taught Spring Semester: Full Sem
Course Fee: $35.00
Course Fee Purpose: Software licensing, lab computers and support
Description: An advanced 3D CAD course featuring 3-D parametric modeling using commercially available software. Studies in parametric design and design intent, applying surfaces, rendering, and creating animated presentations for the automotive and aerospace industries.
Pre-requisite(s): PDD 3470.

PDD 4500 - Hydraulic and Pneumatic Applications

Credits: (3)
Typically Taught Spring Semester: Full Sem
Course Fee: $35.00
Course Fee Purpose: Software licensing, lab computers and support
Description: Examines the components of hydraulic and pneumatic systems, including a detailed study of each type of system and the integration of all components required for machine design. The symbols used to document hydraulic and pneumatic systems and the selection of components from vendor catalogs will be included in the detailing of complete machines.
Pre-requisite(s): MET 3400.

PDD 4600 - Senior Project I (Design)

Credits: (2)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: A Capstone project spanning two consecutive semesters. This semester concentrates on documenting the design solution. The project includes application of skills, knowledge, techniques and concepts to design and manufacture or construct a project. Emphasis placed on integrated project management including preparation of drawings, creation of presentations, project organization, control, and documentation. Prerequisite: Senior Project Application form, senior standing, approval of the department, and Associates Degree in DET or equivalent. (A student must apply for senior project one semester before the start of the senior project.)
Co-Requisite(s): PDD 4610. Cross-listed with MFET 4610L.

PDD 4610 - Senior Project II (Build)

Credits: (2)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: A Capstone project spanning two consecutive semesters. This semester concentrates on manufacturing or building the design solution. The project includes application of skills, knowledge, techniques and concepts to design and manufacture or construct a project. Emphasis placed on integrated project management including preparation of drawings, creation of presentations, project organization, control, and documentation.
Pre-requisite(s): PDD 4600. Cross-listed with: MFET 4620L.

PDD 4830 - Directed Readings

Credits: (1-3)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Directed readings in Product Design and Development. Must have department approval. Can be taken for 1-3 credit hours twice for a maximum of 6 credits.

PDD 4890 INT - Cooperative Work Experience

Credits: (1-3)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Open to all advanced students in Product Design and Development. Department approval required before registration. Provides academic credit for on-the-job experience. Grade and amount of credit will be determined by the department. Can be taken for 1-3 credit hours twice for a maximum of 6 credits.

PDD 4920 - Short Courses, Workshops, Institutes, and Special Programs
Credits: (1-6)

Workshop

Typically Taught Summer Semester: Full Sem
Description: Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript. May be repeated for a total maximum of 6 credit hours.

PE 1010 - Aerobics, Level I

Credits: (1)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Course Fee: $5.00
Course Fee Purpose: This course has a fee attached. Course fees are established in order to benefit the students in this course and may, among other things, be used to cover the costs of equipment replacement and maintenance, consumable materials, or to meet specific regulatory requirements. Examples of course fee expenditures for this specific course include replacing heavy bags, exercise balls, mats, fitness bands, flooring, HR monitors, steps, toning bars, weight plates, bars, foam rollers, and other Aerobics equipment/training aides, and technology based teaching and learning aides, including but not limited to apps and other digitally based resources.
Description: A physical activity course that engages students in aerobic exercises to improve cardiovascular and respiratory functioning.

PE 1011 - Aerobics, Level II

Credits: (1)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Course Fee: $5.00
Course Fee Purpose: This course has a fee attached. Course fees are established in order to benefit the students in this course and may, among other things, be used to cover the costs of equipment replacement and maintenance, consumable materials, or to meet specific regulatory requirements. Examples of course fee expenditures for this specific course include replacing heavy bags, exercise balls, mats, fitness bands, flooring, HR monitors, steps, toning bars, weight plates, bars, foam rollers, and other Aerobics equipment/training aides, and technology based teaching and learning aides, including but not limited to apps and other digitally based resources.
Description: A physical activity course that engages students in aerobic exercises to improve cardiovascular and respiratory functioning.

PE 1012 - Aerobics, Level III

Credits: (1)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Course Fee: $5.00
Course Fee Purpose: This course has a fee attached. Course fees are established in order to benefit the students in this course and may, among other things, be used to cover the costs of equipment replacement and maintenance, consumable materials, or to meet specific regulatory requirements. Examples of course fee expenditures for this specific course include replacing heavy bags, exercise balls, mats, fitness bands, flooring, HR monitors, steps, toning bars, weight plates, bars, foam rollers, and other Aerobics equipment/training aides, and technology based teaching and learning aides, including but not limited to apps and other digitally based resources.
Description: A physical activity course that engages students in aerobic exercises to improve cardiovascular and respiratory functioning.

PE 1035 - Zumba, Level I

Credits: (1)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Course Fee: $5.00
Course Fee Purpose: This course has a fee attached. Course fees are established in order to benefit the students in this course and may, among other things, be used to cover the costs of equipment replacement and maintenance, consumable materials, or to meet specific regulatory requirements. Examples of course fee expenditures for this specific course include replacing toning sticks, chain tassels, Zumba belts, wipe away sleeves/sweatbands, and other Zumba equipment/training aides, and technology based teaching and learning aides, including but not limited to apps and other digitally based resources.
Description: A physical activity course that introduces students to Zumba; an activity that fuses cardiovascular fitness, upbeat world rhythms, and easy-to-follow choreography for a total-body workout.

PE 1036 - Zumba, Level II

Credits: (1)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Course Fee: $5.00
Course Fee Purpose: This course has a fee attached. Course fees are established in order to benefit the students in this course and may, among other things, be used to cover the costs of equipment replacement and maintenance, consumable materials, or to meet specific regulatory requirements. Examples of course fee expenditures for this specific course include replacing toning sticks, chain tassels, Zumba belts, wipe away sleeves/sweatbands, and other Zumba equipment/training aides, and technology based teaching and learning aides, including but not limited to apps and other digitally based resources.
Description: A physical activity course that introduces students to Zumba; an activity that fuses cardiovascular fitness, upbeat world rhythms, and easy-to-follow choreography for a total-body workout.
in this course and may, among other things, be used to cover the costs of equipment replacement and maintenance, consumable materials, or to meet specific regulatory requirements. Examples of course fee expenditures for this specific course include replacing toning sticks, chain tassels, Zumba belts, wipe away sleeves/sweatbands, and other Zumba equipment/training aides, and technology based teaching and learning aides, including but not limited to apps and other digitally based resources.

**Description:** A physical activity course that introduces students to Zumba; an activity that fuses cardiovascular fitness, upbeat world rhythms, and easy-to-follow choreography for a total-body workout.

**PE 1037 - Zumba, Level III**

**Credits:** (1)
**Typically Taught Fall Semester:** Full Sem
**Typically Taught Spring Semester:** Full Sem
**Course Fee:** $5.00
**Course Fee Purpose:** This course has a fee attached. Course fees are established in order to benefit the students in this course and may, among other things, be used to cover the costs of equipment replacement and maintenance, consumable materials, or to meet specific regulatory requirements. Examples of course fee expenditures for this specific course include replacing toning sticks, chain tassels, Zumba belts, wipe away sleeves/sweatbands, and other Zumba equipment/training aides, and technology based teaching and learning aides, including but not limited to apps and other digitally based resources.

**Description:** A physical activity course that introduces students to Zumba; an activity that fuses cardiovascular fitness, upbeat world rhythms, and easy-to-follow choreography for a total-body workout.

**PE 1040 - Walking for Fitness, Level I**

**Credits:** (1)
**Typically Taught Summer Semester:** Full Sem
**Typically Taught Fall Semester:** Full Sem
**Typically Taught Spring Semester:** Full Sem
**Course Fee:** $5.00
**Course Fee Purpose:** This course has a fee attached. Course fees are established in order to benefit the students in this course and may, among other things, be used to cover the costs of equipment replacement and maintenance, consumable materials, or to meet specific regulatory requirements. Examples of course fee expenditures for this specific course include replacing yoga bands for stretching, foam rollers, compasses, wrist weights, ankle weights, HR monitors, and other Walking equipment/training aids, and technology based teaching and learning aides, including but not limited to apps and other digitally based resources.

**Description:** A physical activity course that engages students in walking to improve physical fitness.

**PE 1041 - Walking for Fitness, Level II**

**Credits:** (1)
**Typically Taught Summer Semester:** Full Sem
**Typically Taught Fall Semester:** Full Sem
**Typically Taught Spring Semester:** Full Sem
**Course Fee:** $5.00
**Course Fee Purpose:** This course has a fee attached. Course fees are established in order to benefit the students in this course and may, among other things, be used to cover the costs of equipment replacement and maintenance, consumable materials, or to meet specific regulatory requirements. Examples of course fee expenditures for this specific course include replacing yoga bands for stretching, foam rollers, compasses, wrist weights, ankle weights, HR monitors, and other Walking equipment/training aids, and technology based teaching and learning aides, including but not limited to apps and other digitally based resources.

**Description:** A physical activity course that engages students in walking to improve physical fitness.

**PE 1042 - Walking for Fitness, Level III**

**Credits:** (1)
**Typically Taught Summer Semester:** Full Sem
**Typically Taught Fall Semester:** Full Sem
**Typically Taught Spring Semester:** Full Sem
**Course Fee:** $5.00
**Course Fee Purpose:** This course has a fee attached. Course fees are established in order to benefit the students in this course and may, among other things, be used to cover the costs of equipment replacement and maintenance, consumable materials, or to meet specific regulatory requirements. Examples of course fee expenditures for this specific course include replacing yoga bands for stretching, foam rollers, compasses, wrist weights, ankle weights, HR monitors, and other Walking equipment/training aids, and technology based teaching and learning aides, including but not limited to apps and other digitally based resources.

**Description:** A physical activity course that engages students in walking to improve physical fitness.

**PE 1043 - Jogging, Level I**

**Credits:** (1)
**Typically Taught Fall Semester:** Full Sem
**Typically Taught Spring Semester:** Full Sem
**Course Fee:** $5.00
Course Fee Purpose: This course has a fee attached. Course fees are established in order to benefit the students in this course and may, among other things, be used to cover the costs of equipment replacement and maintenance, consumable materials, or to meet specific regulatory requirements. Examples of course fee expenditures for this specific course include replacing heart rate monitors, heart rate straps, exercise balls, foam rollers, jump ropes, box jumps, and other jogging equipment/training aides, and technology based teaching and learning aides, including but not limited to apps and other digitally based resources.

Description: A physical activity course that engages students in jogging to improve physical fitness and health. Topics in the biomechanics of running efficiently and safely, heart rate, energy expenditure, body composition, and diet may be taught.

PE 1044 - Jogging, Level II

Credits: (1)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Course Fee: $5.00

Course Fee Purpose: This course has a fee attached. Course fees are established in order to benefit the students in this course and may, among other things, be used to cover the costs of equipment replacement and maintenance, consumable materials, or to meet specific regulatory requirements. Description: A physical activity course that allows students to learn and develop the skills needed to perform the martial art of Tae Kwon-do through combat and self-defense while incorporating sport and exercise.

**PE 1515 - Sailboating**

Credits: (1)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem

Description: A physical activity course that introduces students to the outdoor activity of sailboating. The fundamental skills of sailboating will be addressed for both beginning and recreational sailors.

**PE 1557 - Bicycling, Level I**

Credits: (1)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem

Description: A physical activity course that allows students to learn and develop the skills and knowledge needed to safely enjoy bicycling.
PE 1558 - Bicycling, Level II

Credits: (1)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: A physical activity course that allows students to learn and develop the skills and knowledge needed to safely enjoy bicycling.

PE 1559 - Bicycling, Level III

Credits: (1)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: A physical activity course that allows students to learn and develop the skills and knowledge needed to safely enjoy bicycling.

PE 1575 - Rodeo I

Credits: (1)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: A physical activity course that engages students to learn how to participate in rodeo events. Students will learn various skills, history and culture, and styles, as well as how to maintain a high level of fitness through participation in rodeo. May be repeated 2 times up to 3 credit hours.

PE 1670 - Ice Skating, Level I

Credits: (1)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Course Fee: $10.00
Course Fee Purpose: This course has a fee attached. Course fees are established in order to benefit the students in this course and may, among other things, be used to cover the costs of equipment replacement and maintenance, consumable materials, or to meet specific regulatory requirements. Examples of course fee expenditures for this specific course include replacing ice skate rentals, admittance into the ice sheet, and other Ice Skating equipment/training aides, and technology based teaching and learning aides, including but not limited to apps and other digitally based resources
Description: A physical activity course that introduces students to ice skating. The fundamental skills of ice skating will be addressed for both beginning and recreational skaters.

PE 1710 - Country Swing Dance Level I

Credits: (1)
Typically Taught Summer Semester: Full Sem, 1st Blk, 2nd Blk
Typically Taught Fall Semester: Full Sem, 1st Blk, 2nd Blk
Typically Taught Spring Semester: Full Sem, 1st Blk, 2nd Blk
Course Fee: $5.00
Course Fee Purpose: This course has a fee attached. Course fees are established in order to benefit the students in this course and may, among other things, be used to cover the costs of equipment replacement and maintenance, consumable materials, or to meet specific regulatory requirements. Examples of course fee expenditures for this specific course include replacing stereo equipment, dance props, music, and other Country Square Dance equipment/training aides, and technology based teaching and learning aides, including but not limited to apps and other digitally based resources
Description: A physical activity course that engages students to learn how to dance in the form of Country swing. Students will learn various skills, history and culture, and styles, as well as how to maintain a high level of fitness through participation in Country Swing Dancing. May be repeated 12 times with a maximum of 12 credit hours.

PE 1711 - Country Swing Dance Level II

Credits: (1)
Typically Taught Summer Semester: Full Sem, 1st Blk, 2nd Blk
Typically Taught Fall Semester: Full Sem, 1st Blk, 2nd Blk
Typically Taught Spring Semester: Full Sem, 1st Blk, 2nd Blk
Course Fee: $10.00
Course Fee Purpose: This course has a fee attached. Course fees are established in order to benefit the students in this course and may, among other things, be used to cover the costs of equipment replacement and maintenance, consumable materials, or to meet specific regulatory requirements. Examples of course fee expenditures for this specific course include replacing stereo equipment, dance props, music, and other Country Square Dance equipment/training aides, and technology based teaching and learning aides, including but not limited to apps and other digitally based resources
Description: A physical activity course that engages students to learn how to dance in the form of Country swing. Students will learn various skills, history and culture, and styles, as well as how to maintain a high level of fitness through participation in Country Swing Dancing. May be repeated 12 times with a maximum of 12 credit hours.

PE 1712 - Country Swing Dance Level III

Credits: (1)
Typically Taught Summer Semester: Full Sem, 1st Blk, 2nd Blk
Typically Taught Fall Semester: Full Sem, 1st Blk, 2nd Blk
Typically Taught Spring Semester: Full Sem, 1st Blk, 2nd Blk
Course Fee: $10.00
Course Fee Purpose: This course has a fee attached. May be repeated 12 times for a maximum of 12 credit hours.

PE 1767 - Hip Hop for Fitness Level III

Credits: (1)
Typically Taught Summer Semester: Full Sem, 1st Blk, 2nd Blk
Typically Taught Fall Semester: Full Sem, 1st Blk, 2nd Blk
Typically Taught Spring Semester: Full Sem, 1st Blk, 2nd Blk
Course Fee: $5.00
Course Fee Purpose: This course has a fee attached.
Course fees are established in order to benefit the students in this course and may, among other things, be used to cover the costs of equipment replacement and maintenance, consumable materials, or to meet specific regulatory requirements. Examples of course fee expenditures for this specific course include replacing stereo equipment, dance props, music, and other Hip-hop equipment/training aides, and technology based teaching and learning aides, including but not limited to apps and other digitally based resources.

**Description:** A physical activity course that engages students to learn how to dance in the form of Hip-Hop. Students will learn various skills, history and culture, and styles, as well as how to maintain a high level of fitness through participation in Hip-Hop. May be repeated 12 times for a maximum of 12 credit hours.

**PEP 1079 - Weightlifting, Level III**

**Credits:** (1)

**Typically Taught Fall Semester:** Full Sem  
**Typically Taught Spring Semester:** Full Sem

**Description:** A vigorous physical conditioning course intended to assist students in skill development specific to Olympic weightlifting. The clean-and-jerk, and snatch, lifts will be emphasized exclusively.

**Pre-requisite(s):** PE 1080, or instructor approval.

**PEP 2000 - Foundations of Physical Education**

**Credits:** (3)

**Typically Taught Fall Semester:** Full Sem  
**Typically Taught Spring Semester:** Full Sem

**Course Fee:** $35.00  
**Course Fee Purpose:** This course has a fee attached. Course fees are established in order to benefit the students in this course and may, among other things, be used to cover the costs of equipment replacement and maintenance, consumable materials, or to meet specific regulatory requirements. Examples of course fee expenditures for this specific course include replacing basketballs, scarves, hula hoops, coloring/art equipment, balloons, ribbon wands, app based software to aid teaching, purchasing your PEP Polo for wear in school visits and practicums, and other equipment used in Physical Education and in this course.

**Description:** Examination of history, philosophy, career opportunities, issues, and trends in physical education. Emphasis on professional preparation requirements and competencies.

**PEP 2100 - Introduction to Coaching Sport**

**Credits:** (3)

**Typically Taught Fall Semester:** Full Sem  
**Typically Taught Spring Semester:** Full Sem

**Description:** Examines various coaching philosophies and styles along with the duties and responsibilities of the coach, with an emphasis on leadership skills, organizational and administrative duties, the legal responsibilities that affects sport and the evaluation of the athletic program.

**PEP 2480 - Fitness for Life Concepts**

**Credits:** (1)

**Description:** Prescribe individualized programs for weight control, cardiovascular endurance, strength and flexibility. Note: This course is not currently offered.

**PEP 2500 - Sport Pedagogy**

**Credits:** (3)

**Typically Taught Fall Semester:** Full Sem  
**Typically Taught Spring Semester:** Full Sem

**Course Fee:** $10.00  
**Course Fee Purpose:** This course has a fee attached. Course fees are established in order to benefit the students in this course and may, among other things, be used to cover the costs of equipment replacement and maintenance, consumable materials, or to meet specific regulatory requirements. Examples of course fee expenditures for this specific course include replacing basketballs, scarves, hula hoops, coloring/art equipment, balloons, ribbon wands, app based software to aid teaching, and other equipment used in Physical Education and in this course.

**Description:** This course is designed to provide information on skill development, practice and game planning, season schedules, creating drills and practice sessions, motivating players and coaching tips.

**PEP 2600 - Growth and Motor Development**

**Credits:** (3)

**Typically Taught Fall Semester:** Full Sem  
**Typically Taught Spring Semester:** Full Sem

**Description:** Description of the structural and functional principles of human growth and development. Introduction of motor learning principles with emphasis on their application to pedagogy.

**Pre-requisite(s):** PEP 2000 or concurrent enrollment in PEP 2000.
PEP 2700 SS - Sociohistorical Aspects of Sport

Credits: (3)
Typically Taught Summer Semester: Online
Typically Taught Fall Semester: Online
Typically Taught Spring Semester: Online
Description: This course examines the sociological and historical aspects of sport in American society with the purpose of gaining an understanding of how race, class, gender, ethnicity, politics, and religion can bind Americans in a community of shared values and aspirations. Students will explore the unifying power of sport, as well as how sport serves to reproduce many inequalities present in the larger society. Gaining an understanding of how these issues, and others, interplay with sport is critical for those aspiring to become successful sport coaches, as well as for those who simply wish to gain an understanding of the complex relationship between sport and society (e.g., parents, fans, and sport participants).

PEP 2800 - Individual Projects

Credits: (1-4)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: A comprehensive study of a significant problem in the field of physical education. Hours to be arranged. May be repeated 3 times up to 4 credit hours.

PEP 2920 - Short Courses, Workshops, Institutes, and Special Programs

Credits: (1-6)
Workshop
Description: Consult the semester class schedule for current offering under this number. The specific title and credit authorized will appear on the student transcript. May be repeated for a total maximum of 6 credit hours. Note: This course is taught as needed.

PEP 3100 - Principles of Motor Learning and Motor Development

Credits: (3)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: The purpose of this course is to introduce and explore motor learning and motor development principles. Particular focus will be on how the application of motor learning and motor development impact the physical education and coaching learning environments. Pre-requisite(s): PEP 2000.

PEP 3240 - Skill Development and Methods of Field Sports

Credits: (2)
Typically Taught Fall Semester: Full Sem
Description: The purpose of this course is to provide prospective physical education teachers experiences that will lead to skill acquisition, the ability to analyze, diagnose and correct errors in skill performance, the development of skills, drills, and game progressions, and the pedagogical skills needed to teach a variety of field sports (e.g., flag football, soccer, and softball). Pre-requisite/Co-requisite: Prerequisite or concurrent enrollment in PEP 2000.

PEP 3242 - Skill Development and Methods of Court Sports

Credits: (2)
Typically Taught Spring Semester: Full Sem
Description: The purpose of this course is to provide prospective physical education teachers experiences that will lead to skill acquisition, the ability to analyze, diagnose and correct errors in skill performance, the development of skills, drills, and game progressions, and the pedagogical skills needed to teach a variety of court sports (e.g., basketball and volleyball). Pre-requisite/Co-requisite: Prerequisite or concurrent enrollment in PEP 2000.

PEP 3260 - Methods of Teaching Lifelong Activities

Credits: (2)
Typically Taught Fall Semester: Full Sem
Description: Designed to give students a broad variety of noncompetitive/nonconventional activities and sports that are beneficial as lifetime sports. Pre-requisite/Co-requisite: Prerequisite or concurrent enrollment in PEP 2000.

PEP 3262 - Methods of Teaching Individual Sports

Credits: (2)
Typically Taught Spring Semester: Full Sem
Description: The purpose of this course is to provide
prospective physical education teachers experiences that will lead to skill acquisition, the ability to analyze, diagnose and correct errors in skill performance, the development of skills, drills, and game progressions, and the pedagogical skills needed to teach a variety of individual sports (e.g., golf, swimming, and track and field).

**Pre-requisite/Co-requisite:** Prerequisite or concurrent enrollment in PEP 2000.

**PEP 3264 - Skill Development and Methods of Teaching Racket Sports**

**Credits:** (2)
**Typically Taught Fall Semester:** Full Sem
**Description:** The purpose of this course is to provide prospective physical education teachers experiences that will lead to skill acquisition, the ability to analyze, diagnose and correct errors in skill performance, the development of skills, drills, and game progressions, and the pedagogical skills needed to teach a variety of racket sports (e.g., badminton, racquetball, and tennis/pickleball).

**Pre-requisite/Co-requisite:** PEP 2000.

**PEP 3270 - Methods of Teaching Aerobic Conditioning**

**Credits:** (2)
**Typically Taught Spring Semester:** Full Sem
**Description:** Examine, evaluate and practice aerobic conditioning theories and current practices for the purpose of preparing entry level professionals to select, incorporate, and facilitate appropriate aerobic activities, as well as, design and evaluate the effectiveness of aerobic conditioning programs.

Two lecture/labs per week.

**Pre-requisite(s):** PEP 2000, PEP 2600 or concurrent enrollment in PEP 2000 or PEP 2600.

**Pre-requisite/Co-requisite:** Prerequisite or concurrent enrollment in PEP 2000.

**PEP 3280 - Methods of Teaching Strength and Conditioning**

**Credits:** (3)
**Typically Taught Fall Semester:** Full Sem
**Typically Taught Spring Semester:** Full Sem
**Course Fee:** $10.00
**Course Fee Purpose:** This course has a fee attached. Course fees are established in order to benefit the students in this course and may, among other things, be used to cover costs of equipment replacement and maintenance, consumable materials, licensure examinations, or to meet specific regulatory requirements. Examples of course fee expenditures for this specific course include laboratory equipment costs and maintenance, as well as the provision of test preparation materials for the CSCS exam.

**Description:** Examine, evaluate and practice strength and conditioning theories and current practices for the purpose of preparing entry level professionals to select, incorporate, and facilitate appropriate conditioning activities, as well as, design and evaluate the effectiveness of strength and conditioning programs.

Two lecture/labs per week.

**Pre-requisite(s):** PE 1080.

**PEP 3290 - Methods of Teaching Fitness for Life**

**Credits:** (3)
**Typically Taught Fall Semester:** Full Sem
**Typically Taught Spring Semester:** Full Sem
**Description:** This course is designed to introduce the fundamental principles of cardiovascular fitness, flexibility, and strength development, as well as to assist each individual to design and implement their own personal fitness program based on individual needs, assessments, and personal preferences. Students will explore resources for and methods of teaching the principles of fitness in the secondary school setting. This is a required course for the physical education major and the physical education/coaching minor.

**Pre-requisite/Co-requisite:** Prerequisite or concurrent enrollment in PEP 2000.

**PEP 3310 - Techniques for Teaching Aquatics**

**Credits:** (2)
**Description:** Practice of swimming and related aquatic skills, teaching techniques for all levels of swimming, and the acquisition of materials to use for teaching swimming. Course leads to American Red Cross certification as a Water Safety Instructor.

**Pre-requisite(s):** Skills screening will be required.

**Note:** This course is not currently offered.

**PEP 3320 - Techniques for Teaching Lifeguarding**

**Credits:** (2)
**Description:** Professional techniques and methods in teaching water safety, educational programs, lifeguard training and reviews, and lifeguard progressions are taught.
This course leads to Red Cross certification as a lifeguard instructor.
Note: This course is taught as needed.

**PEP 3400 - Sport Psychology for Coaches**

Credits: (3)
Typically Taught Summer Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: This course involves understanding the study and analysis of human behavior patterns as they relate to sport performance. Students (coaches) are provided with necessary information regarding mental processes, and applicable uses for this information. Recommended Prerequisite: PSY 1010.

**PEP 3520 - Curriculum and Assessment**

Credits: (2)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Course Fee: $10.00
Course Fee Purpose: This course has a fee attached. Course fees are established in order to benefit the students in this course and may, among other things, be used to cover the costs of equipment replacement and maintenance, consumable materials, or to meet specific regulatory requirements. Examples of course fee expenditures for this specific course include replacing basketballs, scarves, hula hoops, coloring/art equipment, balloons, ribbon wands, app based software to aid teaching, and other equipment used in Physical Education and in this course.
Description: Course emphasis is on developing curriculum necessary to meet the needs of diverse learners. Emphasis is also on development of assessment strategies that correctly match objectives and instruction. The students are given a basic understanding of the statistical use of data for grade determination. Students will have hands on experience in designing and implementing various assessment (affective, cognitive, and psychomotor) and grading methods relating to physical education objectives. Students will also be provided the opportunity to learn how to design and implement lessons using up-to-date forms of technology that are currently being used in public schools.
Pre-requisite(s): PEP 2000.
Co-Requisite(s): PEP 3520L.

**PEP 3520L - Curriculum and Assessment Lab**

Credits: (1)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: This course will avail students a practicum opportunity to apply in an area K-12 school the theory learned and the curriculum prepared in the Curriculum and Assessment PEP 3520 course. Students will develop lessons and assessments to determine students learning and implement them in a teaching experience in the school setting.
Co-Requisite(s): PEP 3520.

**PEP 3600 - Measurement and Statistics in Exercise Science**

Credits: (3)
Typically Taught Summer Semester: 1st Blk
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: The selection, administration, and interpretation of measurement techniques and statistical procedures for the purpose of evaluation and research as related to exercise science and health promotion.
Pre-requisite(s): Meet WSU Quantitative Literacy requirement and complete WEB 1700.

**PEP 3610 - Assessment/Technology in Physical Education**

Credits: (3)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: This course is designed to help students develop assessment strategies that correctly match objectives and instruction. The students are given a basic understanding of the statistical use of data for grade determination. Students will have hands on experience in designing and implementing various assessment (affective, cognitive, and psychomotor) and grading methods relating to physical education objectives. Students will also be provided the opportunity to learn how to design and implement lessons using up-to-date forms of technology that are currently being used in public schools.
Pre-requisite(s): A minimum of 3 Skill Development and Methods of Teaching Courses.

**PEP 3620 - Methods of Teaching Physical Education and Health for Elementary Teachers**
Credits: (3)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Course Fee: $7.00
Course Fee Purpose: This course has a fee attached. Course fees are established in order to benefit the students in this course and may, among other things, be used to cover the costs of equipment replacement and maintenance, consumable materials, or to meet specific regulatory requirements. Examples of course fee expenditures for this specific course include replacing basketballs, scarves, hula hoops, coloring/art equipment, balloons, ribbon wands, app based software to aid teaching, and other equipment used in Physical Education and in this course.

Description: The course is designed to provide students with instructional methods, activities and skills for teaching Physical Education K-6 and Health Education. The course will include a 15-hour hands-on-practicum teaching experience in an area public school. The content of this course will be presented through various instructional strategies and teaching models.

Pre-requisite/Co-requisite: Prerequisite/Co-requisite: EDUC 3100.

PEP 3630 - Methods of Teaching Elementary School Physical Education

Credits: (3)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Course Fee: $10.00
Course Fee Purpose: This course has a fee attached. Course fees are established in order to benefit the students in this course and may, among other things, be used to cover the costs of equipment replacement and maintenance, consumable materials, or to meet specific regulatory requirements. Examples of course fee expenditures for this specific course include replacing basketballs, scarves, hula hoops, coloring/art equipment, balloons, ribbon wands, app based software to aid teaching, and other equipment used in Physical Education and in this course.

Description: The course is designed to provide students with instructional methods, activities and skills for teaching Physical Education K-6 and Health Education. The course will include a 15-hour hands-on-practicum teaching experience in an area public school. The content of this course will be presented through various instructional strategies and teaching models.

Pre-requisite(s): PEP 2000 or PEP 3100.

PEP 3660 - Adapted Physical Education

Credits: (3)
Typically Taught Fall Semester: Full Sem

Course Fee: $10.00
Course Fee Purpose: This course has a fee attached. Course fees are established in order to benefit the students in this course and may, among other things, be used to cover the costs of equipment replacement and maintenance, consumable materials, or to meet specific regulatory requirements. Examples of course fee expenditures for this specific course include replacing basketballs, scarves, hula hoops, coloring/art equipment, balloons, ribbon wands, app based software to aid teaching, and other equipment used in Physical Education and in this course.

Description: The purpose of this course is to introduce and explore various congenital and acquired disabilities as well as gain an understanding of the legal mandates for individuals with disabilities and their educational rights. Particular emphasis and focus of this course will be on the application of various teaching methodologies to ensure inclusion for all in the physical education learning environment. In addition to meeting in the classroom, students will be required to participate in practicums both in the local school systems and at Weber State University.

Pre-requisite(s): PEP 3100; 3 classes of PEP 3240 - 3290.

PEP 4700 - Methods of Teaching Junior High School Physical Education

Credits: (3)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Course Fee: $10.00
Course Fee Purpose: This course has a fee attached. Course fees are established in order to benefit the students in this course and may, among other things, be used to cover the costs of equipment replacement and maintenance, consumable materials, or to meet specific regulatory requirements. Examples of course fee expenditures for this specific course include replacing basketballs, scarves, hula hoops, coloring/art equipment, balloons, ribbon wands, app based software to aid teaching, and other equipment used in Physical Education and in this course.

Description: Provides prospective elementary physical education teachers with the knowledge, skills, and experience necessary to delivering quality physical education lessons for elementary school-aged students. Principles, concepts, strategies, classroom management, skill development, and assessment will be explored.

Pre-requisite(s): PEP 2000, PEP 3100.

PEP 4710 - Methods of Teaching High School Physical Education

Credits: (3)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Course Fee: $10.00
Course Fee Purpose: This course has a fee attached. Course fees are established in order to benefit the students in this course and may, among other things, be used to cover the costs of equipment replacement and maintenance, consumable materials, or to meet specific regulatory requirements. Examples of course fee expenditures for this specific course include replacing basketballs, scarves, hula hoops, coloring/art equipment, balloons, ribbon wands, app based software to aid teaching, and other equipment used in Physical Education and in this course.

Description: Provides prospective Junior High School physical education teachers with the knowledge, skills, and experience necessary to delivering quality physical education lessons for Junior High School-aged students. Principles, concepts, strategies, classroom management, skill development, and assessment will be explored.

Pre-requisite(s): PEP 2000, PEP 3100.
Credits: (3)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Course Fee: $10.00
Course Fee Purpose: This course has a fee attached. Course fees are established in order to benefit the students in this course and may, among other things, be used to cover the costs of equipment replacement and maintenance, consumable materials, or to meet specific regulatory requirements. Examples of course fee expenditures for this specific course include replacing basketballs, scarves, hula hoops, coloring/art equipment, balloons, ribbon wands, app based software to aid teaching, and other equipment used in Physical Education and in this course.

Description: Provides prospective high school physical education teachers with the knowledge, skills, and experience necessary to delivering quality physical education lessons for high school-aged students. Principles, concepts, strategies, classroom management, skill development, and assessment will be explored.

Pre-requisite(s): PEP 2000, PEP 3100.

PEP 4800 - Individual Projects

Credits: (1-4)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: A comprehensive study of a significant problem in the field of physical education. Hours to be arranged. For seniors only.
May be repeated 3 times up to 4 credit hours.

PEP 4830 - Directed Readings

Credits: (1-3)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Individualized readings and investigation of professional literature and its application to current and future specialized topics supervised by a faculty member. Extensive reading and formal writing required. Hours to be arranged. For seniors only.
May be repeated 2 times up to 3 credit hours.

PEP 4860C INT - Field Experience Coaching

Credits: (3)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Work experience which applies prior academic learning in a supervised setting.

Pre-requisite/Co-requisite: PEP 2100 and PEP 2500.

PEP 4920 - Short Courses, Workshops, Institutes, and Special Programs

Credits: (1-6)
Workshop
Description: Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript. May be repeated for a total maximum of 6 credit hours.
Note: This course is taught as needed.

PEP 4990 INT - Field Experience/Senior Seminar

Credits: (3)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: This course is designed to provide students with the opportunity to gain practical experiences in the field of physical education by teaching a class or classes in local public school grades 6-12. The course is also designed for students to meet and discuss a variety of issues relevant to preparing students to be physical educators.

Pre-requisite(s): PEP 3520, 12 credits of PEP 3240 - 3290. No substitutions can be made for this course.

PEP 6010 - Leadership in Physical Education

Credits: (3)
Description: Designed to provide graduate students with an understanding of both theoretical and practical aspects of leadership in their respective fields of study. The ultimate goal of the course is to encourage daily application of leadership concepts in the personal and professional lives of the students.
Note: This course is taught as needed.

PEP 6100 - Current Trends in Health and Physical Education

Credits: (3)
Description: A study of health and physical education perspectives with an emphasis on the changes, trends, and future prospects that will affect the profession and the needs of those they serve.
Note: This course is taught as needed.
PEP 6370 - Exercise Management for Special Populations

Credits: (2)
Description: Exercise management for populations with special conditions. Overview of each condition's unique physiology, effects of the condition on the exercise response, effects of exercise training on the condition, and recommendations for exercise testing and programming are presented in a selected topics format.
Pre-requisite(s): ESS 2300 and ESS 3510.
Note: This course is taught as needed.

PEP 6420 - Curriculum in Physical Education

Credits: (3)
Description: Designed to provide an understanding of the role and importance of physical education in today's society, steps involved in curriculum planning, trends and issues in curriculum and to orient the student to various ideas in curriculum design.
Note: This course is taught as needed.

PEP 6520 - Improving Physical Education

Credits: (3)
Description: Designed for elementary classroom teachers to provide an opportunity for the teacher to further develop teaching skills, personal performance skills, knowledge and competencies. A major goal of this course will be to help the classroom teacher gain additional confidence in teaching physical education activities.
Note: This course is taught as needed.

PEP 6830 - Motor Learning

Credits: (3)
Description: An in-depth study of the psychomotor domain of development. Special emphasis is given to skilled performance, learning theory, motor abilities, individual differences, developmental considerations, instructional and training procedures. Secondary school and athletic populations are considered regarding these topics.
Note: This course is taught as needed.

PHIL 1000 HU/EDI - Introduction to Philosophy

Credits: (3)
Typically Taught Summer Semester: Online
Typically Taught Fall Semester: Full Sem, Online
Typically Taught Spring Semester: Full Sem, Online
Description: An introduction to the methods and problems of philosophy, with special emphasis on topics pertaining to the nature of reality, the theory of knowledge, and value theory.

PHIL 1120 HU - Contemporary Moral Problems

Credits: (3)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem, Online
Typically Taught Spring Semester: Full Sem, Online
Description: An introduction to ethical theories and their application to contemporary moral issues, such as human cloning, abortion, and physician-assisted suicide.

PHIL 1250 HU - Critical Thinking

Credits: (3)
Typically Taught Summer Semester: Online
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: An introduction to informal logic, focusing on issues of logical form, standards of good and bad reasoning, and argumentative writing.

PHIL 2200 - Deductive Logic

Credits: (3)
Typically Taught Fall Semester: Full Sem
Description: An introduction to the concepts and methods of modern symbolic logic. Emphasis is placed on problems of translating English expressions into logical symbols, on the development of skills in using the formal proof procedures of sentential and predicate logic, and development of the predicate calculus.

PHIL 2920 - Short Courses, Workshops, Institutes, and Special Programs

Credits: (1-6)
Workshop Description: Consult the semester class schedule for the current offering under this number. The specific title and number of credits authorized will appear on the student's transcript.
May be repeated for a total maximum of 6 credit hours.
Note: This course is offered as needed.

PHIL 3010 - History of Philosophy: Classical & Medieval

Credits: (3)
Typically Taught Spring Semester: Full Sem even years
Description: A survey of the major philosophers and issues from the Presocratics to the beginning of the early modern period, covering such major figures as Plato, Aristotle, Plotinus, Augustine, and Aquinas.

PHIL 3020 - History of Philosophy: Modern

Credits: (3)
Typically Taught Spring Semester: Full Sem odd years
Description: A topical survey of the major philosophers and issues from the seventeenth century to the beginning of the nineteenth century (Descartes to Kant).

PHIL 3150 - Existentialism

Credits: (3)
Typically Taught Fall Semester: Full Sem
Description: An examination of central themes in Existentialism, including anxiety, dread, freedom, awareness of death, and the consciousness and meaning of existence. These themes will be traced through the writings of such writers as Kierkegaard, Nietzsche, Heidegger, Camus, Sartre, and Simone de Beauvior.

PHIL 3200 - Philosophy of Democracy

Credits: (3)
Typically Taught Spring Semester: Full Sem odd years
Description: An examination of the ideals of and justifications for democratic institutions.

PHIL 3250 - Philosophy of Law

Credits: (3)
Typically Taught Spring Semester: Full Sem even years
Description: An examination of central topics in the philosophy of law, including the relationship between law and morality, the justification of punishment, and legal reasoning.

PHIL 3350 - Medical Ethics

Credits: (3)
Typically Taught Fall Semester: Full Sem
Description: A survey of fundamental moral issues arising from the practice of medicine and from advances in medical science.

PHIL 3500 - Philosophy of Western Religion

Credits: (3)
Typically Taught Fall Semester: Full Sem even years
Description: A survey of topics in the philosophy of religion, especially as they pertain to Judaism, Christianity, and Islam.

PHIL 3550 - Philosophy of Eastern Religion

Credits: (3)
Typically Taught Spring Semester: Full Sem even years
Description: An examination of classic philosophical issues in Eastern religious thought, with a special emphasis on Hinduism, Buddhism, Taoism, and Confucianism.

PHIL 3650 - Aesthetics

Credits: (3)
Typically Taught Fall Semester: Full Sem
Description: An examination of philosophical issues concerning the nature and importance of aesthetic experience and appreciation in the arts and the environment, including questions about the definition of art, artistic representation and expression, and aesthetic value.

PHIL 3700 - Environmental Philosophy

Credits: (3)
Typically Taught Fall Semester: Full Sem
Description: An introduction to central issues in the field of environmental philosophy. The course may cover such topics as conceptions of nature; moral frameworks for addressing environmental problems, including theories of social justice; values in nature, both moral and aesthetic; and applied ethical issues, such as the ethics of climate change and animal rights/welfare.

PHIL 4400 - Great Issues in Philosophy

Credits: (3)
Description: A selected study of one of the traditional
PHIL 4450 - Great Thinkers of Philosophy

Credits: (3)
Description: Selected study of the major works of a single central figure in philosophy. Philosophers whose works may be taught include, but are not limited to: Plato, Aristotle, Augustine, Aquinas, Descartes, Leibniz, Spinoza, Locke, Berkeley, Hume, Kant, Nietzsche, Mill, and Wittgenstein.
May be repeated once up to six credits covering a different philosopher.
Note: This course is offered as needed.

PHIL 4510 - Metaphysics

Credits: (3)
Typically Taught Fall Semester: Full Sem odd years
Description: A study of enduring topics concerning the nature of reality, such as the mind/body problem, free will/determinism, the problem of universals, and the existence of God. Historical and contemporary philosophers are discussed.

PHIL 4520 - Epistemology

Credits: (3)
Typically Taught Fall Semester: Full Sem even years
Description: A study of enduring topics in the theory of knowledge, such as the nature of justification; the relationship between knowledge, justification, and belief; the nature of truth; and sources of knowledge. Historical and contemporary philosophers are discussed.

PHIL 4530 - Philosophy of Mind

Credits: (3)
Typically Taught Spring Semester: Full Sem odd years
Description: A study of enduring topics in the philosophy of mind, such as the nature of mind; the mind-body problem; consciousness; the individuation of mental content; artificial intelligence. Historical and contemporary philosophers are discussed.

PHIL 4540 - Philosophy of Language

Credits: (3)
Typically Taught Fall Semester: Full Sem odd years
Description: A survey of central topics in the philosophy of language, including semantic content, speech acts, and the connection between meaning and truth. Historical and contemporary philosophers are discussed.

PHIL 4600 - Ethical Theory

Credits: (3)
Typically Taught Fall Semester: Full Sem odd years
Description: An in-depth study of western ethical theories, including utilitarianism, Kantian ethics, virtue ethics, and social contract theory.

PHIL 4810 - Experimental Course

Credits: (1-6)
Experimental
Description: Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript.
May be repeated for a total maximum of 6 credit hours.
Note: This course is offered as needed.

PHIL 4830 - Directed Readings

Credits: (1-2)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Individually designed tutorial for philosophy minors and majors, intended to satisfy program requirements not available through scheduled class offerings.
May be repeated 8 times for a maximum of 9 credits.

PHIL 4900 - Senior Capstone Seminar

Credits: (3)
Typically Taught Spring Semester: Full Sem
Description: A comprehensive review of the various areas of philosophy and an in-depth study of a single philosopher with the goal of producing a substantial thesis paper.

PHIL 4920 - Short Courses, Workshops, Institutes, and Special Programs

Credits: (1-6)
Workshop
Description: Consult the semester class schedule for the
current offering under this number. The specific title and number of credits authorized will appear on the student's transcript. May be repeated for a total maximum of 6 credit hours. Note: This course is offered as needed.

**PHYS 1010 PS - Elementary Physics**

**Credits:** (3)

**Typically Taught Summer Semester:** Full Sem Online

**Typically Taught Fall Semester:** Full Sem, Full Sem Online

**Typically Taught Spring Semester:** Full Sem, Full Sem Online

**Course Fee:** $10.00

**Course Fee Purpose:** Consumables and maintenance of equipment used for teaching demonstrations

**Description:** A brief survey of physics at the introductory level. Topics covered include laws of motion, gravity, energy, light, heat, sound, electricity, magnetism, atomic and nuclear physics, radioactivity, and relativity.

Three hours of lecture per week.

**PHYS 1040 PS - Elementary Astronomy**

**Credits:** (3)

**Typically Taught Fall Semester:** Full Sem, Full Sem Online

**Typically Taught Spring Semester:** Full Sem, Full Sem Online

**Course Fee:** $10.00

**Course Fee Purpose:** Consumables and maintenance of equipment used for teaching demonstrations

**Description:** A brief survey of the physical universe using the fundamental laws of physics. Topics include the history of astronomy, the solar system, the sun, the evolution of stars, pulsars, black holes, the Milky Way galaxy, galaxies, quasars, and the Big Bang.

Three hours of lecture per week.

**PHYS 1360 PS - Principles of Physical Science**

**Credits:** (3)

**Typically Taught Fall Semester:** Full Sem

**Description:** A lecture/laboratory course designed to provide an introduction to the scientific method and its application to the study of selected topics in physics and chemistry.

Two hours of lecture and one 3-hour lab per week. Recommended for Elementary Education majors.

**PHYS 2010 PS - College Physics I**

**Credits:** (5)

**Typically Taught Summer Semester:** Full Sem

**Typically Taught Fall Semester:** Full Sem

**Typically Taught Spring Semester:** Full Sem

**Description:** First semester of a two-semester sequence in general physics, primarily for students in pre-medicine, pre-dentistry, technology and other disciplines requiring physics without calculus. This semester covers topics in mechanics, including kinematics, Newton's laws, and the conservation laws of energy, linear momentum, and angular momentum. Also covered are topics in gravity, fluid mechanics, waves, and thermodynamics.

Class meets five hours per week in lecture/discussion format. One 3-hour lab per week (PHYS 2019).

**Pre-requisite(s):** MATH 1060 OR MATH 1080 OR MATH 1210.

**Co-Requisite(s):** PHYS 2019.

**PHYS 2015 - College Physics I Lab**

**Credits:** (1)

**Typically Taught Summer Semester:** Full Sem

**Typically Taught Fall Semester:** Full Sem

**Typically Taught Spring Semester:** Full Sem

**Description:** Enrollment limited to transfer students.

One 3-hour lab per week.

**Co-Requisite(s):** PHYS 2010.

Enrollment limited to transfer students.

**PHYS 2019 - College Physics I Lab**

**Credits:** (0)

**Course Fee:** $25.00

**Course Fee Purpose:** Laboratory consumables, maintenance of laboratory equipment, hourly employee lab assistance

**Description:** 3-hour lab to be taken concurrently with PHYS 2010.

**Co-Requisite(s):** PHYS 2010.

**PHYS 2020 - College Physics II**

**Credits:** (5)

**Typically Taught Fall Semester:** Full Sem

**Typically Taught Spring Semester:** Full Sem

**Description:** Second semester of a two-semester sequence in general physics. This semester covers topics in electricity and magnetism, electromagnetic waves, light and optics, relativity, atomic, and nuclear physics.

Class meets five hours per week in lecture/discussion
PHYS 2025 - College Physics II Lab

Credits: (1)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Enrollment limited to transfer students.
One 3-hour lab per week.
Co-Requisite(s): PHYS 2020.
Enrollment limited to transfer students.

PHYS 2029 - College Physics II Lab

Credits: (0)
Course Fee: $25.00
Course Fee Purpose: Laboratory consumables, maintenance of laboratory equipment, hourly employee lab assistance
Description: 3-hour lab to be taken concurrently with PHYS 2020.
Co-Requisite(s): PHYS 2020.

PHYS 2040 PS - Principles of Observational Astronomy

Credits: (3)
Typically Taught Fall Semester: Full Sem
Description: An introductory course in observational astronomy. Topics will include planetary, stellar, and galactic astronomy, with a focus on modern observational techniques, including digital imagery, spectroscopy, and observing with science-grade astronomical instrumentation. Cross-listed with ASTR 2040.
Pre-requisite(s): MATH 1060 (minimum grade of C).

PHYS 2090 PS SUS - Energy and the Environment

Credits: (3)
Typically Taught Spring Semester: Full Sem
Description: This interdisciplinary course explores how energy moves through our modern technological society. We will study the many forms of energy, traditional, and emerging sources of energy, and how energy use affects our environment. Much of the course will focus on identifying energy-related problems and their potential solutions.

PHYS 2210 PS - Physics for Scientists and Engineers I

Credits: (5)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: First semester of a two-semester sequence in calculus-based physics, primarily for students in science, math, computer science, and pre engineering. This semester covers topics in mechanics, including kinematics, Newton's laws, and the conservation laws of energy, linear momentum, and angular momentum. Also covered are topics in gravity, fluid mechanics, waves, and thermodynamics.
Class meets five hours per week in lecture/discussion format. One 3-hour lab per week (PHYS 2219).
Co-Requisite(s): MATH 1210 and PHYS 2219.

PHYS 2215 - Physics for Scientists and Engineers I Lab

Credits: (1)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Enrollment limited to transfer students.
One 3-hour lab per week.
Co-Requisite(s): PHYS 2210.

PHYS 2219 - Physics for Scientists and Engineers I Lab

Credits: (0)
Course Fee: $25.00
Course Fee Purpose: Laboratory consumables, maintenance of laboratory equipment, hourly employee lab assistance
Description: 3-hour lab to be taken concurrently with PHYS 2210.
Co-Requisite(s): PHYS 2210.

PHYS 2220 - Physics for Scientists and Engineers II

Credits: (5)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Second semester of a two semester sequence in calculus-based physics. This semester covers topics in electricity and magnetism, electromagnetic waves, light and optics, relativity, and quantum, atomic, and nuclear
PHYS 2220 - Physical Science I

Credits: (3)
Typically Taught Fall Semester: Full Sem
Description: This introductory course provides an overview of the major physical sciences, including mechanics, heat, sound, light, electricity, magnetism, and modern physics. Pre-requisite(s): MATH 1210 or equivalent.

PHYS 2229 - Physics for Scientists and Engineers II Lab

Credits: (0)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Course Fee: $25.00
Course Fee Purpose: Laboratory consumables, maintenance of laboratory equipment, hourly employee lab assistance
Description: One 3-hour lab per week.
Co-Requisite(s): PHYS 2220.

PHYS 2250 - Scientific Computing for Physical Systems

Credits: (3)
Typically Taught Fall Semester: Full Sem
Description: An introduction to computer programming and fundamental numerical algorithms as used for problem solving and visualization in the natural sciences. Applications may include nonlinear dynamics, chaos, many-particle systems, and Monte Carlo techniques. Pre-requisite(s): PHYS 2220, MATH 1210, and either MATH 1200 or CS 1030 or permission of the instructor.

PHYS 2600 - Laboratory Safety

Credits: (1)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: An interdisciplinary, course that will be an overview of the major chemical, biological and physical safety issues related to science laboratories and field work.

PHYS 2710 - Introductory Modern Physics

Credits: (3)
Typically Taught Fall Semester: Full Sem
Description: Relativity, quantum effects, the hydrogen atom, many-electron atoms, molecular and solid-state bonding, quantum effect devices, nuclear structure, nuclear reactions and devices, elementary particles. Pre-requisite(s): PHYS 2220, MATH 1200 (may be taken concurrently), and MATH 1220.

PHYS 2800 - Introductory Individual Research Problems

Credits: (1-3)
Description: Time and credit to be arranged. Intended for students working on a directed research project which includes physics/astronomy at the lower division level for one or more semesters. Pre-requisite(s): Consent of instructor. Cross-listed with ASTR 2800. May be repeated up to 10 times.

PHYS 2820 - Elements of Research in the Sciences

Credits: (3)
Typically Taught Spring Semester: Full Sem
Description: This interdisciplinary course provides concrete skills for productive entry-level scientific research. Students engage in a hands-on introduction to scientific research and methods, including an introduction to sample handling, data analysis, and dissemination of results through papers and presentations. Upon completion of the course, a student will be prepared for potential internships, summer research programs, and research assistantships both on and off campus. Pre-requisite(s): MATH 1060 or MATH 1080 or MATH 1210; and CHEM 1210 or PHYS 2210 or PHYS 2010 or (GEO 1110 and GEO 1115). Cross-listed with CHEM 2820 and GEO 2820.
Credits: (1-3)
Description: Time and credit to be arranged. Intended for students working on a directed reading project which includes physics/astronomy at the lower division level for one or more semesters.
Pre-requisite(s): Consent of instructor.
Cross-listed with ASTR 2830.
May be repeated up to 10 times.

PHYS 2890 INT - Cooperative Work Experience

Credits: (1-6)
Description: Open to all students in the Physics Department who meet the minimum Cooperative Work Experience requirements of the department. Provides academic credit for on-the-job experience. Grade and amount of credit will be determined by the department.

PHYS 2920 - Short Courses, Workshops, Institutes, and Special Programs

Credits: (1-6)
Workshop
Description: Consult the class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript.
May be repeated for a total maximum of 6 credit hours.

PHYS 3160 - Stellar and Planetary Astrophysics

Credits: (3)
Typically Taught Spring Semester: Full Sem odd years
Description: Selected topics in astrophysics, with a focus on stellar and planetary systems. Topics may include celestial mechanics, interaction of light and matter, stellar and planetary spectroscopy, stellar atmospheres and interiors, binary star systems, planets and planet formation, and extrasolar planets.
Pre-requisite(s): PHYS 2220.
Cross-listed with ASTR 3160.

PHYS 3170 - Galaxies and Cosmology

Credits: (3)
Typically Taught Spring Semester: Full Sem even years
Description: Selected topics in astrophysics, with a focus on galactic astronomy and cosmology. Topics may include gravitational dynamics, interaction of light and matter, galaxy classification, galaxy formation and evolution, the structure of the universe, cosmology, and the origin and fate of the universe.
Pre-requisite(s): PHYS 2220.
Cross-listed with ASTR 3170.

PHYS 3180 - Thermal Physics

Credits: (3)
Typically Taught Spring Semester: Full Sem
Description: An introduction to thermodynamics and statistical mechanics. Topics include heat and work; ideal gases; equipartition of energy; entropy; the Boltzmann, Fermi-Dirac, and Bose-Einstein distributions; applications to heat engines, refrigeration, chemical equilibrium, phase transitions, blackbody radiation, and properties of solids.
Pre-requisite(s): PHYS 2220, MATH 1200 and MATH 1220.

PHYS 3190 - Applied Optics

Credits: (3)
Typically Taught Fall Semester: Full Sem odd years
Description: Geometrical and physical optics, lasers, lenses, optical instruments, interference, thin films, interferometry, holography, diffraction, gratings, crystal diffraction, polarization.
Two lectures and one 3-hour lab a week.
Pre-requisite(s): PHYS 2220 and MATH 1220.

PHYS 3300 - Advanced Computational Physics

Credits: (3)
Typically Taught Spring Semester: Full Sem even years
Description: This course extends the computational skills developed in PHYS 2300 to address a wider range of problems in modern physics. Students will explore the limits of computational methods and develop techniques suited to high-performance computing. Applications may be chosen from nonlinear dynamics, astrophysics, condensed matter physics, and quantum mechanics.
Pre-requisite(s): PHYS 2220 and PHYS 2300.

PHYS 3410 - Electronics for Scientists

Credits: (4)
Typically Taught Fall Semester: Full Sem
Description: An introductory course in electronics for students in physics and other sciences. The course includes D.C. and a.c. circuit analysis using complex impedances and covers basic principles of semiconductor operation, transistors, analog and digital integrated circuits, analog-to-
digital conversion techniques used in computer interfacing, and noise.
Three lectures and one 3-hour lab a week.
**Pre-requisite(s):** PHYS 2220.

**PHYS 3420 - Data Analysis, Statistics, and Instrumentation**

**Credits:** (3)
**Typically Taught Spring Semester:** Full Sem odd years
**Description:** Intermediate-level course in computer interfacing (data acquisition and analysis) for students in physics and all other sciences. Topics may include: data acquisition with industry-standard software packages, computerized test and measurement, analog-to-digital and digital-to-analog conversion, data acquisition electronics, electronic sensors (thermal sensors, light sensors, etc.), least squares curve fitting, fast Fourier transforms (FFT), Nyquist's theorem, noisy and weak signals.
Two lectures and one 3-hour lab a week.
**Pre-requisite(s):** PHYS 2020 or PHYS 2220.

**PHYS 3500 - Analytical Mechanics**

**Credits:** (3)
**Typically Taught Fall Semester:** Full Sem
**Description:** Particle motion, oscillating systems; planetary motion, stability of orbits; collisions; Euler's equations, gyroscopic motion; Lagrange's equations, Hamilton's equations, theory of vibrations.
**Pre-requisite(s):** PHYS 2220, MATH 1200 and MATH 2280.

**PHYS 3510 - Electromagnetic Theory**

**Credits:** (3)
**Typically Taught Fall Semester:** Full Sem
**Description:** Vector analysis; electrostatics; calculating electric potentials; solving Laplace's equation; multipole expansions; electrostatic fields in matter; magnetostatics; charges in motion; electrodynamics; Faraday's law; Maxwell's equations.
**Pre-requisite(s):** PHYS 2220, MATH 1200, MATH 2210 and MATH 2280.

**PHYS 3540 - Mechanical and Electromagnetic Waves**

**Credits:** (3)
**Typically Taught Spring Semester:** Full Sem
**Description:** Periodic motions, free and forced vibrations; resonance; normal modes; dispersion; boundary conditions; electromagnetic waves and light; the Fresnel equations; electromagnetic radiation from accelerating charges.
**Pre-requisite(s):** PHYS 3500, PHYS 3510.

**PHYS 3570 - Foundations of Science Education**

**Credits:** (3)
**Typically Taught Spring Semester:** Full Sem
**Description:** A thorough investigation of research in science learning and curricular standards at the state and national levels. Foundations of the philosophy of science and scientific inquiry as applicable to science teaching at the secondary level. This course serves as a foundation to a preservice science teacher's education coursework.

**PHYS 3710 - Nuclear and Particle Physics**

**Credits:** (3)
**Typically Taught Fall Semester:** Full Sem
**Description:** Nuclear structure and nuclear reactions including radioactive decay, fission, and fusion, with selected applications. The standard model of elementary particles and interactions. Collider experiments and their interpretation in terms of Feynman diagrams. Topics of current research at the high-energy frontier.
**Pre-requisite(s):** PHYS 2710.

**PHYS 3810 - Experimental Course**

**Credits:** (1-6)
**Experimental**
**Description:** Individual courses offered on an experimental basis, identified by specific name and description. The specific title will appear on student's transcript along with the authorized credit.
May be repeated for a total maximum of 6 credit hours.

**PHYS 4200 - The Physics of Materials**

**Credits:** (3)
**Typically Taught Spring Semester:** Full Sem even years
**Description:** An introduction to the modern theory of condensed matter. Emphasis is placed on the structural, electrical, and thermal properties of solids, with particular attention to materials of current research interest.
**Pre-requisite(s):** CHEM 1210 and either PHYS 2710 or CHEM 3410.
PHYS 4400 - Advanced Physics Laboratory

Credits: (2)
Typically Taught Spring Semester: Full Sem
Description: Advanced experiments in mechanics, electromagnetism, modern physics, and nuclear physics. This course also covers general laboratory practice, data analysis, and error propagation. Four hours of lab per week. Four hours of lab per week.
Pre-requisite(s): PHYS 2220; either PHYS 3190 or PHYS 3410.

PHYS 4410 - Materials Characterization Laboratory

Credits: (2)
Typically Taught Fall Semester: Full Sem even years
Description: A series of experiments for advanced students employing modern methods of measurement of properties of materials. The course will teach microscopic and spectroscopic techniques and general laboratory practice, data analysis, and error propagation.
Four hours of lab per week.
Pre-requisite(s): PHYS 2220 and PHYS 3410.

PHYS 4570 - Secondary School Science Teaching Methods

Credits: (3)
Typically Taught Fall Semester: Full Sem
Description: Acquaintance and practice with various teaching and assessment methods. Development of science curricula including lesson and unit plans. It is recommended that this course be completed immediately before student teaching.
Pre-requisite(s): Admission to the Teacher Education Program.

PHYS 4610 - Quantum Mechanics

Credits: (3)
Typically Taught Spring Semester: Full Sem
Description: Wave-particle duality, Schrodinger equation, wave function, quantization rules, one-dimensional motion, one-electron atoms, spin and orbital angular momentum.
Pre-requisite(s): MATH 2270 and PHYS 2710.
Pre-requisite/Co-requisite: PHYS 3500.

PHYS 4620 - Advanced Quantum Mechanics

Credits: (3)
Typically Taught Spring Semester: Full Sem
Description: Approximation methods and other selected topics in pure and applied quantum mechanics.
Pre-requisite(s): PHYS 4610.

PHYS 4800 - Individual Research Problems

Credits: (1-3)
Description: Time and credit to be arranged. Open to qualified students for one or more semesters.
Pre-requisite(s): Consent of instructor.
Cross-listed with ASTR 4800.
May be repeated up to 10 times.

PHYS 4830 - Readings in Physics/Astronomy

Credits: (1-3)
Description: Topics which can be studied include (but are not limited to): mechanics, thermodynamics, kinetic theory, statistical mechanics, electronics, electromagnetism, optics, solid-state physics, modern physics, nuclear physics, relativity, cosmology, and astrophysics. These courses may be taken at any time on a personalized basis. Time and credit to be arranged.
Pre-requisite(s): Consent of instructor.
Cross-listed with ASTR 4830.
May be repeated up to 10 times.

PHYS 4890 INT - Cooperative Work Experience

Credits: (1-6)
Description: A continuation of PHYS 2890. Open to all students.

PHYS 4920 - Short Courses, Workshops, Institutes, and Special Programs

Credits: (1-6)
Workshop Description: Consult the class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript.
May be repeated for a total maximum of 6 credit hours.

PHYS 4970 - Senior Thesis
Credits: (2)
Description: An individual research program pursued under faculty supervision. It is expected that one or more semesters of research (PHYS 4800) will precede registration for this course. Course evaluation will include an oral and a written report.
Pre-requisite(s): senior class standing and consent of departmental committee.

PHYS 4990 - Seminar in Physics

Credits: (1)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Weekly presentations by students, faculty, and visitors on topics in physics and astronomy. Each student taking this course for credit will make a presentation on a topic agreed upon with a faculty mentor and the seminar instructor.
Pre-requisite(s): previous upper division physics course. May be taken twice for credit.

PHYS 5030G - Physics for Teachers

Credits: (2-3)
Description: Science content course for teachers in the MEd Science Emphasis Program. To register, select another departmental course and develop a contract detailing additional work required for graduate credit. Contract must be approved by instructor, department chair, and Director of the Master of Education Program. May be repeated once up to 6 credit hours.

POLS 1010 SS/EDI - Politics, Power, and the State

Credits: (3)
Typically Taught Summer Semester: 1st Blk Online
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: This course is an introduction to the study of political science. It presents an overview of the discipline, including the basic theories, concepts, approaches, and enduring questions of political science. The course introduces students to the primary subfields of political science, American, Comparative, International Relations, Political Theory, Public Administration and Public Law. The focus is on the substance of politics, power, and the state. This includes the roles played by states, mass publics, organizations, institutions, and individuals and the output of their interactions on public policy and international relations, providing students with a foundation of knowledge and the analytical skills necessary to understand modern politics in a global and historical context.

POLS 1100 AI - American National Government

Credits: (3)
Typically Taught Summer Semester: Full Sem, 1st Blk, Online
Typically Taught Fall Semester: Full Sem, Online
Typically Taught Spring Semester: Full Sem, Online
Description: A study of American constitutional democracy at the national level, including political institutions, interests, ideals, and the processes through which policies are formulated and implemented.

POLS 1520 SS - Leadership and Political Life

Credits: (3)
Typically Taught Fall Semester: Full Sem
Description: The purpose of the Leadership and Political Life class is to introduce students to the theory and practice of leadership in the public realm, which is applicable to the private sector.

POLS 2100 SS SUS GLB - International Politics, Organizations, and Society

Credits: (3)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: This course will allow students to explore the foundations and forces that shape international politics and society. It examines the concept of power and sovereignty within the system including discussions of conflict, war, and terrorism. Global economics will be examined, including economic interdependence, globalization, trade, and development. International institutions will be examined including the United Nations to understand the role of international organization, international law, and the concepts of sustainable development.

POLS 2200 SS GLB - Global Governments, Politics, and Societies

Credits: (3)
Typically Taught Fall Semester: Full Sem
Description: An introductory survey, comparing and contrasting political ideas, institutions and processes in the
political systems of the world to gain a deeper knowledge of, and a broader perspective on, political phenomena.

**POLS 2300 SS - Introduction to Political Theory**

Credits: (3)
Typically Taught Spring Semester: Full Sem
Description: An examination of the arguments behind and the implications of the dominant theories of politics. Theories that are studied include liberalism, conservatism, socialism, and republicanism, among others. In studying these theories, the works of such theorists as Plato, Aristotle, Locke, Rousseau, Marx, and Mill will be examined.

**POLS 2400 SS - Introduction to Law and Courts**

Credits: (3)
Typically Taught Fall Semester: Full Sem
Description: An introductory survey of law and courts emphasizing the structure of courts, different forms of law, and the various actors involved in legal conflicts.

**POLS 2500 SS/EDI/GLB - Human Rights in the World**

Credits: (3)
Typically Taught Fall Semester: Full Sem
Description: Human rights (HR) are a powerful idea in the modern world, but also the focus of controversy. This course will provide students with a broad foundation in human rights including the ability to analyze HR in domestic and int’l law, examine prevention and prosecution techniques, and debate current issues at home and abroad. Emphasis will be placed on women and gender studies (including LGBT issues), vulnerable populations such as refugees, and atrocity crimes.

**POLS 2700 - Introduction to Public Administration**

Credits: (3)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: To understand the role of public administration in the United States, this course examines the administrators who manage and implement policy, the tools they use, and the environments in which they work. We will cover the economic, political, and social dynamics within public administration as well as management challenges related to human resources, finance, program development, evaluation, and strategic planning. Introduction to public administration would not be complete without discussions about the values and ethics unique to the public sector. We will be using textbooks, other assigned readings, case studies, simulations of ethical quandaries, and whenever possible hands-on learning experiences. The first half of the course will include historical milestones in the history of the administrative state, the logic of public service and the constitutional context of executive power, and management challenges for the public sector in the 21st century. The second half of the course will focus on the policy cycle, program implementation and evaluation, budgeting, leadership and ethics, and the future of public administration.

**POLS 2920 - Short Courses, Workshops, Institutes, and Special Programs**

Credits: (1-6)
Workshop
Description: Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript. May be repeated for a total maximum of 6 credit hours. Note: Course not currently being offered.

**POLS 2930 - Peacebuilding in Rwanda**

Credits: (3)
Typically Taught Summer Semester: 1st Blk
Description: In this course, students will travel to Rwanda (Africa) to participate in a Peacebuilding Institute (PBI) with Weber State University and Never Again Rwanda. Weber State students and Rwandan University students will work together for an unforgettable academic experience. Through readings, site visits, lectures from specialists, and group discussions, students will explore themes of genocide, human rights, transitional justice, and good governance. In addition they will develop skills in cross-cultural dialogue exchange.

**POLS 3070 - Moot Court**

Credits: (3)
Typically Taught Fall Semester: Full Sem
Description: Students in teams of two prepare appellate arguments based on a hypothetical case with Constitutional
Law issues that are argued before the Supreme Court of the United States. Students develop legal arguments and briefs for both the petitioner and the respondent for two issues based on a closed set of approximately twenty real Supreme Court cases. Students are required to make use of existing Supreme Court precedents in addition to arguing the facts in the hypothetical case. Students develop, prepare, and practice their arguments with one another in class and compete against other teams in the Western Regional Moot Court competition held in November in California. Counselors are judged by a panel typically made up of law school professors, attorneys, and graduate and law school students.

Suggested Requisite(s): Recommend prior constitutional law and legal studies coursework, but not required.

### POLS 3140 GLB - Foreign Policy of the United States

**Credits:** (3)

**Typically Taught Spring Semester:** Full Sem even years

**Description:** An analysis of the making of American foreign policy with reference to the role and influences of beliefs, interests, public opinion, media and especially the institutional struggle between President & Congress. The challenges facing contemporary U.S. foreign policy will also be examined.

### POLS 3150 GLB - Model United Nations

**Credits:** (3)

**Typically Taught Spring Semester:** Full Sem

**Description:** A study of the current events before the United Nations General Assembly as well as in-depth research on selected countries; includes preparation for the Model United nations of the Far West and the Northern Utah Model UN.

May be repeated once for 6 credit hours.

### POLS 3151 GLB - Model United Nations Team

**Credits:** (1)

**Typically Taught Fall Semester:** Full Sem

**Typically Taught Spring Semester:** Full Sem

**Description:** This course prepares students on the Model UN team for the upcoming Fall/Spring conference.

**Pre-requisite(s):** POLS 3150 with a minimum grade of B. Permission of the instructor.

May be repeated up to 12 credit hours.

### POLS 3200 GLB - Middle East and North Africa

**Credits:** (3)

**Typically Taught Spring Semester:** Full Sem

**Description:** A survey of the political dynamics of selected states and societies in the Middle East and North Africa (MENA). Issues to be covered: the impact of early Middle Eastern/North African history upon today's politics; class structures in the MENA countries and their impact on politics; the rise of Arab nationalism; Zionism; the politics of oil; the status of women; the political impact of economic restructuring; Islamic movements; state-building; and political liberalization and democratization in the Middle East and North Africa.

### POLS 3210 GLB - Politics in the European Union

**Credits:** (3)

**Typically Taught Fall Semester:** Full Sem

**Description:** This course examines the origins and development of the European community/EU and its institutions, theories of integration, and challenges in the creation of a supranational authority. It also compares the impact of EU policies on domestic politics in the individual European states with emphasis on relevant issues of the day, such as EU enlargement, immigration, and the political economy.

### POLS 3290 GLB - Democratization and Political Transitions

**Credits:** (3)

**Typically Taught Spring Semester:** Full Sem odd years

**Description:** A survey of the democratic transitions literature with focus on political transitions in comparative perspective. This course will compare a variety of different kinds of political transitions in different regions of the world, including cases in which countries have transitioned back to authoritarianism.

### POLS 3320 - American Political Thought: The Founding

**Credits:** (3)

**Typically Taught Fall Semester:** Full Sem

**Description:** This course looks at the political theory of the American founding from the Declaration of Independence to the drafting and ratification of the U.S. Constitution.
POLS 3330 - American Political Thought: Contemporary

Credits: (3)
Typically Taught Spring Semester: Full Sem
Description: An examination of late 20th and early 21st century American Political Thought. In this course we will examine a variety of political theories put forth by American thinkers, including social welfare liberalism, libertarianism, civic republicanism, critical race theory, and others.

POLS 3340 - Environmental Political Theory

Credits: (3)
Typically Taught Fall Semester: Full Sem even years
Description: This is an upper division course in political theory, with the specific focus being environmental political theory. The course examines a range of theoretical perspectives on a range of issues including how we conceptualize humans, nature, and politics.

POLS 3400 - LGBTQ Politics

Credits: (3)
Description: Social movements employ a variety of methods to achieve the protection of their members' rights and interests. This course focuses on these issues through the study of gender and sexual minorities in the United States from the mid-Twentieth Century to the present. It examines the strategies, both formal and informal, adopted to achieve social change.
Note: This course is taught during odd years.

POLS 3600 - Political Parties

Credits: (3)
Typically Taught Fall Semester: Full Sem odd years
Description: A study of the organization and function of the American political parties, political organizations that play a role alongside political parties in the American political system, such as interest groups, and a comparative study of political parties in other countries.

POLS 3610 - Campaigns and Elections

Credits: (3)
Typically Taught Fall Semester: Full Sem even years
Description: A study of the electoral process in the United States with an examination of national institutional elections, state and local elections, as well as election rules. Also a study of campaigning techniques in elections at all levels.

POLS 3620 - Political Behavior

Credits: (3)
Typically Taught Spring Semester: Full Sem odd years
Description: This course is designed to introduce students to the nature of mass political behavior and its role in the political process. Further, it examines the interaction between and among diverse social groups, the media, and policy makers. The course will also emphasize the political psychology of public opinion formation and political decision of those outside the mainstream political institutions.

POLS 3640 - Media and Politics

Credits: (3)
Typically Taught Fall Semester: Full Sem
Description: In terms of influencing American politics, media perform three functions: supplying information about issues and candidates; setting the agenda for public debate; conveying messages between elected officials and the public. In this course we will focus on the effect media has on political discourse in the United States.

POLS 3700 - Bureaucratic Politics

Credits: (3)
Typically Taught Spring Semester: Full Sem
Description: Presents basic theories, concepts, and analysis of current practices and problems in governmental administration.

POLS 3750 - Urban Government and Politics

Credits: (3)
Typically Taught Fall Semester: Full Sem odd years
Description: A study of local government organization and policy problems, with an emphasis on problems of the metropolitan areas.

POLS 3760 - State Government and Politics

Credits: (3)
Typically Taught Spring Semester: Full Sem even years
Description: An examination of governmental
organization, operation, policy making, and electoral politics of state governments and the dynamics of relationships with other levels of government.

**POLS 3780 - Lobbying: Theory and Practice**

Credits: (3)
Typically Taught Fall Semester: Full Sem
**Description:** This course looks at both the theory and practice of lobbying, primarily at the state and local governmental levels; and it examines the business of lobbying, how the profession of lobbying has developed, what lobbyists do, the ethical constraints of lobbying, and from where the right to petition the government is derived.

**POLS 3990 - Political Analysis**

Credits: (3)
Typically Taught Spring Semester: Full Sem
**Description:** An introduction to the scope and methods of political science. This course focuses on the formulation of hypotheses, the collection of data, appropriate study design, and study analysis through statistical testing and interpretation.
**Pre-requisite(s):** POLS 1010.

**POLS 4020 - Constitutional Law: Powers**

Credits: (3)
Typically Taught Fall Semester: Full Sem
**Description:** An introduction to many of the doctrines of American Constitutional Law around the structure of the U.S. Constitution, governmental powers, and federalism. Topics include constitutional theory; congressional, executive, and judicial power; and the relationship between federal and state governments.

**POLS 4030 - Constitutional Law: Rights**

Credits: (3)
Typically Taught Spring Semester: Full Sem
**Description:** An introduction to many of the doctrines of American Constitutional Law. Topics include the study of various fundamental rights including free speech, religious freedom, equal protection, and privacy rights.

**POLS 4050 - Institutional Presidency**

Credits: (3)
Typically Taught Summer Semester: Full Sem
**Typically Taught Fall Semester:** Full Sem
**Typically Taught Spring Semester:** Full Sem
**Description:** We will examine the American Presidency from four perspectives this semester. First, the course considers the creation of the presidency and "the executive power" in the Constitution. Second, it surveys the institutional development of the presidency and executive branch from the late 1700s through the present. Third, it examines different theories on the politics and effectiveness of presidential leadership. Finally, it asks whom the president represents and, having considered the institutional development of the presidency, whether the president needs more tools to fulfill expectations placed upon him or her.
**Pre-requisite(s):** POLS 1100.

**POLS 4060 - Law and Society**

Credits: (3)
**Description:** This course explores how law operates in society and how society influences the nature of the law. Topics may include the role of race in law, legal consciousness, efficacy of legal action, and the nature of the legal profession.
**Note:** Course not currently being offered.

**POLS 4100 - Free Speech**

Credits: (3)
Typically Taught Spring Semester: Full Sem
**Description:** This course explores the historical meaning of free speech in the United States, the modern development of free speech principles in constitutional law, and the application of those principles to modern controversies.

**POLS 4160 - Topics in Global Politics**

Credits: (3)
**Variable Title**
**Typically Taught Fall Semester:** Full Sem
**Description:** The study of selected contemporary problem areas in world politics to assess their impact within the international arena.
**May be repeated for a maximum of 6 hours toward the hours required for Political Science majors and only 3 hours will be counted toward the political science minor requirement.**

**POLS 4170 GLB - Gender, Power, and Global Politics**
Typically Taught Spring Semester: Full Sem, Full Sem - Online

Description: This course is a comprehensive introduction to the gendered nature of global politics and how power and gender influences the world around us. During the semester, we will examine what cultural, structural, and political factors shape gendered access to power worldwide. We will discuss why women have succeeded in obtaining sustainable political power in some countries and not others. We will determine what factors influence why women and transgendered individuals are excluded from political processes and not represented proportionately in political, influential, or leadership positions. At the conclusion of this course, students will be familiar with multiple approaches to understand how gender matters in many facets of world politics and how gender can intersect with other social identities such as race, ethnicity, class, and sexual orientation.

POLS 4180 GLB - International Law and Organization

Credits: (3)
Typically Taught Fall Semester: Full Sem
Description: In-depth exploration of international society through the basis principles of international law and the organizations that comprise our world. Emphasis is given to international criminal law, international humanitarian law, human rights law and the prominence of the United Nations.

POLS 4190 GLB - Theories of International Politics

Credits: (3)
Typically Taught Fall Semester: Full Sem even years
Description: An analysis of traditional and contemporary theories offered to explain politics in the international arena.

POLS 4200 GLB - Dictatorships

Credits: (3)
Typically Taught Fall Semester: Full Sem
Description: Political science has long had a bias towards democracies. Authoritarian governments, however, are far more common both over history and today. This course will thus expand the coverage of governmental types and instruct students in the varieties of authoritarian governments and their methods of governance.

POLS 4210 GLB - Violence and Contestation

Credits: (3)
Typically Taught Spring Semester: Full Sem
Description: This course examines theories and case studies on the processes shaping collective challenges to authority in different countries around the world. Topics include causes and mechanics of mobilization, the contexts in which protest movements emerge, repression and violence, strategies, and determinants of political outcomes.

POLS 4360 - Classical Political Thought

Credits: (3)
Description: An examination of ideas of God, human nature, society, the state, the problem of evil, etc., from Ancient Greece to the middle ages.
Note: This course is not currently offered.

POLS 4380 - Modern Political Thought

Credits: (3)
Typically Taught Fall Semester: Full Sem even years
Description: A survey of political theory from the 17th century to the present, with a focus on theoretical formulations and critiques of democratic government and the political subject.

POLS 4600 - American Congress

Credits: (3)
Typically Taught Fall Semester: Full Sem odd years
Description: A study of the United States Congress and its members. This course examines the legislative decision making process as well as an emphasis on the history of the institution.

POLS 4620 - The U.S. Supreme Court

Credits: (3)
Typically Taught Fall Semester: Full Sem even years
Description: A study of the U.S. Supreme Court as a legal and political institution. This course examines the historical development of the Supreme Court, its relationship to other institutions, and judicial decision-making.

POLS 4640 - American Presidency

Credits: (3)
Typically Taught Spring Semester: Full Sem even years
Description: A study of the United States presidency and the people who have held the office. This course examines individual presidential character and personality as well as providing a survey of the history of the institution.

POLS 4750 - Public Policy Analysis

Credits: (3)
Typically Taught Fall Semester: Full Sem odd years
Description: A study of the American policy process, with an emphasis on the dynamics involved in the creation, adoption and implementation of selected domestic policies.

POLS 4760 - Rwanda: Genocide and Aftermath

Credits: (3)
Typically Taught Summer Semester: Online
Description: This course will examine the 1994 Rwandan genocide and its aftermath. The class will discuss the historical legacy of colonialism and the impact that post-colonial policies had in pre-genocide Rwanda. Next, the events surrounding the genocide within Rwanda will be discussed in addition to its immediate impact on the surrounding Great Lakes countries of Africa. Finally, the legacy of the Rwandan genocide will be examined, especially in regards to politics and international law. Specific issues to be addressed include the complex relationship between political and legislated memories, ethnic identities before and after the genocide, the creation and implementation of transitional justice measures including the national courts, gacaca courts, and the International Criminal Tribunal for Rwanda.

POLS 4770 GLB - Genocide, War, and Human Rights

Credits: (3)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: This course examines the complexity of genocide studies, within the framework of war and human rights abuses, including an examination of genocide theories, definitions and debates. Within this context, both internationally recognized genocides will be examined (Germany, Rwanda, former Yugoslavia) and those which are more contested such as indigenous and political based massacres. The course will also examine Crimes Against Humanity, War Crimes and how societies recover from these types of crimes. The course will take an interdisciplinary approach; with an emphasis on law and politics.

POLS 4800 - Individual Projects and Research

Credits: (1-2)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Pre-requisite(s): Department approval required.
A maximum of 6 hours may be counted toward the major or 3 hours toward the minor.

POLS 4830 - Directed Readings

Credits: (3)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Pre-requisite(s): Department approval required.
A maximum of 6 hours may be counted toward the major or 3 hours toward the minor.

POLS 4860 INT - Internships

Credits: (1-6)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Pre-requisite(s): Department approval required.
A maximum of 6 hours may be counted toward the major or 3 hours toward the minor.

POLS 4861 INT - International Internships

Credits: (1-6)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Internships located outside of the United States. Department approval required.
A maximum of 6 hours may be counted toward the major or 3 hours toward the minor.

POLS 4865 INT - Utah State Legislature Internship

Credits: (1-6)
Typically Taught Spring Semester: Full Sem - Online
Description: Utah State Legislature Internship. Professor approval required.
May be repeated up to 5 times and up to 6 credit hours.
POLS 4870 INT - Internship in Perspective

Credits: (3)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem

Description: This course is designed to put the internship experience in broader context. Students will read books and articles on current issues and then focus on the way that government and non-governmental institutions combine to make policy. In this students will take their political science knowledge and apply it to practical politics.
Co-Requisite(s): POLS 4860.

POLS 4880 INT - Internship Research

Credits: (3)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem

Description: This course is designed to complement the student intern's experience while in the placement. This course is designed to give the student a chance to do a research project based on his or her experience in the internship. The research evolves out of assignments given at the internship.
Pre-requisite(s): POLS 4860.

POLS 4920 - Short Courses, Workshops, Institutes, and Special Programs

Credits: (1-6)
Workshop

Description: Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript. May be repeated for a total maximum of 6 credit hours.
Note: Course not currently being offered.

POLS 4940 - Topics in American Politics & Thought

Credits: (3)
Variable Title

Description: The study of selected contemporary problem areas in American politics and thought to assess the impact and implication within the U.S. domestic arena. This course may count once to satisfy a subfield requirement at the discretion of the department chair. This course may be repeated once up to 6 credit hours (in different topics).
Note: Course not currently being offered.

POLS 4990 - Senior Seminar/Senior Thesis

Credits: (3)

Typically Taught Fall Semester: Full Sem

Description: A seminar in the field of political science. Students will be required to produce a major paper out of this seminar. Required for Political Science majors.
Pre-requisite(s): POLS 1010. Department approval required.
Note: Note: Political Science BS students must take POLS 3990 before POLS 4990.

PS 1143 - Principles of Selling and Persuasion

Credits: (3)

Typically Taught Summer Semester: Full Sem Online
Typically Taught Fall Semester: Full Sem; Full Sem Online
Typically Taught Spring Semester: Full Sem; Full Sem Online

Description: A retail, wholesale, and direct selling and persuasion course. Emphasis upon mastering and applying the fundamentals of selling and persuasion. Preparation for and execution of sales demonstrations required.

PS 1303 - Sales Channels

Credits: (3)

Typically Taught Summer Semester: Full Sem Online
Typically Taught Fall Semester: Full Sem; Full Sem Online
Typically Taught Spring Semester: Full Sem; Full Sem Online

Description: Examination of the distribution process of goods and services, the interrelationships of customer demands, production, pricing, promotion, and the movement of goods from producer to consumer.

PS 1401 - Introduction to Sales and Service Technology

Credits: (1)

Typically Taught Summer Semester: Full Sem Online
Typically Taught Fall Semester: Full Sem; Full Sem Online
Typically Taught Spring Semester: Full Sem; Full Sem
**Description:** This course is designed to help those new PS majors or those exploring the PS major field learn more about the career/employment options available. This course is also designed to review the various academic emphases, major requirements, and decision making process.

**PS 1403 - Introduction to Customer Care**

**Credits:** (3)
**Typically Taught Fall Semester:** Full Sem
**Typically Taught Spring Semester:** Full Sem

**Description:** A study of the basic techniques for providing quality service to clients.

**PS 1503 - Introduction to Fashion Merchandising**

**Credits:** (3)
**Typically Taught Fall Semester:** Full Sem; Fall Sem Online
**Typically Taught Spring Semester:** Full Sem; Full Sem Online

**Description:** A study of the Fashion Merchandising industry, including careers in design, manufacturing, wholesaling, promotion, and retailing, including well-known designers, manufacturers, promotion media and apparel and accessory retail institutions.

**PS 1890 INT - Work Experience**

**Credits:** (1-3)
**Typically Taught Fall Semester:** Full Sem
**Typically Taught Spring Semester:** Full Sem

**Description:** Open to all first year declared majors in Professional Sales. Provides academic credit for on-the-job experience. Grade and amount of credit will be determined by department. May be repeated a maximum of 3 times or until a maximum of 6 credit hours is reached.

**PS 2182 - Credit and Collection Methods**

**Credits:** (2)
**Typically Taught Fall Semester:** Full Sem Online
**Typically Taught Spring Semester:** Full Sem Online

**Description:** The study of specific credit and collection methods for retail, wholesale, and service industries; including cost of retail credit, credit investigation, methods of collecting bad accounts, securing new business through credit applications, and credit control.

**PS 2383 - Retail Merchandising and Buying Methods**

**Credits:** (3)
**Typically Taught Summer Semester:** Full Sem Online
**Typically Taught Fall Semester:** Full Sem; Full Sem Online
**Typically Taught Spring Semester:** Full Sem; Full Sem Online

**Description:** The study of the retail buyer's duties, different buying organizations, and techniques, procedures of purchasing merchandise for resale and retail merchandising strategies.

**PS 2443 - Advertising Methods**

**Credits:** (3)
**Typically Taught Summer Semester:** Full Sem Online
**Typically Taught Fall Semester:** Full Sem; Full Sem Online
**Typically Taught Spring Semester:** Full Sem; Full Sem Online

**Description:** A study of advertising methods as they relate to local retail, wholesale, and service industries, including newspaper, magazine, radio, TV, mail, outdoor and special promotion events.

**PS 2603 - Advanced Selling Techniques**

**Credits:** (3)
**Typically Taught Summer Semester:** Full Sem Online
**Typically Taught Fall Semester:** Full Sem; Full Sem Online
**Typically Taught Spring Semester:** Full Sem; Full Sem Online

**Description:** Study of advanced techniques including, opening, investigating, demonstrating capability and obtaining commitment of the consultative and strategic seller.

**PS 2703 - Internet Sales and Service**

**Credits:** (3)
**Typically Taught Fall Semester:** Full Sem Online
**Typically Taught Spring Semester:** Full Sem Online

**Description:** The study of Internet sales, service and technology. Understanding the process of establishing an online business, setting up online shopping capabilities and database integration. Online customer service and retention, buyer behavior and current Internet sales issues are presented.
PS 2890 INT - Work Experience II

Credits: (1-3)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Open to second year declared majors in Professional Sales. A continuation of PS 1890. May be repeated a maximum of 3 times or until a maximum of 6 credit hours is reached.

PS 2903 - Professional Selling Methodologies

Credits: (3)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: The study of selling and customer service techniques as they apply to virtual, inside and field sales.

PS 2991 - Sales/Service Technology Seminar

Credits: (1-3)
Typically Taught Spring Semester: Full Sem
Description: Directed studies, group discussions, and analysis of selected topics pertinent to sales and service technology. Also designed to prepare sales and service majors for the job market and career opportunities. May be repeated until a maximum of 3 credit hours is reached.

PS 3001 - Sales Career Strategies

Credits: (1)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: The study of developing a sales career including finding sales opportunities and how to market yourself into landing those opportunities.

PS 3003 - Relational Selling

Credits: (3)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: The study of relational selling techniques as they apply to virtual, inside and field sales in all industries and sales situations.

PS 3103 - Sales Personalities and Profiles

Credits: (3)
Typically Taught Summer Semester: Full Sem Online
Typically Taught Fall Semester: Full Sem; Full Sem Online
Typically Taught Spring Semester: Full Sem; Full Sem Online
Description: Discovering and understanding your own personality style and how to adapt to your client for selling success is the focus of this course. We will utilize the Everything DISC Sales assessment to distinguish the 4 behavior styles and the Strengths Finder assessment to utilize our talents throughout the selling process.
Pre-requisite(s): PS 1143.

PS 3203 - Customer Service Techniques

Credits: (3)
Typically Taught Summer Semester: Full Sem Online
Typically Taught Fall Semester: Full Sem; Full Sem Online
Typically Taught Spring Semester: Full Sem; Full Sem Online
Description: A study of customer service techniques required in order to sell and service products, systems, or services needed by industrial manufacturing, processing, mining, construction firms, or other related technical areas.

PS 3250 - Business Communication

Credits: (3)
Typically Taught Summer Semester: Full Sem Online
Typically Taught Fall Semester: Full Sem; Full Sem Online
Typically Taught Spring Semester: Full Sem; Full Sem Online
Description: Application of oral and written communication, including diversity and international aspects of communication.
Pre-requisite(s): ENGL 2010.

PS 3303 - Technology in Sales

Credits: (3)
Typically Taught Summer Semester: Full Sem online
Typically Taught Fall Semester: Full Sem, Full Sem Online
Typically Taught Spring Semester: Full Sem, Full Sem Online
Description: This course will teach professional sales
people to use sales technologies to (1) attract new clientele (2) strengthen customer relationships (3) expand existing accounts and (4) establish a position as an authority in the field.

**Pre-requisite(s):** PS 1143.

**PS 3363 - Contract and Sales Negotiation Techniques**

**Credits:** (3)
**Typically Taught Summer Semester:** Full Sem Online
**Typically Taught Fall Semester:** Full Sem; Full Sem Online
**Typically Taught Spring Semester:** Full Sem; Full Sem Online

**Description:** Principles, techniques and analysis of strategies involved in contract and sales negotiations. Development of integrated strategies through group and individual interaction.

**Pre-requisite(s):** PS 1143.

**PS 3403 - Pharmaceutical and Medical Device Sales**

**Credits:** (3)
**Typically Taught Spring Semester:** Full Sem

**Description:** A study of the opportunities that exist in the medical field as it pertains to selling. The course examines the integral relationship that pharmaceutical and medical device representatives have within the medical community.

**Pre-requisite(s):** PS 1143 and PS 2603.

**PS 3503 - Sales Planning and Forecasting**

**Credits:** (3)
**Typically Taught Summer Semester:** Full Sem Online
**Typically Taught Fall Semester:** Full Sem; Full Sem Online
**Typically Taught Spring Semester:** Full Sem Online

**Description:** A study of sales planning and forecasting. Special emphasis will be given to goal setting, prioritizing, sales forecasting and establishing and managing a sales territory. The student will also learn techniques for individual goal setting and time management.

**PS 3563 - Principles of Sales Supervision**

**Credits:** (3)
**Typically Taught Summer Semester:** Full Sem Online

**Typically Taught Fall Semester:** Full Sem; Full Sem Online
**Typically Taught Spring Semester:** Full Sem; Full Sem Online

**Description:** Practical application of first-line supervisory skills including choosing, organizing, training, and evaluating entry-level employees; making supervisory decisions; and solving first-line supervisory problems. Understanding the basic responsibilities of a supervisor in production organizations and service organizations.

**PS 3702 - Developing Team Leadership Skills**

**Credits:** (2)
**Typically Taught Summer Semester:** Full Sem; Full Sem Online
**Typically Taught Fall Semester:** Full Sem
**Typically Taught Spring Semester:** Full Sem

**Description:** A skills based course designed to develop the interpersonal and leadership skills necessary to work effectively in teams and guide teams through the group stages of development. This course will be facilitated in such a way the participants will learn how to diagnose team developmental level and develop a high performing team by applying the principles of situational leadership and the DISC personality profiles system.

**Pre-requisite(s):** PS 3563.

**PS 3703 - Professional Sales Simulations**

**Credits:** (3)
**Typically Taught Fall Semester:** Full Sem
**Typically Taught Spring Semester:** Full Sem

**Description:** Application of advanced persuasion skills to use in professionally organized competitions. This course will use simulations and role-playing to develop persuasive techniques and theoretical applications.

**Pre-requisite(s):** PS 1143.

May be repeated three times for a maximum of six credit hours.

**PS 3803 - Sales Proposals**

**Credits:** (3)
**Typically Taught Summer Semester:** Full Sem Online
**Typically Taught Fall Semester:** Full Sem; Full Sem Online
**Typically Taught Spring Semester:** Full Sem; Full Sem Online

**Description:** A study of selling techniques required in order to sell products, systems, or services needed by
industrial manufacturing, processing, mining, construction firms, or other related technical areas.

**Pre-requisite(s):** PS 3563.

**PS 3903 - Sales Presentation Strategies and Techniques**

**Credits:** (3)

**Typically Taught Summer Semester:** Full Sem; 1st Blk Online

**Typically Taught Fall Semester:** Full Sem; Full Sem Online

**Typically Taught Spring Semester:** Full Sem; Full Sem Online

**Description:** Principles and practices for the five major categories of professional sales consultants.

**Pre-requisite(s):** PS 1143 and PS 3803.

**PS 4203 - Ethical Sales and Service**

**Credits:** (3)

**Typically Taught Summer Semester:** Full Sem Online

**Typically Taught Fall Semester:** Full Sem; Full Sem Online

**Typically Taught Spring Semester:** Full Sem; Full Sem Online

**Description:** Principles, techniques and analysis of ethics in the sales and service professions. Utilizes group interaction, individualized hands-on experiences and a field based experience.

**Pre-requisite(s):** PS 3563.

**PS 4610 INT - Senior Project I**

**Credits:** (3)

**Typically Taught Summer Semester:** Full Sem Online

**Typically Taught Fall Semester:** Full Sem, Full Sem Online

**Typically Taught Spring Semester:** Full Sem, Full Sem Online

**Description:** A capstone project for students in their final year of the professional sales degree. Provides hands-on experiences in the areas of sales and service including sales, customer service techniques, presentation strategies, and team leadership development. This course focuses on working with sales and service problems in a departmentally approved work environment.

**Co-Requisite(s):** PS 4620.

**Pre-requisite/Co-requisite:** PS 3103, PS 3363, PS 3903.

**PS 4620 INT - Senior Project II**

**Credits:** (3)

**Typically Taught Summer Semester:** Full Sem Online

**Typically Taught Fall Semester:** Full Sem, Full Sem Online

**Typically Taught Spring Semester:** Full Sem, Full Sem Online

**Description:** A continuation of PS 4610.

**Co-Requisite(s):** PS 4610.

**Pre-requisite/Co-requisite:** PS 3103, PS 3363, PS 3903.

**PS 4830 - Directed Readings**

**Credits:** (1-3)

**Typically Taught Fall Semester:** Full Sem

**Typically Taught Spring Semester:** Full Sem

**Description:** Individual readings supervised by a faculty member.

**Pre-requisite(s):** Approval of instructor.

May be repeated twice for a maximum of 3 credit hours.

**PS 4920 - Short Courses, Workshops, Institutes, and Special Programs**

**Credits:** (1-6)

**Workshop**

**Typically Taught Fall Semester:** Full Sem

**Description:** Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript.

May be repeated for a total maximum of 6 credit hours.

**PS 4993 - Sales Career Seminar**

**Credits:** (3)

**Typically Taught Summer Semester:** Full Sem Online

**Typically Taught Fall Semester:** Full Sem, Full Sem Online

**Typically Taught Spring Semester:** Full Sem, Full Sem Online

**Description:** Research and discussion of sales and service related problems. Also designed to prepare sales and service majors for the job market and career opportunities.

**PSY 1010 SS - Introductory Psychology**

**Credits:** (3)

**Typically Taught Summer Semester:** Full Sem, 1st Blk, 2nd Blk, Full Sem Online

**Typically Taught Fall Semester:** Full Sem, 1st Blk, 2nd Blk, Full Sem Online

**Typically Taught Spring Semester:** Full Sem, 1st Blk, 2nd Blk, Full Sem Online
Course Fee: $3.00  
Course Fee Purpose: Maintenance and oversight of the Introductory Psychology Research Participation pool  
Description: Introduction to the scientific study of human behavior.

PSY 1540 - Designing Your Life

Credits: (3)  
Typically Taught Spring Semester: Full Sem  
Description:  
The course is designed to help students understand and overcome the challenges many college students face in the transition to adulthood, a period known as emerging adulthood. Because the course examines issues relevant to self and identity development, students will learn the psychological principles and developmental processes associated with becoming functional college students and young adults.

PSY 2000 SS/EDI - The Psychology of Human Relationships

Credits: (3)  
Typically Taught Summer Semester: Full Sem, Full Sem Online  
Typically Taught Fall Semester: Full Sem, Full Sem Online  
Typically Taught Spring Semester: Full Sem, Full Sem Online  
Description: A systematic review of the research on interpersonal relationships, including the study of multiple factors that contribute to relationship development and functioning and the diverse socio-cultural contexts in which relationships occur.

PSY 2010 - Science and Profession of Psychology

Credits: (3)  
Typically Taught Fall Semester: Full Sem, Full Sem Online  
Typically Taught Spring Semester: Full Sem, Full Sem Online  
Description: The purpose of this course is to build upon Introductory Psychology so that students may better understand the discipline as both a science and a profession. The course covers a range of topics, including research, statistics, ethics, career options, graduate school options and preparation, critical to all fields of psychology and provides the skills necessary for students to succeed in upper-division courses and career preparation. This course is designed for students who are interested in or beginning to pursue psychology as an academic major or minor.  
Pre-requisite(s): PSY 1010.

PSY 2020 - Mental Health Awareness

Credits: (3)  
Typically Taught Fall Semester: 1st Blk  
Typically Taught Spring Semester: 1st Blk  
Description: Students in this course will learn how to recognize when someone is in crisis, how to listen to a peer in distress, and how to refer them to appropriate services. Students will gain a basic understanding of common types of disorders and distress seen on campus (e.g., depression, anxiety). Students will also gain an understanding of adaptive coping skills and how to implement them in their own lives.

PSY 2250 - Learning and Memory

Credits: (3)  
Typically Taught Summer Semester: Full Sem, Full Sem Online  
Typically Taught Fall Semester: Full Sem, Full Sem Online  
Typically Taught Spring Semester: Full Sem, Full Sem Online  
Description: This course will involve a survey and analysis of the basic processes involved in acquisition, retention, and expression of new behaviors and alterations of existing behaviors in animals and humans. The course will examine the central theoretical concepts and issues in the fields of learning and memory.  
Pre-requisite(s): PSY 1010.

PSY 2370 - Psychology of Women and Gender

Credits: (3)  
Typically Taught Summer Semester: Full Sem, Full Sem Online  
Typically Taught Fall Semester: Full Sem, Full Sem Online  
Typically Taught Spring Semester: Full Sem, Full Sem Online  
Description: The philosophical, theoretical, and empirical issues of psychology of gender. Issues include gender differences, stereotypes, androgyny, sexuality, health issues, achievement motivation, gender stereotypes, global women's issues, sexual orientation, issues for women with
disabilities, and violence.

Pre-requisite(s): PSY 1010.

PSY 2400 - Positive Psychology

Credits: (3)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem

Description:
This course surveys the scientific study of how and why people flourish, achieve lasting happiness, and are able to live "The Good Life." The course includes classic and contemporary psychological theory and psychological research dedicated to understanding how people achieve optimal functioning.

Pre-requisite(s): PSY 1010.

PSY 2710 - Biopsychology

Credits: (3)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem

Course Fee: $5.00

Course Fee Purpose: The $5.00-course fee for this course is used to pay for physiological recording supplies (e.g., adhesive disks and electrodes) and biological lab materials (e.g., sheep brains) used in the lab portion of this course.

Description: Biological basis of human & animal behavior, with emphasis upon sensory and nervous system processes underlying motivation, learning, perception, emotion, & abnormal behavior.

PSY 2800 INT CRE - Projects and Research

Credits: (1-3)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem

Description: Supervised participation in faculty research projects in various areas of psychology. Written report required at end of semester; oral report assigned at discretion of faculty supervisor.

Pre-requisite(s): PSY 1010 and permission of the instructor.

May be repeated 4 times for a maximum of 4 credit hours.

PSY 2830 CRE - Directed Readings

Credits: (1-3)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem

Description: Independent readings or secondary research on advanced special topics under the direction of a faculty mentor. For each hour of credit in a readings project the student is required to read an appropriate number of primary research journal articles and book chapters. A paper written in APA style and oral report are required at the end of the term.

Pre-requisite(s): PSY 1010 and faculty mentor permission.

May be repeated 4 times for a maximum of 4 credit hours.

PSY 2860 - Practicum

Credits: (1-3)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem

Description: Lower division practicum course that involves placement of students in state and community agencies for the purpose of providing supervised practice in application of psychological skills and knowledge.

Pre-requisite(s): PSY 1010.

May be repeated for a maximum of 6 credit hours.

PSY 2890 INT - Cooperative Work Experience

Credits: (1-2)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem

Description: Open to all students who meet the following requirements. Provides academic credit for on-the-job learning experience. Learning experiences will be specified in a learning contract. Grade and amount of credit will be determined by the department. Limited to two credit hours per semester and four credit hours counted toward the psychology major and minor from the following courses: PSY 2890, PSY 4890, PSY 4860 and PSY 4390. Federal regulations restrict all Cooperative Work Experience to no more than six semester hours. Must be employed in a position that uses psychological training. By prior permission of instructor only.

Pre-requisite(s): PSY 1010.

May be repeated 4 times for a maximum of 4 credit hours.

PSY 2920 - Short Courses, Workshops, Institutes, and Special Programs
Credits: (1-6)
Workshop
Description: Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript.
Pre-requisite(s): PSY 1010.
May be repeated for a total maximum of 6 credit hours.

PSY 3000 - Child Psychology

Credits: (3)
Typically Taught Summer Semester: 1st Blk, 2nd Blk
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Principles and theories of physiological, psychological, emotional, cognitive, personality and social child development and parent-child relations and developmental problems.
Pre-requisite(s): PSY 1010.

PSY 3010 - Abnormal Psychology

Credits: (3)
Typically Taught Summer Semester: 1st Blk, 2nd Blk, Full Sem Online
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: An overview of abnormal human behavior, its etiology, symptoms and treatment as seen by current psychological paradigms.
Pre-requisite(s): PSY 1010.

PSY 3020 - Child and Adolescent Psychopathology

Credits: (3)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: An overview of the etiology, diagnosis, developmental course, treatment, and prevention of disorders first evident in childhood and adolescence.
Pre-requisite(s): PSY 1010.

PSY 3030 - Health Psychology

Credits: (3)
Typically Taught Fall Semester: Full Sem
Description: This course examines how psychological states (e.g. anxiety, stress) influence physical health, and how physical states (e.g. illness, pain) and the environment influence psychological health. Topics will include stress, coping, adherence to treatment, pain, chronic disease, psychoneuroimmunology and health behavior change. The course will emphasize the biopsychosocial model in understanding health and disease.
Pre-requisite(s): PSY 1010.

PSY 3100 - Psychology of Diversity

Credits: (3)
Typically Taught Summer Semester: 1st Blk
Typically Taught Spring Semester: Full Sem
Description: This course examines the psychological issues associated with human diversity including culture, disabling conditions, gender, class, ethnicity, and others. It addresses the psychological principles underlying these issues and offers effective ways of dealing with these issues.
Pre-requisite(s): PSY 1010.

PSY 3140 - Adolescent Psychology

Credits: (3)
Typically Taught Summer Semester: 1st Blk, 2nd Blk, Full Sem Online
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Principles and theories of physiological, psychological, emotional, cognitive, personality and social adolescent development and parent-adolescent relations and developmental problems.
Pre-requisite(s): PSY 1010.

PSY 3200 - Psychology of Sport, Injury & Rehabilitation

Credits: (3)
Description: This course is designed to provide a basic understanding of the psychology of sport, injury, and rehabilitation. Topics covered include: emotion, motivation, mental skills training and use, psychological antecedents of injury, psychology of injury and rehabilitation, career transition and termination, disabilities, rehabilitation/exercise adherence, eating disorders, alcohol and drug/substance abuse, gender and cultural diversity, and research methods related to psychology of sport, injury and rehabilitation.
Pre-requisite(s): PSY 1010 or HLTH 1110.
Cross-listed with RHS 3200.
Note: Course not currently being offered.

PSY 3240 - The Psychology of Drug Use and Abuse
PSY 3255 - Conditioning, Learning, & Behavior Modification

Credits: (3)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: This course will involve an analysis of the complex processes involved in the acquisition, retention, and expression of new behaviors and the mechanisms related to altering existing behaviors in all types of animals (human and nonhuman). The course will examine the historical and current central theoretical concepts and issues in the fields of conditioning and learning. Additionally, the course will provide you with an understanding of the principles of applied behavioral analysis and modification.
Pre-requisite(s): PSY 1010.

PSY 3270 - Motivation and Emotion

Credits: (3)
Typically Taught Fall Semester: Full Sem-SLCC Miller Campus
Description: Theories, content areas, research methods, measurement and practical applications in the psychology of motivation and emotion.
Pre-requisite(s): PSY 1010.

PSY 3430 - Theories of Personality

Credits: (3)
Typically Taught Summer Semester: 1st Blk
Typically Taught Fall Semester: Full Sem, Full Sem Online
Typically Taught Spring Semester: Full Sem, Full Sem Online
Description: A survey of the major theories of personality.
Pre-requisite(s): PSY 1010.

PSY 3450 - Psychology of Language

Credits: (3)
Typically Taught Spring Semester: Full Sem even years
Description: This course will provide a comprehensive overview of psycholinguistics. It will focus on the cognitive and social aspects of language production and comprehension in both spoken and written language.
Pre-requisite(s): PSY 1010 or ENGL 3010.

PSY 3460 - Social Psychology

Credits: (3)
Typically Taught Summer Semester: Full Sem Online
Typically Taught Fall Semester: Full Sem, Full Sem Online
Typically Taught Spring Semester: Full Sem, Full Sem Online
Description: An empirically based survey of the effects of social influence on the basic psychological processes of individuals. Included are the individual in culture and society, the development of attitudes, and the impact of the group.
Pre-requisite(s): PSY 1010.

PSY 3500 - Cognition

Credits: (3)
Typically Taught Summer Semester: Full Sem, Full Sem Online
Typically Taught Fall Semester: Full Sem, Full Sem Online
Typically Taught Spring Semester: Full Sem, Full Sem Online
Description: Principles of cognition and thinking including attention, memory, concept learning, decision making, and problem solving.
Pre-requisite(s): PSY 1010.

PSY 3550 - Psychology of Consciousness

Credits: (3)
Description: The study of the nature, origins, evolution, and functions of brain, mind and consciousness as these pertain to sensation, perception, learning, memory, cognition, motivation, emotion, behavior, and social relationships from a contemporary neuro-cognitive science perspective.
Pre-requisite(s): Introductory Psychology (PSY 1010), Biopsychology (PSY 2710) and instructor consent required; recommend some background in Introductory Philosophy, Perception, and/or Cognition.
Note: Course not currently being offered.

PSY 3560 - Group Dynamics and Counseling

Credits: (3)
Description: The study of the nature, origins, evolution, and functions of brain, mind and consciousness as these pertain to sensation, perception, learning, memory, cognition, motivation, emotion, behavior, and social relationships from a contemporary neuro-cognitive science perspective.
Pre-requisite(s): Introductory Psychology (PSY 1010), Biopsychology (PSY 2710) and instructor consent required; recommend some background in Introductory Philosophy, Perception, and/or Cognition.
Note: Course not currently being offered.
**PSY 3600 - Statistics in Psychology**

**Credits:** (3)

**Typically Taught Summer Semester:** 1st Blk  
**Typically Taught Fall Semester:** Full Sem  
**Typically Taught Spring Semester:** Full Sem  

**Description:** Techniques of data collection and analysis for application to experimental research in Psychology.  
**Pre-requisite(s):** MATH 1010 or QL with passing grade of C or better.

**PSY 3605 - Psychology Statistics Lab**

**Credits:** (1)  
**Typically Taught Summer Semester:** Full Sem  
**Typically Taught Fall Semester:** Full Sem  
**Typically Taught Spring Semester:** Full Sem  
**Course Fee:** $5.00  
**Course Fee Purpose:** Maintenance of two Psychological Science computer labs (LH 302 & LH 304)  
**Description:** This course covers the application of statistical, database, and graphical software for psychological research analysis and presentation.  
**Pre-requisite/Co-requisite:** Pre-requisite or co-requisite: PSY 3600 or equivalent.

**PSY 3610 CRE - Research Methods in Psychology**

**Credits:** (4)  
**Typically Taught Summer Semester:** Full Sem  
**Typically Taught Fall Semester:** Full Sem  
**Typically Taught Spring Semester:** Full Sem  
**Course Fee:** $5.00  
**Course Fee Purpose:** Research software and research participation tracking  
**Description:** This course will focus on the scientific methods of behavioral and psychological research. Specific emphasis will be placed upon research design, study preparation, data collection, and analysis of experiments on human and animal behavior as well as proposal writing and critiques of experimental literature.  
**Pre-requisite(s):** MATH 1010 or equivalent, PSY 1010 and PSY 3615.

**PSY 3615 - Psychological Statistics and Methods I**

**Credits:** (4)  
**Typically Taught Fall Semester:** Full Sem  
**Typically Taught Spring Semester:** Full Sem  
**Course Fee:** $5.00  
**Course Fee Purpose:** Research software and research participation tracking  
**Description:** This course will focus on the scientific methods of behavioral and psychological research. Specific emphasis will be placed upon research design, study preparation, data collection, and analysis of experiments on human and animal behavior as well as proposal writing and critiques of experimental literature. The course will cover experimental and quasi-experimental approaches and the statistical tools associated with these approaches (e.g., ANOVAs).  
**Pre-requisite(s):** MATH 1010 or equivalent, PSY 1010 and PSY 3615.

**PSY 3616 - Psychological Statistics and Methods II**

**Credits:** (4)  
**Typically Taught Spring Semester:** Full Sem  
**Course Fee:** $5.00  
**Course Fee Purpose:** Research software and research participation tracking  
**Description:** This course will focus on the scientific methods of behavioral and psychological research. Specific emphasis will be placed upon research design, study preparation, data collection, and analysis of experiments on human and animal behavior as well as proposal writing and critiques of experimental literature. The course will cover experimental and quasi-experimental approaches and the statistical tools associated with these approaches (e.g., ANOVAs).  
**Pre-requisite(s):** PSY 1010 or equivalent, PSY 1010 and PSY 3615.

**PSY 3730 - Perception**

**Credits:** (3)  
**Typically Taught Spring Semester:** Full Sem even years  
**Description:** Sensory and perceptual processes whereby living organisms acquire information about the world through the sensory structures, and then select, organize and interpret that information.  
**Pre-requisite(s):** PSY 1010 Or NEUR 2950

**PSY 3740 - Neuropsychopharmacology**
Credits: (3)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: This course provides an in depth analysis of drugs on behavior. Topics include how drugs affect the brain, and consequently behavior, the underlying brain and environmental factors thought to be responsible for drug addiction, tolerance, and sensitivity, pharmacological treatment of major psychological disorders, the classification of common psychoactive drugs, and mechanisms of action of commonly abused drugs.
Pre-requisite(s): NEUR 2950 or PSY 2710 or instructor approval.

PSY 3850 - Forensic Psychology

Credits: (3)
Typically Taught Fall Semester: Full Sem, Full Sem
Typically Taught Spring Semester: Full Sem, Full Sem
Description: A survey course examining the application of fundamental issues in psychology to the criminal justice system.
Pre-requisite(s): PSY 1010.

PSY 4000 - Advanced General

Credits: (3)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: A senior level review of modern concepts in all the major areas of psychology. Designed to help a student prepare for the advanced part of the GRE in psychology. Strongly recommended for those who plan to teach psychology. 24 credit hours of psychology courses and instructor approval required.
Pre-requisite(s): PSY 1010.

PSY 4050 - Evolutionary Psychology

Credits: (3)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Examines origins and evolutionary development of early hominid and contemporary human behavior, e.g., competition and cooperation, mating, reproductive and care-giving strategies, and kinship behaviors. Includes ethological, sociobiological, and social psychological perspectives.
Pre-requisite(s): 24 credit hours of psychology courses and instructor approval and PSY 1010.

PSY 4090 - History and Systems of Psychology

Credits: (3)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Early philosophical origins and contributions to psychology; critical contrasts of systems and schools on major issues. 24 credit hours of psychology courses and instructor approval.
Pre-requisite(s): PSY 1010.

PSY 4100 - Psychology in the Media

Credits: (3)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: This capstone course will highlight how psychological concepts, principles, and theories are depicted in the popular media (e.g., film, documentary). Students will watch psychologically-relevant media, read classic and contemporary research connected to the concepts depicted in the media, and synthesize what they have learned from these sources in oral and written formats. Students will understand how the discipline of psychology provides a framework for understanding the world as depicted in media. 24 credits of Psychology coursework and instructor approval required.
Pre-requisite(s): 24 credits of Psychology coursework and instructor approval.

PSY 4140 - Theories of Development

Credits: (3)
Typically Taught Fall Semester: Full Sem
Description: This capstone course examines current research and theoretical models that focus on human development. Students will read various theories of development to explore 1) the main issues of developmental psychology that theories address, 2) the mechanisms of development, 3) applications, 4) strengths and weaknesses, and 5) contemporary research to highlight how the theory is alive today. Finally, students will synthesize their learning in oral and written formats to address the question, "What is my theory of development?". Students will understand how developmental theory provides a "big picture" framework for understanding the significance of research findings in developmental psychology. Pre-requisite: 24 credits of Psychology coursework and instructor approval.
PSY 4310 - Introduction to Counseling Theories

Credits: (3)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: A didactic introduction to the major theories of counseling and therapy plus an introduction to the research findings associated with effectiveness of therapy and principles of behavioral change. 24 credit hours of psychology courses and instructor approval required.
Pre-requisite(s): (Required) PSY 1010 and PSY 3010.

PSY 4340 - Skills and Techniques of Counseling

Credits: (3)
Description: Provides skills and techniques for counselors, ministers, social workers, and other professionals who serve a helping function.
Three hours of lecture and two hours of lab/week.
Pre-requisite(s): (Recommended) PSY 4310 or equivalent and permission of the instructor.
Note: Course not currently being offered.

PSY 4390 CEL - Capstone Practicum

Credits: (3)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Capstone version of PSY 4860 in which students are placed in state or community agencies for the purpose of providing supervised experiences in applying psychological skills and knowledge. The capstone practicum additionally provides students with an extensive reading list to review with the instructor to better apply their skills and knowledge and understand their experiences on site. 24 credit hours of psychology courses and instructor approval.
Pre-requisite(s): PSY 3610 or PSY 3616 (or equivalent) and other specific courses at the discretion of the supervising instructor. Also, permission of the instructor is required.

PSY 4510 - Industrial and Organizational Behavior

Credits: (3)
Description: The psychological aspects of the work setting including selection, training, motivation, attitudes, and the effects of the organization.

Pre-requisite(s): (Recommended) PSY 1010.
Note: Course not currently being offered.

PSY 4575 - Psychology of Criminal Behavior

Credits: (3)
Typically Taught Spring Semester: Full Sem
Description: A comprehensive account of the biological, psychological, and social factors underlying criminal behavior.
Pre-requisite(s): PSY 3850.

PSY 4760 - Tests and Measurements

Course Fee: $5.00
Course Fee Purpose: Work study student who monitors the classroom, so it can be open at relevant times for students in the class
Description: Survey of methods, techniques, and instruments for measuring individual differences in behavior, a critical analysis of representative tests, values and limitations of test, methods of test selection, lab experience with tests. 24 credit hours of psychology courses and instructor approval required.
Pre-requisite(s): PSY 1010, PSY 3600 and PSY 3010.

PSY 4800 INT CRE - Projects and Research

Credits: (1-3)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Supervised participation in projects and/or primary research with a faculty mentor in various areas of psychology. Limited to advanced students upon consent of psychology mentor and department chair. A paper written in APA style and an oral report are required at the end of the semester.
Pre-requisite(s): PSY 1010, PSY 3600 (Statistics), and PSY 3610 (Research Methods) or equivalent, and faculty mentor permission.
May be repeated 3 times for a maximum of 6 credit hours.

PSY 4805 - Capstone Projects and Research
Credits: (3)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Capstone version of PSY 4800, supervised participation in projects and/or primary research with a faculty supervisor in various areas of psychology. Limited to advanced students upon consent of psychology supervisor and department chair. A paper written APA style and an oral report are required at the end of the semester. 24 credit hours of psychology courses and instructor approval required.
Pre-requisite(s): PSY 3610 or PSY 3616 or equivalent, and permission of a faculty supervisor and the chair.

PSY 4830 INT CRE - Directed Readings

Credits: (1-3)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Independent readings or secondary research on advanced special topics under the direction of a faculty mentor. For each hour of credit in a readings project the student is required to read an appropriate number of primary research journal articles and book chapters. A paper written in APA style and oral report are required at the end of the term.
Pre-requisite(s): PSY 1010, PSY 3600 (Statistics), PSY 3610 (Research Methods) or equivalent, and faculty mentor permission.
Suggested Requisite(s): PSY 3610 may be taken concurrently with PSY 4830.
May be repeated 3 times for a maximum of 6 credit hours.

PSY 4835 - Capstone Directed Readings

Credits: (3)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Capstone version of PSY 4830 which involves independent readings or secondary research on advanced special topics under the direction of a faculty supervisor. Limited to advanced students upon consent of psychology supervisor and department chair. A paper written in APA style and an oral report are required at the end of the semester. 24 credit hours of psychology courses and instructor approval required.
Pre-requisite(s): PSY 3610 or PSY 3616 (or equivalent) and permission of a faculty supervisor and the chair.

PSY 4860 CEL - Practicum

Credits: (1-4)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Placement of students in state and community agencies for the purpose of providing supervised practice in application of psychological skills and knowledge. A maximum of four credit hours counted toward the psychology major and minor from the following courses: PSY 2890, PSY 4890, PSY 4860, and PSY 4390.
Pre-requisite(s): 18 credit hours of psychology courses, one of which must be PSY 1010. Other courses will be at the discretion of the supervising instructor. Also, permission of the instructor is required.
May be repeated one time for a maximum of six credit hours.

PSY 4890 INT - Cooperative Work Experience

Credits: (1-2)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Open to all students. Provides academic credit for on-the-job learning experience. Learning experiences will be specified in a learning contract. Grade and amount of credit will be determined by the department. Limited to two credit hours per semester and four credit hours counted toward the psychology major and minor from the following courses: PSY 2890, 4890, PSY 4860 and PSY 4390. Federal regulations restrict all Cooperative Work Experience to no more than six semester hours. Must be employed in a position that uses psychological training. By prior permission of instructor only.
Pre-requisite(s): PSY 1010.
May be repeated 4 times for a maximum of 4 credit hours.

PSY 4900 - Selected Topics in Psychology

Credits: (2-3)
Variable Title
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: An in-depth exploration of selected topics and issues in the discipline, designed as an upper division course.
Pre-requisite(s): PSY 1010.
May be repeated 3 times for a maximum of 9 credit hours.
PSY 4905 - Capstone Selected Topics in Psychology

Credits: (3)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description:

An in-depth exploration of selected topics and issues in the discipline, which fulfills the goals of a capstone class in the discipline. Students will be expected to read, analyze, and integrate research in a seminar style setting.
Pre-requisite(s): PSY 3610 or PSY 3616 (or equivalent), 24 credit hours of psychology courses, and instructor approval.

PSY 4910 - Senior Thesis

Credits: (3)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: A research project to be written by a senior student under the supervision of a faculty member. Successful completion of the research project will fulfill the capstone requirement of the major (as an alternative to PSY 4000 or PSY 4090) and the senior project requirement for honors. The student must apply for acceptance into the course (applications available from the chair), and the research proposal and the final project must be approved by a faculty committee. It is expected that the course will be taken once for the writing and defense of a proposal and repeated for the writing and defense of the final project. 24 credit hours of psychology courses and instructor approval required.
Pre-requisite(s): PSY 1010.

PSY 4920 INT - Short Courses, Workshops, Institutes, and Special Programs

Credits: (1-6)
Workshop
Description: Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript. May be repeated for a total maximum of 6 credit hours.

Note: Course not currently offered.

PSY 4950 - Capstone Experience: Promoting Psychological Literacy

Credits: (1)
Typically Taught Fall Semester: Full Sem Online
Typically Taught Spring Semester: Full Sem Online
Course Fee: $32.50
Course Fee Purpose: The $32.50-course fee for this course is used to pay for the ETS® Major Field Test. The department pays $795.00 per year to be able to compare the department data on this exam with national data. This comparative metric provides the department with a benchmark standard to assess our performance.
Description: This course is designed for graduating seniors to reflect on and integrate the knowledge and skills acquired during their training in psychology. 24 credit hours of psychology courses and instructor approval required.
Pre-requisite(s): PSY 1010.

PTGS 1010 - First Semester Portuguese

Credits: (3)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Course Fee: $8.00
Course Fee Purpose: Maintain technology in the FL lab, EH 408, and classroom technology.
Description: (N=Novice) Introductory course assuming no significant previous experience with the language. Beginners and students with less than two years of high school language should register for this class. Emphasis on everyday conversation and exposure to cultural perspectives.

PTGS 1020 - Second Semester Portuguese

Credits: (3)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Course Fee: $8.00
Course Fee Purpose: Maintain technology in the FL lab, EH 408, and classroom technology.
Description: (N=Novice) Continuation of PTGS 1010.
Basic language skills including listening, speaking, reading, writing and culture.

**PTGS 2010 - Third Semester Portuguese**

**Credits:** (3)  
**Typically Taught Fall Semester:** Full Sem  
**Course Fee:** $8.00  
**Course Fee Purpose:** Maintain technology in the FL lab, EH 408, and classroom technology.  
**Description:** (NH=Novice High) Continuation of PTGS 1020. Assumes completion of first-year or equivalent experience. Students learn to understand and express ideas about their community and the world. Includes listening, speaking, reading, writing and culture.

**PTGS 2020 HU - Fourth Semester Portuguese**

**Credits:** (3)  
**Course Fee:** $8.00  
**Course Fee Purpose:** Maintain technology in the FL lab, EH 408, and classroom technology.  
**Description:** (NH=Novice High) Continuation of PTGS 2010. The learning and application of strategies for acquiring a foreign language. Students also learn how cultural products and practices reflect a culture's attitudes, values, ideas and meaning. The process of language acquisition and the seeking of cross-cultural understanding provide insights into the commonalities of how the human family learns, thinks and communicates.

**PTGS 2021 - Second Year II**

**Credits:** (3)  
**Description:** (NH=Novice High) Continuation of PTGS 2010 without General Education Humanities credit. Offered through examination only.  
**Pre-requisite(s):** Only available through testing.

**PTGS 2030 - Second Year Language Review**

**Credits:** (3)  
**Course Fee:** $8.00  
**Course Fee Purpose:** Maintain technology in the FL lab, EH 408, and classroom technology.  
**Description:** (NH=Novice High) This course will prepare students who wish to continue language study. Emphasis on conversational skills and a review of language structure and usage.  
Note: Check with department for course availability.

**PTGS 3060 - Grammar & Composition**

**Credits:** (3)  
**Course Fee:** $8.00  
**Course Fee Purpose:** Maintain technology in the FL lab, EH 408, and classroom technology.  
**Description:** (IL=Intermediate Low) Students will read examples of writing in various modes (such as description, narration, exposition, and argument), write short compositions in those modes, and review the necessary grammar to write correctly in those modes.  
Note: Check with department for course availability.

**PTGS 3116 - DLI Bridge Course I**

**Credits:** (3)  
**Typically Taught Fall Semester:** Full Sem  
**Description:** Taught in DLI High Schools for students who have passed the AP Exam with a 4 or higher. Although this is a three credit-hour class, it will meet over the course of a full academic year. Credit will count toward a major or minor in the language.  
**Pre-requisite(s):** PTGS 2020 or AP exam with a score of 4 or better

**PTGS 3117 - DLI Bridge Course II**

**Credits:** (3)  
**Typically Taught Fall Semester:** Full Sem  
**Description:** Taught in DLI High Schools for students who have passed the AP Exam with a 4 or higher. Although this is a three credit-hour class, it will meet over the course of a full academic year. Credit will count toward a major or minor in the language.  
**Pre-requisite(s):** PTGS 2020 or AP exam with a score of 4 or better

**PTGS 3118 - DLI Bridge Course III**

**Credits:** (3)  
**Typically Taught Fall Semester:** Full Sem  
**Description:** Taught in DLI High Schools for students who have passed the AP Exam with a 4 or higher. Although this is a three credit-hour class, it will meet over the course of a full academic year. Credit will count toward a major or minor in the language.  
**Pre-requisite(s):** PTGS 2020 or AP exam with a score of 4 or better
PTGS 3160 - Introduction to Literature

Credits: (3)
Course Fee: $8.00
Course Fee Purpose: Maintain technology in the FL lab, EH 408, and classroom technology.
Description: (IL=Intermediate Low) Required of all majors and minors. 3160 may be taken concurrently with other literature courses. One sheltered section may be offered to students who have not had extensive in-country experience.
Note: Check with department for course availability.

PTGS 3175 - Business Language II

Credits: (3)
Typically Taught Fall Semester: Full Sem

PTGS 3220 - Phonetics and Phonology

Credits: (3)
Course Fee: $8.00
Course Fee Purpose: Maintain and replace equipment in the WLC lab, EH 408, and classroom technology; support for student tutors and online instructional resources.
Description: (IL=Intermediate Low) Analysis of the sounds of language and word formation: practice of native like speech patterns. Required of all teaching majors and minors.
Note: Check with department for course availability.

PTGS 3270 - Special Topics in Linguistics

Credits: (3)
Variable Title
Course Fee: $8.00
Course Fee Purpose: Maintain technology in the FL lab, EH 408, and classroom technology.
Description: (IM=Intermediate Mid) An introduction to linguistic structures and semantic elements. The course provides useful information and practice in the language, its structures and usage. The sub-disciplines of linguistics, other than phonetics and phonology (covered in FL 3220), will be studied. These may include lexical analysis, semantics, morphology, syntax, linguistic change and dialectal variation.
Note: Check with department for course availability.

PTGS 3320 - Applied Language Studies

Credits: (1-3)
Variable Title
Course Fee: $8.00
Course Fee Purpose: Maintain technology in the FL lab, EH 408, and classroom technology.
Description: (Minimal proficiency level varies with content).
May be repeated up to 10 times under different titles.

PTGS 3360 - Advanced Grammar

Credits: (3)
Course Fee: $8.00
Course Fee Purpose: Maintain and replace equipment in the WLC lab, EH 408, and classroom technology; support for student tutors and online instructional resources.
Description: (IL=Intermediate Low) Analysis and application of syntactic principles and discourse structure.
Note: Check with department for course availability.

PTGS 3370 - Special Topics in Linguistics

Credits: (3)
Variable Title
Course Fee: $8.00
Course Fee Purpose: Maintain technology in the FL lab, EH 408, and classroom technology.
Description: (IL=Intermediate Low) Analysis and application of syntactic principles and discourse structure.
Note: Check with department for course availability.

PTGS 3540 - Latin American Environment and Cultures

Credits: (3)
Course Fee: $8.00
Course Fee Purpose: Maintain technology in the FL lab, EH 408, and classroom technology.
Description: (IM=Intermediate Med) Studies in culture, history, geography, social customs, fine arts and civilization. May be repeated for other non-English-speaking cultures.

PTGS 3550 - Cultural Heritage I

Credits: (3)
Variable Title
Course Fee: $8.00
Course Fee Purpose: Maintain technology in the FL lab, EH 408, and classroom technology.
Description: (Intermediate Mid) In-depth studies in culture, history, geography, social customs, fine arts and civilization. May be repeated up to 7 times for credit and for other non-English speaking cultures.

PTGS 3560 - Cultural Heritage II

Credits: (3)
Variable Title
Course Fee: $8.00
**Course Fee Purpose:** Maintain technology in the FL lab, EH 408, and classroom technology.

**Description:** (IM=Intermediate Med) Studies in culture, history, geography, social customs, fine arts, and civilization. May be repeated 3 times for other non-English speaking cultures.

**PTGS 3570 - Special Topics in Culture**

Credits: (3)
Variable Title
Course Fee: $8.00

**Course Fee Purpose:** Maintain technology in the FL lab, EH 408, and classroom technology.

**Description:** (Intermediate Mid) In-depth studies in culture, history, geography, social customs, fine arts, and civilization. May be repeated up to 7 times for credit and for other non-English speaking cultures.

Note: Check with Department for course availability.

**PTGS 3610 - Literature Survey I**

Credits: (3)
Variable Title
Course Fee: $8.00

**Course Fee Purpose:** Maintain technology in the FL lab, EH 408, and classroom technology.

**Description:** (IH=Intermediate High) A survey of the authors and works of a particular period or place. May be taken 3 times up to 9 credits under different titles.

**PTGS 3620 - Literature Survey II**

Credits: (3)
Variable Title
Course Fee: $8.00

**Course Fee Purpose:** Maintain technology in the FL lab, EH 408, and classroom technology.

**Description:** (IH=Intermediate High) A survey of the authors and works of a particular period or place. May be repeated under different titles.

**PTGS 3631 - Literature: Prose**

Credits: (3)

**Typically Taught Fall Semester:** Full Sem

Course Fee: $8.00

**Course Fee Purpose:** Maintain technology in the FL lab, EH 408, and classroom technology.

**Description:** (IM=Intermediate Mid) A survey of works in prose by one or various authors of a particular period or place, or spanning several literary movements and geographical regions. May be taken 3 times up to 9 credits under different titles.

**PTGS 3632 - Literature: Drama**

Credits: (3)

**Typically Taught Fall Semester:** Full Sem

Course Fee: $8.00

**Course Fee Purpose:** Maintain technology in the FL lab, EH 408, and classroom technology.

**Description:** (IM=Intermediate Mid) A survey of theater plays by one or various authors of a particular period or place, or spanning several literary movements and geographical regions. May be taken 3 times up to 9 credits under different titles.

**PTGS 3680 - Literature: Film**

Credits: (3)

Course Fee: $8.00

**Course Fee Purpose:** Maintain technology in the FL lab, EH 408, and classroom technology.

**Description:** (IM=Intermediate Mid) A survey of film by one or various filmmakers of a particular period or place, or spanning several literary movements and geographical regions. May be taken 3 times up to 9 credits under different titles.

Note: Check with department for course availability.

**PTGS 3710 - Business Language I**

Credits: (3)

Course Fee: $8.00

**Course Fee Purpose:** Maintain technology in the FL lab, EH 408, and classroom technology.

**Description:** (IM=Intermediate Mid) Business Language and Practices. Required of all commercial majors.

**PTGS 3715 - Business Language II**

Credits: (3)

Course Fee: $8.00

**Course Fee Purpose:** Maintain technology in the FL lab, EH 408, and classroom technology.

**Description:** (IM=Intermediate High) Advanced Business Language and Practices. Required of all commercial majors.
PTGS 3720 - Language for Specific Purposes I

Credits: (3)
Course Fee: $8.00
Course Fee Purpose: Maintain technology in the FL lab, EH 408, and classroom technology.
Description: (IM=Intermediate Mid) This course is content, vocabulary and culture-based. The course focuses on practical vocabulary, idiomatic expressions, professional terminology and cultural interactions on a variety of topics such as language for the medical professions, social workers, law enforcement or tourism.

PTGS 3730 - Language for Specific Purposes II

Credits: (3)
Course Fee: $8.00
Course Fee Purpose: Maintain technology in the FL lab, EH 408, and classroom technology.
Description: (IM=Intermediate Mid) This course is content, vocabulary and culture-based. The course focuses on practical vocabulary, idiomatic expressions, professional terminology and cultural interactions on a variety of topics, such as language for medical professions, social work, law enforcement or tourism.

PTGS 3740 - Translation I

Credits: (3)
Course Fee: $8.00
Course Fee Purpose: Maintain technology in the FL lab, EH 408, and classroom technology.
Description: (IM=Intermediate Mid) Introduction to basic techniques and skills needed for bilingual translation of non-fiction texts. Emphasis will be on the translation into English, and on the stylistic, syntactic, cultural, lexical, and terminological problems. Students are given ample opportunity to apply these techniques through a series of written translation assignments, which form the basis for class discussion.

PTGS 3850 - Study Abroad

Credits: (1-6)
Description: (IM=Intermediate Mid) Language and culture studies for students whose language proficiency is Intermediate Low to Intermediate High. All Intermediate and Advanced tasks will be performed in the target language. All Superior tasks may be performed in English. Prior travel experience does not apply. May be repeated up to 10 times for credit.

PTGS 4740 - Translation II

Credits: (3)
Course Fee: $8.00
Course Fee Purpose: Maintain technology in the FL lab, EH 408, and classroom technology.
Description: (IH=Intermediate High) Development of techniques and skills needed for bilingual translation of non-fiction texts. Emphasis will be on the translation into the target language. Methods of contrastive linguistics to analyze pertinent aspects of language structure, involving syntax, vocabulary and style, as well as basic theoretical-historical concepts are employed. Students are given ample opportunity to apply these techniques and concepts through a series of written translation assignments, which form the basis for class discussion. Prerequisite/Co-requisite: PTGS 3740 is strongly advised, but not required.

PTGS 4830 - Directed Readings

Credits: (1-3)
Description: (IH=Intermediate High) Independent readings under the direction of a faculty member. May be repeated up to 10 times.
Note: Check with Department for course availability.

PTGS 4850 - Study Abroad

Credits: (3)
Description: (A=Advanced) Language and culture studies for students whose language proficiency is Advanced or Superior. All tasks are performed in the target language. Prior travel experience does not apply.

PUBH 3150 - Introduction to Public Health

Credits: (3)
Typically Taught Summer Semester: Full Sem Online
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem, Full Sem Online
Description: An overview of public and community health including history, management, prevention and epidemiology of disease. Emphasis on the role of community and government health agencies regarding health promotion and disease prevention activities.
PUBH 3200 - Epidemiology and Biostatistics

Credits: (3)
Typically Taught Summer Semester: Online
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem

Description: The goals and objectives of epidemiology, its policy and procedure, and its foundation and support in health care information are the focus of this course. Investigation of an epidemic, measures of mortality, incidence and prevalence, measures of risk, biological variability, probability, screening, sampling, statistical significance, correlation, multiple regression, retrospective and prospective studies, and survival analysis are discussed. Advanced techniques for the statistical analysis of institutional case-mix and quality improvement data are presented.

Pre-requisite(s): Must meet WSU Quantitative Literacy requirement.

PUBH 3210 - Advanced Epidemiology & Population Health

Credits: (3)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem

Description: This course provides an advanced, in-depth, exploration of epidemiology, public health, and global population health. The history, philosophy, core values, concepts, and functions of public health will be discussed at the local, national, and international levels. The concepts and methods needed to track and analyze disease trends will be applied. Students will be able to identify and describe upstream determinants of health including the socioeconomic, behavioral, biological, environmental, and other factors that affect human health and contribute to health disparities. At the conclusion of the course, students will be able to identify public health issues, design a basic intervention, and formulate appropriate internal and external public health communications.

Pre-requisite(s): PUBH 3200 - Epidemiology and Biostatistics.

PUBH 3500 - Biomedical Research Support

Credits: (2)
Typically Taught Fall Semester: Online

Description: Design concepts and information systems used in biomedical research and investigation by drug companies, genetic engineering firms, academic institutions, and individual researchers and the support of same by health information professionals are discussed. The major national research policy-making bodies (NIH, NCHS, CDC) and their research protocols are reviewed. The student also learns what techniques and resources facilitate biomedical literature searches and how to assist a researcher in the pursuit of published information. An overview of the development, structure, and management of a health care institutional medical library is presented.

PUBH 4500 - Grant Writing

Credits: (2)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem Online

Description: This course is an introduction to the art of grant writing. The general elements of a grant will be outlined and explored. Students will learn about what makes a grant proposal successful. Grant writing and evaluation skills will be developed, demonstrated, and exercised.

PUBH 4700 - Public Health Capstone

Credits: (3)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem

Description: The Public Health Capstone will provide students in the Public Health program a comprehensive review culminating in an applied project. Public Health concepts including epidemiology, population health, finance, behavior change, communications and marketing among others will be brought together demonstrating their application in real world public health situations. A final project will be used to demonstrate the students understanding of general public health concepts and their applications.

QS 2900 - Topics in Queer Studies

Credits: (3)
Variable Title
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem

Description: Varied topics as described in the semester schedule. Topics will be drawn from issues related to queer studies.

Pre-requisite(s): WGS 1500.
May be repeated 3 times up to 9 credits with different course content.
QS 3050 - Queer Theories

Credits: (3)
Typically Taught Spring Semester: Full Sem
Description: This course provides an introduction to the study of queer theories. Students will study historical accounts of queer activism and literature, exploring cultural norms and power structures that contribute to the marginalization of those who identify as part of the queer community.
Pre-requisite(s): WGS 1500.

QS 3100 - LGBTQ America Since 1945

Credits: (3)
Typically Taught Fall Semester: Full Sem
Description: This course explores American LGBTQ experience since 1945. Topics include the history of state abuses as well as how LGBTQ people mobilized to overcome such abuses and win recognition, to some degree, of their right to equal treatment and citizenship.

QS 4150 - Research Methods in Queer Studies

Credits: (3)
Typically Taught Fall Semester: Full Sem
Description: This course is designed to introduce students to a variety of approaches to research in queer studies. Students will consider some of the assumptions, which underlie research methodologies that may limit our knowledge about research subjects and affect individuals as researchers.
Pre-requisite(s): QS 3050.

QS 4830 - Directed Readings

Credits: (1-3)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Directed individual readings in the general area of queer studies. Specific topic selected in consultation with instructor; amount of material to be read determined at discretion of instructor, based on level of topic and degree of difficulty of reading and consistent with any existing university and departmental guidelines.
Pre-requisite(s): WGS 1500 and QS 3050 with a grade of 'C' or higher.
May be repeated up to 6 credit hours.

QS 4860 - Internship in Queer Studies

Credits: (3)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: This internship course is a chance for you to consolidate and enrich your undergraduate learning while building the transition to life beyond college. Queer Studies students learn to think critically and act strategically on issues of gender and sexuality, particularly relating to issues of social justice.
Pre-requisite(s): QS 3050.

QS 4900 - Topics in Queer Studies

Credits: (3)
Variable Title
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Varied topics as described in the semester schedule. Topics will be drawn from issues related to queer studies.
Pre-requisite(s): WGS 1500 and QS 3050 with a grade of 'C' or higher.
This course may be taken 2 times for up to 6 credits with different course content.

QS 4949 - The Neuroscience of Sex, Romance, and Sexual Orientation

Credits: (3)
Typically Taught Fall Semester: Full Sem
Description: This course will examine three human imperatives (sex, romance, and sexual orientation) from a neuroscience perspective. The neuroscience basis for each of these aspects of human behavior will be examined through directed readings and in-class discussions.
Pre-requisite(s): PSY 1010.

QUAN 2400 - Business Calculus

Credits: (3)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Course Fee: $13.00
Course Fee Purpose: Quantitative Methods Lab is available in Wattis Business Building, Room WB 202. The course fee for this course is used to fund a Quantitative Methods Lab in Room WB202, which provides tutoring
and computer equipment.

**Description:** Emphasis on applications of calculus to problems in business. Topics include functions, limits, differentiation, and integration. Applications include profit maximization, cost functions, demand analysis, and output maximization with budget constraints and resource allocation.

**Pre-requisite(s):** Earn a "C" or better in MATH 1050, 1080, or 1210 or earn a "C" or better in any math course for which either MATH 1050 or MATH 1080 or MATH 1090 is a prerequisite or; score 3 or higher on AP Calculus exam or; score 70 or higher on ACCUPLACER College Level Math (CLM) or; score of 26 on Math ACT or; score of 65 or higher on ALEKS.

**QUAN 2600 SUS - Business Statistics I**

**Credits:** (3)
**Typically Taught Summer Semester:** Full Sem  
**Typically Taught Fall Semester:** Full Sem  
**Typically Taught Spring Semester:** Full Sem  
**Course Fee:** $13.00  
**Course Fee Purpose:** Quantitative Methods Lab is available in Wattis Business Building, Room WB 202. The course fee for this course is used to fund a Quantitative Methods Lab in Room WB202, which provides tutoring and computer equipment.

**Description:** Introduction to concepts and applications of statistics in business and economics. Topics include summary statistics, probability distributions of random variables, sampling, and estimation. Class will include use of computers.

**Pre-requisite(s):** Earn a "C" or better in MATH 1050, MATH 1080 or MATH 1210 or earn a "C" or better in any math course for which either MATH 1050 or MATH 1080 or MATH 1090 is a prerequisite or; score 3 or higher on AP Calculus exam or; score 70 or higher on ACCUPLACER College Level Math (CLM) or; score of 26 on Math ACT or; score of 65 or higher on ALEKS.

**QUAN 3610 - Business Statistics II**

**Credits:** (3)
**Typically Taught Summer Semester:** 1st Blk  
**Typically Taught Fall Semester:** Full Sem  
**Typically Taught Spring Semester:** Full Sem  
**Course Fee:** $13.00  
**Course Fee Purpose:** Quantitative Methods Lab is available in Wattis Business Building, Room WB 202. The course fee for this course is used to fund a Quantitative Methods Lab in Room WB202, which provides tutoring and computer equipment.

**Description:** Continuation of QUAN 2600. Topics include test of hypotheses, correlation, time series, and multiple regression analysis with specific application to problems in business and economics. Computers will be used extensively in regression analysis.

**Pre-requisite(s):** QUAN 2600.

**RADT 1012 - Cardiographic Technician**

**Credits:** (3)  
**Typically Taught Summer Semester:** Full Sem  
**Typically Taught Fall Semester:** Full Sem  
**Typically Taught Spring Semester:** Full Sem  
**Description:** This course will cover the procedural activities necessary for practical ECG. Students will learn basic heart anatomy, the fundamentals of performing an ECG, stress testing, and ambulatory monitoring. They will also review ECG morphology and appropriate measurements. They will also learn to identify changes in heart rhythm resulting from pharmacological medications. At the conclusion of this course, students will have completed appropriate didactic learning necessary for CCI credentialing as a Certified Cardiac Technician (CCT).

**RADT 1013 - Rhythm Analysis**

**Credits:** (3)  
**Typically Taught Summer Semester:** Full Sem  
**Typically Taught Fall Semester:** Full Sem  
**Typically Taught Spring Semester:** Full Sem  
**Description:** All courses will be taught in a hybrid format heavily focused on face-to-face and hands on learning with some online learning components. This course will cover the procedural activities necessary for Telemetry. Students will learn the fundamentals of Telemetry and identify normal and pathological rhythms demonstrated with telemetry analysis. They will also review EKG morphology and appropriate measurements. At the conclusion of this course, students will have completed appropriate didactic learning necessary for CCI credentialing as a Certified Rhythm Analysis Technician (CRAT).

**RADT 1014 - Basic Cardiac Imaging**

**Credits:** (3)  
**Typically Taught Summer Semester:** Full Sem  
**Typically Taught Fall Semester:** Full Sem  
**Typically Taught Spring Semester:** Full Sem  
**Description:** This course will cover (1) cardiac and vascular anatomy (2) radiological examinations (3)
common pathologies. Course Objectives. By the completion of the semester, each student will demonstrate the ability to discuss and demonstrate application of the following skills and abilities:

Identify anatomy of the heart and large vessels within various radiologic sciences modalities.

Describe common radiologic sciences examinations in radiography, sonography, computed tomography, magnetic resonance imaging, and nuclear medicine.

Identify and describe common cardiac pathologies including: contusion, cardiomyopathy, infarction, dysplasia, tumors, and aneurysm.

RADT 1021 - Limited Clinical Simulation

Credits: (1)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Limited clinical simulation for the limited radiographer to gain skills in radiographic imaging processes.
Co-Requisite(s): RADT 1023, RADT 1024, RADT 1025.

RADT 1022 - Introduction to Radiologic Technology

Credits: (2)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Program orientation, elementary radiation protection and basic darkroom procedures.

RADT 1023 - Limited Radiographic Anatomy & Positioning

Credits: (2)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Limited Radiographic Anatomy and Positioning will cover procedures in the limited scope of radiographic examinations, as well as the basics of human anatomy associated with those exams.
Co-Requisite(s): RADT 1024, RADT 1025, and RADT 1021

RADT 1024 - Limited Principles of Radiographic Exposure

Credits: (3)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Limited Principles of Radiographic Exposure will cover all radiation safety, exposure factors, and image production concepts.
Co-Requisite(s): RADT 1023, RADT 1025, and RADT 1021

RADT 1025 - Limited Patient Care and Assessment

Credits: (2)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: To provide patient care skills that will sustain students in a medical clinic as a limited radiographer.
Co-Requisite(s): RADT 1023, RADT 1024, and RADT 1021

RADT 1303 - Principles of Radiographic Exposure I

Credits: (3)
Typically Taught Fall Semester: Full Sem
Description: Theory of x-ray production; image production and radiographic equipment.

RADT 1502 - Radiographic Anatomy and Positioning I

Credits: (2)
Typically Taught Fall Semester: Full Sem
Course Fee: $12.00
Course Fee Purpose: Lab supplies: Lab Equipment/Software upgrade and Maintenance
Description: Terminology, pathology and radiographic positioning.

RADT 1512 - Radiographic Anatomy and Positioning II

Credits: (2)
Typically Taught Spring Semester: Full Sem
Course Fee: $18.00
RADT 1522 - Radiographic Anatomy and Positioning III

Credits: (2)
Typically Taught Summer Semester: Full Sem
Course Fee: $12.00
Course Fee Purpose: Lab supplies: Lab
Description: Continuation of RADT 1502.
Pre-requisite(s): RADT 1502.

RADT 1532 - Radiographic Anatomy and Positioning IV

Credits: (2)
Typically Taught Fall Semester: Full Sem
Course Fee: $18.00
Course Fee Purpose: Lab supplies: Lab
Description: Continuation of RADT 1512.
Pre-requisite(s): RADT 1522.

RADT 1542 - Radiographic Anatomy and Positioning V

Credits: (2)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Course Fee: $18.00
Course Fee Purpose: Lab supplies: Lab
Description: Continuation of RADT 1532.

RADT 1601 - Clinical Simulation I

Credits: (1)
Typically Taught Fall Semester: Full Sem
Course Fee: $12.00
Course Fee Purpose: Lab supplies: Lab
Description: Patient positioning, darkroom experience and review of radiographic quality.

RADT 1621 - Clinical Simulation II

Credits: (1)
Typically Taught Spring Semester: Full Sem

RADT 1641 - Clinical Simulation III

Credits: (1)
Typically Taught Summer Semester: Full Sem
Course Fee: $12.00
Course Fee Purpose: Lab supplies: Lab
Description: Continuation of RADT 1601.
Pre-requisite(s): RADT 1601.

RADT 1661 - Clinical Simulation IV

Credits: (1)
Typically Taught Fall Semester: Full Sem
Course Fee: $12.00
Course Fee Purpose: Lab supplies: Lab
Description: Continuation of RADT 1641.

RADT 1681 - Clinical Simulation V

Credits: (1)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem

RADT 1810 - Experimental Course

Credits: (1-6)
Experimental
Description: Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript. May be repeated for a total maximum of 6 credit hours.

RADT 2042 - Community-Based Patient Care I

Credits: (1-2)
Typically Taught Fall Semester: Full Sem
Description: Patient case studies and critical care situations.
May be repeated once for credit.
RADT 2043 - Specialty Based Patient Care

Credits: (2)
Typically Taught Spring Semester: Full Sem
Course Fee: $12.00
Course Fee Purpose: Lab supplies: Lab Equipment/Software upgrade and Maintenance
Description: Patient care and management in radiology.

RADT 2272 - Basic Sectional Anatomy

Credits: (2)
Typically Taught Spring Semester: Full Sem
Description: The anatomical appearance of each organ system and common pathology on sectional medical images.

RADT 2403 - Principles of Radiographic Exposure II

Credits: (3)
Typically Taught Spring Semester: Full Sem
Description: Radiographic imaging, instrumentation, image production and factors affecting radiologic quality.

RADT 2803 - Independent Research

Credits: (1-3)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Individualized projects. May be repeated 3 times for credit.

RADT 2821 - Directed Readings & Research I

Credits: (2)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Selecting readings and/or a research project on medical imaging procedures, new technology, patient satisfaction, patient safety, and professional behavior.

RADT 2822 - Directed Readings & Research II

Credits: (2)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Selecting readings and/or a research project on medical imaging procedures, new technology, patient satisfaction, patient safety, and professional behavior.

RADT 2823 - Directed Readings & Research III

Credits: (2)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Selecting readings and/or a research project on medical imaging procedures, new technology, patient satisfaction, patient safety, and professional behavior.

RADT 2824 - Directed Readings & Research IV

Credits: (2)
Typically Taught Fall Semester: Full Sem
Description: Selecting readings and/or a research project on medical imaging procedures, new technology, patient satisfaction, patient safety, and professional behavior.

RADT 2825 - Directed Readings & Research V

Credits: (2)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Selecting readings and/or a research project on medical imaging procedures, new technology, patient satisfaction, patient safety, and professional behavior.

RADT 2861 INT - Clinical Education

Credits: (3)
Typically Taught Fall Semester: Full Sem
Description: Experience gained in a health care facility.
Pre-requisite(s): Acceptance into the program.

RADT 2862 INT - Clinical Education
RADT 2863 INT - Clinical Education
Credits: (3)
Typically Taught Summer Semester: Full Sem
Description: Continuation of RADT 2861.

RADT 2864 INT - Clinical Education
Credits: (3)
Typically Taught Fall Semester: Full Sem
Description: Continuation of RADT 2863.

RADT 2865 INT - Clinical Education
Credits: (2)
Typically Taught Spring Semester: Full Sem
Description: Continuation of RADT 2864.

RADT 2866 INT - Final Competency Evaluation
Credits: (2)
Typically Taught Spring Semester: Full Sem
Description: Demonstration of competency performing the procedures required by the certification agency.

RADT 2913 - Comprehensive Review
Credits: (2)
Typically Taught Spring Semester: Full Sem
Description: Review of didactic and clinical applications.

RADT 2921 - Workshop, Conferences and Telecourses
Credits: (1-3)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
May be repeated twice for a maximum of 3 credit hours.

RADT 2942 - Transition to Clinical Practice
Credits: (2)
Typically Taught Fall Semester: Full Sem
Description: Assistance with career planning and an introduction to specialized imaging procedures and new and future imaging procedures.

RADT 3003 - Psycho-Social Medicine
Credits: (3)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Designed to prepare students to better understand their patient and the patient's family through comparison of diverse populations based on their value systems, cultural and ethnic influences, communication styles, socio-economic influences, health risks and life stages. Study of factors that influence the interrelationships with patients and professional peers. Understanding multicultural diversity assists the student in providing better patient care.

RADT 3043 - Medical Ethics and Law
Credits: (3)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Medical ethics and law and case studies in medical imaging and radiation therapy.

RADT 3123 - Sectional Anatomy
Credits: (2)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Anatomical study of the body in the sagittal, transverse and coronal imaging planes.

RADT 3143 - Imaging Pathophysiology I
Credits: (2)
Typically Taught Fall Semester: Full Sem
Description: Imaging adaptations and alterations in anatomy and physiology with variation outside of the normal range (Unit 1).

RADT 3144 - Imaging Pathophysiology II
Credits: (2)
Typically Taught Spring Semester: Full Sem
Description: Imaging adaptations and alterations in
anatomy and physiology with variation outside of the normal range (Unit 2).

Pre-requisite(s): RADT 3143 - Imaging Pathophysiology I.

RADT 3243 - Community-Based Patient Care II

Credits: (2)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Advanced level patient care, assessment, and management in the community-based environment.

RADT 3253 - Specialty-Based Patient Care II

Credits: (2)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Advanced level patient care, assessment, and management in the specialty-based environment.

RADT 3263 - Diagnostic Services Pharmacology

Credits: (2)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Concepts of pharmacology including modes of action, uses, modes of excretion effects, side effects and patient care required for specific pharmacologic agents.

RADT 3403 - Radiobiology & Health Physics

Credits: (3)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Effects of ionizing radiation on the human body, patient and personnel protection, exposure monitoring health physics and oncology.

RADT 3423 - Federal Regulations

Credits: (2)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Regulations governing health care, equipment and application of ionizing radiation.

RADT 3443 - Quality Assurance in Radiology

Credits: (3)
Typically Taught Summer Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Course Fee: $18.00
Course Fee Purpose: Lab supplies: Lab Equipment/Software upgrade and Maintenance
Description: Development of a quality assurance program and manual to meet accreditation requirements.

RADT 3463 - Computerized Imaging

Credits: (3)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Digital radiography, image acquisition, image processing and digital image management.

RADT 3563 - Managing Clinical Information

Credits: (3)
Typically Taught Fall Semester: Full Sem
Description: Digital and volumetric imaging, emerging technologies, secure computerized management practice, and patient privacy regulations.

RADT 3863 INT - Clinical Internship

Credits: (2-6)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Experience in a radiology specialty area. Consent of instructor is required. May be repeated twice for credit.

RADT 4203 - Patient Education in Radiology

Credits: (2)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Skills necessary to assess, plan and evaluate a variety of educational programs specific to radiology patients.

RADT 4213 - Supervision and Staff Development

Credits: (3)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Federal regulations, developing department protocol, designing departments personnel supervision and quality of care assessment.

RADT 4223 - Promotional Strategies

Credits: (3)
Typically Taught Summer Semester: Full Sem
Description: Assessment of needs, development and implementation of promotional strategies for Radiology Departments.

RADT 4233 - Fiscal Analysis in Radiology

Credits: (3)
Typically Taught Spring Semester: Full Sem
Description: Justification, acquisition and leasing of imaging equipment and accessories, staffing formulas and review of maintenance contracts.

RADT 4243 - Quality Management in Radiology

Credits: (3)
Typically Taught Spring Semester: Full Sem
Description: Concepts and principles of quality management, collection and analysis of data.

RADT 4253 - Risk Management

Credits: (3)
Typically Taught Fall Semester: Full Sem
Description: Study of management of risk associated with the delivery of health care in clinical and non-clinical settings.

RADT 4303 - Cardiology

Credits: (3)
Typically Taught Summer Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Detailed study of the heart: anatomy, physiology, pathophysiology, pharmacology, EKGs and imaging modalities.

RADT 4313 - Visceral, Pelvic and Extremity Angiography

Credits: (3)
Typically Taught Fall Semester: Full Sem
Description: Anatomy, pathology, protocols and interventional procedures of abdominal viscera, extremities and pelvis.

RADT 4333 - Head and Neck Angiography

Credits: (3)
Typically Taught Summer Semester: Full Sem
Description: Anatomy, pathology, protocols and interventional procedures of the aortic arch, brachiocephalic, thyroid and other facial and neck arteries.

RADT 4343 - Thoracic and Venous Procedures

Credits: (3)
Typically Taught Spring Semester: Full Sem
Description: Anatomy, pathology, protocols and interventional procedures of the venous and cardiac systems.

RADT 4403 - Imaging Pathology

Credits: (3)
Typically Taught Fall Semester: Full Sem
Description: Radiographic presentation of pathological conditions, abnormalities and anomalies.

RADT 4413 - Forensic Radiology

Credits: (3)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: This course provides a comprehensive study of medical imaging's role in forensic medicine. Forensic Radiology is used to determine identity of remains,
evaluate injury or cause of death and assist in the detection of abuse. Junior or Senior standing required.

**RADT 4433 - PACS Administration**

*Credits: (3)*  
*Typically Taught Fall Semester: Full Sem*  
*Typically Taught Spring Semester: Full Sem*  
*Description:* Digital imaging and communication standards, PACS administration, image quality, and emerging technology standards.

**RADT 4443 - Imaging Informatics**

*Credits: (3)*  
*Typically Taught Spring Semester: Full Sem*  
*Description:* Analyzing system needed, project management, quality improvement, bioinformatics, clinical informatics, and medical informatics.

**RADT 4453 - Advanced Imaging: 3D Visualization and 3D Printing**

*Credits: (3)*  
*Typically Taught Spring Semester: Full Sem*  
*Description:* This course will be composed of three credit hours of lecture content and includes one additional session of lab participation. Students will learn the advanced operation and manipulation of software to reconstruct two-dimensional (2D) radiology images into three-dimensional (3D) images. The lecture portion of the course will instruct the students on the different 3D rendering techniques and segmentation processes involved with creating digital and printed images. The lab portion of the course will provide the students an opportunity to compile acquired slices from different imaging modalities (MRI, CT, PET, etc.) using advanced 3D rendering and segmentation techniques to create a 3D digital image from their home.

**RADT 4543 - Bone Densitometry**

*Credits: (3)*  
*Typically Taught Summer Semester: Full Sem*  
*Description:* This course comprehensively covers the methods of bone density measurement (bone densitometry, DEXA), the pathogenesis of osteoporosis, quality management issues, therapies for osteoporosis and a review of additional analysis methods.

**RADT 4553 - Breast Anatomy, Physiology and Pathology**

*Credits: (3)*  
*Typically Taught Fall Semester: Full Sem*  
*Description:* Normal breast anatomy and physiology compared to pathological conditions.

**RADT 4563 - Mammographic Positioning/Imaging Techniques**

*Credits: (3)*  
*Typically Taught Spring Semester: Full Sem*  
*Description:* Routine positions, risk versus benefit; tissue variations, specialized procedures and imaging modalities.

**RADT 4572 - Advanced Breast Imaging**

*Credits: (3)*  
*Typically Taught Summer Semester: Full Sem*  
*Typically Taught Fall Semester: Full Sem*  
*Typically Taught Spring Semester: Full Sem*  
*Description:* This course will highlight advanced breast imaging and correlate findings between modalities; discuss associated patient education and medicolegal considerations; and highlight best practice in relation to pathology and patient history.

**RADT 4573 - The Female Patient and Medical Imaging**

*Credits: (3)*  
*Typically Taught Summer Semester: Full Sem*  
*Typically Taught Spring Semester: Full Sem*  
*Description:* This course will familiarize the student to disease processes specific to the female patient and the imaging methods that may be used in diagnosis and treatment. The clinical pathways that are commonly used, involving all radiologic imaging modalities, will be explored. Students who enroll in this course must be certified by the American Registry of Radiologic Technologists.

**RADT 4583 - Mammographic Equipment and Quality Assurance**

*Credits: (3)*  
*Typically Taught Fall Semester: Full Sem*  
*Description:* Equipment operation, technical factors and quality assurance procedures in mammography.
RADT 4603 - Magnetic Resonance Imaging Physics, Instrumentation & Safety
Credits: (3)
Typically Taught Fall Semester: Full Sem
Description: Physical principles and theories of magnetic resonance, instrumentation, safety, imaging sequences and methods in normal and abnormal tissue, and computer parameters of magnetic resonance.

RADT 4610 - Clinical Simulation I
Credits: (1)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Clinical Simulation in the Radiology and Computer Labs.

RADT 4611 - Clinical Simulation II
Credits: (1)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Clinical Simulation in the Radiology and Computer Labs.

RADT 4612 - Clinical Simulation III
Credits: (1)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Clinical Simulation in the Radiology and Computer Labs.

RADT 4613 - Computed Tomography of the Torso and Limbs
Credits: (3)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Description: Sectional anatomy, pathology and imaging protocols of the abdominal viscera, pelvis, thorax and extremities.
Pre-requisite(s): Same as is previously noted for this course

RADT 4623 - Advanced MRI Procedures
Credits: (3)
Typically Taught Spring Semester: Full Sem
Description: Evaluation of organ function and diagnosis of disease process using advanced MRI procedures with emphasis on spectroscopy and functional MR.

RADT 4633 - Magnetic Resonance Imaging of the Central Nervous System
Credits: (3)
Typically Taught Summer Semester: Full Sem
Description: Sectional anatomy, pathology and imaging protocol of the head, spine and central nervous system.

RADT 4643 - Magnetic Resonance of the Torso and Limbs
Credits: (3)
Typically Taught Spring Semester: Full Sem
Description: Sectional anatomy, pathology and imaging protocols of the abdominal viscera, pelvis, thorax and extremities.

RADT 4653 - Computed Tomography of the Central Nervous System
Credits: (3)
Typically Taught Summer Semester: Full Sem
Description: Sectional anatomy, pathology and imaging protocols of the head, spine and central nervous system.

RADT 4663 - Computed Tomography Physics, Instrumentation & Safety
Credits: (3)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Description: Interactions of electromagnetic waves, instrumentation, imaging sequences, computer parameters, and safety of computerized tomography imaging.
Pre-requisite(s): Same as already listed
Co-Requirement(s): Same as already listed

RADT 4803 - Individual Research
Credits: (1-3)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Research projects developed for district, state, regional or national presentation.
May be repeated for a maximum of 3 credit hours.

**RADT 4833 - Directed Readings and Research**

Credits: (3)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Synthesis and analysis of journal articles resulting in a research paper for the purpose of publication.

**RADT 4850 - Study Abroad**

Credits: (1-6)
Variable Title
Typically Taught Summer Semester: Full Sem
Description: The purpose of this course is to provide opportunities for students in health professions to experience a study abroad program that is designed to explore healthcare, culture, and clinical experience.
May be repeated 5 times with a maximum of 6 credit hours.

**RADT 4861 - Clinical Internship**

Credits: (2)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Experience in a radiology specialty area.
Consent of instructor is needed.

**RADT 4862 - Clinical Internship**

Credits: (2)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Experience in a radiology specialty area.
Consent of instructor is needed.

**RADT 4863 INT - Clinical Internship**

Credits: (2-4)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Description: Experience in a radiology specialty area.
May be repeated twice for credit.

**RADT 4911 - Comprehensive Review/CT**

Credits: (2)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Description: Preparation for advanced certification examination.

**RADT 4912 - Comprehensive Review/MRI**

Credits: (2)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Description: Preparation for advanced certification examination.

**RADT 4913 - Comprehensive Review/CIT**

Credits: (2)
Typically Taught Summer Semester: Full Sem
Description: Preparation for advanced certification examination.

**RADT 4914 - Comprehensive Review/M**

Credits: (2)
Typically Taught Summer Semester: Full Sem
Description: Preparation for advanced certification examination.

**RADT 4915 - Comprehensive Review/QM**

Credits: (2)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Preparation for advanced certification examination.

**RADT 4922 - Workshop, Conferences and Telecourses**

Credits: (2)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
RADT 4933 - Research Methods

Credits: (2)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Apply research strategies in health care and clinical practice, obtain certificate for human subject research, formulate a research proposal, and complete an institutional review board application.

RADT 4942 - Transition to Specialty Practice

Credits: (2)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Description: Review of the program educational requirements. Professional responsibilities and requirements as the student transitions into the healthcare marketplace.
May be repeated twice for a maximum of four credit hours.

RADT 4943 - Baccalaureate Thesis

Credits: (2)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Research in health professions utilizing the scientific inquiry method.

RADT 4992 - Seminar

Credits: (1-2)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: New developments and procedures in imaging and therapy and preparing for the future.
May be repeated for a maximum of 2 credit hours.

RADT 5864G - Clinical Preceptorship

Credits: (3)
Typically Taught Summer Semester: Full Sem
Description: Continuation of RADT 6863.

RADT 5867G - Competency Assessment/Residency
RATH 4446 - Quality Assurance

Credits: (3)
Typically Taught Fall Semester: Full Sem
Description: Establishment of a quality assurance program for linear accelerators, simulators and therapeutic isotopes.

RATH 4448 - New Technology in Radiation Therapy

Credits: (3)
Typically Taught Spring Semester: Full Sem
Description: Exploration of the emerging technology and new equipment used in radiation therapy.
Pre-requisite(s): Graduate of an approved Radiography Program or equivalent.

RATH 4861 INT - Clinical Education I

Credits: (3)
Typically Taught Fall Semester: Full Sem
Description: Clinical education designed to facilitate transference of didactic instruction to practical clinical practice.

RATH 4862 INT - Clinical Education II

Credits: (3)
Typically Taught Spring Semester: Full Sem
Description: Clinical education designed to facilitate transference of didactic instruction to practical clinical practice.

RATH 4863 INT - Clinical Education III

Credits: (3)
Typically Taught Summer Semester: Full Sem
Description: Clinical education designed to facilitate transference of didactic instruction to practical clinical practice.

RATH 4913 - Comprehensive Review

Credits: (3)
Typically Taught Summer Semester: Full Sem
Description: Review of all didactic and clinical courses and competencies. Guest lecturer and multiple mock registry examinations will be presented.

REC 1241 - Mountain Biking, Level I

Credits: (1)
Typically Taught Summer Semester: 1st Blk; 2nd Blk
Typically Taught Fall Semester: 1st Blk
Typically Taught Spring Semester: 2nd Blk
Course Fee: $81.00
Course Fee Purpose: This course has a fee attached. Course fees are established in order to benefit the students in this course and may, among other things, be used to cover the costs of equipment replacement and maintenance, consumable materials, licensure examinations, or to meet specific regulatory requirements. Examples of course fee expenditures for this course include mountain bikes parts and maintenance, transportation, first aid supplies, and permit fees.
Description: This physical activity course introduces students to mountain biking and trail riding. Students will explore and apply topics to enable safe, independent bike travel over a variety of terrain and surfaces. Course content will focus on trail awareness and selection, choosing appropriate equipment, and basic bike maintenance and repair.
May be repeated twice and up to 3 credits.

REC 1242 - Mountain Biking, Level II

Credits: (1)
Typically Taught Summer Semester: 1st Blk; 2nd Blk
Typically Taught Fall Semester: 1st Blk
Typically Taught Spring Semester: 2nd Blk
Course Fee: $81.00
Course Fee Purpose: This course has a fee attached. Course fees are established in order to benefit the students in this course and may, among other things, be used to cover the costs of equipment replacement and maintenance, consumable materials, licensure examinations, or to meet specific regulatory requirements. Examples of course fee expenditures for this course include mountain bikes parts and maintenance, transportation, first aid supplies, and permit fees.
Description: This physical activity course introduces students to mountain biking and trail riding. Students will explore and apply topics to enable safe, independent bike travel over a variety of terrain and surfaces. Course content will focus on trail awareness and selection, choosing appropriate equipment, and basic bike maintenance and repair.
repair. May be repeated twice and up to 3 credits.

**REC 1243 - Mountain Biking, Level III**

**Credits:** (1)
**Typically Taught Summer Semester:** 1st Blk; 2nd Blk
**Typically Taught Fall Semester:** 1st Blk
**Typically Taught Spring Semester:** 2nd Blk
**Course Fee:** $81.00
**Course Fee Purpose:** This course has a fee attached. Course fees are established in order to benefit the students in this course and may, among other things, be used to cover the costs of equipment replacement and maintenance, consumable materials, licensure examinations, or to meet specific regulatory requirements. Examples of course fee expenditures for this course include mountain bikes parts and maintenance, transportation, first aid supplies, and permit fees.

**Description:** This physical activity course introduces students to mountain biking and trail riding. Students will explore and apply topics to enable safe, independent bike travel over a variety of terrain and surfaces. Course content will focus on trail awareness and selection, choosing appropriate equipment, and basic bike maintenance and repair. May be repeated twice and up to 3 credits.

**REC 1304 - Backcountry Touring, Level I**

**Credits:** (1)
**Typically Taught Spring Semester:** 1st Blk
**Course Fee:** $30.00
**Course Fee Purpose:** This course has a fee attached. Course fees are established in order to benefit the students in this course and may, among other things, be used to cover the costs of equipment replacement and maintenance, consumable materials, licensure examinations, or to meet specific regulatory requirements. Examples of course fee expenditures for this course include equipment such as avalanche beacons, avalanche probes, collapsible shovels, avalanche airbags, ski helmets, first aid supplies, spare batteries, and ski wax.

**Description:** This physical activity course introduces students to skiing and/or snowboarding safely in the backcountry, outside of resort boundaries where avalanche control and ski patrol are not present. The course covers basic avalanche hazard recognition, evaluation, and mitigation, single-burial avalanche companion rescue, uphill snow travel, and downhill skiing and/or snowboarding techniques for variable snow conditions and hazards. May be repeated three times for a maximum of three credit hours.

**REC 1305 - Backcountry Touring, Level II**

**Credits:** (1)
**Typically Taught Spring Semester:** 1st Blk
**Course Fee:** $35.00
**Course Fee Purpose:** This course has a fee attached. Course fees are established in order to benefit the students in this course and may, among other things, be used to cover the costs of equipment replacement and maintenance, consumable materials, licensure examinations, or to meet specific regulatory requirements. Examples of course fee expenditures for this course include equipment such as avalanche beacons, avalanche probes, collapsible shovels, avalanche airbags, ski helmets, first aid supplies, spare batteries, and ski wax.

**Description:** This physical activity course introduces students to skiing and/or snowboarding safely in the backcountry, outside of resort boundaries where avalanche control and ski patrol are not present. The course covers basic avalanche hazard recognition, evaluation, and mitigation, single-burial avalanche companion rescue, uphill snow travel, and downhill skiing and/or snowboarding techniques for variable snow conditions and hazards. May be repeated three times for a maximum of three credit hours.

**REC 1306 - Backcountry Touring, Level III**

**Credits:** (1)
**Typically Taught Spring Semester:** 1st Blk
**Course Fee:** $76.00
**Course Fee Purpose:** This course has a fee attached. Course fees are established in order to benefit the students in this course and may, among other things, be used to cover the costs of equipment replacement and maintenance, consumable materials, licensure examinations, or to meet specific regulatory requirements. Examples of course fee expenditures for this course include equipment such as avalanche beacons, avalanche probes, collapsible shovels, avalanche airbags, ski helmets, first aid supplies, camping equipment, and mountaineering equipment.

**Description:** This physical activity course introduces students to skiing and/or snowboarding safely in the backcountry, outside of resort boundaries where avalanche control and ski patrol are not present. The course covers basic avalanche hazard recognition, evaluation, and mitigation, single-burial avalanche companion rescue, uphill snow travel, and downhill skiing and/or
snowboarding techniques for variable snow conditions and hazards. May be repeated three times for a maximum of three credit hours.

**REC 1307 - Avalanche Level I**

**Credits:** (1)  
**Typically Taught Spring Semester:** 1st Blk  
**Course Fee:** $100.00  
**Course Fee Purpose:** This course has a fee attached. Course fees are established in order to benefit the students in this course and may, among other things, be used to cover the costs of equipment replacement and maintenance, consumable materials, licensure examinations, or to meet specific regulatory requirements. Examples of course fee expenditures for this course include equipment such as avalanche beacons, avalanche probes, collapsible shovels, avalanche airbags, ski helmets, first aid supplies, spare batteries, and ski wax.

**Description:**  
This course is intended for individuals wishing to pursue travel in avalanche terrain, whether backcountry skiing and snowboarding, snowshoeing, or mountaineering. Different sections of this course may be appropriate for various modes of travel, for example, skiing and snowboarding vs. snowshoeing. Instruction will take place predominantly at local backcountry mountainous areas through practical skills sessions. The course also includes relevant lecture, discussion, group decision making, and travel plan exercises. Emphasis will be placed on development of skills and knowledge to select appropriate terrain to avoid avalanches.

**REC 1308 - Avalanche Rescue**

**Credits:** (1)  
**Typically Taught Spring Semester:** 1st Block  
**Course Fee:** $64.00  
**Course Fee Purpose:** This course has a fee attached. Course fees are established in order to benefit the students in this course and may, among other things, be used to cover the costs of equipment replacement and maintenance, consumable materials, licensure examinations, or to meet specific regulatory requirements. Examples of course fee expenditures for this course include equipment such as avalanche beacons, avalanche probes, collapsible shovels, avalanche airbags, ski helmets, first aid supplies, spare batteries, and ski wax.

**Description:** This course is intended for individuals wishing to learn rescue skills in avalanche terrain, whether backcountry skiing and snowboarding, snowshoeing, or mountaineering.  
**Suggested Requisite(s):** REC 1307.

**REC 1309 - Avalanche Level 2**

**Credits:** (1)  
**Typically Taught Spring Semester:** 1st Block  
**Course Fee:** $100.00  
**Course Fee Purpose:** This course has a fee attached. Course fees are established in order to benefit the students in this course and may, among other things, be used to cover the costs of equipment replacement and maintenance, consumable materials, licensure examinations, or to meet specific regulatory requirements. Examples of course fee expenditures for this course include equipment such as avalanche beacons, avalanche probes, collapsible shovels, avalanche airbags, ski helmets, first aid supplies, spare batteries, and ski wax.

**Description:** This course is intended for individuals wishing to expand their understanding of avalanche problem types and group risk management systems for travel in avalanche terrain, whether backcountry skiing and snowboarding, snowshoeing, or mountaineering.  
**Suggested Requisite(s):** REC 1307 and REC 1308.

**REC 1310 - Whitewater Paddling, Level I**

**Credits:** (1)  
**Typically Taught Summer Semester:** Full Sem, 1st Blk, 2nd Blk  
**Typically Taught Fall Semester:** 1st Blk  
**Typically Taught Spring Semester:** 2nd Blk  
**Course Fee:** $140.00  
**Course Fee Purpose:** This course has a fee attached. Course fees are established in order to benefit the students in this course and may, among other things, be used to cover the costs of equipment replacement and maintenance, consumable materials, licensure examinations, or to meet specific regulatory requirements. Examples of course fee expenditures for this course include equipment such as rafts, paddles/oars, PFDs, helmets, camping equipment, and first aid supplies as well as permit fees, camping fees, and supplemental course assistance to meet state law for supervision on the water.

**Description:** This physical activity course introduces students to the basic skills required for whitewater paddling in a number of potential watercraft such as rafts, kayaks, paddleboards, and canoes. Skills taught include boat maneuvering, reading rapids, and basic rescue skills. May be repeated twice and up to 3 credits.
REC 1311 - Whitewater Paddling, Level II

Credits: (1)
Typically Taught Summer Semester: Full Sem, 1st Blk, 2nd Blk
Typically Taught Fall Semester: 1st Blk
Typically Taught Spring Semester: 2nd Blk
Course Fee: $140.00
Course Fee Purpose: This course has a fee attached.

Description: This physical activity course introduces students to the basic skills required for whitewater paddling in a number of potential watercraft such as rafts, kayaks, paddleboards, and canoes. Skills taught include boat maneuvering, reading rapids, and basic rescue skills. May be repeated twice and up to 3 credits.

REC 1312 - Whitewater Paddling, Level III

Credits: (1)
Typically Taught Summer Semester: Full Sem, 1st Blk, 2nd Blk
Typically Taught Fall Semester: 1st Blk
Typically Taught Spring Semester: 2nd Blk
Course Fee: $170.00
Course Fee Purpose: This course has a fee attached.

Description: This physical activity course introduces students to the basic skills required for whitewater paddling in a number of potential watercraft such as rafts, kayaks, paddleboards, and canoes. Skills taught include boat maneuvering, reading rapids, and basic rescue skills. May be repeated twice and up to 3 credits.

REC 1313 - Swiftwater Rescue

Credits: (1)
Typically Taught Summer Semester: 1st Blk, 2nd Blk
Typically Taught Spring Semester: 2nd Blk
Course Fee: $100.00
Course Fee Purpose: This course has a fee attached.

Description: This course combines classroom and on-river instruction in avoidance and rapid resolution of accidents and injuries in swiftly moving whitewater. The course emphasizes skill demonstration and practice on or near the river and in-water. The course teaches effective rope based and/or rescue PFD based techniques that minimize rescuer risk in these complex systems. The course also includes relevant lecture, discussion, and group management exercises.

REC 1316 - Stand-Up Paddleboard

Credits: (1)
Typically Taught Summer Semester: 1st Blk
Typically Taught Fall Semester: 1st Blk
Course Fee: $125.00
Course Fee Purpose: This course has a fee attached.

Description: This physical activity course is intended to introduce students to the fundamental skills and knowledge necessary to enjoy Stand Up Paddleboarding (SUP). The course will cover: 1) technical knowledge (i.e., history, terminology, equipment, regulations, safety); 2) technical skills (i.e., carrying, launching, landing, balance, stances, strokes, maneuvers, equipment maintenance); and 3 rescue/safety (i.e. self-rescues).

REC 1350 - Scuba Diving, Level I
Credits: (1)
Typically Taught Summer Semester: Full Sem, 1st Blk, 2nd Blk
Typically Taught Fall Semester: Full Sem, 1st Blk, 2nd Blk
Typically Taught Spring Semester: Full Sem, 1st Blk, 2nd Blk
Course Fee: $55.00
Course Fee Purpose: This course has a fee attached. The course fee covers facilities and instruction from the scuba provider.
Description: A beginner level physical activity course that allows students to learn and develop the skills and knowledge needed to safely engage in the underwater activity of scuba diving.
Note: This course is offered through Continuing Education only.

REC 1351 - Scuba Diving, Level II

Credits: (1)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Course Fee: $55.00
Course Fee Purpose: This course has a fee attached. The course fee covers facilities and instruction from the scuba provider.
Description: A physical activity that engages students in the underwater activity of scuba diving. This Level II course allows students to build on skills developed in Level I.
Pre-requisite(s): REC 1350.

REC 1404 - Mountaineering, Level I

Credits: (1)
Typically Taught Summer Semester: 1st Blk
Typically Taught Spring Semester: 1st Blk, 2nd Blk
Course Fee: $100.00
Course Fee Purpose: This course has a fee attached. Course fees are established in order to benefit the students in this course and may, among other things, be used to cover the costs of equipment replacement and maintenance, consumable materials, licensure examinations, or to meet specific regulatory requirements. Examples of course fee expenditures for this course include climbing hardware, harnesses, helmets, crampons, ice axes, avalanche beacons, avalanche probes, collapsible shovels, tents, sleeping bags, packs, and first aid supplies.
Description: This physical activity course introduces students to the basic skills required for mountaineering, including snow climbing and descending, ice climbing, ice axe use, basic avalanche hazard identification, and technical rope systems in these environments. Course offering dependent on weather and snow pack expectations and conditions. May be repeated twice and up to 3 credits.

REC 1405 - Mountaineering, Level II

Credits: (1)
Typically Taught Summer Semester: 1st Blk
Typically Taught Spring Semester: 1st Blk, 2nd Blk
Course Fee: $100.00
Course Fee Purpose: This course has a fee attached. Course fees are established in order to benefit the students in this course and may, among other things, be used to cover the costs of equipment replacement and maintenance, consumable materials, licensure examinations, or to meet specific regulatory requirements. Examples of course fee expenditures for this course include climbing hardware, harnesses, helmets, crampons, ice axes, avalanche beacons, avalanche probes, collapsible shovels, tents, sleeping bags, packs, and first aid supplies.
Description: This physical activity course introduces students to the basic skills required for mountaineering, including snow climbing and descending, ice climbing, ice axe use, basic avalanche hazard identification, and technical rope systems in these environments. Course offering dependent on weather and snow pack expectations and conditions. May be repeated twice and up to 3 credits.

REC 1406 - Mountaineering, Level III

Credits: (1)
Typically Taught Summer Semester: 1st Blk
Typically Taught Spring Semester: 1st Blk, 2nd Blk
Course Fee: $105.00
Course Fee Purpose: This course has a fee attached. Course fees are established in order to benefit the students in this course and may, among other things, be used to cover the costs of equipment replacement and maintenance, consumable materials, licensure examinations, or to meet specific regulatory requirements. Examples of course fee expenditures for this course include climbing hardware, harnesses, helmets, crampons, ice axes, avalanche beacons, avalanche probes, collapsible shovels, tents, sleeping bags, packs, and first aid supplies.
Description: This physical activity course introduces students to the basic skills required for mountaineering, including snow climbing and descending, ice climbing, ice axe use, basic avalanche hazard identification, and technical rope systems in these environments. Course offering dependent on weather and snow pack expectations and conditions. May be repeated twice and up to 3 credits.
and conditions. May be repeated twice and up to 3 credits.

**REC 1505 - Kayaking, Level I**

Credits: (1)
Typically Taught Spring Semester: 2nd Blk
Description: A physical activity course that introduces students to the outdoor activity of kayaking. The fundamental skills of kayaking will be addressed for both beginning and recreational paddlers.

**REC 1510 - Fishing, Level I**

Credits: (1)
Typically Taught Summer Semester: 1st Blk, 2nd Blk
Typically Taught Fall Semester: 1st Blk
Typically Taught Spring Semester: 2nd Blk
Course Fee: $50.00
Course Fee Purpose: This course has a fee attached. Course fees are established in order to benefit the students in this course and may, among other things, be used to cover the costs of equipment replacement and maintenance, consumable materials, licensure examinations, or to meet specific regulatory requirements. Examples of course fee expenditures for this course include first aid supplies, repair/maintenance items, permits, fishing rods/reels, leader/tippet, and flies.
Description: A physical activity course that allows students to learn and develop the skills needed to practice fishing.

**REC 1511 - Fishing, Level II**

Credits: (1)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: 1st Blk
Typically Taught Spring Semester: 2nd Blk
Course Fee: $50.00
Course Fee Purpose: This course has a fee attached. Course fees are established in order to benefit the students in this course and may, among other things, be used to cover the costs of equipment replacement and maintenance, consumable materials, licensure examinations, or to meet specific regulatory requirements. Examples of course fee expenditures for this course include first aid supplies, repair/maintenance items, permits, fishing rods/reels, leader/tippet, and flies.
Description: A physical activity course that allows students to learn and develop the skills needed to practice fishing.

**REC 1512 - Fishing, Level III**

Credits: (1)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: 1st Blk
Typically Taught Spring Semester: 2nd Blk
Description: A physical activity course that allows students to learn and develop the skills needed to safely enjoy hiking through the use of trail resources, environmental conscientiousness, planning, and conduct.

**REC 1520 - Hiking, Level I**

Credits: (1)
Typically Taught Summer Semester: Full Sem, 1st Blk
Typically Taught Fall Semester: 1st Blk
Typically Taught Spring Semester: 2nd Blk
Typically Taught Spring Semester: 2nd Blk
Course Fee: $50.00
Course Fee Purpose: This course has a fee attached. Course fees are established in order to benefit the students in this course and may, among other things, be used to cover the costs of equipment replacement and maintenance, consumable materials, licensure examinations, or to meet specific regulatory requirements. Examples of course fee expenditures for this course include climbing shoes, harnesses, helmets, climbing rope, and climbing holds.

**REC 1521 - Hiking, Level II**

Credits: (1)
Typically Taught Fall Semester: 1st Blk
Typically Taught Spring Semester: 2nd Blk
Description: A physical activity course that allows students to learn and develop the skills needed to safely enjoy hiking through the use of trail resources, environmental conscientiousness, planning, and conduct.

**REC 1522 - Hiking, Level III**

Credits: (1)
Typically Taught Fall Semester: 1st Blk
Typically Taught Spring Semester: 2nd Blk
Description: A physical activity course that allows students to learn and develop the skills needed to safely enjoy hiking through the use of trail resources, environmental conscientiousness, planning, and conduct.

**REC 1527 - Rock Climbing, Level I**

Credits: (1)
Typically Taught Summer Semester: Full Sem, 1st Blk
Typically Taught Fall Semester: Full Sem, 1st Blk
Typically Taught Spring Semester: Full Sem, 2nd Blk
Course Fee: $50.00
Course Fee Purpose: This course has a fee attached. Course fees are established in order to benefit the students in this course and may, among other things, be used to cover the costs of equipment replacement and maintenance, consumable materials, licensure examinations, or to meet specific regulatory requirements. Examples of course fee expenditures for this course include climbing shoes, harnesses, helmets, climbing rope, and climbing holds.
Description: A beginner level physical activity course that allows students to learn and develop the skills and knowledge needed to safely enjoy rock climbing.

**REC 1528 - Rock Climbing, Level II**

Credits: (1)
Typically Taught Summer Semester: 1st Blk
Typically Taught Fall Semester: 1st Blk
Typically Taught Spring Semester: 2nd Blk
Course Fee: $55.00

Course Fee Purpose: This course has a fee attached. Course fees are established in order to benefit the students in this course and may, among other things, be used to cover the costs of equipment replacement and maintenance, consumable materials, licensure examinations, or to meet specific regulatory requirements. Examples of course fee expenditures for this course include climbing shoes, harnesses, helmets, ropes, and climbing hardware.

Description: An intermediate level physical activity course that allows students to learn and develop the skills and knowledge needed to safely enjoy rock climbing.

**REC 1529 - Rock Climbing, Level III**

Credits: (1)
Typically Taught Fall Semester: 1st Blk
Course Fee: $55.00

Course Fee Purpose: This course has a fee attached. Course fees are established in order to benefit the students in this course and may, among other things, be used to cover the costs of equipment replacement and maintenance, consumable materials, licensure examinations, or to meet specific regulatory requirements. Examples of course fee expenditures for this course include climbing shoes, harnesses, helmets, ropes, and climbing hardware.

Description: An advanced level physical activity course that allows students to learn and develop the skills and knowledge needed to safely enjoy rock climbing.

**REC 1530 - Rock Climbing for Instructors, Level I**

Credits: (1)
Typically Taught Fall Semester: 1st Blk
Course Fee: $85.00

Course Fee Purpose: This course has a fee attached. Course fees are established in order to benefit the students in this course and may, among other things, be used to cover the costs of equipment replacement and maintenance, consumable materials, licensure examinations, or to meet specific regulatory requirements. Examples of course fee expenditures for this course include rock climbing equipment and AMGA licensing fees.

Description: This course is intended for individuals pursuing work as climbing instructors or guides and covers the curriculum of the American Mountain Guides Association (AMGA) Single Pitch Instructor Course. Instruction will take place predominantly at local outdoor climbing areas through practical skills sessions. The course also includes relevant lecture, discussion, and teaching exercises. Emphasis will be placed on development of skills and knowledge base for rock climbing instructors.

**REC 1531 - Rock Climbing for Instructors, Level II**

Credits: (1)
Typically Taught Fall Semester: 1st Blk
Course Fee: $82.00

Course Fee Purpose: This course has a fee attached. Course fees are established in order to benefit the students in this course and may, among other things, be used to cover the costs of equipment replacement and maintenance, consumable materials, licensure examinations, or to meet specific regulatory requirements. Examples of course fee expenditures for this course include rock climbing equipment and AMGA licensing fees.

Description: This course is intended for individuals pursuing work as climbing instructors or guides and covers the curriculum of the American Mountain Guides Association (AMGA) Single Pitch Instructor Course. Instruction will take place predominantly at local outdoor climbing areas through practical skills sessions. The course also includes relevant lecture, discussion, and teaching exercises. Emphasis will be placed on development of skills and knowledge base for rock climbing instructors.

**REC 1535 - Leave No Trace Trainer**

Credits: (1)
Typically Taught Summer Semester: 1st Blk
Typically Taught Fall Semester: 1st Blk
Course Fee: $50.00

Course Fee Purpose: This course has a fee attached. Course fees are established in order to benefit the students in this course and may, among other things, be used to cover the costs of equipment replacement and maintenance, consumable materials, licensure examinations, or to meet specific regulatory requirements. Examples of course fee expenditures for this course include camping equipment, transportation, first aid supplies, and camping/permit fees.

Description:
The Leave No Trace (LNT) Trainer course is designed to train current and future outdoor recreation leaders on the principles of Leave No Trace. Participants will gain an in-depth understanding of the seven LNT principles and how to provide LNT awareness workshops in a variety of settings including camps, schools, parks, and backcountry areas. Students who successfully complete this course will be recognized as Leave No Trace Trainers by the Leave No Trace Center for Outdoor Ethics.

REC 1610 - Skiing, Level I

Credits: (1)
Typically Taught Fall Semester: 1st Blk
Course Fee: $155.00
Course Fee Purpose: All skiers/snowboarders are assessed a lab fee of $170 which covers instruction and lift tickets from Powder Mountain.
Description: A physical activity course that allows students to learn and develop the skills and technique needed to safely enjoy skiing and advance through specified skill levels. (CR/NC).

REC 1611 - Skiing, Level II

Credits: (1)
Typically Taught Fall Semester: 2nd Blk
Course Fee: $155.00
Course Fee Purpose: All skiers/snowboarders are assessed a lab fee of $170 which covers instruction and lift tickets from Powder Mountain.
Description: A physical activity course that allows students to learn and develop the skills and technique needed to safely enjoy skiing and advance through specified skill levels. (CR/NC).

REC 1612 - Skiing, Level III

Credits: (1)
Typically Taught Fall Semester: 3rd Blk
Course Fee: $155.00
Course Fee Purpose: All skiers/snowboarders are assessed a lab fee of $170 which covers instruction and lift tickets from Powder Mountain.
Description: A physical activity course that allows students to learn and develop the skills and technique needed to safely enjoy skiing and advance through specified skill levels. (CR/NC).

REC 1620 - Snowboarding, Level I

Credits: (1)
Typically Taught Fall Semester: 4th Blk
Course Fee: $155.00
Course Fee Purpose: All skiers/snowboarders are assessed a lab fee of $170 which covers instruction and lift tickets from Powder Mountain.
Description: A physical activity course that allows students to learn and develop the skills and technique needed to safely enjoy snowboarding and advance through specified skill levels. (CR/NC).

REC 1621 - Snowboarding, Level II

Credits: (1)
Typically Taught Fall Semester: 5th Blk
Course Fee: $155.00
Course Fee Purpose: All skiers/snowboarders are assessed a lab fee of $170 which covers instruction and lift tickets from Powder Mountain.
Description: A physical activity course that allows students to learn and develop the skills and technique needed to safely enjoy snowboarding and advance through specified skill levels. (CR/NC).

REC 1622 - Snowboarding, Level III

Credits: (1)
Typically Taught Fall Semester: 6th Blk
Course Fee: $155.00
Course Fee Purpose: All skiers/snowboarders are assessed a lab fee of $170 which covers instruction and lift tickets from Powder Mountain.
Description: A physical activity course that allows students to learn and develop the skills and technique needed to safely enjoy snowboarding and advance through specified skill levels. (CR/NC).

REC 1630 - Cross-Country Skiing, Level I

Credits: (1)
Typically Taught Fall Semester: 7th Blk
Course Fee: $120.00
Course Fee Purpose: This course has a fee attached. The course fee covers facilities and instruction through Ogden Nordic.
Description: A physical activity course that allows students to learn and develop the skills and technique needed to safely enjoy cross-country skiing. (CR/NC).

REC 1631 - Cross-Country Skiing, Level II
Credits: (1)
Description: A physical activity course that allows students to learn and develop the skills and technique needed to safely enjoy cross-country skiing. (CR/NC).

REC 1632 - Cross-Country Skiing, Level III

Credits: (1)
Description: A physical activity course that allows students to learn and develop the skills and technique needed to safely enjoy cross-country skiing. (CR/NC).

REC 1640 - Skiing for Instructors

Credits: (1)
Typically Taught Fall Semester: 2nd Blk
Description: This course is intended for individuals pursuing work as skiing instructors. Instruction will take place at Powder Mountain ski resort. The course includes relevant lecture, discussion, and teaching exercises. Emphasis will be placed on development of skills and knowledge base for skiing instructors through practical demonstrations and exercise on the snow.

REC 1641 - Skiing for Instructors II

Credits: (1)
Typically Taught Fall Semester: 2nd Blk
Description: This course is intended for individuals pursuing work as skiing instructors. Instruction will take place at Powder Mountain ski resort. The course includes relevant lecture, discussion, and teaching exercises. Emphasis will be placed on development of skills and knowledge base for skiing instructors through practical demonstrations and exercise on the snow.

REC 1642 - Skiing for Instructors III

Credits: (1)
Typically Taught Fall Semester: 2nd Blk
Description: This course is intended for individuals pursuing work as skiing instructors. Instruction will take place at Powder Mountain ski resort. The course includes relevant lecture, discussion, and teaching exercises. Emphasis will be placed on development of skills and knowledge base for skiing instructors through practical demonstrations and exercise on the snow.

REC 1650 - Snowboarding for Instructors, Level I

Credits: (1)
Typically Taught Fall Semester: 2nd Blk
Description: This course is intended for individuals pursuing work as snowboarding instructors. Instruction will take place at Powder Mountain ski resort. The course includes relevant lecture, discussion, and teaching exercises. Emphasis will be placed on development of skills and knowledge base for snowboarding instructors through practical demonstrations and exercise on the snow.

REST 1540 - Survey of Respiratory Therapy

Credits: (1)
Typically Taught Summer Semester: 1st Blk, 2nd Blk
Typically Taught Fall Semester: Full Sem, Online
Typically Taught Spring Semester: Full Sem, Online
Description: This course is designed to introduce allied health and other students to the profession of respiratory therapy. It includes field trips, group discussions, lecture/demonstrations and limited lab activities. Open to all students.

REST 1560 - Multi-Skilled Health Care Worker
Credits: (1)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: This course prepares students from different health care disciplines to understand the hospital environment, patient needs, and perform basic skills of patient care. Topics include the patient's right to privacy, confidentiality, ethical, legal, and cultural issues, documentation, team building, age related concerns, medical terminology, and death and dying. Patient skills include vital signs, oxygen administration, specimen collection, personal care and cleanliness, environmental cleanliness, nutrition and diet, elimination, positioning and ambulating, patient safety and comfort, and OSHA guidelines for healthcare worker safety.

REST 2140 - Introduction to Basic Therapeutic Modalities Lab

Credits: (3)
Typically Taught Fall Semester: Full Sem
Course Fee: $200.00
Course Fee Purpose: Sterile gloves, cannula, O2 masks, non-rebreathers, Venturi masks, 11mm/22mm adapters, sylastic connectors, ABG syringes, mannequins, incentive spirometers, O2 analyzers, saturation monitors, wrighte's respirometers, artificial arms [arterial puncture], postural drainage
Description: Introductory Laboratory course emphasizing basic patient interaction and assessment skills. Includes infection control, the administration of medical gases, humidity and aerosol, pharmacologic agents, hyperinflation therapy, airway clearance techniques and methods of care, and artificial ventilation.

REST 2160 - Equipment Management Lab

Credits: (3)
Typically Taught Spring Semester: Full Sem
Course Fee: $200.00
Course Fee Purpose: Mechanical ventilators [Drager, Avelo, Puritan-Bennett, Siemons] CPAP equip., hospital gurneys, oxygen quick connects, laryngoscopes, adult ET tubes, bronchoscopy equip,
Description: Laboratory course emphasizing patient assessment skills relating to ventilation techniques and equipment. Includes equipment used by the respiratory care practitioner in initiating, troubleshooting, monitoring, and weaning from mechanical ventilation.

REST 2210 - Elementary Cardiopulmonary Anatomy and Physiology

Credits: (3)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Cardiopulmonary anatomy and physiology specifically for the entry-level respiratory care practitioner. Includes physics of respiration, oxygen and carbon dioxide transport, and control of ventilation.

REST 2230 - Cardiopulmonary Pathophysiology

Credits: (2)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: A synopsis of medical and surgical cardiopulmonary disorders for the entry-level practitioner. Etiology, symptomatology, pathology, diagnosis, treatment, and prognosis of these disorders are presented.

REST 2250 - Basic Patient Assessment

Credits: (2)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: A basic orientation to patient assessment techniques used to obtain a patient medical history and physical examination. Discussion of pulmonary disease integrates assessment information with laboratory and radiographic data.

REST 2270 - Application of Cardiopulmonary Diagnostics

Credits: (3)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Introduction to theory and clinical application of basic cardiopulmonary diagnostic studies, including simple spirometry, arterial and mixed venous blood gases, and electrocardiograms. Course emphasizes critical thinking skills in the application of diagnostic findings and utilizes case studies, class discussions, and extensive study guides.
Pre-requisite(s): Program acceptance required.
REST 2300 - Basic Modalities in Respiratory Care I

Credits: (3)
Typically Taught Fall Semester: Full Sem, 1st Blk
Typically Taught Spring Semester: Full Sem, 1st Blk
Description: Theory and clinical application of basic therapies. Course includes indications, complications, hazards, equipment needed, side effects, and assessment for medical gases, humidity, aerosols, airway clearance, hyperinflation therapy, and pharmacologic agents. Course emphasizes patient assessment and critical thinking skills.
Co-Requisite(s): Concurrent enrollment in REST 2140.

REST 2310 - Basic Modalities in Respiratory Care II

Credits: (3)
Typically Taught Fall Semester: Full Sem, 2nd Blk
Typically Taught Spring Semester: Full Sem, 2nd Blk
Description: Theory and clinical applications of airway management and artificial ventilation, including IPPB and introduction to modes of mechanical ventilation. Also includes the theory of invasive and non-invasive monitoring technology, and equipment decontamination.

REST 2320 - Essentials of Mechanical Ventilation

Credits: (2)
Typically Taught Summer Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Course provides a basic understanding of essentials for mechanical ventilation. Includes determining the need for ventilatory support, the associated physiology and how ventilatory support is initiated, maintained, monitored, and discontinued.
Pre-requisite(s): Program acceptance required.

REST 2330 - Entry Level Respiratory Therapy Review

Credits: (1)
Typically Taught Spring Semester: Full Sem
Description: Course is a comprehensive review intended to prepare the student for the entry-level certification/licensure examination. The material covered is based on the examination matrix provided by the National Board for Respiratory Care (N.B.R.C.).

REST 2500 - Survey of Polysomnography

Credits: (1)
Typically Taught Summer Semester: 1st Blk
Description: Introduction to polysomnography as a profession. Course includes an overview of the polysomnogram, sleep disorders as they affect the general population, typical employment in the field, and employment opportunities. Also includes an introduction to the professional organization of sleep and requirements to become a registered polysomnographic technologist (R.PSG.T). Students taking REST 3500 are required to write a 6-10 page paper outlining the assessment of sleep disorders or neurodiagnostics. Students taking REST 2500 cannot take REST 3500 for credit.
Pre-requisite(s): Medical terminology, anatomy, and physiology or completion of respiratory therapy program or C.R.T., R.R.T., or R.N. credential.

REST 2501 - Anatomy and Physiology of Sleep

Credits: (3)
Description: Introduction to the anatomy and physiology of the neurologic, cardiac, and respiratory systems during sleep. Basic anatomy and physiology of wake-sleep cycles are studied, with emphasis on changes that occur during varying stages of sleep and during common sleep disorders. Introduction to the EEG, EOG, EKG, EMG, and other polysomnography data recorders. Students taking REST 3501 are required to write a 6-10 page paper outlining physiologic components affecting quality of sleep. Students taking REST 2501 cannot take REST 3501 for credit.
Pre-requisite(s): medical terminology, anatomy, and physiology or completion of respiratory therapy program or C.R.T., R.R.T., or R.N. credential.

REST 2502 - Introduction to Sleep Disorders

Credits: (2)
Typically Taught Summer Semester: 1st Blk
Description: Course provides an overview of the history of sleep medicine, normal sleep physiology, effects of the sleep-wake stage, sleep disorders and abnormal sleep physiology, and an introduction to polysomnography (including patient interaction, sensor and lead placements, and instrumentation). Course also introduces the fundamentals of therapeutic interventions utilized to treat sleep disorders. Students taking REST 3502 are required to write a 6-10 page paper outlining the implications for assisted ventilation to sleep disorders. Students taking REST 2502 cannot take REST 3502 for credit.
Pre-requisite(s): medical terminology, anatomy, and
REST 2500 - Principles of Pharmacology

Credits: (2)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Introduction to pharmacology, including general principles, autonomic and central nervous system agents, and cardiovascular agents. Also includes drugs used in managing renal, GI tract, endocrine, and infectious or neoplastic diseases and disorders.

REST 2700 INT - Clinical Applications

Credits: (4)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Clinical rotations in various medical settings performing skills learned and practiced in REST 2140. Recommending and modifying basic therapies will be emphasized utilizing patient assessment skills and review of patient medical history.
Suggested Requisite(s): Concurrent enrollment in REST 2140.

REST 2710 INT - Specialty Clinical Experiences

Credits: (1)
Typically Taught Summer Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Clinical rotations in various medical settings providing the opportunity to observe and participate in various specialty areas within the profession, including PFTs, cardiac testing, EKGs, ABGs, and longterm artificial airway care.
Suggested Requisite(s): Concurrent enrollment in REST 2160.

REST 2720 INT - Clinical Applications

Credits: (3)
Typically Taught Summer Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Clinical rotations in various medical settings performing skills learned and practiced in REST 2140. Initiating, monitoring, and weaning from mechanical ventilation will be emphasized utilizing patient assessment skills. Case studies will be used to practice critical thinking skills in the management of ICU patients.
Suggested Requisite(s): Concurrent enrollment in REST 2160.

REST 2800 - Independent Projects

Credits: (1-3)
Description: Projects must meet departmental and professional goals and standards and must have instructor approval prior to beginning project; enrollment by permission only.
May be repeated twice for a maximum of 3 credit hours.

REST 2830 - Directed Readings

physiology or completion of respiratory therapy program or C.R.T., R.R.T., or R.N. credential.

REST 2503 - Instrumentation and Computers in Polysomnography

Credits: (2)
Description: Course provides study of equipment, instrumentation, and recording devices utilized in polysomnography. Includes EEG waves, signal pathway and derivation of waves, impedance, sensitivity, time constants, amplifiers, filters, calibration, electrodes, artifacts (both equipment and patient-generated), computer basics, and monitoring devices. Students taking REST 3503 are required to write a 6-10 page paper outlining specific instrumentation in polysomnography assessing sleep disorders. Students taking REST 2503 cannot take REST 3503 for credit.
Pre-requisite(s): REST 2500/REST 3500 and REST 2502/REST 3502 or medical terminology, human anatomy and human physiology.

REST 2505 - Therapeutics of Managing Sleep Apnea

Credits: (2)
Description: Course provides current therapies and interventions for treatment of sleep apneas. Interventions include positive airway pressure therapy (nocturnal CPAP and bi-level CPAP), surgery, and dental devices. Patient compliance and outcomes of these treatments are included. Students taking REST 3505 are required to write a 6-10 page paper outlining strategies managing sleep apnea. Students taking REST 2505 cannot take REST 3505 for credit.
Pre-requisite(s): REST 2501/REST 3501 and REST 2502/REST 3502 or medical terminology, human anatomy and human physiology.
Credits: (1-2)
Typically Taught Spring Semester: Full Sem
Description: Readings must meet departmental and professional goals and standards and must have instructor approval prior to beginning; enrollment by permission only. May be repeated twice for a maximum of 3 credit hours.

REST 2920 - Short Courses, Workshops, Institutes, and Special Programs

Credits: (1-6)
Workshop
Description: Consult semester schedule for the current offering under this number. The specific title and credit authorized will appear on student transcript. May be repeated for a total maximum of 6 credit hours.

REST 3210 - Advanced Cardiopulmonary Anatomy and Physiology

Credits: (3)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Cardiopulmonary anatomy and physiology specifically for the therapist-level practitioner. Includes advanced anatomical considerations for the cardiac, pulmonary and renal systems in neonates and adults. Includes developing abstracts from evidence-based research.
Pre-requisite(s): Enrollment in baccalaureate respiratory therapy program, CRT credential, or equivalent.

REST 3220 - Advanced Cardiopulmonary Pathophysiology

Credits: (3)
Typically Taught Spring Semester: Full Sem
Description: Pathology and prognosis of coronary artery disease, interpreting 12-lead ECG's, fungal lung diseases, bronchogenic carcinomas, ARDS, chest injuries, shock in relation to the care of the trauma patient, and differentiation of intracellular and extracellular fluid compartments with renal pathology are presented. Includes developing abstracts from evidence-based research.
Pre-requisite(s): Enrollment in baccalaureate respiratory therapy program, CRT credential, or equivalent.

REST 3230 - Advanced Cardiopulmonary Technology

Credits: (2)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Advanced diagnostic procedures and interpretive skills in cardiopulmonary function, lung dynamics, specialty gases, blood gas analysis, and metabolic assessment.

REST 3260 - Neonatal/Pediatric Respiratory Care

Credits: (3)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Course Fee: $137.18
Course Fee Purpose: Neonatal sx equip., neonatal ventilators, infant ET tubes, holders, issoleses, headwalls, O2 blenders, infant Miller/MacIntosh blades, intubation mannequin.
Description: Pediatric and neonatal respiratory care with emphasis on intensive care activities, therapeutic procedures, life support modalities and fetal, neonatal, pediatric pathophysiology.
Pre-requisite(s): Enrollment in baccalaureate respiratory care program, CRT credential, or equivalent.

REST 3270 - Adult Critical Care

Credits: (2)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Course Fee: $137.18
Course Fee Purpose: Adult monitoring systems, chest tube evacuation, bronchoscope & light source, bariatric stretcher, laryngoscopes and endotracheal tubes
Description: Advanced adult respiratory intensive care, including hemodynamic monitoring, ventilation/perfusion monitoring, pulmonary assessment and airway management.

REST 3280 - Patient Care Continuum/Quality Management

Credits: (3)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Theory and principles of pulmonary and spinal cord rehabilitation, polysomnography, discharge planning, patient education, quality management, home and self care, legal, ethical, and moral considerations of chronic and extended care.
REST 3500 - Survey of Polysomnography

Credits: (1)
Typically Taught Fall Semester: 1st Blk
Typically Taught Spring Semester: 1st Blk
Description: Introduction to polysomnography as a profession. Course includes an overview of the polysomnogram, sleep disorders as they affect the general population, typical employment in the field, and employment opportunities. Also includes an introduction to the professional organization of sleep and requirements to become a registered polysomnographic technologist (R.PSG.T). Students taking REST 3500 are required to write a 6-10 page paper outlining the assessment of sleep disorders or neurodiagnostics. Students taking REST 2500 cannot take REST 3500 for credit.
Pre-requisite(s): Medical terminology, anatomy, and physiology or completion of respiratory therapy program or C.R.T., R.R.T., or R.N. credential.

REST 3501 - Anatomy and Physiology of Sleep

Credits: (3)
Typically Taught Summer Semester: 1st Blk
Description: Introduction to the anatomy and physiology of the neurologic, cardiac, and respiratory systems during sleep. Basic anatomy and physiology of wake-sleep cycles are studied, with emphasis on changes that occur during varying stages of sleep and during common sleep disorders. Introduction to the EEG, EOG, EKG, EMG, and other polysomnography data recorders. Students taking REST 3501 are required to write a 6-10 page paper outlining physiologic components affecting quality of sleep. Students taking REST 2501 cannot take REST 3501 for credit.
Pre-requisite(s): Medical terminology, anatomy, and physiology or completion of respiratory therapy program or C.R.T., R.R.T., or R.N. credential.

REST 3502 - Introduction to Sleep Disorders

Credits: (2)
Description: Course provides an overview of the history of sleep medicine, normal sleep physiology, effects of the sleep-wake stage, sleep disorders and abnormal sleep physiology, and an introduction to polysomnography (including patient interaction, sensor and lead placements, and instrumentation). Course also introduces the fundamentals of therapeutic interventions utilized to treat sleep disorders. Students taking REST 3502 are required to write a 6-10 page paper outlining the implications for assisted ventilation to sleep disorders. Students taking REST 2505 cannot take REST 3502 for credit.
Pre-requisite(s): medical terminology, anatomy, and physiology or completion of respiratory therapy program or C.R.T., R.R.T., or R.N. credential.

REST 3503 - Instrumentation and Computers in Polysomnography

Credits: (2)
Typically Taught Summer Semester: 1st Blk
Typically Taught Fall Semester: 1st Blk
Typically Taught Spring Semester: 1st Blk
Description: Course provides study of equipment, instrumentation, and recording devices utilized in polysomnography. Includes EEG waves, signal pathway and derivation of waves, impedance, sensitivity, time constants, amplifiers, filters, calibration, electrodes, artifacts (both equipment and patient-generated), computer basics, and monitoring devices. Students taking 3503 are required to write a 6-10 page paper outlining specific instrumentation in polysomnography assessing sleep disorders. Students taking REST 2503 cannot take REST 3503 for credit.
Pre-requisite(s): REST 2500/REST 3500 and REST 2502/REST 3502 or medical terminology, human anatomy and human physiology.
May be repeated twice with a maximum of 6 credit hours.

REST 3504 - Laboratory Practice of Instrumentation in Polysomnography

Credits: (1)
Description: Course provides practice and application of operating principles of equipment, instrumentation, and recording devices utilized in polysomnography. Includes EEG waves, signal pathway and derivation of waves, impedance, sensitivity, time constants, amplifiers, filters, calibration, electrodes, artifacts (both equipment and patient generated), computer basics, and monitoring devices.
Pre-requisite(s): REST 3502/REST 2502 or medical terminology, human anatomy and human physiology
Co-Requisite(s): Concurrent enrollment with REST 3503.

REST 3505 - Therapeutics of Managing Sleep Apnea

Credits: (2)
Description: Course provides current therapies and interventions for treatment of sleep apneas. Interventions include positive airway pressure therapy (nocturnal CPAP
and bi-level CPAP), surgery, and dental devices. Patient compliance and outcomes of these treatments are included. Students taking REST 3505 are required to write a 6-10 page paper outlining strategies managing sleep apnea. Students taking REST 2505 cannot take REST 3505 for credit.

Pre-requisite(s): REST 2501/REST 3501 and REST 2502/REST 3502 or medical terminology, human anatomy and human physiology.

May be repeated once for a maximum of 4 credit hours.

**REST 3506 - Advanced Technical Procedures**

Credits: (3)

Description: Course provides detailed description and discussion of specific diagnostic procedures in PSG, including multiple sleep latency tests, maintenance of wakefulness test, REM behavior disorder studies, MMPI, movement disorders, TCM, nocturnal seizure disorders, esophageal balloon procedures, and others.

Pre-requisite(s): REST 3502 and REST 3503.

May be repeated once for a maximum of 6 credit hours.

**REST 3507 - Event Recognition and Polysomnography Scoring**

Credits: (3)

Description: Course provides advanced study of sleep stages and recognition of EEG characteristics of each stage. Multi-channel recording of breathing events, leg movements, ocular movements, cardiac and oxygenation monitoring, parasomnias, and interictal and ictal epileptic events are also presented. Course will include review and scoring of 12-hour polysomnography records to determine the overall sleep score.

Pre-requisite(s): REST 3501 and REST 3502.

**REST 3508 - Sleep Center Management**

Credits: (1)

Description: Course is designed to prepare students for sleep center management in hospitals and independent facilities. Course includes sleep laboratory requirements for accreditation, personnel requirements and training, PSG study documentation, technician manuals, quality assurance, policies and procedures, and lab protocols. REST 3500 or credentialed as C.R.T., R.R.T., or R.N.

**REST 3509 - Cases in Sleep Medicine**

Credits: (2)

Typically Taught Summer Semester: 1st Blk
Typically Taught Spring Semester: 1st Blk

Description: Course will include physician presentations or case studies of patients with a variety of sleep disorders. Case-based learning is applied in the context of patient presentation and initial interview and diagnostic findings, determination of appropriate interview and diagnostic studies, interpretation of patient findings, recommendation for patient therapy, and follow-up of patient compliance and outcome(s) of therapeutic intervention.

Pre-requisite(s): REST 3502 and REST 3505.

May be repeated once for a maximum of 4 credit hours.

**REST 3510 - Clinical Practice I in Polysomnography**

Credits: (2)

Description: Introduction to the sleep laboratory and the set-up, monitoring, and therapeutic interventions associated with polysomnography. Students will be oriented to patient interviewing and selection, OSHA standards, sleep laboratory standards, and confidentiality. Competency is demonstrated in patient set-up, producing a reliable PSG, recognizing artifact, and basic therapeutic interventions for common sleep disorders.

Pre-requisite(s): REST 3502.

Co-Requisite(s): Concurrent enrollment in REST 3503 and REST 3504.

May be repeated twice for credit.

**REST 3511 - Clinical Practice II in Polysomnography**

Credits: (2)

Description: Case-based clinical applications course. Course requires competency in complete patient management (patient referral and interview, physician consult, patient study[ies], therapeutic intervention and follow-up of patient compliance). Students will develop the patient history and physical, perform the study, score the patient record, interpret the report, apply therapy, and follow-up patient compliance.

Pre-requisite(s): REST 3502 and REST 3510.

Co-Requisite(s): Concurrent enrollment in REST 3505.

May be repeated once for a maximum of 4 credit hours.

**REST 3512 - Clinical Practice III in Polysomnography**

Credits: (4)

Description: Clinical applications course providing
experience in performing advanced technical procedures, including multiple sleep latency tests, maintenance of wakefulness tests, REM behavior disorders studies, MMPI, movement disorders, TCM, nocturnal seizure disorders, esophageal balloon procedures, and others.

**Pre-requisite(s):** REST 3502, REST 3510, and REST 3511.

**Co-Requisite(s):** Concurrent enrollment in REST 3506. May be repeated once for a maximum of 8 credit hours.

**REST 3760 INT - Clinical Applications of Neonatal/Pediatric Respiratory Care**

**Credits:** (4)

**Typically Taught Spring Semester:** Full Sem

**Description:** The clinical application of pediatric and neonatal assessments as they relate to selection and use of respiratory care procedures and equipment specific for this patient population.

**REST 3770 INT - Clinical Applications of Adult Critical Care**

**Credits:** (4)

**Typically Taught Fall Semester:** Full Sem

**Typically Taught Spring Semester:** Full Sem

**Description:** Adult respiratory care in the intensive care setting [shock-trauma, thoracic, burn ICUs] with emphasis on hemodynamic monitoring, ventilation/perfusion monitoring, pulmonary assessment and airway management.

**Co-Requisite(s):** To be taken concurrently with REST 3270.

**REST 3780 INT - Clinical Applications**

**Credits:** (2)

**Typically Taught Fall Semester:** Full Sem

**Typically Taught Spring Semester:** Full Sem

**Description:** Clinical experiences related to REST 3280: rehabilitation, extended care, home care agencies, polysomnography, patient assessment and planning for discharge, and quality management.

**Co-Requisite(s):** To be taken concurrently with REST 3280.

**REST 3800 - Respiratory Care Certifications**

**Credits:** (3)

**Typically Taught Summer Semester:** Full Sem

**Typically Taught Fall Semester:** Full Sem

**Typically Taught Spring Semester:** Full Sem

**Description:** Best practice for advanced resuscitation skills for neonates, children, and adults are demonstrated and effective team-based care for health professionals presented. Advanced life-support skills are presented and practiced prior to entry into the workforce.

**REST 3900 - Clinical Simulation Seminar**

**Credits:** (1)

**Typically Taught Summer Semester:** Full Sem

**Typically Taught Fall Semester:** Full Sem

**Typically Taught Spring Semester:** Full Sem

**Description:** Problem-based clinical concepts course: comprehensive program review including written and clinical simulation examinations.

**Pre-requisite(s):** Enrollment in baccalaureate respiratory therapy program; CRT credential, or equivalent.

**REST 4600 - Patient Education and Disease Management**

**Credits:** (3)

**Typically Taught Summer Semester:** Full Sem - Online

**Typically Taught Fall Semester:** Full Sem - Online

**Typically Taught Spring Semester:** Full Sem - Online

**Description:** Quality of care issues arise in a variety of management roles throughout the spectrum of care. Practitioners are increasingly serving as supervisors, managers, and clinical preceptors in their roles involving case management, disease navigation, and home management in chronic respiratory patients. This course focuses on improving communication and coordination of care to educate patients and reduce readmissions, understand reimbursement systems, and quality outcomes for patients in our care.

**Pre-requisite(s):** AAS in Respiratory Therapy

**REST 4610 - Advanced Patient Assessment**

**Credits:** (1-2)

**Typically Taught Summer Semester:** Full Sem

**Typically Taught Fall Semester:** Full Sem

**Typically Taught Spring Semester:** Full Sem

**Description:** The advanced patient assessment project is designed to be a physician intensive, interactive experience that emphasizes an understanding of diagnostic processes involved in assessing, evaluating, and treating patients with cardiopulmonary diseases. Enrollment by permission only.

**REST 4620 - Health Promotion**
Credits: (1-2)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: The health promotion project addresses the growing role of the Respiratory Care Practitioner (RCP) in patient education, public education, and health promotion in general. Enrollment by permission only.

REST 4630 - Continuous Quality Improvement

Credits: (1-2)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: The continuous quality improvement project enhances an understanding of how to construct and conduct a quality improvement (quality assurance) project in the workplace. Enrollment by permission only.

REST 4800 - Independent Projects

Credits: (1-6)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Student designed, instructor approved projects which will further develop cognitive or psychomotor skills for the baccalaureate level respiratory care practitioner. Projects must meet departmental and professional goals and standards and must have instructor approval prior to beginning project. Enrollment by permission only. May be repeated for a maximum of 6 credit hours.

REST 4830 - Directed Readings

Credits: (1-3)
Typically Taught Spring Semester: Full Sem
Description: Student designed, instructor approved readings which will further develop professional knowledge or understanding for the baccalaureate level respiratory care practitioner. Readings must meet departmental and professional goals and standards and must have instructor approval prior to beginning. Enrollment by permission only. May be repeated twice with a maximum of 3 credit hours.

REST 4850 - Study Abroad

Credits: (1-6)
Variable Title
Typically Taught Summer Semester: Full Sem
Description: The purpose of this course is to provide opportunities for students in health professions to experience a study abroad program that is designed to explore healthcare, culture, and clinical experience. May be repeated 5 times with a maximum of 6 credit hours.

REST 4990 - Senior Seminar

Credits: (2)
Typically Taught Summer Semester: Full Sem - Online
Typically Taught Fall Semester: Full Sem - Online
Typically Taught Spring Semester: Full Sem - Online
Description: Moderated discussion and/or laboratory experiences relating to current events in healthcare, legislative, credentialing, and licensing issues as well as emergent technologies and advanced educational opportunities in the field.

RGAF 6000 - Introduction to Regulatory Affairs

Credits: (3)
Typically Taught Fall Semester: 1st Block Online
Description: This course is designed to present an introduction to the regulations, documents and processes necessary for FDA approval of new medical products. The course covers an overview of critical scientific, technical, engineering design, manufacturing, and operational drivers for national and global regulatory compliance. This course also discusses the historical context in which the FDA evolved, its structure and relationship with other US regulatory agencies. The course will provide an overview of market clearance pathways for various medical products and devices that ensure the development and delivery of safe and effective healthcare products to consumers.

RGAF 6100 - Biostatistics Applied to Research

Credits: (3)
Typically Taught Fall Semester: 2nd Block Online
Description: Advanced biostatistics as applied to research. The concepts of populations, samples, distributions, variables, hypothesis formulation and testing, t-test, ANVOA, and chi-square are presented through the lens of translational research. The course includes a detailed exploration of the application and interpretation of data from clinical trials and medical studies. The written and oral communication of study results is also covered.
RGAF 6200 - Regulatory Drugs & Biologics

Credits: (2)
Typically Taught Spring Semester: 1st Block Online
Description: This course focuses on the development and evaluation of regulatory practices related to drugs and biologics. This course provides an overview of laws and regulations governing development, manufacturing and distribution of drugs and biologic and how they relate to the regulatory affairs strategy. Approaches for integrating regulatory and business needs are reviewed. The role of post-marketing efforts in shaping regulatory strategy are evaluated.
Pre-requisite(s): RGAF 6000.

RGAF 6230 - Regulatory Devices and Diagnostics

Credits: (2)
Typically Taught Spring Semester: 1st Block Online
Description: An in-depth exploration of the origins and application of regulations relevant to medical devices and diagnostics. Medical device and diagnostic product development is covered through an organizational strategy and regulatory compliance lens. The course analyzes the design and application of clinical trial data related to the medical device and diagnostic regulatory process. Post-marketing strategy and device labeling are also covered.
Pre-requisite(s): RGAF 6000.

RGAF 6250 - Regulatory Clinical Evidence

Credits: (2)
Typically Taught Spring Semester: 2nd Block Online
Description: The evaluation and assessment of regulatory strategies that include protocol development, study design, post-marketing surveillance, evaluation and, assessment of regulatory submissions. Utilizing clinical trial design, participants will evaluate and assess strategies for achieving regulatory goals. Students are introduced to requirements of planning and conducting clinical trials. Clinical trial terminology and design are discussed including planning and carrying out a study.
Pre-requisite(s): RGAF 6000

RGAF 6300 - Compliance in Regulatory Affairs

Credits: (3)
Typically Taught Spring Semester: Full Sem - Online
Description: This course focuses on regulatory affairs compliance strategies and guidelines. Topics included are regulatory compliance, risk management, bioethics, quality assurance, and required reporting. Students will identify and assess regulatory requirements, policies and guidelines associated with good practice (GXP) regulatory compliance issues. Students are required to critically analyze regulatory compliance issues and develop implementation strategies for ensuring regulatory affairs compliance in medical product manufacturing, development, and marketing. Students will need to demonstrate effective written communication skills required to develop regulatory communications using root cause analysis and corrective and preventive actions (CAPAs).
Pre-requisite(s): RGAF 6000.

RGAF 6500 - Internship

Credits: (3)
Typically Taught Summer Semester: Full Sem - Online
Description: The internship course will focus on research and application of regulatory issues in the organizational agency of their choice. Application of knowledge and skills of regulatory science through participation in a part or full time internship with a biomedical related industry or agency. Internship competencies will be determined by the student and preceptor based on organization focus and student need. The internship is arranged by the student, faculty, and participating institution by mutual consent.
Pre-requisite(s): RGAF 6000.

RHS 1300 - First Aid: Responding to Emergencies

Credits: (2)
Typically Taught Summer Semester: 1st Blk
Typically Taught Fall Semester: 1st Blk
Typically Taught Spring Semester: 1st Blk
Course Fee: $35.00
Course Fee Purpose: Alcohol prep pads, gloves, disposable masks, CPR manikins, AED trainers.
Description: Trains the lay person to respond correctly in emergencies and act as the first link in the emergency medical service system. Course leads to American Heart Association Basic Life Support (BLS) and Heartsaver First Aid OR American Red Cross certification in Adult, Infant and Child CPR with AED and First Aid: Responding to Emergencies.
Cross-listed with HLTH 1300.
RHS 1550 - Introduction to Rehabilitation Sciences

Credits: (2)
Typically Taught Fall Semester: Full Sem, Full Sem - Online
Typically Taught Spring Semester: Full Sem, Full Sem - Online
Description: This course is designed to introduce students to health care professions that the majority of athletic therapy majors pursue. These health care professions include: athletic training (AT), physical therapy (PT), occupational therapy (OT), physician assistant (PA), and medicine (MD or DO). Through lectures, assignments, and guest speaker presentations, students will be introduced to a variety of health care professions, learn about the application process for various graduate programs, use resources to prepare their graduate program applications, and develop/revise their degree plans for their Bachelor's degree and graduate program prerequisites.

RHS 2175 - Introduction to Sports Medicine

Credits: (3)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Presents the duties, functions, and collaboration of sports medicine professionals in the care and supervision of athletes. The course will focus on the prevention, diagnosis, and treatment of common musculoskeletal injuries/illnesses, strength and conditioning of athletes, environmental factors and guidelines, and management and administration of the sports medicine team.

RHS 2300 - Emergency Response

Credits: (3)
Typically Taught Summer Semester: 2nd Blk
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Course Fee: $64.00
Course Fee Purpose: Alcohol prep pads, gloves, disposable masks, CPR manikins, AED trainers, nasal/oral airways, oxygen tanks and regulators.
Description: Meets the needs of the non-health care professional who has a duty to respond in an emergency. Provides more skills and in-depth training than the First Aid: Responding to Emergencies course. Course leads to American Red Cross certification in Emergency Response and CPR for the Professional Rescuer. Cross-listed with HLTH 2300.

RHS 2431 - Taping, Wrapping, Bracing, Padding, and Splinting

Credits: (1)
Typically Taught Fall Semester: Full Sem, 1st Blk, 2nd Blk
Description: This course is designed to give a basic understanding of athletic training taping, wrapping, bracing, padding, and splinting techniques. Students will apply a variety of techniques to support all areas of the body.

RHS 2890 - Introduction to Cooperative Work Experience

Credits: (1)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Provides academic credit for shadowing experience of a health care professional. The purpose of this course is to introduce students to the health care industry early in their major by shadowing a health care professional for a minimum of 60 hours within a given semester. Once accepted to the Rehabilitation Sciences (BS) program, students will take the expanded version of this course (RHS 4890), which requires students to complete a full internship instead of a shadowing experience.

Students have the option to request RHS 2890 to be waived as a required course for the Rehabilitation Sciences (BS) program. Students must submit a waiver form to the program director, which verifies that they have previously completed at least 60 hours of shadowing experience with a health care professional. Experiential credit is not an option for this course.

RHS 3080 - Evidence Based Practice for Rehabilitation Sciences

Credits: (3)
Typically Taught Summer Semester: Full Sem, 2nd Blk, 1st Blk
Typically Taught Spring Semester: Full Sem
Description: This course explores the concepts necessary to ensure future allied health professionals are well prepared to utilize an evidence-based practice approach to treatment. Students will gain familiarity with the major
elements of evidenced-based practice, such as developing a clinically-relevant research question, research design, evaluation, statistical analysis, presentation of data, and ethical considerations. This course also provides an overview of descriptive and inferential statistics. Students should have a basic understanding of conducting library and Internet information searches prior to taking this course.

**Pre-requisite(s):** MATH 1010 or higher; or Math ACT score of 23 or higher.

**RHS 3200 - Psychology of Sport, Injury & Rehabilitation**

**Credits:** (3)

**Typically Taught Fall Semester:** Full Sem

**Typically Taught Spring Semester:** Full Sem

**Description:** This course is designed to provide a basic understanding of the psychology of sport, injury, and rehabilitation. Topics covered include: emotion, motivation, psychosocial skills training and application, psychological antecedents of injury, psychology of injury and rehabilitation including individual response and effect on self-identity and physical function, and outcomes topics related to rehabilitation and exercise adherence, eating disorders, alcohol and drug/substance abuse, cultural competence, and research methods within the area of sport, injury, and rehabilitation psychology.

**Pre-requisite(s):** PSY 1010.

**RHS 3300 - Evaluation and Care of Musculoskeletal Injuries: Lower Extremities**

**Credits:** (3)

**Typically Taught Summer Semester:** 1st Blk Online

**Typically Taught Fall Semester:** Full Sem, 1st Blk Online

**Typically Taught Spring Semester:** 1st Blk Online

**Course Fee:** $15.00

**Course Fee Purpose:** This course has a fee attached. Course fees are established in order to benefit the students in this course and may, among other things, be used to cover the costs of equipment replacement and maintenance, consumable materials, licensure examinations, or to meet specific regulatory requirements. Examples of course fee expenditures for this specific course include tools/instruments such as goniometers, pinwheels, reflex hammers, 2-point discriminators, bubble inclinometers, penlights, and anatomical models.

**Description:** Content of this course addresses evaluation techniques and care for musculoskeletal injuries to the trunk and lower extremities. The student must integrate knowledge of anatomical structures, physiology principles and evaluative techniques to provide a basis for critical decision-making in an injury management environment.

**Pre-requisite(s):** ZOOL 2100 or HTHS 1110.

**RHS 3301 - Evaluation and Care of Musculoskeletal Injuries: Upper Extremities**

**Credits:** (3)

**Typically Taught Summer Semester:** 2nd Blk Online

**Typically Taught Fall Semester:** 2nd Blk Online

**Typically Taught Spring Semester:** Full Sem

**Course Fee:** $15.00

**Course Fee Purpose:** This course has a fee attached. Course fees are established in order to benefit the students in this course and may, among other things, be used to cover the costs of equipment replacement and maintenance, consumable materials, licensure examinations, or to meet specific regulatory requirements. Examples of course fee expenditures for this specific course include tools/instruments such as goniometers, pinwheels, reflex hammers, 2-point discriminators, bubble inclinometers, penlights, and anatomical models.

**Description:** Content of this course addresses evaluation techniques and care for musculoskeletal injuries to the head, face and upper extremities. The student must integrate knowledge of anatomical structures, physiology principles and evaluative techniques to provide a basis for critical decision-making in an injury management environment.

**Pre-requisite(s):** ZOOL 2100 or HTHS 1110

**RHS 3505 - Standardized Patient Training**

**Credits:** (3)

**Typically Taught Summer Semester:** Full Sem

**Typically Taught Fall Semester:** Full Sem

**Typically Taught Spring Semester:** Full Sem

**Course Fee:** $15.00

**Course Fee Purpose:** This course has a fee attached. Course fees are established in order to benefit the students in this course and may, among other things, be used to cover the costs of equipment replacement and maintenance, consumable materials, licensure examinations, or to meet specific regulatory requirements. Examples of course fee expenditures for this specific course include tools/instruments such as tape measures, goniometers, pinwheels, reflex hammers, 2-point discriminators, and anatomical models.

**Description:** The purpose of this course is to provide experiential learning for WSU health professions students by training them to act as standardized patients for simulated exam experiences in different health professions courses. Students will learn to respond to health professions students with consistent, reliable, professional responses to a variety of simulated scenarios. In this course, students will be introduced to orthopedic evaluation and assessment, the role of a patient, basic acting skills, training on how to portray patients, case simulations, and instructions on how to provide constructive feedback to health professions students.
RHS 3600 - Ergonomics for Health and Safety

Credits: (2)
Description: Examines and analyzes the effects of the workplace on employees and adaptations of the work environment to suit the individual. The focus is on the interaction of work and people, i.e., physiological and environmental stresses with the primary intent to establish ways to reduce injuries, accidents, and fatigue and to improve human performance at work.
Pre-requisite(s): ESS 3500 or consent of instructor.
Note: This course is not currently offered.

RHS 4150 - Therapeutic Modalities for Rehabilitation Sciences majors

Credits: (3)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Course Fee: $45.00
Course Fee Purpose: Modality equipment such as massage lotion, Ethyl Chloride spray, ice bags, paraffin wax beads, compression stockinets, electrical stimulation electrodes, biofeedback electrodes, lonto-patch system, ultrasound gel pads, ultrasound gel, treatment towels.
Description: Specifically designed for the pre-professional student, the course will introduce the student to contemporary usage and basic foundation of therapeutic modalities. Through lecture, discussion, and laboratory experience, the scientific basis of musculoskeletal rehabilitation involving therapeutic modalities will be examined. Emphasis will be placed on fundamental concepts of tissue healing and pain control techniques, as well as an introduction to cryo/thermotherapy, massage, traction, ultrasound and electrical stimulation.
Pre-requisite(s): RHS 3300, RHS 3301.
Note: Must be admitted to the Rehabilitation Sciences (formerly Athletic Therapy) program in order to register for this course.

RHS 4250 - Rehabilitation for Rehabilitation Sciences majors

Credits: (3)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Course Fee: $45.00
Course Fee Purpose: Goniometers, inclinometers, hand sanitizer, Theratubing, Theraband, pool chemicals.
Description: This course provides an overview of therapeutic exercise as it relates to the rehabilitation process of musculoskeletal injuries for Rehabilitation Sciences majors. This course provides instruction and hands-on techniques in basic therapeutic rehabilitation techniques.
Pre-requisite(s): RHS 3300, RHS 3301, ESS 3450.
Note: Must be admitted to the Rehabilitation Sciences (formerly Athletic Therapy) program in order to register for this course.

RHS 4650 - Management for Rehabilitation Sciences Majors

Credits: (3)
Typically Taught Summer Semester: Full Sem - Online, 1st Blk Online
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Provides an overview of the necessary policies, procedures, maintenance, and daily operation of healthcare facilities. Applies principles of facility design and planning, information management, legal and ethical considerations in healthcare, and professional development as it relates to future healthcare professionals.

RHS 4800 CRE - Individual Projects

Credits: (1-4)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: A comprehensive study or project in the field of Athletic Training. Hours to be arranged for seniors only. May be repeated 3 times up to 16 credit hours.

RHS 4810 - Experimental Course

Credits: (1-6)
Experimental
Description: Consult the semester class schedule for the current offering under this number. The specific title will appear on student's transcript along with the authorized credit. May be repeated for a total maximum of 6 credit hours.

RHS 4890 INT - Cooperative Work Experience

Credits: (1-6)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Provides academic credit for on-the-job
experience.
May be repeated 5 times and up to 6 credit hours.
Note: Must be admitted to the Rehabilitation Sciences
program to register for this course.

RHS 4999 - Special Topics in
Rehabilitation Sciences

Credits: (3)
Typically Taught Summer Semester: 2nd Blk, 2nd Blk
Online, 1st Blk, 1st Blk Online
Typically Taught Fall Semester: 2nd Blk, 2nd Blk Online,
1st Blk, 1st Blk Online
Typically Taught Spring Semester: 2nd Blk, 2nd Blk
Online, 1st Blk, 1st Blk Online
Description: This course will focus on introducing
students to special topics which may include but are not
limited to: women’s health, instrument assisted soft tissue
mobilization, or sacroiliac joint conditions.

SBS 1050 - Introduction to Social &
Behavioral Sciences Bridge

Credits: (3)
Typically Taught Summer Semester: Full Sem
Description: This is a course designed for high school
students and entering freshman students interested in
people, politics, society and the environment. It covers an
introduction to the disciplines, methods, and programs in
social and behavioral sciences and methods, strategies and
resources to be successful in college. The course combines
traditional lectures and seminars with on- and off-campus
activities designed to see the influence of social and
behavioral sciences in the real world.

SBS 1100 - Introduction to Social &
Behavioral Sciences

Credits: (1)
Typically Taught Fall Semester: Full Sem
Description: An introduction to the disciplines, methods,
and programs in social and behavioral sciences. The course
also reviews college success resources available to
students. The course serves as a starting point for students
interested in people, politics, society and the
environment but do not know what major they should
pursue.
Suggested Requisite(s): FYE 1105 and/or UNIV 2900
recommended as corequisite

SBS 1550 HU/EDI - Introduction to World
Religions

Credits: (3)
Typically Taught Fall Semester: Full Sem
Description: Introduction to religious studies with a focus
on religious literacy; methodologies and theories of
religion; and the histories, philosophies, beliefs and
practices, and internal diversity of major world religions
including Judaism, Christianity, Islam, Hinduism,
Buddhism, and Indigenous traditions. The course also
explores the intersections between religion and politics,
magic, gender and sexuality, and art.

SBS 1810 - Experimental Course

Credits: (1-6)
Experimental
Description: Consult the semester class schedule for the
current offering under this number. The specific title and
credit authorized will appear on the student transcript.
May be repeated for a total maximum of 6 credit hours.

SBS 2810 - Experimental Course

Credits: (1-6)
Experimental
Description: Consult the semester class schedule for the
current offering under this number. The specific title and
credit authorized will appear on the student transcript.
May be repeated for a total maximum of 6 credit hours.

SBS 2920 - Short Courses, Workshops,
Institutes, and Special Programs

Credits: (1-6)
Workshop
Description: Consult the semester class schedule for the
current offering under this number. The specific title and
credit authorized will appear on the student transcript.
May be repeated for a total maximum of 6 credit hours.

SCM 2400 - Fundamentals of Project
Management

Credits: (3)
Typically Taught Spring Semester: Full Sem
Description: Provides practical knowledge and skills for
managing a project from inception to completion to meet
time, cost, and performance objectives. Prepares students
from all backgrounds to successfully perform the role of a
project manager in any profit or non-profit context, including business, government, engineering, healthcare, arts, humanities, or education. Topics include management of project teams, stakeholders, communications, schedule, cost, scope, performance and risk for achieving project success.

SCM 2890 - Cooperative Work Experience

Credits: (1-3)
Description: Open to students meeting criteria established by the SCM program. Provides academic credit for selected on-the-job experience. Grade and amount of credit will be determined by the department.
Pre-requisite(s): Instructor Approval.

SCM 2920 - Short Courses, Workshops, Institutes, and Special Programs

Credits: (1-6)
Workshop
Description: Consult the semester class schedule for the current offering under this number. The specific title with the credit authorized will appear on the student transcript. May be repeated for a total maximum of 6 credit hours.

SCM 3050 - Operations and Supply Chain Management

Credits: (3)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Supply chain management is the value creation engine of every organization. The focus of this course is to acquaint students with the core elements of supply chain management: 1) customer value, 2) collaborative value creation, and 3) systems thinking. The course introduces and defines the three primary functions that compose supply chain activities- 1) purchasing, 2) operations, and 3) logistics-and shows how they need to work together to create the high-quality, low-cost, and innovative products and services that customers expect to find in today's marketplace. Important analytical tools are introduced.
Pre-requisite(s): Earn a "C" or better in MATH 1010, MATH 1050, MATH 1080 or MATH 1210; or earn a "C" or better in any math course for which either MATH 1010, MATH 1050, MATH 1080, or MATH 1090 is a prerequisite; or score 3 or higher on AP Calculus exam or; score 70 or higher on ACCUPLACER College Level Math (CLM) or; score of 23 or higher on Math ACT or; score of 55 or higher on ALEKS.

SCM 3500 - Spreadsheet Modeling for Prescriptive Analytics

Credits: (3)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Spreadsheet software enables business people to model and analyze quantitative problems in a wide variety of business contexts. This course covers spreadsheet modeling in terms of optimization models for deciding the best set of decisions to meet constraints and performance objectives; simulation models for considering uncertainty in business operations and decisions; and other decision models and tools. Through conceptual and applied topics, this course will enhance one's problems solving and modeling capabilities as well as Excel spreadsheet skills.
Pre-requisite(s): MIS 2010, QUAN 2600.

SCM 3600 - Logistics & Transportation

Credits: (3)
Typically Taught Fall Semester: Full Sem
Description: This course incorporates readings, site visits, and case analysis to convey state-of-the-art and emerging business logistics practices. The focus of this course is on forecasting, inventory management, transportation, distribution and warehousing, with an introduction to contemporary issues in logistics such HADR and sustainability. Development of leading-edge strategies, which promote a firm's ability to differentiate itself in terms of its supply chain performance is emphasized.
Pre-requisite(s): BSAD 2899; SCM 3050.
Pre-requisite/Co-requisite: SCM 3500.

SCM 3700 - Purchasing & Strategic Sourcing

Credits: (3)
Typically Taught Fall Semester: Full Sem
Description: This course provides students an introduction to the supply management discipline, focusing on the development of category management skills and the purchasing process. Companies have always sourced a large percent of their COGS—up to 50-80%. However,
today's emphasis on core competencies and increased use of outsourcing makes sourcing even more strategic. Sourcing managers are responsible for managing supplier capacity and capabilities. The course emphasizes costing and relationship management tools. This course builds the foundation for students to pass the Certified Profession in Supply Management (CPM) exam.  

Pre-requisite(s): SCM 3050.

SCM 4100 - Quality Management and Process Improvement

Credits: (3)  
Typically Taught Fall Semester: Full Sem  
Typically Taught Spring Semester: Full Sem  
Description: Introduces principles and practices for achieving quality, customer satisfaction, and performance excellence. Emphasis on process improvement, problem-solving, variation and statistical thinking, customer and supplier relationships, service quality, employee involvement, project management, and quality management frameworks. Presents tools and methods for analyzing and improving business processes, including Six Sigma, lean, and theory of constraints. This course builds the foundation for students to pass the ASQ Certified Quality Process Analyst exam.  

Pre-requisite(s): BSAD 2899; SCM 3050; or Instructor Permission.  
Pre-requisite/Co-requisite: QUAN 3610.

SCM 4400 - Global Supply Chain Management

Credits: (3)  
Typically Taught Fall Semester: Full Sem  
Description: Globalization has changed the rules of competition. Globalization also raises complex and controversial issues such as job displacement and worker exploitation. Winning companies now use worldwide resources to meet the needs of global consumers. This course introduces and is built around a scanning model. Students are expected to actively scan, using emerging information to identify inflection points and determine their strategic and tactical implication. From this analysis, strategic objectives are renewed to guide the design of a global supply chain. Effective communication and teamwork are emphasized via the in class activities and projects.  

Pre-requisite(s): BSAD 2899 and SCM 3050.

SCM 4500 - Supply Chain Relational Skills

Credits: (3)  
Pre-requisite(s): SCM 3050 and SCM 3700.

SCM 4550 - Strategic Supply Chain Management

Credits: (3)  
Description: Supply chain management (SCM) is integrative in nature, requiring a systems approach to the design and management of supply chain processes across functions and organizational boundaries. This capstone SCM course provides a summative learning experience in which students integrate and apply their knowledge and skills in simulations, real-world cases, and large-scale data sets. The course emphasizes the conceptual and analytical skills needed to plan, source, make and deliver distinctive customer value in collaboration with supply chain partners. The course also covers current events and emerging topics in today's supply chains.  

Pre-requisite(s): SCM 3600 and SCM 3700.  
Pre-requisite/Co-requisite: SCM 4100.

SCM 4700 - Supply Chain Case Analysis, Logic, and Presentation

Credits: (3)  
Typically Taught Fall Semester: Full Sem  
Typically Taught Spring Semester: Full Sem  
Description: This course is designed around the case analysis methodology and has the explicit goal of preparing student teams for participation in specific competitive supply chain case competitions (both regionally and nationally). Preparation time will be extensive and students must possess an advanced level of SCM mastery prior to enrollment in this class. Class meetings will be scheduled with the students throughout the semester for presentation and preparation. Please see the instructor for information on enrollment eligibility. Credit/no credit grading.  

Pre-requisite(s): SCM 3050, instructor approval.
SCM 4800 - Independent Research

Credits: (1-3)
Description: Independent undergraduate research under the direction of a faculty member.
Pre-requisite(s): Advanced Standing; Instructor Approval. May be repeated until a total of 4 hours credit is accumulated.

SCM 4805 - Directed Study

Credits: (1-3)
Description: Independent readings and learning activities on advanced special topics under the direction of a faculty mentor.
Pre-requisite(s): Advanced Standing; Instructor Approval.

SCM 4840 - Operations & Supply Chain Industry Projects

Credits: (3)
Typically Taught Fall Semester: Full Sem
Description: Early in their careers, many choose to work for a management consulting company or get involved in rotations within a company. These jobs and programs expose the worker to a wide variety of job types and functions and prepare the worker for whatever opportunities the future may bring. In this course, students are exposed to operations and supply chain management consulting projects typical of what they could expect in a full-time consulting position or in a company's early-career leadership rotation program.
Pre-requisite(s): SCM 3500.
Co-Requisite(s): SCM 3600 and SCM 3700. May be repeated up to two times for a total of 6 hours of credit.

SCM 4850 - Supply Chain Management Study Abroad

Credits: (1-3)
Typically Taught Spring Semester: Full Sem
Description: This course is designed for students who wish to explore supply chain management theory and practice in countries other than the U.S. Students will study global supply chain management as offered through a partner university (or other university with department chair approval).
Pre-requisite(s): BSAD 2899. Can be repeated once up to 6 credits.

SCM 4860 INT - Supply Chain Management Internship

Credits: (3)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: A structured professional-level field experience. The student will be counseled and supervised as he/she applies and integrates the knowledge and skills obtained through operations management and logistics courses.
Pre-requisite(s): BSAD 2899; Senior Standing; Instructor approval.

SCM 4920 - Short Courses, Workshops, Institutes, and Special Programs

Credits: (1-6)
Workshop
Description: Consult the semester class schedule for the current offering under this number. The specific title with the credit authorized will appear on the student transcript. May be repeated for a total maximum of 6 credit hours.

SE 6010 - Foundation of Systems Engineering

Credits: (3)
Typically Taught Fall Semester: Full Sem, Fall Sem - Online
Typically Taught Spring Semester: Full Sem, Full Sem - Online
Course Fee: $25.00
Course Fee Purpose: Course fees for this course are designed to cover computer labs, paper usage, software, equipment maintenance and replacement, supplies and instructional resources.
Description: The Foundations of Systems Engineering course is an introductory overview of the systems engineering perspective and is presented to set the conceptual and practical framework of the entire systems engineering graduate program. The course covers the foundational components of systems engineering, from the concept development stage through the process steps of engineering development. Several issues related to post-development, disposal, and special topics areas are also presented.

SE 6020 - Engineering Project and Program Management
SE 6110 - Design Project

Credits: (3)
Typically Taught Spring Semester: Full Sem, Full Sem - Online
Course Fee: $25.00
Course Fee Purpose: Course fees for this course are designed to cover computer labs, paper usage, software, equipment maintenance and replacement, supplies and instructional resources.
Description: MSSE Students are required to complete a system engineering design project that demonstrates proficiency in research, design, analysis, implementation, testing and documentation. The project is an in-depth study selected by the student or course instructor to showcase the student's skills and knowledge.
Pre-requisite(s): SE 6010 and SE 6020 and SE 6130 and SE 6140 and SE 6150.

SE 6120 - System Design and Operational Analysis

Credits: (3)
Typically Taught Summer Semester: Full Sem - Online
Typically Taught Fall Semester: Full Sem - Online
Typically Taught Spring Semester: Full Sem - Online
Course Fee: $25.00
Course Fee Purpose: Course fees for this course are designed to cover computer labs, paper usage, software, equipment maintenance and replacement, supplies and instructional resources.
Description: This course targets systems engineering professionals. It will prepare you to take the International Requirements Engineering Board's certification exam, to elicit and analyze requirements, document and validate requirements, create UML and SysML use cases, manage requirements, and demonstrate systems requirements for a development project.
Suggested Requisite(s): Calculus and Basic Statistics.

SE 6130 - Overview of Systems Engineering Processes

Credits: (3)
Typically Taught Fall Semester: Full Sem - Online
Course Fee: $25.00
Course Fee Purpose: Course fees for this course are designed to cover computer labs, paper usage, software, equipment maintenance and replacement, supplies and instructional resources.
Description: An overview of system life-cycle design processes and the associated analysis techniques. Approaches to system reliability, maintainability and failure analysis are also explored.
Pre-requisite(s): SE 6010.

SE 6140 - Design for Operational Feasibility

Credits: (3)
Typically Taught Fall Semester: Full Sem, Full Sem - Online
Typically Taught Spring Semester: Full Sem, Full Sem - Online
Course Fee: $25.00
Course Fee Purpose: Course fees for this course are designed to cover computer labs, paper usage, software, equipment maintenance and replacement, supplies and instructional resources.
Description: This course will introduce the application of engineering and management efforts to maximize the likelihood that the resulting system design will be operationally feasible and perform as intended in an effective and efficient manner. The objective of the course is to study the characteristics that are known to have a significant impact on the success of a system and the customer's need. Topics include Design for reliability, maintainability, human factors, logistics, producibility, and affordability.

SE 6150 - Research Methods and Experimentation
SE 6260 - Reliability Engineering and Risk Analysis

Credits: (3)
Typically Taught Spring Semester: Full Sem - Online
Course Fee: $25.00
Course Fee Purpose: Course fees for this course are designed to cover computer labs, paper usage, software, equipment maintenance and replacement, supplies and instructional resources.
Description: The course introduces the participant to research methods and experimentation, including surveys, case studies, stratification, comparative experiments, regression, and design of experiments. The course emphasizes practical decision-making processes, both intuitive and logical; qualitative and quantitative. A review of practical descriptive, comparative, and relational statistics is leveraged to explore and apply advanced methods.

Description:

SE 6320 - Simulation Modeling and Engineering Optimization: Methods/Applications

Credits: (3)
Typically Taught Fall Semester: Full Sem, Full Sem - Online
Typically Taught Spring Semester: Full Sem, Full Sem - Online
Course Fee: $25.00
Course Fee Purpose: Course fees for this course are designed to cover computer labs, paper usage, software, equipment maintenance and replacement, supplies and instructional resources.
Description: This course will introduce methods of optimization, simulation, and analysis for a variety of complex systems — including linear optimization, non-linear optimization, and data modeling. It will also introduce business analytics, the types of business analytics and their uses and advantages. Students will apply business analytics and modeling techniques to improve design for feasibility concepts of a complex system. Software used will include SQL, Visual Basic, Excel, and similar languages.

SE 6350 - Organizational Systems

Credits: (3)
Typically Taught Fall Semester: Full Sem, Full Sem - Online
Typically Taught Spring Semester: Full Sem, Full Sem - Online
Course Fee: $25.00
Course Fee Purpose: Course fees for this course are designed to cover computer labs, paper usage, software, equipment maintenance and replacement, supplies and instructional resources.
Description: Organizational Systems provides engineers with organizational-level skills to recognize, develop, analyze, improve, and sustain organizational subsystems. The course blends the most useful mental models from organizational theory and design, industrial psychology, and organizational behavior. Participants complete multiple applied deliverables to connect theory and application. Open systems thinking, structural design, internal design elements, and managing dynamic processes frame the content.

SE 6360 - System Logistics: Ensuring a System of Systems Approach

Credits: (3)
Typically Taught Summer Semester: Full Sem - Online
Typically Taught Fall Semester: Full Sem - Online
Typically Taught Spring Semester: 2nd Block Online
Course Fee: $25.00
Course Fee Purpose: Course fees for this course are designed to cover computer labs, paper usage, software, equipment maintenance and replacement, supplies and instructional resources.
Description: System of systems is a collection of task-oriented or dedicated systems that pool their resources and capabilities together to create a new, more complex system which offers more functionality and performance than simply the sum of the constituent systems. This course will introduce the subsequent sustaining maintenance & support
of the system throughout its entire life cycle, including end of life/disposal. It will also include different DoD tailorable concepts to effectively manage and field product. Topics include: Reliability Growth, Initial Contractor Support (ICS), and Performance-Based Logistics (PBL) Systems of Systems (SoS) or Federation of Systems (FoS).

Suggested Requisite(s): Calculus and Basic Statistics.

SE 6370 - Requirement Engineering

Credits: (3)
Typically Taught Fall Semester: Full Sem, Full Sem - Online
Typically Taught Spring Semester: Full Sem, Full Sem - Online
Course Fee: $25.00
Course Fee Purpose: Course fees for this course are designed to cover computer labs, paper usage, software, equipment maintenance and replacement, supplies and instructional resources.

Description: This course targets systems engineering professional. It will prepare you to take the International Requirements Engineering Board's certification exam, to elicit and analyze requirements, document and validate requirements, create UML and SysML use cases, manage requirements, and demonstrate systems requirements for a development project.

SE 6380 - Model Based Systems Engineering (MBSE) and SysML

Credits: (3)
Typically Taught Fall Semester: Full Sem, Full Sem - Online
Typically Taught Spring Semester: Full Sem, Full Sem - Online
Course Fee: $130.00
Course Fee Purpose: Course fees for this course are designed to cover computer labs, paper usage, software, equipment maintenance and replacement, supplies and instructional resources.

Description: Introduction to formal system architecture methods using the Systems Modeling Language (SysML) and Model-Based Systems Engineering (MBSE) with detailed case studies. Students will apply the methodology to build architecture models, analyze internal and external interactions, and plan appropriate approaches for implementation. Topics include digital engineering, iterative MBSE techniques, model structure interactions and behaviors based on requirements and constraints, and creating key diagrams (such as use-case, sequence, and activity)

Pre-requisite(s): SE 6010 or SE 6130.

SE 6390 - Model Based Systems Engineering (MBSE) II

Credits: (3)
Typically Taught Fall Semester: Full Sem - Online
Typically Taught Spring Semester: Full Sem - Online
Course Fee: $130.00
Course Fee Purpose: Per class registration, allocated partially to computer lab refurbishment, lab aids and software licenses.

Description: Students will apply advanced enterprise and system modeling techniques, using state-of-the-art modeling tools, methodologies, architecture frameworks, and languages as well as performing model-based reviews and audits, in the context of enterprises and systems from both supplier and acquirer perspectives.

Pre-requisite(s): SE 6380 or equivalent.

SE 6900 - Special Topics

Credits: (1-4)
Typically Taught Summer Semester: Full Sem - Online
Typically Taught Fall Semester: Full Sem - Online
Typically Taught Spring Semester: Full Sem - Online
Description: A one-time special study course designed to introduce a new relevant topic that is not covered in the Systems Engineering programs. Lecture or lecture and lab combination. Laboratory activities support the selected course topic.

Pre-requisite(s): Permission from the department.

May be repeated 10 times and up to 12 credit hours.

SE 6910 - Individual Research

Credits: (1-3)
Typically Taught Summer Semester: Full Sem - Online
Typically Taught Fall Semester: Full Sem - Online
Typically Taught Spring Semester: Full Sem - Online
Description: Students taking this course will receive credit for approved, mentored studies in the Master of Science in Systems Engineering (MSSE). A maximum of three credits may be counted toward graduation.

Pre-requisite(s): Permission from the department.

SOC 1010 SS/EDI - Introduction to Sociology

Credits: (3)
Typically Taught Summer Semester: 1st Blk, Full Sem
Typically Taught Fall Semester: Full Sem, Full Sem
Typically Taught Spring Semester: Full Sem, Full Sem

Description: An introduction to the study of Sociology through the concepts and principles used to understand and evaluate society. It focuses on all aspects of society: culture; social interaction; institutions; group processes; deviance and social control; stratification, diversity, and inequality based on race, ethnicity, class, gender, etc.; and social stability and change.

SOC 1020 SS/EDI - Social Problems

Credits: (3)
Typically Taught Summer Semester: 2nd Blk, Full Sem
Typically Taught Fall Semester: Full Sem, Full Sem
Typically Taught Spring Semester: Full Sem, Full Sem

Description: A study of major social problems in contemporary society, including issues of age, gender, family, race, ethnicity, wealth and poverty, politics, education, public safety, health care, substance abuse, and environment. Special emphasis is given to these issues and their consequences for today's global and diverse society.

SOC 2370 - Sociology of Gender

Credits: (3)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem

Description:

This course examines gender as an organizing principle of social life and the ways in which gender influences individuals' identities, behaviors, and life experiences. Students will study gender within a variety of contexts, such as the workplace, family, politics, athletics, education, health, media, and religion. Attention will also be given to sociological theories of gender, gender socialization, and the intersection of gender, race, class, and sexuality.

SOC 2400 SS - Introduction to Ethnic Studies

Credits: (3)
Typically Taught Summer Semester: Full Sem, Full Sem - Online
Typically Taught Fall Semester: Full Sem, Full Sem - Online

Typically Taught Spring Semester: Full Sem, Full Sem - Online

Description: This course is an introduction to the study of race and ethnicity, especially through the experiences of ethnic minority groups in the United States. We will explore the main perspectives, theories, findings, and other features, focusing especially on how social systems define and shape racial understandings and outcomes as well as continuing efforts to dismantle racial oppression.

SOC 2600 - Sociology of Family

Credits: (3)
Typically Taught Spring Semester: Full Sem

Description: The course analyzes family arrangements and structures, changes in such arrangements over time, and contemporary issues facing families. Emphasis is placed on variations in family experiences with regard to race, gender, social class, and sexual orientation. Students examine the relationship between families and other social institutions such as politics, religion, and the economy.

SOC 2810 - Experimental Course

Credits: (1-6)
Experimental

Description: Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript. May be repeated for a total maximum of 6 credit hours. Note: This course is offered as needed. Please check with the department for availability.

SOC 2920 - Short Courses, Workshops, Institutes, and Special Programs

Credits: (1-6)
Workshop

Description: Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript. May be repeated for a total maximum of 6 credit hours. Note: This course is offered as needed. Please check with the department for availability.

SOC 3000 - Self and Society

Credits: (3)
Typically Taught Spring Semester: Full Sem odd years

Description: Sociological Social Psychology is the study of individual, group, and social behavior through analysis
of the relationship between individuals and social institutions. Individuals actively create social structure while they are simultaneously shaped by it. Students will analyze how social interaction, processes, roles, and statuses are created and maintained by individuals. Students will also analyze how these same processes, roles, and statuses shape their individual behavior. Social Psychological theories and methodologies are also addressed.

Pre-requisite(s): SOC 1010 or SOC 1020.

SOC 3010 - Social Inequality

Credits: (3)
Typically Taught Spring Semester: Full Sem odd years
Description: The study of social stratification and inequality in the United States and globally. The course focuses on economic class and status groups, such as gender, race and ethnicity, age, sexuality, and physical ability.
Pre-requisite(s): SOC 1010 or SOC 1020.

SOC 3030 - Classical Sociological Theory

Credits: (3)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: A study of the classical tradition of sociological thought in late 18th to early 20th century Europe and 19th to early 20th century U.S. The course introduces the main theories of Comte, Martineau, Marx, Weber, Simmel, Durkheim, and others, including early theorists of gender and race. To be taken before SOC 4030.
Pre-requisite(s): SOC 1010.

SOC 3250 - Deviance and Social Control

Credits: (3)
Typically Taught Spring Semester: Full Sem even years
Description: Introduces the student to the various sociological concepts of deviance and social control. Deviance and social control are examined in their positive and negative forms. The benefits and contributions as well as the consequences and disruptions of these forms are considered in the context of the formal and informal socialization processes and the internalization of social norms.
Pre-requisite(s): SOC 1010 or SOC 1020.

SOC 3260 - Juvenile Delinquency

Credits: (3)
Typically Taught Fall Semester: Full Sem even years
Description: Juvenile delinquency as a social phenomenon and its causes involving definitions, agencies of law enforcement, and the courts.
Pre-requisite(s): SOC 1010 or SOC 1020.

SOC 3270 - Criminology

Credits: (3)
Typically Taught Fall Semester: Full Sem odd years
Description: Study of the nature, extent, causes, and treatment of crime.
Pre-requisite(s): SOC 1010 or SOC 1020.

SOC 3300 SUS - Environment and Society

Credits: (3)
Typically Taught Spring Semester: Full Sem even years
Description: An in-depth study of societal-environmental interactions including population, technology and organization impacts of human societies on the physical environment, and environmental impacts on human behavior and social organization.

SOC 3400 - Social Change

Credits: (3)
Typically Taught Fall Semester: Full Sem odd years
Description: The factors which change society and how society changes, emphasizing technological innovations and its implications, social movements, and the role of individuals.
Pre-requisite(s): SOC 1010 or SOC 1020.

SOC 3410 - Sociology of Religion

Credits: (3)
Typically Taught Spring Semester: Full Sem even years
Description: Examination of religion and religious activities globally from the theoretical perspectives of Sociology.

SOC 3420 - Sociology of Education

Credits: (3)
Typically Taught Fall Semester: Full Sem even years
Description: Analysis of the structure and function of education as a central social institution in contemporary society.
SOC 3430 - Medicine and Healthcare in Society

Credits: (3)
Typically Taught Fall Semester: Full Sem odd years
Description: Utilizes the Sociological perspective to explore the Institution of Medicine and the Medical Healthcare Delivery System; its function as a social institution and its capability, accessibility, and the related issues of providing Healthcare. The various organizational system structures, and their economic and political dimensions are also examined. Further emphasis is placed on the various professional roles, supporting roles, and patient behaviors. Additional focus is placed upon selected international comparisons, as well as medical research, ethical considerations, and international health issues.

SOC 3550 - Organizations in Society

Credits: (3)
Typically Taught Spring Semester: Full Sem odd years
Description: Surveys the nature and structure of organizations in general and modern formal organizations and globalization in specific. How organizations work, function and affect contemporary society and individuals' lives and behavior. Sociological theories about modern organizations and globalization will be examined.
Pre-requisite(s): SOC 1010.

SOC 3600 - Social Statistics

Credits: (3)
Typically Taught Summer Semester: 1st Blk
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Introduction to descriptive and inferential statistical analysis techniques and the presentation of results.
Pre-requisite(s): MATH 1010 or equivalent.

SOC 3660 - Sociological Research

Credits: (3)
Typically Taught Summer Semester: 2nd Blk
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Examines the scientific foundations of Sociology and methods of Sociological Research.
Pre-requisite(s): SOC 1010 or SOC 1020.

SOC 3840 - Cities and Urban Life

Credits: (3)
Typically Taught Fall Semester: Full Sem even years
Description: In-depth analysis of the urbanization, modernization, and development of the system of cities. The relationship between cities and culture, mental illness, and social problems are examined.

SOC 3850 - Race & Ethnicity

Credits: (3)
Typically Taught Spring Semester: Full Sem even years
Description: Examines the social construction of race and ethnicity and the conditions of racial and ethnic groups in the United States and globally, based on statistical and ethnographic data. Includes a survey of theories of the origins, causes, and dynamics of ethnic and race relations.

SOC 4030 - Contemporary Sociological Theory

Credits: (3)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: The works of major contemporary theorists (Mead, Parsons, Merton, Goffman, Garfinkel, etc.) and the emergence of current schools of sociological thought.
Pre-requisite(s): SOC 1010 and SOC 3030.

SOC 4220 - Life in a Consumer Society

Credits: (3)
Typically Taught Spring Semester: Full Sem even years
Description: Examination of consumption, consumerism, and the increasing commercialization of contemporary life. Students study the history of consumerism and advertising; explore how consumer culture influences their own consumption choices; and analyze the relationship between consumerism and social inequality.

SOC 4270 - Sociology of Law

Credits: (3)
Typically Taught Spring Semester: Full Sem odd years
Description: A study of the interchange between law and society, where society creates the law, yet law regulates society.
Pre-requisite(s): SOC 1010 or SOC 1020.

SOC 4300 - Qualitative Methods
**SOC 4410 SUS - Sociology of Globalization**

Credits: (3)

Typically Taught Fall Semester: *Full Sem odd years*

Description: Study of economic, political, and cultural globalization in the late 20th and early 21st century. The course examines the history, theories and critiques of globalization, the key actors in global political-economy, the institutions and events that shape global processes, and globalization's impact on local economies, politics, culture, and the natural environment.

Pre-requisite(s): Junior or Senior standing.

**SOC 4550 - Sociology of Work**

Credits: (3)

Typically Taught Fall Semester: *Full Sem even years*

Description: Explores the relationship between work and social class, gender, technology, race, and ethnicity. Additionally, the nature of occupational subcultures is analyzed.

**SOC 4810 - Experimental Course**

Credits: (1-6)

Experimental

Description: Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript. May be repeated for a total maximum of 6 credit hours.

Note: This course is offered as needed. Please check with the department for availability.

**SOC 4830 INT - Readings and/or Projects**

Credits: (1-3)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Description: Individual readings and/or projects for sociology majors or minors. (Maximum of 5 hours applied toward graduation, 3 of which can be applied toward the sociology major or minor.)

Pre-requisite(s): SOC 1010, senior standing, permission of instructor, approval of program coordinator.

May be repeated 4 times up to 5 credit hours.

**SOC 4890 INT - Internship**

Credits: (1-6)

Typically Taught Summer Semester: *Full Sem*

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Description: Qualified juniors and seniors may apply for internships among federal, state and private agencies. Internships are anticipated to provide the student with both practical and research experiences. A student may complete up to 9 hours, but not more than 6 hours in any one type of internship. A maximum of 3 hours may be applied towards the sociological major or sociological minor.

Pre-requisite(s): SOC 1010, junior or senior status, approval of program coordinator.

May be repeated 8 times up to 9 credit hours.

**SOC 4900 CRE - Senior Capstone Course**

Credits: (3)

Typically Taught Fall Semester: *Full Sem*

Typically Taught Spring Semester: *Full Sem*

Description: A course designed to organize all of the knowledge that the student has gleaned from his/her major into an integrated whole. This course will help the student make relevant the knowledge that he/ she has learned. This will be accomplished by having the student write a senior thesis as well as attend lectures.

Pre-requisite(s): SOC 1010, SOC 3030, SOC 3600, SOC 3660, senior standing.

**SOC 4920 - Short Courses, Workshops, Institutes, and Special Programs**

Credits: (1-6)

Workshop

Description: Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript. May be repeated for a total maximum of 6 credit hours.
Note: This course is offered as needed. Please check with the department for availability.

**SOC 4930 INT - Community Engaged Capstone**

**Credits:** (3)
**Typically Taught Fall Semester:** Full Sem
**Typically Taught Spring Semester:** Full Sem
**Description:** A course designed to organize all of the knowledge that the student has gleaned from his/her major into an integrated whole. This course will help the student make relevant the knowledge that he/she has learned. This will be accomplished by having the student prepare a project based on a previously completed internship as well as attend lectures. Prerequisite: SOC 1010, SOC 3030, SOC 3600, SOC 3660, 3 credit hours minimum of SOC 4890, senior standing.

**SOC 4990 - Seminar in Sociology**

**Credits:** (3)
**Variable Title**
**Typically Taught Spring Semester:** Full Sem
**Description:** An advanced course allowing in-depth study of selected topics in Sociology. When the course number is used, it will be accompanied by a specific title with the credit authorized, which will appear on the student transcript.
**Pre-requisite(s):** SOC 1010 or consent of instructor.
May be repeated 3 times up to 9 credit hours.
Note: (Formerly Contemporary Issues.)

**SPAN 1020 - Second Semester Spanish**

**Credits:** (3)
**Typically Taught Summer Semester:** Full Sem
**Typically Taught Fall Semester:** Full Sem
**Typically Taught Spring Semester:** Full Sem
**Course Fee:** $8.00
**Course Fee Purpose:** Maintain technology in the FL lab, EH 408, and classroom technology.
**Description:** (N=Novice) Continuation of SPAN 1010. Basic language skills including listening, speaking, reading, writing and culture.

**SPAN 1700 - Conversational Skills**

**Credits:** (1-3)
**Description:** Specific vocabulary and speaking skills in one semester (e.g., nursing, law enforcement, medical, tourism, family language courses, etc.). May be repeated for credit under different titles.

**SPAN 1852 - Study Abroad**

**Credits:** (1-3)
**Description:** (N=Novice) Language and culture studies for students with no previous experience in the target language and culture. Most assignments are performed in English. Prior travel experience does not apply. May be repeated twice with a maximum of 3 credit hours.
Note: Check with Department for course availability.

**SPAN 2000 - Proficiency Development**

**Credits:** (1-2)
**Description:** (NH=Novice High) (CR/NC) Non-graded courses for second-year students to augment foreign language instruction in stress-free activities appropriate to the linguistic level of second-year students. May be repeated under different titles. Note: Course not currently being offered.

**SPAN 2010 - Third Semester Spanish**

**Credits:** (3)
**Typically Taught Fall Semester:** Full Sem
**Course Fee:** $8.00
**Course Fee Purpose:** Maintain technology in the FL lab, EH 408, and classroom technology.
Credits: (3)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Course Fee: $8.00
Course Fee Purpose: Maintain technology in the FL lab, EH 408, and classroom technology.
Description: (NH=Novice High) Continuation of FL 1020. Assumes completion of first-year or equivalent experience. Students learn to understand and express ideas about their community and the world. Includes listening, speaking, reading, writing and culture.

SPAN 2020 HU - Fourth Semester Spanish

Credits: (3)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Course Fee: $8.00
Course Fee Purpose: Maintain technology in the FL lab, EH 408, and classroom technology.
Description: (NH=Novice High) Continuation of SPAN 2010. The learning and application of strategies for acquiring a foreign language. Students also learn how cultural products and practices reflect a culture's attitudes, values, ideas and meaning. The process of language acquisition and the seeking of cross-cultural understanding provide insights into the commonalities of how the human family learns, thinks and communicates.

SPAN 2021 - Second Year II

Credits: (3)
Description: (NH=Novice High) Continuation of FL 2010 without General Education Humanities credit. Offered through examination only.
Pre-requisite(s): Only available through testing.

SPAN 2030 - Second Year Language Review

Credits: (3)
Course Fee: $8.00
Course Fee Purpose: Maintain technology in the FL lab, EH 408, and classroom technology.
Description: (NH=Novice High) This course will prepare students who wish to continue language study. Emphasis on conversational skills and a review of language structure and usage.
Note: Check with department for course availability.

SPAN 2600 HU - Introduction to Cultural and Literary Studies in Translation

Credits: (3)
Variable Title
Course Fee: $8.00
Course Fee Purpose: Maintain technology in the FL lab, EH 408, and classroom technology.
Description: May be offered under any of the languages taught in the department. All Foreign Language HU2600 courses are taught in English and all texts are read in English translation in order to make some of the literature we normally would teach in a foreign language accessible to all students. These courses may introduce students to specific literary periods, literary themes or some prominent authors in specific areas of the world where languages other than English are spoken. May be repeated up to 10 times for credit under different titles.
Note: Check with Department for course availability.

SPAN 2851 - Study Abroad

Credits: (3)
Description: (NH=Novice High) Language and culture studies for students whose minimal proficiency is Novice High. Language assignments at the Novice or Intermediate-Low levels are performed in the target language. All other assignments are performed in English. Prior travel experience does not apply.
Note: Check with Department for course availability.

SPAN 2852 - Study Abroad

Credits: (1-3)
Description: (NH=Novice High) Language and culture studies for students whose minimal proficiency is at Novice High. Language assignments at the Novice or Intermediate-Low levels are performed in the target language. All other assignments are performed in English. Prior travel experience does not apply.
Twice with a maximum of 3 credit hours.
Note: Check with Department for course availability.

SPAN 2920 - Short Courses, Workshops, Institutes, and Special Programs

Credits: (1-6)
Workshop
Description: Consult the class schedule for the current offering under this number. The specific title and credit
authorized will appear on the student transcript. May be repeated for a total maximum of 6 credit hours.

**SPAN 3000 - Proficiency Development**

Credits: (3)
Typically Taught Fall Semester: Full Sem
Course Fee: $8.00
Course Fee Purpose: Maintain technology in the FL lab, EH 408, and classroom technology.
Description: (IL=Intermediate Low) This is a transition course to upper division. The course focuses on oral proficiency development. Students will learn a variety of techniques and strategies to increase their oral proficiency in a variety of social, educational and cultural settings. Native-speaking students or those who have acquired proficiency through residence in the target language community are not eligible to take this class.

**SPAN 3060 - Grammar & Composition**

Credits: (3)
Typically Taught Fall Semester: Full Sem
Course Fee: $8.00
Course Fee Purpose: Maintain technology in the FL lab, EH 408, and classroom technology.
Description: (IL=Intermediate Low) Students will read examples of writing in various modes (such as description, narration, exposition, and argument), write short compositions in those modes, and review the necessary grammar to write correctly in those modes.

**SPAN 3116 - DLI Bridge Course I**

Credits: (3)
Typically Taught Fall Semester: Full Sem
Description: Taught in DLI High Schools for students who have passed the AP Exam with a 3 or higher. Although this is a three credit-hour class, it will meet over the course of a full academic year. Credit will count toward a major or minor in the language.
Pre-requisite(s): SPAN 2020 or AP exam with a score of 3 or better

**SPAN 3117 - DLI Bridge Course II**

Credits: (3)
Typically Taught Fall Semester: Full Sem
Description: Taught in DLI High Schools for students who have passed the AP Exam with a 3 or higher. Although this is a three credit-hour class, it will meet over the course of a full academic year. Credit will count toward a major or minor in the language.
Pre-requisite(s): SPAN 2020 or AP exam with a score of 3 or better

**SPAN 3118 - DLI Bridge Course III**

Credits: (3)
Typically Taught Fall Semester: Full Sem
Description: Taught in DLI High Schools for students who have passed the AP Exam with a 3 or higher. Although this is a three credit-hour class, it will meet over the course of a full academic year. Credit will count toward a major or minor in the language.
Pre-requisite(s): SPAN 2020 or AP exam with a score of 3 or better

**SPAN 3160 - Introduction to Literature**

Credits: (3)
Typically Taught Summer Semester: 1st Block
Typically Taught Fall Semester: Full Sem, Full Sem - Online
Typically Taught Spring Semester: Full Sem
Course Fee: $8.00
Course Fee Purpose: Maintain technology in the FL lab, EH 408, and classroom technology.
Description: (IL=Intermediate Low) Required of all majors and minors. 3160 may be taken concurrently with other literature courses. One sheltered section may be offered to students who have not had extensive in-country experience.
Pre-requisite(s): SPAN 3060 Grammar and Composition
Note: Check with department for course availability.

**SPAN 3220 - Phonetics and Phonology**

Credits: (3)
Typically Taught Fall Semester: Full Sem
Course Fee: $8.00
Course Fee Purpose: Maintain technology in the FL lab, EH 408, and classroom technology.
Description: (IL=Intermediate Low) Analysis of the sounds of language and word formation: practice of native like speech patterns. Required of all teaching majors and minors.
Note: Check with department for course availability.

**SPAN 3270 - Special Topics in Linguistics**

Credits: (3)
Variable Title
Course Fee: $8.00
Course Fee Purpose: Maintain technology in the FL lab, EH 408, and classroom technology.
Description: (IM=Intermediate Mid) An introduction to linguistic structures and semantic elements. The course provides useful information and practice in the language, its structures and usage. The sub-disciplines of linguistics, other than phonetics and phonology (covered in SPAN 3220), will be studied. These may include lexical analysis, semantics, morphology, syntax, linguistic change and dialectal variation.
Note: Check with department for course availability.

SPAN 3320 - Applied Language Studies

Credits: (1-3)
Variable Title
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Course Fee: $8.00
Course Fee Purpose: Maintain technology in the FL lab, EH 408, and classroom technology.
Description: (Minimal proficiency level varies with content).
May be repeated up to 10 times under different titles.

SPAN 3360 - Advanced Grammar

Credits: (3)
Typically Taught Fall Semester: Full Sem
Course Fee: $8.00
Course Fee Purpose: Maintain technology in the FL lab, EH 408, and classroom technology.
Description: (IL=Intermediate Low) Analysis and application of syntactic principles and discourse structure.

SPAN 3540 - Latin American Environment and Cultures

Credits: (3)
Course Fee: $8.00
Course Fee Purpose: Maintain technology in the FL lab, EH 408, and classroom technology.
Description: In order to provide an interdisciplinary introduction to Latin America, this course presents the region's history, its peoples, their culture and their political and natural environments. Other content to be discussed includes issues of migration, US Latinos and the region's relationship with the US.

SPAN 3550 GLB - Cultural Heritage I

Credits: (3)
Variable Title
Course Fee: $8.00
Course Fee Purpose: Maintain technology in the FL lab, EH 408, and classroom technology.
Description: (Intermediate Mid) In-depth studies in culture, history, geography, social customs, fine arts and civilization. May be repeated up to 7 times for credit and for other non-English speaking cultures.

SPAN 3560 - Cultural Heritage II

Credits: (3)
Variable Title
Course Fee: $8.00
Course Fee Purpose: Maintain technology in the FL lab, EH 408, and classroom technology.
Description: (Intermediate Med) Studies in culture, history, geography, social customs, fine arts, and civilization. May be repeated 3 times for other non-English speaking cultures.

SPAN 3570 - Special Topics in Culture

Credits: (3)
Variable Title
Course Fee: $8.00
Course Fee Purpose: Maintain technology in the FL lab, EH 408, and classroom technology.
Description: (Intermediate Mid) In-depth studies in culture, history, geography, social customs, fine arts, and civilization. May be repeated up to 7 times for credit and for other non-English speaking cultures.

SPAN 3610 - Literature Survey I

Credits: (3)
Variable Title
Course Fee: $8.00
Course Fee Purpose: Maintain technology in the FL lab, EH 408, and classroom technology.
Description: (IH=Intermediate High) A survey of the authors and works of a particular period or place. May be repeated under different titles.

SPAN 3620 - Literature Survey II

Credits: (3)
Variable Title
Course Fee: $8.00
Course Fee Purpose: Maintain technology in the FL lab, EH 408, and classroom technology.

Description: (IH=Intermediate High) A survey of the authors and works of a particular period or place. May be repeated under different titles.

SPAN 3630 - Literature Poetry

Credits: (3)
Variable Title
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Course Fee: $8.00

Course Fee Purpose: Maintain technology in the FL lab, EH 408, and classroom technology.

Description: (IM=Intermediate Mid) One literature course is required for regular and teaching majors. May be taken concurrently with FL 3160. May be repeated under different titles.

SPAN 3631 - Literature: Prose

Credits: (3)
Typically Taught Fall Semester: Full Sem
Course Fee: $8.00

Course Fee Purpose: Maintain technology in the FL lab, EH 408, and classroom technology.

Description: (IM=Intermediate Mid) A survey of works in prose by one or various authors of a particular period or place, or spanning several literary movements and geographical regions. May be taken 3 times up to 9 credits under different titles.

SPAN 3650 - Literature Periods

Credits: (3)
Variable Title
Course Fee: $8.00

Course Fee Purpose: Maintain technology in the FL lab, EH 408, and classroom technology.

Description: (IM=Intermediate Mid) May be repeated under different titles. One literature course is required for regular and teaching majors. May be taken concurrently with SPAN 3160.

SPAN 3660 - Literature Authors

Credits: (3)
Variable Title
Course Fee: $8.00

Course Fee Purpose: Maintain technology in the FL lab, EH 408, and classroom technology.

Description: (IN=Intermediate Mid) May be repeated under different titles. One literature course is required for regular and teaching majors.

Suggested Requisite(s): May be taken concurrently with SPAN 3160.

Note: Check with Department for course availability.

SPAN 3680 - Literature: Film

Credits: (3)
Typically Taught Fall Semester: Full Sem
Course Fee: $8.00

Course Fee Purpose: Maintain technology in the FL lab, EH 408, and classroom technology.

Description: (IM=Intermediate Mid) A survey of film by one or various filmmakers of a particular period or place, or spanning several literary movements and geographical regions. May be taken 3 times up to 9 credits under different titles.

SPAN 3690 - Special Topics in Literature

Credits: (1-3)
Variable Title
Course Fee: $8.00

Course Fee Purpose: Maintain technology in the FL lab, EH 408, and classroom technology.

Description: (IM=Intermediate Mid) May be repeated under different titles. One literature course is required for regular and teaching majors.

Suggested Requisite(s): May be taken concurrently with SPAN 3160.

Note: Check with Department for course availability.

SPAN 3710 - Business Language I

Credits: (3)
Typically Taught Fall Semester: Full Sem
Course Fee: $8.00

Course Fee Purpose: Maintain technology in the FL lab, EH 408, and classroom technology.

Description: (IM=Intermediate Mid) Business Language and Practices. Required of all commercial majors.

SPAN 3715 - Business Language II

Credits: (3)
Typically Taught Fall Semester: Full Sem
Course Fee: $8.00

Course Fee Purpose: Maintain technology in the FL lab, EH 408, and classroom technology.

SPAN 3720 CEL - Language for Specific Purposes I

Credits: (3)
Typically Taught Fall Semester: Full Sem
Course Fee: $8.00
Course Fee Purpose: Maintain technology in the FL lab, EH 408, and classroom technology.
Description: (IM=Intermediate Mid) This course is content, vocabulary and culture-based. The course focuses on practical vocabulary, idiomatic expressions, professional terminology and cultural interactions on a variety of topics such as language for the medical professions, social workers, law enforcement or tourism.

SPAN 3730 CEL - Language for Specific Purposes II

Credits: (3)
Course Fee: $8.00
Course Fee Purpose: Maintain technology in the FL lab, EH 408, and classroom technology.
Description: (IM=Intermediate Mid) This course is content, vocabulary and culture-based. The course focuses on practical vocabulary, idiomatic expressions, professional terminology and cultural interactions on a variety of topics such as language for the medical professions, social work, law enforcement or tourism.

SPAN 3740 - Translation I

Credits: (3)
Typically Taught Fall Semester: Full Sem
Course Fee: $8.00
Course Fee Purpose: Maintain technology in the FL lab, EH 408, and classroom technology.
Description: (IM=Intermediate Mid) Introduction to basic techniques and skills needed for bilingual translation of non-fiction texts. Emphasis will be on the translation into English, and on the stylistic, syntactic, cultural, lexical, and terminological problems. Students are given ample opportunity to apply these techniques through a series of written translation assignments, which form the basis for class discussion.

SPAN 3750 - Healthcare Interpreting

Credits: (3)
Typically Taught Fall Semester: Full Sem
Course Fee: $8.00
Course Fee Purpose: Maintain technology in the FL lab, EH 408, and classroom technology.
Description: Introduction to techniques and skills needed for bilingual interpretation in the healthcare professional setting. The course includes an overview and history of the interpreting industry and work of interpreters, certification and licensure, and the variety of consumers and modalities with which interpreters work. Ethics, standards of practice, and terminology for healthcare interpreters are explored.

SPAN 3760 - Special Topics in Translation

Credits: (3)
Variable Title
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Course Fee: $8.00
Course Fee Purpose: Maintain technology in the FL lab, EH 408, and classroom technology.
Description: This is a specialized course that offers in-depth studies in selected topics, current developments or recent trends in the fields of Translation and Translation Studies.

SPAN 3850 - Study Abroad

Credits: (1-6)
Description: (IM=Intermediate Mid) Language and culture studies for students whose language proficiency is Intermediate Low to Intermediate High. All Intermediate and Advanced tasks will be performed in the target language. All Superior tasks may be performed in English. Prior travel experience does not apply. May be repeated up to 10 times for credit.

SPAN 4190 - Foreign Language Journal

Credits: (3)
Course Fee: $2.00
Course Fee Purpose: Maintain technology in the FL lab, EH 408, and classroom technology.
Description: (IM=Intermediate Mid) Language and culture studies for students whose language proficiency is Intermediate Low to Intermediate High. All Intermediate and Advanced tasks will be performed in the target language. All Superior tasks may be performed in English. Prior travel experience does not apply. May be repeated up to 10 times for credit.

SPAN 4620 - Survey of Literature I
Credits: (3)  
Course Fee: $8.00  
Course Fee Purpose: Maintain technology in the FL lab, EH 408, and classroom technology.  
Description: (IH=Intermediate High) One literature course is required of regular and teaching majors. Prerequisite: FL 3160

SPAN 4630 - Survey of Literature II

Credits: (3)  
Course Fee: $8.00  
Course Fee Purpose: Maintain technology in the FL lab, EH 408, and classroom technology.  
Description: (IH=Intermediate High) One literature course is required of regular and teaching majors. Prerequisite: FL 3160

SPAN 4690 - Special Topics in Literature

Credits: (3)  
Variable Title  
Course Fee: $8.00  
Course Fee Purpose: Maintain technology in the FL lab, EH 408, and classroom technology.  
Description: (IH=Intermediate High) Detailed analysis of a particular body of literature. For students whose proficiency in the target language is at least Intermediate High. Prerequisite: SPAN 3160 May be repeated up to 10 times under different titles.

SPAN 4740 - Translation II

Credits: (3)  
Typically Taught Summer Semester: Full Sem  
Typically Taught Spring Semester: Full Sem  
Course Fee: $8.00  
Course Fee Purpose: Maintain technology in the FL lab, EH 408, and classroom technology.  
Description: (IH=Intermediate High) Development of techniques and skills needed for bilingual translation of non-fiction texts. Emphasis will be on the translation into the target language. Methods of contrastive linguistics to analyze pertinent aspects of language structure, involving syntax, vocabulary and style, as well as basic theoretical-historical concepts are employed. Students are given ample opportunity to apply these techniques and concepts through a series of written translation assignments, which form the basis for class discussion. Prerequisite/Co-requisite: FL 3740 is strongly advised, but not required.

SPAN 4830 - Directed Readings

Credits: (1-3)  
Description: (IH=Intermediate High) Independent readings under the direction of a faculty member. May be repeated up to 10 times. Note: Check with Department for course availability.

SPAN 4850 - Study Abroad

Credits: (3)  
Description: (A=Advanced) Language and culture studies for students whose language proficiency is Advanced or Superior. All tasks are performed in the target language. Prior travel experience does not apply.

SPAN 4920 - Short Courses, Workshops, Institutes, and Special Programs

Credits: (1-6)  
Workshop  
Description: (Minimal proficiency level; varies with content). Consult the class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript. May be repeated for a total maximum of 6 credit hours. Note: Course not currently being offered.

SPAN 4960 - Senior Project

Credits: (3)  
Course Fee: $6.00  
Course Fee Purpose: Maintain technology in the FL lab, EH 408, and classroom technology.  
Description: (IH=Intermediate High) For students completing a major with Departmental Honors. Before registration in this course, students must work with a faculty advisor to define the project, create a contract and schedule, and determine the appropriate number of credit hours.

SW 1010 SS CEL - Introduction to Generalist Social Work

Credits: (3)  
Typically Taught Summer Semester: Full Sem Online  
Typically Taught Fall Semester: Full Sem, 1st Blk, Online  
Typically Taught Spring Semester: Full Sem, 1st Blk, Online  
Description: A generalist introduction to the relationships between social systems (individuals, groups, and communities) and the social welfare networks which
impact them, including the role of the social work profession. Open to all Weber State University students.

**SW 2100 SS - Human Behavior and the Social Environment I**

**Credits:** (3)
**Typically Taught Summer Semester:** 1st Blk Online
**Typically Taught Fall Semester:** Full Sem, 2nd Blk, Online
**Typically Taught Spring Semester:** Full Sem, 2nd Blk, Online

**Description:** This is the first course in the Human Behavior and the Social Environment sequence. It identifies the relationships between human developmental stages (from conception to death) and the problems associated with environmental interactions. Systems and theory are examined in the biological, psychological, and sociological arenas.

**Pre-requisite(s):** (It is recommended for Social Work Majors that SW 1010 be taken before or concurrently with SW 2100. It is also suggested that ZOOL 1020 be taken before or concurrently with SW 2100.)

**SW 2200 SS/EDI - Issues in Diversity**

**Credits:** (3)
**Typically Taught Summer Semester:** Full Sem
**Typically Taught Fall Semester:** Full Sem
**Typically Taught Spring Semester:** Full Sem

**Description:** A study of diversity among individuals, groups, communities, and of issues social workers will need to understand when interfacing with diverse populations.

**SW 2920 - Short Courses, Workshops, Institutes, and Special Programs**

**Credits:** (1-6)
**Workshop**

**Description:** Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript. May be repeated for a total maximum of 6 credit hours. 

Note: This course is offered as needed. Please check with the department for availability.

**SW 3000 - Death and Dying**

**Credits:** (3)
**Typically Taught Fall Semester:** Full Sem

**Typically Taught Spring Semester:** Full Sem

**Description:** An in-depth study of death, death-related issues and social institutions and practices dealing with death in American society, with special emphasis on the social processes surrounding death and constructive responses to death and dying.

Cross-listed with GERT 3000.

**SW 3100 - Human Behavior and the Social Environment II**

**Credits:** (2)
**Typically Taught Summer Semester:** 1st Blk
**Typically Taught Fall Semester:** Full Sem
**Typically Taught Spring Semester:** Full Sem

**Description:** This second course in the Human Behavior and the Social Environment sequence is designed to present basic principles and fundamental concepts necessary for acquiring and organizing knowledge for practice with individuals, families, groups, organizations, and communities and on the interaction among these systems. Alternative paradigms on human behavior and the social environment are also explored.

**Pre-requisite(s):** SW 1010, SW 2100 and formal admittance to the Social Work Program.

**SW 3120 - Aging: Adaptation and Behavior**

**Credits:** (3)
**Typically Taught Fall Semester:** Full Sem

**Description:** An examination of the physical and psychological processes of aging. The emphasis is upon behavioral and social adaptation to these processes.

Cross-listed with GERT 3120.

**SW 3200 - Child and Family Welfare**

**Credits:** (2)
**Typically Taught Fall Semester:** Full Sem
**Typically Taught Spring Semester:** Full Sem

**Description:** A historical and contemporary examination of child and family welfare issues, and social work intervention strategies.

**Pre-requisite(s):** SW 1010.

**SW 3320 - Ethnicity and Older Women in the American Society**

**Credits:** (3)
**Typically Taught Fall Semester:** Full Sem
**Description:** The importance of special populations (ethnic, racial and women) as they relate to the aging process. Cross-listed with GERT 3320.

**SW 3500 - Social Welfare & Gerontological Policy Development and Service**

Credits: (3)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem

Description: The history, mission, philosophy and human service aspects used in the development of social work/gerontology as a profession will be covered. Examples of social, public and social welfare policy will be identified and studied. Knowledge of local, state, and federal legislation, professional organizations, and membership organizations will assist in review of lobby, funding and implementation practices used in meeting human service needs. Methods for the political and organizational analysis of processes and policy will be covered.

Pre-requisite(s): SW 1010 or GERT 1010. (SW/GERT 3500 must be completed before entering Field Practice.)

**SW 3600 - Social Statistics**

Credits: (3)
Typically Taught Summer Semester: Online
Typically Taught Fall Semester: Full Sem, 1st Blk, Online
Typically Taught Spring Semester: Full Sem, 2nd Blk, Online

Description: Introduction to analysis and presentation of data.

Pre-requisite(s): Meet WSU Quantitative Literacy requirement. Cross-listed with GERT 3600.

**SW 3700 - Social Work Research**

Credits: (3)
Typically Taught Fall Semester: Full Sem, 2nd blk
Typically Taught Spring Semester: Full Sem, 1st Blk

Description: Social work research and its relationship to social work theory and practice. The class will include content on qualitative, quantitative and single system research methodologies; analysis of data, including statistical procedures; systematic evaluation of practice; analysis and evaluation of theoretical bases, research questions, methodologies, statistical procedures, and conclusions of research reports; and relevant technological advances. The course will also identify how the research curriculum contributes to the student's use of scientific knowledge for practice.

Pre-requisite(s): SW 1010. (Must be completed before entering SW 4861.) Recommended prerequisite: completion of social statistics class.

**SW 3800 - Writing in Social Work**

Credits: (3)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem

Description: This course is designed to help students develop and sharpen professional writing skills and become more effective in various forms of written communication in social work and the broader social welfare delivery system. The course will offer an in-depth overview of APA writing style guidelines and apply these, as appropriate, in the preparation of written documents common in professional practice in social and behavioral sciences.

Pre-requisite(s): University Composition (ENGL 2010 or equivalent).

Suggested Requisite(s): (It is recommended that this course be taken concurrently with SW 3700 and/or SW 4860.)

**SW 3900 - Social Work Methods, Values, and Ethics**

Credits: (3)
Typically Taught Summer Semester: 1st Blk
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem

Description: An ecological system and generalist approach to social work practice methods. Content is germane to various systems and subsystems typically implicated in problems encountered by social workers. A study of values and ethics will assist the social worker to understand the proprieties of professional practice.

Pre-requisite(s): SW 1010, SW 2100, SW 2200 and formal admittance to the social work program. (May be taken prior to or concurrently with SW 3910.)

**SW 3910 - Social Work Practice I**

Credits: (3)
Typically Taught Summer Semester: 2nd Blk
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem

Description: An intensive knowledge-based generalist course concentrating on micro social work intervention skills combining lecture and hands-on experiences.
Pre-requisite(s): Formal admittance to the social work program.
Suggested Requisite(s): (May be taken prior to or concurrently with SW 3900.)

SW 3920 - Social Work Practice II

Credits: (3)
Typically Taught Summer Semester: 1st Blk
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: A generalist course directed at understanding and demonstrating the principles, concepts and techniques of planned change in mezzo settings including families and small groups.
Pre-requisite(s): SW 3910.
Co-Requisite(s): SW 3930 and SW 4860.

SW 3930 - Social Work Practice III

Credits: (3)
Typically Taught Summer Semester: 2nd Blk
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: A generalist course designed to illustrate the principles, concepts and techniques of planned change in macro settings including institutions, organizations, and communities.
Co-Requisite(s): Must be taken concurrently with SW 3920 and SW 4860.

SW 4140 - Perspectives on Drug Use and Substance Abuse

Credits: (3)
Typically Taught Spring Semester: Full Sem
Description: This course examines drug use and substance abuse across the lifespan and addresses issues such as prevention, treatment, and public policy as they affect and relate to individuals, groups, families, organizations, and communities. Course material draws on current research, theory, and practice experience.

SW 4150 - DSM-5

Credits: (3)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: This elective course is designed to familiarize the student with the Diagnostic Statistical Manual of Mental Disorders (DSM-5 classification). The DSM-5 provides the practitioner with a systematic diagnostic tool for practice and research.

SW 4220 - Societal Responses to Aging

Credits: (3)
Typically Taught Fall Semester: Full Sem
Description: This course is designed to cover aspects of retirement relating to job change or discontinuance. The processes, events, social roles, and phases of life will be presented.
Cross-listed with GERT 4220.

SW 4240 - Introduction to TeleMental Health

Credits: (3)
Typically Taught Spring Semester: Full Sem
Description: This course explores technology-based mental health, substance abuse treatment, and social service delivery. The course addresses the topic broadly, covering topics such as online tools and technologies, professional ethics, legal considerations, diversity and access, quality assurance, etc. The purpose is to introduce students to the current status and future outlook of web-based mental health and social service delivery.

SW 4250 - Medical Social Work

Credits: (3)
Typically Taught Spring Semester: Full Sem
Description: This elective course explores the process and dynamics of the provision of social work services within the medical service delivery system.

SW 4265 - Crisis Intervention and Trauma

Credits: (3)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: This course is designed to prepare students to develop assessment, diagnostic, and evidenced-based interventions to assist those in critical need during and after a crisis or trauma. A crisis is defined as an event that exceeds and overwhelms an individual's coping skills to the point where equilibrium is disrupted. Successful completion of this course qualifies for the Crisis Worker Certificate through the state of Utah.
Pre-requisite(s): Junior or senior status and at least one of the following: CHF 1500, GERT 1010, HLTH 1030,
NRSG 2200, PSY 1010, SOC 1010, SW 1010; OR instructor permission.

**SW 4500 - Interventions for Populations at Risk**

Credits: (3)
Typically Taught Summer Semester: 1st Blk
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: A course designed to study populations at risk with an emphasis on women and people of color. Interventions to alleviate conditions of human suffering are stressed.
Pre-requisite(s): SW 3910, SW 4860.

**SW 4600 - Social Work in Special Settings**

Credits: (2-4)
Variable Title
Description: This elective course is designed to accommodate special topic areas in Social Work practice. May be repeated once for a maximum of 4 credits.
Note: This course is offered as needed. Please check with the department for availability.

**SW 4650 - Retirement: Adjustment/Planning**

Credits: (3)
Typically Taught Spring Semester: Full Sem
Description: This course is designed to cover aspects of retirement relating to job change or discontinuance. The processes, events, social roles, and phases of life will be presented.
Cross-listed with GERT 4650.

**SW 4800 - Projects and Research**

Credits: (1-3)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: This elective course allows for supervised projects and primary research in various areas of social work. Limited to senior students.
Pre-requisite(s): Consent of department chair.
May be repeated up to 2 times for a maximum of 3 credits.
Note: Check with department for course availability.

**SW 4810 - Experimental Course**

Credits: (1-6)
Experimental
Description: Consult the semester schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript. May be repeated for a total maximum of 6 credit hours.
Note: This course is offered as needed. Please check with the department for availability.

**SW 4830 - Directed Readings**

Credits: (1-3)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: This elective course is an individual readings course for seniors who are majoring in social work. Permission must be obtained from the instructor. Students are required to complete a minimum of 1000 pages of selected readings per class hour requested for credit.
Pre-requisite(s): Consent of department chair.
May be repeated up to 2 times for a maximum of 3 credits.
Note: Check with department for course availability.

**SW 4850 - Social Work Study Abroad**

Credits: (1-4)
Description: The purpose of this course is to provide opportunities for undergraduate students in social work to experience study abroad or study away programs that are designed to explore issues relevant to undergraduate-level social work theory and practice with individuals, families, groups, communities, and organizations.
Pre-requisite(s): SW 1010 or instructor approval.

**SW 4860 INT - Social Service Field Experience I**

Credits: (4)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Course Fee: $0.00
Course Fee Purpose: The course fee for SW 4860 is used to support the preparation and ongoing training of field placement supervisors. Course fee funds are also be used to cover the tangible costs and materials associated with field contracts and the formal review and evaluation of student interns.
Description: This field practice course requires a minimum
of 200 hours of supervised field service in an approved social service agency. The emphasis is to include micro, mezzo, and macro practice opportunities.

**Pre-requisite(s):** SW 2200, SW 3100, SW 3200, SW 3500, SW 3900 and SW 3910. Formal admittance to Field Experience required.

**Suggested Requisite(s):** (Must be taken concurrently with SW 3920 and SW 3930.)

**SW 4861 INT - Social Service Field Experience II**

**Credits:** (4)

Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem

**Course Fee:** $0.00

**Course Fee Purpose:** The course fee for SW 4861 is used to support the preparation and ongoing training of field placement supervisors. Course fee funds are also be used to cover the tangible costs and materials associated with field contracts and the formal review and evaluation of student interns.

**Description:** This field practice course requires a minimum of 200 hours of supervised field service in an approved social service agency. The emphasis is to include micro, mezzo, and macro practice opportunities.

**Pre-requisite(s):** SW 3700, SW 4860, SW/GERT 3600 (or equivalent).

**Co-Requisite(s):** (To be taken concurrently with SW 4990).

**SW 4920 - Short Courses, Workshops, Institutes, and Special Programs**

**Credits:** (1-6)

**Workshop**

**Description:** Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript. May be repeated for a total maximum of 6 credit hours.

**Note:** This course is offered as needed. Please check with the department for availability.

**SW 4990 - Social Work Senior Seminar**

**Credits:** (2)

Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem

**Description:** This course requires preparation and discussion of social work concepts and topics, and information and techniques in obtaining a job and selecting a graduate school.

**Pre-requisite(s):** SW 4860. (Must be taken concurrently with SW 4861.)

**SW 5010 - Professional Development: Human Development in the Social Environment**

**Credits:** (3)

**Description:** This professional development course is designed for non-social work majors who have or wish to have experience in the delivery of social services. The course explores human development in the context of the broader social environment. It identifies the relationship between human developmental stages (from conception to death) and the problems associated with environmental interactions. Systems and theory are examined in the biological, psychological, sociological, and spiritual arenas.

**Credit/No credit.**

**Note:** This course is offered as needed. Please check with the department for availability.

**SW 5020 - Professional Development: Social Welfare Policy**

**Credits:** (3)

**Typically Taught Spring Semester:** 1st Blk

**Description:** This professional development course is designed for non-social work majors who have or wish to have experience in the delivery of social services. The history, mission, philosophy and human service aspects used in the development of social welfare policy will be covered. Examples of social, public, and social welfare policy will be identified and studied. Knowledge of local, state, and federal legislation, professional organizations, and membership organizations will assist in review of lobbying, funding, and implementation practices used in meeting human service needs. Methods for the political and organizational analysis of processes and policy will be covered.

**Credit/No credit.**

**SW 5030 - Professional Development: Social Work Ethics and Practice Methods**

**Credits:** (3)

**Typically Taught Spring Semester:** 2nd Blk

**Description:** This professional development course is designed for non-social work majors who have or wish to have experience in the delivery of social services. Using an ecological and generalist approach to social work practice
at the individual, family, group, organization, and community levels, this course provides training in a planned client change process and considers social work roles at various levels. A significant focus of this course is the study of the application of key values and ethical principles, as defined by the National Association of Social Workers (NASW), to professional practice and the resolution of ethical dilemmas. The course also includes content on the evaluation of practice and programs. Credit/No credit.

THEA 1013 CA - Introduction to Theatre

Credits: (3)
Typically Taught Summer Semester: Online
Typically Taught Fall Semester: Full Sem, Online
Typically Taught Spring Semester: Full Sem, Online
Course Fee: $6.00
Course Fee Purpose: The course fee associated with this class pays for maintenance of the department lab and associated technology.
Description: An introduction to live theatre and drama and the creative heritage of theatre. Students will develop critical awareness of dramatic theory and performance practice through reading and evaluating historical and contemporary drama, and through applied creative activities. Students are expected to attend theatre performances outside of regularly scheduled class time. Note: Theatre majors are required to enroll in the face-to-face class, not the online section.

THEA 1023 CA - Introduction to Film

Credits: (3)
Typically Taught Summer Semester: Full Sem, Online
Typically Taught Fall Semester: Full Sem, Online
Typically Taught Spring Semester: Full Sem, Online
Course Fee: $6.00
Course Fee Purpose: The course fee associated with this class pays for maintenance of the department lab and associated technology.
Description: Examination and analysis of film and film techniques. Students will develop critical awareness of film as an artistic, social, and cultural phenomenon. Students may be required to attend film screenings outside of the regularly scheduled class time. Note: A lab fee is required for this class.

THEA 1030 - Voice and Movement for the Actor

Credits: (3)
Typically Taught Fall Semester: Full Sem
Course Fee: $6.00
Course Fee Purpose: The course fee associated with this class pays for maintenance of the department lab and associated technology.
Description: Natural resources of the human voice and body are studied as artistic resources for the performing artist. The course is designed to examine both the process and products of vocal and physical dynamics. The goal of this course is to integrate vocal and physical skills into the working process of the actor.
Pre-requisite(s): THEA 1033. (Theatre majors only).

THEA 1033 CA - Introduction to Acting

Credits: (3)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Course Fee: $6.00
Course Fee Purpose: The course fee associated with this class pays for maintenance of the department lab and associated technology.
Description: This is an introductory class where students learn basic acting skills through class participation in improvisation, monologue work, and scene study. Students learn a basic understanding of theories and methodologies. Skills demonstrated in areas of body movement, diction, observation, imagination and "action". (For non-theatre majors).
Note: Note: Theatre majors are strongly encouraged to enroll in the "majors only section" offered spring semester and concurrently enroll in THEA 1713.

THEA 1043 CA - Introduction to American Musical Theatre

Credits: (3)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Course Fee: $6.00
Course Fee Purpose: The course fee associated with this class pays for maintenance of the department lab and associated technology.
Description: An introduction to American Musical Theatre, its history and creative elements. Students will develop critical awareness of the differences between traditional and musical theatre by becoming actively involved in reading, observing, and analyzing musical theatre.
Note: Note: Musical Theatre majors are strongly encouraged to enroll in this class fall semester.
THEA 1051 - Freshman (New Student) Seminar

Credits: (1)
Typically Taught Fall Semester: Full Sem
Course Fee: $2.00
Course Fee Purpose: The course fee associated with this class pays for maintenance of the department lab and associated technology.
Description: An introduction to the Theatre Arts Area devoted to the needs of incoming majors, including: faculty and staff introductions and theatrical personnel responsibilities, audition notices and practices, production and Practicum assignments, and opportunities available within the facility. Includes detailed academic advice for majors and minors, and practical methods of library research for theatre topics at WSU.

THEA 1053 - Introduction to Technical Production

Credits: (3)
Description: An introduction to the production components of live theatre in which students will develop an awareness of technical aspects including scenery, lighting, costume, properties and sound. Students are expected to attend theatre performances outside of regularly scheduled class time. This course is recommended for non-theatre majors and minors.

THEA 1063 - Theatre Foundations

Credits: (3)
Typically Taught Fall Semester: Full Sem
Course Fee: $6.00
Course Fee Purpose: The course fee associated with this class pays for maintenance of the department lab and associated technology.
Description: An introduction to live theatre and drama and the creative heritage of theatre. Students will develop critical awareness of dramatic theory and performance practice through reading and evaluating historical and contemporary drama, and through applied creative activities. This course serves as an introduction to the Theatre area of the Department of Performing Arts, the requirements, and the curriculum. Students are expected to attend theatre performances outside of regularly scheduled class time.

THEA 1075 - Class Voice for Musical Theatre

Credits: (1)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Course Fee: $2.00
Course Fee Purpose: The course fee associated with this class pays for maintenance of the department lab and associated technology.
Description: This course will serve as a preparation for private vocal instruction, departmental production auditions, and the application audition in the musical theatre program. While all theatre majors are welcome to take the course, it's geared specifically for incoming freshman musical theatre applicants. The instruction will cover basic singing technique and an introduction to acting a musical theatre song.
Pre-requisite(s): Must be a theatre major or minor. May be repeated once up to 2 credit hours.

THEA 1143 - Musical Theatre Musicianship I

Credits: (2)
Typically Taught Spring Semester: Full Sem
Description: This course is an introduction to musicianship for Musical Theatre artists. It focuses directly on the skills necessary for success in live musical theatre, namely, note and rhythm recognition, keyboard skills, chords, and basic theory.
Pre-requisite(s): THEA 1063.

THEA 1220 - Acting I

Credits: (3)
Typically Taught Spring Semester: Full Sem
Description: Required for Theatre Performance and Teaching Majors. Non-majors should enroll in THEA CA 1033. Students in this course will demonstrate a knowledge of and an ability to integrate fundamental acting principles and analysis skills into performance. Students will develop professional work habits of dependability, promptness, cooperation, a sense of ensemble, and the ability to make independent choices.
Pre-requisite(s): THEA 1030, THEA 1063.

THEA 1223 - Stage Makeup

Credits: (3)
Typically Taught Spring Semester: Full Sem
Course Fee: $10.00
Course Fee Purpose: The course fee associated with this class pays for maintenance of the department lab and
associated technology. The course fee associated with this class pays for demonstration supplies and some of the material needed for makeup applications.

**Description:** A practical investigation of stage makeup techniques and skills of design and application.

Note: A lab fee is required for this class.

**THEA 1513 - Stagecraft**

**Credits:** (3)
**Typically Taught Fall Semester:** Full Sem
**Description:** Introduction to stage scenery: lecture/demonstration of basic materials, shop and stage equipment, construction principles, and elementary technical drawing and design procedures.

**THEA 1713 - Script Analysis**

**Credits:** (3)
**Typically Taught Spring Semester:** Full Sem
**Course Fee:** $6.00
**Course Fee Purpose:** The course fee associated with this class pays for maintenance of the department lab and associated technology.

**Description:** An introductory course focusing on plot, character, language, and thematic analysis of varied historical and modern performance texts in the context of contemporary staging practice. This course teaches play analysis from a practical perspective. For students who intend to perform, direct, and design within the collaborative production process.

**Pre-requisite(s):** THEA 1063

**THEA 1810 - Experimental Course**

**Credits:** (1-6)
**Experimental**

**Description:** Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript. May be repeated for a total maximum of 6 credit hours.

**THEA 2022 - Costume Fundamentals**

**Credits:** (3)
**Typically Taught Fall Semester:** Full Sem
**Course Fee:** $36.00
**Course Fee Purpose:** The course fee associated with this class pays for maintenance of the department lab and associated technology. The course fee associated with this course pays for the basic sewing materials needed, such as muslin, thread, scissors, fabric dye, millinery supplies, pattern making supplies, and weaving supplies.

**Description:** Introduction to stage costume: with lectures, demonstrations and projects to introduce the basic materials, fabrics, costume construction methods, costume history, and design principles and procedures for theatrical costumes. A lab fee is required for this class for costume studio materials.

**THEA 2032 - Lighting Fundamentals**

**Credits:** (3)
**Typically Taught Fall Semester:** Full Sem
**Course Fee:** $21.00
**Course Fee Purpose:** The course fee associated with this class pays for maintenance of the lighting lab including replacing gels, gobos, software updates for the lighting consoles, bulbs, and lighting instruments.

**Description:** This introductory course gives students a foundation in lighting design for the stage. Students will develop an ability to “see” light in new ways, both natural and artificial, and the role light plays in storytelling and on the overall composition of the visual world of the performing arts. Students will also learn technical aspects of lighting equipment, control systems, and computer drafting.

**THEA 2033 - Acting II**

**Credits:** (3)
**Typically Taught Fall Semester:** Full Sem
**Course Fee:** $6.00
**Course Fee Purpose:** The course fee associated with this class pays for maintenance of the department lab and associated technology.

**Description:** For the intermediate and advanced student actor, this course places primary emphasis on the development of characterization techniques through participation in physical and vocal exercises. Focus will be on a variety of stylistic scene work including Greek Theatre and Shakespeare.

**Pre-requisite(s):** THEA 1030, THEA 1220, and by audition.

**THEA 2203 - Costume Technology**

**Credits:** (3)
**Typically Taught Spring Semester:** Full Sem
**Course Fee:** $36.00
**Course Fee Purpose:** The course fee associated with this class pays for maintenance of the department lab and associated technology. The course fee associated with this course pays for the basic sewing materials needed, such as
muslin, thread, scissors, fabric dye, millinery supplies and pattern making supplies.

Description: A practical exploration of the research and construction techniques used to create contemporary and historic costumes for the stage. A lab fee is required for this class for costume studio materials.

Suggested Requisite(s): THEA 2022

Note: Typically Taught Spring of even years.

**THEA 2330 - Dramaturgy and Criticism**

Credits: (3)
Typically Taught Fall Semester: Full Sem even years
Course Fee: $6.00
Course Fee Purpose: Standard DPA Technology fee.

Description: This course will be a practical study of the role and duties of a dramaturg in a production as well as a critic reviewing a finished work. Work will include all facets of dramaturgy: historical research, script analysis, audience outreach, and lobby displays. A completed Dramaturgy workbook for a proposed play or practical work on a department play will be the final assignment. This course may be repeated once up to 6 credit hours.

**THEA 2403 - Stage Management**

Credits: (3)
Typically Taught Fall Semester: Full Sem Odd Years
Course Fee: $24.00

Course Fee Purpose: The course fee for this class will be used to pay for the IAVM Crowd Manager Training Course for each student. This training is part of an update in the curriculum of the class and is used to help train students who will be managing crowds during their time working on shows at Weber State and in their future careers. It is also required for some of their responsibilities relating to course assignments.

Description: A practical study of stage management techniques necessary for efficient theatre production. A conceptual overview of the rehearsal and performance process will be stressed, including an overview of management techniques as applied to the performing arts in general. Front of house management and company management will be studied.

**THEA 2443 - Acting for Musical Theatre**

Credits: (3)
Typically Taught Spring Semester: Full Sem
Course Fee: $6.00

Course Fee Purpose: The course fee associated with this class pays for maintenance of the department lab and associated technology.

Description: A practical study of acting methods unique to the discipline of musical theatre. Emphasis will be placed on the interpretation of modern musical theatre, literature through imagery, action, characterization, and analysis of the score and libretto.

Pre-requisite(s): THEA 2033 and admittance to the Musical Theatre program.

**THEA 2515 - Rendering and Modeling**

Credits: (3)
Typically Taught Spring Semester: Even Years Full Sem

Course Fee Purpose: The course fee associated with this class pays for maintenance of the department lab and associated technology.

Description: An introduction to the tools and techniques used in drawing, rendering and modeling for theatrical designers, covering both traditional and modern techniques for scenic, costume and light renderings.

**THEA 2580 - Creative Computing for Theatre Design**

Credits: (3)
Typically Taught Fall Semester: Full Sem
Course Fee: $10.00

Course Fee Purpose: The course fee associated with this class pays for maintenance of the department lab and associated technology.

Description: The class provides an introduction to several important computer programs used in the performing arts industry. Skills learned are applicable across various design, technical, and educational fields, and each student develops their own individual capstone project tailored to their specific learning goals. Programs learned may include the following: Vectorworks, Lightwright, Qlab, Isadora, and Adobe Suite.

**THEA 2581 - Adobe Suite for Theatre Design**

Credits: (3)
Typically Taught Spring Semester: Even Years Full Sem

Description: In this class students learn Photoshop, Illustrator and InDesign for theatre-relevant applications like creating paper props, editing photos for promotional materials, creating custom fabric patterns, producing photo-realistic rendering of sets and costumes, creating social media posts, portfolios, programs, and other applications.

**THEA 2713 INT - Teaching Theatre in the Secondary School**
THEA 2821 HU - Period Styles in Design

Credits: (3)
Typically Taught Spring Semester: Full Sem
Description: A survey of the history of Western Art, including architecture, clothing, music, art, and decorative arts for the theatre.

THEA 2851 - Design/Tech/Management Practicum

Credits: (1)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Provides supervised experience in theatre production and performance. Practicum is an experiential learning course supervised by theatre faculty to provide the student with a practical application of theatrical theory. The student will develop skills and abilities for the theatre through supervised experience in a design, technical, or management production position relating to: Stage Management, Lighting Design, Costume Design, Scenic Design, Props Design, Sound Design, Dramaturgy, Technical Direction, Choreography, House Management. May be repeated up to 3 times for credit.

THEA 2852 - Design/Tech/Management Practicum

Credits: (1)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Provides supervised experience in theatre production and performance. Practicum is an experiential learning course supervised by theatre faculty to provide the student with a practical application of theatrical theory. The student will develop skills and abilities for the theatre through supervised experience in a design, technical, or management production position relating to: Stage Management, Lighting Design, Costume Design, Scenic Design, Props Design, Sound Design, Dramaturgy, Technical Direction, Choreography, House Management. May be repeated up to 3 times for credit.

THEA 2920 INT - Short Courses, Workshops, Institutes, and Special Programs

Credits: (1-6)
Workshop
Description: Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript. May be repeated for a total maximum of 6 credit hours.

THEA 3033 - Advanced Acting

Credits: (3)
Typically Taught Spring Semester: Full Sem even years
Course Fee: $6.00
Course Fee Purpose: The course fee associated with this class pays for maintenance of the department lab and associated technology.
Description: Introduces students to the techniques required to perform in various styles encountered in contemporary theatre, from Greek tragedy to the most modern forms. Includes two arranged studio hours per week.
Pre-requisite(s): THEA 2033, and by audition.

THEA 3070 - Voice and Movement for the Actor II

1888
Credits: (3)
Typically Taught Spring Semester: Full Sem odd years
Course Fee: $6.00
Course Fee Purpose: The course fee associated with this class pays for maintenance of the department lab and associated technology.
Description: An intermediate continuation of intensive voice and movement training for the actor, strong focus in movement and voice for extension of range and availability and for character development. Intermediate development and conditioning of the actor's voice and body with emphasis on dialect work and stylized movement.
Pre-requisite(s): THEA 1030.
This course may be repeated once up to 6 credit hours.

THEA 3100 - Projection Design

Credits: (3)
Typically Taught Spring Semester: Full Sem
Description: This course is a practical application of the tools and processes essential to creating projection designs for theatre, dance, and live events. This course also examines the history of projection design in theatre performance leading up to current practices. Students will learn script analysis and storytelling as well as the tools and technology used in the industry today. Programs learned include QLab, Isadora, and Lightform.
Note: Typically Taught Spring of odd years.

THEA 3103 INT - Directing I

Credits: (3)
Typically Taught Fall Semester: Full Sem
Course Fee: $6.00
Course Fee Purpose: The course fee associated with this class pays for maintenance of the department lab and associated technology.
Description: This course explores the process of directing plays for the stage. Studio exercises and discussions develop skills in key areas: interpretation of form and artistic intent; perception and sensibility in rehearsal, effective communication with actors, and balancing the interplay between action and text.
Pre-requisite(s): THEA 1063, THEA 1713, and THEA 1033 or THEA 1220.
Suggested Requisite(s): At least one Theatre Design Course is recommended prior to taking this course.

THEA 3116 - Auditioning

Credits: (2)
Variable Title
class pays for maintenance of the lighting lab including replacing gels, gobos, software updates for the lighting consoles, bulbs, and lighting instruments.

**Description:** This course will be an advanced exploration of lighting design for theater. This course is a practical exploration of the equipment, materials, and design processes of stage lighting and stage lighting design.

**Pre-requisite(s):** THEA 2032.
May be repeated twice with a maximum of 6 credit hours.

**THEA 3232 - Scenic Art and Painting**

**Credits:** (3)
**Typically Taught Spring Semester:** Full Sem
**Course Fee:** $36.00
**Course Fee Purpose:** The course fee associated with this class pays for maintenance of the department lab and associated technology.

**Description:** An introduction to the role of the scenic artist in the theatrical process, as well as applied training in basic scene painting/scenic artist techniques for theatre. Texture, faux finishes, and detailing lessons are applied in a variety of scenic projects including wallpaper, bricks, rocks, wood grain and molding, marble, and foliage, culminating in a final project designed to showcase your mastery of painting techniques and the compilation of a basic portfolio of scenic artistry.

**Note:** Typically Taught Spring of even years.

**THEA 3233 - Prop Design**

**Credits:** (3)
**Typically Taught Spring Semester:** Full Sem
**Description:**
A studio course in the process and techniques of prop making techniques. Tools, materials, building, and painting techniques will be demonstrated by the instructor and explored and executed by the student. This course not only places emphasis on artist ability but time management, critical thinking, and problem solving as well.

**Pre-requisite(s):** THEA 1223.

**THEA 3243 - Costume History**

**Credits:** (3)
**Typically Taught Fall Semester:** Full Sem
**Course Fee:** $6.00
**Course Fee Purpose:** The course fee associated with this class pays for maintenance of the department lab and associated technology.

**Description:** A study of fashion from ancient Egypt to the 20th century in relation to stage applications and contemporary fashion. Students will gain a basic understanding of major periods in Western clothing history as well as the interrelationship of clothing and culture and a working ability to research clothing of any culture or era.

**THEA 3253 - Wig Design & Construction**

**Credits:** (3)
**Typically Taught Fall Semester:** Full Sem
**Description:** An exploration of the research and construction techniques used to create wigs for the stage.

**Pre-requisite(s):** THEA 1223

**THEA 3303 - History and Literature of Theatre I**

**Credits:** (3)
**Typically Taught Fall Semester:** Full Sem
**Course Fee:** $6.00
**Course Fee Purpose:** The course fee associated with this class pays for maintenance of the department lab and associated technology.

**Description:** Examines the history of theatre and performance globally, from the beginning of recorded time through the English Restoration. The class encompasses important dramatic texts, theoretical lenses, as well as the history and historiography of Theatre. Students are expected to conduct individual historical research.

**THEA 3313 - History and Literature of Theatre II**

**Credits:** (3)
**Typically Taught Spring Semester:** Full Sem
**Course Fee:** $6.00
**Course Fee Purpose:** The course fee associated with this class pays for maintenance of the department lab and associated technology.

**Description:** Examines the history of theatre and performance globally, from the 1700s through Modernism. The class encompasses important dramatic texts, theoretical lenses, as well as the history and historiography of Theatre. Students are expected to conduct individual historical research.

**THEA 3323 - History and Literature of Contemporary Theatre**

**Credits:** (3)
**Course Fee:** $6.00
**Course Fee Purpose:** The course fee associated with this
class pays for maintenance of the department lab and associated technology. **Description:** A survey of theatre history and literature that will study theatre from the 20th century and into the present time. Specific attention will be given to the plays and producing organizations of minorities and other underrepresented groups.

**THEA 3340 - Theatre Management**

Credits: (3)  
**Typically Taught Spring Semester:** *Full Sem even years*  
**Course Fee:** $6.00  
**Course Fee Purpose:** The course fee associated with this class pays for maintenance of the department lab and associated technology.  
**Description:** An overview of theatre management techniques that includes all the operating functions such as marketing, promotion, fundraising, accounting and personnel management. A functional business plan for a Theatre is the culminating experience of this course.

**THEA 3343 - History & Literature of Musical Theatre**

Credits: (3)  
**Typically Taught Spring Semester:** *Full Sem even years*  
**Course Fee:** $6.00  
**Course Fee Purpose:** The course fee associated with this class pays for maintenance of the department lab and associated technology.  
**Description:** A study of musical theatre from the origins of Opera through contemporary musical theatre. Cultural connections are emphasized through examination of book, score and performance.  
**Pre-requisite(s):** admittance to the Musical Theatre program.

**THEA 3350 - Marketing and Communication for the Arts**

Credits: (3)  
**Typically Taught Fall Semester:** *Full Sem odd years*  
**Description:** This class explores the dynamics of marketing and communication across dance, music, and theatre. The emphasis is on practical application of course content to enhance students' future roles in a variety of arts related careers.

**THEA 3440 - Dance for Musical Theatre**

Credits: (1)  
**Typically Taught Spring Semester:** *Full Sem even years*  
**Course Fee:** $2.00  
**Course Fee Purpose:** Fee supports world dance forms master classes and/or dance concert tickets.  
**Description:** Dance skills and techniques taken from the repertoire of modern musical theatre. Special emphasis on characterization and style as demonstrated by the works of the leading choreographers of this genre. May be repeated four times for a maximum of two credit hours, but use toward Major/Minor must be approved by program advisor.

**THEA 3443 - Scene Study for Musical Theatre**

Credits: (3)  
**Typically Taught Fall Semester:** *Full Sem*  
**Course Fee:** $6.00  
**Course Fee Purpose:** The course fee associated with this class pays for maintenance of the department lab and associated technology.  
**Description:** Advanced study of acting methods unique to the discipline of musical theatre. Emphasis will be placed on the interrelationship of characters through the use of duets, group scenes, and production numbers.  
**Pre-requisite(s):** THEA 2443 and Admittance to the Musical Theatre program. May be repeated two times for credit.

**THEA 3500 - Sound Design**

Credits: (3)  
**Typically Taught Spring Semester:** *Full Sem*  
**Description:** This class is an introduction to the art and craft of sound design for live theatre productions. This course covers script analysis and creative storytelling through sound, as well as the technical skills and application of the tools needed to effectively execute the design. Programs learned include Qlab and Vectorworks. Note: Typically Taught Spring of even years.

**THEA 3505 - Playwriting**

Credits: (3)  
**Typically Taught Fall Semester:** *Full Sem*  
**Description:** This course will be a practical study of dramatic structure and the process of playwriting. Key
components like theatricality, action, premise, and dialogue will be studied through application. Major projects will focus on the composition of ten minute plays. This class is writing intensive.

THEA 3525 - ArtsBridge

Credits: (1-6)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: ArtsBridge is a course that provides undergraduate students with an internship and academic credit for designing and implementing a comprehensive, needs-based, integrated arts project with community organizations or area schools. ArtsBridge students will work closely with a WSU faculty mentor, community/school stakeholder, peers, and the ArtsBridge program coordinator throughout the process culminating in the development of an arts integrated project.
Pre-requisite(s): Recommendation by education supervisor in fine arts content area faculty mentor. Content methodology course(s) completed or in progress.
Note: Following faculty recommendation, please contact the ArtsBridge coordinator for an interview.

THEA 3651 - Musical Theatre Repertoire

Credits: (1)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Advanced study of standard musical theatre repertoire, audition techniques and the business of musical theatre.
Pre-requisite(s): THEA 2443.
May be repeated for a total of four semester hours.

THEA 3810 - Experimental Course

Credits: (1-6)
Experimental Course Fee: $6.00
Course Fee Purpose: The course fee associated with this class pays for maintenance of the department lab and associated technology.
Description: Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript. May be repeated for a total maximum of 6 credit hours.

THEA 3991 - Junior Seminar

Credits: (1)
Typically Taught Fall Semester: Full Sem
Course Fee: $2.00
Course Fee Purpose: The course fee associated with this class pays for maintenance of the department lab and associated technology.
Description: A colloquium that draws theatre students from various interests together in a mutual exploration of theatre research, production, and planning for employment opportunities and graduate study.
Pre-requisite(s): Theatre major - junior standing.

THEA 4002C - Special Studies in Theatre: Stage Combat

Credits: (2)
Typically Taught Spring Semester: Full Sem
Course Fee: $4.00
Course Fee Purpose: The course fee associated with this class pays for maintenance of the department lab and associated technology.
Description: Physical training in the art and craft of stage combat. Emphasis is on safe application of technique to choreograph stage fights. All Special Studies in Theatre courses are half-semester.
May be repeated up to two times.

THEA 4002D - Special Studies in Theatre: Auditioning

Credits: (2)
Typically Taught Spring of Odd Years
Course Fee: $4.00
Course Fee Purpose: The course fee associated with this class pays for maintenance of the department lab and associated technology.
Description: A practical exploration of professional audition techniques including cold reading, prepared monologues, improvisation and portfolio preparation.
Pre-requisite(s): THEA 1033 or THEA 1220.
Repeatable two times for credit.
Note: Typically Taught Spring of Odd Years.

THEA 4002H - Special Studies in Theatre: Contemporary Topics

Credits: (2)
Typically Taught Spring Semester: Full Sem
Course Fee: $4.00
Course Fee Purpose: The course fee associated with this class pays for maintenance of the department lab and associated technology.
Description: A diversified exploration of pertinent theatre topics. May be repeated for upper division credit. All Special Studies in Theatre courses are half-semester.
May be repeated up to two times.

THEA 4103 INT - Directing II

Credits: (3)
Typically Taught Spring Semester: Full Sem odd years
THEA 4120 - Collaboration in the Theatre

Credits: (3)

Description: This class will help theatre students improve collaborative skills specific to production teams in the process of theatrical creation. Students will work in model production teams and explore different modes of communication and collaboration.

Pre-requisite(s): THEA 3103 INT - Directing I or THEA 4203 - Costume Design or THEA 3212 - Scenic Design or THEA 3222 - Lighting Design or THEA 3500 - Sound Design and instructor approval.

THEA 4143 - Directing and Choreographing for Musical Theatre

Credits: (3)

Typically Taught Spring Semester: Full Sem even years

Course Fee: $6.00

Course Fee Purpose: The course fee associated with this class pays for maintenance of the department lab and associated technology.

Description: Theory and practical application of directing and choreographing approaches as they pertain to Musical Theatre.

Pre-requisite(s): THEA 3103.

Note: Offered spring semester every even-numbered year.

THEA 4203 - Costume Design

Credits: (3)

Typically Taught Spring Semester: Full Sem

Course Fee: $6.00

Course Fee Purpose: The course fee associated with this class pays for maintenance of the department lab and associated technology.

Description: A practical application of the techniques of visual communication used to analyze characters, research, and create costume renderings for dramatic scripts.

Suggested Requisite(s): THEA 2022 and THEA 3243.

Note: Offered spring semester every even-numbered year.

THEA 4220 - Design Seminar

Credits: (1-3)

Typically Taught Spring Semester: Full Sem

Course Fee: $6.00

Course Fee Purpose: The course fee associated with this class pays for maintenance of the department lab and associated technology.

Description: A flexible emphasis course devoted to the design processes of theatrical production; a forum through which advanced design students may further their interests and abilities in the design process and/or portfolio development and presentation that will change in focus from student to student. THEA 4220 Design Seminar may be used as a capstone design project with faculty approval.

Pre-requisite(s): at least one Theatre Area design course - THEA 3212 or THEA 3222 or THEA 4203, and permission of the instructor.

Note: This class provides an opportunity for in-depth theatrical design work. Since there is only one formal design class in each of the design areas (costume, lighting, and scenery) students can continue their studies in Design Seminar. The course number stays the same from semester to semester but the content; the design projects changes each time. The maximum time a student can repeat this class for credit is eight times.

THEA 4230 - Performance Seminar

Credits: (1-3)

Typically Taught Fall Semester: 2nd Blk

Course Fee: $6.00

Course Fee Purpose: The course fee associated with this class pays for maintenance of the department lab and associated technology.

Description: A flexible emphasis course devoted to the acting and directing process of live theatrical production, a forum through which advanced performance students may further their interests and abilities in the acting/directing process that will change in focus from student to student. THEA 4230 Performance Seminar may be used as a capstone project with faculty approval.

Pre-requisite(s): THEA 1033, THEA 2033, THEA 3103 and permission of the instructor.

May be repeated twice with a maximum of 6 credit hours.

THEA 4250 - Music Direction Seminar

Credits: (1-3)

Typically Taught Spring Semester: Full Sem

Description: A flexible emphasis course devoted to the music direction process of live musical theatre, a forum through which advanced Music Direction students may further their interests and abilities in a variety of topics that will change in focus from semester to semester and student...
to student. Possible topics may include pit conducting, music rehearsal strategies, and digital technology.

THEA 4270 - Dramatic Theory and Analysis

Credits: (3)
Description: A study of dramatic theory from early Greek thinkers through contemporary theorists. The class will be based on reading primary and secondary texts and will class time will be spent on projects, activities, discussion, and lecture. Additional research assignments are required.

THEA 4603 - Creative Drama

Credits: (3)
Course Fee: $6.00
Course Fee Purpose: The course fee associated with this class pays for the maintenance of technology and materials.
Description: Theories and practices incorporating the techniques of creative drama into the elementary school curriculum. Especially recommended to students of elementary education, recreation, and social services.

THEA 4651 - Individual Training in Stage Voice

Credits: (1)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Course Fee: $445.00
Course Fee Purpose: The fee for these courses is used to compensate the instructor for teaching this class and overhead assessed by the university.
Description: Twelve individual lessons on vocal technique for the actor. A list of approved voice instructors is maintained in the department office. Students are responsible for contacting individual instructors to schedule lessons.
May be repeated up to nine times.
Note: The Musical Theatre students are required to complete Individual Training in Stage Voice a minimum of six times to complete their degree; however, it is not uncommon for students to take private lessons each semester they are enrolled. The maximum number of times a student can repeat this class for credit is eight times.

THEA 4801 - College of Arts & Humanities Leadership Lecture Series

Credits: (1)
Typically Taught Spring Semester: Full Sem
Description: This one-credit elective course will give arts and humanities' majors the opportunity to interact with successful guest lecturers whose undergraduate backgrounds are in the arts and humanities. Lecturers will clarify how the talents and skills associated with their degrees have contributed to their pursuit of successful careers and lives.

THEA 4830 - Directed Readings

Credits: (1-3)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Advanced level, independent study under the direction of faculty member.
Pre-requisite(s): Permission of supervising instructor required for credit.
May be repeated 8 times with a maximum of 9 credit hours.

THEA 4851 INT - Design/Tech/Management Practicum

Credits: (1)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Hands on learning through involvement backstage on running crews, through studio work, acting in,
or involvement in "front of house" operations for Weber State Theatre productions.

To become a well-rounded theatre student, students are required to participate in the production of the departmental plays as often as their schedule allows. Since there are so many different learning opportunities in the theatre it is though Practicum that they are each exposed to the whole production process. There are 2 different Practicum course numbers, one for performance and the other for the design, technical, and management aspects of theatre. The course numbers stay the same from semester to semester but the content; the plays produced changes each time. Minimally students are required to enroll in a Practicum course 3 times to graduate, however since students are expected to be involved in the production of each play (2 per semester) then they should be completing 4 Practicums each academic year.

The maximum time a student can repeat this or any combination of THEA 4851 and THEA 4861 for credit is sixteen times.

THEA 4852 INT - Design/Tech Management Practicum

Credits: (1)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Hands-on learning through involvement backstage on running crews, through studio work, acting in, or involvement in "front of house" operations for Weber State Theatre productions.
May be repeated 9 times and receive up to 10 credits.

THEA 4853 INT - Design/Tech/Management Practicum

Credits: (1)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Hands-on learning through involvement backstage on running crews, through studio work, acting in, or involvement in "front of house" operations for Weber State Theatre productions.
May be repeated 12 times and receive up to 12 credits.

THEA 4854 INT - Design/Tech/Management Practicum

Credits: (1)
Typically Taught Fall Semester: Full Sem

Typically Taught Spring Semester: Full Sem
Description: Hands-on learning through involvement backstage on running crews, through studio work, acting in, or involvement in "front of house" operations for Weber State Theatre productions.
May be repeated 12 times and receive up to 12 credits.

THEA 4855 INT - Design/Tech/Management Practicum

Credits: (1)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Hands-on learning through involvement backstage on running crews, through studio work, acting in, or involvement in "front of house" operations for Weber State Theatre productions.
May be repeated 12 times and receive up to 12 credits.

THEA 4856 INT - Design/Tech/Management Practicum

Credits: (1)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Hands-on learning through involvement backstage on running crews, through studio work, acting in, or involvement in "front of house" operations for Weber State Theatre productions.
May be repeated 12 times and receive up to 12 credits.

THEA 4857 INT - Design/Tech/Management Practicum

Credits: (1)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Hands-on learning through involvement backstage on running crews, through studio work, acting in, or involvement in "front of house" operations for Weber State Theatre productions.
May be repeated 12 times and receive up to 12 credits.

THEA 4858 INT - Design/Tech/Management Practicum

Credits: (1)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Hands-on learning through involvement backstage on running crews, through studio work, acting in,
or involvement in "front of house" operations for Weber State Theatre productions. May be repeated 12 times and receive up to 12 credits.

THEA 4859 INT - Design/Tech/Management Practicum

Credits: (1)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Hands-on learning through involvement backstage on running crews, through studio work, acting in, or involvement in "front of house" operations for Weber State Theatre productions. May be repeated 12 times and receive up to 12 credits.

THEA 4860 - Advanced Playwriting

Credits: (3)
Description: This course will be an advanced study of dramatic structure and the process of playwriting, focusing on writing full length plays. Extensive writing is required. Pre-requisite(s): THEA 3505 and instructor approval. May be repeated up to two times for a maximum of six credit hours.

THEA 4861 INT - Performance Practicum

Credits: (1)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Practical applied performance work to be registered for by students who are 1) cast in, 2) have a significant assistant directing responsibility, or 3) are the production director for a WSU production. To become a well-rounded theatre student, students are required to participate in the production of the departmental plays as often as their schedule allows. Since there are so many different learning opportunities in the theatre it is though Practicum that they are each exposed to the whole production process. There are 2 different Practicum course numbers, one for performance and the other for the design, technical, and management aspects of theatre. The course numbers stay the same from semester to semester but the content; the plays produced changes each time. Minimally students are required to enroll in a Practicum course 3 times to graduate, however since students are expected to be involved in the production of each play (2 per semester) then they should be completing 4 Practicums each academic year. Pre-requisite(s): Audition and permission of the instructor/director. The maximum time a student can repeat this or any combination of THEA 4851 and THEA 4861 for credit is sixteen times.

THEA 4862 INT - Performance Practicum

Credits: (1)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Provides supervised experience in theatre production and performance. May be repeated. Practicum is an experiential learning course supervised by theatre faculty to provide the student with a practical application of theatrical theory. The student will develop skills and abilities for the theatre through supervised experience in a performance of an acting role in a production. Prerequisite: Audition and permission of the instructor/director. May be repeated up to 12 times for a maximum of 12 credit hours.

THEA 4862 INT - Performance Practicum

Credits: (1)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Provides supervised experience in theatre production and performance. May be repeated. Practicum is an experiential learning course supervised by theatre faculty to provide the student with a practical application of theatrical theory. The student will develop skills and abilities for the theatre through supervised experience in a performance of an acting role in a production. Prerequisite: Audition and permission of the instructor/director. The maximum time a student can repeat this or any combination of practicum for credit is twelve times. May be repeated up to 12 times with a maximum of 12 credit hours.

THEA 4863 INT - Performance Practicum

Credits: (1)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Provides supervised experience in theatre production and performance. May be repeated. Practicum is an experiential learning course supervised by theatre faculty to provide the student with a practical application of theatrical theory. The student will develop skills and abilities for the theatre through supervised experience in a
performance of an acting role in a production. Prerequisite: Audition and permission of the instructor/director. The maximum time a student can repeat this or any combination of practicum for credit is twelve times.

THEA 4864 INT - Performance Practicum

Credits: (1)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Provides supervised experience in theatre production and performance. May be repeated. Practicum is an experiential learning course supervised by theatre faculty to provide the student with a practical application of theatrical theory. The student will develop skills and abilities for the theatre through supervised experience in a performance of an acting role in a production. Prerequisite: Audition and permission of the instructor/director. The maximum time a student can repeat this or any combination of practicum for credit is twelve times.

THEA 4865 INT - Performance Practicum

Credits: (1)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Provides supervised experience in theatre production and performance. May be repeated. Practicum is an experiential learning course supervised by theatre faculty to provide the student with a practical application of theatrical theory. The student will develop skills and abilities for the theatre through supervised experience in a performance of an acting role in a production. Prerequisite: Audition and permission of the instructor/director. The maximum time a student can repeat this or any combination of practicum for credit is twelve times.

THEA 4869 INT - Performance Practicum

Credits: (1)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Provides supervised experience in theatre production and performance. May be repeated. Practicum is an experiential learning course supervised by theatre faculty to provide the student with a practical application of theatrical theory. The student will develop skills and abilities for the theatre through supervised experience in a performance of an acting role in a production. Prerequisite: Audition and permission of the instructor/director. The maximum time a student can repeat this or any combination of practicum for credit is twelve times.
THEA 4890 INT - Cooperative Work Experience or Internship

Credits: (1-3)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Actual participation with outside performing arts organizations in the day-to-day activity of a performing arts organization will introduce the student to the professional application of classroom skill and knowledge. Students will arrange their own opportunities by interview or audition. A journal of their experience and a letter from a supervisor are required for credit. Possibilities include but are not limited to: Repertory Dance Theatre, Ballet West or Utah Symphony (management or tech only), Utah Shakespeare Festival, Salt Lake Acting Company, and Pioneer Theatre Company.
Pre-requisite(s): Permission of supervising instructor required for credit.
May be repeated twice with a maximum of 3 credit hours.

THEA 4900 INT - Senior Project

Credits: (1)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: The Senior Project is an opportunity for graduating students to generate and realize a project in an area of primary interest. Typically, the project will reflect the student's emphasis in theatre arts (e.g., Acting, Directing, Design, etc.) and will demonstrate a culmination of previous study and may be a collaborative project.
Pre-requisite(s): Faculty approval of the proposal and a faculty advisor and the student must have completed a minimum of 90 credit hours.

THEA 4920 INT - Short Courses, Workshops, Institutes, and Special Programs

Credits: (1-6)
Workshop
Description: Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript.
May be repeated for a total maximum of 6 credit hours.

THEA 4950 INT - Theatre Festival Participation

Credits: (1)
Description: Attend the Kennedy Center/American College Theatre Festival Region VIII annual meeting or other national theatre conference. Students will have the opportunity to attend theatre performances brought to the festival from throughout the region, display designs, audition, act in new 10-minute plays, and participate in workshops. Students may be responsible for their own registration fees and transportation, lodging and meals.
Pre-requisite(s): Audition and Permission of Instructor.
Note: May be repeated up to 4 times for credit.

UNIV 1106 GLB - American College Experience

Credits: (3)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: To aid in the integration of international students into Weber State campus life, and to foster a better understanding of the relationships between campus and community; comparing the experience with home country and institution. The class combines courses and programs designed to help students transition well to the rigorous academic environment of U.S. higher education.

UNIV 1110 SS, CEL - FYS: Introduction to Social Issues in Higher Education

Credits: (3)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: The goal of the course is for first-time students in the Wildcat Scholars program to understand and embrace what it means to be a college student who is cultivating a future. Students will be exposed to and apply ways of thinking, acting, and interacting that social science and educational research has shown to promote success in college and in life. The course requires traditional academic activities coupled with other activities, such as tutoring, designed to help students adopt the beliefs, attitudes, skills, and knowledge necessary to be a person who is cultivating a future through college.
Pre-requisite(s): Acceptance into the Wildcat Scholars program.

UNIV 4920 INT - Short Courses, Workshops, Institutes, and Special Programs
WEB 1010 - Exploring Web and User Experience

Credits: (3)
Typically Taught Fall Semester: Full Sem
Description: Capabilities and limitations of multimedia technology, evaluation of multimedia products, and creation of a multimedia portfolio.

WEB 1030 - Foundations of Computing

Credits: (4)
Typically Taught Summer Semester: Full Sem, Full Sem Online
Typically Taught Fall Semester: Full Sem, Full Sem Online
Typically Taught Spring Semester: Full Sem, Full Sem Online
Description: This course follows the core body of knowledge specified by the ACM which provides students with a broad overview of topics they might encounter within the major areas of computing. The course is taught at an introductory level and includes topics such as: history of computers, computer architecture, operating systems, web design and development, programming, database, software engineering, networking, and more. Cross-listed with CS 1030 and NET 1030.

WEB 1040 - Speedbuilding Keyboarding

Credits: (1)
Description: Intensive computerized approach for improving speed and accuracy. Keyboarding 25 wpm recommended. The grade for this course is credit/no credit.
Note: This course is not currently offered.

WEB 1400 - Web Design and Usability

Credits: (3)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Course Fee: $25.00
Course Fee Purpose: Course fees are designed to cover the costs of lab equipment maintenance and replacement including desktop and server computer systems and software; consumable materials and supplies; and support for lab aides, student tutors, and online instructional resources.
Description: Understand the technicalities of the World Wide Web and the Internet. Plan, design, and implement a successful web site using current web technologies. Topics covered include audience analysis, information architecture, wireframing, prototyping, responsive design, usability and accessibility, testing, and analytics.

WEB 1430 - Client Side Programming

Credits: (3)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Course Fee: $25.00
Course Fee Purpose: Course fees are designed to cover the costs of lab equipment maintenance and replacement including desktop and server computer systems and software; consumable materials and supplies; and support for lab aides, student tutors, and online instructional resources.
Description: This class introduces the JavaScript language, with a focus on advanced language features and client-side web programming. Topics covered include basic syntax, object-oriented programming, higher-order functions, the DOM, and AJAX. The class will also introduce jQuery.
Pre-requisite(s): WEB 1400 and CS 1400.

WEB 1501 - Document Creation Competency Exam

Credits: (.5)
Typically Taught Summer Semester: Full Sem, Online
Typically Taught Fall Semester: Full Sem, Online
Typically Taught Spring Semester: Full Sem, Online
Course Fee: $10.00
Course Fee Purpose: Course fees are designed to cover the costs of lab equipment maintenance and replacement including desktop and server computer systems and software; consumable materials and supplies; and support for lab aides, student tutors, and online instructional resources.
Description: The computer competency exam for this course is a hands-on examination verifying a student's skills at document creation. Practice materials are available on the web for studying the competencies covered on the test. The one-hour exam must be completed during the semester registered. Two repeats of the exam may be taken during the semester with an additional fee charged. The grade for the course is credit/no credit.
WEB 1502 - Content, Internet Identity, and Device Management Competency Exam

Credits: (.5)
Typically Taught Summer Semester: Full Sem, Online
Typically Taught Fall Semester: Full Sem, Online
Typically Taught Spring Semester: Full Sem, Online
Course Fee: $10.00
Course Fee Purpose: Course fees are designed to cover the costs of lab equipment maintenance and replacement including desktop and server computer systems and software; consumable materials and supplies; and support for lab aides, student tutors, and online instructional resources.
Description: The computer competency exam for this course is a hands-on examination verifying a student's skills in content, internet identity, and device management. Practice materials are available on the web for studying the competencies covered on the test. The one-hour exam must be completed during the semester registered. Two repeats of the exam may be taken during the semester with an additional fee charged. The grade for this course is credit/no credit.
Note: Call (801-626-7384) or email CIL@weber.edu for more information.

WEB 1503 - Data Manipulation, Visualization, and Presentation Competency Exam

Credits: (.5)
Typically Taught Summer Semester: Full Sem, Online
Typically Taught Fall Semester: Full Sem, Online
Typically Taught Spring Semester: Full Sem, Online
Course Fee: $10.00
Course Fee Purpose: Course fees are designed to cover the costs of lab equipment maintenance and replacement including desktop and server computer systems and software; consumable materials and supplies; and support for lab aides, student tutors, and online instructional resources.
Description: The computer competency exam for this course is a hands-on examination verifying a student's skills at data manipulation, visualization, and presentation. Practice materials are available on the web for studying the competencies covered on the test. The one-hour exam must be completed during the semester registered. Two repeats of the exam may be taken during the semester with an additional fee charged. The grade for the course is credit/no credit.
Note: Call (801-626-7384) or email CIL@weber.edu for more information.

WEB 1700 - Introduction to Computer Applications

Credits: (3)
Typically Taught Summer Semester: Full Sem, Online
Typically Taught Fall Semester: Full Sem, Online
Typically Taught Spring Semester: Full Sem, Online
Course Fee: $10.00
Course Fee Purpose: Course fees are designed to cover the costs of lab equipment maintenance and replacement including desktop and server computer systems and software; consumable materials and supplies; and support for lab aides, student tutors, and online instructional resources.
Description: Students will use current software to produce correctly formatted research papers with an accepted academic reference format, to produce effective employment documents such as a resume and a cover letter, and to use multiple collaboration mediums to effectively share, communicate, and collaborate with their peers. Students will use current software/technology to manage content on local devices and in the cloud, to manage their web identity and presence according to e-safety, security, and privacy best practices and standards, and to manipulate multiple computing platforms to troubleshoot problems. Students will protect local devices from security threats including viruses, malware, and adware using current best practices and technologies. Students will also manipulate and analyze data using various software applications and basic programming, organize data using graphical methods such as charts and infographics, and create an effective, well-designed presentation. Keyboarding 25 wpm recommended.

WEB 1701 - Document Creation

Credits: (1)
Typically Taught Summer Semester: 1st Blk, Online
Typically Taught Fall Semester: 1st Blk, Online
Typically Taught Spring Semester: 1st Blk, Online
Course Fee: $10.00
Course Fee Purpose: Course fees are designed to cover the costs of lab equipment maintenance and replacement including desktop and server computer systems and software; consumable materials and supplies; and support for lab aides, student tutors, and online instructional resources.
Description: Students will use current software to produce correctly formatted research papers with an accepted academic reference format such as MLA or APA. Students will use current software/technology to produce effective employment documents such as a resume and a cover letter. Students will also be able to use multiple collaboration mediums to effectively share, communicate, and collaborate with their peers. Keyboarding 25 wpm recommended.

WEB 1702 - Content, Internet Identity, and Device Management

Credits: (1)
Typically Taught Summer Semester: Full Sem, Online
Typically Taught Fall Semester: Full Sem, Online
Typically Taught Spring Semester: Full Sem, Online
Course Fee: $10.00
Course Fee Purpose: Course fees are designed to cover the costs of lab equipment maintenance and replacement including desktop and server computer systems and software; consumable materials and supplies; and support for lab aides, student tutors, and online instructional resources.
Description: Students will use current software/technology to manage content on local devices and in the cloud. Students will manage their web identity and presence according to e-safety, security, and privacy best practices and standards. Students will manipulate multiple computing platforms and troubleshoot problems when they arise. Students will protect local devices from security threats including viruses, malware, and adware using current best practices and technologies. Keyboarding 25 wpm recommended.

WEB 1703 - Data Manipulation, Visualization, and Presentation

Credits: (1)
Typically Taught Summer Semester: Full Sem, Online
Typically Taught Fall Semester: Full Sem, Online
Typically Taught Spring Semester: Full Sem, Online
Course Fee: $10.00
Course Fee Purpose: Course fees are designed to cover the costs of lab equipment maintenance and replacement including desktop and server computer systems and software; consumable materials and supplies; and support for lab aides, student tutors, and online instructional resources.
Description: Students will manipulate and analyze data using various software applications and basic programming. Students will organize data using various graphical methods such as charts and infographics to appropriately convey information. Students will create an effective, well-designed presentation using current technologies. Keyboarding 25 wpm recommended.

WEB 2080 - Database Applications

Credits: (1)
Typically Taught Fall Semester: Full Sem Online
Description: Use of database software to design and create a database, including objects such as tables, queries, reports, and forms. Use of advanced management features such as macros, switchboards, referential integrity, and compound criteria.
Pre-requisite(s): WEB 1700 or WEB 1702/WEB 1502.

WEB 2200 - Image Editing

Credits: (3)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Course Fee: $25.00
Course Fee Purpose: Course fees are designed to cover the costs of lab equipment maintenance and replacement including desktop and server computer systems and software; consumable materials and supplies; and support for lab aides, student tutors, and online instructional resources.
Description: Introduction to an image creation and editing program such as Adobe Photoshop. Students learn the basics of the program (workspace, selections, and layers). The steps in editing images are completed (cropping, color and tonal adjustments, retouch, noise reduction, sharpening, and exporting). Students also work creatively with layer styles, filters, layer masks, blend modes, and paint brushes. Several of the assignments will involve editing images and creating composites for the web (i.e. hero image, web banner ad, Facebook cover).

WEB 2210 - Computer Illustrations

Credits: (3)
Typically Taught Spring Semester: Full Sem
Course Fee: $25.00
Course Fee Purpose: Course fees are designed to cover the costs of lab equipment maintenance and replacement including desktop and server computer systems and software; consumable materials and supplies; and support for lab aides, student tutors, and online instructional resources.
Description: In this course you will learn the fundamentals of a vector drawing program such as Adobe Illustrator.
Students become skilled using the Pen Tool and other drawing tools to create vector illustrations. Various techniques are learned for applying color, attributes, styles, and effects to illustrations. Students also create, edit, and format type to add to their illustrations. Projects will focus on web illustrations for banners, landing pages, user interface elements, social media, infographics, and other web content.

WEB 2220 - Digital Publishing

Credits: (3)
Typically Taught Spring Semester: Full Sem
Course Fee: $25.00
Course Fee Purpose: Course fees are designed to cover the costs of lab equipment maintenance and replacement including desktop and server computer systems and software; consumable materials and supplies; and support for lab aides, student tutors, and online instructional resources.
Description: Use of professional page design and layout software such as Adobe InDesign to design, create, and edit a variety of publications for print and web. Students create publications for print such as a marketing card and business flyer/brochure, as well as interactive online web documents that contain audio, video, slideshows, and HTML content.
Pre-requisite(s): WEB 1400 and WEB 2200 or permission of instructor.

WEB 2300 - Video Editing

Credits: (3)
Typically Taught Fall Semester: Full Sem
Course Fee: $25.00
Course Fee Purpose: Course fees are designed to cover the costs of lab equipment maintenance and replacement including desktop and server computer systems and software; consumable materials and supplies; and support for lab aides, student tutors, and online instructional resources.
Description: Using video editing software such as Adobe Premiere, students will combine many separate video recordings to create short digital movies. The following steps of the video production process will be completed: creating storyboards; shooting the video and recording the audio; capturing resources to the computer; importing resources into a video project; adding titles, graphics, transitions, and effects; and exporting the video to formats for the computer, television, DVDs, and the Web.

WEB 2350 - Client Side Web Development

Credits: (4)
Typically Taught Summer Semester: 2nd Blk Online
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: This course provides an introduction to client-side programming and Web page development. Subjects covered include responsive Web page design and dynamic Web page development. The course will explore various technologies such as HTML5, CSS3, and Javascript with an introduction to Jquery and Jquery Mobile. Cross-listed with CS 2350.
Pre-requisite(s): CS 1400 and WEB 1400.

WEB 2410 - Web Animation I

Credits: (3)
Typically Taught Fall Semester: Full Sem
Course Fee: $25.00
Course Fee Purpose: Course fees are designed to cover the costs of lab equipment maintenance and replacement including desktop and server computer systems and software; consumable materials and supplies; and support for lab aides, student tutors, and online instructional resources.
Description: This course introduces various web technologies that aid the creation of web animations for distribution on many platforms. Students discuss technical issues affecting animation such as speed and compression. Students will explore several current tools to create animations for the web.

WEB 2500 - User Experience Design

Credits: (3)
Typically Taught Fall Semester: Full Sem
Course Fee: $25.00
Course Fee Purpose: Course fees are designed to cover the costs of lab equipment maintenance and replacement including desktop and server computer systems and software; consumable materials and supplies; and support for lab aides, student tutors, and online instructional resources.
Description: In this course students will be introduced to the four-step user experience design process which includes user research, design, testing, and implementation. The following topics will be covered: history of user experience, user behavior, cognitive processing, personas, web analytics, content strategy, information architecture, writing for the web, user-centered design, usability testing, and accessibility. Using current technologies and tools, students will create a basic web or mobile application.
Pre-requisite(s): WEB 1400.
WEB 2620 - Advanced CSS

Credits: (3)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Course Fee: $25.00
Course Fee Purpose: Course fees are designed to cover the costs of lab equipment maintenance and replacement including desktop and server computer systems and software; consumable materials and supplies; and support for lab aides, student tutors, and online instructional resources.
Description: A deep knowledge of CSS properties and specifications is essential in client-side web development and design. This course will expand student's knowledge of CSS by covering the following CSS properties: media queries, animation & transitions, transforms, grid layouts, flexbox, web fonts, shapes, variables, exclusions, and regions. Browser support, preprocessors, frameworks, and minification will also be discussed. Using these advanced CSS techniques student will design and implement a consistent user experience and the page layout of a web application.
Pre-requisite(s): WEB 1400 or CS 2350.

WEB 2700 - Web Accessibility 1

Credits: (4)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: In this course students will be introduced to the disability rights, legislation that governs the rules for accessibility in the United States, and WCAG 2.1 standards. The following topics will be covered: history of disability rights, key leaders in the disability rights movement, groups advocating for disability rights, legislation that governs the rules around accessibility, WCAG 2.1 standards. Using current accommodation software, students will test websites for accessibility and make recommendations to change the code to meet WCAG 2.1 guidelines.
Pre-requisite(s): WEB 2620

WEB 2800 - Independent Projects and Research

Credits: (1-4)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Course Fee: $7.50
Course Fee Purpose: Course fees are designed to cover

WEB 2810 - Experimental Course

Credits: (1-6)
Experimental
Description: Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript.
May be repeated for a total maximum of 6 credit hours.

WEB 2860 - Work Study

Credits: (1-4)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Students can earn variable credit (depending on the number of hours performed) by working in the web and user experience career field or by serving as a teaching assistant for a WEB/UX faculty member. Either way, the student will fulfill objectives that have been pre-approved by a business/organization supervisor or faculty advisor. This lower division elective is primarily intended for WEB/UX majors currently working in entry-level (client side) positions within the career field. Junior and Senior level students, performing more complex server-side web development, should consider taking the Upper Division WEB 4860 course as an alternative.
Pre-requisite(s): Permission of instructor and WEB/UX program coordinator.
May be repeated up to four times with a maximum of four credit hours.

WEB 2890 - Client-Side Portfolio

Credits: (3)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Course Fee: $25.00
Course Fee Purpose: Course fees are designed to cover the costs of lab equipment maintenance and replacement including desktop and server computer systems and
software; consumable materials and supplies; and support for lab aides, student tutors, and online instructional resources.

Description: In this project-based course students will design a web portfolio that features the work they have completed during the Web and User Experience AAS degree. Students will also create several portfolio pieces related to client-side web development.

Pre-requisite(s): WEB 2620

WEB 2920 - Short Courses, Workshops, Institutes, and Special Programs

Credits: (1-6)
Workshop
Description: Consult the class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript. May be repeated for a total maximum of 6 credit hours. Note: This course is not currently offered.

WEB 3000 - Advanced Word Processing

Credits: (1)
Typically Taught Spring Semester: Full Sem Online
Description: Use of word processing software including sorts, tables, columns, reports, merges, graphics, and macros.
Pre-requisite(s): WEB 1700 or WEB 1701/WEB 1501.

WEB 3070 - Advanced Spreadsheet Applications

Credits: (1)
Typically Taught Fall Semester: Full Sem, Online
Typically Taught Spring Semester: Full Sem, Online
Description: Use of spreadsheet software including macros, sorts, advanced formulas, graphs, and creative presentations.
Pre-requisite(s): WEB 1700 or WEB 1703/WEB 1503.

WEB 3090 - Digital Presentations

Credits: (2)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem Online
Course Fee: $15.00
Course Fee Purpose: Course fees are designed to cover the costs of lab equipment maintenance and replacement including desktop and server computer systems and software; consumable materials and supplies; and support for lab aides, student tutors, and online instructional resources.
Description: Use of electronic slide presentation software to create slides consisting of short paragraphs, bulleted lists, graphic images, movie clips, audio clips, data charts, diagrams, and imported data from other software. Emphasis will also be placed on professional quality presentation design and animation of slide elements.
Pre-requisite(s): WEB 1700 or WEB 1701/WEB 1501 and WEB 1702/WEB 1502 and WEB 1703/WEB 1503.

WEB 3110 - Training the Trainer

Credits: (3)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Course Fee: $20.00
Course Fee Purpose: Course fees are designed to cover the costs of lab equipment maintenance and replacement including desktop and server computer systems and software; consumable materials and supplies; and support for lab aides, student tutors, and online instructional resources.
Description: Real-world strategies and techniques to provide better employee training, including development of materials and methods to enhance the learning process.
Pre-requisite(s): ENGL 2010 and WEB 1700 or WEB 1701, WEB 1702, and WEB 1703, or WEB 1501, WEB 1502, and WEB 1503.

WEB 3130 - Web Accessibility 2

Credits: (3)
Typically Taught Spring Semester: Full Sem
Description: In this course, students will learn to work with disabled users as co-participants in the design and development process. Using a website they built in a prior course, they will run testing with disabled users and adapt the site to meet the needs of users. These sites will go beyond basic WCAG 2.1 compliance, as they will be built with active participation from the disabled community.
Pre-requisite(s): WEB 2700.

WEB 3200 - Dynamic Languages for Web Development

Credits: (3)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Course Fee: $25.00
Course Fee Purpose: Course fees are designed to cover the costs of lab equipment maintenance and replacement...
including desktop and server computer systems and software; consumable materials and supplies; and support for lab aides, student tutors, and online instructional resources.

**Description:** General-purpose dynamic languages like Python and Ruby have become increasingly popular and well suited for the creation of full stack web applications. This course will introduce students to the syntax and programmatic idioms of both Ruby and Python. The following topics will be covered in both languages: complex data types, loops, conditionals, command line applications, and the object-oriented programming paradigm. The commonly used web frameworks of each language will be explored and used to create and deploy a full stack web application to a cloud provider.

**Pre-requisite(s):** CS 1400 and WEB 3350.

**Pre-requisite/Co-requisite:** WEB 2890.

### WEB 3300 - Motion Graphics

**Credits:** (3)

**Typically Taught Spring Semester:** Full Sem

**Course Fee:** $25.00

**Course Fee Purpose:** Course fees are designed to cover the costs of lab equipment maintenance and replacement including desktop and server computer systems and software; consumable materials and supplies; and support for lab aides, student tutors, and online instructional resources.

**Description:** In this course you will use Adobe After Effects to create motion graphics and visual effects for film and video. You will learn how to create sophisticated motion graphics using animated text and objects, compositing videos and images, and adding visual effects to video. You will learn how to set keyframes on a timeline and work with transform properties, motion paths, rotoscoping masks and effects, developing a solid foundation in this increasingly popular and versatile software.

**Pre-requisite(s):** WEB 2200 and WEB 2300 or approval of instructor.

### WEB 3350 - Client Side Frameworks

**Credits:** (4)

**Typically Taught Fall Semester:** Full Sem

**Typically Taught Spring Semester:** Full Sem

**Course Fee:** $25.00

**Course Fee Purpose:** Course fees are designed to cover the costs of lab equipment maintenance and replacement including desktop and server computer systems and software; consumable materials and supplies; and support for lab aides, student tutors, and online instructional resources.

**Description:** This course covers client-side JavaScript Frameworks and building Single Page Applications (SPA). It starts with a review of the JavaScript programming language (with emphasis on the Document Object Model (DOM) and covers various debugging techniques using the browser developer tools. An overview of Asynchronous JavaScript (AJAX) is introduced before diving deeper into a popular client-side JavaScript frameworks - like Angular, React or VueJS. Regardless of the primary framework chosen, we will explore and compare the other frameworks as time permits.

**Pre-requisite(s):** WEB 1430 or CS 2350.

### WEB 3400 - LAMP Stack Web Development

**Credits:** (3)

**Typically Taught Fall Semester:** Full Sem

**Typically Taught Spring Semester:** Full Sem

**Course Fee:** $25.00

**Course Fee Purpose:** Course fees are designed to cover the costs of lab equipment maintenance and replacement including desktop and server computer systems and software; consumable materials and supplies; and support for lab aides, student tutors, and online instructional resources.

**Description:** This course explores the Linux-Apache-MySQL-PHP, or LAMP Web development framework to build applications that solve common business problems. The course begins with an exploration of the LAMP architecture, then covers fundamentals of the PHP programming language before introducing a PHP framework like Laravel. Additional coverage focuses on database concepts and how to interact with a MySQL database.

**Pre-requisite(s):** WEB 3200 or NET 2210 or NET 3200.

### WEB 3410 - Web Animation II

**Credits:** (3)

**Typically Taught Spring Semester:** Full Sem

**Course Fee:** $25.00

**Course Fee Purpose:** Course fees are designed to cover the costs of lab equipment maintenance and replacement including desktop and server computer systems and software; consumable materials and supplies; and support for lab aides, student tutors, and online instructional resources.

**Description:** Students will explore native web technologies that are useful for animation including JavaScript, SVG, the HTML canvas element and CSS. Using these native web technologies, students will design and produce advanced
multimedia projects applicable for business and industry. These projects will be produced by combining web animation, graphics, video, and text into interactive web and mobile multimedia presentations.

**Pre-requisite(s):** WEB 2410.

**WEB 3430 - Full Stack JavaScript Development**

**Credits:** (3)

**Typically Taught Fall Semester:** Full Sem  
**Typically Taught Spring Semester:** Full Sem  

**Course Fee:** $25.00  

**Course Fee Purpose:** Course fees are designed to cover the costs of lab equipment maintenance and replacement including desktop and server computer systems and software; consumable materials and supplies; and support for lab aides, student tutors, and online instructional resources.

**Description:** Modern web development increasingly involves using end-to-end JavaScript-based technologies such as MongoDB, Express.js, Angular, React, Vue.js, Node.js, etc. This course introduces development techniques that capitalize on the strengths of every layer in this JavaScript-based full-stack.

**Pre-requisite(s):** WEB 2500.

**WEB 3500 - User Interface Prototyping & Design**

**Credits:** (3)

**Typically Taught Spring Semester:** Full Sem  

**Course Fee:** $25.00  

**Course Fee Purpose:** Course fees are designed to cover the costs of lab equipment maintenance and replacement including desktop and server computer systems and software; consumable materials and supplies; and support for lab aides, student tutors, and online instructional resources.

**Description:** Students will learn the elements of user interface design as it applies to front-end web and mobile app development. Students will identify best practices in user interface design. Using those best practices they will rapidly prototype an effective user interface.

**Pre-requisite(s):** WEB 2500 or CS 2335, WEB 1400 or CS 1400, or permission from instructor.

**WEB 3530 - Information Architecture**

**Credits:** (3)

**Typically Taught Fall Semester:** Full Sem  

**Course Fee:** $25.00

**Course Fee Purpose:** Course fees are designed to cover the costs of lab equipment maintenance and replacement including desktop and server computer systems and software; consumable materials and supplies; and support for lab aides, student tutors, and online instructional resources.

**Description:** In this course students will learn the fundamentals of information architecture. They will learn how to create a functional site structure, navigation, taxonomy, metadata, and content strategies for websites. Students will conduct user research to gather the appropriate requirements through competitive analysis, site and content analysis, accessibility analysis, and user testing methods.

**Pre-requisite(s):** WEB 2500.

**WEB 3600 - User Research Methods**

**Credits:** (4)

**Typically Taught Spring Semester:** Full Sem  

**Course Fee:** $25.00  

**Description:** In this course students will learn the fundamentals of user research. Students will learn the appropriate methods of user research to understand user behaviors, needs, experience, and motivations. Students will conduct qualitative and quantitative research that they will analyze for user insights. Statistical analysis will be applied to quantitative findings to support data-driven decisions. Students will create a research presentation that outlines their key findings, including their big wins and pain points with solutions for designing a better experience for users.

**Pre-requisite(s):** WEB 2500.

**WEB 3620 - Server-Side Web Architecture**

**Credits:** (4)

**Typically Taught Fall Semester:** Full Sem  

**Description:** An introduction to server-side Web development using the most current Web server technologies. General Web development principles such as usability, reliability, maintainability and scalability will be applied to current Web development environments such as PHP, Python, Ruby and Java. Students will gain real-world experience in creating Websites for multiple Web platforms. Cross listed with CS 3620.

**Pre-requisite(s):** WEB 2350 and CS 2550.

**WEB 3650 - Human-Computer Interaction**
Credits: (4)
Typically Taught Fall Semester: Full Sem, Full Sem
Online
Description: This course introduces the skills and concepts of Human-Computer Interaction (HCI) that enable students to design systems that effectively meet human needs. A concrete illustration of the practice of HCI, this course covers usability, user experience, and modern diverse interfaces. This course includes both theoretical and practical best practices. Cross-listed with CS 3650.
Pre-requisite(s): CS 2420 and CS 2450, or WEB 3500.

WEB 3700 - Web Development with .NET

Credits: (4)
Typically Taught Spring Semester: Full Sem
Course Fee: $25.00
Course Fee Purpose: Course fees are designed to cover the costs of lab equipment maintenance and replacement including desktop and server computer systems and software; consumable materials and supplies; and support for lab aides, student tutors, and online instructional resources.
Description: Microsoft's ASP.NET Core is a cross-platform, high-performance web framework for building full stack web applications. This course will introduce students to the syntax and programmatic idioms of ASP.NET/C#. The following topics will be covered: REST, Razor, Model Binding and Validation, Entity Framework and the MVC design pattern. Client-side development libraries will also be discussed and integrated, so that student can build and deploy a full stack application.
Pre-requisite(s): WEB 3200.

WEB 4350 - Web Development Capstone

Credits: (4)
Typically Taught Spring Semester: Full Sem
Course Fee: $25.00
Course Fee Purpose: Course fees are designed to cover the costs of lab equipment maintenance and replacement including desktop and server computer systems and software; consumable materials and supplies; and support for lab aides, student tutors, and online instructional resources.
Description: Senior level group project capstone course covering full stack client/server web development. The project will be implemented using an advanced web framework (such as Laravel, NPM, Django, Ruby on Rails, or others). Includes implementation and concepts of an MVC web architecture, Web UI design and creation, data modeling and retrieval, input validation, security, and unit testing.
Pre-requisite(s): (CS 3260, WEB 3400, and WEB 3430) or (WEB 3130, WEB 3500, and WEB 3600)

WEB 4800 - Independent Research

Credits: (1-4)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Course Fee: $10.00
Course Fee Purpose: Course fees are designed to cover the costs of lab equipment maintenance and replacement including desktop and server computer systems and software; consumable materials and supplies; and support for lab aides, student tutors, and online instructional resources.
Description: Directed research and study on an individual basis.
Pre-requisite(s): Permission of instructor.
May be repeated up to 6 credit hours.

WEB 4860 INT - Internship

Credits: (3)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Course Fee: $10.00
Course Fee Purpose: Course fees are designed to cover the costs of lab equipment maintenance and replacement including desktop and server computer systems and software; consumable materials and supplies; and support for lab aides, student tutors, and online instructional resources.
Description: Students work in the web and user experience field. The student fulfills objectives that have been approved by a business/organization supervisor and a faculty advisor. Must have Senior standing or approval of instructor.
Pre-requisite(s): Permission of instructor.

WEB 4890 - Server-Side Portfolio

Credits: (3)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Course Fee: $25.00
Course Fee Purpose: Course fees are designed to cover the costs of lab equipment maintenance and replacement including desktop and server computer systems and software; consumable materials and supplies; and support for lab aides, student tutors, and online instructional resources.
WEB 4920 - Short Courses, Workshops, Institutes, and Special Programs

Credits: (1-6)
Workshop
Description: Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript. May be repeated for a total maximum of 6 credit hours.
Note: This course is not currently offered.

WGS 1500 SS/EDI - Introduction to Women, Gender, and Queer Studies

Credits: (3)
Typically Taught Summer Semester: Full Sem, 1st Block, 2nd Block
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: An introduction to the discipline of Women Gender and Queer studies using multicultural sources based on current feminist and queer scholarship. In this course, we will examine the diversity experiences of women and LGBTQ people, perspectives, critiques, and theories across the categories of race, ethnicity, class, and gender.

WGS 2500 SS/EDI/GLB - Human Rights in the World

Credits: (3)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Human rights (HR) are a powerful idea in the modern world, but also the focus of controversy. This course will provide students with a broad foundation in human rights including the ability to analyze HR in domestic and int’l law, examine prevention and prosecution techniques, and debate current issues at home and abroad. Emphasis will be placed on women and gender studies (including LGBT issues), vulnerable populations such as refugees, and atrocity crimes.

WGS 2810 - Experimental Course

Credits: (1-6)
Experimental
Description: Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript. May be repeated for a total maximum of 6 credit hours.

WGS 2900 - Topics in Women's Studies

Credits: (1-3)
Variable Title
Description: Varied topics as described in the semester schedule. Topics will be drawn from issues related to women’s studies. May be repeated 3 times up to 9 credits with different course content.

WGS 3050 - Introduction to Feminist Theories 1700 -- Present

Credits: (3)
Typically Taught Spring Semester: Full Sem
Description: An introduction to the study of feminist theories from the 18th Century to the present. Students will study historical accounts of feminism by looking at primary sources written by influential feminists, as well as theoretical treaties on different kinds of feminism, from liberal feminism, to radical feminism, socialist feminism, black feminism, multicultural or global feminism, and so on.
The class will be taught using collaborative learning and will rely on class discussion and interaction, rather than traditional lecture format.

WGS 3090 - Gender and Communication

Credits: (3)
Description: This course is designed to help students understand the influence that communication has upon the shaping of gender and the influence that gender has in shaping communication interactions. Students become aware of, sensitive to, and more experienced in the issues, implications and skills necessary to successfully and meaningfully communicate with males and females, and about males and females, in a wide range of communication contexts.
Pre-requisite(s): Junior or Senior standing required or instructor permission.
Cross listed with COMM 3090.
WGS 4050 - Research Methodologies

Credits: (2)
Description: Designed to introduce students to a variety of approaches to research in women's studies. Students will consider some of the assumptions which underlie research methodologies which may limit our knowledge about women as research subjects and as researchers themselves.
Pre-requisite(s): WGS 3050 (or equivalent coursework) or permission of instructor.
Note: Course not currently being offered.

WGS 4060 - Research Project

Credits: (2)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Directed research project including literature survey and completion of study in area of student's choosing, guided by faculty mentor(s) from Women's Studies program (and, where appropriate, student's major department.)
Pre-requisite(s): WGS 4050 (or equivalent coursework) and permission of instructor.

WGS 4150 - Research Methodologies

Credits: (3)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Designed to introduce students to a variety of approaches to research in women and gender studies. Students will consider some of the assumptions which underlie research methodologies which may limit our knowledge about women as research subjects and as researchers themselves.
Pre-requisite(s): WGS 3050 (or equivalent coursework) or permission of instructor.

WGS 4170 - Gender, Power, and Global Politics

Credits: (3)
Typically Taught Spring Semester: Full Sem, Full Sem - Online
Description: This course is a comprehensive introduction to the gendered nature of global politics and how power and gender influence the world around us. During the semester, we will examine what cultural, structural, and political factors shape gendered access to power worldwide. We will discuss why women have succeeded in obtaining sustainable political power in some countries and not others. We will determine what factors influence why women and transgendered individuals are excluded from political processes and not represented proportionately in political, influential, or leadership positions. At the conclusion of this course, students will be familiar with multiple approaches to understanding how gender matters in many facets of world politics and how gender can intersect with other social identities such as race, ethnicity, class, and sexual orientation.

WGS 4250 INT - Community-Based Research/Internship

Credits: (3)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: The purpose of this research/internship is to provide students with community experiences related to issues of women and gender. Students in this practicum will apply knowledge skills learned throughout their course of study in either the Women and Gender Studies minor or BIS. For this research/internship students will be required to check in with their course faculty supervisor weekly during the semester.
Pre-requisite(s): WGS 4150.

WGS 4810 - Experimental Course

Credits: (1-6)
Experimental
Description: Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript. May be repeated for a total maximum of 6 credit hours.

WGS 4830 - Directed Readings

Credits: (1-3)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Directed individual readings in the general area of women's studies. Specific topic selected in consultation with instructor; amount of material to be read determined at discretion of instructor, based on level of topic and degree of difficulty of reading and consistent with any existing university and departmental guidelines.
Pre-requisite(s): WGS 1500 (or equivalent coursework) and permission of instructor.
May be repeated 5 times up to 6 credit hours.
WGS 4860 - Internship in Women's Studies

Credits: (1-2)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Opportunity for service learning with campus/community organizations involved with women's issues, applying principles learned in women's studies coursework to bring about beneficial social change.
Pre-requisite(s): completion of WGS 4050 (or equivalent coursework) and permission of the instructor.
This course may be repeated once up to two credits toward the minor.
Note: When taken to fulfill a program requirement, students must register for 2 credit hours.

WGS 4900 - Topics in Women's Studies

Credits: (1-3)
Variable Title
Description: Varied topics as described in the semester schedule. Topics will be drawn from issues related to women's studies.
This course may be taken 3 times up to 9 credits with different course content.

WGS 4990 - Senior Seminar

Credits: (2)
Typically Taught Spring Semester: Full Sem
Description: Capstone course including discussion and synthesis of major issues in women's studies. Students will discuss specific projects (completed or in progress) related to their career goals; these projects may have an academic or service orientation.
Pre-requisite(s): completion of the women's studies core (or equivalent) courses and permission of the instructor.

WSU 1450 CA/HU - Perspectives in Creative Arts and Humanities

Credits: (3-5)
Description: Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript.

WSU 1470 PS/CA - Perspectives in Physical Sciences and Creative Arts

Credits: (3-5)
Description: Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript.

WSU 1480 CA/LS - Perspectives in Creative Arts and Life Sciences

Credits: (3-5)
Description: Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript.

WSU 1560 SS/HU - Perspectives in Social Science and Humanities

Credits: (3-5)
Description: Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript.

WSU 1570 PS/HU - Perspectives in Physical Sciences and Humanities

Credits: (3-5)
Description: Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript.

WSU 1580 HU/LS - Perspectives in Humanities and Life Sciences

Credits: (3-5)
Description: Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript.

WSU 1670 SS/PS - Perspectives in Social Science and Physical Science
WSU 1680 SS/LS - Perspectives in Social Science and Life Science

Credits: (3-5)
Description: Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript.

WSU 2160 EN/SS - Perspectives in Composition and Social Sciences

Credits: (3-5)
Description: Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript.

WSU 1780 PS/LS - Perspectives in Physical Sciences and Life Sciences

Credits: (3-5)
Description: Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript.

WSU 2170 EN/PS - Perspectives in Composition and Physical Sciences

Credits: (3-5)
Description: Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript.

WSU 2120 EN/AI - Perspectives in Composition and American Institutions

Credits: (3-5)
Description: Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript.

WSU 2180 EN/LS - Perspectives in Composition and Life Sciences

Credits: (3-5)
Description: Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript.

WSU 2130 EN/QL - Perspectives in Composition and Quantitative Literacy

Credits: (3-5)
Description: Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript.

WSU 2230 AI/QL - Perspectives in American Institutions and Quantitative Literacy

Credits: (3-5)
Description: Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript.

WSU 2140 EN/CA - Perspectives in Composition and Creative Arts

Credits: (3-5)
Description: Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript.

WSU 2240 AI/CA - Perspectives in American Institutions and Creative Arts

Credits: (3-5)
Description: Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript.

WSU 2150 EN/HU - Perspectives in Composition and Humanities

Credits: (3-5)
Description: Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript.

WSU 2250 AI/HU - Perspectives in American Institutions and Humanities
WSU 2260 AI/SS - Perspectives in American Institutions and Social Science

Credits: (3-5)
Description: Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript.

WSU 2270 AI/PS - Perspectives in American Institutions and Physical Sciences

Credits: (3-5)
Description: Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript.

WSU 2280 AI/LS - Perspectives in American Institutions and Life Sciences

Credits: (3-5)
Description: Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript.

WSU 2340 QL/CA - Perspectives in Quantitative Literacy and Creative Arts

Credits: (3-5)
Description: Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript.

WSU 2350 QL/HU - Perspectives in Quantitative Literacy and Humanities

Credits: (3-5)
Description: Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript.

WSU 2360 QL/LS - Perspectives in Quantitative Literacy and Life Sciences

Credits: (3-5)
Description: Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript.

WSU 2370 QL/PS - Perspectives in Quantitative Literacy and Physical Sciences

Credits: (3-5)
Description: Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript.

WSU 2380 QL/SS - Perspectives in Quantitative Literacy and Social Science

Credits: (3-5)
Description: Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript.

WSU 2420 PS/SS - Perspectives in Social Science and Physical Sciences

Credits: (3-5)
Description: Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript.

ZOOL 1010 LS - Animal Biology

Credits: (3)
Typically Taught Summer Semester: Full Sem Online
Typically Taught Fall Semester: Full Sem, Full Sem Online
Typically Taught Spring Semester: Full Sem, Full Sem Online
Description: A non-major's introduction to cell biology, genetics, evolution, ecology, and animal diversity with emphasis on diversity of animal architecture and life strategies in relation to the diverse environments of Earth. The overriding theme is the process of evolution, its basis, and its implications for all animals, including humans. Three lecture/discussion hours a week.

ZOOL 1020 LS - Human Biology

Credits: (3)
Typically Taught Summer Semester: Full Sem Online
Typically Taught Fall Semester: Full Sem, Full Sem
Online
Typically Taught Spring Semester: Full Sem, Full Sem
Online
Description: Survey course for non-science majors. Course content includes basic structure and function of the human body, homeostasis, heredity, human evolution, and ecology. Implications for personal health, bioethical and environmental issues and the impact of each of these on society will be examined.
Three lecture/discussion hours a week.

ZOOL 1030 LS - The Nature of Sex

Credits: (3)
Typically Taught Summer Semester: Full Sem Online
Typically Taught Fall Semester: Full Sem Online
Typically Taught Spring Semester: Full Sem Online
Description: This course will present an overview of sexual reproduction in animals, including humans. It provides evolutionary, ecological, and behavioral perspectives on sex. Topics cover the value of sex for generating variation among individuals, breeding patterns in nonsocial and social species, mating systems such as monogamy and polygamy, and reproductive behavior. The relevance of this material to human reproduction is addressed.
May be repeated once.

ZOOL 1110 LS - Principles of Zoology

Credits: (4)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Course Fee: $20.00
Course Fee Purpose: Consumable lab supplies; lab equipment maintenance and replacement
Description: A science major's introduction to the study of cell biology, genetics, inheritance, evolution, and ecology. The nature and practice of science is also emphasized and basic skills in data collection, analysis, and presentation are introduced. Three hours of lecture and two hours of lab per week. The year-long major's introductory sequence is completed with ZOOL 2220.
Pre-requisite/Co-requisite: CHEM 1200 or 1210.

ZOOL 1280 - Life in Medicine

Credits: (1)
Description: This one credit course for premedical students is designed to provide insight into many of the aspects associated with a career in medicine. The objectives of this course include 1) provision of basic information regarding admission to medical training programs; 2) exposure to some of the basic tenants necessary for professional success; 3) investigation of some of the benefits and detriments associated with this challenging career; and 4) establishing a forum through which students can question and self-assess the feasibility and desire to pursue a medical career. Presentations, group discussions and introspective analysis of selected topics will be led by a local physicians of various specialties to accomplish these goals.
May be repeated once.

ZOOL 1370 LS - Principles of Life Science

Credits: (3)
Typically Taught Spring Semester: Full Sem
Description: A survey course recommended for elementary education majors. Course content includes cells, cell chemistry, genetics, plant and animal anatomy, plant and animal classification, physiology, immune systems, evolution, and ecology. Unifying concepts of all living things will be emphasized.
Two lecture hours and one 3-hour lab a week.
Cross-listed with BTNY 1370 and MICR 1370.

ZOOL 1810 - Experimental Course

Credits: (1-6)
Experimental
Description: Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript.
May be repeated for a total maximum of 6 credit hours.

ZOOL 1990 - Zoology Orientation

Credits: (1)
Description: This seminar consists of faculty, staff, and professional presentations which will inform students of potential research opportunities in the department and career possibilities in the discipline.
One hour a week.
Suggested Requisite(s): This course should be taken concurrently with ZOOL 1110 or ZOOL 2220.
Note: This course is offered as needed.

ZOOL 2100 - Human Anatomy
ZOOL 2200 LS - Human Physiology

Credits: (4)
Typically Taught Summer Semester: 1st Blk, 2nd Blk, Full Sem Online
Typically Taught Fall Semester: Full Sem, Full Sem Online
Typically Taught Spring Semester: Full Sem, Full Sem Online
Course Fee: $25.00
Course Fee Purpose: Consumable lab supplies; lab equipment maintenance and replacement
Description: Human physiology pertains to the study of the physical, biochemical and mechanical functions of the various human organs and the relationships between these organ systems. Its knowledge is essential in understanding diseases and the development of modern medical therapies. This class is critically important to undergraduate students aspiring to enter professional field in health-science such as medicine, dentistry, nursing, pharmacy, physical and occupational therapies, education, and research. Three hours of lecture and two hours of lab per week.

ZOOL 2220 - Diversity of Animals

Credits: (4)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Course Fee: $20.00
Course Fee Purpose: Consumable lab supplies; lab equipment maintenance and replacement
Description: A major's introduction to the diversity and evolution of vertebrate and invertebrate animals. Three hours of lecture and two hours of lab a week. Completes the year-long major's introductory sequence after ZOOL 1110.
Pre-requisite(s): ZOOL 1110 or permission of instructor.
Pre-requisite/Co-requisite: Completion of or co-registering for CHEM 1210 or equivalent is required.

ZOOL 2800 - History of Life Sciences

Credits: (3)
Description: Examination of the ways in which interaction among personalities, instrumentation, and ideas shape the development of biology - past, present, and future.
Three lecture hours a week.
Note: This course is offered as needed.

ZOOL 2900 - Topics in Zoology

Credits: (1-4)
Variable Title
Description: Variable topics related to zoology as announced in the class schedule; may include medical entomology, biostatistics, primatology, etc., and may be taught with a laboratory section.
Pre-requisite(s): ZOOL 1110 and ZOOL 2220, or approval of instructor.
May be repeated 3 times with a maximum of 4 credit hours.
Note: This course is offered as needed.

ZOOL 2920 - Short Courses, Workshops, Institutes, and Special Programs

Credits: (1-6)
Workshop
Description: Consult class schedule for offerings under this number. The specific title and credit authorized will appear on the student transcript.
Pre-requisite(s): Determined by department.
May be repeated for a total maximum of 6 credit hours.
Note: This course is offered as needed.

ZOOL 3099 - Teaching the Human Anatomy Laboratory

Credits: (3)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Course Fee: $40.00
Course Fee Purpose: Consumable lab supplies; lab equipment maintenance and replacement
Description: The purpose of this course is to introduce students to human dissection and the teaching of human cadaver anatomy. In so doing, we will (1) provide a uniform laboratory experience for Zoology 2100 (Human Anatomy), (2) teach the students what and how to teach the human anatomy laboratories, (3) provide the students with the opportunity to teach their peers thus providing experience at public speaking, and, (4) reinforce the knowledge base of the students (the power of knowing
something by teaching something).

**Pre-requisite(s):** Successful completion of ZOOL 2100 with a grade of B+ or higher; completion of interview process, and instructor approval.

**ZOOL 3100 - Advanced Human Anatomy**

**Credits:** (3)
**Typically Taught Fall Semester:** Full Sem
**Typically Taught Spring Semester:** Full Sem
**Course Fee:** $40.00
**Course Fee Purpose:** Consumable lab supplies; lab equipment maintenance and replacement

**Description:** The purpose of this course is to further expose and train students in human cadaver dissection and the teaching of human cadaver anatomy. In so doing, we will (1) provide a uniform laboratory experience for Zoology 2100 (Human Anatomy), (2) teach these advanced students what and how to mentor their junior colleagues in teaching the human anatomy laboratories, (3) provide these advanced students with the opportunity to teach both the 2100 students and other student instructors, thus further improving their public speaking, (4) place these advanced students in a more senior leadership position among their lab instructor peers, and (5) further reinforce the knowledge base of the students (the power of knowing something by teaching something).

Due to the complex and pedagogical nature, this course can be taken up to 4 times. Each semester, the focus of the lecture portion of this course will vary from: histological anatomy, developmental anatomy, evolution and pathological/clinically-relevant anatomy. In addition, the prosection assignments each repeated semester will increase in complexity, difficulty and leadership demand. The student instructor experience is maximized by their ability to repeat this unique course by allowing them to capitalize on and improve their past efforts in both the teaching environment and prosection assignment.

**Pre-requisite(s):** Successful completion of ZOOL 2100 with a grade of B+ or higher, successful completion of ZOOL 3099, completion of interview process, and instructor approval.

May be repeated up to four times with a maximum of 12 credit hours.

**ZOOL 3200 - Cell Biology**

**Credits:** (4)
**Typically Taught Fall Semester:** Full Sem
**Typically Taught Spring Semester:** Full Sem
**Course Fee:** $25.00
**Course Fee Purpose:** Consumable lab supplies; lab equipment maintenance and replacement

**Description:** Cells form the basis of all life on Earth and an understanding of cells is essential for examining the features of all living things, including evolutionary adaptations. This course explores the fundamentals of cellular structure and function, including bioenergetics, protein function, membrane properties, cell transport, and cell signaling. Research techniques are emphasized throughout. Applications of cell biology, such as stem cell biology, tissue organization and cancer are explored. Three hours of lecture and three hours of lab per week. Three lecture hours and one 3-hour lab a week.

**Pre-requisite(s):** ZOOL 1110 and either the CHEM 1110 and CHEM 1120 series or the CHEM 1210 and CHEM 1220 series, or approval of instructor.

**ZOOL 3300 - Genetics**

**Credits:** (4)
**Typically Taught Fall Semester:** Full Sem
**Typically Taught Spring Semester:** Full Sem
**Course Fee:** $25.00
**Course Fee Purpose:** Consumable lab supplies; lab equipment maintenance and replacement

**Description:** Genetics is the foundation for all of biology, from anatomy, physiology, and cell biology, to ecology, behavior and evolution. This course is a comprehensive exploration of genetics, from molecular genetics to organismal genetics to population genetics. Specific topics include DNA and chromosome structure, regulation of gene expression, mutation, Mendelian genetics, and population genetics. The focus is on applications and current research, including biotechnology, forensics, medicine, genetic counseling, wildlife management, and evolution. Three hours of lecture and three hours of lab per week.

**Pre-requisite(s):** ZOOL 1110 and MATH 1050 (or equivalent), or approval of instructor.

**ZOOL 3340 - Information Resources in the Life Sciences**

**Credits:** (2)

**Description:** A practical introduction to the literature and information resources of the life sciences. Students will expand their research skills and be able to develop effective research strategies to find and synthesize information available in academic libraries.

Two lecture hours a week.

**Pre-requisite(s):** ENGL 2010.

Cross listed in Botany, Library Sciences and Microbiology.

Note: This course is offered as needed.
ZOOL 3450 - Ecology

Credits: (4)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Course Fee: $25.00
Course Fee Purpose: Consumable lab supplies; lab equipment maintenance and replacement; motor pool
Description: Study of how environmental factors, both nonliving and living, affect the distribution and abundance of organisms at the individual, population, community, and ecosystem levels. Three hours of lecture and three hours of lab (or field trip) a week.
Pre-requisite(s): ZOOL 1110 and ZOOL 2220, or approval of instructor.
Note: Writing intensive course.

ZOOL 3470 - Zoogeography

Credits: (3)
Typically Taught Spring Semester: Full Sem, alternating years
Description: Study of factors determining the distributions of animals with emphases on ecological and evolutionary processes occurring across landscapes and around the globe. Three hours of lecture per week.
Pre-requisite(s): ZOOL 1110 and ZOOL 2220, or approval of instructor.

ZOOL 3500 - Conservation Biology

Credits: (3)
Typically Taught Fall Semester: Full Sem, alternating years
Description: The study of how biological principles and concepts are used in conservation. Major emphasis on the preservation and management of biodiversity. Connections between biological and societal issues are explored. Three hours of lecture per week.
Pre-requisite(s): ZOOL 1110 and ZOOL 2220, or approval of instructor.

ZOOL 3570 - Foundations of Science Education

Credits: (3)
Typically Taught Spring Semester: Full Sem
Description: A thorough investigation of research in science learning and curricular standards at the state and national levels. Foundations of the philosophy of science and scientific inquiry as applicable to science teaching at the secondary level. This course serves as a foundation to a preservice science teacher's education coursework. Cross-listed with BTNY, CHEM, GEO, MICR, & PHYS 3570.

ZOOL 3600 - Comparative Physiology

Credits: (4)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Course Fee: $25.00
Course Fee Purpose: Consumable lab supplies; lab equipment maintenance and replacement
Description: A comparative and evolutionary approach to the study of how animals function in a variety of environments from cellular to whole-body level. Three hours of lecture and three hours of lab per week.
Pre-requisite(s): ZOOL 1110 and ZOOL 2220, or approval of instructor.

ZOOL 3720 - Evolution

Credits: (3)
Typically Taught Summer Semester: Full Sem Online
Typically Taught Fall Semester: Full Sem, Full Sem Online
Typically Taught Spring Semester: Full Sem, Full Sem Online
Description: The patterns and processes involved in changes in natural populations. How organisms evolve at the genetic, organismal, and population levels. Topics include adaptation, taxonomy, sex, speciation & species, coevolution, and extinction. Three lecture hours a week.
Pre-requisite(s): ZOOL 1110 and ZOOL 2220, or approval of instructor.

ZOOL 3730 - Population Biology

Credits: (3)
Typically Taught Fall Semester: Full Sem
Description: Population biology is an interdisciplinary field combining the areas of ecology, genetics, and evolution. Topics include population growth and regulation, interspecific interactions, population genetics, quantitative genetics, phenotypic plasticity, and evolution of life histories. Emphasis is on current research applications in wildlife management including the structure and dynamics of wildlife populations, competition, predation, and dispersal. Three lecture hours a week.
Pre-requisite(s): ZOOL 1110, ZOOL 2220, and ZOOL 3300, or approval of instructor.
Note: This course is not currently offered.
ZOOL 3810 - Experimental Course

Credits: (1-6)
Experimental
Description: Consult the semester class schedule for the current offering under this number. The specific title and credit authorized will appear on the student transcript. May be repeated for a total maximum of 6 credit hours.

ZOOL 3820 - Biology of Cancer

Credits: (3)
Description: This upper-level elective course is designed to investigate the biological foundations and ramifications of cancer by exploring the molecular mechanisms underlying the development and progression of this disease. Outside reading material will be used to provide a platform for discussion of common misconceptions and attitudes regarding cancer, with the goal of conveying a broad understanding of the disease from molecular, clinical, historical and personal perspectives. Three lecture hours a week.
Pre-requisite(s): ZOOL 1110 or approval of instructor.

ZOOL 4050 - Comparative Vertebrate Anatomy

Credits: (4)
Typically Taught Spring Semester: Full Sem, alternating years
Course Fee: $50.00
Course Fee Purpose: Consumable lab supplies; lab equipment maintenance and replacement
Description: In-depth, comparative study of vertebrate functional anatomy. Students learn to dissect and understand the anatomical and evolutionary relationships between fishes, amphibians, reptiles, birds, and mammals. Three hours of lecture and three hours of lab per week.
Pre-requisite(s): ZOOL 1110 and ZOOL 2220, or approval of instructor.

ZOOL 4100 - Vertebrate Embryology

Credits: (4)
Typically Taught Spring Semester: Full Sem, alternating years
Description: A study of the principles and processes of embryological development in animals, emphasizing mechanisms of development, evolution, and pathology. Three hours of lecture and three hours of lab per week.
Pre-requisite(s): ZOOL 1110 and ZOOL 2220, or approval of instructor.

Suggested Requisite(s): A prior anatomy class is strongly recommended.

ZOOL 4120 - Histology

Credits: (4)
Typically Taught Fall Semester: Full Sem, alternating years
Course Fee Purpose: Consumable lab supplies; lab equipment maintenance and replacement
Description: Microscopic study of the structure and function of vertebrate tissues and organs, with an emphasis on human organ systems. Three hours of lecture and three hours of lab per week.
Pre-requisite(s): ZOOL 1110, ZOOL 2220, either ZOOL 2100 or ZOOL 4050, or approval of instructor.

ZOOL 4210 - Advanced Human Physiology

Credits: (4)
Typically Taught Spring Semester: Full Sem, alternating years
Course Fee: $30.00
Course Fee Purpose: Consumable lab supplies; lab equipment maintenance and replacement
Description: A study of vertebrate physiological processes with human emphasis, focusing on cardiovascular, digestive, and neuromuscular systems. Three lecture hours and one 3-hour lab a week.
Pre-requisite(s): ZOOL 1110, ZOOL 2220, and ZOOL 2200, or approval of instructor; a minimum of one year of (preferably Organic) Chemistry.

ZOOL 4220 - Endocrinology

Credits: (4)
Typically Taught Fall Semester: Full Sem, alternating years
Course Fee: $30.00
Course Fee Purpose: Consumable lab supplies; lab equipment maintenance and replacement
Description: The comparative study of the function of the cells, tissues, glands, and organs that secrete hormones and how these hormones affect the physiology of organisms, from invertebrates to vertebrates. Three lecture hours and one 3-hour lab a week.
Pre-requisite(s): ZOOL 1110 and ZOOL 2220, and either ZOOL 2200 or ZOOL 3600, or approval of instructor.

ZOOL 4250 - Radiation Biology

Credits: (4)
Description: The study of harmful effects of radiation and
practical applications of radioactive tracer techniques to biological problems.
Three lecture hours and one 3-hour lab a week.

**Pre-requisite(s):** ZOOL 1110, ZOOL 2220, and beginning courses in chemistry and physics, or approval of instructor.
Note: This course is not currently offered.

**ZOOL 4300 - Research Applications in Genetics**

Credits: (4)
Typically Taught Spring Semester: *Full Sem*
Course Fee: $40.00
Course Fee Purpose: Consumable lab supplies; lab equipment maintenance and replacement
Description: The techniques of genetics are essential to all areas of biological research, from human biology and medicine, to ecology, population structure and diversification. This course examines the applications of genetics to a variety of topics, including medicine, forensics, wildlife management and ecology. Laboratory exercises provide hands-on experience with generating, analyzing and interpreting genetic data. Three lecture/lab hours and one 3-hour lab per week.
Pre-requisite(s): ZOOL 1110, ZOOL 2220, and ZOOL 3300, or permission of instructor.

**ZOOL 4350 - Animal Behavior**

Credits: (4)
Typically Taught Fall Semester: *Full Sem, alternating years*
Course Fee: $25.00
Course Fee Purpose: Consumable lab supplies; lab equipment maintenance and replacement; motor pool
Description: All animals are motivated to acquire food, avoid predators and parasites, find and secure mates, select habitat, communicate with other animals, and move through their environment. This course is centered on the concepts that underlie such behaviors in nature, with a strong emphasis on both the ecological context and the evolutionary history that has produced them. The primary focus of the lab is on the development and completion of an original, semester-long research project. Three hours of lecture and three hours of lab per week.
Pre-requisite(s): ZOOL 1110 and ZOOL 2220, or approval of instructor.

**ZOOL 4470 - Wildlife Ecology and Management**

Credits: (4)
Typically Taught Fall Semester: *Full Sem, alternating years*
Description: Principles of wildlife ecology and the techniques of wildlife population analysis and manipulation.
Three lecture hours and one 3-hour lab a week.
Pre-requisite(s): ZOOL 1110, ZOOL 2220, and ZOOL 3450, or approval of instructor.

**ZOOL 4480 - Aquatic Ecology**

Credits: (4)
Typically Taught Fall Semester: *Full Sem, alternating years*
Course Fee: $50.00
Course Fee Purpose: Consumable lab supplies; lab equipment maintenance and replacement
Description: Study of the physical, chemical, and biological interactions of freshwater ecosystems with emphasis on streams. Field trips required. Three hours of lecture and three hours of lab per week.
Pre-requisite(s): ZOOL 1110 and ZOOL 2220, or approval of instructor.
Writing intensive course.

**ZOOL 4490 - Marine Ecology**

Credits: (4)
Typically Taught Spring Semester: *Full Sem*
Description: This course will examine the physical, chemical, and biological interactions within and among marine ecosystems. Topics covered will include: physical and biological oceanography, ecological processes driving the distribution and abundance of marine organisms, and exploration of major marine communities. Emphasis will be placed on reading primary scientific literature and discussion of human impacts such as pollution, overfishing, and climate change on all aspects of marine ecosystems. This course is a mixed lecture-lab design with six hours of lecture/lab per week.
Pre-requisite(s): ZOOL 1110 and ZOOL 2220 or approval of instructor. ZOOL 3450 recommended.

**ZOOL 4500 - Parasitology**

Credits: (4)
Course Fee: $25.00
Course Fee Purpose: Motor pool
Description: Survey of representative external and internal parasites of humans, domestic animals, and wildlife.
Emphasis is on their ecology and epidemiology. Three lecture hours and one 3-hour lab a week.

**Pre-requisite(s):** ZOOL 1110 and ZOOL 2220, or approval of instructor.

*Note:* This course is not currently offered.

**ZOOL 4570 - Secondary School Science Teaching Methods**

**Credits:** (3)

**Typically Taught Fall Semester:** *Full Sem*

**Description:** Acquaintance and practice with various teaching and assessment methods. Development of science curricula including lesson and unit plans. It is recommended that this course be completed immediately before student teaching.

**Pre-requisite(s):** Admission to the Teacher Education Program.

Cross-listed with BTNY, CHEM, GEO, MICR, & PHYS 4570.

**ZOOL 4600 - Protozoology**

**Credits:** (4)

**Typically Taught Summer Semester:** *Full Sem*

**Course Fee:** $25.00

**Course Fee Purpose:** Consumable lab supplies; lab equipment maintenance and replacement

**Description:** Structure, function and evolutionary relationships of unicellular organisms. Three lecture hours and one 3-hour lab a week.

**Pre-requisite(s):** ZOOL 1110 and ZOOL 2220, or approval of instructor.

*Note:* This course is not currently offered.

**ZOOL 4640 - Entomology**

**Credits:** (4)

**Typically Taught Summer Semester:** *Full Sem*

**Course Fee:** $25.00

**Course Fee Purpose:** Consumable lab supplies; lab equipment maintenance and replacement; motor pool

**Description:** Insects are the dominant animal group in terrestrial ecosystems and account for over half of all described species of organisms. This course provides an overview of insect anatomy, physiology, ecology and evolution. It also emphasizes the taxonomy of insects at the order and family levels and examines their role in natural systems, as well as their harmful and beneficial effects on agriculture and human health. The field-oriented lab focuses on the collection and curation of local insect specimens. Three hours of lecture and three hours of lab per week.

**Pre-requisite(s):** ZOOL 1110 and ZOOL 2220, or approval of instructor.

**ZOOL 4650 - Ichthyology**

**Credits:** (4)

**Typically Taught Spring Semester:** *Full Sem, alternating years*

**Course Fee:** $50.00

**Course Fee Purpose:** Consumable lab supplies; lab equipment maintenance and replacement

**Description:** Classification, ecology and biology of fishes and emphasis on local freshwater forms. Field trips required.

Three lecture hours and one 3-hour lab a week.

**Pre-requisite(s):** ZOOL 1110 and ZOOL 2220, or approval of instructor.

**ZOOL 4660 - Herpetology**

**Credits:** (4)

**Typically Taught Fall Semester:** *Full Sem, alternating years*

**Description:** Structure, function and evolutionary relationships of amphibians and reptiles.

Three lecture hours and one 3-hour lab a week.

**Pre-requisite(s):** ZOOL 1110 and ZOOL 2220, or approval of instructor.

**ZOOL 4670 - Ornithology**

**Credits:** (4)

**Typically Taught Spring Semester:** *Full Sem, alternating years*

**Description:** The biology of birds including form, function, behavior and ecology. Lab emphasizes identification of Utah species.

Three lecture hours and one 3-hour lab or a field trip each week.

**Pre-requisite(s):** ZOOL 1110 and ZOOL 2220, or approval of instructor.

**ZOOL 4680 - Mammalogy**

**Credits:** (4)

**Typically Taught Spring Semester:** *Full Sem, alternating years*

**Description:** An overview of mammalian anatomy, behavior, conservation, ecology, evolution, physiology, and taxonomy. Three hours of lecture and three hours of lab per week.

**Pre-requisite(s):** ZOOL 1110 and ZOOL 2220, or approval of instructor.

**ZOOL 4700 - Topics in Zoology**
**ZOOL 4800 - Problems in Zoology**

**Credits:** (1-4)

**Typically Taught:**
- **Fall Semester: Full Sem**
- **Spring Semester: Full Sem**

**Description:** Directed individual research in zoology guided by faculty member. Specific requirements determined in consultation with faculty member.

**Pre-requisite(s):** ZOOL 1110 and ZOOL 2220, and approval of instructor.

May be repeated up to 8 credit hours for university credit.

**ZOOL 4820 - Human Physiology Laboratory Teaching Assistant**

**Credits:** (1)

**Typically Taught:**
- **Summer Semester: 1st Blk, 2nd Blk**
- **Fall Semester: Full Sem**
- **Spring Semester: Full Sem**

**Description:** Students selected to be Laboratory Teaching Assistants (Lab TA) will help in the Human Physiology laboratories. Under the teacher's supervision, they (two teaching assistants per class) will address classes of up to 30 students. They will help set up the instruments, present background information, run the experiments and assess the student's learning by giving and grading short quizzes.

**Pre-requisite(s):** Students will need to have taken the Human Physiology class (ZOOL 2200) and laboratory, and obtained a minimum of a B+ in the class. Students will need to apply for one of the positions. Approval to be a Laboratory Teaching Assistant will be at the teacher's discretion.

May be repeated twice for a maximum of two credit hours.

**ZOOL 4830 - Readings in Zoology**

**Credits:** (1-4)

**Typically Taught:**
- **Summer Semester: Full Sem**
- **Fall Semester: Full Sem**
- **Spring Semester: Full Sem**

**Description:** Directed individual readings in the general area of zoology. Specific topic selected in consultation with faculty member.

**Pre-requisite(s):** ZOOL 1110 and ZOOL 2220, and approval of instructor.

May be repeated up to 8 credit hours for university credit.

**ZOOL 4890 INT - Cooperative Work Experience**

**Credits:** (1-4)

**Typically Taught:**
- **Summer Semester: Full Sem**
- **Fall Semester: Full Sem**
- **Spring Semester: Full Sem**

**Description:** Provides academic credit for on-the-job experience, guided by specific written contract designed by student, employer, and Zoology Department Chair. Credit hours determined by the department.

**Pre-requisite(s):** ZOOL 1110, ZOOL 2220, two upper-division Zoology courses, and instructor approval.

May be repeated up to 12 credit hours for university credit.

**ZOOL 4900 - Topics in Zoology**

**Credits:** (1-4)

**Variable Title**

**Description:** New and experimental courses, taught infrequently; may be taught with a laboratory section. Check current semester schedule. Specific title and credit hours will appear on the student transcript.

**Pre-requisite(s):** ZOOL 1110 and ZOOL 2220, or approval of instructor.

May be repeated up to 12 credit hours for university credit.

**ZOOL 4920 - Short Courses, Workshops, Institutes, and Special Programs**

**Credits:** (1-6)

**Workshop**

**Description:** Consult class schedule for offerings under this number. The specific title and credit authorized will appear on the student transcript.

**Pre-requisite(s):** vary and are determined by instructor.

May be repeated for a total maximum of 6 credit hours. Note: This course is not currently offered.

**ZOOL 4950 - Field Zoology**

**Credits:** (1-3)

**Course Fee:** $30.00
Course Fee Purpose: Consumable lab supplies; lab equipment maintenance and replacement; motor pool
Description: Study conducted on an extended, supervised field trip.
Pre-requisite(s): ZOOL 1110 and ZOOL 2220, or approval of instructor.
May be repeated for a maximum of 3 credit hours.
Note: Check with Department for course availability.

ZOOL 4970 - Thesis

Credits: (2)
Typically Taught Summer Semester: Full Sem
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: An extended, individual research project planned and completed under faculty supervision. Normally, two semesters of research (ZOOL 4800) will precede registration for this course. Culmination is an oral and written report of results obtained, with the final draft of the latter being due two weeks prior to the beginning of final exam week. Instructor approval required.
Pre-requisite(s): thesis committee approved research proposal, advanced class standing, and ZOOL 1110 and ZOOL 2220.

ZOOL 4980 - Research Design

Credits: (2)
Description: A basic course in the design and analysis of scientific experiments.
Two lecture hours a week.

Pre-requisite(s): minimum of two upper division Zoology courses.
Note: This course is not currently offered.

ZOOL 4990 - Seminar

Credits: (1)
Typically Taught Fall Semester: Full Sem
Typically Taught Spring Semester: Full Sem
Description: Presentations and discussion concerning a specific topic in zoology. One semester required. May be repeated to fulfill one additional credit of Zoology elective hours if taken beyond the one credit hour required for the major.
One hour a week.
Pre-requisite(s): ZOOL 1110 and ZOOL 2220, or approval of instructor.
May be repeated up to 3 credit hours for university credit.

ZOOL 5030G - Zoology for Teachers

Credits: (1-4)
Description: Science content course for teachers in the MEd Science Emphasis Program. To register, select another Zoology course and develop a contract detailing additional work required for graduating credit. Contract must be approved by instructor, Department Chair, and Director of the Master of Education Program.
Course may be repeated 3 times up to 4 credits.
Note: This course is not currently offered.
